Supp. To CHAPTER 67 THE PROPERTY LAW ASPECTS OF PRIVATE NUISANCE

8-67 Thompson on Real Property, Thomas Editions Supp. to § 67.02

Supp. to § 67.02 Private Nuisance Distinguished from Other Acts Against Property.

[Go To Main]

§ 67.02(a) Distinctions Between Private Nuisance and Public Nuisance. [Go To Main]

Add:

Wallace v. Lewis County, 137 P.3d 101 (Wash. App. 2006) (a private nuisance is an "unreasonable interference with another's use and enjoyment of property"); *Holder v. Gold Fields Mining Corp., 2007 U.S. Dist. LEXIS 7591 (D. Okla. 2007)* (defining common law nuisance as "the unwarrantable, unreasonable, or unlawful use by a person of his own property to the injury of another."); *Asche v. Bloomquist, 133 P.3d 475 (Wash. App. 2006)* (an actionable nuisance consists of an act or omission that injures another's property or unreasonably interferes with another's enjoyment of their property); *Pac. Sound Res. v. Burlington N. & Santa Fe Ry., 2006 U.S. Dist. LEXIS 37616 (D. Wash. 2006)* (denying recovery under nuisance claim in pollution-related nuisance case because the plaintiff lacked a substantial interest in the polluted property); *Iny v. Collom, 827 N.Y.S.2d 416 (2006)* (differentiating between a private and public nuisance, holding that private nuisances interfer with the enjoyment and use of property that affects one person or relatively few people); *Kinsale, LLC v. Tombari, 897 A.2d 646 (Conn. App. 2006)* (noting the similarity in the measure of damages in nuisance and trespassing cases); *Matter of Groat v. Brennan, 831 N.Y.S.2d 353 (2006)* (the right to quiet enjoyment of real property may give rise to a cause of action to enjoin a private nuisance); *Woodward v. Bd. of Dirs. of Tamarron Ass'n of Condo. Owners, 155 P.3d 621 (Colo. App. 2007)* (whether an alleged nuisance unreasonably interferes with a landowner's use and enjoyment of his property is the essential question in a nuisance claim); *City of Moses Lake v. United States, 430 F. Supp. 2d 1164 (D. Wash. 2006)* (to recover for nuisance, a claimant must demonstrate a "substantial interference with the use and enjoyment of his land."); *Walker Manor Envtl. Trust v. Oyster Landing Condo. Ass'n, 2006 Conn. Super. LEXIS 3876 (Conn. Super. Ct. 2006)* (whereas a public nuisance interferes with a public right to health and safety, a private nuisance interferes with a private property right); *Biglane v. Under the Hill Corp., 949 So. 2d 9 (Miss. 2007)* ("A private nuisance is a nontrespassory invasion of another' s interest in the use and enjoyment of his property."); *Iny v. Collom, 827 N.Y.S.2d 416 (2006)* ("To establish a cause of action for private nuisance, the plaintiff must show that the defendant's conduct causes substantial interference with the use and enjoyment of plaintiff's land and that defendant's conduct is (1) intentional and unreasonable, (2) negligent or reckless,

or (3) actionable under the laws governing liability for abnormally dangerous conditions or activities."); *Davis v. Taylor 132 P.3d 783 (Wash. App. 2006)* (defining a nuisance as an "obstruction to the free use of property, so as to essentially interfere with the comfortable enjoyment of [the property]."); *Rattigan v. Wile, 841 N.E.2d 680 (Mass. 2006)* ("[A]ctivities on one's property that create or maintain unreasonable aesthetic conditions for neighbors are actionable as a private nuisance.").

Add:

Wallace v. Lewis County, 137 P.3d 101 (Wash. App. 2006) (a public nuisance is a nuisance "that affects equally the rights of an entire community or neighborhood"); *State v. Lead Indus. Ass'n, 2007 R.I. Super. LEXIS 32 (R.I. Super. Ct. 2007)* (requiring a plaintiff to show unreasonable interference with a public right to recover for public nuisance. Four elements must be proven in a public nuisance cause of action: the alleged nuisance must (1) have "a natural tendency to create danger and inflict injury;" (2) be a continuing danger; (3) constitute unreasonable or unlawful use of land; and (4) be "the proximate cause" of the injury. Proving that the alleged nuisance created a continuing danger is irrelevant in an action for private nuisance, however, as requiring otherwise would be "imprudent," because "private nuisance claims simply do not fit comfortably within the same analytical rubric as public nuisance claims)". *In re Methyl Tertiary Butyl Ether ("MTBE") Products Liability Litigation 457 F. Supp. 2d 298 (S.D.N.Y. 2006)* ("[A] public nuisance need not affect the entire community so long as the nuisance interferes with those who come in contact with it in the exercise of a public right or it otherwise affects the interests of the community at large."); *Evergreen Intern., S.A. v. Marinex Const. Co., Inc., 477 F. Supp. 2d 681* (D.S.C., 2007) (ship owner recovered damages under a claim of public nuisance against a construction company after his ship collided with a submerged dredge pipeline, which created an obstruction to navigation).

Add:

Overcash v. South Carolina Elec. and Gas Co., 614 S.E.2d 619 (S.C. 2005) (purely personal injuries do not establish the special damages necessary for allowing private action on public nuisances; injury must be to real or personal property); *Mercury Skyline Yacht Charters v. Dave Matthews Band, Inc., 2005 U.S. Dist. LEXIS 29663 (D. Ill. 2005)* (Plaintiff showed special injury when his charter boat and passengers were soaked in human waste from a charter bus's refuse tank, as the bus crossed a bridge over a river)

Add:

Holt v. Hegwood, 708 N.W.2d 21 (Wis. App. 2005.) (private nuisance claim for falling tree branches was properly dismissed because statute did not authorize private claim for that public nuisance).

Delete:

In Re. Bloomingdale Partners, 160 B.R. 101 (N.D. Ill. 1993) (holding that, under Illinois law, invasion of another's land need not be physical for purposes of establishing a private nuisance)

Add:

City of Moses Lake v. United States, 430 F. Supp. 2d 1164 (D. Wash. 2006) (holding that trespass applies when an intrusion interferes with the right to exclusive possession of property, whereas, nuisance applies when an intrusion is to the interest in use and enjoyment of property); *Cedar Cove Homeowners Ass'n v. DiPietro, 628 S.E.2d 284 (S.C. App. 2006)* (distinguishing trespass from nuisance as an "intentional invasion" of property, and defining nuisance as a "substantial and unreasonable interference" with the use and enjoyment of property); *Johnson v. Knox County Partnership, 728 N.W.2d 101 (Neb. 2007)* (defining a private nuisance as "a nontrespassory invasion of another's interest in the private use and enjoyment of land."). But *see Kinsale, LLC v. Tombari, 897 A.2d 646 (Conn. App. Ct. 2006)* (damages for nuisance are similar to those for trespass).

Schiller v. Mitchell, 357 Ill.App.3d 435 (2d Dist. 2005) (showing of physical invasion by something perceptible to the senses is necessary for a private nuisance cause of action in Illinois (citing *In re Flood Litigation, 680 N.E.2d 265 (Ill. 1997))* .

Add:

Malin v. Conn. Zoological Soc'y, Inc., 2007 Conn. Super. LEXIS 832 (Conn. Super. Ct. 2007) (confirming four factors in *Petsey*).

Add:

Laster v. Norfolk S. Ry., 2007 Ala. LEXIS 3 (Ala. 2007) (defining an attractive nuisance as "a condition which is naturally attractive to children ... and is likely to be dangerous to such a person in the ordinary course of events, all of which is known to the defendant and not to the injured person and not obviously dangerous in itself").

Supp. To CHAPTER 67 THE PROPERTY LAW ASPECTS OF PRIVATE NUISANCE

8-67 Thompson on Real Property, Thomas Editions Supp. to § 67.03

Supp. to § 67.03 Principles of Private Nuisance Law.

[Go To Main]

Add:

Rittenhouse Row v. Aspite, 917 A.2d 880 (Pa.Cmwlth. 2006) (an inquiry into substantive due process must preserve the rights of property owners, "within constraints of the ancient maxim of our common law, *sic utere tuo ut alienum non laedas*").

Change:

S. Camden Citizens in *Action v. N.J. Dep't of Envtl. Prot., 254 F. Supp. 2d 486 (D. N.J. 2003)* .

Add:

Dumm v. Dahl, 913 A.2d 863, 867 (Pa. Super. Ct. 2006) (liability for a private nuisance arises only if an "invasion of another's interest in the private use and enjoyment of land ... is either (a) intentional and unreasonable, or (b) unintentional and otherwise actionable under the rules controlling liability for negligent or reckless conduct, or for abnormally dangerous conditions or activities).

§ 67.03(a) Private Nuisances as a matter of Law. [Go To Main]

§ 67.03(a)(1) Private Nuisances Forbidden by Law.

Add:

Gamble v. PinnOak Resources, LLC, 511 F. Supp. 2d 1111 (N.D. Ala. 2007) (private nuisance class action against coal preparation plant, alleging defendants violated federal and safety regulations).

Add:

Matter of Groat v. Brennan, 831 N.Y.S.2d 353 (2006) (since having a court determine a private nuisance suit is not a property right, due process does not require a hearing of such).

Add:

Harper **reversed in part** by *Harper v. Summit County, 26 P.3d 193 (Utah 2001)* ; *Harper, 963 P.2d 768* , also **overruled** by *Culbertson v. Bd. of County Comm'rs, 44 P.3d 642, 657 (Utah 2001)* ("[A] zoning violation is tantamount to irreparable injury in cases in which a county is seeking the injunction. This follows from the fact that a county is responsible for prosecuting a zoning violation. Harper erroneously extended this holding to cases in which a private individual seeks relief.").

§ 67.03(a)(3) Private Nuisances Motivated by Malice.

Add:

See also: Rattigan v. Wile, 841 N.E.2d 680 (Mass. 2006) (the intentional invasion of neighbor's land with a "composite of unpleasant odors, sounds, and visual conditions--constituted a nuisance").

Change:

Dowdell v. Bloomquist, 847 A.2d 827 (R.I. 2004) .

Add:

Austin v. Bald II, L.L.C., 658 S.E.2d 1 (N.C. App. 2008) (10-foot fence on the property line was a private nuisance).

Change:

Dowdell v. Bloomquist, 847 A.2d 827 (R.I. 2004) .

Add:

Austin v. Bald II, L.L.C., 658 S.E.2d 1 (N.C. App. 2008) (a 10-foot wooden fence on the property line was ordered removed or lowered to no more than six feet).

§ 67.03(b)(1) Unreasonableness of Defendant's Conduct in the Use of Land

Subsequent History:

Jupin v. Kask, 2004 Mass. Super. LEXIS 161 (2004) **reversed in part** by *Jupin v. Kask, 447 Mass. 141 (Mass. 2006)* .

Rose, 173 A. 627 , **overruled** by *Splendorio v. Bilray Demolition Co., 682 A.2d 461 (R.I. 1996)* .

City of Lawrenceville, 439 S.E.2d 95 (Ga. App. 1993) overruled in part (on other grounds) by *Clive v. Gregory, 635 S.E.2d 188 (Ga. App. 2006)* .

Add:

Schwan v. CNH Am. LLC, 2006 U.S. Dist. LEXIS 28516 (D. Neb. 2006) (imposing liability for private nuisance only when the defendant's interference is intentional and unreasonable, or abnormally dangerous) ("unreasonable and substantial interference tests ... necessarily include a consideration whether the questioned activity is reasonable under all the surrounding circumstances."); *Woodward v. Bd. of Dirs. of Tamarron Ass'n of Condo. Owners, 155 P.3d 621 (Colo. App. 2007)* (unreasonableness is an issue of fact); *Cook v. Rockwell Int'l Corp., 2006 U.S. Dist. LEXIS 89515 (D. Colo. 2006)* ("[A]n interference must be unreasonable to constitute a nuisance."); *Larson v. Tyson Fresh Meats, Inc., 2006 U.S. Dist. LEXIS 90487 (D. Neb. 2006)* (requiring an interference with property to be both intentional and unreasonable in order to constitute a nuisance); *In re Weinhold, 347 B.R. 887 (Bkrtcy. E.D.Wis. 2006)* (a raised concrete driveway, which caused an accumulation of snow, funneled water, leaves, weeds, and debris on neighboring property, and which created a "navigation hazard," did not constitute a private nuisance, but was merely an annoyance. Thus, it

"did not rise to level of 'substantial or unreasonable interference.' "); *Leitstein v. Hirt, 2006 Del. Ch. LEXIS 184 (Del. Ch. 2006)* (defining a private nuisance as "a civil wrong arising from an unreasonable, unwarranted or unlawful use of one's property producing material annoyance, inconvenience, discomfort or hurt to another in the use of his property.").

Add:

Concerned Area Residents for the Env't, 834 F. Supp. 1410 **reversed** in *Concerned Area Residents for the Env't v. Southview Farm, 34 F.3d 114 (2d Cir. 1994)* .

Change:

Kopecky, 510 N.W.2d 410 **should be** *Kopecky v. Nat'l Farms, 510 N.W.2d 41 (Neb. 1994)* .

Add:

Gallagher v. H.V. Pierhomes, LLC, 957 A.2d 628 (Md. App. 2008) (pile driving activity did not constitute a private nuisance).

Add:

Crowley Museum and Nature Center, Inc. v. Southwest Florida Water Management District, 993 So. 2d 605 (Fla. App. 2008) (private nuisance arising from flooding caused by irrigation).

§ 67.03(b)(2) Substantiality of Harm to the Plaintiff's Use and Enjoyment of Land.

Delete:

Delete duplicate "*See* Smith v. Muellner ..." explanatory citation.

Subsequent History:

In re Tutu Wells Contamination Lit, 909 F. Supp. 991 **reversed in part** by *In re Tutu Wells Contamination Litig., 120 F.3d 368 (3d Cir. 1997) , cert denied, Gal v. Plaskett, 540 U.S. 984 (U.S. 2003) .*

Add:

State v. Lead Indus. Ass'n, 2007 R.I. Super. LEXIS 32 (R.I. Super. Ct. 2007) (establishing that intent is not an element of nuisance, but rather that liability depends upon the substantiality of the defendant's conduct, and if that conduct is the proximate cause of the nuisance); *Johnson v. Knox County Partnership, 728 N.W.2d 101 (Neb. 2007)* (justifying the abatement of a nuisance if it causes "actual physical discomfort to one of ordinary sensibilities;" presumes that a plaintiff has "ordinary sensibilities.").

Add:

Saint John's Church in *Wilderness v. Scott, 194 P.3d 475 (Colo. App. 2008)* (private nuisance caused by protestors who interfered with church services; protestors' obstruction of access to the church during church services would cause irreparable harm).

Woodward v. Bd. of Dirs. of Tamarron Ass'n of Condo. Owners, 155 P.3d 621 (Colo. App. 2007) (an interference must be substantial, "as measured by a standard that it would be of definite offensiveness, inconvenience, or annoyance to a normal person in the community.")

Add:

Gellman v. Seawane Golf & Country Club, Inc., 24 A.D.3d. 415 (N.Y. App. Div. 2d Dept. 2005) (golf course driving range that allows balls to continuously escape and make adjacent landowner's use of own property uncomfortable and inconvenient constitutes a private nuisance)

Add:

A permanent nuisance inflicts permanent damage upon property, which warrants a damages award equal to the property's depreciation in value. *Kinsale, LLC v. Tombari, 897 A.2d 646 (Conn. App. Ct. 2006)*

Add:

Temporary interference with the use and enjoyment of property constitutes a temporary nuisance, which warrants a damages award equal to the property's reduction in its rental value. *Kinsale, LLC v. Tombari, 897 A.2d 646 (Conn. App. 2006)* .

Add:

Ruscito v. Swaine, Inc., 17 A.D.3d 560 (N.Y. App. Div. 2d Dept.) (no valid nuisance claim for mere presence on adjoining property of unsightly dumpsters, an abandoned icebox, car parts, or a fence that did not block plaintiff's right to light or air).

Add:

Anderson v. Elliott, 24 A.D.3d 400 (N.Y. App. Div. 2d Dept. 2005) (alleged disturbance that was caused by the defendants' television filming on several occasions did not, as a matter of law, rise to the level of substantial interference with the plaintiffs' use and enjoyment of their properties so as to constitute a private nuisance).

Add:

Woodward v. Bd. of Dirs. of Tamarron Ass'n of Condo. Owners, 155 P.3d 621 (Colo. App. 2007) (advising courts "to look at the character of the neighborhood, the magnitude, frequency, or duration of the defendant's activity exceeding neighborhood norms, and utility of the activity" to determine if an interference is substantial and unreasonable).

Elliott v. Muehlbach, 620 S.E.2d 266 (N.C. App. 2005) (ATV racetrack may be a nuisance per accidens; remanded for reasonableness determination based on an objective perspective of reasonableness and not upon the perspective of a reasonable person in plaintiff's or defendant's position).

Add:

Johnson v. Knox County Partnership, 728 N.W.2d 101 (Neb. 2007) (justifying the abatement of a nuisance if it causes "actual physical discomfort to one of ordinary sensibilities;" presumes that a plaintiff has "ordinary sensibilities. ").

Add:

But see Johnson v. Knox County Partnership, 728 N.W.2d 101 (Neb. 2007) ("[A] legitimate business enterprise is not a nuisance per se, but it may become a nuisance in fact by reason of the conditions implicit in and unavoidably resulting from its operation or because of the manner of its operation."). The Nebraska Supreme Court, in Johnson, further held that a "[a] legal and proper activity may be a nuisance in fact simply because of its location." A business's industrial or rural location does not excuse its offensive operation if it is conducted in a manner that materially prejudices another landowner. The governing principle in *Johnson* is that conducting a business operation that materially and injuriously affects another's property rights becomes a nuisance to the injured property owner and the business operation may be enjoined.

Add:

See also Farber, Daniel A. "The Story of Boomer: Pollution and the Common Law." *32 Ecology L.Q. 113 (2005).*

§ 67.03(b)(3) Defendant's Conduct as Proximate Cause of Plaintiff's Complaint.

Add:

State v. Lead Indus. Ass'n, 2007 R.I. Super. LEXIS 32 (R.I. Super. Ct. 2007) (establishing that intent is not an element of nuisance, but rather that liability depends upon the substantiality of the defendant's conduct, and if that conduct is the proximate cause of the nuisance); *Maravell v. R.J. Grondin & Sons, 914 A.2d 709, 714 (Me. 2007)* ("A landowner is subject to liability for nuisance or injury created by the activity of a third party on the land if the owner knows, or has reason to know, that the activity is causing, or will cause, an unreasonable risk of injury or nuisance and the landowner consents to the activity or fails to exercise reasonable care to prevent the injury or nuisance."); *Puckrein v. ATI Transport, Inc., 897 A.2d 1034 (N.J. 2006)* ("There are three exceptions to the general rule that principals are not liable for the actions of independent contractors [for private nuisance]: (1) where the principal retains control of the manner and means of doing the work subject to the contract; (2) where the principal engages an incompetent contractor; or (3) where the activity constitutes a nuisance per se.").

City of Lawrenceville, 439 S.E.2d 95 (Ga. App. 1993) overruled in part (on other grounds) by *Clive v. Gregory, 635 S.E.2d 188 (Ga. App. 2006)* .

Supp. To CHAPTER 67 THE PROPERTY LAW ASPECTS OF PRIVATE NUISANCE

8-67 Thompson on Real Property, Thomas Editions Supp. to § 67.04

Supp. to § 67.04 Procedural Principles of Private Nuisance Law.

[Go To Main]

§ 67.04(a) Proper Parties. [Go To Main]

Add:

Birke v. Oakwood Worldwide, *87 Cal. Rptr. 3d 602 (2009)* (a minor daughter of the tenant who had a right to enjoy the premises was a proper plaintiff for a private nuisance claim); *Boyne v. Town of Glastonbury, 955 A.2d 645 (Conn. App. 2008)* (private nuisance plaintiff need not be in exclusive possession of the property).

Walker Manor Envtl. Trust v. Oyster Landing Condo. Ass'n, 2006 Conn. Super. LEXIS 3876 (Conn. Super. Ct. 2006) (property ownership, although common, is not a necessary prerequisite to nuisance liability); *Reidling v. City of Gainesville, 634 S.E.2d 862 (Ga.App. 2006)* (a mobile home owner, without an equitable interest in the mobile home park, lacked standing to bring a nuisance action for damage to the park).

Add:

Thorndike v. Thorndike, 910 A.2d 1224, 1227 (N.H. 2006) (recognizing the validity of a claim against a continuing nuisance); *Woldson v. Woodhead, 149 P.3d 361, 364 (Wash. 2006)* (rejecting the notion that future damages for a continuing nuisance must all be recovered in a single action, disapproving of prospective damages recovery). The common law in Kansas distinguishes between permanent and continuing nuisances, but does not distinguish between an offending object and the use of that object. Kansas courts define a continuing nuisance as one where the structure giving rise to the nuisance claim is abatable. *Browning v. MCI, Inc. (In re Worldcom, Inc.), 339 B.R. 836 (D.N.Y. 2006) . But see Brooks v. Chevron USA Inc., 2006 Tex. App. LEXIS 4479 (Tex. App. 2006)* ("[T]he right to sue for injury to real property is a personal right that belongs to the person owning the property at the time of injury." Personal rights do not pass to subsequent purchasers and do "not run with the land absent an express assignment of the cause of action to the

subsequent purchaser."); *Evans v. Lochmere Rec. Club, 627 S.E.2d 340 (N.C. App. 2006)* (property owner not able to enforce previous injunction against neighboring property because the injunction was not obtained against the current landowner, but their predecessor). *But see K & W Elec., Inc. v. State, 712 N.W.2d 107 (Iowa 2006)* (analogizing an inverse condemnation with a permanent nuisance and holding that all recoverable damages must be had in a single cause of action: " '[I]f injuries from a nuisance are of a permanent character and go to the entire value of the estate, there can be but one action, and all damages--past, present, and future--are recoverable therein.' ").

Add:

Evans v. Lochmere Rec. Club, 627 S.E.2d 340 (N.C. App. 2006) (property owner not able to enforce previous injunction against neighboring property because the injunction was not obtained against the current landowner, but their predecessor).

JP Morgan Chase Bank v. Whitmore, 838 N.Y.S.2d 142 (2007) (claim by condominium unit owner against condominium board of managers for noise generated by exhaust fans).

Add:

To recover against a municipality in a nuisance claim, the alleged nuisance must have been created by a positive act of the municipality, or, if involving environmental pollution, by an intentional failure to abate the alleged nuisance by the municipality. *Walker Manor Envtl. Trust v. Oyster Landing Condo. Ass'n, 2006 Conn. Super. LEXIS 3876 (Conn. Super. Ct. 2006)* .

Add:

Chee v. Amanda Goldt Prop. Mgmt., *50 Cal. Rptr. 3d 40, 51 (2006)* (a landlord may be held responsible for a lessee's actions if the landlord authorized or permitted the acts, or if the landlord failed to inspect the property, but a showing of the landlord's knowledge and his ability to prevent the hazard is necessary to impose liability); *Leitstein v. Hirt, 2006 Del. Ch. LEXIS 184 (Del. Ch. 2006)* (all participants in creating a nuisance may be held liable for the injury caused by the nuisance).

Add:

California Dept. of Toxic Substances Control v. Payless Cleaners, 368 F. Supp. 2d 1069 (E.D. Cal. 2005) (successor in interest to dry cleaning company knew of improper disposal of chemicals into the sewer system).

But see Quapaw Tribe of Okla. v. Asarco, Inc., 2007 U.S. Dist. LEXIS 30193 (D. Okla. 2007) ("[T]here is a possibility that [a landlord] could be held liable even if she were not actually aware of an alleged nuisance on the subject property.").

Stein v. Highland Park Indep. Sch. Dist., 540 S.W.2d 551 **overruled** (on other grounds) by *Schneider Nat'l Carriers, Inc. v. Bates, 147 S.W.3d 264 (Tex. 2004)* .

Change:

Milwaukee Metro. Sewerage Dist. v. City of Milwaukee, 671 N.W.2d 345 should be Milwaukee Metro. Sewerage Dist. v. City of Milwaukee, 671 N.W.2d 346 (Wis. App. 2003) .

§ 67.04(c) Statutes of Limitations and Laches [Go To Main]

§ 67.04(c)(1) Statute of Limitations in Actions for Damages

Add:

Harrison v. City of Sanford, 627 S.E.2d 672, 675 (N.C. App. 2006) (the cause of action for damage to property does not accrue until the property damage "becomes apparent or ought reasonably to have become apparent to the claimant."); *K & W Elec., Inc. v. State, 712 N.W.2d 107 (Iowa 2006)* ("Where injuries from the nuisance are intermittent rather than continual, a property owner may bring successive actions to recover damages for each intermittent injury."); *Faulise v. Smithkline Beecham Corp., 2006 U.S. Dist. LEXIS 57276 (D.N.C. 2006)* (action does not accrue until the harm "becomes apparent or ought reasonably to have become apparent to the claimant, whichever event first occurs."); *St. George v. Home Depot U.S.A., Inc., 2007 U.S. Dist. LEXIS 12530 (D. Ariz. 2007)* (a cause of action for a continuing tort accrues, and an applicable statute of limitations begins to run, when the continuing tortious conduct ceases); *Jones v. Town of Angier, 638 S.E.2d 607, 609 (N.C. App. 2007)* (if a claimant knew for more than three years that he had suffered damages, but fails to bring an action until the statute of limitations has run, further damage to his property does not create a new cause of action); *Thorndike v. Thorndike, 910 A.2d 1224, 1227 (N.H. 2006)* (recognizing the validity of a claim against a continuing nuisance); *Woldson v. Woodhead, 149 P.3d 361, 364 (Wash. 2006)* (rejecting the notion that future damages for a continuing nuisance must all be recovered in a single action, disapproving of prospective damages recovery). *But see K & W Elec., Inc. v. State, 712 N.W.2d 107 (Iowa 2006)* (disallowing a five-year statute of limitations to automatically start over after the plaintiff's property flooded a second time); *Moneypenney v. Dawson, 141 P.3d 549 (Okla. 2006)* (damages reasonably capable of being abated are temporary in nature and the statute of limitations will not begin to run until injury is suffered).

Add:

St. George v. Home Depot U.S.A., Inc., 2007 U.S. Dist. LEXIS 12530 (D. Ariz. 2007) (a cause of action for a continuing tort accrues, and an applicable statute of limitations begins to run, when the continuing tortious conduct ceases).

Add:

K & W Elec., Inc. v. State, 712 N.W.2d 107 (Iowa 2006) (disallowing a five-year statute of limitations to automatically

start over after the plaintiff's property flooded a second time). *But see Tenesaca v. C. Pierce Enters., LLC, 2006 Conn. Super. LEXIS 1664 (Conn. Super. Ct. 2006)* (refusing to allow a longer statute of limitations period for temporary nuisances since a permanent nuisance "involves greater damage than a temporary one.").

Add:

Lally v. BP Prods. N. Am., Inc., 615 F. Supp. 2d 654 (N.D. Ohio 2009) (claim of nuisance was time barred because plaintiff knew of contamination 14 years before filing the action against defendant).

Add:

When a nuisance-creating activity or business operation is to continue indefinitely, then a permanent nuisance exists. Whether a nuisance is temporary or permanent is a question of fact. *Manis v. Gibson, 2006 Tenn. App. LEXIS 153 (Tenn. App. 2006)* ; *Shaw v. Tampa Elec. Co., 949 So. 2d 1066, 1070 (Fla. App. 2007)* (permanent nuisance damage measured by the diminution in the value of the plaintiffs' homes); *Kinsale, LLC v. Tombari, 897 A.2d 646 (Conn. App. 2006)* (a permanent nuisance inflicts permanent damage upon property, which warrants a damages award equal to the property's depreciation in value); *Tenesaca v. C. Pierce Enters., LLC, 2006 Conn. Super. LEXIS 1664 (Conn. Super. 2006)* (defining a permanent nuisance as one that inflicts permanent injury upon property, which is remedied with damages equal to the depreciation in the value of the property); *K & W Elec., Inc. v. State, 712 N.W.2d 107 (Iowa 2006)* (analogizing an inverse condemnation with a permanent nuisance and holding that all recoverable damages must be had in a single cause of action: " '[I]f injuries from a nuisance are of a permanent character and go to the entire value of the estate, there can be but one action, and all damages--past, present, and future--are recoverable therein.' " (quoting *Weinhold v. Wolff, 555 N.W.2d 454 (Iowa 1996)* ; *Broadbent v. Allison, 626 S.E.2d 758 (N.C. App. 2006)* (plaintiffs awarded permanent damages may not recover in additional actions based on the same nuisance since the award is for all damages, past and future).

Add:

But see Iannucci v. City of N.Y., 2006 U.S. Dist. LEXIS 21117 (D.N.Y. 2006) (rejecting *Charnley*, and holding that New York does not preclude plaintiffs, based on a lapse of time and the statute of limitations period, from bringing an action to enjoin a public nuisance that also operates as a private nuisance against the plaintiff's property, assuming the plaintiff suffers special damages that are distinct from the general public).

Add, at the end of the subsection

A permanent nuisance inflicts permanent damage upon property, which warrants a damages award equal to the property's depreciation in value. Temporary interference with the use and enjoyment of property constitutes a temporary nuisance, which warrants a damages award equal to the property's reduction in its rental value. n133.1

§ 67.04(d) Right to Jury Trial [Go To Main]

Change:

Armbruster v. Fitzgerald, Wisc. App. LEXIS 185 should be *642 N.W.2d 646* .

FOOTNOTES:
(n1)Footnote 133.1. *Kinsale, LLC v. Tombari, 897 A.2d 646 (Conn. App. 2006)* ; *Fink v. Crean, 2006 Tenn. App. LEXIS 814 (Tenn. App. 2006)* (a nuisance is a temporary nuisance if it can be "corrected with the expenditure of labor and money." Damages for a temporary nuisance may be recovered until the nuisance is abated); *Broyles v. Standifer, 2006 Tenn. App. LEXIS 768 (Tenn. App. 2006)* (damages for a temporary nuisance are measured by the decrease in rental value of the property while the nuisance exists); When a nuisance-creating activity or business operation is to continue indefinitely, then a permanent nuisance exists. Whether a nuisance is temporary or permanent is a question of fact. *Manis v. Gibson, 2006 Tenn. App. LEXIS 153 (Tenn. App. 2006)* ; *Miller v. Rohling, 720 N.W.2d 562, 569 (Iowa 2006)* (measuring the damages for a temporary nuisance as the diminution in the rental value of the property, plus special damages, which include inconvenience, annoyance, discomfort, and the cost of removing the nuisance); *Tenesaca v. C. Pierce Enters., LLC, 2006 Conn. Super. LEXIS 1664 (Conn. Super. 2006)* (defining a permanent nuisance as one that inflicts permanent injury upon property, which is remedied with damages equal to the depreciation in the value of the property); *Miller v. Rohling, 720 N.W.2d 562 (Iowa 2006)* (using commercial grain bins during certain months of the year was held to be a temporary nuisance for which recovery was granted); *K & W Elec., Inc. v. State, 712 N.W.2d 107 (Iowa 2006)* (prescribing the measurement of damages in a temporary nuisance action as the decrease in the property's rental value together with special damages for the plaintiff's discomfort and annoyance) (analogizing an inverse condemnation with a permanent nuisance and holding that all recoverable damages must be had in a single cause of action: " '[I]f injuries from a nuisance are of a permanent character and go to the entire value of the estate, there can be but one action, and all damages--past, present, and future--are recoverable therein.").

Supp. To CHAPTER 67 THE PROPERTY LAW ASPECTS OF PRIVATE NUISANCE

8-67 Thompson on Real Property, Thomas Editions Supp. to § 67.05

Supp. to § 67.05 Trial Issues in Private Nuisance Actions

[Go To Main]

§ 67.05(a) Prima Facie Case; the Plaintiff's Burden of Proof [Go To Main]

Add:

Dickens v. Oxy Vinyls, LP, 631 F. Supp. 2d 859 (W.D. Ky. 2009) (claim for private nuisance dismissed when plaintiff failed to show noxious smells were emanating from vinyl manufacturer.)

Add:

See e.g., Iannucci v. City of N.Y., 2006 U.S. Dist. LEXIS 21117 (D.N.Y. 2006) (requiring a plaintiff to prove special damages that are distinct from the general public in order to recover damages for a private nuisance cause of action that also gives rise to a public nuisance cause of action).

§ 67.05(b) Defenses Available to Defendants [Go To Main]

Add:

Green v. Eastland Homes, Inc., 2007 Ga. App. LEXIS 370 (Ga. App. 2007) (authorizing an action to recover damages for a nuisance created by water-runoff even though the property owner that created the nuisance had sold the property); *Walker Manor Envtl. Trust v. Oyster Landing Condo. Ass'n, 2006 Conn. Super. LEXIS 3876 (Conn. Super. 2006)*

(contributory negligence is a defense in an action for negligent nuisance, but not in a n action for absolute nuisance).

Add:

State v. Romano, 155 P.3d 1102 (Haw. 2007) (exceptions embodied in the language of statutes are an "integral part of the verbal description" and require a prima facie negation of the exception thus relieving the defendant of the burden to prove that the exception exists).

Add:

But see Iannucci v. City of N.Y., 2006 U.S. Dist. LEXIS 21117, 15-17 (D.N.Y. 2006) (denying a defendant's prescription defense because a prescription right cannot exist to maintain a public nuisance, even if the conduct also constitutes a private nuisance).

§ 67.05(b)(4). Legislative Authority

Add:

See Hill v. Koppers, Inc., 2010 U.S. Dist. LEXIS 5036 (N.D. Miss. Jan. 20, 2010) (In Mississippi, under statute, a wood processing plant is defined as an agricultural operation, and therefore plaintiff's claims for nuisance were denied as the operation was protected by the Mississippi Right to Farm statute).

Add:

Whaley v. Park City Municipal Corporation, 190 P.3d 1 (Utah App. 2008) (city permits for outdoor music concerts did not defeat private nuisance claims against the concert promoters).

See, e.g., Kistler v. City of Perry, 719 N.W.2d 804, (Iowa 2006) (holding that legislatures and city governments have "broad authority to define nuisances and to provide methods for their abatement," as long as their exercise of that authority is reasonable).

Change:

Milwaukee Metro. Sewerage Dist. v. City of Milwaukee, 671 N.W.2d 345 **should be** *Milwaukee Metro. Sewerage Dist. v. City of Milwaukee, 671 N.W.2d 346 (Wis. App. 2003)* .

§ 67.05(b)(5) Priority

Change:

City of Lebanon v. Georgia-Pacific Corp., 2004 D. Or. LEXIS 9054 **should be** *City of Lebanon v. Georgia-Pacific Corp., 2004 U.S. Dist. LEXIS 9054 (D. Or. 2004)* .

Add:

Davis v. Taylor, 132 P.3d 783 (Wash. App. Div. 2006) (observing that the Washington state Right-to-Farm Act was intended to be narrowly applied and "effectively codifie[s] the 'coming to the nuisance defense.' ").

Change:

Beck Dev. Co. v. S. Pac. Transp. Co., 44 Cal. App. 4th 1160 (Cal. App. 1996) **should be** *Beck Dev. Co. v. S. Pac. Transp. Co., 52 Cal. Rptr. 2d 518 (Cal. App. 1996)* .

Supp. To CHAPTER 67 THE PROPERTY LAW ASPECTS OF PRIVATE NUISANCE

8-67 Thompson on Real Property, Thomas Editions Supp. to § 67.06

Supp. to § 67.06 Remedies in Private Nuisance Actions.

[Go To Main]

§ 67.06(a) Damages. [Go To Main]

§ 67.06(a)(1) Permanent and Temporary Damages.

Add:

Kinsale, LLC v. Tombari, 897 A.2d 646 (Conn. App. Ct. 2006) (allowing plaintiffs to recover the reasonable cost of their "own efforts to abate the nuisance or prevent future injury," but barring recovery of permanent damages if the plaintiff can abate the nuisance, or if it is abatable by an injunction).

Add:

The common law in Kansas distinguishes between permanent and continuing nuisances, but does not distinguish between an offending object and the use of that object. Kansas courts define a continuing nuisance as one where the structure giving rise to the nuisance claim is abatable. *Browning v. MCI, Inc. (In re Worldcom, Inc.), 339 B.R. 836 (D.N.Y. 2006)* ; *Tenesaca v. C. Pierce Enters., LLC, 2006 Conn. Super. LEXIS 1664 (Conn. Super. Ct. 2006)* (defining a permanent nuisance as one that inflicts permanent injury upon property, which is remedied with damages equal to the depreciation in the value of the property).

Cook v. DeSoto Fuels, Inc., 169 S.W.3d 94 (Mo. App. 2005) (Continued negligent seepage of contaminants from defendant's gas station onto plaintiff's land and into their water is a temporary nuisance); *Goode v. City of Atlanta, 617 S.E.2d 210 (Ga. App. 2005)* (an isolated act of negligence cannot form the basis of a nuisance claim).

Add:

See e.g., K & W Elec., Inc. v. State, 712 N.W.2d 107 (Iowa 2006) (analogizing an inverse condemnation with a permanent nuisance and holding that all recoverable damages must be had in a single cause of action: " '[I]f injuries from a nuisance are of a permanent character and go to the entire value of the estate, there can be but one action, and all damages--past, present, and future--are recoverable therein.' " (quoting *Weinhold v. Wolff, 555 N.W.2d 454 (Iowa 1996)* . *But see Woldson v. Woodhead, 149 P.3d 361, 364 (Wash. 2006)* (rejecting the notion that future damages for a continuing nuisance must all be recovered in a single action, disapproving of prospective damages recovery). *See also Moneypenney v. Dawson, 141 P.3d 549 (Okla. 2006)* (the statute of limitations does not begin for permanent damage until the damage becomes apparent to the property owner and it becomes apparent that the damage is likely permanent); *Citgo Ref. & Mktg. v. Garza, 187 S.W.3d 45, 77 (Tex. App. 2006)* ("Damages for permanent nuisance require a 'material or substantial injury.' ").

King v. City of Independence, 64 S.W.3d 335 (Mo. App. 2002) **overruled** (in-part and on other grounds) by *George Ward Builders, Inc. v. City of Lee's Summit, 157 S.W.3d 644 (Mo. App. 2004)* (nuisance-based claims are not viable against a public entity with condemning authority).

Kinsale, LLC v. Tombari, 897 A.2d 646 (Conn. App. Ct. 2006) (measuring the damages for a temporary nuisance by the reduction in the property's rental value); *Fink v. Crean, 2006 Tenn. App. LEXIS 814 (Tenn. App. 2006)* (damages for a temporary nuisance may be recovered until the nuisance is abated); *Broyles v. Standifer, 2006 Tenn. App. LEXIS 768 (Tenn. App. 2006)* (damages for a temporary nuisance are measured by the decrease in rental value of the property while the nuisance exists); *Miller v. Rohling, 720 N.W.2d 562, 569 (Iowa 2006)* (measuring the damages for a temporary nuisance as the diminution in the rental value of the property, plus special damages, which include inconvenience, annoyance, discomfort, and the cost of removing the nuisance); *K & W Elec., Inc. v. State, 712 N.W.2d 107 (Iowa 2006)* (prescribing the measurement of damages in a temporary nuisance action as the decrease in the property's rental value together with special damages for the plaintiff's discomfort and annoyance).

Add:

Moneypenney v. Dawson, 141 P.3d 549 (Okla. 2006) (a plaintiff may bring successive actions for temporary damage "each time the wrong occurs and the statute of limitations would bar recovery only for damage occurring more than two years prior to a suit's filing.")

§ 67.06(a)(2) Recovery for Harm to Property.

Add:

Shaw v. Tampa Elec. Co., 949 So. 2d 1066, 1070 (Fla. App. 2007) (permanent nuisance damage measured by the diminution in the value of the plaintiffs' homes); *Kinsale, LLC v. Tombari, 897 A.2d 646 (Conn. App. Ct. 2006)* (a permanent nuisance inflicts permanent damage upon property, which warrants a damages award equal to the property's

depreciation in value); *Tenesaca v. C. Pierce Enters., LLC, 2006 Conn. Super. LEXIS 1664 (Conn. Super. Ct. 2006)* (permanent injury to property is remedied with damages equal to the depreciation in the value of the property).

Change:

Santa Fe P'ship v. Arco Prods. Co., 46 Cal. App. 4th 967 (Cal. App. 1996) **should be** *Santa Fe P'ship v. Arco Prods. Co., 54 Cal. Rptr. 2d 214 (1996)* .

Add:

City of Atlanta v. Landmark Environmental Industries, Inc., 613 S.E.2d 131 (Ga. App. 2005) (city liable for lost rent in addition to the costs of restoring the property contaminated by raw sewage from leaking sewer lines); *Whiteside Estates, Inc. v. Highlands Cove, L.L.C., 609 S.E.2d 804 (N.C. App. 2005)* (for temporary injury, damages may include diminished rental value, reasonable costs of replacement or repair, or restoring the property to its original condition).

Add:

Fink v. Crean, 2006 Tenn. App. LEXIS 814 (Tenn. App. 2006) (damages for a temporary nuisance may be recovered until the nuisance is abated); *Broyles v. Standifer, 2006 Tenn. App. LEXIS 768 (Tenn. App. 2006)* (damages for a temporary nuisance are measured by the decrease in rental value of the property while the nuisance exists); *Miller v. Rohling, 720 N.W.2d 562, 569 (Iowa 2006)* (measuring the damages for a temporary nuisance as the diminution in the rental value of the property, plus special damages, which include inconvenience, annoyance, discomfort, and the cost of removing the nuisance); *K & W Elec., Inc. v. State, 712 N.W.2d 107 (Iowa 2006)* (prescribing the measurement of damages in a temporary nuisance action as the decrease in the property's rental value together with special damages for the plaintiff's discomfort and annoyance). *King v. City of Independence, 64 S.W.3d 335 (Mo. App. 2002)* **overruled** (inpart and on other grounds) by *George Ward Builders, Inc. v. City of Lee's Summit, 157 S.W.3d 644 (Mo. App. 2004)* (nuisance-based claims are not viable against a public entity with condemning authority).

Add:

Books Are Fun, Ltd. v. Rosebrough, 2006 U.S. Dist. LEXIS 64196 (D. Iowa 2006) (requiring a showing that a defendant's purpose in interfering with a business is to financially injure or destroy the plaintiff).

§ 67.06(a)(3) Recovery for Personal Injury and Inconvenience

Add:

Kinsale, LLC v. Tombari, 897 A.2d 646 (Conn. App. Ct. 2006) (allowing a jury's consideration of annoyance and discomfort in awarding damages for a nuisance); *Miller v. Rohling, 720 N.W.2d 562, 569 (Iowa 2006)* (including inconvenience, annoyance, and discomfort in special damages awards for nuisance); *K & W Elec., Inc. v. State, 712 N.W.2d 107 (Iowa 2006)* (including annoyance and discomfort in special damages awards for nuisance).

See Action Marine, Inc. v. Cont'l Carbon, Inc., 481 F.3d 1302, 1321 (11th Cir. 2007) (awarding attorney's fees as part of the measure of actual damages); *Day v. Gabriele, 101 Conn. App. 335 (Conn. App. Ct. 2007)* (awarding attorney's fees in a cause of action for nuisance and trespass); *Parker v. Scrap Metal Processors, Inc., 468 F.3d 733 (11th Cir. 2006)* (upholding award of attorney' s fees in claims of nuisance, trespass, and negligence); *Felton v. Morgan Stanley Dean Witter & Co., 429 F. Supp. 2d 684,* (S.D.N.Y. 2006) (the Private Securities Litigation Reform Act of 1995 ("PSLRA"), *15 U.S.C. §§ 77z-1, 78u*, limited the recovery of attorney's fees and sought to deter or quickly dispose of nuisance suits following abuses); *Merrill Lynch, Pierce, Fenner & Smith, Inc. v. Dabit, 547 U.S. 71 (2006)* (Congress intended to limit recoverable attorney's fees to curb tort abuses, including nuisance claims, in Title I of the PSLRA, captioned "Reduction of Abusive Litigation."); *Haufler v. Zotos, 845 N.E.2d 322 (Mass. 2006)* (award of attorney's fees uncontested on appeal). *But see Miller v. Rohling, 720 N.W.2d 562 (Iowa 2006)* (denying plaintiffs' recovery of attorney's fees in nuisance cause of action because no statute or agreement provided for them).

Change/Delete:

Omit parallel citation in *Sramek v. Korth, 207 Wis. 2d 645, 559 N.W.2d 924 (Wis. App. 1996)* .

§ 67.06(a)(4) Recovery of Exemplary Damages

Add:

Holubec v. Brandenberger, 214 S.W.3d 650 (Tex. App. 2006) (awarding exemplary damages against sheep feedlot based on evidence that the feedlot owners maliciously exacerbated the nuisance); *Gail v. New England Gas Co., Inc. 460 F. Supp. 2d 314 (D.R.I. 2006)* (allowing claim for exemplary damages where the plaintiff alleged the defendant "knew or should have known" that their conduct would cause harm and that their actions included a high degree of risk. The court held that although the standard for awarding exemplary damages requires evidence of willfill, reckless, or wicked conduct, those terms are not "magical."); *Vaughn v. Drennon 202 S.W.3d 308 (Tex. App. 2006)* (reversing award of exemplary damages, indicating that a plaintiff must prove that the defendant "desires to cause the consequences of his act, or that he believes the consequences are substantially certain to result from it" in order to award exemplary damages); Proctor v. 7- *Eleven, Inc., 180 Fed. Appx. 453 (4th Cir. 2006)* (reversing award of exemplary damages because property owners were unable to recover compensatory damages from gas leak and because defendant's conduct did not constitute reckless or intentional conduct).

Subsequent History:

Miller v. Cudahy Co., 592 F. Supp. 976 (D. Kan. 1984) **reversed in part** (on other grounds) **and affirmed in part** (affirming award of exemplary damages) by *Miller v. Cudahy Co., 858 F.2d 1449, 1458 (10th Cir. 1988)* .

§ 67.06(a)(5) Mitigation of Damages

Add:

But see Kinsale, LLC v. Tombari, 897 A.2d 646 (Conn. App. Ct. 2006) (barring recovery of permanent damages if the plaintiff can abate the nuisance but fails to do so).

Add:

Gumz v. N. States Power Co., 721 N.W.2d 515 (Wis. App. 2006) (failing to mitigate damages, at most, enhances the damages). *See also Broadbent v. Allison, 626 S.E.2d 758 (N.C. App. 2006)* (allowing benefits from nuisance to be considered in mitigation of damages).

Add:

Kinsale, LLC v. Tombari, 897 A.2d 646 (Conn. App. Ct. 2006) (allowing plaintiffs to recover the reasonable cost of their "own efforts to abate the nuisance or prevent future injury," but barring recovery of permanent damages if the plaintiff can abate the nuisance, or if it is abatable by an injunction).

§ 67.06(b) Judicial Abatement of the Nuisance [Go To Main]

Add:

Holder v. Gold Fields Mining Corp., 2007 U.S. Dist. LEXIS 7591 (D. Okla. 2007) (allowing injunctive relief under both statutory and common law nuisance claims); *Kistler v. City of Perry, 719 N.W.2d 804,* (Iowa 2006) (holding that legislatures and city governments have "broad authority to define nuisances and to provide methods for their abatement," as long as their exercise of that authority is reasonable); *Evans v. Lochmere Rec. Club, 627 S.E.2d 340 (N.C. App. 2006)* (property owner not able to enforce previous injunction against neighboring property because the injunction was not obtained against the current landowner, but their predecessor).

§ 67.06(b)(3) Requir ements of Irreparable Harm or Inadequate Remedy at Law

Add:

Vaughn v. Drennon, 202 S.W.3d 308 (Tex. App. 2006) (allowing injunctive relief to be granted "only on a showing of a wrongful act, imminent harm, irreparable injury, and the absence of an adequate remedy at law."); *The Woods at Wayne Homeowners Ass'n v. Gambone Bros. Const. Co., Inc., 893 A.2d 196 (Pa. Cmwlth. 2006)* (requiring courts to remedy private nuisances in a way "reasonably suited to abate the harm."); *Holder v. Gold Fields Mining Corp., 2007 U.S. Dist. LEXIS 7591 (D. Okla. 2007)* (allowing injunctive relief under both statutory and common law nuisance claims, in addition to money damages); *Shaw v. LDC Enterprises, 863 N.E.2d 424 (Ind. App. 2007)* (allowing an action to abate a nuisance to be brought if property is injured or the personal enjoyment of property is lessened by the nuisance, quoting *Ind. Code § 32-30-6-7(a)*).

Add:

Vaughn v. Drennon, 202 S.W.3d 308 (Tex. App. 2006) ("A n injunction should be broad enough to prevent a repetition of the evil sought to be corrected ... . However, it must not be so broad as to enjoin a defendant from activities that are a lawful and proper exercise of his rights."); *Fink v. Crean, 2006 Tenn. App. LEXIS 814 (Tenn. App. 2006)* (damages for a temporary nuisance may be recovered until the nuisance is abated).

§ 67.06(b)(4) The Requirement of "Clean Hands"

Add:

Cline v. Berg, 639 S.E.2d 231 (Va. 2007) (holding that the lower court abused its discretion by not applying the unclean hands doctrine).

Add:

Cline v. Berg, 639 S.E.2d 231 (Va. 2007) (defining the unclean hands doctrine as an "ancient maxim" that requires the plaintiff seeking an injunction to have clean hands and not be guilty of "any inequitable or wrongful conduct with respect to the transaction or subject matter sued on.")

§ 67.06(b)(5) The Possibility of Election of Remedies

Add:

Broadbent v. Allison, 626 S.E.2d 758 (N.C. App. 2006) ("Once all the relevant issues in the case have been determined

by the jury and the trial court, plaintiffs shall be allowed to elect between available remedies to the extent necessary to 'prevent double redress for a single wrong.' "); *Holder v. Gold Fields Mining Corp., 2007 U.S. Dist. LEXIS 7591 (D. Okla. 2007)* (recognizing claims for damages and injunctive relief under both statutory and common law nuisance claims).

Add:

Fink v. Crean, 2006 Tenn. App. LEXIS 814 (Tenn. App. 2006) (damages for a temporary nuisance may be recovered until the nuisance is abated).

§ 67.06(c) Self-help or Non-judicial Abatement of the Nuisance [Go To Main]

Add:

But see, Iny v. Collom, 827 N.Y.S.2d 416 (2006) (recognizing that under some rules, self-help is the only remedy available to a would-be plaintiff as a nuisance claim would not properly lie, and in New York, a plaintiff must first resort to self-help before sustaining a cause of action for nuisance, unless impractical); *Kinsale, LLC v. Tombari, 897 A.2d 646 (Conn. App. 2006)* (allowing plaintiffs to recover the reasonable cost of their "own efforts to abate the nuisance or prevent future injury," but barring recovery of permanent damages if the plaintiff can abate the nuisance, or if it is abatable by an injunction). *See generally, Kistler v. City of Perry, 719 N.W.2d 804 (Iowa 2006)* (invalidating an ordinance that permitted the abatement of nuisances "without notice and hearing," as a violation of due process); *The Woods at Wayne Homeowners Ass'n v. Gambone Bros. Const. Co., Inc., 893 A.2d 196 (Pa. Cmwlth. 2006)* (the creator of a nuisance is responsible for abating the nuisance).

Supp. To CHAPTER 67 THE PROPERTY LAW ASPECTS OF PRIVATE NUISANCE

8-67 Thompson on Real Property, Thomas Editions Supp. to § 67.07

Supp. to § 67.07 Land Uses That Have Been Held to be Private Nuisances in Fact

[Go To Main]

§ 67.07(a) Agricultural Uses and Commercial Animal Activities [Go To Main]

§ 67.07(a)(3) Farm

Add:

When agricultural activities (i.e. an activity arising from commercial farming) are exempted by right-to-farm laws, they are not nuisances by definition. Agricultural activities are exempt in accordance with the Washington right-to-farm act when the activity is (1) consistent with agricultural practices; (2) practiced before the arrival of nonagricultural activities; and (3) void of a "substantial adverse effect on the public health and safety." While right-to-farm laws give farmers a "right-to-farm" defense, causes of action against activities that fail to meet the "agricultural activities" definition will not allow such a defense. *Davis v. Taylor 132 P.3d 783 (Wash. App. Div. 2006)* (disallowing a right-to-farm defense where a farmer produced excessive noise as a result of the use of propane cannons and cherry guns, which were not exempt from a nuisance claim).

§ 67.07(a)(6) Hog Farm and Feed Lot; Cattle Feed Lot

Add:

Holubec v. Brandenberger, 214 S.W.3d 650 (Tex. App. 2006) (granting a permanent injunction against a feedlot, in addition to actual damages and exemplary damages); *Johnson v. Knox County P'ship, 728 N.W.2d 101 (Neb. 2007)* (reversing the trial court and holding that genuine issues of material fact existed as to whether a cattle feedlot constituted a private nuisance).

§ 67.07(a) Missing [Go To Main]

§ 67.07(a)(7) Livestock.

At end of subsection, add new text:

Despite plaintiff's complaints of overbearing odor, cattle grazing 18 inches away from neighbor's house was found to be reasonable because the cows were being fed elsewhere, the strip of land was only a small part of a much larger pasture, and the complaining neighbors had previously grazed their own cows in that very place.

At end of new text, add new footnote 293.1:

Delancey v. Mallette, 912 So.2d 483 (Miss. App. 2005) .

§ 67.07(a)(8) Poultry Operations

Add:

State v. Romano, 155 P.3d 1102 (Hawaii 2007) (holding it unlawful to operate a poultry business); *Payne v. Terrell, 629 S.E.2d 839 (Ga. App. 2006)* (affirming the reversal of an order denying a permanent injunction against a commercial poultry venture and holding it a nuisance as a matter of law).

§ 67.07(a)(11) Slaughterhouse, Stockyard, Meat Packing Plant

Add:

State v. Schweda (Wis. App. 2006) (including slaughterhouses in the "traditional nuisance industries").

§ 67.07(b) Commercial Uses [Go To Main]

§ 67.07(b)(1) Airport

Add:

But see Biddle v. BAA Indianapolis, LLC, 860 N.E.2d 570 (Ind. 2007) ("Whether a taking occurred can be subject to summary judgment."); *Beck v. City of Evansville, 842 N.E.2d 856 (Ind. App. 2006)* (finding no taking of homeowners' property on review of trial court's grant of summary judgment to city); *McCarran Intern. Airport v. Sisolak 137 P.3d 1110 (Nev. 2006)* ("Where aircraft operations interfere with a property's existing use, a claim for nuisance ... may exist based upon the extent of the damage created by the overflights.").

Add:

But see Biddle v. BAA Indianapolis, LLC, 860 N.E.2d 570 (Ind. 2007) (affirming the trial court's summary judgment against an airport for nuisance based on excessive noise).

Add:

Broadbent v. Allison, 626 S.E.2d 758 (N.C. App. 2006) (reversing the trial court denial of a permanent injunction against a county airport).

§ 67.07(b)(3) Eating Establishment.

Add:

Biglane v. Under the Hill Corp., 949 So. 2d 9 (Miss. 2007) (saloon was a private nuisance to the neighbors).

Add:

Cafe Sevilla, Inc. v. OM Enterprises, 2006 Cal. App. Unpub. LEXIS 5350 (California Unpublished Opinions 2006) (cross-complaint for injunctive relief against a Cafe whose music was loud and patrons unruly was granted based on a private nuisance claim).

Add:

Shaw v. LDC Enterprises 863 N.E.2d 424 (Ind.App.,2007) (reversing the dismissal of a nuisance claim for injunctive relieve against a restaurant that intoxicated a motorist who killed the plaintiff's daughter).

§ 67.07(b)(4) Entertainment Establishment

Add:

Capitol Props. Group, LLC v. 1247 Ctr. St., LLC, 770 N.W.2d 105 (Mich. Ct. App. 2009) (holding that a nightclub's excessive noise at only certain hours is not a nuisance at all times and does not constitute a nuisance per se).

Add:

Adkins v. Boetcher, 2010 Ohio 554 (Ohio Ct. App., Ross County Feb. 12, 2010) (granting an injunction for private nuisance claim against a racetrack to limit the amount of noise and light emitted).

§ 67.07(b)(7) Gas Station

Add:

Banks v. Dunn, 630 S.E.2d 1 (N.C. App. 2006) (homeowner awarded damages against n eighboring gas station based on contaminated fill dirt). *But see Walden v. Morgan, 635 S.E.2d 616 (N.C. App. 2006)* ("The mere ownership and presence near adjacent residences of an above-ground storage tank for gasoline by landlord and tenant of gas station was not a nuisance.").

Add:

See also Lally v. BP Prods. N. Am., Inc., 615 F. Supp. 2d 654 (N.D. Ohio 2009) , where a nuisance claim for damages stemming from underground gas tanks and gas station operations was denied for exceeding the four-year statute of limitation.

§ 67.07(b)(8) Grain Business

Add:

Miller v. Rohling, 720 N.W.2d 562 (Iowa 2006) (commercial grain storage facility's grain drying and storage activities constituted a nuisance which warranted damages for the loss of use and enjoyment of property).

§ 67.07(b)(16) Prostitution

Add:

People v. Bhakta, *37 Cal. Rptr. 3d 652 (2006)* (affirming the city attorney' s authority to bring an abatement action against Los Angeles motels under the Red Light Abatement Law, *Cal. Penal Code § 11235*, which provides that "every building or place used for the purpose of prostitution, gambling, lewdness or assignation or upon which such conduct

occurs 'is a nuisance which shall be enjoined, abated, and prevented, ... whether it is a public or private nuisance.' ").

§ 67.07(b)(20) Trapshooting Club, Gun Club, Rifle Range

Add:

Brown v. Cedar Creek Rod & Gun Club, 298 S.W.3d 14 (Mo. Ct. App. 2009) (Gun club appealed district court's grant of an injunction for a nuisance claim for noise and vibrations. Club's appeal was on the basis of a statutory amendment that granted immunity to firearm ranges for civil liability from noise nuisance. Appellate court held that the statutory amendment only covered noise nuisance and not vibration nuisance and upheld the district court's injunction.)

§ 67.07(c) Industrial Uses [Go To Main]

§ 67.07(c)(2) Cement Plant

Add:

Darney v. Dragon Prods. Co., LLC, 640 F. Supp. 2d 117 (D. Me. 2009) (holding that property devaluation is not the only way to satisfy substantial interference with use and enjoyment of property. Other factors of substantial interference can include appreciable damages to property or evidence that property appreciation was lower than it would have been but for the alleged nuisance).

§ 67.07(c)(5) Construction Operations

Add:

McMullan v. HRH Const., LLC, 831 N.Y.S.2d 147 (N.Y.A.D. 2007) (enjoining a construction company from entering subject land because its operations there constituted a private nuisance).

§ 67.07(c)(7) Electric Power Plant

Add:

Oglethorpe Power Corp. v. Forrister, 2010 Ga. App. LEXIS 348 (Ga. Ct. App. Mar. 30, 2010) (affirming denial of summary judgment for a power company which was claiming that a nuisance claim was barred by statute of limitations because noise from a power plant constituted a permanent nuisance and therefore the statute of limitations began to run at the construction of the power plant. Court disagreed and held that noise from the power plant was a continuing nuisance and that a nuisance claim was proper as the statute of limitation did not apply)

§ 67.07(c)(12) Miscellaneous Factories

Add:

Hydrogen fluoride, released from a neighboring factory, caused fluorosis in dairy farmers' cows. Farmers subsequently sued the factory owner for nuisance and summary judgment was granted for the factory owner, but the Third Circuit Court of Appeals vacated that judgment. *Mest v. Cabot Corp., 449 F.3d 502 (3d Cir. 2006)* .

§ 67.07(c)(14) Railroad Operations

Add:

Norfolk Southern Ry. Co. v. City of Pittsburgh, 235 Fed. Appx. 907 (3d Cir. 2007) (in a role reversal, the railroad was permitted to bring a nuisance claim against the city, arising from landslides causing boulders and other objects to fall from city-owned property onto the railroad tracks).

Add:

Dismissing a private nuisance claim against a railroad, an appellate court in Texas held that the Interstate Commerce Commission Termination Act (ICCTA), *49 U.S.C. § 10501(b)*, "provided exclusive remedies with respect to regulation of rail transportation," which preempted a state law claim of private nuisance since the action would shut down railroad operations. The court also rejected the contention that awarding monetary damages would circumvent the preemption, indicating that such an allowance would open a floodgate of litigation and kill Congress's intent behind the *ICCTA. A & W Properties, Inc. v. Kansas City S. Ry. Co., 200 S.W.3d 342 (Tex. App. 2006)* ; *New England Cent. R.R., Inc. v. Springfield Terminal Ry. Co., 415 F. Supp. 2d 20 (D. Mass. 2006)* (recognizing the ICCTA's preemption of private nuisance claims).

§ 67.07(c)(18) Stone and Quarry Operations

Add:

The Alabama Supreme Court reversed the trial court's summary judgment that held that a quarry did not constitute a private nuisance and barred plaintiffs' nuisance claims. The court remanded the issue for determination by a jury, finding an issue of material fact whether the quarry injured plaintiffs' property by "emitting noise, dust, vibration, and pollution; dewatering the subsoil; and causing sinkholes to form in the area." *Davis v. Hanson Aggregates Southeast, Inc., 952 So.2d 330 (Ala. 2006)* .

Add:

See also Blackford v. Heman Const. Co., 112 S.W. 287 (Mo. Ct. App. 1908) , holding that although quarry had the right

to quarry stone on their property, their neighbors had a superior right to enjoy undisturbed possession of their home. And when those two rights were in conflict the quarry must yield to their neighbor's right.

Add:

Benton v. Kernan, 13 A.2d 825 (N.J. Ch. 1940) (holding that a quarry and asphalt mixing business operation constituted a nuisance. Vibrations from rock blasts, noise from machinery, and odors from the asphalt constituted a nuisance, even though the quarry had existed prior to a population moving near the quarry.)

§ 67.07(c)(20) Trucking and Freight Operations

Add:

But see Puckrein v. ATI Transport, Inc., 897 A.2d 1034 (N.J. 2006) (holding that trucking is not a nuisance per se).

§ 67.07(d)(3) Construction Activities.

Add:

See also Willmschen v. Trinity Lakes Improvement Ass'n., 840 N.E.2d. 1275 (Ill. App. 2d Dist. 2005) (lakes polluted by fertilizer and construction site runoff constituted a nuisance; homeowner's association held liable for failure to abate nuisance).

§ 67.07(d)(5) Dogs

Add:

City of Belfield v. Kilkenny, 729 N.W.2d 120 (N.D. 2007) ("[E]xcessive, continuous, or untimely" barking constitutes a nuisance).

§ 67.07(d)(6) Embankment; Dock

Add:

Dumm v. Dahl, 913 A.2d 863 (Pa. Super. 2006) (use of a private dock by neighbors through a public easement does not constitute a private nuisance); 9394, *LLC v. Kehler, 809 N.Y.S.2d 155 (2006)* (reconstruction of dock did not constitute a nuisance).

§ 67.07(d)(9.5) Obstruction of Public Road

Add:

Petre v. Norfolk S. Ry. Co., 458 F. Supp. 2d 518 (N.D. Ohio 2006) (a permanent obstruction that hinders regular travel on a public highway is a nuisance.

§ 67.07(d)(14) Trees

Add:

The Woods at Wayne Homeowners Ass'n v. Gambone Bros. Const. Co., Inc., 893 A.2d 196 (Pa. Cmwlth. 2006) (the creator of a nuisance is responsible for abating the nuisance).

Add:

Landowners, whose foundation was damaged by roots of trees on neighboring land, brought an action for nuisance that was dismissed because the neighboring landowner was not at fault. *Carvalho v. Wolfe, 140 P.3d 1161 (Or. App. 2006)* ; *Iny v. Collom, 827 N.Y.S.2d 416 (N.Y. Sup. App. Term 2006)* (requiring a plaintiff to show that overhanging branches or encroaching roots are causing damage that "a sensible person ... would find injurious" in order to recover for a private nuisance rooted in non-noxious trees or plants).

§ 67.07(d)(17) Wall.

At end of subsection, add new text:

Defendant's construction and maintenance of a retaining wall that encroached upon plaintiffs' property and threatened to collapse thereon constituted a private nuisance.

At end of new text, add new footnote 674.1:

Vacca v. Valerino, 16 A.D.3d 1159 (N.Y. App. Div. 4th Dept.) .

§ 67.07(d)(18) Windmill.

Add:

Rankin v. FPL Energy, LLC, 266 S.W.3d 506 (Tex. App. 2008) (action against wind farm for noise and loss of view).

Burch v. Nedpower Mount Storm, 647 S.E.2d 879 (W. Va. 2007) (noise of wind power electricity generating facility cognizable as a nuisance claim).

§ 67.07(d)(20) Others.

Add:

County of Santa Clara v. Atlantic Richfield Co., *40 Cal. Rptr. 3d 313 (2006)* (permitting the government to pursue nuisance action on behalf of citizens against lead manufacturers for nuisance posed by asbestos).

At end of subsection, add new text:

A city was liable for the nuisance created by an inadequate sewer line in residential neighborhood, which caused sewage to back up on plaintiff's property.

At end of new text, add new footnote 685.1:

Davis v. City of Forsyth, 621 S.E.2d 495 (Ga. App. 2005)

At end of subsection, add new text:

A decision from a city court in New York State may signal an interesting trend. A tenant who smoked in her apartment was held liable, under private nuisance theory, for interference with other tenants' enjoyment of their apartments caused by her smoking.

At end of new text, add new footnote 685.2:

Duntley v. Barr, 10 Misc.3d 206 (Syracuse N.Y. City Ct. 2005) .

Add:

Beachfront property owners succeeded in private nuisance claim against neighboring landowner after "unpleasant odors, sounds, and visual conditions" substantially interfered and injured the plaintiff's use and enjoyment of their property. n688

CHAPTER 68 TRESPASS ON LAND

8-68 Thompson on Real Property, Thomas Editions § 68.01

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 68.01 Introduction.

Trespass is similar to nuisance, as discussed in Chapter 67, in that a trespass also interferes with the use and enjoyment of land; trespass is distinct from nuisance in that trespass is caused by an actual physical invasion of the property. While the interference caused by a nuisance may be actionable without an actual physical invasion of the property--through such means as noise, lights or smells--a trespass is actionable when any physical invasion at all can be proved, no matter how slight or inconsequential.

In a trespass action, only the plaintiff is necessarily the holder of an interest in land. The defendant may be any person who enters another's land, or who causes another or some other thing to enter a person's land. In this chapter, the discussion of the elements of a trespass action apply in all cases of trespass, but some sections of this chapter deal specifically with trespasses that arise between adjoining or nearby landowners. A highly specialized form of trespassory invasion, the loss of lateral or subjacent support, is discussed in Chapter 69, *infra.*

CHAPTER 68 TRESPASS ON LAND

8-68 Thompson on Real Property, Thomas Editions § 68.02

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 68.02 Definition and Elements of Trespass on Land.

[Go To Supp]

§ 68.02(a) Intent.

Trespass is the physical invasion of another's property and, since many trespasses occur casually or inadvertently, the question immediately arises whether one can be liable for trespass without the intent to trespass. American courts consistently hold that a plaintiff in a trespass action need not show that the defendant actually intended to commit a trespass; it is sufficient to show that the defendant intended to enter the plaintiff's land. Even intent to enter the land need not be shown if the plaintiff shows that the defendant's activity was negligent, reckless, or extra-hazardous. Therefore, one may be guilty of trespass who, in most cases, intends the entry onto land but does not necessarily intend either the trespass or its resulting damage. n1

As mentioned, a trespasser may be liable for trespass without knowing or intending that a trespass is committed; when the trespass is a result of the trespasser's ignorance, mistake, or inadvertence, relief against the trespass will still be granted in most cases. n2 If not only the intent to trespass was absent, but the entry itself was unintended, some courts will not recognize a trespass unless the unintended entry n3 was negligent, reckless, or in the course of an extra-hazardous activity. n4 Examples of these latter situations include: damage to land caused by seismic vibration from a static firing rocket motor test, an extra-hazardous activity; n5 a fire which began on defendant's land and as a result of negligence spread to plaintiff's land; n6 and a neighboring landowner who, with consent, pruned back overhanging branches from the trees on adjacent land, but pruned the trees so severely that several died, a form of reckless conduct. n7

LEXIS: Trespass! w/5 (land or real!) w/10 intent!

§ 68.02(b) Entry.

A trespass to land in the early common law was perceived as a breach of the peace resulting from the unlawful entry onto the land of another. If the entry onto the land of another was rightful, even a wrong act following that rightful entry

was not considered a trespass. This is still the view held by some courts. n8 Other courts consider a wrongful act committed even after a rightful entry to be a trespass. n9 In those jurisdictions, one who enters with license, authority, or consent, but who then exceeds the limits of that permission, may commit a trespass. n10 Similarly, a creditor who enters the debtor's premises to take possession of the collateral, but then, in addition, evicts the employees and changes the locks, will be considered a trespasser in some jurisdictions. n11

A slight variant of this split of judicial authority is found in the doctrine of trespass *ab initio*. If an entry on the land of another is made under authority--such as by permission, by agreement, or under authority of law, and the entrant subsequently abuses that authority in a trespassory manner, the entry is considered trespassory from the beginning. n12 Such a situation can commonly arise when one purchases and takes possession of real property pursuant to a real estate sales contract and then fails to make the payments or to vacate after a demand is made; in a jurisdiction that recognizes the doctrine of trespass *ab initio*, such an occupant, upon default, will be considered a trespasser from the time of the first entry. n13 Some jurisdictions adhere to the older rule that no trespass arises unless the original entry was unlawful, and these jurisdictions therefore reject the concept of trespass *ab initio*. n14

Every trespass involves some kind of entry onto plaintiff's land. n15 An entry onto the land of another may be made by a person or a thing n16 and any unauthorized or unlawful entry is a trespass. n17

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/5 (land or real!) w/10 entry

§ 68.02(c) Force.

In the early common law, every person's land was considered enclosed and an entry onto that land not permitted or authorized by the owner was considered to have necessarily broken or violated the enclosure. Thus, by definition, a trespassory entry was always forcible. Today, force is a required element of a trespassory entry, and an unauthorized or unlawful entry is presumed to be forcible. n18 The characteristic of force is attributed to an unlawful entry regardless of how much or little actual force may be used. n19

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/5 (land or real!) w/10 forc!

§ 68.02(d) Actual and Nominal Damage.

Just as the common law assumed that every unlawful entry onto another's property was forcible, the common law also assumed that such a forcible entry resulted in damage to the property. Thus even if little or no actual damage resulted from a trespass, the trespass was still actionable, n20 and in any trespass case nominal damages could be recovered. n21 While that basic doctrine still prevails today, some courts have departed from this traditional position and have held that not even nominal damages should be awarded if the trespass was inadvertent and no actual damage occurred. n22

"Trespass to personal property may be committed by mere intentional physical contact with the chattel of another, and if ... without consent or any other privilege." *United States v. Montague, 75 F. Supp. 2d 670 (S.D. Tex. 1999)* (intent inferred for illegalalien who trespassed on U.S. Soil where mere presence showed intent to enter); *Easterling v. Awtrey Bldg. Corp., 770 So. 2d 606 (Ala. Civ. App. 1999)* (water was diverted onto adjacent property; the court held that intent to do the act which leads to the trespass is the requirement, not the intent to actually trespass).

(n2)Footnote 2. *Brown Jug, Inc. v. International Bhd. of Teamsters, Chauffers, Warehousemen Helpers of America, Local 959, 688 P.2d 932 (Alaska 1984)* (picketing union members trespassed onto retailer's place of business during consumer boycott); *Bullman v. D & R Lumber Co., 464 S.E.2d 771 (W. Va. 1995)* (treble damages and punitive damages awarded for wrongful cutting of timber). *Peterson v. Romine, 960 P.2d 1266 (Idaho 1998)* (Plaintiff parking in unauthorized spot during a shopping trip was a trespasser. No need for the owners of the spot to have signs posted showing ownership; *In re Jason Allen D., 733 A.2d 351 (Md. App. 1999)* (trespass occurred, even though the defendant was under the mistaken belief that he was on his own property, because he intended to be on the land where the trespass occurred).

(n3)Footnote 3. *Hoaglin v. Decker, 713 P.2d 674 (Or. App. 1986)* (action to recover damages for trespass when defendants placed sand, brush and debris on plaintiff's land); *Tissenbaum v. Aerovias Nacionales de Colombia, S.A. In re Air Crash Disaster at Cove Neck, L.I., N.Y. 885 F. Supp. 434 (E.D.N.Y. 1995)* (homeowners' nuisance action against airline whose airplane crashed on their property failed because there was no intent to unlawfully invade the property); *Fondren v. Redwine, 905 S.W.2d 156 (Mo. App. 1995)* (statutory trespass committed by motorist who lost control of vehicle).

(n4)Footnote 4. *Staples v. Hoefke, 235 Cal. Rptr. 165 (1987)* (plaintiffs leased space for computerized photography under a provision preventing the landlord from renting other units in the building to tenants using machinery that would cause the building to vibrate); *United Proteins, Inc. v. Farmland Indus., Inc., 915 P.2d 80 (Kan. 1996)* (chemical discharge from fertilizer manufacturer's plant did not constitute trespass because no intent was shown); *Baltimore Gas & Elec. Co. v. Flippo, 684 A.2d 456 (Md. App. 1996)* (boy did not trespass because there was no conscious intent to do the act that constitutes entry upon someone else's property).

(n5)Footnote 5. *Smith v. Lockheed Propulsion Co., 56 Cal. Rptr. 128 (1967); Yslava v. Hughes Aircraft Co., 1998 U.S. Dist. LEXIS 17228* (D. Ariz. June 26, 1998) (class action where aircraft polluted water in neighborhood: "the tort of trespass 'requires an intentional entry on the land of another.'" The plaintiff does not have to own the land, just have the right to possess the land).

(n6)Footnote 6. *Martin v. Union Pacific R. Co., 474 P.2d 739 (Or. 1970).*

(n7)Footnote 7. *Huling v. Henderson, 29 A. 276 (Pa. 1894).*

(n8)Footnote 8. *Koch Indus., Inc. v. Haxton, 414 F. Supp. 942 (D. Okla. 1976)* (construction company and drilling company damaged plaintiff's pipeline while repairing slush pit); *Edgar v. Riley, 725 So. 2d 982 (Ala. Civ. App. 1998)*(Child bitten by neighbor's dog while on the neighbor's property. Child was given earlier permission to go on land anytime -- no trespass). *Special Force Ministries v WCC TV, 584 N.W.2d. 789 (Minn App. 1998).* (to avoid trespass does not require ownership, just right to possess; defendant had permission to enter, but unlawfully and secretly video-taped the activities in the facility).

(n9)Footnote 9. *Cassinos v. Union Oil Co., 18 Cal. Rptr. 2d 574 (1993).* (Property owner injected waste water into adjacent land owner's mineral estate).

(n10)Footnote 10. *Davis v. Jefferson Sav. & Loan Ass'n, 820 S.W.2d 549 (Mo. App. 1991)* (landlord exceeded the right to enter premises when landlord destroyed tenant's crops). *Trustco Bank of New York v. S/N Precision Enters., Inc., 650 N.Y.S.2d 846 (1996)* (trespass occurred where lessee was aware of agreement to evacuate property by certain date but intentionally failed to do so). Kleppinger v. Anglican Catholic Church, Inc., 715 A.2d.1033 (N.J. Super. 1998) (Bishop under inhibition had no right to use and enjoy any church property and therefore his entry upon church land constituted trespass); *Medical Lab Mgmt. Consultants v. ABC, 30 F. Supp. 2d. 1182 (D. Ariz. 1998)* (Reporter brought a hidden camera into laboratory to expose errors in testing. She was posing as a buyer interested in bringing business to the lab. If the plaintiff "is induced to consent by a substantial mistake concerning the nature of the invasion or the extent of harm to be expected from it and the mistake is caused by the other's misrepresentation, the consent is not effective"). *United States v. Garfield County, 122 F. Supp. 2d 1201 (D. Utah 2000)* (Garfield County has a right of way, consisting of a roadway, over federal park lands. The court held that the County had exceeded its rights under the right of way and was liable for trespass when the County widened the roadway without permission of the federal authorities).

(n11)Footnote 11. *Civic Western Corp. v. Zila Indus., 135 Cal. Rptr. 915 (1970).*

(n12)Footnote 12. *Sedona Self-Realization Group v. Sun-Up Water Co., 598 P.2d 987 (Ariz. 1979)* (defendant dug up owner's water pipe, cut it and put a cap on the end without consent of owner). *Coodington v. Staab, 716 So. 2d. 850 (Fla. App. 1998)* (Trespass to real property when defendant entered plaintiff's apartment and ransacked personal property and deprived him of use of his apartment).

Duresa v. Commonwealth Edison Co., 2004 Ill. App. Lexis 317 (No. 1-03-0317, Mar. 30, 2004) (Power company exceeded its right of easement when it did more than trim bushes and vegetation and thereby committed a trespass.); *Singleton v. Haywood Elec. Mbrshp. Corp., 588 S.E.2d 871 (N.C. 2003)* (Power Company's installation of power poles and a low level power line constituted trespass when company only had authority to repair pre-existing high level line without poles.)

(n13)Footnote 13. *Williams v. Garnett, 608 S.W.2d 794 (Tex. Civ. App. 1980).*

(n14)Footnote 14. *Simpson v. Phillips Pipe Line Co., 603 S.W.2d 307 (Tex. Civ. App. 1980)* (landowner action against pipeline company for damages caused during pipeline replacement).

(n15)Footnote 15. *Crook v. Sheehan Enters., 740 S.W.2d 333 (Mo. App. 1987)* (backhoe operator drove onto property without permission and damaged a sewer pipe that later backed sewage up into plaintiff's basement); *NLRB v. Calkins, 187 F.3d 1080 (9th Cir. 1999)* (action in tespass when entry is "unauthorized"); *ABC v. Gill, 6 S.W.3d 19 (Tex. App. 1999), writ denied* (there can be no trespass without an entry upon land).

(n16)Footnote 16. *Staples v. Hoefke, 235 Cal. Rptr. 165 (1987)* (computerized photography corporation brought trespass action against a leather manufacturer whose punch press emitted vibrations); *Earley v. Roble, 1996 Conn. Super. LEXIS 3229* (No. CV 920334637, Dec. 6, 1996) (defendant enjoined from continuing to keep picnic tables, a shed and drainage pipes on plaintiff's property). *Rubin v. Walpate Constr. Mgmt., 1999 Mass. Super. LEXIS 319* (Mass.

Super. Aug. 23, 1999) (trespass where defendant caused water to enter onto land); *Hoffman v. Vulcan Materials Co., 91 F. Supp. 2d 881 (M.D.N.C. 1999)* (trespass may be unauthorized entry upon land for dust, flying rocks, and shockwaves if plaintiff can show damage); *But see, Adams v. Cleveland-Cliffs Iron Co., 602 N.W.2d 215 (Mich. App. 1999)* (Michigan law of trespass does not cover airborne particles, noise, or vibrations).

(n17)Footnote 17. *Plotkin v. Club Valencia Condo. Assoc., Inc., 717 P.2d 1027 (Colo. App. 1986)* (condominium association trespassed when its agent entered a unit and moved a storage locker on the owner's balcony); *Heathergreen Commons Condo. Assoc. v. Paul, 503 A.2d 636 (Del. 1985)* (action to prohibit adjoining property owners from building a hotel, motel, or restaurant); *Vecchiotti v. Tegetoff, 745 S.W.2d 741 (Mo. App. 1987)* (action against adverse possessors to prohibit them from entering disputed parcel); *United States v. Grabler, 907 F. Supp. 499 (D. Mass. 1995)*(private owner's tennis court built partially on public land caused a continuing trespass on the public land); *Mack v. Edens, 464 S.E.2d 124 (S.C. App. 1995)* (homeowner who failed to prove that road on adjacent land had been dedicated to the public was therefore a trespasser). *McDowell v. State, 957 P.2d 965 (Alaska 1998)* (Real property owners sued state for trespass upon real property when petroleum leaked onto their property).

(n18)Footnote 18. *Letterman v. English Mica Co., 107 S.E.2d 753 (N.C. 1959)* (mine owner dumped dirt in river, raising river bed and backing up water); *Chrysler Credit Corp. v. Koontz, 661 N.E.2d 1171 (Ill. App. 1996)* (repossesser's act of entering private property and repossessing a car was not a breach of the peace); *Johnson v. Marcel, 465 S.E.2d 815 (Va. 1996)* (landlord entered tenants' premises without consent, changed locks, ripped the telephone out of the wall socket, and continually intimidated and harassed the tenants, and was liable to them in common-law trespass); *Rosenfeld v. Thoele, 28 S.W.3d 446 (Mo. Ct. App. 2000)* (defendant constructed a debris area and eleven foot high tie wall on plaintiff's land).

(n19)Footnote 19. *Crook v. Sheehan Enters., 740 S.W.2d 333 (Mo. App. 1987)* (trespass action against backhoe owner); *Palace Properties, L.L.C. v. Sizeler Hammond Square Limited Partnership, 839 So. 2d 82 (La. App. 2002)* (a landowner did not trespass when its contractor rightfully entered plaintiff's property to maintain and improve a servitude of passage); *Thomas v. Harrah's Vicksburg Corp, 734 So. 2d 312 (Miss. App. 1999)* (plaintiff sought damages for common law trespass).

(n20)Footnote 20. *Nissan Motor Corp. v. Maryland Shipbuilding Drydock Co., 544 F. Supp. 1104 (D. Md. 1982), aff 'd, 742 F.2d 1449 (4th Cir. 1984)* (action against shipbuilder for smoke emissions). *In re Tutu Wells Contamination Litigation, 909 F. Supp. 991 (D. Virgin Islands 1995)* (oil companies accused of polluting aquifer, but harm is not a necessary element of the tort of trespass).

Public Service Co. of Colorado v. Van Wyk, 27 P.3d 377 (Colo. 2001) (holding that, in Colorado, an intangible intrusion may be actionable in trespass only if physical damages are proven to be caused by such intangible intrusion).

(n21)Footnote 21. *Brown Jug, Inc. v. International Bhd. of Teamsters, Chauffers, Warehousemen Helpers of America, Local 959, 688 P.2d 932 (Alaska 1984)* (trespass action for boycott picket); *Staples v. Hoefke, 235 Cal. Rptr. 165 (1987)* (press punch operation in violation of lease); *Suggs v. Carroll, 333 S.E.2d 510 (N.C. 1985)* (trespass action by parent against children who refused to leave the home).

(n22)Footnote 22. *Maddy v. Vulcan Materials Co., 737 F. Supp. 1528 (D. Kan. 1990)* (emission of gases and contamination of water); *Southern Mo. Dist. Council of Assemblies of God v. Hendricks, 807 S.W.2d 141 (Mo. App. 1991)* (fence built on plaintiff's property); *Jordan v. Georgia Power Co., 466 S.E.2d 601 (Ga. App. 1995)* (alleged electromagnetic fields could not be the basis for liability in trespass). *National Tel. Coop. Assn. v. Exxon Corp., 38 F. Supp. 2d 1 (D.D.C. 1998)* (Exxon did not commit trespass when its facility inadvertently leaked oil onto the property of National Telephone. "In cases involving an unintentional trespass by imperceptible deposits there must be real and substantial harm to property."); *Smith v. Carbide & Chems. Corp., 298 F. Supp. 2d 561 (W.D. Ky. 2004)* (Where plaintiffs failed to prove actual damage, trespass was not actionable, where trespass occurred by imperceptible particles).

CHAPTER 68 TRESPASS ON LAND

8-68 Thompson on Real Property, Thomas Editions § 68.03

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 68.03 Trespass from Encroachment by Structures.

[Go To Supp]

§ 68.03(a) Encroachment by Objects Interfering with Structures on the Boundary Line.

Sometimes a landowner's boundary line is marked by a building, a fence, a wall, or some other structure, and any interference or even touching of that structure on the boundary line may constitute a trespass. Courts have found a trespass where dirt has been piled against such a structure, or a vine from adjacent land has been permitted to grow onto such a structure, or even where a sign has been painted on the building on the boundary line. n23 Attaching a wire to such a structure is a trespass. n24 Because a landowner's boundary line is considered to be a vertical boundary which extends upward from the boundary on the surface of the land itself, such a trespass can occur at any point along that vertical plane.

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/5 (land or real!) and (encroach! or interfere!) w/10 boundary

§ 68.03(b) Encroachment by Structures Extending over the Boundary Line.

A trespass against that vertical boundary line plane may be committed by means of any kind of structure that encroaches on, over or under the land of another. n25 Any object or structure that extends over the boundary line of adjacent land and violates the air space of adjacent land constitutes a trespass. n26 Examples of such trespasses by encroaching structures have included wires that extend across the air space of adjacent land, n27 and eaves, n28 shutters, n29 walls, n30 roofs, n31 and bay windows n32 that project over the boundary line and into the air space of adjacent land.

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/5 (land or real!) and (encroach! or interfere!) w/10 boundary

§ 68.03(c) Encroachment by Party Walls and Partition or Division Fences.

Often adjoining landowners will mark the division of their respective properties by some sort of boundary structure. Such a structure could be a partition or division fence or, if the property division is inside a building, the dividing structure will be referred to as a party wall. As between two interconnected buildings, a party wall connects and divides the two buildings, and ordinarily each of the adjoining landowners owns the portion of the wall resting in the owner's respective side of the boundary line. n33 In terms of ownership, usually each landowner has a separate title in the portion of the party wall resting on the owner's side of the dividing line, coupled with an easement interest in the portion held by the other owner. n34 Less commonly the adjoining landowners may hold ownership of the wall by tenancy in common. n35 If one landowner builds a party wall which rests partly on the land of the adjoining owner, and the construction is without the consent or authorization of the adjoining owner, a trespass has occurred. n36 Even if a party wall has been placed by consent of the adjoining landowners, if one of the owners has a duty to maintain the wall in good condition and from neglect of that duty the wall collapses so as to damage the adjoining property, again a trespass has occurred. n37

The partition or division fence is similar to a party wall, a kind of outdoor version of a party wall resting on the boundary line dividing two contiguous properties. n38 Often such a partition or division fence is used by each owner as a part of a larger enclosure on the owner's land. n39 Ordinarily, a landowner has no duty to construct or to maintain a partition or division fence, n40 although such an agreement and obligation can arise by agreement of the parties or even as a matter of prescriptive right between adjoining landowners. n41 Such a prescriptive right can arise when a landowner has been the sole provider of maintenance for a partition fence uninterruptedly during the prescriptive period in that jurisdiction; the other owner may thereby obtain a prescriptive right to have the maintenance activity continued. n42 If such a prescriptive right has arisen, the obligated party has a right to go onto the land of the one holding the right in order to conduct the necessary maintenance on the fence. n43

In an ideal world, a partition fence rests on exactly equal portions of the adjoining properties. n44 If a party or division fence is under construction, and one landowner perceives that the contiguous properties will bear unequal portions of the fence, the landowner is entitled to enjoin the construction of the fence until the inequality is corrected. n45 The theory of exactly equal support from adjoining properties is also applied to partition fences built in a zig-zag fashion, crossing and re-crossing a boundary line which is not in zig-zag form; n46 likewise when a ditch is used to mark a boundary between adjoining properties, it will be presumed that the ditch rests on equal portions of each parcel of land. n47

The adjoining landowners hold a title to a partition or a division fence as tenants in common, unless they have agreed otherwise or it is otherwise determined by statute or covenant. n48 If one of those tenants in common damages, removes, opens, or destroys any part of the fence, the other tenant or tenants in common have a right of action in trespass. n49

CHAPTER 68 TRESPASS ON LAND

8-68 Thompson on Real Property, Thomas Editions § 68.04

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 68.04 Trespass from Encroachment by Vegetation.

[Go To Supp]

§ 68.04(a) Encroachment by Vegetation on the Boundary Line.

§ 68.04(a)(1) The Right to Remove Vegetation on the Boundary Line.

When trees and shrubs are growing on and straddling the boundary line between contiguous parcels of land, the adjoining landowners hold ownership in those trees and shrubs as tenants in common. n50 Because the landowners are tenants in common, neither has the right to destroy or damage the vegetation without the permission of the other; n51 however, either owner may remove any portion of that vegetation that threatens serious damage to the owner's property. n52 In one case, the roots of a tree on the boundary line eventually pushed in the basement wall of a house on one of the parcels of land, and under those circumstances the houseowners were entitled to remove the entire tree, although at their own expense. n53 Even where such boundary line vegetation does threaten serious damage to one of the properties, the owner whose land is threatened may not by legal action compel the other owner to remove the vegetation. n54

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! and encroach! w/20 (vegetation or trees or plants or shrubbs or growth)

§ 68.04(a)(2) The Right to Cut Back Vegetation on the Boundary Line.

As mentioned in the preceding paragraph, one adjoining landowner may remove trees or shrubs straddling the boundary line if that vegetation threatens serious damage to the owner's property. Even without the threat of serious damage, one of the adjoining owners may cut back such roots and branches of the vegetation that extend beyond the boundary line onto the owner's property. However, that cutting back may not extend to cutting into and damaging the trunk itself. n55 In one case, an owner was restrained entirely from cutting back any portion of a row of trees that had been planted and was being used as a windbreak. n56 If one of the owners unnecessarily cuts back or damages boundary line vegetation, the other owner may sue in trespass, even though both owners hold the vegetation as tenants in common. n57

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! and encroach! and (vegetation or tree or plant or growth) w/10 cut or trim or remov!

§ 68.04(b) Encroachment by Vegetation Extending or Hanging over the Boundary Line.

§ 68.04(b)(1) The Right to Cut Back Vegetation Extending or Hanging over the Boundary Line.

Adjoining landowners, as discussed above, have a right to remove or to cut back vegetation that is situated on and straddles the property line between contiguous parcels of land. In some cases the vegetation is situated wholly upon one parcel of land, but extends roots or branches over onto adjoining land. While landowners are free to plant trees and shrubs as they wish on their own land, n58 they may be liable in trespass for damage caused by roots or branches which extend over the boundary line of adjoining property and encroach on that contiguous land. n59 If a tree that extends its branches or roots onto adjoining property was not planted but grew naturally in its location, trespass liability of the treeowner will usually be denied. n60 And in some jurisdictions recognizing a right of private self-help to cut back encroaching vegetation, a judicial right of action against the neighboring landowner who owns the vegetation for such relief has been denied altogether. n61

This private right of self-help to cut back encroaching vegetation means that a landowner may, without permission, cut back roots or overhanging branches encroaching on the property and which are part of vegetation growing on adjacent property. n62 This private right of self-help is a very limited right, and entitles the landowner only to abate the nuisance or cure the trespass created by the overextending roots and branches; n63 the landowner obtains no property right in the cuttings and the branches may not be converted to use by the owner of the encroached property. n64 Indeed, as this rule has developed in English law when overhanging branches have been cut, the owner of the tree has a right to go onto the encroached property and retrieve the cut branches and any fruit that they were bearing. n65

As noted before, in some jurisdictions courts deny a right of legal action against an owner of encroaching vegetation, because the prospective plaintiff has a right of self-help to remove the offending roots and branches. Nevertheless, even in those jurisdictions a right of judicial action exists if the encroaching roots or branches are extended from so-called noxious trees or plants. n66 "Noxious" vegetation is broadly defined as that which is "poisonous, destructive of health or otherwise pernicious." Even otherwise harmless vegetation which creates serious damage may be termed noxious; when the roots of an ornamental shade tree destroyed and polluted a well on adjoining land, the tree was deemed noxious. n67

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! and encroach! w/20 (vegetation or tree or plant or shrub or growth)

§ 68.04(b)(2) The Right to Take Fruit from Vegetation Extending or Hanging over the Boundary Line.

If, as was mentioned in the preceding section, the owner of encroaching vegetation has the right to go onto other land to retrieve cut branches and the fruit they are bearing, then, of course, the owner of encroached land who cuts off the overhanging branches may withhold from the owner of the tree neither the branches nor the fruit. n68 Accordingly, when the branch of a tree, growing on one parcel of land, overhangs onto adjoining land, the owner of the adjoining land may not take the fruit from that overhanging branch and, in fact, the owner of the tree is entitled to come onto the adjoining property to harvest the fruit. n69 Even if the fruit from an overhanging branch has fallen to the ground on adjoining land, the fruit may not be taken and converted by the owner of encroached land. Usually the owner of the tree and fruit may come onto the encroached land to take possession of the fruit which has fallen to the ground. n70

CHAPTER 68 TRESPASS ON LAND

8-68 Thompson on Real Property, Thomas Editions § 68.05

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 68.05 Trespass from Encroachment by Objects Coming onto the Land.

[Go To Supp]

§ 68.05(a) Elements of Trespass Liability for Encroachment.

When tangible objects such as rocks or portions of a building fall or are projected onto the property of another, clearly a trespassory invasion has occurred. The trespassory nature of that invasion becomes less clear as the intruding object becomes less tangible, such as when fumes or ashes drift or migrate from one parcel of land to another. Some such interferences with land use are often considered nuisances rather than trespasses, and cases can be found in which either legal theory is appropriate. In those instances when the invasions of land are physical, yet ephemeral, plaintiffs may often pursue relief under either trespass or nuisance theories. In this section are described examples of tangible things coming onto land that are almost all represented by trespass cases, but an occasional nuisance case emerges.

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/5 (land or real!) and encroach! w/20 liab!

§ 68.05(b) Strict Liability for Trespass by Encroachment.

It is still the common law rule that no landowner liability results when water or other matter gathers naturally on one's land and then migrates to the land of another, causing damage. However, if the discharge of the water or other matter occurs even partially because of a building or other artificial structure, so that the migration is no longer completely natural, the owner of the land from which the discharge originates may be liable for damage caused on nearby land, at least if negligence occurred in the interfering with the natural migration. This common law rule of liability for negligence was altered by the English case of Rylands v. Fletcher, n71 which imposed strict liability on a landowner who intervened in the natural runoff or migration which caused damage on other land. In American jurisdictions which have adopted at least some aspects of this rule of strict liability, a landowner who makes some unusual or unnatural use of property will be liable for damage caused to nearby land if the use is not kept under close control. n72 A land use is considered unusual or inappropriate if the potential damage to nearby land is much greater than the potential benefit to the user. n73

In a related rule, most American courts impose strict liability for property damage caused by extra-hazardous activities or the use of dangerous instrumentalities on one's land. n74 In addition to the typical example of ultrahazardous or extra-hazardous activity of blasting operations which cause damage through seismic vibrations, n75 another example is depositing dangerous materials on land so that damage is caused when the materials explode. Thus when a landowner left railroad tanker cars loaded with propane near warehouses on other land, that owner was liable for damage to the warehouses that occurred when the propane exploded. n76

§ 68.05(c) Examples of Trespass by Moving Objects Coming onto the Land.

§ 68.05(c)(1) Dirt, Stones and Debris.

Dirt, stones and debris may normally move from one parcel of land to another, and thus cause a trespass, in two situations. In one, a landowner may deposit a pile of dirt near the boundary line and when the pile or portion of the pile slides onto adjacent land, trespass liability may result, at least if negligence is shown. n77 In the other situation, dirt, stones and debris may be cast onto the land of another as the result of blasting or some other similar extra-hazardous activity or through the use of a dangerous instrumentality. n78 In these situations strict liability may be imposed with no showing of negligence required. n79

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/5 (land or real!) w/50 (dirt or soil or stone or debris)

§ 68.05(c)(2) Changing Grade of Contiguous Land.

Although one landowner is usually free to change the grade or natural topography of the land, if that change forces an adjoining landowner to change the way the adjoining land is used, the landowner who forces the change may be liable in damages and also may be required to restore the original grade or topography. n80 If a landowner changed the grade or topography by raising the level of the land above its natural level, then that owner must take steps to see that the higher level is retained within the land's boundaries and does not subside over onto neighboring land. n81

LEXIS: Trespass! w/5 (land or real!) and chang! w/10 (grade or topography)

§ 68.05(c)(3) Falling Wall or Building.

Trespass liability may be imposed when a wall n82 or a pile of lumber n83 or other material falls onto adjoining property, at least if damage is caused. If a landowner conducts an excavation on the land and causes a building or other structure on the land to collapse onto adjoining property, trespass liability will result. n84

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/5 (land or real!) w/50 (fall! or fell or collaps!)

§ 68.05(c)(4) Explosions and Fires.

Damage to nearby land resulting from explosions and fires is usually pursued on the basis of a nuisance theory, but a

trespass action is also available. n85 In addition to whatever seismic damage occurs, when blasting casts rocks and dirt and other debris onto adjoining property, a right of action in trespass arises for the property owner. n86

Fire enters into trespass litigation in quite another context. If an oncoming fire is threatening to property, and the threat can be reduced or eliminated by going onto other property to prepare a fire break or to destroy structures that would help spread the fire, liability for such a trespass may be excused on the basis that it was necessary or justified under the circumstances. n87

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/5 (land or real!) w/50 (explosion or fire)

§ 68.05(c)(5) Cinders and Soot.

The casting of cinders and soot onto neighboring property is frequently treated as a nuisance, but a trespassory invasion has also been held to occur when a smokestack or a cupola is functioning so close to another's land that it deposits cinders and soot particles on that other land. n88

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/5 (land or real!) w/50 (cinder or soot or ash)

§ 68.05(c)(6) Sewage, Foul Air, Fumes, and Pesticides.

Both trespass and nuisance liability, under the common law, can result from discharges of sewage, n89 harmful gases, or foul air from one's property onto other land. n90 If such discharges also violate various environmental and pollution laws and regulations, those violations may also give rise to various private rights of action.

The problem of drifting pesticides presents different issues. A landowner is entitled to use chemicals and other substances to protect premises, including farms and crops, from infestations of insects and weeds. n91 Even if chemical sprays drift onto adjoining land and present health or other problems, liability will usually result only if those insecticides and herbicides have been used negligently and in a manner that does not minimize the interference with other land. n92 Again, a modern element in these cases is the presence of numerous environmental laws and regulations, some of which may impose private party liability for their violation. When cotton farmers had crops damaged by aerial spraying of nearby rice fields, they were able to present evidence of non-compliance with state environmental regulations as one of their elements of proof. n93

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/5 (land or real!) w/50 (sewage or pollution or pesticide or fume or foul air)

§ 68.05(c)(7) Rainwater, Ice and Snow.

Liability for damage caused by rainwater runoff from one land onto other land is governed by two competing rules. Under one rule, the owner of the land discharging the rainwater is liable only if negligent and if the water actually causes damage to the adjoining land. This rule establishes a standard of only ordinary care in discharging the rainwater. n94

Under the other rule, strict liability is imposed for any damage caused by rainwater discharged from a building (but not from the land itself) onto adjoining land. n95 Other cases seem to have imposed trespass liability without so much

regard to formal rules as to a due regard for the equities of the particular facts of the case. Thus, if a landowner has constructed a roof or some other portion of a building so that it directly or indirectly forces water to run off onto adjoining land and that runoff causes damage, the runoff is considered a trespass. n96 Failure to contain runoff, when it is reasonable to expect such containment, may result in liability; when a landowner whose building does not have rain gutters for the eves or roof discharges runoff onto adjacent property, trespass liability for damage will be imposed. n97 If gutters or other conduits for rainwater are provided, they must have sufficient capacity for ordinary storms in order for liability for their runoff damage to be avoided. n98 If gutters of ordinary capacity have been provided, damage from discharges caused by extraordinarily heavy rainfall will not create trespass liability. n99

Similar liabilities attach to accumulations of snow and ice that slide from a roof or other structure onto adjoining property; ordinarily the owner of the structure will be liable for damage caused when those accumulations slide onto other property. n100

Another example of artificial creation of runoff occurs when a landowner allows piped water to flow onto adjacent property, which will also produce trespass liability for resulting damage. n101 If water flows naturally onto adjacent property without being piped or otherwise diverted, then no trespass liability results. Discharges caused by the natural features of the land are not actionable.

Some jurisdictions have accepted the rule announced in the English case of Rylands v. Fletcher, n102 which imposes strict liability on a landowner who brings anything onto the property, including water, that will likely cause damage if permitted to escape.

LEXIS: Trespass! w/5 (land or real!) w/50 (rain! or ice or snow)

§ 68.05(c)(8) Trespass by Animals

A landowner's failure to restrain livestock or other animals from trespassing onto adjacent owners' land may result in liability for damages caused.. n103 A 1994 Illinois case raised the prospect that unrestrained cattle could cause liability under the state common law, under the state Running at Large Act, and under the state Fence Act, including punitive damages. The court in that case held only the common law applicable and denied punitive damages; however, the exposure to multiple liability is a real risk. n104

CHAPTER 68 TRESPASS ON LAND

8-68 Thompson on Real Property, Thomas Editions § 68.06

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 68.06 Procedural Rules for Actions Based on Trespass to Land.

[Go To Supp]

§ 68.06(a) Proper Parties.

§ 68.06(a)(1) Proper Plaintiffs.

A plaintiff in a trespass action must have some kind of actual or constructive possession of the land where the trespass occurred. n105 However, possession rather than ownership is the key requirement. If a plaintiff is in actual possession of the subject property, such possession need not be based on a legal title, or on a valid title, or on any title at all, as long as the defendant does not have superior title. n106 If a plaintiff brings the action as an actual occupant without title to the land, the right of action in trespass pertains only to the lands actually occupied by the plaintiff. n107

For those plaintiffs who have actual title or who are adverse possessors with color of title (such as an invalid deed), their actual possession of a portion of tract of land is constructively extended to the entire parcel represented by their title or color of title. n108 Such a plaintiff's right of action in trespass therefore extends to the lands described by the title or color of title. When a plaintiff is in purposeful adverse possession of a tract of land, but has not yet perfected or acquired title, actual possession of a portion of the tract is constructively extended to be possession of the entire tract. n109 Such an adverse possessor, even when title has not yet been acquired, is a proper plaintiff against any defendant except one with superior title. n110

Other parties with ownership interests in land, but who do not have present rights of occupancy, generally do not have the possessory rights to qualify as trespass plaintiffs. Included among these are landlords, n111 remaindermen, n112 and reversioners. n113 On the other hand, life tenants n114 and trustees (who hold legal title) n115 are deemed to be in possession and are therefore proper plaintiffs in a trespass action. Creditors, including mortgagees, who have assumed actual possession of the encumbered property or have a right to actual possession, are also considered to be in possession and are proper plaintiffs in a trespass action against third persons. n116

Possession of land can occur under many different circumstances, and one who enters land only sporadically or incidentally to other purposes, and not for the purpose of taking possession, does not possess the land for the purposes of qualifying as plaintiff in a trespass action. n117 Possession, once obtained, need not be exclusive and may be shared

with others. n118

The plaintiff in a trespass action must be able to show possession at the time the trespass is alleged to have occurred. n119 Usually a landowner may not bring action for a trespass that occurred while the land was occupied by the owner's predecessor in interest. n120 As applied to a continuous trespass, this means that a plaintiff in an action for such a trespass may seek recovery of damages sustained from the trespass that occurred during the plaintiff's time of possession. n121

All of these rules may be summarized in the statement that the proper plaintiff in a trespass action is one who holds possession of the property upon which the trespass occurred at the time the trespass occurred. Therefore, a plaintiff who has conveyed title but remains in possession at the time the trespass occurred is the proper plaintiff in a trespass action. n122 And a plaintiff who is divested of both title and possession after the trespass has occurred and the trespass action has commenced is still entitled to recover damages pertaining to the time of possession. n123

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/5 (land or real!) plaintiff w/10 proper w/30 possess!

§ 68.06(a)(2) Proper Defendants.

The proper defendant in a trespass action is the party or parties who actually commit or cause others to commit the act of trespass, n124 or whose actions result in trespasses by others. n125 In addition to the actual participants in a trespass as defendants, any others who assist, encourage, command or in some other way participate in committing the trespass are jointly and severally liable as co-trespassers. n126 Under the usual master-servant rules, an employer is liable for a trespass committed by an employee, if the trespassory acts were within the scope of employment and in furtherance of the employer's business. n127 If the trespass is to land, the trespassing employee is also individually liable. n128

In a broader sense, both principles and agents are liable for trespasses committed by the agents within the scope of the agency. n129 As to corporations, corporate officers or agents may be held individually liable for acts constituting trespass, n130 and the corporation is also liable if the acts were committed in the course of corporate business. n131

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/5 (land or real!) w/50 defendant w/10 proper

§ 68.06(b) Pleadings.

§ 68.06(b)(1) Elements of the Complaint.

The plaintiff's complaint in a trespass action is fairly straightforward and should include allegations of all the facts essential to constitute the cause of action, including a description of the activity that resulted in the invasion of plaintiff's land. n132 The complaint should also aver the particular possessory interest held by the plaintiff, n133 and a description of the plaintiff's land sufficient to establish that venue is proper. n134

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/5 (land or real!) and element w/10 (plead! or complaint)

§ 68.06(b)(2) Possible Defenses in a Trespass Action.

Because most defenses in a trespass action are not revealed in the general denials of complaint allegations, the defenses

should be pleaded specifically. This is even true of such general defenses as statute of limitations n135 and accord and satisfaction in trespass actions. n136

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/5 (land or real!) w/20 defense

§ 68.06(b)(2)(i) Title.

A defendant may present a complete defense to a complaint of trespass by proving ownership and right of possession of the property on which the trespass is alleged to have occurred. Not only could such a defendant not make an unauthorized entry on property owned by the defendant (except in certain landlord/tenant situations), but a plaintiff without ownership or right of possession of that land would not have the right to bring such a trespass action. n137 For this defense, however, it is required that the defendant affirmatively establish title rather than merely show weaknesses in the plaintiff's title. n138

§ 68.06(b)(2)(ii) Authority.

A defendant in a trespass action may allege that the trespass was committed under legal authority. A public official, for instance, may commit a trespass in the course of acting in a lawful manner within the scope of official authority or may even be acting under command of a public law or court order. n139 This defense will fail if the authority is determined to be unconstitutional or otherwise invalid. n140

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/50 defense w/20 authority

§ 68.06(b)(2)(iii) Consent.

A defendant in a trespass action will prevail if able to prove that the entry onto plaintiff's land occurred under the plaintiff's consent, n141 even if the consent was given under a mutual mistake of fact. n142 An example of trespassory entry under mutual mistake of fact is when both parties erroneously believe that the landowner's agent has authority to enter into a lease with the party accused of the trespass. n143 Consent will be a defense to a trespass action, even if the consent was obtained through misrepresentation, if previous entries had been permitted. n144 This would be an example of trespass not being the appropriate theory of the case where the entry was peaceable.

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/50 defense w/20 consent!

§ 68.06(b)(2)(iv) Estoppel.

The possibility of estoppel as a defense arises only in the context of the facts of each particular trespass case. A trespass plaintiff is estopped from pressing the charge if to grant relief would be inequitable under the circumstances. n145 In trespass actions, the defense of estoppel can be established by showing the plaintiff's consent to or acquiescence in the trespass, followed by the defendant's change in position by relying on that consent or acquiescence. n146 If a defendant has been admitted onto the land and is in occupancy, that occupancy cannot be used as defense to a trespass charge before the requirements for adverse possession have been met. n147

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/50 defense w/20 estopp!

§ 68.06(b)(2)(v) Necessity.

A defendant may claim that a trespass was justified or excused by either public or private necessity. n148 In an example of private necessity, one who holds a right of way easement as the dominant tenement may sometimes go onto the property of the servient tenement to clear an obstruction from the right of way. n149 It has also been noted that one may destroy a building on the land of another in order to stop the spread of a fire that threatens one's own land or the surrounding area in general. n150 In rare instances, a landowner may go onto nearby land to abate a nuisance, and this would give rise to the defense of necessity, if the other landowner complains of trespass.

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/50 defense w/20 necess!

§ 68.06(b)(2)(vi) Compulsion.

A defendant in a trespass action may plead as a defense that the defendant was forced to commit the trespass and had no reasonable alternative but to yield to that compulsion. n151 This defense is not appropriate and not available to an employee or agent who has been directed by the employer or principal to commit the trespass. n152

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/50 defense w/20 (compulsion or compel!)

§ 68.06(b)(2)(vii) Defenses Not Available.

Because an action in trespass is premised upon an invasion of one's land, without regard to motive in most cases, certain standard defenses available in other legal actions are not sufficient to excuse a trespass. Examples of these inappropriate defenses include intent, good faith, n153 advice of counsel, n154 qualified immunity, n155 contributory negligence, n156 infancy, n157 and mistake of law or fact, except in sustaining the defense of consent. n158 Although a plaintiff may base a trespass action on unperfected adverse possession, that same unperfected adverse possession is not an adequate defense to a complaint of trespass.

COMPUTER-ASSISTED RESEARCH:

LEXIS: Trespass! w/50 defense w/5 (invalid or not available)

§ 68.06(c) Burden and Standard of Proof.

In trespass actions, as in actions generally, plaintiff must prove the elements of the case, n159 including entitlement to relief, n160 by a preponderance of the evidence. n161 Likewise the defendant must establish any affirmative defenses also by a preponderance of the evidence. n162

§ 68.06(d) Remedies.

§ 68.06(d)(1) Recovery of Damages.

Because of the assumption, under medieval law, that every trespass necessarily included a violation of the enclosure around a parcel of land, and that violation was necessarily forcible and caused damage, the rule developed in legal actions that every trespass proved should be remedied by an award of damages, and even nominal damages could be

awarded without proof of actual injury. n163 Some courts in the modern era have taken the view that even nominal damages should not be awarded, if the trespass was inadvertent and did not result in actual damage. n164 The *Restatement (Second) of Torts* takes that reform even further with the position that an inadvertent and non-negligent trespass should not result in any liability, even if damage is caused. n165

In general, the measure of damages for trespass actions is whatever amount is required to place the plaintiff and the plaintiff's land in the same position as enjoyed before the trespass. n166 Damages calculated by this measure also take into account the principal purpose for which the property is used, n167 and the effect of the trespass on the entire parcel of property as well as the portion invaded. n168 Where a trespass renders a portion of the plaintiff's property unfit for use, the plaintiff may recover, among other items, damages equal to the fair rental value of the portion that cannot be used, n169 even if that portion was not being used at the time of the trespass. n170

When the trespass is repeated or continuing, damages for past offenses are awarded up to the time that the action was commenced, n171 although occasionally the damage award will cover up to the time of the trial. n172

Not all jurisdictions permit awards of exemplary damages in trespass cases, but in those that do, such damages can be awarded in cases where the defendant has acted with malice, fraud or some similar motivation. n173 In the jurisdictions that do permit awards of exemplary damages, some may not allow those awards if actual damages are not also recovered. n174 Where money damages are recovered, interest on the damage amount may be allowed from the time of the trespass, but some courts deny such pre-judgment interest. n175

Many states award multiple damages for cutting of timber. n176

LEXIS: Trespass! w/5 (land or real) w/50 remedy w/10 damages

§ 68.06(d)(2) Injunctive Relief and Ejectment.

Injunctions to prevent or remove encroachments or a trespass are the usual relief in cases where encroachments by structures or vegetation or other continuing trespasses are proved. n177 Injunctions for removal of encroachments have been issued in cases involving buildings, n178 walls, n179 footings, n180 and roofs. n181 Theoretically, the old remedy of ejectment could also be used for this purpose, although some courts have questioned whether ejectment is the correct remedy for an encroaching structure that merely overhangs the plaintiff's property rather than occupying a portion of the surface of the land. n182 Ejectment has not been used as a remedy to remove the encroachment of overhanging vegetation. n183

If ejectment is available, then its availability as an adequate legal remedy could preclude the availability of injunction, n184 or an injunction could be granted based on the denial of the availability of ejectment as an adequate legal remedy.

In general, a plaintiff qualifies for injunctive relief by showing that no adequate legal remedy is available and that the harm that will be caused by the trespass, if it is allowed to continue, will be irreparable. n185 Harm is irreparable if the damage caused cannot be repaired or restored or compensated for by money or cannot be adequately measured. n186 By contrast, a plaintiff qualifies for the remedy of ejectment merely by showing that the defendant is in trespassory occupancy of plaintiff's land.

Injunctive relief may be denied or moderated if courts take into consideration the relative hardship or inconvenience to the parties that would be caused by granting the injunction. n187 No such balancing occurs, however, when it is established that the encroachment is intentional or willful. n188

As a form of equitable relief, the suit for injunction is subject to the usual equitable defenses of consent, n189 acquiescence, delay or laches, n190 and estoppel. n191 The defense of consent is also appropriate, if the plaintiff has given verbal permission to enter the property. n192 If the plaintiff has let overgrowing branches and shrubs intrude for so long that damage has occurred to the plaintiff's house and fence, the defendant may invoke acquiescence or laches as a defense in an action for equitable relief by the plaintiff. n193 Estoppel was an appropriate defense against a plaintiff who stood by while the defendant completed construction of a garage in violation of building regulations and then complained of the violations. n194 Also, the court purporting to grant an injunction may lack the requisite judicial power to do so. n195

If a plaintiff obtains a court order directing the defendant to remove an encroachment from the plaintiff's land, the plaintiff must usually permit the defendant to enter onto the land to effect the removal. n196 In a case where the plaintiff refused such entry to the defendant, the defendant simply paid for one-half of the cost of removing the encroachment. n197

LEXIS: Trespass! w/5 (land or real!) w/50 remedy w/10 (injunc! or enjoin or eject or remov!)

FOOTNOTES:

(n1)Footnote 105. *Dunbar Corp. v. Lindsey, 905 F.2d 754 (4th Cir. 1990)* (plaintiff brought trespass action when armed military police entered property allegedly belonging to plaintiff, removed plaintiff's signs, posted signs forbidding trespassing on U.S. property, and erected a fence around the property); *Maintenance Equip. Co. v. Godley Bldrs., 420 S.E.2d 199 (N.C. App. 1992) review denied, 426 S.E.2d 707 (N.C. 1993)* (tenant who occupied land owned by railroad brought trespass action for damages resulting when adjacent property owner graded and bulldozed property); *Gowanus Indus. Park, Inc. v. Amerada Hess Corp., 2003 U.S. Dist. Lexis 15580* (No. 01-CV-0902 (ILG), E.D. N.Y., Sept. 5, 2003) (landowner who was unable to show constructive possession of waterway could not bring an action for trespass against a corporation which built a mooring on the disputed land).

(n2)Footnote 106. *Avery v. Geneva County, 567 So. 2d 282 (Ala. 1990)* (in action brought by father of drowning victim who brought action against county, it was held that the victim had no interest in the land and so could not sustain a trespass action); *Posey v. Leavitt, 280 Cal. Rptr. 568 (1991)* (condominium owner could not build a deck extension into the common area without the consent of all other owners); *Owens v. Smith, 541 So. 2d 950 (La. App. 1989)* (action brought to determine location of boundary between two lots; one neighbor claimed adverse possession).

(n3)Footnote 107. *Swinson v. Jones, 33 S.E.2d 376 (Ga. App. 1945)* (plaintiff was not entitled to recover on possession alone, where evidence did not show that plaintiff was in actual possession of land from which timber was cut).

(n4)Footnote 108. *Swinson v. Jones, 38 S.E.2d 878 (Ga. App. 1945)* (person who was in possession and had color of title and was able to prosecute a trespass action).

(n5)Footnote 109. *Firment v. Bryden, 387 N.Y.S.2d 737 (1976)* (trespass action brought against neighbor who placed debris on plaintiff's land and removed surveyor's pin on land).

(n6)Footnote 110. *Sloss-Sheffield Steel & Iron Co. v. Wilkes, 165 So. 764 (Ala. 1936)* (the roofs of two mines on defendant's land caved in, which drained all water from plaintiff's springs and wells and caused cracks and crevices to occur on plaintiff's land), overruled by *Henderson v. Wade Sand and Gravel Co., Inc., 388 So. 2d 900 (Ala. 1980).*

(n7)Footnote 111. *Gifford v. City of Colorado Springs, 815 P.2d 1008 (Colo. App. 1991)* (restaurant lessee brought inverse condemnation and trespass action against city arising out of alleged losses caused by city public works project).

(n8)Footnote 112. *Austin v. Hallstrom, 86 A.2d 549 (Vt. 1952)* (remaindermen could not bring action of trespass without joining life tenant).

(n9)Footnote 113. *Dieterich Int'l Truck Sales, Inc. v. J.S. & J. Services, 5 Cal. Rptr. 2d 388 (1992)* (adjoining landowner claimed prescriptive easement after twenty-two years of using a strip of land), but see, *Friends of the Trails v. Blasius, 93 Cal.Rptr.2d 193 (Cal. Ct. App. 2000)* (distinguishing between possessory and nonpossessory interests in property).

(n10)Footnote 114. *Schell v. Rice, 246 S.E.2d 61 (N.C. App. 1978) review denied, 248 S.E.2d 253 (N.C. 1978)* (adjoining landowner constructed building which encroached on part of plaintiff's land and the landowner also cut trees which were entirely on plaintiff's land).

(n11)Footnote 115. *Chicago Title & Trust Co. v. Weiss, 605 N.E.2d 1092 (Ill. App. 1992)* (trustee of land trust brought suit seeking to enjoin neighbor from maintaining basketball hoop on driveway and from trespassing onto lot owner's property); *Pan Coal Co. v. Garland Pocahontas Coal Co., 125 S.E. 226 (W. Va. 1924)* (dispute concerning chain of title).

(n12)Footnote 116. *McCorristin v. Salmon Signs, 582 A.2d 1271 (N.J. Super. 1990)* (mortgagees of real property brought action against third party for damage caused to property when third party bolted advertising sign through aluminum siding and plaster of building on property).

(n13)Footnote 117. *Bileu v. Paisley, 21 P. 934 (Or. 1889)* (sheep trespassed on respondent's property, causing damage to his ditches).

(n14)Footnote 118. *Kinney v. Service, 52 N.W. 53 (Mich. 1892)* (plaintiff, who possessed the land as a cotenant, brought a trespass action against an intruder).

(n15)Footnote 119. *Flobert Indus. v. Stuhr, 343 N.W.2d 917 (Neb. 1984)* (grantee of right-of-way brought action seeking to enjoin neighboring landowners from trespassing and encroaching upon its right-of-way and to recover damages); *Zanoni v. Hudon, 678 A.2d 12 (Conn. App. 1996)* (ward's child and child's spouse lacked standing to bring trespass action).

(n16)Footnote 120. *Vaughn v. Missouri Pub. Serv. Co., 616 S.W.2d 540 (Mo. App. 1981)* (location of anchors and guy wires on plaintiff's property in support of a permanent transmission line did not constitute a continuing trespass, but was a trespass against plaintiff's predecessor in title). *But see, Williams v. Lynd Tp., 312 N.W.2d 110 (Minn. 1981)* (where grantor assigned all legal causes of action arising from use or misuse of conveyed premises to grantee in a warranty deed); *Bassilakis v. Saland Corp., 1998 Conn. Super. Lexis 1064* (Conn. Super. Apr. 8, 1998) (plaintiffs are owners and lessors of the property).

(n17)Footnote 121. *Matthews v. James Lumber Co., 122 S.E. 480 (N.C. 1924)* (defendant negligently trespassed by burning parts of plaintiff's land).

(n18)Footnote 122. *Hayward v. Sedgley, 14 Me. 439 (1837)* (trespasser cut and removed timber).

(n19)Footnote 123. *Bowman v. Hibbard, 236 S.W.2d 938 (Ky. 1951)* (removal of coal from plaintiff's land).

(n20)Footnote 124. *Breiding v. Wells, 800 S.W.2d 789 (Mo. App. 1990)* (adjoining landowners allegedly trespassed and damaged landowner's trees). *Van Eck v. Whitney Village Nursery Sch., 1999 Conn. Super. LEXIS 2921* (Conn. Super. Oct. 28, 1999) (trespass could not be imputed to defendant where it had no duty to prevent damage to plaintiff's parking lot).

(n21)Footnote 125. *Freese v. Buoy, 576 N.E.2d 1176 (Ill. App. 1991)* (tenants under sharecropping agreement

brought action against landlord to recover for trespass by another tenant who destroyed tenant's crop and planted a different crop).

(n22)Footnote 126. *Parker v. Kangerga, 482 S.W.2d 43 (Tex. Civ. App. 1972)* (timber owners brought action against paper mill, pulpwood dealer and hauler to recover damages for conversion of timber).

(n23)Footnote 127. *Collum v. Argo, 599 So. 2d 1210 (Ala. Civ. App. 1992)* (action brought against septic tank installer and mobile home seller to recover damages for injuries to property when tank was installed); *Gittemeier v. Contractors Roofing & Supply Co., 932 S.W.2d 865 (Mo. App. 1996)* (drivers employed by carriers who delivered goods of roofing products firm to construction supply company were under control of carriers and not of roofing products firm, and thus, firm could not be held liable on trespass and nuisance claims asserted by owner of land adjoining that occupied by company); *Stevensen v. Goodson, 924 P.2d 339 (Utah 1996)* (mortgagees did not have standing to maintain trespass or encroachment cause of action against company whose land bordered land in which mortgage was held).

(n24)Footnote 128. *Russell v. American Rock Crusher Co., 317 P.2d 847 (Kan. 1957)* (action to recover for alleged trespass in quarry operations by the removal of a large quantity of rock from underneath plaintiff's land).

(n25)Footnote 129. *Blaen Avon Coal Co. v. McCulloh, 59 Md. 403 (1883)* (removal of coal from neighboring land).

(n26)Footnote 130. *Curlee v. Donaldson, 233 S.W.2d 746 (Mo. App. 1950)* (defendant individually liable for trespass).

(n27)Footnote 131. *Russell v. American Rock Crusher Co., 317 P.2d 847 (Kan. 1957)* (trespass in quarry operations by removal of rock from plaintiff's land).

(n28)Footnote 132. *Lennon v. Seaman, 63 F. Supp. 2d 428 (S.D.N.Y. 1999)* (court dismissed trespass claim where plaintiff failed to state an essential element of the claim); *Rutter v. Carroll's Foods of the Midwest, Inc., 50 F. Supp. 2d 876 (N.D. Iowa 1999)* (pleading for trespass must contain allegations of each element of the claim or should be dismissed); *Van Eck v. Whitney Village Nursery Sch., 1999 Conn. Super. LEXIS 2921* (Conn. Super. Oct. 28, 1999) (plaintiff's failure to allege all of the essential elements of a trespass claim led to dismissal of claims); *General Mills Restaurants, Inc. v. Texas Wings, Inc., 12 S.W.3d 827 (Tex. App. 2000)* (defendant need disprove only one element of trespass or establish each essential element of an affirmative defense to rebut action in trespass).

(n29)Footnote 133. *Schell v. Rice, 246 S.E.2d 61 (N.C. App. 1978)* (plaintiff averred that she had a life tenancy); *State v. Collins, 1998 Ohio App. LEXIS 4547* (Ohio App. Sept. 28, 1998) (No defense to criminal trespass that the land or premises involved were owned, controlled, or in the custody of a public agency).

(n30)Footnote 134. *Lapp v. Stanton, 81 A. 675 (Md. 1911)* (premises upon which trespasses were committed, were adequately marked).

(n31)Footnote 135. *Elk Garden Big Vein Coal Mining Co. v. Gerstell, 121 S.E. 569 (W. Va. 1924)* (plea of statute of limitations allowed to be filed); *McDowell v. Stater, 957 P.2d 965 (Alaska 1998)* (Property owners filed suit alleging injuries to real property caused by petroleum contamination. Defendants pleaded that the statute of limitations had run).

(n32)Footnote 136. *Heirn v. Carron, 19 Miss. (11 S. & M.) 361 (1848)* (plea of accord and satisfaction as bar to the action); *City of Shawnee, Kan v. A.T. & T. Corp., 910 F. Supp. 1546 (D. Kan. 1995)* (trespass action barred by statute of limitations).

(n33)Footnote 137. *Thomsen v. State, 422 P.2d 824 (Wash. 1966)* (possession is title as against a wrongdoer); *Jordan v. Stallings, 911 S.W.2d 653 (Mo. App. 1995)* (landowners who held easement had a sufficient interest to pursue

trespass claim); *Moore v. Dudley, 904 S.W.2d 496 (Mo. App. 1995)* (when adverse possession claim failed, the trespass counterclaim succeeded). *Felker v. Stewart Title Guar. Co., 1998 U.S. Dist. LEXIS 17937* (M.D. Pa. Mar. 30, 1998) (plaintiffs did not have life estate in property but had a license and could not be treated as a trespassers and could not bring a trespass action).

(n34)Footnote 138. *Carson v. Turk, 143 S.W. 393 (Ky. 1912)* (claim that title not signed by the proper party was not sufficient to bar the action); *Kraft v. Burr, 476 S.E.2d 715 (Va. 1996)* (trespassing defendant did not claim title to the property and merely relied upon the alleged weaknesses in the title of the plaintiff who was in prior possession of the property under color of title); *McGrath v. Hills, 662 A.2d 215 (Me. 1995)* (trespass defendant failed to establish superior title); *Angier v. Mathews Exploration Corp. 905 P.2d 826 (Okla. App. 1995)* (lower court was not allowed to reform contract so as to deprive plaintiff of title to land on which trespass claim was based).

(n35)Footnote 139. *Brassette v. Central La. Elec. Co., Inc., 383 So. 2d 120 (La. App. 1980); Mubarez v. New York, 453 N.Y.S.2d 549 (1982)* (tax authorities had authority to inspect cigarettes for fraudulent stamping); *Harris v. Carbonneau, 685 A.2d 296 (Vt. 1996)* (occupants of house sued deputy sheriff and state for trespass after being served process).

(n36)Footnote 140. *Paine v. Savage, 136 A. 664 (Me. 1927)* (authority cited by log haulers held invalid); *Potts v. Johnson, 654 So. 2d 596 (Fla. App. 1995)* (police officer's search was illegal, making the officer a trespasser on landowner's property); *United States v. Hatfield, 333 F.3d 1189 (10th Cir. 2003)* (where warrantless search by police officers was legal, police were not considered trespassers on land); *Misseldine v. Corporate Investigative Servs., 2003 Ohio App. Lexis 2488* (No. 81771, May 29, 2003) (authority of garbage collection service to enter property and take trash did not allow a private investigative company to do the same).

(n37)Footnote 141. *Salisbury Livestock Co. v. Colorado Cent. Credit Union, 793 P.2d 470 (Wyo. 1990)* (consent of possessor is absolute defense to trespass); *Hager v. Tire Recyclers, Inc., 901 P.2d 948 (Or. App. 1995)* (no evidence that landowners gave consent for a flow of silt onto their property); *Apel v. Katz, 697 N.E.2d 600 (Ohio 1998)* (defendants attempted to use the fact that they had an easement to the passageway as a defense to trespass); *Manor Enters. v. Vivid, Inc., 596 N.W.2d 828 (Wis. App. 1999)* (held that consent to entry onto land is a defense to an action for trespass); *American Transmission, Inc. v. Channel 7 of Detroit, Inc., 609 N.W.2d 607 (Mich. App. 2000)* (consent is an affirmative defense to a claim of trespass); *General Mills Restaurants, Inc. v. Texas Wings, Inc., 12 S.W.3d 827 (Tex. App. 2000)* (actual or apparent consent is an affirmative defense to trespass); *Weynand v. Foster, 2000 Wisc. App. LEXIS 199* (Wisc. App. Feb. 24, 2000) (found trespass where plaintiff did not give consent to defendant to put boulders on his property).

(n38)Footnote 142. *Dubuque Fire & Marine Ins. Co. v. Union Compress & Warehouse Co., 143 F. Supp. 128 (W.D. La. 1956), motion denied, 146 F. Supp. 482 (W.D. La. 1956)* (warehouse company was a licensee and therefore not a trespasser); *Dickinson v. Charter Oaks Tree & Landscaping Co., 2003 Ohio App. Lexis 1940* (No. 02AP-981, Apr. 24, 2003) (where ex-husband had apparent authority to allow neighbors to trim dead vegetation along property line, no trespass occurred when ex-husband actually had no authority).

(n39)Footnote 143. *Id.*

(n40)Footnote 144. *North v. Williams, 13 A. 723 (Pa. 1888)* (though agent made a misrepresentation to gain entry to premises, contract of sale provided for agent's entry); *Food Lion, Inc. v. Capital Cities/ABC, Inc., 194 F.3d 505 (4th Cir. 1999)*(may not assert consent as a defense where consent was obtained by misrepresentation).

(n41)Footnote 145. *Steel Creek Dev. Corp. v. Smith, 268 S.E.2d 205 (N.C. 1980)* (defense of equitable estoppel not established).

(n42)Footnote 146. *Steel Creek Dev. Corp. v. Smith, 268 S.E.2d 205 (N.C. 1980)* (estoppel defined).

(n43)Footnote 147. *Brandt v. Robertson, 266 F.2d 456 (D.C. Cir. 1959)* (evidence for adverse possession held to be equivocal); *Steel Creek Dev. Corp. v. Smith, 268 S.E.2d 205 (N.C. 1980)* (time of adverse possession not long enough).

(n44)Footnote 148. *N.O.W. v. Operation Rescue, 747 F. Supp. 760 (D.D.C. 1990)* (defense of necessity not available because abortion is a constitutionally protected activity), injunction dissolved, *NOW v. Operation Rescue, 929 F. Supp. 461* (D.D.C. May 30, 1996) *judgment aff'd in part and rev'd in part, 37 F.3d 646 (D.C. Cir. 1994),* injunction dissolved, *NOW v. Operation Rescue, 929 F. Supp. 461 (D.D.C. 1996); United States v. Gardner, 903 F. Supp. 1394 (D. Nev. 1995)* (necessity defense was not established). *United States v. Rockwood, 52 M.J. 98 (C.A.A.F. 1999)* (defense of necessity arises if situation is such that a reasonable person, under like circumstances, would have been impelled to do what was done by defendant); *Ohio v. Rooney, 1999 Ohio App. LEXIS 3129* (Ohio App. July 1, 1999) (no necessity found where defendant did not feel that the lives of him or his family were in danger if he did not trespass).

(n45)Footnote 149. *Johnson v. Borson, 46 N.W. 815 (Wis. 1890)* (bars installed by plaintiff were an unreasonable obstruction on defendant's right of way).

(n46)Footnote 150. *Bowditch v. Boston, 101 U.S. 16 (1880).*

(n47)Footnote 151. *Suss v. American Soc'y, for Prevention of Cruelty to Animals, 823 F. Supp. 181 (S.D.N.Y. 1993)* (defense of sovereign compulsion rejected); *Cunningham v. Pitzer, 2 W. Va. 264 (1867).*

(n48)Footnote 152. *Semonian v. Panoras, 116 A. 417, 117 A. 235 (R.I. 1922)* (agent liable for trespass at command of principal).

(n49)Footnote 153. *Paris Am. Corp. v. McCausland, 759 P.2d 1210 (Wash. App. 1988)* (good faith rejected as a defense); *Poggi v. Scott, 139 P. 815 (Cal. 1914).*

App. 1986)* (measure of permanent damages is difference in market value of land immediately before and after the trespass); *Ghant v. Morrow, 911 S.W.2d 733 (Tenn. App. 1995)* (measure of damages for cut timber). *Klingshirn v. McNeal, 520 S.E.2d 761 (Ga. App. 1999)* (the measure of damages is the diminution in the market value); *Kenneth Henes Special Projects Procurement v. Continental Biomass Indus., 86 F. Supp. 2d 721 (E.D. Mich. 2000)* (proper assessment of damages is actual damages); *Adams v. Cleveland-Cliffs Iron Co., 602 N.W.2d 215 (Mich. App. 1999)* (court ruled that in cases of trespass, damage is presumed and nominal damages should be awarded; any additional actual damages proved should also be awarded); *Amkco, Ltd. v. Welborn, 985 P.2d 757 (N.M. App. 1999)* (permanent damages to property by trespass are measured by the diminution in value of the victim's land caused by the trespass); Francis Corp. v. Sun Co., 1999 Ohio App. LEXIS (Ohio App. Dec. 23, 1999) (restoration costs were proper measure of damages where court looked at the diminution in value of the land caused by the trespass); *Day v. Tripp, 1999 Tex. App. LEXIS 5550* (Tex. App. July 29, 1999) (measure of damages is the difference in the market value of the land before and after the trespass). *Wright v. Wilcox, 586 S.E.2d 364 (Ga. App. 2003)* (Even when measure of damages is nominal, amount can vary widely).

(n63)Footnote 167. *Davis v. Sponhauer, 574 N.E.2d 292 (Ind. App. 1991)* (damages include loss of rental income); *Kratze v. Independent Order of Oddfellows, 475 N.W.2d 405 (Mich. App. 1991)* (damages for loss of use have historically included a reasonable rent, net rental loss, and lost profits), *aff'd in part, rev'd in part, 500 N.W.2d 115 (Mich. 1993)* ; *Salesian Soc. v. Ellenvill, 505 N.Y.S.2d 197 (1986)* ("The measure of damages in a trespass action is the diminution in the rental or usable value of the premises caused by the trespass, taking the property as is and as zoned.").

(n64)Footnote 168. *Waggener v. Leggett, 150 So. 2d 529 (Miss. 1963)* (proper measure of damages incorporates loss in value of entire parcel of real property, not just the land at the precise place of injury); *Ardoin v. Department of Transp. & Dev., 679 So. 2d 928 (La. App. 1996)* (business owner whose property was damaged by state highway-widening project was entitled to mental anguish damages for trespass).

(n65)Footnote 169. *Borland v. Sanders Lead Co., 369 So. 2d 523 (Ala. 1969)* (even if plaintiff is deprived of only a portion of the land, damages may property include the difference in the fair market value of the land "with and without such portion").

(n66)Footnote 170. *Pearl v. Pic Walsh Freight Co., 168 N.E.2d 571 (Ohio App. 1960)* (person who has beneficially occupied property "may be held liable for its fair rental value, even though the plaintiff was not hindered or obstructed in any use which he expected to make of the property").

(n67)Footnote 171. *Amax, Inc. v. Sohio Indus. Prods. Co., 469 N.Y.S.2d 282 (1983)* (damages recoverable for continuing trespass generally incorporate plaintiff's pecuniary loss up to the time of the suit); *Freemont E.M. Valley R. Co. v. Harlin, 70 N.W. 263 (Neb. 1897).*

(n68)Footnote 172. *Krejci v. Capriotti, 305 N.E.2d 667 (Ill. App. 1973)* (where the trespass continues beyond the date the action commences, the plaintiff may recover damages measurable up to the time of the trial); *Cosgriff Bros. v. Miller, 68 P. 206 (Wyo. 1902).*

(n69)Footnote 173. *Skelton v. Haney, 777 P.2d 733 (Idaho 1989)* (a trespass that was "deliberate, willful, and malicious" justified an award of punitive damages); *Bangert v. Osceola County, 456 N.W.2d 183 (Iowa 1990)* (where the county cut down landowner's trees in willful and deliberate disregard for the landowner's rights, the trial court could award treble damages; for the purpose of determining the "willful" of the trespass, the court must look for actions "done wantonly and without any reasonable excuse"); *Muehlstedt v. Lino Lakes, 473 N.W.2d 892 (Minn. App. 1991)* (willful failure to act sufficient to support an award of punitive damages occurred where the landowner's trees were removed by the city without the landowner's permission). *Bullman v. D & R Lumber Co., 464 S.E.2d 771 (W. Va. 1995)* (treble damages and punitive damages awarded for wrongful cutting of timber); It is proper to instruct a jury that violation of state and federal regulations may be sufficient evidence of willfulness and recklessness to justify an award of punitive damages. *Ravan v. Greenville County, 434 S.E.2d 296 (S.C. App. 1993). Golonka v. Plaza at Latham, L.L.C., 704 N.Y.S.2d 703 (N.Y. App. 2000)* (punitive damages may only be awarded where trespasser acted with actual malice involving intentional wrongdoing).

(n70)Footnote 174. *Rhodes v. Harwood, 544 P.2d 147 (Or. 1975)* (awarding punitive damages where no actual damages were recovered, but citing authorities that required actual damages to be proved before punitive damages could be awarded). *But see, Ernst v. Western States Chiropractic College, 1999 U.S. App. LEXIS 28500* (9th Cir. Nov. 1, 1999) (court held that plaintiffs did not need to show actual damages to support the award of punitive damages).

(n71)Footnote 175. *McConnell Bros. v. Slappey, 67 S.E. 440 (Ga. 1910)* (interest on the damage award allowed from the time of harm or injury); *Matanuska Elec. Ass'n, Inc. v. Weissler, 723 P.2d 600 (Alaska 1986)* (prejudgment interest on punitive damage award denied).

(n72)Footnote 176. *See, e.g., Beeman v. Marling, 646 N.E.2d 382 (Ind. App. 1995)* (statutory treble damages for wrongful cutting of timber).

(n73)Footnote 177. *Powe v. Merkel, 121 So. 2d 865 (Ala. 1960)* (where no question of disputed title exists and the nature of the injury is such that the remedy at law is inadequate, injunction is the appropriate remedy); *Bridges v. Henson, 116 S.E.2d 570 (Ga. 1960)* (where the remedy at law is an inadequate response to a continuing trespass, an injunction is necessary to provide relief); *Heaton v. Miller, 391 P.2d 653 (N.M. 1964)* (plaintiff entitled to injunction where the defendant knew that the boundary line location was questionable and built a structure encroaching on plaintiff's land); *Gulf Park Water Co. v. First Ocean Springs Dev. Co., 530 So. 2d 1325 (Miss. 1988)* (despite lack of demonstrable harm, an injunction was available to prevent or abate a nuisance); *Wabban, Inc. v. Brookhart, 921 P.2d 409 (Or. App. 1996)* (store owner was entitled to declaratory and injunctive relief for continuing trespass).

See also Stranahan v. Fred Meyer, Inc., 11 P.3d 228 (Or. 2000) (holding that a person collecting petitions was not entitled to stay on store premises over the store's objection).

(n74)Footnote 178. *Allen v. Virginia Hill Water Supply Corp., 609 S.W.2d 633 (Tex. Civ. App. 1980)* (although a building encroaching on plaintiff's land had been constructed by defendant's predecessor in interest, the encroaching improvement was of a continuing character, subject to injunction compelling removal); *Englert v. Zane, 848 P.2d 165 (Utah App. 1993)*(house). *Espahbod v. Town of Sudbury, 1998 Mass. Super. LEXIS 436* (Mass. Super. July 30, 1998) (Injunctive relief available to remedy a continuing trespass to real estate caused by an unauthorized drainage).

(n75)Footnote 179. *Pahl v. Ribero, 14 Cal. Rptr. 174 (1961)* (wall); *Hatanaka v. Struhs, 738 P.2d 1052* (Utah App.), *cert. denied, 765 P.2d 1277 (Utah App. 1987)* (fence) *Osborn v. Pine Mtn. Ranch, 766 P.2d 1165 (Wyo. 1989)* (fence); *Seid v. Ross, 853 P.2d 308 (Or. App. 1993)* (wall); *Hatanaka v. Struhs, 765 P.2d 1277 (Utah 1987).*

(n76)Footnote 180. *See* Annotation, *Mandatory Injunction to Compel Removal of Encroachments by Adjoining Landowner, 28 A.L.R.2d 679, 741 (1953),* superseded by Annotation, *Encroachment of Trees, Shrubbery, or Other Vegetation Across Boundary Line, 65 A.L.R.4th 603 (1988); Broadway-Wisconsin Inv. Co. v. Sentinel Co., 212 N.W. 646 (Wis. 1927).*

(n77)Footnote 181. *Beaty v. Gordon, 364 S.W.2d 311 (Ark. 1963). Ferrone v. Rossi, 42 N.E.2d 564 (Mass. 1942); Caliri v. Corvese, 153 A. 795 (R.I. 1931); Mayer v. Flynn, 150 P. 962 (Utah 1915); Huber v. Stark, 102 N.W. 12 (Wis. 1905).*

(n78)Footnote 182. *Beck v. Ashland Cigar Tobacco Co., 130 N.W. 464 (Wis. 1911)* (where the property of another is intruded upon either below or above ground, but the landowner is undisturbed in possession of the surface up to the boundary line, the proper remedy is in trespass, not in ejectment; if the trespass is continuous, equitable relief may be obtained), *overruled in part, Fisher v. Goodman, 237 N.W. 93 (Wis. 1931).*

(n79)Footnote 183. *Grandona v. Lovdal, 11 P. 623 (Cal. 1886).*

(n80)Footnote 184. *See* Annotation, *Mandatory Injunction to Compel Removal of Encroachments by Adjoining Landowner, 28 A.L.R.2d 679, 698 (1953),* superseded by Annotation, *Encroachment of Trees, Shrubbery, or Other Vegetation Across Boundary Line, 65 A.L.R.4th 603 (1988).*

(n81)Footnote 185. *Clinger v. Hartshorn, 911 P.2d 709 (Colo. App. 1996)* (preliminary injunction was not warranted absent showing of irreparable injury caused by hunting operations or inadequate remedy at law).

(n82)Footnote 186. *Pradelt v. Lewis, 130 N.E. 785 (Ill. 1921)* (irreparable harm means that the trespass complained of "cannot be repaired or restored or adequately compensated for in money or the compensation cannot be safely measured"); *New York State Nat'l Org. for Women v. Terry, 886 F.2d 1339 (2d Cir. 1989)* (the general rule is that for a permanent injunction to be granted, a "party must show the absence of an adequate remedy at law and irreparable harm if the relief is not granted"), *cert. denied, 495 U.S. 947 (U.S. 1990); Englert v. Zane, 848 P.2d 165 (Utah App. 1993)* (injunction to remove encroaching house denied, but money damages to compensate for loss of a portion of the plaintiff's lot to the encroachment could be awarded).

(n83)Footnote 187. *Ostrem v. Alyeska Pipeline Serv. Co., 648 P.2d 986 (Alaska 1982)* (trial court should consider the relative hardship to the parties if removal of an encroaching structure is ordered); *Penelko, Inc. v. John Price Assocs., 642 P.2d 1229 (Utah 1982)* (a defendant objecting to an order to remove an encroachment has the burden of showing that the removal will cause substantial economic waste); *Christopher v. Rosse, 458 N.Y.S.2d 8 (1982)* (minor encroachment of less than two inches not removed); *Seid v. Ross, 853 P.2d 308 (Or. App. 1993)* (an injunction to remove an encroaching wall was denied where the burden of removal was substantial and outweighed the benefits of removal).

(n84)Footnote 188. *Webster v. Dane Corp., 101 N.W.2d 616 (Wis. 1960)* (when the defendant trespasses wilfully and wrongfully, no equitable principle may thereafter be invoked to oppose an injunction); *Borrowmann v. Howland, 457 N.E.2d 103 (Ill. 1983)* (where the trespass is intentional or due to culpable negligence, the court may properly refuse to balance the equities).

(n85)Footnote 189. 116 *East 57th St., Inc. v. Gould, 79 N.Y.S.2d 243 (N.Y. App. Div. 1948), leave to app. denied, 81 N.Y.S.2d 189 (1948)* (based on proof presented by the plaintiffs, the defenses of laches, consent, and estoppel were property sustained by the trial court); *Ethan's Glen Community Ass'n v. Kearney, 667 S.W.2d 287 (Tex. App. 1984)* (consideration of equitable defenses, including consent).

(n86)Footnote 190. *City of Eustis v. Firster, 113 So. 2d 260 (Fla. 1959)* (laches barred action for injunction brought ten years after plaintiff acquired the property); *Heinrich v. Hinson, 600 S.W.2d 636 (Mo. App. 1980)* (acquiescence and laches).

(n87)Footnote 191. *Bright v. Michel, 137 So. 2d 155 (Miss. 1962)* (equitable estoppel).

(n88)Footnote 192. *Huber v. Stark, 102 N.W. 12 (Wis. 1905)* (verbal consent constituted revocable license); *Dunn v. Fletcher, 96 So. 2d 257 (Ala. 1957)* (verbal consent and subsequent acquiescence).

(n89)Footnote 193. *Granberry v. Jones, 216 S.W.2d 721 (Tenn. 1949).*

(n90)Footnote 194. *McCartney v. Schuette, 54 N.W.2d 462 (Iowa 1952).*

(n91)Footnote 195. *Cross v. McCurry, 859 S.W.2d 349 (Tenn. App. 1993)* (7-year statute of limitations applicable; chancery court lacked authority to require a landowner to execute a deed).

(n92)Footnote 196. *See* Annotation, *Mandatory Injunction to Compel Removal of Encroachments by Adjoining Landowner, 28 A.L.R.2d 679, 720 (1953),* superseded by Annotation, *Encroachment of Trees, Shrubbery, or Other Vegetation Across Boundary Line, 65 A.L.R.4th 603 (1988).*

(n93)Footnote 197. *Pile v. Pedrick, 31 A. 646 (Pa. 1895).*

Supp. To CHAPTER 68 TRESPASS ON LAND

8-68 Thompson on Real Property, Thomas Editions Supp. to § 68.02

Supp. to § 68.02 Definition and Elements of Trespass on Land.

[Go To Main]

Add new text following the section heading:

In addition to the traditional elements of trespass discussed in the following subsections, a court may analyze a trespass to as either permanent or continuing. A permanent trespass occurs when the defendant's trespassory act has been fully accomplished, but injury to the plaintiff's land persists even in the absence of further conduct by the defendant. A continuing trespass results when the defendant's trespassory act is ongoing, perpetually creating fresh violations of the plaintiff's property rights. These circumstances can affect the choice of remedy and defenses, such as statute of limitations.

§ 68.02(a) Intent. [Go To Main]

Add:

Watson Land Co. v. Shell Oil Co., *29 Cal. Rptr. 3d 343 (2005)* (oil company committed trespass when gasoline leaked from the company's pipelines and contaminated property owner's land); *Railey v. State, 615 S.E.2d 609 (Ga. App. 2005)* (defendant committed trespass when he backed his car into plaintiff's garage and entered house without authorization); *Bullard v. Bouler, 612 S.E.2d 513 (Ga. App. 2005)* (The "innocent trespasser" rule states that an unintentional and nonnegligent entry onto another's land does not automatically subject an individual to liability, even though the entry causes harm to the possessor and protects individuals who enter the land of another under the mistaken belief that it is permissible to do so).

Add:

See Seals v. Amburgey, 2009 Ky. App. Unpub. LEXIS 925 (restating the common law rule that "it is irrelevant under the statute whether the trespasser was innocent or willful"); *Richard v. Richard, 23 So. 3d 292, 296 (La Ct. App. 2009)* (stating that "[a] defendant may be held liable for trespass even in the absence of intent ... when the plaintiff offers proof that the defendant was at fault in causing the trespass"); *but see Meece v. Feldman Lumber Co., 290 S.W.3d 631, 632-33 (2009)* (restating the common law rule that the measure of damages may depend on an intent to trespass).

Add:

See Fire Ins. Exchange v. Superior Court, 181 Cal. App. 4th 388, 392-393 (Cal. Ct. App. 2010) (finding that an insurer should have been granted summary judgment because an insured's mistaken belief that they owned property was insufficient to make their act unintentional); *Lee v. S. Telecom Co., 2010 Ga. App. LEXIS 308* (holding that "a trespasser is one who, though peacefully or by mistake, wrongfully enters ... property owned or occupied by another").

Add:

See Portland GE Co. v. Hick, 234 Ore. App. 1, 10 (2010) (holding an owner of a damaged sewer liable for trespass where the owner refused to repair the sewer).

§ 68.02(b) Entry. [Go To Main]

Add:

Estate of Cilley v. Lane, 985 A.2d 481, 486 (Me. 2009) (holding that a person initially invited into a trailer but who then refused to leave when asked to do so had trespassed).

Add:

Hanks v. Spann, 2009 Ala. Civ. App. LEXIS 458 (holding that defendant's dirt-hauling operation exceeded the purposes for which consent was given and thus made him liable for trespass).

Add:

Amaral v. Cuppels, 831 N.E.2d 915 (Mass. App. 2005) (projection of golf balls from the country club's property onto the owners' properties constituted a continuing trespass)

Add:

Bachelor v. Patterson, 2009 Cal App. Unpub. LEXIS 5753 (holding that "trespass ... may be accomplished by the casting of substances or objects upon the plaintiff's property"); *Hunter v. Mansell, 2010 Colo. App. LEXIS 274* ("[u]ntil the thing tortuously placed on the land, or underneath the land, is removed, the liability for trespass remains").

Add

In re Worldcom, Inc., 339 B.R. 836 (S.D. N.Y. 2006) (the use of fiber optic lines to transmit light pulses under an owner's land was not a trespass).

§ 68.02(c) Force [Go To Main]

Add:

Goerlitz v. City of Maryville, 2009 Mo. App. LEXIS 1742 ("[t]respass is the unauthorized entry upon the land of another ... regardless of the amount of force used").

§ 68.02(d) Actual and Nominal Damages. [Go To Main]

Add:

Mills v. Kimbley, 909 N.E.2d 1068, 1076 (Ind. Ct. App. 2009) (stating that a plaintiff may recover nominal damages even if there is no injury and may recover compensatory damages if there is actual injury); *Chang v. Baxter Healthcare Corp., 599 F.3d 728, 733 (7th Cir. 2010)* (stating that "purely nominal damages" may be awarded in a trespass action even "if there is no tangible harm"); *Rhodes v. E.I. Du Pont de Nemours & Co., 657 F. Supp. 2d 751, 771-772 (S.D.W.Va. 2009)* .

Add:

Kimberly Kempton v. Cooper, 2009 Cal. App. Unpub. LEXIS 4440 (stating that the jury may choose to award no damages where "a plaintiff suffers no harm whatsoever").

Add:

Herzberg v. County of Plumas, *34 Cal. Rptr. 3d 588 (2005)* (damages not recoverable for occasional use of and damage

to property caused by wandering cattle because landowners were not deprived of all economically beneficial or productive use of their land; where "fencing out" laws apply, a person in possession of unfenced land may neither seize estrays nor sue for trespass or injunctive relief; owner of the livestock is liable for all damages done by the livestock together with costs of suit if animals are herded or grazed on another person's property in violation of statute).

Supp. To CHAPTER 68 TRESPASS ON LAND

8-68 Thompson on Real Property, Thomas Editions Supp. to § 68.05

Supp. to § 68.05 Trespass from Encroachment by Objects Coming Onto the Land.

[Go To Main]

§ 68.05(b) Strict Liability for Trespass by Encroachment [Go To Main]

Add:

See also Sunset Ranchos Investors v. Mollison, 2009 Cal. App. Unpub. LEXIS 9457 (holding that water runoff caused by tree planting was a trespass).

Add:

Caesar v. Shelton Land Co., Inc., 646 S.E.2d 689 (Ga. App. 2007) (bulldozer operated by development company destroyed a family cemetery).

Add:

See also Mills v. Kimbley, 909 N.E.2d 1068, 1076 (Ind. Ct. App. 2009) (stating that "one who recklessly or negligently, or as a result of an abnormally dangerous activity, enters land in the possession of another or causes a thing ... to enter is subject to liability ... ").

§ 68.05(c) Examples of Trespass by Moving Objects Coming onto the Land. [Go To Main]

§ 68.05(c)(1) Dirt, Stones and and Debris

Add:

Whiteside Estates, Inc. v. Highlands Cove, L.L.C., 609 S.E.2d 804 (N.C. App. 2005) (defendant's construction activities caused owner's creek and lake to fill with silt and sediment)

§ 68.05(c)(3) Falling Wall or Building

Add:

Vento v. Marin, 2010 Conn. Super. LEXIS 843 (holding that the act of digging at the base of plaintiff's stone wall and causing it to fall "alone constituted a trespass").

§ 68.05(c)(6) Sewage, Foul Air, Fumes, and Pesticides.

Add:

Hale v. Klemp, 184 P.3d 1185 (Or. App. 2008) (unsuccessful trespass action from use of herbicide, brought by owners of organic farm against owner of adjacent commercial forest land).

§ 68.05(c)(7) Rainwater, Ice and Snow.

Add:

Quereguan v. New Castle County, 2009 Del. Ch. LEXIS 182 (holding that "[w]here a landowner creates an artificial condition on his property which increases the flow onto his neighbor's land, beyond the natural flow, he is liable only where ... the artificial use is unreasonable"); *Rogers v. Hood, 2009 Ohio App. LEXIS 4885* ("a land owner who alters the natural flow of water across his property so as to increase the volume and intensity of the flow onto adjoining property may be held liable in trespass").

Add:

Reith v. McGill Smith Punshon, Inc., 840 N.E.2d 226 (Ohio App. 2005) (there is no legal distinction between surface water above the ground and surface water temporarily channeled through underground pipes)

Add:

Ondovchik Family, L.P. v. Agency of Transp., 2010 VT 35 ("moving snow onto another's property might be a trespass").

Add:

Boyne v. Town of Glastonbury, 955 A.2d 645 (Conn. App. 2008) (trespass action from drainage from highway onto private land).

Crowell v. Kogut, 2005 Conn. Super. LEXIS 2783 (Conn. Super. Ct. 2005) (landowners who divert surface water from its natural flow in such a way as to substantially damage the property of their neighbors are liable regardless of whether their conduct is reasonable; neighbor constructed earth berm that diverted surface water into preexisting drainage ditch and cause ditch to overflow and damage owner's land)

Starrh and Starrh Cotton Growers v. Aera Energy LLC, *63 Cal. Rptr. 3d 165 (2007)* (continuing trespass resulting from energy company's ponding practice resulting in the migration of water); *Green v. Eastland Homes, Inc. 644 S.E.2d 479 (Ga. App. 2007)* (trespass action based on alleged mold exposure and excessive water runoff from higher adjoining land).

§ 68.05(c)(8) Trespass by Animals.

Add:

Herzberg v. County of Plumas, *34 Cal. Rptr. 3d 588 (2005)* (fencing laws typically govern right to recover trespass damages caused by estrays; if "fencing out" laws apply, the person in possession of unfenced land may not sue for trespass of estrays; owner is liable for damages if livestock is intentionally herded or grazed on another person's property in violation of statute; statute provided that an act to prevent trespass to real estate by livestock is not applicable to any livestock running at large on the ranges or commons)

Add:

Herzberg v. County of Plumas, *34 Cal. Rptr. 3d 588 (2005)* (a county open range ordinance was upheld because the ordinance and any damage from free roaming cattle did not deprive landowners of all economically beneficial or productive use of their land and did not extinguish any fundamental attribute of ownership).

Supp. To CHAPTER 68 TRESPASS ON LAND

8-68 Thompson on Real Property, Thomas Editions Supp. to § 68.06

Supp. to § 68.06 Procedural Rules for Actions Based on Trespass to Land.

[Go To Main]

§ 68.06(a) Proper Parties. [Go To Main]

§ 68.06(a)(1) Proper Plaintiffs.

Add:

Abrams v. Ciba Specialty Chems. Corp., 663 F. Supp. 2d 1259, 1274 (S.D. Ala. 2009) (holding that "a plaintiff who dies before suit is filed is not a proper plaintiff").

Add:

Spinks v. Equity Residential Briarwood Apartments, *90 Cal. Rptr. 3d 453 (2009)* (stating that trespass protects possessory interests).

Add:

Adams v. Woods, 609 S.E.2d 429 (N.C. App. 2005) (owner acquired title without knowledge of current lease tenants and had a trespass action against defendants for invasion of his possessory rights)

Add:

But see *Smith v. Smith, 2009 Iowa App. LEXIS 1360* (holding that "[a] landowner may bring a trespass claim if his or her ownership interest has been affected, even if the landowner is not currently in possession").

§ 68.06(a)(2) Proper Defendants.

Add:

Huntingdon Life Sciences, Inc. v. Stop Huntingdon Animal Cruelty USA, Inc., *29 Cal. Rptr. 3d 521 (2005)* (party that provided transportation to alleged trespassers was not liable for trespass because his conduct did not direct or authorize their conduct)

Add:

Richard v. Richard, 24 So. 3d 292, 296 (La. Ct. App. 2009) (holding that "the party supervising and/or directing the work and ordering the trespass is liable").

Add:

Bullard v. Bouler, 612 S.E.2d 513 (Ga. App. 2005) (an unknowing contractor was not liable when a landowner employed a contractor to remove a neighbor's trees)

§ 68.06(b) Pleadings [Go To Main]

§ 68.06(b)(1) Elements of the Complaint

Add:

Hill v. Crowson, 2009 Tex. App. LEXIS 8924 (plaintiff need not plead any injury to be entitled to nominal damages).

Add:

McCloud v. Living Word Church, 2009 Ohio 2545 ("[i]n order to recover on a trespass claim, a plaintiff must prove that he or she had actual or constructive possession of the land at the time that the trespass occurred").

§ 68.06(b)(2) Possible Defenses in a Trespass Action.

Add:

Reith v. McGill Smith Punshon, Inc., 840 N.E.2d 226 (Ohio App. 2005) (under Ohio law, recovery for injury or damage to real property resulting from permanent trespass is subject to four-year statute of limitations and begins to run when damage to property is first discovered, or through the exercise of reasonable diligence it should have been discovered; claim for continuing trespass may be brought at any time until the claim has ripened into a presumptive right by adverse possession)

§ 68.06(b)(2)(iii) Consent

Add:

Harding County v. Frithiof, 575 F.3d 767, 777 (8th Cir. 2009) (stating that consent acts as a defense to a trespass claim in South Dakota).

§ 68.06(b)(2)(iv) Estoppel.

Add:

Reith v. McGill Smith Punshon, Inc., 840 N.E.2d 226 (Ohio App. 2005) (claim for continuing trespass may be brought at any time until the claim has ripened into a presumptive right by adverse possession)

§ 68.06(b)(2)(vii) Defenses Not Available

Add:

But see Bailey v. Annistown Rd. Baptist Church, Inc., 301 Ga. App. 677, 687 (2009) (stating that Georgia accepts the innocent trespasser defense, which "protects individuals who enter the land of another under the mistaken belief that it is permissible to do so").

§ 68.06(c) Burden and Standard of Proof [Go To Main]

Add:

Mills v. Kimbley, 909 N.E.2d 1068, 1076 (Ind. Ct. App. 2009) .

Add:

Caciapoli v. Lebowitz, 2010 Conn. Super. LEXIS 551 ("[t]he plaintiff has the burden of proving the nature and extent of the loss").

Add:

Simon v. Avenarius, 2009 Iowa App. LEXIS 927 (defendant has burden of proof in offering evidence in mitigation of damages).

§ 68.06(d) Remedies [Go To Main]

§ 68.06(d)(1) Recovery of Damages

Add:

Mills v. Kimbley, 909 N.E.2d 1068, 1076 (Ind. Ct. App. 2009) (stating that a plaintiff may recover nominal damages even if there is no injury and may recover compensatory damages if there is actual injury); *Chang v. Baxter Healthcare Corp., 599 F.3d 728, 733 (7th Cir. 2010)* (stating that "purely nominal damages" may be awarded in a trespass action even "if there is no tangible harm"); *Downs v. Lyles, 2009 Ala. Civ. App. LEXIS 512* .

Add:

Whiteside Estates, Inc. v. Highlands Cove, L.L.C., 609 S.E.2d 804 (N.C. App. 2005) (damages awarded to restore property to pre-silt condition when defendant's construction activities caused a creek and lake to fill with silt)

Add:

J.S.F. Props., LLC v. McCann, 2009 Del. Super. LEXIS 172 (stating that "damages for trespass ... are generally ... the difference between the value of the land before the trespass occurred and the value of the land after the trespass occurred").

Add:

City of Atlanta v. Landmark Envtl. Indus., 613 S.E.2d 131 (Ga. App. 2005) (damages owed by municipality limited to those incurred during the six months preceding the giving of such notice of trespass)

Add:

Hunter v. Mansell, 2010 Colo. App. LEXIS 274 ("[f]or continuing intrusions ... each repetition or continuance amounts to another wrong, giving rise to a new cause of action").

Add:

See Downs v. Lyles, 2009 Ala. Civ. App. LEXIS 512 ; *see also Betzner Family, LLC v. Midwest Amusement Park, LLC, 2009 WI App. 77* (stating that "[p]unitive damages are especially appropriate in cases of trespass [because] society has an interest in punishing and deterring intentional trespassers").

Add:

Bishop Eddie Long Ministries, Inc. v. Dillard, 613 S.E.2d 673 (Ga. App. 2005) (punitive damages awarded for removal of trees)

Add:

See Alexander v. Dunn, 15 So. 3d 302, 305 (La. Ct. App. 2009) (noting Louisiana's harsh statutory scheme penalizing "timber trespass").

§ 68.06(d)(2) Injunctive Relief and Ejectment.

Add:

Hunter v. Mansell, 2010 Colo. App. LEXIS 274 ("the traditional and preferred equitable remedy for a continuing trespass is a mandatory injunction requiring the removal of the encroachment").

Add:

Adams v. Woods, 609 S.E.2d 429 (N.C. App. 2005) (ejectment not an appropriate action to remove tenants who had a lease agreement with previous owner but not with current owner)

Add:

Hunter v. Mansell, 2010 Colo. App. LEXIS 274 ("[a] remedy at law is inadequate ... where further trespasses of the same kind are threatened"); *see also Harris Group v. Robinson, 209 P.3d 1188, 1205 (Colo. App. 2009)* .

Add:

Hunter v. Mansell, 2010 Colo. App. LEXIS 274 (quoting *Golden Press, Inc. v. Rylands, 124 Colo. 122, 126-27 (1951)* , "[s]ometimes a slight and harmless encroachment is held to be within the rule de minimis ... we think the court should weigh the circumstances so that it shall not act oppressively").

Add:

Hunter v. Mansell, 2010 Colo. App. LEXIS 274 (quoting *Golden Press, Inc. v. Rylands, 124 Colo. 122, 126-27 (1951)* , "[w]here the encroachment is deliberate and constitutes a willful and intentional taking of another's land, equity may well require its restoration regardless of the expense of removal as compared with damage suffered therefrom").

Add:

Amaral v. Cuppels, 831 N.E.2d 915 (Mass. App. 2005) (there is no notion of "coming to a trespass"; defendant golf course ordered to prevent stray balls from entering adjacent owner's land)

Add:

Amaral v. Cuppels, 831 N.E.2d 915 (Mass. App. 2005) (burden of modifying a portion of a golf course was not a hardship sufficient to relieve a country club of its obligation to eliminate a continuing trespass of golf balls onto adjacent owners' properties)

CHAPTER 69 RIGHTS OF LATERAL AND SUBJACENT SUPPORT

8-69 Thompson on Real Property, Thomas Editions § 69.01

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 69.01 Introduction and Definitions.

[Go To Supp]

The rights and obligations pertaining to lateral support and subjacent support are rights pertaining exclusively to real property, and also pertaining only to adjoining landowners. The rights to lateral and subjacent support associated with land ownership are often termed natural rights, which means that they inhere in land ownership and are presumed to exist whether or not the parties explicitly refer to them in any land transactions. Even though rights to lateral and subjacent support have always been recognized in the common law as natural rights associated with property ownership, English and American jurisdictions have developed somewhat different rules for remedies when those rights have been violated. The English rules are favored in some American jurisdictions.

Lateral support is a landowner's right to have the soil in its natural condition supported by the soil of adjoining land in its natural condition. This right ordinarily applies only to the ground, and not to any artificial structures in or on the ground. n1 Inasmuch as rights to lateral and subjacent support are natural rights, it is unnecessary to mention them or to include provisions creating them in conveyances or other transactions concerning the land. n2

Land that is entitled to maintenance of lateral support from adjoining land is likewise held to a duty of providing its own lateral support for that same land. This has been termed a continuing obligation that runs with the land. n3

While the courts have been far from unanimous, the weight of judicial authority favors the view that liability for loss or withdrawal of lateral support is absolute, with no showing of negligence required. n4

Subjacent support is a landowner's right to have the soil in its natural state supported by the soil beneath it. n5 The applicability of the right of subjacent support to the surface soil is necessarily vague, but it has been held that "surface" means only the superficial part of the land. n6 By agreement, the parties can be more specific about how much surface stratum is entitled to the provision of subjacent support. Whether by common law or by agreement of the parties, then, it is possible for the owner of any upper stratum to have a right to the subjacent support from any of the lower strata. n7

FOOTNOTES:

(n1)Footnote 1. *Carrion v. Singley, 614 S.W.2d 916 (Tex. Civ. App. 1981)* (action to enjoin adjacent landowner from allowing further deterioration of retaining wall); *Keck v. Longoria, 771 S.W.2d 808 (Ark. App. 1989)* (excavation on common boundary without building retaining wall). *Com v. Salley, 121 A.2d 169 (Pa. 1956)* (holding that the right to lateral support extends to land in natural state and not to artificial improvements); *Namm v. City of New York, 5 N.Y.S.2d 233 (N.Y. Sup. 1938)* (holding that the right to lateral support extends to land in natural state and not to artificial improvements).

CHAPTER 69 RIGHTS OF LATERAL AND SUBJACENT SUPPORT

8-69 Thompson on Real Property, Thomas Editions § 69.02

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 69.02 The Natural Right of Lateral Support for Land.

[Go To Supp]

§ 69.02(a) Lateral Support of Land in Its Natural State.

The right to lateral support from adjoining soil usually applies only to land in its natural state, unencumbered by structures or other artificial improvements. This right of lateral support held by a landowner imposes a corresponding duty on the adjoining landowner to not remove the adjacent soil or otherwise weaken the lateral support. n8

COMPUTER-ASSISTED RESEARCH:

LEXIS: Right w/20 lateral w/5 support w/20 natural

§ 69.02(b) Lateral Support of Land That Has Been Altered or Filled.

When land is no longer in its natural state, but has been filled in or otherwise altered, the entitlement to lateral support from adjoining property is not thus forfeited, but the landowner is entitled only to such lateral support as the land would have needed in its natural state, before it was altered or filled. n9

If land has been partially altered or filled, but a portion of the land has not been so changed, the unchanged portion retains its natural right of lateral support from adjoining property. n10

With the passage of time, land that was earlier altered or filled may, in that condition, come to be considered once again in its natural state. Indeed, in areas of long human habitation, virtually no land is left in its pristine natural state, so most land that was altered or filled long ago is once again considered in its natural state and entitled to the corresponding lateral support. n11 In some cases the return of the full right of lateral support occurs after only a few years from the time of altering or filling. One landowner who excavated for a driveway near the land's boundary with the neighboring landowner was required to install a retaining wall to stop subsidence of the neighbor's line of property along the line of excavation, even though the subsiding soil itself had been placed as fill by the neighbor just five years earlier. n12

COMPUTER-ASSISTED RESEARCH:

LEXIS: Right w/20 lateral w/5 support w/20 (alter! or fill! or buil! or develop!)

§ 69.02(c) Lateral Support of Land with Buildings.

The rather firm common law rule prevailing in American courts is that no right of lateral support exists for the additional weight imposed on the land by buildings or other structures or improvements. n13 However, an adjoining landowner may not be negligent toward a neighbor's buildings; an excavator is under a duty to use care and also to give notice to the owner of a building on adjacent land before excavation is undertaken, in order that protective and preventive measures can be taken. n14 It has also been held that, if an excavation threatens the stability of buildings on non-contiguous land, the excavator must also give notice to those landowners. n15

CHAPTER 69 RIGHTS OF LATERAL AND SUBJACENT SUPPORT

8-69 Thompson on Real Property, Thomas Editions § 69.03

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 69.03 The Created Right of Lateral Support for Buildings.

§ 69.03(a) Lateral Support Rights Created by Statute or by Express Grant.

In addition to the natural right of lateral support that inheres in land ownership generally, a landowner may acquire a right of lateral support by express grant, or have such a right conferred by statute. This situation arises most commonly if a landowner wishes to secure lateral support for structures on the land. n16 By agreement with an adjoining owner, a landowner may also secure a right of support for a building by an adjoining building. n17

COMPUTER-ASSISTED RESEARCH:

LEXIS: Right w/20 lateral w/5 support w/20 building w/20 (express! grant! or statute)

§ 69.03(b) Lateral Support Rights Created or Arising by Prescription or by Implication.

§ 69.03(b)(1) Prescriptive Lateral Support Rights for Buildings.

If a landowner wishes to obtain a right of lateral support for buildings on the land, a right not inherent in the common law right of lateral support, and the landowner has not obtained such a right by express agreement, it is still possible that by prescription or implied grant or reservation the landowner could secure a right of support for the buildings. English courts and a few American courts have recognized a prescriptive claim to a right of lateral support for a building, n18 but the majority of American courts do not recognize such a prescriptive right. n19

In those American jurisdictions that do recognize the possibility of obtaining a right of lateral support for buildings by prescription, the usual rules apply. The landowner who claims such a right for a building on the land must have placed the building in such a way that it requires the support of the neighboring land or a building on adjacent land, and that this need for support, by its openness, could have drawn the neighbor's objection at the time of construction. n20 Also, of course, the prescriptive use must be continuous for the time normally required of prescriptive easements. The requirement that, for a prescriptive right to arise, the structure be so placed that it actually relies for support on neighboring land or buildings is crucial; where one landowner constructed a building without a foundation wall on the side that was adjacent to a neighbor's building, but the building did not depend on the adjacent structure for support, no

prescriptive right to lateral support arose. Upon the removal of the neighbor's building 40 years later, leaving the owner's building exposed to weather, no cause of action based on a prescriptive lateral support right could be shown. n21

COMPUTER-ASSISTED RESEARCH:

LEXIS: Right w/20 lateral w/5 support w/20 building w/20 (prescri!)

§ 69.03(b)(2) Implied Grants and Reservations of Lateral Support Rights for Buildings.

An implied grant of a right to lateral support for buildings must meet essentially the same requirements as an implied easement. n22 The land with the building needing support and the land which is bound to provide the support must at one time have been in common ownership, and while in common ownership the owner must have constructed the building in such a way that it relied for its support on a portion of the owner's land, which portion was later severed and conveyed to another. These circumstances give rise to a presumed grant of a right of lateral support that arose at the time of severance. n23 The inferences giving rise to such an implied grant in a conveyance can be defeated by specific provision in the conveyance itself.

An implied grant of lateral support rights for buildings arises when the common owner builds two buildings on the land, each needing the support of the other. An implied reservation of a lateral support right for buildings may arise when a common owner of land builds a structure on one part of the land, which structure supposedly relies for support on the owner's other land, and then the owner conveys away the portion of the land needed for the support of the building. n24 Both the implied reservation and the implied grant for lateral support of structures apply only to structures that are in existence at the time the reservation or grant arises. n25

CHAPTER 69 RIGHTS OF LATERAL AND SUBJACENT SUPPORT

8-69 Thompson on Real Property, Thomas Editions § 69.04

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 69.04 Liability Imposed for Loss of Lateral Support.

[Go To Supp]

§ 69.04(a) Loss of Lateral Support Caused by Act of God.

Although the right to lateral support is a natural right under the common law, for the loss of which liability without negligence may be imposed, no liability attaches for loss of that support through a so-called act of God. When the lateral support is lost through the instrumentality of an act of God, or through any sudden, unforeseen natural force, then the owner of the land that did not provide the support is not held liable for the damage from the loss nor required to restore the support. n26 A loss of lateral support resulting from a combination of an act of God and the adjoining landowner's act or failure to act, will usually result in liability attaching to the adjoining landowner. n27

COMPUTER-ASSISTED RESEARCH:

LEXIS: Lateral w/5 support and act of god

§ 69.04(b) Loss of Lateral Support Caused by Excavation.

§ 69.04(b)(1) Loss of Lateral Support from Land Without Structures.

The most common cause of loss of lateral support is by excavation on adjoining land. When the adjoining landowner, by excavation, disturbs or removes the lateral support of neighboring land, the excavator is liable for all damages that proximately result from the excavation. n28 Liability attaches to the neighboring excavator when the soil falls of its own weight after the lateral support has been removed; n29 however, when the soil collapses only after a person has walked upon it, the excavator bears no liability for either personal injury or property damage. n30 Also, after the soil has subsided onto neighboring property because the lateral support was withdrawn, it may not be taken and used by the neighboring owner. If it is so taken, the neighboring owner will be liable for the value of the soil. n31

In most cases, the defendant landowner who by excavation causes loss of lateral support is an adjoining owner; however, the defendant's land need not be contiguous with the plaintiff's land, if the defendant's excavation nevertheless caused the subsidence of plaintiff's land. n32

Liability for loss of lateral support, as it pertains to land in its natural state, is absolute and, therefore, a plaintiff need not prove that the defendant was negligent in conducting the activities that caused the loss of support. n33 If a defendant excavator is liable without negligence, the liability extends only to the damage to the land itself. If the defendant excavator is liable and negligent, too, liability may extend to damage to structures as well as to damage to the land itself. n34

The absolute liability of an excavating landowner for damage to adjoining property from loss of lateral support may be reduced or eliminated by statute. n35

COMPUTER-ASSISTED RESEARCH:

LEXIS: Lateral w/5 support and liab! w/20 excavat!

§ 69.04(b)(2) Loss of Lateral Support from Land with Structures.

§ 69.04(b)(2)(i) The English and American Rules.

As already noted, the common law right to lateral support did not require the adjoining land to support the additional lateral pressure caused by buildings on land, but rather was a requirement of support for land only in its natural state. n36 However, it sometimes occurs that the weight of a building on land does not increase the lateral pressure against the neighboring land; when soil subsides onto neighboring land from land with one or more buildings on it, but the subsidence is caused solely by the neighboring excavation and not by the weight of any buildings, the excavator will be liable not only for the damage to the subsiding land, but in the English and in some American courts will also be liable for resulting damage to the plaintiff's buildings. n37 Some other American courts grant recovery in these circumstances, but only if the excavator was negligent. n38

COMPUTER-ASSISTED RESEARCH:

LEXIS: Lateral w/5 support and liab! w/20 excavat!

§ 69.04(b)(2)(ii) When Liability Only for Negligence Is Imposed.

One natural corollary of the common law right of lateral support is that the right to excavate on one's land is not reduced or eliminated by the presence of buildings on adjacent land, and not even by buildings next to the boundary. n39 However, even if the ability to excavate is uncompromised, the excavator may be under additional duties of care as a result of the presence of buildings on neighboring land. The principle additional duty of the excavator is to use due care in avoiding injury to the adjacent structures. The excavator may be liable for property damage if the damage results from negligence in the excavation. n40 When, during excavation, damage occurs to the plaintiff's building, but the plaintiff is unable to show negligence on the part of the excavator, the excavator will not be liable for the damage. n41

Because there is no liability for damage to buildings without showing negligence on the part of the excavator, there is, of course, no excavator liability for building damage when, without negligence in the course of excavation, the soil collapses entirely because of the extra weight of a building. n42

COMPUTER-ASSISTED RESEARCH:

LEXIS: Lateral w/5 support and liab! w/20 excavat! w/o50 negligen!

§ 69.04(b)(2)(iii) The Standard of Due Care.

The duty of due care imposed upon an excavator is almost always a jury question, n43 and the standard is usually identified in the context of the facts of each case. n44 The reported cases that have dealt with issue of excavator negligence have identified several factors relevant to the issue of negligence: whether the excavator investigated soil characteristics; n45 whether the excavation unnecessarily endangered the buildings; n46 whether the excavator used outdated or discredited methods; n47 whether the excavator took weather conditions into account; n48 whether the excavator proceeded as other experienced excavators with acquaintance with the site would have proceeded; n49 and whether the excavator took into account the condition and current use of any structure possibly threatened or affected by the proposed excavation. n50 The excavator's duty of care is enlarged when excavation occurs near a weakened structure, n51 but no liability is imposed on an excavator if a structure on adjoining land falls because of its own weakness, even when the collapse takes place during the excavation. n52

Excavators must sometimes act affirmatively to fulfill the standard of due care and to avoid negligence. Frequently an excavator must provide temporary shoring or underpinning support for adjoining land, both while the excavation is in progress and for as long as necessary until the land is no longer in danger of subsidence. n53 No standard rule requires an excavator in every case to provide shoring and underpinning; such a duty is entirely dependent upon the facts in each case. n54 Usually the owner of a threatened building has a concurrent right to take steps to protect the building while excavation proceeds on adjacent land and, in the reported cases, the owner of the building is more often held to the stronger duty to take such protective measures. n55 Because of these rules, adjacent landowners have reciprocal rights under the common law to go onto each other's lands for the purpose of shoring up buildings when one of them plans to excavate. n56 When either landowner undertakes protective measures or repairs, liability may result when those steps are carried out negligently. n57

One possible protective measure to be adopted by an excavator is to conduct the excavation one section at a time, which has the benefit of exposing only portions of adjoining land or structures to the risk of subsidence or damage, while other sections remain fully supported. n58 Conducting an excavation by sections is most often carried out -- and is sometimes required -- where the soil, such as sand or gravel, is brittle or crumbling. n59

These common law rights and reciprocal duties to provide support can be altered by statute or ordinance or by the agreement of the parties. n60 If the responsibility for protective measures has not been regulated by statute or parties' agreement, then the excavator who is required to undertake protective measures must also bear the expenses therefor. n61 Occasionally, a landowner who was given notice of the excavation, and then took no steps to protect buildings on the land, will be required to reimburse the excavator for the cost of protecting the buildings during the excavation. n62

COMPUTER-ASSISTED RESEARCH:

LEXIS: Lateral w/5 support and liab! w/20 excavat! w/50 negligen!

§ 69.04(b)(2)(iv) When Due Care Requires Prior Notice of Excavation.

The owner or excavator of land where excavation is intended should give notice to any adjoining landowner whose buildings may be threatened by the excavation. n63 Whether the notice must be given because of the type of excavation or the condition of the buildings is a determination dependent upon the facts in each case; n64 therefore, the duty to provide notice is not absolute. n65 It has been held that notice is *not* required if it is already obvious that the excavation will require that protective precautions must be undertaken for the protection of nearby buildings. n66

Naturally, no duty to give notice pertains if the adjoining landowner already knows of the intended excavation. n67 Also, notice of an intended excavation should be given to owners of buildings on non-contiguous land that might be threatened by the excavation. n68 Plaintiffs may cite the failure to give any required notice as evidence of negligence. n69

In order to meet the requirements of due care, the notice must be given sufficiently in advance so that protective measures can be taken, n70 and the notice must provide enough information about the excavation so that both excavator and adjoining landowner can take appropriate measures to prevent damage. n71 In addition to the timing of the excavation, most notices should also state the depth of the proposed excavation. n72 When excavation plans are changed, a new and timely notice of the changes must be given if the changes alter the exposure of the buildings to damage from the excavation. n73

CHAPTER 69 RIGHTS OF LATERAL AND SUBJACENT SUPPORT

8-69 Thompson on Real Property, Thomas Editions § 69.05

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 69.05 The Right to Subjacent Support.

[Go To Supp]

§ 69.05(a) Definition and General Rule of Subjacent Support.

The common law right to subjacent support is the right to have the surface in its natural state supported by the strata below. n74 The right of subjacent support is an absolute right, meaning that one responsible for the loss of subjacent support may be liable even without negligence. Issues concerning subjacent support may arise if subsurface ownership is severed from surface ownership, such as for mineral extraction or other excavations and tunnels.

COMPUTER-ASSISTED RESEARCH:

LEXIS: Subjacent support

§ 69.05(b) The Right to Subjacent Support as an Absolute Right.

The absolute nature of the right to subjacent support not only may result in imposing liability without negligence, but it may also require that the support be maintained despite technical difficulties in providing propping for the surface, or despite unexpected conditions in the soil strata or in the relative values of surface and subsurface rights. n75 However, as with the right to lateral support, no liability follows if the subjacent support is disturbed because of acts of God or other powerful natural forces. n76

The absolute nature of the right of subjacent support also means that even an owner of subsurface rights, with rights to engage in extraction of minerals or similar activities, may not do so in a way that disturbs the subjacent support owed to the surface owner. n77 Occasionally a reservation of mineral rights expressly alters the right of subjacent support, so that the holder of the rights is freer to excavate and extract. n78 Absent such modification of rights, if mining or other subsurface activities are conducted without negligence, disturbance of the subjacent support will still result in liability because of the absolute nature of the right. n79

The strict liability that flows from the absolute nature of the right to subjacent support applies only to disturbance of the surface of the land in its natural state and without buildings or other structures on it. n80

COMPUTER-ASSISTED RESEARCH:

LEXIS: Subjacent support w/20 right w/5 absolut!

§ 69.05(c) The Right to Subjacent Support for Land in Its Natural State.

As mentioned, the right to subjacent support applies to land in its natural state, n81 and liability for withdrawing this support may extend to damage from disturbing uses for which the land is naturally adapted. n82 A mining owner was held liable when it left a surface opening for its mining operations, and a horse grazing on the surface fell into the opening and was injured. n83

COMPUTER-ASSISTED RESEARCH:

LEXIS: Subjacent support w/20 right w/10 natural

§ 69.05(d) The Right to Subjacent Support for Land with Buildings.

Although the right to subjacent support applies to land in its natural state, a surface owner may recover compensation for damage to buildings on the surface caused by withdrawal of subjacent support, when the loss of support was caused by negligence in the subsurface activities. n84 In a few jurisdictions, subsurface owners are strictly liable for damage to surface buildings resulting from loss of subjacent support. n85 Even in a jurisdiction that does not grant recovery for damage to buildings, if the loss of subjacent support is so severe that the land would sink even without buildings on it, then damage to the structures on the land may often also be recovered by the surface owner. n86

The common law right of subjacent support as applied to land in its natural state has also been adapted in some jurisdictions to different levels of buildings. The owner of the upper portion of a building has a right to subjacent support from the lower portion of the building. n87 Because the owner of a lower portion of the building usually is not engaging in subsurface activities analogous to mining or other mineral extraction work, the duty to provide subjacent support in this context is mostly a passive one; the lower owner must do nothing that will disturb the subjacent support of the upper portions. Of course, the lower owner must keep the lower portion in good repair. n88 In some jurisdictions, even the duty to repair has become part of the duty to maintain subjacent support. n89 The duty to repair, and other expansions of the right of subjacent support, also can be created by agreement between the parties.

COMPUTER-ASSISTED RESEARCH:

LEXIS: Subjacent support w/20 right w/20 building

§ 69.05(e) The Right to Subjacent Support from Subsurface Waters.

If land surface is supported at least partially by subsurface waters and silt, that support, too, must be left intact according to the right of subjacent support. n90 This seems to be the rule in the relatively few American jurisdictions that have addressed the question; the English and common law rules are to the contrary. n91

CHAPTER 69 RIGHTS OF LATERAL AND SUBJACENT SUPPORT

8-69 Thompson on Real Property, Thomas Editions § 69.06

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 69.06 Procedural Rules Governing Actions for Loss of Lateral and Subjacent Support.

[Go To Supp]

§ 69.06(a) Proper Parties.

When damage has occurred from loss of lateral or subjacent support, any party holding a possessory or ownership interest in that land is entitled to bring an action for the loss. n92 Therefore, present possessors, reversioners and remaindermen, n93 lessees, n94 and easement owners may hold concurrent rights of action. n95 Even a plaintiff who acquired title by adverse possession may bring an action for loss of lateral or subjacent support, but only for the damage that occurred after the adverse possession title was perfected. n96

This large group of possible plaintiffs is matched by a large group of possible defendants. Any party who participates in causing the damage through loss of the lateral or subjacent support can be made a defendant. Thus, owners, occupants and hired excavators are all potential defendants. n97 In rare circumstances, an owner or occupier of adjacent land may escape liability for loss of lateral support, if the loss was caused by an excavation that was begun before the occupant assumed possession. n98 A landowner who comes into possession after an excavation on the land has taken place may yet be liable for loss of lateral support, if the prior excavator established a retaining wall or other artificial support that needs to be kept in repair. n99

COMPUTER-ASSISTED RESEARCH:

LEXIS: (Lateral or subjacent) w/5 support w/50 (party or plaintiff or defendant) w/5 proper

§ 69.06(b) Limitations of Actions and Other Defenses.

A common defense raised by defendants in actions for loss of lateral or subjacent support is that the applicable statute of limitations has expired. Frequent conflict in this matter arises over when the cause of action accrued so that the period of the statute of limitations begins to run. Although American courts are divided on this question, most hold that the cause of action accrues when the subsidence first occurs, n100 and that repeated subsidences give rise to new and repeated causes of action. n101 But a few courts have held that the cause of action accrues earlier, when the excavation or other removal of the support occurs, even though the manifestation of damage occurs only later. However, these

courts apply this earlier accrual rule only if the excavation does not violate a law or ordinance. n102 Even in these minority jurisdictions, if the excavation was illegal, then the later accrual of the cause and, thus, the extended time of the statute of limitations, will be applied. Indeed, in those jurisdictions, the accrual of the cause of action is delayed either until the subsidence occurs or until the illegal removal of the support is discovered or reasonably could have been discovered. n103 In most states, the applicable statute of limitations is the statute pertaining to actions for real property generally.

Of the few other defenses available to defendants in actions for loss of lateral or subjacent support, occasionally a defendant may show that prior notice of an excavation was given as an affirmation of due care. n104 Also, by specific agreement, the parties may remove or limit the defendant's exposure to liability for damage from loss of support. n105

One other defense that may conform to the factual circumstances is that subsidence may have been caused by the extra weight and pressure posed by buildings on the surface of plaintiff's land.

COMPUTER-ASSISTED RESEARCH:

LEXIS: (Lateral or subjacent) w/5 support w/20 defense

§ 69.06(c) Pleadings and Proof.

In a typical complaint for loss of lateral or subjacent support, the pleading will describe the respective parcels of land where the damage occurred and where the cause of damage originated; the nature of the plaintiff's interest in the land that was damaged; the nature of the defendant's responsibility or rights in the land from which the damage originated; the specific nature of the defendant's accountability for the actual cause of the damage; the actual cause of the damage; the details of the damage; and, if a claim for recovery for structural damages is included, averments concerning the defendant's negligence. If structures are not involved, the plaintiff should aver that the damaged land was in its natural condition n106 and, if the land had buildings on it, the plaintiff should allege that the structures did not increase the lateral pressure, and thus contribute to the subsidence. n107 Special damages must be specifically pleaded. n108 The plaintiff must carry the burden of proof on a preponderance of the evidence. n109

COMPUTER-ASSISTED RESEARCH:

LEXIS: (Lateral or subjacent) w/5 support w/20 (pleading or complaint or proof or prove)

§ 69.06(d) Remedies for Loss of Lateral or Subjacent Support.

§ 69.06(d)(1) Compensatory and Exemplary Damages.

The successful plaintiff in an action for loss of lateral or subjacent support may recover compensation for all damages proximately caused by the removal of the support. n110 If the damage to the plaintiff's land is permanent, and the land is not to be restored to its prior undamaged condition, the measure of damages is the loss of property value. n111 If the land is to be restored or may be restored, then the cost of restoration is the measure of damages, and if the land may or may not be restored, then whichever measure of damages is less is applied in the case. n112 A few courts have taken the position that, because the land is simply to be restored to its natural state, the proper measure of damages is the value of the lost soil. n113

In those cases where the plaintiff has established liability for damaged structures, then the amount of those damages must also be taken into account. n114 Where the plaintiff is a tenant of a building, the proper measure of damages is the loss of the value of the rented premises. n115 In some jurisdictions the right to support is considered a servitude, rather than a natural right, and in those jurisdictions an award can be made for prospective damage from a wrongful

excavation. n116

There is no bar to recovering exemplary damages in an action for loss of lateral or subjacent support, as long as the right to compensatory damages has also been established. n117

COMPUTER-ASSISTED RESEARCH:

LEXIS: (Lateral or subjacent) w/5 support w/100 damage w/5 (compensat! or exemplary)

§ 69.06(d)(2) Injunctions.

Plaintiffs showing loss or threatened loss of lateral or subjacent support may also obtain injunctions to restrain the cause of such loss, even if the possible monetary loss would be small. n118 The right to such relief is established by pleading and proving the usual elements of (1) inadequacy of remedies at law and (2) irreparable harm from continuance of the condition or activity that threatens the support. n119 In the granting of such injunctions, a court will balance the right of a landowner to lateral or subjacent support against the right of an adjoining landowner to excavate on the land, and will attempt to limit the scope of such injunctions as much as possible. n120 Under most federal and state mining reclamation acts, the operator of an underground mine is required to correct material damage resulting from subsidence by restoring land, to the extent technologically and economically feasible, to a condition capable of maintaining the value and reasonably foreseeable uses it supported before the subsidence. n121

(n1)Footnote 92. *Seal v. Aldredge, 111 S.E.2d 769 (Ga. App. 1959)* (loss of lateral support when grade of adjacent land was lowered). *Kim v. City of New York, 681 N.E.2d 312 (NY 1997).*

(n2)Footnote 93. *Gordon v. Automobile Club of Am., 167 N.Y.S. 585, aff'd, 167 N.Y.S. 588 (1917)* (failure to support building as required by statute).

(n3)Footnote 94. *Behrens v. W.S. Bills & Sons, 283 N.E.2d 1 (Ill. App. 1972)* (building collapse caused by nearby excavation); *Walker v. Strosnider, 67 S.E. 1087 (W. Va. 1910)* (building collapse damage equipment in the building).

(n4)Footnote 95. *Corley v. Exxon Pipeline Co., 821 S.W.2d 435 (Tex. App. 1991)* (sandpit collapse exposed a section of a pipeline); *San Jacinto Sand Co. v. Southwestern Bell Tel. Co., 426 S.W.2d 338 (Tex. Civ. App. 1968), cert. denied, 393 U.S. 1027 (1969)* (lateral and subjacent support for underground telephone line easements); *New York Cent. Ry. v. Marinucci Bros. & Co., 149 N.E.2d 680 (Mass. 1958)* (removal of support from railroad right of way).

(n5)Footnote 96. *Schiro v. Oriental Realty Co., 76 N.W.2d 355 (Wis. 1956), later appealed, 97 N.W.2d 385 (Wis. 1959)* (attempt by adverse possessor to recover damages for personal injuries).

(n6)Footnote 97. *Keck v. Longoria, 771 S.W.2d 808 (Ark. App. 1989)* (excavation by defendant's predecessor in title); *Waters v. Biesecker, 298 S.E.2d 746* (N.C.), *review allowed, 302 S.E.2d 249* (N.C.), *aff'd, 305 S.E.2d 539 (N.C. 1983)* (liability on landowner whose excavation was conducted by an independent contractor); *Haseman v. Orman, 660 N.E.2d 1041 (Ind. App. 1996)* (mineral lessor was a passive lessor and was not strictly liable to surface owners for removal of subjacent support caused by mineral lessee), *superseded by Haseman v. Orman, 680 N.E.2d 531 (Ind. 1997).*

(n7)Footnote 98. *Lee v. Takao Bldg. Dev. Co., 220 Cal. Rptr. 782 (1985)* (defendant purchased land after nearby damage had already occurred).

(n8)Footnote 99. *Klebs v. Yim, 772 P.2d 523 (Wash. App. 1989)* (duty to maintain retaining wall built by predecessor in interest); *Keck v. Longoria, 771 S.W.2d 808 (Ark. App. 1989); Gorton v. Schofield, 41 N.E.2d 12 (Mass. 1942).*

(n9)Footnote 100. *Nida v. American Rock Crusher Co., 855 P.2d 81 (Kan. 1993)* (removal of support occurred 30 years before subsidence occurred). *Lincoln Bank & Trust Co. v. Neustadt, 917 P.2d 1005 (Okla. App. 1996)* (summary judgment affirmed since claim was outside both statute of limitations and statute of repose); *Hall's Park Motel, Inc. v. Rover Constr., Inc., 460 S.E.2d 444 (W. Va. 1995)* (statute of limitations began to run when the property sustained a noticeable injury from a traumatic event).

(n10)Footnote 101. *Asiala v. City of Fitchburg, 505 N.E.2d 575 (Mass. App. 1987)* (building damage from negligently maintained retaining wall); *Bellman v. Contra Costa County, 5 Cal. Rptr. 692 (1960).*

(n11)Footnote 102. *Griffin v. New Orleans Drainage Comm'n, 34 So. 799 (La. 1903)* (limitations period began to run when the trench was dug).

(n12)Footnote 103. *Williams v. Southern Ry., 396 S.W.2d 98 (Tenn. 1965), appeal after remand, 417 S.W.2d 573 (Tenn. 1966)* (damage from earthslide into a railroad cut); *Lewey v. H.C. Fricke Coke Co., 31 A. 261 (Pa. 1895)* (subsidence from coal operations).

(n13)Footnote 104. *Hermanson v. Morrell, 252 N.W.2d 884 (N.D. 1977)* (notice given after excavation had begun); *Kim v. City of New York, 681 N.E.2d 312 (NY 1997).*

(n14)Footnote 105. *Stamp v. Windsor Power House Coal Co., 177 S.E.2d 146 (W. Va. 1970)* (deed to subsurface mineral rights did not include the duty to support overlying strata); *Pennsylvania Coal Co. v. Mahon, 260 U.S. 393 (1922); Feinzig v. Ficksman, 674 N.E.2d 1329 (Mass. App. 1997)* (denied plaintiff's request to build retaining wall on defendant's adjacent land to support construction of driveway).

(n15)Footnote 106. *Jennemann v. Hertel, 264 S.W.2d 911 (Mo. App. 1954)* (trees and shrubs allegedly removed).

(n16)Footnote 107. *Noone v. Price, 298 S.E.2d 218 (W. Va. 1982)* (purchasers knew of deteriorated condition of retaining wall).

(n17)Footnote 108. *Barr v. Smith, 598 So. 2d 438* (La. App.), *writ denied, 604 So. 2d 998 (La. 1992)* (special damages awarded for mental anguish and for survey expenses); *Hanrahan v. City of Baltimore, 80 A. 312 (Md. 1911)* (groundwater seepage caused by open trench).

(n18)Footnote 109. *B.A. Mtg. Co. v. McCullough, 590 S.W.2d 955 (Tex. Civ. App. 1979)* (insufficient evidence on amount of damages); *Seal v. Aldredge, 111 S.E.2d 769 (Ga. App. 1959)* (evidence sufficed to show title and damage). *Pender v. Matranga, 1997 Conn. Super. LEXIS 423,* (Conn. Super. Feb. 20, 1997) (defendant failed to prove that plaintiff's excavation encroached upon the natural lateral support for the defendant's easement); *Colorado Fuel & Iron Corp. v. Salardino, 245 P.2d 461 (Colo. 1952).*

(n19)Footnote 110. *Platts v. Sacramento N. Ry., 253 Cal. Rptr. 269 (1988)* (action by landowner whose house collapsed into an old abandoned railroad tunnel); *Kim v. City of New York, 681 N.E.2d 312 (NY 1997).*

(n20)Footnote 111. *Helm Bros. v. Trauger, 389 N.W.2d 600 (N.D. 1986)* (damages for diminution in value); *Tortolano v. DiFilippo, 349 A.2d 48 (R.I. 1975). Pugel v. Monheimer, 83 Wash. App. 688 (Wash. App. 1996)* (where damage to property is permanent, measure of damages is diminution in value); *Easter v. Dundalk Holding Co., 86 A.2d 477 (Md. App. 1952)* (damages for erosion could not be recovered in the absence of evidence showing loss of property value).

(n21)Footnote 112. *B. A. Mtg. Co. v. McCullough, 590 S.W.2d 955 (Tex. Civ. App. 1979)* (damages for diminution of land value); *Brewitz v. St. Paul, 99 N.W.2d 456 (Minn. 1959); Spall v. Janota, 406 N.E.2d 378 (Ind. App. 1980).*

(n22)Footnote 113. *McGettigan v. Potts, 24 A. 198 (Pa. 1892)* (house collapsed into excavation pit).

(n23)Footnote 114. *Waters v. Biesecker, 298 S.E.2d 746, review allowed, 302 S.E.2d 249, aff'd, 305 S.E.2d 539 (N.C. 1983)* (city's excavation caused loss of lateral support); *Noone v. Price, 298 S.E.2d 218 (W. Va. 1982)* (subsidence caused by deteriorated retaining wall).

(n24)Footnote 115. *Island Lime Co. v. Seattle, 211 P. 285 (Wash. 1922)* (damages based on rental value).

(n25)Footnote 116. *Williams v. Missouri Furnace Co., 13 Mo. App. 70 (1882)* (adjacent land subsided into excavation pit).

(n26)Footnote 117. *Kolodkin v. Griffin, 75 S.E.2d 197 (Ga. App. 1953)* (exemplary damages for willful and reckless trespass and excavation). In Louisiana, only compensatory damages are awarded. *Bentley v. Industrial Fire Protection Co., 338 So. 2d 1177 (La. App. 1976).*

(n27)Footnote 118. *Bradley v. Valicenti, 138 A.2d 238 (Pa. Super. 1958)* (injunction requiring construction of retaining wall); *Gorton v. Schofield, 41 N.E.2d 12 (Mass. 1942)* (money damages to pay for repair of retaining wall).

(n28)Footnote 119. *Ahern v. Warner, 450 N.E.2d 662 (Mass. App. 1983)* (action for damages and injunction); *Gladin v. Von Engeln, 575 P.2d 418* (Colo.) *appeal after remand, 590 P.2d 76 (Colo. App. 1978)* (damage from city's excavation); *Powers v. Olson, No. CV 960563230, 1998 Conn. Super. LEXIS 2094,* at *11 (Conn. Super. July 17, 1998) (holding that harm to Plaintiff's trees is irreparable and limited injunctive relief is appropriate because the harm is actual or imminent); Riverbluff Coop. v. City of Memphis & Mayor W.W. Herenton, No. 02*A01-9805-CH-00128, 1998 Tenn. App. LEXIS 558* (Tenn. App. July 24, 1998) (sustaining lower courts denial of injunctive relief because of a lack of proof of immediate and irreparable injury as required by the state procedural rules).

(n29)Footnote 120. *Farrand v. Marshall, 19 N.Y. (Barb.) 380 (1853), aff'd, 21 Barb. 409 (N.Y. 1855)* (action by owner of improved land against owner of industrial land).

(n30)Footnote 121. *Rose v. Oneida Coal Co., Inc., 466 S.E.2d 794 (W. Va. 1995).*

Supp. To CHAPTER 69 RIGHTS OF LATERAL AND SUBJACENT SUPPORT

8-69 Thompson on Real Property, Thomas Editions Supp. to § 69.01

Supp. to § 69.01 Introduction and Definition

[Go To Main]

Add:

Watson v. Michael Haskins Photography, Inc., 2005 Texas App. LEXIS 9838 (Tex. App. 2005) (Temporary injunction against an adjacent landowner for failure to repair a common wall).

Add:

Downs v. Lyles, 2009 Ala. Civ. App. LEXIS 512 (citing *Moody v. McClelland, 39 Ala. 45, 48 (1863)* in holding that the right applies "to the support of land in its natural state").

Add:

Pecanty v. Miss. S. Bank, 2010 Miss. App. LEXIS 232 (holding that "the duty to provide lateral support is ongoing and run[s] against the servient land").

Add:

XI Props. v. RaceTrac Petroleum, Inc., 151 S.W.3d 443, 447 (Tenn. 2004) (Holding that an adjacent landowner has no duty to replace the lateral support for artificial additions to land); *Lusardi v. Kensington Bldg. Corp., 2005 Mo. App. LEXIS 1730 (Mo. Ct. App. 2005)* (Holding that a showing of subsidence is necessary for a cause of action for damages for the withdrawal of lateral support).

Add:

Pecanty v. Miss. S. Bank, 2010 Miss. App. LEXIS 232 (requiring no showing of negligence to show a breach of duty of support).

Supp. To CHAPTER 69 RIGHTS OF LATERAL AND SUBJACENT SUPPORT

8-69 Thompson on Real Property, Thomas Editions Supp. to § 69.02

Supp. to § 69.02 The Natural Right of Lateral Support for Land

[Go To Main]

§ 69.02(a) Lateral Support of Land in Its Natural State [Go To Main]

Add:

Downs v. Lyles, 2009 Ala. Civ. App. LEXIS 512 (quoting *Moody v. McClelland, 39 Ala. 45, 48 (1863)* in holding that "the adjacent proprietor cannot remove the earth to such an extent as to withdraw the natural support of his neighbor's soil").

§ 69.02(b) Lateral Support of Land That Has Been Altered or Filled [Go To Main]

Add:

XI Props. v. RaceTrac Petroleum, Inc., 151 S.W.3d 443, 448 (Tenn. 2004) (Holding that the right of lateral support does not extend to filled land); *Lusardi v. Kensington Bldg. Corp., 2005 Mo. App. LEXIS 1730 (Mo. Ct. App. 2005)* (Holding that a showing of subsidence is necessary for a cause of action for damages for the withdrawal of lateral support).

Add:

Morewood Point Cmty. Ass'n v. Port Auth., 2010 Pa. Commw. LEXIS 182 (quoting *Beal v. Reading Co., 370 Pa. 45, 51*

(Pa. 1952) in holding that "a landowner is under no duty affirmatively to supply lateral support"); *Pecanty v. Miss. S. Bank, 2010 Miss. App. LEXIS 232* .

§ 69.02(c) Lateral Support of Land with Buildings [Go To Main]

Add:

Lusardi v. Kensington Bldg. Corp., 2005 Mo. App. LEXIS 1730 (Mo. Ct. App. 2005) (Holding that a showing of subsidence is necessary for a cause of action for damages for the withdrawal of lateral support).

Add:

Pecanty v. Miss. S. Bank, 2010 Miss. App. LEXIS 232 (holding that "this principle [of lateral support] applies only to land in its natural state").

Thompson on Real Property, Thomas Editions

Copyright 2010, Matthew Bender & Company, Inc., a member of the LexisNexis Group.

Supp. To CHAPTER 69 RIGHTS OF LATERAL AND SUBJACENT SUPPORT

8-69 Thompson on Real Property, Thomas Editions Supp. to § 69.04

Supp. to § 69.04 Liability Imposed for Loss of Lateral Support

[Go To Main]

§ 69.04(b) Loss of Lateral Support Caused by Excavation [Go To Main]

§ 69.04(b)(1) Loss of Lateral Support from Land Without Structures

Add:

Great Northern Ins. Co. v. Leontarakis, 904 A.2d 846 (N.J. Super. 2006) (an excavating owner had a statutory duty to provide lateral support to a neighboring owner's wall).

Add:

Lusardi v. Kensington Bldg. Corp., 2005 Mo. App. LEXIS 1730 (Mo. Ct. App. 2005) (Holding that a showing of subsidence is necessary for a cause of action for damages for excavation of a neighboring land resulting in a withdrawal of lateral support).

Add:

Pecanty v. Miss. S. Bank, 2010 Miss. App. LEXIS 232 (affirming trial court's decision to hold original landowners liable for excavating in order to make improvements on their land).

Add:

But see Downs v. Lyles, 2009 Ala. Civ. App. LEXIS 512 (holding that runoff water from neighbor's construction of a driveway was a trespass and not a violation of the right of lateral support).

Add:

Bentley v. COP Construction Co.,, 2005 ML 423, 17 (Mont. Dist. 2005) (subsidence caused by nearby excavation).

Add:

Pecanty v. Miss. S. Bank, 2010 Miss. App. LEXIS 232 .

§ 69.04(b)(2) Loss of Lateral Support from Land With Structures

§ 69.04(b)(2)(ii) When Liability Only for Negligence is Imposed

Add:

Atlantic Exp. Transp. Corp. v. Weeks Marine, Inc., 869 N.Y.S.2d 326 (2008) (action for damages caused by loss of lateral support from drilling, blasting and dredging of channel adjacent to plaintiff's property).

Louthan v. Ekizian, 2005 Cal. App. Unpub. LEXIS 3641, 2-3 (California Unpublished Opinions 2005) (Natural and improved property damaged when sewer was installed).

Add:

Bentley v. COP Construction Co., 2005 ML 423, 25 (Mont. Dist. 2005) (liability for damages to a neighboring but noncontiguous tract must rest on negligence).

§ 69.04(b)(2)(iii) The Standard of Care

Add:

Bentley v. COP Construction Co., 2005 ML 423, 37 (Mont. Dist. 2005) (Jury should decide whether there was a loss of subjacent support due to negligence).

Copyright 2010, Matthew Bender & Company, Inc., a member of the LexisNexis Group.

Supp. To CHAPTER 69 RIGHTS OF LATERAL AND SUBJACENT SUPPORT

8-69 Thompson on Real Property, Thomas Editions Supp. to § 69.05

Supp. to § 69.05 The Right to Subjacent Support

First Amendment

§ 69.05(b) The Right to Subjacent Support as an Absolute Right [Go To Main]

Add:

Saddle Mt. Minerals, L.L.C. v. Joshi, 152 Wash. 2d 242, 255 (Wash. 2004) (Deed to extract minerals by any manner as long as it does not raise the issue of subjacent support).

Add:

Ambrosia Land Investments, LLC v. Peabody Coal Co., 521 F.3d 778 (7th Cir. 2008) (action by surface owner against mining company for loss of subjacent support).

§ 69.05(c) The Right to Subjacent Support for Land in Its Natural State [Go To Main]

Add:

Gary v. Braddock Cemetery, 517 F.3d 195 (3d Cir., 2008) (action for loss of support by mining beneath a cemetery and causing subsidence).

Add:

Bentley v. COP Construction Co., 2005 ML 423, 2 (Mont. Dist. 2005) (Excavation of a trench to install a sewer).

Add:

Ambrosia Land Investments, LLC v. Peabody Coal Co., 521 F.3d 778 (7th Cir. 2008) (action against mining company for withdrawal of subjacent support).

CHAPTER 70 WASTE

8-70 Thompson on Real Property, Thomas Editions § 70.01

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 70.01 Outline of the Chapter.

This chapter discusses the concept of waste as it applies to both real and personal property. Waste as a form of injury to property is defined in §70.03. The characteristics of waste that distinguish it from other causes of action are described in §70.04. The elements or requirements for a cause of action in waste are discussed in §70.05.

The various types of waste are distinguished in §70.06. In §70.07 the historical development of the concept of waste is set forth, including the English and American statutory influences. This section also includes a discussion of how waste has been characterized in the American Restatement of Property. Following this historical treatment, §70.08 gives a comprehensive review of the wide variety of circumstances that give rise to a cause of action in waste, in both real and personal property contexts.

Concluding the chapter are several sections on the procedural aspects of waste actions, including proper parties (§70.09), remedies (§70.10), defenses (§70.11), and practice and procedure considerations (§70.12), including drafting instructions (§70.13).

CHAPTER 70 WASTE

8-70 Thompson on Real Property, Thomas Editions § 70.02

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 70.02 Overview of the Law of Waste.

The law of waste protects the owner of a future interest in property from depredations by the present possessor. It is one of the common law doctrines with deepest roots in feudalism and the Middle Ages. In medieval England land was almost always occupied by some type of tenant, so the law of waste performed the important function of defining the extent of occupants' rights of use and the consequences of misuse or neglect. Accordingly, an extraordinary number of early statutes defined and refined waste law. In the 13th century no fewer than six major statutory pronouncements dealt with waste law, beginning with the Magna Carta in 1215 and concluding with the Statute of Waste in 1292. Probably no other common law doctrine received such heavy statutory attention so early in its development.

The statutes introduced more convenient legal procedures for controlling waste and mandated the harsh remedies of treble damages and forfeiture of the property. While English jurisprudence eventually rejected multiple damages and forfeiture, the American colonies and states either received them into their common law or re-enacted them in many of their state statutes. In both countries, however, even with statutory sanction, the extreme remedies coupled with the traditional action of waste were left largely unused when the more facile action on the case for waste became acceptable; the action on the case yielded only single damages and no forfeitures.

Litigation in waste cases remained popular in the United States as long as American society was essentially agrarian. Many of the leading cases arose in the early decades of the 19th century. These cases reaffirm the basic principles of the old common law doctrine, especially that a present possessor is required to preserve the property essentially unchanged in value and character, in anticipation of the time when the future interest ripens into possession. Both misuse and neglect are prohibited; limited duties of repair and maintenance are imposed; payment of current taxes, mortgage interest, and insurance premiums is required; use of timber and extraction of mineral and other resources are permitted under limited circumstances; and some beneficial changes in the character of the property and its improvements are permitted. The rights of a future interest holder to control the use and condition of the property in the hands of present possessors weaken as the future interests become more remote or less likely to eventually vest.

Waste litigation has become relatively rare today, and waste cases may be affected by changes in other areas of the law. For instance, most states have now adopted some form of implied warranty of habitability, requiring landlords to maintain residential rental premises in minimally safe and habitable condition. These requirements effectively shift

from tenants to landlords many of the duties of maintenance and repair that, under the law of waste, rested with tenants as present possessors of the property.

CHAPTER 70 WASTE

8-70 Thompson on Real Property, Thomas Editions § 70.03

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 70.03 Definition.

"Waste" is the technical term of law that describes a use of property, by one lawfully in possession of the property, that is detrimental to another's interest in the same property. n1 More specifically, waste is the destruction or alteration of property by an owner in possession, to the detriment of one or more others who hold an interest in the property and are usually not in possession. To constitute waste, an act or omission must be wrongful, unreasonable, or improper, and must be permanently harmful to the value of the premises, including impairment of evidence of title. Typical examples of waste are cutting of timber or neglect of buildings by a life tenant in possession, for which a reversioner or remainderman has a cause of action in waste.

Waste as a legal concept is only indirectly related to the modern popular meaning of waste, which refers to thoughtlessly or carelessly using or squandering some resource. The term waste probably came into English from similar Old French and Latin words signifying a place that was empty and desolate as well as a place that had been plundered, ravaged or destroyed. n2 The dual connotations of barrenness and damage are both elements in the modern legal concept of waste. According to that concept, waste is an act or omission that is wrongful, unreasonable, or improper, and is permanently harmful to the value of the premises, including impairment of evidence of title.

CHAPTER 70 WASTE

8-70 Thompson on Real Property, Thomas Editions § 70.04

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 70.04 Distinctive Features of Waste Law.

[Go To Supp]

§ 70.04(a) Waste Distinguished from Tort.

It has been asserted that waste is a form of tort. n3 Because actions for waste existed long before the 19th century when torts were recognized as a distinct category of the law, waste typically is not included in major treatises on tort law. Most attempts to frame a comprehensive definition for torts as a class of conduct, however, are broad enough to include waste. n4 Where doubt exists about characterization of waste as a tort, the activity at issue has sometimes been called a "tort in the nature of waste." n5

§ 70.04(b) Waste Distinguished from Trespass.

In most cases waste is rather easily distinguished from trespass, even though similar conduct might be involved. Waste is based on privity of estate n6 and -- in theory -- can be committed only by one rightfully in possession of the damaged premises, whereas trespass is committed by one who is not in rightful possession of the premises. n7

Some confusion between the concepts of waste and trespass may arise in cases of wasteful conduct committed by one who is a stranger to the title. A few courts have permitted an action in waste by the remainderman or reversioner directly against the stranger, n8 such as a trespasser upon leased premises, even though privity of estate is lacking. n9

§ 70.04(c) Wasteful Conduct as Relative to Circumstances.

Acts or omissions that constitute waste in some circumstances may not be considered waste under all circumstances. Under common law, waste is a flexible concept influenced by the type of property and the reasonableness of the defendant's conduct under the circumstances. n10 In some jurisdictions this flexibility has been stiffened by statute, which may impose liability for certain types of waste conduct whenever and wherever it occurs. n11

FOOTNOTES:
(n1)Footnote 3. Powell on Real Property(R), ch. 56, *Waste* (Michael Allan Wolf ed., Matthew Bender).

Keesecker v. Bird, 490 S.E. 2d 754 (W. Va. 1997) (waste is a property damage tort (citing *Cecil v. Clark, 39 S.E. 202 (W. Va. 1901))* distinguished by *Boucher Inv., L.P. v. Annapolis-West Ltd. Partnership, 784 A.2d 39* (Md. App. Oct. 31, 2001).

(n2)Footnote 4. *See, e.g.,* William L. Prosser & Page Keeton, Prosser and Keeton on The Law of Torts §1, at 1-7 (5th ed. 1984).

(n3)Footnote 5. *See, e.g.,* Grant S. Nelson & Dale A. Whitman, Real Estate Finance Law §4.4, at 152 (2d ed. 1985). The question of waste as a tort can arise when a mortgagor is left in possession of the mortgaged premises in a jurisdiction that adheres to the common law view that waste can be committed only by a tenant for life or for years. A court in such an instance would characterize the wasteful conduct as a tort in the nature of waste for which the plaintiff might bring an action either in trespass or in trespass on the case. *Delano v. Smith, 92 N.E. 500 (Mass. 1910)* (an action by a mortgagee against a lessee that used the land as a smallpox hospital was "an action of tort in the nature of waste").

(n4)Footnote 6. *Stevens v. Mobil Oil Corp., 412 F. Supp. 809 (E.D. Mich. 1976)* ("the primary distinction between waste and trespass is that in [waste] the injury is done by one rightfully in possession").

(n5)Footnote 7. *See supra* Chapter 68.

(n6)Footnote 8. *See supra* §70.09(i).

(n7)Footnote 9. *California Dry-Dock Co. v. Armstrong, 17 F. 216 (D. Cal. 1883)* (shipowners declared liable in waste to lessors of land when their ship broke loose and damaged a marine railway on the leased premises).

(n8)Footnote 10. Coke's categorical pronouncement that cutting timber was waste probably led some English courts to take a more dogmatic approach toward this particular and rather common problem. Coke on Littleton *53a, *as discussed in* John Henry Merryman, *Part 20: Waste, in 5* American Law of Property 71 (A. James Casner ed. 1952).

(n9)Footnote 11. Statutory modifications of common law waste concepts are discussed *infra* §70.07(d) and (k).

CHAPTER 70 WASTE

8-70 Thompson on Real Property, Thomas Editions § 70.05

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 70.05 Elements of Waste.

§ 70.05(a) Committed by One Who Is Lawfully in Possession of the Property.

Subject to certain trespass actions being characterized as waste actions, n12 waste can be committed only by a party lawfully in possession of the property. n13

§ 70.05(b) An Act or Omission That Is Wrongful.

Waste commonly arises from the destruction, misuse, alteration, or neglect of property. n14 Numerous types of wrongful acts or omissions have been held to constitute waste n15 and usually fall into several general categories that are mentioned frequently in published judicial opinions. These categories commonly are described in such terms as abuse or destructive use of property; consumption of things belonging to the inheritance; acts contrary to the ordinary course of good husbandry; unreasonable or improper use; mismanagement; unlawful acts or omissions of duty; destruction of things on the land not included in its temporary profits; spoliation, spoil or destruction in houses, gardens, trees, or other corporeal hereditaments; improper destruction or material alteration or deterioration of the freehold; acts which are willful and constitute lack of ordinary care; poor husbandry; employment of resources prodigally or without any considerable return or effect; and improper conversion of rents and profits by a mortgagor.

§ 70.05(c) Damage to the Property Interest of Another.

Not all misuse of property constitutes waste. The resultant harm from wasteful conduct must be prejudicial to the interests in the property held by another, such as a remainderman or co-owner of a concurrent estate. n16 The types of damage that have been held to constitute waste have been described as those tending to destroy security for mortgage; lasting damage or permanent loss to the freehold or its improvements or anything forming an essential part of the freehold; permanent injury to the inheritance; definite physical injury; depreciation of value; substantial injury; increase in the burden on the estate; acts causing the disherison n17 of the remainderman; acts or omissions which tend to destroy the identity of the property or impair evidence of title; and destruction of the corporeal hereditaments on the premises.

CHAPTER 70 WASTE

8-70 Thompson on Real Property, Thomas Editions § 70.06

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 70.06 Types of Waste Recognized in Modern Law.

Waste as a legal concept appears in several forms, active and passive, concrete and abstract, present and prospective. These forms are embodied in the types of waste described in this section.

§ 70.06(a) Voluntary or Commissive Waste.

Voluntary or commissive waste consists of deliberate or voluntary destructive acts. n18 A common example is causing damage to or destruction of a building on the premises. n19

§ 70.06(b) Permissive Waste.

Permissive waste may be described as neglecting or failing to prevent injury to the property, or the failure to exercise ordinary care in preserving the property. n20 The propriety of a right of action for permissive waste was questioned after enactment of the Statutes of Marlborough and Gloucester in the 13th century because their provisions applied to those who "made" or "did" waste; however, early English courts concluded that permissive waste actions had been permitted under the common law even before those statutes and should be continued. The concept of permissive waste at that time included waste that occurred without the fault of the tenant in possession, such as damage caused by a trespasser. Under pressure of the harsh common law remedies of multiple damages and forfeiture, the permissive waste concept eventually came to exclude the instances of so-called innocent waste; for the same reason it also became inapplicable where no actual damage had occurred to the reversion or remainder. As the action on the case for waste became popular, some English courts took the somewhat arbitrary position that permissive waste could not come within the ambit of an action on the case. When the action on the case became the principal procedural remedy for waste in 19th century England, uncertainty existed about whether permissive waste would sustain a cause of action. In the United States, courts have consistently upheld a right of action for permissive waste. n21

§ 70.06(c) Equitable Waste.

Equitable waste consists of acts committed by the lawful possessor and within the rights of possession, but which are nevertheless harmful to the property. Courts of equity are said to act particularly against a tenant's acts which are wanton, malicious or unconscientious. For instance, the owner of a defeasible fee, at law not liable in waste to the

holder of the reversionary or executory interest, could be held liable for abusive conduct under a theory of equitable waste. n22 Equitable waste is today largely a theoretical concept, almost never invoked in modern cases. In no reported case of the twentieth century has a court decreed liability under a theory of equitable waste.

§ 70.06(d) Ameliorative Waste.

According to the controversial concept of ameliorative waste, some acts that increase the value of the premises can be considered waste under some circumstances. It is popularly believed that this concept requires that the inheritance be turned over to the remainderman or reversioner in condition essentially unchanged from the time it was granted, so that even a valuable alteration will violate the expectations of the remainderman or reversioner. n23 Such a conception has understandably brought the doctrine into some disrepute. A closer examination of the English origins of the concept, however, provides a more plausible foundation: not all changes benefitting the present possessory interest necessarily benefitted the future freehold; if the present change, even though adding value at the moment, actually injured the freehold's value, impaired its evidence of title, or added to its burdens, it could be charged as waste. The concept has lost much force in England and in the United States. n24

§ 70.06(e) Innocent Waste.

Originally included within the concept of permissive waste, innocent waste came to mean property damage that occurred without the fault (or neglect) or participation of the possessory tenant, such as damage caused by accident or by a trespasser. No liability for innocent waste attaches in England n25 or in the United States today. n26

§ 70.06(f) Eventual Waste.

Eventual waste is a rare label used to describe the wasteful conduct of one in possession of property which has become the subject of an action to try title. The common law procedural remedy to restrain such waste and to obtain damages for waste already caused since institution of the title action was a writ of estrepement. Thus, a court decreed, in dictum, that "all such acts as would be deemed waste, when done by an admitted particular tenant, if done after the institution of any suit involving title, or of a suit for partition, it may be well to denominate eventual waste." n27 In effect, then, any waste which could be the subject of a writ of estrepement, could be denominated eventual waste.

Carter v. Helmsley-Spear, Inc., 861 F. Supp. 303, 335 (S.D.N.Y. 1994), aff'd in part, rev'd in part, 71 F.3d 77 (2d Cir. 1995) (but waste dismissal upheld), *cert. denied, 517 U.S. 1208 (1996). See Three & One Co. v. Geilfuss, 504 N.W.2d 393 (Wis. 1993)* (urine-caused damage to carpet and flooring constituted waste).

(n2)Footnote 19. *Dorsey v. Speelman, 459 P.2d 416 (Wash. App. 1969)* (interior of house destroyed by tearing out walls and ceilings, destroying cabinets, and ripping out wiring).

See Three & One Co. v. Geilfuss, 504 N.W.2d 393 (Wis. 1993) (urine-caused damage to carpet and flooring constituted waste). *McNeese v. Hutchinson, 724 So. 2d 451 (Miss. App. 1998)* (filling in swimming pool).

(n3)Footnote 20. *Prudential Ins. Co. of Am. v. Spencer's Kenosha Bowl, Inc., 404 N.W.2d 109 (Wis. App. 1987)* (non-assuming grantee of mortgagor liable in permissive waste to mortgagee for failing to keep building roof in good repair).

(n4)Footnote 21. *See infra* §70.07(j)(1) and (k)(2).

Kestel-Rauls v. Moore, 586 N.W.2d 699 (Wisc. App. 1998) (unpublished opinion listed in Table) (puppy, kitten,

cigarette, and iron damage to carpet).

(n5)Footnote 22. *Landers v. Landers, 151 S.W. 386 (Ky. 1912)* (the owner of a defeasible fee interest could be restrained from injurious acts which were wanton and unconscientious abuses of fee owner's rights).

(n6)Footnote 23. In *Palmer v. Young, 108 Ill. App. 252 (1903),* the court declared that any change in the character of the property would be waste, and if the change increased the value of the property, it would still be actionable as ameliorative waste. In Ohio, when the land occupant reduced a muck pond and created an artificial lake in its place, in preparation for a golf course, the court conceded it could be technically considered waste, but because of the increased value to the estate, no liability would result. *J.H. Bellows Co. v. Covell, 162 N.E. 621 (Ohio App. 1927).* Most authority on ameliorative waste is from British courts, cited for American courts in 27 Ruling Case Law *Waste,* §§3, 38 (1920). *See especially Meux v. Cobley, 2 Ch. 253 (1892),* holding that replacing meadowland and arable ground with a market garden was ameliorating waste, but denying damages or injunction.

(n7)Footnote 24. *See infra* §70.07(j)(2) and (k)(3).

(n8)Footnote 25. *See infra* §70.07(j)(1).

(n9)Footnote 26. A series of 19th century American cases included statements in dictum to the effect that a life tenant is liable to a remainderman for waste committed by a stranger. These were founded in part on a statement of Coke's that a "tenant by the curtesie, tenant in dower, tenant for life, yeares, etc. shall answer for the waste done by a stranger, and shall take their remedy over." Coke, 1 Institutes *54a. The most recent American case reaffirming this position, again only in dictum, is *Dix v. Jaquay, 88 N.Y.S. 228 (1904).* It seems safe to assume that the doctrine of liability for innocent waste is now dead in the United States.

(n10)Footnote 27. *Duvall v. Waters, 1 Bland. (Md. Ch.) 569, 575 (1827).*

CHAPTER 70 WASTE

8-70 Thompson on Real Property, Thomas Editions § 70.07

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 70.07 History of Waste.

§ 70.07(a) Early Waste Actions Associated with Life Estates.

Although the origins of waste doctrine are obscure, the doctrine must have been important in the early common law, because the essential principles of it are mentioned in the earliest common law literature. Even by the time of Glanville and Bracton, however, the common law of waste struggled to meet the needs of landholders and was ripe for statutory modification. Because in its earliest form the action for waste was coupled with certain life estates that arose by law, examining the development of the life estate in English land law provides insight into how actions for waste may have evolved.

§ 70.07(b) Origins of Life Estates.

The common law life estate may have evolved from a property interest known in Dark Age Europe as the *precarium*, or the practice of one party possessing and using another party's land, for whatever consideration seemed appropriate. The precarium was one element of classic Roman property jurisprudence that survived the barbarian invasions. Inevitably this property relationship led to bonds of patronage within which the possessor, the holder of the beneficium, came under the protection and power of the owner. In the lower reaches of society this practice meant that the tenants obtained their land on heavy conditions and gradually slipped into serfdom, bound to the land. Among the more fortunate classes, many conferred lands on the church for the sake of their souls, but reserved rights of possession during their lifetimes. Also, in purely secular transactions, an important aristocrat might obtain possessory rights to a large tract of land from the monarch, perhaps as a reward for past service or in expectation of future service. n28

In Anglo-Saxon England property rights were distinguished as bookland, folkland and laenland, with laenland bearing close resemblance to the continental precarium. The word laen is likely related to the modern German Lehn, which means loan, although in the feudal context it is interpreted as fief or fee. Laenland in Anglo-Saxon England was literally loaned and, according to available documentation, was almost always loaned to individual tenants by the English church, which had received many grants from kings and others. Possession of these lands was typically loaned out to members of the nobility, sometimes even the king, for the span of one or more lives, but never more than three lives. n29 Lump sum payments, or rent, or services would be required in return. n30 The net effect of laenland holding, as well as Anglo-Saxon bookland and folkland practices, is best expressed by Holdsworth's assertion "that the rights of

landowners are beginning in many cases to be rather rights of tenants than of absolute owners." n31

While Anglo-Saxon and continental tenures and conveyances would have eventually merged in England, "the Conquest suddenly bridged a gap which at the time was still well-marked." n32 So even after the Conquest, the life estate continued to be the usual form of landholding. An ordinary gift of land to a person was considered to convey only a life estate. n33

In addition to conventional life estates created by private conveyance, certain life estates arose by operation of law. Dower, originally a voluntary, though customary, gift made by the husband to the wife, eventually came to be recognized as an estate created by operation of law. The dower right of the wife consisted of a life estate in one-third of the land held by the husband at the time of the marriage; by the time of Edward I the dower right also applied to any land acquired by the husband after the moment of marriage. n34 Curtesy, another form of life estate created by law, seems to have originated sometime after the Conquest; this somewhat obscure term describes the husband's right to a life estate in the lands held by his wife during the marriage, if issue were born alive during the marriage. Another limited estate that arose by operation of law was attached to guardianship rights in chivalry and in socage. Those entitled to exercise guardianship rights could possess and enjoy lands inherited by minors upon the death of the father and through the duration of minority. n35 These guardianships in chivalry were technically not life estates, but were similarly finite in duration.

Despite the uncertain and sometimes brief duration of these life estates -- both those that were privately created and those that arose by operation of law -- a life tenant had the powerful rights of seisin and was considered the "owner" of land for most purposes. n36 The right, under the early common law, of a reversioner or remainderman to complain of misuse of the property by a life tenant was uncertain and in any event very limited.

§ 70.07(c) Scope of Early Common Law Remedies for Waste.

Indeed, legal historians have carried on a warm dispute about the scope of common law remedies for waste available to remaindermen and reversioners before enactment of several major 13th-century statutes dealing with waste. All authorities agree that any life tenants whose conveyances prohibited waste could be held liable for waste. n37 However, absent such prohibitions, according to some authorities, only the tenants of the estates arising by operation of law -- guardians in chivalry, tenants in dower, and tenants by the curtesy -- could be liable in waste. n38 Other historians point out that even conventional life tenants could sometimes be held liable for waste, when a royal prohibition against the waste was issued. n39 However, a royal prohibition would not issue unless the waste was substantial. n40 Yet another scholar believes that conventional life tenants could be liable for waste under the same circumstances as legal life tenants, even if no royal prohibition were issued. n41 All of these authorities agree that in the period before the great 13th-century statues on waste were enacted, tenants for years were not subject to waste liability at common law. n42

§ 70.07(d) Medieval Statutory Changes in Waste Law.

§ 70.07(d)(1) Magna Carta (Version of 1225).

The earliest statutory response to this uncertainty of remedy is probably the provision of Magna Carta which rather severely penalizes guardians in chivalry who commit waste on their wards' property:

> (1) The keeper of the land of such an heir, being within age, shall not take of the lands of the heir, but reasonable issues, reasonable customs, and reasonable services, and that without destruction and waste of his men and his goods. (2) And if we commit the custody of any such land to the sheriff, or to any other, which is answerable unto us for the issues of the same land, and he make destruction or waste of those things that he hath in custody, we will take of him amends and recompence therefore, (3) and the land shall be committed to two lawful and discreet men of that fee, which shall answer unto us for the issues of the same land, or unto him whom we will assign. (4) And if we give or sell to any man the

> custody of any such land, and he therein do make destruction or waste, he shall lose the same custody; and it shall be assigned to two lawful and discreet men of that fee, which also in like manner shall be answerable to us, as afore is said. n43

§ 70.07(d)(2) Provisions of Westminster (1259).

After Magna Carta, a series of statutes later in the 13th century addressed the problem of waste more broadly, as waste was apparently a matter of frequent judicial concern. This concern is made evident from the large number of cases dealing with waste as reported in Bracton's Note Book. n44 The first of the statutory provisions to address this need was in the Provisions of Westminster, enacted in 1259:

> Also farmers during their farms, shall not make waste, or sale, or exile, in woods, houses, men, or in any thing else belonging to the tenements which they have to farm; unless they have a special grant in the writing of their covenant, making mention that they may do so. And if they do, and be convicted thereof, they shall restore damages in full. n45

§ 70.07(d)(3) Statute of Marlborough (or Marlbridge) (1267).

The regulation of waste actions in the Provisions of Westminster applied only to tenants for years. It was re-enacted in 1267, in the Statute of Marlborough (also called the Statute of Marlbridge), which enhanced the remedy by imposing a fine along with damages:

> Also fermors, during their terms, shall not make waste, sale, nor exile of house, woods, and men, nor of any thing belonging to the tenements that they have to ferm, without special licence had by writing of covenant, making mention, that they may do it; which thing if they do, and thereof be convict, they shall yield full damage, and shall be punished by amerciament [a money fine for official misconduct] grievously. n46

§ 70.07(d)(4) Statutes of Gloucester (1278).

Even after the Statute of Marlborough, the liability of a conventional life tenant for waste, absent a royal prohibition, may still have been in doubt. n47 Thus a short time later, in 1278, more extensive legislation followed in the Statutes of Gloucester:

> (1) It is provided also, that a man from henceforth shall have a writ of waste in the Chancery against him that holdeth by law of England, or otherwise for term of life, or for term of years, or a woman in dower. (2) And he which shall be attainted of waste, shall lose the thing that he hath wasted, and moreover shall recompense thrice so much as the waste shall be taxed at. (3) And for waste made in the time of wardship, it shall be done as is contained in the Great Charter. (4) And where it is contained in the Great Charter, that he which did waste during the custody, shall leese [lose] the wardship, (5) it is agreed that he shall recompense the heir his damages for the waste, if so be that the wardship lost do not amount to the value of the damages before the age of the heir of the same wardship. n48

This enactment thus resolved any lingering doubt about who could be liable for waste: life tenants and tenants for terms were included; both conventional life estates and estates arising by operation of law were included.

Even more important were the statute's innovations in procedures and remedies for waste. The writ of waste was a new procedure, although probably not the exclusive procedure, since, according to Coke, the writ of prohibition continued in use. n49 As with other common law writs of the time, the plaintiff applied for it in Chancery; however, the action was still an action at law rather than in equity. n50 A further remedy, the writ of estrepement, was provided by the Statutes of Gloucester against waste committed by persons who were adjudged to be no longer rightfully in possession of their

land:

> (1) It is provided also, That after such time as a plea shall be moved in the city of London by writ, the tenant shall have no power to make any waste or estrepement of the land in demand (hanging the plea) and if he do, the mayor and bailiffs shall cause it to be kept at the suit of the demandant. (2) And the same ordinance and statute shall be observed in other cities, boroughs, and every where throughout the realm. n51

§ 70.07(d)(5) Statute of Westminster II (1285).

Next, the Statute of Westminster II in 1285 extended the remedies for waste to joint tenants and tenants in common:

> (1) Whereas two or more do hold wood, turfland, or fishing, or other such thing in common, wherein none knoweth his several, and some of them do waste against the minds of the other, an action may lie by a writ of waste; (2) and when it is come unto judgement, the defendant shall choose either to take his part in a place certain, by the sheriff, and by the view, oath, and assignment of his neighbours sworn and tried for the same intent, or else he shall grant to take nothing from henceforth in the same wood, turf-land, and such other, but as his partners will take. (3) And if he do choose to take his part in a place certain, the part wasted shall be assigned for his part, as it was before he committed the waste. (4) And there is such a writ in this case... n52

An important change in procedure for waste cases was also introduced by Westminster II. The summons, or writ of waste, now replaced the prohibition, because of the belief by some that an action for waste would lie only after a prohibition had been violated. By means of the summons, relief could be obtained for waste committed at any time:

> (1) Whereas for waste done in the inheritance of any person, by guardians, tenants in dower, tenants by the courtesie of England, or otherwise for term of life, or years, a writ of prohibition of waste hath been used to be granted, by which writs many were deceived, thinking that such as had done the waste should not need to answer but only for waste done after the prohibition to them directed: (2) our lord the King, to remove from henceforth this error, hath ordained, That all manner of waste done to the damage of any person, there shall from henceforth be no writ of Prohibition awarded, by a writ of Summons, so that he of whom complaint is shall answer for waste done at any time; (3) and if he come not after the Summons, he shall be attached, and after the attachment he shall be distrained; (4) and if he come not after the distress, the sheriff shall be commanded that in proper person he shall take with him twelve, etc. and shall go to the place wasted, and shall enquire of the waste done, and shall return an inquest, and after the inquest returned, they shall pass unto judgement, like as is contained in the statute of Gloucester. n53

§ 70.07(d)(6) Statute of Waste (1292).

By means of these statutes the remedies for waste evolved from preventive to punitive. The old writ of prohibition had been used to prevent threatened waste. It was suddenly replaced by the writ of waste, or summons, by which waste committed in the past could result in forfeiture and treble damages. Another writ, the writ of estrepement, was useful against persons whose possession of the land was adjudged to be no longer rightful.

Further extension of waste remedies occurred by the Statute of Waste in 1292, which decreed that "every heir ... shall have his recovery by a writ of waste... ." n54 Thus the heir of a reversioner had a right of action for waste, overcoming the old requirement that the complainant must have the "immediate state of inheritance." n55

§ 70.07(e) Exclusivity of Common Law Waste Remedies.

According to Coke and a modern legal scholar, the old writ of prohibition for waste continued to be available to plaintiffs even after the writ of waste was introduced by the Statutes of Gloucester. n56 However, it is said that the law reports carry no evidence of any legal remedy other than the writ of waste being used until the action on the case developed. n57

§ 70.07(f) Deficiencies in Common Law Waste Remedies.

Undoubtedly, the harsher remedies of forfeiture and treble damages introduced by the Statutes of Gloucester sparked a reaction among conveyancers. Some property interests were created and conveyed with express declarations that the interests were without "impeachment of waste," thus freeing the grantees to use the property without any of the common law waste restraints. n58 Law courts consistently enforced the exculpatory provisions, even if the possessor acted unreasonably. n59 The reluctance of conveyancers to submit to common law remedies was probably matched by the reluctance of some English juries to impose such drastic remedies as forfeiture or treble damages in waste cases. Common law remedies were therefore less readily available; this in turn led to more frequent intervention by equity and eventually, in England, to repeal of the statutes whence the more extreme common law remedies sprang.

§ 70.07(g) Rise of Equitable Remedies.

When aggrieved reversioners and remaindermen could get no relief at law, the Chancellor began to intervene in cases of unconscionable abuse of the property. At first the Chancellor acted in equity only when no legal remedy was available at all. If a life tenancy was protected against "impeachment of waste," but was abused in an unconscionable manner, an equitable remedy could be granted. n60 Equity cognizance then expanded to cases for which a legal remedy was available, but was deemed inadequate. n61 Such equitable intervention was initially justified on the ground that a life tenant should not be allowed to destroy the tenancy, n62 but in some later cases it was based on the presumption that the grantor intend the life tenancy to be so restrained. n63 This later rationale was weak when applied to the many life estates reserved by grantors for themselves, because they could hardly be said to have denied themselves the freedom of action they were enjoying.

§ 70.07(h) Rise of the Action on the Case for Waste.

In the early decades of the thirteenth century, it became settled that one who had been wronged by another could seek compensation by way of a complaint in an action of trespass. Writs to open such actions fell into standard forms for the most common wrongs of assault, breach of close (the typical action for trespass against real property), or asportation (the act of carrying away goods). Writs for the great variety of other wrongs required individual introductory narratives and were known as actions for "trespass on the case," meaning that the claimed wrong derived from the circumstances of the particular case presented by the complaint. The writs for actions "upon the case" were distinguished by their inclusion of detailed descriptions of the circumstances giving rise to the complaints. n64

It is not known exactly when the action on the case was first employed in a waste case, but the earliest reported cases are from the Elizabethan era. n65 At that early time, use of the action on the case may have been restricted to those instances when no other action by writ was available. n66 However, during the ensuing century courts eventually accepted the action, even though other remedies were available. n67 During the century thereafter, it would be said "case has now become the usual action for ... waste." n68

§ 70.07(i) England's Repeal of the Writ of Waste, Forfeiture, and Multiple Damages for Waste.

The action on the case for waste differed from the traditional action based on the writ of waste in two important respects. First, a successful plaintiff in an action on the case for waste recovered only single damages, not the treble damages mandated for writ of waste actions by the Statutes of Gloucester. Second, the action on the case for waste was not limited in scope to only certain classes of defendants, as was the writ of waste under the Statutes of Gloucester. According to its statutory terms, the writ of waste applied only to tenants for life or term, holding by operation of law or

by private conveyance; this led to the doctrines that waste defendants must enjoy some sort of privity of estate and that waste plaintiffs must have the immediate estate of inheritance. The writ of waste would therefore not apply in an action against a stranger who damaged land possessed by a tenant for life or years; also outside the scope of the writ of waste was a waste action by a life tenant against a lessee. However, in both instances an action on the case for waste would lie. n69 The general utility of the action on the case for waste was undoubtedly a factor leading to England's eventual repeal, in the 19th century, of the writ of waste, and with it the Statutes of Gloucester remedies of treble damages and forfeiture. n70

§ 70.07(j) Other English Alterations of Waste Law.

§ 70.07(j)(1) Permissive Waste.

Both the Statute of Marlborough and the Statutes of Gloucester applied to those who "made" or "did" waste, suggesting that waste was achieved only by commission and not by omission. The question was raised in some early English cases as to whether mere passivity or neglect which resulted in property damage, so-called permissive waste, could be charged as waste. English courts initially accepted the concept of permissive waste, partly because -- even before enactment of the 13th century waste statutes -- the common law courts had recognized a right of action against permissive waste; these courts also held the view that the waste statutes had not really changed the common law definition of waste, only the procedures and remedies. n71 Thus the judges decided that enactment of the waste statutes recognized plaintiffs' rights against permissive waste, despite the harsh, new remedies provided by statute. n72 Moreover, the concept of permissive waste at that time was broad enough in those cases to include the waste of neglect which results in deterioration, the neglect which leaves property vulnerable to damage from natural forces, and the damage caused intentionally or unintentionally by a stranger.

From the rather sketchy case authority available, however, it appears that by the 14th century courts had become reluctant to apply the harsh statutory penalties for waste in those cases of permissive waste where the defendant was not in some way at fault, particularly in cases of damage done by a stranger. n73 Thus cases of so-called innocent waste became separated from the law applicable to permissive waste. It also appears from the cases that no action for permissive waste arising from neglect would lie unless some actual damage or destruction had occurred. n74

Then, in the first half of the 17th century, permissive waste cases virtually disappeared from the records, and it was during this time that the action on the case for waste was steadily growing in popularity. By the early years of the 19th century an English court could declare that an "action on the case does not lie for permissive waste." n75 That court's pronouncement was both criticized and followed and, when the old writ of waste was abolished a few years later, leaving the action on the case as the principal legal remedy against waste, the result was considerable confusion about whether a cause of action for permissive waste would lie in the courts of England. n76 Even more modern observers of English jurisprudence still disagree over the liability of a tenant for permissive waste. n77

§ 70.07(j)(2) Ameliorative Waste.

In its most simplistic form, the doctrine of ameliorative waste n78 teaches that even acts which increase the value of the premises can be considered waste under some circumstances. Cases explaining the origins of the doctrine suggested that some changes in the land which added present value to the land were considered waste because the changes destroyed "muniments of title," that is, the physical characteristics according to which conveyancing witnesses could give evidence of title. n79 Perhaps a more perceptive judicial explanation of the doctrine is that which recalls that no act can be waste which does not injure the inheritance (remainder or reversion), and that the same act which adds value to the present possessory interest may be waste because it also diminishes the value of the future estate, or adds to its burdens, or impairs its evidence of title. n80

Despite these underlying rationales, the doctrine of ameliorative waste fell into some disrepute in England because it

seemed to invite charges of waste, with accompanying penalties of forfeiture or multiple damages, in circumstances where no apparent injury had occurred. Decisions in some English courts diluted the doctrine n81 and, in 1927, the doctrine was by statute made inapplicable to leased business property. n82 Thus modern English jurisprudence has been left with much uncertainty about the vitality of both the concepts of ameliorative waste and permissive waste.

§ 70.07(k) Development of Waste Law in the United States.

§ 70.07(k)(1) Adoption of the Statutes of Marlborough and Gloucester.

England's explicit repeal of the Statutes of Gloucester in 1833 and 1879, and with it the rejection of forfeiture and multiple damages remedies as remedies for waste, has not been followed in the United States. Undoubtedly these 13th century statutes were considered part of the common law of England and received as such by some states. n83 In other states, comparable rights of action and remedies have been re-enacted in state legislation. n84 Therefore, the extraordinary remedies of forfeiture and multiple damages for waste still exist in the jurisprudence of many states, even if they are seldom used.

From the beginning, however, American jurisprudence was more tolerant of conduct that would be characterized as waste in England. In English courts it became axiomatic that cutting trees under almost any circumstance constituted waste. In America, with timber in such abundance, and clearing of land a compelling and constant task, the rigid rule quickly gave way to a rule of reason based on notions of good husbandry. A perceptive and succinct description of early American waste law was given by James Kent: "The American doctrine on the subject of waste is somewhat varied from the English law, and is more enlarged, and better accommodated to the circumstances of a new and growing country." n85

§ 70.07(k)(2) Recognition of Permissive Waste.

The English ambivalence over liability for various types of permissive waste has not spread to the United States. American decisions consistently recognize liability for at least those varieties of permissive waste in which some fault is involved. n86 Those decisions are in accord with Kent's view:

> Under the head of permissive waste, the tenant is answerable, if the house or other buildings on the premises be destroyed by fire, through his carelessness or negligence; and he must rebuild, in a convenient time, at his own expense... .
>
> Perhaps the universal silence of our courts on the subject of any such responsibility of the tenant for accidental fires, is presumptive evidence that the doctrine of permissive waste has never been introduced, and carried to that extent, in the common law jurisprudence of the United States. n87

§ 70.07(k)(3) Exception to Ameliorative Waste.

The doctrine of ameliorative waste, which assigns waste liability in some cases where the tenant has changed the land and added to its present value, but possibly damaged the inheritance, is probably the prevailing rule in the United States, but a significant exception to liability is recognized where major changes have occurred in the area surrounding the land at issue. n88

§ 70.07(k)(4) Statutory Enactment or Modification of the Common Law of Waste in the States.

Most of the statutory pronouncements in the American states simply reaffirm the liability for waste that may attach to certain possessory interests and which of the traditional common law remedies are in force in that state. A review of individual state waste legislation shows that common law liability and remedies for waste are still quite widespread in the United States. Indeed, one jurisdiction -- the District of Columbia -- has reenacted in verbatim form the key

provisions of the old Statutes of Marlborough and Gloucester, including the arcane 13th century language that is surely unintelligible to most modern lawyers and judges.

The statutes serve the additional purpose of expressing a state's positions on certain issues or choices that have arisen over the centuries of waste law development. These issues, some of which arise only in one or a few of the state statutory provisions, may be summarized as follows:

1. Whether the state authorizes recovery of multiple damages (either triple or double) for waste. The statutes often indicate whether multiple damages may be recovered in any waste action, or are available only if the waste was wanton or malicious, or under some other specialized circumstances.

2. Whether the state authorizes the extraordinary remedies of forfeiture and eviction for waste. Such remedies may be available for any waste case, or only if the waste was wanton or malicious, or under some other specialized circumstances. A common limitation is to permit forfeiture only where the value of the defendant's interest is less than the waste damage to the plaintiff 's interest. Another common limitation is to allow forfeiture of only that part of the possessory interest that was damaged by waste.

3. Whether the state permits waste actions only by a holder of the next immediate freehold estate of inheritance. Many state statutory provisions ensure potential plaintiffs that they have a right of action even in the face of an intervening estate for life or years, but even some of those statutory assurances seem to be limited to reversioners, excluding remaindermen by inference. Such actions may also be limited to single damages even in states where multiple damages would otherwise be awarded. A statute conferring a right of action on any aggrieved party presumably does not require that a plaintiff hold the next immediate estate of inheritance.

4. Whether the state recognizes permissive as well as voluntary waste. Many of the statutes confer a right of action against one who "commits or suffers" waste, the word "suffers" thus indicating that permissive waste is also actionable. Other statutes are silent on the matter, although in those jurisdictions presumably permissive waste is also actionable under some general authority other than the waste statute.

5. Whether property interests other than real property are subject to waste actions. Many statutes refer specifically to various types of tenants of real property, again leaving it uncertain whether a right of action in waste would also apply to equivalent interests in other than real property.

6. Whether a tenant in possession has a duty of repair, neglect of which can result in a right of action for waste. Some statutes set out an explicit duty of repair and maintenance by the tenant in possession, and also specify the standard or condition of the premises required to be maintained under that duty. These objections may in turn be modified by imposition of an implied warranty of habitability in residential rentals.

7. Whether the specific common law actions for waste have been subsumed into the generic action typical in modern civil procedure. A few statutes indicate that actions for waste are considered to be the same as actions for other wrongs. n89

8. Whether an action on the case for waste is explicitly recognized.

9. Whether a right of action for waste applies to possessory interests created by operation of law.

With these issues in mind, the following summaries of state statutory provisions on waste law from more than 40 states

and the District of Columbia will more meaningfully signify the policy choices made by the respective legislatures:

Alabama. State statutes contain no general waste provisions, but in an action for ejectment, the plaintiff may recover damages for waste or any other injury to the land. n90

Alaska. A waste action may be brought against a guardian, a tenant for life or years, or a tenant in common. Judgment may be for treble damages. If the plaintiff is a reversioner and the waste damage exceeds the value of the defendant's interest, or the waste is committed with malice, judgment may be for forfeiture. n91

Arizona. Arizona has no statutory provision for a specific action against waste, but does indicate in its venue statute that a waste action should be brought in the county in which the real property is located. n92 Another provision authorizes judicial restraint of waste while land is subject to a redemption period. n93

California. A waste action may be brought against a guardian, conservator, tenant for life or years, joint tenant or tenant in common of real property; n94 a reversioner or remainderman may have an action for waste notwithstanding an intervening estate for life or years. n95 Judgment may be for treble damages and may include an injunction to restrain waste. n96 Damages for cutting or damaging trees shall be trebled. n97 The owner of a life estate "must keep buildings and fences in repair from ordinary waste and must pay taxes and other annual charges and a just proportion of extraordinary assessments benefiting the whole inheritance." n98 A purchaser at a foreclosure sale is entitled to an order restraining waste until redemption occurs; n99 a person whose interest is subject to a mortgage may not commit waste. n100

Connecticut. A waste action may be brought against a person with a life estate, estate for years or lesser estate in real property, if the interest was created by act of the parties and not by operation of law, and if the waste committed was "beyond what tenants for years or life created by operation of law may do." n101

Delaware. A waste action may be brought against a tenant by the curtesy, a tenant in dower, or a tenant for life or years; n102 an assignee of a tenant; n103 a tenant in common, joint tenant or coparcener; n104 or heir, executor or administrator of a tenant. n105 An accidental fire in a house is not waste. n106 A waste action against a tenant making repairs is prohibited, if certain notice provisions are followed. n107 Cutting of timber or improper tillage on agricultural land may be waste, and judgment may be for double the value of damage done to the land, loss of value of the land, and loss of value of the crop or timber. n108 A writ of estrepement may be awarded to restrain waste upon premises during an action of ejectment or waste, or to restrain waste upon premises subject to a lien. n109 An injunction may be granted to prevent waste. n110

District of Columbia. This jurisdiction has re-enacted the Statutes of Gloucester n111 and Marlborough n112 verbatim, including provisions for a writ of waste, treble damages, and forfeiture. A joint tenant or tenant in common may also maintain an action for waste against a cotenant. n113

Idaho. A waste action may be brought against a guardian, tenant for life or years, joint tenant, or tenant in common of real property. Judgment may be for treble damages. n114 The owner of a life estate "must keep the buildings and fences in repair from ordinary waste, and must pay the taxes and other annual charges, and a just proportion of extraordinary assessments benefiting the whole inheritance." n115

Illinois. State statutes contain no general waste provisions, but they do declare that a personal representative may be liable for waste n116 and that no waste should be comitted on any property after a sale has been made and until a tax deed has been issued or until redemption has been made. n117

Indiana. Wrongs previously remediable by action against waste are now subjects of action as other wrongs. Such actions against waste may result in judgment for damages, forfeiture of the defendant's estate, and eviction from the

premises. Forfeiture and eviction shall be granted only to a reversioner if the damage equals the value of the defendant's interest. n118 A reversioner or remainderman may maintain an action for waste notwithstanding an intervening life estate or estate for years. n119 A personal representative or a purchaser at a sheriff's sale may maintain an action for waste. n120

Iowa. A waste action may be brought against a guardian, tenant for life or years, joint tenant, or tenant in common of real property. The person liable shall pay three times the resulting damage. n121 Judgment of forfeiture and eviction may be granted if the amount of damages recovered by a reversioner is more than two-thirds of the value of the defendant's interest in the estate. n122 Treble damages shall be paid for willfully injuring any tree or shrub. n123 A remainderman or reversioner may maintain an action for waste notwithstanding an intervening estate for life or years. n124

Kansas. A remainderman or reversioner may maintain an action for waste for injury to the inheritance, notwithstanding an intervening estate for life or years. n125

Kentucky. A waste action may be brought against a tenant for life or years; the defendant shall lose the thing wasted and pay treble the amount at which the waste is assessed. n126 A remainderman or reversioner for life or years or in fee simple after an intervening estate for life or years may bring an action for waste and recover such damages as have been suffered. n127 A vendor or tenant who commits waste while still in possession of the land, shall be liable in damages. n128 A tenant in common, joint tenant or parcener who commits waste shall be liable to cotenants for damages. n129 In any action for waste, if the jury finds the waste was wantonly committed, judgment shall be entered for treble damages. n130 If waste is being or about to be committed during an action to recover or charge land, the court may order a receiver to take possession, or may stay the committing of waste by issuing an injunction or restraining order. n131

Louisiana. Although not a common law jurisdiction, Louisiana provides that a lessee may be liable for injuries to land sustained through lessee's own fault or by action of lessee's family or subtenant. n132

Maine. A waste action may be brought by the person having the next immediate estate of inheritance against a tenant in dower, by curtesy, for life or for years, who commits or suffers any waste on the premises. The plaintiff may recover the place wasted and any damages done to the premises. n133 A waste action may be brought by a remainderman or reversioner for life or years only or in fee simple after an intervening life estate. n134 If any joint tenant or tenant in common commits waste by taking trees, minerals or other valuable things from the property without prior notice to all other persons with interest in the property, any or all of those persons may recover their proportion of treble damages. n135 However, if a jury finds that the defendant in such an action proceeded in good faith or had three years' exclusive possession, only single damages will be awarded. n136 A court in an action to recover possession of real estate may issue an injunction to stay waste committed or threatened by the person in possession of the real estate. n137 If a tenant commits waste by damaging trees during the pendency of an action to recover the land, judgment shall be for treble damages. n138 If an heir or devisee of a decedent commits waste on an estate which must be sold to pay debts, the estate may recover treble damages. n139

Maryland. A waste action may be brought against any mortgagor, trust deed grantor, any person in possession of land, life tenant, tenant for years, tenant at will, periodic tenant, tenant in common, or joint tenant who commits or permits waste. The judgment shall be for actual damages. If waste is committed after an injunction to stay waste, double damages will be assessed, some part of which may be considered as damages due the plaintiff, and some part as fine. Nonpayment of the fine may result in imprisonment. n140

Massachusetts. A waste action may be brought by the person having the next immediate estate of inheritance against a tenant in dower, by the curtesy, for life or for years who commits or suffers waste on the land held. The plaintiff may recover the place wasted and the amount of the damage. n141 Persons having the next immediate estate of inheritance, reversioners or remaindermen after an intervening life estate or for life or years, may have an action of tort in the nature

of waste to recover the amount of damage. n142 A joint tenant or tenant in common who commits waste without giving cotenants prior notice of such actions, or who commits waste while partition proceedings are pending, shall pay treble damages. n143 A person in possession who commits waste during the pendency of an action to recover land shall pay treble damages. n144 If a person commits or threatens to commit waste on land after an action is brought to recover the land or foreclose a mortgage on the land, a court may enjoin the waste. n145

Michigan. Any person who commits waste against the soil or vegetation of another's land shall pay treble damages, unless the trespass was inadvertent, in which case only single damages are awarded. A waste action may be brought against any guardian, tenant in dower, life tenant, tenant for years, joint tenant, or tenant in common who commits or suffers any waste to the land. The action may be brought by the person having the next immediate estate, by any person who has the remainder or reversion in fee or for life after an intervening estate for life or years, or by purchasers not yet in possession. Judgment may be for double damages. Injunctions may issue to stay and prevent waste, and violations of injunctions are treated as contempt. n146

Minnesota. A waste action may be brought against a guardian, tenant for life or years, joint tenant, or tenant in common of real property who commits waste on the property. Judgment may be for forfeiture of the property, treble damages, and eviction from the property. Forfeiture and eviction apply only in behalf of a reversioner, if the damage to the reversion is equal to the value of the defendant's estate or unexpired term, or if the damage to the reversion was done in malice. n147

Missouri. A waste action may be brought against any tenant for life or years. The defendant may lose the thing wasted and be required to pay treble the amount of the waste. n148 An action for waste may be brought by a reversioner or remainderman for life or years, or in fee simple after an intervening estate for life or years, for recovery of the damages suffered. n149 A person in possession who commits waste after having aliened the land is liable for damages. n150 A tenant in common, joint tenant, or parcener who commits waste is liable for damages. n151 If waste is committed pending a suit to recover or charge the land, a receiver may be appointed to take possession of the land. n152 One who is entitled to bring an action for waste against a conservator may recover the damages proved. n153 In any action for waste, if a jury finds the waste was wantonly committed, judgment for treble damages shall be assessed. n154

Montana. The owner of a life estate may use the land in the same manner as the owner of a fee simple, except that no injury to the inheritance may be committed. n155 A life tenant must keep buildings and fences in good repair from ordinary waste. n156 A remainderman or reversioner may maintain an action in waste notwithstanding an intervening estate for life or years. n157 If a guardian, tenant for life or years, joint tenant, or tenant in common commits waste, judgment for treble damages may be awarded. n158

Nebraska. Although Nebraska has no statute conferring a general right of action specifically for waste, individual statutory sections provide that permissive waste is actionable, n159 and that a remainderman or reversioner has an action for waste notwithstanding an intervening estate for life or years. n160 Waste actions are also available to an heir, for waste occurring while the ancestor held the estate, n161 and to a purchaser at an execution sale, for waste occurring after the sale, especially for excessive use of timber. n162

Nevada. A waste action may be brought against a guardian, tenant for life or years, joint tenant, or tenant in common of real property for waste committed on the property. Judgment for treble damages may be granted. n163

New Hampshire. New Hampshire has no general waste statute, but state law does provide that the superior courts have jurisdiction over waste actions n164 and that cotenants have an action in assumpsit if part of the estate is destroyed, severed or carried away by another cotenant. n165

New Jersey. A guardian who commits waste of the property of the ward shall be deprived of the trust and be liable in treble damages. n166 No tenant in dower or curtesy or for life or term shall make or suffer any waste without special

license in writing. A tenant who does commit waste shall lose the thing wasted and be assessed treble damages. n167 If waste occurs between parceners, tenants in common, or joint tenants, the defendant may elect to have the property partitioned, with the wasted part included in the defendant's portion, or to give security against further waste. If the waste exceeds the value of the defendant's share, the plaintiff may recover damages. n168 Any heir may maintain an action for waste of the inheritance, with judgment for recovery of the inheritance or its value and treble damages. n169 A tenant for term or life who grants the estate to another but continues to occupy, and who commits waste thereon, shall be liable to the remainderman or reversioner for forfeiture of the property wasted or its value and for treble damages, unless the tenant was exempt from waste liability before granting the estate. n170 If a tenant of a particular estate fails to take possession and waste results, the reversioner or remainderman may serve on the tenant a demand to take possession of the premises and keep them free from waste; if the tenant does not comply within two months the plaintiff has an action for relief. n171

New York. A general guardian or guardian in socage shall not make or suffer waste, or shall lose custody of the thing wasted and be liable to the ward for damage. n172 If a party commits waste on real property during the pendency of an action affecting title to the property, the court may by order restrain any further commission of waste; disobedience to the order may be punished as a contempt. n173 A waste action may be brought against a tenant by the curtesy, in dower, for life, or for years, or assignee, who commits waste on the real property held. n174 Judgment in such an action shall be for damages, unless the damage to the reversion equals or exceeds the value of the defendant's estate or unexpired term, in which case the estate shall be forfeited to a plaintiff who holds the next entitled reversion. n175 If waste is committed by a tenant in common or joint tenant against a co-tenant, the plaintiff is entitled to damages or to a partition; the partition may include compensation to the plaintiff for damages. n176 A tenant for life or years may, under certain conditions, replace or alter the premises without liability for waste. n177 A remainderman or reversioner may maintain an action for waste notwithstanding an intervening estate for life or years. n178

North Carolina. Wrongs formerly remediable as actions of waste, are subjects of legal action as are other wrongs; judgments may be for damages, forfeiture and eviction. n179 A waste action may be brought against any person committing the waste, as well as against the tenant for life or years or a guardian. n180 A tenant in common or joint tenant may be liable in waste to a cotenant. n181 A judgment for damages may require that treble damages be recovered and the property forfeited if the damages are not timely paid. n182

North Dakota. A waste action may be brought against a guardian, tenant for life or years, joint tenant, or tenant in common, of real property, for which a judgment of treble damages, forfeiture of the defendant's estate, and eviction from the premises may be awarded. n183 Judgment of forfeiture and eviction shall not be given to a reversioner unless the injury to the reversion is equal to the value of the tenant's estate or unexpired term, or the waste was done in malice. n184 A purchaser of real property sold on execution may have a waste action for damages against a tenant in possession, after sale and before possession is delivered. n185

Ohio. A tenant in dower or life tenant who commits or suffers waste will forfeit the wasted property and will be liable in damages. n186 One coparcener [tenant in common] may maintain an action in waste against another. n187

Oklahoma. Although Oklahoma has no general waste provision in its statutes, state law does provide that a remainderman or reversioner may maintain a waste action notwithstanding an intervening estate for life or years. n188 A life tenant must keep buildings and fences in repair from ordinary waste. n189 A waste action is available against a personal representative. n190

Oregon. A waste action may be brought against a guardian, conservator, tenant in severalty or in common, for life or for years, in real property. A judgment may award treble damages, forfeiture and eviction. Forfeiture and eviction will be granted only if the injury to the reversion is equal in value to the defendant's estate or unexpired term, or when the waste was committed with malice. n191 A reversioner or remainderman may bring an action for injury to the estate notwithstanding an intervening estate for life or years. n192

Pennsylvania. An owner of an undivided interest in timber may not remove or cut the timber without written consent of all cotenants. n193 A court may issue an injunction pendente lite to restrain waste. n194 The procedure in an action to restrain waste shall be as in any equity action. n195 Other specific and specialized statutory references to waste actions have been repealed, so that procedure and remedies for waste are now apparently the same as for other actions, generally.

Rhode Island. A tenant for life or years who commits waste shall forfeit the estate in the place so wasted and double damages to the person entitled to the next estate in remainder or reversion. n196 A joint tenant, tenant in common, or coparcener who commits waste shall forfeit double damages to the other cotenants. n197 In an action for ejectment, partition or waste, a court may issue a writ of estrepement requiring the sheriff to stay all waste on the estate described in the writ. n198

South Carolina. South Carolina has repealed its former code provisions for specific actions against waste, which are now treated as ordinary actions, but state law empowers a court to appoint persons to view and assess damage from waste.

South Dakota. A waste action may be brought against a conservator, tenant for life or years, joint tenant or tenant in common of real property; a judgment may award treble damages, forfeiture and eviction. n199 Forfeiture and eviction shall be awarded only to a reversioner when the injury to the reversion equals the value of the tenant's estate or unexpired term, or the waste was done maliciously. n200 A life tenant must keep the buildings and fences in repair from ordinary waste and must pay taxes and other charges. n201

Tennessee. Any person entitled to redress for waste has a right to enjoin the commission of waste and recover damages for the waste actually committed. n202 One who possesses land under a parol agreement to purchase, which agreement is later voided by that person, is liable for waste committed during the possession. n203

Utah. A waste action may be brought against a guardian, tenant for life or years, joint tenant or tenant in common, of real property. Judgment may be for treble damages. n204

Vermont. Vermont statutes make no specific provision for an action against waste, n205 but a purchaser at an execution sale may obtain an accounting for waste, and a personal representative may be held accountable for waste. n206

Virginia. A waste action for damages may be brought against any tenant of land or any person in possession of aliened land, n207 a tenant in common, joint tenant or parcener, n208 or guardian. n209 A person entitled to damages from waste may recover them in an action on the case; if a jury finds that the waste was wanton, double damages shall be assessed. n210 It is waste for a tenant at will or for years to remove manure from the premises. n211 A tenant in possession who commits waste during the pendency of an action to recover the land may be enjoined by the court and the injunction may be enforced by contempt punishment. n212

Washington. Wrongs formerly remediable by action of waste are now the subjects of actions as other wrongs. n213 A waste action may be brought against a guardian, tenant in severalty or in common, for life or for years, or by sufferance or at will, or a subtenant, of real property. The judgment may be for treble damages or fifty dollars, whichever is greater, and forfeiture and eviction. Forfeiture and eviction may be awarded only to a reversioner against the tenant in possession and only when the injury to the reversion is equal to the value of the tenant's estate or unexpired term or was done or suffered in malice. Costs may include a reasonable attorney's fee to be fixed by the court. n214

West Virginia. A waste action for damages may be brought against a tenant of land or any person in possession who has alienated land, n215 a tenant in common, joint tenant or parcener, n216 or guardian. n217 If a tenant in possession commits waste on land during an action to recover or charge the land, the plaintiff may recover treble damages. n218 A

person entitled to damages from waste may recover them in an action on the case; if a jury finds that the waste was wanton, double damages shall be assessed. n219

Wisconsin. A waste action may be brought against a tenant who commits waste while retaining possession after letting or granting the estate, or against a joint tenant or tenant in common who commits waste of the cotenancy. n220

Wyoming. Wyoming has no statutory provision for a specific action against waste, but does provide that one parcener [the term includes a tenant in common] may bring an action of waste against another [in the context of partition proceedings]. n221 Also, a jury is authorized to view land which is the subject of a claim for waste and shall find in its verdict the damages, if any, the land has sustained by waste. n222

COMPUTER-ASSISTED RESEARCH

In LEXIS, state codes may be searched for provisions dealing with waste. Using "waste" as a search term is essential but problematic: the term is also used in reference to waste disposal and management and when used without further qualifiers will retrieve the numerous statutory references to those activities; and waste as a search term will miss statutory provisions referring only to injury or damage to land. To sharpen the search, "waste" must be combined with other terms typically found in the provisions dealing with common law waste, such as tenant, lessee, remainderman, reversioner, guardian, inheritance or estate. Even this search will miss miscellaneous provisions associated with waste statutes but not containing any of those terms, or the occasional isolated provision, such as would be found in laws dealing with decedents' estates or execution sales. For best results, the direct search of code provisions should be combined with a search of the code's general index.

§ 70.07(k)(5) Non-Statutory Remedies for Waste.

It should not be assumed that the states that have not legislated on waste law have rejected the concept. In those states, either waste law jurisprudence continues with its common law features or the action has been subsumed into the law governing civil actions generally.

§ 70.07(k)(6) The Role of the *Restatement of Property* in American Waste Law.

The first *Restatement of Property* was issued in 1936 by the American Law Institute. The *Restatement of Property* does not review or revise any of the first restatement's sections related to waste law.

All of the restatements of law are difficult to characterize, but perhaps none more so than the property restatement, because of confusion of purpose. Not limiting themselves to mere iterations of the majority rules of American property law, the restatement authors have also attempted to identify competing rules and to express preferences, even if the rule of choice does not represent the weight of judicial authority. Occasionally, an innovative alternative is adopted, even if it has never been considered and accepted by the courts. Thus on the subject of waste, the Restatement of Property stands not only as authority for what the prevailing law is in American jurisprudence, but also for what the restatement authors believe the law ought to be, with little indication as to which description applies to each individual assertion. Careful scrutiny of the comments is required to discern which of the restatement pronouncements are believed to represent a current majority view, and which provisions are included for their value in improving or reforming the law. In any event, the Restatement of Property represents a thoughtful exposition of recommended rules of law for its various topics.

The provisions of the Restatement of Property that relate most directly to waste may be summarized as follows:

(1) *Duties of a life tenant.* The owner of a possessory or reversionary life estate, unless otherwise excused, has a duty to not diminish the market value of the future estate following the life estate. n223 The life tenant also has a duty to

preserve the land and structures in a reasonable state of repair to the extent the income from the property permits. n224 As to changes in the property, the life tenant has a duty to make no changes "in such a manner that the owners of the interests limited after the estate for life have reasonable ground for objection thereto." n225 In addition to all of the duties just described, the life tenant has a basic obligation to pay taxes and any other maintenance charges that will, if left unpaid, become liens upon the property. n226

(2) *Exceptions to life tenant's duties.* These basic duties may be modified by provisions in the instrument creating the life estate, n227 or by requirements of a valid police power regulation, n228 or by the privilege to take estovers. n229 Also, if minerals were extracted or timber cut from the land before the life estate was created, the life tenant may enjoy similar rights after entering into possession. n230 The life tenant may do acts on the property, such as cutting timber, without liability, if the proceeds from such activities are used to preserve the estate in the same way that an owner in fee might act. n231 The life tenant does not need to repair damage done "by the conduct of a stranger, by accident, or by extraordinary natural force," unless the life tenant could have acted to prevent the damage and did not. n232

(3) *Corresponding rights of future interest holders.* As a corollary to the life tenant responsibilities, the Restatement also lists corresponding rights held by the owner of an indefeasibly vested future interest in a fee simple absolute following a life estate. n233 However, if the life estate is followed by a future interest that is either subject to a condition precedent or defeasibly vested, the owner of the future interest may only obtain injunctive and not monetary relief, when the life tenant violates any of those rights; n234 despite this limitation, equitable relief can usually be granted. n235

None of these rights and duties are affected by the existence of an intervening future life estate between the present life estate and the future interest in fee; n236 however, the owner of such intervening life interest has enforcement rights against the waste of the present life tenant similar to those held by the owner of the fee simple future interest. n237

If the future interest fee simple is preceded by a defeasible or conditional fee, the future interest owner may combat actual or threatened waste by an injunction, if there is a "reasonable probability" that the future interest will become a present interest, n238 but damages cannot be recovered. n239 Two or more future interest holders can in concert assert the same rights as if their interests were held by a single owner, n240 and each concurrent owner of such a future interest has the same right as would exist in a single owner of the interest. n241 If the owner of the present interest has the power to destroy the future interests, as in a life estate with a presently exercisable power of appointment, then the holder of the future interest, according to the Restatement, may not act against the waste of the present tenant. n242

(4) *The Restatement positions on multiple damages and forfeiture.* The Restatement acknowledges that waste statutes from the beginning have provided for multiple damages, but criticizes the severity of those statutes and denies that they have automatically become part of the American common law through reception of early English statutes. States should re-enact such statutes if the legislative policy is to enforce multiple damages. n243 The same attitude is taken toward the remedy of forfeiture for waste, except that forfeiture is deemed more appropriate if the damage caused by waste is at least equivalent to the value of the unexpired life estate. n244

(5) *Rights of future interest holders in things other than land.* Where rights of future interest holders in things other than land are involved, the Restatement recognizes that the present possessor must act as "the owner of complete property in a like thing would act," n245 and confers corresponding enforcement rights on the future interest owner. n246 The owner of a future interest may also act against a third person whose conduct harms or threatens to harm the future interest. n247

(n30)Footnote 57. John Henry Merryman, *Part 20: Waste, in 5* American Law of Property §20.17, at 110 (A. James Casner ed. 1952). Even Kirchwey concedes that "it is probably also true that [the writ of prohibition] was seldom resorted to and soon fell into desuetude." George W. Kirchwey, *Liability for Waste, 8 Colum. L. Rev. 425 & 624, at 434 (1908).*

(n31)Footnote 58. Blackstone suggested in 1766 that the practice of protecting some lessees against "impeachment of waste" was at least 500 years old. 2 William Blackstone, Commentaries 283 (1766).

(n32)Footnote 59. Bowles's Case, 11 Co. Rep. 79 b, *77 Eng. Rep. 1252 (1616)* (tenant for life without impeachment for waste permitted to cut trees on the property and keep the timber; the life tenant was considered to have the property, and not merely to be exempt from waste penalties).

(n33)Footnote 60. *Vane v. Lord Barnard, 2 Vern. 738, 23 Eng. Rep. 1082 (1716)* (life tenant enjoined from removing a castle roof and required to pay for repairs); *Robinson v. Litton, 3 Atk. 209, 26 Eng. Rep. 922 (1744)* (one who held an interest subject to divestment if he did not reach age 21 was enjoined from cutting £3000 worth of timber on the land nine months before his 21st birthday).

(n34)Footnote 61. *Horner (Bampfield) v. Popham, Colles 1, 1 Eng. Rep. 150 (1697)* (an injunction that was granted to restrain timber cutting by a life tenant subjected to review a House of Lords decree at law terminating the estate of the life tenant).

(n35)Footnote 62. *Bishop of London v. Web, 1 P. Wms. 528, 24 Eng. Rep. 501 (1718)* (a life tenant was not permitted to strip off topsoil for brickmaking); *Aston v. Aston, 1 Ves. Sen. 264, 27 Eng. Rep. 1021 (1749)* (a life tenant "with full liberty to commit waste" was prohibited from taking timber so extensively as to cut even saplings).

(n36)Footnote 63. Turner v. Wright, 2 De G. F. & J. 234, *45 Eng. Rep. 612 (1860)* (the holder of a fee simple subject to an executory limitation was restrained from cutting trees that had been planted by the grantor for ornamental purposes); *Micklethwait v. Micklethwait, 1 De G. & J. 504, 44 Eng. Rep. 818 (1857)* (a life tenant was not restrained from cutting ornamental trees on land from which the testator had removed the mansion house and had turned into a game cover).

(n37)Footnote 64. Theodore F. T. Plucknett, A Concise History of the Common Law 372-73 (1956).

(n38)Footnote 65. One of the earliest reported actions on the case for waste is *Jeremy v. Lowgar, Cro. Eliz. 461, 78 Eng. Rep. 714 (1596)* (a life tenant in an action on the case recovered single damages from his tenant for years who burned the house on the premises).

(n39)Footnote 66. A contemporary example of an action on the case being denied because another remedy was available is the case of *Beswick v. Cunden, Cro. Eliz. 520, 78 Eng. Rep. 768 (1596)* (a landowner was not permitted to use an action on the case to seek damages for nuisance resulting from an adjoining landowner's overflowing brook, because another remedy by writ was available).

(n40)Footnote 67. One of the last cases to question the propriety of an action on the case for waste when other remedies were available is *Jefferson v. Jefferson, 3 Lev. 130, 83 Eng. Rep. 614 (1683)* (action in case by remainderman against life tenant for pulling down house and taking away the house timbers and other materials; the court divided 2-2 on whether action on the case was permissible).

(n41)Footnote 68. *Greene v. Cole, 2 Wms. Saund. 252, 85 Eng. Rep. 1037 (1799).*

(n42)Footnote 69. *Jeremy v. Lowgar, Cro. Eliz. 461, 78 Eng. Rep. 714 (1596)* (a life tenant could bring an action on the case for waste against his tenant who burned a house on the premises).

(n43)Footnote 70. 3 & 4 Will. IV, c. 27, §36 (1833) ; 42 & 43 Vict., c. 59 (1879).

(n44)Footnote 71. Coke, too, perpetuated this view in a later century. 2 Coke, Institutes 300, 301.

(n45)Footnote 72. Nine cases from the Year Books are cited in George W. Kirchwey, *Liability for Waste,* 8 Colum. L. Rev.; 425 & 624, at 436 n.53 (1908).

(n46)Footnote 73. George W. Kirchwey, *Liability for Waste, 8 Colum. L. Rev. 425 & 624, at 625-26 (1908).*

(n47)Footnote 74. George W. Kirchwey, *Liability for Waste, 8 Colum. L. Rev. 425 & 624, at 628 (1908).*

(n49)Footnote 76. George W. Kirchwey, *Liability for Waste,* 8 Colum. L. Rev.; 425 & 624, at 632 (1908).

(n50)Footnote 77. Merryman concluded, "Although the decisions are not uniform there seems to be no liability on life tenants under the present English law of permissive waste. *In re Parry, [1900] 1 Ch. 160.*" John Henry Merryman, *Part 20: Waste,* in 5 American Law of Property §20.12, at 99 (A. James Casner ed. 1952). Kirchwey, however, cited the earlier case of *Davies v. Davies, 38 Ch. D. 499 (1888),* "as an assertion of the general liability of such a tenant for permissive waste, even in cases where no active negligence is imputed to him." George W. Kirchwey, *Liability for Waste,* 8 Colum. L. Rev.; 425 & 624, at 635 (1908).

(n51)Footnote 78. Alternative and equally acceptable labels are ameliorating, meliorative and meliorating waste.

(n52)Footnote 79. *Young v. Spencer, 10 B. & C. 145, 109 Eng. Rep. 405 (1829)* (the court asserted that the old authorities held waste would lie for anything that destroyed evidence of title; the case was remanded for a trial on the

issue of whether a new door in a house on the property affected the reversioner's title).

(n53)Footnote 80. *Doe dem. Grubb v. Earl of Burlington, 5 B. & Ad. 507, 110 Eng. Rep. 878 (1833).* In this case a copyhold tenant pulled down a dilapidated barn on the premises, but escaped liability to the lord of the manor for waste when a jury found that the removal of the barn did not injure the inheritance. The court stated: "Upon the whole, there is no authority for saying that any act can be waste which is not injurious to the inheritance, either, first, by diminishing the value of the estate, or, secondly, by increasing the burthen upon it, or thirdly, by impairing the evidence of title." *110 Eng. Rep. at 882.*

(n54)Footnote 81. *Meux v. Cobley, 2 Ch. 253 (1892)* (an agricultural lessee who converted part of the farm to a market garden with glass houses for hot-house produce, was absolved of waste; other farms nearby had undergone similar conversions to profitable market gardens and no injury to the inheritance was shown); Doherty v. Allman, 3 App. Cas. 709 (1878) (a lessee of land under a 999-year lease was permitted to convert dilapidated storage buildings, once used as military barracks, into dwelling houses, without liability for waste). The subsequent case of *West Ham Cent. Charity Bd. v. East London Waterworks Co., 1 Ch. 624 (1900),* could be viewed as a return to a traditional rule of ameliorative waste. The *West Ham* court distinguished the Meux and Doherty cases and held that the lessee of a 99-year lease, which obtained the lease for the purpose of building a reservoir but eventually used the land as a rubbish shoot (landfill), had committed waste. Waste was found because allegedly the only value of the property at the end of the lease term would be as factory land, which would require excavation to the original level of the land, although the question of whether the landfill operation actually enhanced the value of the land was never resolved. The *West Ham* case, therefore, possibly raised no issues of ameliorative waste, in any event. *West Ham* was criticized in *Notes, Ameliorating Waste, 14 Harv. L. Rev. 226 (1900),* for its result and incomplete analysis.

(n55)Footnote 82. Landlord and Tenant Act, 17 & 18 Geo. V,c. 36, §§3, 18 (1927).

(n56)Footnote 83. The first Restatement of Property, at §198, takes the rather arbitrary position that the Statutes of Gloucester did not "become a part of the law of an American state, in the absence of an express re-enactment thereof." According to the Restatement, automatic reception should be attributed only to those rules "suitable to the different conditions and situations of the New World." The severity of the remedies and the English rejection of them persuaded the Restatement authors that the remedies were too unsuitable for the New World to qualify for automatic reception. 2 Restatement of Property §198 cmt. a, at 808 (1936). However, the large number of American states that have re-enacted or judicially adopted these extraordinary remedies suggests just the opposite. *See infra* §70.07(k)(4). *See also* Morton Gitelman, *The Impact of the Statute of Gloucester on the Development of the American Law of Waste, 39 Ark. L. Rev. 669 (1986).*

CHAPTER 70 WASTE

8-70 Thompson on Real Property, Thomas Editions § 70.08

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 70.08 Conduct Constituting Waste.

[Go To Supp]

§ 70.08(a) Change in the Premises.

Because a reversioner or remainderman is entitled to obtain possession of the premises in essentially the same condition as when the estate was created, any change in the land or improvements presumptively threatened that right. As in England, the American common law attached waste liability to changes in the premises that impaired evidence of title, or added burdens to or diminished the value of the future estate.

If a remainderman or reversioner believes that waste is occurring or about to occur, a question may arise about a right to inspect the premises. No authority is directly on point, but in a related setting, a landlord with no duty or right to repair traditionally had had no right to inspect premises rented to a tenant; however, it has been held that a landlord has a right to enter the tenant's premises in order to prevent waste. n248

§ 70.08(a)(1) Change in the Land.

The decisions in American courts consistently hold that changes in the land will constitute waste if they cause permanent injury to the inheritance, if they are contrary to practices of good husbandry, or if they violate the present tenant's covenants. Not surprisingly, the cases dealing with change in the character of the land as an issue of waste are rare and old. Even though the cases arise out of agrarian circumstances less likely to be encountered today, the principles on which the decisions are based are still firmly in place in American jurisprudence.

In one case, clearing land of timber to prepare it for pasture was considered waste only because a jury found that the clearing in those circumstances did not represent good husbandry. n249 Conversion of arable land into a roadway, also exposing the reversioner's reserved fruit trees to depredations of passersby, was also waste, when the court concluded that the new use worked a permanent or present injury to the freehold. n250 Dredging by the shore of land bordering a stream, and removing land and trees above the high-water mark was adjudged an injury to the inheritance and therefore waste. n251 A tenant under covenant not to cut more timber than he could actually use on the farm, violated the covenant and committed waste when he cut timber and took clay to be used in making bricks for sale. n252 A singularly stern view of waste was taken by the court which ruled against a life tenant who took land as pasture, allowed it to

become woodland, and then cut the timber in order to return the land to pasture; the court rejected the trial court's jury instruction that the cutting of wood would not be waste if done in accordance with good husbandry. n253 This case is clearly out of harmony with other American decisions.

Also instructive are the more numerous reported cases in which change in the character of the land did not result in liability for waste. One tenant for years escaped waste liability even after transforming low, swampy land into residential property; the jury believed that even if the remainderman demanded removal of the houses and return of the property to agricultural use, the property would still be more valuable to him than in its former condition. n254 An early Missouri court declared it "is not waste in this country to convert arable land into meadow, nor vice versa; nor is it waste to clear land by a tenant for life"; n255 this ruling led a later court of that state to declare that plowing up blue grass sod in a farm was also not waste. n256 "Turning out" exhausted land has been declared not to be waste. n257 In another state, converting meadowland into pastureland was not waste when a jury would not find that the change injured the farm or that it was a change no good farmer would make; the jury would also not find waste when the pastures were permitted to become overgrown with brush. n258 As one court noted: "Hence it is well settled, that many things may be done by a tenant for life here, that if done in England would be waste; as, for example, the conversion of meadow or pasture into plowland, or woodland into a farm, etc." n259

The most conspicuous exception to waste liability for changing the land is in recognition that the area surrounding the land in question may have changed so much that a change in the land itself may be permanently beneficial. Thus, a leveling of former residential land to make it more suitable for use in the industrial area that had arisen in place of the surrounding residences was deemed beneficial to the inheritance and not waste. n260

§ 70.08(a)(2) Change in the Improvements.

This section deals with constructing or altering buildings or other improvements on the premises. n261 The issues of change in the improvements are more likely to arise in modern times than are the issues of change in the land, and the principal case authority for these situations is somewhat newer, but there is still a remarkable dearth of recent case authority for these rules. Modern courts are still challenged to apply rules fashioned in an agrarian society to situations arising in a vastly different industrialized society. It is intriguing to consider, though, that the old rules have worked well enough that even contemporary landowners with competing interests are able to enjoy their property without frequent resort to litigation over these issues.

The general statement of the rule of waste by a 19th century American legal scholar is still an adequate starting point for rules regarding changes in buildings and other improvements: "Waste is the destruction, or improper deterioration, or material alteration of things forming an essential part of the inheritance, done or suffered by a person rightfully in possession by virtue of a temporary or partial estate, as, for instance, a tenant for life or for years." n262

This rule as applied in cases dealing with changes in the improvements suggests that any change in existing improvements is presumptively waste. However, adding new improvements constitutes waste only if they injure the inheritance. Thus, construction of new buildings and other improvements on the premises is not waste if the construction does not injure the inheritance, including the existing improvements; presumably no such injury occurs if the new improvements can be removed at the end of the tenancy so that the inheritance is returned to its original

condition. n263 If new buildings or other improvements are constructed on premises with existing improvements, waste does not occur unless the new construction damages the existing improvements. n264 However, it is considered waste to remove or damage permanent improvements, even if they are old and dilapidated, unless the structures are dangerous n265 or are simply being repaired or replaced by better versions of the old improvements. n266 It has also been held waste merely to tear down an unrepairable improvement. n267 Of course, damage to improvements from accident or natural causes is not waste, n268 but in some older cases the tenant has been held liable for damage to improvements caused by acts of third parties. n269

Traditionally it has been considered waste to make any changes in improvements that permanently and materially alter the character of the property, n270 but an important exception has developed. If the character of the *surrounding* area has so changed that the change in the improvements is an appropriate and beneficial response to the changed conditions, no waste liability results. Of course, an ostensibly beneficial change that also burdens the inheritance may nevertheless be considered waste. n271

The most prominent case espousing this exception is Melms v. Pabst Brewing Co. n272 In that case, because the area surrounding the land in question had lost its residential character, it was not waste for a life tenant to remove the residence on the premises, and lower the grade 30-40 feet to street level and prepare the property for more appropriate business uses. Subsequent cases have followed this view. n273 The basic rule that, absent such change in the surrounding area, even a beneficial change in the improvements constitutes waste, was reaffirmed in Brokaw v. Fairchild. n274 That court recognized the holding of Melms v. Pabst Brewing Co., but distinguished it on its facts. In Brokaw the court denied permission for the life tenant to demolish a large residence on Manhattan's Fifth Avenue and replace the residence with a 13-story apartment house, worth about triple the value of the existing house. The principal point of departure from the facts of *Melms* was that no significant change in the character of the neighborhood had occurred in New York. The Brokaw court took the position that any change in the premises was still presumably waste, unless the change in the area made it pointless to return the property unchanged to the remainderman.

§ 70.08(b) Misuse or Neglect of the Premises.

This subsection treats those instances of waste arising out of premises abuse or neglect other than change in the premises n275 or removal of resources or improvements from the premises. n276

§ 70.08(b)(1) Neglect of Financial Obligations Pertaining to the Premises Generally.

One type of neglect impacts on the premises generally, without respect to a distinction between land and improvements, and that is the failure by the tenant to pay financial obligations that pertain to preservation of title, such as taxes, mortgage interest and principal, insurance premiums, and certain assessments. The two major issues in determining tenant liability for such payments are whether the tenant is obligated at all to pay a particular type of charge or any portion of it, and whether there is some absolute limitation on the tenant's total financial liability for such charges.

§ 70.08(b)(1)(i) Charges for Which the Tenant Is Liable.

Taxes--Life Tenant. A life tenant has a common law duty to pay property taxes imposed on the estate generally

throughout the duration of the tenancy, and failure to fulfill this duty has been characterized as waste. n277 This duty is in recognition of the fact that taxes are a lien on the entire estate, and a tenant's failure to pay threatens the continuance of the reversion or remainder. n278 Taxes that accrued before the possessory estate began are not included in this obligation. n279 Also, any property tax which is considered under state law as imposing a lien on the life interest only should be paid by the life tenant, but not as a matter of duty to the reversioner or remainderman; n280 failure to pay such taxes is therefore not waste. Of course, all of these duties can be altered by the instrument which creates the life tenancy n281 or by agreement between the life tenant and reversioner or remainderman. n282

Taxes--Tenant for Years. A tenant for years, including in this context a periodic tenant, is not obligated by common law to pay property taxes, n283 except under special circumstances: a tenant who has installed improvements for the tenant's sole benefit must pay the portion of property taxes attributable to the improvements; a tenant under no obligation to pay rent must pay the property taxes; n284 and tenants with so-called perpetual leases or with long-term renewal options must pay the property taxes. n285 These duties and exceptions may be altered by agreement between the parties.

COMPUTER-ASSISTED RESEARCH

LEXIS: life tenant or tenant or lessee w/30 tax or tax w/5 property

Mortgage Interest and Principal--Life Tenant. If a mortgage or similar encumbrance was a lien on the entire estate when the life tenancy commenced, or was created jointly by the life tenant and reversioner or remainderman, the life tenant is obligated by common law to pay the interest that accrues on the encumbrance during the tenancy, n286 unless that duty is modified by agreement. If mortgage payments are amortized into equal periodic payments so that each payment falling due during the life tenancy consists partly of interest and partly of principal, or if payment of the mortgage principal falls due during the life tenancy, payment of principal must be apportioned between life tenant and reversioner or remainderman, although there are practical difficulties with such an arrangement. n287

Mortgage Interest and Principal--Tenant for Years. No court has held a tenant for years under a common law duty to pay mortgage interest or principal, and the view has been advanced that, in any event, the duty is imposed on the landlord by the implied covenant of quiet enjoyment. n288

COMPUTER-ASSISTED RESEARCH

LEXIS: life tenant or tenant or lessee w/30 mortgag!

Insurance Premiums--Life Tenant. Under common law in most states, the life tenant has no duty to maintain insurance on the estate for the benefit of the reversioner or remainderman. n289 However, if a mortgage encumbering the entire estate requires the mortgagor to insure the premises for the benefit of the mortgagee, the life tenant must pay the premiums for such insurance for the duration of the life estate. n290 In a few states, life tenants are under a common law duty to maintain insurance for the benefit of the reversioner or remainderman as part of the overall duty to preserve the inheritance. n291

Insurance Premiums--Tenant for Years. A tenant for years has no common law duty to pay insurance premiums on the estate. n292

COMPUTER-ASSISTED RESEARCH

LEXIS: life tenant or tenant or lessee w/30 insurance w/20 premium

Special Assessments--Life Tenant. The life tenant must pay the cost of special assessments for public improvements

related to the estate to the extent the life of the improvement does not exceed the probable duration of the life estate. n293 If the life of the improvement is in excess of the expected duration of the life estate, the duty to pay is apportioned between the life tenant and the reversioner or remainderman. n294

Special Assessments--Tenant for Years. A tenant for years has no common law duty to pay special assessments for public improvements. n295

COMPUTER-ASSISTED RESEARCH

LEXIS: life tenant or tenant or lessee w/30 assess!

§ 70.08(b)(1)(ii) Limitations on the Tenant's Liability.

A life tenant's common law duty to pay taxes, mortgage payments and interest, insurance premiums, and special assessments is subject to the firm limitation that such payments may not exceed the income received from the tenancy or the value of the life tenant's occupancy. The income amount or rental value is calculated cumulatively, so the limitation is not fixed at an inordinately high or low level because of the particular time period chosen. n296 Thus, current taxes must be paid even if current rental income is insufficient, if a surplus has been accumulated in previous years of the tenancy.

Because a tenant for years is obligated for such payments in only a few specialized situations relating to property taxes, it is not known whether the same limitation applies to payment of property taxes. Such a limitation, based on income received or rental value, does not apply to the repair obligation of a tenant for years, even though it applies to the life tenant's repair obligation, n297 so by such a tenuous analogy one might conclude that the duty of tenant for years to pay property taxes is likewise not subject to the income received or rental value limitation.

§ 70.08(b)(2) Misuse or Neglect of the Land.

Most of the early waste cases arising out of misuse of the land itself were concerned with agriculture. Those courts agreed, however, that so-called "ill husbandry" itself would not constitute waste, unless it resulted in material or permanent injury to the inheritance. n298 Older cases provide numerous examples of ill husbandry actionable as waste because the defendants did cause permanent injury to the estate. These examples include plowing up of all meadowland, n299 ruining fields by constant tillage, n300 tilling contrary to established rotations, n301 allowing hogs to root up a meadow and carry away fruit trees, n302 and removing bog grass from a farm. n303 In modern times, waste has been found when a carnival was operated on the premises, n304 when broken concrete was deposited on the premises, n305 and when a farm was neglected so the land became choked with weeds. n306

COMPUTER-ASSISTED RESEARCH

LEXIS: land and neglect! or abus! or misus! w/50 waste husbandry w/50 waste

§ 70.08(b)(3) Misuse or Neglect of the Improvements.

Misuse or abuse of buildings or other improvements on the premises may be considered waste according to the same principles as are applied to misuse of the land itself: if the conduct or neglect causes permanent injury to the inheritance, it is actionable as waste. Such misuse or neglect generally consists either of the failure to repair and maintain (typically forms of permissive waste) n307 or of some active but abusive use of structures or equipment on the premises.

§ 70.08(b)(3)(i) The Duty of Repair.

The duty of repair imposed on a life tenant or a tenant for years is limited, but may not be ignored. In general, a tenant

for life or years in possession is obliged under common law only to make all reasonable, ordinary and necessary repairs to preserve the estate or to prevent deterioration of the estate. The condition of the estate to be preserved is that condition which existed when the tenancy began. n308 Typical examples of required repairs are repairing a house that has become "run down," n309 repairing fences and outbuildings that have become decayed and dilapidated, n310 and putting improved real estate back in condition to be occupied. n311 The tenant is required to perform maintenance repairs that will effectively stop other damage from occurring, such as painting to stop further surface deterioration, or roof repairs. n312

The duty of tenants for life or years to repair damage caused by third parties has had an interesting history. In English jurisprudence, old cases holding tenants liable for damage caused by third parties appear to be based on the presumption that the tenant could eventually obtain recovery from the third party; tenant liability was therefore a convenience to the reversioners or remaindermen, who at the time did not have the right of action directly against a trespasser. This procedural disability was corrected with the rise of the action on the case, and actions on the case for waste became prominent at the same time cases holding tenants responsible to remaindermen for damage caused by a stranger disappeared. In American jurisprudence, several older cases have held tenants liable for damage caused by strangers, even where the possibility of recovery from the stranger is nonexistent, n313 but no courts in the last century have decreed such liability.

§ 70.08(b)(3)(ii) Limitations on the Duty of Repair.

A tenant for life or years is not required to repair damage that already existed when the tenancy began. n314 Even ordinary wear and tear need not be restored, unless repair is needed to prevent further deterioration. n315 A tenant also need not repair damage caused by natural forces or accidents for which the tenant is not responsible. n316 The most important limitation on the repair duty of a life tenant is the same limitation placed on the duty to pay taxes and other financial obligations: the life tenant is not required to spend more than the income received from the tenancy or, if in occupancy, the rental value of the tenant's occupancy. n317

This limitation on the amount that could be expended for repairs did not apply to a tenant for years, who was otherwise under the same duty of repair and entitled to the same limitations as a life tenant. n318 However, with the rise of the implied warranty of habitability in residential tenancies in most states, much of the repair duty of the tenant for years has been shifted to landlords, who are now obligated by usually unalterable rule of law to keep premises in habitable condition.

LEXIS: tenant and repair! w/50 waste

warranty w/5 habitability w/50 waste

§ 70.08(c) Removal of Resources from the Premises.

In this subsection are discussed the removal of several distinct types of resources from the premises: removal of manure, crops and other products of agricultural activity; removal of soil and minerals; removal of timber and other growing things; and removal of improvements. Slightly different rules apply to each category, although all rules proceed from the same basic premise that the tenant in possession may do nothing to harm the inheritance.

§ 70.08(c)(1) Removal of Products of Agricultural Activity.

Manure produced in ordinary husbandry activities belongs to the estate. In keeping with principles of good husbandry it may be used by the tenant on the estate, but may not be removed from the premises. n319 Straw, hay, and other crops

grown on the premises by the tenant are the property of the tenant until severed, and may be removed from the property without committing waste. n320 This is true even if the tenant removes such items from the premises in violation of an agreement with the reversioner, since the proper action in that case is for breach of covenant, not waste. n321

COMPUTER-ASSISTED RESEARCH

LEXIS: remov! or sever! and crop or manure w/50 waste

§ 70.08(c)(2) Removal of Soil and Minerals.

Mines, quarries and other operations for extraction and removal of mineral resources of the land may be carried on by the tenant if they are already in place or operative at the beginning of the tenancy (the so-called "open mine" rule), but no new operations may be commenced by the tenant, absent agreement with the owner of the inheritance. n322 This ostensible inconsistency is rationalized by the assertions that the prohibition against new operations is to prevent permanent damage to the inheritance, while the permission to continue existing operations is in recognition that such operations were an established right of present possession when the tenancy began and probably correspond to the intent of the parties. These basic rules have been applied to a wide variety of mineral extraction and removal operations. n323

These general rules are subject to modification by agreement of the parties showing an intent different from that implied by the common law rule, or by legislation. Also, a particular tenancy may by its nature preclude a presumption that the parties intended to include mineral extraction rights with the tenancy, such as when land is leased specifically for agricultural purposes, n324 or when the mineral operation was intended to exclude any tenant. n325 An open mine which has not been worked for some time is still considered an open mine, but if it has actually been abandoned, the tenant who re-opens it may commit waste. n326 A mine which is under lease to be opened, but has not yet actually been opened, is considered open for the tenant for life or years. n327 The common element of all these rules is their attempt to identify the intent of the parties when the parties have not bothered to express that intent.

COMPUTER-ASSISTED RESEARCH

LEXIS: mine or mineral or quarry or oil w/50 waste

§ 70.08(c)(3) Removal of Trees.

As opposed to the English rule making a tenant liable in waste for almost any cutting of trees, American courts find no waste in tree cutting unless the cutting damages the inheritance. n328 Historically, most cutting of trees in America was for the purpose of clearing land, which added value to the land, so usually cutting of trees was not waste. n329 The test of whether the inheritance was injured became a question of whether the cutting represented good husbandry, although some courts made separate inquiries into the issues of good husbandry and injury to the inheritance. For some of those courts, even good husbandry could be waste if the cutting damaged the inheritance; n330 for others, waste could be found only if the cutting represented both bad husbandry and damage to the inheritance. n331 The decisions in aggregate seem to form a rule that permits the tenant for life or years to cut trees as reasonably necessary for the enjoyment of the tenancy, as long as the inheritance is not damaged. n332 Thus originated the ancient agrarian rules that, barring damage to the inheritance, a tenant could take timber for fuel, n333 for making and repairing farm equipment, n334 and to make necessary repairs on the premises, n335 all traditionally referred to as estovers or the common of estovers. n336 Whether repairs justifying the cutting of timber must be necessary merely for enjoyment of the tenancy, or must be necessary to avoid liability for permissive waste is a question that has not been addressed by the courts. n337 Some courts have permitted a tenant to cut timber and use the proceeds from the sale of the timber for necessary repairs, without liability for waste, n338 while others have not. n339

COMPUTER-ASSISTED RESEARCH

LEXIS: tree or timber and cut! w/50 waste

§ 70.08(c)(4) Removal of Improvements.

Ordinarily, under the common law, a tenant for life or years who removes all or a part of a building or other improvements from the premises will be liable in waste. n340 Removal of fences, n341 floors, and things affixed to the estate has been found to be waste. n342 But large areas of exception have been recognized. Removal of old, useless buildings and replacement with new structures more valuable to the estate is possible without waste, but probably only if the removal is in response to change in the character of the surrounding area. n343 An old building in dangerous condition may be removed, n344 and a tenant may remove items of personal property from the premises, if they have not become affixed to the premises. If the items cannot be removed without injury to the estate, then they have acceded to the estate as fixtures and belong to the reversioner or remainderman, and their removal by the tenant is waste. n345

COMPUTER-ASSISTED RESEARCH

LEXIS: remov! w/20 improvement or building or fixture w/50 waste

§ 70.08(d) The Application of Waste Law to Personal Property.

In the area of fixtures the law of waste has an application to personal property. If personal property of the tenant for life or years accedes to the premises, becoming a fixture, then its removal by the tenant, with consequent injury to the premises, constitutes waste. Otherwise, the personal property may be removed by the tenant without liability for waste. n346

If ownership of personal property is divided into present possessory and future interests, the ready mobility and alienability of such property when in the possession of the tenant for life or years is afforded little restraint by the law of waste. Owners of the future interests do not have adequate protection against misuse or misappropriation by those in possession of the property. Therefore, it has become common in many jurisdictions, by statute or decision, to treat the present possessor as a trustee, or to require that some security be given for the duration of the possessory estate. n347 The traditional law of waste has been applied to personal property in a few older cases, either to award damages for injury to the property n348 or to enjoin threatened damage to the property. n349

(n14)Footnote 261. The problems associated with actual removal of improvements are discussed *infra* §70.08(b)(2).

(n15)Footnote 262. John Norton Pomeroy, A Treatise on Equity Jurisprudence §1348, at 379 (1883).

Trump Empire State Partners v. Empire State Bldg. Assoc., 665 N.Y.S.2d 891 (N.Y. App. Div. 1997)(holding that tortious claims for waste were insufficient because there had been no pleading of damage to the building that changed the nature of the property).

(n16)Footnote 263. *Pynchon v. Stearns, 52 Mass. (11 Metc.) 304 (1846)* (it was not waste when tenant filled in

low, swampy ground, built houses and excavated cellars for the houses, because the houses could be removed and the land returned in better condition to the remainderman); *Winship v. Pitts, 3 N.Y. (Paige Ch.) 259 (1832)* (it was not waste to build a livery stable on the vacant rear portion of a lot used for commercial and residential purposes).

Ruggles v. Sabe, 670 N.W.2d 356 (N.D. 2003) (a life tenant who also held a two-thirds remainder in the same property committed waste when he removed a structure from the property without the permission of the other remainderman). *Vereen v. Hargrove, 96 S.W.3d 762 (Ark. App. 2003)* (construction of a tail-water recovery system on the farm land did not constitute waste).

(n17)Footnote 264. *Hayman v. Rownd, 118 N.W. 328 (Neb. 1908)* (waste occurred when holes and pegs were driven into and damaged a brick wall in order to attach a sign).

(n18)Footnote 265. *Clemence v. Steere, 1 R.I. 272 (1850)* (it was not waste to tear down a barn that was so dilapidated that it threatened to collapse on the cattle). *Compare Bond v. Green, 401 So. 2d 639 (La. App. 1981)* (destroying old houses was not waste).

(n19)Footnote 266. *Sarles v. Sarles, 3 N.Y. (Sand. Ch.) 601 (1846)* (to build a new outhouse in place of an old, "ruinous" one was not waste).

McNeese v. Hutchinson, 724 So. 2d 451 (Miss. App. 1998) (waste to fill in inoperable swimming pool).

(n20)Footnote 267. *Clemence v. Steere, 1 R.I. 272 (1850)* (a life tenant with an unrepairable house on the premises may leave it in a dilapidated condition, but may not tear it down).

(n21)Footnote 268. *Barrera v. Barrera, 294 S.W.2d 865 (Tex. Civ. App. 1956)* (a life tenant was not responsible for repairing house damage caused by a flood); *Merritt v. Richey, 27 N.E. 131 (Ind. 1891)* (house accidentally burned, without negligence of occupant).

(n22)Footnote 269. *Cook v. Champlain Transp. Co., 1 Denio 91 (N.Y. 1845)* (a lessee was held liable for waste when a building on the premises was destroyed because of negligent acts of a third party; in this case sparks from a passing steamboat ignited a fire that destroyed a planing mill). *See infra* §70.09(i).

(n23)Footnote 270. *Davenport v. Magoon, 4 P. 299 (Or. 1884)* (the court enjoined a lessee who wanted to pull down a livery stable and replace it with a workers' dwelling).

(n24)Footnote 271. *Crewe Corp. v. Feiler, 146 A.2d 458 (N.J. 1958)* (when a building remodeled into an office resulted in higher property taxes for the lessor, the remodeling constituted waste).

(n25)Footnote 272. *79 N.W. 738 (Wis. 1899).*

(n26)Footnote 273. *Dodds v. Sixteenth Section Dev. Corp., 99 So. 2d 897 (Miss. 1958)* (a reservoir could be placed on lands formerly used exclusively for agricultural purposes); *J.H. Bellows Co. v. Covell, 162 N.E. 621 (Ohio App. 1927)* (reducing a muck pond and creating an artificial lake for a golf course would not injure the property).

(n27)Footnote 274. *237 N.Y.S. 6 (1929).*

(n28)Footnote 275. Discussed *supra* §70.08(a).

(n29)Footnote 276. Discussed *infra* §70.08(c).

(n30)Footnote 277. *Chapman v. Chapman, 526 So. 2d 131 (Fla. App. 1988)* (life tenants must pay property taxes during the continuance of their estate).

Thomas v. Thomas, 661 N.W.2d 1 (S.D. 2003) (a life tenant who failed to pay property taxes committed waste).

See Boillot v. Conyer, 887 S.W.2d 761 (Mo. 1994) (life tenant must pay taxes on property).

(n31)Footnote 278. *Monaghan v. Wagner, 487 So. 2d 815 (Miss. 1986)* (tax payments by life tenant were not effective to assert adverse possession against the remainderman, because the life tenant already had a duty to pay the taxes). *See* Lewis M. Simes & Allan F. Smith, 4 The Law of Future Interests §1693 n.5 (2d ed. 1956 & Supp. 1989).

(n32)Footnote 279. *Matter of Estate of Enright, 436 N.E.2d 681 (Ill. App. 1982)* (estate taxes accruing before period of probate could not be paid from income produced by probate property). *See* Lewis M. Simes & Allan F. Smith, 4 The Law of Future Interests §1693 n.10 (2d ed. 1956 & Supp. 1989).

(n33)Footnote 280. *Dixon v. Evans, 149 S.E.2d 124 (Ga. 1966)* (taxes were assessed and executions were issued in personam against the life tenant only). *See* Lewis M. Simes & Allan F. Smith, 4 The Law of Future Interests §1693 nn.3 & 4 (2d ed. 1956 & Supp. 1989).

(n34)Footnote 281. *Brinkley v. Day, 362 S.E.2d 587 (N.C. App. 1987)* (expenses to be paid from life tenancy income). *See* Lewis M. Simes & Allan F. Smith, 4 The Law of Future Interests §1693 n.14 (2d ed. 1956 & Supp. 1989).

(n35)Footnote 282. *Almeida v. Price, 236 P.2d 823 (Cal. App. 1951)* (life tenant, mother of reversioners, was not expected to pay taxes or insurance). *See* Lewis M. Simes & Allan F. Smith, 4 The Law of Future Interests §1693 n.16 (2d ed. 1956).

(n36)Footnote 283. *Deutsch v. Frey, 173 N.E. 40 (Ohio App. 1930)* (taxes are assessed against the estate as a whole).

(n37)Footnote 284. *Kelley v. Ball, 19 S.W. 581 (Ky. 1892)* (a devisee entitled to use of the property rent-free for a term of years was required to pay taxes).

(n38)Footnote 285. *Ocean Grove Camp Meeting Ass'n v. Reeves, 75 A. 782 (N.J. 1910)* (lessee under low rent agreed to pay tax assessments).

(n39)Footnote 286. *Hill v. Hill, 623 S.W.2d 779 (Tex. App. 1981)* (life tenant must pay interest on existing encumbrances to protect the remainder interest from forfeiture).

In re Felker, 211 B.R. 165, 1997 Bankr. LEXIS 1230 (U.S. Bankr. Pa. 1997) (holding "the life tenant must pay the taxes, municipal assessments for sidewalk paving, and mortgage interest accruing during his ownership").

(n40)Footnote 287. *Scotch v. Hurst, 437 So. 2d 497 (Ala. 1983)* (a life tenant who redeemed property at a foreclosure sale was entitled to contribution from the remainderman). By analogy, apportionment of the obligation for payment of principal between the life tenant and the reversioner or remainderman could be extended to the equal, amortized payments typical of modern long-term mortgages. *See* Roger A. Cunningham, et al., The Law of Property §4.3, nn.15-17 (2d ed. 1993).

(n41)Footnote 288. *Ganz v. Clark, 169 N.E. 100 (N.Y. 1929)* (an owner under covenant of quiet enjoyment was liable in damages to a lessee who was evicted by foreclosure); Roger A. Cunningham, et al., Law of Property §4.3, n.39 (2d ed. 1993).

(n42)Footnote 289. *Clark v. Childs, 321 S.E.2d 727 (Ga. 1984)* (a jury could decide if the standard of ordinary care required a life tenant to maintain insurance on the premises).

(n43)Footnote 290. *Livesay v. Boyd, 180 S.E. 158 (Va. 1935).*

(n44)Footnote 291. *See, e.g., Clark v. Leverett, 126 S.E. 258 (Ga. 1924),* as modified by *Clark v. Childs, 321 S.E.2d 727 (Ga. 1984)* (life tenant was guardian for the remainderman).

(n45)Footnote 292. *Ingold v. Phoenix Assur. Co., 52 S.E.2d 366 (N.C. 1949)* (tenant, not otherwise obligated, agreed to be a coinsurer with the landlord).

(n46)Footnote 293. *Holliday v. Phillips Petr. Co., 275 F. Supp. 686 (E.D. Ark. 1967)* (life tenant failed to construct or pay for required sidewalks).

(n47)Footnote 294. *Troy v. Protestant Episcopal Church, 56 So. 982 (Ala. 1911)* (assessment for sidewalks was apportioned between life tenant and remainderman).

(n48)Footnote 295. *Blake v. Metropolitan Chain Stores, 225 N.W. 587 (Mich. 1929)* (lessee not required to pay sidewalk assessment).

G & A Inc. v. Nahra, 514 N.W.2d 255 (Mich. 1994) (tenant required by agreement to pay property taxes was not thereby required to pay special assessment).

(n49)Footnote 296. *Nation v. Green, 123 N.E. 163 (Ind. 1919)* (a life tenant obligated to pay taxes during lifetime, only if sufficient income was received).

(n50)Footnote 297. *See infra* §70.08(b)(3).

(n51)Footnote 298. *American Nat'l Bank & Trust Co. v. Hacros Chems., Inc., 997 F. Supp. 994 (N.D. Ill. 1997), Serfecz v. Jewel Food Stores, 1997 U.S. Dist. LEXIS 13270* (N.D. Ill. Aug. 26, 1997) ((quoting *Pasulka v. Koob, 170 Ill. App. 3d 191, 524 N.E.2d 1227, 121 Ill. Dec. 179 (1988)* (holding "waste occurs when someone who lawfully has possession of real estate destroys it, misuses it, alters it or neglects it so that the interest of persons having a subsequent right to possession is prejudiced in some way or there is a diminution in the value of the land being wasted")) distinguished by *Boucher Inv., L.P. v. Annapolis-West Ltd. Partnership, 784 A.2d 39* (Md. App. Oct 31, 2001); *Kimbrough v. Reed, 943 P.2d 1232 (Idaho 1997)* (defining waste as "action or inaction by a possessor of land causing unreasonable injury to the holders of other estates in the same land. Abuse or a destructive use of property by one in rightful possession. Spoil or destruction, done or permitted, to lands, houses, gardens, trees, or other corporeal hereditaments, by the tenant thereof, to the prejudice of the heir, or of him in reversion or remainder"); *Gilman v. Abagnale, 235 A.D.2d 989, 653 N.Y.S.2d 176 (N.Y. App. Div. 1997)* (citing 107 N.Y. Jur. 2d, Waste, §1, at 386 "waste is any destruction, misuse, alteration, or neglect of premises by one lawfully in possession thereof to the prejudice of the ... interest therein of another"); *Keesecker v. Bird, 200 W.Va. 667, 490 S.E.2d 754 (W.Va. 1997)* distinguished by *Boucher Inv., L.P. v. Annapolis-West Ltd. Partnership, 784 A.2d 39* (Md. App. Oct 31, 2001). ((citing *Gwinn v. Rogers, 92 W.Va. 533, 115 S.E. 428 (1922)* (holding waste is "any permanent or lasting injury done or permitted to be done by the holder of the particular estate to lands, houses, or other corporeal hereditaments, to the prejudice of the heir or of him in remainder or reversion")).

(n52)Footnote 299. *Chapel v. Hull, 26 N.W. 874 (Mich. 1886)* (it was waste for the outgoing tenant, over the objection of the reversioner, to sow the entire farm in wheat, leaving the land worthless for renting as meadow and pasture the next season).

(n53)Footnote 300. *Sarles v. Sarles, 3 N.Y. (Sand. Ch.) 601 (1846).*

(n54)Footnote 301. *Wilds v. Layton, 1 Del. Ch. 226 (1882)* (improper tillage was waste, because it tended to depreciate the value of the inheritance).

(n55)Footnote 302. *Bellows v. McGinnis, 17 Ind. 64 (1861).*

(n56)Footnote 303. *Sarles v. Sarles, 3 N.Y. (Sand. Ch.) 601 (1846).*

(n57)Footnote 304. Allegheny County v. Township of Snowden, *113 Pa. L.J. 31 (Pa. Com. Pl. 1964).*

(n58)Footnote 305. *Smith v. Cap Concrete, 184 Cal. Rptr. 308 (1982)* (dumping concrete debris was waste, because it substantially and permanently devalued the property).

(n59)Footnote 306. *Lytle v. Payette-Oregon Slope Irrig. Dist., 152 P.2d 934 (Or. 1945).*

(n60)Footnote 307. *Dorsey v. Speelman, 459 P.2d 416 (Wash. App. 1969)* (permissive waste implies negligence in letting a house decay from lack of repair or deteriorate from other neglect).

See *Carter v. Helmsley-Spear, Inc., 861 F. Supp. 303, 335 (S.D.N.Y. 1994),* aff'd in part, rev'd in part, *71 F.3d 77 (1995)* (but waste dismissal upheld), cert. denied, *517 U.S. 1208 (1996)* (an example of permissive waste would be failure to prevent elements from causing damage to building). *Davidson v. Kenney, 971 S.W. 2d 896 (Mo. App. 1998)* (dog damage to carpet, floor and curtains); *Kestel-Rauls v. Moore, 586 N.W.2d 699 (Wisc. App. 1998)* (unpublished opinion listed in Table) (puppy, kitten, cigarette, and iron damage to carpet).

(n61)Footnote 308. *Savings Inv. & Trust Co. v. Little, 39 A.2d 392 (N.J. 1945)* (life tenant not required to replace furnace in house already beyond repair).

(n62)Footnote 309. *Stovall v. Edwards, 151 P.2d 385 (Okla. 1944)* (a tenant who let a residence become "run down" and who refused to make repairs was guilty of waste).

(n63)Footnote 310. *Prescott v. Grimes, 136 S.W. 206 (Ky. 1911)* (the court held that a life tenant who let a dwelling, outbuildings and fences become dilapidated could be liable for permissive waste).

(n64)Footnote 311. *Greene v. Greene, 35 A. 1042 (R.I. 1896)* (a life tenant, as an income beneficiary of a trust, was not permitted to charge tenantable repairs against the corpus of the trust).

(n65)Footnote 312. *Woolston v. Pullen, 102 A. 461 (N.J. 1917)* (roof in need of retinning).

(n66)Footnote 313. *White v. Wagner, 8 Md. (4 H. & J.) 373 (1812)* (the tenant, a newspaper publisher, committed waste when an angry mob destroyed the tenant's house on the premises). See discussion and citations to the older cases in John Henry Merryman, [it]Part 20: Waste, *in 5* American Law of Property §20.13, at 103-05 nn.1-10 (A. James Casner ed. 1952).

(n67)Footnote 314. *Savings Inv. & Trust Co. v. Little, 39 A.2d 392 (N.J. 1945)* (life tenant not required to replace furnace in house already beyond repair).

(n68)Footnote 315. *Matter of Steele, 19 N.J. Eq. 120 (1868)* (new roof and paint required of life tenant).

In re Felker, 211 B.R. 165 (Bankr. M.D. Penn. 1997) (finding a life tenant "may not disregard the rights of those who take when his life estate ends. So, he is responsible for ordinary course of business repairs and maintenance"); *Kimbrough v. Reed, 943 P.2d 1232 (Idaho 1997)* (citing Idaho Code §55-311 "the owner of a life estate must keep the buildings and fences in repair from ordinary waste").

(n69)Footnote 316. *In re Stout's Estate, 50 P.2d 768 (Or. 1935)* (vacant house of life tenant had been vandalized).

(n70)Footnote 317. *In re Stout's Estate, 50 P.2d 768 (Or. 1935)*

(n71)Footnote 318. *Van Wormer v. Crane, 16 N.W. 686 (Mich. 1883)* (tenant obligated to restore planing mill destroyed by fire); *Suydam v. Jackson, 54 N.Y. 450 (1873)* (tenant for years required to make ordinary repairs).

(n72)Footnote 319. *Brigham v. Overstreet, 57 S.E. 484 (Ga. 1907)* (manure is appurtenant to the realty; good husbandry requires that it be applied to increasing the productivity of the land where it was produced).

(n73)Footnote 320. *Munier v. Zachary, 114 N.W. 525 (Iowa 1908)* (the tenant is the owner of straw from crops raised on the premises); *Clark v. Strohbeen, 181 N.W. 430 (Iowa 1921)* (the tenant has the exclusive ownership in annual crops until they are severed).

(n74)Footnote 321. *Munier v. Zachary, 114 N.W. 525 (Iowa 1908).*

(n75)Footnote 322. *Haskell v. Wood, 64 Cal. Rptr. 459 (1967)* (the life interest was conveyed prior to the grant of an oil and gas lease).

Hynson v. Jeffries, 697 So. 2d 792 (Miss. App. 1997) (holding that "if a mine has been opened before the creation of the life estate and a future interest in land, the life tenant may be entitled to continue and operate the opened mine and retain the proceeds of such operation").

(n76)Footnote 323. *Rupel v. Ohio Oil Co., 95 N.E. 225 (Ind. 1911)* (oil and gas wells); *Williamson v. Jones, 27 S.E. 411 (W. Va. 1897)* (salt wells); *United States v. Bostwick, 94 U.S. 53 (1877)* (quarries); *Russell v. Merchants' Bank of Lake City, 50 N.W. 228 (Minn. 1891)* (excavating clay for bricks); *Halifax Drainage Dist. v. Gleaton, 188 So. 374 (Fla. 1939)* (sand and gravel operations).

Abraxas Petroleum Corp. v. Hornburg, 20 S.W.3d 741 (Tex. Ct. App. 2000) (oil operation's responsibilities were defined by a joint operating agreement and therefore an action in waste was precluded by the joint operating agreement).

(n77)Footnote 324. *Freer v. Stotenbur, 2 Abb. Dec. 189, 2 Keyes 467, 34 How. Prac. 440 (N.Y. 1866)* (land leased for agricultural purposes does not include the right to work a quarry).

(n78)Footnote 325. *Franklin Coal Co. v. McMillan, 49 Md. 549 (1878)* (an action by a remainderman against a life tenant when a coal mining company negligently mined under life tenant's property).

(n79)Footnote 326. *Gaines v. Green Pond Iron Mining Co., 33 N.J. Eq. 603 (1881)* (mere cessation of work in a mine, even for over 60 years, was not abandonment).

(n80)Footnote 327. *Kimbark Exploration Co. v. Von Lintel, 391 P.2d 55 (Kan. 1964)* (development of a mine was authorized before the life estate took effect); *Hembree v. Magnolia Petr. Co., 56 P.2d 851 (Okla. 1935)* (a lease and conveyances were executed before the homestead right vested).

(n81)Footnote 328. *King v. Miller, 6 S.E. 660 (N.C. 1888)* (a tenant in dower could use fallen and dead trees for firewood).

(n82)Footnote 329. *Whitehead v. Whitehead, 181 A. 684 (Del. Super Ct. 1935)* (timber was cut and sold to pay for taxes, insurance and repairs).

(n83)Footnote 330. *Thomas v. Thomas, 82 S.E. 1032 (N.C. 1914)* (some trees were cut for profit, which was used for repair costs).

(n84)Footnote 331. *Disher v. Disher, 63 N.W. 368 (Neb. 1895)* (cutting timber to make pastureland was not waste, if it was good husbandry and did not diminish the value of the inheritance).

(n85)Footnote 332. *Poole v. Union Trust Co., 157 N.W. 430 (Mich. 1916)* (in this country, the common law rules on timber cutting are relaxed).

(n86)Footnote 333. *Webster v. Webster, 33 N.H. 18 (1856)* (a tenant of a farm may take all necessary wood for fuel from the farm, even if he has other outlying woodland).

(n87)Footnote 334. *Thomas v. Thomas, 82 S.E. 1032 (N.C. 1914)* (some trees were cut for profit, which was used for repair costs).

(n88)Footnote 335. *Temple v. Carter, 165 S.E.2d 541 (N.C. App. 1969)* (a life tenant was restricted to cutting only timber needed for repairs); *Adams v. Adams, 371 S.W.2d 637 (Ky. 1963)* (a life tenant may cut trees only as needed for maintenance and domestic purposes).

(n89)Footnote 336. Common of estovers (from estoffer, to furnish) is a liberty of taking necessary wood, for the use of furniture of a house or farm, from off another's estate. The Saxon word, bote, is of the same significance with the French estovers; and therefore housebote is a sufficient allowance of wood, to repair, or to burn in, the house; which latter is sometimes called fire-bote: plough-bote and cart-bote are wood to be employed in making and repairing all instruments of husbandry: and hay-bote or hedge-bote is wood for repairing of hays, hedges, or fences. These botes or estovers must be reasonable ones; and such that any tenant or lessee may take off the land let or demised to the tenant, without waiting for any leave, assignment, or appointment of the lessor, unless the tenant be restrained by special covenant to the contrary. William Blackstone, Commentaries 35 (1766).

(n90)Footnote 337. The question was raised by Merryman, who concluded that both types of necessity are implicit in the decisions. John Henry Merryman, Part 20: Waste, *in 5* American Law of Property §20.4, at 82-86 (A. James Casner ed. 1952).

(n91)Footnote 338. *Whitehead v. Whitehead, 181 A. 684* (Del. Super. Ct. & Orphans' Ct. 1935) (timber was cut and sold to pay for taxes, insurance and repairs).

(n92)Footnote 339. *Dennett v. Dennett, 43 N.H. 499 (1862)* (a life tenant could not sell wood for money to use in necessary repairs).

(n93)Footnote 340. *Reams v. Henney, 97 N.E.2d 37 (Ohio App. 1950)* (a life tenant removed furniture from the premises); *Bass v. Metropolitan W. Side Elevated R.R., 82 F. 857 (7th Cir. 1897)* (a lease assignee cut off the corner of a building to accommodate railroad tracks).

(n94)Footnote 341. *United States v. Bostwick, 94 U.S. 53 (1877).*

(n95)Footnote 342. *White v. Wagner, 8 Md. (4 H. & J.) 373 (1812).*

(n96)Footnote 343. *Melms v. Pabst Brewing Co., 79 N.W. 738 (Wis. 1899).*

(n97)Footnote 344. *Clemence v. Steere, 1 R.I. 272 (1850)* (it is not waste to tear down a barn so dilapidated that it may fall on the cattle).

(n98)Footnote 345. *Pearson v. Harper, 392 P.2d 687 (Idaho 1964)* (shelving and a partition could not be removed without injury to the building).

(n99)Footnote 346. *Meyer v. Hansen, 373 N.W.2d 392 (N.D. 1985)* (the cost of replacing damaged or missing inventory from a leased hotel could be recovered in a waste action).

Norris v. Green, 656 A.2d 282 (D.C. App. 1995) (defaulted and evicted commercial tenant brought unsuccessful suit for unjust enrichment after the landlord sold the building containing equipment installed by the tenant).

(n100)Footnote 347. *See* Roger A. Cunningham, et al., The Law of Property §4.11 (2d ed. 1993).

(n101)Footnote 348. *Isler v. Isler, 88 N.C. 576 (1883)* (proceeds from the sale of property take the place of the property); *Wintuska v. Peart, 36 S.W.2d 50 (Ky. 1931)* (conversion of Liberty bonds could be waste against a remainderman).

(n102)Footnote 349. *Dillen v. Fancher, 102 S.W.2d 87 (Ark. 1937)* (injunction to enjoin conversion of personal property, money, notes and accounts).

CHAPTER 70 WASTE

8-70 Thompson on Real Property, Thomas Editions § 70.09

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 70.09 Proper Parties.

[Go To Supp]

A plaintiff in a waste action must have the estate of inheritance and the defendant must have a lawful present possessory interest in the same property. n350 Although this statement covers the large majority of waste cases, it is an oversimplification, obscuring the fact that waste can arise in a surprisingly wide variety of relationships between present and future interest holders. The scope of the waste action and the range of available remedies often vary greatly, depending on the types of interests held by the parties. Rather than treating this subject by the traditional division between proper plaintiffs and proper defendants, this section describes the respective positions of plaintiffs and defendants in waste actions that can arise in the several types of property relationships with present and future interests.

§ 70.09(a) Waste Action by Reversioner or Remainderman, for Fee or for Life, Against Life Tenant, Tenant for Years or Periodic Tenant.

A reversioner or remainderman has the right to bring a waste action for full legal or equitable relief against a tenant for life or years in possession of the premises. However, the scope of the waste action -- and the respective rights of plaintiffs and defendants--change slightly if the property rights vary from the typical. n351 For instance, if the remainderman plaintiff has only a contingent remainder, an equitable action to prevent waste is available, but a legal action for damages is not, n352 unless the court agrees to assess and impound the damages until the remainder is vested. n353 A contingent remainderman may also bring an action for damages on behalf of all owners of future interests in the property, with the recovery proceeds to be held until the interests vest. n354

A life estate remainder interposed by conveyance between a possessory estate for life or years and a vested remainder or reversion raises two issues. The first issue is whether the life estate remainderman or reversioner has a right of action in waste against the possessory tenant. Such plaintiffs are treated as contingent remaindermen, with rights of action for equitable relief, but not for damages, unless the court agrees to assess and impound past damages. n355 Several states have by statute conferred upon a remainderman for life the right to bring a waste action for damages. n356 The second issue is whether the remainderman or reversioner in fee is entitled to bring a waste action as long as there exists an intervening future estate for life. The old common law rule was that the waste plaintiff must have the next immediate estate of inheritance, but many states have by statute modified the rule so that any reversioner or remainderman has a

right of action for waste. n357 The current rule in states without such statutes can only be guessed at, since reception of that part of the common law rule is uncertain and there is no recent reported case authority.

Another variant is the action brought against a tenant in possession under only a periodic tenancy, rather than a term for years. There is no case authority or other reason to apply a different rule of waste liability to periodic tenants than is applied to tenants for terms. Regarding all tenants of residential premises, potential permissive waste liability for failure to make repairs has been considerably reduced with the spread of the implied warranty of habitability through almost all American jurisdictions.

In these most typical waste actions, as in others arising out of less common relationships, it is not necessary that the plaintiff be seised of the interest at the time the action is brought, only at the time the waste occurred. n358 And one court has stated that a child *en ventre sa mere* qualified for injunctive relief to stay waste. n359

LEXIS: waste w/50 tenan! w/5 will

waste w/50 tenan! w/5 sufferance

§ 70.09(c) Waste Action by Holder of Reversionary Interest or Executory Interest Against Owner of Defeasible Fee, or Action by Holder of Remainder in Defeasible Fee Against Tenant for Life or Years.

If the plaintiff in a waste action owns only a reversionary or executory interest in the property, the available remedies vary depending on the remoteness of the possibility that the interest will become a fee simple absolute. If vesting in possession could likely occur soon, if at all, the holders of these interests may bring waste actions for equitable relief and, in some circumstances, even recover damages. n361 Where vesting in possession is only a remote possibility, that is, where the possessor's estate could potentially last forever, no authority supports a right of action for damages, and actions for equitable relief would be rare. n362 By analogy the same rule of remedies should apply to actions against present possessors by those who hold remainders or reversions subject to defeasance: the more likely the interest will vest in possession, the broader the range of possible equitable and legal relief in a waste action; and relief, if available, will likely be only equitable relief. n363

§ 70.09(d) No Waste Action Against Possessor with Power to Extinguish Future Interest.

A waste action may not be brought against a present possessor of property who owns an estate in fee simple conditional, or in fee tail, because such an owner has power to convey the property in fee simple absolute and extinguish all future interests. Similarly, a waste action may not be brought against a life tenant with power to appoint or to consume, because that life tenant is also able to extinguish all future interests. n364

COMPUTER-ASSISTED RESEARCH

LEXIS: waste w/50 consume or power w/5 appoint!

§ 70.09(e) Waste Action by Secured Creditor Against Debtor in Possession.

In the so-called "title theory" states, in which the mortgagee or trust deed trustee is considered to have an ownership interest in the title to the premises, a waste action against the trustor or mortgagor may be brought as against a tenant for life or years. n365 In the so-called "lien theory" states, in which the mortgagee or trustee is considered only to have a security interest in the property, the mortgagee or trustee may have an action in waste for damages only if the security has been substantially impaired, which is a higher threshold of actionable injury than in the ordinary waste case. n366 In both groups of states, mortgagees and trustees may seek equitable relief, but only if the alleged waste threatens their security. n367 The test for impairment of security, as mentioned, may present a higher threshold of actionable injury. If any loss of value in the secured estate is considered impairment of security, then the ordinary standards for a waste action apply. However, if security is not considered impaired until the waste reduces the secured property's value to the level of the outstanding indebtedness, then the secured party may be severely limited in the right to bring a waste action. This latter standard, referred to as the debt equivalency test, is the more widely followed standard. n368

A number of states impose some statutory regulation over waste rights in these relationships by giving a right of action for waste against a mortgagor in possession during a post-foreclosure redemption period, or giving the mortgagee a right of action for waste only after foreclosure has occurred. n369

COMPUTER-ASSISTED RESEARCH

LEXIS: waste w/50 mortgag! or secur! w/10 impair!

§ 70.09(f) Waste Action by Ward Against Guardian.

Concerns about guardians' abuse of their wards' lands prompted the earliest common law statutes governing waste, n370 and in the modern era it is common for the American states to confer on wards a statutory right to bring actions of waste against their guardians. n371 If no statute governs, a guardian's liability for waste is defined by the same rules that apply to ordinary waste actions against tenants for life or years. n372

COMPUTER-ASSISTED RESEARCH

LEXIS: waste w/50 ward or guardian

§ 70.09(g) Waste Action Against Vendor in Possession.

If a landowner has entered into a contract to sell the land, but remains in possession until the transaction closes, the buyer may bring an action for any waste committed during the interim occupancy. n373 Similarly, a landowner who remains in possession after granting an option to purchase may not commit waste on the premises; however, the optionee must first exercise the option before bringing the action for waste. n374

§ 70.09(h) Waste Action Between Concurrent Owners.

Statutes in the majority of American states confer on concurrent owners a right of action against their cotenants who commit waste. n375 However, often these statutes only refer to actions for damages. Equitable relief against a wasting cotenant is usually not granted unless the conduct is particularly serious or malicious; this limitation on relief probably is in recognition that each cotenant has theoretically full ownership rights. n376

COMPUTER-ASSISTED RESEARCH

LEXIS: waste w/50 cotenan! and damage or injunct!

§ 70.09(i) Waste Action Against Stranger.

According to common law in most jurisdictions, the tenant in possession is liable for all wasteful conduct that occurs on the premises, even if committed by a third party, a stranger to the title. n377 A tenant so held liable is usually entitled to recover from the actual wrongdoer. n378 A few jurisdictions deny waste liability in such situations if the tenant was free from fault. n379 When a reversioner or remainderman or innocent tenant brings an action against the stranger or third party who committed waste on the premises, the action usually sounds in trespass rather than waste, because the wrongdoer was not in lawful possession of the premises when the damage occurred. n380 In an occasional departure from this rule a remainderman may bring an action on the case in waste directly against a stranger who has damaged the premises. n381 A tenant cannot be charged with waste for acts of God, or of the public enemy, n382 or of public authorities. n383

Anyone who commits waste after taking possession of the premises by permission of the tenant--such as an assignee, a subtenant, or a licensee--can be directly liable to the remainderman or reversioner, n384 and both legal and equitable relief can be granted. n385 A tenant who assigns is not liable to the remainderman for waste committed by the assignee, unless the tenant has assumed such liability n386 or remained in possession. n387 A tenant may recover from a subtenant the loss to the possessory interest as well as to the future interest. n388

CHAPTER 70 WASTE

8-70 Thompson on Real Property, Thomas Editions § 70.10

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 70.10 Remedies.

[Go To Supp]

As is revealed in the summary of state waste statutes in §70.07(k)(4), many states explicitly authorize an action for waste against various categories of defendants. All the statutes authorize damages, either single, double, or triple; several authorize the further remedies of forfeiture of the possessory estate and eviction from the premises in specified circumstances. Some of the statutes also authorize injunctive relief. A waste statute authorizing multiple damages will not be considered mandatory, so a court has discretion over whether to impose multiple damages. n389 Quite commonly, multiple damages, even when authorized by statute, will be awarded only when the defendant's conduct has been wanton, willful, or malicious. n390

It is uncertain whether remedies omitted from such statutes could be invoked by judicial authority, but that would seem unlikely with respect to the extraordinary remedies of multiple damages, forfeiture and eviction. n391 Insofar as the statutes address only the action for waste, it seems more likely that an ordinary civil action for waste would be available, even if not mentioned in the statute. Such an action would be limited to recovery of single damages.

COMPUTER-ASSISTED RESEARCH

LEXIS: waste w/50 damage w/10 treble or triple or

double or multiple

waste w/50 forfeit!

waste w/50 evict!

waste w/50 willful or wilful or wanton or malic!

Damages in waste cases are usually measured by diminution in the value of the property, in other words, the difference

between the property value from the time the possessory estate was created and the property value after commission of waste. n392 A court may choose to use the cost of restoration as the measure of damages, but if the restoration cost exceeds the value of the property, then diminution of property value should be the measure. n393 A court willing to consider either diminution in value or cost of restoration as the measure of damages will choose the least costly standard. n394

COMPUTER-ASSISTED RESEARCH

LEXIS: waste w/50 damage w/20 dimin! and estate

Equitable relief through injunction is, as always, available only if legal relief is inadequate, n395 although in some jurisdictions injunctions are readily granted even if money relief is available and adequate. n396 Injunction is appropriate if the waste is of a nature that cannot be easily measured or compensated by money. n397 Affirmative or mandatory injunctions commanding the premises to be restored in specified ways may issue in appropriate cases. n398 Equitable relief by injunction may also include the further equitable remedy of accounting for past damage, under the power of equity courts to grant complete relief. n399 Thus, the available equitable remedies can effectively eliminate the need for many actions at law.

COMPUTER-ASSISTED RESEARCH

LEXIS: waste w/50 injunct! w/10 affirm! or mandat!

In an appropriate case, the waste plaintiff may request a receivership. n400

CHAPTER 70 WASTE

8-70 Thompson on Real Property, Thomas Editions § 70.11

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 70.11 Defenses.

A defendant in a waste action may claim that the plaintiff has waived the right to pursue the waste action n401 or that the defendant has obtained the possessory interest "without impeachment for waste" or some modern equivalent that renders the possessor immune from all but an action for wanton waste. n402 An action may also be barred by a statute of limitations, laches, or estoppel. n403 Under a defense relying on a statute of limitations, usually the time begins to run when the damage occurs, n404 although at least one state delays running until the possessory estate terminates. n405 An action against permissive waste is considered to be against a continuing injury and usually the statute will not commence until the tenancy is terminated. n406 Alternatively, it has been held that even in a permissive waste case, the statute begins to run when the waste first occurs. n407

An occupant presently committing waste may not defend by the promise to restore the premises to their prior condition. n408

CHAPTER 70 WASTE

8-70 Thompson on Real Property, Thomas Editions § 70.13

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 70.13 Drafting Instructions.

Waste issues do not give rise to a wide variety of documentation. This section will provide guidelines and suggestions for the most important of those, including a covenant against liability for waste, a covenant to not commit or permit waste, a complaint against waste, answers and defenses against such a complaint, and a statute authorizing a specific cause of action for waste.

§ 70.13(a) Covenant Against Liability for Waste.

Typically a provision in a conveyance protecting a tenant for life or years against liability for waste will arise in the context of a reserved life estate: a grantor wishing to make an inter vivos gift of presently occupied property will convey only the remainder, while retaining a present life interest. It is also possible to convey that life estate, so protected, to a third party, or to simply create such a protected life estate by direct conveyance from the holder of the fee simple absolute interest.

The traditional common law term of art for a provision in a conveyance protecting against liability for waste is to convey "without impeachment for waste." However, greater clarity today may be achieved if the protective provision is simply worded "without liability for the commission of waste" or "without liability for waste"; the latter phrase presumably offers broader protection against complaints of permissive waste. The protective provision may extend to the entire premises or only to a certain portion of the premises, and may be limited to protection for only certain specified activities or conditions.

One who holds land without impeachment for waste may nevertheless be liable for conduct which is wanton or malicious. A protective provision which attempted to suppress liability for even wanton or malicious conduct would probably be unenforceable as encouraging landowner conduct below an acceptable standard of care.

§ 70.13(b) Covenant to Not Commit or Permit Waste.

The first issue to confront in drafting a covenant prohibiting waste is determining whether it extends only to voluntary waste, or also to permissive waste. A covenant prohibiting a tenant for life or years only from committing waste may protect only against voluntary waste, whereas more complete protection is afforded by a covenant to not commit or

permit (or "suffer" to use the older word that still occurs frequently in waste statutes) waste on the premises. In an agricultural or any other specialized setting, a covenant may itemize certain conduct which is prohibited, or certain affirmative acts which may be required under specified circumstances. In some circumstances, such as a covenant by a purchaser under a real estate contract not to commit waste, the covenant is limited in duration to only the period during which the contract remains executory.

Covenants against waste also frequently include other, affirmative promises, such as care, maintenance and repair; such covenants also usually spell out the required standard for compliance, such as reasonableness, or maintaining the condition prevailing at the beginning of the tenancy. A covenant may also include specific provisions for restoration or replacement of damaged improvements on the premises.

A general covenant against waste may also include certain exceptions to the general prohibition, such as permitting alterations to the premises by a lessee to enhance rental income. A lessor in such circumstances should, however, consider whether such exceptions should be made subject to the lessor's prior written or other approval. Likewise, from the lessor's or remainderman's perspective, any exceptions to broad prohibitions against waste should be described in precise detail to minimize possible conflicts over interpretation. Moreover, such exceptions should not be phrased in any way that would excuse a tenant for life or years from liability for the tenant's own negligence.

§ 70.13(c) Complaint Against Waste.

Any complaint against waste should specifically address the three basic requirements for a cause of action in waste: a wrongful act or omission, committed by one lawfully in possession (unless the jurisdiction permits the plaintiff to bring a waste action against a stranger or trespasser), and permanent harm to the inheritance. The complaint should recite the source of the plaintiff's standing to sue, which is usually as the owner of the inheritance. Even under statutes which permit a waste action by "any aggrieved party," standing must be established by describing the plaintiff's interest in the damaged party, in order to show that the alleged conduct damaged that interest so as to render the plaintiff an aggrieved party.

When the action is brought under the authority of a state statute, the statutory criteria should be cited and addressed in the complaint. Likewise, if the action is based on allegedly wasteful conduct which has also breached the terms of a conveyance or agreement between the parties, those terms should be recited and the actions or omissions described which show how the terms have been breached.

If the alleged injury to premises is merely a change in the land or improvements that is not clearly harmful, or is even ostensibly beneficial (so-called ameliorative waste), the allegation of harm must be precise and to the point. The complaint should carefully state in what way the change causes permanent injury to the inheritance, despite benefit to the present possessory interest, or at least allege harm to the right of the plaintiff to obtain possession of the property in essentially the same condition as when the estate was created.

When recovery of money damages is sought, the types and amounts of damages should be stated with particularity, including any claim for recovery of costs or attorney fees authorized by statute or agreement. The statement of damage should also describe the measure of damage employed, such as diminution in property value or cost of restoration, as appropriate. If the prayer for relief will seek multiple damages, the complaint should state the statutory or other warrant for such a request and also specific allegations of willfull, wanton or malicious conduct by the defendant. A demand for multiple damages, even though authorized by statute, must be specifically stated.

When injunctive relief is sought, the usual foundational showing of irreparable damage and inadequate remedy at law should be stated in the complaint, along with the precise terms of the injunction sought. The extraordinary remedies of forfeiture and eviction from the premises may be requested if the statutory or other authority for such relief is stated in the complaint.

§ 70.13(d) Answers and Defenses in Response to Complaint for Waste.

In addition to denying the veracity or accuracy of specific factual allegations in the complaint, as appropriate, the defendant named in a waste action may challenge other aspects of the complaint that are essential to the plaintiff's success. Not all wrongful conduct or neglect on the premises constitutes waste; the alleged waste must result in permanent, material harm to the inheritance in order to be actionable as waste. Not all changes in the land or improvements are waste; they must be beyond the range of conduct accorded the present possessor in full enjoyment of the premises, and they must be shown to work a permanent, material change in character of or injury to the inheritance. Beneficial changes, in particular, will be protected from liability, if the defendant can show that they are in reasonable response to changes in the area surrounding the premises.

The defendant may also invoke other appropriate defenses, such as statute of limitation or laches, estoppel by plaintiff's acquiescence or permission, a conveyance to the defendant "without impeachment for waste," or some force beyond the defendant's control as the cause of the alleged damage.

If extraordinary relief in the form of multiple damages or forfeiture is sought, the defendant may show, as appropriate, that the damaging conduct was not wanton or malicious under the circumstances, and that forfeiture, under the circumstances, would be inequitable and contrary to the public policy which discourages forfeitures. Also a defendant threatened with forfeiture may try to show that only the portion of the premises actually damaged should be subject to forfeiture.

§ 70.13(e) Statute Authorizing Actions for Waste.

From almost its earliest common law origins, waste concepts have been expressed in statutory language. Even today in the United States, the large majority of states have statutes expressly conferring rights of action for waste. Drafters and amenders of such statutes should give attention to all the significant issues and policy choices implicit in the waste statutes of the various states. These issues may be stated as follows:

- Does a right of action for waste extend to permissive as well as voluntary or commissive waste? Does the waste provision in the statutes constitute the exclusive remedy for waste, or is a more general action in tort or breach of contract also available? If so, is there any special need for an explicit waste statute, such as provision for extraordinary remedies? Does the right of action for waste extend only to real property interests?

- Who are the potential plaintiffs in a waste action, only reversioners and remaindermen, or any aggrieved party? Is the plaintiff required to hold the next immediate estate of inheritance, or may there be intervening estates for life or years? May cotenants have rights against each other for waste? May wards have waste actions against guardians?

- Who are the potential defendants in a waste action, only the party who actually commits or permits waste, or any party with present possessory rights? Should a waste action be limited to defendants who are lawfully in possession of the premises, or may a stranger or trespasser also be a defendant? Should a right of action for waste extend to those whose possessory interests arise by law as well as those whose interests are created by conveyance?

- Should the statute include the extraordinary remedies of forfeiture and eviction? Should those remedies be available upon any showing of waste or only upon egregious conduct? Should forfeiture, if granted, apply to the entire possessory estate or only to the part of the premises actually damaged by waste?

- Should the waste statute express a duty of maintenance or repair imposed on possessors of land subject to future interests, the breach of which duty gives rise to a cause of action in waste?

Supp. To CHAPTER 70 WASTE

8-70 Thompson on Real Property, Thomas Editions Supp. to § 70.08

Supp. to § 70.08 Conduct Constituting Waste

[Go To Main]

§ 70.08(a) Change in the Land [Go To Main]

Add:

Barkacs v. Perkins, 2006 Ohio 469, P15 (Ohio Ct. App. 2006) (landlord had the right to enter the leased premises to prevent severe waste resulting from substantial damage caused by the lessee).

§ 70.08(a)(2) Change in the Improvements

Add:

Coleman v. Regions Bank, 2005 Ark. App. LEXIS 197 (Ark. Ct. App. 2005) (it was not waste when a tenant expanded its building by constructing an overpass, because the tenant's lease expressly granted permission to make alterations that would not injure the underlying real estate).

§ 70.08(b) Misuse or Neglect of Premises [Go To Main]

Add:

Grimes v. Saikley, 904 N.E.2d 183 (Ill. App. 2009) (action alleging that an estate administrator breached his duty to

protect the estate from waste, loss and embezzlement); *U.S. Bank Nat. Ass'n v. American Realty Trust, Inc., 275 S.W.3d 647 (Tex. App. 2009)* (borrower who breached promissory note did not commit waste, so as to permit recovery against the guarantor).

§ 70.08(b)(1) Neglect of Financial Obligations Pertaining to the Premises Generally

§ 70.08(b)(1)(i) Charges for Which the Tenant is Liable

Add:

Ward v. Brown, 2005 Fla. App. LEXIS 9374 (Fla. Dist. Ct. App. 2005) (lessees with a lease term for 99 years with automatic renewals for additional 99-year periods in perpetuity were virtual owners of the property responsible for payment of taxes).

§ 70.08(b)(2) Misuse or Neglect of the Land

Add new text and footnote 306.1 at the end of the subsection:

Use of dwellings for methamphetamine-related activities may constitute waste. n306.1

§ 70.08(b)(3) Misuse or Neglect of the Improvements

§ 70.08(b)(3)(i) The Duty of Repair

Add:

CedarBridge, LLC v. Eason, 293 S.W.3d 462 (Mo. App. 2009) (successful bidder at tax sale, who also collected rents from the properties' tenants, was subject to ejectment for waste).

Add:

In re 114 Tenth Ave. Ass'n, Inc. ___ B. R. ___ (S.D. N.Y. 2010) (debtor's negligent mismanagement could constitute waste).

§ 70.08(b)(3)(iii) When Liability Only for Negligence is Imposed

Add:

Harness v. Curtis, 2004 Ark. App. LEXIS 635 (Ark. Ct. App. 2004) (finding the lessee's unsightly presence of vehicles did not amount to waste, because it did not involve any destruction to the property).

§ 70.08(c) Removal of Resources from the Premises [Go To Main]

§ 70.08(c)(2) Removal of Soil and Minerals

Add:

Exxon Corp. v. Miesch, 180 S.W.3d 299 (Tex. App. 2005) (Exxon committed waste on property by plugging oil wells).

CHAPTER 71 REAL PROPERTY ISSUES IN WEATHER CONTROL

8-71 Thompson on Real Property, Thomas Editions § 71.01

AUTHOR: Late Professor Ray Jay Davis J. Reuben Clark Law School Brigham Young University

§ 71.01 Outline of the Chapter.

This chapter commences with analysis of the relationship between weather modification and property rights and values. It then considers relationships to the hydrologic cycle and to other atmospheric changes (§ 71.03, *infra*). This places weather modification in its environmental setting. In § 71.04, *infra*, the technology of cloud seeding is addressed through consideration of natural precipitation, weather modification techniques, data collection and reporting, and evaluation of results. Legal practice and procedure are covered in § 71.05, *infra*, with examination of arrangements for funding operations, water rights, and legal liabilities.

CHAPTER 71 REAL PROPERTY ISSUES IN WEATHER CONTROL

8-71 Thompson on Real Property, Thomas Editions § 71.02

AUTHOR: Late Professor Ray Jay Davis J. Reuben Clark Law School Brigham Young University

§ 71.02 Overview of Weather Resources Law.

[Go To Supp]

Development and use of technology for extensive surface and underground water resources management have been accompanied by changes in property rights and values and by interrelated growth of legal norms. The rise of modern weather resources management through initiation in the late 1940s of cloud seeding to enhance precipitation n1 has followed a similar pattern. During the past five decades, economics, property concepts, other legal norms, atmospheric science, and engineering have come together to form the shape of human weather control.

Neither weather modification capabilities nor weather resources law have been static; they have evolved with each other. Professional groups whose members have practiced weather modification have undertaken to express their views concerning human ability to alter the weather. n2 Their most recent statements indicate that much has been learned about methods to manipulate weather phenomena, but that ongoing research and continued learning from application of scientific principles will enhance their capabilities. Also it is clear that what has been learned about appropriate techniques in one geographic locale or climate regime does not necessarily transfer to different places and times. Effectiveness of currently developed technologies varies with the type of precipitation situation being treated. Cold ground fog dissipation over relatively small areas is now operational at a number of major airports; removal of warm fog is still in an experimental mode. Winter snowpack enhancement over mountainous areas can achieve 5-20% seasonal increases depending upon meteorological conditions. Evaluations of wintertime programs in more coastal environments indicate between 5 and 30% increases seasonally. Summer precipitation augmentation appears promising. Projects relying upon injection of seeding material directly into clouds meeting certain criteria generally indicate positive seeding effects on rainfall from the treated cloud and sometimes in area-wide rainfall. The scientific linkages involved in hail suppression are not well understood, but assessment of surface hail differences suggest reduction in the order of 20-50%. Correct placement and timing of seeding are of particular importance in hail suppression work. n3

The scientific and technological setting dominated the genesis of weather modification law during the first decade after the initial experiments in 1946. The dominant legal developments were in the judicial arena. Litigants sought either to enjoin seeding activities or to obtain damages for losses they asserted were caused by the weather modification activities. Although in none of the cases were claimants able to prove they were harmed by the seeding, in most of them

litigation had adverse effects upon the projects. The pattern for subsequent litigation was thus established. Plaintiffs have been unable to collect damages from cloud seeders or their sponsors because they have been unable to prove causation. But, by threatening to sue or actually bringing suit, opponents of weather modification projects often have been able to cause suspension of seeding activities. n4

During the decade from 1957 to 1966, legislatures got into the weather modification control act. Congress passed various appropriation laws which supplied funds for cloud seeding. It also enacted a requirement that persons conducting weather modification activities report them to the Department of Commerce. n5 The states commenced passing statutes and promulgating administrative regulations regulating weather control projects. At present two-thirds of the states have such legal rules requiring operational permits for projects and, in some cases, professional licenses for operators. n6 The bulk of the early laws came from the more arid states where there was more incentive to attempt precipitation enhancement than in comparatively well watered jurisdictions. The physical setting dominated the second decade of weather modification law.

The executive branch of government played the most significant role of official agencies during the golden decade of weather modification regulation, the third decade from 1966 to 1976. Administrative regulation, governmental support, and multi-jurisdictional agreements then were fashionable. But late in the 1970s the regulatory climate changed. Other than environmental regulation, during the years since then there has been less government involvement with weather control efforts -- less funding for research and operations, less invasive regulation, less litigation. The pace of legal development has slowed to a crawl. n7

CHAPTER 71 REAL PROPERTY ISSUES IN WEATHER CONTROL

8-71 Thompson on Real Property, Thomas Editions § 71.03

AUTHOR: Late Professor Ray Jay Davis J. Reuben Clark Law School Brigham Young University

§ 71.03 Relationships of Weather Resources Management and the Environment.

Weather resources management activities have impacts upon and are otherwise related to real property, the hydrologic cycle, and other atmospheric changes. These relationships and their legal consequences are addressed in this section.

§ 71.03(a) Real Property.

The connection between cloud seeding and real property involves both property rights and property values. Rights in and values of realty may be either expanded or diminished.

§ 71.03(a)(1) Property Rights.

Property rights can be affected by airspace intrusion above the surface of real property in order to carry out the cloud seeding operation and by impacts upon the surface of the land from either increases or decreases in precipitation resulting from the seeding. To the extent there is no legal responsibility for such acts, the seeder's conduct has altered the property rights of the landowner. If the landowner and the seeding project sponsor are not the same person, property rights of the landowner have been potentially decreased; if they are the same person, or if they have acted in concert, property rights potentially have been increased.

Sir Edward Coke, over three hundred years ago uttered the famous dictum that " *cujus est solum, ejus est usque ad coelum*." n8 Understood literally, this means that he who owns the soil also owns into the heavens. If this expansive notion of landownership rights ever really meant anything beyond rights immediately above the surface of the ground, it had to and has given way in light of the advent of aviation. The Restatement (Second) of Torts §159 (2) advances the proposition that "Flight by aircraft in the air space above the land of another is a trespass if, but only if, (a) it enters into the immediate reaches of the air space next to the land, and (b) it interferes substantially with the other's use and enjoyment of his land." n9 Flying aircraft and rockets and introducing seeding materials into the atmosphere should not usually amount to invasion of the real property interests of the owner of the land over which the cloud seeding activity takes place.

Impacts on the surface of land either within or outside the targeted seeding area can amount to an increase or a decrease in precipitation with consequent resulting hydrologic impacts -- floods or droughts. Both kinds of claims have been

litigated. Except for a case involving granting a temporary restraining order shutting down a hail suppression project alleged to have reduced precipitation over the plaintiffs' lands, the defendant cloud seeders and their sponsors have won all such lawsuits. n10 Their victories, however, have not been the result of court rulings about the property rights involved. Rather the litigation has favored weather modifiers because complainants have been unable to prove that they were harmed due to the cloud seeding. Lack of proof of causation, rather than a property rights decision has been the basis for each such decision. n11 Given sufficient proof of harm and connection between the conduct of the defendants and that harm, liability for impacts on the surface of realty will result and weather modification to that extent will not constitute a restriction on property interests. Such proof, though, will require evidence that will be difficult to produce. n12

§ 71.03(a)(2) Property Values.

Weather modification is practiced for economic gain. It is a profession and a business for cloud seeders. The size of the profession is quite small; around 150 people are members of the Weather Modification Association, the professional organization to which many cloud seeders belong. These meteorologists, climatologists, chemists, engineers, hydrologists, and other professionals make their livings from cloud seeding. The economics of the business are important to them. n13

Similarly, monetary considerations motivate sponsors for cloud seeding projects. If sponsors perceive that weather-related losses will be decreased, they will support such activities. Sponsors have included ski areas interested in increased snowfall, electric power companies anticipating runoff enhancement that will increase hydropower generation, cities concerned about municipal water supplies, farmers and ranchers worried about hail losses and hopeful for added rainfall, and other waterusers, developers, and managers wishing to tap the "rivers in the sky." The bottom line, the cost/benefit ratio, is critical to all such sponsors of weather resources management projects. If their property values are increased, their involvement continues. If they gain nothing, or are unable to perceive that they have gained anything, their support for weather modification stops. n14

Property owners do not share completely congruent weather interests. Alterations in natural weather may disadvantage some landholders through reduction or increase in the precipitation affecting their lands. As has been noted in the previous subsection, quantification of such disadvantages and proof of their causation will be very difficult. n15

Because unmodified weather events can have severe negative impacts on economic activity, the gross benefits from successful precipitation enhancement and hail suppression activities appear to be high. By comparison the operational costs of weather modification efforts are small. Studies based upon econometric models bear out such favorable cost/benefit ratios. n16 Such studies should, however, look beyond the immediate impacts upon stakeholders and consider the broader regional effects and weigh other means for enhancing water resources and minimizing the overall impacts of weather and climate. n17

§ 71.03(b) Hydrologic Cycle.

To scientists and engineers, the hydrologic cycle is a single system, one in which water moves from the atmosphere to the surface and underground and then back into the atmosphere again. Traditionally American law has viewed water resources in segments rather than in a uniform manner. Diffuse surface water, water in watercourses on the surface of the land, and underground water are treated differently in law. n18 The ability to harvest atmospheric water now adds another facet to hydrologic management, one that is related to surface and ground water as another portion of the same hydrologic cycle. However, in the same fashion that physical connection has not resulted in integration of other water law, similarly the relationship has not resulted in atmospheric water resources law simply following the prior legal patterns for surface and ground water. In the eyes of the law, it is as different from them as they are different from each other.

§ 71.03(b)(1) Surface Water.

In spite of efforts to encourage uniformity among state water rights laws, n19 each jurisdiction has its own legal system. There are some commonalities which have provided models for atmospheric water resources law. Administrative permits are now required in most states to obtain surface water rights. n20 Permits, but not necessarily from the same agencies, are required under weather modification legislation in order to mount a project. n21 Reasonable and beneficial use are measures of the extent of surface water rights. n22 Comparisons among cloud seeding plans are authorized under permit legislation in order to judge the appropriateness of the projected activity. n23 Water, whether on the surface or in the atmosphere, is regarded as a renewable resource the development of which is subject to the public interest.

§ 71.03(b)(2) Ground Water.

Ground water, like water on the surface, is governed by a non-uniform legal system. Persons who drill wells and also the installation of the wells are regulated; professional well drillers need permits to practice their trade; development of the resource by drilling a well also requires administrative consent. n24 In those states that require both a weather modifier's license and an operational permit, there is a parallel system of dual regulation. n25 Substantive legal requirements that must be met to obtain a well drilling permit vary depending upon whether the state follows a reasonable use approach, prior appropriation, or correlative rights. n26 Substantive requirements imposed upon cloud seeding project permit applicants are much more uniform and appear to have little connection with what sort of ground water doctrine is followed in the jurisdiction. n27

§ 71.03(c) Other Atmospheric Changes.

In addition to cloud seeding intended to enhance precipitation, there are other human-induced changes in the atmosphere. Law relating to them often can be applied to intended weather resources management or at least may be useful as a basis for comparison with intended weather modification law. Among the other atmospheric changes for which there are legal norms are severe weather modification -- suppression of fog and hail and mitigation of tropical storms, air pollution, acid precipitation, unintended weather modification caused by the urban heat island effect, stratospheric ozone depletion, and global climate change.

§ 71.03(c)(1) Severe Weather Modification.

§ 71.03(c)(1)(i) Fog.

The earliest cloud seeding performed outside a laboratory was in essence fog seeding by a team of General Electric Company scientists lead by Vincent Schaefer. In November 1946, they flew an aircraft above a cloud bank and dispensed dry ice particles into it. Early photographs of cloud seeding show a racetrack-like cut in the fog bank below from seeding aircraft following such a course. n28 Subsequently different seeding materials and different operational techniques have been used to treat cold fog (fog at temperatures below freezing) with similar visible results. No sophisticated statistical design is required to demonstrate the effectiveness of the operations. n29 By keeping airports open when they otherwise would be closed to flights, cold fog clearance has some obvious benefits -- travellers who are not delayed, airlines who do not have to assist passengers, and airports that can maintain a smoother flow of traffic than otherwise. n30

Cold fog dispersal through seeding enhances visibility by causing fallout from clouds of ice particles. It has been hypothesized that aggregation of these particles on the ground could slicken roadways and be implicated in motor vehicle accidents. n31 There are, however, no reported legal actions involving collisions of that sort. Cold fog dissipation is a technology with so little downside that most permitting laws exempt such activities from obtaining administrative consent to operate. n32

Warm fog (fog above freezing temperatures) has proven to be a more difficult nut to crack than cold fog. The principles of seeding with hygroscopic materials (those that take up moisture such as salt) are well understood, but the manner and location of the seeding and the size distribution of the seeding agents are both critical and hard to specify in individual cases. Some hygroscopic materials are corrosive, but others (such as urea/ammonium nitrate) may be either benign or even beneficial as a fertilizer. n33 Warm fog treatment has been neither the subject of litigation nor of regulation.

§ 71.03(c)(1)(ii) Hail.

Hail suppression has been the most controversial form of weather modification. It is the subject of a current ongoing dispute between agencies of the states of North Dakota and Montana, n34 it has resulted in permitting and liability disputes in Texas, n35 it led to violence in Colorado, n36 and it has caused a long-lasting negative image of weather modification in the tri-state area of Pennsylvania, West Virginia, and Maryland with resulting legal restrictions on weather modification activities in those jurisdictions. n37 The source of the controversy is the belief that hail suppression diminishes overall precipitation if it is successful and may backfire causing more severe losses if it is not successful. Studies show such concerns unfounded, n38 large scale hail suppression is still practiced in the "hail alley" portions of the High Plains states, n39 and research and development of seeding techniques continue, but more research is needed, including obtaining a better understanding of hail embryo origin and growth and of hailstorm structure and dynamics. n40

Hail poses a considerable problem for crops and also causes property damage. Crop hail insurance rates have responded to hail suppression projects by rate reductions. n41 There also is evidence that increased precipitation may result from hail suppression seeding. n42 State and provincial funds are paying for operational hail suppression activities in North Dakota n43 and Alberta, n44 and there are widespread hail suppression projects in Europe, Africa, and South America. n45

§ 71.03(c)(1)(iii) Tropical Storms.

Hurricanes devastating large portions of many states have increased American concern with the awesome power of such tropical storms and their potential for causing loss of life and property damage. The possibility that cloud seeding could alter the composition, dynamics, and structure of hurricanes led early researchers to seed a hurricane. As such storms often do, it changed course. Concern over possible legal liability should such a storm come over land after altering its direction led private researchers on advice of legal counsel to get out of the hurricane seeding business. n46 Development of the technology was taken up by the United States Navy in cooperation with the Department of Commerce. They did some seeding in the Atlantic, but protected themselves by tight criteria concerning the direction and speed of the storms. In fact the criteria was so tight they could not often seed and sought to shift their operations to the Pacific and Indian Oceans. Their work never materialized because downwind countries were unwilling to go along with the American plans unless they were assured that the United States would hold them harmless from any resulting losses -- something that our negotiators were unable and unwilling to do. n47 Potential liability from treatment of such large tropical disturbances is just simply too great even for the United States to assume.

§ 71.03(c)(2) Air Pollution.

There is one superficial commonality between weather modification and air pollution: they both involve atmospheric emissions. The differences, though, are far greater than the similarities. Cloud seeding is intentional both in the sense that the acts involved in cloud seeding are intended and the consequences hoped for also are intended -- changes in the composition, dynamics, behavior, and movements of the atmosphere in order to alter precipitation. Pollution results generally from intentional conduct which is not designed to produce any particular consequences. In fact polluters usually are simply uninterested in the atmospheric consequences of their emissions.

Another and far more important difference is in the extent of the emissions. Pollutants are measured in tons. Weather

modification agents are used so sparingly that even corrosive or toxic materials are so diluted that it becomes difficult to detect their presence in the atmosphere, on the ground, or in runoff from a seeded target area. Reports from 1991 indicate that 19,561 kilograms of dry ice was used throughout the United States, but only 739 kilograms of silver iodide, and 5,342 gallons of liquid propane. n48 These amounts spread throughout the nation during a total of 1,115 weather modification days are indeed very dilute. n49

The Clean Air Act n50 and state air quality implementation plans based upon it have not dealt with such insignificant matters when there are really serious pollution concerns to attack. Neither have there been air pollution nuisance or trespass cases filed against weather modifiers or their sponsors.

§ 71.03(c)(3) Acid Precipitation.

Acidification of precipitation has been recognized as a serious problem in forests and lakes. Sulphur in the atmosphere due to coal combustion and other manmade causes is no longer being ignored. At the state, federal, and international level legal norms are now in place that are designed to reduce this environmental disaster. States have filed lawsuits against each other to force reductions in sulphur emissions, n51 the Environmental Protection Agency has required consideration of acid rain in state clean air plans, n52 the United States and Canada have negotiated an acid rain abatement agreement. n53 Although cloud seeding and acid precipitation are in most respects dissimilar, both involve the atmosphere and legal responses to acid rain which are illustrative of legal norms that can be directed toward artificially induced precipitation. There could be interstate litigation, n54 federal intervention, n55 and international agreement n56 patterned on the acid rain precedent.

§ 71.03(c)(4) Urban Weather Anomaly.

In addition to intentionally modifying the weather, human activities inadvertently modify weather. It has been long on record that urban areas are warmer than adjacent rural areas. English and French data going back at least two centuries demonstrate this fact. n57 It is now known that urbanization results in both localized and regional weather changes. For example, major cities with populations in excess of 1 million located in continental climates influence warm season clouds and increase precipitation by 10 to 20%, with a lesser impact on cold season precipitation. Urbanization affects not only cloud and precipitation processes, but also air quality, visibility, surface and low-level winds, humidities, and temperatures. In addition, agricultural activities such as cropping and irrigation practices, and industrial activities can modify local and sometimes regional weather conditions. n58

The relationship of inadvertent to intended weather modification is significant. There really is no such thing as "natural" weather, at least not in and around cities and agricultural areas and along transportation corridors. Neither losses nor benefits from weather events can be attributed readily to intended weather modification when there are probable inputs from such things as the urban weather anomaly. Evaluation is made even more difficult by inadvertent cloud seeding.

§ 71.03(c)(5) Stratospheric Ozone Depletion.

Emission of cholorfluorocarbons (CFCs) used in refrigerants and sprays has diminished the stratospheric ozone layer, the high level protection of the earth, from harmful solar radiation. n59 It is thought that among the adverse impacts of this ozone depletion is an increase in skin cancer incidence. n60 In response, the international community, acting through the United Nations, has taken steps toward regulation of CFC production and use. The 1985 Vienna Convention for the Protection of the Ozone Layer provided a framework for later negotiations. n61 In 1987 the Montreal Protocol placed limits on the consumption and use of CFCs in order to achieve a 50% reduction by developed nations in CFCs by 1998. The 1990 Clean Air Act was the response of the United States to its new international obligation. It provides for monitoring production and trade in ozone depleting substances, establishes a schedule (consistent with the Montreal Protocol) for phasing out CFC production and consumption, prohibits persons servicing, maintaining, or disposing of appliances from venting CFCs into the atmosphere, and encourages development of safer refrigerants. n62

International and national legal responses to stratospheric ozone depletion demonstrate the ability of the international and federal community to act when science shows that activities affecting the atmosphere require regulation. Scientists persuaded policy makers that a problem required their prompt attention. Thus far weather modification has not triggered such scientific concern. But should it do so, the ozone precedent is there.

§ 71.03(c)(6) Global Climate Change.

Global climate change is an additional type of anthropogenic atmospheric alteration. Scientific consensus is considerably less complete on climate change than it is concerning ozone depletion, acid rain, unintended weather change, or air pollution. n63 But there is sufficient evidence to convince many reputable (and, what is more important, influential) scientists that the greenhouse effect from world-wide emissions of certain trace gases into the atmosphere is responsible for global warming. They in turn have been able to convince lawmakers throughout the world to take steps to do something to stem the warming tide. n64 Congress has established the National Climate Program to help us "understand and respond to natural and man-induced climate processes and their implications." n65 The Global Change Research Act of 1990 was aimed at supporting research and development of technologies useful for reducing energy consumption, encouraging using renewable energy sources, and other techniques to reduce greenhouse gas emissions. n66 At the United Nations Conference on the Environment and Economic Development in Rio de Janeiro during the summer of 1992, the assembled delegates adopted a climate change convention which formally recognized the nature of the problem and proposed some non-binding national actions to cope with it. n67 This response was less than that of the ozone convention at least in part because of the different levels of scientific consensus about causes and cures and also partly due to economic considerations. The costs of shifting from coal which produces CO_2, a greenhouse gas, are very large compared with the costs of shifting from CFCs.

Weather is a short term phenomenon, one which is relatively localized. Climate is long term, an atmospheric parameter which is widespread. But both phenomena are part of our atmosphere. Laws relating to the one can logically be considered in dealing with the other. The hydrologic consequences of climate change give rise to concern about it. Likewise the hydrologic impacts of weather modification have been considered in assessing the extent to which it should be regulated. Floods and droughts have been the subject of litigation and are appropriate factors to be weighed by administrators in issuing or denying weather modification permits.

> Human activities have been proven to increase precipitation and severe storms in urban areas, because of a combination of pollution, the urban heat island, higher metropolitan area humidity, and the mechanical effect of built-up areas. Each city has unique conditions, and urban-induced weather changes are variable. Governmental policy concerning unintended effects on weather can be implemented by law in three different approaches: (1) applying existing law to new weather parameters; (2) adapting to modified weather; and (3) making and enforcing new laws identifying causal factors as agents of inadvertent weather change. These legal approaches to urban-induced weather alteration can exist in tandem.

CHAPTER 71 REAL PROPERTY ISSUES IN WEATHER CONTROL

8-71 Thompson on Real Property, Thomas Editions § 71.04

AUTHOR: Late Professor Ray Jay Davis J. Reuben Clark Law School Brigham Young University

§ 71.04 Weather Resources Management Technology.

A precondition to effective weather resources management is understanding the natural precipitation processes. Weather modification technology seeks to manipulate those processes. This section considers such natural weather processes and then looks at cloud seeding agents and techniques used to enhance precipitation. It looks at the legal aspects of mounting a cloud seeding project and considers requirements about data collection, reporting, and evaluating such projects.

§ 71.04(a) Natural Precipitation Processes.

Natural precipitation processes involve two successive stages: cloud formation and precipitation formation.

§ 71.04(a)(1) Cloud Formation.

Often under drought conditions there are calls for undertaking weather modification projects, and when weather conditions provide normal or abundant precipitation, according to one prominent atmospheric scientist, "interest in weather modification is soluble in a drop of water." n68 But droughts are unlikely times for successful cloud seeding and more normal weather may provide greater opportunities to seed successfully. In order to achieve success, there must be the right sort of clouds to treat. Without them nothing can be done.

Clouds form when there is adequate water vapor in the atmosphere, some cooling mechanism to bring air parcels to saturation and beyond, and sufficient aerosol particles to act as nuclei upon which condensation of the water vapor into cloud droplets can start. n69 A common mechanism for cooling air parcels to saturation is their expansion as they rise to higher altitudes due to updrafts in cumulus clouds, lifting by winds flowing into low atmospheric pressure areas, or upward movement due to meeting rising terrain. Fog and low stratus clouds are formed by radiation cooling. The quantity of precipitation that a cloud can produce depends on the nature of the updraft, its intensity, extent, and longevity. Most of the microscopic aerosol particles serving as cloud condensation nuclei either are ammonium sulfate in continental air masses or sea salts in maritime air. n70

§ 71.04(a)(2) Precipitation Formation.

Unless cloud droplets become part of the precipitation process, they readily will evaporate and not fall to earth. They are extremely small. A typical raindrop is between one million and ten million times the size of a cloud droplet. Hence there must be another atmospheric physics process which converts such droplets into precipitation. In some maritime clouds, where a few droplets are larger initially than others, collisions and the consequent coalescence of a relatively few of the larger droplets helps them grow enough to sweep sufficient nearby droplets so they can become rain drops. n71

Most precipitation subjected to weather modification is produced through a process different from the all-water one. It is the product of an ice-crystal process in clouds that have been cooled below the normal zero degrees celsius freezing temperature. This so-called supercooled liquid water freezes when it touches ice. There must be present in clouds using the ice-crystal process sufficient ice-forming nuclei (small particles between. 00002 and. 00001 inches in diameter) onto which the droplets will freeze. Concentrations of such nuclei vary by more than a factor of a thousand within the supercooled parts of clouds. Their effectiveness depends both upon appropriate temperatures and the moisture conditions in the cloud. If sufficient crystals are nucleated in a supercooled cloud, water from a large number of cloud droplets will be transferred to the crystals. Thereupon the crystals will grow large enough to fall, collide with each other or with cloud droplets, grow, and form snowflakes. Temperatures at lower altitudes determine the form of precipitation reaching the ground. n72

Cloud seeding tries to encourage the natural precipitation process, to enhance its efficiency. The idea is to trigger precipitation when it otherwise would not be produced. Cloud seeding imitates the precipitation formation process.

§ 71.04(b) Agents Used for Precipitation Alteration.

Clouds are seeded by introducing certain chemicals into the atmosphere. Among those agents which have been used for precipitation alteration are salt, urea, ammonium nitrate, liquid nitrogen, lead iodide, silver iodide, carbon dioxide, and propane. Carbon dioxide and silver iodide were the first two used and remain the most widely employed in the United States. Propane is also now being used at some airports. It depends upon rapid expansion of the compressed gas to cool the air enough to form ice crystals. n73

§ 71.04(b)(1) Carbon Dioxide.

Production of ice crystals in a cloud can be enhanced by introducing into it a coolant such as dry ice (CO_2). Vincent Schaefer discovered that by inserting carbon dioxide into a laboratory cold box water vapor in the box would be converted into ice crystals. He used crushed CO_2 in the first cloud seeding flights. n74 Next to silver iodide, CO_2 is currently being used in the greatest number of weather modification projects.

§ 71.04(b)(2) Silver Iodide.

Bernard Vonnegut, a colleague of Schaefer's at General Electric Laboratories, pioneered use of silver iodide as a cloud seeding agent. His concept was that augmentation of natural ice crystals in a cloud with an agent that had a molecular structure similar to ice would cause cloud droplets to freeze onto it and initiate the precipitation process. From testing various substances, he discovered that silver iodide was the most effective artificial nucleus of them all. n75 Chemists have devised various silver iodide compounds in an effort to discover which is the most effective of them.

§ 71.04(c) Artificial Nucleation.

There are two approaches to conversion of supercooled liquid water in clouds into precipitation: static seeding and dynamic seeding. The static seeding strategy is to add to an insufficient number of natural ice-freezing nuclei so sufficient ice crystals will grow, fall out, and yield a maximum amount of precipitation. The seeder must identify those clouds that contain substantial supercooled liquid water but that without seeding will not be part of the precipitation process. If too many ice crystals are nucleated, competition for available cloud water may keep them from getting sufficiently large to interact with one another or with cloud droplets. n76

Dynamic seeding depends upon introduction of large enough quantities of artificial ice nuclei or coolant to cause rapid glaciation of the cloud. The resultant latent heat release from the vapor deposition growth of ice crystals and/or freezing of supercooled drops will then increase the cloud's buoyancy. Updrafts within the cloud are then extended to greater heights, air parcels are cooled to lower temperatures, and more water is condensed from the cloud. This technique is used primarily with wet cumulus clouds. The challenge is to identify the appropriate clouds. n77

In order to conduct a cloud seeding operation properly, it has been recommended that the following actions must take place:

1. Identification of a suitable seeding situation;

2. Reliable production of an appropriate cloud seeding agent;

3. Successful placement of the seeding agent in the supercooled parts of the cloud mass;

4. Availability within the cloud of sufficient supercooled liquid and cloud vapor, and adequate time before evaporation of the cloud so precipitation size particles can be produced; and

5. Eventual fallout to the ground of the precipitation before it evaporates, sublimates, or moves out of the desired target area. n78

§ 71.04(d) Materials Delivery.

Because of the significance to correct targeting, delivery of the seeding agent to the proper place in the cloud at the appropriate time is critical. There are various methods of delivery of materials from the ground and from the air. Propane is dispensed under high pressure from the ground. Carbon dioxide is dispensed from aircraft flying above the clouds as in the case of the first General Electric seeding, or a plane flying through the clouds. Penetrating clouds into the liquid supercooled water parcels is hazardous flying because of icing conditions. Silver iodide is normally dispensed in a smoke form by burning it in an acetone mixture either in a generator on the ground relying on updrafts to take the material into place, or by carrying generators aloft in planes. Also, flares can be dropped from planes, rockets can boost the silver iodide into place, or artillery has been used. n79 Aircraft are expensive to operate and there are crew safety concerns. Although rockets and guns have appealed to Europeans, n80 they have not to American cloud seeders. Ground-based generators must be correctly placed and turned on at the appropriate time. Meteorological conditions will determine whether the seeding agent arrives when and where it should in sufficient quantities to do the job correctly.

§ 71.04(e) Mounting a Project.

Mounting a weather modification project calls for skilled personnel who are knowledgeable in meteorology, cloud physics, cloud seeding techniques, and project management. They must enter into a cloud seeding contract with a sponsor and comply with applicable legal requirements.

§ 71.04(e)(1) Sponsorship Contracts.

Weather resources management usually involves a sponsoring organization and a professional cloud seeding organization. Their relationship is governing by contract between them. Usual terms include promises by the cloud seeder or the sponsor to secure the proper permit from the state government. n81 The seeder is to provide forecasting and meteorological services in order to ascertain proper seeding times. Delivery systems are agreed upon; they often are a mix between ground-based and aircraft seeding. The use of radar to determine when and where to seed and to help evaluate results is stipulated in the agreement. Other instrumentation, particularly in research contracts, may be called

for. The cloud seeder will undertake to keep records which will include cloud seeding data, weather information, and hydrologic data. A cloud seeding plan will be set forth and the cloud seeder will agree to seed with the established plan, to suspend seeding under certain meteorological conditions in order not to exacerbate a severe weather situation or to be perceived as doing so, to operate during the agreed upon cloud seeding season and within the prescribed operational area in an effort to effect results in a target area, and to report on all of this to the sponsor. Usually contracts require the operator to carry legal liability insurance. In return for the services of the weather modifier, the sponsor will promise to pay the required fee. n82

In their relationships with clients, weather modifiers must comply with professional ethical standards. They are not to sell their services through exaggeration of their capabilities or guaranteeing specific results. Their claims of capabilities should be kept within the bounds established by professional capability statements. n83 Also it is not proper for operators to enter into contingent fee contracts. They are not allowed to enter into agreements paying them a bonus for production of precipitation over certain contractually agreed levels. n84

§ 71.04(e)(2) Environmental Regulation.

Because weather modification takes place in the atmosphere and is intended to alter the environment, it is a natural for environmentally motivated regulation. Projected changes in snowpack depth, as an illustration of such environmental quality concerns, caused a Montana environmental organization to seek an injunction restraining seeding. n85 In mounting a project, seeders and their sponsors must conform to environmental laws and administrative rules. If they do not do so, their weather control activities can be enjoined.

State laws requiring a permit as a condition of operations, can serve environmental ends. Regulators can inquire whether the project is environmentally proper and, if it is, either call for a change in the operational plan or deny the permit. Environmental organizations frequently participate in permit hearings. Both through visitation of projects and consideration of required reports regulators can determine whether environmental requirements established in permits have been complied with. n86

When the federal government sponsors a cloud seeding project, there is a possibility that an environmental impact statement process may be required. The National Environmental Policy Act of 1969 mandates that federal agencies seeking to operate projects which have a "significant" impact upon the "quality of the human environment" file a "detailed" Environmental Impact Statement (EIS). n87 The process involves conducting an environmental assessment to determine if there will be such significant impact. If not, a statement to that effect is filed. If there will be, data from the assessment is used to prepare a draft EIS which is widely circulated to obtain responses from stakeholder groups. Hearings may be held to attract comments. The agency then considers the input received and prepares a final EIS which is filed with the appropriate federal agency. n88 Environmental impact statements must be complete or else the challengers of a project may be able to have a court enjoin launching the proposed action. n89

The National Environmental Policy Act requires statements to contain:

1. The environmental impact of the proposed action;

2. Any adverse environmental effects which cannot be avoided should the proposal be implemented;

3. Alternatives to the proposed action;

4. The relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity; and

5. Any irreversible and irretrievable commitments of resources which would be involved in the proposed

action should it be implemented. n90

Production of that sort of information adds to the costs of mounting a project. The process can be simplified by borrowing from other EIS's prepared for similar projects using federal funds. Studies of environmental issues have been made under government sponsorship. n91 These too can be used. Of course caution must be taken in using generic studies because conditions and projects vary from location to location.

Snowpack augmentation in or affecting wilderness areas also has given rise to legal difficulties. The Wilderness Act of 1964 set up the Wilderness System, units of which are included by congressional action placing them in the system. n92 In such wilderness areas, many of which because of their high mountain locations are prime target areas for maximum enhancement of snowpack, certain activities are banned on the ground that they are inconsistent with wilderness values. It is more efficient to use motorized equipment to install and service generators and instrumentation than it is to walk into the areas. Yet some federal officials have interpreted the Wilderness Act to ban such weather modification related activities. n93

§ 71.04(e)(3) Federal Aviation Administration Regulation.

Operation of cloud seeding aircraft is subject to regulation by the Federal Aviation Administration. In some countries, regulation by the civil aviation authorities has been an effective means for controlling cloud seeding activities. n94 In the United States, FAA regulation has come into play in three areas: airworthiness certification of seeding aircraft, flight regulation, and carrying hazardous substances. A cloud seeding aircraft must be specially equipped for its weather modification missions. Flare racks and/or cloud seeding generators must be mounted, and cloud physics instrumentation usually also is added in addition to normal flight instruments. These modifications must meet with FAA approval to be given airworthiness certification. n95 Flight control for carrying out weather modification missions is most effective when carried out from project radar operators and controllers on the ground. This must be integrated with normal FAA flight control. The agency has usually been very cooperative with weather modifiers and has allowed them latitude in directing their cloud seeding pilots. n96 The hazardous substances regulations of the FAA deal with explosives and combustibles -- an apt description of flares and burning generators. It has been necessary for operators to secure FAA waivers to carry out their flights. n97

Pilots are taught to avoid severe weather, to stay away from clouds which contain supercooled liquid water which might cause them icing problems. Weather modification ground controllers for cloud seeding flights might well direct their pilots to enter clouds in places where experience has taught the pilots that the ride will be a rough one. It is clear from operational weather resources management projects that pilots have the final word on their safety. It also is clear that they may be asked to do flight segments that in another context they would not undertake. Many American weather modification pilots have been trained at a special weather modification pilot training course offered at North Dakota University where they are taught how to seed and why they must comply with instructions from project directors when it is safe to do so. n98

§ 71.04(f) Data Collection and Reporting.

Weather resources management depends upon data collection by the operator so he can know what it is that he is doing and reporting to the sponsor, the state, and the federal government so they too can be aware of what activities are taking place.

§ 71.04(f)(1) Keeping Logs and Records.

Weather modifiers often have had prior experience as practicing meteorologists, engineers, or aircraft pilots. Training in all of those professions includes teaching practitioners to keep logs and records. Consequently, it was natural that cloud seeders follow their own earlier practices in the new setting. Without contractual or legal compulsion, they would

maintain records. Also there is among cloud seeders a healthy interest in knowing what they are doing, something that can be accomplished only if accurate records are kept.

Information is the life blood of effective administrative regulation. It can be collected either by government personnel going on the site and collecting it or by requiring keeping and submitting logs and records to the regulator. Information gathering by the cloud seeder is less expensive and less intrusive than exercise of the visitorial power. Even in those jurisdictions with statutory authority to monitor projects by on-site inspections, n99 the visitorial power has been used merely as an adjunct to police the record keeping requirement. n100

In addition to effective regulation, public awareness of what is happening in a regulated industry and how well public control of it is working is dependent upon having information through operator logs and other records. Sponsors as well need such information to be able to ascertain whether contractual obligations have been met by operators.

Federal regulations mandate keeping logs and records. Operators must maintain a chronological daily log which shall include the file number assigned to the project, the designation of each unit of weather modification apparatus, and the following information:

1. Date of the activity;

2. Position of each item of weather modification equipment during the activity;

3. Time when the seeding began and ended;

4. Duration of operation of each unit of weather modification apparatus;

5. Type of each cloud seeding agent used;

6. Rate of seeding agent dispersal;

7. Total amount of each agent employed; and

8. Number of days on which weather modification activities were conducted, segregated by the predominant types of weather phenomena. n101 Additional meteorological and seeding information applicable to specific types of seeding equipment must be recorded, but need not be a part of the daily logs -- who operated the equipment, the altitude and type of weather treated, release points and temperatures at them, aircraft identification numbers and names and addresses of crew members and pilots, descriptions of weather phenomena such as clouds, hail, rain, humidity, and temperature, and all measurements of precipitation made in target and control areas. n102

State rules for keeping logs and records are similar. In some cases they simply require operators to keep the data mandated by federal law. n103

§ 71.04(f)(2) Reporting.

Cloud seeders make reports to their sponsors, to state regulatory officials, and to the National Oceanic and Atmospheric Administration, an agency of the United State Department of Commerce.

§ 71.04(f)(2)(i) To Sponsor.

Usually by contract operators of weather control projects are required to report periodically to their sponsors. And,

whether it is required by contract or not, feedback to sponsors is essential to contract renewal. The timing and contents of such reporting depend upon contractual requirements and the nature of the relationship between the parties. Some contractor reports are rather complete. They have not only information about the seeding but also provide some assessment of the seeding effects. n104 Others are less formal, but even word of mouth reporting is better than no feedback to the persons or entities paying for the seeding.

§ 71.04(f)(2)(ii) To State.

State regulators either mandate periodic reporting of information from logs and records or require submission of copies to the state of the reports provided to the federal government. n105 It is through such reports that the state agencies are able to determine whether seeding has remained within the parameters prescribed in the operational plans for which cloud seeding permits were issued, and such reports are important information relied upon to help decision making concerning permit extensions or reissuance.

§ 71.04(f)(2)(iii) To the National Oceanic and Atmospheric Administration.

Unlike the states which have undertaken regulation of cloud seeding activities through permit systems, the federal government has declined repeated invitations to assume control over weather modification and weather modifiers. Rather it has financially underwritten research and development n106 and has instituted a reporting requirement. Public Law 92-205, n107 enacted in 1971, authorized the Commerce Department to promulgate rules requiring reporting to it of weather modification activities in the United States by non-federal cloud seeders. Federal agencies by agreement also report their projects. n108 The Department of Commerce delegated the enforcement of the law to the National Oceanic and Atmospheric Administration (NOAA), the federal agency that deals with climate and weather, and NOAA promulgated a set of reporting rules.

NOAA reporting rules apply to fog dispersal and precipitation enhancement activities and to hail suppression. They do not, however, apply to farm frost suppression efforts or to "activities of purely local nature that can reasonably be expected not to modify the weather outside of the area of operation." n109 At the start of an operation, initial reports are required; n110 thereafter by October 1 of each year there must be an interim report, n111 and, upon completion of a project, a final report must be filed. n112 The information required is substantially the same as that which must be present in logs and records. n113 What is not required, however, is any evaluation of the results of the seeding.

Periodically, usually each year, NOAA makes a public report of its compilation of information from the reports it receives. This now is being done through publication in the Journal of Weather Modification, the professional journal of the Weather Modification Association. n114 NOAA also reports the information received to the World Meteorological Organization which maintains a register of seeding projects throughout the world and publishes it from time-to-time. n115 Additionally NOAA provides information about seeding in American states along the Canadian border to Canada in accordance with an executive agreement between the United States and Canada. n116

§ 71.04(g) Evaluation.

Evaluation of the effectiveness of weather modification technology is both difficult and controversial. Evaluation requires data, analysis, and conclusions. There have been both physical and statistical analyses. Both will be discussed.

§ 71.04(g)(1) Physical Evaluation.

Sponsors of weather modification projects may be perfectly satisfied if there is ample water in reservoirs for hydropower generation, sufficient snow on the slopes to attract skiers, bounteous well-water crops, and adequate supplies for municipal needs. They continue their support of projects on the basis of such satisfaction. But, when they perceive that their economic needs are not being met, they may withdraw financial backing for the project. n117 In neither instance, that of sufficient precipitation or that of lacking rain, snowfall, and runoff, does it follow that the

weather regime would have been any different but for the cloud seeding. They are not comparing what would have happened if there had been no seeding (something contrary to fact) with what did in fact take place. Their only physical evaluation is based upon data (which may be inadequate) about events subsequent to the actual seeding. That simply does not establish enough to determine the efficacy of the treatment. It is, as it were, a "black box" approach, one focusing upon the ends and not the means.

Scientists, engineers, informed sponsors, and lawyers need a great amount of data to make intelligent conclusions about the consequences of particular cloud seeding activities. The data called for include information about the seeding activity in order to determine whether, given the meteorological conditions at the time and the seeding hypothesis, there is relatively strong scientific certainty that the natural precipitation processes were altered and the extent to which that transformation happened. This data includes information about temperatures, winds, concentrations of supercooled liquid water, extent to which ice crystal nuclei were present, extent to which artificial nuclei were introduced into the air mass (targeting the seeding material), and the like. Acquisition of this meteorological and cloud physics information requires sophisticated instrumentation. n118 Radar readouts before, during, and after seeding are needed too.

Physical data from the ground include that which can be obtained through snow courses and snow pillows to determine the nature of the snowfall and snowpack, rain gauges in sufficiently dense array, and stream gauges in the runoff areas to determine water flows. Reliance upon government instrumentation put in place by the United States Geologic Survey and NOAA is not usually adequate because their instrumentation is not dense enough to provide the details needed for reliable physical evaluation.

Historical data from the area targeted for treatment and from other areas that are geographically and meteorologically similar to the target area provides a basis for comparison with actual information about meteorological and hydrological conditions in the target area during and after seeding activities. It is unlikely this will be very complete, but any such data to use for comparisons with what happened in the seeded zone will add confidence in the physical evaluation and enhance credibility of the findings. n119

§ 71.04(g)(2) Statistical Evaluation.

Because of the inadequacies of even the most careful physical evaluation, weather modification research projects and some operational activities also use statistical evaluation, computer models, and mathematical analyses. Statisticians took exception to early physical evaluations of weather modification projects. n120 Their objections were well-founded. Research projects today are based upon pre-planned seeding activities that fit within a carefully drawn statistical format. Researchers also rely upon cloud and cloud seeding models to ascertain possible results from weather modification activities. Computers also make possible analysis of the vast amount of physical data acquired as part of research efforts. n121

Planning to attain maximum information for statistical analysis involves trade-offs. A plan can call for seeding only on a randomized basis, for foregoing seeding opportunities in order to compare data between seeded and unseeded events. Sponsors usually would prefer to seed whenever meteorological conditions are ripe for success and safe for the environment. They trade water (or at least the chance of getting it on the ground) for information. Researchers are not driven as much by the need to produce physical results and commonly use seeding protocols calling for randomized seeding and cross-over targeting -- all of which are compared with historical data from target and comparable "control" areas as well as actual measurements taken in conjunction with the experiment. After several seasons -- the length of time in part depends upon the number of seeded cases -- analysis of the statistics can give researchers some confidence in their reports of results and capabilities. n122

Operational cloud seeding in several states is being conducted with NOAA assistance in evaluation. Efforts to obtain further information about the effects of seeding are "piggy-backed" on the weather resources management projects. In essence a compromise is struck between getting all that is thought possible out of the seeding project in terms of hail

suppression or precipitation enhancement and learning more about the cloud seeding process and its impacts. In a time of limited funding for weather modification, such state-federal cooperation makes economic sense. n123

FOOTNOTES:

(n1)Footnote 68. Dr. Archie Kahan, long-time head of the Bureau of Reclamation atmospheric water resources development group, was fond of this wry remark which he regularly brought out with other salient comments on public interest or lack thereof in cloud seeding. Project Skywater, the program he directed for the Bureau was from time-to-time called upon with requests for emergency drought relief seeding and also was cut back when there appeared to be a good water year in the offing.

CHAPTER 71 REAL PROPERTY ISSUES IN WEATHER CONTROL

8-71 Thompson on Real Property, Thomas Editions § 71.05

AUTHOR: Late Professor Ray Jay Davis J. Reuben Clark Law School Brigham Young University

§ 71.05 Practice and Procedure.

The lawyer practicing weather modification law is most likely to encounter questions in four areas: funding (Where does the money for the project come from?); regulation (How do we go about getting the necessary state authorization to proceed?); water rights (Will we be able to realize a benefit from the seeding by having a legal right to any water generated by it?); and liability (Are we going to have to pay for claims made by persons asserting that the cloud seeding caused them harm?).

§ 71.05(a) Funding.

The costs of weather modification operations have been paid from non-governmental money, state and local governmental funds, and federal payments.

§ 71.05(a)(1) Non-governmental.

Although, as indicated previously, n124 potential benefits from weather modification as compared with costs make for attractive cost/benefit ratios, cloud seeding activities are simply too expensive to be undertaken by individuals. Some non-governmental entities, however, have sponsored projects. Ski resorts wish to augment snowfall, particularly early in the season. Modern snowmaking equipment that relies on spraying frozen water on the slopes is helpful. Cloud seeding also has been used. n125 Hydroelectric power generating companies need ample water to operate their turbines. Some of the longest running weather modification projects in the country have been sponsored by power companies. They and ski areas have the financial resources to pay the costs. n126

Farmers are used to working together informally as well as in farm organizations to enhance their profits. Some weather modification projects have been paid for by them passing the hat among themselves and relying on sufficient collections from volunteers to pay for the seeding. Unless they are convinced of positive results, the farmers may drop out and the project may die for lack of money to operate it. n127 And there is always the problem of the "free-loader" who does not contribute to support of the seeding, but who may reap the results where he has not sown.

§ 71.05(a)(2) State and Local Governments.

In order to evade the problem of the beneficiary of weather modification who does not pay for such activities, there has been resort to governmental funding. The tax collector secures the necessary money in the manner specified by law; the government agency supporting the project pays for it with the public funds provided. Payments must conform to appropriations laws and if the necessary appropriation law is not enacted or renewed, the project must be terminated. Accordingly, it is important to get and keep political support to launch and continue a governmental project. n128

There are three types of funding laws applicable to atmospheric water resources development and management:

1. General legislative grants to spend appropriated funds; n129

2. Authority specially granted to the sponsoring agency by law to spend money on weather modification activities; n130 and Such special authority coupled with power to establish legal entities which have taxing power to raise funds for cloud seeding. n131

State money for weather modification usually comes out of the general treasury and is appropriated to an agency of the state government to pay for the seeding. For example, in Utah the Division of Water Resources which is the water development agency of the state has for some years been given appropriations each year to pay the state's share of a snowpack enhancement project along the mountains in the central part of the state. The participating counties pay their shares from their own treasuries. n132

New York law authorizes municipalities to spend money on weather modification projects. n133 California has legislation allowing a named district in the state to contract for cloud seeding. n134 Such legislation specifically approves spending by the agencies named.

Through the High Plains states and in some other jurisdictions there are laws allowing formation for special weather modification districts or authorities. n135 If appropriate procedures are followed, n136 these governmental entities will function much like irrigation districts. They can raise money by assessing mill levies and are empowered to spend it contracting for weather modification services. In turn these special districts may combine with each other and the state to run projects over a large area. Such has been the case in North Dakota for many years. n137

§ 71.05(a)(3) Federal Government.

Apart from the reporting law, the major role of the federal government in weather modification has been underwriting research and development costs. The Bureau of Reclamation of the Interior Department and NOAA and its predecessors in the Commerce Department are currently the major players. Previously other agencies, such as the Navy and its work on hurricanes n138 and the Forest Service efforts to study lightning suppression n139 have also been involved. Specific appropriations laws have allowed the Bureau of Reclamation to work outside the traditional western "reclamation states" to which its activities traditionally have been restricted. Its Project Skywater has supported a great deal of research in the mountain West and the High Plains states. n140 NOAA in the Commerce Department currently operates the state/federal coop program designed to make federal money available to state projects in order to secure better evaluation of them. n141

The federal government has undertaken two major studies of weather modification technology and policy. The first, conducted by the Advisory Committee on Weather Control under the leadership of Howard T. Orville, during the 1950s gave impetuous to subsequent federal research and development funding and the federal reporting requirement. n142 The second, conducted by the Weather Modification Advisory Board established under *Public Law 94-490* under the chairmanship of Harlan Cleveland, during the 1970's made recommendations for creation of a formal federal weather modification policy. n143 None has been adopted. In addition to its early research support, the National Science Foundation funded a major review of the field n144 as the National Research Council. n145 Two federally funded technology assessments have been undertaken: one for mountain snowpack augmentation n146 and one for hail

suppression. n147 In addition to all of this, universities and other research organizations have widely benefitted from federal research grants. They have, however, significantly declined in recent years. Weather modification is no longer fashionable. n148

§ 71.05(b) Regulation.

As has been noted, most American weather modification regulation is carried out by the states. There also have been a few local regulatory efforts. Additionally, multi-jurisdictional regulation has taken place: interstate and federal and international.

§ 71.05(b)(1) Local and State.

Two-thirds of the states currently have weather modification laws in place. See the list in §71.06(a)(1) of the statutes and regulations in effect now. A few other states have had laws which now are no longer in force. And some local units of government have undertaken to control weather modification activities. n149 None are doing so now.

Regulation is carried out through control over who will be allowed to seed clouds under professional licenses and what projects will be permitted to operate under cloud seeding permits. In licensing, occupational competency is of primary public concern. State rules focus upon educational qualifications and operational experience. Professional certification by the Weather Modification Association is considered by some states. n150 In addition to competency, state regulators are concerned with the integrity of applicants for professional licenses. Information about applicants may be obtained from forms and documents accompanying their applications. Interviews and testing have not been employed. Licenses are normally valid for only a year, but are readily renewable. Suspension, revocation (after a hearing), and refusal to renew all are possibilities under state regulatory norms, n151 but as a practical matter the initial grant or denial of the professional license is the critical decision.

State laws regulating projects require sponsors wishing to undertake a cloud seeding project to apply for a permit to the regulatory department. Among the criteria that administrative agencies consider when deciding upon permit granting are:

1. Personnel -- licensed cloud seeder on the project premises, meteorologists, radar operators, pilots, and other employees;

2. Cloud seeding agents, rate of dispersal, timing, and method of delivery of the materials;

3. Equipment -- cloud seeding apparatus, airplanes, radar, and other monitoring and measuring instruments;

4. Target area, operational area, and control area(s) (if relevant);

5. Operational plan, including procedures for suspension of cloud seeding in the event of dangerous meteorological or hydrological conditions;

6. Plan for information gathering and evaluation;

7. Projected impact of weather modification activity including affect on any other permitted cloud seeding operation; and

8. Contract and cost information. n152

After an application is received, the agency should decide upon its action in a relatively prompt fashion so sponsors and their operators can either proceed or else look for other approaches to meet their needs. n153 Regulators may have information readily available to them in addition to that provided with the application. Past experience with the area, the operation, the sponsor, the cloud seeder, and with other persons in the area who may have a viewpoint about the project can help them decide about the application. In many states, including some which do not require permits, n154 notice by publication in newspapers in the target area about the proposal may cause members of the public to bring their concerns to the attention of regulators. Public hearings either may be required by law as part of the permitting process, or they may be optional at the discretion of the regulators. n155

Permits may be granted in the form requested, granted in an altered form, denied, suspended, revoked, or their renewal refused. n156 Like the licensing situation, the critical decision usually is the initial one on granting the permit. Regulatory laws provide for judicial review. When there have been errors of law or unreasonable fact findings, agency decisions will be reversed by the courts. n157 Usually they are not.

In three states there have been vigorous permit disputes in which sponsors and organized opponents of projects have battled. Opposition to hail suppression in the Texas panhandle led to permit denials and resulted in alteration in Texas legislation so protesters could more readily block permit issuance. n158 In Colorado a permit decision was appealed. n159 In Montana, a snowpack augmentation project was headed off by the mere filing of an action to enjoin it on environmental grounds, and in 1992 there was litigation over the efforts of North Dakota to seed inside the neighboring state just upwind from the North Dakota target area. The Montana court ordered issuance of the permit. n160

§ 71.05(b)(2) Interstate and Federal.

States usually have cooperated with each other with respect to weather modification control. Thus, Arizona and Texas have issued permits to operators targeting areas in adjacent states, and there is an arrangement among counties in Utah, Idaho, and Nevada for conduct of joint multi-state projects. n161 But some downwind states from cloud seeding projects have asserted that projects being allowed in upwind jurisdictions have or will adversely affect them. An Idaho official asserted that seeding being allowed by Oregon and Washington would harm Idaho and demanded that the two upwind states stop it. Minnesota residents have been heard to complain about seeding in the Dakotas. n162

The Commerce Clause of the Constitution *has been invoked to invalidate state laws prohibiting export to other states of ground water*. n163 By analogy it can be argued that atmospheric water, like underground water, is an "article of commerce" which no state can bar other states from sharing in. Of course, states can enter into compacts dealing with atmospheric water resources as they have concerning surface water streams that they share; n164 they can persuade Congress to enact legislation allocating the "rivers in the sky," just as the Boulder Canyon Project Act was held to divide the flow of the Colorado River; n165 and they can go to the Supreme Court challenging upwind permitting and seeking damages and/or an "equitable apportionment" of the atmospheric water resource. n166 None of these have happened.

§ 71.05(b)(3) International.

At a meeting in 1979 in Geneva, Switzerland, a group of experts designated by their governments offered eight "recommendations" for consideration by countries in dealing with each other in the context of weather modification. Although they never were officially promulgated by the sponsoring United Nations organizations -- the World Meteorological Organization and the United Nations Environment Program -- these recommendations represent the view of legal and meteorological experts about the international law of cloud seeding and can be used as raw material for further development of customary international regulation of artificial nucleation. The recommendations were:

1. Weather modification should be dedicated to the benefit of mankind and the environment;

2. There should be good faith international exchange of information and cooperation regarding weather modification;

3. Countries should report weather modification activities to the World Meteorological Organization which should prepare and distribute compilations of those reports;

4. Countries should provide timely notice to other nations about weather modification activities within their jurisdiction or control which are likely to have an effect on such nations;

5. Environmental assessments should be made by countries of cloud seeding projects within their jurisdiction or under their control and the results should be made to concerned nations;

6. Weather modification activities should be so conducted as not to cause damage to the environment of other countries;

7. Countries should enter into consultation with other nations who may be affected by cloud seeding planned or taking place within their borders; and

8. Nations should encourage international cooperation on weather modification, including joint research and multilateral agreements. n167

Further comment about international law respecting several of the recommendations is in order. International legal norms either dealing specifically with weather modification or with environmental, atmospheric, or hydrological matters which can by analogy be applied to cloud seeding are in place. The United Nations adopted a convention entitled "Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques" n168 in 1977 in response to wartime cloud seeding in Southeast Asia by the United States Navy designed to disrupt enemy transportation. The United States has ratified this agreement by which the parties undertook "not to engage in military or any other hostile use of environmental modification techniques having widespread, long-lasting, or severe effects as the means of destruction, damage or injury to any other" party to the convention. It can be argued that cloud seeding is not sufficiently "long-lasting," does not have such severe effects, and lacks sufficiently widespread impact to be banned from hostile military use. In view of the history of the convention, that might be a hard sell. n169

The countries of the world have been very cooperative in providing weather information for international use. World Weather Watch, operated through the World Meteorological Organization, is an international mechanism for gathering and exchanging meteorological data and has facilitated better forecasting. n170 Also weather modification information has been provided to the World Meteorological Organization from national weather services. That information is in turn distributed throughout the world through the Register of National Weather Modification Projects prepared by the World Meteorological Organization. n171

By virtue of international law, countries that are aware of dangers within their jurisdiction are obliged to give notice about them to nations which may be harmed by them. The International Court of Justice in the Corfu Channel Case expressed an obligation on the part of every nation to provide such notice. n172 Upon receiving notice, a country may wish to enter into diplomatic consultations with the nation where the project is being carried out or the country which proposes to do or allow the seeding. In the international arbitration between France and Spain concerning a shared river, the arbitrators noted that the potential offender was obliged to consult with the nation asserting that it might be harmed. But in the same decision, the Lake Lanoux Case, the country proposing the water project was allowed to proceed; it was not subjected to a veto from the other nation. n173 However, it is clear that any damage resulting from undertaking such an activity -- including cloud seeding projects -- subjects the country carrying out or allowing the project to liability to any damaged nation. That is the message of the Trail Smelter Arbitration which required Canadian payments to the United States for transboundary air pollution losses. n174 Downwind damage compensation also would be supported by

Principle 21 of the Stockholm Declaration on the Human Environment which imposes the responsibility on countries to ensure that activities within their jurisdiction or control do not cause damage in other nations. n175

§ 71.05(c) Water Rights.

A few cases, a handful of statutes, and some analogies support water rights claims by persons or groups involved in or affected by precipitation enhancement activities. If the purpose of a project is economic gain through augmenting water supplies, rights to the water assertedly generated by the cloud seeding activity can be critical. In any such case, claims to enhanced precipitation or runoff would face an initial hurdle of quantification. As has been discussed, statistical evaluation of a project is a complex matter, one that may take years and cost large sums. n176 Measurement of any augmented supply may sometime be within scientific capabilities. One legislative proposal speaks of quantification in terms of several factors:

1. Physical and statistical analysis of historic streamflow and augmented streamflow;

2. Analysis of precipitation data in the project area and similar control area;

3. Computer simulations;

4. Radar measurements;

5. Chain of events research; and

6. Such other technology or technique that currently exists or may be available in the future which comports with sound engineering and physical principles. n177

The following subsections assume that the augmented water can be identified and its quantity can be calculated. Those assumptions are the basis upon which the cases, statutes, and analogies appealed to by contestants for the water are founded.

§ 71.05(c)(1) Activity-Based.

Prior appropriation law of the western states grants water rights to the person who first would develop it. n178 This is an attractive analogy for those who would sponsor weather resources development. They could appropriate the water harvested under their weather modification permit. In Colorado, a jurisdiction following the prior appropriation doctrine, just such a result is possible under a provision of the weather modification law allowing application for appropriation of the augmented water. n179 Other western water law doctrines such as the developed water concept allowing someone who has added to stream flow a right to the augmented water n180 and the imported water doctrine which grants the importer of water exclusive right to its use n181 also would support the weather modification project sponsor's claim to the water.

Case law which talks in terms of no rights to atmospheric moisture merely by virtue of land ownership also tends to support cloud seeder claims. In Slutsky v. City of New York n182 one of the very early decisions about weather modification, the court held for the defendant city which was sponsoring a precipitation enhancement project to increase rainfall in the catchment area of municipal water works. The plaintiff who was complaining of flooding of his property in the target area did not prove that the seeding caused those losses. In addition to its actual decision, the court noted that property owners "clearly have no vested property rights in the clouds or the moisture therein." n183 If they do not have such rights, who better than the developer of the water?

§ 71.05(c)(2) Landowner-Based.

Although in Slutsky the court turned a deaf ear to the claim of a landowner concerning rights to atmospheric moisture, at least two cases and a statute support water rights on the part of land owners. In the Southwest Weather Case from Texas, the court said the landowner has a right to "such precipitation as Nature deigns to bestow... to such rainfall as may come from clouds over his own property that Nature, in her caprice, may provide." n184 In Pennsylvania, a court said that "every landowner has a property right in the clouds and the water in them." But it went on to indicate that it felt the right was subject to "weather modification activities undertaken... under... governmental authority." It further noted that a modifier cannot "determine for himself what his needs are and produce those needs by artificial means to the prejudice and detriment of his neighbors." n185 Finally, the state of North Dakota has provided by statute that artificial precipitation will be treated legally like natural precipitation. n186 A legislative proposal based on that provision declares that "water derived from atmospheric water resources management becomes part of the State's basic water supply subject to allocation and regulation in accordance with" the water allocation law of the state. n187 In a riparian jurisdiction where rights traditionally stem from land ownership, n188 such legislation would favor the claim of the property owner.

§ 71.05(c)(3) Surface Water Owner-Based.

The Utah Weather Control Law has a provision for water rights much like that of Colorado. It has, however, been interpreted differently. Utah is a prior appropriation state in which surface and ground water rights have priority in right based upon priority in time. The entitlements of senior water rights holders must be filled before juniors can take from streams or aquifers. Utah's weather modification law would assign the right to the next claimant in line whose priority has not otherwise been filled. It would benefit the holder of a surface water right who otherwise would not get any water because he was junior to persons with priorities being served ahead of him. n189 This gives incentive to the persons most likely to need the water to seed the clouds. The Utah weather modification program is a cooperative venture between the state and counties in its central region. It is designed to enhance the flow in the Sevier River, an over-appropriated intrastate stream. Local water users, particularly those at the bottom of the Sevier River water Priority list support the program. n190

§ 71.05(d) Liabilities.

The other side of the coin in water rights is weather modifier and sponsoring organization legal liabilities for harm from their activities. As is the case generally, most of the law respecting legal liabilities is general common law applicable across the board to losses from whatever source. There are, however, a handful of cases involving claims against weather modifiers in which the general principles have been applied specifically to this field. The emphasis herein is upon those cases.

§ 71.05(d)(1) Impacts from Weather Resources Management.

People who complain about weather modification and threaten to sue or actually do sue for damages for their losses or to obtain injunctive relief have asserted that they have been harmed in a number of ways. Such claims of actual harm are essential to a prima facie torts case. n191 Among those losses perceived to be associated with various cloud seeding projects have been loss of precipitation (the "robbing Peter to pay Paul" claim), increase in precipitation (some people do not want it to "rain on their parade"), avalanches and other effects of heavy snowfall (snow removal costs money), floods from heavy runoff, and other harmful alteration in the timing, amount, and distribution of precipitation. n192

§ 71.05(d)(2) Liability Theories.

Whatever the claim of harm from cloud seeding is, the plaintiff seeking damages or an injunction against further activities must have a liability theory on which to assert his case. The weather control laws of Nevada, Oklahoma, Washington, and Wyoming assert that they are not intended to affect private rights or liabilities. n193 Claimants in those jurisdictions are cast upon the common law for their liability theories. Several states immunize the state agency

issuing permits from any liability for the conduct of permit holders. n194 Of course the permittees might be subject to common law liability. And a number of states provide that holding state permission to seed is no defense in cases asserting legal liability. n195 Nine states have laws that do deal with liability theories. Pennsylvania and West Virginia have provisions which provide for strict liability for drought harming farmers and heavy downpours or storms causing damage to lands. n196 By way of contrast seven other states to one degree or another abolish in liability cases such theories as strict liability and nuisance for acts relating to weather modification and their consequences. They retain liability for negligence and intentionally harmful acts. n197

Apart from statute, possible theories include trespass, negligence, strict liability, and nuisance. Of the dozen cases that have been filed seeking damages or injunctive relief from cloud seeding, counts in the complaints have alleged all or some of those theories. Since the defendants won all but one of those cases on failure of the plaintiffs to establish causal linkage between the seeding and harm, it is only through dicta that they shed any light on the liability theory issue. n198 In that plaintiff victory, the Southwest Weather Research case from Texas, n199 the focus was upon issues relating to rights in atmospheric moisture and harm done to them, not to the liability theory.

Judicial language in Slutsky v. City of New York n200 supports the nuisance concept. The opinion speaks of balancing the interests of the rural complainant against the needs of the city for water supplies. Such a balancing test is part of the prima facie case for a nuisance. The impact upon the plaintiff must outweigh that from which the defendant would suffer if the activity were not to take place. n201

Strict liability based upon the notion of abnormally dangerous activity proceeds on the proposition that the activity is very risky, that such risk cannot be eliminated even with care, that it is somehow inappropriate in the location, and that is not a commonly performed activity. n202 It is not surprising that in severe flooding cases in which claimants have sought to implicate weather modifiers they have included strict liability counts in their pleadings. n203

Negligence or failure to live up to the standard of professional care in conducting the operation has been charged against cloud seeders. Plaintiffs have been none too successful in getting experts whose testimony was credible to fact finders. Weather modifiers, like such other professions as doctors, tend to stick together when it comes to litigation. The more impressive witnesses whose testimony is needed to establish the standard of care for negligence and to assess what departure, if any, from such standard was committed by the defendant have usually testified for the defendants. n204

Trespass requires proof of intrusion of some foreign matter upon the premises. n205 Precipitation may not be classified as "foreign matter" for purposes of this theory. Flood law might be a viable option in cases where flooding has been the basis of the claim. n206

§ 71.05(d)(3) Cause-in-fact.

As has been noted, it is hard for cloud seeders to prove that over a season or several seasons of operations they have effected changes in the weather. n207 The discussion of water rights and weather modification proceeded upon an assumption that changes in water amounts on the surface of the land could be established, something that obviously also is very difficult if not impossible. n208 By similar token, proof of causation of loss stemming from a particular seeding event or a course of events over all or part of a seeding season is terribly difficult. Proof of causation was insufficient in eleven of the twelve litigated cases. The floods and other heavy storm losses could not be connected to cloud seeding. n209 The alleged loss of precipitation similarly was not established to have been the consequence of the defendant's activities. n210 It is possible that better factual information and developments in tort law loosening causation requirements n211 might make proof of cause a practical reality some time. It is not so now.

§ 71.05(d)(4) Proximate Cause.

Proximate or legal cause is a concept used in negligence law to limit the extent of a defendant's legal responsibility for

losses he has caused to those that are sufficiently direct. n212 Investigators in the Rapid City Flood case concluded that a natural weather event which was so overwhelming that it alone would have caused the losses was the responsible author of the flood losses. n213 Assume, however, that the seeding played a role. The proximate cause question then would be whether the act of nature was an intervening act that superseded the defendant's negligence and cut off liability. The Restatement (Second) of Torts *section 451* says that the defendant could escape liability if the harm done was different from the harm threatened by the defendant's conduct. n214 Flooding was the risk from both the seeding and the act of nature. The latter does not then cut off the responsibility of the defendant whose conduct will be judged to be the proximate cause of the loss.

§ 71.05(d)(5) Immunity.

For the most part, governmental immunity has been abolished in America. The Federal Tort Claims Act, however, does not waive the liability of the United States of America for so-called "discretionary acts." n215 Weather forecasting has been held to be discretionary. n216 Improper instrumentation by NOAA in its weather buoy program has been held not to be discretionary. n217 Federal weather modification may very well be like instrumentation -- carrying out a program, rather than planning for it. The defense may not apply.

§ 71.05(d)(6) Necessity.

The privilege of public necessity has been applied to the acts of government officials who have caused property losses in order to avert a public disaster. n218 Inadequate water supplies may not fit the in the same manner as blowing up buildings to prevent the sweep of a wild fire. However, some state regulatory provisions exempt emergency situations such as fire, drought, and fog in which normal licensing and permitting procedures need not be followed by modifiers. n219 They are indicia of a policy like that of the doctrine of public necessity. The philosophy of public necessity may underlie the statement in the Pennsylvania Natural Weather Association case that "weather modification activities undertaken in the public interest (as opposed to private interests) and under the direction and control of governmental authority should and must be permitted." n220

§ 71.05(d)(7) Contribution and Indemnification.

Because they work together to bring about cloud seeding activities, weather modifiers and their sponsors are jointly liable for damages they have caused if claimants can fit them within a liability theory. n221 State laws require permit holders to carry liability insurance. n222 An insurer who pays for a loss is subrogated to the rights of the policy holder. The weather modifier may well have a claim against the sponsor for contribution, payment of its share of the judgment when it all has been paid by or on behalf of a joint defendant. n223

Assume that the sponsor and cloud seeder do not work together, but that the sponsor is merely the employer of the operator. It well may be that the employer and his employee are jointly liable under a concept of vicarious liability founded upon the master-servant relationship. n224 In such cases, a legally liable master who pays the judgment has a right to full indemnification from the servant for all damages paid. The key then is whether the two defendants are working together or whether the one is working for the other. Some weather modification contracts specifically provide that the weather modifier will indemnify the sponsor for any losses suffered by the employer, including legal liability. Federal contracts typically do so provide n225 -- even though the federal agency may be immune as noted in the subsection on immunity. n226

§ 71.05(d)(8) Remedies.

Damages making the plaintiff whole from financial losses are available to plaintiffs whose losses have been caused by the conduct of cloud seeders. Most cases have sought such compensation for property and personal losses. n227 Injunctive relief also is a possibility. In the case won by plaintiffs, a temporary restraining order was issued and then upheld on appeal. n228 It had the effect of stopping cloud seeding in the jurisdiction for years even though it was

directed only at the operators of a particular project. Neither they nor other cloud seeders were about to engage in seeding when the possibility of further injunctions hung over their heads. Only after the state enacted a cloud seeding control law did weather modification resume.

§ 71.05(d)(9) Insurance and Security for Damages.

Weather control laws usually require posting of bond or issuance of a liability insurance policy to pay for losses in case of liability of the permit holder. n229 Hence the ability to purchase liability insurance is essential to the weather modification industry. It has not always been easy and rates have not reflected losses (of which there have been none) and costs for defense of cases (which at times have been rather high). n230 Industry-wide bargaining with insurance brokers has helped.

Posting security for damages is an alternative under some state laws to obtaining liability insurance. n231 It has not been used because insurance is cheaper.

§ 71.05(d)(10) Procedural Issues.

In two cases, one in federal court stemming from the Rapid City flood, and the other in state court claiming flooding in central North Dakota from cloud seeding, the question of certification of the litigation for class action was raised. In both instances it failed, n232 and the lawsuits were not further prosecuted by the named plaintiffs individually because of their lack of financial resources to pay litigation costs -- money they may have been able to raise had the cases been certified for class actions.

Environmental organizations have sued to stop weather modification projects. n233 For them questions of standing to sue arise. Usually when such groups bring actions they have good enough lawyering to establish the right to bring the actions. n234

In states with permit requirements, it has not been unheard of for people who did not participate in the permit process, although they legally could have, to then seek injunctive relief to prevent projects from going forward. When they have had such administrative remedies and have not exhausted them, they cannot go to court. n235 The lesson for opponents of weather modification is to take their claims to the administrative agencies given regulatory authority over weather resources management, pursue them in the administrative arena, and, if they do not prevail there, then go to court seeking judicial review. Determination about whether permits should be issued and projects will be allowed to go forth are delegated by the legislative branch of government to the exclusive jurisdiction of the administrative branch.

New Mexico, 462 U.S. 554 (1983).* The classic work on interstate compacts is Felix Frankfurter & James Landis, *The Compact Clause of the Constitution -- A Study in Interstate Adjustments, 34 Yale L.J. 685 (1925). See also* Clifford J. Villa, *California Dreaming: Water Transfers from the Pacific Northwest, 23 Envtl. L. 997, 998, n.7 (1993):* Interstate transfer of atmospheric or surface water creates concern in the western states. The California drought caused many water transfer projects to be proposed: seeding clouds, towing icebergs, desalination of seawater, shipping water in supertankers, and water transfer from the Pacific Northwest via pipeline or aqueduct. Most such ideas proved impractical on a large scale. Seawater desalination emerged as a popular alternative, and surface water transfers from the Pacific Northwest also received substantial support. Natural rainfall finally relieved the draught and with it, much concern for weather modification or water augmentation. Weather modification proposals have not been prominent among these proposals.

(n46)Footnote 169. *See* Ray Davis, *Weather Warfare: Law and Policy, 14 Ariz. L. Rev. 659 (1973). See* Mark J.T. Caggiano, *The Legitimacy of Environmental Destruction in Modern Warfare: Customary Substance Over Conventional Form, 20 B.C. Envtl. Aff. L. Rev. 479 (1993);* Shilpi Gupta, *Iraq's Environmental Warfare in the Persian Gulf,* 6 Geo. L. Rev. (petroleum fires deliberately set by Iraqi soldiers affected local, but not global, weather patterns) 251, 253 (1993) (acid rain caused by deliberately set petroleum fires). According to Caggiano, the international community has taken note of deliberate environmental destruction during war. In reaction to environmental abuses by the United States during the Vietnam War, (forest defoliation and attempts to increase rainfall to hinder enemy troop movements), the United Nations held an international conference on the environment which prepared twenty-six principles relating to the rights of humankind during warfare. Later war-related environmental offenses by the Iraqis and Serbians have come under similar international scrutiny. The author proposes that all nations engaging in environmental warfare be subject to a war crimes tribunal. The Gupta article describes how, during the Gulf War, Saddam Hussein pumped crude oil into the Persian Gulf from the Sea Island Terminal. In addition, Iraq systematically set fire to Kuwait oil fields. Iraqi troops damaged or destroyed eighty to eighty-five percent of Kuwait's 950 oil wells, resulting in dire environmental consequences for the Persian Gulf area and beyond. The beaches in Kuwait and Saudi Arabia were coated with crude oil and littered with dead marine life and birds. Crude oil damaged sea grass beds, algae, and coral reefs. The entire Gulf ecosystem was affected, which effects will continue to harm the food chain and marine life for many years to come. The environmental and human consequences may never be determined due to the lack of technology available to the governments affected for accurately measuring the damage. Atmospheric pollution resulting from the burning oil slick and oil fields has affected climate and rainfall over a wide region.

CHAPTER 71 REAL PROPERTY ISSUES IN WEATHER CONTROL

8-71 Thompson on Real Property, Thomas Editions § 71.06

AUTHOR: Late Professor Ray Jay Davis J. Reuben Clark Law School Brigham Young University

§ 71.06 Bibliography.

[Go To Supp]

A vast array of materials has been written about the technology and law of weather modification. This bibliography is merely representative of it. Except for the listing of statutes and regulations specifically dealing with cloud seeding, no effort has been made to present anything other than more recent materials and classics in the field.

Legal -- Statutes and Regulations.

The federal governments of the United States and Canada by statute and regulation each currently require periodic reporting of cloud seeding activities to a designated national agency. Additionally, as of 1993, there were in force in thirty-two states and three provinces statutes and administrative rules dealing specifically with weather modification.

FEDERAL UNITED STATES:

15 U.S.C.A. §§330 - 330(e)

15 C.F.R. §§908.1 - 908.21.

CANADA:

Weather Modification Information Act, 1971, ch. 59 (CAN.); Weather Modification Information Regulations, 1974 (CAN.).

STATES:

ARIZONA:

ARIZ. REV. STAT. ANN. §§45-1601 to-1607 (Regulation setting licensing procedures).

ARIZ. REV. STAT. ANN. §§48-3011 to 48-3024, §§48-3041 to 48-3051, §§48-3071 to 48-3077, §§48-3091 to 48-3098.

Regulations have been promulgated. ARIZ. ADMIN. CODE §R12-15-151 (8).

CALIFORNIA:

CAL. WATER CODE §§400-02, 410-12, 420 (Regulatory statute);

CAL. WATER CODE §235 (Public agencies authorized to conduct weather modification study and research). CAL. WATER CODE §402.

CAL. GOV'T CODE §53063 (Public agencies authorized to modify weather).

COLORADO:

Weather Engineering Corp. of America v. United States, 614 F.2d 281 (Ct. Cl. 1980) [weather modification device patent infringement case].

Prob. & Prop. Vol. 9 (Sept./Oct. 1995) 8 (This article reviews the water rights which have developed under several different doctrines in the United States, then introduces the development of the ASCE's two model water codes. Among the more important policy positions of the drafters of the model water rights codes are: (1) making legal provisions that conform with physical laws, (2) protecting the security of private property rights, (3) protecting the public interest, (4) recognizing third party interests, (5) fostering efficient and productive use of water, and (6) providing flexibility for water rights. The author points out that the model code approach is governed by a policy of human regulation that is congruent with physical laws and therefore treats allocation of all usable water irrespective of where it is in the hydrologic cycle.)

CHAPTER 72 SOURCES OF GOVERNMENT POLICE POWER

8-72 Thompson on Real Property, Thomas Editions § 72.01

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 72.01 Introduction to the Chapter.

[Go To Supp]

The term "police power" or its equivalent does not appear in the United States Constitution; it was not used in a U.S. Supreme Court opinion until 1827; and it was not the explicit basis for a decision by that Court until 1877. n1 Yet, in the late 19th and early 20th centuries, it attracted the attention of hundreds of judges and legal writers, and today, casting its influence in ever more subtle and diverse ways, it is a concept at the center of profound developments in the American law.

This chapter will briefly explore the origins of police power concepts in the United States, especially as that power is used to regulate and restrict private rights in real property. The chapter will show the slow emergence and development of state police power concepts in the 18th and 19th centuries. Subjects for further study are the key cases and legal writers that gave the police power new tasks and vigor to open the 20th century, and the judicial failures that have loosed it virtually without restraint over the land today.

Even though its philosophical basis lies at the very foundation of English common law, the notion of governmental police power attracted little attention in the United States until Thomas Cooley's watershed treatise describing constitutional limitations on state legislative power, first published in 1868. n2 Here he defined police power in phrases that immediately became standard language for the subject:

> The police of a state, in a comprehensive sense, embraces its system of internal regulation, by which it is sought not only to preserve the public order and to prevent offenses against the state, but also to establish for the intercourse of citizen with citizen those rules of good manners and good neighborhood which are calculated to prevent a conflict of rights, and to insure to each the uninterrupted enjoyment of his own, so far as is reasonably consistent with a like enjoyment of rights by others. n3

This chapter will examine the growing recognition of state police power principles that occurred in the United States from the colonial era until Cooley's important pronouncement.

CHAPTER 72 SOURCES OF GOVERNMENT POLICE POWER

8-72 Thompson on Real Property, Thomas Editions § 72.02

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 72.02 Common Law Origins of the Police Power: An Ancient, Fundamental Principle.

If, as Cooley declared, the police power of a state enforces the state's system of internal regulation, not only to protect the state, but to ensure citizens' rights relative to one another, what principles govern the application of this power? The answer to this question is found in the earliest literature of English common law.

At the heart of a government's power to regulate its citizens' private property affairs is the ancient and familiar legal maxim: "*Sic utera tuo ut alienum non laedas*," loosely translated as, "Enjoy your property in such manner as to not injure that of another." n4 The maxim's earliest expression appears about 1187 in Glanville's *The Laws and Customs of the Kingdom of England*, where, by a series of examples, the author demonstrates that one may not use one's own property to the injury of another. For instance, he declares that if "any Dyke should be raised or thrown down ... to the injury of any person's freehold," then a King's writ should issue. n5

Henry of Bracton, writing about 1250, referred to some types of servitudes being imposed by law, "that is, that no one do anything on his own land by which damage or nuisance accrues to a neighbor." n6 In *Fleta, Commentarius Juris Anglicani*, an anonymous late 13th century book on English law which apparently borrowed heavily from Bracton and some contemporary tracts, the nearly identical statement and supporting examples appear: "a man is not to do anything on his land by which harm or nuisance may be caused to his neighbour." n7 Also appearing in about 1290, the same time as the *Fleta*, a book in French, purportedly penned by one Britton, likewise referred to servitudes "by law," requiring that "no one shall do anything in his own soil that may be a grievance or annoyance to his neighbors." n8

While this principle of restraint in the use of one's real property permeates much of our common law, the maxim "*sic utere tuo ut alienum non laedas*," does not appear in extant court records until the 1594 case of Edwards v. Halinder. n9 Later, Sir Edward Coke cited the maxim in reporting the decision of Aldred's Case in 1611, n10 and in the following century statements or examples of the principle appear several times in *Blackstone's Commentaries*. n11

Even more importantly, however, those *Commentaries* contain a major companion concept, by which Blackstone incorporates this maxim of private conduct into the regulatory powers of the kingdom:

> The last species of offenses that especially affect the commonwealth are those against the public

> police and economy. By the public police and economy I mean the due regulation and domestic order of the kingdom: whereby the individuals of the state, like members of a well governed family, are bound to conform their general behavior to the rules of propriety, good neighbourhood, and good manners; and to be decent, industrious, and inoffensive in their respective stations. n12

Thus Blackstone regarded the rule that one should not use one's property in any way that injures another as a rule properly enforced by the state and derived from the state's police powers. This, of course, goes beyond merely permitting private citizens access to the judiciary to compel one another's proper behavior; it interjects the power of the state directly into the citizens' affairs, whether invited or not.

In medieval times, as English monarchs established hegemony over factions of the aristocracy by declaring and maintaining the "king's peace," regulating private affairs of private citizens had an important public purpose. Therefore, Glanville could write in 1187 that violations of the rule against using one's property to the injury of another could be redressed by applying for a king's writ. n13 The use of such state police power in England during the ensuing centuries varied with the relative strength of the monarchy or national government, and by the 18th century it had not attracted much attention from English judges or lawyers. n14

FOOTNOTES:

(n1)Footnote 4. This translation is from Herbert Broom's Legal Maxims 327 (5th Am. ed.) *cited in* Thomas Cooley, A Treatise on the Constitutional Limitations 574, n.1 (1868). Perhaps the more common version of the maxim today would be: "Don't use your property in such a way as to injure the property of another."

CHAPTER 72 SOURCES OF GOVERNMENT POLICE POWER

8-72 Thompson on Real Property, Thomas Editions § 72.03

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 72.03 Police Power in American Constitutional History.

[Go To Supp]

Likewise, the drafters of the United States Constitution seem to have had a police power concept firmly in mind during the creation and ratification of that document, but were not prompted to discuss it at length. Roger Sherman of Connecticut, in the convention debate of June 6, 1787, enumerated four categories of powers he thought ought to belong to the national government n15 and then declared that "[a]ll other matters civil and criminal would be much better in the hands of the States." n16

On June 8, 1787, James Madison of Virginia spoke in favor of a power in the national government to "negative" legislative acts of the states that conflicted with the powers assigned to the national government. Implicit in those comments is a very broad concept of state legislative power, confined only by the powers assigned to the national government. n17 Those debates concerned the provisions eventually included in the Tenth Amendment of the U.S. Constitution, reserving to the states or the people all powers not delegated to the national government or prohibited to the states. n18

Further discussion of the Tenth Amendment concepts during the period of ratification, by means of The Federalist Papers, also shows that state police power concepts were familiar to and accepted by the drafters. In Federalist Paper No. 17, Hamilton refers to the "residuary authorities" left with the states for local purposes and denies that the national government would ever want to divest the states of those authorities. In Federalist Paper No. 25, he gives specific examples of state police power used to maintain internal order. A plenary statement of inherent governmental powers, in Federalist Paper No. 31, initially referring to the national government but then extended to state governments, is his most precise justification for police power:

> A government ought to contain in itself every power requisite to the full accomplishment of the objects committed to its care, and to the complete execution of the trusts for which it is responsible, free from every other control but a regard to the public good and to the sense of the people... .The State governments by their original constitutions are invested with complete sovereignty. n19

He illustrated that sovereignty in Federalist Paper No. 32 by admitting that states "should possess an independent and

uncontrollable authority to raise their own revenues for the supply of their own wants." Indeed, "the State governments would clearly retain all the rights of sovereignty which they before had, and which were not, by that act, n20 *exclusively* delegated to the United States." This rule, by which most state powers "remain with them in full vigor ... is clearly admitted by the whole tenor of that instrument which contains the articles of the proposed Constitution." n21

James Madison declared that, in ratifying the Constitution, each state "is considered as a sovereign body independent of all others, and only to be bound by its own voluntary act." n22 The jurisdiction of the national government extends "to certain enumerated objects only, and leaves to the several States a residuary and inviolable sovereignty over all other objects." Finally, in Federalist Paper No. 45, Madison makes his most pointed reference to the police power of a state:

> The powers delegated by the proposed Constitution to the federal government are few and defined. Those which are to remain in the State governments are numerous and indefinite... . The powers reserved to the several States will extend to all the objects which, in the ordinary course of affairs, concern the lives, liberties, and properties of the people, and the internal order, improvement, and prosperity of the State. n23

The scant attention paid police power by the Founders was continued into the early 19th century by American lawyers, judges and legal writers. The U.S. Supreme Court rarely heard a case involving police power issues.

CHAPTER 72 SOURCES OF GOVERNMENT POLICE POWER

8-72 Thompson on Real Property, Thomas Editions § 72.04

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 72.04 Police Power Cases in American Courts Before 1868.

[Go To Supp]

In the 1827 Supreme Court opinion written by John Marshall in Brown v. Maryland, n24 the term "police power" is first used by that court to designate the residual sovereign power of the American states. n25 In this case, a state act imposing licensing requirements on importers was struck down as contrary to the constitutional commands (1) that states should not burden the import and export trade without consent of Congress and (2) that Congress has the power to regulate foreign commerce. Marshall compared the prohibited legislation to other acts within the power of the states, such as removal of imported gunpowder for safety reasons, and called such power "police power." The police power, he declared, "unquestionably remains, and ought to remain, with the States." n26

The concept of state police power, however, had by then clearly been recognized in earlier Supreme Court cases, even though not denominated as police power. In Dartmouth College v. Woodward, n27 Marshall had earlier stated a view favorable to such implied state powers, holding void a state law materially altering the college's pre-Revolutionary War British charter. Declining to give unlimited scope to the constitutional prohibition of state laws impairing the obligation of contracts, Marshall asserted that "the framers of the constitution did not intend to restrain the States in the regulation of their civil institutions, adopted for internal government...." n28 And in Gibbons v. Ogden, n29 Marshall wrote against New York state laws giving exclusive river navigation rights to Robert Livingston and Robert Fulton, but he acknowledged "the power of a State to regulate its police, its domestic trade, and to govern its own citizens... ." n30

The words of Marshall in Brown v. Maryland were quoted with approval by Justice Barbour in the court's next prominent police power case, New York v. Miln, n31 wherein the court upheld a state law regulating passenger shipping in the port of New York. n32 Justice Thompson declared in a concurring opinion, "Can anything fall more directly within the police power and internal regulation of the state...?" n33 In another case later in that same term, n34 Chief Justice Taney defended state powers "over their own internal police and improvement which is so necessary to their well-being and prosperity." n35

Even when the court upheld federal action as superseding state authority, as in Prigg v. Pennsylvania, n36 it was careful to acknowledge the police power of the states:

> [W]e are by no means to be understood in any manner whatsoever to doubt or to interfere with the police power belonging to the states in virtue of their general sovereignty. That police power extends over all subjects within the territorial limit of the states; and has never been conceded to the United States ... [T]he operations of this police power ... [are] designed essentially ... for the protection, safety, and peace of the state... n37

The occurrence of so many police power cases in controversies over respective powers of the national and state governments led to the phrase "police power" being commonly equated with powers of sovereignty. n38

Meanwhile, state courts gave occasional signals that they, too, recognized a police power concept. An 1815 Massachusetts case discussed the power of a state to compel militia service by its citizens, a power which could even repeal exemptions from such service granted earlier by the state. n39 The New York Supreme Court, in 1826, upheld municipal legislative power prohibiting use of land as a cemetery. As noted by the court, clothed by the state with legislative powers, the "local Legislature ... are particularly charged with the care of public morals, and the public health within their own jurisdiction." n40

The same court the next year, in Vanderbilt v. Adams, n41 upheld as a valid police regulation a statute regulating harbor vessels, even at private wharves. Justice Woodworth delivered a lengthy but perceptive description of police power, n42 noting particularly that such rights had "been assumed and acted upon without a question, ever since we became an independent government." n43 He also referred, without citation, to "numerous cases in cities, much stronger than the present, where this power has been deemed constitutional, and never drawn in question... ." n44

Vanderbilt was cited later that year in support of another exercise of police power in Coates v. City of New York. n45

Undoubtedly numerous state and local courts of the early 19th century reached decisions and issued opinions that reflected in one way or another a recognition of state police power. The citation of only a few additional examples will suffice to make the point. In Commonwealth v. Worchester, n46 the Massachusetts State Court upheld a municipal ordinance regulating the driving of wagons:

> Surely the power of the legislature to pass a local act cannot be questioned. It is not only the right, but the duty of that branch of government, so to vary the provisions of law, as to meet, so far as is practicable, the peculiar exigencies of every portion of the community. n47

Two years later, the same court upheld another local ordinance, noting without comment that the trial "judge instructed the jury, that the subject of the regulation was one on which it was proper for the city to legislate, it having relation to the public convenience and the health of the inhabitants... ." n48 The court declared, "The great object of the city is to preserve the health of the inhabitants." n49 The court later sustained an ordinance regulating the selling of produce. n50 In Goddard's Case, n51 an ordinance requiring property owners to remove snow from city streets where they lived was upheld as a valid "police regulation." n52

In New York, the Supreme Court upheld a village ordinance regulating the selling of meat "as within the power conferred by the charter; it was reasonable in itself, and promotive of the public good." n53 That Court later sustained a prohibition of bowling alleys, acknowledging that the Constitution gives "all the accustomed powers of legislation" to a state, including "the power to create municipal corporations with the right to pass by-laws for local objects." n54

The cases described in the preceding paragraphs demonstrate that through the middle decades of the 19th century, judicial recognition of police power, in both federal and state supreme courts, became more explicit. For instance, Vermont's Chief Justice Redfield, in an 1854 opinion, depicted the maxim requiring use of one's property so as not to injure the property of another as the essence of the "police power of the state," which "extends to the protection of the lives, limbs, health, comfort, and quiet of all persons, and the protection of all property within the state." Therefore, "it

must of course, be within the range of legislative action to define the mode and manner in which every one may so use his own [property] as not to injure others." n55

The great American law commentator, James Kent, first wrote during this same era, and in his first edition of commentaries in 1826 declared that a state legislature, in order to prevent injury to the public, may prohibit nuisances and trades harmful to life, health, and peace. n56 However, it was not until the 12th edition in 1873, edited by Oliver Wendell Holmes, that this work contained explicit recognition of the state's police power and -- so far as it touches real property -- its basis in the maxim or principle, discussed earlier, that one should not use one's property so as to injure another:

> The government may, by general regulations, interdict such uses of property as would create nuisances, and become dangerous to lives, or health, or peace, or comfort of the citizens ... on the general or rational principle, that every person ought so to use his property as not to injure his neighbors, and that private interests must be made subservient to the general interests of the community. n57

By this time, Cooley's definitive statement concerning state police power, noted in the introduction to this chapter, had been issued, and this subject then entered the mainstream of American jurisprudence. n58

FOOTNOTES:

(n1)Footnote 24. *25 U.S. (12 Wheat.) 419,* (1827).

(n2)Footnote 25. Ruth L. Roettinger, in The Supreme Court and State Police Power 10 (1957), credits Marshall with this first use of the term.

(n3)Footnote 26. *25 U.S. at 433.*

(n4)Footnote 27. *17 U.S. (4 Wheat.) 518 (1819).*

(n5)Footnote 28. *4 Wheat. at 628, 629.* However, he declared, "contract" in its limited sense would at least constitutionally "restrain the legislature in future from violating the right to property." *17 U.S. at 628.*

(n6)Footnote 29. *22 U.S. (9 Wheat.) 1,* (1824).

(n7)Footnote 30. *22 U.S. at 208.* Not treated in this chapter is the controversy over whether the state and national powers defined in the Constitution were considered to be mutually exclusive, rather than being concurrent in some areas until federal preemption occurred. *Gibbons* advances the mutually exclusive powers theory, which -- although concentrating on the exclusive national powers -- actually is a states' rights doctrine, recognizing large areas of historical state governance from which the national government is excluded. Marshall's opinion, however, also concedes that, while the respective powers might be exclusive, the "necessary and proper" actions to execute those powers might be concurrent, and the federal actions would prevail over any conflicting "necessary and proper" state actions. Later Supreme Court cases, notably *New York v. Miln, 36 U.S. (11 Pet.) 102 (1837)* and *The License Cases, 46 U.S. (5 How.) 504 (1846),* instead emphasized that these state powers were sovereign and exclusive, meaning that the states' "necessary and proper" actions to carry out those powers were also exclusive of any supposedly concurrent federal powers and actions. Both of those cases are also significant in showing the developing state police power in general and are discussed herein from that perspective. This brief chapter thus is not intended to discuss state police power as it may come in conflict with federal powers. *See* William W. Crosskey and William Jeffrey, Jr., Politics and the Constitution in the History of the United States 695-696 (1953). *See also Walter v. City of Gulf Shores, 829 So. 2d 181 (Ala. Crim. App. 2001)* (city was entitled, under statute governing watercraft, to enact regulations governing licensure of businesses and advertising activities on its navigable waters under general police power).

(n8)Footnote 31. *36 U.S. (11 Pet.) 102 (1837).*

City of Mankato, 268 F.3d 603 (8th Cir. 2001)* (precluding adult entertainment in establishments that held liquor license was valid exercise of police power); *Sanchez v. City of Caldwell, 20 P.3d 1 (Idaho 2001)*(ordinance denying retail license for sale of beer or wine to someone who within past five years had been convicted for DWI was rationally related to legitimate governmental purpose and did not exceed city's police powers). *Fly Fish, Inc. v. City of Cocoa Beach, 337 F.3d 1301 (11th Cir. 2003)* (City licensing and zoning of adult entertainment business related to health and morals of community and thus was a valid exercise of police power.); *Jordan v. City of Centerville, 119 S.W.3d 214 (Mo. App. 2003)* (City liquor licensing requirements within the scope of police power.); San Diego County Veterinary Medical Ass'n v. County of San Diego, *10 Cal. Rptr. 3d 885,* (2004) (Police power encompasses the right of county to require health vaccinations.)

(n18)Footnote 41. *7 Cow. (9 N.Y. Common Law Reports) 349, 351-353 (1827).*

(n19)Footnote 42. The right assumed under the law would not be upheld, if it exerted beyond what may be considered a necessary police regulation. The line between what would be a clear invasion of right on the one hand, and regulations not lessening the value of the right, and calculated for the benefit of all, must be distinctly marked. On the principle contended for here, I do not perceive on what ground various regulations for the better government of the police of a crowded population can be supported. And yet, to a certain extent, it has never been doubted that the Legislature were competent to direct. Police regulations are legal and binding, because for the general benefit, and do not proceed to the length of impairing any right in the proper sense of that term.

The sovereign power in a community, therefore, may and ought to prescribe the manner of exercising individual rights over property. It is for the better protection and enjoyment of that absolute dominion which the individual claims. The powers rest on the implied right and duty of the supreme power to protect all by statutory regulations, so that on the whole, the benefit of all is promoted. Every public regulation in a city may and does, in some sense, limit and restrict the absolute right that existed previously. But this is not considered as an injury. So far from it, the individual, as well as others, is supposed to be benefited.

It may then be said that such a power is incident to every well regulated society, and without which it could not well

exist. Is there a doubt that the Legislature have a right to authorize a road through the wild land of A without his consent? This right has been assumed and acted upon without a question, ever since we became an independent government. No compensation is allowed, in such cases, to the owner. Can he defeat the operation of the law, by saying that private right is invaded? The doctrine has not yet been advanced. Such a law, I apprehend, is constitutional and obligatory; because, in many cases, necessary for the public benefit, and not deemed injurious to the individual whose land is taken... . The numerous cases in cities ... where this power has been deemed constitutional and never drawn in question, goes strongly to prove, that regulations like those in question, do not fall within the principle contended for by the plaintiff in error... . Can the power, with impunity, violate such a law, because he has the absolute right of property? It has not been heretofore so considered.

App. 1996)* (sawmill regulations); *Natural Aggregates Corp. v. Brighton Twp., 539 N.W.2d 761 (Mich. App. 1995)* (sand and gravel removal permit conditioned on filing of reclamation plan and surety bond); However, despite such broad characterizations of police power, a court is still able to find that a municipality has acted outside its police power. *Cellular Tel. Co., v. Village of Tarrytown, 624 N.Y.S.2d 170 (1995)* (local law imposing moratorium on installation of cellular telephone antenna was held invalid as an exercise of the village's police power).

Erb v. Maryland Dept. of Env't, 676 A.2d 1017 (Md. App. 1996) (sewage disposal regulation, proscribing a nuisance from coming into existence on landowner's property, is one facet of the State's power to regulate in order to protect the public health and safety).

Aztec Minerals Corp. v. Romer, 940 P.2d 1025 (Colo. App. 1996) (Actions of Colorado Department of Public Health and Environment (CDPHE) and Colorado Department of Natural Resources (DNR) in entering into response action agreements with Environmental Protection Agency (EPA) to abate nuisance by remedying environmental contamination

at former mining site and by providing technical and financial assistance to EPA did not rise to level of taking; property owners had no property right to permit continued degradation of environment surrounding site and thus creating hazard to public health).

Beck Dev. Co., Inc. v. Southern Pacific Transp. Co., 44 Cal. App. 4th 1160 (Cal. App. 3d Dist., 1996) (concept of a "nuisance per se" arises when a legislative body with appropriate jurisdiction, in the exercise of the police power, expressly declares a particular object or substance, activity, or circumstance, to be a nuisance), *review denied* (Jul. 31, 1996). *Rhod-A-Zalea & 35th, Inc. v. Snohomish County, 959 P.2d 1024 (Wash. 1998)* (owner subject to a grading permit requirement imposed on peat miners). *Hanna v. Town of Framingham, 802 N.E.2d 1061 (Mass. App. 2004)* (Amendment to city zoning plans within the scope of the police power.); *Plummer v. City of Fruitland, 87 P.3d 297* (Idaho, 2004) (Power of city to grant exclusive waste collection franchise within the Constitutional bounds of the police power).

(n32)Footnote 55. *Thorpe v. Rutland & B. R.R., 27 Vt. 140, 149-150 (1854). Barnhill, v. City of North Myrtle Beach, 333 S.C. 482, 511 S.E.2d 361 (S.C. 1999)* (ordinance prohibiting personal watercraft from launching off a public beach was within the city's police power); *Phillips v. Town of Oak Grove, 968 S.W.2d 600 (Ark. 1998)* (ordinance prohibiting emu farmers from keeping fowl within city limits for commercial use was upheld); *Curtis v. Town of South Thomaston, 708 A.2d 657 (Me. 1998)* (town fire ordinance which required them to build fire pond and grant town easement to use the pond was upheld as proper use of police power).

Smith v. City of Arkadelphia, 984 S.W.2d 392 (Ark. 1999) (City may regulate standards of construction following a tornado); *Development Servs. of America v. City of Seattle, 979 P.2d 387 (Wash. 1999)* (City's denial of a permit to construct a Helistop is a proper use of police power); *Rodeo Sanitary Dist. v. Board of Supervisors of Contra Costa County, 71 Cal. App. 4th 1443 (Cal. App. 1999)* (a county has no general police power to regulate a sanitary district; that power is with the state). *See Pennsylvania v. Siemel, 686 A.2d 899 (Pa. Commw. Ct. 1996), appeal denied, 698 A.2d 68 (Pa. 1997)* (holding that an ordinance prohibiting "excessive vegetation," which was defined as "any grass, weeds, bushes, brush, saplings or similar vegetation exceeding six inches in height except such as are planted for useful or ornamental purposes," was a valid exercise of police powers). *Baker v. Boston, 29 Mass. 184 (Mass. 1831)* (holding that police regulations to direct use of realty to prevent public harm, not void); In *Petition of Bailey, 626 N.W.2d 190 (Minn. Ct. App. 2001)* (contribution by adjoining landowners for construction of fence was reasonably necessary to achieve public purpose of keeping animals confined, was not unduly oppressive to adjoining landowners, and was thus valid exercise of state's police powers); *Paul's Lobster, Inc. v. Commonwealth, 758 N.E.2d 145 (Mass. App. Ct. 2001)* (reconfiguration of road that owner's loading docks directly abutted was not constructive taking but rather a reasonable exercise of police power); *Fisher v. Viola, 789 A.2d 782 (Penn. Commw. Ct. 2001)* (zoning ordinances which made changes relating to slopes, grades, and impermeability were reasonable exercises of police power); *Echevarrieta v. City of Rancho Palos Verdes, 103 Cal. Rptr. 2d 165 (2001)* (city's "view protection" ordinance, which prohibits city residents from significantly impairing view by permitting foliage to grow to heights exceeding limitations, was authorized by city's traditional police powers).

(n33)Footnote 56. 2 James Kent, Commentaries on American Law, pt. V, ch. XXXIV, 274 (1826). *See also* Benjamin F. Wright, The Contract Clause of the Constitution 198 (1938). *Miller v. Craig, 11 N.J. Eq. 175 (N.J. Ch. 1856)* (dealing with the powers of a legislature to condemn a mill dam detrimental to the public health); *Paul v. Carver, 24 Pa. 207 (Pa. 1855)* (dealing with legislative power to vacate streets and highways).

(n34)Footnote 57. 2 James Kent, Commentaries on American Law 340 (Oliver Wendell Holmes, ed., 12th ed. 1873). *K. Hope, Inc. v. Onslow County, 911 F. Supp. 948 (E.D.N.C. 1995)* (zoning regulation of adult and sexually oriented businesses); *Threatt v. Fulton County, 467 S.E.2d 546 (Ga. 1996)* (regulation requiring that vegetation be left undisturbed for 50 feet from the banks of a river); *Township of Concord v. Concord Ranch, Inc., 664 A.2d 640 (Pa. Commw. 1995)* (prohibition against using property as "gentleman's club"). *Graham v. Township of Knockville, 599 N.W.2d 793 (Mich. App. 1999)* (regulatory purpose of a connection fee).

(n35)Footnote 58. More recent U.S. Supreme Court decisions that significantly affect police power concepts include *City of Ladue v. Gilleo, 114 S. Ct. 2038 (1994)* (ordinance prohibiting residential signs violates free speech rights); *Dolan v. City of Tigard, 114 S. Ct. 2309 (1994)* (required dedication of private property for bicycle/pedestrian pathway).

CHAPTER 73 PUBLIC NUISANCE

8-73 Thompson on Real Property, Thomas Editions § 73.01

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 73.01 Introduction to the Chapter.

Even though a public nuisance is not necessarily an offense against real property, and may not emanate from real property, it is reasonable to include a discussion of public nuisance in this treatise, principally to distinguish the subject from that of private nuisance, covered extensively in Chapter 67, above. This chapter traces the common history of nuisances both private and public, identifies the elements of public nuisance, distinguishes public from private and attractive nuisance, describes illustrative public nuisance cases, and analyzes aspects of public nuisance prosecution and civil litigation. This latter topic includes the elements of the charge or complaint, parties, defenses, remedies, and special procedural issues.

CHAPTER 73 PUBLIC NUISANCE

8-73 Thompson on Real Property, Thomas Editions § 73.02

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 73.02 Historical Development of Concepts of Public Nuisance.

From the corrupted Latin term "nocumentum," meaning "harm," the Norman French term "nuisance" arose. Early common law records show courts acting to protect landholders from the most serious type of harm, that of dispossession. In Anglo-Saxon times complainants brought their actions in the principal Anglo-Saxon local courts, the hundred courts. After the Norman Conquest in 1066, A.D., the Norman kings recognized that threats to property rights also threatened the peace, and so it was in the king's interest to resolve such disputes with dispatch. This interest they pursued by establishing a royal court, whose justices traveled to court sessions throughout the realm to hear and decide cases important enough to endanger the peace. Private disputants could request a hearing before a royal justice, or the justices could assert "jurisdiction" on their own initiative. The cases were opened by writ, and the general writ seeking access to the king's court was known as the Writ of Right. In 1166, during the reign of Henry II (1154-1189), judges created a procedure especially for dealing with wrongful dispossession from land, the Assize n1 of Novel Disseisen. n2

When a complainant alleged no dispossession but that the accused interfered with the use of the land, the allegation was phrased as a harm or nuisance to the land, n3 a variant of the Assize of Novel Disseisin that eventually became known as the Assize of Nuisance. n4 Nuisance thus attained the special meaning of harm to land. n5 Judges later developed a new form of action known as "trespass on the case," or "case," to cover a wide variety of injuries resulting from wrongful acts, and to replace the assize of nuisance. For a time this new action was actually called an "action on the case for nuisance," and over time it was used for complaints of conduct that was not so serious as to render the complainant's land uninhabitable, but which rendered occupancy less convenient. n6 For Bracton, writing in the 12th century, the most common example was obstructing a private right of way. By easy analogy he was able to conclude that when a *public* way was obstructed, the remedy of removing the obstruction could be justified for the common good, or the good of the public, even though no private land was affected. n7 This reasoning was followed a century later by the writer known as Britton, n8 and by others who wrote about private nuisance. When writing about nuisance, they typically referred to conduct that offended the community in general as "common" nuisances and then as "public nuisances." n9

During the reign of Henry II in the late twelfth century, public nuisance cases were heard in the main royal court, or by royal justices sent out to the principal regional courts. Eventually, minor offenses were heard in court leet or sheriff's tourn, successor tribunals to the old Anglo-Saxon hundred courts. This assignment of jurisdiction became official in the

late fourteenth century by a statute enacted during the reign of Richard II, the first known statute dealing with public nuisances. n10 Considered criminal, such conduct was prosecuted through use of a presenting jury, and of presentment and indictment for offenses.

The private remedy implicit in this statute had been recognized even earlier. Although the earliest mentions of remedies for public nuisances, or purprestures, did not recognize a private right of action, n11 a case as early as 1411 suggested that a private plaintiff could sue on a public nuisance. n12 Some writers and judges believed that a public offense should not give rise to a private right, but such actions were included regularly in the expansion of actions for trespass on the case, because those actions lay when adequate remedies were not available under the other standard writs. With the English antipathy to overlapping remedies, private nuisance actions were brought under the Assize of Nuisance, and private actions for public nuisance were brought as actions for trespass on the case, all as mutually exclusive categories. The logical consistency of this arrangement was confirmed in the requirement that a plaintiff in a private nuisance action had to be seized of a free tenement; no such requirement existed for actions on the case.

FOOTNOTES:

(n1)Footnote 1. An assize is best described as a decree, edict or ordinance issued by a medieval legislative body; the term assize also denotes a legislative session.

CHAPTER 73 PUBLIC NUISANCE

8-73 Thompson on Real Property, Thomas Editions § 73.03

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 73.03 Definitions of Public Nuisance.

[Go To Supp]

§ 73.03(a) Various Definitions from the Past.

One early eighteenth-century writer defined "common nuisance" through examples such as "damaging a public highway, failing to repair a bridge, 'running a bawdy-house,' and operating a 'gaming house ...'" n13 Blackstone incorporated Hawkins's definition when he wrote that common nuisances are "Offences against the public health, and the public polic[y]" which included "building on real property owned by the crown; maintaining disorderly places; operating unlicensed lotteries; making, selling or using fireworks; eavesdropping; and being a 'common scold.'" n14

Hawkins's definition of public nuisance formed the basis of early American public nuisance law. n15 However, by the end of the nineteenth century, American courts were beginning to create a more specific definition of public nuisance. In 1918 a Kentucky court defined public nuisance as "the doing or the failure to do something that injuriously affects the safety, health or morals of the public, or works some substantial annoyance, inconvenience or injury to the public." n16

§ 73.03(b) Modern Definitions of Public Nuisance.

A prominent tort law scholar described the historical definition of public nuisance as any "act not warranted by law, or omission to discharge a legal duty, which inconveniences the public in the exercise of rights common to all [citizens]." n17

Courts have created a fundamental split over the issue of whether a public nuisance arises from the number of persons affected or derives from the character of the conduct. According to the majority of courts, a nuisance is public if the character of the conduct meets certain criteria, regardless of the number of persons affected. n18 A substantial minority of courts are reluctant to find a public nuisance unless a larger number of people are affected. n19

The most straightforward definition of a public nuisance is an "unreasonable interference with 'a right common to the general public,'" n20 or with a right to which the whole public is entitled, and causes injury to the general public. n21 Some judicial definitions break down public nuisance into its constituent elements. For example, public nuisance could

be defined as unreasonable interference with the exercise of a right common to the general public, and includes conduct that significantly interferes with public health, safety, peace, comfort, or convenience; conduct that is proscribed by law; and conduct of a continuing nature that produces a permanent or long-lasting effect, and, as the actor knows or has reason to know, has a significant effect on public rights. n22 Some courts emphasize the continuing nature of a public nuisance n23 declaring that public nuisances are by definition continuous. n24

For some courts the surroundings and place of the nuisance are key factors in determining the public nature of the nuisance. n25 Some courts require that a public nuisance have occurred in areas where the public frequents, or where the public is likely to come in contact or under its influence. n26 According to this view, a nuisance that is located in an isolated or unfrequented place is not a public nuisance, unless the court finds it *malum in se*, that is a nuisance under any circumstances. n27 This definition focuses on the public nature of the nuisance and not the number of people affected by it. n28 Such definitions also focus on the meaning of "public" as a right common to the public. n29 The right must be a common right that the public in general is free to exercise; therefore, a public nuisance does not include nuisances that damage an individual's property or numerous individuals' properties where the public in general does not have an exercisable right connected to that property. n30 However, a nuisance does not have to affect the whole community or injure the entire public for it to be a public nuisance. n31 So, if a nuisance affects a public place where the general public has a right to go, n32 and the public does frequent the place or is likely to be influenced by the nuisance in such a place, n33 and the nuisance annoys, injures, offends, or endangers those that come under its influence, n34 then it creates a public nuisance. n35

Some courts emphasize the character of the conduct as key to determining whether a public nuisance arises. Thus several decisions declare that a public nuisance includes an act or failure to act that affects or behavior that causes unreasonable interference with the community's safety, health, morals, peace, comfort, convenience or creates a substantial annoyance. n36 Or, a public nuisance is anything that causes danger to life, disease, or shocks public morals, decency or religious feeling. n37 A public nuisance may be characterized by unlawful acts or neglect of a duty that may offend the community's morals or decency, or prejudice health, property, or safety. n38 Where character of the conduct is at issue in determining whether a public nuisance exists, the inquiry is not into the illegality of the conduct, but rather into the reasonableness of the conduct. n39 Thus a public nuisance could include conduct that offends the senses, n40 or an act or failure to act that causes harm to health, comfort, convenience, the interests of the community, the free exercise of the public's rights, or the use of a public place. n41

CHAPTER 73 PUBLIC NUISANCE

8-73 Thompson on Real Property, Thomas Editions § 73.04

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 73.04 Public and Private Nuisance Distinguished.

[Go To Supp]

Public and private nuisances were distinguished as separate actions as early as the twelfth century. n42 In the view of some courts, a public nuisance is public because it is dangerous to the public, and a private nuisance is private because only a private individual is affected instead of the public generally. n43 Thus, a private nuisance affects a limited number of people and their rights to the land they possess. n44

Another distinction lies in the relationship of the nuisance to land. A private nuisance is an interference with the use and enjoyment of a person's land or the interest in the use or enjoyment of such land. n45 A private nuisance occurs when a person's use n46 of the land is so unreasonable that it causes a substantial interference with the use and enjoyment of another's land. n47 Thus a private nuisance originates with use of the defendant's land that substantially interferes with use and enjoyment of the plaintiff's land. A private nuisance interferes only with a private right. A public nuisance does not necessarily cause interference with the use or enjoyment of land, but more with a common public right, whether or not associated with land use. n48 A nuisance is public because the harm is to the public, n49 and is not necessarily connected with rights in land. n50 Another distinguishing factor between a private nuisance and a public nuisance is that a public nuisance is a criminal offense and a private nuisance is only a tort. n51 Because a public nuisance is a criminal offense, the remedy for a public nuisance rests in the state's hands. n52 A public nuisance liability cannot be transferred from one creator to another. n53 On the other hand, a private nuisance can be transferred from one nuisance creator to a buyer of the land. n54 Thus in public nuisance one normally finds no private right of action, either in equity or law. n55

CHAPTER 73 PUBLIC NUISANCE

8-73 Thompson on Real Property, Thomas Editions § 73.05

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 73.05 Public Nuisance and Attractive Nuisance Distinguished.

An attractive nuisance occurs if a landowner maintains on the land a condition dangerous to children, but nevertheless attractive to them, which condition in fact causes injury to a child, if the landowner has not exercised reasonable care to provide protection against the occurrence. n56 Attractive nuisance is similar to private nuisance in that it requires that the defendant landowner has been negligent, which is analogous to the private nuisance requirement that the defendant has acted unreasonably. Attractive nuisance actions are similar to public nuisance in that they present a condition that is dangerous to at least a portion of the public and do not require that there has been any interference with the use and enjoyment of the plaintiff's land. n57

FOOTNOTES:
(n1)Footnote 56. *Thunder Hawk v. Union Pac. R. Co., 844 P.2d 1045 (Wyo. 1992)* (elements of attractive nuisance explained).

(n2)Footnote 57. Attractive nuisance appeared in § 339 of the Restatement of Torts (1934), and then was slightly modified in the Restatement (Second) of Torts (1965). As modified, the doctrine eliminated the requirement that the rule applied only to "young" children and the requirement that the condition on the defendant's land be attractive or enticing to children.

CHAPTER 73 PUBLIC NUISANCE

8-73 Thompson on Real Property, Thomas Editions § 73.06

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 73.06 Nuisances That Are Both Public and Private.

[Go To Supp]

In some jurisdictions, private and public nuisance laws overlap, n58 leading to hybrid cases dealing with both types of actions from the same conduct, sometimes referred to as mixed nuisances. n59 In such jurisdictions, a mixed nuisance is one that affects a large number of people or a public interest and also injures private interests in a way unique or distinct from the public injury. n60 Mixed nuisances are public nuisances that cause special injuries to private rights. n61 The mixed nuisance may be public because it interferes with a right common to the public, but a private nuisance at the same time because it inflicts special injury on a particular citizen or limited number of citizens. n62 Therefore, the nuisance is public, but causes special injury to an individual. n63 Some courts focus on the number of people affected rather than the character of the injury. n64

CHAPTER 73 PUBLIC NUISANCE

8-73 Thompson on Real Property, Thomas Editions § 73.07

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 73.07 Examples of Different Types of Conduct Held to Be Public Nuisance.

[Go To Supp]

§ 73.07(a) The Wide Variety of Successful Public Nuisance Prosecutions.

Courts have held such a wide variety of conduct to be public nuisances that any definitions of public nuisance are necessarily general. This is evident in the following short list of the range and variety of conduct successfully prosecuted as public nuisances:

- keeping a diseased animal; n65
- storing explosives; n66
- shooting off fireworks in public streets; n67
- unlawfully practicing medicine; n68
- running a house of prostitution; n69
- running a gambling house; n70
- bullfighting; n71
- using profanity in public; n72
- causing loud noises; n73
- generating odors, smoke dust, and vibrations; n74
- blocking highways or navigable waterways; n75

- being a common scold; n76
- street gang activity; n76.1
- creating an unsightly appearance on private property; n76.2 and
- running a social hall. n76.3

Municipal and public interest organization public nuisance actions against firearm manufacturers are increasing in frequency, with mixed results. n76.4

§ 73.07(b) Special Problems in Public Nuisance Prosecutions.

§ 73.07(b)(1) Wetlands.

As with other attempts to protect the environment through land use regulation, protection of wetlands may require the public agency to pay just compensation resulting from a taking of private property rights. However, use of public nuisance as the basis for regulation, thus avoiding the expense of paying for a taking, has been suggested. n77 More commonly, however, courts have ruled that protecting wetlands does not fit within the nuisance law exceptions to the Takings Clause. n78 The doctrine of public nuisance law is based on protecting the public from harms. Therefore, unless one can show that a threat to wetlands also affirmatively threatens harm to the public, protecting wetlands will probably remain outside the scope of public nuisance doctrine. n79

§ 73.07(b)(2) Private Takings of Endangered Species.

In an ironic contradiction to the use of public nuisance doctrine in protecting wetlands, courts have approved the use of public nuisance theory in protecting endangered species of wildlife. Thus habitats of endangered species may be protected under public nuisance doctrine without meeting Takings Clause requirements that compensation be paid for adversely affected private property rights. To successfully show that a public nuisance has occurred, one must show substantial and unreasonable harm to the public. n80 Despite the obvious difficulty in demonstrating the harm caused by destroying a species of wildlife, n81 some experts do indeed make the argument--averring that the harm may be unknown because of benefits from the species that may be discovered later, n82 and some courts are receptive. n83

§ 73.07(b)(3) Obscenity.

The success of public nuisance prosecutions of obscenity has been mixed, with First Amendment protections impeding the effort; n84 however, some states are more receptive to public nuisance regulation of obscenity. n85 A variety of views have been expressed by both state courts n86 and the United States Supreme Court. n87

§ 73.07(b)(4) National Parks.

National parks are the best example of property where the general public has common rights to the enjoyment of such lands. In fact, the legislation creating the first national park, Yellowstone Park, specifically declares that the park was created for the enjoyment by every citizen. n88 Enabling legislation for several other national parks also noted the enjoyment by the general public as one of the purposes for the parks' creation. n89 National parks face unique public nuisance problems, in addition to the environmental damage caused by human visitation inside the parks. These unique problems arise from the commercial developments that are built to accommodate the millions of visitors to these parks. n90 The development of hotels, condominiums, stores, restaurants, and other facilities around the boundaries of national parks harm vegetation, air quality, water, and the aesthetics of the parks. n91 Theoretically, public nuisance prosecutions may be useful in controlling these conditions within the proximity of the parks.

§ 73.07(b)(5) Environmental Nuisances

Public nuisance prosecutions have been used to combat various--although not all--violations of environmental regulations. n92

CHAPTER 73 PUBLIC NUISANCE

8-73 Thompson on Real Property, Thomas Editions § 73.08

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 73.08 The Judicial Procedure of Public Nuisance Prosecutions.

[Go To Supp]

§ 73.08(a) Elements of a Cause of Action.

The key element in a proceeding against a public nuisance suit is whether the accused conduct has caused interference with a common public right. n93 Of course, not all such interferences are considered public nuisances; n94 only substantial interferences may be prosecuted as public nuisances. n95 In other words, the prosecutor must show that the defendant's actions substantially and unreasonably interfered with public property or public rights in order to win a public nuisance case. Thus, in successful public nuisance cases the court usually finds that the defendant substantially damaged public property; n96 or disrupted, n97 offended n98 or threatened the health of the public. In some environmental cases, the court must find that the defendant's conduct has reduced the environment's quality below the reasonable expectation of the public. n99

The substantial interference element involves substantial or significant harm to the public, n100 determined by gauging the conduct's effect on the public by a reasonable person standard. n101 If the defendant's conduct threatens the public's sensibilities or harms the public, then the conduct satisfies this element. n102 Courts have ruled that conduct is significantly harmful to the public if it is visually offensive. n103 Whenever a defendant's conduct threatens the public's health, n104 emits odors or noises that makes an ordinary person in the community ill or uncomfortable or forces changes in work habits and lifestyle, n105 creates sights that offend the ordinary citizen's taste, n106 visual interferences, n107 or conduct that considerably damages public property by harming plants, air or soil, n108 such conduct meets the substantial interference element and may be considered a public nuisance.

Once the court decides that the defendant caused substantial interference, then it can move on to the unreasonableness of the interference. The unreasonable interference element is met when defendant's conduct is such that the environmental quality is reduced below what the plaintiff reasonably expects. n109 Another component of the unreasonableness of the interference is the lack of defendant's efforts to mitigate the harm caused by the nuisance. n110 A court might expect or require that a defendant will mitigate the harm by operating in another location n111 or reducing the level of interference causing the nuisance. n112

§ 73.08(b) Parties.

§ 73.08(b)(1) When a Private Plaintiff May Sue on a Public Nuisance.

Historically, a public nuisance proceeding could be brought only by the monarch as a criminal in the royal court, so private citizens acting on their own were not able to abate a public nuisance. n113 This changed in 1536, in the first case permitting a private citizen to bring an action to abate a public nuisance. n114 In this case, a tort action, the plaintiff was accorded standing to challenge someone who had blocked the king's highway and impeded access to the plaintiff's "close." n115 In this action, the private citizen was permitted to sue because he had suffered more than others, and should be allowed to recover damages for the special injury caused by the public nuisance. n116 Without a showing of special injury, the only party who could bring an action to abate a public nuisance was the monarch. The special injury rule, of course, means that not every public nuisance carries with it a private right of action. n117

The rule requiring special injury as a foundation to a private right of action may have been grounded on the notion that private citizens should not be allowed to vindicate the sovereign's rights, n118 that the numbers of such complaints should be limited, n119 and that courts should not be burdened with trivial complaints or with theoretical or speculative damages. n120 The requirement persists today and is still the chief obstacle or requirement that prospective private plaintiffs meet in bringing a private action based on a public nuisance.

The special injury rules has come under attack by legal scholars and is sometimes not enforced in the courts. According to one scholarly view, the special injury rule is not necessary to reduce frivolous suits or the number of suits because a plaintiff must prove substantial injury to maintain a public nuisance action to recover damages or obtain an injunction. n121 Also, frivolous suits are limited by the court's ability to deny certifying a class action n122 or to dismiss a frivolous suit and sanction attorneys who bring them. n123 Even where a public nuisance sparks numerous suits, it is no different when numerous actions follow a mass catastrophe, such as airliner crashes, n124 hotel fires, n125 pharmaceutical product liability cases, n126 cases over contamination of water, n127 or over asbestos exposure. n128 The United States Supreme Court has expressed reservations about the special injury rule, n129 as have various state courts. n130

Several courts have ruled that physical injury to a private individual caused by a public nuisance constitutes injury per se and satisfies the special injury rule automatically. n131

§ 73.08(b)(2) Prosecution of Public Nuisance by Public Authority.

Typically a federal or state government representative in the name of the governmental entity brings a public nuisance action. n132 In addition, laws and statutes can designate, within certain limits, a class or particular people who can bring a public nuisance action on behalf of the state. n133 Usually, the representative of the state is the attorney general, board of health, or a county municipal corporation; the United States can also bring the public nuisance action. n134 As stated in the preceding section, a public nuisance is unique in that it does not ordinarily give a private party the right to bring an action to abate a public nuisance. n135 Additionally, an organization, unless authorized by statute, cannot bring an action to abate the public nuisance. n136 However, some courts have authorized citizen groups to bring public nuisance actions on behalf of their members if they can show legitimate interests in the subject matter of the action, and the individual members could maintain a public nuisance claim if each one showed special injury. n137

As described in the preceding section, private parties can overcome the general rule prohibiting their bringing actions to abate a public nuisance, n138 if they can show that they have suffered special harm or damages differing from what the public in general has suffered.

The special injury must be caused by the nuisance. Some courts require the nuisance to be the proximate cause n139 and not a secondary cause, n140 and other courts allow consequential damages to satisfy the special damage requirement. n141 The special damages must be substantial n142 and different from what the community in common has suffered. n143 The injury must differ in kind and not merely in degree from the injury suffered by the general

public, n144 and the injury must relate to the use and enjoyment of the private party's land. n145 A private group can bring an action for damages for a public nuisance where that group suffered special injury different from the general public. n146

Courts differ in the specific requirements for showing special injury. n147 Some courts have found that a special injury to an individual requires the plaintiff to show "an invasion or violation of some private right" compared to the public right that has been violated. n148 In early cases, "special injury" meant that the injury to the individual plaintiff had to be direct rather than consequential. n149 However, recent cases focus on the injury being different in kind from that suffered by the general public or different in degree. n150 The majority of courts require the plaintiff to show that the injury is different in kind from the injury to the rest of the community. n151 Different in kind may include pecuniary harm, n152 personal injury, n153 interference with private property rights, n154 or interferences with a business n155 or contract. n156 The special injury in those jurisdictions is not met by plaintiffs who merely use the public right more than the rest of the community or whose land is damaged more. n157 However, some courts require only a showing that the plaintiff had greater exposure to an unpleasant or ugly condition. n158

In some jurisdictions, the special injury doctrine has required private plaintiffs to show physical injury to either property or their person in order to recover damages. n159 Some jurisdictions are changing the physical injury requirement and substituting a proximate cause approach. n160 Some courts have adopted a foreseeability test to satisfy the special injury rule. n161 Other courts have taken other more flexible approaches to the special injury rule. n162

Statutes may also confer private rights of action. n163 A statute may allow a private party to maintain a public nuisance suit without showing special injury n164 or without requesting the proper officers n165 or administrative proceedings first. n166 Private plaintiffs suing under statutory authority must show that they meet the qualifications imposed by the statute. n167

Where the statute authorizes a private action, the effect is that the private plaintiff is assisting the public authority in carrying out its enforcement function. n168 Therefore, the effect of a statute is usually to confer on the individual only the remedies and procedural requirements governing other equity suits available to the public in public nuisance suits. n169 A statutory right to bring a public nuisance action does not limit any private right otherwise available under the circumstances of the particular action. n170

Regardless of a transfer of ownership or title, if a public nuisance is a continuing nuisance, the current owner may be responsible for all past damage done by the nuisance. n171 However, if the public nuisance is caused as a result of a particular way an operation is conducted, then the new owner, to be held liable, must be continuing the operations in the same way. n172 The current owner's and the previous owner's actions are considered successive, n173 therefore, both owners cannot be held joint and severally liable. n174 An order to abate a nuisance may be enforced only against a party that has both the legal right and legal duty to abate the nuisance. n175

§ 73.08(c) Defenses.

One defense to a private nuisance action is that the defendant has a prescriptive right to act in the manner charged as a nuisance. However, courts do not recognize a prescriptive right to maintain a public nuisance, n176 therefore prohibiting the prescriptive right argument as a defense. n177 A defendant in a public nuisance action may not raise this defense either against public authorities n178 or private individuals. n179 Similarly, the innocent-owner defense used in environmental litigation is not available as a defense against an abatable public nuisance. n180 Courts may also entertain defenses based on First Amendment rights. n181

§ 73.08(d) Remedies.

Historically, until the mid-eighteenth century, the sovereign could prosecute public nuisances only in criminal court,

which would grant injunctions to the crown only in case of unauthorized building on the king's land. Because so many public nuisances could not be remedied by a fine or jail time, chancery courts began issuing permanent injunctions upon application by a proper government official. In more modern times, legislators have enacted measures emphasizing abatement more than criminal penalties.

For many public nuisance situations, injunctive relief or a suit in equity are the only meaningful remedies. With respect to applications for injunctions, the court has the discretion to award injunctions after considering all the facts and circumstances and relying on basic equity jurisprudence. n182 An injunction against a nuisance is not a matter of right and is left to a court's discretion, n183 because the rights of the defendant to use the property without undue interference must also be considered, and courts will not compel the defendant, beyond what is necessary, to protect the plaintiff's rights. n184 Some courts have ruled that where a defendant's activities are lawful and can be carried on without creating a nuisance, the court should not restrain the defendant at all from that particular activity. n185 However, the court has the discretion to compel the defendant to perform those lawful activities in a proper manner so as to minimize the nuisance. n186

Courts are able to enjoin defendants from using the premises or conducting the activity complained of after the plaintiffs have shown that there is no way to conduct such activities without causing a nuisance to occur. n187 Courts, when issuing the orders or injunction decrees, should state everything in general terms and only include such specific orders as are necessary to prevent the nuisance from continuing while allowing the activity to continue. n188

A court's discretion allows it to grant the defendant time to rectify the nuisance before an injunction against the use or business will take effect. n189 However, the court also may refuse to allow additional time to correct or abate the nuisance when the defendants have already had adequate time since the suit commenced to remedy the nuisance. n190 In cases where a business is unable to operate in a particular locality without causing a nuisance, the court may forbid such operations in that entire area and order the business to operate in a manner to cause as little annoyance as possible until the injunction takes effect. n191 A court is not likely to grant an injunction where the nuisance has been abated in good faith n192 by the end of the injunction hearings, even though the nuisance existed at the beginning of the suit. n193 In such a case, a temporary injunction may be issued by the court n194 or the court may still issue the injunction to enforce subsidiary rights. n195

Public nuisance injunctions differ from private nuisance injunctions. Public nuisance injunctions limit only the activity that is harmful to the public. n196 The power of a court's injunctive authority extends to prohibit the defendant's activity only to the extent necessary to abate the public nuisance, n197 unless the authority is extended by statute. n198 Where a defendant has created a nuisance prohibited by statute and continues in the behavior that is creating the nuisance prior to and up to the filing for injunction, the court's authority to grant injunctive relief against continuing such behavior remains. n199 Some courts have held that a court has no authority, in the absence of statute, to close the premises on which a nuisance is operated or maintained. n200 Contrary decisions have also been issued. n201 Courts have held that, absent statutory authorization, n202 in public nuisance cases a court may not destroy or confiscate property that contributes to or causes the nuisance. n203 However, other authority accords a court the power to do anything necessary to abate the public nuisance. n204 According to some statutes, courts may order the closure of the entire premises where the nuisance is for an extended period of time. n205

When a public nuisance suit is commenced, the court does not have the power to take possession or control of the premises causing the nuisance until after the trial and a judgement has been issued. n206 Some statutes prohibit a court from requiring closure of a building on which a public nuisance occurs until contempt proceedings have been initiated to enjoin or abate the nuisance. n207 The court may, however, order the reopening of premises where it is satisfied that the defendant has abated the nuisance properly and in good faith without being in contempt of that particular court in the proceedings. n208 In all of these matters, federal law is pre-emptive when dealing with airports or nuclear facilities. n209 Also, where interstate issues are concerned, federal statutes preempt common law; n210 however, the suit may be brought under state law of the state where the nuisance originates, even in cases of interstate pollution. n211

Where a defendant is guilty of maintaining a public nuisance after a permanent injunction has been issued against such a nuisance, a penalty or tax may be imposed on the defendant or the premises where the nuisance is maintained. n212 In order for the owner of a premises of a public nuisance to be liable for the penalty or tax, the owner must have actual or constructive knowledge of the continuance of such illegal nuisance. n213 Where the defendant is without such knowledge, the legislature is without the power to authorize the court to impose such a tax. n214 A defendant is liable for the tax even though the defendant files a bond for the release of the property or temporarily ceases the nuisance. n215

Courts do not order the destruction of real property to abate public nuisances where the use of the property is lawful. n216 However, where destruction is the only way to abate the public nuisance, courts can and do order the destruction of real property. n217 The courts prefer to preserve the ownership and rights to lawful and nuisance-free use of real property. Therefore, forfeiture of real property is also usually not allowed, unless authorized by statute. n218

These same rules apply to the seizure of personal property. For example, a third person owner who has no knowledge of the illegal nuisance use cannot have the property seized by the court; the third person owner has the burden of proving his or her innocence. n219 However, personal property differs from real property in that the prosecution for the confiscation of personal property is not a criminal proceeding, but may be considered quasi-criminal. n220 Usually, this proceeding of seizing property for abatement of a nuisance does not change the title of the owner until a decree is entered causing the owner to forfeit the personal property. n221

§ 73.08(e) Summary Abatement.

Summary abatement proceedings are often used in attempts to abate public nuisances. n222 The common law established the right to summary abatement proceedings, where the judicial process was not necessary, and is still considered good law under constitutional provisions respecting life, liberty, and property. n223 Every state's power allows the legislature to grant the authority to the courts to issue abatement or destruction decrees by summary proceedings, and the legislature may even grant the courts the power to abate a nuisance without judicial proceedings or processes. n224 When the court engages in summary proceedings, it must limit the scope of the remedy so that it suffices to abate, but does nothing beyond abatement. n225 When a threat to the public's health is at issue, the court may order destruction or summary abatement of the public nuisance. n226

In order for a summary abatement proceeding to be valid, it must afford the defendant due process of notice and a chance to be heard. n227 In situations where there is not a threat to life, health, or safety, due process requires the defendant or person ultimately responsible for the cost of the abatement have a chance to remedy the nuisance before proceedings are commenced and costs incurred. n228 Ultimately, the thing abated must actually be a nuisance for it to be subject to summary abatement proceedings. n229 In many cases of public nuisances, the nuisance can be abated only through destruction of the property. n230

Courts differ on what kinds of nuisances may be subject to summary abatement proceedings. Such proceedings may apply only to nuisances per se, to nuisances that are declared by common law or statutory law as nuisances per se, and all other nuisances are required by due process to have notice and a hearing. n231 In other courts, summary abatement proceedings may apply to actions that are not nuisances per se. n232 Private plaintiffs may apply for summary abatement. n233 To qualify, the private plaintiff must show that the conduct is a nuisance in fact and in law. n234

Ct. 618, 619-20 (1907)* (holding that a public nuisance occurred when industrial emissions destroyed Georgia land); *United States v. Reserve Mining Co., 380 F. Supp. 11, 54-55 (D. Minn. 1974)* (holding that a public nuisance was created by defendant's discharge of harmful pollutants); *Robie v. Lillis, 299 P.2d 155, 158 (Or. 1975).*

(n9)Footnote 101. *See United States v. Luce, 141 F. 385, 409-10 (Del. Cir. 1905).*

(n10)Footnote 102. *See United States v. Reserve Mining, 380 F. Supp. at 54-55 (D. Minn. 1974)* (health threat); *United States v. Luce, 141 F. 385, 408 (D. Del. 1905)* (offensive odors).

(n11)Footnote 103. *See Hay v. Stevens, 530 P.2d 37, 39 (Or. 1975)* (holding that a public nuisance may be any interference that is visual and annoys or offends the average person in the community); *Parkersburg Builders Material Co. v. Barrack, 191 S.E. 368, 369-71 (W. Va. 1937)* (holding that an object that is offensive to the average person in the community could be a public nuisance); *United States v. County Board of Arlington County, 487 F. Supp. 137 (E.D. Va. 1979)* (stating that a public nuisance could be a building that detracted from the reasonable person's view of the Washington, D.C. monuments).

(n12)Footnote 104. *United States v. Reserve Mining Co., 380 F. Supp. 11, 54-55 (D. Minn. 1974)* (holding it a public nuisance where defendant discharged carcinogens into water causing an increased risk of cancer); *American Smelting & Ref. Co. v. Godfrey, 158 F. 225 (8th Cir. 1907), cert. den., 207 U.S. 597, 28 S.Ct. 262, 52 L.Ed. 357 (1907).*

(n13)Footnote 105. *See United States v. Luce, 141 F. 385, 407-10 (Del. Cir. 1905)* (holding that a fertilizer and fish company that created odors causing nearby workers and inmates of a quarantine station to get sick committed a a public nuisance); *Wade v. Fuller, 365 P.2d 802, 804-05 (Utah 1961)* (noise caused by defendant constituted a public nuisance).

(n14)Footnote 106. *See Parkersburg Builders Material Co. v. Barrack, 191 S.E. 368, 371 (W. Va. 1937)* (holding that defendant's ugly junkyard met the substantial interference test and constituted a public nuisance). *But see, United States v. County Bd. of Arlington County, 487 F. Supp. 137 (E.D. Va. 1979)* (holding that a high rise building across from the D.C. monuments is not a public nuisance merely because it blocks a visitor's view from only certain angles.

Also, unsightliness is usually not sufficient to constitute a public nuisance).

(n15)Footnote 107. *See Parkersburg Builders Material Co. V. Barrack, 191 S.E. 368, 370-71 (W. Va. 1937)* (holding that a junkyard in a residential community would offend the average community member and constitute a public nuisance).

(n16)Footnote 108. *See Georgia v. Tennessee Copper Co., 206 U.S. 230, 51 L. Ed. 1038, 27 S. Ct. 618, 619-20 (1907)* (holding that defendant's industry considerably damaged forests and plants in plaintiff state); *American Smelting & Ref. Co. v. Godfrey, 158 F. 225, 225-26 (8th Cir. 1907)* (holding that defendant's smelting operations created fumes that destroyed plaintiff's trees); and *City of Harrisonville v. W.S. Dickey Clay Mfg. Co., 53 S. Ct. 602, 77 L. Ed. 1208, 289 U.S. 334, 335-37 (1933)* (holding that defendant's act of dumping sewage into a lake on plaintiff's land, contaminating a pasture, was significant enough to constitute a public nuisance).

(n17)Footnote 109. See *Georgia v. Tennessee Copper Co.,206 U.S. 230, 51 L. Ed. 1038, 27 S. Ct. 618, 619 (1907); United States v. Luce, 141 F. 385, 408-11 (Del. Cir. 1905)* (ruling that odors caused by defendant's fish operations were unreasonable). *See also, U.S. v. Rainbow Family, 695 F. Supp. 314, 321 (E.D. Tex. 1988)* (applying a balancing of the equities test to determine whether the conduct was unreasonable and what remedy to award. The court balances the harm caused by the interference and the harm to defendant and the public under particular judicial remedies.); *St. Joseph Lead Co. v. Prather, 278 F.2d 301, 303 (8th Cir. 1956)* (holding that the storing of dangerous explosives creates excessive danger to life, thus, making the conduct unreasonable); *Robie v. Lillis, 299 A.2d 155, 157, 161 (N.H. 1972)* (ruling that the boat storage shed and trucks did not create enough of an interference to the plaintiff compared to the economical value of the boat storage operation to the public).

Supp. To CHAPTER 73 PUBLIC NUISANCE

8-73 Thompson on Real Property, Thomas Editions Supp. to § 73.03

Supp. to § 73.03 Definitions of Public Nuisance

[Go To Main]

§ 73.03(b) Modern Definitions of Public Nuisance. [Go To Main]

Add:

Connecticut v. Am. Elec. Power Co., 582 F.3d 309, 369-70 (2d Cir. 2009) (following the Restatement (Second) of Torts § 821C in holding that "[c]onduct does not become a public nuisance merely because it interferes with the use and enjoyment of land by a large number of persons"); *Rhodes v. E.I. Du Pont de Nemours & Co., 657 F. Supp. 2d 751, 767-68 (S.D. W. Va. 2009)* .

Add:

Comer v. Murphy Oil USA, 585 F.3d 855 (5th Cir. 2009) ; *Connecticut v. Am. Elec. Power Co., 582 F.3d 309 (2d Cir. 2009)* ; 653 Quapaw Tribe of Okla. v. Blue Tee Corp., F. Supp. 2d 1166, 1186 (N.D. Okla. 2009).

Add:

Cole v. Asarco, Inc., 2010 U.S. Dist. LEXIS 17741 (holding that "the extent of the annoyance or damage inflicted upon the individuals may be unequal").

Change *State ex rel. Hoffman v. Swift & Co.* citation to *275 P. 176 (Kan. 1929)* .

Add:

Palco Invs., Inc. v. City of Springfield, 2005 Ohio 6838 (Ohio Ct. App. 2005) (ordinance requiring abatement and demolition of unsafe structures on private land); San Francisco v. Ballard, *39 Cal. Rptr. 3d 1 (2006)* (a building whose partial sprinkler system was inadequate under the building code to provide fire protection was a public nuisance).

Add:

Sanders v. Norfolk S. Corp., 2010 U.S. Dist. 4270.

Supp. To CHAPTER 73 PUBLIC NUISANCE

8-73 Thompson on Real Property, Thomas Editions Supp. to § 73.04

Supp. to § 73.04 Public and Private Nuisance Distinguished

[Go To Main]

Add:

K-Mart, Inc. v. Stewart, 2009 Ala. Civ. App. LEXIS 445 ; *Am. Energy Corp. v. Tex. Eastern Transmission, LP, 2010 U.S. Dist. LEXIS 28413* ; *Brockman v. Barton Brands, LTC., 2009 U.S. Dist. LEXIS 110387* .

Add:

Contreras v. 455 Pacific St., LLC, 2010 Conn. Super. LEXIS 645 (comparing public nuisance to private nuisance).

Thompson on Real Property, Thomas Editions

Copyright 2010, Matthew Bender & Company, Inc., a member of the LexisNexis Group.

Supp. To CHAPTER 73 PUBLIC NUISANCE

8-73 Thompson on Real Property, Thomas Editions Supp. to § 73.06

Supp. to § 73.06 Nuisances That Are Both Public and Private

[Go To Main]

Add:

Birke v. Oakwood Worldwide, *87 Cal Rptr. 3d 602 (Cal. Ct. App. 2009)* (refusing to apply the special injury requirement when a nuisance is both private and public).

Thompson on Real Property, Thomas Editions

Copyright 2010, Matthew Bender & Company, Inc., a member of the LexisNexis Group.

Supp. To CHAPTER 73 PUBLIC NUISANCE

8-73 Thompson on Real Property, Thomas Editions Supp. to § 73.07

Supp. to § 73.07 Examples of Different Types of Conduct Held to Be Public Nuisance

[Go To Main]

§ 73.07(a) The Wide Variety of Successful Public Nuisance Prosecutions. [Go To Main]

Add

Pless v. State, 633 S.E.2d 340 (Ga. App. 2006) (conviction for allowing an unrestrained animal to become a public nuisance).

Add

Edling v. Isanti County, 2006 Minn. App. Unpub. LEXIS 654 (Minn. Ct. App. Unpub. 2006) (mining and extraction activities found to be a public nuisance).

Add:

Connecticut v. Am. Elec. Power Co., 582 F.3d 309 (2d Cir. 2009) (vacating a motion to dismiss and holding that plaintiffs had standing to sue power corporations for their contribution to global warming).

Add:

Kempton v. City of Los Angeles, *81 Cal. Rptr. 3d 852 (2008)* (blocking a public sidewalk constitutes a public nuisance

per se).

Add:

Kuhns v. City of Allentown, 636 F. Supp. 2d 418, 438 (E.D. Pa. 2009) (holding that "obstruction of a public street constitutes a public nuisance").

Add:

People ex rel. Reisig v. Acuna, *106 Cal. Rptr. 3d 560 (Cal. Ct. App. 2010)* .

Add

Walker County v. Tri-State Crematory, 643 S.E.2d 324 (Ga. App. 2007) (county sought, on the basis of the public nuisance ordinance, to recover its costs in cleaning up human remains from the area of a crematorium; action denied, because the public nuisance ordinance authorized imposition only of a lien for abatement, not recovery of costs as damages).

Add:

Kleinman v. City of San Marcos, 597 F.3d 323 (5th Cir. 2010) (determining the validity of a city ordinance that made it a public nuisance to place or keep junked vehicles on their property).

Add:

City of New York v. A- 1 Jewelry & Pawn, Inc., 252 F.R.D. 130 (E.D. N.Y. 2008) (sales practices of a gun dealer could be a public nuisance).

§ 73.07(b) Special Problems in Nuisance Prosecutions. [Go To Main]

§ 73.07(b)(3) Obscenity.

Add:

Mutschler v. City of Phoenix, 129 P.3d 71 (2006) (sex club shut down under an ordinance declaring such clubs to be public nuisances).

§ 73.07(b)(5) Environmental Nuisances.

Angell v. Polaris Production Corp., 280 Fed. Appx. 748 (10th Cir. 2008) (allegation of public nuisance by contaminating groundwater).

Add:

Gail v. New England Gas Co., Inc., 460 F. Supp. 2d 314 (D. R.I. 2006) (action to recover damages for deposit of coal gasification waste material stated a public nuisance claim).

Town of Carbondale v. Gss Props., 140 P.3d 53 (Colo. Ct. App. 2005) (violation of watershed protection ordinance as a public nuisance and within the town's legislative authority).

Supp. To CHAPTER 73 PUBLIC NUISANCE

8-73 Thompson on Real Property, Thomas Editions Supp. to § 73.08

Supp. to § 73.08 The Judicial Procedure of Public Nuisance Prosecutions.

[Go To Main]

§ 73.08(a) Elements of a Cause of Action [Go To Main]

Add:

Boyne v. Town of Glastonbury, 955 A.2d 645 (Conn. App. 2008) (no public nuisance because conduct did not interference with a right that was common to the general public).

Add:

Sanders v. Norfolk S. Corp., 2010 U.S. Dist. LEXIS 4270 (holding that the threat of chlorine exposure and subsequent confusion for "only a number of hours" was not enough to reach the "substantial interference" threshold).

Add:

City of Milwaukee v. NL Industries, 762 N.W.2d 757 (Wis. App. 2008) (liability for intentional public nuisance requires proof that defendant anticipated the public nuisance).

Diess v. Pennsylvania Dept. of Transp., 935 A.2d 895 (Pa. Cmwlth. 2007) (the defendant did not have control of the embankment built with power plant fly ash, which ash caused the alleged public nuisance, and therefore could not be held liable for the public nuisance).

Add:

Native Village of Kivalina v. Exxon Mobil Corp., 663 F. Supp. 2d 863, 874 (N.D. Cal. 2009) (citing *People ex rel. Gallo v. Acuna, 60 Cal. Rptr. 2d 277 (Cal. Ct. App. 1997)* in holding that the degree of interference is judged based on a reasonable person standard).

§ 73.08(b) Parties. [Go To Main]

§ 73.08(b)(1) When a Private Plaintiff May Sue on a Public Nuisance

In line 2 of the subsection, add the word "proceeding" after "criminal."

Add:

Kelsey v. Schoolground Three, 877 A.2d 963 (Conn. Super. 2005) (because the plaintiff's injuries were not sustained while the plaintiff was exercising a public right, no private right of action could be based on a public nuisance claim).

Norfolk Southern Ry. Co., v. City of Pittsburgh, 235 Fed. Appx. 907 (3d Cir. 2007) (public nuisance action by railroad against city arising from landslides of city-owned property, causing boulders and other object to fall onto the railroad tracks).

Add:

Sanders v. Norfolk S. Corp., 2010 U.S. Dist. LEXIS 4270 (stating that "a plaintiff must allege direct and special damages different in kind from what the public may sustain"); *Rhodes v. E.I. Du Pont de Nemours & Co., 657 F. Supp. 2d 751, 768-69 (S.D.W. Va. 2009)* .

Add:

Overcash v. South Caroline Electric and Gas Company, 614 S.E.2d 619 (S.C. 2005) (the special injury requirement is satisfied only by injury to the plaintiff's real or personal property).

Add:

Rhodes v. E.I. Du Pont de Nemours & Co., 657 F. Supp. 2d 751, 771 (S.D.W. Va. 2009) (refusing to grant plaintiffs'

attempt at class certification).

§ 73.08(b)(2) Prosecution of Public Nuisance by Public Authority.

Add:

New Jersey Dept. of Environmental Protection v. Exxon Mobil Corp., 923 A.2d 345 (N.J. Super. 2007) (public nuisance claim for natural resource damages from the discharge of hazardous substances).

Add

New York v. Ametek, Inc., 473 F. Supp. 2d 432 (S.D. N.Y. 2007) (state law public nuisance claim not pre-empted by CERCLA).

Add:

See Rowe v. E.I. Dupont De Nemours & Co., 262 F.R.D. 451, 463 (holding that the Court will certify a subclass of individuals and allow them to bring a public nuisance claim).

Add:

Quapaw Tribe of Okla. v. Blue Tee Corp., 653 F. Supp. 2d 1166, 1186 (citing *Okla. Stat. tit. 50 §§ 10, 11*, allowing private persons to file a public nuisance claim if the defendant's actions are "specially injurious to themselves").

Add:

Melton v. Boustred, *107 Cal. Rptr. 3d 481 (Cal. App. 2010)* (holding that "the critical question [in a public nuisance action] is whether the defendant created or assisted in the creation of the nuisance").

Add:

Kuhns v. City of Allentown, 646 F. Supp. 2d 418, 437 (E.D. Pa. 2009) (holding that a private plaintiff must show substantial damages and a different kind of harm as compared to members of the general public).

Add:

Connecticut v. Am. Elec. Power Co., 582 F.3d 309, 366 (2d Cir. 2009) .

§ 73.08(c) Defenses. [Go To Main]

RTM Media, L.L.C. v. City of Houston, 584 F.3d 220 (5th Cir. 2009) (holding that City's Sign Code was constitutional and did not violate the *First Amendment*).

§ 73.08(d) Remedies. [Go To Main]

Add:

Connecticut v. Am. Elec. Power Co., 582 F.3d 309, 327 n.7 (2d Cir. 2009) (holding that an injunction will only be issued upon a showing by the plaintiff of "determinate and satisfactory evidence").

§ 73.08(e) Summary Abatement. [Go To Main]

Add:

Tea v. City of St. Paul, 2009 Minn. App. Unpub. LEXIS 681 (holding that "notice and opportunity to be heard should be granted without restraint").

CHAPTER 74 AN OVERVIEW OF LAND USE REGULATIONS

8-74 Thompson on Real Property, Thomas Editions § 74.01

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 74.01 Introduction to the Chapter.

The purpose of this chapter is to give an overview of various forms of public regulations intended to control use of land, especially to manage growth. The subject is a large one and has been treated in voluminous writings. Therefore, this rather brief chapter will describe the scope of the subject and point out the fundamental principles underlying these various forms of land use planning. The most important land use planning technique, of course, is zoning, so the chapter provides a more thorough background for zoning.

CHAPTER 74 AN OVERVIEW OF LAND USE REGULATIONS

8-74 Thompson on Real Property, Thomas Editions § 74.02

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 74.02 Zoning.

[Go To Supp]

§ 74.02(a) The Early Judicial Approval of Zoning.

Comprehensive zoning ordinances in American municipalities are a phenomenon of the 20th century. Among the earliest zoning regulations were those of New York in 1916 and Washington, D.C., in 1920. In 1926, the Department of Commerce created the Standard Zoning Enabling Act and invited the states to prepare state legislation modeled on that act. Most states thereafter enacted legislation delegating zoning power to their municipalities; the state legislation was not only patterned closely after the standard act, but has changed very little since enactment.

The zoning arrangements contemplated in these enabling acts were "cumulative" in the sense that less restrictive zones could also theoretically be used in any of the ways authorized by the more strict zones described in the ordinance. Newer zoning ordinances often authorize a larger variety of zones with more flexible arrangements for certain zone classifications.

Before 1926, state courts ruled inconsistently on the constitutionality of comprehensive zoning ordinances. This was changed by the landmark U.S. Supreme Court decision in Euclid v. Ambler Realty Co. in 1926, which declared such ordinances constitutionally proper exercises of police power and not a deprivation of private property: n1

> The ordinance now under review and all similar laws and regulations must find their jurisdiction in some aspect of the police power, asserted for the public welfare. The line in which this field separates the legitimate from the illegitimate assumption of power is not capable of precise delimitation. It varies with circumstances and conditions. A regulatory zoning ordinance, which would be clearly valid as applied to the great cities, might be clearly invalid as applied to rural communities. n2

The following year two other high court cases affirmed the constitutionality of comprehensive zoning ordinances. n3

In addition to the general issue of the constitutionality of comprehensive zoning ordinances, it was also necessary for the courts to define when otherwise valid ordinances might be unconstitutional in their specific applications. If application of a zoning restriction to a particular landowner is excessively burdensome and, in that application, does not

promote the public health, safety or general welfare, that application will not be upheld. n4

§ 74.02(b) The Constitutional Basis for Zoning.

One of the fundamental but essentially unstated principles of the American constitution is that each state government possesses certain inherent powers enabling it to govern and keep order. Most of these powers fall under the heading of police power, which has come to mean the state's power to maintain the public health, safety, morals and general welfare. n5 Generally, this means that reasonable restrictions can be placed on use of private property, and that the reasonableness of restrictions is a fluid concept, especially with recent expansions of the notion of public welfare as a justification for broader restrictions.

The police power is a power held by state governments and, if it is to be exercised by political subdivisions within the state, must be properly delegated. Thus, whether a municipality has the authority to zone, or has exercised that authority within the scope of its delegated power, are also issues that are constitutional in nature. n6 A local zoning ordinance is, as a legislative act, presumed to be constitutional. n7

If a zoning ordinance as applied to an individual landowner or group of landowners imposes excessive hardship, it may not be upheld, or it may result in an unconstitutional "taking" of private property without just compensation. This limitation is based on the Fifth Amendment to the U.S. Constitution, which declares, "nor shall private property be taken for public use, without just compensation." n8 If the exercise of land use regulations under the state's police power bears no relationship to a legitimate public purpose, or if it effectively deprives the landowner of virtually all use and value of the land, it may be considered a "taking" that can be accomplished only by the acquiring governmental entity providing just compensation to the landowner. If zoning is exercised for proper purposes, it will not be invalidated on constitutional grounds if it also happens to cause incidental injury to property held by individual landowners. n9

An application of a zoning ordinance that is a serious interference with legitimate use of land and deprives the land of most of its value may be determined to be compensable. n10 The severity of the interference and the relative loss of value have been judged on the basis of several criteria, summarized as follows:

> (1) existing uses and zoning of nearby property, including land in another municipality; (2) how much property value is reduced by the subject restrictions; (3) suitability of plaintiff's property for zoned purposes; (4) public gain measured against private loss; and (5) length of time the property has been vacant in light of surrounding land development. n11

The constitutional mandate for due process of law requires that parties affected by application of land use regulations have adequate notice and opportunity for hearing as to both enactment of the legislation and application of the legislation to their land. n12

The constitutional principle that citizens enjoy equal protection of the laws means that the land use regulations must bear a rational relationship to legitimate and permissible governmental purposes n13 and, further, that the restrictions may not be discriminatory in their application.

At the state level, most constitutional issues focus on whether the authority to zone has been properly delegated to the local governmental entities. n14 A few state constitutions specifically give local governmental bodies the authority to zone. n15 In most states, however, zoning powers under the constitution are vested in the state legislatures, n16 which then delegate that power to local governments by means of zoning enabling acts.

LEXIS: state! w/5 power! w/5 zon! w/30 constitution!

§ 74.02(c) The Common Law and Statutory Basis for Zoning.

§ 74.02(c)(1) Zoning as a Form of Police Power.

The power to zone is an exercise of the police power which rests inherently with state governments so that they may provide for the health, safety and welfare of the people. This was confirmed in 1926, when the United States Supreme Court, on its first occasion to review a zoning ordinance for constitutionality, n17 affirmed that zoning power was a form of police power, and that police power was not subject to precise definition:

> The ordinance now under review, and all similar laws and regulations, must find their justification in some aspect of the police power, asserted for the public welfare. The line which in this field separates the legitimate from the illegitimate assumption of power is not capable of precise delimitation. It varies with circumstances and conditions. n18

This view of zoning power as a form of police power has been reiterated both by the United States Supreme Court n19 and by various state courts. n20 As with all other exercises of police power, zoning regulations, to be valid, must have a reasonable relation to the public health, safety, morals or general welfare. n21

The police power is an inherent power of each state but not of any of a state's political subdivisions. n22 Thus, a municipality may enact zoning regulations, as an exercise of police power, only if such power has been delegated to it by the state legislature. In many jurisdictions municipal zoning regulations are viewed as a valid exercise of the municipality's general police power, as it relates specifically to the regulation of land use. n23 In other jurisdictions, however, it has been held that zoning is purely statutory in nature and cannot be carried out under a general grant of police power. n24 Under either view, the delegation of zoning power from the state to the municipality must either be specific or be necessarily implied from the terms of a statute, charter or constitutional provision. n25

COMPUTER-ASSISTED RESEARCH

LEXIS: zon! w/15 police w/1 power! w/5 state!

§ 74.02(c)(2) The Statutory Foundation for Zoning.

§ 74.02(c)(2)(i) State Enabling Acts Generally.

The legislature of each state has delegated to local governments in the state the power to enact zoning regulations. n26 These enabling laws, modeled after the Standard State Zoning Enabling Act, typically authorize municipalities to enact comprehensive zoning ordinances. n27 The constitutionality of such enabling laws has consistently been upheld in the courts. n28

A typical state enabling act sets forth the purposes of zoning and the factors that justify a municipality exercising the zoning power. n29 The acts then usually prescribe procedures to be followed in adopting and administering zoning regulations, and impose limitations on the exercise of the zoning power by local governments. n30 If a municipality derives its zoning power entirely from an enabling statute, its zoning ordinance is enacted pursuant to the provisions of the enabling act. n31 Because a local zoning ordinance is an act of police power delegated from the state, the ordinance is subject to the same requirements that apply to any exercise of state police power, *i.e.*, the ordinance must reasonably relate to the health, safety, convenience, morals, or general welfare of the community. n32

§ 74.02(c)(2)(ii) The Standard State Zoning Enabling Act.

A Commerce Department advisory committee published the first standard State Zoning Enabling Act in 1926. This was to be available to the states as a model for their individual state enabling acts delegating zoning power to municipalities.

This model act was also revised in 1926. In this revised form, this model or standard act provides for a general delegation of power from the state to a municipality to regulate the use of property. The zoning enabling legislation in most states is patterned entirely or partially on the provisions of the Standard Act. These provisions are summarized as follows:

Section 1 grants to the legislative bodies of cities and incorporated villages the power to zone. n33 This section recognizes the relationship between zoning and traditional police power goals by declaring that the zoning power is delegated "[f]or the purpose of promoting health, safety, morals, or the general welfare of the community." It sets out specific uses that may be the subject of zoning regulations, while also broadly authorizing zoning for "other purposes." n34

Section 2 authorizes local legislative bodies to divide municipalities into districts or "zones," and requires uniformity or consistency of land use regulation within each district. n35 This division of the community into districts or "zones," with its resulting restrictions on land use, is a common characteristic of "Euclidian zoning." n36

Section 3 requires that zoning regulations be made in conformity with a "comprehensive plan," n37 and sets out the specific purposes -- relating to public safety, health and welfare -- for which zoning regulations may be enacted. Factors to be considered in fashioning zoning regulations include the character of the district, the suitability of the district for particular uses, the conservation of property values, and the encouragement of the most appropriate uses of land.

Section 4 requires each municipal legislature to create procedures for enacting, enforcing and amending zoning regulations, including provision for notice and hearing. n38

Section 5 confers on all the municipal legislatures specific authority to amend or repeal regulations, and also provides some procedural protections for those directly affected. n39

Section 6 requires the municipal legislature to appoint a zoning commission -- or to designate a city planning commission as a zoning commission -- to recommend a zoning plan for adoption, to conduct hearings on such plan, and to submit a final report to the local legislative body. n40 The legislature is not permitted to take any action on a zoning ordinance until after it receives the commission's final report. After receiving the zoning commission's report, the local legislative body must give notice and hold a public hearing on the proposed zoning action.

Section 7 authorizes a board of adjustment to be appointed, and contains detailed provisions concerning the board's powers. n41 This section, which constitutes nearly half the Act, also sets out detailed provisions governing the composition, jurisdiction and administrative procedures of the board. n42 The board of adjustment has original and appellate powers to hear and decide appeals from orders, decisions or determinations of administrative officials; to hear and decide requests for special exceptions to the terms of the ordinance; and upon appeal, to authorize variances from the terms of the ordinance, if the variances are not contrary to the public interest and if literal enforcement of the ordinance's provisions will result in unnecessary hardship.

Section 7 also sets forth the circumstances and procedures for taking an appeal to the board. Specifically, an appeal may be taken by "any person aggrieved" or by "any officer, department, board, or bureau of the municipality affected" by a decision of an administrative officer. n43 The appeal must be taken "within a reasonable time," and it stays all proceedings connected with the appealed action, unless the stay would possibly cause imminent danger to life or property. n44 The board must give public notice of the hearing of the appeal, as well as "due notice" to the parties in interest; the decision of the board -- following such hearing -- must be made "within a reasonable time." n45

Section 7 also allows judicial review of the board's decision. Within thirty days of the filing of the decision, certain specified aggrieved or interested persons may seek judicial review of the board's action and must specify the bases of the alleged error or errors. n46 The court may then issue a writ of certiorari to review the decision of the board of

adjustment, and may then reverse, affirm or modify the decision under review. n47

Section 8 authorizes local legislative bodies to enforce the enabling act and any zoning regulations made thereunder. n48 Thus, the question of how to deal with specific enforcement problems is left to local discretion. While acknowledging this discretion, however, the Standard Act declares, that violations of zoning ordinances are misdemeanors and recommends that local legislative bodies punish such conduct by both criminal and civil penalties. n49 For cases where such penalties may be ineffective, §8 also gives local authorities the right to commence proceedings to prevent unlawful erection, construction, reconstruction, alteration, repair, conversion, maintenance or use of buildings or land. n50

Section 9 provides that in the event of a conflict with other state or federal statutes or local ordinances, the more restrictive provisions will govern. n51

Some municipalities obtain their zoning powers from home rule provisions contained in state constitutions or state statutes. These home rule provisions typically give a municipality blanket authority to exercise all powers of local self-government that tend to promote public health and welfare, and to adopt and enforce local regulations that do not conflict with general laws. n52

When a municipality adopts a charter in conformity with the state's home rule provisions, the charter becomes the organic law of the municipality. A home rule charter may authorize adopting and amending zoning ordinances and may prescribe procedures to be followed in such adoption or amendment. n53 Even in those states with home rule charter provisions, a concurrently valid zoning enabling act will govern the exercise of zoning power where the charter does not authorize zoning by the local government, where a municipality has not adopted a charter, or where there is a conflict between local regulations and general laws. n54

COMPUTER-ASSISTED RESEARCH

LEXIS: state zoning enabling act

§ 74.02(c)(3) Limits on the Exercise of Zoning Power.

§ 74.02(c)(3)(i) Constitutional Limitations.

The zoning power of local governments is limited by the same constitutional limitations that restrict the police power of the state itself. n55 A zoning regulation must be substantially related to the public health, safety, morals or general welfare, and the regulation must be reasonable both by its terms and in its application. n56 Due process and equal protection guarantees must be observed so that zoning power is not exercised in an unreasonable, oppressive, arbitrary, or discriminatory manner. n57

No precise test is used to determine whether a particular zoning restriction is reasonable and non-discriminatory. Zoning restrictions are upheld if legitimate governmental objectives are intended to be served and if the means used to exercise the police power of zoning have any substantial relation to those objectives. n58 Therefore, a zoning ordinance will be held to violate due process if it interferes with the exercise of private property rights and has no substantial relation to a legitimate governmental purpose, n59 or if there is no reasonable relationship between the end sought to be achieved by the regulation and the means used to achieve that goal. n60

Despite those standards a zoning ordinance enjoys a strong presumption of validity, n61 unless it is arbitrary or unreasonable on its face. n62 A finding that a zoning ordinance is invalid is likely where there is no reasonable basis for the restriction and the public benefit is small compared to the hardship imposed upon the individual property owner. n63 The party attacking the validity of an ordinance has the burden of proving that the ordinance bears no reasonable

relationship to public health, morals, safety or welfare. n64

Courts ruling on the validity of an ordinance will consider such factors as the character of the neighborhood, the traffic conditions on adjacent streets, how nearby property is used, the authorized land usage or zoning of nearby property, the extent to which property values are diminished by the zoning restriction, the effect that removal of the restriction would have on the value of neighboring property, and the public benefits as compared to the hardships imposed on individual property owners. n65 Because of the strong presumption in favor of validity, a zoning ordinance will be struck down only if that presumption is overcome by a clear, affirmative showing that the law is arbitrary or unreasonable. n66

COMPUTER-ASSISTED RESEARCH

LEXIS: w/2 power! w/30 due process or equal protection

§ 74.02(c)(3)(ii) Statutory Limitations.

The exercise of zoning power is further limited by the terms of the state zoning enabling acts. A zoning ordinance will not be upheld to the extent it exceeds the powers delegated by the state enabling statute. n67 Thus, where an enabling statute prescribes a particular procedure to be followed in the enactment of an ordinance, the parties must adhere strictly to that procedure; n68 otherwise, the ordinance will be declared void. n69 A zoning ordinance need not include all restrictions authorized by the enabling act, n70 but may not impose any restrictions that the act does not authorize. The basic judicial test for the validity of a zoning ordinance is whether there is a substantial relationship between the ordinance and the furtherance of any of the general objectives enumerated in the enabling statute. n71 In resolving that question, the court will give effect to the presumption favoring the validity of the ordinance.

§ 74.02(c)(3)(iii) Territorial Limitation.

One further limitation of zoning ordinances is a territorial limitation. Unless there is specific authority to the contrary, zoning laws of a municipality may not effectively impose restrictions beyond the municipality's territorial boundaries. n72 However, it *is* proper for a zoning authority to consider regulatory needs in contiguous regions in fashioning a local zoning ordinance. n73 Because zoning must be exercised for the public welfare, when a zoning regulation has a substantial impact beyond the municipality's own borders, the welfare of neighboring citizens must also be considered. n74

§ 74.02(c)(3)(iv) The Limitations of Governmental Immunity.

A governmental entity may seek immunity from the application to itself of its own zoning ordinance or from zoning restrictions of other entities that are of equal, higher or lower status. n75 Such immunity, when granted, usually runs in favor of the governmental entity which enacted the regulation. n76 This immunity may not be extended to private parties, n77 except those leasing municipal property to perform municipal functions. n78 Conversely, where a governmental agency leases property from a private owner, there is no governmental exemption from zoning restrictions, even though the property will be used for governmental purposes.

Several tests have been formulated to determine whether governmental immunity applies in a particular situation: the governmental proprietary test; the superior sovereign test; the eminent domain theory; the statutory guidance test; and the balancing of interests test. n79 These tests are individually discussed below; however, one court has summarized the tests as follows:

> In deciding this type of case, the courts have used varying tests. One approach utilized by a number of courts is to rule in favor of the superior sovereign. Thus, where immunity from a local zoning ordinance is claimed by an agency occupying a superior position in the governmental hierarchy, it is presumed that immunity was intended in the absence of express statutory language to the contrary. A

> second test frequently employed is to determine whether the institutional use proposed for the land is "governmental" or "proprietary" in nature. If the political unit is found to be performing a governmental function, it is immune from the conflicting zoning ordinance. On the other hand, when the use is considered proprietary, the zoning ordinance prevails. Where the power of eminent domain has been granted to the governmental unit seeking immunity from local zoning, some courts have concluded that this conclusively demonstrates the unit's superiority where its proposed use conflicts with zoning regulations. Other cases are controlled by explicit statutory provisions dealing with the question of whether the operation of a particular governmental unit is subject to local zoning. [Citations omitted.] n80

The traditional, and formerly the prevailing, governmental immunity test is the governmental-proprietary concept. Under this approach, a governmental unit is considered immune from local zoning ordinances where the unit performs governmental functions, but will be subject to such laws when it acts in a proprietary capacity. n81 Governmental functions are municipal acts pursuant to obligations imposed by legislative mandate. Proprietary functions are permissive or discretionary -- that is, acts that the political unit has the discretionary power but not the duty to perform. n82

> The criteria used in determining whether an activity is governmental or proprietary are: (1) a municipality performs a governmental function when doing acts required by legislative mandate whereas it acts in a proprietary capacity when performing by legislative permission; and (2) a municipal function is governmental when the acts involve benefit to the general public as distinguished from acts which involve private benefits and in which public benefit is indirect. [Citations omitted.] n83

However, in applying these guidelines for determining whether a particular activity is immune from zoning regulations, the courts often reach different conclusions on similar facts. n84 Increasing dissatisfaction with this test has led some courts to avoid using this test, if there are other grounds on which to base their decision. n85

Courts in a few jurisdictions now apply the superior sovereign test to resolve governmental immunity questions. This approach presumes that governmental units or agencies occupying a superior position in the governmental hierarchy are not subject to zoning regulations enacted by a lower echelon of government, unless there is express statutory language to the contrary. n86 This presumption is based on the rationale that higher agencies have broader authority and a jurisdiction that transcends local boundaries. n87 Nevertheless, even under this test a governmental unit is not allowed to flagrantly disregard zoning restrictions of subordinate units in its regulation of land uses. Where the reasonableness of governmental action is subject to question, the presumption of immunity can be rebutted. n88

A third test, the eminent domain theory, is based on the notion that property taken by governmental eminent domain power or purchased in lieu of condemnation, is no longer subject to local zoning ordinances. n89 Therefore, any political unit with authority to condemn is automatically immune from zoning restrictions. Some courts do not accept any form of absolute immunity derived from this test, but do accept a case-by-case immunity based on this test as modified by a rule of reason. This requires the court to examine the reasonableness of the condemning authority's action in light of the nature of the use and the political and geographical context of the use. n90

Another test to determine whether governmental immunity from local zoning ordinances applies is the statutory guidance test. Under this test, state statutes that direct or authorize a local governmental agency to undertake a specified function are generally held to be superior to and immune from local zoning ordinances. n91 Some courts, however, are reluctant to assume a blanket immunity on this basis, and have held that a statutory grant of authority to perform a specified function does not automatically exempt the state agency from local zoning restrictions and that such exemption must be explicitly provided by the statute. n92

Some courts see all of the above tests as too rigid and have instead adopted a so-called "balancing of interests" test that

takes into consideration the nature of the instrumentality seeking immunity, the land use involved and its effects, and the public interest served by such use. n93

LEXIS: zon! w/15 government! w/3 immun! w/30 (governmental w/1 proprietary) or (superior w/1 sovereign) or eminent domain or (statutory w/1 guidance) or (balancing w/1 interests!)

§ 74.02(d) General Principles of Zoning in Application.

Zoning authority is usually exercised by a municipality, but other units of local government, such as a county or a region, may also have zoning and other land use regulatory authority delegated to them. In most zoning ordinances, a zoning commission or planning commission is established to advise the local city council or other legislative body on land use regulatory matters, and in many instances, the legislative body may not act until the commission has fulfilled its advisory function. n94

When the local legislative authority does act, it must first give notice of its intent to act, and adequate opportunity for public hearing on its proposed action. n95 If a building code or a housing code is considered to be in effect a building code, because it controls development and land use, then the due process requirements of notice and hearing for zoning ordinances must be employed, or else the code will not be upheld. n96 Under some ordinances, protests filed by a certain percentage of affected landowners will increase the margin of majority necessary to adopt the zoning ordinance. Virtually all zoning ordinances also establish a board of appeals that can grant variance relief in individual cases of hardship.

In typical application, a zoning ordinance will divide a municipality into areas, each with a specifically defined range of permissible uses, usually classed generally as residential, commercial, and industrial. Within each such general class of uses are variants of use classifications, and for each of these will be individual specifications, such as population density, bulk, height, setback and side clearance requirements. Strict uniformity is varied by exceptions included in the enabling act or zoning ordinance itself, legislative provisions for relief of undue hardship on individual landowners, exceptions decreed as a result of judicial action, and by accommodation of nonconforming uses.

Exceptions to specific provisions of a zoning ordinance are uses outside the specific requirements for a zoning district but which are otherwise compatible with the underlying purpose of that zoning classification. n97

The exceptions may be either categorically stated in the ordinance, or their granting may be left to the discretion of a local legislative or administrative body. In litigation over the statutory exceptions, courts have differed over whether statutory language should be strictly n98 or liberally construed. n99 If an administrative body is given discretion in granting exceptions, the legislation must also provide some guidance, in the form of statutory standards, in exercising this discretion. n100

Further discretionary authority is usually given in the statutory provisions for variances. n101

A variance, unlike an exception, is a deviation from the requirements of a specific zone that is prohibited by and generally inconsistent with the purpose and provisions of that zone. n102 Normally, use variances are granted only if the applicant can show that denial will cause unusual hardship, n103 and that granting the exception will not undermine the zoning plan generally. n104 A variance is granted as an administrative act. By contrast, the zoning ordinance itself may be amended by legislative authority, and an amendment, too, is a form of relief from the application of the zoning ordinance; however, an amendment to a zoning ordinance must still conform to the overall or comprehensive plan which the zoning ordinance should be implementing. n105

In many municipalities the question has arisen whether the municipality itself is bound by its own zoning ordinance. It has been held that a municipality which is exercising its governmental as opposed to its proprietary functions is exempt from its own zoning ordinance. n106 It has also been held that a higher governmental authority, such as a state, may not be subject to the zoning restrictions of a municipality, which has, after all, derived its authority from the state. n107

In addition to the exceptions, variances, amendments, and exemptions described above, zoning ordinances typically provide for acceptance of prior nonconforming uses. If certain land uses inconsistent with the zoning restrictions were practiced before enactment of the zoning ordinance, they will usually be allowed to continue. Continuation may either be limited to a specific finite period of time, n108 or until the use ceases once. n109 Usually, no great variation in or extension of the prior nonconforming use is permitted without endangering continuation. n110 A nonconforming use is usually defined within the zoning ordinance or the enabling legislation.

§ 74.02(e) Modern Developments in Zoning.

The essentially negative approach of traditional zoning, which defines what cannot be done within a distinct area, has not been adequate to meet the challenges of urban sprawl and huge new demands for municipal services, which seem to call for affirmative land use regulation measures. In general, the conflicts over newer, more assertive techniques of zoning are contested, on the one hand, by the governmental authorities acting in what they consider to be the common good and, on the other hand, by private developers seeking to maximize their return on real estate investments.

One of the techniques intended to add flexibility to the traditionally rigid "Euclidian" zoning is the so-called "floating zone":

> The concept of the floating zone involves a special detailed use district of undetermined location in which the proposed kind, size and form of buildings must be approved in advance. It is legislatively recognized to be compatible with the region in which it eventually locates if particular use limitations and development standards (such as site plan approval and large open space requirements) are met and the specific application is not unreasonable. n111

The floating zone is also sometimes referred to as an overlay district, and may be installed only after the ordinance requirements are completely fulfilled.

Another newer concept is cluster zoning, by which residential buildings are permitted to be clustered in more dense configurations, under the condition that compensatory open, common space is provided elsewhere in the development. n112 Thus the specific open space requirements for individual lots may be waived in order to provide larger and more effective open space resources for an entire development. The greater dwelling density may also reduce the need for certain common facilities, such as roads and utilities.

The related concept of contract zoning confers upon a landowner the benefit of an amendment in the zoning ordinance responsive to the wishes of the landowner, in return for which the landowner agrees to observe certain specific restrictions and conditions. A variant of this is conditional zoning, consisting of a pre-enacted amendment, which becomes effective when the specified conditions are met. n113

Zoning may also be enacted for special purposes, such as preserving wetlands or historic structures and sites. Under the rather common historic district ordinances, a community may subject to review any proposed alterations of structures within a designated historic district, and may retain the power to block disapproved changes or proposed demolitions. The major issue with such special purpose zoning is whether the impact of use restrictions on individual landowners is so severe that an unconstitutional uncompensated taking has occurred. n114

Another rather typical type of special purpose zoning is that intended to protect the public, such as floodplain zoning.

This type of zoning usually imposes significant restrictions on residential or commercial development in the designated area, thus drastically devaluing the affected land; consequently, the most restrictive of these measures may be considered unconstitutional. n115 The general trend, however, is to sustain such of these ordinances as are clearly linked to public health and safety. n116 A sub-specialty of this type of zoning is the so-called "airport zoning," which may limit the height of structures or other objects, may limit new residential construction in the proximity of landing zones, or may limit certain types of air operations and activities. As with other specialty zoning, it is possible that restrictions go so far that they will be considered as unconstitutional uncompensated takings. n117

Zoning techniques are themselves morally neutral, but can be used by parties or factions pursuing particular interests in ways that may be harmful or contrary to the public interest. Sometimes a residential zone is established with requirements concerning the size and expense of each dwelling; the resulting financial barriers to prospective landowners who may wish to obtain land located within that zone have the effect of excluding persons of lesser means. When such "exclusionary zoning" has the effect -- or, in some cases, the original purpose -- of excluding low income or minority persons from acquiring property within the zone, it may be subject to constitutional challenge. n118 However, for the most part, the following types of restrictions will be upheld, even if an incidental exclusionary effect is the result:

(1) the zoning of vacant residential land for acreage minimums, thereby reducing the total supply of development lots and increasing the overall cost of land in a community;

(2) requiring minimum building sizes, which necessitate the construction of bigger and more expensive housing;

(3) the exclusion of apartments and other types of multiple dwellings;

(4) prohibition of mobile homes;

(5) limitations on the number of bedrooms per housing unit;

(6) age restrictions;

(7) regulations that limit the number of persons unrelated by blood or marriage who may reside together; and the resulting prohibition of social welfare facilities such as group homes. n119

Other communities experiencing very rapid growth use zoning to control the pace of development. After preparing a master plan outlining the pattern of future development, the actual timing (and location) of building permits and other manifestations of growth is limited and controlled so that provision of public services and facilities can keep up. It is important that the communities find some basis in their delegated authority for imposing such restrictions and that the limits on development not extend over too long a time. n120

Variants of this so-called "time-controlled zoning" include quota limitations on the number of construction, water connection or sewer connection permits issued during specific periods of time, restrictions on approval of new subdivisions, imposition of maximum population limits, exclusion of development from zones indicated on official planning maps, and other forms of exclusions, such as multiple dwelling units and minimum lot size restrictions. n121

All restrictive and exclusionary techniques may encounter judicial disapproval if they are perceived as attempts to permanently exclude or restrict development. n122 The exclusionary practices of individual communities may be ameliorated and the growth burdens more evenly distributed if planning and control devices are conducted on a regional basis.

Considerable controversy has dogged another development restriction technique, which is the imposition of various

exactions from builders who actually construct the new dwellings or commercial areas. The rationale and operation of this form of control have been summarized as follows:

> The movement of new residents from major cities to the suburbs has forced local governments to provide new streets, water and sewer lines, recreational facilities, police and fire buildings and schools. In order to avoid placing an equitable share of the increased financial burden on established residents to provide these facilities, statutes empower local communities to exact dedications of land from subdividers, or fees in lieu of dedication.
>
> The dedication of streets, utility facilities and related easements by subdivision builders is not a new development in land use law. More recently, however, local governing bodies have been authorized to require new types of land dedication as a condition for subdivision approval. These new and more controversial exactions include dedication of parks and recreational land, school sites and open space generally. Developers have been required alternatively to pay fees in lieu of dedication.
>
> The rationale for dedication statutes is that a subdivider realizes a profit (in the form of increased land value) because of governmental approval of his subdivision. In return for this benefit, the developer is required to satisfy the increased need he has created in the community for facilities such as schools, parks, and the like. The ultimate cost of the land or fee exaction, is passed on by the developer to new homeowners, who will pay more than their "fair share" for community schools, parks and other community facilities financed by builder exactions. Despite this fact, courts have uniformly upheld the constitutionality of state dedication statutes, including those providing for dedication of park and recreational land, school sites and open space. n123

Local dedication ordinances, on the other hand, have not been upheld unless their delegated authority from the state is clear, n124 or dedication or exaction is not adequately justified. n125

Ambassador Books & Video, Inc. v. City of Little Rock, 20 F.3d 858 (8th Cir. 1994) (zoning ordinance upheld unless

it bears no rational relationship to the public health, safety, or general welfare).

(n33)Footnote 33. Sec. 1. Grant of Power:

> For the purpose of promoting health, safety, morals, or the general welfare of the community, the legislative body of cities and incorporated villages is hereby empowered to regulate and restrict the height, number of stories, and size of buildings and other structures, the percentage of a lot that may be occupied, the size of yards, courts, and other open spaces, the density of population, and the location and use of buildings, structures, and land for trade, industry, residence, or other purpose.

(n34)Footnote 34. *Id.* Most enabling acts today contain a grant of power similar to that found in the Standard Act. In some cases, however, the specific types of regulation authorized by the Act have been omitted. Vermont, on the other hand, has gone beyond the Standard Act in permitting its municipalities that have adopted a comprehensive plan and created a planning commission under the Municipal and Regional Development Act (24 Vt. Stat. Ann. §§4301 *et seq.*) to prohibit, restrict, and regulate land development, including specific uses of land, water courses and other bodies of water. 24 Vt. Stat. Ann. §4401(b)(A).

(n35)Footnote 35. Sec. 2. Districts:

> For any or all of said purposes the local legislative body may divide the municipality into districts of such number, shape, and area as may be deemed best suited to carry out the purposes of this act; and within such districts it may regulate and restrict the erection, construction, reconstruction, alteration, repair, or use of buildings, structures, or land. All such regulations shall be uniform for each class or kind of building throughout each district, but the regulations in one district may differ from those in other districts.

(n36)Footnote 36. *See Village of Euclid v. Ambler Realty Co., 272 U.S. 365 (1926)* where such zoning by district was sanctioned by the Supreme Court. It was from this case that the term "Euclidean zoning" was derived.

(n37)Footnote 37. Sec. 3. Purposes in View:

> Such regulations shall be made in accordance with a comprehensive plan and designed to lessen congestion in the streets; to secure safety from fire, panic, and other dangers; to promote health and the general welfare; to provide adequate light and air; to prevent the overcrowding of land; to avoid undue concentration of population; and to facilitate the adequate provision of transportation, water, sewerage, schools, parks, and other public requirements. Such regulations shall be made with reasonable consideration, among other things, to the character of the district and its peculiar suitability for particular uses, and with a view to conserving the value of buildings and encouraging the most appropriate use of land throughout such municipality. *Price v. Dahl, 912 P.2d 541 (Alaska 1996)* (proposed referendum election challenging comprehensive plan).

(n38)Footnote 38. Sec. 4. Method of Procedure:

> The legislative body of such municipality shall provide for the manner in which such regulations and restrictions and the boundaries of such districts shall be determined, established, and enforced, and from time to time amended, supplemented, or changed. However, no such regulation, restriction, or boundary shall become effective until after a public hearing in relation thereto, at which parties in interest and citizens shall have an opportunity to be heard. At least 15 days' notice of the time and place of such hearing shall be published in an official paper, or a paper of general circulation, in such municipality.

(n39)Footnote 39. Sec. 5. Changes:

Such regulations, restrictions, and boundaries may from time to time be amended, supplemented, changed, modified, or repealed. In case, however, of a protest against such change, signed by the owners of 20 percent or more either of the area of the lots included in such proposed change, or of those immediately adjacent in the rear thereof extending ... feet therefrom, or of those directly opposite thereto extending ... feet from the street frontage of such opposite lots, such amendment shall not become effective except by the favorable vote of three-fourths of all the members of the legislative body of such municipality. The provisions of the previous section relative to public hearings and official notice shall apply equally to all changes or amendments.

(n40)Footnote 40. Sec. 6. Zoning Commission:

In order to avail itself of the powers conferred by this act, such legislative body shall appoint a commission, to be known as the zoning commission, to recommend the boundaries of the various original districts and appropriate regulations to be enforced therein. Such commission shall make a preliminary report and hold public hearings thereon before submitting its final report, and such legislative body shall not hold its public hearings or take action until it has received the final report of such commission. Where a city planning commission already exists, it may be appointed as the zoning commission.

(n41)Footnote 41. Sec. 7. Board of Adjustment:

Such local legislative body may provide for the appointment of a board of adjustment, and in the regulations and restrictions adopted pursuant to the authority of this act, may provide that the said board of adjustment may, in appropriate cases and subject to appropriate conditions and safeguards, make special exceptions to the terms of the ordinance in harmony with its general purpose and intent and in accordance with general or specific rules therein contained ...

The board of adjustment shall have the following powers:

To hear and decide appeals where it is alleged that there is error in any order, requirement, decision, or determination made by an administrative official in the enforcement of this act or of any ordinance adopted pursuant thereto.

To hear and decide special exceptions to the terms of the ordinance upon which such board is required to pass under such ordinance.

To authorize, upon appeal in specific cases, such variance from the terms of the ordinance as will not be contrary to the public interest, where, owing to special conditions, a literal enforcement of the provisions of the ordinance will result in unnecessary hardship, and so that the spirit of the ordinance shall be observed and substantial justice done.

(n42)Footnote 42. These provisions are set out in §7 of the Standard Act, as follows:

The board of adjustment shall consist of five members, each to be appointed for a term of three years and removable for cause by the appointing authority upon written charges and after a public hearing.

Vacancies shall be filled for the unexpired term of any member whose term becomes vacant.

The board shall adopt rules in accordance with the provisions of any ordinance adopted pursuant to this act. Meetings of the board shall be held at the call of the chairman and at such other times as the board may determine. Such chairman, or in his absence the acting chairman, may administer oaths and compel the attendance of witnesses. All meetings of the board shall be open to the public. The board shall keep minutes of its proceedings, showing the vote of each member upon each question, or if absent or failing to vote, indicating such fact, and shall keep records of its examinations and other official actions, all of which shall be immediately filed in the office of the board and shall be a public record.

Most states' enabling acts have followed the Standard Act's language for the authority and powers of boards of adjustment. Some states, however, use the terms "board of appeals" or "board of review" instead of "board of adjustment." In New York, the term "board of appeals" is used. *See* N.Y. Gen. City Law §81; N.Y. Village Law §7-700 *et seq.* N.Y. Town Law §261 *et seq.*

Curran v. Church Community Hous. Corp., 672 A.2d 453 (R.I. 1996)(the zoning board acted within its authority in approving a housing project for the elderly, even though the project was not in accordance with the then existing zoning ordinance).

(n43)Footnote 43. Section 7 of the Standard Act, in pertinent part, states:

Appeals to the board of adjustment may be taken by any person aggrieved or by any officer, department, board, or bureau of the municipality affected by any decision of the administrative officer. Such appeal shall be taken within a reasonable time, as provided by the rules of the board, by filing with the officer from whom the appeal is taken, and with the board of adjustment, a notice of appeal specifying the grounds thereof. The officer from whom the appeal is taken shall forthwith transmit to the board all the papers constituting the record upon which the action appealed from was taken.

(n44)Footnote 44. The effects of such appeals are set out in §7 as follows:

An appeal stays all proceedings in furtherance of the action appealed from, unless the officer from whom the appeal is taken certifies to the board of adjustment after the notice of appeal shall have been filed with him that by reason of facts stated in the certificate a stay would, in his opinion, cause imminent peril to life or property. In such case, proceedings shall not be stayed otherwise than by a restraining order which may be granted by the board of adjustment or by a court of record on application and notice to the officer from whom the appeal is taken and on due cause shown.

(n45)Footnote 45. Section 7 of the Act, in relevant part, provides:

The board of adjustment shall fix a reasonable time for the hearing of the appeal, give public notice thereof, as well as due notice to the parties in interest, and decide the same within a reasonable time. Upon the hearing any party may appear in person or by agent or by attorney ... .

(n46)Footnote 46. Provision is made for judicial review in §7 as follows:

Any person or persons, jointly or severally, aggrieved by any decision of the board of adjustment, or any taxpayer, or any officer, department, board, or bureau of the municipality, may present to a court of record a petition, duly verified, setting forth that such decision is illegal, in whole or in part, specifying

the grounds of the illegality. Such petition shall be presented to the court within 30 days after the filing of the decision in the office of the board.

(n47)Footnote 47. This role of the courts is described in §7 of the Standard Act, as follows:

Upon the presentation of such petition the court may allow a writ of certiorari directed to the board of adjustment to review such decision of the board of adjustment and shall prescribe therein the time within which a return thereto must be made and served upon the relator's attorney, which shall not be less than 10 days and may be extended by the court. The allowance of the writ shall not stay proceedings upon the decision appealed from, but the court may, on application, on notice to the board, and on due cause shown, grant a restraining order.

If, upon the hearing, it shall appear to the court that testimony is necessary for the proper disposition of the matter, it may take evidence or appoint a referee to take such evidence as it may direct and report the same to the court with his findings of fact and conclusions of law, which shall constitute a part of the proceedings upon which the determination of the court shall be made. The court may reverse or affirm, wholly or partly, or may modify, the decision brought up for review.

Costs shall not be allowed against the board unless it shall appear to the court that it acted with gross negligence, or in bad faith, or with malice in making the decision appealed from.

All issues in any proceeding under this section shall have preference over all other civil actions and proceedings.

(n48)Footnote 48. Sec. 8. Enforcement and Remedies:

The local legislative body may provide by ordinance for the enforcement of this act and of any ordinance or regulation made thereunder. A violation of this act or of such ordinance or regulation is hereby declared to be a misdemeanor, and such local legislative body may provide for the punishment thereof by fine or imprisonment or both. It is also empowered to provide civil penalties for such violations.

(n49)Footnote 49. Most state zoning enabling statutes incorporate at least some of the enforcement provisions of the Standard Act. Some declare that a statutory violation constitutes a misdemeanor punishable by criminal sanctions. A most effective method of enforcement where the proposed construction or alteration violates a zoning ordinance is the withholding of building permits. Although this method is not mentioned in the Standard Act, it has been statutorily adopted in a number of jurisdictions, including Massachusetts (Mass. Ann. Laws ch. 40A, §12) and Nevada (Nev. Rev. Stat., §278.570).

(n50)Footnote 50. These provisions are set out in §8, as follows:

In case any building or structure is erected, constructed, reconstructed, altered, repaired, converted, or maintained, or any building, structure, or land is used in violation of this act or of any ordinance or other regulation made under authority conferred hereby, the proper local authorities of the municipality, in addition to other remedies, may institute any appropriate action or proceedings to prevent such unlawful erection, construction, reconstruction, alteration, repair, conversion, maintenance, or use, to restrain, correct, or abate such violation, to prevent the occupancy of said building, structure, or land, or to prevent any illegal act, conduct, business, or use in or about such premises.

(n51)Footnote 51. Sec. 9. Conflict With Other Laws:

> Wherever the regulations made under the authority of this act require a greater width or size of yards, courts, or other open spaces, or require a lower height of building or less number of stories, or require a greater percentage of lot to be left unoccupied, or impose other higher standards than are required in any other statute or local ordinance or regulation, the provisions of the regulations made under the authority of this act shall govern. Wherever the provisions of any other statute or local ordinance or regulation require a greater width or size of yards, courts, or other open spaces, or require a lower height of building or a less number of stories, or require a greater percentage of lot to be left unoccupied, or impose other higher standards than are required by the regulations made under the authority of this act, the provisions of such statute or local ordinance or regulation shall govern.

CHAPTER 74 AN OVERVIEW OF LAND USE REGULATIONS

8-74 Thompson on Real Property, Thomas Editions § 74.03

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 74.03 Planning.

[Go To Supp]

Planning is a broader term than zoning and embraces zoning as one of the land use techniques for carrying out the plan. Planning is also broader in the sense that it considers factors well beyond the immediate use of land, factors that both impact on land use and are impacted by land use. Conscientious planning, taking future circumstances sufficiently into account, is a major means of assurance that the zoning ordinances implementing the plan will not be arbitrary and capricious in their conception or application.

A basic component of any municipal planning regimen is a master plan, which sets forth the objectives for land use planning and the predictions or projections about future development. A component of the master plan is a comprehensive zoning plan, usually explicitly required by the state zoning enabling act. n126 Occasionally, the validity of a zoning ordinance may be measured by whether it comports with the comprehensive zoning plan. n127 The comprehensive plan is intended to achieve balance in the community by means of zoning restrictions that are not piecemeal and are therefore less likely to be arbitrary, capricious or unreasonable. n128 Proper planning usually eliminates most "spot zoning," which is special zoning for limited areas that is different from land use patterns in the surrounding areas.

It should also be made explicit that a thoughtful master plan or comprehensive plan is not limited by the objectives of merely eliminating nuisance situations, but may also affirmatively pursue conditions that enhance life in the municipality.

FOOTNOTES:
(n1)Footnote 126. The requirement is stated in §3 of the Standard State Zoning Enabling Act.

Enterprise Partners v. County of Perkins, 619 N.W.2d 464 (Neb. 2000) (the county's failure to adopt a comprehensive development plan before adopting its land use planning ordinances rendered the ordinances invalid).

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 74.04 Subdivision Regulations.

[Go To Supp]

An important adjunct to or component of comprehensive planning is subdivision control. The objectives of subdivision regulations are to establish some degree of uniformity in subdivision layout and standards, require proper construction of improvements and require adherence to standard procedures. Subdivision regulations usually include rules or standards for streets, lot size and clearances, improvements that are required, easements, environmental concerns, n129 reservations, utilities, endorsements, and review procedures. n130

In general, review of proposed subdivisions by planning commissions occurs in several stages. In the very preliminary stage, a developer may benefit from discussions with planning officials that describe the subdivision requirements. Next, the developer will seek conditional approval of a preliminary plat and more detailed design information. Finally, when the formal and full plat, with all required informational detail is submitted, final approval can be granted after public notice and hearing. An approved plat is recorded as a document related to real property title; recording of unapproved plats is not permitted, so, along with the granting of the building permit, final subdivision approval is a practical necessity for proceeding with the development. n131

8-74 Thompson on Real Property, Thomas Editions § 74.05

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 74.05 Planned Unit Developments.

"Planned unit development" is a somewhat generic term for a variety of residential developments that impose density requirements only on the development as a whole, rather than on individual lots within the development. Typically, the dwelling units are clustered closer together than would normally be permitted by density requirements, and then larger areas of common open space, often with various amenities, are included within the development, open to all residents of the development. A planned unit development should not be approved unless the local zoning ordinance includes provision for a planned unit development, n132 along with adequate standards and guidelines to ensure that approvals are fairly granted. n133

8-74 Thompson on Real Property, Thomas Editions § 74.06

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 74.06 Maps.

By means of "official maps" municipalities place on record a depiction of the streets, waterways and public areas that have been authorized for the community. This has the effect of preserving rights of way for present and future streets and drainage and effectively blocks issuance of building permits for construction that would interfere with those rights of way.

An official map is subject to consultation from the planning board and review at properly noticed public hearings, and then it must be approved by the municipality's governing body. Amendments to the official map must go through a similar process. One form of indirect amendment, or at least a filling in of the map, is through adoption of subdivision plats; the details of a subdivision plat, once approved, become part of the official map.

8-74 Thompson on Real Property, Thomas Editions § 74.07

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 74.07 Building and Housing Codes.

The adoption and enforcement of building codes and housing codes (and various other health and safety codes) comprise another land use regulation technique. While building codes help ensure that the buildings are safe, housing codes are more broadly concerned with achieving and maintaining standards of habitability in dwellings. Housing codes typically set standards for density of occupancy, lighting, ventilation, heating and sanitary facilities.

CHAPTER 74 AN OVERVIEW OF LAND USE REGULATIONS

8-74 Thompson on Real Property, Thomas Editions § 74.08

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 74.08 "Regulatory Takings."

[Go To Supp]

As was mentioned at the beginning of this chapter, n134 if a zoning ordinance as applied to an individual landowner or group of landowners imposes excessive hardship, it may not be upheld, or it may result in an unconstitutional "taking" of private property without just compensation. n135

The "taking" terminology derives from the Fifth Amendment to the U.S. Constitution, which declares, "nor shall private property be taken for public use, without just compensation." n136 If the exercise of land use regulations under the state's police power bears no relationship to a legitimate public purpose, or if it effectively deprives the landowner of virtually all use and value of the land, it may be considered a "taking" that can be accomplished only by the governmental entity providing just compensation to the landowner. n137

One of the most fertile fields of conflict in the "takings" area is land whose use is restricted by imposition of federal and state environmental regulations. n138 These restrictions are fully discussed in Chapter 75, "The Impact of Environmental Regulation on Real Property," and in Chapter 81, "Regulatory Takings," *infra*.

Supp. To CHAPTER 74 AN OVERVIEW OF LAND USE REGULATIONS

8-74 Thompson on Real Property, Thomas Editions Supp. to § 74.02

Supp. to § 74.02 Zoning.

[Go To Main]

§ 74.02(b) The Constitutional Basis for Zoning. [Go To Main]

Add:

Union Land Owners Ass'n v. County of Union, 689 S.E.2d 504 (N.C. Ct. App. 2009) (The municipality's police power to regulate subdivisions must be granted by the state.); *Five C'S, Inc. v. County of Pasquotank, 672 S.E.2d 737 (N.C. Ct. App. 2009)* (Counties are instrumentalities of the state and possess only that power delegated by the state.)

Add:

Homebuilders Ass'n of Mississippi, Inc. v. City of Brandon, Miss., No. 3:07-cv-716- *WHB-LRA, 2009 U.S. Dist. LEXIS 49087* (S.D. Miss. June 10, 2009) (municipality statutorily permitted to regulate the size of buildings, but minimum square feet requirement may result in a discriminatory impact).

Add:

Union Land Owners Ass'n v. County of Union, 689 S.E.2d 504 (N.C. Ct. App. 2009) (A county may regulate land use when in so doing it believes it will promote the most appropriate use of the restricted property and protect the value of other properties.); *Five C'S, Inc. v. County of Pasquotank, 672 S.E.2d 737 (N.C. Ct. App. 2009)* (holding that the nexus between the county's intention in protecting property values and the actual effect of the zoning ordinance was too tenuous).

§ 74.02(c) The Common Law and Statutory Basis for Zoning. [Go To Main]

§ 74.02(c)(1) Zoning as Form of Police Power.

Add:

Tex. Midstream Gas Servs. LLC v. City of Grand Prairie, Tex., No. 08-11200, 2010 U.S. App. LEXIS 11108 (5th Cir. June 1, 2010) (eminent domain power does not supersede a city's generally applicable zoning ordinances); *Zimmerman v. Bd. of County Comm'rs of Wabaunsee County, Kan., No. 98,487, 2009 Kan. LEXIS 1073* (Kan. Oct. 30, 2009) (the county board acted reasonably in amending its zoning regulations to permit only small wind farms).

Add:

Union Land Owners Ass'n v. County of Union, 689 S.E.2d 504 (N.C. Ct. App. 2009) (the municipality's police power to regulate subdivisions must be granted by the state and may not exceed the authority granted); *Schefer v. City Council of Falls Church, 691 S.E.2d 778 (Va. 2010)* (a county ordinance may not exceed the authority granted by state); *Greater Wash. Park Neighborhood Ass'n v. Bd. of Adjustment of Montgomery, 24 So. 3d 443 (Ala. Civ. App. 2009)* (a municipality cannot extend, circumscribe, or alter the powers granted by the state).

Add:

Marianne Craft Norton Trust v. City Council of Hudson, Iowa, No. 9-450 / 08-1704, *2009 Iowa App. LEXIS 1436* (Iowa Ct. App. Oct. 7, 2009) (in granting a rezoning request the city council complied with the zoning code); Rude v. Bd. of Adjustment of Mapleton, Iowa, No. 9-060 / 08-1265, *2009 Iowa App. LEXIS 497* (Iowa Ct. App. May 29, 2009) (zoning amendments that allowed special use permits were properly enacted).

§ 74.02(c)(2) The Statutory Foundation for Zoning.

§ 74.02(c)(2)(i) State Enabling Acts Generally.

Add:

Sinkler v. County of Charleston, 690 S.E.2d 777 (S.C. 2010) (holding that a county ordinance did not fit within the parameters of a planned development according to the Local Government Comprehensive Planning Enabling Act).

§ 74.02(c)(2)(ii) The Standard State Zoning Enabling Act.

Add:

Anderson House, LLC v. Mayor and City Council of Rockville, Md., 939 A.2d 116 (Md. App. 2008) (newly enacted zone had to conform to provisions of state zoning enabling act); *Hendricks County Bd. of Com'rs v. Rieth-Riley Const. Co., Inc., 868 N.E.2d 844 (Ind. App. 2007)* (zoning ordinance was permitted to include provision not enumerated in the zoning enabling act, but did not meet the Act's specificity requirements).

Add:

Greater Wash. Park Neighborhood Ass'n v. Bd. of Adjustment of Montgomery, 24 So. 3d 443 (Ala. Civ. App. 2009) (standards prescribed for governing board in giving special exceptions).

Add:

Schefer v. City Council of Falls Church, 691 S.E.2d 778 (Va. 2010) (city ordinance regulating height of single-family dwellings did not conflict with state code); *Sinkler v. County of Charleston, 690 S.E.2d 777 (S.C. 2010)* (an ordinance rezoning agricultural land did not meet the requirements for a planned development district under the state enabling act).

§ 74.02(c)(3) Limits on the Exercise of Zoning Power.

§ 74.02(c)(3)(i) Constitutional Limitations.

Add

Festa v. New York City Department of Consumer Affairs, 830 N.Y.S.2d 133 (2007) (laws and regulations governing cabarets were rationally related to permissible governmental objectives); *Osborne v. Grussing, 477 F.3d 1002* (8th Cir. 2007) (allegation that zoning ordinances were selectively enforced was rejected); *Rittenhouse Row v. Aspite, 917 A.2d 880 (Pa. Cmwlth. 2006)* (a zoning ordinance regulating the uses of buildings within a designated area did not violate equal protection or due process of law).

Add:

For the People Theatres of NY, Inc. v City of New York, 897 N.Y.S.2d 618 (N.Y. Sup. Ct. 2010) (held that a zoning ordinance targeting establishments whose primary business is adult entertainment does not violate the constitution).

Add:

Schefer v. City Council of Falls Church, 691 S.E.2d 778 (Va. 2010) (discriminatory land use regulations not substantially related to the health, safety, and welfare of the public deny the equal protection of the laws); *Gypsum Res., LLC v. Masto, 672 F. Supp. 2d 1127 (U.S. Dist. Nev. 2009)* (a senate bill that would alter a county's zoning powers was declared unconstitutional).

Add:

Chicago Area Council, Inc. v. Blue Lake Twp. (Mich. App., March 18, 2010) (zoning ordinance may be unconstitutional if there is no legitimate governmental interest being advanced); *Coventry Woods Neighborhood Ass'n v. City of Charlotte, 688 S.E.2d 538 (N.C. Ct. App. 2010)* (constitutional protections against takings require a property interest on the part of those seeking protection).

Add:

Five C'S, Inc. v. County of Pasquotank, 672 S.E.2d 737 (N.C. Ct. App. 2009) (holding that the nexus between the county's intention in protecting property values and the actual effect of the zoning ordinance was too tenuous).

Add:

Risko v. Grand Haven Charter Twp. Zoning Bd. of Appeals, 773 N.W.2d 730 (Mich. Ct. App. 2009) (unless zoning ordinance promoting a reasonable governmental interest is arbitrary, capricious, or unfounded, it will generally pass constitutional muster).

§ 74.02(c)(3)(ii) Statutory Limitations.

Add:

Andrews v. Planning and Zoning Com'n of Town of Wallingford, 904 A.2d 275 (Conn. App. 2006) (planning and zoning commission exceeded its statutory authority); *Durham Land Owners Ass'n v. County of Durham, 630 S.E.2d 200 (N.C. App. 2006)* (statutes authorizing counties to adopt zoning ordinances did not provide the enabling legislation).

Cerrillos Gravel Products, Inc. v. Board of County Commissioners of Santa Fe County, 117 P.3d 932 (N.M. 2005) (under its statutory authority the county could enforce its land use ordinances by suspending mining land use permits); *N.W.D.A. v. City of Portland, 108 P.3d 589 (Ore. App. 2005)* (city decision on parking structures was not inconsistent with the comprehensive plan and therefore not in violation of state law).

Add:

Union Land Owners Ass'n v. County of Union, 689 S.E.2d 504 (N.C. Ct. App. 2009) (holding that a municipality exceeded the powers delegated by the state enabling statute in enacting a county public facilities ordinance); *Owens v. City Council of Norfolk, 78 Va. Cir. 436 (Va. Cir. 2009)* (zoning ordinance fell within city council's statutory authority).

§ 74.02(c)(3)(iii) Territorial Limitation

Add:

Century Ctr. at Braselton, LLC v. Town of Braselton, 677 S.E.2d 106 (Ga. 2009) (held that a zoning ordinance affecting property outside town's boundaries was invalid).

§ 74.02(d) General Principles of Zoning in Application.

Add:

Fasbender v. Lewis & Clark County Bd. of County Comm'rs, 218 P.3d 69 (Mont. 2009) (A permanent zoning regulation must be noticed to be in compliance with state enabling act).

Add:

Porter County Bd. of Zoning Appeals v. SBA Towers II, LLC (Ind. App., May 19, 2010) (held that the construction of a communications tower was within the spirit, purpose, and intent of the zoning ordinance and served the public welfare); *Pennsy Supply, Inc. v. Zoning Hearing Bd., 987 A.2d 1243 (Pa. Commw. Ct. 2009)* (An exception is a use permitted within the standards and criteria in the zoning ordinance).

Add:

Greater Wash. Park Neighborhood Ass'n v. Bd. of Adjustment of Montgomery, 24 So. 3d 443 (Ala. Civ. App. 2009)

(zoning regulations provide conditions for granting exceptions that should be followed by the decision-making body).

Add

Santos v. Zoning Bd. of Appeals of Town of Stratford, 918 A.2d 303 (Conn. App. 2007) (hardship required for variance not established); *Solebury Tp. v. Solebury Tp. Zoning Hearing Bd., 914 A.2d 972 (Pa. Cmwlth. 2007)* (variance granted due to hardship).

Add:

Morgan v. Zoning Bd. of Appeals of Town of Weymouth (Mass. Land Ct., July 31, 2009) (holding that no hardship existed sufficient to grant variance to landowner); *Lamb v. Zoning Bd. of Appeals, 923 N.E.2d 1078 (Mass. App. Ct. 2010)* (a property owner who transforms his property from a conforming parcel to a non-conforming parcel creates his own hardship and is not entitled to variance); *Boyer v. Zoning Hearing Bd. of Franklin Twp., 987 A.2d 219 (Pa. Commw. Ct. 2010)* (holding that a hardship existing due to natural conditions of the parcel, not those conditions imposed by the zoning ordinance, is not qualified for variance); *Greater Wash. Park Neighborhood Ass'n v. Bd. of Adjustment of Montgomery, 24 So. 3d 443 (Ala. Civ. App. 2009)* (a variance requires a showing of unnecessary hardship).

§ 74.02(e) Modern Developments in Zoning. [Go To Main]

Add:

Friends of the Bethany Place, Inc. v. City of Topeka, 222 P.3d 535 (Kan. Ct. App. 2010) (considerations in granting alteration to historical parcel include the availability of feasible and prudent alternatives and the amount of planning to minimize harm to historic property).

Add:

Schefer v. City Council of Falls Church, 691 S.E.2d 778 (Va. 2010) (holding that a discrepancy in height restrictions between standard and substandard single family dwelling lots was not facially discriminatory).

Add:

Foothills of Fernley, LLC v. City of Fernley, 2009 U.S. App. LEXIS 24468 (9th Cir. Nev. 2009) (dedication fees for city

water held to be constitutional as they are rationally related to a legitimate government purpose).

Supp. To CHAPTER 74 AN OVERVIEW OF LAND USE REGULATIONS

8-74 Thompson on Real Property, Thomas Editions Supp. to § 74.03

Supp. to § 74.03 Planning

[Go To Main]

Add:

Wilson v. City of Akron Council, 2006 Ohio 1483 (Ohio Ct. App. 2006) (the city properly relied on its land use plan to deny a requested conditional use); 1000 *Friends of Oregon v. Yamhill County, 126 P.3d 684 (Ore. App. 2005)* (county ordinances amended county comprehensive plan text and map and zoning ordinance text and map).

Add:

Lake County First v. Polson City Council, 218 P.3d 816 (Mont. 2009) (a zoning ordinance should comply substantially with master zoning plan).

Supp. To CHAPTER 74 AN OVERVIEW OF LAND USE REGULATIONS

8-74 Thompson on Real Property, Thomas Editions Supp. to § 74.08

Supp. to § 74.08 "Regulatory Takings."

[Go To Main]

Add:

Lamar Co., LLC v. City of Fremont, 771 N.W.2d 894 (Neb. 2009) (claims that a zoning regulation deprives an entity of a vested property right should be analyzed according to the *Takings Clause of the Fifth Amendment*).

Add:

Lake Pointe Constr. Co. v. City of Avon, 913 N.E.2d 1022 (Ohio Ct. App., Lorain County 2009) (where a land ordinance acts as a regulatory taking, by denying landowner the use of his land, the government is required to compensate for "use" of the land).

CHAPTER 75 THE IMPACT OF ENVIRONMENTAL REGULATION ON REAL PROPERTY

8-75 Thompson on Real Property, Thomas Editions § 75.01

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 75.01 Introduction.

The purpose of this chapter is to point out the most significant ways that environmental regulation by governments impacts on privately held land. The chapter is not a comprehensive or methodical dissertation on how governments are attempting to combat environmental damage or conserve resources for the future; the huge body of technical information necessary for such an undertaking is well beyond the scope of the present chapter. n1 However, in recent years anciently derived rights and interests in real property have been profoundly affected by environmental regulation, and this chapter will describe those effects. Environmental regulation is a dynamic area, and property interests that may be free of regulation or in compliance with standards in one decade may be at risk a short time later. Therefore, the emphasis in this chapter will be on discussion of basic sources of law and regulation, with the hope that the use of this material as a reference resource may be prolonged. Because of the heavy reliance on statutory and regulatory sources for documentation in this chapter, computer-assisted research instructions are less essential for research and are not given.

CHAPTER 75 THE IMPACT OF ENVIRONMENTAL REGULATION ON REAL PROPERTY

8-75 Thompson on Real Property, Thomas Editions § 75.02

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 75.02 Brief History of Federal Environmental Regulation in the United States.

The 1899 Rivers and Harbors Act n2 was perhaps the first authentic federal environmental legislation; intended mostly to deal with obstructions in navigable waters, its purpose was quite narrow. The adverse environmental impacts of post-World War II industrialization began to be widely noticed in the 1960's, although some earlier environmental legislation had been enacted. Federal water pollution legislation appeared in 1948 and 1956, and federal air pollution laws were adopted in 1955 and 1963. Solid waste legislation was approved in 1965, further water pollution controls and noise controls in 1970, toxic substance control and resource conservation and recovery in 1976, and strengthened air and water pollution control in 1977. The National Environmental Policy Act of 1969 introduced the serious employment of environmental impact statements, assuring fuller consideration of environmental values in the nation's growth and development. Cleanup legislation followed in the 1980's.

Meanwhile, environmental litigation in the 1960's established that parties with environmental interests had standing to challenge those with traditional economic interests. Citizen suit provisions in the major statutes opened the way for public interest groups to influence the course of development through litigation. The spinoff from environmental litigation to other fields of law has been substantial:

> In the course of its development, the field of environmental law made reciprocal contributions to other fields of law. The efforts of citizens and citizen groups to participate in the enforcement of pollution control laws and regulations led to the institutionalization of the private attorney general in citizen suit provisions in the 1970 and 1972 air and water pollution legislation. The general gain for public interest litigation was immeasurable because there are now scores of citizen suit provisions in protective legislation, whether or not environmental. Environmental law has made major contributions, too, to the general area of administrative law. Environmental law, which involves standard setting and rulemaking of a sophisticated technical nature by government agencies, as well as administrative determination of controversies and the issuance of administrative orders and their enforcement, is clearly a field of administrative law. Because of the high level of activity in the field, and because of the complex nature of the area, decisions with environmental implications now make up the majority of administrative law decisions in the federal courts... n3

§ 75.03 Summary of Federal Environmental Laws That Impact Real Property.

1986 Internal Revenue Code

Since the explosion of interest in environmental protection burst forth in enormous amounts of well-intended laws and regulations beginning in the 1970's, it has become increasingly difficult to maintain a comprehensive overview of this area of the law. This section is intended to point out and summarize the principal items of legislation that form the foundation of American environmental regulation, to summarize their respective intended purposes, and to show some of the interrelationships that have caused confusion. Quite often, a separate and distinct statute will be enacted to deal with an individual environmental problem, but will then be codified as part of a larger, older piece of environmental legislation, somewhat losing its identity and its claim on public awareness.

The legislation summarized in this section has been divided into two main groupings. The first contains the legislation dealing mainly with combatting hazards to the environment. The second consists of legislation intended to implement conservation measures. In each group, the individual items of legislation are listed and summarized in alphabetical order. The summaries are mostly drawn either from the text of the law itself or from the leading committee reports published as part of the statute's legislative history.

This material, presented in this fashion, will not present an orderly picture of how environmental regulation functions in this country, but will serve as a reference resource for the primary legal materials of that environmental regulation.

§ 75.03(a) Legislation for Combatting Environmental Hazards.

§ 75.03(a)(1) Acid Precipitation Act of 1980 *(42 U.S.C. §§8901* to 8912).

(b) The Congress declares that it is the purpose of this subchapter--

(1) to identify the causes and sources of acid precipitation;

(2) to evaluate the environmental, social and economic effects of acid precipitation; and

(3) based on the results of the research program established by this subtitle and to the extent

consistent with existing law, to take action to the extent necessary and practicable (A) to limit or eliminate the identified emissions which are sources of acid precipitation, and (B) to remedy or otherwise ameliorate the harmful effects which may result from acid precipitation.

(c) For purposes of this subtitle the term "acid precipitation" means the wet or dry deposition from the atmosphere of acid chemical compounds. n4

§ 75.03(a)(2) Act to Prevent Pollution from Ships *(33 U.S.C. §§1901* to 1912).

The purpose of this legislation is to implement the Protocol of the 1978 Relating to the International Convention for the Prevention of Pollution from Ships, 1973, and for other purposes. This Marpol Protocol has been partially implemented by the enactment of the Port and Tanker Safety Act of 1978 (Public Law 94-474). This bill will complete the required implementing legislation. Enactment should materially influence other maritime nations to ratify the treaty and thus assist in bringing it into force internationally ...

The 1973 Pollution Convention recognized ... that, even with the increasing use of methods to reduce the amounts of oil and water mixtures to be disposed of, there remained a need to provide sufficient shoreside reception facilities to receive polluting residues and mixtures. Under the Convention, as modified by the Marpol Protocol, signatory nations agreed to provide reception facilities for excessive oil residues in crude oil loading ports, in ports loading more than 1,000 metric tons of product oil, and ship repairs ports. [This legislation] will enable the United States to carry out this commitment. n5

§ 75.03(a)(3) Asbestos Hazard Emergency Response Act of 1986 (part of the Toxic Substances Control Act at §§201 to 214 *(15 U.S.C. §§2641* to 2654)).

The purpose of [this legislation] is to prevent unreasonable risks of injury to health or the environment associated with the manufacture, processing, distribution in commerce, use, or disposal of chemical substances. The bill is designed to fill a number of regulatory gaps which currently exist. They are:

1. PREMARKET REVIEW

While certain environmental health statutes may be used to protect health and the environment from chemical substances, only pesticides, drugs, and food additives undergo premarket scrutiny prior to first manufacture.

2. DIRECT REGULATION OF CHEMICALS

While air and water laws authorize limitations on discharges and emissions, the Occupational Safety and Health Act authorizes the establishment of ambient air standards for the workplace, and the Consumer Product Safety Act authorizes standards with respect to consumer products, there are no existing statutes which authorize the direct control of industrial chemicals themselves for their health or environmental effect (except section 211 of the Clean Air Act, which authorizes the regulation of fuel additives).

3. CONSIDERATION OF ALL THE RISKS

While individual agencies may be authorized to regulate occupational, environmental, or direct consumer hazards with respect to a chemical substance, there is no agency which has the authority to look comprehensively at the hazards associated with the chemical. Existing authority allows the agencies to only look at the hazards within their jurisdiction in isolation from other hazards associated with the

same chemical. The [legislation] would grant the Environmental Protection Agency the authority to look at the hazards in total.

4. COLLECTION OF TEST DATA

The [legislation] also provides a mechanism whereby information with respect to health and environmental effects can be collected from manufacturers and processors of chemical substances. While other statutes provide regulatory authority, they do not place the responsibility for gathering information in support of the regulatory program squarely with persons who are responsible for the manufacture or processing of the chemical substance or mixtures. n6

§ 75.03(a)(4) Aviation Safety and Noise Abatement Act of 1979 ***(49 U.S.C. §§ 47501 et seq.***).

This legislation is intended "to provide assistance to airport operators to prepare and carry out noise compatibility programs, to provide assistance to assure continued safety in aviation, to provide assistance to aircraft operators to aid them in complying with noise standards, and for other purposes." n7

§ 75.03(a)(5) Clean Air Act ***(42 U.S.C. §§7401*** **to 7642).**

The original Clean Air Act was approved in 1955, but was completely revised in 1977. The new legislation was intended to fulfill the following purposes:

(1) to extend authorizations of appropriations for non-research activities under the Clean Air Act;

(2) to provide a greater role and greater assistance for State and local governments in the administration of the Clean Air Act;

(3) to provide express recognition of the economic and energy factors which should be considered, and the manner in which they should be considered, under the act;

(4) to create incentives for the regulation of currently unregulated pollutants and unregulated sources of pollution;

(5) to provide more effective surveillance and enforcement tools for States and the administrator to bring existing stationary and mobile sources into compliance and to assure that they remain in compliance;

(6) to provide greater legislative guidance and clearer legislative intent with respect to certain issues on which there has been administrative or judicial dispute (that is, prevention of significant deterioration, new source standards of performance, tall stacks and intermittent controls, and so forth);

(7) to permit the extension of certain deadlines under the existing act, where justified;

(8) to establish uniform bases and procedures for standard setting under the act;

(9) to insure more effective, informed public involvement in decision making under the act;

(10) to promote the development and utilization of innovative technologies for pollution control or prevention, which are more effective, less costly, and less energy intensive than presently available technologies;

(11) to establish certain protections for free competition, consumer free choice, and small business in the administration of the act; and

(12) to provide appropriate employee protection measures under the act.

... [The] primary and overriding purpose of the [legislation] remains the prevention of illness or death which is air pollution related and protection of the public health. n8 *General Motors Corp. v. United States, 496 U.S. 530 (U.S. 1990)* (The EPA sued General Motors (GM) alleging violation of state plan to implement the Clean Air Act. Even though the EPA was required to conclude matters "within a reasonable time," the EPA was not barred from bringing suit on the allegation that GM unreasonably delayed revising its state implementation plan).

§ 75.03(a)(6) Clean Vessel Act of 1992 *(33 U.S.C. §1322* note).

33 U.S.C. §1322. Findings; Purpose.

(a) FINDINGS. -- The Congress finds the following:

(1) The discharge of untreated sewage by vessels is prohibited under federal law in all areas within the navigable waters of the United States.

(2) The discharge of treated sewage by vessels is prohibited under either federal or state law in many of the United States bodies of water where recreational boaters operate.

(3) There is currently an inadequate number of pumpout stations for type III marine sanitation devices where recreational vessels normally operate.

(4) Sewage discharged by recreational vessels because of an inadequate number of pumpout stations is a substantial contributor to localized degradation of water quality in the United States.

(b) PURPOSE. -- The purpose of this subtitle is to provide funds to States for the construction, renovation, operation, and maintenance of pumpout stations and waste reception facilities. n9

§ 75.03(a)(7) Clean Water Act of 1977.

This act amended the 1972 amendments to the Federal Water Pollution Control Act; its statement of purpose is in §75.03(1)(15), *infra.*

§ 75.03(a)(8) Community Environmental Response Facilitation Act *(42 U.S.C. §9620* note).

[This legislation] is intended to establish both a process and criteria for evaluating and identifying uncontaminated property on federal installations where government activities are scheduled to terminate. Such evaluation and identification shall be undertaken by the federal agency that owns such property. In the case of property on the National Priorities List (NPL), the U.S. Environment Protection Agency (EPA) shall have a concurrent role in determining when such property is not contaminated. In the case of property not included on the NPL, appropriate state agencies will have the opportunity to concur or non-concur in such determination. [This legislation] also clarifies that environmental restoration on any property transferred by the government shall be the responsibility of the federal government if contamination attributable to federal activities is discovered after the date of such transfer. Finally, [this legislation] clarifies the point at which all remedial action necessary to protect human health and the environment has been taken to satisfy the requirements of Section 120(h)(3). n10

§ 75.03(a)(9) Comprehensive Environmental Response, Compensation, and Liability Act of 1980 *(42 U.S.C. §§9601* to 9675) [CERCLA].

The [legislation] would amend the Solid Waste Disposal Act to provide for a national inventory of inactive hazardous waste sites and to establish a program for appropriate environmental response action to protect public health and the environment from the dangers posed by such sites. The bill would provide authorities to the Administrator of the Environmental Protection Agency to take emergency assistance and containment actions with respect to such sites and establish a $600 million, 4-year Hazardous Waste Response Fund to be drawn in equal amounts from industry-based fees and federal appropriations, to finance such actions undertaken by the Administrator. The legislation would also establish a federal cause of action in strict liability to enable the Administrator to pursue rapid recovery of the costs incurred for the costs of such actions undertaken by him from persons liable therefor and to induce such persons voluntarily to pursue appropriate environmental response actions with respect to inactive hazardous waste sites. n11

§ 75.03(a)(10) Emergency Planning and Community Right to Know Act of 1986 *(42 U.S.C. §§11001* to 11050).

[This legislation] amends the Comprehensive Environmental Response, Compensation and Liability Act ("CERCLA" or "Superfund") to provide $10 billion in additional funding over the next five years to clean up the Nation's worst abandoned hazardous waste sites and uncontrolled leaking underground storage tanks. The bill establishes a schedule for the Environmental Protection Agency's (EPA) cleanup activities; establishes national cleanup standards for Superfund sites; establishes a program to insure the cleanup of waste sites owned by the federal government; establishes a program for research and training in relation to hazardous substances; clarifies the authorities of the EPA to enter into settlements with parties responsible for Superfund sites; provides assistance to the states in fulfilling their role in the Superfund program; enhances EPA response and enforcement authority; gives citizens the right to participate in cleanup decisions; strengthens the role of the Agency for Toxic Substances and Disease Registry in determining the effects of hazardous substances on human health; and insures the cleanup of leaking underground storage tanks where responsible parties cannot be identified. In addition to establishing certain taxes, the [legislation] authorizes appropriations of $250,000,000 in each of the next five years. [This legislation would] revitalize the Superfund program to permit substantial progress in addressing one of our most pressing environment problems -- the protection of the public from hazardous chemical substances. n12

§ 75.03(a)(11) Environmental Quality Improvement Act of 1970 *(42 U.S.C. §§4371* to 4375).

4371. Congressional findings, declarations, and purposes ...

(b) (1) The Congress declares that there is a national policy for the environment which provides for the enhancement of environmental quality. This policy is evidenced by statutes heretofore enacted relating to the prevention, abatement, and control of environmental pollution, water and land resources, transportation, and economic and regional development.

(2) The primary responsibility for implementing this policy rests with State and local government.

(3) The federal government encourages and supports implementation of this policy through appropriate regional organizations established under existing law.

(c) The purposes of this chapter are --

(1) to assure that each federal department and agency conducting or supporting public works activities which affect the environment shall implement the policies established under existing law; and

(2) to authorize an Office of Environmental Quality, which, notwithstanding any other provisions of

law, shall provide the professional and administrative staff for the Council on Environmental Quality established by Public Law 91-190. n13

§ 75.03(a)(12) Federal Facility Compliance Act of 1992 *(42 U.S.C. §6901* note) a.k.a. the Land Disposal Program Flexibility Act of 1996. n14

[This legislation] is intended to ensure greater compliance by federal facilities with requirements of the Resource Conservation and Recovery Act for management, treatment, storage and disposal of hazardous and solid wastes. The [legislation] accomplishes this by reaffirming the Act's original intent that each department, agency, and instrumentality of the United States is to be treated as a "person" for purposes of the Act. As a further reaffirmation of the original intent of the Act, the [legislation] explicitly provides that federal facilities are subject to all the same substantive and procedural requirements, including enforcement requirements and sanctions, to which state and local governments and private companies are subject. n15

§ 75.03(a)(13) Federal Insecticide, Fungicide, and Rodenticide Act *(7 U.S.C. §§136* to 136y).

This [legislation] completely revises the Federal Insecticide, Fungicide, and Rodenticide Act.

At the present time, this Act prohibits interstate commerce in unregistered pesticides, and permits registration only when if used as directed or in accordance with commonly recognized practice the pesticide is not injurious to man, vertebrate animals, or desirable vegetation. It does not prohibit the misuse of any registered pesticide, nor does it regulate pesticides moving only in intrastate commerce.

The [legislation] would --

(A) regulate the use of pesticides to protect man and his environment; and

(B) extend federal pesticide regulation to actions entirely within a single State. n16

§ 75.03(a)(14) Federal Water Pollution Control Act *(33 U.S.C. §§1251* to 1387).

§1251. Congressional declaration of goals and policy

(a) Restoration and maintenance of chemical, physical and biological integrity of Nation's waters; national goals for achievement of objective.

The objective of this chapter is to restore and maintain the chemical, physical, and biological integrity of the Nation's waters. In order to achieve this objective it is hereby declared that, consistent with the provisions of this chapter --

(1) it is the national goal that the discharge of pollutants into the navigable waters be eliminated by 1985;

(2) it is the national goal that wherever attainable, an interim goal of water quality which provides for the protection and propagation of fish, shellfish, and wildlife and provides for recreation in and on the water be achieved by July 1, 1983;

(3) it is the national policy that the discharge of toxic pollutants in toxic amounts be prohibited;

(4) it is the national policy that federal financial assistance be provided to construct publicly owned waste treatment works;

(5) it is the national policy that areawide waste treatment management planning processes be developed and implemented to assure adequate control of sources of pollutants in each State;

(6) it is the national policy that a major research and demonstration effort be made to develop technology necessary to eliminate the discharge of pollutants into the navigable waters, waters of the contiguous zone, and the oceans; and

(7) it is the national policy that programs for the control of non-point sources of pollution be developed and implemented in an expeditious manner so as to enable the goals of this act to be met through the control of both point and non-point sources of pollution. n17

§ 75.03(a)(15) Lead Exposure Reduction Act *(15 U.S.C. §§2681* to 2692).

The EPA and other appropriate federal agencies are to "conduct a comprehensive program to promote safe, effective, and affordable monitoring, detection, and abatement of lead-based paint and other lead exposure hazards." n18

§ 75.03(a)(16) Lead Contamination Control Act of 1988 *(42 U.S.C. §§300j-21* to 300j-25).

This legislation provides programs intended to help reduce lead contamination in drinking water, especially for children. Its major provisions include a mandate for the Consumer Product Safety Commission to recall drinking water coolers with lead-lined water reservoir tanks; a ban on the manufacture or sale of drinking water coolers that are not lead free; a federal program to help schools evaluate and respond to lead contamination problems, including federal technical and financial assistance; and a lead screening program for children to be administered by the Centers for Disease Control. n19

§ 75.03(a)(17) Low-Level Radioactive Waste Policy Amendments Act of 1985 *(42 U.S.C. §§2021b* to 2021d).

This [legislation] would amend the Low-Level Radioactive Waste Policy Act (LLRWPA) to lay out ground rules and clarify responsibilities as necessary to provide for a national low-level waste interstate compact system. In addition to proposing a compromise allowing access to operating disposal sites, the legislation clarifies federal and state responsibilities for low-level waste management, creates a uniform definition of low-level radioactive waste for purposes of determining state responsibility, and clarifies that no new state authority superseding federal law or regulatory authorities is intended to be created by the compacts, except the authority to control import or export of waste to or from compact regions. n20

§ 75.03(a)(18) Medical Waste Tracking Act of 1988 *(42 U.S.C. §§6992* to 6992k).

This legislation is intended to "ensure that those who generate, handle, or dispose of medical waste are accountable, and it will encourage proper handling and disposal of such potentially dangerous waste." n21

§ 75.03(a)(19) National Contaminated Sediment Assessment and Management Act *(33 U.S.C. §1271* note).

The EPA and other agencies are to "conduct a comprehensive national survey of data regarding aquatic sediment quality in the United States ... [including] pollutants in aquatic sediment ... " The EPA also "shall conduct a comprehensive and continuing program to assess aquatic sediment quality." n22

§ 75.03(a)(20) National Environmental Policy Act of 1969 *(42 U.S.C. §§4321* to 4370b).

The purpose of [this legislation] is to create a Council on Environmental Quality with a broad and

independent overview of current and long-term trends in the quality of our national environment, to advise the President, and through him the Congress and the American people on steps which may and should be taken to improve the quality of that environment.

In achieving the purpose, the [legislation] would require the transmission to the Congress by the President of an annual environmental quality report on the status of various aspects of the American environment, as well as on the foreseeable trends that may affect that status, and on their impact on other national requirements.

The [legislation] also would require the five-member Council to maintain a continuing review of federal policies and activities with environmental implications and to conduct such studies as may be necessary for it to carry out its statutory mandate. The results of this activity would be summarized in an annual report to the President as a means of augmenting and supplementing his report to the Congress. n23

§ 75.03(a)(21) National Ocean Pollution Planning Act of 1978 *(33 U.S.C. §§1701* to 1709).

The purpose of this legislation is:

(1) to establish a comprehensive 5-year plan for federal ocean pollution research and development and monitoring programs in order to provide planning for, coordination of, and dissemination of information with respect to such programs within the Federal Government;

(2) to develop the necessary base of information to support, and to provide for, the rational, efficient, and equitable utilization, conservation, and development of ocean and coastal resources;

(3)to provide for the effective coordination of research conducted to support the preservation and protection of the environmental quality of the Great Lakes, the Chesapeake Bay, Puget Sound, and other estuaries of national significance, and to encourage the use of such research in determinations that affect the environmental quality of the Great Lakes, the Chesapeake Bay, Puget Sound, and other estuaries of national significance; and

(4) to designate the National Oceanic and Atmospheric Administration as the lead federal agency for preparing the plan referred to in paragraph (1) and to require the Administration to carry out a comprehensive program of ocean pollution research and development and monitoring under the plan. n24

§ 75.03(a)(22) Noise Control Act of 1972 *(42 U.S.C. §§4901* to 4918).

... [I]t is the purpose of this Act to establish a means for effective coordination of federal research and activities in noise control, to authorize the establishment of federal noise emission standards for products distributed in commerce, and to provide information to the public respecting the noise emission and noise reduction characteristics of such products. n25

§ 75.03(a)(23) Non-indigenous Aquatic Nuisance Prevention and Control Act of 1990 *(16 U.S.C. §§4701* to 4751) a.k.a. the National Invasive Species Act of 1996.

(b) Purposes. -- The purposes of this Act are --

(1) to prevent unintentional introduction and dispersal of non-indigenous species into waters of the United States through ballast water management and other requirements;

(2) to coordinate federally conducted, funded or authorized research, prevention control, information dissemination and other activities regarding the zebra mussel and other aquatic nuisance species;

(3) to develop and carry out environmentally sound control methods to prevent, monitor and control unintentional introductions of non-indigenous species from pathways other than ballast water exchange;

(4) to understand and minimize economic and ecological impacts of non-indigenous aquatic nuisance species that become established, including the zebra mussel; and

(5) to establish a program of research and technology development and assistance to States in the management and removal of zebra mussels. n26

§ 75.03(a)(24) Nuclear Waste Policy Act of 1982 *(42 U.S.C. §§10101* to 10270).

The purpose of [this legislation] as amended by the Committee is to establish programs for the development of repositories for the safe permanent disposal of high level nuclear waste and spent fuel, and to provide for the safe stabilization and long-term protection of sites for the disposal of low level radioactive waste. n27

§ 75.03(a)(25) Ocean Dumping Ban Act of 1988 *(33 U.S.C. §§1414b,* 1414c).

This legislation amends title I of the Marine Protection, Research, and Sanctuaries Act which regulates the dumping, and the transportation for the purpose of dumping, of material into ocean waters.

The bill establishes a framework for ending the ocean dumping of sewage sludge. It prohibits any person who is not now ocean dumping sewage sludge from beginning to dump. For existing dumpers, the bill prohibits the dumping of sewage sludge within six months of the bill's enactment unless the dumper has entered into a compliance agreement to end the dumping of sewage sludge, and makes it unlawful to ocean dump sewage sludge after December 31, 1991 ...

The bill establishes civil penalties for violations which exceed the costs of implementing land-based alternatives, and permit fees to cover the costs of monitoring and any associated research and to determine compliance with the Act. Penalties and fees will be deposited in a newly established Clean Oceans Fund to be used by EPA and the Coast Guard to implement the Ocean Dumping Act and by EPA to implement technologies and management practices necessary for controlling pollutant inputs adversely affecting the New York Bight.

The bill also requires EPA and N.O.A.A. to conduct a monitoring program at sewage sludge dump sites and surrounding waters which may be affected by ocean dumping of sewage sludge. EPA is required to report on progress in using electronic surveillance to monitor sewage sludge dumping. n28

§ 75.03(a)(26) Oil Pollution Act of 1990 *(33 U.S.C. §§2701* to 2761).

This legislation was intended "to consolidate and improve Federal laws providing compensation and establishing liability for oilspills." n29

§ 75.03(a)(27) Organotin Antifouling Paint Control Act of 1988 *(33 U.S.C. §§2401* to 2410).

"The purpose of this Act is to protect the aquatic environment by reducing immediately the quantities of organotin entering the waters of the United States." n30

§ 75.03(a)(28) Residential Lead-Based Paint Hazard Reduction Act *(42 U.S.C. §4851 et seq.*).

§4851a. Purposes.

The purposes of this Act are --

(1) to develop a national strategy to build the infrastructure necessary to eliminate lead-based paint hazards in all housing as expeditiously as possible;

(2) to reorient the national approach to the presence of lead-based paint in housing to implement, on a priority basis, a broad program to evaluate and reduce lead-based paint hazards in the Nation's housing stock;

(3) to encourage effective action to prevent childhood lead poisoning by establishing a workable framework for lead-based paint hazard evaluation and reduction and by ending the current confusion over reasonable standards of care;

(4) to ensure that the existence of lead-based paint hazards is taken into account in the development of Government housing policies and in the sale, rental, and renovation of homes and apartments;

(5) to mobilize national resources expeditiously, through a partnership among all levels of government and the private sector, to develop the most promising, cost-effective methods for evaluating and reducing lead-based paint hazards;

(6) to reduce the threat of childhood lead poisoning in housing owned, assisted, or transferred by the Federal Government; and

(7) to educate the public concerning the hazards and sources of lead-based paint poisoning and steps to reduce and eliminate such hazards. n31

§ 75.03(a)(29) Safe Drinking Water Act *(42 U.S.C. §§300f* to 300j-11).

The purpose of the legislation is to assure that water supply systems serving the public meet minimum national standards for protection of public health. At present, the Environmental Protection Agency is authorized to prescribe federal drinking water standards only for water supplies used by interstate carriers. Furthermore, these standards may only be enforced with respect to contaminants capable of causing communicable disease. In contrast, this bill would (1) authorize the Environmental Protection Agency to establish federal standards for protection from all harmful contaminants, which standards would be applicable to all public water systems, and (2) establish a joint Federal-State system for assuring compliance with these standards and for protecting underground sources of drinking water. n32

§ 75.03(a)(30) Solid Waste Disposal Act *(42 U.S.C. §§6901* to 6991i) a.k.a. the Land Disposal Program Flexibility Act of 1996.

6902. Objectives and national policy.

(a) Objectives:

The objectives of this chapter are to promote the protection of health and the environment and to conserve valuable material and energy resources by --

(1) providing technical and financial assistance to State and local governments and interstate agencies for the development of solid waste management plans (including resource recovery and resource conservation systems) which will promote improved solid waste management techniques

(including more effective organizational arrangements), new and improved methods of collection, separation, and recovery of solid waste, and the environmentally safe disposal of non-recoverable residues;

(2) providing training grants in occupations involving the design, operation, and maintenance of solid waste and disposal systems;

(3) prohibiting future open dumping on the land and requiring the conversion of existing open dumps to facilities which do not pose a danger to the environment or to health;

(4) assuring that hazardous waste management practices are conducted in a manner which protects human health and the environment;

(5) requiring that hazardous waste be properly managed in the first instance thereby reducing the need for corrective action at a future date;

(6) minimizing the generation of hazardous waste and the land disposal of hazardous waste by encouraging process substitution, materials recovery, properly conducted recycling and reuse, and treatment;

(7) establishing a viable Federal-State partnership to carry out the purposes of this chapter and insuring that the Administrator will, in carrying out the provisions of subchapter III of this chapter, give a high priority to assisting and cooperating with States in obtaining full authorization of State programs under subchapter III of this chapter;

(8) providing for the promulgation of guidelines for solid waste collection, transport, separation, recovery, and disposal practices and systems;

(9) promoting a national research and development program for improved solid waste management and resource conservation techniques, more effective organizational arrangements, and new and improved methods of collection, separation, and recovery, and recycling of solid wastes and environmentally safe disposal of non-recoverable residues;

(10) promoting the demonstration, construction, and application of solid waste management, resource recovery, and resource conservation systems which preserve and enhance the quality of air, water, and land resources; and

(11) establishing a cooperative effort among the Federal, State, and local governments and private enterprise in order to recover valuable materials and energy from solid waste. n33

§ 75.03(a)(31) Toxic Substances Control Act *(15 U.S.C. §§2601* to 2692).

The purpose of this legislation is to prevent unreasonable risks of injury to health or the environment associated with the manufacture, processing, distribution in commerce, use, or disposal of chemical substances. The [legislation] is designed to fill a number of regulatory gaps which currently exist. They are:

(1) Premarket Review ...

(2) Direct Regulation of Chemicals ...

(3) Consideration of all the Risks ...

(4) Collection of Test Data... n34

§ 75.03(a)(32) United States Public Vessel Medical Waste Anti-Dumping Act of 1988 *(33 U.S.C. §§2501* to 2504). n35

§ 75.03(a)(33) Uranium Mill Tailings Radiation Control Act of 1978 *(42 U.S.C. §§2014,* 2021, 2021a, 2022, 2023, 2111, 2113, 2114, 5153e) (part of the Atomic Energy Act of 1954).

The Uranium Mill Tailings Control Act ... is intended to protect the public health and safety and the environment from hazards associated with wastes from the uranium ore milling process. If enacted, the legislation will require every reasonable effort to be made by the States, the Federal Government, and private industry to provide for the disposal, stabilization and control in a safe and environmentally sound manner of such tailings to prevent or minimize the diffusion of radon or the entry of other hazards into the environment.

Title I 1 ... in cooperation with interested States, Indian tribes, and persons who own or control inactive mill tailings sites, provides a program of assessment and remedial action at such sites. Such actions may include, where appropriate, the reprocessing of tailings to extract residual uranium and other valuable minerals.

Title II 1 clarifies and reinforces the authority of the Nuclear Regulatory Commission to regulate the production and disposal of uranium mill tailings at active sites, and provides for the application of minimum federal standards to such activities in States which regulate them under authority permitted by the Atomic Energy Act.

[The legislation] also provides that all final disposal areas for uranium mill tailings be treated in accordance with Federal policy regarding other nuclear wastes, in that such disposal sites would be transferred to the Federal Government for permanent custody and protection. n36

§ 75.03(b) Environmental Conservation.

§ 75.03(b)(1) Agricultural Act of 1970 *(16 U.S.C. §§1501* to 1510) (Rural Environmental Conservation Program).

Eligible farmers shall furnish a plan of farming operations or land use which incorporates such practices and principles as may be determined by the Secretary of Agriculture:

[T]o be practicable and which outlines a schedule of proposed changes, if any, in cropping systems or land use and of the conservation measures which are to be carried out on the farm, ranch, wetland, forests, or other land during the contract period to protect the farm, ranch, wetland, forests or other land and surrounding areas, its wildlife, and nearby populace and communities from erosion, deterioration, pollution by natural and manmade causes or to insure an adequate supply of timber and related forest products. Said plans may also ... conserve surface waters and preserve and improve habitat for migratory waterfowl and other wildlife resources and improve subsurface moisture ... n37

§ 75.03(b)(2) Antarctic Mineral Resources Protection Act of 1990 *(16 U.S.C. §§2461* to 2466).

(b) Purpose. -- The purpose of this Act is to --

(1) strengthen substantially overall environmental protection of Antarctica;

(2) prohibit prospecting, exploration, and development of Antarctic mineral resources by United

States citizens and other persons subject to the jurisdiction of the United States;

(3) urge other nations to join the United States in immediately negotiating one or more new agreements to provide an indefinite ban on all Antarctic mineral resource activities and comprehensive protection for Antarctica and its associated and dependent ecosystems; and

(4) urge all nations to consider a permanent ban on Antarctic mineral resource activities. n38

§ 75.03(b)(3) Coastal Zone Management Act of 1972 *(16 U.S.C. §§1451* to 1464).

[This legislation] has as its main purpose the encouragement and assistance of States in preparing and implementing management programs to preserve, protect, develop and whenever possible restore the resources of the coastal zone of the United States. The [legislation] authorizes federal grants-in-aid to coastal states to implement these management programs once approved, and States would be aided in the acquisition and operation of estuarine sanctuaries. Through the system of providing grants-in-aid, the States are provided financial incentives to undertake the responsibility for setting up management programs in the coastal zone. There is no attempt to diminish state authority through federal pre-emption. The intent of this legislation is to enhance state authority by encouraging and assisting the states to assume planning and regulatory powers over their coastal zones. n39

§ 75.03(b)(4) Endangered Species Act of 1973 *(16 U.S.C. §§1531* to 1544).

The purpose of this [legislation] is to provide for conservation, protection and propagation of endangered species of fish and wildlife by federal action and by encouraging the establishment of State endangered species conservation programs. The methods include authorization to the Secretaries of Interior and Commerce to list species which are either (1) endangered or (2) likely to become endangered within the foreseeable future, and authority to establish an Advisory Committee for consultation regarding this list; authorization to the Secretary to use certain existing legislation for land acquisition; provision for criminal and civil penalties for violation of its prohibitions; provision for the administrative implementation of the international convention on endangered species; management of endangered and threatened species by the States under State plans that are approved by the Secretary; and provisions for financial aid to State wildlife management agencies which enter into cooperative or management agreements with the Secretary. n40

§ 75.03(b)(5) Energy Supply and Environmental Coordination Act of 1974 *(15 U.S.C. §§791* to 798).

The purpose of this legislation is to grant specific authority to increase the use of coal resources so as to increase the energy supplies available to the Nation, to obtain information about the energy supplies available to the Nation, and to permit certain adjustment of environmental requirements, so that the Nation's essential energy needs may be met in a manner which is consistent with our national commitment to protect and improve the environment.

In brief summary, the [legislation] directs steps to be taken to make more effective use of our Nation's coal resources, authorizes and directs the Federal Energy Administrator to obtain information on the Nation's energy supply situation, and permits narrowly defined and limited variances from certain specific Clean Air requirements so as to effectuate proper coordination between measures taken with respect to energy supplies and measures respecting environmental protection and enhancement. n41

§ 75.03(b)(6) Federal Land Policy and Management Act of 1976 *(43 U.S.C. §§1701* to 1784).

This legislation is intended "to establish public land policy; to establish guidelines for its administration; to provide for the management, protection, development, and enhancement of the public

lands ...."

The underlying mission proposed for the public lands is the multiple use of resources on a sustained-yield basis. Corollary to this is the selective transfer of public lands to other ownerships where the public interest will be served thereby. The proper multiple use mix of retained public lands is to be achieved by comprehensive land use planning, coordinated with State and local planning. Planning decisions are to be made only after full opportunity for public involvement in the planning process. Management and disposal of the public lands are to be consistent with land use plans so developed. n42

§ 75.03(b)(7) Forest and Rangeland Renewable Resources Planning Act of 1974 *(16 U.S.C. §§1600* to 1614).

This legislation is intended "to provide for the Forest Service, Department of Agriculture, to protect, develop, and enhance the environment of certain of the Nation's lands and resources" and will "encourage wise and orderly development of the renewable resources of our forest, range, and associated lands." n43

§ 75.03(b)(8) Forest and Rangeland Renewable Resources Research Act of 1978 *(16 U.S.C. §§1641* to 1647).

In order that "scientific discoveries and technological advances ... be made and applied to support the protection, management, and utilization of the Nations' renewable resources," the legislation authorizes the Secretary of Agriculture "to expand research activities to encompass international forestry and natural resource issues on a global scale." n44

§ 75.03(b)(9) Forest Ecosystems and Atmospheric Pollution Research Act of 1988 *(16 U.S.C. §1641).*

This legislation is based on Congressional findings that:

(1) the health and productivity of forests in certain regions of the United States are declining;

(2) there is a special concern about the decline of certain hardwood species, particularly sugar maples and oaks, in the eastern United States and the effects of atmospheric pollutants on the health and productivity of these forests;

(3) declines in the productivity of certain commercially important Southern pine species have been measured;

(4) existing research indicates that atmospheric pollution, including ozone, acidic deposition, and heavy metals, may contribute to this decline;

(5) there is an urgent need to expand and better coordinate existing Federal, State, and private research, including research by private industry, to determine the cause of changes in the health and productivity of domestic forest ecosystems and to monitor and evaluate the effect of atmospheric pollutants on such ecosystems; and

(6) such research and monitoring should not impede efforts to control atmospheric pollutants. n45

[This legislation amends] the Forest and Rangeland Renewable Resources Research Act of 1978 to direct the Secretary of Agriculture to establish, through the Forest Service, a 10-year program to determine the effects of air pollutants, in addition to acid precipitation, on forest ecosystems. The [legislation] gives clear direction to the Forest Service to develop and implement this program and expand the agency's current research and survey efforts in this area beyond their limited focus on acid precipitation. n46

§ 75.03(b)(10) Geothermal Energy Research, Development, and Demonstration Act of 1974 *(30 U.S.C.*

***§§1101* to 1164).**

The purpose of the [legislation] is to create an administrative mechanism for federal coordination and management of research, development, and demonstration activities in geothermal energy, including those presently funded by the Atomic Energy Commission, the Department of the Interior, and the National Science Foundation; to direct the Administrator of the National Aeronautics and Space Administration to undertake in fiscal year 1975 a program definition for an integrated national program to demonstrate the utilization of several geothermal energy resources by the end of fiscal year 1980; and to initiate a loan guaranty program as one means to further research, development, and utilization of geothermal resources by the private sector. n47

§ 75.03(b)(11) Global Climate Protection Act of 1987 *(15 U.S.C. §2901* note).

This legislation is based on the following Congressional findings and goals:

Findings.

The Congress finds as follows:

(1) There exists evidence that manmade pollution -- the release of carbon dioxide, chlorofluorocarbons, methane, and other trace gases into the atmosphere -- may be producing a long-term and substantial increase in the average temperature on Earth, a phenomenon known as global warming through the greenhouse effect.

(2) By early in the next century, an increase in Earth temperature could --

(A) so alter global weather patterns as to have an effect on existing agricultural production and on the habitability of large portions of the Earth; and

(B) cause thermal expansion of the oceans and partial melting of the polar ice caps and glaciers, resulting in rising sea levels.

(3) Important research into the problem of climate change is now being conducted by various United States Government and International agencies, and the continuation and intensification of those efforts will be crucial to the development of an effective United States response.

(4) While the consequences of the greenhouse effect may not be fully manifest until the next century, ongoing pollution and deforestation may be contributing now to an irreversible process. Necessary actions must be identified and implemented in time to protect the climate.

(5) The global nature of this problem will require vigorous efforts to achieve international cooperation aimed at minimizing and responding to adverse climate change; such international cooperation will be greatly enhanced by the United States meeting of the Governing Council of the United Nations Environment Program, scheduled for June 1989, which will seek to determine a direction for worldwide efforts to control global climate change.

(6) Effective United States leadership in the international arena will depend upon a coordinated national policy.

Mandate for Action on the Global Climate.

(a) Goals of United States Policy. -- United States policy should seek to --

(1) increase worldwide understanding of the greenhouse effect and its environmental and health consequences;

(2) foster cooperation among nations to develop more extensive and coordinated scientific research efforts with respect to the greenhouse effect;

(3) identify technologies and activities to limit mankind's adverse effect on the global climate by --

(A) slowing the rate of increase of concentrations of greenhouse gases in the atmosphere in the near term; and

(B) stabilizing or reducing atmospheric concentrations of greenhouse gases over the long term; and

(4) work toward multilateral agreements. n48

§ 75.03(b)(12) Marine Protection, Research, and Sanctuaries Act of 1972 *(33 U.S.C. §§1401* to 1445).

[This legislation] is divided into two titles: Title I -- Ocean Dumping and Title II -- Comprehensive Research on Ocean Dumping.

The purpose of Title I of the [legislation] is to regulate the dumping and transportation for dumping of waste material in those parts of the oceans, coastal and other waters beyond the territorial jurisdiction of the United States. The [legislation] bans under all circumstances the transportation for dumping and dumping in waters beyond the territorial jurisdiction of the United States of radiological, chemical, or biological warfare agents and high level radioactive wastes. The [legislation] also bans the transportation for dumping and dumping beyond the territorial jurisdiction of the United States of all other waste materials unless authorized by a permit issued by the Administrator of the Environmental Protection Agency (EPA).

The Administrator is authorized to issue permits for the transportation for dumping and dumping of materials when he deems that such action will not degrade the marine environment or endanger human life, in accordance with criteria that he is to establish by regulation. Civil penalties may be assessed by the Administrator, after notice and opportunity for hearing, and an action may be brought to impose criminal penalties for knowingly violating Title I.

... Title II of the [legislation] authorizes and directs the Secretary of Commerce, in coordination with the Secretary of the department in which the Coast Guard is operating and the Administrator of EPA, to initiate a comprehensive program of research on the effects of ocean dumping. n49

§ 75.03(b)(13) Mining and Mineral Resources Research Institute Act of 1984 *(30 U.S.C. §§1221* to 1230).

The purpose of [this legislation] is to re-authorize the establishment of a State mining and mineral resources research institute program similar to that which was established pursuant to Title III of the Surface Mining Control and Reclamation Act of 1977 *(91 Stat. 445; 30 U.S.C. 1221).* The original authorization under the 1977 Act expires in fiscal year 1984. The bill, in pertinent part, provides that one public college or university in each State that meets the eligibility criteria established in section 10 would receive federal grants to be matched by State grants in order to assist those States in carrying on the work of a competent and qualified mining and mineral resources research institute. n50

§ 75.03(b)(14) Multiple-Use Sustained-Yield Act of 1960 *(16 U.S.C. §§528* to 531).

The purpose of this [legislation] is to provide a direction to the Secretary of Agriculture to

administer the national forests for multiple use and sustained yield of their several products and services. It would name in a single statute the renewable surface resources for which the national forests are established and shall be administered.

In the effectuation of the act, the Secretary of Agriculture would be authorized "to cooperate with State and local agencies and others." The expression of authority in the bill "to cooperate with State and local agencies and others" should be construed as encouragement to the Secretary of Agriculture to stimulate State and local agencies and others to cooperate in the development and management of the national forests, particularly where benefits to the local community and local use are great.

It is made clear that nothing in the [legislation] would affect the authority which the Secretary of the Interior has with respect to the mineral resources in the national forest lands. Thus, the [legislation] would not impair mining operations and activities under the authorities which the Secretary of the Interior has with respect to such mineral resources.

Although the [legislation] lists wildlife and fish among the purposes for which the national forests are established and administered, it should be understood that the enactment of this [legislation] would not in any way affect the jurisdiction or responsibilities of the several States and their wildlife and fish agencies with respect to wildlife and fish on the national forests. n51

§ 75.03(b)(15) National Climate Program Act *(15 U.S.C. §§2901* to 2908).

The purposes of the National Climate Act are to expand the Nation's understanding of natural and man-induced climate processes, to relate knowledge of climate and its implications and effects to human welfare and the environment, and to respond more effectively to climate-induced problems. Climate fluctuations and change can have serious and disruptive effects on food production, water resources, energy use and other important human activities. An effective climate policy and program would help reduce the Nation's vulnerability to such disruptions. n52

§ 75.03(b)(16) National Coastal Monitoring Act *(33 U.S.C. §§2801 et seq.*).

The purposes of this title are to --

(1) establish a comprehensive national program for consistent monitoring of the Nation's coastal ecosystems;

(2) establish long-term water quality assessment and monitoring programs for high priority coastal waters that will enhance the ability of Federal, State, and local authorities to develop and implement effective remedial programs for those waters;

(3) establish a system for reviewing and evaluating the scientific, analytical, and technological means that are available for monitoring the environmental quality of coastal ecosystems;

(4) establish methods for identifying uniform indicators of coastal ecosystem quality;

(5) provide for periodic, comprehensive reports to Congress concerning the quality of the Nation's coastal ecosystems;

(6) establish a coastal environment information program to distribute coastal monitoring information;

(7) provide state programs authorized under the Coastal Zone Management Act of 1972 *(16 U.S.C. §1451 et seq.*) with information necessary to design land use plans and coastal zone regulations that will

contribute to the protection of coastal ecosystems; and

(8) provide certain water pollution control programs authorized under the Federal Water Pollution Control Act *(33 U.S.C. §1251 et seq.*) with information necessary to design and implement effective coastal water pollution controls. n53

§ 75.03(b)(17) National Forest Management Act of 1976 *(16 U.S.C. §§1600,* 1611 to 1614).

The "Forest Service, Department of Agriculture, in cooperation with other agencies, [is charged with] assessing the Nation's renewable resources, and developing and preparing a national renewable resource program, which is periodically reviewed and updated...." n54

§ 75.03(b)(18) Outer Continental Shelf Lands Act Amendments of 1978 *(43 U.S.C. §§1801* to 1866).

The purposes of this Act are to --

(1) establish policies and procedures for managing the oil and natural gas resources of the Outer Continental Shelf which are intended to result in expedited exploration and development of the Outer Continental Shelf in order to achieve national economic and energy policy goals, assure national security, reduce dependence on foreign sources, and maintain a favorable balance of payments in world trade;

preserve, protect, and develop oil and natural gas resources in the Outer Continental Shelf in a manner which is consistent with the need (A) to make such resources available to meet the Nation's energy needs as rapidly as possible, (B) to balance orderly energy resource development with protection of the human, marine, and coastal environments, (C) to insure the public a fair and equitable return on the resources of the Outer Continental Shelf, and (D) to preserve and maintain free enterprise competition;

(3) encourage development of new and improved technology for energy resource production which will eliminate or minimize risk of damage to the human, marine, and coastal environments;

(4) provide States, and through States, local governments, which are impacted by Outer Continental Shelf oil and gas exploration, development, and production with comprehensive assistance in order to anticipate and plan for such impact, and thereby to assure adequate protection of the human environment;

(5) assure that States, and through States, local governments, have timely access to information regarding activities on the Outer Continental Shelf, and opportunity to review and comment on decisions relating to such activities, in order to anticipate, ameliorate, and plan for the impacts of such activities;

(6) assure that States, and through States, local governments, which are directly affected by exploration, development, and production of oil and natural gas are provided an opportunity to participate in policy and planning decisions relating to management of the resources of the Outer Continental Shelf;

(7) minimize or eliminate conflicts between the exploration, development, and production of oil and natural gas, and the recovery of other resources such as fish and shellfish;

(8) establish an oilspill liability fund to pay for the prompt removal of any oil spilled or discharged as a result of activities on the Outer Continental Shelf and for any damages to public or private interests caused by such spills or discharges;

(9) insure that the extent of oil and natural gas resources of the Outer Continental Shelf is assessed at the earliest practicable time; and

(10) establish a fishermen's contingency fund to pay for damages to commercial fishing vessels and gear due to Outer Continental Shelf activities. n55

§ 75.03(b)(19) Pollution Prevention Act of 1990 *(42 U.S.C. §§13101* to 13109).

Sec. 13101. FINDINGS AND POLICY.

(a) Findings -- The Congress finds that:

(1) The United States of America annually produces millions of tons of pollution and spends tens of billions of dollars per year controlling this pollution.

(2) There are significant opportunities for industry to reduce or prevent pollution at the source through cost-effective changes in production, operation, and raw materials use. Such change offer industry substantial savings in reduced raw material, pollution control, and liability costs as well as help protect the environment and reduce risks to worker health and safety.

(3) The opportunities for source reduction are often not realized because existing regulations, and the industrial resources they require for compliance, focus upon treatment and disposal, rather than source reduction; existing regulations do not emphasize multi-media management of pollution; and businesses need information and technical assistance to overcome institutional barriers to the adoption of source reduction practices.

(4) Source reduction is fundamentally different and more desirable than waste management and pollution control. The Environmental Protection Agency needs to address the historical lack of attention to source reduction.

(5) As a first step in preventing pollution through source reduction, the Environmental Protection Agency must establish a source reduction program which collects and disseminates information, provides financial assistance to States, and implements the other activities provided for in this subtitle.

(b) Policy. -- The Congress hereby declares it to be the national policy of the United States that pollution should be prevented or reduced at the source whenever feasible; pollution that cannot be prevented should be recycled in an environmentally safe manner, whenever feasible; pollution that cannot be prevented or recycled should be treated in an environmentally safe manner whenever feasible; and disposal or other release into the environment should be employed only as a last resort and should be conducted in an environmentally safe manner. n56

§ 75.03(b)(20) Renewable Resources Extension Act of 1978 *(16 U.S.C. §§1671* to 1676).

This legislation authorizing federal sponsorship of renewable resource educational programs from universities, colleges and cooperative extension services, is based on five findings:

The first finding states that the extension program of the Department of Agriculture and the extension activities of each State provide useful and productive educational programs for private forest and rangeland owners, processors, and consumptive and non-consumptive users of forest and rangeland renewable resources, and that these educational programs complement research and assistance programs conducted by the Department. The second finding states that in order to meet national goals it is essential that all forest and rangeland renewable resources be fully considered in designing educational programs

for landowners, processors, and users. The third finding states that more efficient utilization and marketing of renewable resources can extend available supplies of such resources, provide products to consumers at prices less than they would otherwise be, and promote reasonable returns on the investments of landowners, processors, and users. The fourth finding cites the benefits of trees and forests in urban areas. The fifth finding cites the benefits of trees and shrubs used as shelterbelts. n57

§ 75.03(b)(21) Resource Conservation and Recovery Act of 1976 *(42 U.S.C. §§6901* to 6991i).

This act, part of the Solid Waste Disposal Act, is intended to provide technical and financial assistance for the development of management plans and facilities for the recovery of energy and other resources from discarded materials and for the safe disposal of discarded materials, and to regulate the management of hazardous waste. n58

§ 75.03(b)(22) Shore Protection Act of 1988 *(33 U.S.C. §§2601* to 2609, 2621 to 2623).

This act was passed together with, and shares the means and objectives of, the Ocean Dumping Ban Act of 1988. n59

§ 75.03(b)(23) Soil and Water Resources Conservation Act of 1977 *(16 U.S.C. §§2001* to 2009).

[This legislation] establishes a mechanism whereby the Federal Government in conjunction with State soil and water conservation agencies, local land owners and users, local units of government, and other concerned agencies or persons can make informed, long-range policy decisions with respect to the conservation and improvement of our country's soil, water, and related resources. The principal elements of this mechanism include a continuing assessment of the condition and quality of these vital resources, the determination of a comprehensive national policy and set of priorities based on the information gained from the inventory, the development of a program tailored to meet these needs, and, finally, a continuing evaluation of what is or should be accomplished. [This legislation] is not, nor is it intended to be, a land use control bill. n60

§ 75.03(b)(24) Surface Mining Control and Reclamation Act of 1977 *(30 U.S.C. §§1201* to 1328).

[This legislation] would enact a set of national environmental performance standards to be applied to all coal mining operations and to be enforced by the State with backup authority in the Department of the Interior. More specifically, [this legislation] will implement a national system of coal mining regulation by --

(1) Covering all coal surface mining (contour, mountaintop, area stripping and open-pit operations) and the surface impacts from underground mines and coal processing;

(2) Establishing administrative, environmental, and enforcement standards for regulatory programs to be administered by the States on non-federal lands;

(3) Providing authority for a federal regulatory program to augment State programs if necessary on non-federal lands;

(4) Applying federal standards to operations on Indian lands and undertaking a study to develop a program under which Indian tribes may elect to assume full regulatory authority of coal mining operations on Indian lands;

(5) Establishing a program for the reclamation of previously mined and inadequately reclaimed lands;

(6) Establishing a program for designating areas unsuitable for surface coal mining and a more

limited program for minerals other than coal;

(7) Establishing a new Office of Surface Mining Reclamation and Enforcement for implementing provisions on this act;

(8) Establishing a federal grant-in-aid program to the States for State mining and mineral resource research institutes;

(9) Establishing procedures for public review of the administrative and enforcement program through access to data, hearings, inspections and standing to sue for damages for non-compliance with the act; and

(10) Recognizing the rights of surface owners and offsite water users. n61

§ 75.03(b)(25) Water Resources Research Act of 1984 *(42 U.S.C. §§10301* to 10309).

It is the purpose of this Act to assist the Nation and the States in augmenting their water resources science and technology as a way to --

(1) assure supplies of water sufficient in quantity and quality to meet the Nation's expanding needs for the production of food, materials, and energy;

(2) discover practical solutions to the Nation's water and water resources related problems, particularly those problems related to impaired water quality;

(3) assure the protection and enhancement of environmental and social values in connection with water resources management and utilization;

(4) promote the interest of State and local governments as well as private industry in research and the development of technology that will reclaim waste water and to convert saline and other impaired waters to waters suitable for municipal, industrial, agricultural, recreational, and other beneficial uses;

(5) promote more effective coordination of the Nation's water resources research program;

(6) promote the development of a cadre of trained research scientists, engineers, and technicians for future water resources problems; n62 and (7) encourage long-term planning and research to meet future water management, quality, and supply challenges.

§ 75.03(b)(26) Wood Residue Utilization Act of 1980 *(16 U.S.C. §§1681* to 1687).

The purpose of [this legislation] ... is to develop, demonstrate, and make available information on methods to increase and improve wood residue utilization. The emphasis is to be on methods that are feasible and that have potential for commercial application in homes, businesses, industries and power plants. n63

§ 75.03(b)(27) Cogeneration and Small Power Production *(16 U.S.C. §824a-3)*

Congress is instructed to issue rules to encourage cogeneration and small power production, and to encourage geothermal small power production facilities of not more than 80 megawatts capacity.

§ 75.03(c) Policy and Procedural Regulation.

The National Environmental Policy Act of 1969, which was actually signed by the President on January 1, 1970, is a

brief and somewhat general piece of legislation that has subsequently had monumental impact. The first part of this act declares national environmental policy and goals; the second part creates the Council on Environmental Quality and describes its responsibilities. This council has also issued federal regulations. n64

The declaration of policy and statement of responsibility were stated in very broad terms:

> In order to carry out the policy set forth in this chapter, it is the continuing responsibility of the Federal Government to use all practicable means, consistent with other essential considerations of national policy, to improve and coordinate Federal plans, functions, programs, and resources to the end that the Nation may --
>
> (1) fulfill the responsibilities of each generation as trustee of the environment for succeeding generations;
>
> (2) assure for all Americans safe, healthful, productive, and esthetically and culturally pleasing surroundings;
>
> (3) attain the widest range of beneficial uses of the environment without degradation, risk to health or safety, or other undesirable and unintended consequences;
>
> (4) preserve important historic, cultural, and natural aspects of our national heritage, and maintain, wherever possible, an environment which supports diversity and variety of individual choice;
>
> (5) achieve a balance between population and resource use which will permit high standards of living and a wide sharing of life's amenities; and
>
> (6) enhance the quality of renewable resources and approach the maximum attainable recycling of depletable resources. n65

The most substantive part of this Act was the section that introduced the requirement for environmental impact statements:

> [A]ll agencies of the Federal Government shall --
>
> ... (C) include in every recommendation or report on proposals for legislation and other major federal actions significantly affecting the quality of the human environment, a detailed statement by the responsible official on --
>
> (i) the environmental impact of the proposed action,
>
> (ii) any adverse environmental effects which cannot be avoided should the proposal be implemented,
>
> (iii) alternatives to the proposed action,
>
> (iv) the relationship between local short-term uses of man's environment and the maintenance and enhancement of long-term productivity, and
>
> (v) any irreversible and irretrievable commitments of resources which would be involved in the proposed action should it be implemented. n66

While the reach of this act has been well beyond real property rights, this federal legislation and the numerous imitative state laws have had profound impact in the field of public regulation of land.

CHAPTER 75 THE IMPACT OF ENVIRONMENTAL REGULATION ON REAL PROPERTY

8-75 Thompson on Real Property, Thomas Editions § 75.04

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 75.04 Air Pollution Control.

The Clean Air Act n67 first appeared in 1955 and since then has grown into a gargantuan tangle of legislation, regulation, and judicial interpretation. As deftly described in one treatise:

> The Federal Clean Air Act (the Act) is an inordinately complex and confusing statute. In Act form it runs to nearly 200 pages. There are more than 2,700 pages of regulations of the United States Environmental Protection Agency (EPA) implementing the Act, and many hundreds of additional pages are always under development. In addition, there are hundreds of pages of EPA guidelines providing guidance on activities such as monitoring and predicting air quality concentrations. Unpublished interpretive memoranda and guidance, opinions of EPA's Office of General Counsel, and decided cases (already numbering in the hundreds) run into thousands of pages. n68

The principal purpose of the act is to establish and maintain national ambient air quality standards. Ambient air, as defined by the EPA is, "that portion of the atmosphere, external to buildings, to which the general public has access." n69 As interpreted by regulatory authority, ambient air has come to mean the air beyond the property boundaries of a pollution source, if adequate control of public access to the property is maintained. n70

The approach of the Clean Air Act is to require the EPA to identify specific pollutants, prescribe minimum air quality standards, setting maximum acceptable atmospheric concentrations for these specific pollutants, and identify control techniques for the pollutants. Standards for these particular pollutants in turn become part of models and computations for evaluating whether overall ambient air quality standards are being maintained. The act also requires states to create and submit for EPA approval state implementation plans providing for attainment of primary and secondary ambient air quality standards within designated time limits. If a state does not adopt an acceptable plan, the EPA theoretically adopts a plan for the state. n71

An important goal of requiring state implementation plans is to prevent air quality deterioration in those areas where acceptable air quality already exists. To achieve this objective, the state plans must have provision for a program of preconstruction permit review and issuance, periodic review of the plan and of the air quality to ensure that deterioration is not occurring, and adequate means to prevent deterioration that is either imminent or actually occurring. Another part

of the act is aimed at protecting and improving visibility values in the air. Provisions for visibility protection should be included in state implementation plans. n72

When an area does not meet established air quality standards, the possible consequences include withholding of certain federal funds (such as for highways and sewage treatment facilities) and preventing construction of facilities that may generate pollutants. The EPA has also established national performance standards for new, modified, or reconstructed facilities that have the potential to generate pollutants. After promulgation of such standards it becomes more difficult for individual states to recruit new industries by claiming relatively lower pollution control costs.

Emissions of hazardous air pollutants are subject to federal emission standards, n73 but the actual processes of regulation are conducted at the state level.

To aid in enforcement, the Clean Air Act provides for civil and criminal penalties -- including non-compliance penalties, and injunctions. Also, for areas that remain in non-compliance, sanctions in the form of moratoria on permits and withholding of federal funds for such projects as highways, sewage treatment plants, and air pollution control grants may be imposed. n74 The EPA administrator is required to bring enforcement actions against violators, n75 but may do so either by the notice process or by civil actions in federal court. n76 The criminal penalties may include either significant daily fines or imprisonment or both, n77 and those penalties may also be imposed on "any responsible corporate officer." n78 In most instances the penalty provisions of the act do not become operative until 30 days after a notice of violation has been issued by the administrator. n79

CHAPTER 75 THE IMPACT OF ENVIRONMENTAL REGULATION ON REAL PROPERTY

8-75 Thompson on Real Property, Thomas Editions § 75.05

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 75.05 Water Pollution Control.

Federal water pollution legislation dates back to 1899, when the Rivers and Harbors Act was enacted. n80 Building bridges and other structures and depositing solid waste were prohibited without Army Corps of Engineer approval or permit. With enactment of the Federal Water Pollution Control Act of 1948, n81 courts were empowered to order abatement of water pollution, and under the Water Quality Act of 1965, n82 water quality standards were established for interstate waters. A major reshaping of water pollution legislation occurred with the approval of the Clean Water Act n83 in 1972. This act continued, and provided for ongoing review of, water quality standards and placed limits on discharges of pollutants into waters. Further amendments were made in 1977 n84 and in 1987. n85 The latter amendments included new water quality controls for toxic pollutants, requirements for storm water discharges, civil penalties, and compliance deadline extensions.

Standards concerning the level of water quality are based either on the best available technology or on measurements of actual pollutant levels in the water. Usually the more stringent or restrictive of the two standards is deemed applicable. To secure compliance with these standards, a permit system has been established, applicable to those responsible for discharges into federal waters. n86 If discharges are made without the required permit, civil and criminal penalties at both federal and state levels may be imposed, and the offender may also be exposed to citizen suits. n87 Such discharges may also violate Environmental Protection Agency (EPA) standards for toxic pollutants and pretreatment processes, and the same consequences in terms of penalties and private litigation judgments may follow.

CHAPTER 75 THE IMPACT OF ENVIRONMENTAL REGULATION ON REAL PROPERTY

8-75 Thompson on Real Property, Thomas Editions § 75.06

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 75.06 Noise Control.

The Noise Control Act of 1972 directs EPA "to promote an environment for all Americans free from noise that jeopardizes their health and welfare." It specifies that EPA shall regulate new products in commerce that are "major sources of noise" and shall establish noise labeling requirements for noisy products and products designed to reduce noise. In 1978, Congress amended this legislation with the Quiet Communities Act to encourage the development of noise control programs on the community and state level. The amendments provided a necessary link and balance between the federal regulatory program and local noise control activities.

EPA began the rulemaking process by examining transportation and construction noise, the primary concerns of most local communities. The agency studied various products -- such as trucks, motorcycles, and jack hammers -- and considered a broad range of factors, including the absolute magnitude of the noise emitted in typical environments and whether the product is used in the combination with other noisy products. EPA's principal objective was to improve the health and welfare benefits to the public by lowering noise emissions from products identified as major noise sources. This was the central theme of the 1972 Act. Also considered was the available technology and the costs to both the manufacturer and the consumer of reducing the noise levels of these products.

Since 1972, EPA has identified 10 products as major noise sources: medium and heavy trucks, motorcycles, buses, garbage trucks, wheel and crawler tractors (used in construction), portable air compressors, pavement breakers (or jack hammers), rock drills, power lawnmowers, and truck refrigeration units.

Besides standards on newly manufactured products, EPA has issued in-use regulations for locomotives and rail cars used in interstate commerce and has proposed standards for other railroad equipment and facilities. These regulations are enforced by the Federal Railroad Administration of the Department of Transportation.

Since 1975, interstate motor carriers also have been covered by EPA's in-use standards, which have proven effective in getting the worst noise offenders off the highways. The Bureau of Motor Carrier Safety of D.O.T. actively enforces these standards.

F.A.A. is responsible for issuing noise limits for new types of aircraft. The Federal Air Regulation noise limits on new

types of aircraft were established in 1969 and in 1977, and now cover most types of aircraft, including jet transports and propeller-driven aircraft. There is also a "retrofit or replacement" rule requiring all existing subsonic jet transport aircraft to meet at least the 1969 limits by 1985. In 1979 F.A.A. proposed noise limits for new helicopters:

> The protection of workers from excessive noise on the job is an area of increasing public concern and controversy. The Occupational Safety and Health Administration (OSHA) is charged with developing and enforcing rules to prevent excessive noise exposure. OSHA's mandate is that *no* employee should suffer material impairment of health or functional capacity even if the employee is regularly exposed to a hazard covered by an OSHA standard for the period of his working life ...

Because federal standard-setting alone cannot achieve desirable community noise levels, state and local programs are an essential complement. The Noise Control Act as modified by the Quiet Communities Act provides the framework for a federal partnership with states and localities in achieving a balanced national noise control program.

> One facet of this partnership is EPA's program for financial assistance to help communities launch noise control programs. This is not long-term assistance; instead it is designed to help communities identify their particular noise problems and build programs in response. n88

Noise control legislation is common at the state and local levels and, indeed, mostly at the local level:

> Almost every state has enacted laws requiring mufflers on vehicles to prevent excessive noise and to the extent that these muffler regulations require particular kinds of performance from new equipment, they are likely to be displaced by pre-emptive noise control regulations for motor vehicles to be issued by EPA under the 1972 Noise Control Act ... But in spite of a growing state interest in the area, enhanced considerably by the passage of the 1972 Federal Noise Control Act, regulatory activities are still mainly based on local ordinances. The local legislation regarding noise is generally part of a set of miscellaneous prohibitions collected in local codes. Frequently, they are composed of matters too trivial to appear in the state's general penal code and usually too neglected in modern times to be brought together in public health laws or similar legislation. n89

CHAPTER 75 THE IMPACT OF ENVIRONMENTAL REGULATION ON REAL PROPERTY

8-75 Thompson on Real Property, Thomas Editions § 75.07

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 75.07 Hazardous Substances Control.

To the extent that solid waste disposal includes cleanup of hazardous wastes, the actions have been dominated by the Comprehensive Environmental Response, Compensation, and Liability Act, known commonly as CERCLA actions have their own impetus and objectives and a similar but separate citizen suit provision. n90 One commentator has noted:

> To a large extent the role of [the Solid Waste Disposal Act citizen suit provisions] in the EPA enforcement effort has been diminished by the increased reliance on CERCLA [citizen suit] orders, which carry the possible penalty of treble the costs of the ordered cleanup. But the reach of [the Solid Waste Disposal Act action] probably is as broad as [the CERCLA action] -- for example, [the solid waste action] applies to *all* wastes (including liquids and gases) -- and it may be that EPA will routinely use both provisions to encourage the desired conduct at the same site. n91

So, even with a perhaps diminished role in environmental regulation and enforcement, solid waste disposal laws will continue to be important.

The Solid Waste Disposal Act n92 was significantly amended in 1976 by passage of the Resource Conservation and Recovery Act, n93 which, together with voluminous EPA regulations in 1980, n94 established programs to manage hazardous wastes.

Under these enactments and regulations hazardous wastes are defined and identified, and regulations and permit requirements for handling and disposal of wastes are established. States that have enacted programs similar to the federal program may also be authorized to administer the federal regulations. Amendments to the Act in 1984 n95 launched the federal government into a more aggressive program of containing and disposing of wastes.

Regulation of waste disposal usually takes the form of recordkeeping and reporting requirements for those who generate and transport waste materials, and a permit program for those who store and dispose of waste. The key to applicability of these regulations is the definitions of what is a solid waste, n96 and which solid wastes may be designated as hazardous. Material is considered hazardous if it appears on one of several itemized lists of hazardous material, n97 or,

more generally, if it possesses one of the characteristics of ignitability, corrosivity, reactivity or toxicity. n98

Although the federal regulatory program has been worked out in considerable detail, most states have implemented their own program in place of a federal program. However, the EPA will not authorize a state to administer such a waste program unless the state requirements are no less strict than the federal requirements, and, even after authorizing a state program, the EPA retains considerable enforcement authority. Among the devices that either state or federal agencies might use to compel compliance are restraining and compliance orders, permit requirements, requirements for reporting and testing at a site, court actions, and criminal penalties.

CHAPTER 75 THE IMPACT OF ENVIRONMENTAL REGULATION ON REAL PROPERTY

8-75 Thompson on Real Property, Thomas Editions § 75.08

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 75.08 Radiation Control.

Under the first Atomic Energy Act in 1946, the federal government first asserted federal controls over nuclear power that pre-empt any regulation by state and local governments. Not until 1959 did the federal government begin to share some rulemaking and enforcement power with the state and local governmental entities.

According to the nuclear regulatory legislation, the Atomic Energy Commission and its successor, the Nuclear Regulatory Commission, were assigned to set radiation protection standards relating to nuclear installations. Now some of this responsibility is shared with the Environmental Protection Agency (EPA). The EPA sets limits on levels of radiation exposure for the general environment, apart from nuclear reactors, but, with respect to those facilities, emission controls are the responsibility of the Nuclear Regulatory Commission.

CHAPTER 75 THE IMPACT OF ENVIRONMENTAL REGULATION ON REAL PROPERTY

8-75 Thompson on Real Property, Thomas Editions § 75.09

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 75.09 CERCLA: Responsibility for Clean-Up of Environmental Pollution.n99

[Go To Supp]

§ 75.09(a) Introduction to CERCLA

Certain uses of land subject the land user to complex environmental regulations, mostly aimed at controlling land uses that cause environmental harm; violations of these regulations can result in imposition of both civil and criminal penalties. For example, the Clean Water Act n100 (CWA) governs uses of land that discharge pollutants into "the waters of the United States, including the territorial seas." n101 The Safe Drinking Water Act n102 (SDWA) controls the injection of pollutants into underground water. n103 The Clean Air Act n104 (CAA) governs uses of land that release air pollutants. n105 Storage or disposal of solid and hazardous waste on land is regulated by the Resource Conservation and Recovery Act n106 (RCRA).

However, the Comprehensive Environmental Response, Compensation, and Liability Act n107 (CERCLA) affects all other major environmental legislation and goes well beyond regulating uses of land to reduce environmental harm. Instead of focusing on pollution control or regulating behavior, CERCLA focuses on responding to pollution that has already occurred, and it imposes liability for the costs of cleaning up land that has been contaminated with hazardous substances. n108 CERCLA is unequivocally the most important and troublesome environmental statute for both landowners and lenders who are secured by land, because it imposes such expansive liability.

CERCLA liability often extends to landowners or lenders who had little or nothing to do with hazardous materials being placed on the property and who were not traditionally thought of as perpetrators of environmental harm. Current landowners may be liable for the cleanup of hazardous waste that was released on the property by previous landowners, no matter how remote the chain of title and possession. n109 Mortgagees may be liable for cleaning up hazardous waste that was placed on the property by the mortgagor.

Moreover, in bankruptcy proceedings, the cost of cleanup may be assigned priority of access to the debtor's assets ahead of claims of secured creditors. Thus, even if lenders are not directly liable for cleanup costs, they may nevertheless face a type of indirect CERCLA liability, because their security interest in contaminated property may be compromised by CERCLA cleanup costs.

Because CERCLA liability extends to lenders or landowners who have had little experience with complex environmental statutes and regulations, it is essential that these parties obtain a basic understanding of CERCLA. Otherwise, lenders or landowners who do not think of themselves as polluters may be surprised to find that they are responsible for enormous cleanup costs n110 or that their security is worthless. n111

This section provides a basic outline of CERCLA and discusses issues relating to lender or landowner liability. The first part of the section provides an overview of CERCLA and the Superfund n112 program. The next part of the section examines the liability scheme under CERCLA, with special emphasis on lender or landowner liability. The final part of the chapter analyzes how CERCLA may threaten security interests.

§ 75.09(b) Overview of CERCLA

CERCLA was passed in December, 1980, during the final days of a lame duck Congress and Presidency. n113 Three bills were hurriedly combined to form CERCLA. n114 Thus, CERCLA's legislative history has been criticized by both courts and commentators as being confusing or even contradictory, n115 and the text of CERCLA has been lampooned as a quintessential example of a confusing, poorly drafted statute. n116 Nevertheless, the legislative history and text of CERCLA make clear that Congress intended to (1) provide the government with the authority to respond effectively to and clean up hazardous waste sites where releases have occurred or are likely to occur, and (2) impose liability for these cleanup or response costs on those responsible for the releases. n117

Under CERCLA, releases or threatened releases of a hazardous substance from a vessel or facility must be reported by the person in charge of the vessel or facility. Potentially responsible parties n118 (PRPs) may be forced to respond to or clean up the release in a manner consistent with the National Contingency Plan (N.C.P.), and the Environmental Protection Agency (EPA) or Coast Guard may issue an administrative order or seek an injunction to compel such PRP response. Alternatively, the EPA may respond to or clean up a release itself and recover its costs from the PRPs for all actions consistent with the NCP. In addition, third parties may respond to a release and seek recovery of their costs from the Superfund or PRPs if the response is consistent with the N.C.P. n119 The following subsections discuss in greater detail the elements of CERCLA that describe reporting duties, response and cleanup actions, and liability.

§ 75.09(b)(1) Determining What Is a Hazardous Substance.

For CERCLA purposes, hazardous substances include (1) toxic or hazardous pollutants designated under other environmental statutes n120 and (2) any other toxic or hazardous pollutants designated under CERCLA §102(a). n121 Materials designated as toxic pollutants n122 or hazardous substances under the CWA, n123 as hazardous waste under RCRA, n124 as hazardous air pollutants under the CAA, n125 or as an "imminently hazardous chemical substance or mixture" n126 under the Toxic Substance Control Act n127 (T.S.C.A.) are all hazardous substances under CERCLA. The §102 authority n128 to list additional hazardous substances fills in any gaps left by these environmental statutes. n129

The EPA also has authority to respond to a "release or substantial threat of release into the environment of any pollutant or contaminant which may present an imminent and substantial danger to the public health or welfare." n130 Pollutants or contaminants are defined under CERCLA §101(33). n131 However, PRPs are not liable under CERCLA for releases or threatened releases of these pollutants or contaminants. Under CERCLA, the EPA can only force PRPs to respond to or clean up a release of *hazardous substances*, n132 and PRPs are only liable for response costs incurred for *hazardous substance* releases. n133 Thus, there may be instances where the EPA has authority to respond to a release of pollutants but cannot impose CERCLA liability on PRPs for response costs.

However, EPA response to contaminant releases where PRPs are exculpated from liability is exceedingly rare. If a pollutant or contaminant is dangerous enough to warrant EPA response when released into the environment, it is likely that the pollutant or contaminant has already been determined to be a hazardous substance under CERCLA A review of

the hazardous substances list shows that it contains almost every known hazardous pollutant. n134

The most prominent exclusion from the CERCLA list of hazardous substances is the petroleum exclusion. The definition of "hazardous substance" n135 or a "pollutant or contaminant" n136 specifically excludes "petroleum, including crude oil and any fraction thereof...." n137 This exclusion can be attributed to both the considerable influence of the petroleum lobby and the EPA's authority to deal with oil spills under the CWA n138 The EPA has interpreted the petroleum exclusion to except all naturally occurring petroleum fractions from CERCLA coverage, even if these petroleum fractions contain listed hazardous substances. Moreover, the EPA excludes from CERCLA petroleum products that contain hazardous substances as additives as long as these additives are normally added during the refining process and do not exceed normal refining levels. Although the EPA's interpretation of the petroleum exclusion is not outlined in the regulations, it has been clearly articulated in EPA guidance documents. The petroleum exclusion encompasses hazardous substances (1) "which are inherent in petroleum" or (2) "which are normally mixed with or added to crude oil or crude oil fractions during the refining process." n139

Courts have generally accepted the EPA's interpretation of the petroleum exclusion. For example, the Ninth Circuit has held that the petroleum exclusion "does apply to unrefined and refined gasoline even though certain of its indigenous components and certain additives during the refining process have themselves been designated as hazardous substances within the meaning of CERCLA" n140 Thus, although they may contain benzene, lead, and other chemicals that are hazardous substances under CERCLA, gasoline, diesel fuel, and similar petroleum products are not hazardous substances under CERCLA n141

However, the petroleum exclusion does not extend to petroleum fractions that have been mixed with hazardous substances after the refining process. n142 This rule may remove most waste or used oil from the petroleum exclusion, because oil often comes in contact with and mixes with hazardous substances during use. Thus, PRPs have incurred CERCLA liability for releases of used crankcase oil. n143 In addition, waste oil emulsion containing hazardous substances added after the refining process does not qualify for the petroleum exclusion. n144 Moreover, the petroleum exclusion does not include pesticides, even though the pesticide may be produced from a petroleum fraction. n145 The addition of any hazardous substance to a petroleum fraction after the "normal" refining process removes the fraction from the petroleum exclusion.

In addition to petroleum, §§101(14) and 101(33) of CERCLA exclude "natural gas, natural gas liquids, liquefied natural gas, or synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas). n146 The EPA has no response authority under CERCLA for these substances, and there are no CERCLA reporting duties for releases of these substances.

If the substance at issue is a CERCLA hazardous substance which is not excepted by one of the statutory exclusions, the next issue is whether the substance has been released.

§ 75.09(b)(2) Determining Whether There Has Been a Release or Substantial Threat of Release.

Before the EPA has the authority to act under CERCLA and before liability may be imposed, there must be "an actual or threatened release of a hazardous substance from a facility." n147 The CERCLA definition of release is extremely broad and covers almost every conceivable way that a hazardous substance could be placed into the environment. CERCLA §101(22) states:

> The term "release" means any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment of discarded barrels, containers, and other closed receptacles containing any hazardous substance or pollutant or contaminant)... n148

Although for CERCLA purposes a release must be "into the environment," n149 the definition of the environment under CERCLA §101(8) is also exceedingly broad. n150 A release into the "environment" is a release into any air, water, or land under the jurisdiction of the United States. n151

However, the definition of a release does place some limitations on CERCLA authority and liability. The releases excluded from CERCLA are usually regulated to some extent under other statutory schemes. First, releases confined solely to the workplace and affecting only employees are excluded from CERCLA to the extent such releases create claims against the employer. n152 These workplace releases are regulated under the Occupational Health and Safety Act n153 (OSHA) and state workers' compensation laws. Second, engine exhaust releases from mobile sources and pipeline pumping stations are regulated by the CAA n154 and do not come within the purview of CERCLA n155 Third, certain nuclear or radioactive releases are handled under the Atomic Energy Act of 1954 n156

or the Uranium Mill Tailings Radiation Control Act of 1980. n157 Finally, "the normal application of fertilizer" is simply exempted from CERCLA coverage. n158

In addition, there is no notification requirement or liability under CERCLA for federally permitted releases. n159 Federally permitted releases include releases under CWA National Pollutant Discharge Elimination System (N.P.D.E.S.) permits, n160 CWA §404 dredge and fill permits, n161 RCRA treatment, storage, and disposal (T.S.D.) permits, n162 ocean dumping permits, n163 SDWA underground injection control permits, n164 non-attainment or P.S.D. permits and CAA control regulations, n165 state energy production injection laws, n166 CWA pretreatment standards, n167 or Atomic Energy Act permits, licenses, regulations or orders. n168

After it has been established that a release, as defined by CERCLA, of a CERCLA hazardous substance has occurred, the next issue is whether the hazardous substances release occurred at a facility or vessel.

§ 75.09(b)(3) Determining Whether the Real Property is a "Facility."

EPA response authority under CERCLA §104 does not require the existence of a vessel or a facility. Thus, the EPA may respond to any release of a hazardous substance, as long as response is consistent with the N.C.P. However, PRPs can be compelled to respond to a release or be held liable for response costs only if the release is from a vessel n169 or facility. n170 Similarly, CERCLA reporting requirements also presuppose a vessel or facility. n171

The facility requirement offers PRPs little protection, however, because almost any structure, container, or property is classified as a facility under the broad definition supplied by CERCLA n172 "Simply put, the term 'facility' includes *every* place where hazardous substances come to be located." n173 Therefore, the definition of a facility under CERCLA is seldom a material issue. n174 Any real property where hazardous substances are located is unequivocally a hazardous waste facility.

§ 75.09(b)(4) Reporting Duties.

CERCLA creates certain reporting duties which are triggered by the release of a hazardous substance from a vessel or facility (onshore or offshore). n175 Failure to comply with the reporting requirements is punishable by both fines and imprisonment. n176 The reporting duty arises as soon as any person in charge of a vessel or facility has knowledge that a hazardous substance release has occurred. The person in charge of the vessel or facility must report such a release immediately by contacting the National Response Center in Washington, D.C. n177

However, each of the three elements discussed above must be present before the person in charge is required to report a release: (1) a hazardous substance, (2) a release, and (3) a facility or vessel. Moreover, there is no reporting duty if the hazardous substance is released (1) in an amount less than the "reportable quantity" n178 or (2) under a federal permit, or (3) if one of the three specific exemptions apply.

§ 75.09(b)(4)(i) Reportable Quantities.

To avoid the inefficient reporting of *de minimis* releases, CERCLA §102(a) n179 orders the Administrator to promulgate regulations establishing the reportable quantities for different hazardous substances. A hazardous substance release need not be reported unless the quantity released exceeds these threshold amounts. n180 Until the EPA had time to establish reportable quantities, §102(b) of CERCLA n181 set the initial reportable quantities at levels established under the CWA for those substances regulated under the CWA, n182 or at one pound for substances not regulated under the CWA However, the EPA has since promulgated regulations establishing reportable quantities for most hazardous substances. n183 These reportable quantities range from 1 to 5,000 pounds. The notification requirement is triggered by any release equal to or above the reportable quantity in any 24-hour period. n184

§ 75.09(b)(4)(ii) Exemptions.

Beyond the requirement of a reportable quantity, §103 sets forth four specific exemptions from CERCLA release reporting requirements. n185 First, no reporting duty arises if the release is pursuant to a federal permit. n186 Second, "the application of a pesticide product registered under the Federal Insecticide, Fungicide, and Rodenticide Act" n187 (FIFRA) is exempted from CERCLA reporting requirements. n188 Third, any release that is specifically exempted from RCRA reporting requirements n189 need not be reported under §103(a) of CERCLA n190 Finally, "a continuous release, stable in quantity and rate," which has already been reported is not subject to §103(a) notification requirements. n191

§ 75.09(b)(4)(iii) Facility Notification.

A related reporting duty is the facility notification requirement of CERCLA §103(c). The facility notification requirement is not created by a release of a hazardous substance but rather by the knowledge that hazardous waste has been treated, stored, or disposed of at the facility. The hazardous wastes (as opposed to hazardous substances) that trigger notification are identified and listed pursuant to RCRA §3001. n192 No release is required to create this notification requirement. The necessary elements to trigger the notification requirement are the (1) past or present treatment, storage, or disposal (TSD) of hazardous waste at (2) a facility. Notification is not necessary if the facility has received an interim status or final RCRA T.S.D. permit. n193 Again, the application of pesticides registered under F.I.F.R.A. is exempted from CERCLA reporting requirements. n194

The facility reporting duty extends to "any person who owns or operates or who at the time of disposal owned or operated, or who accepted hazardous substances for transport and selected, a facility at which hazardous [wastes] are or have been stored, treated or disposed of." n195 Although facility notification should have been filed by June 9, 1981, for facilities existing prior to that time, n196 the notification requirement is ongoing. Thus, any new knowledge that hazardous waste was treated, stored, or disposed of at a facility must be reported immediately.

If a release at a T.S.D. facility is reported, the next issue becomes whether response to the release is warranted or required.

§ 75.09(b)(5) Response Authority Under CERCLA §104.

CERCLA §104 n197 gives the government authority to respond to any release or substantial threat of release of either (1) a hazardous substance or (2) pollutants or contaminants "which may present an imminent and substantial danger to the public health and welfare." n198 This response authority is vested in the President, n199 and the President has delegated this authority to the Coast Guard for releases in coastal zones or certain navigable waters and to the EPA for almost all inland releases. n200 The response authority for *hazardous substances* under §104(a)(1)(A) is not based on any finding of "imminent and substantial danger" n201 because the danger is inherent in the definition of a hazardous substance. To respond under §104(a)(1)(A), there need only be a (1) release or threatened release of (2) a hazardous

substance. n202 However, response authority under §104(a)(1)(B) is conditioned on (1) a pollutant or contaminant, (2) a release or threatened release, and (3) imminent, substantial danger. n203

If the elements of §104(a)(1) are satisfied, the EPA may respond to or clean up a site using money from the Superfund, as long as this response is consistent with the N.C.P. n204 The Superfund was originally supplied with $1.6 billion under CERCLA §111 for the years 1981-1985; however, S.A.R.A. increased the fund to $8.5 billion for years 1986-1991. n205 The Superfund is financed by congressional appropriations; taxes on petroleum, petroleum products, and chemical feedstocks; an environmental tax on corporations; and costs and penalties recovered from PRPs. n206 If the EPA has responded to the release of a hazardous substance under §104(a)(1)(A), the agency may replenish the Superfund by suing PRPs to pay for response costs. However, the EPA cannot seek reimbursement from PRPs for §104(a)(1)(B) responses to pollutants and contaminants because PRP liability is predicated on the existence of a hazardous substance. n207

As part of the EPA's response authority, the EPA has the discretion to allow PRPs, rather than the EPA, to respond to or clean up a hazardous substance release if the EPA believes that the PRPs will respond "properly and promptly." n208 Like EPA response, PRP response actions must be consistent with the N.C.P. In addition, the EPA will appoint qualified personnel to oversee all PRP actions, and the PRP must reimburse the EPA for these oversight costs. n209

The appropriate response action is usually selected by the EPA PRPs cannot challenge the selected response action until EPA or another PRP seeks recovery of response costs by bringing a §107 action against the PRPs. n210 CERCLA §113(h) specifically provides that courts lack jurisdiction to review "removal or remedial action selected under §104" until response costs are incurred and some party seeks recovery under §107. n211 CERCLA divides response actions into the two broad categories of removal actions and remedial actions. n212

§ 75.09(b)(5)(i) Removal Actions.

Removal actions are generally short term solutions to hazardous substance releases and include steps "to prevent, minimize, or mitigate damage to the public health or welfare or the environment." n213 Removal actions specifically include such emergency operations as "temporary evacuation and housing of threatened individuals," providing uncontaminated water, and fencing off dangerous areas. n214 Other removal actions include the monitoring and evaluation of a release or threatened release and, of course, the actual removal of a hazardous substance. Section 104 provides that removal actions should "contribute to the efficient performance of any long term remedial action." n215

§ 75.09(b)(5)(ii) Remedial Actions.

Remedial actions are permanent, long term solutions to hazardous substance releases. Remedial actions include all cleanup and containment activities; permanent relocation of individuals, businesses, and community facilities; and "offsite storage, treatment, destruction, or secure disposition of hazardous substances and associated contaminated materials." n216 The EPA must consult with affected states before selecting an appropriate permanent remedy. n217 Selection of a remedial action is governed by the N.C.P. and CERCLA §121. n218 As discussed later in this section, the N.C.P. sets forth the procedures and standards for cleaning up hazardous substance releases. n219 One important restriction under the N.C.P. is that Superfund expenditures for remedial actions are limited to sites that have been placed on the National Priorities List (N.P.L.). n220 CERCLA §121 provides for remedial action cleanup standards in harmony with the N.C.P. n221

Section 121 requires releases to be cleaned to a contaminant level that "assures protection of human health and the environment." n222 Congress has directed that this threshold must be met by removing the hazardous substance until the level of the substance no longer exceeds any "legally applicable or relevant and appropriate standard, requirement, criteria, or limitation." n223 These applicable or relevant and appropriate requirements (A.R.A.R.s) include levels under federal environmental statutes (*e.g.*, T.S.C.A., SDWA, CAA, CWA, and RCRA) and levels under state environmental

laws that are more stringent than federal standards. n224

A.R.A.R.s can be divided into two subcategories: (a) applicable requirements and (2) relevant and appropriate requirements. If the A.R.A.R. is a legally applicable standard, determining the cleanup level under §121 is relatively easy. For example, a release of arsenic into groundwater would have to be cleaned up to a level of. 05 milligrams per liter, the level legally applicable under RCRA n225 However, determining A.R.A.R.s which are both relevant and appropriate is much more difficult and requires the EPA and courts to exercise a great deal of discretion. For example, under what circumstances should the level of cleanup be set by health and safety standards under OSHA? CERCLA specifically requires cleanup to attain Maximum Contaminant Level Goals under the SDWA or water quality criteria levels under the CWA if these levels are relevant and appropriate. n226 Thus, CERCLA may require cleanup to attain contaminant levels that are actually lower than levels permitted when there is no CERCLA release in the first place. In other words, the EPA can require PRPs to restore the environment to a cleaner level than the normal legally required level.

State A.R.A.R.s determine contaminant cleanup levels only if they are more stringent than any of the federal A.R.A.R.s. In addition, state A.R.A.R.s must be "of general applicability," promulgated "by formal means," based on "hydrologic, geologic, or other relevant considerations," and related to "protection of human health and the environment." n227 The state must also ensure that an adequate facility exists to implement the more stringent standard and must pay the incremental cost of the more stringent cleanup. n228 Finally, the state must notify the EPA of the more stringent standard "in a timely manner." n229

Even if an A.R.A.R. exists, the EPA may select another level that is protective of human health and the environment if compliance with the A.R.A.R. is excused under one of the statutory A.R.A.R. exemptions. n230 For example, compliance with an A.R.A.R. is excused if it is "technically impracticable from an engineering perspective." n231 Also, the EPA may excuse compliance from a state A.R.A.R. if the EPA finds that the state has not applied the A.R.A.R. consistently n232 or if the costs associated with obtaining an A.R.A.R. are not justified when balanced against the need for Superfund expenditures at other sites. n233

If there is no Federal or State A.R.A.R., the EPA and the courts are left to determine a cleanup level that protects human health and the environment. This determination will be based primarily on studies and risk assessments of the site which have been developed consistent with the N.C.P. Finally, if a remedial action involves transferring hazardous substances or pollutants or contaminants to another site, such materials must be sent only to facilities that are (1) operating in compliance with RCRA and all other applicable federal and state laws, (2) are not releasing any hazardous waste from the operating unit, and (3) have an approved corrective action program for releases from other units at the facility. n234

Section 121 also requires a remedial action or response that is "cost effective." n235 The statute compels the EPA to consider and compare both the long-term and short-term costs of different remedial actions. The EPA must take into account such factors as "the long-term uncertainties associated with land disposal; ... long-term maintenance costs; [and] the potential for future remedial action costs if the alternative remedial action in question were to fail...." n236

Congress expressed a clear preference for remedial actions that permanently decrease the volume, toxicity, or mobility of contaminants. n237 Therefore, CERCLA requires the EPA to select remedial actions that employ "permanent solutions and alternative treatment technologies or resource recovery technologies to the maximum extent practicable." n238 Simply transporting contaminants to another location without treatment is, by law, "the least favored alternative" and the last resort for the EPA

§ 75.09(b)(5)(iii) Limitations on Response Authority.

Subsection 104(c) sets forth three limitations on government response authority. However, these limitations are somewhat misleading, because the EPA can ignore them under emergency circumstances. First, the EPA lacks authority

to respond to naturally occurring releases of naturally occurring substances. n239 Second, the EPA cannot respond to releases of materials that form part of building. n240 This limitation prevents the EPA from depleting the Superfund by responding to indoor environment problems such as asbestos. Finally, the EPA cannot use the Superfund to respond to the deterioration and contamination of a drinking water supply through normal use. n241 Nevertheless, the EPA may respond to these releases if it is a "public health or environmental emergency and no other person with the authority and capability to respond to the emergency will do so in a timely manner." n242 Moreover, these limitations only apply to response authority under §104. Thus, the EPA could still order a response under §106 to the extent the EPA can find a PRP who is somehow liable for such a release.

§ 75.09(b)(5)(iv) Additional Authority: Entry and Inspection.

Section 104 also gives the EPA the authority to enter, inspect, and take samples "if there is a reasonable basis to believe there may be a release or threat of release of a hazardous substance or pollutant or contaminant." n243 Refusal to allow such actions will result in the issuance of a compliance order, n244 and failure to obey a compliance order in turn results in civil penalties. The EPA may also exercise discretionary authority to purchase, lease, or condemn real property if such action is necessary to conduct a remedial action. n245

§ 75.09(b)(6) Response Authority Under CERCLA §106.

Section 106 provides the EPA with abatement authority when (1) a release or threatened release of (2) hazardous substances n246 from (3) a facility presents (4) "an imminent and substantial endangerment to the public health or welfare or the environment" n247 and (5) a PRP exists who is responsible for the actual or threatened release under CERCLA §107. n248 If these five elements are satisfied, the EPA may either seek injunctions or issue administrative orders requiring PRPs to take response actions. The EPA has authority under §106 to order either removal action or remedial action, n249 or in other words, any response that is consistent with the N.C.P. However, §106 orders are often removal actions tailored to abate imminent, substantial danger.

Although §106 speaks of abatement actions, abatement is framed broadly to include any response necessary to remove or minimize the danger or to protect public health and the environment. n250 In the watershed decision of United States v. Price, n251 the court rejected arguments that §106 actions or orders are limited to abatement at operating facilities and do not apply to PRPs who are no longer actively involved with the facility. Under *Price*, the government may order any appropriate response to any site that poses an imminent and substantial danger, including "remedial action with respect to past sites." Thus, §106 authority extends to the cleanup of dormant facilities. The court also held that all PRPs are proper targets for §106 actions or orders, regardless of whether the PRPs involvement with the facility was entirely in the past and did not cause the release. As with §107 liability, §106 liability is strict, without regard to causation or fault. n252

Despite a statutory mandate to "establish and publish guidelines for using the imminent hazard, enforcement, and emergency response authorities," n253 the EPA has done little to delineate the scope of "imminent and substantial endangerment." n254 Courts have also been unable or unwilling to articulate a test for this authority. However, the clear trend is toward a very broad interpretation of "imminent and substantial endangerment." n255 Nevertheless, this requirement of endangerment is not an illusory limitation; the release of hazardous substances must actually pose an imminent and substantial endangerment to trigger §106 response authority.

§ 75.09(b)(6)(i) Injunctions.

The EPA's first option under §106 is to go directly to the United States District Court and bring an action seeking injunctive relief, when the five elements that trigger liability are present. This injunction option allows the EPA to procure a judicial finding that the required elements are present and forces the PRP to respond by eliminating any question over whether there is sufficient cause to ignore the EPA's order. However, actions under §106 for injunctive

relief are becoming less common, primarily because the EPA, as a matter of policy, has developed a preference for administrative orders.

One reason for this preference is that courts are not bound by the EPA's proposed remedies, if the EPA seeks an injunction for hazardous substances cleanup under §106. n256 The level of deference that must be given to the EPA's findings is much lower when the EPA proceeds by injunction rather than by administrative order. When the EPA seeks an injunction, the First Circuit has concluded that "the district court [is] free to make its own determinations of fact and to exercise its own judgment in fashioning relief." n257

§ 75.09(b)(6)(ii) Administrative Orders.

As mentioned *supra*, the second option available to the EPA under §106 is to issue an administrative order which forces PRPs to take the desired response action. When the EPA issues a final administrative order under §106 compelling PRPs to respond to a release, a court must enforce the order unless it is "arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law." n258 Thus, a court must give much deference to the EPA's findings concerning the appropriate response, if the court is reviewing an EPA administrative order. Moreover, the EPA has more control over the timing and swiftness of administrative proceedings. Finally, because CERCLA prohibits pre-enforcement judicial review of administrative orders and imposes large penalties for non-compliance, the EPA has inordinate leverage to force compliance even from PRPs who have colorable claims of "sufficient cause" for non-compliance. These considerations have shaped current EPA policy and more response actions now come in the form of §106(a) administrative orders.

A PRP need not comply with an administrative order, if there is "sufficient cause" for non-compliance. n259 This defense was codified by SARA in 1986 after courts had determined that a "good cause" defense must be read into CERCLA to enable the administrative order scheme to pass constitutional scrutiny. n260 Without the "good cause" defense, imposing large non-compliance penalties without pre-enforcement review would violate due process. Thus, PRPs who have "sufficient cause" to believe that they should not be responsible for the action ordered by the EPA may refuse to comply with the order without incurring any penalties.

The most promising defense is that the PRP is not a liable party under CERCLA §107(a). This liability question is ultimately determined by the court without deference to the EPA's finding of liability; responsible party status is always reviewed de novo by the court. PRPs may also have sufficient cause to disobey an EPA order if the EPA has selected an inappropriate remedy. However, unless a remedial action is inconsistent with the N.C.P., CERCLA §121 cleanup standards, or some other provision of law, PRPs have "sufficient cause" for non-compliance only if the selected remedy is arbitrary or capricious. n261 Moreover, the EPA's findings of fact are also accepted unless shown to be arbitrary, capricious or an abuse of discretion. n262 Thus, most judicial review will be highly deferential to the EPA's findings and conclusions, and establishing "sufficient cause" will often require showing facts and issues of law which could overcome such a deferential standard of review.

Section 113(h) of CERCLA expressly limits judicial review of §106 administrative orders to actions brought by the government to enforce orders, to recover penalties for non-compliance with orders, or to compel remedial action or actions brought by PRPs for reimbursement after complying with an order. n263 Federal courts simply lack jurisdiction to review a §106 administrative order under any other circumstance. n264 Thus, there is no pre-enforcement review of a §106 administrative order. A PRP must either obey an administrative order and later seek reimbursement from the Superfund or liable parties or disobey an order and risk harsh penalties by gambling that there is "sufficient cause" to disobey. Without pre-enforcement review, PRPs can never be certain that their defenses provide "sufficient cause" for non-compliance, but they face draconian penalties if they guess incorrectly. Nevertheless, this penalty and review scheme has withstood due process challenges. n265

As mentioned above EPA action and findings concerning the appropriate response are reviewable only under an

"arbitrary and capricious" standard and review is generally limited to the administrative record. n266 Therefore, judicial review should not be viewed as an alternative to aggressive participation in the administrative process. To protect their rights, PRPs must take full advantage of the available administrative procedures.

Unless there is "sufficient cause" for non-compliance, PRPs may be assessed a fine of $25,000 for each day they refuse to obey an EPA order. n267 More importantly, a PRP who, without sufficient cause, fails to comply with a §106 order requiring removal or remedial action may be responsible for punitive treble damages equal to three times the cleanup costs incurred by the Superfund. n268 If a PRP fails to undertake removal or remedial action under §106, the EPA can simply clean up the site itself and bill the PRP for three times the cost, unless there was sufficient cause for non-compliance. This penalty should persuade even the most confident PRPs to carefully analyze their "sufficient cause" defense.

A PRP can avoid the dilemma of harsh penalties and lack of pre-enforcement review by obeying even questionable orders and then seeking reimbursement from the Superfund. n269 To obtain reimbursement, a PRP must apply within 60 days after completion of the response action. n270 If the EPA initially denies reimbursement, which is almost a certainty, PRPs must seek reimbursement by filing an action within 30 days of the EPA's reimbursement denial and proving by a preponderance of the evidence that they are not liable parties under CERCLA §107(a). n271 Even if a PRP is a liable party under §107(a), the PRP is still entitled to reimbursement for any additional costs incurred because the response action imposed by the EPA was arbitrary or capricious or not otherwise in accordance with the law (e.g., the N.C.P.). n272 Although courts have held that response costs include the costs of litigating a CERCLA action when seeking recovery from a PRP, n273 it is unclear whether parties can recover litigation costs from the Superfund.

Although it avoids the harsh non-compliance penalties, the reimbursement approach raises problems of its own. PRPs may be forced to commit enormous amounts of capital to cleanup projects for which they actually have no legal responsibility. Moreover, courts may be even more deferential to the remedy selected by the EPA after the response action is completed. Simply put, it is more difficult to challenge a response action as inappropriate and argue that things should have been done differently if all the cleanup has already been completed successfully.

Nevertheless, post-cleanup reimbursement is the only practical option unless a PRP clearly has sufficient cause to disobey a §106 order for removal or remedial action.

§ 75.09(b)(6)(iii) RCRA §7003.

In addition to the problems discussed above, a §106 defendant's worries are not limited to CERCLA alone. If the EPA attempts to compel response action under §106, PRPs are likely to face a RCRA §7003 action as well.

Through judicial interpretation and legislative amendment, the scope of RCRA §7003 has been expanded so that it is virtually identical to CERCLA §106. n274 Both CERCLA §106(a) and RCRA §7003(a) provide for strict liability for response action when hazardous wastes present an "imminent and substantial endangerment" to human health or the environment. n275 In addition, RCRA §7003(a) allows the EPA to order the same type of injunctive relief as is authorized under CERCLA §106(a), n276 and the scope of liability under both injunctive provisions basically parallels liability under CERCLA §107(a). However, there are minor differences between the two provisions. For example, some solid wastes are covered under RCRA §7003 but not under CERCLA §106, and some hazardous substances under CERCLA may not be solid wastes under RCRA

§ 75.09(b)(7) Private Party Response Authority.

As long as their actions are consistent with the N.C.P., CERCLA allows private parties n277 to respond to releases of hazardous substances from a vessel or facility. If the private party is not a responsible party under CERCLA §107(a), the party can seek reimbursement for response costs from PRPs under §107(a) or from the Superfund. n278 However,

cumbersome procedural restrictions are imposed on the process of obtaining private party reimbursement from the Superfund.

CERCLA mandates that the Superfund shall be used to reimburse any person for *necessary* response costs incurred which are consistent with the N.C.P. n279 However, these response costs "must be approved under [the N.C.P.] and certified by the responsible official." n280 The EPA has interpreted this "approved under" and "certified" language to require EPA pre-approval of any private response action. n281 Thus, private parties are barred from Superfund reimbursement unless they had EPA approval prior to taking the response action. In addition, recovery from Superfund is barred unless recovery has already been sought from PRPs, and this bar continues as long as the action for recovery from a PRP is still pending. n282 These and other procedural hurdles to private recovery of response costs from the Superfund have led commentators to believe that private party recovery from the Superfund is seldom a workable option. n283

Parties seeking reimbursement from the Superfund must commence their actions within six years of the completion of all response action. n284 Actions for Superfund reimbursement for natural resource damages must be brought within three years of (1) "discovery of the loss and its connection with the release in question" or (2) promulgation of the regulations required under CERCLA §301(c). n285 Responsible parties cannot seek reimbursement from the Superfund because they are jointly and severally liable for response costs. n286

Recovery of private party response costs from PRPs is much more likely than Superfund reimbursement. CERCLA §107(a) provides that responsible parties under that section are liable for "*necessary* costs of response incurred by any other person consistent with the national contingency plan." n287 Courts have held that this language creates a private right of action for recovery of any necessary response costs consistent with the N.C.P. n288 Although the necessity of response has rarely been a material issue in private party cost recovery actions, n289 consistency with the N.C.P. has been vigorously contested in several cases. n290 Thus, private parties must ensure that their cleanup activities follow the procedures and standards mandated by the N.C.P., and judicial interpretation of the N.C.P. requirements is crucial.

However, courts have disagreed on exactly what is required to be consistent with the N.C.P. Most courts have determined that a site need not be on the N.P.L. before private parties are entitled to response costs under §107(a). n291 A more troublesome question is whether private parties must coordinate their response efforts with the EPA before recovery under §107(a) is authorized. Some courts have held that private party responses must be supervised or pre-approved by the EPA, n292 while other courts have reached the better result that consistency with the N.C.P. can be achieved without any EPA involvement. n293 Consistency with the N.C.P. is also a paramount concern for responsible parties under §107(a) who plan to seek contribution from other PRPs under CERCLA §113(f). n294

The relief obtainable under §107(a) is limited to recovery of costs for response actions. Injunctive relief is unavailable to private parties. n295 Although CERCLA allows citizen suits, very little injunctive relief is available in any practical sense.

§ 75.09(b)(7)(i) Citizen Suits.

CERCLA §310 n296 authorizes any person to bring an action against (1) any person (including the federal government) who is in violation of any CERCLA standard, regulation, condition, requirement, or order or (2) the EPA for failing to perform a non-discretionary duty. n297 Thus, citizens can force PRPs to comply with §106 orders or settlement agreements or force the EPA to undertake non-discretionary actions. The problem is that almost all of the EPA's authority under CERCLA is discretionary to some extent.

CERCLA citizen suits are subject to the usual constraints that accompany citizen suit provisions under federal environmental statutes. No citizen action can be brought prior to the expiration of 60 days notice to the EPA, to the state where the alleged violation is occurring, and to the alleged violator. n298 A citizen suit is also barred if the federal

government is already diligently prosecuting the alleged violator. n299 The court may award costs and attorneys' fees to the prevailing or substantially prevailing party "whenever the court determines such an award is appropriate." n300

§ 75.09(b)(7)(ii) State Enforcement.

In addition to citizen suit authority, CERCLA gives states authority to secure judicial enforcement of federal remedial action standards, requirements, or limitations. n301 States are also entitled to participate in negotiations with PRPs and intervene as a matter of right in any §106 remedial action proceedings. n302

§ 75.09(b)(8) The National Contingency Plan (N.C.P.).

The N.C.P. provides the procedures and standards which govern responses to hazardous substances releases. n303 The N.C.P. sets forth the responsibilities of the government agencies, n304 the organizational framework for government response, n305 emergency contingency plans, n306 response procedures for oil spills and hazardous substance releases, n307 regulations for natural resources trustees, n308 and rules for use of chemical dispersants. n309 The discovery, investigation, assessment, evaluation, priority ranking, removal, and remediation of hazardous substance releases are all regulated by Subpart F of the N.C.P. n310

A release of a hazardous substance may be discovered through notification under CERCLA §103, investigation under CERCLA §104(e), information given by federal and state permit holders, inventory efforts (*e.g.*, the CERCLA Information System (C.E.R.C.L.I.S.)) or random observation by any person. n311 All releases are investigated initially by an On-Scene Coordinator (O.S.C.), n312 who decides whether a preliminary assessment of the release is necessary. n313 The preliminary assessment determines whether further federal action, such as removal action or further site evaluation, is necessary. n314 If removal action is necessary, the procedures and standards for removal actions, as well as examples of appropriate actions, are outlined by the N.C.P. n315 A site evaluation may proceed concurrently with or in the absence of a removal action.

Site evaluations determine whether remedial action is necessary and whether the site should be placed on the NPL. n316 Information and samples are collected to ascertain and describe the hazardous substances released, the extent of contamination, and the environment that will be affected. n317 The priority assigned to a release is determined by the Hazard Ranking System (H.R.S.). n318 Under the H.R.S., each release is assigned a numerical score reflecting "the relative degree of risk to human health and the environment." n319 Determining the H.R.S. score requires a series of calculations derived from various risk factors. Hazard scores are calculated for risks of fire or explosion, direct contact, or migration. n320 The migration hazard score is calculated from the separately determined risk scores for groundwater, surface-water, and air migration. n321 The factors scored require extensive knowledge of the release and its surrounding area. For example, the groundwater migration hazard score examines such factors as the depth to the nearest aquifer, permeability of strata overlying the aquifer, average precipitation, adequacy of containment structures, waste characteristics (toxicity, persistence, ignitability, and reactivity), and distance to the nearest well (considering the population served). n322

If a release receives a H.R.S. score of 28.5 or greater, the site is placed on the N.P.L. n323 In addition, each state has the power to place one site of its choosing on the N.P.L. regardless of the H.R.S. score. n324 Moreover, a site may be placed on the N.P.L. regardless of its H.R.S. score if (1) the Agency for Toxic Substances and Disease Registry (A.T.S.D.R) issues a health advisory recommending that people stay away from the site, (2) the EPA decides that the release poses a significant threat to public health, or (3) the EPA decides that remedial action will be more cost-effective in the long run than removal action. n325 A site must be on the N.P.L. before the EPA can use the Superfund to perform remedial action at the site. n326

If remedial action is necessary, the N.C.P. sets forth the guidelines for conducting the Remedial Investigation/Feasibility Study (R.I./F.S.) that must be used to determine the appropriate remedial action. n327 The R.I.

determines the nature and extent of the release and the threat it poses to human health and the environment. The F.S. evaluates proposed remedies. The R.I./F.S. governs the procedures and outlines the considerations that, in conjunction with CERCLA §121 (cleanup standards), will be used to determine the appropriate permanent remedy. n328 The N.C.P. also provides examples of appropriate remedial actions. n329

Some, but limited, public participation in the selection of the remedial action through submission of comments is guaranteed by CERCLA §117. n330 The N.C.P. also provides for community relations plans to foster good community relations when response actions are necessary. n331 Finally, the N.C.P. outlines the documentation necessary for subsequent cost recovery actions under CERCLA §107(a). n332

§ 75.09(c) Specific Rules for Landowner and Lender Liability Under CERCLA

If response or cleanup costs consistent with the N.C.P. are incurred by the United States or any other person, if damages for destruction of natural resources should be recovered, or if the A.T.S.D.R incurs costs by performing a health assessment or health effects study under CERCLA §104(i), n333 CERCLA provides for liability. Six basic elements create CERCLA liability. Before any party is liable under CERCLA, there must be (1) a release or threatened release n334 of (2) a hazardous substance from (3) a facility or vessel which causes (4) the incurrence of response costs n335 (5) in a manner consistent with the N.C.P., n336 and (6) the PRP must be a responsible party under subsections 107(a)(1)-(4). n337 Again, there is a general exclusion for application of a pesticide product registered under F.I.F.R.A. n338

Actions under §107(a) for recovery of *removal* action costs must be brought within three years of the completion of the removal action, unless another three years is granted by the EPA pursuant to continued response action under §104(c)(1)(C). n339 Actions for recovery of *remedial* action costs must be initiated within six years after beginning physical onsite construction of the remedial action. Natural resources damage actions must be brought within three years of (1) "discovery of the loss and its connection with the release in question" or (2) promulgation of the regulations required under CERCLA §301(c). n340

§ 75.09(c)(1) Responsible Parties.

Before plaintiffs can recover their response costs, they must prove that the defendant PRPs are responsible parties under the statute. n341 Subsections 9607(a)(1)-(4) establish the four classes of persons who are strictly liable under CERCLA These classes include:

> (1) the owner and operator of a vessel or a facility,
>
> (2) any person who at the time of disposal of any hazardous substance owned or operated any facility at which such hazardous substances were disposed of,
>
> (3) any person who by contract, agreement, or otherwise arranged for disposal or treatment ... of hazardous substances ... and
>
> (4) any person who accepts or accepted any hazardous substance for transport to disposal or treatment facilities, incineration vessels or sites selected by such person, from which there is a release, or a threatened release which causes the incurrence of response costs, of a hazardous substance. n342

These four categories of parties who are strictly liable for the costs of cleaning up a vessel or facility are commonly summarized as:

> (1) current owners and operators,

(2) owners or operators at the time of disposal,

(3) generators or arrangers, and

(4) transporters.

§ 75.09(c)(1)(i) Current Owners and/or Operators.

Often, the material inquiry is whether a party is an operator or owner for purposes of CERCLA liability. According to CERCLA §101(20)(A), "[t]he term 'owner or operator' means ... in the case of an onshore facility or an offshore facility, any person owning or operating such facility...." n343 This circuitous, question-begging definition does not offer any clear guidelines for the imposition of liability, and courts have been forced to develop the law regarding owners and operators under CERCLA through statutory interpretation on a case-by-case basis.

The definition of a current owner and operator under §107(a)(1) has generated considerable confusion and controversy, because it simply states that "the owner and operator of a ... facility ... shall be liable...." n344 Although this language appears to suggest that subsection (a)(1) applies only to those parties who are both owners and operators since it speaks conjunctively of "the owner *and* operator" of a facility, the courts appear to have accepted a different interpretation of the language. It now seems well settled that §107(a)(1) imposes strict liability on either the current owner *or* current operator of a facility where hazardous waste has been deposited, n345 regardless of whether the hazardous waste was deposited long before the current owner or operator began owning or operating the facility.

The seminal opinion for this statutory interpretation was New York v. Shore Realty Corp.. n346 In *Shore Realty*, the current owner of a facility was held liable without regard to whether it was also the operator or the owner at the time of disposal. n347 However, the court did not address the problem of §107(a)(1) being conjunctively phrased in contrast to the disjunctive phrasing of §107(a)(2). Instead of arguing that Shore was not "the owner and operator" within the common meaning of that expression, Shore contended that subsection 107(a)(1) covered only owners "at the time of disposal." n348 The court rejected this interpretation of §107(a), stating "that §107(a)(1) unequivocally imposes strict liability on the current owner of a facility from which there is a release or threat of release...." n349

It is interesting to note that the court probably did not have to reach this result in order to find that Shore was a liable party. According to the facts set out in the opinion, Shore should have been liable under §107(a)(2), since "nearly 90,000 gallons of hazardous chemicals were" disposed of at the facility after "Shore took title." n350 The court apparently reached the conclusion that current owners are liable, so it could avoid the messier, more fact-bound questions of whether Shore was an owner at the time of disposal or whether Shore was also a current operator of the facility. n351

In United States v. Maryland Bank & Trust Co., n352 the operators of a trash and garbage business borrowed money from the bank to finance the purchase of the dump site property. n353 When the owner and operator of the facility failed to make the payments on the loan, the bank brought a foreclosure action and took title to the property at the foreclosure sale. n354 Then the operator notified the EPA that hazardous waste had been disposed of on the site, and the EPA demanded that the bank clean up the site. n355 When the bank refused to do so, the EPA removed the hazardous wastes and brought an action under CERCLA to compel the bank to pay for these response costs. The United States sought to pin liability on the bank as the current owner of the facility. n356

Relying partially on the precedent set by *Shore Realty*, the district court in *Maryland Bank* held "that current ownership alone brings a party within the ambit of [subsection 107(a)(1)]. Notwithstanding the language 'the owner and operator,' a party need not be both an owner and operator to incur liability under this subsection." n357

The *Maryland Bank* Court admitted "[p]roper usage dictates that the phrase 'the owners and operators' include only

those persons who are both owners and operators." n358 However, the court found that the *Shore Realty* precedent, legislative history, and hasty drafting of CERCLA supported a contrary result. n359 The court dismissed the plain meaning arguments by stating that "by no means does Congress always follow the rules of grammar when enacting the laws of this nation." n360 Thus, *Maryland Bank* directly confronted the conjunctive phrasing of subsection 107(a)(1) in reaching the holding and is the most frequently cited case on this issue.

Maryland Bank has established a strong precedent which appears to have been generally accepted. n361 This precedent is probably reinforced by the S.A.R.A., n362 because "legislative action by amendment ... with respect to other parts of a law which have received a contemporaneous and practical construction may indicate approval of interpretations pertaining to the unchanged and unaffected parts of the law." n363 Then again, this legislative inaction may just show unwillingness to address a thorny policy produced by poor statute drafting rather than clear Congressional consensus. n364 Nevertheless, any discussion of the proper interpretation of §107(a)(1) may be purely academic now, unless Congress directly addresses the matter in the future. n365

§ 75.09(c)(1)(ii) Owners or Operators at the Time of Disposal.

The second of the four broad categories of liable parties under CERCLA is set out under CERCLA §107(a)(2) and includes owners or operators *at the time of disposal*. n366 The disjunctive meaning of §107(a)(2) is discernable upon a simple reading of the statute. Because the statute proclaims that "any person who at the time of disposal of any hazardous substance owned *or* operated any facility at which such hazardous substances were disposed of" is liable, it is clear that a party need only be either an owner *or* an operator at the time of disposal, but not both, to incur CERCLA liability. n367

To incur response cost liability for a hazardous substance release under §107(a)(2), a party must have owned or operated a facility at the time of disposal of a hazardous substance. n368 The most surprising element of subsection (a)(2) may be the "at the time of disposal" requirement. n369 Disposal is defined very broadly under CERCLA to include "the discharge, deposit, injection, dumping, spilling, leaking, or placing" of solid or hazardous waste into the environment. n370 Therefore, the time of disposal is not limited to the time that the hazardous substance was brought onto the site. The time of disposal continues as long as the hazardous substance is being released into the environment.

For example, the time of disposal may extend to the entire period that a container of hazardous substances continues to leak material into the environment, even if the container was placed on the property long ago by another owner or operator. Courts have been willing to interpret "disposal" liberally and have imposed liability on owners and operators who somehow become remotely and inadvertently involved with a continuing past disposal. n371 Thus, many owners or operators have been surprised to learn that they were owners or operators at the time of disposal.

§ 75.09(c)(1)(iii) Generators or Arrangers.

The third broad category of liable parties under CERCLA is set out under §107(a)(3) and includes those who generated hazardous substances or arranged for their disposal. n372 To be liable as a generator or arranger of hazardous substances, a PRP must have sent hazardous substances to the facility for disposal and the hazardous substance release must contain the same kind of hazardous substances that the PRP sent to the facility. n373 Thus, a generator who only shipped lead to a facility cannot be held liable for a release of arsenic. However, a party seeking response costs under CERCLA §107(a) need not trace the ownership of the hazardous substances released. A generator is liable if a release contains "hazardous substances alike, similar, or of a like kind to those that were present in the generator defendant's wastes or that could have been produced by the mixture of defendant's waste with other waste present at the site." n374

Again, the courts have interpreted the term "disposal" broadly. Generators who "arranged for disposal" may include those who *sell* hazardous substances knowing that they will be disposed of by the buyer. Several courts have held that generators incur CERCLA liability for selling hazardous substances, if the sale primarily serves the purposes of

disposal. n375 On the other hand, courts have held that legitimate commercial transactions involving hazardous substances are not arrangements for disposal. n376 The distinction between the two lines of authority seems to rest on the immediacy of the disposal after the sale, the general usefulness of the material sold, and the sales price. n377

§ 75.09(c)(1)(iv) Transporters.

The fourth and final category of liable parties under CERCLA is outlined in subsection 107(a)(4) and includes persons who transported hazardous substances to a facility where they were subsequently released. Transporters of hazardous wastes have been statistically less likely to incur CERCLA liability than the other three classes of responsible parties. Nevertheless, there have been cases of transporter liability. n378

§ 75.09(c)(1)(v) Landowner Liability.

Although there are affirmative defenses to landowner liability, a landowner is usually liable as an "owner" under CERCLA §107(a)(1), n379 if the real property is contaminated with hazardous substances. As did the court in Tanglewood E. Homeowners v. Charles-Thomas, Inc., n380 most courts "find nothing in the wording of [section] 9607(a) to exclude present owners of properties previously contaminated." n381 And the broad definition of disposal ensnares past landowners who held title to the property during the "disposal" of a hazardous substance on the property. The entity seeking response costs need only show that the landowner currently has title to the property or had title at the time of disposal. Thus, a landowner's best hope of escaping liability rests in the affirmative defenses discussed later in this section. n382

§ 75.09(c)(1)(vi) Lenders as Owners (The Security Interest Exemption).

Section 9601(20) (A) states that the term owner "does not include a person, who, without participating in the management of a vessel or facility, holds indicia of ownership primarily to protect his security interest in the vessel or facility." n383 This language obviously indicates that a lender who simply maintains a mortgage on the property cannot be defined as an owner under CERCLA, even in title-theory states, where a mortgagee is deemed to hold a form of title under the common law. The critical inquiry is whether a mortgagee who forecloses on a mortgage may be treated as an owner for purposes of CERCLA liability.

Maryland Bank is the principal case on this issue as well. In *Maryland Bank*, the Maryland Bank & Trust Co. asserted that it was not the current owner under CERCLA, because it was exempted from the definition of an owner under §9601(20)(A). The bank claimed that it was not an owner for CERCLA liability purposes, since it only held "indicia of ownership primarily to protect [its] security interest in the ... facility." n384 The court rejected this reasoning, stating: "The exemption of subsection (20)(A) covers only those persons who, *at the time of the clean-up*, hold indicia of ownership to protect a then-held security interest in the land. The verb tense of the exclusionary language is critical. The security interest must exist at the time of the clean-up." n385 The court held that Maryland Bank & Trust ceased being a security interest holder and became the owner of the property for CERCLA purposes when it foreclosed on the property and took title to it. "The exclusion [of *42 U.S.C. §9601*(20)(A)] does not apply to former mortgagees currently holding title after purchasing the property at a foreclosure sale...." n386

The court in *Maryland Bank* reached this result despite the fact that two other federal courts which had examined this issue came to the opposite conclusion. In United States v. Mirabile, n387 the federal district court for the Eastern District of Pennsylvania held that:

> [A] hazardous waste site owner's secured creditors, *including one who foreclosed on the site*, may be held liable under [section 9607] only if they exercised control over the nuts-and-bolts operation of the site. The statutory definition of 'owner or operator' excludes persons who do not participate in management and hold indicia of ownership primarily to protect a security interest. n388

The Federal District Court in *Maryland Bank* tried to distinguish *Mirabile* on the grounds that the mortgagee in *Maryland Bank* "held title for nearly four years" n389 after the foreclosure whereas the mortgagee in *Mirabile* assigned [the property] within four months of the foreclosure. n390 The court in *Maryland Bank* stated that the *Mirabile* "holding pertained to a situation in which the mortgagee-turned-owner promptly assigned the property. To the extent to which that opinion suggests a rule of broader application, this Court respectfully disagrees." n391

It would be difficult to formulate a coherent rule for liability on the basis of the length of time such a mortgagee holds title, since there is no statutory or regulatory standard to guide the court. n392 Nevertheless, because the court in *Maryland Bank* did distinguish the *Mirabile* holding on this basis, instead of directly challenging the holding, a lender may still be able to escape liability even under the *Maryland Bank* rule as long as the lender assigns the title to the property soon after foreclosing. However, the fact that there are no subsequent cases in which a lender has successfully taken this approach may indicate the tenuous nature of this "length of time" distinction suggested in *Maryland Bank*.

Despite the attempts of the *Maryland Bank* court to distinguish *Mirabile*, it is clear that the two decisions are irreconcilable. *Mirabile* stands for the proposition that obtaining title through foreclosure is a normal and expected event in protecting a security interest and is included within the security interest exemption of CERCLA §101(20)(A). n393 *Mirabile* focuses on the reason why lenders hold title. If lenders hold title to protect their security interest, they are protected by the security interest exemption. *Maryland Bank*, on the other hand, stands for the proposition that the protection of the security interest exemption is directed only at lender/mortgagees in title-theory states and that the protection ends as soon as the lender/mortgagee forecloses and obtains full title to the property.

The other case which the court in *Maryland Bank* had to reject in reaching its conclusion was In re T.P. Long Chem., Inc. n394 In this case, the bankruptcy court stated that "even if [the bank] had repossessed its collateral pursuant to a security agreement it would not be an 'owner or operator' as defined under CERCLA" n395 The bankruptcy court reasoned that a bank which repossesses such collateral merely holds indicia of ownership primarily to protect its security interest in the facility. n396 Thus, the bank was shielded from liability by operation of §9601(20)(A). The *Maryland Bank* Court dismissed this conclusion as dictum. n397

Since *Maryland Bank*, there have been few cases which examine the issue of whether a lender who forecloses becomes an owner under CERCLA Lenders have simply been unwilling to challenge the *Maryland Bank* holding and risk liability by foreclosing. Although it is possible to convince a court to adopt the holding and reasoning from *Mirabile* or *T.P. Long Chem.*, it appears that the rule from *Maryland Bank* has become the lending industry standard by default. No lender will deliberately risk liability when it can easily avoid liability merely by not foreclosing on property contaminated by hazardous waste.

The two courts which have examined the scope of the security interest exemption since the *Maryland Bank* decision have also split on the issue. In Guidice v. BFG Electroplating & Mfg. Co., n398 the district court followed *Maryland Bank* and held that a lender is liable to the same extent as any other current owner if the lender purchases the property at a foreclosure sale. Like *Maryland Bank*, the *Guidice* court found that "[e]xtending the interest exemption to lenders holding full title to properties would frustrate the distribution of clean-up costs achieved under CERCLA as well as reallocate the risks assumed in owning real property." n399 This holding rested in part on Congressional inaction in the face of the *Maryland Bank* holding. n400 The court ignored the length of time distinction suggested in *Maryland Bank*, even though the lender had held the property for only eight months after foreclosure. n401

However, the Ninth Circuit ruled that a lender who holds title (warranty deed) to contaminated property for the purpose of protecting its security interest is not an owner under CERCLA n402 The court held that "under the security interest exception the court must determine *why* the [lender] holds such indicia of ownership." n403 Thus, the court took the *Mirabile* approach and focused on the purpose of the lender in holding title. In the Ninth Circuit, a lender may hold title to contaminated property without becoming an owner under CERCLA as long as the lender holds title "primarily to protect his security interest in the vessel or facility." n404 Given the conflicting law in the circuits, a Supreme Court

decision or Congressional clarification may be required to settle the confusion on this issue.

§ 75.09(c)(1)(vii) Lenders as Operators.

Even if lenders successfully avoid liability as *owners* under the *Maryland Bank* rule, they may nevertheless become liable under CERCLA as a *operators* by participating in the management of a hazardous waste facility. The protection afforded by the security interest exemption of CERCLA §101(20)(A) extends only to one "who, *without participating in the management of a vessel or facility*, holds indicia of ownership primarily to protect his security interest." n405 Therefore, a lender may become an "owner or operator" for purposes of CERCLA by participation in the management of the facility. However, the level of control a lender would have to exercise over the facility to become an owner or operator has not been clearly delineated. n406

In Mirabile, the court held that "before a secured creditor ... may be held liable, it must, at a minimum, participate in the day-to-day operational aspects of the site." n407 The *Mirabile* court did give some general guidelines for "determining how far a secured creditor may go in protecting its financial interests" before becoming an "operator within the meaning of [CERCLA]." n408 Judge Newcomer stated that "[m]ere financial ability to control waste disposal practices" n409 or "participation in purely financial aspects of the operation" n410 is not enough to subject a lender to CERCLA liability as an operator. Thus, the monitoring of and exercise of control over cash collateral accounts and accounts receivable is not participation in the management of a facility for CERCLA purposes. n411 "[T]he participation which is critical is participation in operational, production, or waste disposal activities." n412 The court found that a regular and frequent presence at the site (once a week), control over the priority of orders to be filled, insistence on certain manufacturing changes, and control over the assignment of personnel could together be sufficient participation in management to make a lender an operator of the facility. n413

This opinion leaves a vast, unexplored area between purely financial aspects of management and operational aspects of management where these distinctions will undoubtedly become blurred. It is sometimes difficult to determine where financial participation ends and participation in "day-to-day" operations begins. n414 Nevertheless, *Mirabile* remains a leading case and is one of the better sources of guidance on this issue.

Most courts that have examined the issue have followed *Mirabile*. In Guidice v. BFG Electroplating & Mfg. Co., n415 the court stated:

> Interpretation of "participation in the management" and "primarily to protect is [sic] security interest" has permitted secured creditors "to provide financial assistance and general, and even isolated instances of specific, management advice to its debtors without risking CERCLA liability if the secured creditor does not participate in the day-to-day management of the business or facility" ... n416

The court found that a meeting between the lender and operator to discuss the account status, personnel changes, and raw materials; communications between the lender and environmental regulatory authorities in an effort to assist operator compliance; an inspection of the property by the lender; and the lender's restructuring of the debtor's loans did not remove the lender from the protection of the security interest exemption. n417 Thus, the Guidice court adopted the *Mirabile* test and established a fairly high threshold for day-to-day management liability. Other courts have adopted similar tests. n418

The Ninth Circuit, in In re Bergsoe Metal Corp., n419 declined to articulate a day-to-day management rule or a test for "participating in the management." n420 The court simply stated: "whatever the precise parameters of 'participation,' there must be *some* actual management of the facility before a secured creditor will fall outside the [security interest] exception." n421 The court then made it clear that participation in the planning stages of a project was not management of a facility. Moreover, the Ninth Circuit held that a party "errs in equating the power to manage with actual management... Merely having the power to get involved in management, but failing to exercise it, is not enough." n422

The Eleventh Circuit established a lower threshold for lender liability when it rejected the *Mirabile* day-to-day operations rule in United States v. Fleet Factors Corp.; n423 the court held that the touchstone for lender management liability was any management participation, financial or operational, that shows that the lender had the ability to influence the debtor's hazardous substance activities. n424 The court reasoned that "participating in the management of a vessel or facility" n425 is a lower level of oversight and control than is required to become an operator of the facility. n426

Under this analysis, if the phrase "participating in the management" was simply referring to operator liability, it would not be needed. Parties who participate in the management of a facility to the extent of being an operator under CERCLA are liable as operators regardless of whether they hold indicia of ownership. Thus, the phrase must have some meaning apart from a direct reference to operator liability. n427

However, this interpretation of the security interest exemption ignores the fact that all of the language of CERCLA §101(20)(A), including the security interest exemption, is directed at the term "owner or operator." n428 If the statute simply excluded one who "holds indicia of ownership primarily to protect his security interest" from the definition of "owner or operator," n429 a secured creditor would be exempted from both owner and operator liability by holding indicia of ownership. The statutory definition therefore makes clear that the security interest exemption applies only to those secured parties who are not operators of the facility. Thus, the reasoning of the court is questionable.

Nevertheless, a party holding indicia of ownership in the Eleventh Circuit may become liable under CERCLA for even modest involvement in the financial management of the debtor's facility. The court outlined this low threshold for management liability by stating that:

> a secured creditor may incur section 9607(a)(2) liability, without being an operator, by participating in the *financial* management of a facility to a degree indicating a capacity to influence the corporation's treatment of hazardous wastes. It is not necessary for the secured creditor actually to involve itself in the day-to-day operations of the facility in order to be liable... Nor is it necessary for the secured creditor to participate in management decisions relating to hazardous waste. Rather, a secured creditor will be liable if its involvement with the management of the facility is sufficiently broad to support the inference that it could affect hazardous waste disposal decisions if it so chose. n430

The court also emphasized that participation in the financial affairs of the debtor may be enough to subject a lender to liability. n431 Thus, lenders in the Eleventh Circuit who had relied on *Mirabile* for guidance in dealing with debtors will be surprised to find that they are not protected by the security interest exemption, and lenders in other jurisdictions can only hope that the *Fleet Factors* reasoning remains confined to the Eleventh Circuit.

It is interesting to note that "operator" liability seems to be fundamentally at odds with the policy rationales advanced for holding a lender liable as an "owner." Lender "owner" liability gives lenders an incentive to closely monitor and supervise the activities of the mortgagor to ensure that there is no release of hazardous waste. n432 However, lender "operator" liability compels a lender to give the mortgagor free reign because the lender must avoid any management whatsoever of the mortgagor's facility to avoid liability. Therefore, the lender may be trapped in a hopeless predicament.

The lender may want to take steps to ensure that the mortgagor is responsible in handling any hazardous waste so that foreclosure remains a viable option in protecting the lender's security interest, but such action could cause the lender to become an "operator" under CERCLA Because the cost of clean-up often exceeds the value of the mortgage, the prudent course in many situations will simply be to write-off the mortgage and let the mortgagor do whatever it wants in its operations. This could actually encourage irresponsible handling of hazardous wastes, and commentators have criticized this "operator" liability problem. n433

In *Guidice*, the court recognized these policy considerations in holding that a high level of day-to-day participation in the management of a facility should be required before a lender is held liable under CERCLA n434 Judge McCune explained:

> A goal of CERCLA is safe handling and disposal of hazardous waste. To encourage banks to monitor a debtor's use of security property, a high liability threshold will enhance the dual purposes of protection of the bank's investments and promoting CERCLA's policy goals. Conversely, a low liability standard would encourage a lender to terminate its association with a financially troubled debtor and expedite loan payments in an effort to recover debts. n435

In contrast, the *Fleet Factors* court brushed these concerns aside by reasoning that a lower threshold for management liability would encourage banks to ensure hazardous substances are handled properly because the lender would always be worried that it would be a liable party. This analysis may be correct if the threshold is so low that a lender will always be liable for the hazardous substances releases of the debtor. However, even the *Fleet Factors* decision requires some participation in the management of a facility before liability attaches to the lender. Thus, *Fleet Factors* may frustrate one of the primary goals of CERCLA by compelling lenders to exercise no oversight whatsoever at facilities where debtors handle hazardous substances.

§ 75.09(c)(1)(viii) Successor Liability.

If a corporation acquires another entity through a merger, consolidation, or the sale of stock, the corporation also acquires the CERCLA liability of the entity. n436

§ 75.09(c)(1)(ix) Parent Corporations.

In United States v. Bestfoods, n437 the Supreme Court held that under §107(a)(2), a parent corporation that actively participates in and controls the operations of a subsidiary may not be held derivatively liable as an operator of a polluting facility, unless the corporate veil can be pierced. However, a parent corporation that actively participated in and controlled the operations of the facility may be directly liable as an operator of that facility. Nothing in CERCLA rejects general principles of corporate law that a parent corporation is not liable for actions of its subsidiaries and that the corporate veil may be pierced if the corporate form would otherwise be misused to commit misconduct.

§ 75.09(c)(2) Strict Liability.

The PRPs under CERCLA §107(a) n438 are strictly liable for all necessary response costs. n439 CERCLA simply states that these persons "shall be liable for all costs of removal or remedial action incurred by the United States Government or a state or an Indian tribe ... [or for] any other necessary costs of response incurred by any other person consistent with the national contingency plan...." n440 Because there is no mention of any culpability requirement in the statute, the courts have held that §107 was intended to impose strict liability on the specific classes of persons covered by the statute. In United States v. Bliss, n441 the court succinctly articulated the current law by stating that "[l]iability under CERCLA is strict, without regard to the liable party's fault or state of mind." n442

§ 75.09(c)(3) Joint and Several Liability.

The majority of courts have held that CERCLA imposes joint and several liability on all parties described under §107(a). n443 Unless the defendant can prove that there is a rational basis for apportioning the costs or harm among the different liable parties, the defendant is jointly and severally liable for the full amount. n444 Although this requirement does not appear in CERCLA itself, most courts have decided that CERCLA liability should be joint and several under common law principles. n445 These courts usually invoke the *Restatement (Second) of Torts* §433 in holding that the CERCLA defendant bears the burden of proving that "there is a reasonable basis for determining the contribution of each cause of a single harm." n446

This joint and several liability motivates the entity seeking reimbursement for response costs under CERCLA to bring the action against the liable party with the deepest pocket, making lending institutions particularly likely defendants if they are owners or operators of a contaminated facility. Most mortgagees become owners because the previous owner and operator no longer has adequate funding to pay its basic debts, CERCLA response costs notwithstanding. Thus, joint and several liability poses a significant problem for mortgagees. Although CERCLA expressly mandates the right to contribution, n447 contribution will not be of any value when the other liable parties do not have adequate funds. Therefore, a deep pocket mortgagee is likely to be burdened with the full amount of the response costs under CERCLA Other current owners and operators are also likely to feel the burden of joint and several liability as CERCLA defendants because the burden of proving that an entity is a *current* owner or operator is minimal.

In United States v. Ottati & Goss, Inc., n448 the Federal District Court of New Hampshire became the first court to actually find "a reasonable basis for determining the contribution" of each CERCLA defendant. n449 Because the response costs for removing barrels of hazardous substances could be directly calculated according to the number of barrels, the court based individual liability for these costs on the number of barrels each defendant generator had sent to the facility. However, other response costs incurred at the site were indivisible and dictated joint and several liability. n450

A few jurisdictions take an even more flexible approach to liability and hold that the court has the discretion to "reject joint and several liability, regardless of the indivisibility of the harm, where the peculiar facts of the case point to a more fair apportionment of liability." n451 However, this view is clearly a minority rule; in other jurisdictions, joint and several liability is almost always imposed. Thus, PRPs are normally jointly and severally liable for response costs and usually must file a claim for contribution from other PRPs. n452

§ 75.09(c)(3)(i) Contribution.

CERCLA expressly provides for a right of contribution among liable parties under §113(f). n453 Thus, parties who have been held jointly and severally liable for response costs under §107(a) or who have been forced to take response action under §106 may recover some of their costs through a contribution action. n454 Courts have rejected arguments that the equitable doctrine of "unclean hands" should bar some liable parties from seeking contribution from other PRPs. n455 "*Any* person may seek contribution from any other person who is liable or potentially liable under section [107(a)]." n456 However, the court may consider the extent of a party's culpability or irresponsible conduct in apportioning liability. "In resolving contribution claims, the court may allocate response costs among liable parties using such equitable factors as the court determines are appropriate." n457

The statute of limitation for contribution actions requires that the action be brought within three years of (1) the date of the judgment against the PRP for response costs, natural resources damages, or A.T.S.D.R. costs or (2) the date of an administrative order under §122 (relating to settlement) or judicially approved settlement. n458 Interestingly, the statute fails to mention §106 injunctions or administrative orders. Thus, assuming that a three-year period would be applied to §106 response actions as well, it is unclear when the three year period begins. The time could start running when the injunction or order is entered or when the response action is completed.

§ 75.09(c)(3)(ii) Settlement with the Government.

A PRP may also avoid the effects of joint and several liability by entering into a settlement agreement with the EPA If PRPs settle with the government, they can only be held liable for their settlement amount or duties and they are protected from the contribution claims of other PRPs. n459 Sheltering settling PRPs from subsequent actions promotes early settlement and cleanup. The enormous litigation expenses associated with contesting CERCLA liability also push PRPs toward settlement. CERCLA §122 provides procedures and guidelines for settlements. n460

§ 75.09(c)(3)(iii) Indemnification.

Parties are free to allocate liability among themselves by contracting for releases from or indemnification for CERCLA liability. n461 However, no agreement can shield a PRP from liability to the EPA or other parties who have not contracted with the PRP n462 Thus, indemnification will be of little value unless the indemnifier has adequate capital to honor the agreement. Moreover, a hold harmless agreement is of no value if the PRP is named as a defendant in a §107(a) action or a §106 action or order. A hold harmless agreement is only a defense against the party who signed the agreement.

§ 75.09(c)(4) Affirmative Defenses.

Three affirmative defenses under CERCLA are set out in §107(b). n463 CERCLA provides:

> There is no liability under [CERCLA] for a person otherwise liable who can establish by a preponderance of the evidence that the release or threat of release of a hazardous substances ... w[as] caused solely by -- (1) an act of God; (2) an act of war; [or] (3) an act or omission of a third party other than an employee or agent of the defendant, or than one whose act or omission occurs in connection with a contractual relationship, existing directly or indirectly, with the defendant ...." n464

The first defense -- the "act of God" defense -- has been interpreted rather narrowly. Section 101(1) limits the defense to "an unanticipated grave natural disaster or other natural phenomenon of an exceptional, inevitable, and irresistible character, the effects of which could not have been prevented or avoided by the exercise of due care or foresight." n465 Thus, the EPA has taken the position that lightning strikes are not acts of God under CERCLA n466

The second defense, "an act of war," has never been successfully asserted and has received little attention.

However, the third defense, commonly called the "third party defense," has received a great deal of attention as the most important protection for completely blameless parties. This defense exculpates PRPs from liability for the unsanctioned actions of third parties.

The problem with this third party defense as applied to landowners is that the third party act or omission is often found to occur "in connection with a contractual relationship," which renders the defense unavailable. Thus, CERCLA carves out an exception for innocent landowners to the contractual relationship limitation on the third party defense. This subcomponent of the third party defense is known as the "innocent landowner defense." Section 101(35)(A) states:

> The term "contractual relationship," for purposes of section 9607(b)(3) of this title includes, but is not limited to, land contracts, deeds or other instruments transferring title or possession, *unless* the real property on which the facility was located was acquired by the defendant after the disposal or placement of the hazardous substance on, in, or at the facility... n467

In addition to proving that the property was acquired after the disposal of the waste, the landowner must also establish "by a preponderance of the evidence [that] [a]t the time the defendant acquired the facility the defendant did not know *and had no reason to know* that any hazardous substance which is the subject of the release or threatened release was disposed of on, in, or at the facility." n468 Section 9601(35)(B) lists a number of factors that the court could use to find that a landowner had no reason to know that the site was contaminated.

> To establish that the defendant has no reason to know, ... the defendant must have undertaken, at the time of acquisition, all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice in an effort to minimize liability. For purposes of the preceding sentence the court shall take into account any specialized knowledge or experience on the part of the defendant, the relationship of the purchase price to the value of the property if

> uncontaminated, commonly known or reasonably ascertainable information about the property, the obviousness of the presence or likely presence of contamination at the property, and the ability to detect such contamination by appropriate inspection. n469

Thus, landowners may have an exceptionally difficult time proving that they had "no reason to know" and are therefore deserving of the innocent landowner defense. n470

Moreover, a commercial lender as landowner will undoubtedly be held to a high standard of care due to its "specialized knowledge or experience" in commercial real estate transactions and its "ability to detect" hazardous waste through "appropriate inspections." n471 The standard of care will also be influenced by the level of inquiry the judge believes to be good commercial practice. In some cases, the inquiry will simply be whether an environmental consultant would have been able to detect hazardous waste on the property before it was acquired by the mortgagee. In most circumstances, the answer to that question will be yes and the third party defense will be unavailable. The cases in which a landowner or mortgagee will be able to show that the unobvious nature or unlikely presence of contamination outweighs the other factors will be truly exceptional.

PRPs must meet two additional requirements before they are exculpated from liability by the third party defense. Section 107(b) requires that the party also show that "(a) he exercised due care with respect to the hazardous substance concerned ... and (b) he took precautions against foreseeable acts or omissions of any such third party and the consequences that could foreseeably result from such acts or omissions." n472 This provides for yet another limitation on the use of the third party defense for the rare defendant who has made it over the previous hurdles. Also, because issues of due care and foreseeability, along with the fact questions to be considered in §9601(35)(B), must normally be determined by a trier of fact, all of this language almost ensures that a party asserting the third party defense will be subjected to a trial before escaping liability. n473

As the preceding discussion should indicate, PRPs face a legal obstacle course when asserting the third party defense, and successful assertions of the defense are almost non-existent. Rejections of third party defense claims have dominated the reported decisions on the issue. Courts have strictly enforced the requirement that the third party be the *sole* cause of the release. n474 Moreover, courts have held that subsequent purchasers of property have reason to know that the property was contaminated if the purchasers were aware of any prior industrial use of the property. n475 In addition, courts have rejected the defense because the PRP failed to take precautions against foreseeable acts of third parties. n476

However, International Clinical Laboratories, Inc. v. Stevens n477 offers PRPs a ray of hope. In this case, International Clinical Laboratories (ICL) purchased industrial property without performing an environmental audit of the site. "[T]here were no visible environmental problems at the site," and neither the previous owner nor operator disclosed the existence of any environmental problems to ICL. n478 Only after ICL closed on the property did it learn that the New York Department of Environmental Conservation (D.E.C.) has previously filed a complaint against operators of the site discharging hazardous substances onto the property and that the property was listed on the DEC Inactive Hazardous Waste Disposal Sites list. n479 Despite ICL's only limited inspection of the property and cursory inquiry into prior uses, the court held that ICL was exculpated from liability by the innocent landowner's defense of §§9607(b)(3) and 9601(35)(A). n480 Thus, there are courts willing to interpret the third party defense broadly. n481

§ 75.09(d) Bankruptcy and Security Interests.

As discussed *supra*, lenders are often subject to liability as owners or operators of a facility from which a hazardous substance has been released, even though lenders are not thought of as "owners" or "operators" within the normal use of those terms. However, even if lenders are sophisticated and manage to avoid liability under CERCLA §107(a), they still face the prospect of having their security interests attacked for response costs. Moreover, the claims of general creditors are usually subordinated to hazardous substance response costs.

General creditors and creditors with perfected security interests in uncontaminated property face two main problems. First, their claims may be subordinated through super-priority liens for hazardous substance response costs. Second, even if there is no super-priority lien, the claims of general (and perhaps secured) creditors may be subordinated to response costs which are classified as administrative expenses under the bankruptcy code.

Creditors with perfected security interests in contaminated property will usually have their security invaded to pay for response costs, such as administrative expenses, associated with the contaminated property. Even if the property is abandoned and security interests are not invaded to clean up the contaminated property, the security interest may still be eviscerated in a practical sense, because the market value of the property is still reduced by the costs of any response action that could be taken under CERCLA

This section examines the liens associated with CERCLA liability and their impact on general and secured creditors. This section also discusses how the administrative expense provisions of the bankruptcy code may be used to subordinate the claims of both general and secured creditors.

§ 75.09(d)(1) The CERCLA Lien.

Section 107(1) of CERCLA provides for a federal lien in favor of the United States which attaches to any real property that is subject to removal or remedial action and is owned by a PRP under §107(a). n482 The federal lien arises the later of (1) the time the federal government incurs response costs associated with the property or (2) the time the PRP first receives written notice by certified or registered mail of the potential liability. The United States may bring an action in rem in the federal district court where the real property is located to recover any response costs or natural resources damages. n483

However, the lien must still be filed with the county clerk or other appropriate government official. Moreover, the federal lien does not have priority over other security interests or judgment liens that are perfected before the federal lien is filed. n484 Thus, although response costs will be given priority over the claims of general creditors, the actual lien provisions of CERCLA are seldom a cause for concern for secured creditors. The effects of CERCLA on secured creditors, however, range far beyond the federal lien authorized in the statute.

§ 75.09(d)(2) State Super Liens.

In Ohio v. Kovacs, n485 Justice O'Connor wrote a concurring opinion inviting states to enact statutes giving response costs incurred by state agencies priority over secured creditors. Justice O'Connor noted that property rights in the assets of the bankruptcy estate are determined by state law and that this allowed a state to "protect its interest" in reimbursement for response costs. n486 However, only a few states have responded enthusiastically to this challenge by enacting state super-priority lien statutes. Some of the states which have enacted super-priority liens appear to have been predisposed toward super-priority liens before *Kovacs*.

For example, shortly after the *Kovacs* decision, New Jersey amended and clarified the super-priority lien provision n487 that already existed in the New Jersey Spill Compensation and Control Act. n488 The New Jersey lien law provides that any expenditure by the state to respond to or clean up discharges of hazardous substances may be secured by a super-priority lien that takes precedence over all other secured and unsecured claims against the property. n489 Residential property containing six or fewer dwelling units is exempted from the super-priority lien. n490 Connecticut's super-priority lien provision was also enacted before *Kovacs*. n491

New Hampshire did enact a super-priority lien statute after *Kovacs* which is very similar to the New Jersey provision. The New Hampshire statute elevates the priority of the hazardous materials lien above other encumbrances, but it does not give the hazardous materials lien priority over perfected security interests in residential property. n492 Arkansas and

Massachusetts also adopted a hazardous substance liability scheme and super-priority lien provision after *Kovacs*, n493 although Arkansas later amended the super-priority lien provision to cancel the first priority status of environmental cleanup liens. n494

Similarly, Tennessee explicitly rejected Justice O'Connor's invitation in *Kovacs*. Tennessee amended its existing hazardous waste lien provision to clarify lien filing requirements and priority status and to prevent Justice O'Connor's statement in *Kovacs* from eviscerating prior perfected security interests. n495 The Tennessee statute now provides that the lien shall not have priority over valid liens or interests in property that are perfected before the filing of the hazardous waste lien. Before these changes, the Tennessee statute would have been read as a super-priority lien in light of *Kovacs*. n496

The state super-priority liens do not emanate directly from CERCLA, but rather from independent state liability schemes. However, the state schemes are usually very similar to CERCLA and often borrow much from CERCLA. For example, both the Arkansas and Massachusetts statutory schemes define hazardous materials as those materials or substances which are defined or listed as hazardous substances under CERCLA. n497 Moreover, the New Hampshire statute adopts the CERCLA §107(a) liability scheme almost word for word, setting forth the same four categories of liable parties under CERCLA n498

Thus, a party that is liable under CERCLA will often be liable under a similar state scheme, and creditors must examine state law to determine what priority hazardous substance response costs will be given in bankruptcy proceedings. In Connecticut, Massachusetts, New Hampshire, and New Jersey, hazardous substance response or cleanup costs will take priority over all other claims, whether secured or general. If a state lien provision does not govern the priority of environmental response costs, the bankruptcy code and bankruptcy case law will determine the priority of claims.

§ 75.09(d)(3) Response Costs as Administrative Expenses.

The United States Bankruptcy Code provides that "the actual, necessary costs and expenses of preserving the estate" may be charged against the bankruptcy estate as an administrative expense. n499 Under §507 of the Bankruptcy Code, these administrative expenses are given first priority over all unsecured claims against the estate. n500 Moreover, such administrative expenses may be recovered from secured property as long as the holder of the security interest derives some benefit from the administrative expense. n501

The subordination of general creditors' claims to CERCLA response costs usually proceeds in a two-stage analysis. First, the court determines that the contaminated property cannot be abandoned by the bankruptcy trustee. Second, because the estate is strictly liable for contaminated property that is not abandoned, as an owner or operator under CERCLA, the court, find that the cleanup of hazardous substances released on estate property is a necessary administrative expense in preserving the estate.

Before a secured claim is subordinated to CERCLA response costs, a third stage of analysis is required -- an actual benefit to the holder of the security interest. Thus, a perfected security interest cannot be invaded unless (1) the contaminated property cannot be abandoned, (2) response costs are found to be allowable administrative expenses, and (3) the holder of the security interest derives a benefit from the response action.

In re T.P. Long Chem., Inc. n502 provides an excellent example of this analysis. In *T.P. Long Chem.*, hazardous substances had been released into the environment from drums which were part of the bankruptcy estate. n503 The EPA responded by excavating and disposing of the drums and surrounding contaminated soil and then it sought recovery of response costs for this removal action. n504

The bankruptcy court first reasoned that the estate was an "owner or operator" under CERCLA §107(a) based upon the "broad construction" the courts have given those terms and the broad definition of "person" in CERCLA §101(21). n505

Thus, the court found that the estate could not discharge its CERCLA liability by abandoning the drums and contaminated property because the estate would still be an owner or operator at the time of disposal under CERCLA §107(a)(2). n506 The court also relied on other cases which held that the power to abandon property is subject to laws or equitable principles that are designed to protect public health or safety. n507

Proceeding to the second stage of the analysis, Judge White held that the CERCLA response costs were allowable administrative expenses: "Since the estate cannot avoid the liability imposed by CERCLA, it follows that the cost incurred by the [EPA] in discharging this liability is an actual necessary cost of preserving the estate entitled to administrative expense priority." n508 Thus, the claims of general creditors were subordinated to the CERCLA response costs.

However, because the estate's unencumbered assets were inadequate to satisfy the CERCLA administrative expense, the EPA sought to invade the perfected security interest of BancOhio in the equipment, fixtures, inventory, and accounts receivable of the estate. n509 Under this third stage of analysis, the court determined that BancOhio had not received any real benefit from EPA's response action other than the health and safety benefits enjoyed by the general public. n510 Judge White noted that BancOhio had no interest in the drums and that preserving the drums did not benefit BancOhio. Moreover, BancOhio had no interest in the contaminated property and did not stand to benefit financially from any cleanup of the property. Thus, Judge White ruled that the CERCLA administrative expense could not be given priority over perfected security interests under Bankruptcy Code §506(c). A perfected security interest in uncontaminated property could not be invaded to respond to or clean up contaminated property in the bankruptcy estate. n511

Although courts have not always followed the specific holdings of *T.P. Long Chem.*, the framework set forth by Judge White seems to be the dominant analysis. The priority given to CERCLA response costs under the Bankruptcy Code continues to depend on three main issues: (1) whether the contaminated property can be abandoned by the bankruptcy trustee, (2) whether CERCLA response costs are allowable administrative expenses, and (3) whether the holder of the security interest received any benefit from the CERCLA removal or remedial action.

§ 75.09(d)(3)(i) Abandonment.

Section 554 of the Bankruptcy Code provides for abandonment of property either by the trustee or on motion of a creditor:

> (a) After notice and a hearing, the trustee may abandon any property of the estate that is burdensome to the estate or that is of inconsequential value and benefit to the estate.
>
> (b) On request of a party in interest and after notice and a hearing, the court may order the trustee to abandon any property of the estate that is burdensome to the estate or that is of inconsequential value and benefit to the estate. n512

A straightforward reading of §554 seems to conflict with the holding in T.P. Long Chem., that property burdened with CERCLA liability cannot be abandoned by the bankruptcy estate. Indeed, many bankruptcy courts had simply allowed the bankruptcy trustee to abandon contaminated property under §554 if cleanup costs were actually greater than the market value of the property after decontamination. n513 Nevertheless, it is now well settled that the statutory abandonment power is limited by a duty to protect public health and safety. n514

The most authoritative treatment of the abandonment issue is found in Midlantic Nat'l Bank v. New Jersey Dep't of Envtl. Protection. n515 In a five-four decision, the Supreme Court held that state and local laws may limit the bankruptcy trustee's power to abandon property as long as the statute or regulation is "reasonably designed to protect the public health or safety from identified hazards." n516 However, in a footnote the Court cautioned that this exception to

the trustee's §554 abandonment power should not be read too broadly. The trustee's abandonment power may only be limited when state action is "reasonably calculated to protect the public health or safety from *imminent* and *identifiable* harm." n517

The narrowness of the public health and safety limitation on the abandonment power is open to debate. In the proceedings *infra*, the Third Circuit had held that contaminated property could not be abandoned under §554: n518 "If trustees in bankruptcy are to be permitted to dispose of hazardous wastes under the cloak of the abandonment power, compliance with environmental protection laws will be transformed into governmental cleanup by default." n519 This broad rationale would preclude almost all abandonment of contaminated property, because abandonment to the bankrupt prior owner will always require governmental cleanup; the prior owner will have lost any assets to use in cleaning up the property.

In affirming the Third Circuit, it is clear that the Supreme Court did not preclude all abandonment of contaminated property. However, the Third Circuit may still give this "narrow" health and safety exception a rather broad reading. Other courts since *Midlantic* have refused to allow abandonment under §554 without careful and detailed findings of *imminent and identifiable harm*. n520 These courts appear to logically assume that any lawful hazardous substance response or cleanup action is "reasonably calculated to protect the public health or safety from imminent and identifiable harm." n521

However, other courts have read *Midlantic* very narrowly and have allowed abandonment when the contaminated property "does not present immediate and menacing harm to the public health and safety." n522 In the Fourth Circuit, abandonment under §554 is only limited "when there is an *immediate* threat to the public health and safety and an imminent danger of death or illness." n523 This line of authority does indeed render the *Midlantic* exception a narrow one.

In re Franklin Signal Corp., n524 sets forth an approach somewhere between the broadest and narrowest readings of *Midlantic*. n525 According to Judge Kressel, *Midlantic* requires at a minimum (1) a thorough investigation to determine the extent of hazardous substances contamination and (2) notification to federal and state authorities. n526 The court must then examine:

> (1) the imminence of any danger to the public health and safety,
>
> (2) the extent of probable harm,
>
> (3) the amount and type of hazardous waste,
>
> (4) the costs to bring the property into compliance with environmental laws, and
>
> (5) the amount and type of funds available for cleanup n527 before allowing abandonment of contaminated property. Although seldom cited, this five-factor test appears to include the most important considerations in the abandonment decision.

If the property is abandoned, title reverts back to the bankrupt debtor. n528 General creditors and holders of security interests in other property should be protected from any response costs associated with the contaminated property. However, a few courts have speculated in dicta that response costs could still be charged against the estate even if the contaminated property is properly abandoned under §554. n529

Because the cost of cleanup exceeds the value of the property, the property is virtually worthless until it is cleaned up. The secured interest in such property is similarly of little value until some entity (most likely the state or federal government) cleans up the property. Thus, the secured creditor must wait until cleanup before it will reap any benefit from its security interest in the property. Ironically, the wait will be shorter if the property is dangerously contaminated

and is assigned a high priority on the N.P.L. However, if the danger is not extensive and the property receives a low H.R.S. score, the secured creditor may be in for a long wait before it can capitalize on its security interest.

If the property is not abandoned, the claims of both general and secured creditors may still be subordinated to cleanup costs that are held to be administrative expenses under the bankruptcy code. Thus, the next issue becomes whether response or cleanup costs are entitled to administrative expense priority.

§ 75.09(d)(3)(ii) Administrative Expenses: The Actual and Necessary Costs of Preserving the Estate.

In Midlantic, the Supreme Court explained that the limitations it placed on the abandonment power were entirely consistent with and followed from its holding in Ohio v. Kovacs. In *Kovacs*, the court held that a state cleanup order was dischargeable in bankruptcy proceedings as a general, unsecured claim. However, *Kovacs* also made it clear that anyone in possession of a contaminated site cannot violate state environmental laws, maintain a nuisance, pollute waters, or refuse to abate hazardous conditions. n530 Thus, the abandonment holding in *Midlantic* is consistent with *Kovacs*.

However, the *Midlantic* Court refused to address the issue of cleanup costs as administrative expenses, n531 implying that *Kovacs* offered little controlling precedent as to the priority of response costs in bankruptcy. The *Midlantic* Court treated abandonment and administrative expense priority as two easily separable issues. By refusing to address the issue, the court implied that contaminated property which cannot be abandoned under §554 is not automatically entitled to administrative expense priority. Nevertheless, courts have disregarded these implications; courts have relied on *Kovacs* to find that cleanup costs are not entitled to administrative expense priority, while other courts have merged the abandonment and administrative expense issues into one question. n532

In In re Dant & Russell, Inc., n533 the Ninth Circuit relied on *Kovacs* for the general proposition that cleanup costs for prepetition releases of hazardous substances are simply general claims and are not entitled to administrative expense priority unless the contaminated property is part of the bankruptcy estate. n534 Similarly, the Third Circuit relied on *Kovacs* in Southern Ry. v. Johnson Bronze Co. n535 to hold that prepetition claims could not be given administrative expense priority status. This use of *Kovacs* is somewhat troublesome, because *Kovacs* did not address the administrative expense issue. Indeed, other courts have recognized that *Kovacs* and *Midlantic* offer little guidance on the question of administrative expense priority. n536 Moreover, other courts have reached a similar conclusion without relying on *Kovacs*. n537

However, the reasoning of the Ninth Circuit does not depend on inferences drawn from *Kovacs*. The Ninth Circuit correctly notes that administrative expenses must be necessary to preserve the estate and must be incurred after the filing of the bankruptcy petition. Thus, if the contaminated property is not part of the bankruptcy estate, money spent to clean up prepetition hazardous substance releases does nothing to preserve the bankruptcy estate; cleanup preserves property that is not part of the bankruptcy estate. In effect, the contaminated property is abandoned because it never was actually part of the estate in the first place. Other cases denying administrative expense status for environmental cleanup costs may also be harmonized with the Ninth Circuit's analysis. n538

Thus, response costs are not entitled to administrative expense priority if (1) the hazardous substance release occurred before the bankruptcy petition was filed *and* (2) the contaminated property is not part of the estate. If a bankruptcy estate fails to meet one of these two conditions, response costs may be granted administrative expense priority.

In Pierce Coal & Construction, the bankruptcy court held that clean up costs for environmental damage that occurred after the petition for bankruptcy was filed are entitled to administrative expense status, regardless of whether the damaged or contaminated property is actually a part of the estate. n539 The court relied on §§503 and 507 of the Bankruptcy Code to distinguish between pre- and post-petition environmental damage. n540

When the contaminated property is part of the bankruptcy estate, the courts appear to be unanimous in holding that response or cleanup costs are entitled to administrative expense priority. n541 The courts have not required a showing that the hazardous substance release occurred after the bankruptcy petition was filed. If the contaminated property is part of the bankruptcy estate, all post-petition response or clean up costs are entitled to administrative expenses status, regardless of when the damage to the environment actually occurred. n542

However, it may be impossible to adequately reconcile and categorize all the cases on this issue. Contrary to the Ninth Circuit, many courts strain to classify response costs as administrative expenses with little analysis of any pre-petition/post-petition distinction or of whether the contaminated property is part of the estate. For example, courts may focus on the hazardous substances themselves as being contaminated property that is part of the estate. n543 Thus, response or cleanup costs are always necessary to preserve the bankruptcy estate. n544 This analysis would render the Ninth Circuit rule meaningless.

In the end, the question of whether response costs are necessary costs of preserving the estate is not easily answered. Like the abandonment question, the answer to the administrative expense issue may also be influenced by the public health and safety concerns associated with the contaminated property. n545 Moreover, it is unclear whether response costs for property that is part of the estate are always necessary to preserve the estate. *Midlantic* at least left open the possibility that response costs for part of the estate need not receive administrative expense priority. Creditors should be aware that the EPA, n546 state authorities, n547 or private parties n548 may be entitled to stand in the place of the trustee and receive administrative expense priority for response costs.

If administrative expense priority is granted, all of the unsecured claims of general creditors will be subordinated to response or cleanup costs. However, before the claims of secured creditors are subrogated to administrative expense response costs, an additional finding is necessary.

§ 75.09(d)(3)(iii) Benefit to Secured Creditors.

Before a security interest can be invaded to pay for administrative expenses, the holder of the security interest must receive a benefit from the administrative expense. Generally, administrative expenses cannot be charged against a perfected security interest, unless the secured creditor is directly benefitted by the expenditure. n549 The bankruptcy courts have consistently held that secured creditors must be directly and primarily benefitted before their security interests may be eviscerated to pay for response or cleanup costs that have obtained administrative expense status. n550

If secured creditors have no interest in the contaminated property, the courts have held that the secured creditors do not receive a sufficient benefit from cleanup to invade their security interests in the uncontaminated property of the estate. Thus, a secured creditor is generally protected from response costs for property unless the creditor has some interest in or association with the contaminated property. n551

However, the analysis is different when the security interest is actually in the contaminated property. Before cleanup, the secured creditor is unable to foreclose on the property without incurring CERCLA liability, and the market value of the property will reflect any cleanup costs that may be imposed under CERCLA Thus, the secured creditor receives a direct benefit from cleanup of the contaminated property and the security interest may be invaded to cover cleanup costs. n552

Finally, at least one court has speculated that the security interests of secured creditors may be invaded regardless of whether they actually have an interest in the contaminated property if the health and safety concerns are great enough. n553

(n12)Footnote 110. The average CERCLA cleanup cost has been estimated at $25 million to $30 million. *See* William K. Reilly, A Management Review of the Superfund Program (United States Environmental Protection Agency 1989).

(n13)Footnote 111. Ann M. Burkhart, *Lender/Owners and CERCLA: Title and Liability*, 25 Harv. J. on Legis. 317, 321 (1988) ("CERCLA has proven to be an unexpected source of liability for lenders, because this is the first time that a government agency has pursued lender/wners in court for conditions on the property.").

(n14)Footnote 112. The Superfund is the trust fund established under CERCLA to pay for the EPA's cleanup of hazardous substance releases. The term "Superfund" has become a nickname for CERCLA.

(n15)Footnote 113. Most commentators credit the media attention and public outcry at Love Canal for sowing the seeds of CERCLA. *See* Sheldon M. Novick, Donald W. Stever & Margaret G. Mellon, Law of Environmental Protection rev. 1990); Ann M. Burkhart, and CERCLA: Title and Liability," Harv. J. on Legis. 318, n.2 (1988); Superfund at Square One: *Promising Statutory Framework Requires Forceful EPA Implementation, 11 Envtl. L. Rep. (Envtl. L. Inst.) 10101 (1981).* There is certainly enough discussion of Love Canal in the legislative history of CERCLA to support such a conclusion. *See* 126 Cong. Rec. 26, 39-51 (1980).

Love Canal was an unfinished and inactive canal in Niagara Falls, New York. From the mid-1940s until 1953, the

Hooker Chemical Co. and others dumped hazardous wastes, including dioxin, into the canal. Hooker Chemical filled in the canal in 1953 and donated the land to the Niagara Falls Board of Education, and a school was subsequently built on the site. In 1976, residents near the school and parents of school children began to realize that they were being contaminated by hazardous leachate leaking from the site. More than 600 families had to be permanently evacuated from the site. *See* Adeline Levine, Love Canal: Science, Politics, and People (1982); *Sheldon M. Novick, Donald W. Stever & Margaret G. Mellon, supra,* §13.01[6].

> release of source, byproduct, or special nuclear material from a nuclear incident ... if such release is subject to [the financial responsibility] requirements ... [of *42 U.S.C. §2210],* or for the purposes of section 9604 of this title or any other response action, any release of source byproduct, or special nuclear material from any processing site designated under section 7912(a)(1) or 7942(a) of this title.

42 U.S.C. §9601(22).

(n60)Footnote 158. *42 U.S.C. §9601*(22)(D).

(n61)Footnote 159. *42 U.S.C. §§9603*(a), 9607(j).

(n62)Footnote 160. CWA §102, *33 U.S.C. §1342.* N.P.D.E.S. permits set forth the pollutants that can be legally discharged from a point source into the waters of the United States. *Id.*

(n63)Footnote 161. *33 U.S.C. §1344.*

(n64)Footnote 162. RCRA §§3005(a)-3005(d), *42 U.S.C. §6925*(a)-(d).

(n65)Footnote 163. *33 U.S.C. §§1412*-1413.

(n66)Footnote 164. *42 U.S.C. §§300h*-300h-7.

(n67)Footnote 165. *42 U.S.C. §§7410*-7412, 7470-7508.

(n68)Footnote 166. *See 42 U.S.C. §9601*(10)(I).

(n69)Footnote 167. *33 U.S.C. §§1317*(b)-1317(c).

(n70)Footnote 168. *42 U.S.C. §§2011 et seq.*

(n71)Footnote 169. A vessel is defined as "every description of watercraft or other artificial contrivance used, or capable of being used, as a means of transportation on water." *42 U.S.C. §9601*(28). Since this chapter is concerned primarily with CERCLA and real property, no discussion of vessels is provided.

(n72)Footnote 170. *See 42 U.S.C. §9606*(a) (injunctive relief and administrative orders are proper when there is "an actual or threatened release of a hazardous substance from a facility"); *42 U.S.C. §9607*(a) (linking CERCLA liability to the existence of a facility or vessel).

(n73)Footnote 171. *See 42 U.S.C. §9603*(a).

(n74)Footnote 172. *42 U.S.C. §9601*(9) provides:

> The term "facility" means (A) any building, structure, installation, equipment, pipe or pipeline ... well, pit, pond, lagoon, impoundment, ditch, landfill, storage container, motor vehicle, rolling stock, or aircraft, or (B) any site or area where a hazardous substance has been deposited, stored, disposed of, or placed, or otherwise come to be located ...

(n75)Footnote 173. *United States v. Conservation Chem. Co., 619 F. Supp. 162, 185 (W.D. Mo. 1986)* (emphasis added). This case has been rejected by other courts, e.g., *United States v. Northwestern Pharm. & Chem. Co., Inc., 810 F.2d 726 (8th Cir. 1986)* cert. denied, *484 U.S. 848 (1987). See also United States v. Bliss, 667 F. Supp. 1298, 1303, 1305 (E.D. Mo. 1987)* (finding that roadways sprayed with hazardous waste oil to suppress dust were facilities for purposes of CERCLA liability); *New York v. General Elec. Co., 592 F. Supp. 291 (N.D.N.Y. 1984)* ("[T]he broad language employed in §109(9) dispels any notion that CERCLA was designed to cover only traditional dump sites... Congress sought to deal with every conceivable area where hazardous substances come to be located."). *Amcast Indus. Corp. v. Detrex Corp., 2 F.3d 746,* (7th Cir. 1993) (holding hazardous materials spilled from trucks as a CERCLA "facility"), cert. denied, *114 S.Ct. 691 (1994); KN Energy, Inc. v. Rockwell Int'l Corp., 840 F. Supp. 95 (D. Colo. 1993)* (natural gas pipelines as a CERCLA "facility"); *Reading Co. v. City of Phila., 823 F. Supp. 1218 (E.D. Pa. 1993)* (rolling stock held to be a CERCLA "facility").

(n76)Footnote 174. The definition of a facility does exclude "any consumer product in consumer use." *42 U.S.C. §9601*(9). Thus, PRPs cannot be held liable under *42 U.S.C. §9607*(a) for releases of hazardous substances from consumer products or forced to respond to such releases under *42 U.S.C. §9606*(a). Moreover, there is no reporting requirement for releases from consumer products. However, these issues have not been litigated.

(n77)Footnote 175. *42 U.S.C. §9603*(a).

(n78)Footnote 176. *42 U.S.C. §9603*(b).

(n79)Footnote 177. *See* 40 C.F.R. §302.6(a) (1989).

(n113)Footnote 211. *42 U.S.C. §9613*(h).

(n114)Footnote 212. For criticism of CERCLA's two-response system, see Jerry L. Anderson, *Removal or Remedial? The Myth of CERCLA's Two-Response System, 18 Colum. J. Envtl. L. 103 (1993)* (distinguishing between the two types of actions and discussing the court's confusion about the purpose of the removal/remedial distinction).

(n115)Footnote 213. *42 U.S.C. §9601*(23). *ABB Indus. Sys. v. Prime Tech. Inc., 32 F. Supp. 2d 38 (D. Conn. 1998)* (Removal actions and remedial actions can be factually distinguished. Removal actions are typically an immediate response to an emergency situation while remedial actions focus on permanent remedies to the releases).

(n116)Footnote 214. *Id.*

(n117)Footnote 215. *42 U.S.C. §9604*(a)(2).

(n118)Footnote 216. *42 U.S.C. §9601*(24). *Gussack Realty Company v. Xerox Corporation, 224 F.3d 85 (2d Cir. 2000)* (expert and attorney fees incurred in remediating a site are not a necessary cost and not recoverable under CERCLA).

(n119)Footnote 217. *42 U.S.C. §§9604*(c)(2), 9621(f)(1). Although the state must have a meaningful opportunity to help develop and review the selected remedy, the EPA need not obtain state approval of the remedial action.

(n120)Footnote 218. *See 42 U.S.C. §§9604*(a), 9604(c)(4).

(n121)Footnote 219. *See* §75.09(b)(8), *infra.*

(n122)Footnote 220. *See* 40 C.F.R. §300.68(a)(1) ("Fund-financed remedial action, excluding remedial planning activities pursuant to CERCLA section 104(b), may be taken only at sites listed on the NPL.").

(n123)Footnote 221. *42 U.S.C. §9621*(a). The statutory text actually states that remedial actions need only be consistent with the NCP "to the extent practicable." *Id.* Prior to the enactment of SARA in 1986, cleanup standards were determined solely under the NCP. After Congress provided new cleanup guidelines under SARA §121(a) (codified at *42 U.S.C. §9621),* the existing NCP was not entirely consistent with the new statutory mandate regarding cleanup standards. Thus, a remedial action was not governed by the NCP to the extent it conflicted with revised *42 U.S.C. §9621.* However, because EPA has since revised the NCP, there should no longer be circumstances where *42 U.S.C. §9621* conflicts with the NCP. Thus, cleanup standards must comply with both CERCLA §121 and the NCP.

(n124)Footnote 222. *42 U.S.C. §9621*(d)(1).

(n125)Footnote 223. *42 U.S.C. §9621*(d)(2)(A).

(n171)Footnote 269. *See 42 U.S.C. §9606*(b)(2).

(n172)Footnote 270. *42 U.S.C. §9606*(b)(2)(A).

(n173)Footnote 271. *42 U.S.C. §§9606*(b)(2)(B)-9606(b)(2)(C).

(n174)Footnote 272. *42 U.S.C. §9606*(b)(2)(D).

(n175)Footnote 273. *See, e.g., United States v. Northernaire Plating Co., 685 F. Supp. 1410 (W.D. Mich. 1988).*

(n176)Footnote 274. *See United States v. Prive, 688 F.2d 204, 213-214 (3d Cir. 1982);* William Rosbe & Robert L. Gulley, *The Hazardous and Solid Waste Amendments of 1984: A Dramatic Overhaul of the Way America Manages Its Hazardous Wastes, 14 Envtl. L. Rep. (Envtl. L. Inst.) 10458 (1984).*

(n177)Footnote 275. *See 42 U.S.C. §6973*(a).

(n178)Footnote 276. Although RCRA §7003(a) seems to authorize only injunctive relief, some courts have begun interpreting §7003(a) to allow Superfund financed cleanup and cost recovery actions. *See, e.g., United States v. Aceto Agrl. Chem. Corp., 872 F.2d 1373 (8th Cir. 1989) but see Mathews v. Dow Chemical Co., 947 F. Supp. 1517,* (D. Colo. 1996).

(n179)Footnote 277. For purposes of this section, the term "private party" includes state and local governments. In other words, a private party is any person or entity that does not have CERCLA response authority pursuant to CERCLA §§104 and 106.

(n180)Footnote 278. Responsible parties are barred from seeking reimbursement from the Superfund.

(n181)Footnote 279. *42 U.S.C. §9611*(a)(2).

(n182)Footnote 280. *42 U.S.C. §9611*(a)(2).

(n183)Footnote 281. *See* 40 C.F.R. §300.25(d)(1) (1989).

(n184)Footnote 282. *42 U.S.C. §9612*(a).

(n185)Footnote 283. *See, e.g.,* Frank M. Thomas, Jr. *Municipal and Private Party Claims Under Superfund, 13 Envtl. L. Rep. (Envtl. L. Inst.) 10272 (1983).* Apparently, the EPA has decided that its interest in controlling the cleanup process outweighs the benefits of private party response and reimbursement.

(n186)Footnote 284. *42 U.S.C. §9612*(d)(1).

(n187)Footnote 285. *42 U.S.C. §9612*(d)(2).

(n188)Footnote 286. If a responsible party performs response actions in which less than all responsible parties participate or pay their fair share, the responsible party must seek contribution from other PRPs instead of reimbursement from the Superfund. *See 42 U.S.C. §9613*(f).

However, there is one limited circumstance where a responsible party actually has recourse to the Superfund. As noted in the discussion of CERCLA §106 response authority, a responsible party may recover response costs from the Superfund if the costs were incurred as the result of an arbitrary, capricious, or unlawful administrative order. *See 42 U.S.C. §9606*(b)(2)(D).

(n189)Footnote 287. *42 U.S.C. §9607*(a)(4)(B) (emphasis added). State governments and Indian tribes are also entitled to recover response costs not inconsistent with the NCP under *42 U.S.C. §9607*(a)(4)(B).

(n190)Footnote 288. *Tanglewood E. Homeowners v. Charles-Thomas, Inc., 849 F.2d 1568, 1574-1575 (5th Cir. 1988); New York v. Shore Realty Corp., 759 F.2d 1032, 1045-1048 (2d Cir. 1985); Walls v. Waste Resource Corp., 761 F.2d 311 (6th Cir. 1985); Pinole Point Props., Inc. v. Bethlehem Steel Corp., 596 F. Supp. 283, 289-290 (N.D. Cal. 1984); Jones v. Inmont Corp., 584 F. Supp. 1425 (S.D. (n191)Footnote 289. *See Tanglewood E. Homeowners v. Charles-Thomas, Inc., 849 F.2d 1568, at 1574-1575 (5th Cir. 1988)* (court dismissing, with almost no discussion, arguments that response was not necessary).

(n192)Footnote 290. *See, e.g., Tanglewood E. Homeowners, 849 F.2d at 1574-1575; Shore Realty, 759 F.2d at 1045-48; United States v. Reilly Tar & Chem. Corp., 546 F. Supp. 1100 (D. Minn. 1982).*

Because CERCLA §107(a)(4)(B) requires that the response action be "consistent with" the NCP, most private parties seeking response costs bear the burden of proving consistency with the NCP. *42 U.S.C. §9607*(a)(4)(B). On the other hand, if the federal government, a state government, or a Native American tribe is seeking response costs, the defendant bears the burden of proving inconsistency with the NCP, because federal, state, and Native American government response actions need only be "not inconsistent with" the NCP. *42 U.S.C. §9607*(a)(4)(A).

(n193)Footnote 291. *Shore Realty, 759 F.2d at 1045-1047* (private parties may recover all response costs which are consistent with the NCP, regardless of whether the site is on the NPL); *Pinole Point Properties, 596 F. Supp. at 289-90* (private party response not limited to sites on the NPL); *United States v. Reilly Tar & Chem. Corp., 546 F. Supp. 1100 (D. Minn. 1982)* (liability under CERCLA §107(a) is independent of and broader than authorized uses of the Superfund under §111).

As indicated by the above cases, most courts have held that private recovery of response costs under §107(a) is available for all response costs incurred consistent with the NCP, including remedial action at sites not on the NPL. These decisions reject the argument that recovery under §107(a) should be limited to NPL sites because Superfund expenditures are limited to NPL sites under 40 C.F.R. §300.68(a)(1) (1989). For other cases holding that liability under §107 is independent of §111 Superfund expenditure limitations, *see United States v. Northeastern Pharm. & Chem. Co., 579 F. Supp. 823, 850-51 (W.D. Mo. 1984); United States v. Wade, 577 F. Supp. 1326, 1334-1336 (E.D. Pa. 1983).*

(n232)Footnote 330. *See 42 U.S.C. §9617.*

(n233)Footnote 331. *See* 40 C.F.R. §300.67.

(n234)Footnote 332. *See* 40 C.F.R. §300.69.

(n235)Footnote 333. *See 42 U.S.C. §9604*(i).

(n236)Footnote 334. PRPs do not incur CERCLA liability for federally permitted releases CERCLA provides that recovery "for response costs or damages resulting from a federally permitted release shall be pursuant to existing law in lieu of [CERCLA §107(a)]." *42 U.S.C. §9607*(j).

(n237)Footnote 335. As pointed out above CERCLA §107(a) liability also extends to natural resources damages and ATSDR costs. Response costs include removal and remedial activities as well as investigations and evaluations performed under the NCP. Response costs may also include the costs of litigating §107(a) recovery actions. *See United States v. Northernaire Plating Co., 685 F. Supp. 1410 (W.D. Mich. 1988).*

(n238)Footnote 336. Federal, state, or Native American government response actions need only be "not inconsistent" with the NCP, while response actions of other parties must be "consistent with" the NCP. *42 U.S.C. §9607*(a)(4)(A)-(B). This difference in language has been interpreted to require defendants to bear the burden of proving inconsistency with the NCP in actions brought by the federal, a state, or Native American government under *42 U.S.C. §9607*(a)(4)(B). Thus, consistency with the NCP is not an element of a prima facie case in *42 U.S.C. §9607*(a)(4)(A) actions but is instead an affirmative defense.

(n239)Footnote 337. *See 42 U.S.C. §9607*(a). *See also United States v. Aceto Agrl. Chem. Corp., 872 F.2d 1373 (8th Cir. 1989)* (condensing the six factors into four elements by including "hazardous substance" in one of the other elements and failing to mention consistency with the NCP because the defendant bears the burden of proof on that issue); *United States v. New Castle County, 727 F. Supp. 854, 859 (D. Del. 1989)* (same); *United States v. Bliss, 667 F. Supp. 1298 (E.D. Mo. 1987)* (same), *but see Mathews v. Dow Chemical Co., 947 F. Supp. 1517,* (D. CHAPTER 75 THE IMPACT OF ENVIRONMENTAL REGULATION ON REAL PROPERTY

8-75 Thompson on Real Property, Thomas Editions § 75.10

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 75.10 Land Policy and Management.

1986 Internal Revenue Code

The land policy and management aspect of environmental regulation primarily concerns public lands. Perhaps the most concise official survey of public land issues in the context of environmental regulation is in the 1982 Report of the Council on Environmental Quality:

> The onshore public lands (i.e., those owned by the federal government) comprise approximately one-third of the nation or approximately 700 million acres ... These lands are found in every state in the Union, but are unevenly distributed, ranging from over 80 percent of Alaska and Nevada to less than 1 percent of Iowa, Maine, and Connecticut. These public lands are managed by several departments and their respective agencies. However, the predominant land-holding agencies are the so-called "multiple-use agencies," the Bureau of Land Management (BLM) of the U.S. Department of the Interior and the Forest Service of the U.S. Department of Agriculture.

Multiple-Use Planning

Although the origins of the Bureau of Land Management (B.L.M.) and the Forest Service and the history of their legislative mandates are quite different, the two now share many problems and much future potential. They manage huge land-holdings with a commitment to multiple-use development and elaborate land use planning. They are also faced with increasing recreational demands on their lands.

The public lands hold rich reserves of energy resources and other minerals. The B.L.M. controls the leasing on all on-shore lands, and the Minerals Management Service controls leasing of the 1.1 billion acres of the Outer Continental Shelf (O.C.S.). In 1980, the O.C.S. accounted for 9 percent of domestic oil production and 23 percent of domestic natural gas production. The U.S. Geological Survey (U.S.G.S.) estimates that about 30 percent of the undiscovered oil and gas in the United States is on O.C.S. lands... Major shale oil and tar sand reserves are also on public lands, though these have not yet proved economical to develop.

Western public lands hold 33 percent of total U.S. coal reserves, mostly in low sulfur coal. Currently the federal lands

account for about 10 percent of total U.S. coal production, which may rise to 25 percent by 1990.

These energy resources make major contributions to the federal treasury through royalties, and bonus bids totaled more than $9 billion in 1980. Fifty percent of these revenues (except for those from the O.C.S.) is shared with the states. In terms of job creation, government resources and overall contribution to the energy supply of the nation, these are exceptionally productive lands.

Untold quantities of non-fuel, hardrock minerals, subject to patenting under the 1872 mining law, are also found on federal lands. In the last few decades, hundreds of millions of acres of public land have been withdrawn from entry, restricting the mineral exploration efforts of the American mining industry. Estimates vary widely on the amount of undeveloped minerals on the public lands, because substantial exploration and development are necessary to compile good predictive data.

The federal lands are rich in other resources too, though these are, perhaps, less important economically than the energy resources. About 54 percent of the nation's softwood sawtimber inventory is found on federal land, though normally only a fifth to a quarter of the U.S. annual timber harvest is federal timber. About 86 percent of the federal harvest comes from the rich timber lands of both the Forest Service and B.L.M. in northern California, Oregon, and Washington.

Both the B.L.M. and the Forest Service lands have become important recreational playgrounds for hikers, campers, skiers, hunters, and fishermen. The Forest Service has become one of the nation's largest purveyors of outdoor recreation. Its hiking and horse trails, fishing lakes and streams, scenic rivers, and roadside campgrounds attracted 233.4 million recreational visitor days in 1982. The Forest Service has 25 million acres of special wilderness lands where access is limited and no public travel by motorized vehicles is permitted. Forest Service wilderness acreage will probably grow to between 34 and 41 million acres over the next few years. The B.L.M. is currently in the early stages of an assessment of the wilderness quality of 24 million acres of its lands. When the new wilderness areas of the B.L.M. and the Forest Service are added to the existing wildernesses in the parks, forests, and refuges, the completed wilderness system will probably total more than 100 million acres, an area larger than the state of California.

Finally, many Americans who never plan to visit the public lands gain substantial benefits from the nation's scenic and wild lands through reading, films, pictures, and just from knowing they are there. There is real value in knowing that grizzly bears still roam the Yellowstone Plateau as they did in the days of the mountain men, and that in Alaska a venturesome hiker can still wander through land reminiscent of the late Pleistocene glaciation. This "existence value" is difficult to measure, but existence value should be added to any list of the economic resources of the federal lands.

Economists would argue that another factor to be considered in calculating the economic value of the federal lands is the opportunity costs of non-development, i.e., the value of foregone economic opportunities. Preservationists with their view of existence value and intrinsic values, and the economists with their concept of opportunity costs, often seem to be talking past each other without much sympathy for the opposing point of view. Yet both sides speak to a common underlying theme -- not all things are possible with the same plot of land. The decision as to what is the proper use for these lands when the value of forage, timber, minerals, recreation, foregone opportunities, and intrinsic worth are all totaled up is the challenge facing the land manager today.

Proper management of the public lands is of the utmost importance if public benefits are to be maximized. With the passage of the Federal Land Policy Management Act of 1976 (FLPMA), the Forest and Rangeland Renewable Resources Planning Act of 1974 (R.P.A.), and the National Forest Management Act of 1976 (N.F.M.A.), the Congress clearly established a policy that the public lands shall generally be retained in federal ownership and managed for all Americans under the principles of multiple-use and sustained yield.

B.L.M. Planning

The B.L.M. manages an intricate combination of natural resources -- from coal and caribou to watershed and cultural resources. The F.L.P.M.A. requires that decisions on public land use be based on inventories of the resource base and on analysis of alternative levels and types of use. Such decisions are to be made with full participation by the public and a careful balance of the interests of competing users. The F.L.P.M.A. also requires an approach which reflects the sensitivity to and complexity of multiple use of resources...

Forest Service Planning

The Forest and Rangeland Renewable Resources Planning Act of 1974 (R.P.A.), as amended, directs the Secretary of Agriculture to prepare a comprehensive, long-range assessment of the nation's renewable resources and to develop a program for Forest Service activities. The R.P.A. assessment, required every 10 years, provides detailed information on renewable forest and rangeland resources -- timber, range, water, fish, wildlife, outdoor recreation, and wilderness. It includes projections of future supply and demand for each of those resources, and spells out potential opportunities to meet the nation's future needs.

The National Forest Management Act (N.F.M.A.) of 1976 directed the Secretary of Agriculture to develop a land and resource management plan for each administrative unit of the National Forest System by 1985. Regulations were developed in 1979 to guide this effort. The regulations require integrated planning for all resources, i.e., recreation, fish and wildlife habitat, water, timber, range, wilderness, and minerals. In the last year the regulations were revised to streamline the land management planning process, and the final rules became effective November 1, 1982.

Forest plans for 121 administrative units of the National Forest System are being prepared. Forest plans will constitute the land and resource management plans required by N.F.M.A. Fourteen draft environmental impact statements for Forest plans were issued for public comment in FY 1982 (8 others were issued in FY 1981). However, because of the reevaluation of roadless and under developed areas recommended in 1979 for wilderness designation or non-wilderness uses, forest planning schedules will be delayed by six months to one year. The reevaluation will be accomplished through the forest planning process. The goal is to complete the remainder of the 121 forest plans in FY 1984, although some of these plans will not be published until 1985.

Alaska Lands

The Alaska Statehood Bill, the first of 3 laws passed since 1958 affecting disposition of 374 million acres of public land in Alaska, authorized conveyance of 104 million acres to the then new state. During 1982, B.L.M. conveyed nearly 12 million acres to the state of Alaska, bringing to 65.5 million the total acreage actually conveyed since passage of the Alaska Statehood Bill.

In 1971, the Alaska Native Claims Settlement Act authorized conveyance of an additional 40 million acres of federal land in Alaska to native organizations. During 1982, B.L.M. conveyed 4.7 million acres to Alaskan natives, bringing the total acreage conveyed to over 23 million acres.

In December 1980, nearly two and a half decades of debate over public lands in Alaska were settled by passage of the Alaska National Interest Lands Conservation Act. The 1980 Act expanded the National Park System by 45 million acres; the wildlife refuges administered by the Fish and Wildlife Service were increased by 54 million acres; and the Forest Service gained about 3 million acres.

When the state and native land entitlements are fulfilled, approximately 75 million acres of public land will remain in Alaska under B.L.M. administration. Approximately 23 million of these acres are within Alaska's National Petroleum Reserve.

Rangeland and Timber Management

In 1982, B.L.M. adopted new rangeland management regulations that make livestock managers stronger partners in maintaining a healthier rangeland environment. The Bureau also returned to the states the primary authority to allocate state water resources, which reaffirmed that the individual states shall govern how Department of the Interior agencies acquire new water sources.

B.L.M. also issued a final grazing management policy designed to place federal resource management investments where most needed, resulting in more effective and efficient management while protecting and improving rangeland condition and productivity. To date, B.L.M. is expected to complete 144 grazing environmental impact statements covering over 174 million acres.

More than 9,300 wild horses and burros were removed from the public lands in 1982, and approximately 7,000 of these animals have been placed in private maintenance through the Bureau's "Adopt-A-Horse" program. In addition, new wildlife management policies were implemented that reaffirm states' rights to manage resident wildlife populations.

The downward trend in the demand for lumber greatly affected the harvest of sawtimber in calendar year 1982. Housing starts reached the lowest level in 36 years at slightly less than 1.1 million units. This economic slump was reflected by a sharp decrease in the amount of timber harvested from the National Forest. Although 10.5 billion board feet of sawtimber were sold, only 6.4 billion board feet were harvested.

Interest has continued to increase in the Forest Service firewood program. This program allows people to obtain permits to cut timber for their personal use as firewood. During 1982, more than 860,000 permittees removed over 4.7 million cords of fuelwood valued at about $7.5 million from National Forest System land. This firewood harvest was 5 percent larger than during 1981, and it provided the heating equivalent of about 16.2 million barrels of fuel oil.

In the case of B.L.M., the Bureau's responsibilities for timber and woodlands, or non-commercial forests, are limited to public domain lands throughout the western United States and to the revested Oregon and California railroad grant lands. In managing the timber resource of these lands, the Bureau, like the Forest Service, is obligated to obtain a fair market price for government timber, while still retaining a sensitivity to other resource values such as watersheds, wildlife habitat, and recreation.

B.L.M.'s new policy also recognizes woodlands as distinct ecosystems having value for wood products, livestock forage, wildlife habitat, recreation use, watershed protection, and minerals development. Under the new policy, B.L.M. develops and maintains an inventory and classification of the public woodlands to achieve a positive cost/benefit ratio and to facilitate the management of other resources.

As in the case of the Forest Service, another B.L.M. responsibility is the issuance of permits authorizing the private and commercial harvest of fuelwood from B.L.M. lands. In 1982, B.L.M. decided to make the program self-sufficient by charging each person who wanted a permit $10 for the privilege of the harvesting fuelwood.

Wilderness Areas

The Federal Land Policy and Management Act directed that the lands administered by B.L.M. be inventoried for wilderness characteristics. By November 1980, the inventory was largely completed in the western states. Of 174 million acres inventoried, nearly 24 million acres, in a thousand separate tracts, were identified as wilderness study areas, and approximately 149 million acres were found not to possess wilderness characteristics. The law required further that those areas to be studied for potential wilderness designation should be managed, with some specified exceptions, so that no impairment of wilderness suitability would occur prior to final congressional action on their status.

During the study period, all wilderness study areas are being managed under B.L.M.'s Interim Management Policy. The main thrust of this policy is to prevent impairment of the areas' suitability for wilderness designation, but there are exceptions for valid existing rights and previously existing mineral and grazing uses.

Once an area is designated by the Congress as part of the National Wilderness Preservation System, B.L.M. will manage it under the same provisions of the Wilderness Act of 1964 that apply to designated wilderness areas managed by the Forest Service. B.L.M.'s Wilderness Management Policy was published on September 24, 1981.

Recreational Use of the Public Lands

As indicated earlier, quite apart from the National Parks general public lands are being used more and more for recreational purposes. This is particularly true of the National Forest System. Of the 554 million visitors days of use in 1982 for all federal lands, approximately 43 percent occurred in the National Forests and National Grasslands.

Recreation activities in national forests vary from camping at constructed facilities to backpacking in primitive settings. In the past 5 years, recreational use of National Forest System lands has increased 7 percent. In FY 1982, 233.4 million recreation visitor days occurred in National Forest System lands, almost unchanged from the previous year. Of the total use in 1982, 11.2 million recreation visitor days occurred in wilderness and primitive areas and 222.2 million in other National Forest System lands.

The National Parks

The National Parks represent a national heritage which most Americans hold dear. Over the years, the National Park System has grown to include not only the great national treasures such as Yellowstone, the Everglades and the Grand Canyon, but also many national monuments, battlefield parks, historic sites, seashores, rivers and recreational areas.

The National Park System began 111 years ago with the creation of Yellowstone National Park. It now comprises 334 areas totalling 77 million acres, of which 54 million acres are located in Alaska. Park visits in 1982 alone equalled more than 245 million visitor days.

Acquisition and Development

In 1965 Congress established the Land and Water Conservation Fund (L.W.C.F.) to provide federal dollars for park land acquisition. Although the congressionally established Outdoor Recreation Resources Review Commission had recommended focusing the LWCF on grants to states for necessary park land purchases, Congress also provided a federal share of the Fund.

Since the Fund was created, 123 park areas have been added to the System. The National Park System has grown dramatically over the past two decades. The number of parks has almost doubled and the acreage in the system has increased by over 5 million acres (not including Alaska). Many of the newer additions to the system have required billions of dollars from the LWCF to purchase private lands.

This rapid growth of the National Park System has caused much controversy. It has always been the desire of the National Park Service (NPS) to include resources in the system which possess national significance, but as the System grew, a number of parks were added despite opposition from the Service and those who felt these newer parks were more of state or local value.

Another criticism is that this seemingly unlimited expansion has been at the expense of System resources and facilities. Appropriations from the federal budget during several Administrations have not kept pace with the costs of purchasing,

protecting, maintaining, and staffing the expanded National Park System. For example, in 1980 the U.S. General Accounting Office (GAO) reported that the infrastructure and visitor facilities in many parks had deteriorated to the point of being hazardous to visitors. To correct these health and safety problems, the Department of the Interior established a 5-year, $1 billion Park Restoration and Improvement Program. Thus far, $433.3 million has been appropriated by Congress for this program, and in 1982 GAO issued a further report which indicated that considerable progress has been made in the restoration and improvement of park facilities.

In recent years, as a result of new strategies for land protection, management of many of the additions to the System containing sizeable amounts of privately owned land has become more of a partnership arrangement between federal, state, and local governments, and the private sector. Protection of these areas involves zoning, cooperative agreements, easements, and other alternatives to full fee federal ownership of land.

Recognizing the need for a new land protection strategy, the Department of the Interior, in 1981, adopted a Land Protection Policy to guide use of the federal portion of the LWCF. NPS is presently applying the policy's concepts to park areas containing non-federal lands, and land protection plans will be prepared for 195 units in the System. These plans will enable N.P.S. to:

Identify what land or interests in land need to be in federal ownership to achieve park management objectives consistent with the public purposes established by Congress;

Use to the maximum extent practical, cost-effective alternatives to direct federal purchase of private lands, and, when federal acquisition is necessary, acquire or retain only the minimum interests necessary to meet management objectives;

Cooperate with landowners, other federal agencies, states, local governments, and the private sector to manage land for public use or protect it for resource conservation; and

Formulate, or revise as necessary, plans for land acquisition, resource protection, and park use to insure that the most outstanding areas are adequately managed.

Implementation of land protection planning is likely to be one of the more innovative and significant actions in the recent history of public lands management and policy.

Park Protection

Because improved management is the key to the protection of resources in the Park System, the Department of the Interior is placing renewed emphasis on park resource management. Within 2 years, all units of the system will have prepared resource management plans. To increase the professional expertise available for solving resource problems, the Service has instituted a comprehensive training program for park specialists in resource management.

Offshore Oil and Gas

The oceans bordering the United States are one of America's greatest multiple use resources, serving the nation as a vast source of energy, minerals, fish protein, and recreation and transportation opportunities. The management of ocean resources is required and authorized by numerous statutes, including the Outer Continental Shelf (O.C.S.) Lands Act of 1953. Under that Act, as amended in 1978, the responsibility for the balanced development of energy and minerals is vested in the Secretary of the Interior.

Despite the presence in the offshore area of approximately two-thirds of America's oil and gas resources, over the past 30 years little effort was expended to develop that potential... In fact, between 1954 and 1981, only 4 percent of the O.C.S. was made available for oil and gas exploration and only 2 percent was leased for such development.

Because U.S. offshore oil production fell by 33 percent between 1970 and 1980, the Department of the Interior has worked to develop environmentally sensitive methods of increasing America's domestic energy resources, assist national defense, preserve environmental quality, and promote domestic growth and revitalization.

Over the past decade, the Department of the Interior, in consultation with numerous other agencies, has spent over $300 million on an environmental studies program to ensure the protection of the multiple-use resources of the O.C.S. Since its inception in 1973, the program has supported prelease studies in all areas on the O.C.S. leasing schedules, and the information has been used in the analysis of risks and benefits of O.C.S. leasing as well as in the development of sale-specific and programmatic Environmental Impact Statements and other decision documents. In 1980, the environmental studies program began to focus on issues more related to post-lease management decisions. This was possible because most lease areas had several years of completed study, and opportunities for scientifically credible monitoring experiments became available. Monitoring for biological and chemical effects of exploratory and development activities was initiated on Georges Bank and in southern California. Programs to observe the effects of O.C.S. operations on endangered species (bowhead and gray whales, sea otters, and ringed seals) were also initiated. The information from these studies is used in post-lease determinations on the effectiveness of stipulations to protect the environment under such requirements as the Endangered Species Act (E.S.A.), the Marine Mammal Protection Act (M.M.P.A.), and the National Pollutant Discharge Elimination System (N.P.D.E.S.).

In 1981, the Interior Department announced a new 5-year offshore oil and gas leasing program, as required by law, after a 19-month environmental review process. In consultations with the governors of 23 coastal states, Congress, and numerous other groups, the Department developed a leasing program that will consider almost the entire Outer Continental Shelf for possible leasing. Of the total acreage involved, only a portion will be offered for leasing; less will actually be leased; far less will be drilled, and only a fraction will see any production. From that small fraction will come the energy and revenues from the O.C.S. program. As a result of the 41 lease offerings in this new program, in 5 years America will have made great strides in inventorying the entire offshore area for hydrocarbon potential.

Most experts assert that 90 percent of America's hydrocarbon potential will come from 9 percent of the fields, some as large as Prudhoe Bay and others much smaller. The importance of these smaller offshore fields cannot be overlooked, since nearly 99 percent of all the onshore fields ever discovered in the lower 48 states have contained less than 300 million barrels of oil. It is the cumulative contribution of the smaller onshore fields that has made the largest domestic contribution to the nation's energy needs in the past, and it is expected that the small to medium-sized offshore fields will play a similar role in the nation's energy future.

Onshore Oil and Gas

In January 1981, America was importing almost 40 percent of its crude oil needs, while production from public lands was declining. Less than 15 percent of U.S. onshore public lands were under lease for oil and gas development, and no federal onshore oil and gas leases had been issued in Alaska for 15 years. The annual national energy bill for imported crude oil had reached $80 billion, and it had become obvious that if the United States intended to reduce this outflow of American wealth to foreign nations, it had to increase oil and gas production from public lands...

In 1981, B.L.M. leased 150 percent more onshore acres than were leased in 1980. In 1982, leased acreage nearly doubled again, thus equalling in 1982 alone the number of acres leased for the entire period of 1977-1980... These leases were issued with more environmental safeguards than ever before in the history of this country.

Under this aggressive leasing plan, 259 onshore oil and gas leases, encompassing 2.8 million acres, were issued on public lands in Alaska. Furthermore, more than 100 million acres in Alaska were opened for geophysical exploration, and more than 4.25 million acres were offered in two sales in the Alaska National Petroleum Reserve, the largest competitive oil and gas offering in history.

Coal

One of America's greatest energy assets is its abundance of coal. It is estimated that 40 percent of the nation's coal reserves are federally owned. In the West, the federal government owns or controls, due to land ownership patterns, 80-90 percent of the coal reserves. Currently, these public lands account for about 10 percent of all U.S. coal production.

Geothermal Energy

The development and use of geothermal energy is proving to be a viable energy alternative. In 1981 and 1982, B.L.M. issued over 1,100 geothermal leases on 2.1 million acres, an increase of 508 leases from 1979 and 1980 ... Bonus bids from competitive geothermal lease sales jumped from $3.4 million in 1979 and 1980 to nearly $30.5 million in 1981 and 1982. In addition, new regulations to encourage development of locally important geothermal resources were implemented. The new regulations affect lands where the federal government currently shares ownership of the resources or where ownership will vest in the government at a future date.

During 1982, the first comprehensive national assessment of low temperature geothermal resources of the United States, useful for space heating and industrial heat processes, was completed. Furthermore, a geophysical survey was made of the Cascade Range in Oregon and California, as part of a major regional geothermal assessment.

Strategic Minerals

In April 1982, the President announced the first national minerals policy in 30 years. The policy states that cost-effective approaches will be followed in dealing with America's reliance on foreign sources for strategic minerals and encourages development of its own rich mineral resources. The adoption of this policy has been coupled with a dramatic increase in research on strategic and critical minerals.

While Congress authorized the development of offshore strategic and critical minerals over 30 years ago, no action was taken regarding that resource area until the announcement in January 1982 of an offshore mineral leasing program. The first area of interest for future leasing is the sand and gravel potential of the Beaufort Sea, Alaska.

The President's recent proclamation of an Exclusive Economic Zone confirming U.S. sovereign rights and control over the living and non-living natural resources of the seabed within 200 nautical miles of U.S. coasts will assure future opportunities for development of America's strategic and critical mineral resources, including zinc and copper in offshore Oregon and Washington, and cobalt near the Hawaiian Islands.

In recent years, the regulation of wetlands has become a prominent issue. In 1975 the federal jurisdiction over "waters of the United States" was judicially expanded to include most wetland areas, n554 so now the permit process under the Clean Water Act, administered by the Army Corps of Engineers, applies to any activity that involves dredging or filling wetlands. n555 The impact of all of this on real property rights has been aptly described as follows:

> Generally, a property owner may object to the Army Corps of Engineers' requirement of a §404 dredge and fill permit on only two grounds. First, the owner may claim that the Corps lacks jurisdiction over the owner's property. However, in *Riverside Bayview* the Supreme Court made it clear that the Corps' broad interpretation of its own jurisdiction is a reasonable one. As long as the property is sufficiently saturated to support wetland vegetation and is also adjacent to a navigable body of water, the Corps may require a §404 permit before the owner may develop the property. The property needs to be inundated or frequently flooded before it will be considered a wetlands subject to the Corps' jurisdiction.

Second, the owner may claim that the Corps' denial of the owner's application for a §404 permit constitutes a Regulatory Taking. However, an owner will be successful in its claim of a Regulatory Taking only in extreme circumstances. In order to be successful in such a claim, an owner must make one of two showings. The owner may attempt to show that the denial of a permit has left that owner without any economically viable use of his property. However, most courts have no problem finding some remaining economically viable use if they believe that equities in a particular case require such a result. The owner may also attempt to show that the denial of a permit has not substantially advanced legitimate government interest. However, as the Supreme Court held in *Riverside Bayview*, "there is no identifiable set of instances in which mere application of the permit requirement will necessarily or even probably constitute a taking."

These developments seem to constitute a large setback to land developers, potentially affecting millions of acres of saturated property across the country. Swamps, marshes, bogs, and the like are now clearly entitled to federal protection. Owners of such properties must obtain a dredge and fill permit from the Corps before filling and, therefore, before any construction may begin. If a permit application is denied, the developer is unlikely to obtain relief from the courts. n556

CHAPTER 75 THE IMPACT OF ENVIRONMENTAL REGULATION ON REAL PROPERTY

8-75 Thompson on Real Property, Thomas Editions § 75.11

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 75.11 Protection of Wildlife.

Regulation of wildlife in the United States has been a subject of some conflict between federal and state jurisdictions. It has now been determined that a state has an interest in and the power to regulate wildlife within its own borders, but that regulation may not directly or indirectly burden interstate commerce if alternative conservation measures are available. n557

The various federal statutes regulating wildlife also promote a variety of purposes: protection of the environment, protection of endangered species, protection of food sources, protection of commercial enterprises based on fish and animals, and protection of recreational resources.

Wildlife conservation received early statutory attention in the Fish and Wildlife Coordination Act of 1934, n558 which sought to assure "that wildlife conservation will receive equal consideration and be coordinated with other features of water resource development programs through the effectual and harmonious planning, development, maintenance and coordination of wildlife conservation and rehabilitation." This consideration must be taken into account whenever a body of water is to be modified by any federal agency.

Individual species protection has been promoted by statutes such as the Marine Mammal Protection Act n559 and the Wild Free-Roaming Horse and Burros Act. n560 These and other miscellaneous items of legislation were succeeded by the Endangered Species Act of 1973, n561 which was the first comprehensive statutory protection for endangered species, including plants.

Under the act federal agencies periodically update lists of endangered and threatened species, and then regulations for their protection are issued. Much enforcement activity is delegated to the states, which also receive financial assistance therefor.

CHAPTER 75 THE IMPACT OF ENVIRONMENTAL REGULATION ON REAL PROPERTY

8-75 Thompson on Real Property, Thomas Editions § 75.12

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 75.12 Citizen Suits.

[Go To Supp]

§ 75.12(a) The Role of Citizen Suits in Environmental Protection.

It is now well-recognized that the natural environment is fragile and that human activities impacting on the environment often impact on private property rights. The various attempts to regulate by law the types of conduct that affect the environment emphasize the role of public authority in creating and executing the laws and regulations.

It should also be recognized that private rights are often at issue in environmental regulation and protection, and that what is harmful to the environment generally is also likely to be harmful to specific private rights. Thus it should not be surprising that the main environmental legislative enactments also make some provision for so-called "citizen suits," that is, legal actions brought by one private party against another, complaining of private injury arising out of violation of public environmental law.

In most situations where one property owner is impeded in use of property by the activities of a nearby property owner which violate environmental law, a remedy may be sought by a private nuisance action. n562 In those nuisance actions the plaintiff's burden of proof can be heavy: a plaintiff in a nuisance action must usually show that the defendant's conduct was unreasonable and that the interference with or injury to plaintiff's use of land caused by that conduct was substantial. By contrast, in private litigation under environmental laws, the plaintiff's burden of proof may be much lighter: the plaintiff in most such cases need show only a violation of the law and resulting injury to or interference with the plaintiff's property in order to secure injunctive relief. However, a private action under environmental law may also have disadvantages, such as limitations on the scope of proper issues or on compensatory remedies.

In this section several of the principal federal environmental laws are summarized as to that law's citizen suit provisions. Those summaries highlight the scope of the right of action, proper parties, available remedies, and special procedural considerations relating to the background or purpose of the legislation.

Similar state legislation and rights of action also exist, but because of the wide variety of subjects for environmental legislation, it is beyond the scope of this section to survey in detail the state citizen suit legislation in each of those areas. The state approach to these topics may be very generally summarized as follows:

> Federal environmental legislation encourages private enforcement through "citizen suit" provisions authorizing enforcement litigation by private individuals, and a few states have followed the federal lead in this area ... Some hazardous waste laws also include a private right of action allowing private individuals to recover cleanup or removal costs for a hazardous waste site, although private actions seeking injunctive relief or penalties are rare. For the most part, however, state environmental laws do not include explicit "citizen suit" provisions, relying instead on enforcement by government agencies. n563

A couple of states have enacted "environmental rights" acts that are designed to encourage private enforcement on a broader basis. Unlike the typical "citizen suit" provision, which authorizes private enforcement of a single piece of state environmental legislation, these laws broadly empower private individuals to sue for violations of any environmental law. n564

§ 75.12(b) Private Litigation to Enforce the Clean Water Act.

§ 75.12(b)(1) Citizen Suits Under the Clean Water Act.

Specific statutory authority for citizen suits over clean water violations was introduced by the 1972 Clean Water Act and has since been used "as the basis for hundreds of suits against dischargers." n565

§ 75.12(b)(1)(i) Scope of the Action.

A citizen suit under the Clean Water Act may be based on any allegation that the defendant is violating an effluent standard n566 or limitation under the act or is violating an order of the federal administrator or an order of a state with respect to such a standard or limitation. n567 Also a citizen may bring an action against the Administrator based on an allegation that the Administrator is failing to perform a non-discretionary duty under the act. n568 The act ostensibly refers to current violations as being the subjects of citizen suits, and the U.S. Supreme Court held in 1987 that a citizen suit may not be maintained for *wholly* past violations. n569 However, other federal courts -- even after 1987 -- have held that the actions may be maintained for past violations. Sometimes environmental groups acting as plaintiff have been formed after the occurrence of the violations in order, as plaintiffs, to allege those violations in the groups' citizen suits. n570

The Act also preserves any right of action a plaintiff may have under "any statute or common law" for enforcement of an effluent standard or limitation or for other relief. It has been claimed that these broad citizen suit provisions imply an intent by Congress to preserve a private right of action under federal common law, but the U.S. Supreme Court has held that federal common law rights of action in this area are pre-empted by the citizen suit provisions; thus a citizen plaintiff must comply with the statutory procedural requirements. n571 It has already been judicially determined that any private right of action under the federal common law of nuisance in the area of water pollution has been pre-empted by these statutes. n572

§ 75.12(b)(1)(ii) Procedural Considerations.

The statute authorizing citizen suits contains an explicit waiver of federal sovereign immunity:

> any citizen may commence a civil action on his own behalf --
>
> (1) against any person (including (i) the United States, and (ii) any other government instrumentality or agency to the extent permitted by the eleventh amendment of the Constitution)... n573

This limited waiver of sovereign immunity applicable to federal governmental entities does not extend to pollution-related actions brought by a state under the federal common law of nuisance. n574 Nevertheless, a federal

district court in a later case held that an action against the administrator based both on this act and on the federal common law of nuisance was not barred by sovereign immunity, even though the plaintiff had not complied with the statutory notice requirements. n575

The act also provides an additional waiver of sovereign immunity in that any citizen may commence a civil action "against the Administrator where there is alleged a failure of the Administrator to perform any act or duty under this chapter which is not discretionary with the Administrator...." n576

Even though the waivers of sovereign immunity in the act apply only to citizen suits brought under the act, one federal court has waived federal immunity on behalf of the state by allowing imposition of state civil penalties on a federal facility on the premise that the act waives sovereign immunity to *all* civil claims under the act. n577 A different federal court, however, has maintained the federal facility sovereign immunity from civil penalties, because the supposed waiver was not unambiguous. n578

Federal district courts have jurisdiction of actions under the act, "without regard to the amount in controversy or the citizenship of the parties." n579 But jurisdiction complications arise when actions under the act also include related or similar claims under state environmental statutes, so that the federal court must decide whether to adjudicate or abstain from such claims. Abstention may be justified where joinder of the claims presents difficult questions of state law; usually, however, the federal court will not abstain from the state-based claim. n580 The timing of the alleged violations and of the litigation may be important, as the U.S. Supreme Court has held that the federal court has no jurisdiction over a citizen suit based only on wholly past violations. n581

Venue for most actions under this law is laid in the district where the alleged violation is occurring:

> Any action respecting a violation by a discharge source of an effluent standard or limitation or an order respecting such standard or limitation may be brought ... only in the judicial district in which such source is located. n582

This provision does not specify venue for actions by a citizen against the administrator, which are thus governed by the usual venue rules. n583

The act sets out no specific statute of limitations for the bringing of citizen suits, n584 but if the forum court takes the position that no citizen suit may be brought for wholly past violations, then that position acts as a sort of limitation of action. n585 Ordinarily, when a federal act contains no limitations provisions, the federal court should apply the most appropriate state statute of limitations, unless a relevant and analogous federal limitations provision is available. It has been held that the general federal five-year limitations period n586 is relevant and thus applicable to citizen suits under the Clean Water Act for which no other statute of limitation is appropriate. n587

To commence a citizen suit against an alleged violator, the plaintiff must give at least 60 days' notice of the alleged violation to the prospective defendant, to the Administrator, and to the State in which the alleged violation occurred. n588 The notice provision is theoretically jurisdictional, that is, the court may not hear the action if the notice requirement has not been met. n589 However, because the citizen suit is not the exclusive remedy, n590 actions seeking similar relief under other statutes or under common law have been accepted, even though no notice or only inadequate notice was given. n591

A private action may not be commenced at all if the administrator or a state "has commenced and is diligently prosecuting a civil or criminal action," in either federal or state court, to require compliance with the standard, limitation, or order whose alleged violation would have been the object of the private plaintiff's action. n592 However, in that circumstance the private prospective plaintiff has a right to intervene in the action brought by the administrator or the state.

When the plaintiff proposes to bring an action against the administrator for alleged failure to perform a non-discretionary act or duty, the plaintiff must give at least 60 days' notice of such action to the administrator. n593 However, if this proposed action relates to national performance standards n594 or to toxic effluent standards, n595 no waiting period is required after the notice, and the plaintiff may file the action immediately after giving notice. Theoretically, the occasions on which no notice is required are assumed to be situations in which the need to deal with threats to clean water is urgent. In the more ordinary cases, however, the purpose of the waiting period following notice is to afford the defendant, either the state or the appropriate agency of the federal government, an opportunity to commence an action that would eliminate the need for a separate citizen suit. n596

The content of the notice and requirements for serving the notice are prescribed by regulation. n597 If the notice is of an alleged violation of a standard, limitation or order, the notice must identify which of those criteria have been violated, what activity constituted the violations, the persons responsible for the violations, the dates and locations of violations, and the name, address and telephone number of the person giving notice. n598 The notice shall also state the name, address and telephone number of the legal counsel, if any, representing the person giving notice. n599 If the notice is to the administrator for failure to perform a non-discretionary duty, the notice shall cite the statutory provision establishing the duty, describe the action taken or not taken by the administrator, and provide the name, address, and telephone number of the person giving notice. n600 This notice, too, must give information concerning legal counsel.

The notice requirement is jurisdictional, so the federal court is not empowered to adjudicate the action if the notice requirements have not been met. n601 Sufficiency of the notice is not so much a matter of strict compliance with technical content requirements as it is of giving adequate notice to the defendant of the circumstances of the alleged violation and identifying the complainant. n602 In a case brought by multiple plaintiffs, it has been held that notice from only one of the plaintiffs is adequate as substantial compliance with the notice requirements. n603 After the action is commenced, additional similar violations may be added by amendment to the complaint, without the necessity of meeting the pre-litigation notice requirements. n604

Upon commencement of a citizen suit in federal court, the plaintiff "shall serve a copy of the complaint on the Attorney General and the Administrator." n605 Also, if a consent judgment is to be entered in the action, and the United States is not a party, the Attorney General and the Administrator must be provided a copy of the proposed consent judgment at least 45 days before that judgment is to be entered. n606

§ 75.12(b)(1)(iii) Proper Plaintiffs.

A plaintiff may be "any citizen," n607 which "means a person or persons having an interest which is or may be adversely affected." n608 To show an adversely affected interest plaintiffs must have suffered some injury in order to have standing to sue; however, that includes persons whose injuries are non-economic but who have standing under the holding of Sierra Club v. Morton, n609 as well as those who have suffered actual economic injury. n610 A right of action under §1983 of the Civil Rights Act, n611 to challenge actions of state officials allegedly violating rights created by federal law, may not be implied under this act.

Standing issues have focused on environmental groups seeking to assert citizen suits on behalf of their members. Quite consistently such groups enjoy standing if they are able to represent that any of their members live in the areas affected by the alleged violations. n612 The federal courts are in conflict over whether a state is a "citizen" for purposes of bring a citizen suit under this statute. n613

Under certain situations, the prospective plaintiff is precluded from commencing an action under the citizen suit provisions, but may intervene as a matter of right in an already pending action adjudicating the same issues. Specifically, if the administrator has already commenced and is diligently prosecuting a court action for compliance with the same standard or limitation on which the plaintiff bases a claim, the plaintiff may intervene. n614 If the

administrator is seeking such enforcement only through an administrative forum, the plaintiff is not barred from commencing judicial action, n615 unless the administrative forum has authority similar to that of a court. n616

Just as a private complainant may intervene as a matter of right in certain actions brought by the administrator or by a state, so the administrator, if not already a party, may intervene as a matter of right in any action respecting a violation by a discharge source brought under the act. n617

§ 75.12(b)(1)(iv) Proper Defendants.

Defendants in a citizen suit may be:

> (1) the administrator in an action alleging the administrator's failure to perform any non-discretionary act or duty under this law, n618 or
>
> (2) any person alleged to be in violation of an effluent standard or limitation under the act, or in violation of an order from the administrator or a state respecting such standard or limitation. n619 "Any person" includes the United States and also includes "any other governmental instrumentality or agency to the extent permitted by the eleventh amendment to the Constitution." n620 The Eleventh Amendment to the Constitution, prohibiting federal actions by citizens of one state against another state, declares:
>
> The judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by Citizens of another State, or by Citizens or Subjects of any Foreign State.

In an action not fitting neatly into any of the categories described above, it has been held that a citizen suit under this section may be brought against the Army Corps of Engineers for alleged failure to perform non-discretionary duties arising out of its dredge and fill program. n621

§ 75.12(b)(1)(v) Remedies.

In a citizen suit respecting a violation of or order concerning an effluent standard or limitation, the district court "shall have jurisdiction ... to enforce such an effluent standard or limitation, or such an order." n622 In a suit brought against the administrator for failure to perform a non-discretionary act or duty, the court may order the administrator to perform the act or duty. n623 The court is also authorized to "apply any appropriate civil penalties under §1319(d) of this title." n624 A citizen plaintiff seeking compensatory damages would have to do so by action or claim under some other statute or common law right, n625 which could possibly be joined with the citizen suit action against violations of clean water laws by a defendant.

§ 75.12(b)(2) Actions to Review Administrator's Actions.

In provisions separate from the citizen suit provisions, the act authorizes "any interested person" to bring an action for review of the administrator's actions in promulgating certain standards of performance, in making certain determinations, in promulgating certain effluent standards, prohibitions or pretreatment standards, in making determinations as to state permit programs, in approving certain effluent or other limitations, and in issuing or denying certain permits. n626 Any administrator action which could have been the subject of such a review, but was not, may not be subjected to subsequent judicial review "in any civil or criminal proceeding for enforcement." n627

§ 75.12(b)(3) Civil Action by the Governor of a State.

The act also gives specific permission for the governor of a state to commence a civil action:

> [A]gainst the Administrator where there is alleged a failure of the Administrator to enforce an effluent standard or limitation under this chapter the violation of which is occurring in another State and is causing an adverse effect on the public health or welfare in his State, or is causing a violation of any water quality requirement in his State. n628

§ 75.12(b)(4) Costs and Attorney's Fees.

The act contains an explicit provisions for costs and attorney's fees:

> The court, in issuing any final order in any action brought pursuant to this section, may award costs of litigation (including reasonable attorney and expert witness fees) to any prevailing or substantially prevailing party, whenever the court determines such award is appropriate. The court may, if a temporary restraining order or preliminary injunction is sought, require the filing of a bond or equivalent security in accordance with the Federal Rules of Civil Procedure. n629

This section was amended in 1987 to authorize the court to award costs to a "substantially prevailing party" in addition to a prevailing party, although case law had already adopted that position. n630

§ 75.12(b)(5) State Regulation.

The federal act expressly does not "preclude or deny the right of any State or political subdivision thereof ... to adopt or enforce" similar clean water standards, except that state standards may not be "less stringent" than federal standards, nor may state laws impair federal jurisdiction over state waters. n631

§ 75.12(c) Private Litigation Under the Clean Air Act.

§ 75.12(c)(1) Citizen Suits Under the Clean Air Act.

The citizen suit provision in the Clean Air Act was an important legislative milestone:

> The inclusion of a citizen suit provision in the Clean Air Act in 1970 was a development that revolutionized public interest litigation, not only in the field of environmental law, but quite generally. Since 1970, almost every law that provides for public health, safety and consumer protection has included a citizen suit provision. The right of citizen enforcement has become so widely accepted that there is little general discussion of the issue... n632

§ 75.12(c)(1)(i) Scope of the Action.

A citizen suit is often based on an allegation that a person (including the United States or other governmental instrumentalities and agencies) is violating an emission standard or limitation or is violating an order based on such a standard or limitation. n633 The act includes an elaborate and broad definition of emission standard or limitation. These terms can mean:

> (1) a schedule or timetable of compliance, emission limitation, standard of performance or emission standard,
>
> (2) a control or prohibition respecting a motor vehicle fuel or fuel additive, or
>
> (3) any condition or requirement of a permit under [various enumerated sections of the Clean Air Act]. n634

The plaintiff in a citizen suit may also bring an action against the administrator that alleges the administrator's failure to

perform any non-discretionary act or duty under the act. n635 Finally, the plaintiff may bring an action against any person proposing to construct a facility that will produce emissions, either without a required permit or in violation of an existing permit. n636 Except for this latter provision, which permits a private legal action against proposed construction allegedly to be in violation of a permit, a citizen suit is not ripe for adjudication unless a violation has actually occurred. n637

In the context of the Clean Water Act, federal courts disagreed over whether a citizen suit could be maintained for violations wholly in the past. This matter was effectively resolved by the *Gwaltney* case, requiring that the action could be based only on present or intermittent violations. n638 The holding of *Gwaltney* has now been applied to citizen suits under the Clean Air Act. n639

As is the case under the Clean Water Act, this act preserves other existing rights of private enforcement:

> Nothing in this section shall restrict any right which any person (or class of persons) may have under any statute or common law to seek enforcement of any emission standard or limitation or to seek any other relief (including relief against the Administrator or a State agency). n640

This section clearly preserves common law private rights of action in the states, and it has been held that federal common law rights also remain intact, because the act did not clearly abolish them. n641 However, a subsequent U.S. Supreme Court case reviewing a similar question under the Clean Water Act held that the federal common law of nuisance in the area of water pollution was pre-empted by the Clean Water Act and related statutes. n642

Private citizens in the form of citizen groups may bring action for judicial review of administrator actions under a separate provision of the Clean Air Act. n643

§ 75.12(c)(1)(ii) Special Procedural Considerations.

A citizen suit against the federal government or a federal agency is made possible by an explicit waiver of federal sovereign immunity in the Clean Air Act:

> ... [A]ny person may commence a civil action on his own behalf --
>
> (1) against any person (including (i) the United States, and (ii) any other governmental instrumentality or agency to the extent permitted by the Eleventh Amendment to the Constitution)... n644

As an additional waiver of sovereign immunity, the act also provides that any person may commence a civil action "against the Administrator where there is alleged a failure of the Administrator to perform any act or duty under this Act which is not discretionary with the Administrator...." n645

Jurisdiction in Clean Air Act citizen suits is conferred on federal district courts, "without regard to the amount in controversy or the citizenship of the parties," to enforce an emission standard or limitation, or an order, or to order the administrator to perform an act or duty, as may be required by the act. n646 If a petition to review an agency action or an agency's failure to act has been filed in the court of appeals, the proper jurisdiction still lies first with the federal district court. n647 The district court is clearly a better forum for this type of action than is the court of appeals, because for some actions no prior record of the administrative processes will have been created. n648 This jurisdiction of the district courts is to be distinguished from the jurisdiction conferred on the Court of Appeals in Washington, D.C., to review EPA actions in promulgating national standards, rules, and regulations. n649

Legal actions concerning violations of emission standards, limitations and orders, as distinguished from actions against the administrator, are to be brought only in the district where the source of the emissions is located. n650

No statute of limitations is indicated in the provisions of the act authorizing citizen suits. Ordinarily, when a federal act contains no limitations provisions, the federal court should apply the most appropriate state statute of limitations, unless a relevant federal limitations provision is available. In the context of the Clean Water Act, it has been held that the general federal five-year limitations period n651 is relevant and thus applicable to citizen suits. n652 This same reasoning may apply to Clean Air actions.

The *Gwaltney* case, decided under the Clean Water Act, has also clarified that violations alleged in citizen suits must be intermittent or ongoing, and may not be wholly past violations. n653 This has been followed in clean air citizen actions. n654 The rule that no action can be brought for violations that are wholly past also functions as a sort of statute of limitations.

No citizen suit against a person alleged to be in violation of emission standards, limitations or orders can be commenced unless at least 60 days earlier the plaintiff has given notice of the alleged violation to the alleged violator, as well as to the administrator and to the state in which the violation occurs. n655 The purpose of this notice is to provide time for correction of the violation, which would thus render further judicial action unnecessary, n656 and to that end the notice requirement is construed "flexibly and realistically." n657 There is disagreement among the courts about whether the notice requirement is jurisdictional, n658 but it does appear that citizen suits filed before the 60-notice requirement is met will generally be dismissed as premature. n659

If the plaintiff is commencing an action against the administrator for failure to perform a non-discretionary act or duty under the act, 60 days prior notice of the action must be given to the administrator, n660 again to permit corrective action to be taken before litigation is actually commenced.

In a violations case requiring the 60 days' notice, the 60-day waiting period may be ignored and the action filed immediately after giving notice, if the alleged violation relates to urgent conditions arising from certain emission standard violations n661 or from an order concerning such violations. n662

Although the notice prescribed by this act "shall be given in such manner as the Administrator shall prescribe by regulation." n663

Even prior notice is ineffective to authorize commencement of a citizen suit if the administrator or a state has already commenced *and is diligently prosecuting* n664 a compliance action with respect to a violation that might otherwise be the basis for a citizen suit. n665 In that circumstance, the citizen plaintiff is not permitted to commence a separate action, but is authorized to intervene as a matter of right in the administrator's or state's civil action in federal court. n666 Conversely, if the citizen suit is first commenced, then the administrator who is not already a party may intervene as a matter of right. n667

In contrast to the Clean Water Act, the Clean Air Act's citizen suit provisions impose no requirement that the citizen plaintiff serve a copy of the complaint on either the Attorney General or the EPA administrator after commencement of the action. n668

§ 75.12(c)(1)(iii) Proper Plaintiffs.

Under the usual rules for standing, n669 environmental organizations have standing to bring actions under the Clean Air Act citizen suit provisions, if they demonstrate that organizational members live in close proximity to the areas which are the subject of the action. n670 It should also be noted that "any person" may commence a citizen suit under the Clean Air Act, n671 whereas the terminology under the Clean Water Act is that any "citizen" may commence a citizen suit thereunder. n672 However, even under the Clean Water Act a "citizen" is defined as a "person" with an adversely affected interest, n673 so the respective acts' terminology apparently creates a distinction without a difference. "Person"

is not defined in the Clean Air Act.

§ 75.12(c)(1)(iv) Proper Defendants.

Defendants in a citizen suit under the Clean Air Act may be:

(1) the administrator in an action that alleges the administrator's failure to perform a non-discretionary act or duty under the Clean Air Act, n674 or

(2) any person allegedly in violation of an emission standard or limitation under the act, or in violation of an order from the administrator or a state with respect to such standard or limitation. n675 "Any person" includes the United States and, to the extent permitted by the Eleventh Amendment to the United States Constitution, "any other governmental instrumentality or agency." n676 The Eleventh Amendment, however, prohibits a federal court action in which a state is sued by a citizen of another state or by a foreign national.

It has been held that "any person" against whom a Clean Air Act citizen suit may be brought does not include individual corporate officers of an enterprise alleged to be in violation of emission standards. n677 However, it should be noted that individual, "responsible corporate officers" are among the persons subject to penalties for violations of Clean Air Act provisions. n678

§ 75.12(c)(1)(v) Remedies.

In a citizen suit brought under the Clean Air Act for violation of an emission standard or limitation, or an order with respect to such a standard or limitation;

> The district courts shall have jurisdiction ... to enforce such an emission standard or limitation, or such an order, or to order the Administrator to perform such act or duty, as the case may be. n679

Compensatory damages are not available as remedies in citizen suits, n680 but separate legal actions for causes of action under common law or some other statutory authorization may enable a plaintiff to seek damages.

§ 75.12(c)(2) Actions for Review of Administrator's Actions.

Distinct from the citizen suit provisions is a section of the Clean Air Act authorizing a

> petition for review of action of the Administrator in promulgating any national primary or secondary ambient air quality standard [and various other enumerated emission standards and requirements under the Clean Air Act]. n681

This section does not address the question of who may file such a petition, so courts have assumed that the usual rules of standing apply, and that the plaintiff must show some adverse impact on an interest of the plaintiff in order to be qualified to file a review petition. n682 Administrator's actions which can be reviewed under this section, but are not, are thereafter protected from subsequent judicial review in civil or criminal enforcement proceedings. n683

§ 75.12(c)(3) Costs and Attorney's Fees.

The costs and attorney's fees of any party are expressly recoverable in a citizen suit under the Clean Air Act:

> The court, in issuing any final order in any action brought pursuant to subsection (a) of this section, may award costs of litigation (including reasonable attorney and expert witness fees) to any party, whenever the court determines such award is appropriate. The court may, if a temporary restraining order

> or preliminary injunction is sought, require the filing of a bond or equivalent security in accordance with the Federal Rules of Civil Procedure. n684

This section has not been amended, as the Clean Water Act was in 1987, n685 to authorize the court to award costs to a "substantially prevailing party," although the court may make the award to any party as it deems appropriate.

§ 75.12(c)(4) State Regulation.

State regulation is an important element of the federal clean air legislation. State implementation plans n686 are vital to the effective implementation of national standards, and the federal regulatory scheme relies on concurrent environmental regulation by the states.

In some circumstances the federal regulation is quite assertive. For instance, states may not adopt standards relating to new motor vehicle emissions without a waiver of federal authority, n687 and a state may not adopt aircraft emission standards that are not identical to the federal standards. n688 The most sweeping limitation imposed by the federal legislation is the requirement that state standards not be less stringent than the federal standards:

> Except as otherwise provided in [certain enumerated sections] nothing in this Act shall preclude or deny the right of any State or political subdivision thereof to adopt or enforce (1) any standard or limitation respecting emissions of air pollutants or (2) any requirement respecting control or abatement of air pollution; except that if an emission standard or limitation is in effect under an applicable implementation plan or under *[42 U.S.C. §7411* or §7412], such State or political subdivision may not adopt or enforce any emission standard or limitation which is less stringent than the standard or limitation under such plan or section. n689

Overall state involvement in clean air regulation may be summarized as follows:

> In view of the pervasive impact of the Clean Air Act on air quality programs since 1970, there is considerable uniformity among the state schemes. Each of them is intended to allow the state to meet the national ambient air quality standards promulgated by E.P.A. In some states regulations set more stringent standards for the same pollutants as are covered by the federal promulgations. Some states also have adopted ambient standards on pollutants not addressed on a national scale. It should not be overlooked, however, that many states have statutory prohibitions on the adoption of regulations more stringent than federal restrictions. n690

§ 75.12(d) Private Litigation over Solid Waste Under the Resource Conservation and Recovery Act.

§ 75.12(d)(1) Citizen Suits Under the Resource Conservation and Recovery Act.

§ 75.12(d)(1)(i) Scope of the Action.

The Resource Conservation and Recovery Act 's citizen suit provision authorizes three types of actions. n691

First, the citizen plaintiff, described as "any person," may commence a civil action on his own behalf against "any person" (including the United States and other governmental instrumentalities and agencies) allegedly in violation of any permit, standard, regulation, condition, requirement, prohibition, or order which has become effective under the act. n692 Second, a citizen plaintiff may also commence an action against any person, including the United States and any other governmental instrumentality or agency (to the extent permitted by the Eleventh Amendment to the Constitution) or against any past or present owner, generator or transporter of solid or hazardous waste "which may present an imminent and substantial endangerment to health or environment." n693 Third, the citizen plaintiff may commence a civil action against the administrator for failure to perform a non-discretionary duty under the act. n694 The constraint

of the Eleventh Amendment on actions against governmental instrumentalities or agencies refers to the prohibition against actions against a state brought by citizens of another state or of a foreign country.

As with citizen suit provisions under other environmental legislation, it has been determined that the action may be brought only for present or ongoing violations, n695 although there is earlier authority to the contrary. n696 The statute itself also contains a major exception to this restriction in its provision permitting citizen suits against "past or present" owners, generators or transporters of solid or hazardous waste that presents endangerment to health or the environment. n697

§ 75.12(d)(1)(ii) Special Procedural Considerations.

Clearly the citizen suit provisions amount to a waiver of sovereign immunity by the United States. A plaintiff is authorized to bring suit against the United States if the federal government has violated the provisions of the act, or has been involved with waste that may present a danger to health or the environment, and also against the administrator if that official has failed to perform a non-discretionary act or duty under the act. It has been held that this waiver of sovereign immunity extends to civil claims under the Resource Conservation and Recovery Act, n698 but not with respect to the imposition of civil penalties against federal facilities. n699

Jurisdiction in citizen suits under this act rests with the federal district courts, "without regard to the amount in controversy or the citizenship of the parties." n700 Venue for such an action is appropriate in either the district where the violation occurs or where the endangerment occurs. If the action is one brought against the administrator for failure to perform a non-discretionary duty, it may be brought either in the district where the "violation," i.e., the failure to perform a required act or duty, occurred, or in the District Court for the District of Columbia. n701 Where venue is appropriate in more than one district, consolidation of actions with venue in different jurisdictions would be appropriate to avoid conflicting and duplicative litigation. n702

No limitation of actions is specified in the citizen suit provisions of the Resource Conservation and Recovery Act. Actions for violations completely in the past would be time based, if only ongoing or intermittent present violations may be the basis for an action against a violator or an administrator. n703 However, as has been mentioned with respect to the other environmental citizen suit provisions in this section, when a federal act contains no limitations provision, the court should apply an appropriate state statute of limitations or a relevant federal limitations statute. The general federal five-year limitations period n704 has been held relevant and applicable to citizen suits under the Clean Water Act n705 and is presumably also applicable to actions under the Solid Waste Disposal Act.

As with the citizen suit provisions in other environmental regulation statutes, a notice of violation followed by a 60-day waiting period must usually precede the action. Indeed, the U.S. Supreme Court has held that the notice requirement under this act *is* jurisdictional. n706 Under this act, before commencing an action for violations, a 60-day notice of the violation must be given to the administrator, n707 to the state in which the alleged violation occurs, n708 and to the alleged violator. n709 Even if the alleged violator signals an intent to do nothing to correct the alleged violation during the 60-day period, the waiting period must still be observed. n710 If the alleged violation relates to the provisions regarding hazardous waste management, n711 the action may be commenced any time after the notice is given, without the 60-day waiting period. n712

Although the notice requirement must be fulfilled before the court can proceed with the case, n713 courts have been fairly flexible as to the required contents of the notice. n714

If the proposed action relates not to a violation (an action brought under §6972(a)(1)(A)) but to the generation or management of any solid or hazardous waste that may endanger health or environment (an action brought under §6972(a)(1)(B)), a 90-day notice must be given to the administrator, the state allegedly endangered and the person whose conduct is the object of the complaint. n715 In neither case may an action be commenced if the administrator or

the state has commenced and is diligently prosecuting a civil or criminal action in federal or state court to address the problem that is the object of the proposed citizen suit. n716 Also, with respect to hazardous waste situations that may endanger health or environment, no citizen suit may be commenced, if the administrator or the state is pursuing remedies under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), n717 and only a state or local government can commence an action "with respect to the siting of a hazardous waste treatment, storage, or a disposal facility. n718

If a citizen plaintiff seeks to bring a civil action with respect to waste management practices that may present danger to health or the environment, n719 and the citizen suit is not permitted because an action by the public authority has already been commenced, the prospective citizen plaintiff may nevertheless intervene as a matter of right in the pending proceeding, n720 if it can be shown that intervention can protect an interest of the intervenor related to the subject matter of the action. n721 A similar but broader right rests in the administrator, who can intervene as a matter of right in any citizen suit, if the administrator is not already a party. n722

If the plaintiff is able to commence an action against a party whose involvement with solid or hazardous waste presents endangerment to health or the environment, n723 then copies of the complaint must be served on the attorney general and the administrator. n724

§ 75.12(d)(1)(iii) Proper Plaintiffs.

"Any person" may commence a citizen suit, but "person" is not defined in the statute. However, based on the interpretation of the term as used in similar, related environmental statutes, plaintiffs must be persons having an interest which is or may be adversely affected. n725 As was stated in the context of the Clean Water Act, to show an adversely affected interest plaintiffs must have suffered some injury in order to have standing to sue; however, that includes persons whose injuries are non-economic but who have standing under the holding of Sierra Club v. Morton, n726 as well as those who have suffered actual economic injury. n727

§ 75.12(d)(1)(iv) Proper Defendants.

As is the case under the citizen suit provisions in other environmental statutes, the possible defendants include parties who are violating the pertinent laws and regulations as well as the administrators and agencies responsible for enforcing those laws and regulations. It has been held that, because of similarity in citizen suit provisions, potential defendants under this act should be the same as under CERCLA n728 These provisions are also powerful enough to reach beyond some traditional barriers, so that even an Indian tribe operating a solid waste disposal facility on a reservation is a potential defendant. n729

§ 75.12(d)(1)(v) Remedies.

The court in a citizen suit has jurisdiction to order injunctive relief and impose civil penalties, but not to grant compensatory damages to the private plaintiff:

> The district court shall have jurisdiction ... to enforce the permit, standard, regulation, condition, requirement, prohibition, or order, referred to paragraph (1)(A), to restrain any person who has contributed or who is contributing to the past or present handling, storage, treatment, transportation, or disposal of any solid or hazardous waste referred to in paragraph (1)(B), to order such person to take such other action as may be necessary, or both, or to order the Administrator to perform the act or duty referred to in paragraph (2), as the case may be, and to apply appropriate civil penalties under §6928(a) and (g) of this title. n730

§ 75.12(d)(2) Actions for Review of Administrator's Actions.

Private citizens have statutory authority to commence an action for the purpose of subjecting to review the administrator's actions or failure to act. First, "any person may petition the Administrator for the promulgation, amendment, or repeal of any regulation under this chapter." n731 Second, a party may seek review of the Administrator's actions "in promulgating any regulation or requirement ... or denying any petition for promulgation." n732 Third, any interested person may seek judicial review of the administrator's action in issuing, denying, modifying or revoking permits or other authorizations under the act. n733

§ 75.12(d)(3) Costs and Attorney's Fees.

The court "may award costs of litigation (including reasonable attorney and expert witness fees) to the prevailing or substantially prevailing party, whenever the court determines such an award is appropriate." n734 This provision, introduced by amendment in 1984, is a more precise and restrictive approach to attorney fees than the original provision, which empowered the court to award these costs of litigation "whenever the court determines the award is appropriate."

§ 75.12(e) Summary of the Comparable Citizen Suit Provisions of Major Environmental Laws.

The provisions for citizen suits in the major federal environmental laws are so ostensibly similar that it may be questioned whether there are any *significant* differences between them. There are in fact some differences, although they are not major, and the approach of the acts remains substantially identical. Each confers on a plaintiff with standing the right to sue individual violators as well as the government officials responsible for control of the violations. Relief available in suits against the violators is in each case injunctive, with private compensatory damages available only through some other statutory or common law action, which remedies are preserved by the citizen suit laws.

Citizen suits are generally prohibited unless and until a 60-day notice is first given to the violator; if a responsible administrator has already commenced an action against the violator, the citizen plaintiff may not commence an independent action, but has a right to intervene in the administrator's action. Costs and attorney's fees may be recovered in citizen suits.

Among the differences to be found in these essentially similar statutes are:

1. The plaintiff may be denominated as "any person" or "any citizen." The difference may not be meaningful if "citizen" is then defined as any person whose interests are adversely affected by the alleged violations. In any event, the plaintiff in a citizen suit is often a public interest organization whose first hurdle, whether as citizen or person, is to establish standing.

2. The citizen suit provisions generally authorize a private action to review the action of the pertinent administrator. A civil action by the governor of a state may also be authorized, such as under the Clean Water Act. 3. Some acts enable a court to award recovery of costs and attorney's fees "as appropriate" (according to the court's discretion); other acts require costs and attorney's fees to be awarded only to the "prevailing" or the "substantially prevailing" party.

4. All of the acts contain language preserving rights of action under other statutes and under common law, but the terminology differs according to environmental area being regulated and interpretive court decisions under each act may vary in which rights of action are preserved. For instance, a citizen's clean water action under the federal common law of nuisance has been held pre-empted by the federal legislation.

5. Slight differences may appear in the wording of provisions requiring the 60-day notice, or preventing commencement of an action if an administrator or state action is already pending, or waiving the post-notice waiting period for certain violations.

6. Although service of a copy of the complaint on the attorney general and the appropriate administrator is sometimes not required, an environmental law may include a provision, for the protection of federal interests, that the citizen plaintiff serve a copy of the complaint on the attorney general and the appropriate administrator. A companion provision may require prior notice to the attorney general of any proposed consent judgment.

7. Each act contains some definition of key terms unique to its particular area of the environment.

8. The action which a citizen suit plaintiff may commence against government officials for failure to perform non-discretionary duties may simply name the administrator as potential defendant or may, as in CERCLA, name the "President or any other office of the United States."

9. The act may specify proper venue for an action against the administrator, or it may not, in which case normal federal venue rules apply.

§ 75.12(f) Sources of Citizen Suit Provisions in Federal Environmental Statutes.

Clean Air Act: *42 U.S.C. §7604.*

Clean Water Act: *33 U.S.C. §1365.*

Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA): *42 U.S.C. §9601 et seq*.

Deepwater Port Act: *33 U.S.C. §1515.*

Endangered Species Act: *16 U.S.C. §1504*(g).

Noise Control Act: *42 U.S.C. §4911.*

Ocean Dumping Act: *33 U.S.C. §1415*(g).

Outer Continental Shelf Land Act: *43 U.S.C. §1349.*

Safe Drinking Water Act: *42 U.S.C. §300j-8.*

Solid Waste Disposal Act: *42 U.S.C. §6972.*

Surface Mining Control and Reclamation Act: *30 U.S.C. §1270.*

Toxic Substances Control Act: *15 U.S.C. §2619.*

FOOTNOTES:

(n1)Footnote 562. Private nuisance actions are discussed in ch. 67, *supra*. *Presque Isle Harbor Dev. Co. v. Dow Chem. Co., 875 F. Supp. 1312 (W.D. Mich. 1995)* (possible common law action for environmental contamination under state law).

Supp. 902 (W.D. Pa. 1980), aff'd, 644 F.2d 995 (3d Cir. 1981); Biederman v. Scharbarth, 483 F. Supp. 809 (E.D. Wis. 1980); Save Our Sound Fisheries Ass'n v. Callaway, 429 F. Supp. 1136 (D.R.I. 1977).*

(n29)Footnote 590. *33 U.S.C. §1365*(e).

(n30)Footnote 591. *Natural Resources Defense Council v. Train, 510 F.2d 692 (D.C. Cir. 1974); Environmental Defense Fund v. Alexander, 501 F. Supp. 742 (N.D. Miss. 1980); Evansville v. Kentucky Liquid Recycling, Inc. 604 F.2d 1008* (7th Cir.), *cert. denied, 444 U.S. 1025 (1979); Long Beach Twp. v. City of New York, 445 F. Supp. 1203 (D. N.J. 1978).*

(n31)Footnote 592. *33 U.S.C. §1365*(b)(1)(B); *Knee Deep Cattle Co. v. Bindana Inv. Co., 94 F.3d 514 (9th Cir. 1996)* (citizen suit allowed because the state was not diligently prosecuting action), *cert. dismissed, 117 S. Ct. 1027 (1997); Old Timer, Inc. v. Blackhawk-Central City Sanitation Dist., 51 F. Supp. 2d 1109 (D. Colo. 1999)* (The Clean Water Act bars commencement of citizen suits if a State is seeking an administrative penalty. However, the court is not retroactively stripped of its jurisdiction if a State seeks an administrative penalty after a citizen suit was commenced).

(n32)Footnote 593. *33 U.S.C. §1365*(b)(2); *Community Ass'n for Restoration of the Env't v. Henry Bosma Dairy, 65 F. Supp. 2d 1129 (E.D. Wash. 1999)* (One of the main reasons for the 60-day notice requirement is to allow the alleged violator time to comply with the Clean Water Act and thus eliminate the need for the suit).

(n33)Footnote 594. *33 U.S.C. §1316.*

(n34)Footnote 595. *33 U.S.C. §1317*(a).

(n35)Footnote 596. *Connecticut Fund for the Env't v. Job Plating Co., 623 F. Supp. 207 (D. Conn. 1985).*

(n36)Footnote 597. 40 C.F.R. §§135.1, 135.2.

(n37)Footnote 598. 40 C.F.R. §135.3(a).

(n38)Footnote 599. 40 C.F.R. §135.3(c).

(n39)Footnote 600. 40 C.F.R. §135.3(b).

(n40)Footnote 601. *Protect Our Eagles' Trees (POETs) v. City of Lawrence, Kansas, 715 F. Supp. 996 (D. Kan. 1989).*

(n41)Footnote 602. *Comite Pro Rescate De La Salud v. Puerto Rico Aqueduct & Sewer Auth., 693 F. Supp. 1234 (D.P.R. 1988); National Wildlife Fed'n v. Consumers Power Co., 657 F. Supp. 989 (W.D. Mich. 1987), rev'd on other grounds, 862 F.2d 580 (6th Cir. 1988).*

(n42)Footnote 603. *Student Pub. Interest Research Group of N.J., Inc. v. A.T. & T. Bell Labs., 617 F. Supp. 1190 (D.N.J. 1985).*

(n43)Footnote 604. *Chesapeake Bay Found., Inc. v. Bethlehem Steel Corp., 652 F. Supp. 620 (D. Md. 1987).*

(n44)Footnote 605. *33 U.S.C. §1365*(c)(3).

(n45)Footnote 606. *33 U.S.C. §1365*(c)(3)

(n46)Footnote 607. *33 U.S.C. §1365*(a).

(n47)Footnote 608. *33 U.S.C. §1365*(g); *Friends of the Earth, Incorporated v. Laidlaw Environmental Services (TOC), Inc., 528 U.S. 167 (2000)* (plaintiff groups had standing to bring citizen suit).

(n48)Footnote 609. *405 U.S. 727 (1972).* Under *Sierra Club*, standing exists if it can be shown that the plaintiff is within the class of persons intended to be protected by the statute and has been actually aggrieved by the administrative action or inaction. This latter criterion means the plaintiff must show some special interest in the area subject to the administrative action.

(n49)Footnote 610. *Middlesex County Sewerage Auth. v. National Sea Clammers Ass'n, 453 U.S. 1 (1981); Puerto Rico Campers' Association v. Puerto Rico Aqueduct and Sewer Authority, 219 F. Supp. 2d 201 (D. P. R. 2002)* (the association met the requirements for associational standing); *Association to Protect Hammersley, ELD, and Totten Inlets v. Taylor Resources, Inc., 299 F.3d 1007 (9th Cir. 2002)* (organization had standing to bring citizen's suit); *Maine People's Alliance v. Holtrachem Manufacturing Company, LLC, 211 F. Supp. 2d 237 (D. Maine 2002)* (organization had standing to bring citizen suit unter RCRA).

(n50)Footnote 611. *42 U.S.C. §1983.*

(n51)Footnote 612. *Chesapeake Bay Found., Inc. v. American Recovery Co., Inc., 769 F.2d 207 (4th Cir. 1985); Friends of the Earth v. Consolidated Rail Corp., 768 F.2d 57 (2d Cir. 1985); Atlantic States Legal Found. v. A1 Tech Specialty Steel Corp., 635 F. Supp. 284 (N.D.N.Y. 1986); Student Pub. Interest Research Group of N.J., Inc. v. A.T. & T. Bell Labs., 617 F. Supp. 1190 (D.N.J. 1985); Student Pub. Interest Research Group of N.J., Inc. v. Georgia-Pacific Corp., 615 F. Supp. 1419 (D.N.J. 1985); Friends of the Earth, Inc. v. Crown Central Petroleum Corp., 95 F.3d 358 (5th Cir. 1996)* (an organization whose members birdwatch and fish at a lake 18 miles from the source of the unlawful water pollution failed to meet the fairly traceable component of the standing doctrine to sue); *Friends of Earth, Inc. v. Gaston Copper Recycling Corp., 9 F. Supp. 2d 589 (D. S.C. 1998)* (The Clean Water Act that allows for a citizen suit by

anyone who "may be adversely affected" is limited by the injury prong of the Constitutional standing test).*The Piney Run Preservation Association v. County Commissioners of Carroll County, Maryland, 82 F. Supp. 2d 464 (D. Md. 2000)* (members of the plaintiff group living in the vicinity of a polluted stream suffered particularized injury for standing purposes).

(n52)Footnote 613. Holding that a state may bring a citizen suit: *Commonwealth of Mass. v. United States Vet. Admin., 541 F.2d 119 (1st Cir. 1976); People v. State of Ill. ex rel. Scott v. Hoffman, 425 F. Supp. 71 (S.D. Ill. 1977).* Holding that a state may not bring a citizen suit: *California v. Department of the Navy, 631 F. Supp. 584 (N.D. Cal. 1986), aff'd, 845 F.2d 222 (9th Cir. 1988).*

(n53)Footnote 614. *33 U.S.C. §1365*(b)(1)(B); *Solid Waste Agency of Northern Cook County v. United States Army Corps of Eng'rs, 101 F.3d 503 (7th Cir. 1996)* (village and citizens group allowed to intervene because outcome of action could sufficiently impair interests to support intervention as of right).

(n54)Footnote 615. *Friends of the Earth v. Consolidated Rail Corp., 768 F.2d 57 (2d Cir. 1985).*

(n55)Footnote 616. *Student Pub. Interest Research Group v. Fritzsche, Dodge & Olcott, 759 F.2d 1131 (3d Cir. 1985).*

Annotation, *What Are "Necessary Costs of Response" Within Meaning of 107(a)(4)(b) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.S. at 9607(a)(4)(B)), 113 A.L.R. Fed. 1.*

Annotations Organized by Act

The annotations listed below have been arranged according to the environmental act referred to in their respective titles.

Clean Air Act Annotations

Annotation, *Application of Air Quality Modeling to Decisionmaking Under Clean Air Act (42 U.S.C.A. §§7401-7626), 84 A.L.R. Fed. 710.*

Annotation, *Application of §165 of Clean Air Act (42 U.S.C.A. §7475), Pertaining to Preconstruction Requirements for Prevention of Significant Deterioration, To Particular Emission Sources, 86 A.L.R. Fed. 255.*

Annotation, *Award of Costs and Attorney's Fees in Judicial Review of Administrative Proceedings Under §307(F) of Clean Air Act (42 U.S.C.A. §7607(F)), 146 A.L.R. Fed. 531.*

Annotation, *Clean Air Act Implementation Plans for Nonattainment Areas, 90 A.L.R. Fed. 481.*

Annotation, *Construction and Application of 42 U.S.C.A. §7604 (D) Pertaining to Recovering Costs of Litigation in Suits Under Clean Air Act, 85 A.L.R. Fed. 118.*

Annotation, *Construction and Application of Preemption Sections (§§208, 210(C)(4)) of Clean Air Act (42 U.S.C.A. §§1875F-6A, 1857F-6(c)(4)), 18 A.L.R. Fed. 971.*

Annotation, *Construction and Application of §307(B)(1) of Clean Air Act (42 U.S.C.A. §7607(B)(1) Pertaining to Judicial Review by Courts of Appeals, 86 A.L.R. Fed. 604.*

Annotation, *Control of Interstate Pollution Under Clean Air Act as Amended in 1977 (42 U.S.C.A. §§7401-7626), 82 A.L.R. Fed. 316.*

Annotation, *Decisions of Environmental Protection Agency (EPA) Approving or Disapproving State Implementation Plans As Interfering With Primary Role of States To Determine How National Ambient Air Quality Standards Should Be Met Under Clean Air Act (42 U.S.C.A. §§7401 et seq)., 151 A.L.R. Fed. 495.*

Annotation, *Environmental Protection Agency's Classifications of Air Quality Control Regions Under §107(D)(2) of Clean Air Act (42 U.S.C.A. §7407(D)(2)), 75 A.L.R. Fed. 328.*

Annotation, *Federal Requirements for Public Participation in Adoption, Submission, and Approval of State Implementation Plans and Revisions Pursuant to §110 of Clean Air Act (42 U.S.C.A. §7410), 151 A.L.R. Fed. 445.*

Annotation, *Orders or Penalties Against State or Its Officials For Failure to Comply With Regulations Directing State to Regulate Pollution-Creating Activities of Private Parties, Under §113 of Clean Air Act (42 U.S.C.A. §1857C-8), 31 A.L.R. Fed. 79.*

Annotation, *Preemption, by Provisions of Clean Air Act (42 U.S.C.A. §§7401 et seq)., of Federal Common Law of Nuisance in Area of Air Pollution, 61 A.L.R. Fed. 859.*

Annotation, *Private Contractor as "Authorized Representative" of Administrator of Environmental Protection Agency for Purpose of Inspections Conducted Under §114 of Clean Air Act (42 U.S.C.A. §7414), 72 A.L.R. Fed. 176.*

Annotation, *Standing of Air Pollution Source to Challenge Clean Air Act (42 U.S.C.A. §§7401-7626) or Its Implementation, 85 A.L.R. Fed. 515.*

Annotation, *What Are "Land-Use and Transportation Controls" Which May Be Imposed, Under §110(A)(2)(B) of Clean Air Act of 1970 (42 U.S.C.A. §1875C-5(A)(2)(B)), to Insure Maintenance of National Primary Ambient Air Quality Standards, 30 A.L.R. Fed. 156.*

Annotation, *What Constitutes Modification of Stationary Source, Under §111(A)(3), (4) of Clean Air Act (42 U.S.C.A. §7411(A)(3), (4)), so as to Subject Source to Environmental Protection Agency's New Source Performance Standards, 94 A.L.R. Fed. 750.*

CERCLA Annotations

Annotation, *Application of Requirement in §107(A) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9607(A)) That Private Cost-Recovery Actions Be Consistent With National Contingency Plan, 107 A.L.R. Fed. 562.*

Annotation, *Application of Statutes of Limitations (42 U.S.C.A. §9613(G)) in Action Under §113(F) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9613(F)) for Contribution for Response Costs or Damages, 143 A.L.R. Fed. 591.*

Annotation, *Application of Statutes of Limitations (42 U.S.C.A. §9613(G)) in Action Under §113(F) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9613(F)) for Contribution for Removal or Remedial Action, 142 A.L.R. Fed. 115.*

Annotation, *Arranger Liability of Sellers Pursuant to §107(A)(3) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9607 (A)(3)), 125 A.L.R. Fed. 315.*

Annotation, *Arranger Liability of State Government Under §107(A) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9607(A)), 130 A.L.R. Fed. 431.*

Annotation, *Arranger Liability of Nongenerators Pursuant to §107(A)(3) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9607(A)(3)), 132 A.L.R. Fed. 77.*

Annotation, *Construction and Application of Statute of Limitations (42 U.S.C.A. §9613(G)(1)) for Action Under §107 of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9607), 144 A.L.R. Fed. 285.*

Annotation, *Determination Whether Substance Is "Hazardous Substance" Within Meaning of §101 (14) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9601(14)), 118 A.L.R. Fed. 293.*

Annotation, *Equitable Allocation of Response Costs in Contribution Action Under §113(f) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), 42 U.S.C.A. §9613(F): Factors Affecting Response Cost Liability of Generator, Broker or Arranger, and Transporter in Single, 146 A.L.R. Fed. 363.*

Annotation, *Equitable Considerations in Allocating Response Costs to Owner or Occupant of Previously Contaminated Facility in Action Pursuant to §113(F) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9613(F), 148 A.L.R. Fed. 203.*

Annotation, *Establishing "Release or Threatened Release" of Hazardous Substance From Facility for Purposes of Liability Pursuant to §107 of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9607), 120 A.L.R. Fed. 1.*

Annotation, *Government Recovery of Cost of Hazardous Waste Removal Under Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §§9601 et. seq)., 70 A.L.R. Fed. 329.*

Annotation, *Indemnification or Release Agreement As Covering Liability Under §107(A) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9607(A)), 139 A.L.R. Fed. 123.*

Annotation, *Liability of Dissolved Corporation or Corporation That Forfeited Charter in Action Pursuant to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §§9601-9675), 123 A.L.R. Fed. 461.*

Annotation, *Liability of Federal Government Under §107(A) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9607*(A)), *127 A.L.R. Fed. 511.*

Annotation, *Liability of Individual Shareholder, or Director of Corporation That Owned Contaminating Facility in Action Pursuant to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §§9601-9675), 122 A.L.R. Fed. 321.*

Annotation, *Liability of Generators Pursuant to §107(A)(3) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9607(A)(3)), 126 A.L.R. Fed. 265.*

Annotation, *Liability of Local Government Under §107(A) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9607(A)), 133 A.L.R. Fed. 293.*

Annotation, *Liability of Parent or Successor Corporation, or Corporate Shareholders, in Action Pursuant to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §§9601-9675), 121 A.L.R. Fed. 173.*

Annotation, *Private Entity's Status as Owner or Operator Under §107 (A) (1,2) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9607(A)(1,2)), 140 A.L.R. Fed. 181.*

Annotation, *Secured Lender Liability: Application of Security Interest Exemption From Definition of "Owner or Operator" Under §101(20)(A) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9601*(20)(A)), *131 A.L.R. Fed. 293.*

Annotation, *Third-Party Defense To Liability Under §107 of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9607), 105 A.L.R. Fed. 21.*

Annotation, *Transporter Liability Under §107(A)(4) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9607(A)(4)), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. 112* A.L.R. Fed. 49.

Annotation, *Validity and Construction of §106(A) and (B)(1) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9606(A) and (B)(1), Authorizing Equitable Abatement Actions and Administrative Orders and Prescribing Fines for Noncompliance With Such Orders, 87 A.L.R. Fed. 217.*

Annotation, *What Claims Fall Within Limitation Imposed by §113(H) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9631(H)) on Judicial Review of Cases Arising Under CERCLA, 116 A.L.R. Fed. 1.*

Annotation, *What Constitutes "Disposal" for Purposes of Owner or Operator Liability Under §107(A)(2) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9607(A)(2)), 136 A.L.R. Fed. 117.*

Annotation, *What Constitutes "Facility" Within Meaning of §101(9) of the Comprehensive, Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. §9601(9)), 146 A.L.R. Fed. 469.*

Federal Insecticide, Fungicide, and Rodenticide Act Annotation

Annotation, *What Constitutes Use of Pesticide in Manner Inconsistent With Its Labeling, so as to Violate §12(A)(2)(G) of Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C.A. §136J(A)(2)(G)), 69 A.L.R. Fed. 835.*

Federal Water Pollution Control Act Annotations

Annotation, *Citizen's Action Under 33 U.S.C.A. §1365(A)(1) for Violation of Effluent Standards or Limitations Under Federal Water Pollution Control Act (33 U.S.C.A. §§1251 et. seq). or Orders With Respect Thereto, 68 A.L.R. Fed. 701.*

Annotation, *Availability of Court of Appeals Review, Under §509(B)(1)(E) of Federal Water Pollution Control Act (33 U.S.C.A. §1369(B)(1)(E)), of Action By Administrator of Environmental Protection Agency in Approving or Promulgating Effluent and Other Limitations, 62 A.L.R. Fed. 906.*

Annotation, *Citizen's Action Against Administrator of Environmental Protection Agency to Compel Performance of Nondiscretionary Duty Under §505(A)(2) of Federal Water Pollution Control Act (33 U.S.C.A. §1365(A)(2)), 57 A.L.R. Fed. 851.*

Annotation, *Construction and Application of Provision of Federal Water Pollution Control Act (33 U.S.C.A. §1321(B)(5) and Similar Predecessor, Formerly Designated as 33 U.S.C.A. §1161(B)(4) Requiring Person in Charge of Vessel, or Onshore or Offshore Facility, to Notify Federal Agency of Prohibited..., 17 A.L.R. Fed. 804.*

Annotation, *Construction of "Transacts Such Business" For Purposes of §509(B)(1) of the Federal Water Pollution Control Act (33 U.S.C.A. §1369(B)(1)) Which Authorizes Judicial Review of Action By Administrator of Environmental Protection Agency, 50 A.L.R. Fed. 887.*

Annotation, *Criminal Proceedings, Under §309(C)(1,3) of the Federal Water Pollution Control Act (33 U.S.C.A. §1319(C)(1,3)), Based on Violation of §301(A) of the Act (33 U.S.C.A. §1311(A)), Prohibiting Discharge of Pollutants Without a Permit, 53 A.L.R. Fed. 481.*

Annotation, *Direct Review By Federal Courts of Appeals of Action By Administrator of Environmental Protection Agency Not Specifically Enumerated in §508(B)(1) of the Federal Water Pollution Control Act (33 U.S.C.A. §1369(B)(1)), Which Authorizes Direct Review of Specified Actions Taken by the..., 56 A.L.R. Fed. 918.*

Annotation, *Liability, Under §311(B)(6) of Federal Water Pollution Control Act (33 U.S.C.A. §1321(B)(6)), of Owner, Operator, or Person in Charge of Onshore or Offshore Facility, or Vessel, for Discharge of Oil or Hazardous Substance, 55 A.L.R. Fed. 141.*

Annotation, *Liability, Under §311(F,G) of Federal Water Pollution Control Act (33 U.S.C.A. §1321(F,G)), to United States of Owner or Operator of Onshore or Offshore Facility or Vessel, for Discharge of Oil or Hazardous Substance, 56 A.L.R. Fed. 343.*

Annotation, *Liability, Under §311(I) of Federal Water Pollution Control Act (33 U.S.C.A. §1321(I)), of United States to Owner or Operator of Onshore or Offshore Facility, or Vessel, for Removal Costs of Oil or Hazardous Substance, 59 A.L.R. Fed. 282.*

Annotation, *What Are "Navigable Waters" Subject to the Provisions of the Federal Water Pollution Control Act, as Amended (33 U.S.C.A. §1251 et. seq), 52 A.L.R. Fed. 788.*

Annotation, *What Constitutes Discharge of Dredged or Fill Material Into Navigable Waters, so as to Subject to Permit Requirements under §404(A) of Federal Water Pollution Control Act (33 U.S.C.A. §1344(A)), 72 A.L.R. Fed. 703.*

Annotation, *What Constitutes "Issuing or Denying" Permit for Discharge of Pollutants Within Meaning Of §509(b)(1)(f) of the Federal Water Pollution Control Act (33 U.S.C.A. §1369(B)(1)(F)) Which Authorizes Judicial Review of Such Action by Administrator of Environmental Protection Agency, 67 A.L.R. Fed. 365.*

NEPA Annotations

Annotation, *Affirmative Defenses in Actions Challenging Omission or Adequacy of Environmental Impact Statement Required by §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), 63 A.L.R. Fed. 18.*

Annotation, *Construction and Application of §§101-1-5 of National Environmental Policy Act of 1969 (42 U.S.C.A. §§4331-4335) Requiring All Federal Agencies to Consider Environmental Factors in Their Planning and Decisionmaking, 17 A.L.R. Fed. 33.*

Annotation, *Environmental and Conservation Group's Standing to Challenge Omission or Adequacy of Environmental Impact Statement Required by §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), 63 A.L.R. Fed. 337.*

Annotation, *General Principles Governing Standing to Maintain Action Challenging Omission or Adequacy of Environmental Impact Statement Required by §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), 61 A.L.R. Fed. 87.*

Annotation, *Governmental Entity's Standing to Challenge Omission or Adequacy of Environmental Impact Statement Required by §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), 64 A.L.R. Fed. 521.*

Annotation, *Necessity and Sufficiency of Environmental Impact Statements Under §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), in Cases Involving Defense, Military, and Related Projects, 75 A.L.R. Fed. 119.*

Annotation, *Necessity and Sufficiency of Environmental Impact Statements Under §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), in Cases Involving Herbicide, Pesticide, and Related Projects, 74 A.L.R. Fed. 702.*

Annotation, *Necessity and Sufficiency of Environmental Impact Statements Under §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), in Cases Involving Highway Projects, 64 A.L.R. Fed. 15.*

Annotation, *Necessity and Sufficiency of Environmental Impact Statements Under §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), in Cases Involving Housing and Urban Renewal Projects, 65 A.L.R. Fed. 121.*

Annotation, *Necessity and Sufficiency of Environmental Impact Statements Under §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), in Cases Involving Hunting, Fishing, and Related Projects, 74 A.L.R. Fed. 852.*

Annotation, *Necessity and Sufficiency of Environmental Impact Statements Under §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), in Cases Involving Logging, Mining, and Related Projects, 74 A.L.R. Fed. 702.*

Annotation, *Necessity and Sufficiency of Environmental Impact Statements Under §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), in Cases Involving Park, Recreational, Wilderness, and Related Projects, 75 A.L.R. Fed. 738.*

Annotation, *Necessity and Sufficiency of Environmental Impact Statements Under §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), in Cases Involving Pollution Abatement and Related Projects, 76 A.L.R. Fed. 563.*

Annotation, *Necessity and Sufficiency of Environmental Impact Statements Under §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), in Cases Involving Power Projects, 66 A.L.R. Fed. 395.*

Annotation, *Necessity and Sufficiency of Environmental Impact Statements Under §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), in Cases Involving Projects Relating to Acquisition, Construction, Alteration, or Disposition of Government Facilities, 76 A.L.R. Fed. 279.*

Annotation, *Necessity and Sufficiency of Environmental Impact Statements Under §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), in Cases Involving Regulation of Private Enterprise, 76 A.L.R. Fed. 902.*

Annotation, *Necessity and Sufficiency of Environmental Impact Statements Under §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), in Cases Involving Transportation Projects, 62 A.L.R. Fed. 664.*

Annotation, *Necessity and Sufficiency of Environmental Impact Statements Under §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), in Cases Involving Water and Waterworks Projects, 67 A.L.R. Fed. 54.*

Annotation, *Private Individual's Standing to Challenge Omission or Adequacy of Environmental Impact Statement Required by §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), 62 A.L.R. Fed. 337.*

Annotation, *Standing of Entity, Other Than Governmental or Environmental Entity, to Challenge Omission or Adequacy of Environmental Impact Statement Required by §102(2)(C) of National Environmental Policy Act of 1969 (42 U.S.C.A. §4332(2)(C)), 61 A.L.R. Fed. 657.*

Noise Control Act Annotation

Annotation, *Judicial Review Under §16 of Noise Control Act of 1972 (42 U.S.C.A. §4915) of Action of Administrator of Environmental Protection Agency, 59 A.L.R. Fed. 705.*

Oil Pollution Act Annotation

Annotation, *What Constitutes a Violation of the Prohibition, in the Oil Pollution Act of 1924 (33 U.S.C.A. §§431 et seq)., of Discharge of Oil Into Navigable Waters and Adjoining Shorelines, 2 A.L.R. Fed. 794.*

Toxic Substances Control Act Annotation

Annotation, *State or Local Regulation of Toxic Substances as Pre-Empted by Toxic Substances Control Act (15 U.S.C.A. §§2601 et. seq)., 84 A.L.R. Fed. 913.*

Endangered Species Act Annotations

Annotation, *Criminal Prosecution Under Endangered Species Act of 1973 (16 U.S.C.A. §§1531-1543), 128 A.L.R. Fed. 271.*

Annotation, *Validity, Construction, and Application of Endangered Species Act of 1973 (16 U.S.C.A. §§1531 -1543), 32 A.L.R. Fed. 332.*

Federal Land Policy and Management Act (FLPMA) Annotation

Annotation, *"Compliance With State Standards" as Requirement to Granting Right-of-Way Over Federal Public Lands Under §505(A)(IV) of the Federal Land Policy and Management Act of 1976 (43 U.S.C.A. §1765(A)(IV)), 60 A.L.R. Fed. 386.*

Outer Continental Shelf Lands Act Annotations

Annotation, *Construction and Application of §4 of Outer Continental Shelf Lands Act of 1953 (43 U.S.C.A. §1333), Relating to Laws Applicable to Subsoil and Seabed of Outer Continental Shelf and Artificial Islands and Fixed Structures Erected Thereon, 30 A.L.R. Fed. 615.*

Annotation, *Grant, Administration, and Construction, Under Outer Continental Shelf Lands Act of 1953 (43 U.S.C.A. §§1331 et seq). of Leases to Explore for Oil and Gas Deposits Under Continental Shelf, 31 A.L.R. Fed. 615.*

Resource Conservation and Recovery Act (RCRA) Annotations

Annotation, *Liability Under §7003 of Resource Conservation and Recovery Act (42 U.S.C.A. §6973) Pertaining to Imminent Hazards From Solid or Hazardous Waste, 115 A.L.R. Fed. 491.*

Annotation, *Right to Maintain Action Based on Violation of §7003 of Resource Conservation and Recovery Act (42 U.S.C.A. §6973) Pertaining to Imminent Hazards From Solid or Hazardous Waste, 105 A.L.R. Fed. 800.*

Annotation, *Right to Maintain Citizen Suit Under §7002 of Resource Conservation and Recovery Act (42 U.S.C.A. §6972), 91 A.L.R. Fed. 436.*

Annotation, *Sovereign Immunity of United States Under §6001 of Resource Conservation and Recovery Act of 1976 (42 U.S.C.A. §6961) With Respect to Criminal Penalties or Noninjunctive Relief, 108 A.L.R. Fed. 632.*

Annotation, *What Constitutes "Hazardous Waste" Subject to Regulation Under Resource Conservation and Recovery Act (42 U.S.C.A. §§6901 et seq), 135 A.L.R. Fed. 197.*

Surface Mining Control and Reclamation Act (SMCRA) Annotations

Annotation, *Award of Attorneys' Fees Pursuant to §§520(D), 520(F), or 703(C) of Surface Mining Control and Reclamation Act of 1977 (30 U.S.C.A. §§1270(D), 1270(F), 1275(E)), 89 A.L.R. Fed. 171.*

Annotation, *Liability for Reclamation Fees Under §402 of Surface Mining Control and Reclamation Act (30 U.S.C.A. §1232), 117 A.L.R. Fed. 377.* Annotation, *Penalties Under 30 U.S.C.A. §1268 for Violating Surface Mining Control and Reclamation Act, 82 A.L.R. Fed. 218.*

Supp. To CHAPTER 75 THE IMPACT OF ENVIRONMENTAL REGULATION ON REAL PROPERTY

8-75 Thompson on Real Property, Thomas Editions Supp. to § 75.03

Supp. to § 75.03 Summary of Federal Environmental Laws That Impact Real Property

1986 Internal Revenue Code

§ 75.03(a) Legislation for Combatting Environmental Hazards [Go To Main]

§ 75.03(a)(1) Acid Precipitation Act of 1980 *(42 USC §§ 8901* to 8912).

Add serial comma after "social" in line 3, below:

(b) The Congress declares that it is the purpose of this subchapter--

(1) to identify the causes and sources of acid precipitation;

(2) to evaluate the environmental, social and economic effects of acid precipitation; and

Replace the word subtitle with subchapter in §§ (b)(3) and (c)

(b) The Congress declares that it is the purpose of this subchapter-- ... .

(3) based on the results of the research program established by this **subchapter** (not subtitle) and to the extent consistent ... .

(c) For purposes of this **subchapter** (not subtitle) the term "acid precipitation" means the wet or dry deposition from the atmosphere of acid chemical compounds.

§ 75.03(a)(2) Act to Prevent Pollution from Ships *(33 U.S.C. §§ 1901* to 1912).

Add:

United States v. Abrogar, 459 F.3d 430 (2006) (the Act to Prevent Pollution from Ships did not make foreign vessels liable for actions committed outside the boundaries of U.S. waters).

§ 75.03(a)(5) Clean Air Act *(42 USC §§ 7401* to 7642).

In the heading, as written above, change sections from "§§ 7401 to 7642" to "§§ 7401 to 7671."

§ 75.03(a)(6) Clean Vessel Act of 1992 *(33 U.S.C. § 1322* note).

Change to read as follows:

United States v. West Indies Transport, Inc., 127 F.3d 299 (3d Cir. 1997) (The barge where the defendants housed workers was not a "vessel" as defined by the Clean Vessel Act of 1992, because the barge was permanently moored to the shore and partially submerged, making it incapable of being used for transport. Therefore, the Clean Vessel Act of 1992 did not apply, and the defendants were properly convicted of discharging sewage as a point of source polluter under the Clean Water Act).

§ 75.03(a)(7) Clean Water Act of 1977.

In the last line, change "§ 75.03(1)(15)" to "§ 75.03(a)(14)".

§ 75.03(a)(8) Community Environmental Response Facilitation Act *(42 U.S.C. § 9620* note).

Add:

In *Jessco Corp. v. Chrysler Corp., 829 F. Supp. 224, 227-28 (W.D. Mich. 1993)* (government agencies can be held liable for cleanup costs under the Community Environmental Response Facilitation Act only if the facility is currently owned or operated by that agency.

§ 75.03(a)(10) Emergency Planning and Community Right to Know Act of 1986 *(42 U.S.C. §§ 11001* to 11050).

The text for this section should read as follows:

Originally part of the Superfund Amendments and Reauthorization Act of 1986 (SARA), the Emergency Planning and Community Right to know act of 1986 (EPCRA) has emerged as an important free standing law designed to help communities protect themselves from the harms of chemical pollutants. The EPCRA does this by requiring state and local communities to plan for emergencies involving chemical hazards. Each state is required to form a State

Emergency Response Commission (SERC), which is responsible for dividing the state into emergency districts, and appointing a Local Emergency Planning Committee (LERC) to oversee each district. Each LERC must devise a comprehensive emergency plan for their district, which is to be reviewed and updated every year. In addition to a planning element, the EPCRA also contains a reporting requirement.

Any facility that uses, stores, transfers, or releases a hazardous chemical is required to report this to the LERC within which it resides. The reporting requirements are different depending on the amount and hazardous nature of the substance being used. In addition, any accidental spills or discharges of any of these substances must be reported. This reporting element is designed to make communities more aware of the potential hazards they face, as well as give them an opportunity to avoid unnecessary harm in the future. FN 12

Footnote 12 should read as follows:

H.R. Rep. No. 253(I), 99th Cong., 2d Sess., at 44 (1986) . *Steel Co. v. Citizens for a Better Environment, 523 U.S. 83 (U.S. 1998)* (The community group brought an action under the EPCRA for failure to file a required report. The Supreme Court dismissed the action because the citizen's group did not meet the redressability requirement for standing).

§ 75.03(a)(11) Environmental Quality Improvement Act of 1970 *(42 USC §§ 4371* to 4375).

In the last line, change "provisions" to "provision"

§ 75.03(a)(13) Federal Insecticide, Fungicide, and Rodenticide Act *(7 U.S.C. §§ 136* to 136y).

The heading should read as follows:

§ 75.03(a)(13) Federal Insecticide, Fungicide, and Rodenticide Act (*7 U.S.C. §§ 136 to 136y*) a.k.a. the Pesticide Registration Improvement Act of 2003.

§ 75.03(a)(14) Federal Water Pollution Control Act *(33 U.S.C. §§ 1251* to 1387).

The section heading should read:

§ 75.03(a)(14) Federal Water Pollution Control Act (1986 Internal Revenue Code) a.k.a. The Clean Water Act of 1977.

§ 75.03(a)(15) Federal Water Pollution Control Act *(33 USC §§ 1251* to 1387).

Change note 18 to read:

See *42 U.S.C. § 4852(d)*

§ 75.03(a)(18) Medical Waste Tracking Act of 1988 *(42 U.S.C. §§ 6992* to 6992k).

In section (a)(7) replace the word "act" with the word "chapter."

Add:

This act was intended to last only 2 years, and consequently expired in 1991.

§ 75.03(a)(22) Noise Control Act of 1972 *(42 U.S.C. §§ 4901* to 4918).

Add:

While the Noise Control Act of 1972 remains in effect, it is essentially unfunded because the Environmental Protection Agency has transferred the primary responsibility of regulating noise to the state and local governments. U.S. Environmental Protection Agency, Noise Control Act, http://www.epa.gov/ history/topics/nca/index.htm (last visited May 10, 2007).

The case in footnote 25 (Rushing v. Kansas City) has been overruled on a point of law regarding expert testimony.

§ 75.03(a)(26) Oil Pollution Act of 1990 *(33 U.S.C. §§ 2701* to 2761).

Add:

Rice v. Harken Exploration Co., 89 F. Supp. 2d 820 (N.D. Tex., 1999) (The court held that a landowner was unable to sue an oil exploration company under the Oil Pollution Act (OPA) for damages to his land caused by an offshore oil spill because the OPA applies to damage caused to navigable channels of water, not land).

§ 75.03(a)(29) Safe Drinking Water Act *(42 U.S.C. §§ 300f* to 300j-11)

Add:

United States v. Mass. Water Res. Auth. 256 F.3d 36 (1st Cir, 2001) (There is no statute of limitations for violations of

the Safe Drinking Water Act; therefore there is no limitations period within which the government must bring an enforcement suit).

§ 75.03(a)(30) Solid Waste Disposal Act *(42 U.S.C. §§ 6901* to 6991i) a.k.a. the Land Disposal Program Flexibility Act of 1996.

The title should include the following:

See § 75.03(b)(21) Resource Conservation and Recovery Act of 1976 (*42 U.S.C. §§ 6901 to 6991i*).

§ 75.03(a)(31) Toxic Substances Control Act *(15 U.S.C. §§ 2601* to 2692).

Add:

The case, *Flue-Cured Tobacco Stabilization Corp. v. United States E.P.A., 4 F. Supp. 2d 435 (M.D.N.C. 1988)* was vacated with no subsequent treatment. *See Flue-Cured Tobacco Coop. Stabilization Corp. v. United States EPA, 313 F. 3d 852* (4*th* Cir. N.C. 2002) .

§ 75.03(b)(3) Coastal Zone Management Act of 1972 *(16 U.S.C. §§ 1451* to 1464).

Add:

Case overturned by statute. See *California v. Norton, 311 F.3d 1162 (9 Cal. App. 2002*).

§ 75.03(b)(6) Federal Land Policy and Management Act of 1976 *(43 U.S.C. §§ 1701* to 1784).

Add:

S. Utah Wilderness Alliance v. BLM, 425 F.3d 735 (10th Cir. 2005) (any holder of a legitimate right of way across federal land must consult with the appropriate federal land management agency before making improvements that would be classified as more than routine).

§ 75.03(b)(13) Mining and Mineral Resources Research Institute Act of 1984 *(30 U.S.C. §§ 1221* to 1230).

Add:

According to the text of the act, federal funding for this research ended in 1994.

§ 75.03(b)(21) Resource Conservation and Recovery Act of 1976 *(42 U.S.C. §§ 6901* to 6991i).

Add:

U.S. Dept. of Energy v. Ohio, 503 U.S. 607 (U.S. 1992) has been superseded by statute. *See Crowley Marine Servs. v. FEDNAV, Ltd., 915 F. Supp. 218 (E.D. Wash. 1995)* .

§ 75.03(b)(22) Shore Protection Act of 1988 *(33 U.S.C. §§ 2601* to 2609, 2621 to 2623).

should read as follows:

See § 75.03(a)(25), supra.

Thompson on Real Property, Thomas Editions

Copyright 2010, Matthew Bender & Company, Inc., a member of the LexisNexis Group.

Supp. To CHAPTER 75 THE IMPACT OF ENVIRONMENTAL REGULATION ON REAL PROPERTY

8-75 Thompson on Real Property, Thomas Editions Supp. to § 75.09

Supp. to § 75.09 CERCLA: Responsibility for Clean-up of Environmental Pollution

[Go To Main]

§ 75.09(a) Introduction to CERCLA [Go To Main]

Change lender/wners to lender/owners

§ 75.09(b) Overview of CERCLA [Go To Main]

First Paragraph of footnote 113 should read as follows:

Most commentators credit the media attention and public outcry at Love Canal for sowing the seeds of CERCLA. *See* Sheldon M. Novick, Donald W. Stever & Margaret G. Mellon, Law of Environmental Protection (rev. 1990); Ann M. Burkhart, *Lenders/Owners and CERCLA: Title and Liability*, 25 Harv. J. on Legis. 318, n.2 (1988); Superfund at Square One: *Promising Statutory Framework Requires Forceful EPA Implementation, 11 Envtl L. Rep. (Envtl. L. Inst.) 10101 (1981).* There is certainly enough discussion of Love Canal in the legislative history of CERCLA to support such a conclusion. *See* 126 Cong. Rec. 26, 39-51 (1980).

Second Paragraph of footnote 117 should read as follows:

The *Violet* holding was overruled by *United States v. Davis, 794 F. Supp. 67 (D.R.I. 1992)* , and is no longer accurate in the sense that equitable defenses are now not available in CERCLA cost recovery actions. *United States v. Domenic Lombardi Realty, Inc., 204 F. Supp. 2d 318 (D.R.I. 2002)* (CERCLA held constitutionally enacted according to

Congress' power to regulate interstate commerce).

Footnote 120 should read as follows:

See CERCLA § 101(14), *42 U.S.C. § 9601(14)*. Annotation, *Determination Whether Substance Is "Hazardous Substance" Within Meaning of Sec. 101(14) of Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) (42 U.S.C.A. § 9601(14)), 118 A.L.R. Fed. 293 (1994)* .

§ 75.09(b)(1) Determining What is a Hazardous Substance

Add:

Arkema, Inc. v. Asarco, Inc. 2007 U.S. Dist. LEXIS 25985 (W.D. Wa., 2007) (Summary judgment was improper in case where it was not yet determined whether wood containing a hazardous substance was considered "hazardous substance" according to CERCLA).

Add:

Cariddi v. Consol. Aluminum Corp., 2007 U.S. Dist. LEXIS 19959 (D. Mass. 2007) (CERCLA claims were dismissed because the discharge fell within the exception for petroleum contained in CERCLA; however, the state law claims remained because the discharge was waste oil, which was expressly excluded from the state petroleum exception).

Footnote 141 should read as follows:

Moreover, unused cutting oil is not a hazardous substance under CERCLA. *See* Marmon Group ...

§ 75.09(b)(2) Determining Whether There Has Been a Release or Substantial Threat of Release.

Indented block quote in paragraph one of this section should read as follows:

The term "release" means any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discarding of barrels, containers, and other closed receptacles containing any hazardous substance or pollutant or contaminant) ... .

§ 75.09(b)(3) Determining Whether the Real Property is a "Facility."

Add:

Consol. Cos. V. Union Pac. R.R. Co., 2006 U.S. Dist. LEXIS 8795 (W.D. La. 2006) (Both RCRA and CERCLA definitions of "facility" include contiguous or adjacent property, and do not distinguish residential from commercial or industrial "facilities"); *Otay Land Co. v. U.E. Ltd. LP, 440 F. Supp. 2d 1152* (S.D. Ca., 2006) (A trap and skeet range containing lead shot and clay debris is not considered a "facility" under CERCLA because it falls within the consumer product exception contained in CERCLA; therefore, no contribution claim could be made by current owners against former owners for clean-up of the contaminated site.)

§ 75.09(b)(5) Response Authority Under CERCLA § 104.

Insert the following directly after the sentence ending with footnote 206:

However, Congress failed to renew both the taxes on petroleum and petroleum products and the corporate environmental taxes, and as a result, the superfund ran out of money in 2003. Since then, superfund money comes from general funds and money reimbursed by responsible parties. Since 2005, the EPA has faced financial constraints, which has required it to focus most of its attention on projects that are currently ongoing. This lack of funding has made it difficult for the EPA to initiate new clean-up projects.

§ 75.09(b)(6) Response Authority Under CERCLA § 106.

Footnote 255 should read as follows:

United States v. Ottati & Goss, Inc., 630 F. Supp. 1361 (D.N.H. 1985) judgment aff'd in part, vacated in part United States v. Ottati & Goss, Inc., 900 F.2d 429 (1st Cir. 1990) . See also United States v. Vertac Chem. Corp., 489 F. Supp. 870 (E.D. Ark. 1980) (discussion of imminent and substantial endangerment under RCRA § 7003).

§ 75.09(b)(6)(iii) RCRA § 7003

Footnote 274 should read as follows:

United States v. Price, 688 F.2d 204 (3d Cir. 1982) ; William Rosbe & Robert L. Gulley, *The Hazardous and Solid Waste Amendments of 1984: A Dramatic Overhaul of the Way American manages Its Hazardous Wastes, 14 Envtl. L. Rep. (Envtl. L. Inst.) 10458 (1984).*

§ 75.09(b)(8) The National Contingency Plan (N.C.P.).

Footnote 317 should read as follows:

Id.

Footnote 322 should read as follows:

Id.

§ 75.09(c) Specific Rules for Landowner and Lender Liability Under CERCLA [Go To Main]

In footnote 337, "but see Mathews v. Dow Chemical Co." should read "but see Mathews v. Dow Chemical Co.".

§ 75.09(c)(1) Responsible Parties.

Add:

Sycamore Indus. Park Assoc. v. Ericsson, Inc., 2007 Dist. LEXIS 23881 (N.D. Ill., 2007) (A seller of a parcel of land was deemed not to have disposed of hazardous materials according to CERCLA when he left an old heating system on the property that contained asbestos in its construction). *But See Sycamore Indus. Park Assocs. V. Ericsson, 2007 U.S. Dist. LEXIS 31614* (N.D. Ill., 2007) (The court granted a motion for reconsideration because the earlier ruling was based on the assumption that the asbestos contained in the heating system was built in, when in fact the plaintiffs had alleged that the asbestos was found in and around various pipes, boilers, and equipment located within the several buildings, which inference by the court did not afford plaintiffs all reasonable inferences, and therefore was considered manifest error).

§ 75.09(c)(1)(i) Current Owners and/or Operators

***United States v. C.D.M.G. Realty Co., 875 F. Supp. 1077 (D.N.J. 1995)* has been vacated and remanded without any further treatment. Therefore, footnote 344 should read simply: *42 U.S.C. § 9607*(a)(1)**

Add:

Maine v. Kerramerican, Inc., 2007 U.S. Dist. LEXIS 16258 (D. Me., 2007) (parent corporations generally cannot be held liable for the actions of their subsidiaries, unless the parent, by its own right, can be held liable as an owner. Parent ownership can be shown where the parent has directed the workings of, managed, or conducted the affairs of the facility. The existence of common directors in the parent corporation and the subsidiary, alone is not enough to establish liability as an owner). *Ameripride Services, Inc. v. Valley Industrial Service, Inc., 37 ELR 20058* (E.D. Ca., 2007) (For the purposes of CERCLA liability as an owner, a corporation that held title to a facility for less than a day was not considered an "owner" for the purposes of CERCLA liability because the corporation never actually exercised any control or exclusive use of the property, and liability in this case would defeat CERCLA's purpose of holding

responsible parties liable). *See also United States v. Capital Tax Corp., 37 ELR 20015* (N.D. Ill., 2007) .

Footnote 348 should read as follows:

Id. at 1043 .

Footnote 349 should read as follows:

Id. at 1044 .

Footnote 350 should read as follows:

Id. at 1032 . However, Shore still argued that it was not an owner "at the time of disposal" within the meaning of *42 U.S.C. § 9607(a)(2). See Id.* at 1043 .

Footnote 354 should read as follows:

Id.

Footnote 355 should read as follows:

Id.

Footnote 356 should read as follows:

Id. at 577.

Footnote 357 should read as follows:

Id.

Footnote 358 should read as follows:

Id. at 578.

Footnote 359 should read as follows:

Id.

Footnote 360 should read as follows:

Id. at 577.

§ 75.09(c)(1)(ii) Owners or Operators at the Time of Disposal.

Add:

U.S. v. Honeywell Intern. Inc., 542 F. Supp. 2d 1188 (E.D. Cal. 2008) (subdivision developer was an owner and subdivision development was a disposal under CERCLA).

§ 75.09(c)(1)(iii) Generators or Arrangers.

Add:

Agere Sys. v. Advanced Envt'l Tech. Corp., 2006 U.S. Dist. LEXIS 84114 (E.D. Pa., 2006) (In order to establish liability as an arranger, the plaintiff must show first, that the defendant owned or possessed the waste, and second, that the defendant knew that the processing of the waste could or would result in the release of hazardous waste, or the defendants' control over the production process. The possession element does not mean actual possession, and liability

may be established by showing constructive ownership or possession. In addition, the defendant need not know that a release will occur at a specific location, and it is enough that he know that a release is likely to occur). *Tex Tin Corp. v. United States, 2006 U.S. Dist. LEXIS 62349* (S.D. Tx., 2006) (Within the 5th circuit, factors to consider when deciding arranger liability include the following: (1) an obligation or authority to exercise control over the disposal of the hazardous substance; (2) ownership of the substance; (3) the intent of the parties to the transaction who decided to place the substance at the facility, e.g., whether the transaction was engaged in for the purpose of waste disposal. Where a substance is categorized as hazardous, but is transported for a useful purpose other than disposal, CERCLA liability as an arranger is not established). *See also Vine St., LLC v. Keeling, 460 F. Supp. 2d 728* (E.D. Tx., 2006) .

Add:

Burlington Northern & Santa Fe Railway Co. v. United States, 129 S.Ct. 1870 (2009) (a company is not liable as an "arranger" under CERCLA if it merely knows that some hazardous chemicals it delivers spill during the transfer from truck to storage tank).

§ 75.09(c)(1)(iv) Transporters.

Add:

Action Manufacturing Co. v. Simon Wrecking Co., 428 F. Supp. 2d 288 (E.D. Pa., 2006) (to establish liability as a transporter, the transporter must have at least actively participated in deciding where to dispose of the waste).

§ 75.09(c)(1)(vi) Lenders as Owners (The Security Interest Exemption).

Footnote 384 should read as follows:

United States v. Maryland Bank & Trust Co., 632 F. Supp. 573, 578 (D. Md. 1986) (quoting *42 U.S.C. § 9601(20)(A)*).

Footnote 385 should read as follows:

Id. at 578-79 (emphasis added).

Footnote 386 should read as follows:

Id.

Second paragraph should read as follows:

The two courts which have examined the scope of the security interest exemption since *Maryland Bank* decision have also spit on the issue. In *Guidice v. BFG Electroplating & Mfg. Co.*, the district ...

§ 75.09(c)(vii) Lenders as Operators.

Footnote 410 should read as follows:

Id. at 20997 .

Footnote 412 should read as follows:

Id. at 20995 .

Footnote 413 should read as follows:

Id. at 20997 .

Footnote 414 should read as follows:

Id. at 20996 .

Footnote 417 should read as follows:

Id. at 562.

The last sentence in the first paragraph on this page should read as follows:

Nevertheless, *Mirable* remains a leading case and is one of the better sources of guidance on this issue.

Footnote 418 should read as follows:

See United States v. Nicolet, Inc., 712 F. Supp 1193, 1205 (E.D. Pa. 1989) ("Thus, existing caselaw suggests that a mortgagee can be held liable under CERCLA only if the mortgagee participated in the management and operational aspects of the facility in question."). *Cf. United States v. New Castle County, 727 F. Supp 854, 866 (D. Del. 1989)* ("[M]ere ability to exercise control as a result of the financial relationship of the parties is insufficient for liability to attach. The entity or person sought to be strapped with liability must *actually exercise control*." (emphasis in original)) (quoting *Rockwell Int'l Corp. v. IU Int'l Corp., 702 F. Supp. 1384, 1390 (N.D. Ill. 1988))* ; *see also United States v. Township of Brighton, 153 F.3d 307 (6th Cir. 1998)* ; *United States v. Alliedsignal Inc., 62 F. Supp. 2d 713 (N.D.N.Y 1999)* ; *United States v. Consolidated Rail Corp., 729 F. Supp. 1461, 1468 (D. Del. 1990)* ("[T]he statute requires that a person be actively participating in the management of the facility to be held liable for the disposal of hazardous wastes."). *Stearns & Foster Bedding Co. v. Franklin Holding Corp., 947 F. Supp. 790 (D.N.J. 1996)* (Complete ownership and general control are not enough to impose CERCLA liability based on the "actual control" test).

The second sentence in the first paragraph should read as follows:

The court simply state: "whatever the precise parameters of 'participation,' there must be *some* actual management of the facility before a secured creditor will fall outside the [security interest] exception."

Footnote 423 should read as follows:

901 F.2d 1550 (11th Cir. 1990) order amended and superseded by United States v. Fleet Factors Corp., 819 F. Supp. 1079, 821 F. Supp. 707 (S.D. Ga. 1993) .

Footnote 426 should read as follows:

901 F.2d at 1556-57 & n.6 order amended and superseded by United States v. Fleet Factors Corp., 819 F. Supp. 1079, 821 F. Supp. 707 (S.D. Ga. 1993) .

Footnote 430 should read as follows:

Fleet Factors, 901 F.2d 1557-58 (emphasis added) (footnotes omitted) *order amended and superseded by United States v. Fleet Factors Corp., 819 F. Supp. 1079, 821 F. Supp. 707 (S.D. Ga. 1993)* .

Footnote 433 should read as follows:

See Roslyn Tom, *Interpreting the Meaning of Lender Management Participation Under Section 101(20)(A) of CERCLA, 98 Yale L.J. 925 (1989).* "Without clear standards defining the degree of control a lender can safely exercise over the debtor's operations, banks will be deterred from monitoring sites." *Id. at 927.* Thus, to promote the close supervision of those mortgagors who handle hazardous substances, "the court should find that *total control* amounting to ownership is what exposes the creditor to liability." *Id. at 943* (emphasis added).

§ 75.09(c)(1)(viii) Successor Liability.

Add:

New York v. Nat. Serv. Indus., 460 F.3d 201, (U.S. App. 2d, 2006) (Allegations that a de facto merger occurred, for the purposes of establishing CERCLA successor liability necessarily fail if there is no continuity of ownership). *K.C. 1986 L.P. v. Reade Mfg., 472 F. 3d 1009, 37 ELR 20009* (U.S. App. 8th, 2006) (An arms' length transaction breaks the chain of successor liability under the mere continuation test). For a general discussion of successor liability and tests used by different courts, *see also Tex. Tin. Corp. v. United States, 2006 U.S. Dist. LEXIS 26782* , 62 Envtl. Rep. Cas. (BNA) 2017 (S.D. Tx., 2006). *See also Vine St., LLC v. Keeling, 460 F. Supp. 2d 728* (E.D. Tx., 2006) .

§ 75.09(c)(2) Strict Liability.

Add:

See also United States v. Capital Tax Corp., 2007 U.S. Dist. LEXIS 1184, 37 ELR 20015 (N.D. Ill., 2007) ; *United States v. Alcan Aluminum Corp. 2006 U.S. Dist. LEXIS 24309* (N.D.N.Y., 2006) .

§ 75.09(c)(3) Joint and Several Liability

Footnote 446 should read as follows:

See, e.g., Monsanto, 858 F.2d at 171-72; Wade, 577 F. Supp. at 1338-39 (quoting *Restatement (Second) of Torts* § 433). *See also* Michael D. Green, *Successors and CERCLA: The Imperfect Analogy to Products Liability and an*

Alternative Proposal, 87 N.W. U.L. Rev. 897 (1993) (criticizing the expansion of CERCLA liability to include successor corporations, based on the analogy of products liability).

Footnote 450 should read as follows:

United States v. Ottati & Goss, Inc., 630 F. Supp. 1361 (D.N.H. 1985) . Cf. Monsanto, 858 F.2d at 170 n. 27 ("Volumetric contributions provide a reasonable basis for apportioning liability only if it can be reason ably assumed, or it has been reasonably demonstrated, that independent factors had no substantial effect on the harm to the environment.").

§ 75.09(c)(3)(i) Contribution.

Add:

K.C. 1986 Ltd. Partnership v. Reade Mfg., 472 F.3d 1009 (8th Cir. 2007) (allocation of liability and contribution ordered); *Cooper Industries, Inc. v. Aviall Services, Inc., 543 U.S. 157 (2004)* (private party who had not been sued in CERCLA administrative or cost recovery action could not obtain contribution from other liable parties).

Add:

Elementis Chromium L. P. v. Coastal States Petroleum Co., 450 F. 3d 607 (U.S. App. 5th 2006) (Liability for contribution actions under § 113(f) are several only, not joint and several).

§ 75.09(c)(3)(ii) Settlement with the Government.

The first sentence in the first paragraph on this page is missing a period at the end.

Footnote 459 should read as follows:

42 U.S.C. § 9613(f)(2). Bedford Affiliates v. Sills, 156 F.3d 416 (2d Cir. 1998) (An owner's state law restitution and indemnification claims were preempted by CERCLA. If the court allowed a state remedy, the state laws would bypass the detailed settlement requirements in CERCLA).

Add:

Asarco Inc. v. Union Pac. R.R. Col., 2006 U.S. Dist. LEXIS 2626, 62 ERC (BNA) 1092 (D. Az., 2006) (any settlement with a Government entity must be done with the approval of the EPA, or else it will not have the effect of resolving CERCLA liability).

Shell Oil Co. v. U.S., 80 Fed. Cl. 411 (2008) (oil companies which supplied aviation fuel during World War II were able to charge acid waste cleanup costs to the government).

§ 75.09(c)(3)(iii) Indemnification.

U.S. v. Burlington Northern & Santa Fe Ry. Co., 520 F.3d 918 (9th Cir. 2008), 502 F.3d 781 (9th Cir. 2007), 479 F.3d 1113 (9th Cir. 2007) (various liability apportionment issues).

§ 75.09(c)(4) Affirmative Defenses.

The first full block quote should read as follows:

The term "contractual relationship," for purposes of section 9607(b)(3) of this title includes, but is not limited to, land contracts, deeds, easements, leases, or other instruments transferring title or possession, unless the real property on which the facility concerned is located was acquired by the defendant after the disposal or placement of the hazardous substance on, in, or at the facility ... .

Add:

United States v. Capital Tax Corp., 37 ELR 20015 (N.D. Ill., 2007) (discussing generally the third party defense, and illustrating the difficulty of successfully asserting this defense). *See also United States v. Timmons Corp., 2006 Dist. LEXIS 7642* (N.D.N.Y., 2006) .

§ 75.09(d)(1) The CERCLA Lien

Footnote 484 should read as follows:

42 U.S.C. § 9607(l)(3). See, e.g., In re Better-Brite Plating, Inc., 105 B.R. 912, 917 (Bankr. E.D. Wis. 1989) vacated, In re Better Brite Plating, Inc., 136 B.R. 526 (Bankr. E.D. Wis. 1990) . S. Pac. Transp. Co. v. Voluntary Purchasing Groups, Inc., 252 B.R. 373 (E.D. Tex. 2000) (a bankruptcy court lacked jurisdiction to approve and then issue mandatory injunctions regarding claims under CERCLA).

§ 75.09(d)(3) Response Costs as Administrative Expenses.

Footnote 499 should read as follows:

Section 503 now reads in pertinent part:

> (b) After notice and a hearing, there shall be allowed administrative expenses, other than claim allowed under section 502(f) of this title, including--
>
> > (1) (A) the actual necessary costs and expenses of preserving the estate including--
> > (i) wages, salaries, and commissions for services rendered after the commencement of the case.

Footnote 500 should read as follows:

11 U.S.C. § 507(a)(1), amended by Pub. L. 109-8, Title II, § 212, 223, Title VII, §§ 705, 706, Title XIV, § 1401, Title XV, § 1502(a)(1), *119 Stat. 51, 62, 126, 214, 216.*

Footnote 506 should read as follows:

Id. at 285 .

Footnote 507 should read as follows:

See id. at 286 .

Footnote 509 should read as follows:

See id. at 280 .

At the end of the section, add new footnote 511.1:

FN 511.1 *In re United Soil Recycling, Inc., 2006 Bankr. LEXIS 1753* (D. Or., 2006) .

§ 75.09(d)(3)(i) Abandonment

Add:

For a fairly detailed treatment of the issue of abandonment, *see* Hillinger, Ingrid Michelsen & Michael G. "Environmental Affairs in Bankruptcy: 2004." *12 Am. Bankr. Inst. L. Rev. 331 (2004).*

Footnote 518 should read as follows:

In re Quanta Resources Corp., 739 F.2d 912 (3d Cir. 1984) , aff'd sub nom. Midlantic Nat'l Bank v. New Jersey Dept. of Envtl. Protection, 474 U.S. 494 (1986) .

Add:

Supp. To CHAPTER 75 THE IMPACT OF ENVIRONMENTAL REGULATION ON REAL PROPERTY

8-75 Thompson on Real Property, Thomas Editions Supp. to § 75.12

Supp. to § 75.12 Citizen Suits.

[Go To Main]

§ 75.12(b) Private Litigation to Enforce the Clean Water Act. [Go To Main]

§ 75.12(b)(1) Citizen Suits Under the Clean Water Act.

§ 75.12(b)(1)(i) Scope of the Action

Add:

Peconic Baykeeper, Inc. v. Suffolk County, 600 F.3d 180 (2d Cir. 2010) (citizen suit against county under the Clean Water Act alleging discharge of dredged spoils without permit, discharge of pollutants, and spraying pesticides into U.S. waters).

Add:

Envtl. Conservation Org. v. City of Dallas, 529 F.3d 519 (5th Cir. Tex. 2008) (citizen enforcement action by environmental organization alleging the city failed to develop an effective program to monitor and reduce discharge of storm water pollutants); *Friends of the Earth, Inc., v. Gaston Copper Recycling Corp., 263 Fed. Appx. 348* (4th Cir. 2008) (citizen suit brought by nonprofit environmental organizations against operator of smelting facility).

Add:

Our Children's Earth Foundation v. U.S.E.P.A, 527 F.3d 842 (9th Cir. 2008) (citizen suit by environmental advocates against E.P.A. alleging the agency abandoned a mandatory review function).

Footnote 569 should read as follows:

Patterson v. Barden & Robeson Corp., 2007 U.S.Dist. LEXIS 11225 (W.D.N.Y., 2007) (defendant had not obtained proper permit until after the case was initiated, and therefore, was considered to be committing an ongoing violation).

Gwaltney of Smithfield v. Chesapeake Bay Found., Inc., 484 U.S. 49 (1987) , on remand 844 F.2d 170 (4th Cir. 1988), 688 F. Supp. 1078 (E.D. Va. 1988) judgment aff'd in part, rev'd in part, Chesapeake Bay Found., Inc. v. Gwaltney of Smithfield, Ltd., 890 F.2d 690 (4th Cir. 1989) , superseded by statute as recognized in *Glazier v. American Ecology Envtl. Serv. Corp., 894 F. Supp. 1029 (E.D. Tex. 1995) . U.S. Public Interest Research Group v. Atlantic Salmon of Maine, LLC, 339 F.3d 23 (1st Cir. 2003)* (only citizen suits alleging violation at time suit is brough tar cognizable but once action has been brought and present violation established, court may order relief for past wrongs as well.). *See also Pennsylvania Envtl. Defense Found. V. Bellefonte Borough, 718 F. Supp. 431 (M.D. Pa. 1989)* ; *Brewer v. Ravan, 680 F. Supp. 1176 (M.D. Tenn. 1988) .*

Footnote 570 should read as follows:

Natural Resources Defense Council, Inc. v. Texaco Ref. & Mktg., Inc., 719 F. Supp. 281 (D. Del. 1989) judgment aff'd in part, rev'd in part, Natural Resources Defense Council, Inc. v. Texaco Ref. & Mktg., Inc., 2 F.3d 493 (3d Cir. 1993) ; *Student Pub. Interest Research Group of N.J., Inc. v. A.T. & T. Bell Labs., 617 F. Supp. 1190 (D.N.J. 1985)* ; *Sierra Club v. Simkins Indus., 617 F. Supp. 1120 (D. Md. 1985) , aff'd, 847 F.2d 1109 (4th Cir. 1988) .*

§ 75.12(b)(1)(ii) Procedural Considerations

Add:

Sierra Club v. United States EPA, 475 F. Supp. 2d 29 (D. D.C., 2007) .

Add:

Pennsylvania v. Allegheny Energy, Inc., 2006 U.S. Dist. LEXIS 38377 (W.D. Pa., 2006) (applying the federal five year limitation in a Clean Air Act case where the statute of limitations was at issue); *Nat'l Parks Conservation Ass'n v. TVA, 480 F. 3d 410* (U.S. App. 6 *th*, 2007).

Footnote 588 should read as follows:

33 U.S.C. § 1365(b)(1)(A).

Add:

Carney v. Gordon County, 63 ERC (BNA) 1907, (N.D. Ga., 2006) (the mere fact that notice was given in a form letter does not render the notice ineffectual for the purposes of the statute, although the notice still must be sufficiently specific regarding the alleged violations of the Clean Water Act). *Natural Res. Council of Me. V. Int'l. Paper Co., 424 F. Supp. 2d 235, 62 ERC (BNA) 1589* (D. Me., 2006) (Most of plaintiff's allegations were dismissed because the notice given to defendants was not sufficiently specific enough to inform the violator about what it was doing wrong, and how to remedy the violations in order to avert the lawsuit).

Add:

City of Newburgh v. Sarna, 690 F. Supp. 2d 2136 (S.D. N.Y. 2010) (Citizen suit action against developer and town alleging violation of the Clean Water Act; dismissed sua sponte for failure to comply with the 60-day notice provision).

Footnote 592 should read as follows:

33 U.S.C. § 1365(b)(1)(B); *Knee Deep Cattle Co. v. Bindana Inv. Co., 94 F.3d 514 (9th Cir. 1996)* (citizen suit allowede because the state was not diligently prosecuting action), *cert. dismissed, 519 U.S. 1144 (1997)* ; *Old Timer, Inc. v. Blackhawk-Central City Sanitation Dist., 51 F. Supp. 2d 1109 (D. Colo. 1999)* (The Clean Water Act bars commencement of citizen suits if a state is seeking an administrative penalty. However, the court is not retroactively stripped of its jurisdiction if a state seeks an administrative penalty after a citizen suit was commenced).

Add:

But see Paper, Allied-Industrial, Chem. & Energy Workers Int'l Union v. Cont'l Carbon Co., 2003 U.S. Dist. LEXIS 26858 (W.D. Ok., 2003) (Where state has commenced and is diligently prosecuting an administrative action based on state law that is comparable to a Clean Water Act action, a citizen suit is barred from pursuing civil claims based on the

same violations in the state action, but is allowed to continue with its claims for declaratory and injunctive relief).

Add:

See supra note 588.

§ 75.12(b)(1)(iii) Proper Plaintiffs.

Add:

Envirowatch, Inc. v. Fukino, 2007 U.S. Dist. LEXIS 14140 (D. Hi., 2007) (holding that the plaintiffs had not pleaded any adverse effect sufficiently to state a claim under the Clean Water Act citizen suit provisions); *Sierra Club v. El Paso Props., Inc., 2007 U.S. Dist. LEXIS 1191* (D. Co., 2007) (Where one plaintiff group has met the standing requirements, the court does not have to inquire into the standing of a second group when the groups are asserting the same claims for relief and the allegations are the same, the groups were represented by the same council, and their arguments were presented jointly throughout the trial); *See also S. Utah Wilderness Alliance v. BLM, 425 F. 3d 735* (10th Cir. 2005) .

Add:

Northwest Envtl. Def. Ctr. v. Brown, 476 F. Supp. 2d 1188 (D. Or., 2007) (reviewing the requirements for standing when an organization represents the interests of its members in a citizen suit under the Clean Water Act). *Bldg. & Constr. Trades Council of Buffalo v. Downtown Dev., Inc., 448 F. 3d 138* (U.S. App. 2d, 2006) (When bringing a citizen suit as an organization, during the motion to dismiss stage, the members names need not be presented in order to establish standing).

Envtl. Protection Info. Center v. Pacific Lumber Co., 469 F. Supp. 2d 803 (N.D. Calif. 2007) (action by non-profit environmental organization against two lumber companies, alleging illegal discharge of pollutants into a creek).

Add:

Karr v. Hefner, 475 F.3d 1192 (10th Cir. 2007) (Clean Water Act citizen suit against various non-governmental entities; action barred because EPA was diligently prosecuting the violations against the defendants).

§ 75.12(b)(1)(iv) Proper Defendants.

Add:

Id. Northwest Environmental Defense Center v. U.S. Army Corps of Engineers, 118 F. Supp. 2d 1115 (D. Ore., 2000) (There are no implied private causes of action under the CWA; All causes of action must be based on a violation of the appropriate NPDES permit system, not some other permitting scheme).

Northern California River Watch v. City of Healdsburg; *496 F.3d 993 (9th Cir. 2007)* (citizen suit against city); *Sierra Club, Hawaii Chapter v. City and County of Honolulu, 486 F. Supp. 2d 1185* (D. Hawai'i 2007) (citizen suit against city and county).

§ 75.12(b)(4) Costs and Attorney's Fees.

Add:

Sierra Club v. Hamilton County Bd. of County Com'rs, 504 F.3d 634 (6th Cir. 2007) (action by environmental group seeking attorney fees and costs, which were awarded).

§ 75.12(c)(1) Citizen Suits Under the Clean Air Act

§ 75.12(c)(1)(i) Scope of the Action

Add:

Sierra Club v. Portland General Elec. Co., 663 F. Supp. 2d 983 (D. Ore. 2009) (citizen suit action by environmental agencies against electric company for alleged violations of the Clean Air Act).

Add:

St. Bernard Citizens for Environmental Quality, Inc. v. Chalmette Refining, L.L.C., 500 F. Supp. 2d 592 (E.D. La. 2007) (citizen suit under Clean Air Act against refinery for illegal emissions).

Add:

New York v. Am. Elec. Power Serv. Corp., 2006 U.S. Dist. LEXIS 32829 (S.D. Oh., 2006) (1990 amendments to the Clean Air Act effectively overrule the Gwaltney decision, and allow citizen suits to be brought both for ongoing violations and wholly past violations as long as the past violations occurred more than once).

Add:

Sierra Club v. Korleski, 654 F. Supp. 2d 722 (S.D. Ohio 2009) (citizen suit against director of state environmental protection agency alleging violations of the state implementation plan, federally approved under the Clean Air Act).

§ 75.12(c)(1)(ii) Special Procedural Considerations

Add:

But see New York v. Am. Elec. Power Serv. Corp., supra note 639 .

Footnote 658 should read as follows:

Holding that the notice requirement is *not* jurisdictional, *see Kennecott Copper Corp. v. Train, 424 F. Supp. 1217 (D. Nev. 1976) rev'd, Kennecott Copper Corp. v. Costle, 572 F.2d 1349 (9th Cir. 1978)* . Holding that the notice requirement *is* jurisdictional, *see Philadelphia Council of Neighborhood Orgs. V. Coleman, 437 F. Supp. 1341 (E.D. Pa. 1977) , motion denied, 451 F. Supp. 114* (E.D. Pa.) , *aff'd without opinion, 578 F.2d 1375 (3d Cir. 1978)* .

Footnote 666 should read as follows:

Const. Art. 9, § 4.

Footnote 669 should read as follows:

See Sierra Club v. Morton, 405 U.S. 727 (1972) .

Add:

For a detailed discussion of standing under the Clean Air Act, *see Northwest Env'tl Def. Ctr. v. Owens Corning Corp., 434 F. Supp. 2d 957* (D. Ore., 2006) . *See also Massachusetts v. EPA, 127 S. Ct. 1438 (2007)* ; *Nat'l Council of La Raza*

v. Gonzales, 468 F. Supp. 2d 429 (E.D.N.Y., 2007) ; *Sierra Club v. Johnson, 436 F. 3d 1269* (11th Cir. Ga., 2006) .

§ 75.12(c)(1)(iv) Proper Defendants.

Add:

National Parks and Conservation Ass'n, Inc. v. Tennessee Valley Authority, 502 F.3d 1316 (11th Cir. 2007) (Clean Air Act citizen suit against Tennessee Valley Authority).

Add:

But see Franklin v. Birmingham Hide & Tallow Co., 1999 U.S. Dist. LEXIS 22489 (N.D. Al., 1999) (refusing to find People of State of Ill. v. Commonwealth Edison Co. persuasive, holding that a corporate officer may be held civilly liable for violations of the CWA).

§ 75.12(d)(1) Citizen Suits Under the Resource Conservation and Recovery Act.

Add:

Crandall v. City and County of Denver, Colorado, 594 F.3d 1231 (10th Cir. 2010) (citizen action under the Resource Conservation and Recovery Act to prevent full-plane deicing at the Denver airport; dismissed under standard of no imminent danger); *Francisco Sanchez v. Esso Standard Oil Co., 572 F.3d 1 (1st Cir. 2009)* (gas station owners brought citizen suit action under Resource Conservation and Recovery Act against former suppliers who allegedly allowed underground gasoline storage tanks to discharge hazardous waste into the soil and groundwater; suit not precluded by Puerto Rico's civil action against the supplier).

§ 75.12(d)(1)(ii) Special Procedural Considerations

Footnote 706 should read as follows:

Hallstrom v. Tillamook County, 493 U.S. 20 (1989) . See also Michael T. Caljouw, Case Comment, *Environmental Law--Failure to Comply with Sixty-Day Notice Provision for Citizen Suits Under Resource Conservation and Recovery Act Requires Dismissal-- Hallstrom v. Tillamook County, 110 S. Ct. 304 (1989) , 24 Suffolk U. L. Rev. 875 (1990).*

Footnote 714 should read as follows:

Proffit v. Township of Bristol, 754 F.2d 504 (3d Cir. 1984) abrogated by Hallstrom v. Tillamook County, 493 U.S. 20

(1989) ; *Brewer v. Ravan, 680 F. Supp. 1176 (M.D. Tenn. 1988)* ; *Fishel v. Westinghouse Elec. Corp., 617 F. Supp. 1531 (M.D. Pa. 1985)* .

Add:

Eckardt v. Gold Cross Serv's, 2007 U.S. Dist. LEXIS 3848 (D. Ut., 2007) (the 90-day notice required for RCRA claims related to the generation or management of solid or hazardous waste must describe the endangerment involved).

§ 75.12(d)(1)(iii) Proper Plaintiffs.

Add:

Envirowatch, Inc. v. Fukino, 2007 U.S. Dist. LEXIS 14140 (D. Hi., 2007) (Plaintiff's claim that it was barred from participating in settlement discussions regarding the enforcement of RCRA violations could not, on its own, constitute an injury in fact for the purposes of standing).

Chapter 76 TAXATION OF REAL PROPERTY

9-76 Thompson on Real Property, Thomas Editions § 76.01

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 76.01 Introduction to the Chapter.

[Go To Supp]

Most types of real property interests are subject to some form of taxation, imposed either by the federal government or by state and local governments. Income taxes may be imposed when property represents or produces some type of income for its owner or owners; some type of state or local transfer tax may be imposed when ownership of real property changes; and some type of inheritance or estate tax may be imposed on real property whose owner dies. This chapter is intended to alert the reader and researcher to the various kinds of taxes that are imposed upon real property in American jurisdictions, to some notion of how heavy these impositions are, and to the sources where further information may be obtained. It is not the objective of this chapter to give a full discussion of any of these taxing schemes, because they tend to be extremely detailed, complex, and changeable. Because of the nature of the chapter as a broad survey of a huge topic, and the fact that the principal sources are specific federal statutes, regulations, and agency rulings, no bibliography and no computer-assisted research instructions are included with this chapter.

The first part of the chapter reviews the types of federal taxation that may be imposed on real property, principally the income tax, and also briefly describes the estate and gift tax rules. The latter part of the chapter summarizes the enormous number of state transfer, recording, and estate and inheritance taxes that are imposed upon real property.

Chapter 76 TAXATION OF REAL PROPERTY

9-76 Thompson on Real Property, Thomas Editions § 76.02

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 76.02 Federal Income Taxation of Non-residential Real Property.

[Go To Supp]

Under the federal income tax law, real property is subject to taxation according to several laws and rules that will be discussed in this section. However, it should be noted that a separate discussion for the federal income taxation of residential real property is provided because of certain special provisions applying to transfers of a taxpayer's principal residence and some tax advantages for individual taxpayers that are related to residential real property. The general rules of federal income taxation pertaining to real property that are discussed in the section on non-residential real property also apply to residential real property, except where specifically noted otherwise.

§ 76.02(a) Taxation of Non-residential Real Property Acquisition.

§ 76.02(a)(1) Tax Treatment of Acquisition Costs.

A taxpayer who acquires real property often has a number of tax perspectives in mind, but usually paramount among them is whether the consideration given for the acquisition of real property can be treated as a deduction against the acquirer's tax liability in the year of acquisition, or must be treated as a capital expense to be deducted only in portions throughout the years of the life of the property acquired. Alternatively, sometimes the cost of acquisition must be capitalized over the life of the loan used to obtain the property.

Since 1981, the tax rules have required that expenses and costs of acquisition that are related to a loan used for acquiring property must be treated in the same manner as escrow fees, loan processing fees and other service fees, which is that they must be capitalized over the life of the loan. n1

To the extent such fees relate specifically to obtaining a loan commitment, rather than to the loan itself, and the loan commitment is deemed to begin and end within a relatively brief period of time, a taxpayer may be able to treat the fees connected with the loan commitment as fully deductible in the year incurred. n2 Such a result is almost necessitated in the circumstances where the loan is eventually declined, and the fees expended in obtaining the loan commitment are treated as deductible losses. n3

Another common variety of acquisitions costs is what are known as "points." A "point" is an amount equal to 1% of the amount borrowed, and a lender frequently charges one or more "points" as a special additional fee for making the loan; certain types of subsidized or guaranteed loans are made at below the market interest rate by commercial lenders, who seek to increase their incentive for making such loans by obtaining payment of "points." Some "points" are fully deductible in the year paid as business expenses, while others must be amortized or deducted in piecemeal fashion as capital expenses attributable to the entire life of the loan. In the situation where "points" are paid as a fee for the privilege of obtaining the loan, such "points" may be treated either as fully deductible current business expenses or as capital expenses whose deductibility is amortized over the life of the loan. n4 "Points" that consist of fees for the privilege of obtaining a loan are treated under the tax code as amounts paid for the use of money or forbearance from collection of money. n5 In some instances these "points" are considered additional interest and are completely deductible in the year of the loan, because they are fully paid at the beginning of the loan process. n6 In other cases, however, the "points" are considered at least partially to be additional interest allocable to future years of the loan and must be ratably deducted for each of those years. n7

If a taxpayer pays deferred interest on a discount loan, that deferred interest is deductible in the year paid. n8 "Points" that are not considered as fees for the privilege of obtaining the loan, but rather are designated for particular services provided by the lender, must be capitalized over the life of the loan. n9 For taxpayers to whom the characterization of "points" may be critical in terms of tax liability, it is possible to structure the loan documents in such a way that the desired form of deductibility can be achieved. n10 Some restrictions exist, however; a taxpayer who pays "points" as part of refinancing a mortgage is required to amortize the deductibility of those "points" over the life of the new loan, except to the extent the refinancing is used in improving a mortgaged residence. n11

If a taxpayer who transfers real property is required to pay some sort of transfer tax imposed by a state or local governmental entity, and if the transfer tax is based upon the actual consideration paid for the transfer, the amounts of such transferred taxes are usually deductible if the property is used in a trade or business or some other income-producing activity. n12 Where the property that is transferred was held only as an investment or for income production, and not specifically used in a trade or business, the deductibility of the transfer taxes applies only to an individual taxpayer and only as an itemized deduction. n13 If the property being transferred produces rental or royalty income, then any transfer taxes are fully deductible. n14

Since 1986, a taxpayer who holds real property for resale may not deduct the direct cost and the property's share of indirect costs of the transfer, including taxes, but must capitalize those expenses over the life of the property. n15

If such a taxpayer is conducting new construction on the property which is to be held for resale, then the interest costs attributable to the construction loan must also be capitalized if paid or incurred during the construction period and if the production period exceeds two years n16 or exceeds at least one year and has a cost of over one million dollars, n17 or the property has a long useful life. n18 The full details of these rules are still being announced. n19

§ 76.02(a)(2) The Definition and Role of Basis.

A very significant concept in the rules for federal income taxation of real property is that of "basis." Basis is the value assigned to property and generally represents the cost of acquiring or investing in the property. n20 One who acquires property must know the basis in order to compute taxable gain and certain credits against tax upon retransfer of the property. The basis of the property is not a static number, but may be adjusted up or down to reflect capital expenses, losses, and depreciation.

In most instances, the cost of acquiring property is the basis, although property that is obtained through an exchange has its fair market value as its basis. When property is obtained for corporation stock, the basis of the property is the value of the stock given in consideration, which may be defined as the fair market value of the property in an arm's-length transaction. n21 When property consists of a building that has been constructed on land, the basis consists of the cost of

the building, the cost of the land, and the cost of acquiring title. Building costs will include not only the interest and taxes pertaining to the period of construction, but also insurance premiums, salaries of officers needed to guide the construction activity, n22 and depreciation of the equipment used in construction. n23 Some construction expenses that would normally be part of the basis and then subject to a capitalized deduction schedule, are assigned shorter amortization periods if placed in service prior to November 6, 1990 n24 and often can be treated as business expense deductions in the year incurred. n25

The basis may also be modified because of liabilities that encumber the real property. Basis is not altered by the existence of contingent liabilities, n26 but can be affected by liabilities to which the property itself is susceptible, whether or not the taxpayer who has acquired the property interest is personally liable. n27

Thus, debt instruments with nonrecourse liability, n28 which are free of the "at risk" limitations on loss deductions as they relate to real property, would modify the cost basis of the property. n29 Where the basis would exceed the real value of the property if it included such nonrecourse liabilities, those liabilities will normally not be treated as part of the basis. n30

Properties traded through a tax-free exchange or through an involuntary conversion have a basis defined as the basis of the property given in the exchange or conversion, enhanced by any gain recognized in the transfer itself. n31

When property is transferred by gift, the property has the same basis as it had in the hands of the donor, n32 which basis is then adjusted if gift tax consequences are incurred in the donation. n33 If property obtained by gift is further transferred, its basis may not exceed the fair market value of the property and thus produce a loss. n34 When property is obtained from a decedent's estate, its basis in the hands of the heir or devisee is the fair market value of the property on the date of decedent's death or on the alternative valuation date listed in Internal Revenue Code § 2032. n35

If the basis of the property is established as of the time the property was acquired, but the property is later transferred in portions, then the basis must be allocated according to the value of the portions transferred. n36 When the property consists of both non-depreciable land and of improvements, which may be depreciable property, the basis must also be allocated in order to account for the depreciation deductions claimed for the improvements. If the basis has been allocated under these circumstances and then adjustments are made to the basis, the adjustments are apportioned in the same way as the allocation of the underlying basis. n37

§ 76.02(b) Taxation of Non-residential Real Property Ownership.

§ 76.02(b)(1) Deductions.

When real property is used in a trade, a business, or in certain income-producing activities, some expenses related to that real property are currently deductible in the year incurred as business expenses. n38 Examples of these expenses are the costs of repairs and the costs of insurance premiums. A taxpayer must carefully distinguish between repairs that may be deducted as current business expenses and "repairs" that are really capital improvements and whose deductibility must be apportioned over the life of the improvement. n39 Also, the deductibility of multi-year insurance premiums must be apportioned over the period of the premiums' coverage. n40

If the deductions that are permitted for expenses related to real estate activities produce a loss for the taxpayer, the loss is deductible for that taxpayer only up to the amount for which the taxpayer is at risk. A taxpayer is at risk for the amount of cash invested, the amount of indebtedness for which the taxpayer is personally liable, n41 and the amount of certain non-recourse loans from qualified lenders. n42

Among the most common deductible business expenses are real property taxes, n43 but not all assessments against property that appear to be taxes are actually deductible as taxes. In order to be deductible, the tax must be levied against

the ownership of the property, not against the exercise of some privilege of ownership. Therefore, if the state where the property is located imposes a tax on the gain from the sale or transfer of the property, such a tax does not qualify as a deductible real property tax for federal income tax purposes. n44 Such state transfer taxes, however, may still be deductible as expenses of doing business. Likewise, an assessment against property to pay for a specific service may not be deductible as a real property tax n45 but may still be deductible as a business expense. n46 Taxes assessed against property for specific improvements and facilities are also not deductible as property taxes. n47

If a taxpayer makes interest payments in connection with the property, those interest payments are deductible in the year paid (or accrued, for accrual taxpayers). n48 Fees other than interest paid in connection with loans are not necessarily deductible. If a fee, unlike interest, is not for the use of the borrowed funds, but is a fee for processing the loan or for part of the price of the land, it is not deductible as interest. n49 Interest paid is not deductible if the indebtedness to which the interest is attributed is not genuine and is not the taxpayer's. n50 Where the proceeds of the loan to which the interest is attributed are placed in a passive investment, certain limitations on the available deductions may apply. n51 These investment interest limitations are also coordinated with passive loss rules. n52

§ 76.02(b)(2) Credits.

Both deductions and credits reduce a taxpayer's ultimate tax liability, but they do so in different ways. A deduction reduces the amount of the taxpayer's income that may be exposed to tax liability. A credit is applied against the tax liability which has already been calculated and directly reduces or offsets that tax liability. In recent years, credits pertaining to real property have been significantly restricted. Generally, credits related to real property are limited by the taxpayer's tax liability for the tax year, by the taxpayer's use of non-recourse financing for qualified expenditures, and by the taxpayer's derivation of income from passive activities. n53

§ 76.02(b)(2)(i) Investment Credit.

Formerly a major consideration in large real estate transactions, the investment credit has been mostly eliminated for tax years after 1985.

§ 76.02(b)(2)(ii) Rehabilitation Credit.

A rehabilitation credit is available for qualified expenditures for buildings first placed in service before 1936; certified historic structures are entitled to a 20% rehabilitation credit. n54 The credit is intended to encourage restoration rather than reconstruction of older buildings that are not certified as historic, and thus the requirements for the credit include retaining most of the external walls and the internal structural framework. n55 If such a credit is taken, the basis of the property must usually be reduced by the amount of the credit. A taxpayer qualifies for this credit by making expenditures for the property, its improvements, or its additions. The rehabilitation credit is not available when an existing building is enlarged, when property is acquired, or when the expenditure pertains to property which is given accelerated depreciation treatment. n56

§ 76.02(b)(2)(iii) Low-income Housing Credit.

A credit is available for expenditures for qualified low-income housing projects. n57 The rules to qualify for this credit and to compute the credit are quite complex, and the credit may be subject to recapture if the qualifications later dissipate. Generally, the low-income housing credit may only be used to offset taxes on passive income. n58 The low-income housing credit has had a limited life and must be extended by legislation from time to time. Additional guidance for owners of rent-restricted units is imposed by the Revenue Reconciliation Act of 1993. n59

§ 76.02(b)(2)(iv) Energy Investment Credit.

If certain real property qualifies as alternative energy property, solar wind energy property, and other specially defined

property relating to energy conservation, it may qualify for the energy investment credit. n60 Real property may qualify for the rehabilitation credit and the energy investment credit concurrently.

§ 76.02(b)(2)(v) Credit for Disability Access.

Certain small businesses are eligible for a tax credit of up to $5,000 for expenditures in making their facilities accessible to the disabled. n61 Businesses may also deduct as much as $1,500 per year of expenditures incurred in making facilities more accessible to the handicapped or elderly. n62

§ 76.02(b)(3) Depreciation.

An owner of property may usually depreciate the costs incurred in acquiring the property, but may not deduct the acquisition costs as current expenses. Several different systems of computing depreciation have been enacted over the years, each with its own set of complexities and vagaries, and the applicability of each system depends upon the date the property was "placed in service." For instance, property placed in service on or before December 31, 1980, is depreciated according to instructions in the Internal Revenue Code itself. n63 Depreciation for property placed in service after December 31, 1980, is calculated according to the accelerated cost recovery system. n64 Because the land itself is not subject to decay or exhaustion and is therefore not depreciable, the amount of basis subject to depreciation consists only of those costs relating to the improvements on the land. n65

In theory, the depreciation is related to the useful life of the item being depreciated as that item is used in the taxpayer's trade, business, or income activity. When an item has been fully used or depreciated, it still has a salvage value, which is the value left in the item once it is no longer useful in the trade, business, or income activity. Once the salvage value has been identified, the difference between the basis and the salvage value over the useful life of the item is the amount of depreciation that can be deducted, or "recovered." Enormous complexity afflicts taxpayers attempting to determine and apply the methods by which they identify the useful life of an item and how much of the depreciable value may be deducted in any one year. Sometimes detailed tables of property types have been promulgated, such as the Class Life Asset Depreciation Range System (CLADR or ADR), introduced in 1972. n66 Other methods of apportioning depreciation over the years of the property's life have included straight line, 200 percent declining balance, and 150 percent declining balance. n67

The taxpayer's objective in most of these matters is to disproportionately increase the amount of depreciation deduction in the early years of the property's life. This objective was given statutory approval for tax years after 1980 by enactment of the Accelerated Cost Recovery System (ACRS), which has established specific and somewhat limited useful life periods for various sorts of real property. Most depreciable real property (including non-residential real property with an ADR class life of at least 27.5 years) has either a 31.5-year recovery period, or a 27.5-year period (generally consisting of residential rental property), or a 20-year period (consisting of most other kinds of real property). n68

Salvage value is no longer used in calculating depreciable value, and the depreciable value is deducted in shares over the period of time specified under the ACRS. n69 The two longest-life real property categories are depreciated by using the straight-line method, but the 20-year property category may be depreciated by use of either the straight-line or the 150% declining balance method. n70 The rules for calculating depreciation deductions are very complex and should be studied in the primary sources, beginning with the code sections. n71

§ 76.02(b)(4) Alternative Minimum Tax.

An additional tax known as the alternative minimum tax is imposed on certain items of tax liability called tax preference items. The alternative minimum tax is imposed if and to the extent that a specially calculated minimum tax on certain items of income exceeds the taxpayer's regular tax liability. n72 Owners of real property may be liable for

payment of the alternative minimum tax, because certain tax preference items relate directly to real property. These include depletion, charitable contributions of appreciated property, and certain accelerated depreciation and amortization amounts. n73

§ 76.02(c) Taxation of Non-residential Real Property Leases.

§ 76.02(c)(1) Costs of Leasehold Acquisitions.

Certain costs of acquiring a leasehold may be deductible as current business expenses, or may be later deductible as capital improvements whose deductibility is amortized over the life of the improvement. Typical costs incurred in acquiring a leasehold include professional fees, commissions, and payments to buy out existing leases.

If the party obtaining a leasehold is a landlord, the acquisition costs must generally be capitalized. n74 Also a tenant who incurs costs in acquiring or entering into a lease must usually capitalize those costs over the life of the lease. n75 Where the costs of leasehold acquisition are divided between direct acquisition costs and costs for improving the leasehold, the amortization of those expenses may be related to the life of the improvement period, if that period is shorter than the lease term. n76

If a tenant under a commercial lease is required to make certain payments to the landlord in addition to the ordinary rent, those additional payments are considered deductible expenses for the tenant and ordinary income for the landlord. n77 If a security deposit, which is intended to enhance the likelihood that lease terms will be performed, is held by the landlord, the deposit is generally not treated as income, n78 but if the security deposit is eventually treated as advance rent and applied against the tenant's later rental obligation, then it may be taxable to the landlord as ordinary income. n79 A tenant who incurs expenditures in making improvements to the lease may capitalize those costs over the term of the lease, unless there is an option to renew the lease, in which case it may be advantageous to amortize those costs over the life of the improvement. The lease term used for calculating capitalization should not include any period for which the lease may be renewed, extended or continued pursuant to an option exercisable by the lessee. n80

§ 76.02(c)(2) Taxation of Sale-leasebacks.

Special federal income tax rules apply when an owner of property sells the property to another, but immediately receives the property back as lessee of the property. In most sale-leaseback arrangements, the property is leased back to the seller for a long term, and the seller pays all the operational expenses while the rent paid usually offsets the purchase price, giving an acceptable rate of return to the buyer-lessor. Usually the seller-lessee prefers to treat the two portions of the transaction independently, with the sale resulting in gain or loss, and the lease rent considered as an ordinary business expense. If so, then the other ordinary expenses of leasing, such as repairs and insurance, are also deductible. n81 In addition to the deductions for the seller-lessee, the buyer-lessor may claim depreciation deductions, credits, and interest deductions for associated mortgages; rent payments must be reported and taxed as ordinary income.

Because sale-leasebacks are often used by the parties as alternatives for conventional financing, and because the position of the seller changes little after the transaction, the Internal Revenue Service may characterize the transaction as simply a form of borrowing, rather than a change of ownership. This is quite likely to happen if the seller has a right to reacquire the property on favorable terms during or at the conclusion of the lease. For the seller, adverse tax consequences may result from characterizing the transaction as a loan. The parties may not claim a loss on the sale, n82 and the buyer would be a lender and therefore not entitled to some of the tax advantages of ownership. No firm guidance is available to help determine under what circumstances sale-leaseback transactions are considered loans rather than sales. n83

§ 76.02(d) Taxation of Non-residential Real Property Transfers.

§ 76.02(d)(1) Sales.

A major revision in real estate investment strategies occurred in 1986 when the Tax Reform Act repealed the deduction for capital gains. Capital gains, which consist of the appreciation and value of capital assets held for investment, were, through the capital gains deduction, subject to effectively lower rates of taxation when the capital assets were transferred to others. With the elimination of the capital gains deduction in 1986, all net capital gains were required to be completely included in income at the taxpayer's usual rate of taxation. Under present rules, capital gains can be offset by capital losses, and those losses can also offset up to $3,000 per year of ordinary income.

Another important tax consequence related to sales of non-residential real property was promulgated in 1986. For depreciable real property placed in service after 1986, it is no longer necessary to account for depreciation recapture when the property is sold. n84

Property sold by corporate sellers may be subject to double tax, the first tax imposed on the proceeds of the sale as held by the corporation, and, when the proceeds are distributed to shareholders, a second tax on the personal income of the shareholders. If the property, rather than its sale proceeds, is distributed to shareholders, the property's basis determines its fair market value. n85

§ 76.02(d)(2) Installment Sales.

If a taxpayer sold property and received in consideration a cash down payment and a note for the balance, the gain from this entire consideration would be subject to tax in the year the transaction took place. However, federal income tax law includes special rules for installment sales, which generally permit sellers to defer taxation on the unpaid balance until each installment is paid. n86 Property transactions by dealers do not qualify for installment treatment. n87 The installment method is also not available where real property is sold under a revolving credit plan arrangement. Except for certain installment sales of time shares, installment treatment is denied for purposes of the alternative minimum tax. n88

§ 76.02(d)(3) Exchanges.

Under so-called tax-free exchanges, real property that is held for productive use in a trade or business or that is held for investment may be traded for similar property (so-called "like kind" property) without incurring recognition of gain or loss and the usual accompanying tax consequences. n89 Property that is held primarily for sale n90 or exchange n91 does not qualify for the tax-free exchange treatment. While the exchange of properties does not need to occur concurrently, there are time limits within which the exchange must be completed. n92 Generally the transaction must be completed within 180 days. n93 The property obtained in a tax-free exchange assumes the same basis as the property that was given in the exchange, with adjustments for cash consideration or for recognized loss. n94 The tax laws give a broad definition to "like kind" property, permitting, for example, improved property to be exchanged for unimproved property. n95 In recent years, some restrictions have been imposed upon tax-free exchanges of property, so that related persons are not qualified for this tax benefit, if either party disposes of the exchanged property within two years after the exchange, n96 and domestic real property may not be exchanged for foreign real property and qualify for this tax treatment. n97

§ 76.02(d)(4) Foreclosures.

Occasionally real property changes ownership by means of foreclosure. If a borrower-owner defaults on a mortgage, or abandons the property so that a conveyance in lieu of foreclosure has occurred, certain tax consequences for either party may arise. Sometimes the default will be settled by discounting the mortgage obligation, and that results in taxable gain to the mortgagor in the amount of the advantage gained by the favorable discharge terms. n98 A business mortgagor may avoid this attribution of gain if the debt is a qualified business indebtedness, n99 and the basis of the depreciable property is reduced by the excluded amount. n100 For the mortgagee, a discount settlement is deemed a bad debt to the

extent of the discount. This bad debt may be either fully deductible as a business bad debt or treated as a capital loss. n101 If the mortgage as held by the mortgagee was a capital asset and then is sold at a discount to a third party, the discount is treated as a capital loss. n102

When the property is sold at foreclosure sale, the sale proceeds may be either greater or less than the basis of the property, producing a corresponding gain or loss to the mortgagor. n103 The loss may be capital loss or ordinary loss, depending upon the nature of the asset as held by the mortgagor. The potential gain to the mortgagor is reduced to the extent sale proceeds are used to pay property tax or any interest connected with the mortgage. n104

In addition to the gain or loss recognized by the mortgagor, a mortgagee may realize gain or loss at a foreclosure sale to the extent that the fair market value of the property exceeds the amount of the purchase price applied to the indebtedness. If the mortgaged property is actually transferred from the mortgagor to the mortgagee, or abandoned, such transfers are considered sales. n105

§ 76.02(d)(5) Involuntary Conversions.

In addition to the usual method of condemnation by use of eminent domain power, involuntary conversions of real property can also occur by means of destruction, theft, seizure, requisition, or sale under threat of requisition or condemnation. n106 Involuntary conversion also occurs if a property owner negotiates a voluntary sale under threat or imminence of condemnation. n107 While a taxpayer ordinarily must recognize gain or loss (usually gain).

From receipt of awards in condemnation proceedings, this gain may be deferred if, within two years after the year of the involuntary conversion, the conversion proceeds are used to acquire property which is similar to or related in service or use to the converted property. n108 Deferral of gain will occur only if the taxpayer files an election therefor. n109

Chapter 76 TAXATION OF REAL PROPERTY

9-76 Thompson on Real Property, Thomas Editions § 76.03

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 76.03 Federal Income Taxation of Residential Real Property.

[Go To Supp]

§ 76.03(a) Taxation of Residential Real Property Ownership.

§ 76.03(a)(1) Deduction for Moving Expenses.

Ownership of residential real property can make a number of deductions available to individual taxpayers, and among those is the deduction for moving expenses (although a taxpayer does not need to be an owner of real property to qualify for this deduction). The deduction for moving expenses is available upon a change of residence, whether the residence is rented or owned, and it is attractive because it is available even to taxpayers who itemize deductions. In order to qualify as a deduction, the moving expenses must have been incurred by the taxpayer in connection with employment, although employment can include self-employment. The taxpayer must also meet the following additional criteria: the distance between the taxpayer's new principal place of work and former residence must be at least 50 miles farther than the distance between the former residence and the former place of work; and the taxpayer must meet tests of full-time employment for either 39 weeks, or 78 weeks if the taxpayer is self-employed, after the move. n110 In order to qualify for the moving expense deduction, the move must be a requirement of the taxpayer's employment; an employee-initiated transfer is not deductible, even if it benefits the employer and is therefore partially reimbursed. n111

§ 76.03(a)(2) Deduction for Casualty Losses.

The owner of a personal residence, as other taxpayers, may deduct losses caused to the residential property by casualty. n112 A casualty is some sudden, unexpected or unusual event, n113 and there must be a direct relationship between the loss and the cause, n114 and the damage must be permanent. n115 Thus, a steadily operating cause with gradual loss caused by the taxpayer's neglect would not constitute a casualty loss.

The deduction for casualty losses is limited in several ways. It may be computed by one of two alternative formulas, n116 it is subject to reduction by $100 per cause, n117 and further reduced by 10% of the taxpayer's adjusted gross income, n118 by any insurance reimbursements, and by any other contributions or compensation received for replacing the loss. The casualty loss deduction should be claimed in the year in which the loss was sustained n119 or in which the loss was first discovered. n120 The casualty loss deduction does not include incidental expenses connected with the

casualty, n121 and the deduction may not exceed the basis of the property on which the casualty loss was inflicted. n122 Special tax relief provisions are in effect for property owners in federally designated disaster areas. n123

§ 76.03(a)(3) Deduction for Mortgage Interest.

A taxpayer who pays interest on a mortgage that encumbers a personal residence may usually deduct the amount of interest paid from taxable personal income. This deduction may be claimed by a taxpayer who itemizes deductions, n124 and in the tax code the deductible mortgage interest is referred to as "qualified residence interest." The mortgage interest is deductible if it is interest on a security interest, perfected under local law on a qualified residence. n125 The interest deduction applies to interest paid or accrued on "acquisition indebtedness," of up to one million dollars, when that debt is used to buy, build or improve the taxpayer's qualified residences and the debt is secured by those residences. n126 The interest paid on "home equity indebtedness," which is any other debt secured by qualified residence, is also deductible by the taxpayer to the extent that such indebtedness does not exceed the fair market value of the residence, is reduced by any outstanding acquisition indebtedness, and, in any event does not exceed $100,000. n127

Various kinds of payments have been deemed to be deductible mortgage interest. Among these are interest on a loan to purchase stock in a housing cooperative, n128 "points" paid by the taxpayer n129 unless the "points" are paid for separately identifiable services n130 (as is always the case with VA or FHA loans), n131 prepayment penalties, n132 and certain other payments considered to be penalties, such as for collection forbearance. n133 Penalties generally are not deductible for individual taxpayers, and a taxpayer who pays interest on an assumed debt is considered to have made a non-deductible capital expenditure, rather than having paid interest. n134

Mortgage interest is not deductible unless and until it is actually paid. If the mortgage debtor merely increases the amount of the loan from the creditor to cover current interest without actually making the payment, that is not considered a deductible payment. n135 Also the deduction must be taken in the year that the interest is actually paid. n136

§ 76.03(a)(4) Deduction for Property Taxes.

Property taxes are deductible by the taxpayer on whom the property taxes are imposed. n137 Some assessments against property that are labeled as "property taxes" are not deductible because they are considered to be assessments other than property taxes. For instance, taxes that are assessed for local benefits and improvements are not deductible but rather are considered as fees for services or payments for capital assets or improvements. n138 Thus, a tax imposed for the purpose of retiring municipal bonds is a deductible tax, n139 but a real estate transfer tax n140 or a tax which is being contested and has not yet been paid is not deductible. n141

If a tax or assessment is used to repair or maintain an improvement, or to pay interest charges attributed to the improvement, a deduction will be allowed. n142

If an assessment against property, which would ordinarily not be deductible as a tax, is eventually used for services that benefit the public generally, the assessment will be considered a tax and treated as deductible. n143

If a property tax deduction applies to property that is sold during the tax year, the deduction is apportioned between the buyer and seller taxpayers. n144

§ 76.03(a)(5) Deductions for Business Use of Personal Residence.

Under certain rather narrow circumstances, expenses incurred by a taxpayer using residential property for business or for the production of income may qualify for business use deductions. Such situations commonly arise when part of the personal residence is used as an office, or as a house on a farm, or an apartment in a multiple-unit dwelling owned by

the taxpayer, or an apartment connected with the taxpayer's store. Among the strict limitations on this deduction are that the business use of the residence must be regular, n145 and exclusive, n146 as the principal place of business, or as a place where business is conducted. n147

If the business use of a residence deduction is claimed by an employee, the business use of the residence must be for the convenience of the employer. n148 If a deduction is claimed for business use of the residence that is merely storage of inventory, the residence must be the sole fixed location of the business. n149

The deduction for business use of residence is usually limited in amount by the amount of gross income from that use, as reduced by certain expenses. n150 Examples of business expense deductions relating to use of the residence include repairs, utilities, loss of property, and depreciation. n151

§ 76.03(b) Taxation of Residential Real Property Transfers.

The starting point or initial presumption of federal tax treatment of residential real property transfers is that the "gain" from the sale or exchange of that property is a taxable capital gain. Under some circumstances, that gain from the sale or purchase of a residence may qualify for nonrecognition. Most of the nonrecognition rules apply to the gain from the sale of a "principal residence." n152

The tax laws and rulings give no comprehensive definition of what constitutes a "principal residence," because of the great variety in forms of home ownership. n153

If the sale or exchange of residential real property results in a loss, that loss is not deductible to the individual taxpayer, except to the extent that the residential property was used for business or for production of income. n154

Determining that gain has resulted from a sale of a personal residence is only the first step in calculating the tax. Next it must be determined if the gain has been realized. Gain from the sale of a principal residence is realized only to the extent that the "amount realized" (which is the purchase price of the old residence less the expenses of the sale) n155 exceeds the adjusted basis of the old residence. n156 Then it must be determined to what extent the gain realized is also the gain recognized. Realized gain is recognized gain only to the extent that the "adjusted sales price" (which is the amount obtained for the old residence reduced by the sale and fixing-up expenses) exceeds the cost of purchasing the new residence. n157 Sale expenses usually include such items as advertising costs, commissions, document preparation fees, other service and professional fees, title insurance, and telephone expenses. n158 Sometimes the distinction must be made between expenses which are used simply to fix up an old residence, n159 and those that add a substantial improvement and which would then be capital expenditures adding to the basis of the residence. n160 Fixing up expenses are not included among the deductible expenses of sale, unless they have been incurred not more than 90 days before the contract of sale is executed and paid within 30 days after the sale takes place. n161

In calculating the cost of purchasing a new residence, the taxpayer may include the cash consideration paid, the indebtedness on the property which has been assumed, and any other liabilities assumed by the taxpayer as part of the consideration for the purchase. n162 Other purchase expenses such as commissions are also deductible. n163 Some purchase expenses such as escrow fees, loan charges, attorney fees, and title costs, may be deductible under other provisions of the tax law, such as the provisions creating a tax deduction for moving expenses. If such expenses are so deducted under some other provision, they should not be added to the cost of purchasing the new residence. Purchase costs may also include any capital expenditures for the reconstruction or improvement of the premises. n164

Nonrecognition of gain rules do not apply if the taxpayer sells the land, but keeps the dwelling and moves it to a new lot which has been purchased within the appropriate time period specified by the tax law. n165 If one residence is exchanged for another residence, the cost of the purchase is the fair market value of the new residence. n166 If a residence is acquired by gift, inheritance or devise, that acquisition is not considered a purchase. n167

As mentioned above, the gain from the sale or exchange of a principal residence is recognized only to the extent that the sale price or the exchange value, reduced by certain costs and expenses, exceeds the purchase consideration and the costs associated with the new property obtained, and so long as the new purchase occurs within certain time limits. The basic time limit is that the purchase and occupancy of the new residence must take place within two years after sale of the old residence, whether the new residence already exists or must be newly constructed. n168

In the case of an installment sale, the applicable state property transfer law determines the date of the sale. n169 If the construction of the new residence has begun before the sale of the old residence, only those construction costs that were incurred within the applicable statutory period are considered to be costs of the new purchase. n170 Accordingly only those costs of improvements and reconstruction that are made within the applicable time period are considered costs of purchase. n171 The cost of the new residence to the taxpayer is its basis, unless some gain from the sale of the old residence has not been recognized; in that case, the basis for the new residence is reduced by the amount of the unrecognized gain. n172 If the real property that is obtained is only partially used as a residence, then appropriate allocations of costs and gains must be made. n173

In order to qualify for this nonrecognition treatment, the taxpayer who sells the old residence must be the same taxpayer who buys the new residence, unless one of the parties is the taxpayer's spouse. Married taxpayers may sell a residence which one of them holds solely or which they hold in concurrent ownership, and the married taxpayers may also acquire the new property individually or in concurrent ownership, if the proper consent has been filed with the Internal Revenue Service. n174 Except for certain grantor trusts, a trust does not usually qualify for the benefit of the nonrecognition provisions. n175

Other special tax benefits for the sale of a principal residence also apply to older taxpayers. A taxpayer who is at least 55 years old and who sells a dwelling that was used as the principal residence for at least three of the five years preceding the sale, may exclude up to $125,000 of the gain from the sale of that residence. n176 A taxpayer who wishes to rely on this exclusion is not required to purchase a new residence for that purpose. When a residence is held by married taxpayers, only one of whom is at least 55 years old, the exclusion provision still applies upon the sale of that property. n177 The taxpayer is not required to take this exclusion, but is required to file an election to take advantage of the exclusion; such election may be made only once by the taxpayer or the taxpayer's spouse, n178 unless any previous elections have been revoked. n179 Other rules relate to the reporting of recognized gain on installment sales n180 and limit or defer the recognition of gain when property is reacquired in order to satisfy indebtedness. n181

In installment sales, a seller who receives at least one payment in the year after the year of the sale may recognize gain but not loss. n182 Thus, the income recognized in the year it is received is that "proportion of the payments received in that year which the gross profit (realized or to be realized when the payment is completed) bears to the total contract price." n183

Chapter 76 TAXATION OF REAL PROPERTY

9-76 Thompson on Real Property, Thomas Editions § 76.04

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 76.04 Federal Estate Taxation of Real Property.

[Go To Supp]

No special federal estate tax rules apply to real property; the same rules apply to both real and personal property. It also does not matter whether a decedent's estate is submitted to probate or not; the estate tax may be imposed on property whether or not it has been probated. Not all property of the decedent is subject to federal estate tax. The estate must determine what property is subject to estate tax by first determining the gross estate and then reducing that amount by various available deductions.

The gross estate, for federal estate tax purposes, consists of "the value of all property to the extent of the interests therein of the decedent at the time of his death." n184 Even property with conditional or limited ownership by the decedent is included in this definition, e.g., property transferred with a retained life estate, n185 property transferred at death, n186 and property transferred with a retained power to alter, amend, or revoke. n187 Property that was held by the decedent in joint tenancy is included in the estate to the extent of the value the decedent contributed to its acquisition or improvement. n188 In order to discourage certain transfers to avoid the estate tax, federal estate tax law includes within the decedent's gross estate the value of property interests transferred by the decedent within three years of the decedent's death. n189

Once the gross estate has been calculated, that amount may be reduced by certain expenses; the resulting amount is the "taxable estate." The expenses usually deducted from the amount of the gross estate include funeral and estate administration expenses, n190 the amounts of valid claims against the estate, n191 the amounts of mortgages and other indebtedness relating to the property in the gross estate, marital property settlement amounts, n192 losses, n193 charitable contributions, n194 and bequests to the surviving spouse. n195 Both the value of the gross estate and the value of the taxable estate (which is the amount of the gross estate less the amount of qualified deductions), are determined as of the date of the decedent's death or, at the election of the executor, as of six months after the date of decedent's death. n196

Once the taxable estate has been determined, then an estate tax may be computed according to a rate table showing tax rates, ranging from 18% of the first $10,000 of the taxable estate to 55% of taxable estate amounts over $3,000,000.

n197 From this amount of tax are then deducted various credits, including most importantly the unified credit. The unified credit is a credit against the first $192,800 of the federal estate tax n198 and, if fully applied, would mean that the taxable estate would have to amount to about $600,000 before federal estate taxation would have any impact. Indeed, a federal estate tax return is not even required, unless the decedent's estate amounts to more than $600,000. n199

This unified credit is a credit that is also shared under the rules for the federal gift tax. The credit is "unified" in the sense that if any of the credit has been used to excuse payment of gift tax during the decedent's lifetime, then to that extent the credit is not available against the decedent's estate's federal estate tax liability.

In addition to the unified credit, other credits available under the federal estate tax rules are credits for state death taxes, n200 federal gift taxes, n201 taxes on prior transfers, n202 and foreign death taxes. n203

A special estate tax lien attaches to all the property included in the decedent's gross estate as of the date of decedent's death. n204 This lien comes into existence immediately upon the death of the decedent, and exists without assessment, demand or determination of the tax. Even though the lien is not normally filed, foreclosure of the lien may be enforced even against parties who purchase the property without knowledge of the lien. n205 Rather than be saddled with such a lien, an executor may apply for a special lien on property that will suffice to pay for the taxes and the interest connected with the estate and which payment would then release the executor from personal liability. n206 In addition to the special estate tax lien, a general lien for other taxes is imposed upon the property of any person liable for tax. n207

Chapter 76 TAXATION OF REAL PROPERTY

9-76 Thompson on Real Property, Thomas Editions § 76.05

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 76.05 Federal Gift Taxation of Real Property.

Certain gifts of real property made by a taxpayer are subject to the federal gift tax. n208 From this liability for gift taxation, a taxpayer may exclude up to $10,000 of taxable gifts per donee per year, when the gifts are of present interests in property. n209 If the taxpayer's spouse joined in making the gift, the exclusion is doubled to $20,000 per donee per year. n210 Also excluded from liability for gift tax are all amounts paid for tuition on behalf of a donee to an educational institution, or amounts paid for medical services on behalf of a donee to a health care provider. n211 Additional exclusions apply to donative transfers between spouses, if the parties are married at the time of the gift, if the donor is a citizen or resident of the United States, and if the interest donated is not subject to termination upon the passage of time or upon the occurrence of particular circumstances or events. n212

The same tax rate in effect for the federal estate tax is also in effect for the federal gift tax. n213 Once the property subject to federal gift tax has been determined, and the federal gift tax rate has been applied, the gift tax is established and then the taxpayer may offset against that gift tax any available credits, including the unified credit referred to in the discussion on federal estate tax. The gift tax is paid and the gift tax return must be filed, if required at all, annually and not later than April 15. n214 A gift tax return is required for any year in which a gift is made other than gifts covered by the annual exclusion or by the exclusion of gifts for educational and medical purposes. n215

Chapter 76 TAXATION OF REAL PROPERTY

9-76 Thompson on Real Property, Thomas Editions § 76.06

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 76.06 Federal Taxation of Entities That Own Real Estate.

[Go To Supp]

§ 76.06(a) Corporations.

New "Simplification of Entity Classification Rules" became effective January 1, 1997, promulgated as Internal Revenue Regulations § 301.7701-1 to § 301.7701-3. These "check-the-box" rules automatically classify certain organizations as corporations, while other organizations may choose their classification. A business entity -- any entity not classified as a trust -- with only a single member is classified as a corporation or treated as an entity not separated from its owner, such as a sole proprietorship, or a branch or division of the owners. A business entity with two or more members can be classified as either a corporation or a partnership.

Corporations may own real estate and may be taxed as realty-owning entities. Corporations are subject to some special rules for determining taxable income and are also subject to a separate tax rate structure. n216 An entity is treated as a corporation for federal tax purposes if its organization exhibits most of the characteristics of corporations, including the presence of associates, the pursuit of business, the division of profits, continuity, centralized management, limited liability, and transferability of interests. n217 For tax purposes, corporate entities may consist of associations, joint stock companies, and insurance companies. n218

Under some circumstances, smaller corporations may elect not to be taxed as corporations. These entities are known as small business corporations or sub-chapter S Corporations, and rather than being taxed as corporations, they are treated as conduits of income, losses deductions, and credits for the individual shareholders. n219

§ 76.06(b) Partnerships.

Partnerships as entities are not taxable, but they are required to report information relating to tax liability, which information may then be used to establish tax liability of partners for their partnership activities. A partnership tends to be a catch-all entity, a label attached to an entity which is not a corporation, an estate, or a trust. n220 Partnerships are treated as conduits for the income, losses, deductions, and credits pertaining to individual partners. Thus, the income items and deductions generated by partnership activities are included by partners in their individual tax returns as appropriate for their respective partnership or distributed shares. n221 Accordingly, a partner may claim a loss

deduction relating to partnership activities only up to the amount of the adjusted basis of the partner's interest in the partnership. n222 These principles apply to limited partnerships as well as to general partnerships. n223

§ 76.06(c) Trusts.

Trusts may also own property, although the form of ownership usually involves title in the name of the trustee, who then holds the property for passive beneficiaries. Such trusts are entities subject to taxation, but any taxable income of such a trust is reduced by deductions for distributions of income to beneficiaries. n224 Beneficiaries in turn, are taxed on their distributions from the trust, and any such distributions from a trust have the same character in the hand of the beneficiaries as they had for the trust. n225

If a trust has been created for the purpose of carrying on a business, and the trustees are active managers of the business, the trust may be considered a business trust and subject to tax treatment as a corporation. n226 As an owner of real property, a real estate investment trust would normally be taxable as a corporation, but may avoid the so-called "double tax" on corporations by deducting from income any amount distributed to the investors as dividends. n227

§ 76.06(d) Limited Liability Companies (LLC).

The limited liability company (LLC), an entity that offers limitation on liability to its members, is taxed as a partnership. To qualify to be taxed as a partnership, the LLC must have not more than two of the following characteristics of a corporation: continuity, limited liability, free transferability of interests, and centralized management. Some states have LLC enabling statutes that are especially flexible, and to these the Internal Revenue Service gives no automatic assurance that LLCs authorized in those states will enjoy partnership taxation status. n228 In some LLCs a member is able to receive a property distribution with no tax liability on either the member or on the LLC. n229 An LLC can also offer greater flexibility in allocating gains, losses, deductions, and credits. LLCs have no shareholder restrictions, and the basis of each membership is tied to the member's share of LLC debt, which may increase the opportunity for the member to deduct losses.

Chapter 76 TAXATION OF REAL PROPERTY

9-76 Thompson on Real Property, Thomas Editions § 76.07

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 76.07 Federal Taxation of Foreign Ownership in U.S. Real Property.

[Go To Supp]

Under older American tax law, it was possible for foreign investors in American real property to avoid most gains from transfer of that property. Consequently, Congress in 1980 enacted the Foreign Investment and Real Property Tax Act (FIRPTA), to correct those conditions. n230 FIRPTA governs real property transactions occurring after June 18, 1980. The general approach of FIRPTA is to subject foreign investors in real property to the same tax rules that would apply if the transactions were conducted by a domestic trade or business. To certain transactions, FIRPTA also attaches a special alternative minimum tax. FIRPTA also imposes additional withholding and reporting requirements for real estate transactions conducted by foreign entities.

FIRPTA applies to transactions in foreign-held American real property interests, including those interests that are owned directly by a taxpayer or owned by a United States real property holding corporation. n231 An ordinary corporation is deemed to be a holding corporation if the fair market value of its American real property interests is one-half or more of all the corporation's real property interests and its assets are used in a trade or business. Real property interests here included are fee ownership, leaseholds, options to require either a fee or leasehold interest, and related personal property. n232

When a foreign investor directly disposes of an American real property interest, the investor is taxed on the value received as if the investor were connected with an American trade or business.

The property interest subject to that tax may include stock in the United States real property holding corporation. If any of those taxable interests are held by partnerships, trusts, or estates, the tax is to be apportioned among the beneficial owners of those business associations when those respective interests are distributed. n233 If the foreign investor is also a non-resident alien, a special alternative minimum tax applies to the lesser of the taxpayer's alternative minimum taxable income or to the gain from American real property for the taxable year. n234 The foreign investor subject to the FIRPTA tax is also entitled to the benefits of any applicable nonrecognition provision for exchanges of American property interests, unless those interests, if sold, would not be subject to taxation. n235

After 1984, FIRPTA overrides the terms of American tax treaties exempting foreign investors from taxation of gain from transactions involving American real property interests. n236 Any foreign company affected by the overriding of these treaties may elect to be treated as a domestic company for purposes of FIRPTA. n237

FIRPTA also imposes certain withholding requirements, so that the transferee of an American real property interest which has been conveyed by a foreign taxpayer must deduct and withhold 10% of the amount realized on the transaction, unless otherwise exempt. n238 Exceptions from these withholding requirements exist in the following situations: (1) If the transferor gives an affidavit along with the transferor's United States tax identification number stating that the transferor is not a foreign person; n239 (2) if the interest disposed of is in a domestic corporation, and the corporation provides an affidavit stating that it is not and has not been a United States real property holding corporation during a specified particular period of time; n240 (3) if the transferee obtains from the Secretary of the Treasury a qualifying statement to the effect that the transferor is tax exempt, has paid the tax, or has provided adequate security for the tax; n241 (4) if the property being sold is a residence which is to be used as a residence and the amount realized is under $300,000; and (5) if the transaction includes stock regularly traded on an established securities market. n242

The trustee or executor of an American partnership, trust, or estate must withhold 35% (or, in some instances, 28%) of the gain realized by a foreign person who is a partner or beneficiary of an American partnership, trust, or estate. n243 More comprehensive withholding requirements have generally replaced most of the older reporting requirements under FIRPTA. Only those foreign persons holding direct investments in American real property are required to submit an information return. n244 This requirement is applied to foreign persons not engaged in an American trade or business during the tax year and whose domestic property interests are valued at more than $50,000. n245

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 76.08 State Taxation of Real Property Interests.

[Go To Supp]

The following summary indicates the types of tax imposed on real property by each of the states. The descriptions of items taxed are intended to highlight the types of real property that are taxed, and are not comprehensive descriptions of all other types of property subject to that tax.

§ 76.08(a) Alabama.

§ 76.08(a)(1) Property Tax.

Property subject to tax: All nonexempt real property. n246

Rate of state levy: 0.65% of assessed value. n247

Ratio of assessed value to fair market value: 30% for property of utilities used in the utility business; 20% for property not otherwise classified; 10% for agricultural, forest, single-family owner-occupied residential property, historic buildings and sites; 15% for private passenger cars and pickup trucks of 8,000 pounds or less not operated for hire, rent or compensation. n248

§ 76.08(a)(2) Transfer and Recording Taxes.

§ 76.08(a)(2)(i) Tax on Instruments Conveying Real Property.

Items subject to tax: Deeds, bills of sale, and other instruments conveying real property interests, except mortgage transfers on which the mortgage tax has been paid, deeds for nominal consideration to perfect title; re-recordations to correct deeds or mortgages. n249

Rate: 50 cents per $500 or fraction thereof of the actual value of the property at the time of the conveyance. n250

§ 76.08(a)(2)(ii) Tax on Instruments Securing Debt With Real Property in the State.

Items subject to tax: Mortgages, deeds of trust, and other instruments security debt with real property in the state. n251

Rates: 15 cents per $100 or fraction thereof of initial indebtedness. On instruments securing open-ended or revolving indebtedness on residential real property, 15 cents per $100 or fraction thereof of the maximum principle indebtedness to be secured. n252

§ 76.08(a)(2)(iii) Tax on Mineral Documents.

Items subject to tax: Leases, deeds, or other instruments creating, conveying, extending, excepting, or reserving an interest in and to any non-producing oil, gas, or other minerals in the states, except foreclosure instruments or other instruments that create a lien on such interests. n253

Rates: 5 cents per acre conveyed for terms of 10 years or less, 10 cents per acre for terms of 10 to 20 years, and 15 cents per acre for terms of more than 20 years. n254

§ 76.08(a)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n255

§ 76.08(a)(4) Generation-skipping Transfer Tax.

Equal to the credit allowed under federal generation-skipping tax law. n256

§ 76.08(b) Alaska.

§ 76.08(b)(1) Property Tax.

Property subject to tax: No state general property tax. Cities may assess property taxes. Real property used or committed for use in oil and gas activities is subject to state and local tax. n257

Rate of state levy: For property used in oil and gas activities 20 mills for each dollar of full value.

§ 76.08(b)(2) Estate Tax.

Equal to the credit allowed under federal estate tax law. n258

§ 76.08(c) Arizona.

The following Arizona property tax provisions are repealed effective January 1, 1999.

§ 76.08(c)(1) Property Tax.

Property subject to tax: All nonexempt real property. n259

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 13 classes of property, with ratios varying from 25% to 1%. n260

§ 76.08(c)(2) Estate Tax.

Equal to the credit allowed under federal estate tax law. n261

§ 76.08(c)(3) Generation-skipping Transfer Tax.

The state tax is a fraction of the amount of tax allowed under federal law, the fraction being comprised of the value of the estate subject to Arizona tax divided by the value of all property in the generation-skipping transfer. n262

§ 76.08(d) Arkansas.

§ 76.08(d)(1) Property Tax.

Property subject to tax: All nonexempt real property. n263

Rate of state levy: None.

§ 76.08(d)(2) Tax on Instruments Conveying Real Property.

Items subject to tax: Instruments conveying interests in real property. n264

Rate: $3.30 per $1000 or fraction thereof when the consideration paid is in excess of $100. n265

§ 76.08(d)(3) Estate Tax.

Equal to the credit allowed under the federal estate tax law. n266

§ 76.08(e) California.

§ 76.08(e)(1) Property Tax.

Property subject to tax: All nonexempt real property. n267

Rates of state levy: None.

§ 76.08(e)(2) Tax on Instruments Conveying Real Property.

Items subject to tax: Counties and cities may tax instruments conveying real property when the consideration in the transaction exceeds $100. n268

Rates: 55 cents per $500 or fraction thereof. Some reciprocal credits are allowed. n269

§ 76.08(e)(3) Estate Tax.

Equal to the credit allowed under the federal estate tax law. n270

§ 76.08(e)(4) Generation-skipping Tax.

Equal to the federal credit allowed. n271

§ 76.08(f) Colorado.

§ 76.08(f)(1) Property Tax.

Property subject to tax: All nonexempt real property. n272

Rate of state levy: Varies.

Ratio of assessed value to fair market value: Varies from 21% to 29%. n273

§ 76.08(f)(2) Tax on Instruments Conveying Real Property.

Items subject to tax: Instruments conveying title to real property. n274

Rates: 1 cent per $100 or major fraction thereof when the total net consideration exceeds $500. n275

§ 76.08(f)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n276

§ 76.08(f)(4) Generation-skipping Transfer Tax.

Equal to the maximum credit allowed under federal law. n277

§ 76.08(g) Connecticut.

§ 76.08(g)(1) Property Tax.

Property subject to tax: All nonexempt real property. n278

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 70%. n279

§ 76.08(g)(2) Tax on Transfers.

§ 76.08(g)(2)(i) Tax on Instruments Conveying Real Property.

Items subject to tax: Instruments conveying interests in real property. n280

Rates: If property is not residential except unimproved land the tax is 1% of consideration, but if property is residential then tax rate is .5% for amount less than or equal to $800,000 and 1% for portion exceeding $800,000. If mortgage is secured by property and delinquent greater than 6 months then rate to be .5%. n281

§ 76.08(g)(2)(ii) Tax on Farm and Forest Land Conveyances.

Items subject to tax: Sales or reclassifications of land classified as open space, farmland, or forest land, if the transfer or change occurs within 10 years of acquisition. n282

Rates: The rates are varying percentages applied to the sales price, or if there was no sale, to the fair market value. The percentage rate indicated below is applied according to how long after ownership or acquisition the sale or classification change occurs:

Within first year:
10%.

Within second year:

9%.

Within third year: 8%.

Within fourth year: 7%.

Within fifth year: 6%.

Within sixth year: 5%.

Within seventh year: 4%.

Within eighth year: 3%.

Within ninth year: 2%.

Within tenth year: 1%.

After tenth year: No tax. n283

§ 76.08(g)(3) Succession and Transfer Tax.

A tax is imposed on transfers by will, by descent and distribution of property upon the death of the owner, in contemplation of the death of the owner, and similar transactions. The rate of tax varies with the class of donee and the application of exemptions and includes a surcharge. n284

§ 76.08(g)(4) Estate Tax.

Equal to the credit allowed under the federal estate tax law. n285

§ 76.08(h) Delaware.

§ 76.08(h)(1) Property Tax.

Property subject to tax: All nonexempt real property. n286

Rate of state levy: None.

§ 76.08(h)(2) Tax on Instruments Conveying Real Property.

Items subject to tax: Any document presented for a recording, certain condominium agreements, and transfers of beneficial real property interests through conveyances of certain intangible interests in corporations, partnerships, and trusts. n287

Rates: 2% of the value of the property, if the value is more than $100. The rate of tax on documents for construction is 1% on amounts in excess of $10,000. n288

§ 76.08(h)(3) Estate Tax.

Equal to the difference between the state inheritance tax and the maximum credit under the federal estate tax law. n289

§ 76.08(h)(4) Inheritance Tax.

The amount of this tax varies according to the share of the gross estate obtained and the class of the heir. n290

§ 76.08(i) District of Columbia.

§ 76.08(i)(1) Property Tax.

Property subject to tax: All nonexempt real property. n291

Rate of district levy: Varies.

Ratio of assessed value to fair market value: 100%. n292

§ 76.08(i)(2) Transfer Taxes.

§ 76.08(i)(2)(i) Tax on Deeds.

Items subject to tax: Deeds submitted for recording. n293

Rates: 1.1% of the consideration paid for the deed, except that for deeds evidencing a transfer of an economic interest in real property in the District of Columbia, the rate is 2.2% of the higher of the assessed value or the sales price. n294

§ 76.08(i)(2)(ii) Transfer Tax on Real Property.

Items subject to tax: All transfers of real property interests. n295

Rates: 1.1% of the consideration paid for the transfer, with a minimum $1.00 tax. n296

§ 76.08(i)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n297

§ 76.08(j) Florida.

§ 76.08(j)(1) Property Tax.

Property subject to tax: All nonexempt real property. n298

Rate of state levy: None. n299

§ 76.08(j)(2) Transfer Taxes.

§ 76.08(j)(2)(i) Tax on Instruments Relating to Land.

Items subject to tax: Deeds, instruments, or writings conveying any interest in real property, including documents granting occupancy to a tenant-stockholder in a cooperative apartment corporation. n300

Rates: 70 cents per $100 or fraction thereof of the consideration for the transaction. n301

§ 76.08(j)(2)(ii) Tax on Evidences of Indebtedness.

Items subject to tax: Mortgages, trust deeds, security arrangements, and other evidences of indebtedness filed or recorded in the state. n302 A conveyance between spouses of an interest in the marital home pursuant to a divorce action is not subject to this tax.

Rates: 35 cents on each $100 or fraction thereof of the indebtedness or obligation. n303

§ 76.08(j)(2)(iii) Tax on Notes and Other Payment Obligations Secured by Real Property.

Items subject to tax: Notes, bonds, and other obligations for payment of money to the extent they are secured by a mortgage, deed of trust, or other lien upon real property in the state. n304

Rates: Two mills for each dollar of the value of the obligation. n305

§ 76.08(j)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n306

§ 76.08(j)(4) Generation-skipping Transfer Tax.

Equal to the amount allowed as a credit for state legacy taxes. n307

§ 76.08(k) Georgia.

§ 76.08(k)(1) Property Tax.

Property subject to tax: All nonexempt real property. n308

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 40%, except agricultural land, which is assessed at 75% of the value of other land. n309

§ 76.08(k)(2) Tax on Instruments Conveying Real Property.

Items subject to tax: Instruments conveying real property interests for any net consideration over $100. n310

Rates: $1.00 for the first $1,000 or fraction thereof, and 10 cents for each additional $100 or fraction thereof of the net consideration for, or net value of, the interest conveyed. n311

§ 76.08(k)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n312

§ 76.08(l) Hawaii.

§ 76.08(l)(1) Property Tax.

Property subject to tax: All nonexempt real property. n313

Rate of state levy: None. n314

§ 76.08(l)(2) Transfer Taxes.

§ 76.08(l)(2)(i) Tax on Instruments Conveying Real Property.

Items subject to tax: Instruments conveying real property interests. n315

Rates: 10 cents per $100 of actual consideration, with a minimum of $1.00. Special rules exist for computing the taxable values of leaseholds. n316

§ 76.08(l)(2)(ii) Withholding Tax on Transfers by Non-residents.

Items subject to tax: A transferee must withhold the tax if the transferor is a non-resident. n317

§ 76.08(l)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n318

§ 76.08(m) Idaho.

§ 76.08(m)(1) Property Tax.

Property subject to tax: All nonexempt real property. n319

Rate of state levy: None.

§ 76.08(m)(2) Estate Tax.

Equal to the credit allowed under federal estate tax law. n320

§ 76.08(n) Illinois.

§ 76.08(n)(1) Property Tax.

Property subject to tax: All nonexempt real property. n321

Rate of state levy: None.

§ 76.08(n)(2) Transfer Taxes.

§ 76.08(n)(2)(i) State Tax on Real Property Transfers.

Items subject to tax: Transfers of real property interests. n322

Rates: 50 cents per $500 or fraction of value, which value does not include the value of outstanding mortgages on the property at the time of the transfer. n323

§ 76.08(n)(2)(ii) County Tax on Real Property Transfers.

Items subject to tax: Counties are authorized to tax real estate transfers and transfers of beneficial interests in land trusts within the county. n324

Rates: 25 cents per $500 of the full consideration. n325

§ 76.08(n)(3) Estate Tax.

Equal to the maximum credit allowed under federal estate tax law, with adjustments for portions of the estate not in Illinois. n326

§ 76.08(n)(4) Generation-skipping Transfer Tax.

Equal to the maximum credit allowed under federal law, with adjustments for portions of the transferred property outside Illinois. n327

§ 76.08(o) Indiana.

§ 76.08(o)(1) Property Tax.

Property subject to tax: All nonexempt real property. n328

Rates: *State:* Tax rate is limited to one cent on each $100 of valuation. Effective March 1, 2001, the limit is $.0033 per $100 of assessed valuation. n329

Local: In all incorporated cities and towns, the total tax rate is limited to $.6667 on each $100 of valuation, n330 and in all unincorporated areas the total tax rate is limited to $1.25 (effective March 1, 2001, $.4167) on each $100 of valuation. n331

Ratio of assessed value to fair market value: 33 1/3%. n332

§ 76.08(o)(2) Estate Tax.

Equal to the credit allowed under federal estate tax law. n333

§ 76.08(o)(3) Inheritance Tax.

Varies according to the class of donee and applicable exemptions. n334

§ 76.08(p) Iowa.

§ 76.08(p)(1) Property Tax.

Property subject to tax: All nonexempt real property. n335

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 100%, with variations for agricultural, residential, commercial, and industrial property. n336

§ 76.08(p)(2) Tax on Instruments Conveying Real Property.

Items subject to tax: Instruments conveying real property interests. n337

Rates: 80 cents per $500 or fraction thereof of consideration exceeding $500. n338

§ 76.08(p)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n339

§ 76.08(p)(4) Generation-skipping Transfer Tax.

Equal to the credit allowed under federal law. n340

§ 76.08(p)(5) Inheritance Tax.

Varies according to the class of donee and applicable exemptions. n341

§ 76.08(q) Kansas.

§ 76.08(q)(1) Property Tax.

Property subject to tax: All nonexempt real property. n342

Rate of state levy: Varies.

Ratio of assessed value to fair market value: Varies between 11.5% and 30% for 7 classes of real property. n343

§ 76.08(q)(2) Tax on Real Estate Mortgages.

Items subject to tax: All real estate mortgages. n344

Rates: 0.26% of principal debt or obligation secured by instrument or major fraction thereof. n345

§ 76.08(q)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law as of 1981. n346

§ 76.08(q)(4) Generation-skipping Tax.

Equal to the credit allowed under federal law. n347

§ 76.08(q)(5) Inheritance Tax.

Varies according to the class of donee and the applicable exemptions. n348

§ 76.08(r) Kentucky.

§ 76.08(r)(1) Property Tax.

Property subject to tax: All nonexempt real property. n349

Rate of state levy: Up to 31.5 cents per $100.

Ratio of assessed value to fair market value: 100%. n350

§ 76.08(r)(2) Tax on Instruments Conveying Real Property Interests.

Items subject to tax: Any instrument, except a will or lease, by which any Kentucky real property interest is conveyed. n351

Rates: 50 cents per $500 or a fraction thereof of value. n352

§ 76.08(r)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n353

§ 76.08(r)(4) Inheritance Tax.

Varies according to the class of donee and the applicable exemptions. n354

§ 76.08(s) Louisiana.

§ 76.08(s)(1) Property Tax.

Property subject to tax: All nonexempt real property. n355

Rate of state levy: Varies.

Ratio of assessed value to fair market value: Varies from 10% to 25%. n356

§ 76.08(s)(2) Estate Tax.

Equal to the credit allowed under federal estate tax law. n357

§ 76.08(s)(3) Inheritance Tax.

Varies according the class of donee and the applicable exemptions. n358

§ 76.08(s)(4) Gift Tax.

For amounts that exceed the annual exclusion and lifetime exemptions, 2% for gifts up to $15,000, and 3% for gifts over $15,000. n359

§ 76.08(t) Maine.

§ 76.08(t)(1) Property Tax.

Property subject to tax: All nonexempt real property. n360

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 100%. n361

§ 76.08(t)(2) Tax on Transfers of Real Property Interests.

Items subject to tax: Documents which transfer title to real property. n362

Rates: $2.20 per $500 or a fraction thereof, the tax to be imposed 2 on the grantor and 2 on the grantee. n363

§ 76.08(t)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n364

§ 76.08(u) Maryland.

§ 76.08(u)(1) Property Tax.

Property subject to tax: All nonexempt real property. n365

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 40% for most real property. n366

§ 76.08(u)(2) Transfer Taxes.

§ 76.08(u)(2)(i) Tax on Recording of Written Documents.

Items subject to tax: Written instruments transferring real property interests, which instruments are submitted for recording or filing. n367

Rates: The rates vary but must be applied to each $500 or fraction thereof of consideration. The rate is $1.65 for articles of transfer, articles of merger, or articles of consolidation relating to foreign corporations or foreign limited partnerships. n368

§ 76.08(u)(2)(ii) Tax on Real Property Transfers.

Items subject to tax: Any written instrument transferring a real property interest submitted for recording. n369

Rates: The rate is one-half of 1% of the consideration payable for the transfer, except that the first $30,000 of consideration paid for residentially improved owner-occupied property is not taxed. n370

§ 76.08(u)(2)(iii) Agricultural Land Transfer Tax.

Items subject to tax: Written instruments transferring title to agricultural land. n371

Rates: For transfers of agricultural land, 5%; for transfers of less than 20 acres of agricultural land, 4%; for transfers of less than 20 acres assessed as improved agricultural land, 3%, further reduced by 25% for each consecutive full tax year in which the real property taxes were paid on the basis of a non-agricultural use assessment. n372

§ 76.08(u)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n373

§ 76.08(u)(4) Generation-skipping Transfer Tax.

Equal to the credit allowed under federal law. n374

§ 76.08(u)(5) Inheritance Tax.

Varies according to class of donee and applicable exemptions. n375

§ 76.08(v) Massachusetts.

§ 76.08(v)(1) Property Tax.

Property subject to tax: All nonexempt real property. n376

Rate of state levy: Varies.

Ratio of assessed value to fair market value: Varies between classifications. n377

§ 76.08(v)(2) Tax on Instruments for Sale of Real Property.

Items subject to tax: Any person who makes an instrument for the sale of any real property interests. n378

Rates: $2.28 if the consideration is between $100 and $500, and $2.28 for each additional $100 or fraction thereof, and an additional 14% surtax. n379 Except in Barnstable County, in which the rate is $1.50 if the consideration is between $100 and $500, and $1.50 for each additional $100 or fraction thereof.

§ 76.08(v)(3) Estate Tax.

Varies according to class of donee and applicable exemptions. n380

§ 76.08(v)(4) Estate Transfer Tax.

Equal to credit allowed under federal estate tax law. n381

§ 76.08(v)(5) Generation-skipping Transfer Tax.

Equal to the credit allowed for state death taxes under federal law. n382

§ 76.08(w) Michigan.

§ 76.08(w)(1) Property Tax.

Property subject to tax: All nonexempt real property. n383

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 50%. n384

§ 76.08(w)(2) Recordation Tax on Instruments Conveying Real Property.

Items subject to tax: Instruments conveying real property interests wholly in Michigan. n385

Rates: 55 cents per $500 or fraction thereof of the total value in a county with a population of less than 2 million and not more than 75 cents per $500 or fraction thereof of the total value in any county with a population of 2 million or more. n386

§ 76.08(w)(3) Tax on Real Estate Transfers.

Items subject to tax: Recording of written contracts for transfer of any interest in realty, and recording of written deeds or instruments for conveyance of any interest in realty for consideration.

Exemptions: Instruments with consideration under $100; instruments for out-of-state land; instruments exempt under U.S. law; transfers securing or discharging debts; transfers of personalty or certain mineral rights; transfers by government agencies; transfers given in foreclosure proceedings and government insured proceedings; conveyances between spouses and between certain related persons; transfers pursuant to court order; instruments to straighten

boundary lines; certain transfers pre-dating January 1, 1995.

Rate: $3.75 per $500.00 or fraction thereof of the value of the property transferred.

Payment: Paid to county registrar of deeds when instrument is recorded.

§ 76.08(w)(4) Estate Tax.

Equal to the credit allowed under federal estate tax law. n387

§ 76.08(w)(5) Inheritance Tax.

Varies according to class of donee and applicable exemptions. n388

§ 76.08(x) Minnesota.

§ 76.08(x)(1) Property Tax.

Property subject to tax: All nonexempt real property. n389

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 100%. n390

§ 76.08(x)(2) Transfer Taxes.

§ 76.08(x)(2)(i) Tax on Instruments Conveying Real Property Interests.

Items subject to tax: Instruments conveying interests in real property in Minnesota. The tax applies to the total consideration for the transaction, including what is paid for personal property on the premises, less the value of any liens and encumbrances on the property. n391

Rates: $1.65 for transfers resulting from corporate mergers, consolidations, or reorganizations, and for transfers with consideration of $500 or less. If the consideration is in excess of $500, the tax is $1.65 plus $1.65 for each additional $500. n392

§ 76.08(x)(2)(ii) Tax on Mortgages.

Items subject to tax: Mortgages on real property in the state. n393

Rates: 23 cents per $100 or fraction thereof of the principle debt secured. n394

§ 76.08(x)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n395

§ 76.08(y) Mississippi.

§ 76.08(y)(1) Property Tax.

Property subject to tax: All nonexempt real property. n396

Rate of state levy: None.

§ 76.08(y)(2) Tax on Instruments Conveying Mineral Interests.

Items subject to tax: All instruments conveying leasehold or mineral or royalty interests in any non-producing oil, gas or other minerals. n397

Rates: 3 cents per acre, if the primary term expires 10 years or less after the date the instrument was executed; 6 cents per acre if the term is 10-20 years; 8 cents per acre if the term is more than 20 years. A minimum tax of $1.00 is imposed. n398

§ 76.08(y)(3) Estate Tax.

Varies according to class of donee and applicable exemptions. n399

§ 76.08(z) Missouri.

§ 76.08(z)(1) Property Tax.

Property subject to tax: All nonexempt real property. n400

Rate of state levy: Varies.

Ratio of assessed value to fair market value: Between 12% and 32%. n401

§ 76.08(z)(2) Estate Tax.

Equal to the credit allowed under federal estate tax law. n402

§ 76.08(z)(3) Generation-skipping Transfer Tax.

Equal to the credit for state death taxes allowed under federal estate tax law. n403

§ 76.08(aa) Montana.

§ 76.08(aa)(1) Property Tax.

Property subject to tax: All nonexempt real property. n404

Rate of state levy: Varies.

Ratio of assessed value to fair market value: Varies between 3% and 100% among several classes of property. n405

§ 76.08(aa)(2) Estate Tax.

Equal to the credit allowed under federal estate tax law. n406

§ 76.08(aa)(3) Inheritance Tax.

Varies according to class of donee and applicable exemptions. n407

§ 76.08(bb) Nebraska.

§ 76.08(bb)(1) Property Tax.

Property subject to tax: All nonexempt real property. n408

Rate of state levy: None.

§ 76.08(bb)(2) Tax on Transfer of Certain Real Property Interests.

Items subject to tax: Any deed transferring a beneficial interest in or legal title to real estate. n409

Rates: $1.75 per $1,000 of value or fraction thereof. n410

§ 76.08(bb)(3) Estate Tax.

The excess of federal estate tax credit over amount of state inheritance taxes. n411

§ 76.08(bb)(4) Inheritance Tax.

Varies according to class of donee and applicable exemptions. n412

§ 76.08(cc) Nevada.

§ 76.08(cc)(1) Property Tax.

Property subject to tax: All nonexempt real property. n413

Rate of state levy: Varies.

Ratio of assessed value to fair market value: Most real property is assessed at 35%. n414

§ 76.08(cc)(2) Tax on Instruments Conveying Real Property Interests.

Items subject to tax: Instruments conveying real property interests valued at over $100. n415

Rates: 65 cents per $500 or fraction thereof of value. n416

§ 76.08(cc)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law, less the death taxes on the estate imposed by any other states. n417

§ 76.08(cc)(4) Generation-skipping Transfer Tax.

Equal to the credit allowed under federal law. n418

§ 76.08(dd) New Hampshire.

§ 76.08(dd)(1) Property Tax.

Property subject to tax: All nonexempt real property. n419

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 100%. n420

§ 76.08(dd)(2) Tax on Transfer of Real Property Interests.

Items subject to tax: Transfers of real property interests other than by devise or intestate succession. n421

Rates: 35 cents per $100 or fraction thereof of the consideration or price; if the consideration is $4,000 or less, the minimum tax is 14 dollars. n422

§ 76.08(dd)(3) Estate Tax.

Equal to the difference between the credit allowed under federal estate tax law and the amount of the state inheritance tax. n423

§ 76.08(dd)(4) Inheritance Tax.

Eighteen percent on all property passed by will, intestate succession, or by transfer in contemplation of death. n424

§ 76.08(ee) New Jersey.

§ 76.08(ee)(1) Property Tax.

Property subject to tax: All nonexempt real property. n425

Rate of state levy: None.

§ 76.08(ee)(2) Tax on Transfer of Real Property Interests.

Items subject to tax: Transfers of freehold property interests (including leases for 99 years or more and proprietary leases of cooperative units) in New Jersey, if the transfers are by written instrument. n426

Rates: $0.50 to $1.75 per $500 of consideration or fraction thereof, plus 75 cents for each $500 in excess of $150,000. n427

Certain exemptions apply to low and moderate income housing, residences owned and occupied by senior citizens, by blind or disabled persons, and also to certain new construction. n428

§ 76.08(ee)(3) Estate Tax.

The difference between the maximum credit under federal estate tax law and the amount of all state and inheritance taxes paid. n429

§ 76.08(ee)(4) Inheritance Tax.

Varies according to the class of donee and the applicable exemptions. n430

§ 76.08(ff) New Mexico.

§ 76.08(ff)(1) Property Tax.

Property subject to tax: All nonexempt real property. n431

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 100%. n432

§ 76.08(ff)(2) Estate Tax.

Equal to the credit for state death taxes under federal estate tax law. n433

§ 76.08(gg) New York.

§ 76.08(gg)(1) Property Tax.

Property subject to tax: All nonexempt real property. n434

Rate of state levy: None.

§ 76.08(gg)(2) Transfer Taxes.

§ 76.08(gg)(2)(i) New York State Real Property Transfer Tax.

Items subject to tax: Transfers of real property interests when consideration exceeds $500. Also taxed are transfers of controlling interests and entities which own real property, a creation of certain leaseholds and sub-leases, and cooperative housing corporation activities in some circumstances. n435

Rates: 1 to 2 dollars per $500 or fraction thereof. n436

§ 76.08(gg)(2)(ii) New York State Real Property Transfer Gains Tax.

Items subject to tax: The New York State real property transfer gains tax on 10% of the gain applies to certain transfers of interests in New York real property or interests in entities having an interest in New York real property, if the consideration exceeds 1 million dollars. n437

Rates: The tax is applied to 10% of the gain.

§ 76.08(gg)(2)(iii) Mortgage Recording Tax.

Items subject to tax: Any principle debt or obligation that is or may be secured by a mortgage or a deed of trust on real property in the state. Taxable transactions also include executory real estate sale contracts when the purchaser is in possession, deeds of trust, agreements increasing mortgage indebtedness, supplemental mortgages for new or further indebtedness, and corporate mortgages and trusts securing corporate indebtedness. n438

Rates: 50 cents per $100 or a major fraction thereof imposed on each mortgage. n439 An additional tax of 25 cents per $100 or major fraction thereof is imposed on each mortgage, payable by the mortgagor, but if the mortgagor is an exempt organization or if the tax is imposed on mortgaged properties with six or fewer units with separate cooking facilities, the tax shall be paid by the mortgagee. n440 Certain charitable organizations are exempt from this tax. n441 For mortgages recorded after July 1, 1969, an additional tax is imposed at the rate of 25 cents for each $100 or major fraction thereof, except on the first $10,000 of a mortgage obtained principally to improve a 1- or 2-family dwelling. This second additional tax may be suspended from time to time by local ordinance and counties outside New York City and in some of the larger counties in the state. n442 Cities of one million or more population may impose yet another recording tax. n443

§ 76.08(gg)(3) Estate Tax.

Varies according to the property transferred and the relationship of the decedent to the transferee. n444

§ 76.08(gg)(4) Gift Tax.

Same rates as for state estate tax. n445

§ 76.08(hh) North Carolina.

§ 76.08(hh)(1) Property Tax.

Property subject to tax: All nonexempt real property. n446

Rate of state levy: None.

§ 76.08(hh)(2) Tax on Instruments Conveying Real Property Interests.

Items subject to tax: Any instrument transferring real property interest. n447

Rates: 55 cents per $500 or fraction thereof of the net consideration or value. n448

§ 76.08(hh)(3) Estate Tax.

Equal to the difference between the credit allowed under federal estate tax law and the amount of state inheritance tax imposed. n449

§ 76.08(hh)(4) Generation-skipping Inheritance Tax.

Equal to the credit allowed under federal generation-skipping transfer tax law. n450

§ 76.08(hh)(5) Inheritance Tax.

Varies according to the class of donee and the applicable exemptions. n451

§ 76.08(hh)(6) Gift Tax.

Same rates as the inheritance tax. n452

§ 76.08(ii) North Dakota.

§ 76.08(ii)(1) Property Tax.

Property subject to tax: All nonexempt real property. n453

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 50%. n454

§ 76.08(ii)(2) Estate Tax.

Equal to the credit allowed under federal estate tax law. n455

§ 76.08(jj) Ohio.

§ 76.08(jj)(1) Property Tax.

Property subject to tax: All nonexempt real property. n456

Rate of state levy: Varies.

Ratio of assessed value to fair market value: Not more than 35%. n457

§ 76.08(jj)(2) Tax on Recordation of Transfers of Real Property.

Items subject to tax: Recordation of deeds conveying real property.

Rates: $1.00 minimum or 10 cents per $100 of value or fraction thereof.

§ 76.08(jj)(3) County Tax on Recordation of Transfers of Real Property Interests. n458

Items taxed: Recordation of deed conveying real property.

Rates: Up to 30 cents per $100 or fraction thereof of value, as authorized by the county.

§ 76.08(jj)(4) Estate Tax.

Varies according to value of property transferred. n459 An additional estate tax is imposed, equal to the difference between the credit allowed under federal estate tax law and the amount of the death taxes paid in all states. n460

§ 76.08(jj)(5) Generation-skipping Transfer Tax.

Equal to the credit allowed under federal law. n461

§ ;76.08(kk) Oklahoma.

§ 76.08(kk)(1) Property Tax.

Property subject to tax: All nonexempt real property. n462

Rate of state levy: Varies.

Ratio of assessed value to fair market value: Not more than 35%. n463

§ 76.08(kk)(2) Transfer Taxes.

§ 76.08(kk)(2)(i) Tax on Instruments Conveying Real Property Interests.

Items subject to tax: Instruments conveying real property interests with a net value of more than $100. n464

Rates: 75 cents per $500 of value or fraction thereof. n465

§ 76.08(kk)(2)(ii) Registration Tax on Mortgages.

Items subject to tax: All mortgages, mortgages in trust, mortgages in real property only partially in the state, mortgages

recorded prior to July 1, 1913, and advances under existing mortgages. n466

Rates: 10 cents per $100 or fraction thereof on mortgages of 5 years or more; 8 cents per $100 or fraction thereof on mortgages of 4 to 5 years; 6 cents per $100 or fraction thereof on mortgages of 3 to 4 years; 4 cents per $100 or fraction thereof on mortgages of 2 to 3 years; 2 cents per $100 or fraction thereof on mortgages of 2 years and less. The minimum tax is 10 cents. When the mortgage is executed to secure bond payments and used to create property that will be subject to ad valorem taxes, the recording fee is 25 cents for the first folio and 10 cents for each additional folio and fifty cents for the indexing and recorder's certificate. The county treasurer imposes an additional $5 fee for each mortgage to be certified. n467

§ 76.08(kk)(3) Estate Tax.

Varies according to the class of donee and the applicable exemptions. n468

§ 76.08(ll) Oregon.

§ 76.08(ll)(1) Property Tax.

Property subject to tax: All nonexempt real property. n469

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 100%. n470

§ 76.08(ll)(2) Inheritance Tax.

Equal to the difference between the federal estate tax credit and the amount of the state death taxes. n471

§ 76.08(mm) Pennsylvania.

§ 76.08(mm)(1) Property Tax.

Property subject to tax: All nonexempt real property. n472

Rate of state levy: None.

§ 76.08(mm)(2) Tax on Transferors of Real Property Interests.

Items subject to tax: Persons who transfer, or on whose behalf is transferred, any real property interests. n473

Rates: 1% of the value of the property. n474

§ 76.08(mm)(3) Estate Tax.

Equal to the difference between the credit under federal estate tax law and the amount of state inheritance tax. n475

§ 76.08(mm)(4) Inheritance Tax.

Varies according to the class of the donee and the applicable exemptions. n476

§ 76.08(nn) Rhode Island.

§ 76.08(nn)(1) Property Tax.

Property subject to tax: All nonexempt real property. n477

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 100% unless local assessor determines otherwise. n478

§ 76.08(nn)(2) Tax on Instruments Conveying Real Property Interests.

Items subject to tax: Instruments conveying real property interests valued at over $100. n479

Rates: For purchase price values over $100, $1.40 for each $500 or fraction thereof. n480

§ 76.08(nn)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n481

§ 76.08(nn)(4) Generation-skipping Transfer Tax.

Equal to the credit available under federal tax law for generation-skipping transfers. n482

§ 76.08(oo) South Carolina.

§ 76.08(oo)(1) Property Tax.

Property subject to tax: All nonexempt real property. n483

Rate of state levy: None.

§ 76.08(oo)(2) Tax on Instruments Conveying Real Property Interests.

Items subject to tax: Instruments conveying real property interests valued at over $100. n484

Rates: For conveyances, $1.30 for $100 to $500 of value and $1.30 for each additional $500 of value. n485

§ 76.08(oo)(3) County Tax on Real Property Transfers. n486

Items subject to tax: Transfers of real property interests.

Rates: 55 cents on consideration or value of $100 to $500; 55 cents for each added $500.

§ 76.08(oo)(4) Estate Tax.

Equal to the credit allowed under federal estate tax law. n487

§ 76.08(oo)(5) Generation-skipping Transfer Tax.

Equal to the credit allowed under federal law. n488

§ 76.08(pp) South Dakota.

§ 76.08(pp)(1) Property Tax.

Property subject to tax: All nonexempt real property. n489

Rate of state levy: Varies, but the tax may not equal more than 2 mills per dollar of valuation in any one year. n490

Ratio of assessed value to fair market value: 100%. n491

§ 76.08(pp)(2) Tax on Transfers of Real Property Titles.

Items subject to tax: Transfers of title to real property in the state. n492

Rates: 50 cents per $500 of value or fraction thereof. n493

§ 76.08(pp)(3) Estate Tax.

Equal to the credit available under federal estate tax law. n494

§ 76.08(pp)(4) Inheritance Tax.

Varies according to class of donee and available exemptions. n495

§ 76.08(qq) Tennessee.

§ 76.08(qq)(1) Property Tax.

Property subject to tax: All nonexempt real property. n496

Rate of state levy: None.

§ 76.08(qq)(2) Transfer Taxes.

§ 76.08(qq)(2)(i) Tax on Transfers of Real Property Interests.

Items subject to tax: All transfers of realty, except that only one tax is imposed on several deeds used to convey a single tract of land. n497

Rates: 37 cents per $100 or major fraction thereof of the consideration or the value of the property, whichever is greater. n498

§ 76.08(qq)(2)(ii) Tax on Instruments of Indebtedness.

Rates: 11.5 cents per $100 of the amount secured over $2,000 on property within the state. The maximum tax is $500,000.

§ 76.08(qq)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n499

§ 76.08(qq)(4) Generation-skipping Transfer Tax.

Equal to the credit available under federal law. n500

§ 76.08(qq)(5) Inheritance Tax.

Varies according to the class of donee and available exemptions. n501

§ 76.08(qq)(6) Gift Tax.

Varies according to the amounts of the gifts. n502

§ 76.08(rr) Texas.

§ 76.08(rr)(1) Property Tax.

Property subject to tax: All nonexempt real property. n503

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 100%. n504

§ 76.08(rr)(2) Estate Tax.

Equal to the credit allowed under federal estate tax law. n505

§ 76.08(rr)(3) Generation-skipping Transfer Tax.

A fraction of the federal credit, determined by the value of the Texas property divided by the value of all property in the transfer. n506

§ 76.08(ss) Utah.

§ 76.08(ss)(1) Property Tax.

Property subject to tax: All nonexempt real property. n507

Rate of state levy: Varies, but may not exceed .00048 per dollar of taxable value of taxable property in the state. n508

Ratio of assessed value to fair market value: 100%, except that residential property assessments are reduced by 32%. n509

§ 76.08(ss)(2) Estate Tax.

Equal to the credit allowed under federal estate tax law. n510

§ 76.08(tt) Vermont.

§ 76.08(tt)(1) Property Tax.

Property subject to tax: All nonexempt real property. n511

Rate of state levy: None.

Rate of assessed value to fair market value: 1% of appraised value. n512

§ 76.08(tt)(2) Transfer Taxes.

§ 76.08(tt)(2)(i) Tax on Transfer of Real Property Titles.

Items subject to tax: Transfers of real property titles by deed. n513

Rates: One and one-quarter percent of the value of the property transferred, with a minimum tax of $1.00, except that the tax for a principal residence is one-half of one percent of the first $100,000 and one and one-quarter percent thereafter. Effective until July 1, 2000, the tax on the first $100,000 in value of the principal residence is not imposed if a certain guaranty fee is paid to the Vermont home mortgage guarantee program. These rates also apply to the principal residence of a member or shareholder in a housing cooperative. n514

§ 76.08(tt)(2)(ii) Capital Gains Tax on Land.

Items taxed: Gains from sales or exchanges of land. n515

Rates: the tax is determined by how long the seller had held the property and by the magnitude of the gain, according to the following table:

Years held	0-99% gain	100-199% gain	200 + gain
Less than 4 mos.	60%	70%	80%
4 but less than 8 mos.	35%	52.5%	70%
8 mos. but less than 1 yr.	30%	45%	60%
1 yr. but less than 2 yrs.	25%	37.5%	50%
2 yrs. but less than 3 yrs.	20%	30%	40%
3 yrs. but less than 4 yrs.	15%	22.5%	30%
4 yrs. but less than 5 yrs.	10%	15%	20%
5 yrs. but less than 6 yrs.	5%	7.5%	10%

§ 76.08(tt)(3) Estate Tax.

Equal to the federal credit for state death taxes less amounts for death taxes paid. n516

§ 76.08(uu) Virginia.

§ 76.08(uu)(1) Property Tax.

Property subject to tax: All nonexempt real property. n517

Rate of state levy: None.

§ 76.08(uu)(2) Transfer Taxes.

§ 76.08(uu)(2)(i) Tax on Instruments Conveying Real Property Interests.

Items taxed: Instuments transferring real property interests valued at more than $100. n518

Rates: Fifty cents per each $500 or fraction thereof, not including any lien or other encumbrance attached at the time of sale. n519 Counties and cities are authorized to impose an additional tax equal to one third of the state tax. n520

§ 76.08(uu)(2)(ii) Tax on Documents Transferring Real Property Interests.

Items taxed: Deeds, deeds of trust, mortgages, construction loan deeds of trust or mortgages, leases, contracts and agreements. n521

Rates: Fifteen cents for each $100 or fraction thereof of the consideration or the actual value of the property conveyed, whichever is greater. For property partially in Virginia, the tax is only applicable to the value of the part of the property located in Virginia. n522 On contracts and deeds of lease of real and personal property, the tax is based on the consideration or value contracted for, except that the tax on oil and gas leases may not exceed twenty-five dollars, and the tax on coal and other mineral rights may not exceed fifty dollars. n523 On deeds of trust or mortgages secured by bonds, the tax is based on the amount of bonds secured or, if not ascertainable, on the fair market value of the property conveyed.

Maximum tax schedule:

1st $10 million	$.15 per $100 of value
2nd $10 million	$.12 per $100 of value
3rd $10 million	$.09 per $100 of value
4th $10 million	$.06 per $100 of value
Over $40 million	$.03 per $100 of value n524

On deeds of release or any deed of partition, any deed transferring property pursuant to a decree of divorce or separate maintenance or any deed of conveyance to a new corporation, the tax is fifty cents per deed. n525

§ 76.08(uu)(2)(iii) Tax on Leases and Contracts.

Items subject to tax: Leases, contracts, and assignments that are recorded. n526

Rates: Rates vary according to the consideration or value contracted for with a dollar limit on mineral leases. n527

§ 76.08(uu)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n528

§ 76.08(uu)(4) Generation-skipping Transfer Tax.

Equal to the federal credit for state legacy taxes. n529

§ 76.08(uu)(5) Tax on Wills and Administrators.

Except for estates valued at $5,000 or less, 10 cents for every $100 of value of an estate or fraction thereof, upon the probate of a will or grant of administration. n530

§ 76.08(vv) Washington.

§ 76.08(vv)(1) Property Tax.

Property subject to tax: All nonexempt real property. n531

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 100%. n532

§ 76.08(vv)(2) Tax on the Sale of Property.

Items taxed: An excise tax is imposed on each sale of property, including any conveyance, grant, assignment, quitclaim, or transfer of the ownership of or title to real property or any estate or interest therein for a valuable consideration, including any contract, or lease with an option to purchase, or transfers of possession, with the remaining in the vendor for security purposes. n533

Rates: 1.28% of sales price. In addition, any county may impose a tax on the sale of real property in the unincorporated area of the county, or any city may impose a tax on the sale of real property within the corporate limits of the city at a rate not to exceed .25% of the selling price. n534

§ 76.08(vv)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n535

§ 76.08(vv)(4) Generation-skipping Transfer Tax.

Equal to the credit allowed under federal law. n536

§ 76.08(ww) West Virginia.

§ 76.08(ww)(1) Property Tax.

Property subject to tax: All nonexempt real property. n537

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 60%. n538

§ 76.08(ww)(2) Tax on Transfers of Real Property Titles.

Items taxed: Transfers of title to real estate located in West Virginia. n539

Rates: $1.10 per $500 of actual consideration, including any liens assumed, or, for gifts, of actual monetary value of the property, plus an additional county excise tax of fifty-five cents per $500 of value or fraction thereof. n540

§ 76.08(ww)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n541

§ 76.08(xx) Wisconsin.

§ 76.08(xx)(1) Property Tax.

Property subject to tax: All nonexempt real property. n542

Rate of state levy: Varies.

Ratio of assessed value to fair market value: 100%. n543

§ 76.08(xx)(2) Tax on Transfers of Real Property.

Items subject to tax: Transfers of real property. n544

Rates: Thirty cents per $100 of value or fraction thereof. n545

§ 76.08(xx)(3) Estate Tax.

Equal to the credit allowed under federal estate tax law. n546

§ 76.08(xx)(4) Inheritance Tax.

Varies according to the class of the donee and the available exemptions. n547

§ 76.08(xx)(5) Gift Tax.

Varies according to the value of the gift and to the class of the donee and the applicable exemptions. n548

§ 76.08(yy) Wyoming.

§ 76.08(yy)(1) Property Tax.

Property subject to tax: All nonexempt real property. n549

Rate of state levy: Varies, plus a state annual levy of up to 12 mills for school support. n550

Ratio of assessed value to fair market value: 9.5% for most property; 11.5% for industrial property. n551

§ 76.08(yy)(2) Estate Tax.

The Wyoming estate tax is equal to the maximum credit for state death tax allowed as a credit under federal law, times the ratio that the Wyoming gross estate bears to the federal gross estate, or times the maximum state death tax credit allowed to the Wyoming gross estate, whichever is greater. n552

Add:

§ 48 Amended by P.L. 111-5, *123 Stat. 115* (Feb. 17, 2009) (American Recovery and Reinvestment Act).

§ 76.02(b)(2)(v) Credit for Disability Access.

Change $1,500 per year to:

$15,000 per year

Change $5,000 to:

$10,250

§ 76.02(b)(3) Depreciation.

Add:

§ 168 Amended by P.L. 107-147, *116 Stat. 21* (Mar. 9, 2002).

Add:

§ 168 Amended by P.L. 107-147, *116 Stat. 21* (Mar. 9, 2002).

Add:

§ 168 Amended by P.L. 107-147, *116 Stat. 21* (Mar. 9, 2002).

Change § 168(e) to:

§ 168

Change "Id. § 168(e)." to:

Id. § 168(c), (e).

Add:

§ 168 Amended by P.L. 107-147, *116 Stat. 21* (Mar. 9, 2002).

Add:

§ 168 Amended by P.L. 107-147, *116 Stat. 21* (Mar. 9, 2002).

Add:

§ 168 Amended by P.L. 107-147, *116 Stat. 21* (Mar. 9, 2002).

§ 76.02(b)(4) Alternative Minimum Tax.

Add:

§ 56 Amended by P.L. 107-147, *116 Stat. 21* (Mar. 9, 2002).

In the second paragraph, line 7, change text from 31.5 to:

39

Change text wording from "20-year property category" to:

15 and 20 -year property categories.

§ 76.02(c) Taxation of Non-Residential Real Property Leases. [Go To Main]

§ 76.02(c)(1) Cost of Leasehold Acquisitions.

Change J. & E. Enters., Inc. to:

Stanton

Delete reference to charitable contributions of appreciated property from second to last line of page. (1993 Amendments. Subsec. (a)(6). Pub.L. 103-66, § 13171(a), redesignated former par. (7) as (6) and struck out former par. (6) which detailed the appreciated property charitable deduction.)

Change § 178(a) to:

§ 178(b).

§ 76.02(c)(2) Taxation of Sale-leasebacks.

Add to Frank Lyon Co. v. United States, 435 U.S. 561 (1978), **"distinguished by *940 F.2d 1094 (7th Cir. 1991)*"**

"*distinguished by 16 F.3d 821 (7th Cir. 1994)* ."

Add:

Consolidated Edison Co. of N.Y., Inc. & Subsidiaries v. United States, 90 Fed. Cl. 228 (Fed. Cl. 2009) (holding a sale-leaseback arrangement did not lack economic substance and thus the arrangement qualified for the tax deductions claimed); *Tyson v. Comm'r of Internal Revenue, 2009 Tax Ct. Memo LEXIS 178* ; *BB&T Corp. v. United States, 523 F.3d 461 (4th Cir. 2008)* (holding a sale-leaseback transaction to be a financing arrangement and not a genuine lease and sublease, thus implicating tax liabilities).

Add:

$1,500 for a married individual filing separately. Id. § 1211(b)(1).

§ 76.02(d) Taxation of Non-residential Real Property Transfers. [Go To Main]

§ 76.02(d)(1) Sales.

At the end of third line, add new footnote 83.1 after ordinary income: n83.1

Change § 346(b) to:

§ 356(b).

§ 76.02(d) Taxation of Non-residential Real Property Transfers. [Go To Main]

§ 76.02(d)(2) Installment Sales.

Change § 453(l)(1)(B) to:

§ 453(*l*)(1)(B).

Change § 453(l) to:

§ 453(*l*).

§ 76.02(d)(3) Exchanges.

At the end of the 6th line in the first paragraph of the section, add new footnote 91.1 after "tax-free exchange treatment": n91.1

Change § 1031(a) to:

§ 1031(a)(2)(A).

Add:

"*declined to follow by T.C. Memo. 1998-421 , distinguished by 914 F.2d 265 (9th Cir. 1990), distinguished by 33 Fed. Cl. 384 (1995)* ."

Add:

Goldberg v. Ojeda, 2009 U.S. Dist. LEXIS 21590 (analyzing an attempted "Starker Trust").

Add:

"*distinguished by T.C. Memo. 1998-302* ."

Change §§ 1.1031(a)-1.1031(b) to:

§ 1.1031(a)-1.

Add:

Teruya Bros., Ltd. v. Comm'r of Internal Opinion Revenue, 580 F.3d 1038 (9th Cir. 2009) (holding "[t]axpayers cannot escape [liability] simply by hiding the benefits of improper like-kind exchanges with a related party").

§ 76.02(d)(4) Foreclosures.

Add:

§ 108 Amended by P.L. 107-147, *116 Stat. 21* (Mar. 9, 2002).

Change § 108(d)(2)(A)(ii) to:

§ 108(a)(1)(D).

Add:

§ 108 Amended by P.L. 107-147, *116 Stat. 21* (Mar. 9, 2002).

Change § 108(b)(2)(B) to:

§ 108(c).

FOOTNOTES:
(n1)Footnote 83.1. *I.R.C. § 1211*.

(n2)Footnote 91.1. Similarly, use of real property solely as a personal residence is "antithetical to its being held for investment." *T.C. Memo 2010-64* .

Supp. To CHAPTER 76 TAXATION OF REAL PROPERTY

9-76 Thompson on Real Property, Thomas Editions Supp. to § 76.03

Supp. to § 76.03 Federal Income Taxation of Residential Real Property.

[Go To Main]

President Bush signed into law the American Housing Rescue and Foreclosure Prevention Act of 2008, on July 30, 2008. This law includes the Housing Assistance Tax Act of 2008, which provides a credit for first--time home buyers, a property tax deduction for non--itemizing taxpayers, rule changes for excluding gain on the sale of a principal residence, rule changes for real estate investment trusts, changes for the low income housing tax credit, and other more specific and technical changes. More details are provided in the Special Tax Alert in Volume 15 of this treatise.

§ 76.03(a) Taxation of Residential Real Property Ownership. [Go To Main]

Add:

I.R.C. § 165(h)(3).

§ 76.03(a)(2) Deduction for Casualty Losses

Add:

§ 165 Amended by P.L. 110-343, *122 Stat. 3765* (Oct. 3, 2008) (Emergency Economic Stabilization Act of 2008).

Add:

Net casualty loss allowed only to the extent it exceeds 10 percent of adjusted gross income. (clarifies reading)

***Change 62 Tax Ct. Mem. Dec. (P-H) 214* to:**

21 Tax Ct. Meme Dec. (CCH) 1146

Change § 165(j) to:

§ 165(i).

Add:

§ 165 Amended by P.L. 110-343, *122 Stat. 3765* (Oct. 3, 2008) (Emergency Economic Stabilization Act of 2008).

Change note 124 to read:

The references to *I.R.C. § 163(h)* are to the statute as it was originally enacted as part of the Tax Reform Act of 1986; § 163(h) was later revised and renumbered by the Revenue Act of 1987, P.L. 100-203, further amended by the Technical and Miscellaneous Revenue Act of *1988 P.L. 100-647*, and most recently amended by the Emergency Economic Stabilization Act of 2008, P.L. 110-343.

Add following "I.R.C. § 163(h)(3)-163(h)(5), 1034": § 165 Amended by P.L. 110-343, *122 Stat. 3765* (Oct. 3, 2008).

§ 76.03(a)(3) Deduction for Mortgage Interest.

Change § 163(h)(3)(A)(i) to:

§ 163(h)(3)(B)(ii).

Add:

§ 165 Amended by P.L. 110-343, *122 Stat. 3765* (Oct. 3, 2008) (Emergency Economic Stabilization Act of 2008).

Change I.R.C. § 163(h)(3)(A)(ii) to:

I.R.C. § 163(h)(3)(C)(ii)

Add:

§ 165 Amended by P.L. 110-343, *122 Stat. 3765* (Oct. 3, 2008) (Emergency Economic Stabilization Act of 2008).

Change § 163(h)(5)(B) to:

§ 163(h)(4)(b)

Add:

§ 165 Amended by P.L. 110-343, *122 Stat. 3765* (Oct. 3, 2008) (Emergency Economic Stabilization Act of 2008).

Remove second citation to

Rev. Rul. 67-297, 1967-2 C.B. 87

§ 76.03(a)(4) Deduction for Property Taxes.

Change first aff'd to rev'd in part

Change I.R.C. § 461 to:

I.R.C. § 164

§ 76.03(b) Taxation of Residential Real Property Transfers. [Go To Main]

Add:

Pilaria v. Commissioner, 84 Tax Ct. Mem. Dec. (CCH) 305 (2002).

Add:

Guinan v. United States, 2003 U.S. Dist. LEXIS 11923 (Arizona) , Apr. 9, 2003 (court looks at facts and circumstances of each case); *Treas. Reg. 1.121-1(b)(2)* (lists factors to determine whether a principal residence exists).

Add:

Saunders v. Commissioner, 83 Tax Ct. Mem. Dec. (CCH) 1795 (2002), aff'd, 2003 U.S. App. LEXIS 19564 (6th Cir.) .

Dorothy A. Brown, "Shades of the American Dream," *87 Wash. U. L. Rev. 329 (2009)* (describing taxation issues related to *Treas. Reg. § 1.262-1(b)(4)*).

Delete last sentence of first paragraph, and add to text:

The amount of gain excluded is limited to $250,000 for individuals and $500,000 for certain joint returns.[168] Generally, the property must have been owned and used by the taxpayer as a principal residence for at least 2 of the 5 years preceding the date of sale.[168a]

Change to:

I.R.C. § 121(b).

Add:

I.R.C. § 121(a).

Change 42 Tax Ct. to:

52 Tax Ct.

Add:

Parker v. Commissioner, 78 Tax Ct. Mem. Dec. (CCH) 621 (1999).

In line 3 of the second full paragraph, change three of the five years to:

two of the five years

In line 3 of the second full paragraph, change $125,000 to:

$250,000

Add:

Amended by P.L. 110-289, *122 Stat. 2654* (July 30, 2008).

Add:

§ 121 Amended by P.L. 110-289, *122 Stat. 2654* (July 30, 2008).

Add:

Delucchi v. Franchise Tax Board, 2009 Cal. App. LEXIS 142 ("[T]he method for allocating tax liability for an installment sale of a capital investment calculates the percentage that the gain represents of the total sales price and applies this percentage to each payment received to determine the amount of the total gain that is recognized for tax liability in any particular taxable year.")

Thompson on Real Property, Thomas Editions

Copyright 2010, Matthew Bender & Company, Inc., a member of the LexisNexis Group.

Supp. To CHAPTER 76 TAXATION OF REAL PROPERTY

9-76 Thompson on Real Property, Thomas Editions Supp. to § 76.04

Supp. to § 76.04 Federal Estate Taxation of Real Property.

[Go To Main]

Add:

Estate of Malkin v. Comm'r of Internal Revenue, 2009 Tax Ct. Memo LEXIS 214 .

Change § 2053 to:

§ 2053(a).

First full paragraph.

Change 55% of taxable estate amounts over $3,000,000 to:

50% of taxable estate amounts over $2,500,000.

In lines 7 and 10 of the second paragraph, change $600,000 to:

$675,000 in both instances

Add parenthetical:

(Tax rates are set to be phased down for decedents dying between 2002 and 2010. In 2003, the maximum estate tax rate will be 49% and by 2009, the maximum rate will be 45%).

First full paragraph.

Delete last two sentences and replace with:

Under the unified tax credit, a tax credit is given to the estate of every decedent.[198] For decedents dying during 2002 and 2003, the exclusion amount is $1,000,000.[199] This amount is set to increase every two or three years until it reaches $3,500,000 for decedents dying in 2009.[199.1]

Change to:

I.R.C. § 2010(c).

Change § 6018 to:

§ 2010.

Add:

The current provisions of § 2010 do not apply to estates of decedents, dying gifts, or generation skipping transfers after December 31, 2010; rather the *1986 Internal Revenue Code* applies. P.L. 107-16, *115 Stat. 38* (June 7, 2001).

Add:

Id.

Add:

The current provisions of *I.R.C. § 2011* do not apply to estates of decedents, dying gifts, or generation skipping transfers after December 31, 2010; rather the *1986 Internal Revenue Code* applies. P.L. 107-16, *115 Stat. 38* (June 7, 2001).

Add:

The current provisions of *I.R.C. § 2012* do not apply to estates of decedents, dying gifts, or generation skipping transfers after December 31, 2010; rather the *1986 Internal Revenue Code* applies. P.L. 107-16, *115 Stat. 38* (June 7, 2001).

Add:

The current provisions of *I.R.C. § 2013* do not apply to estates of decedents, dying gifts, or generation skipping transfers after December 31, 2010; rather the *1986 Internal Revenue Code* applies. P.L. 107-16, *115 Stat. 38* (June 7, 2001).

Add:

The current provisions of *I.R.C. § 2014* do not apply to estates of decedents, dying gifts, or generation skipping transfers after December 31, 2010; rather the Wyo. Stat. § 39-6-810 applies. P.L. 107-16, *115 Stat. 38* (June 7, 2001).

; with a value equal to or exceeding two thousand dollars.

Change "§§ 12-504(a), 12-504(e)" to: § 12-504a(b), (c).

Change "§ 12-504(a)" to: § 12-504a(b).

§ 76.08(g)(2)(ii) Tax on Farm and Forest Land Conveyances.

Change footnote to read 2005 Ct. ALS 190 (Jan 2005).

Change footnote to read 2005 Ct. ALS 190 (Jan 2005).

§ 76.08(g)(3) Succession and Transfer Tax.

§ 12-344, subsections (d) and (e) were repealed and replaced by 2005 Ct. ALS 251 (Jan 2005).

Add:

§ 12-344b.

§ 12-391 was repealed and replaced by 2005 Ct. ALS 3 (June 2005).

Change § 12.504(a) to:

12.504a.

§ 76.08(h) Delaware. IC34-24-1

§ 76.08(h)(1) Property Tax

Add following 2% of the value of the property, if the value is more than $100" unless municipality or county taxes apply, in which case the tax rate is modified.

§ 76.08(h)(3) Estate Tax.

Delete the wording under "Estate Tax" and replace with:

Equal to the credit allowed under the federal estate tax law.

§ 76.08(h)(4) Inheritance Tax.

Delete this entire section and accompanying footnote, 290. It has been repealed.

§ 76.08(i) District of Columbia [Go To Main]

§ 76.08(i)(1) Property Tax.

Add:

Subsequent History

D.C. Code Ann. § 47-1002 **Amended** by D.C. Legis. 16-191 (2006) ("Tax Exemption Clarification Act of 2004 is amended by striking the word 'company' the first time it appears and inserting the phrase 'of the type' in its place.").

District of Columbia v. Helen Dwight Reid Educ. Found., 766 A.2d 28 (D.C. 2001) (taxpayer's publishing activities were not "activities of" those other potentially exempt institutions and fact that "principal impact" of taxpayer's charitable activities was not in District precluded exemption of building as one used for purposes of public charity principally in District).

§ 76.08(i)(2) Transfer Taxes.

§ 76.08(i)(2)(i) Tax on Deeds.

Change § 45-923 to:

§ 42-1103

Under "Rates," replace "1.1% of the consideration paid for the deed" with:

1.5% of the consideration paid for the deed or the fair market value of the property if there is no consideration or nominal consideration;

§ 76.08(i)(2)(ii) Transfer Tax on Real Property.

Subsequent History

D.C. Code Ann. § 47-903 Amended by D.C. Legis. 16-192 (2006) ("Section 47-903 of the District of Columbia Official Code is amended by adding a new subsection (a-3) to read as follows: '(a-3)(1) Beginning October 1, 2006, except for residential properties transferred for a consideration less than $400,000, an additional tax of.35% is imposed upon a deed that is subject to the tax under subsection (a)(1) of this section.'").

Under "Rates," replace "with a minimum $1.00 tax" with

or the fair market value of the real property if there is no consideration or nominal consideration.

§ 76.08(j) Florida. [Go To Main]

§ 76.08(j)(1) Property Tax.

Add:

Zapo v. Gilreath, 779 So. 2d 651 (Fla. Dist. Ct. App. 2001) (statute subjecting mobile homes affixed to real property owned by homeowner to ad valorem taxation did not violate equal protection, and classifying permanently fixed mobile homes as real property did not conflict with section of constitution exempting mobile homes from ad valorem taxes).

Add:

Dep't of Revenue v. Pinellas VP, LLC, , 3 So. 3d 361 (holding the principal balance of a mortgage is classified as taxable consideration under § 201.02(1)).

§ 76.08(j)(2) Transfer Taxes.

§ 76.08(j)(2)(i) Tax on Instruments Relating to Land.

Add on to the end of "Rates:"

, which consideration is presumed to be equal to the fair market value of the real property or interest there in.

§ 76.08(j)(2)(ii) Tax on Evidences of Indebtedness.

Add on to the end of "Rates:"

, not to exceed $2,450.

Change "99.133(1)" to: 201.01.

§ 76.08(j)(2)(iii) Tax on Notes and Other Payment Obligations Secured by Real Property.

Delete this entire section and accompanying footnotes, 304 and 305, they have been repealed.

§ 76.08(k) Georgia. [Go To Main]

§ 76.08(k)(1) Property Tax.

Add:

United States v. DeKalb County, 729 F.2d 738 (11th Cir. 1984) (contract created a security interest not subject to Georgia taxation); *Clayton County Bd. of Tax Assessors v. King, 397 S.E.2d 293 (Ga. 1990)* (attorney's law library associated with practice, not exempted from ad valorem taxation); *Coweta County Bd. of Tax Assessors v. EGO Prods., Inc., 241 Ga. App. 85 (1999)* (no statutory or constitutional authority allowed a lease to circumvent taxing provisions under the constitution nor empowered an authority to excuse a taxpayer from paying a substantial portion of its property tax obligation without notice to the county); *Lamad Ministries, Inc. v. Dougherty County Bd. of Tax Assessors, 268 Ga. App. 798 (2004)* (a "place of religious worship" exemption applied to other parts of the property, specifically an old-age home, for a tax-exempt corporation).

Add:

Bellsouth Telecommunications, Inc. v. Henry County Bd. of Assessors, 458 S.E.2d 705 (Ga. App. 1995) (although statistical evidence showed that assessment of other property was at 38.84% of fair market value or lower, an assessment of 40% did not violate the constitutional requirement of uniformity).

§ 76.08(k)(2) Tax on Instruments Conveying Real Property.

Add:

Bankers Tust Co. v. Jackson, 512 S.E.2d 378 (Ga. App. 1999) (the real estate tax is an excise tax based on increments in the value of the instrument being recorded and being calculated in the same manner).

§ 76.08(l) Hawaii. [Go To Main]

§ 76.08(l)(1) Property Tax.

Delete: "Page 45 note 313.:

Change to § 246-1 to: 246-2

Add after "Rate of State Levy:"

Ratio of assessed value to fair market value: 60%.[314.5]

Delete: "Add: § 248-2"

Change "Rates" to read:

Starting at 10 cents per $100 for properties valued less than $600,000, increasing to $1 per $100 for properties valued at $10 million or greater. An increased regime exists for the sale of a condominium or single family residence for which the purchaser is not eligible for a county level homeowner's property tax exemption.

§ 76.08(l)(2) Transfer Taxes.

§ 76.08(l)(2)(i) Tax on Instruments Conveying Real Property.

Change "Rates:" to read:

varies.

§ 76.08(l)(2)(ii) Withholding Tax on Transfers by Non-residents

Change "Items subject to tax:" to read:

A transferee must withhold the tax if the transferor is a non-resident, unless the transferor used the property as a principal place of residence the year preceding the sale and the value of the property does not exceed $300,000.

Add after "Items subject to tax:"

Rates: 5% of the amount realized on the disposition of Hawaii real property.[318.5]

§ 76.08(m) Idaho. [Go To Main]

§ 76.08(m)(1) Property Tax.

Replace §§ 63.101, 63.922 with:

§§ 63.203, 63.601.

§ 76.08(n) Illinois. North Dakota--N.D. Cent. Code § 19-031-36

§ 76.08(n)(1) Property Tax.

Replace Ill. Rev. Stat. ch. 35, & 205/18.1 with:

Ill. Ohio Rev. Code Ann. 21.

§ 76.08(n)(2)(ii) County Tax on Real Property Transfers.

Modify from "25 cents per $500 of the full consideration" to

"50 cents per $500 of the full consideration."

Page 46 note 324, modify from "Id. Ch. 55. § 5/5/-1038" to

"Id. Ch. 35 § 200/31-10"

§ 76.08(o) Indiana. [Go To Main]

§ 76.08(o)(1) Property Tax.

Add:

W.H. Paige & Co. v. State Bd. of Tax Comm'rs, 711 N.E.2d 552 (1999) (The leasor of musical instruments had a duty to pay personal property tax because leasor owned the instruments, which were used in the production of income.)

Change § 6-1.1-18-3 to:

Subsequent History

Ind. Code Ann. § 6-1.1-18-3 **Amended** by P.L.2-2006, § 41, eff. July 1, 2007 (amended by adding a new subsection (a-3) to read as follows: '(a-3)(1) Beginning October 1, 2006, except for residential properties transferred for a consideration less than $400,000, an additional tax of.35% is imposed upon a deed that is subject to the tax under subsection (a)(1) of this section.").

Add:

Id. § 6-1.1-18-3(b)(3)(A).

§ 76.08(o)(2) Estate Tax

Change "Equal to the credit allowed under federal estate tax law" to:

The estate tax is determined according to a formula found in the statute.

§ 76.08(o)(2) Estate Tax.

Add:

State, Dep't of Revenue v. Estate of Eberbach, 535 N.E.2d 1194 (Ind. 1989) (Dep't of Revenue is not entitled to tax the estate based on the difference between the maximum allowable federal estate tax and the state inheritance tax paid).

§ 76.08(o)(3) Inheritance Tax.

Add:

In re Grotrian's Estate, 405 N.E.2d 69 (Ind. App. 1980) (relationship between transferor and transferee is the measuring stick to use for inheritance tax).

Modify from "Id. §§ 6-4.1-3-1 - 6-4.1-3-12" to

"Id. §§ 6-4.1-3-1 - 6-4.1-3-4, 6-4.1-3-7 - 6-4.1-3-8, 6-4.1-3-10 - 6-4.1-3-12."

§ 76.08(p) Iowa. [Go To Main]

§ 76.08(p)(1) Property Tax.

Add:

City of Newton v. Board of Review for Jasper County, 532 N.W.2d 771 (Iowa 1995) (Taxable real property must be assessed in one of the following six categories: agriculture, residential, commercial, industrial, utilities, or railroads).

§ 76.08(p)(3) Estate Tax

Change "Equal to the credit allowed under federal law" to:

The estate tax in Iowa has been repealed.

§ 76.08(p)(5) Inheritance Tax.

Add:

In re Estate of Kirk, 591 N.W.2d 630 (Iowa 1999) (under the statute, only a surviving joint tenant's accretive interest is taxable).

§ 76.08(q) Kansas. [Go To Main]

§ 76.08(q)(1) Property Tax.

Add:

In re Tax Exemption Application of Kaul, 933 P.2d 167 (Kansas 1997) (if Indian land has been excluded from boundaries of state, it is not subject to taxation unless specifically included by treaty or act of Congress's power; state taxation of fee-patented Indian-owned land may be proper). *In re Appeal of Inter-Faith Villa, L.P. 2008 Kan. App. LEXIS 91* (holding "taxation is the rule and exemption from taxation is the exception" and "any doubts are to be resolved against the exemption").

Add:

§ 79-1439

And the following case:

Board of Douglas County Comm'rs v. Cashatt, 933 P.2d 167 (Kansas 1997) (proper means to value real property used for residential purposes).

§ 76.08(q)(3) Estate Tax.

Change § 79-1539 (repealed) to:

§ 79-15,203.

§ 76.08(q)(4) Generation-skipping Tax.

Change § 79-1581 (repealed) to:

§ 79-15,114

§ 76.08(q)(5) Inheritance Tax.

Remove this section and its accompanying footnote, 348. It has been repealed

§ 76.08(r) Kentucky. [Go To Main]

§ 76.08(r)(1) Property Tax.

Change Id. to:

Id. § 132.020

§ 76.08(r)(4) Inheritance Tax.

Subsequent History

Ky. Rev. Stat. Ann. § 140.064 **Repealed** by Ky. L. Reg. Sess. Ch. 151 (H.B. 545) (2000) (Exemption of $7,500 received by surviving spouse or surviving children from testator's estate--Repealed).

§ 6-1.1-18-2

Add:

Griffin v. Department of Local Gov't Fin., 765 N.E.2d 716 (Ind. Tax Ct. 2002) (HCI tax statute by implication repealed any inconsistent limitation provision of state tax rate limit statute, and HCI tax was unconstitutional state tax that resulted in nonuniform and unequal taxation of substantially similar property).

Change Id. to:

Id. § 6-1.1-18-3

Add:

(on March 1, 2001, this percentage changes to the true tax value of the property).

§ 76.08(s) Louisiana. [Go To Main]

§ 76.08(s)(1) Property Tax.

Add:

Moonmaid Marine, Inc. v. Larpenter, 605 So. 2d 1120 (La. App. 1992) (unapportioned tax on all properties situated within the state is not a violation of *equal protection clause* or due process clause; the unapportioned tax is levied against domestic vessels engaged in foreign trade, and apportioned tax on vessels engaged in interstate commerce in inland waterways).

Add:

Erich Sternberg Realty Co., Inc. v. Louisiana Tax Comm'n, 560 So. 2d 868 (La. App. 1992) (uniformity does not require similar lands located in different areas of state to have uniform fair market value, because location is only one of several factors which influence fair market value of land).

§ 76.08(s)(3) Inheritance Tax.

Add:

Matter of Succession of Smith, 589 So. 2d 16 (La. App. 1991) (taxation exemptions have to be expressly and clearly conferred in plain terms and will be strictly construed against taxpayer; because nieces and great nieces and nephews are not given tax exemption status for state inheritance taxes by affinity, they must be taxed as strangers to the estate).

Subsequent History

LA. REV. STAT. ANN. §§ 2402, 2403 were repealed by Acts 2008, No. 822, § 1, eff. January 1, 2010.

§ 76.08(s)(4) Gift Tax

Add:

Subsequent History

Gift tax repealed by Acts 2007, No. 371, § 3, eff. July 1, 2008. However, income derived from a gift is included in an

individualAEs gross income. *LA. REV. STAT. ANN. § 47:45*.

§ 76.08(t) Maine. [Go To Main]

§ 76.08(t)(1) Estate Tax

Change "Equal to the credit allowed under federal law" to:

Equal to the federal credit, multiplied by a fraction comprised of "that portion of the decedent's federal gross estate that consists of real and tangible personal property located in the State plus the value of all intangible personal property and the denominator of which is the value of the decedent's federal gross estate." For nonresidents owning property in the State, the credit is equal to the federal credit in relation to the value of the federal gross estate.

§ 76.08(t)(2) Tax on Tranfers of Real Property Interests.

Modify from "Rates: $2.20 per $500 or a fraction thereof, the tax to be imposed 2 on the grantor and 2 on the grantee." to:

"Rates: $2.20 per $500 or a fraction thereof, the tax to be imposed 50% on the grantor and 50% on the grantee."

§ 76.08(u) Maryland. [Go To Main]

§ 76.08(u)(1) Property Tax.

Change "Ratio of assessed value to fair market value:" to read:

phased in value to 100%.

Add:

Supervisor of Assmts. v. Trustees of Bosley Methodist Church Graveyard, 443 A.2d 91 (Md. 1982) (charitable groups enjoy no inherent right to exemption from property taxation, for all real property (except expressly exempt property) within state is liable to taxation); *Mayor & City Council of Baltimore v. Boitnott, 741 A.2d 1079 (Me. 1999)* (City ordinance granting tax exemption is valid).

§ 76.08(u)(2)(i) Tax on Recording of Written Documents.

Add:

Scott v. Clerk of Circuit Court, 684 A.2d 896, (Md. App. 1996) (Maryland imposes two separate taxes on the transfer of real property: a recordation tax under this section, and a transfer tax under § 13-202; transfers made by family members to family limited partnerships for estate planning purposes are not exempt from this tax).

Add:

B.F. Saul Real Estate Inv. Trust v. Clerk of Circuit Court, 677 A.2d 660 (Md. App. 1996) (consideration payable by the transferee is taxable. If the property transferred is subject to a mortgage, the consideration payable by the transferee may include not only the consideration payable to the transferor but also the consideration eventually payable to the mortgagee).

§ 76.08(u)(2)(ii) Tax on Real Property Transfers.

Change wording of "Rates" to read:

The rate is one-half of 1% of the consideration payable for the transfer, except for first-time home buyers, who are subject to a rate of one-quarter of 1%.

§ 76.08(u)(3) Estate Tax

Add to the end of the sentence:

reduced by the proportion of the estate not located in Maryland.

§ 76.08(u)(5) Inheritance Tax.

Add:

McGarvey v. State, 533 A.2d 690 (Md. 1987) (the term "children" includes formally adopted children; children who are "equitably adopted" do not receive the same favorable inheritance tax treatment).

§ 76.08(v) Massachusetts. [Go To Main]

§ 76.08(v)(1) Property Tax.

Change § 2A to:

§ 2A(b).

§ 76.08(v)(2) Tax on Instruments for Sale of Real Property.

Change wording of "Rates" to read:

$2.00 if the consideration is between $100 and $500, and $2.00 for each additional $500 or fraction thereof, except in Barnstable County, in which the rate is $1.50 if the consideration is between $100 and $500, and $1.50 for each additional $500 or fraction thereof.

Add:

Martha's Vineyard Land Bank Comm'n v. Board of Assessors, 62 Mass. App. Ct. 25 (2004) (under the plain and unambiguous language of its enabling act, the Martha's Vineyard Land Bank Commission was exempt from and did not have to pay any real property taxes on property that it acquired).

Change "Id. ch. 64D, § 7" to: *Id.* ch. 64D, § 1.

Change "Items subject to tax:" to read:

any instrument for the sale of real property interests.

§ 76.08(w) Michigan. [Go To Main]

§ 76.08(w)(1) Property Tax.

Add:

Subsequent History

United States ex rel. Saginaw Chippewa Tribe v. Michigan, 882 F. Supp. 659 **reversed** by *United States ex rel. Saginaw Chippewa Tribe v. Michigan, 106 F.3d 130 (6th Cir. 1997)* .

Chauncey and Marion Deering McCormick Foundation v. Wawatam Tp., 492 N.W.2d 751 (Mich. App. 1992) (statutes

providing tax exemption will be strictly construed in favor of taxing authority; organizations seeking tax exemptions have the burden of showing that requirements for the exemptions have been met); Mich. Stat. Ann. § 7.1.

§ 76.08(w)(2) Tax on Instruments Conveying Real Property.

Add:

Taxpayers Allied for Constitutional Taxation v. Wayne County 537 N.W. 2d 596 (Mich. 1995) (action for refund of real property transfer taxes begins accruing at time tax is due; for real property transfer tax, the date the tax is due will necessarily be the date the tax is paid, because payment is a condition of registering title).

§ 76.08(w)(3) Tax on Real Estate Transfers.

Change Mich. Stat. Ann. §§ 7.456(21) et seq. to:

Id. §§ 207.523-207.526

§ 76.08(w)(4) Estate Tax.

Add:

Hill v. Department of Treasury, 509 N.W.2d 905 (Mich. App. 1993) (statutory exemption of marital deduction transfers from inheritance tax also exempts estates from liability for Michigan's "pickup tax," which is equal to maximum of credit for state death taxes allowable to decedent's estate against federal tax).

§ 76.08(w)(5) Inheritance Tax.

Add:

Matter of Estate of Mooney, 397 N.W.2d 329 (Mich. App. 1986) (two children adopted out by their natural father were subject to preferential tax treatment); *Matter of Estate of Walther, 517 N.W.2d 841 (Mich. App. 1994)* (trust beneficiary partners each held proportionate, beneficial interest in trust property transferred to limited partnership from testamentary trust, and, thus, preferential tax rates applied to partners as lineal descendants of testator).

§ 76.08(x) Minnesota. [Go To Main]

§ 76.08(x)(1) Property Tax.

Add:

Cass County v. Leech Lake Bank of Chippewa Indians, 118 S. Ct. 1904 (1998) (tax exempt status declared for Indian land that has been reacquired by tribe after conveyance to non-Indians); *Crown CoCo Inc. v. Commissioner of Revenue, 336 N.W.2d 272 (Minn. 1983)* (canopy over self-service gasoline pumps considered "structure" subject to tax on real property); *County of Ramsey v. Lincoln Fort Road Housing Ltd. Partnership, 494 N.W.2d 276 (Minn. 1992)* (partnership subject to taxation on property for which it made 30 years of lease payments with option to buy for $1.00 at end of lease period, regardless of whether the transaction is considered a lease or an equitable mortgage); *White Earth Land Recovery Project v. County of Becker, 544 N.W.2d 778 (Minn. 1996)* (all property presumed taxable, and charities seeking tax-free status must prove entitlement to claimed exemption); *ILHC of Eagan, LLC v. County of Dakota, 693 N.W.2d 412 (Minn. 2005)* (taxpayer, an assisted living facility, was not eligible for a partial tax exemption because it was not in existence before the 1991 tax levy).

HealthEast v. County of Ramsey, 770 N.W.2d 153 (Minn. 2009) (explaining all property is presumed taxable and the taxpayer bears the burden of proving it is exempt; and holding taxpayers had not met their burden of proving they were a "benevolent society" whose property is exempt from taxation).

Add:

Marquette Bank Nat'l Ass'n v. County of Hennepin, 589 N.W.2d 301 (Minn. 1999) (property tax assessors may consider a property's value-in-use to the extent that present use reflects the property's value to buyers in the marketplace); *TMG Life Ins. Co. v. County of Goodhue, 540 N.W.2d 848 (Minn. 1995)* (taxpayer required to determine value de novo instead of using the foreclosure sale appraisal); *Equitable Life Assur. Soc. of U.S. v. County of Ramsey, 530 N.W.2d 544 (Minn. 1995)* (when possible, two approaches should be used by appraisers when valuing property for real property tax purposes).

§ 76.08(x)(2) Transfer Taxes.

§ 76.08(x)(2)(i) Tax on Instruments Conveying Real Property Interests.

Change "If the consideration is in excess of $500, the tax is $1.65 plus $1.65 for each additional $500" to:

If the consideration exceeds $500, the tax is .0033 of the net consideration.

Change "Rates" to read:

$1.65 for transfers resulting from corporate mergers, consolidations, or designated transfers, and for transfers if $500 or less. If the net consideration exceeds $500, the tax is 0.33% of the net consideration.

§ 76.08(x)(2)(ii) Tax on Mortgages.

Delete the last line of the subsection entitled: "Rates," including footnote 395 (it is no longer applicable).

§ 76.08(y) Mississippi. [Go To Main]

§ 76.08(y)(1) Property Tax.

Add:

Rebelwood, Ltd. v. Hinds County, 544 So. 2d 1356 (Miss. 1989) (identical properties with disparate revenue generating capabilities may be evaluated differently without violating provision of State Constitution requiring uniformity and equality in taxation); *Riley v. Jefferson Davis County, 669 So. 2d 748 (Miss. 1996)* (although land was zoned as residential, it was used as agricultural land and was therefore improperly classified as residential land for tax purposes); *Washington County Bd. of Sup'rs v. Greenville Mill, a Div. of Mohasco Corp., 437 So. 2d 401 (Miss. 1983)* (once true value is determined, a uniform and equal ratio of assessment must be applied to property so as to arrive at assessed value for purposes of taxation).

Change "Rate of State Levy:" to read:

Varies.[397.1]

§ 76.08(z) Missouri. [Go To Main]

§ 76.08(z)(1) Property Tax.

Change:

Central States Christian Endeavors Ass'n v. Nelson, 898 W.2d 547 (Mo. 1995) should be *Central States Christian Endeavors Ass'n v. Nelson, 898 S.W.2d 547 (Mo. 1995)* .

State ex rel. City of Cabool v. Texas County Bd. of Equalization, 850 S.W.2d 102 (Mo. 1993) (property tax should be reduced by fair apportioning formula if tax situs exists in another jurisdiction); *Brookside Estates v. State Tax Comm'n of Missouri, 849 S.W.2d 29 (Mo. 1993)* (that mobile homes situated on real estate owned by homeowner are treated as real property for tax purposes, but personal property when resting on leased property, does not violate *equal protection clause*).

§ 76.08(z)(2) Estate Tax.

Add:

In re Estate of Nease, 643 S.W.2d 97 (Mo. App. W.D. 1982) (doctrine of equitable apportionment operates to prorate the burden of estate taxes among the recipients of property in such proportion as the amount of property contributes to the tax; testator may designate by will who should bear the burden of inheritance and estate taxes).

§ 76.08(aa) Montana. [Go To Main]

§ 76.08(aa)(1) Property Tax.

Change:

§ 15-6-101 to § 15-6-201.

Change § 15-6-101 to:

§ 15-6-201.

§ 76.08(aa)(2) Estate Tax.

Add:

in proportion to the percentage of the decedent's estate located in the state.

§ 76.08(aa)(3) Inheritance Tax.

Delete the wording under "Inheritance Tax" and replace with:

Equal to the credit allowed under the federal tax law.

Replace all with:

Id. § 72-16-1002

§ 76.08(bb) Nebraska. [Go To Main]

§ 76.08(bb)(1) Property Tax

Add:

Amendment:

Neb. Rev. Stat. § 77-201 **amended** by NE Legis 166 (2007) ("Except as provided in subsections (2) through (4) of this section, all real property in this state, not expressly exempt therefrom, shall be subject to taxation and shall be valued at its actual value.").

Lincoln Tel. & Tel. Co. v. County Board of Equalization, 308 N.W.2d 515 (Neb. 1981) (taxpayer carries burden of proof to establish that value of the property has not been fairly and proportionately equalized with all other property); *Richman Gordman v. Board of Equalization, 334 N.W.2d 447 (Neb. 1983)* (actual value, market value, and fair market value mean exactly the same thing for purposes of taxation); *Schmidt v. Thayer County Bd. of Equalization, 624 N.W.2d 63 (Neb. Ct. App. 2001)* (TERC's approval of valuation of taxpayer's property based upon its location in higher-valued market area, without relation to soil classification, was not supported by competent evidence and was arbitrary); *Firethorn Inv. v. Lancaster County Bd. of Equalization, 622 N.W.2d 605 (Neb. 2001)* (sale to political subdivision can reflect current market value and serve as a comparable sale for an assessment, and single sale may in some instances provide evidence for market value); *Garvey Elevators, Inc. v. Adams County Bd. of Equalization, 621 N.W.2d 518 (Neb. 2001)* (board was not required to produce evidence to show how it determined actual value of taxpayer's property, and taxpayer failed to establish that valuations were grossly excessive and result of systematic exercise of intentional will or failure of plain duty); *Livingston v. Jefferson County Bd. of Equalization, 640 N.W.2d 426 (Neb. Ct. App. 2002)* (commission reviewing valuation of house required to specifically consider external depreciation due to a nearby hog facility, nearby manure easement and house's remote location).

§ 76.08(bb)(2) Tax on Transfer of Certain Real Property Interests.

Under "Rates" replace $1.75 with:

$2.25

§ 76.08(bb)(3) Estate Tax

Change "The excess of federal tax credit over amount of state inheritance taxes" to:

The amount varies depending on when the decedent died.

§ 76.08(bb)(4) Inheritance Tax

Change to: Id. § 77-2002 to:

§ 77-2040.

§ 76.08(cc) Nevada. [Go To Main]

§ 76.08(cc)(2) Tax on Instruments Conveying Real Property Interests.

Change "Rates" section to read:

65 cents per $500 or fraction thereof of value in countries whose population is less than 400,000 and $1.25 per $500 in counties whose population exceeds 400,000.

§ 76.08(dd) New Hampshire. [Go To Main]

§ 76.08(dd)(1) Property Tax.

Change:

Appeal of the Kiwanis Club, Inc., 663.2d 90 (N.H. 1995) **should be** *Appeal of the Kiwanis Club, Inc., 663* ***A.2d*** *90 (N.H. 1995)* .

Crown Paper Co. v. City of Berlin 703 A.2d 1387 (N.H. 1997) (in some circumstances factory machinery may be subject to real property taxation where the factory machinery has a special use or multiple uses, independent of or unrelated to the process of production, that are intimately intertwined with the underlying realty); *Appeal of Town of Pelham, 736 A.2d 1223,* (N.H. 1999) (truck trailers used as storage sheds were not taxable as fixtures).

Add:

Town of Ossipee v. Whittier Lifts Trust, 827 A.2d 989 (N.H. 2003) .

§ 76.08(dd)(2) Tax on Transfer of Real Property Interests.

Add:

Appeal of Lorden 594 A.2d 1303 (N.H. 1991) (transfers of assets by a corporation to its stockholders by deed upon dissolution of the corporation do not constitute a transfer within meaning of the transfer tax statute).

In "Rates," change 35 cents to:

75 cents.

And change 14 dollars to:

20 dollars.

§ 76.08(dd)(3) Estate Tax.

Delete wording under "Estate Tax" and replace with:

Equal to the credit allowed under federal estate tax law with respect to property within the state.

§ 76.08(dd)(4) Inheritance Tax.

Remove this section and its accompanying footnote, 425. It has been repealed.

lands owned exemption from property taxation).

note 513, change to:

"*Vt. Stat. Ann. tit. 32, § 3701*."

§ 76.08(tt)(2)(ii) Capital Gains Tax on Land.

Subsequent History

Vt. Stat. Ann. tit. 32, § 7442(a) **Repealed**.

Add new footnote to give reference to the table:

516.1. *Id*. § 10003.

§ 76.08(uu) Virginia. [Go To Main]

§ 76.08(uu)(2) Transfer Taxes

§ 76.08(uu)(2)(ii) Tax on Documents Transferring Real Property Interests

Change in table:

"$.15 per $100 of value" to "$.25 per $100 of value"

"$.12 per $100 of value" to "$.22 per $100 of value"

"$.09 per $100 of value" to "$.19 per $100 of value"

"$.06 per $100 of value" to "$.16 per $100 of value"

"$.03 per $100 of value" to $.13 per $100 of value"

§ 76.08(uu)(3) Estate Tax

Change "Equal to the credit allowed under federal estate tax law" to:

Determined by multiplying the federal estate tax credit by a fraction, the numerator being the value of the gross estate subject to Virginia law, and the denominator being the value of the gross estate.

§ 76.08(uu)(5) Tax on Wills and Administrators.

Change $5,000 or less to:

$15,000 or less

§ 76.08(vv) Washington. [Go To Main]

§ 76.08(vv)(1) Property Tax.

Add:

Carpenter v. Franklin County Assessor, 638 P.2d 619 (Wash. App. 1981) (property encumbered by irrigation ditches was considered valueless so county assessor subtracted the valueless acreage from the total acreage for taxation purposes); *Washington Mut. Sav. Bank v. Department of Revenue, 893 P.2d 654 (Wash. App. 1995)* (private party made improvements on land leased from government and was assessed property taxes on the improvements because the lease agreement stated that improvements would be property of the lessee until expiration of the lease).

Add:

Sahalee Country Club, Inc. v. State Bd. of Tax Appeals, 735 P.2d 1320 (Wash. 1987) (golf course was not allowed to value property at zero for tax purposes on theory that value of the golf course was "shifted" to neighboring properties when their value was increased as a result of residing next to the golf course); *University Village Ltd. Partners v. King County, 23 P.3d 1090 (Wash. Ct. App. 2001)* (challenge to assigned land value component of improved real property appraised by income method, without more, is insufficient to sustain constitutional claim of non-uniform taxation).

§ 76.08(vv)(2) Tax on the Sale of Property.

Subsequent History

Wash Rev. Code § 83.100.030 **Repealed** by Laws 2005, Ch. 516, § 17, eff. May 17, 2005 ("The repealed sections in section 17 of this act do not affect any existing right acquired or liability or obligation incurred under the statutes repealed or under any rule or order adopted under those statutes nor do they affect any proceeding instituted under them ... . This act applies prospectively only and not retroactively. Sections 2 through 17 of this act apply only to estates of decedents dying on or after the effective date of this section.").

§ 76.08(vv)(3) Estate Tax.

Subsequent History

Wash Rev. Code § 83.100.045 **Repealed** by Laws 2005, Ch. 516, § 17, eff. May 17, 2005 ("The repealed sections in section 17 of this act do not affect any existing right acquired or liability or obligation incurred under the statutes

repealed or under any rule or order adopted under those statutes nor do they affect any proceeding instituted under them... . This act applies prospectively only and not retroactively. Sections 2 through 17 of this act apply only to estates of decedents dying on or after the effective date of this section.").

§ 76.08(vv)(4) Generation-skipping Transfer Tax

Subsequent History

WASH. REV. CODE § 83.100.045 Repealed by Laws 2005, Ch. 516, § 17, eff. April 22, 2005.

§ 76.08(ww) West Virginia [Go To Main]

Change "Equal to the credit allowed under federal estate tax law" to:

Determined by multiplying the federal estate tax credit by a fraction, the numerator being the value of the portion of the estate subject to West Virginia law, and the denominator being the value of the gross estate.

§ 76.08(xx) Wisconsin. [Go To Main]

§ 76.08(xx)(1) Property Taxes.

Change § 70.34 to:

§ 70.32.

Ahrens v. Town of Fulton, 641 N.W.2d 423 (Wis. 2002) (Mobile home "set upon a foundation" within meaning of statute permitting such homes to be subject to taxation as real property when home is resting for more than temporary time, in whole or in part, on some other means of support than its wheels, makes owners subject to taxation for improvements to real property).

§ 76.08(xx)(2) Tax on Transfers of Real Property.

Add:

Wisconsin Dep't of Revenue v. Mark, 483 N.W.2d 302 (Wis. App. 1992) (conveyance and consideration with value must be present before real estate transfer fee obligation arises).

Add following the first sentence:

If the entire estate is not located within the state, the tax is determined by multiplying the federal estate tax credit by a fraction, the numerator being the value of the portion of the estate subject to Wisconsin law, and the denominator being the value of the gross estate.

§ 76.08(xx)(4) Inheritance Tax.

Remove this section and its accompanying footnote, 548. It has been repealed.

§ 76.08(xx)(5) Gift Tax.

Remove this section and its accompanying footnote, 549. It has been repealed.

§ 76.08(yy) Wyoming. [Go To Main]

§ 76.08(yy)(1) Property Tax.

CHAPTER 77 FORFEITURES

9-77 Thompson on Real Property, Thomas Editions § 77.01

AUTHOR: Professor Stephen A. Spitz The author would like to acknowledge the invaluable assistance of a number of U.S.C. Law School law students, including Thomas Shelley, III, Bruce Haynes, Henry Cabaniss, Constance Boken, Lauren Ferrari and Mark Fava and would also like to thank Celeste Jones, Esquire of McNair and Sanford, P. A. All these individuals were extraordinarily helpful, and the least that can be done is a public note of appreciation. University of South Carolina Law School

§ 77.01 Early History.

A forfeiture is the "divestiture of property without compensation, in consequence of a default or an offense." n2 The concept has ancient roots. Forfeitures existed in the Bible, in ancient Athens, in medieval England, and in early America.

In the Bible a well-known passage in the Old Testament commands that "if an ox gore a man or a woman, that they die; then the ox shall be surely stoned, and his flesh shall not be eaten." n3 In ancient Athens, the rule was that "among the Athenians, whatever was the cause of a man's death, by falling upon him, was exterminated or cast out of the dominions of the republic." n4 In medieval England, at the time of Edward III, it was the rule that "[i]f my dog kills your sheep and I freshly after the fact tender you the dog you are without recourse against me." n5

In addition, it was the law that "[t]he convicted felon forfeited his chattels to the Crown and his lands escheated to his lord [and] the convicted traitor forfeited all of his property, real and personal, to the Crown." n6 Finally, as the Supreme Court recently noted "English Law provided for statutory forfeitures of offending objects used in violation of the customs and revenue laws." n7

In America, Congress enacted statutory forfeitures in both the 18th and 19th centuries. A law of 1789 declared the forfeit of goods, wares, and vessels when custom rules were violated. n8 And a revenue law of 1866 called for forfeitures when goods subject to federal taxation were removed or concealed with the intent to defraud the United States. The law commanded that when taxes were unpaid, goods and commodities as well as "casks, vessels, cases or other packages ... containing such goods or commodities ... and every vessel, boat, cart, carriage or other conveyance ... used in the removal ... or concealment thereof ... shall be forfeited." n9

In 1920, in a rare use of the Revenue Law of 1866, the government seized an automobile in an *in rem* proceeding, asserting the automobile had been used in the "removal" of distilled spirits without payment of federal taxes. n10 The

titleholder of the seized car, a corporation, intervened in the forfeiture proceeding. The corporation argued that because it held title to the unpaid vehicle, and because the revenue violation was committed by the buyer and not the corporation or its officers, a forfeiture of the automobile would violate due process of law. n11

The United States Supreme Court disagreed. It upheld the statutory forfeiture rejecting the owner's argument of innocence as constitutionally irrelevant. It found an analogy between the statute and the ancient law of *deodand*, under which a personal chattel that caused the death of any creature was forfeited, n12 and held forfeitures were a valid legal remedy under American law. n13

However, forfeitures have not always been held in favor. In England, William Blackstone, in his famous Commentaries, was clearly ambivalent on the subject. Although he concluded that the crime of treason justified forfeiture on principles of "natural justice," n14 he lamented in his concluding chapter of the Commentaries n15 the "unheard-of forfeitures ... arbitrarily extracted" that followed the Norman Conquest. n16 And, as Justice Harlan once noted in a 1971 United States Supreme Court decision, "Blackstone ... condemned the seizure of the property of the innocent as based upon a superstition inherited from the blind days of feudalism". n17

In this country, Chancellor James Kent, in his famous Commentaries on American Law, summarized American thinking on the subject by concluding that "the tendency of public opinion has been to condemn forfeiture of property, at least in cases of felony, as being an unnecessary and hard punishment of the felon's posterity." n18 To support this conclusion, Kent observed that forfeitures of estates and corruption of blood, even in cases of treason, were abolished by federal statute in 1790. n19 And in many states, including his own, New York, laws were passed abolishing every type of forfeiture of property, except treason. n20 Dean Bernard Gavit, n21 in his twentieth century commentary on Blackstone, n22 noted that as of 1941 title by forfeiture "has had no acceptance in this country" n23 and has been "almost completely repudiated in modern law." n24

The early American dislike of forfeitures has not lasted. Since 1970, Congress has dramatically increased the use of civil forfeitures, enacting numerous new statutory forfeitures and expanding the scope of these statutes to new situations. This expansion and the modern developments in this ancient remedy are discussed subsequently.

CHAPTER 77 FORFEITURES

9-77 Thompson on Real Property, Thomas Editions § 77.02

AUTHOR: Professor Stephen A. Spitz The author would like to acknowledge the invaluable assistance of a number of U.S.C. Law School law students, including Thomas Shelley, III, Bruce Haynes, Henry Cabaniss, Constance Boken, Lauren Ferrari and Mark Fava and would also like to thank Celeste Jones, Esquire of McNair and Sanford, P. A. All these individuals were extraordinarily helpful, and the least that can be done is a public note of appreciation. University of South Carolina Law School

§ 77.02 The Modern Statutes.

[Go To Supp]

§ 77.02(a) Federal Civil Statutes.

In modern times, Congress has greatly expanded the role of civil forfeitures in its fight against crime. n25 For example, Justice Kennedy, in his dissent in *Alexander v. United States*, n26 noted that the federal Racketeer Influenced and Corrupt Organizations Act (RICO) contains forfeiture penalties "novel for their punitive character as well as for their unprecedented sweep," n27 and that this statute is only one of many new federal laws creating vast forfeitures in a large number of novel situations. n28 Civil forfeitures now exist in Titles 16, 18, 19, 21, 26, 28, 30, 39, and 49 of the United States Code, and include: *16 U.S.C. §§ 65,* 117d, 128, 171 (guns or other property used unlawfully in national parks); *16 U.S.C. § 773h* (forfeitures under Northern Pacific Halibut Act of 1982); *16 U.S.C. § 1417* (forfeitures under Global Moratorium to prohibit certain tuna harvesting practices); *16 U.S.C. §§ 1823,* 1851, 1860 (forfeitures under international fishery agreements and national fishery management programs); *16 U.S.C. § 3606* (forfeitures under North Atlantic Salmon Fishing); *16 U.S.C. § 5010* (forfeitures under North Pacific Anadromous Stocks Convention); *18 U.S.C. § 981* (various civil forfeitures); *18 U.S.C. § 984* (civil forfeiture of fungible property); *18 U.S.C. § 1082* (forfeiture of property used in connection with illegal gambling); *18 U.S.C. § 1963*(a) (forfeiture of property used in RICO violations); *18 U.S.C. § 2254* (forfeitures resulting from Sexual Exploitation and Other Abuses of Children); *18 U.S.C. § 3322* (forfeitures for disclosure of certain matters occurring before grand jury); *18 U.S.C. § 3666* (forfeitures for property used in connection with illegal bribes); *19 U.S.C. § 1305* (forfeitures under customs law for certain immoral articles); *19 U.S.C. § 1453* (forfeitures for property smuggled in violation of customs laws); *21 U.S.C. § 881* (forfeiture of property connected to drug offenses); *26 U.S.C. § 6103* (forfeitures under revenue law); *28 U.S.C. § 524* (forfeitures of several varieties); *28 U.S.C. § 1355* (new rules about forfeitures); *30 U.S.C. § 1466* (civil forfeitures concerning mining of certain minerals); *39 U.S.C. § 2003* (forfeitures under the Postal Service Fund); *49 U.S.C. § 80303* (forfeiture of vessels used to transport or convey contraband).

Collectively, these statutes have created an exponential increase in forfeitures. Statistics tell the story. In the fiscal year

ending September 30, 1990, the Department of Justice's Asset Forfeiture Fund held a balance of approximately $478 million. n29 In the time period between 1984 and 1990, the government confiscated money and goods worth approximately $1.5 billion. n30 Many of the largest seizures have taken place under the Comprehensive Drug Abuse Prevention and Control Act of 1970. n31

The enactment of this law has been superbly described by Alice Marie O'Brien in her Note, "*Caught in the Crossfire: Protecting the Innocent Owner of Real Property from Civil Forfeiture Under 21 U.S.C § 881(a)(7).*" n32 O'Brien notes that "Congress recognized that routine criminal sanctions such as fines and imprisonment were an inadequate deterrent to participants in the drug trade." n33 She concludes that "Congress sought to supplement the more traditional criminal penalties by providing a law enforcement device that would not only punish, but would also strip offenders of their economic gains," n34 and to further this purpose Congress enacted subsection 881(a)(7), permitting the forfeiture of real property. n35 As currently enacted, the scope of forfeitures under *21 U.S.C. § 881* is extremely broad, encompassing at least 14 separate categories of property that can be confiscated:

(1) The controlled substances themselves; n36

(2) The raw materials, products, and equipment used in the manufacture, distribution, importing, exporting, or delivery of such substances; n37

(3) Property used as a container for such substances; n38

(4) Property intended to be used as a container; n39

(5) "Conveyance" used to transport or facilitate the transportation of the sale, possession, or concealment of an illegal substance, including airplanes, cars, boats, and other "vehicles" or "vessels"; n40

(6) "Conveyances" intended to be used to transport or facilitate such transportation of such illegal substances; n41

(7) The books, records, and research, used or intended to be used in violation of the Act; n42

(8) Property acquired with the proceeds of illegal drug transactions, including all "things of value" in exchange for a controlled substance and "all proceeds" traceable to such an exchange; n43

(9) Real property (including leaseholds) used in any manner to commit violations of the drug law punishable by more than one year's imprison-ment; n44

(10) Real property (including leaseholds) intended to be used in any manner to commit violations of drug law punishable by more than one year's imprisonment; n45

(11) Real property used to facilitate the commission of violations of drug law punishable by more than one year's imprisonment; n46

(12) Drug paraphernalia and certain listed chemicals; n47

(13) Firearms used to facilitate the transportation, sale, or possession of property that can be seized under § 881(1)(2); and n48

(14) Firearms intended to be used to facilitate activities discussed just above. n49

As one lower court n50 summed up this new law:

> One of the most effective "weapons" in the government's arsenal is the law of forfeiture. Through this obscure, but effective law, the government is able to confiscate property that drug traffickers use to further their trade, as well as any profit that may result. In recent years the government has successfully forfeited businesses, commercial real estate, family homes, vehicles, airplanes, boats, negotiable instruments, currency, bank accounts and virtually any other property linked to violation of the drug laws. n51

§ 77.02(b) State Statutes.

Every state and the District of Columbia has enacted at least one forfeiture statute. A partial list follows:

Alabama -- Ala. Code § 20-2-93.

Alaska -- Alaska Stat. §§ 17.30.100 - 17.30.126.

Arizona -- Ariz. Rev. Stat. Ann. § 13-3415.

Arkansas -- Ark. Code Ann. § 5-64-501.

California -- Cal. Health & Safety Code § 11470.

Colorado -- Colo. Rev. Stat. Ann. § 16-13-501.5.

Connecticut -- Conn. Gen. Stat. Ann. § 21a-246d.

Delaware -- Del. Code Ann. tit. 16, § 4784.

District of Columbia -- D.C. Code Ann. § 33-552.

Florida -- Fla. Stat. Ann. § 893.12.

Georgia -- Ga. Code Ann. § 79A-828.

Hawaii -- Haw. Rev. Stat. § 329-55.

Idaho -- Idaho Code § 37-2744.

Illinois -- Ill. Ann. Stat. ch. 561/2, paras. 1505 - 2912.

Indiana -- Ind. Code Ann. § 16-6-8.5-5.1.

Iowa -- Iowa Code Ann. § 809.1-21.

Kansas -- Kan. Stat. Ann. § 60-4107.

Kentucky -- Ky. Rev. Stat. Ann. §§ 218A.405-.460.

Louisiana -- La. Rev. Stat. Ann. § 32.1550.

Maine -- Me. Rev. Stat. Ann. tit. 15, § 5821.

Maryland -- Md. Code Ann. § 10-203.

Massachusetts -- Mass. Gen. Laws Ann. ch. 272, § 98.

Michigan -- Mich. Comp. Laws Ann. § 500.1371.

Minnesota -- Minn. Stat. Ann. § 41-29-181.

Mississippi -- Miss. Code Ann. § 41-29-101.

Missouri -- Mo. Ann. Stat. § 513.607.

Montana -- Mont. Code Ann. § 44-13-103.

Nebraska -- Neb. Rev. Stat. § 28-431.

Nevada -- Nev. Rev. Stat. § 207.460.

New Hampshire -- N.H. Rev. Stat. Ann. § 141-E:16.

New Jersey -- N.J. Stat. Ann. § 2C:41-3.

New Mexico -- N.M. Stat. Ann. § 30-31A-10.

New York -- N.Y. Penal Law § 480.00.

North Carolina -- N.C. Gen. Stat. § 750-5.

North Dakota -- N.D. Cent. Code § 12-46-20.

Ohio -- Ohio Rev. Code Ann. § 2925.43.

Oklahoma -- Okla. Stat. Ann. tit. § 1658.2(b).

Oregon -- Or. Rev. Stat. § 166.725.

Pennsylvania -- 42 Pa. Cons. Stat. Ann. § 6802.

Rhode Island -- R.I. Gen. Laws § 21-28-5.04.2.

South Carolina -- S.C. Code Ann. § 38-21-340(b).

South Dakota -- S.D. Codified Laws Ann. § 58-19-37.

Tennessee -- Tenn. Code Ann. § 39-12-206(5)(b).

Texas -- Tex. Tax Code Ann. § 159.205.

Utah -- Utah Code Ann. § 58-37-13.

Vermont -- Vt. Stat. Ann. tit. 18, § 4241.

Virginia -- Va. Code Ann. § 19.2-368.20.

Washington -- Wash. Rev. Code Ann. § 69.50.505.

West Virginia -- W. Va. Code § 60-6-20.

Wisconsin -- Wis. Stat. Ann. § 100.26(4).

Wyoming -- Wyo. Stat. § 35-7-1049.

9-77 Thompson on Real Property, Thomas Editions § 77.03

AUTHOR: Professor Stephen A. Spitz The author would like to acknowledge the invaluable assistance of a number of U.S.C. Law School law students, including Thomas Shelley, III, Bruce Haynes, Henry Cabaniss, Constance Boken, Lauren Ferrari and Mark Fava and would also like to thank Celeste Jones, Esquire of McNair and Sanford, P. A. All these individuals were extraordinarily helpful, and the least that can be done is a public note of appreciation. University of South Carolina Law School

§ 77.03 The Seizure of Property.

[Go To Supp]

§ 77.03(a) Prior Notice and Meaningful Hearing.

In 1970, and again in 1972, the United States Supreme Court held that due process may demand that the loss of property only take place after prior notice and a meaningful hearing. n52

The court described prior notice and a hearing as "central" to due process, n53 a "basic aspect of the duty of government," n54 and that prior notice and a meaningful hearing ensure fair play, avoid arbitrary encroachment, and reduce the possibility of mistaken deprivation. n55 As Justice Frankfurter once observed, "fairness can rarely be obtained by secret, one-sided determination of facts decisive of rights." n56

Nonetheless, exceptions do exist. In 1974, the United States Supreme Court discussed one such exception in *Calero-Toledo v. Pearson Yacht Leasing Co.* n57 There, upon discovering marijuana on board a pleasure yacht, Puerto Rican authorities seized the yacht under a Puerto Rico law authorizing seizure without prior notice or a prior hearing.

A three-judge lower-court panel held the seizure violated due process. The United States Supreme Court, however, disagreed. It concluded that a seizure for purposes of forfeiture is one of those "extraordinary situations" that justifies postponing notice and opportunity for a hearing. n58 Drawing upon dictum in the Fuentes case, the court noted that immediate seizures may be justified in the following situations:

> First, the seizure has been directly necessary to secure an important governmental or general public interest. Second, there has been a special need for very prompt action. Third, the State has kept the strict control over its monopoly of legitimate force: the person initiating the seizure has been a governmental official responsible for determining, under the standards of a narrowly drawn statute, that it was necessary and justified in the particular instance. n59

Applying this test in *Calero-Toledo*, the court upheld the seizure of the yacht without prior hearing or notice. The court first noted that the immediate seizure advanced the important governmental interest of preventing continued illicit use of the yacht. In addition, the court noted that the need for prompt action and the necessity to forego advance warning existed because the yacht "could be removed to another jurisdiction, destroyed, or concealed, if advance warning of confiscation were given." n60 Finally, the court was persuaded that because public officials and not private parties controlled the seizure process, the situation was distinct from the private seizure in *Fuentes* upon which the lower court had relied in finding the Puerto Rico law unconstitutional.

Calero-Toledo has been widely accepted by federal courts in personal property seizures. n61

Until a recent United States Supreme Court, however, the lower courts were split on whether real as compared to personal property seizures should be allowed without notice. One approach, illustrated by *United States v. Property at 4492 S. Livonia Rd.*, n62 was that real estate in general, and personal residences in particular, require prior notice. The court in *Livonia* urged that the question of pre-seizure notice called for the balancing of a variety of factors, including the significance of the property interest at stake, the risk of an erroneous deprivation, the probable value of additional procedural safeguards, and the government's interest in the avoidance of burdensome procedures. n63

Applying this test to the personal residence sought to be forfeited in Livonia, the court concluded prior notice was necessary. n64 The court found that the inherent personal nature of a private home heavily weighed the test in favor of prior notice because "one's reasonable expectation of privacy in the home is entitled to a unique sensitivity from federal courts." n65

Moreover, the court stated that prompt action in the forfeiture of real property is not as necessary as in the forfeiture of personal property because real property cannot be concealed or removed. Finally, the court reasoned that any concern about the property being transferred, after the notice but before the seizure, could be avoided by the filing of a lis pendens or a restraining order. n66 Other lower courts, however, disagreed, holding the seizure of real property without prior notice or hearing was constitutional. In *United States v. 900 Rio Vista Blvd.*, n67 for example, the court held an immediate seizure of real property without prior notice was justified under *Calero-Toledo* because: "it is well settled that no prior judicial determination that seizure is justified is required when the government seizes items subject to forfeiture." n68

The Supreme Court resolved this split of authority in the lower courts in *United States v. James Daniel Good Real Property*. n69 There, after police found drug paraphernalia and marijuana in a private home and after the owner of the home pled guilty to violation of state law, the United States filed an *in rem* action in Federal District Court, seeking forfeiture of the home and four-acre parcel on which it was situated on the ground that the property had been used to commit or facilitate the commission of a federal drug offense.

Following an *ex parte* proceeding, a Magistrate Judge issued a warrant authorizing the property's seizure, and the government seized the property without prior notice. The owner of the property argued due process had been violated. The Supreme Court agreed, holding that due process requires the government to afford notice and a meaningful opportunity to be heard before seizing real property subject to civil forfeiture, absent exigent circumstances. n70

The government argued that because civil forfeiture serves a "law enforcement purpose" the government need only comply with the Fourth Amendment when seizing forfeitable property. The court rejected this argument, holding that "where the government seizes property not to preserve evidence of wrongdoing but to assert ownership and control over the property, its action must also comply with the Due Process Clause." n71

The government also claimed that civil forfeiture is an exception to the general rule because there is a valid governmental interest at stake that justifies postponing the hearing until after the seizure. In answering this contention,

the court used the inquiry set forth in *Mathews v. Eldridge*, n72 which requires the court to consider the private interests affected by the civil action; the risk of erroneous deprivation of that interest through the procedures used; the probable value of additional safeguards; and the government's interest, including the administrative burden that additional procedural requirements would impose.

The court found that the personal right to maintain control over one's own home, and to be free from governmental interference, is a private interest of historic and continuing importance. n73 The court also found that the practice of an *ex parte* hearing creates an unacceptable risk of error because it affords little or no protection to an innocent owner. n74

Finally, the court found that the government's interest in seizing Mr. Good's property before a forfeiture hearing did not further purposes of forfeiture. n75 Because real property is not as easily disposed of as personal property, the court noted that there is typically no need for extraordinary expediency. Moreover, the court concluded that the government's only legitimate interests at the beginning of forfeiture proceedings are to ensure that the property not be sold, destroyed, or used in further illegal activity prior to the forfeiture judgment. n76 These interests can often be secured by means other than immediate seizure. For example, filing a notice of *lis pendens* can prevent sale, and a restraining order can prevent destruction. Therefore, in most cases, the court found that there was no need to assert control over the property without first affording notice and an adversary hearing. n77

The consequences of *James Daniel Good* are significant. First, several courts have already held that *Good* should be applied retroactively to those cases not finally decided. n78

There is, however, disagreement concerning the legal effect of a failure to hold a preseizure hearing. One court has concluded that lack of notice and hearing requires the action to be dismissed. n79 Other courts disagree. n80

Good leaves unanswered what happens when a prior hearing is excused for "exigent circumstances." In *Organizacion JD LTDA v. United States*, n81 the government seized numerous electronic fund transfers claiming the funds were proceeds of illicit drug trafficking. The Second Circuit held that these seizures satisfied the "exigent circumstances" test because the property at issue was fungible and capable of rapid motion. n82

§ 77.03(b) Methods of Forfeiture.

One court has said that "civil forfeiture is a creature unto itself." n83

This adage is certainly true with regard to the complex procedural requirements found in civil forfeitures. n84 The government has three options when it initiates a civil forfeiture under the Comprehensive Drug Abuse Prevention and Control Act of 1970. n85 First, it can elect to file a complaint pursuant to the Supplemental Rules for Certain Admiralty and Maritime Claims. Under this method, a summons and warrant by a court clerk is issued without requiring a certificate of exigent circumstances. n86

As the court in *United States v. United States Currency Totalling $3,817.49* n87 explained, the Supplemental Rules for Certain Admiralty and Maritime Claims works roughly as follows: The United States commences a judicial forfeiture by filing a complaint in the district where the seizure occurred. n88 Upon the filing of the complaint, the district court clerk issues a warrant for the arrest of the property at issue. n89 The United States must then publish the notice of the action and arrest in a newspaper of general circulation within the district. The notice must specify the time within which the party filing the claim must file an answer. n90 A claimant must file an answer within twenty days after filing the claim, n91 and that claim must be verified on oath or solemn affirmation. n92 A second method is for the government to

"commence a criminal forfeiture proceeding ... in the same manner as provided for a search warrant under the Federal Rules of Criminal Procedure." n93

The third method arises when the Attorney General is authorized to seize property under applicable law, as provided by §§881(b) and (d). n94 Numerous regulations govern this type of proceeding. n95 Under §§881(b) and (d), all special agents of the DEA and FBI are authorized to seize property. n96 Upon seizure, there are specific rules concerning impoundment, custody and disposal. n97 A duty to appraise the property exists. The appraisal occurs "at the time and place of seizure." n98 When the appraised value is under $500,000, n99 the seized merchandise must be described. n100 Notice of the seizure and the government's intention to forfeit, sell or otherwise dispose of the property should be published for three successive weeks in the judicial district in which the processing for forfeiture is brought. n101

When a claim is made concerning the seized property and a satisfactory bond with sureties is posted, n102 the administrative forfeiture proceedings are stopped. n103 Assuming no claim or bond is filed, the property is declared forfeit. n104 The forfeited property is retained, delivered, or disposed of in accordance with official instructions of DEA Asset Forfeiture Section n105 or the official instructions of the FBI Property Management Officer. n106 There is a procedure for "petition for remission or mitigation of forfeiture," n107 and a petition for "restoration of proceeds of sale." n108 Time requirements exist for both types of petitions. n109 This type of procedure is sometimes referred to as "summary forfeiture" because it is essentially an administrative procedure brought pursuant to customs laws found at *19 U.S.C. §1607*. In addition to the regulations discussed above, the agency in charge of the seizure must also send written notice to parties the agency is aware of and who appear to have an interest in seized property. n110

For claimants, these procedures can cause confusion. In *United States v. $80,760.00 in U.S. Currency*, n111 the court discussed the procedure claimants must ordinarily follow to reclaim seized property and then addressed the consequences of a failure to follow the appropriate procedure. In that case, the claimant had properly filed a claim and bond to perfect on administrative claim n112 but failed to file an additional claim in the judicial forfeiture itself as mandated by Supplementary Rule C(6). Because such an additional filing was necessary, the government moved to dismiss. The court refused to grant the motion, holding that pleadings and procedural practices under the Supplemental Rules should be liberally interpreted and that when defects in following the law are the result of confusion rather than bad faith, it is the better practice to reach the merits of the claim. n113 Some, but certainly not all, courts agree. n114 One recent case has openly called for reform. The Court in *United States v. 8771 Lake Rd.*, n115 noted that "I am disturbed by the high number of default judgments ... entered in §881 forfeiture cases." n116 The Court suggested that notice to claimants should "demystify the legal process" n117 and that such notice should advise claimants of available defenses, clearly explain what must be filed, when such a filing is required, and the consequences of failure to file. n118 The Court added:

> Finally, it might be helpful to enclose copies of the pertinent statutes, rather than simply referring the recipient to the Supplemental Rules for Certain Admiralty and Maritime Claims. What lawyer or judge, not to mention a person unskilled in the law, would ever imagine that Admiralty and Maritime "law" governs the forfeiture of land allegedly used for drug transactions? Dickens' comment comparing the law to an ass seems particularly appropriate. n119

LEXIS: civil or judicial w/5 forfeiture! criminal w/5 forfeiture! attorney general w/30 seiz! w/5 property

§ 77.03(c) *In Rem* Jurisdiction.

Historically, a forfeiture was an "*in rem*" proceeding. One important consequence of an *in rem* proceeding is that it is immaterial whether the persons whose misconduct gave rise to the forfeiture are indicted, charged, convicted, or even acquitted. n120 It is property and not the person that is the subject matter of the civil action. A second important

consequence is that the *in rem* nature of civil forfeitures means that a court's power to exercise jurisdiction is derived from control over the property itself. n121 Accordingly, a valid initial seizure of the *res* was long held necessary to commence an *in rem* forfeiture. n122

Until recently, however, the lower courts disagreed on whether *in rem* forfeiture proceedings required continuing control of the *res* throughout the litigation process. Some courts concluded that jurisdiction might be lost should the res be removed from the territorial jurisdiction of the court. Other courts disagreed. n123

The Supreme Court resolved the question in *Republic Nat'l Bank of Miami v. United States*. n124 There the government commenced a forfeiture action against a single-family residence, claiming that the property had been acquired with proceeds from drug trafficking and thus was subject to forfeiture under the Comprehensive Drug Abuse Prevention and Control Act of 1970. n125 In turn, the bank argued that it was an innocent lienholder and that its mortgage interest in the property should not be subject to forfeiture. Awaiting the court's decision on this question, the bank and the government agreed that the residence should be sold. A sale ensued, and the proceeds were retained by the United States Marshal. n126

Ultimately, the district court denied the Bank's claim. Although the Bank appealed, it failed to file either a supersedeas bond or a stay of execution. While the appeal was pending, the government requested that the United States Marshal transfer the proceeds of the sale to the Assets Forfeiture Fund of the United States Treasury. After this transfer, the government moved to dismiss the appeal for lack of jurisdiction, relying on cases that held that jurisdiction over *in rem* forfeitures continues only so long as the court retains control of the *res*. n127 The Supreme Court found the government's argument to be without merit, holding:

> In a civil forfeiture proceeding, where the government has the power to confiscate private property on a showing of mere probable cause, the right to appeal is a crucial safeguard against abuse. No settled rule requires continuous control of the res for appellate jurisdiction in an *in rem* forfeiture proceeding. Nor does the Appropriations Clause place the money out of reach. Accordingly, we hold that the Court of Appeals did not lose jurisdiction when the funds were transferred from the Southern District of Florida to the Assets Forfeiture Fund of the United States Treasury. n128

The *Republic Nat'l Bank* holding is in accord with a recent amendment to *28 U.S.C. §1355* which provides in pertinent part that "[i]n any case in which a final order disposing of property in a civil forfeiture action or proceeding is appealed, removal of the property by the prevailing party shall not deprive the court of jurisdiction." n129

Other amendments to *28 U.S.C. §1355* have further expanded jurisdiction and venue in civil forfeiture cases. In *United States v. One 1978 Piper Cherokee Aircraft*, n130 for example, the court noted that even though the aircraft in question may never have been brought within the geographical confines of the lower court, §1355(b)(1)(B) n131 now permitted venue in that court because that was the judicial district in which the criminal prosecution was brought. n132

LEXIS: jurisdiction or venue w/30 forfeiture!

§ 77.03(d) Probable Cause.

Many civil forfeiture statutes require that the government demonstrate "probable cause" to justify seizure and ultimate forfeiture. For example, under *21 U.S.C. §881*(a)(7), the government's burden is to demonstrate a "probable cause" belief that a connection n133 exists between the property to be seized and an illegal drug transaction. Similarly, under §881(a)(6), a showing of "probable cause" is also needed. Likewise, under *18 U.S.C. §1955*(d), the government is entitled to bring a civil forfeiture claim against property that houses an illegal gambling business upon "probable cause."

Probable cause has been defined as "reasonable ground for belief of guilt, supported by less than prima facie proof, but more than mere suspicion." n134 It has been recognized that probable cause is to be judged "not with clinical detachment, but with a commonsense view to the realities of normal life." n135

In many situations, the government can establish probable cause by relying on a prior criminal case. For example in *United States v. Three Tracts of Property*, n136 the government filed a civil complaint for forfeiture of real estate and of United States currency. In the civil forfeiture, the government offered as proof of probable cause the prior convictions of several individuals. The district court concluded that probable cause existed to believe that properties and currency were subject to forfeiture based on the criminal trial record. On appeal, the Sixth Circuit held that the use of such prior convictions was appropriate, and that the prior convictions along with the doctrine of collateral estoppel n137 fully supported the probable cause finding. The court added, however, that a prior criminal conviction does not always prove probable cause in every instance. n138

Probable cause does not, however, always demand a prior criminal conviction. As early as 1827, the United States Supreme Court n139 rejected the conclusion that a criminal conviction is always a necessary prerequisite to a forfeiture. Modern law is in accord. n140 The government need not prove an owner committed a crime, n141 and a forfeiture may be commenced where no criminal action is brought. n142 For the government to obtain a judgment of forfeiture, it need only demonstrate a probable cause nexus between the seized property and illegal activity. n143

The probable cause showing need not be linked to a particular transaction. n144 Concerning questions of proof, courts have accepted affidavits, hearsay, and circumstantial evidence in civil forfeiture proceedings. *United States v. 228 Acres* n145 is illustrative. There, the government sought forfeiture of tracts of real property, farming equipment, antiques, and other items. n146 Proof that these items were linked to proceeds traceable to an illegal situation was limited, and the trial court had as testimonial evidence only the affidavit of a single DEA agent and the claimant's own testimony to support the government's claim. Nonetheless, the Second Circuit affirmed the District Court's conclusion that there was sufficient direct and circumstantial evidence to support the inference that real and personal properties were "proceeds traceable" to monies furnished in exchange for a controlled substance under federal law, n147 and therefore could be forfeited. One factor the Second Circuit panel noted was that at the time of the civil proceeding the claimant was in prison based on a guilty plea relating to an illegal drug transaction. Although that conviction, by itself, might have been insufficient to establish probable cause, because much of the property sought to be forfeited had been purchased before the crime, the Second Circuit noted that illegal transaction resulted in the seizure of heroin that was "unusually pure." n148 From this fact, the court concluded that it could be inferred that the defendant was in a fairly high position in an illegal drug distribution chain. Other matters in the record also suggested involvement in illegal narcotics activities for a substantial period of time. n149

The court also found significant the unusually large amounts of cash used to acquire the real estate sought to be seized. The court concluded that this behavior is characteristic of drug trafficking. n150 Moreover, reported legitimate income, necessary to finance such unusual cash purchases, was altogether lacking in the claimant's prior tax returns. The purchases of real property for just one year, 1985, actually exceeded the supposed after-tax monies for an entire eight-year period.

Concluding there was ample evidence of probable cause, the court summed up the activities that supported such finding:

> In sum, [the defendant's] attempts to conceal his income and assets, his drug arrest in possession of a kilogram of high-purity heroin followed by his guilty plea of conspiracy to distribute heroin, his unexplained accumulation of the substantial cash used to acquire the forfeited parcels, and his demonstrably false claim that he had paid for these parcels with income from businesses on which the "income taxes were paid," together provided the district court with probable cause to believe that the forfeited properties were ... forfeitable under §881(a)(6). n151

The probable cause standard has been criticized. As Judge George Pratt and his law clerk, William Petersen, in their excellent article, *Civil Forfeiture In The Second Circuit*, n152 have noted the "link" between seizure and the question of illegal activity can be very slight. Indeed, as they so vividly point out in *United States v. One Mercedes-Benz*, n153 the Second Circuit affirmed the forfeiture of the car in that case on evidence of marijuana so small in amount as not to be a crime where the discovery took place. n154

COMPUTER-ASSISTED RESEARCH

LEXIS: forfeiture! w/30 probable cause

§ 77.03(e) Burdens of Proof.

In a civil forfeiture action, the government has the initial burden of showing probable cause to institute the forfeiture action. n155 If the government meets its initial burden, a majority of courts n156 have concluded that the burden then shifts to the claimant to show by a preponderance of the evidence that the property was not subject to forfeiture, or that an innocent owner defense can be established. In fact, under *19 U.S.C. §1615* (in certain forfeitures), the burden shifts to claimant by express statutory language. n157

Thus, the government is entitled to a judgment of forfeiture upon an unrebutted showing of probable cause. n158 The requirement that government need only make "a showing of probable cause" to prevail makes forfeitures unlike most civil cases, where the plaintiff's burden is proof by a preponderance of evidence. Rejecting this standard explicitly in *United States v. One 56-Foot Motor Yacht*, n159 the court noted "that the various levels of burden of proof have no application to the question of probable cause... Perhaps it is for this reason that courts and legislatures have almost universally spoken in terms of a 'showing' of probable cause." n160

Claimants have urged that shifting the burden of proof to the claimant violates due process. As the court in *United States v. 686.64 Acres of Property*, n161 observed, however, the First, Second, Fourth, Ninth and Tenth Circuits have all rejected any argument that shifting the burden of proof violates due process. n162

§ 77.03(f) Civil and Criminal Distinctions.

When Congress enacts a civil forfeiture in one situation and a criminal forfeiture in another situation, it is reasonable to presume that each statute was intended to reach a different end and was enacted for a distinct purpose. Certainly a strong argument exists that at least historically criminal sanctions and civil remedies are fundamentally distinct.

However, civil forfeitures seem to fall in both areas. In an insightful article, n163 Professor Kenneth Mann notes that one basic legal assumption in our society is that distinct responses normally ensue when a crime, as compared to a mere legal wrong, is committed.

If a crime is committed, a proceeding is filed for the purpose of punishment. n164 But if only a legal wrong has occurred, a civil proceeding is filed for the purpose of compensation. n165 Professor Mann notes that these two proceedings typically proceed forward in different courts, with different rules of procedure, under distinct substantive rules, and separate burdens of proof. n166 As Professor Mann persuasively argues, however, the "bifurcation of legal sanctions into [these] two categories is [sometimes] misleading." n167

In discussing a "middle ground," where proceedings are typically a hybrid of a criminal wrong and a civil remedy, many of Professor Mann's examples are drawn from forfeiture cases. n168 His conclusion is that in a growing number of areas of the law civil cases are filed for purposes of punishment and not just compensation. This conclusion seems to accurately describe any number of civil forfeiture cases, and raises the fundamental question whether the historical

distinctions between criminal law and civil actions truly apply to forfeiture proceedings. At one time, most commentators and courts would agree that distinctions between civil and criminal forfeitures existed. For example, the Ninth Circuit has held one basic distinction between civil and criminal forfeitures is whether a penalty was assessed against the person or against an inanimate object. n169 According to *United States v. Seifuddin*, criminal forfeitures are filed against the person. Such actions operate *in personam*, require a conviction before property is seized, and are filed to punish. n170 Civil forfeitures, by contrast, are filed against objects of property. n171 The forfeiture is grounded upon the unlawful use of the *res*. The owner's culpability is irrelevant and the purpose of the action is remedial. n172

However, notwithstanding the distinctions between civil and criminal forfeitures often discussed in some cases, n173 the reality appears to be that the line between civil and criminal forfeitures has been substantially blurred. In *United States v. Elgersma*, n174 for example, an *en banc* court upheld a criminal forfeiture based only upon a preponderance of the evidence. Rejecting the traditional criminal standard of proof beyond a reasonable doubt, the court justified its decision by finding that criminal forfeiture is only part of the sentencing process, and not a substantive offense. Accordingly, the court concluded that "due process does not require the beyond a reasonable doubt standard to apply to the sentencing process, [and] Congress has the authority to apply a less strenuous standard of proof than the beyond a reasonable double standard to criminal forfeiture." n175

Indeed, the Supreme Court has categorically accepted the fact that some former distinctions between civil and criminal forfeitures no longer apply. *Austin v. United States* n176 is illustrative. In this case, the owner of a auto body shop and mobile home appealed a judgment for the government in a action brought against these properties under *21 U.S.C. §§881*(a)(4) and (a)(7). He had previously pled guilty under state law to one count of possession of cocaine with intent to distribute, but argued that the subsequent federal forfeiture violated the Excessive Fines Clause of the Eighth Amendment. In response, the government contended that the Eighth Amendment could not apply because the forfeiture was only civil. n177

The Supreme Court disagreed. Ignoring the "civil" label, the Supreme Court held that all forfeitures, civil or criminal, existed in part as punishments which were subject to Eighth Amendment limitations. Reaffirming its prior holding in *United States v. Halper*, where the court began the process of disengaging former civil and criminal distinctions, the court stated, "[i]t is commonly understood that civil proceedings may advance both punitive and remedial goals, and, conversely, that both punitive and remedial goals may be served by criminal penalties." n178 The Austin Court also noted that in *Calero-Toledo* it had previously held that forfeiture serves both "punitive and deterrent purposes." n179 The court concluded by holding that statutory *in rem* forfeitures under *21 U.S.C. §§881*(a)(4) and (a)(7) are considered punishment today, and that any forfeiture, whatever its label, may be punishment enough to warrant Eighth Amendment review. n180

§ 77.03(g) Criticism of Forfeitures.

Criticism of forfeiture statutes abounds. n181 Calls for reform legislation have been made. n182 The press has written a number of stories, including reporters Andrew Schneider's and Mary Pat Flaherty's series in Pittsburgh with headlines such as "Government Seizures Victimize Innocent," n183 and "Police Profit By Seizing Homes of Innocent." n184 A recent New York Times Magazine article n185 suggests abuses continue. Not all persons, of course, agree. Whether or not the forfeitures laws will be modified is a question for the future.

(n58)Footnote 109. *Id.*

(n59)Footnote 110. Failure to send proper notice at the known location to an obviously interest party can vacate the forfeiture. *See Aero-Medical, Inc. v. United States, 23 F.2d 328, 331 (1994)* (concluding it was unacceptable for DEA to send notice to address known not to be current address of plaintiff); *Gutt v. United States, 641 F. Supp. 603, 606 (W.D. Va. 1986)* (holding that notice sent to claimant at a known invalid address was insufficient when government knew the claimant was represented by counsel).

(n60)Footnote 111. *781 F. Supp. 462, 465-70 (N.D. Tex. 1991).*

(n61)Footnote 112. *Id. at 468.*

(n62)Footnote 113. *Id. at 469-70.* The Court set out a six-factor test that could excuse or extend the time for filing a claim.

(1) The claimant, in good faith, attempted to file a claim on time or inform the government of his interest;

(2) The claimant relied to his detriment on misinformation from a government source;

(3) The claimant actively pursued his interest in the seized property and expended considerable resources preparing the case for trial;

(4) The claimant was acting pro se;

(5) The government itself failed to follow the proper procedures;

(6) The excuse or extension would not prejudice the government.

Id. at 469.

(n63)Footnote 114. *See, e.g., United States v. One Urban Lot, 885 F.2d 994, 999-1000 (1st Cir. 1989)* (court may excuse absence of timely claim under circumstances where a verified answer, containing all the information required in a claim, is timely filed); *United States v. One Parcel of Real Property, 942 F.2d 74, 77 (1st Cir. 1991)* (district courts permitted to exercise discretion), *but see United States v. Beechcraft Queen Airplane, 789 F.2d 627, 630 (8th Cir. 1986)* (filing a timely claim necessary to contest the forfeiture); *United States v. United States Currency in the Amount of $2,875.00, 754 F.2d 208 (7th Cir. 1985)* (favoring strict compliance).

(n98)Footnote 149. *Id.*

(n99)Footnote 150. A number of courts fully agree, and have repeatedly held that when large amounts of cash are used in purchase of property, or found on a person, that this may be considered a factor in establishing probable cause that money represents the proceeds of drug transactions. *See, e.g.*, United States v. 785 St. Nicholas Ave., 983 F.2d 396, 403 (2d Cir. 1993) collecting authorities on the point; *see also United States v. $364,960.00 in United States Currency, 661 F.2d 319 (5th Cir. 1981)* (Two illegal aliens ... were apprehended in an apartment ... with narcotics, guns, and $364,906.00. From the sheer quantity of currency seized under these circumstances, the court concluded that it could permissibly infer a connection with illegal narcotics trafficking).

United States v. $506,231 in United States Currency, 125 F.3d 442, 453 (7th Cir. 1997) ("the government may not seize money... based on the bare assumption that most people do not have huge sums of money lying about").

AUTHOR: Professor Stephen A. Spitz The author would like to acknowledge the invaluable assistance of a number of U.S.C. Law School law students, including Thomas Shelley, III, Bruce Haynes, Henry Cabaniss, Constance Boken, Lauren Ferrari and Mark Fava and would also like to thank Celeste Jones, Esquire of McNair and Sanford, P. A. All these individuals were extraordinarily helpful, and the least that can be done is a public note of appreciation. University of South Carolina Law School

§ 77.04 Defenses to the Seizure.

[Go To Supp]

§ 77.04(a) Standing.

A claimant must have "standing" to contest a forfeiture and assert a personal claim. The question of standing can arise in a number of settings. In *United States v. Approximately Two Thousand, Five Hundred Thirty-Five Point Eighty-Nine Shares of Stock*, n186 for example, the government filed an in rem proceeding pursuant to *21 U.S.C. §881* (a)(6) and *18 U.S.C. §981*. n187 The court noted that these statutes call for the seizure of property pursuant to Supplemental Rules for Admiralty and Maritime Claims. n188 The court further noted that under this procedure, "before a claimant in a forfeiture case can file an answer and defend on the merits, the claimant must file a proper claim" n189 and "if no claim is properly filed, a putative claimant lacks standing to contest forfeiture of the property." n190 Thus, a question of standing may turn merely on the timely filing of a specific claim under a particular statute.

Questions of standing, however, may also be raised in other contexts. The area is unsettled with some courts requiring a claimant demonstrate a "legitimate" property interest in the seized property. n191 On the other hand, some courts have held that bare legal title, by itself, does not confer standing. n192 A classic example of nominal ownership can be found in the case of *United States v. One 1990 Chevrolet Corvette*. n193 The car, which sold for almost $42,000, was registered to an elderly cleaning woman who only earned between six and ten thousand dollars a year. n194 Although title was registered in her name, she demonstrated at trial "a complete lack of familiarity with the car and its features and controls." n195 Nor did she demonstrate the ability to buy a $42,000 car. Under these circumstances, the court concluded that no reasonable finder of fact could conclude that the registered owner was anything other than a nominal owner. Because she lacked standing to challenge the forfeiture, the court held it need not consider the merits of her claim that the government failed to show probable cause for the seizure. n196

Standing can also be lacking because the ownership claim is only based on possibility of future ownership. For example, a child's future expectation of ownership of a home was held to be insufficient to confer standing to contest

the forfeiture, n197 and in *United States v. Four Million Two Hundred Fifty-Five Thousand Dollars in United States Currency*, n198 the court concluded that claimants holding checks written on a forfeited bank account lacked the right to contest the seizure because under Florida law an uncashed check is not an assignment of the funds on deposit. Thus, no ownership or possessory interest in the fund had been proved. n199 Along the same lines, the court in *United States v. $20,193.39 in U.S. Currency* held that an unsecured creditor lacked standing to challenge a civil forfeiture. n200 Other courts are in agreement. n201

Some courts have adopted a broad definition of standing. In *United States v. Forfeiture, Stop Six Ctr.*, n202 the court found that standing to contest a forfeiture was met by a "facially colorable interest in the proceeding sufficient to satisfy the case-or-controversy requirement and prudential considerations defining and limiting the role of the court." n203 Applying this test, the court concluded that the claimant had standing based on her legal title and allegations of a financial stake in the outcome of the forfeiture, even after having delegated management of the property to her brother. n204 Other courts have held that standing can be based upon a possessory interest n205 or a claim of constructive trust. n206

A recent United States Supreme Court decision, *United States v. 92 Buena Vista Ave.*, has settled the question of whether a donee of a gift of real property had standing to challenge a forfeiture, by holding that standing is not limited to merely persons who are purchasers but can include any owner, including a donee. n207 In turn, however, this decision has generated its own uncertainty. In *United States v. 2350 N.W. 187 St.*, n208 for example, the Eleventh Circuit considered whether an unpaid county ad valorem property tax granted the county tax collector standing to qualify as an innocent owner to challenge a civil forfeiture. Vacating two district judgments that held standing did not exist, the court remanded for reconsideration in light of *92 Buena Vista Ave.* n209

LEXIS: forfeiture! w/30 contest! or defen! w/30 standing

§ 77.04(b) Innocent Owner.

The Supreme Court has had difficulty with the question of innocent owners and civil forfeitures. On the one hand, in *Austin v. United States*, the court reaffirmed that innocence as a defense to a civil forfeiture has "uniformly been rejected." n210 Indeed, in the 1974 case of *Calero-Toledo*, the court even hinted that seizure of property from innocent parties may not be altogether undesirable because "[t]o the extent that such forfeiture provisions are applied to lessors, bailors, or secured creditors who are innocent of any wrongdoing, confiscation may have the desirable effect of inducing them to exercise greater care in transferring possession of their property." n211

On the other hand, the Supreme Court, in dicta on more than one occasion, has expressed concern that innocence should be a defense in some situations. Even in *Calero-Toledo*, the court noted in dictum that "it would be difficult to reject the constitutional claim of an owner whose property subjected to forfeiture has been taken from him without his privity or consent." n212 And in further dictum in that case, the court suggested that an innocent owner defense may exist when an owner proved "not only that he was uninvolved in and unaware of the wrongful activity, but also that he had done all that reasonably could be expected to prevent the proscribed use of the property." n213 Under such circumstances, the Supreme Court has asserted that it "would be difficult to conclude that forfeiture served legitimate purposes and was not unduly oppressive." n214 In fact, the court reemphasized the unsettled nature of this question in a footnote in *Austin*, when it suggested that "[b]ecause the forfeiture provisions at issue here exempt innocent owners, we again have no occasion to decide in this case whether it would comport with due process to forfeit the property of a truly innocent owner." n215

Whether or not the Due Process Clause protects at least some innocent owners, and if it does what the scope of that protection might be, Congress has elected to include such a defense in a number of forfeiture statutes. The statutory

definition of an innocent owner in §881(a)(7) provides that "... no property shall be forfeited under this paragraph, to the extent of an interest of an owner, by reason of any act or omission established by that owner to have been committed or omitted without the knowledge or consent of that owner." n216

The innocent owner defense has, however, been difficult for the courts to consistently apply. An extensive Annotation, *Who Is Exempt From Forfeiture of Real Property Under "Innocent Owner" Provision of 21 U.S.C.S. §881(a)(7)?* n217 highlights the problems in this area of forfeiture law. One question that has arisen with some frequency is whether the "innocent owner" exception contemplates an actual knowledge inquiry, rather than an objective knowledge test. n218 A second question of critical importance is the necessary elements of the innocent owner defense. Some courts have held that to prevail as an innocent owner, claimants must establish: (1) they were not involved in the wrongful activity and (2) they were unaware of the wrongful activity. n219 Other courts, however, have required that claimants also prove that they did all that reasonably could be expected to prevent the illegal use of property. n220 This third requirement, that an "innocent owner" must affirmatively take steps to prevent illicit use of premises has been defended by some and criticized by others.

Some courts have argued that requiring an innocent owner to undertake affirmative steps to rid the property of illegal activity comes from dictum in *Calero-Toledo*, n221 where the court suggested that forfeiture of an innocent owner's property might be unconstitutional if the owner "had done all that reasonably could be expected to prevent the proscribed use of the property." n222

The courts that have read this requirement into the innocent owner of §881 have concluded that "[t]he illicit sale and use of drugs is taking an ever-increasing toll on our nation ... [and] [g]iven the present circumstances, defining consent in §881(a)(7) as the failure to take all reasonable steps to prevent illicit use of premises once one acquires knowledge of that use is entirely appro-priate." n223 Others strongly disagree. n224 The lower courts are split on the question. n225

Just as "innocence" has been difficult to define, so has the word "owner." Questions have arisen whether "owner" refers to the person who owns the property at the time it was illegally used or the person who owns the property at the time of the forfeiture proceeding. n226

However, at least one aspect of "ownership," long in dispute, was settled in *92 Buena Vista Ave.* n227 There, the government filed an in rem action against a $240,000 personal residence, asserting the property had been acquired with proceeds traceable to an unlawful drug exchange. The owner of record acquired the residence by gift. She admitted that she was not a bona fide purchaser but argued that as a donee, without knowledge of the alleged unlawful origin of the $240,000 gift, she qualified under the statute as an "innocent owner." n228 The court agreed and held that a donee could be an innocent owner, noting that the text of the statute required only the status of "owner," not "purchaser."

The government argued, however, that in this case the donee was not an "owner" at all. The government relied on the "relation-back" rule that forfeiture of the property relates back in time to the illegal activity itself. Under this theory at that very instance the property is subject to forfeiture and lost to all current and future owners. n229 A plurality disagreed. Reaching back into the court's earliest history, the plurality relied upon an 1806 case decided by Chief Justice Marshall n230 for the rule that forfeiture does not automatically vest title to property in the government, and that the "relation-back" fiction was never intended to defeat a true innocent owner. n231 The court remanded the case for the donee to prove her lack of knowledge. n232

In many situations, proof of innocent ownership is a difficult undertaking. As discussed in a previous section, once the government has established probable cause, the burden is squarely on the claimant to establish an innocent owner defense. n233 And, in at least some circuits, the defense requires proof of both lack of knowledge and lack of consent. n234 Other issues about the defense are also unsettled. In *92 Buena Vista Ave.*, for example, the government argued that the innocent owner defense requires on-going innocence and that a claimant may lose innocent owner status by after-the-fact knowledge. n235 The Supreme Court in *92 Buena Vista Ave.* left this question unresolved.

The question of on-going innocence has been especially troublesome in the co-owner situation. *United States v. 15603 85th Ave. N.* n236 illustrates the difficulties of proving the innocent ownership defense in this situation. In that case, two brothers jointly purchased and improved real property in Palm Beach, Florida. The district court found that one brother contributed legitimate funds towards the purchase and improvement of the real property while the funds from the other brother were proceeds traceable to illegal activities. The Eleventh Circuit held that mere purchase of an interest in real estate with legitimate funds did not establish an innocent owner defense. When a claimant "has actual know-ledge at any time prior to the initiation of the forfeiture proceeding, that claimant's legitimate funds are commingled with drug proceeds and traceable in accord with the forfeiture statute, the legitimate funds are subject to forfei-ture." n237 Thus, "legitimate funds are forfeitable when knowingly commingled with forfeitable funds." n238

The co-owner problem can also arise in the difficult situation of a husband and wife who hold property as tenants by the entirety. If one spouse is innocent, and the other is not, the possibilities include immediate forfeiture, delayed forfeiture, partial forfeiture, or no forfeiture at all. The lower courts are divided on the appropriate response. n239 As to lienholders, the Eleventh Circuit in *United States v. 6960 Miraflores Ave.* n240 has rejected a requirement that a lender can be denied "innocent owner" status on what the lender "should have known," and has similarly rejected an argument based upon after-the-fact knowledge in holding that an innocent investor who "learns too late" is still entitled to protection. n241 Section *18 U.S.C. 981*(a)(2), protecting innocent lienholders, has been held to include recovery of lienholder's principal sum, costs, fees, and interests, if applicable state law would provide for such recovery. n242

§ 77.04(c) Excessive Fine.

The Eighth Amendment to the United States Constitution reads, "excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishment inflicted." In *Austin v. United States* n243 the Supreme Court broke new ground and held that civil forfeitures may violate the excessive fine clause of the Eighth Amendment. After reviewing the history of the Eighth Amendment, the court in *Austin* held that one of the central purposes of the Amendment was to limit "the government's power to punish," n244 and that punishment not only cuts across the division between the civil and criminal law but that "forfeiture generally and statutory *in rem* forfeiture in particular, historically have been understood ... as punishment." n245 Thus, because punish-ment is a part of statutory forfeiture, the court found the Eight Amendment Excessive Fine Clause may be a defense to a civil forfeiture proceeding. n246

Having answered this question; however, the court in *Austin* declined to establish a definitive test of "excessive," leaving that issue for the lower courts to develop. Some commentators have already written on this subject. n247 Although questions of definition are difficult, Judge Pratt, n248 in his excellent article, *Civil Forfeiture in the Second Circuit*, n249 has suggested one illustration of an excessive fine, noting that "when an expensive automobile is forfeited on the strength of less than twenty-five grams of marijuana, one must swallow hard to maintain that the punishment is proportionate to the crime." n250

Justice Scalia, in his concurrence in *Austin*, suggested that the proper inquiry to determine whether an excessive fine has been imposed is to focus on "not how much the confiscated property is worth, but whether the confiscated property has a close enough relationship to the offense." n251 Some lower courts have found this test persuasive and have adopted it. n252 Other courts have suggested that the excessive question be determined by an inquiry "into the proportionality between the value of the [property] sought to be forfeited and the amount needed to effectuate the legitimate remedial purposes of the forfeiture." n253

In *Alexander v. United States*, n254 the Supreme Court directed that the forfeiture in that case be reexamined under the

excessive fines clause and remanded the case to the Eighth Circuit for that purpose. On remand, the Eighth Circuit n255 held that defendants have the initial burden of making a *prima facie* showing of "gross disproportionality." n256 Upon such a showing, the lower courts should then consider the government's evidence of "just proportionality." n257

In considering this latter issue, the court suggested the inquiry should include the gravity of the offense, the extent of criminal activity, and the quantum of property forfeited. n258 The court also noted, however, that forfeiture of proceeds from illegal activity itself "cannot be considered punishment, and thus, subject to the excessive fines clause, as it simply parts the owner from the fruits of the criminal activity." n259 Further, the court suggested that the relationship between the forfeiture ordered and the sentences imposed be considered in any determination of whether the forfeiture has been grossly disproportionate. n260

LEXIS: forfeiture! w/30 contest! or defen! w/30 excess! w/5 fine!

§ 77.04(d) Double Jeopardy.

The Double Jeopardy Clause of the United States Constitution provides that "nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb." n261 The Double Jeopardy Clause embodies three protections. It protects against a second prosecution for the same offense after acquittal. It protects against a second prosecution for the same offense after conviction. And it protects against multiple punishments for the same offense. n262 Until recently, double jeopardy was not accepted as a defense in a civil forfeiture proceeding. n263 This conclusion was reached by various courts on four separate grounds.

First, a number of courts concluded that the Double Jeopardy Clause protects only a "person" subject to the same offense, whereas civil forfeiture is an *in rem* proceeding directed solely against property. This distinction led some courts to conclude that double jeopardy simply did not, by its terms, apply to property forfeitures. n264

Second, other courts rejected double jeopardy challenges on the ground that civil forfeitures are not crimes. Thus, double jeopardy did not attach and civil proceedings were simply beyond Double Jeopardy Clause protections and concerns. n265

Third, the court in *United States v. 38 Whalers Cove Drive*, n266 noted that since claimant pled guilty under state law, and the forfeiture took place under federal law "[t]he Double Jeopardy Clause is inapplicable when separate governments prosecute the same defendant, for the defendant has offended both sovereigns." n267

Finally, still other courts relied upon cases that insist that a criminal and civil sanction for the same wrongful act is fully constitutional and concluded that double jeopardy did not apply in such a situation. n268 In *United States v. Dixon*, n269 for example, the court held without hesitation that "[c]learly Congress may impose both a criminal and a civil sanction in respect to the same act; this is neither unusual nor constitutionally objectionable." n270

Similarly, almost 40 years ago, in *Kingsley Books, Inc. v. Brown*, n271 the Supreme Court held constitutional a New York law that not only criminally punished ownership of "obscene literature" but also authorized the civil seizure and destruction of the literature itself. The Supreme Court noted that the seizure and destruction was a legal remedy sanctioned by the "long history of Anglo-American law" and "[i]f New York chooses to subject persons who disseminate obscene literature to criminal prosecution and also to deal with such books as deodand of old, or both, with due regard, of course to appropriate opportunities for the trial of the underlying issue, it is not for us to gainsay its selection of remedies." n272

Notwithstanding these cases, the Double Jeopardy Clause may now clearly be a valid defense in civil forfeiture

proceedings. In *United States v. Halper*, n273 the United States Supreme Court held that a criminal conviction followed by a huge civil penalty violated the Double Jeopardy Clause. In *Halper*, the defendant was convicted of submitting false claims to an agency of the federal government in the total sum of $585. Subsequently, the government sought a civil penalty of over $130,000 against Halper under the False Claims Act. n274 The Supreme Court denied the government's right to this huge penalty under the Double Jeopardy Clause, holding this case was one of those rare cases "where a fixed penalty provision subjects a prolific but small-gauge offender to a sanction overwhelmingly disappropriate to the damages he has caused." n275

The full scope of the *Halper* opinion is unclear. In *United States v. McCaslin*, n276 the court noted that the Halper rule should be limited, stating:

> *Halper* has no application to the very ancient practice by which instrumentalities of a crime may be declared forfeit to the government. The forfeiture of such instrumentalities is "independent of, and wholly unaffected by any criminal proceedings *in personam*."

The Second Circuit has continued to rely on *McCaslin*, and only recently rejected a double jeopardy argument made in *United States v. $145,139.00 in U.S. Currency*. n277

The Ninth Circuit, however, has had second thoughts about the continued validity of *McCaslin*, noting in a 1994 case that:

> *Halper* involved a civil action brought under the False Claims Act. In *United States v. McCaslin, 959 F.2d 786* (9th Cir.), [*cert. denied, 506 U.S. 942, 113 S.Ct. 382, 121 L.Ed.2d 292 (1992)],* we underestimated its force and refused to apply its rationale in a civil forfeiture action brought under *21 U.S.C. §881*(a)(7). We held that "*Halper* has no application to the very ancient practice by which instrumentalities of a crime may be declared forfeit to the government." *McCaslin, 959 F.2d at 788.* However, in its subsequent decision in Austin, the supreme court said that we were wrong and directly rejected our *McCaslin* analysis. In Austin, the court specifically applied the *Halper* test to determine whether a civil forfeiture under *21 U.S.C. §§ 881*(a)(4) & (a)(7) constituted "punishment," and it concluded that those provisions did in fact misuse punishment under that test. n278

Disagreement about *Halper* also extends to the question whether a Halper defense might apply in a situation where a civil action precedes instead of follows a criminal prosecution. At this time, there is no certain answer to this question as well. n279

Finally, the scope of *Halper* was discussed again in *Department of Revenue of Montana v. Kurth Ranch*, n280 where a divided Supreme Court further struggled with the question when the Double Jeopardy Clause should apply outside criminal proceedings. The issue in *Kurth Ranch* was whether a substantial state tax imposed on the possession and storage of dangerous drugs, but only after the State had already imposed a criminal penalty for the same conduct, violated double jeopardy. The Montana Dangerous Drug Tax Act expressly provided that the tax was to be collected only after all state and federal fines and forfeitures had been satisfied. n281 The Kurth family filed bankruptcy, claiming the Montana tax was unconstitutional as successive "punishment" for their prior drug convictions. Relying primarily on *United States v. Halper*, the Bankruptcy Court concluded that the tax was a form of double jeopardy. The District Court and the Court of Appeals both affirmed; the Court of Appeals basing its conclusion largely on the State's refusal to offer evidence justifying the tax. n282

The majority in *Kurth Ranch* noted that "criminal fines, civil penalties, civil forfeitures and taxes all share certain features" n283 because they each generate government revenue, impose fiscal burdens on individuals, and deter certain behavior. At the same time, the court noted that taxes are typically different than fines, penalties and forfeitures, n284 because taxes are usually motivated by revenue-raising rather than punitive purposes. n285 Nonetheless, the court

con-cluded "at some point, an exaction labeled as a tax approaches punishment, and our task is to determine whether Montana's drug tax crosses that line." n286 In that regard, the court found the Montana tax was assessed at eight times the market value of dangerous drugs and was, therefore, "a remarkably high tax." n287 Equally unusual was that the "so-called tax was conditioned on the commission of a crime." n288 Finally, because this tax was only exacted after the taxpayers had been arrested for the precise conduct that gives rise to the tax obligation in the first place, the court determined that the drug tax was not the kind of remedial sanction that may follow the first punishment of a criminal offense; but, instead it was a second punishment within the contemplation of a constitutional protection that has "deep roots in our history and jurisprudence," n289 and therefore must be imposed during the first prosecution or not at all.

In separate opinions, Chief Justice Rehnquist, Justice O'Connor, and Justice Scalia dissented. Justice Thomas joined Justice Scalia's dissenting opinion. Chief Justice Rehnquist argued that the court's conclusion that the tax was a punishment was "very much at odds with the purpose and effect of the Montana Statute." n290 Justice O'Connor argued that the court had greatly expanded double jeopardy jurisprudence unnecessarily, and suggested that the appropriate analysis was to remand the case for further proceedings under *Halper*. n291 Justices Scalia and Thomas went further, holding that *Halper* itself was in error. According to Justice Scalia's viewpoint:

> It is time to put the *Halper* genie back in the bottle and to acknowledge what the text of the Constitution makes perfectly clear: The Double Jeopardy Clause prohibits successive prosecution, not successive punishment. Multiple punishment is, of course, restricted by the Cruel and Unusual Punishments Clause insofar as its nature is concerned, and by the Excessive Fines Clause insofar as its cumulative extent is concerned. n292

Although it is safe to conclude that forfeitures, fines, and even taxes may now be subject to double jeopardy limitations and concerns, it is also fair to note that much of the law in this area, at least at the present time, is unsettled. n293 In June, 1996, the United States Supreme Court more or less swept the field clear of these conflicts by holding that in rem civil forfeitures are neither "punishment" nor criminal for purposes of the Double Jeopardy Clause. n294

LEXIS: forfeiture! w/30 contest! or defen! w/30 double jeopardy

§ 77.04(e) Undue Delay.

A substantial government delay between the seizure of property and the initiation of forfeiture proceedings may bar a civil forfeiture. n295 In a 1983 decision, *United States v. Eight Thousand Eight Hundred & Fifty Dollars*, n296 that the United States Supreme Court held that whether a delay in commencing a civil forfeiture might be so unreasonable as to violate due process turned on balancing four factors: (1) length of delay, (2) reason for delay, (3) timing of claimant's assertion of the claimant's own rights, (4) prejudice to claimant. In weighing these factors, the court stated in *Eight Thousand Eight Hundred & Fifty Dollars* that the "overreaching factor is the length of the delay." n297 But, closely related to this factor, the court noted was "the reason the Government assigns to justify the delay." n298 The court suggested several matters that would be "weighty factors" in finding a delay justified, particularly a pending criminal proceedings that may well justify delay in commencing a civil forfeiture, n299 and awaiting the results of any petition for remission or mitigation. n300

The court also noted that the government must be allowed some time to decide whether to institute forfeiture proceedings. n301 At the same time, the court stated that "this reason alone could only rarely justify a lengthy delay." n302 In *$8,850 in U.S. Currency*, the government offered as justification both a pending petition for mitigation or remission and a pending criminal proceeding. n303 The court found of significance that the record contained no evidence that the government was responsible for the slow pace of either of these proceedings, nor was there any indication these matters were not pursued with diligence. n304

The final balancing factor is the question of prejudice. The court noted "[t]he primary inquiry here is whether the delay has hampered the claimant in presenting a defense on the merits, through, for example, the loss of witnesses or other important evidence." n305

Lower courts have looked at all these factors. In *United States v. $228,536.00*, n306 for example, a forfeiture action was brought almost four years after the arrest, and almost three years after a guilty plea. The government argued that, for much of this period of time, both state and federal criminal proceedings were pending against the claimant and others, and that contemporaneous civil proceedings might have forced the government to reveal "sensitive information about the criminal prosecutions." n307

The court concluded that, although the delay was lengthy, it was reasonable "because the government has offered a valid explanation for it and the delay did not prejudice [the claimant's] forfeiture defense." n308 The court also noted that claimant did not assert his own rights in an expedited manner. n309 As one might expect, there are numerous lower cases on the question of delay and the issue is fact-sensitive in the final analysis. n310

§ 77.04(f) Statutes of Limitations.

As discussed, the government's undue delay in commencing a civil forfeiture may provide a due process defense in appropriate situations. So, too, may *19 U.S.C. §1621*, which is the statute of limitations for custom seizures. When the laws of customs apply to a specific seizure, n311 the five-year statute of limitation of §1621 is applicable. n312 Section 1621 reads in part:

No suit or action to recover any ... pecuniary penalty or forfeiture of property accruing under the customs laws shall be instituted unless such suit or action is commenced with five years after the time when the alleged offense was discovered. ...

One question about this statute, which up to *United States v. James Daniel Good Real Property* n313 was in dispute, has now been settled. In *Good*, the Supreme Court considered whether a dismissal was proper if the case was filed within the five-year time period, but the government failed to comply with other statutory timing directives found in customs regulations and rules.

There, local authorities arrested Good in 1985 upon the discovery of 89 pounds of marijuana at his residence. n314 Under state law, Good was sentenced to one year in jail, placed on five years' probation, and required to forfeit $3,187 in cash found on the premises. n315 Four and one-half years later, the United States sought to declare Good's house and the four-acre parcel on which it was situated subject to forfeiture under *28 U.S.C. §881*(a)(7).

The government and the claimant acknowledged that under §1621, the government filed its action within the proper statutory period. However, in addition to the five-year statute, the customs laws governing forfeitures contain a number of internal requirements relating to the timing of forfeitures. The Court of Appeals held that failure to comply with these additional requirements mandated dismissal of the forfeiture. The Supreme Court disagreed. Concluding that it was up to Congress to specify consequences for noncompliance with internal timing requirements, the court held that lower courts should not dismiss a forfeiture action on this ground.

§ 77.04(g) Self-Incrimination.

The Fifth Amendment provides that "[n]o person ... shall be compelled in any criminal case to be a witness against himself." n316 As applied to civil forfeitures, the problem of self-incrimination is a perplexing one. *United States v. 566 Hendrickson Blvd.* presents a typical situation. n317 There, the government filed a complaint seeking forfeiture of certain real property. The owner of that property argued he faced a predicament. On the one hand, because there was a parallel criminal proceeding pending against him while the civil forfeiture was being litigated, he had asserted his Fifth Amendment privilege in discovery proceedings in the civil forfeiture. n318 On the other hand, by exercising his Fifth Amendment right of silence, he claimed that he was unable to defend the civil forfeiture. The court acknowledged that a dilemma might exist, if a claimant is actually required to choose between "remain[ing] silent and allow[ing] the forfeiture or testify[ing] against the forfeitability of his property and expos[ing] himself to incriminating admissions." n319 In such situations, the Fifth Amendment has proven to be a defense in some cases, but not in others. *United States v. United States Coin & Currency*, n320 illustrates one situation where the Fifth Amendment defense was successful. Donald J. Angelini was arrested for failing to register as a gambler and for failing to pay a federal gambling tax. n321 At the time of his arrest, he had in his possession $8,674 of United States currency. The government filed a civil forfeiture claiming this sum of money. He argued that he could not defend the forfeiture without further incriminating himself. The Supreme Court agreed. n322

In two prior cases, n323 the Supreme Court had concluded that gamblers had the right under the Fifth Amendment to invoke their privilege against self-incrimination as a ground for their failure to comply with federal registration and federal gambling tax. Recognizing these two precedents, the government argued that neither case applied to Angelini because the government was not seeking a criminal forfeiture. The court, however, held that:

> ... [f]rom the relevant constitutional standpoint there is no difference between a man who forfeits $8,674 because he has used the money in illegal gambling activities and a man who pays a criminal fine of $8,674 as a result of the same course of conduct ... in both instances, money liability is predicated upon a finding of the owner's wrongful conduct; in both cases, the Fifth Amendment applies with equal force. n324

Thus, it is now well-settled that the privilege against compulsory self-incrimination applies in civil forfeiture proceedings. n325 However, it has been repeatedly said that a blanket assertion of the privilege is no defense to a forfeiture proceeding, and does not provide a sufficient basis, by itself, for a district court to grant a stay of the proceedings. n326 In support of this conclusion, lower courts have pointed to a 1983 decision, where the Supreme Court held that although the privilege may preclude a claimant from answering questions, it cannot excuse a claimant's burden under Fed. R. Civ. P. 56(e) of controverting the government's proof. n327

As a result, in any number of situations, the Fifth Amendment privilege of self-incrimination has not been successful. In *United States v. Kordel* n328 for example, the government filed a civil forfeiture and at the same time put interested parties on notice that criminal proceedings were being contemplated. One party, claiming the right to avoid self-incrimination, moved to stay the civil proceeding and be relieved of duty to respond to interrogatories until the criminal proceedings. The Supreme Court rejected this approach, holding the public interest would be served if both civil and criminal investigations were promptly carried out. n329

Still, district courts have the discretion, when parallel state and federal proceedings are pending concurrently, to accommodate the constitutional privilege and the legislative intent behind the forfeiture provision. n330 Typically, relief must be requested, or it will be deemed waived. n331 A court may stay a civil forfeiture action pending the resolution of the criminal proceedings. At the same time, the district court is under no obligation to take affirmative steps to protect the claimant's privilege (i.e., grant a stay) when the claimant, by his words or actions, has chosen to waive the privilege. n332 Use of immunity for testimony in the civil forfeiture proceeding is also a possibility. n333

LEXIS: forfeiture! w/30 contest! or defen! w/30 self-incrimination or fifth amendment

§ 77.04(h) First Amendment.

The First Amendment to the United States Constitution provides, in part, that "Congress shall make no law ... abridging the freedom of speech." n334 In Alexander v. United States, n335 the Supreme Court considered whether the First Amendment provided a defense to a civil forfeiture proceedings brought under RICO. n336 A very divided Court found no First Amendment defense existed.

In a prior proceeding, Ferris Alexander had been convicted by a jury of owning a business that distributed and sold obscene magazines and videotapes, and of substantive obscenity offenses and RICO offenses which were predicated on the obscenity convictions. n337 Sentenced to six years in prison, fined $100,000, and ordered to pay the cost of prosecution and incarceration in the criminal proceeding, n338 Alexander was then made a defendant in a subsequent forfeiture brought pursuant to §1963 (a)(2). The District Court reconvened the same jury that had just convicted Alexander on criminal charges and proceeded to permit that jury to decide whether the government was entitled to the forfeiture of business, real estate, and other assets worth millions. The jury found that Alexander had an interest in ten pieces of commercial real estate and 31 current or former businesses, all of which the jury found had been used to conduct his racketeering enterprise. Sitting without the jury, the District Court then found that petitioner had acquired a variety of assets as a result of racketeering. n339

The defendant made two arguments. He asserted that the Excessive Fine Clause of the Eighth Amendment applied to civil forfeitures. As discussed earlier in this chapter, n340 the Supreme Court agreed and remanded the case for further proceedings on that issue. He also claimed the forfeiture of "expressive materials" violated the First Amendment. A bare majority of the court disagreed. The majority held that the RICO civil forfeiture statute did not violate the First Amendment because the statute "calls for the forfeiture of assets because of the financial role they play in the operation of the racketeering enterprise. The statute is oblivious to the expressive or non-expressive nature of the assets forfeited; books, sports cars, narcotics, and cash are all forfeitable alike under RICO." n341

The court distinguished its decision in *Fort Wayne Books, Inc. v. Indiana*, n342 in which the court held that the First Amendment precluded the seizure of expressive materials. Contrasting the factual setting in *Fort Wayne Books* with that in *Alexander*, the court noted that in *Fort Wayne Books* it had only discussed a pretrial seizure. In *Alexander*, the government's goal of permanent forfeiture followed a prior jury conviction for obscenity and RICO violations. n343 Thus, unlike *Fort Wayne Books* , this was not a pretrial seizure but a post-conviction proceeding. This distinction, the majority concluded, made the issue "altogether different." n344 The court found it "quite clear" that the First Amendment is not a defense to "either stringent criminal sanctions for obscenity offenses or forfeiture of expressive materials as punishment for criminal conduct." n345

The court also addressed the argument that civil forfeitures, such as Mr. Alexander's, had the clear potential for a "chilling effect" on free expression. n346 The majority found that "the threat of forfeiture has no more of a 'chilling' effect on free expression than the threat of a prison term or a large fine." n347 In dictum, the majority added that "[n]o doubt the monetarily large forfeiture in this case may induce cautious booksellers to practice self-censorship and remove marginally protected materials from their shelves out of fear that those materials could be found obscene and thus subject them to forfeitures." n348

Justice Kennedy, in a forceful dissent joined by Justices Blackmon, Stevens, and in part, by Justice Souter, rejected the majority's premises, assumptions, and conclusions. Finding the First Amendment squarely to be violated, the dissent noted, "What is happening here is simple: [b]ooks and films are condemned and destroyed not for their own content but for the content of the owner's prior speech." n349

§ 77.04(i) Other Defenses.

A number of other defenses have been attempted in civil forfeitures. For a time, the defenses of *res judicata* and collateral estoppel appeared to have some validity. n350 In *United States v. One Assortment of 89 Firearms*, n351 however, the Supreme Court held that collateral estoppel did not bar a civil forfeiture from being initiated following an acquittal on related criminal charges, and disapproved *Coffey*. Sometimes, partial defenses may exist. For example, in *United States v. Santoro*, n352 the court addressed under the amount of land that is subject to forfeiture *(18 U.S.C. §881*(a)(7)). The authority in *21 U.S.C. § 881* (a)(7) to condemn extends to "[a]ll right, title and interest (including any leasehold interest) in the whole of lot or tract of land." The court found in *Santoro* that the property, although divided by a road, was legally described as a single, undivided tract. n353 The *Santoro* Court concluded that the "whole of any lot or tract of land" must be determined from the duly recorded instruments and documents filed in the county offices where the defendant property is located. The Sixth Circuit has adopted a similar rule. n354

Using this logic, one court has denied forfeiture of a 686.64-acre farm holding that even though the claimant treated the acreage as a single farm, and even though the source of claimant's title was a single will, since the will divided the property into nine separate parcels, one or more tracts, but not the entire farm, could be forfeited. n355

(n170)Footnote 355. *United States v. 686.64 Acres of Property, 820 F. Supp. 1433, 1443 (M. D. Ga. 1993).* The Court in this case further rejected the government's argument that six of the nine tracts were used to shield two tracts found to be used to grow marijuana and, therefore, all six tracts could be forfeited on the ground that these tracts were used to "facilitate" the commission of an offense under the drug laws. The Court held that "[t]aking advantage of the natural conditions on property, which may make the tract a natural shield for a marijuana field, is not the same as doing something to the land, like planting corn, to shield a marijuana field. " *Id. at 1444.* **See also** United States v. 133 Willington Hill Rd., 855 F. Supp. 552 (D. Conn. 1994).

Law School law students, including Thomas Shelley, III, Bruce Haynes, Henry Cabaniss, Constance Boken, Lauren Ferrari and Mark Fava and would also like to thank Celeste Jones, Esquire of McNair and Sanford, P. A. All these individuals were extraordinarily helpful, and the least that can be done is a public note of appreciation. University of South Carolina Law School

§ 77.05 Rights of Successful Claimant.

[Go To Supp]

The Equal Access to Justice Act (EAJA), n356 took effect on October 1, 1981. Its purpose was to change the American Rule, which has long prevailed in this country, that each party pays its own attorney's fees except in the most unusual situations. The EAJA modifies the American Rule, but only in part. Under the statute, a party that is a prevailing party in a civil action against the United States may recover attorney's fees from the Federal Government unless the position of the United States was "substantially justified" in the litigation. n357

As one might anticipate, when a civil forfeiture does not succeed, successful claimants have sought to find rights under EAJA. In *United States v. Real Property Located at 2323 Charms Rd.* n358 for example, the United States filed a verified complaint and affidavit against a Beech Aircraft, alleging the plane had been used to supply cocaine and seeking forfeiture under *21 U.S.C. § 881*(a)(4). n359 The district court, having first concluded that the government lacked evidence the plane was linked to any illegal transaction, ordered the plane returned to its owner and granted the complainant expenses and attorney's fees under EAJA. n360 However, a divided Court of Appeals reversed. The Court of Appeals held the government was "substantially justified" even if unsuccessful. n361

Although there was a powerful dissent, n362 it appears that the mere failure of the government to achieve forfeiture raises no automatic presumption that the government's position lacked substantial justification. n363 However, when the government does not prevail, and when there is a true lack of evidence to justify the seizure, relief may well be warranted. n364

Supp. To CHAPTER 77 FORFEITURE

9-77 Thompson on Real Property, Thomas Editions Supp. to § 77.02

Supp. to § 77.02 The Modern Statutes.

[Go To Main]

§ 77.02(a) Federal Civil Statutes. [Go To Main]

Add to the text after "Civil forfeitures now exist in Titles 16 ... : ... in Titles 7, 8, ..."

7 USC § 1379(i) (forfeiture of marketing certificates by a wheat producer who violates agricultural statutes)

8 USC § 1824(b) (forfeiture of any vessels, vehicle or aircraft used in the transportation of illegal aliens)

Add:

United States v. Hooper, 229 F.3d 818 (9th Cir. 2000) (even assuming that the state would recognize a community property interest asserted by a wife, the federal criminal forfeiture statute precluded innocent owner relief); *United States v. Land, Winston County, 221 F.3d 1194 (11th Cir. 2000)* (forfeiture statute is remedial in nature and does not abate upon property owner's death).

Add:

United States v. One Single Family Residence at 2200 SW 28th Avenue, Fort Lauderdale, Florida, 204 F. Supp. 2d 1361 (S.D. Fla. 2002) (homestead property was subject to federal forfeiture).

§ 77.02(b) State Statutes [Go To Main]

Also:

Goldburg v. Kelly 397 U.S. 254 (1970) is superseded in West Virginia by statute as stated in *State ex rel. K.M. v. W.Va. Dep't of Health & Human Res., 575 S.E. 2d 393 (W. Va. 2002)* .

After second paragraph which states "Nonetheless, exceptions do exist." add new note 56.1 n56.1

Add: n*

Add

See also United States v. 1461 West 42nd Street, Hialeah, Fla., 251 F.3d 1329 (11th Cir. 2001) .

Add:

Cagle v. King County, 70 Fed. Appx. 450, 453 (9th Cir. 2003) (affirming a seizure of property without prior notice or hearing to protect the public from contaminated properties where chemical residues commonly associated with the manufacture of illegal drugs may be present).

§ 77.03(b) Methods of Forfeiture. [Go To Main]

Add

United States v. Mondragon, 313 F.3d 862, 864 (4th Cir. 2002) (requiring that a complaint against property allegedly connected to drug trafficking state the circumstances from which the complaint arises with such particularity that the defendant or claimant will be able to commence investigation of the facts and frame a responsive pleading); United States v. $ 4,096.00 in *U.S. Currency, 2005 U.S. Dist. LEXIS 40333* (M.D. Ga. May 6, 2005) (requiring the government to meet its substantive obligation to allege facts in the complaint sufficient to establish that the property has been properly forfeited).

United States v. Vasquez-Ruiz, 136 F. Supp. 2d 941 (N.D. Ill. 2001) (the bill of particulars is required to identify the property subject to forfeiture). *U.S. v. Approximately $24,260.00 in U.S. Currency, 2010 U.S. LEXIS 43949 (E.D. Cal. 2010)* (The complaint filed met the requirements of the Supplemental Rules for Admiralty or Maritime Claims and Asset Forfeiture Actions.); *U.S. v. 2007 Chevrolet Tahoe SUV, 2010 U.S. Dist. LEXIS 9959 (E.D. Cal. 2010)* .

Add

See also United States v. Loe, 248 F.3d 449 (5th Cir. 2001) (indictment sufficiently identified real property that was subject to forfeiture).

Add:

Add

Dusenbery v. United States, 534 U.S. 161 (2002) (*Mullane* test of reasonableness under the circumstances, rather than

Mathews v. Eldridge balancing test, applied in determining whether notice of forfeiture sent through certified mail to federal prison where claimant was incarcerated, residence where arrest occurred, and address in town where his mother lived, satisfied due process requirements); *State v. All Real Property, 37 P.3d 276 (Utah Ct. App. 2001)* (claimant was properly served by certified mail with notice of state forfeiture action).

Add:

United States v. Approximately $ 37,000.00 in *United States Currency, 2005 U.S. Dist. LEXIS 24009 (D. Cal. 2005)* (affirming a motion for default judgment brought by Attorney General against defendants under § 881).

See Jorge G. Aristotelidis, *Article: Trained Canines at the U.S.-- Mexico Border Region: A Review of Current Fifth Circuit Law and a Call for Change, 5 Scholar 227 (2003)* .

Add:

David W. Duke and Richard Shane Strabala, *Survey Criminal Law*, 22 U. Ark. Little Rock L. Rev. (Winter 2000); Roger M. Young, *An Overview of Real Property Tax Sales in South Carolina*, 11 S.C. Law. 25 (1999); Emily L. Dimperio, *When a State Seizes Property During a Criminal Investigation, Due Process Requires Notice that the Property Was Seized, But Does Not Require Detailed Notice of Post-Seizure Remedies:* City of West Covina v. Perkins, *45 Wayne L. Rev. 1159 (1999).*

§ 77.03(c) *In Rem* Jurisdiction. [Go To Main]

Add:

United States v. Funds from *Prudential Sec., 362 F. Supp. 2d 75, 83 (D.D.C. 2005)* (upholding a decree for forfeiture against a defendant whose activity was sufficiently suspicious but did not give rise to criminal charges). *Settle v. Com., 685 S.E.2d 182, 185 (Va. App. 2009)* (Forfeiture is a civil action against the res and remains distinct from prosecution of its owner).

Add:

P.R. Ports Auth. v. Barge KATY-B, 427 F.3d 93, 102 (1st Cir. 2005) (jurisdiction was perfected by the initial seizure of the res and was not divested by the subsequent sailing of a boat out of the court's jurisdiction); *Ventura Packers, Inc. v. F/V Jeanine Kathleen, 424 F.3d 852, 861 (9th Cir. 2005)* (upholding in rem jurisdiction after the district court ordered the return of security for the confiscated vessel).

Thomas v. Troy City Bd. of Educ., 302 F. Supp 2d. 1303 (M.D. Ala. 2004) .

Add:

See Vicki C. Jackson, *Symposium: The United States Court of Federal Claims 20th Anniversary Conference: Suing the Federal Government: Sovereignty, Immunity, and Judicial Independence, 35 Geo. Wash. Int'l L. Rev. 521 (2003).*

Add:

See generally Charmin Bortz Shiely, *Note, Unites States v. Bajakajian: Will a New Standard for Applying the Excessive Fines Clause to Criminal Forfeitures Affect Civil Forfeiture Analysis?, 77 N.C. L. Rev. 1595 (1999).*

Add:

See Linn, Courtney J. *International Asset Forfeiture and the Constitution: The Limits of Forfeiture Jurisdiction Over Foreign Assets Under 28 U.S.C. 1355(b)(2). 31 Am. J. Crim. L. 251 (Spring 2004).*

Republic Nat'l Bank is not without its critics, however. *See United States v. Thomas, 319 F.3d 640 (3d Cir. 2003)* (allowing for federal agents to convert seized monies to a cashier's check as it was not "abandonment" of the res).

§ 77.03(d) Probable Cause. [Go To Main]

Modify the second sentence of the footnote as follows:

"First, Fourth, [delete 'and'] Eighth, [add 'and'] Eleventh Circuits hold ... "; and then at end of footnote add: *United States v. Carrell, 252 F.3d 1193 (11th Cir. 2001)* (requires a "substantial connection").

Add:

U.S. v. Jones, 502 F.3d 388 (6th Cir. 2007) (the government failed to establish a nexus between the criminal activity and the property owned by the defendant); *State ex rel. Peterson v. Crawshaw, 165 P.3d 356 (Okla. App. 2007)* (state established that defendant's property was used to commit or facilitate drug trafficking).

Add:

U.S. v. $186,416.00 in U.S. Currency, 583 F.3d 1220, 1226 (9th Cir. 2009) ; *Return of Seized Property v. U.S., 625 F. Supp. 2d 949, 952-953 (C.D. Cal. 2009)* ; See also *State v. Martin, 2010 La. App. LEXIS 443 (La. App. 1 Cir. 2010)* (Police vehicle search that found $46,750 hidden in a broken VCR player and smelling of marijuana satisfied probable cause for forfeiture of the currency).

Add:

See also United States v. $ 17,771.00 in *United States Currency, 2005 U.S. Dist. LEXIS 19323 (D. Ga. 2005)* (finding probable cause that the property was used for illicit drugs).

Add:

See generally Audrey Benison, et al., *Warrantless Searches and Seizures 87 Geo. L.J. 1124 (1999);* Melissa A. Rolland, *Comment, Forfeiture Law,* The *Eighth Amendment's* Excessive Fines Clause and United States v. Bajakajian *74 Notre Dame L. Rev. 1371 (1999).*

Add:

United States v. St. George, 241 F. Supp. 2d 875 (E.D. Tenn. 2003) (government not required at subsequent hearings in a forfeiture proceeding to re-establish probable cause to believe that defendant is guilty of underlying offense); *United States v. All Funds on Deposit in Dime Sav. Bank of Willamsburg Account No. 58-400738-1 in the Name of Ishar Abdi and Barbara Abdi, 255 F. Supp. 2d 56 (E.D. N.Y. 2003)* (claimant's opposition to forfeiture proceeding was insufficient to entitle him to a probable cause hearing).

Add:

United States v. 1948 South Martin Luther King Drive, 270 F.3d 1102 (11th Cir. 2001) ; *Beaston v. Ebersole, 986 A.2d 876 (Pa. Super. 2009)* (Nexus existed between the seized computers and criminal activity); *U.S. v. $200,500.00 in U.S. Currency, 659 F. Supp. 2d 309, 310 (D. P.R. 2009)* (Sufficient nexus was created to establish probable cause against currency being used in a drug offense).

Add:

See United States v. One "Piper" Aztec "F" DeLuxe Model 250PA 23 Aircraft, 321 F.3d 355 (3d Cir. 2003) ; *In re Best Payphones, Inc., 2003 Bankr. LEXIS 180* (No. 01-15472(SMB), Bankr. S.D.N.Y., Mar. 10, 2003); United States v. $ 7,300 in *United States Currency, 2003 U.S. Dist. LEXIS 10968* (No. 02 Civ. 3633 (GEL), S.D.N.Y., June 26, 2003); *United States v. Parcel of Property, 337 F.3d 225 (2d Cir. 2003)* ; *United States v. United States Currency in the Amount of Two Hundred Forty-Eight Thousand Four Hundred Thirty Dollars, 2004 U.S. Dist. LEXIS 7072* (No. CV-01-5036 (SJF) (ASC), E.D.N.Y., Apr. 14, 2004).

§ 77.03(e) Burdens of Proof. [Go To Main]

Add:

Brewer v. Com. of Ky., 206 S.W.3d 313 (Ky. 2006) (property used for several counts of trafficking in marijuana was subject to forfeiture).

Add:

See also Commonwealth of Penn. v. 1992 Chevrolet, 844 A.2d 583 (Pa. Commw. Ct. 2004) (on the switching of the burden of proof from the government to the claimant and back again).

Add:

255 F. Supp. 2d 56 (E.D. N.Y. 2003) ; *United States v. $1,790,021 in U.S. Currency, 261 F. Supp. 2d 310 (M.D. Pa. 2003)* ; *United States v. Contents in Account No. 059-644190-69, 253 F. Supp. 2d. 789 (D. Vt. 2003)* .

Add:

United States v. Parcel of Property, 337 F.3d 225 (2d Cir. 2003) .

§ 77.03(f) Civil and Criminal Distinctions. [Go To Main]

Add:

See also *U.S. v. 867 County Road 2010 U.S. Dist. LEXIS 33466* (Burden of proof for the government is different in civil forfeiture cases than criminal ones).

correct text at the end of the 2nd paragraph:

"beyond a reasonable double" to "beyond a reasonable doubt"

Add:

For additional discussion between the distinctions between civil and criminal forfeiture proceedings, *see United States v. Vondette, 352 F.3d 772 (2d Cir. 2003)* ; United States v. One "Piper" Aztec "F" Deluxe Model 250PA 23 Aircraft,

321 F.3d 355 (3d Cir. 2003) ; *In re* One Residence at 319 E. Fairgrounds Dr., 71 P.3d 930 (Ariz. App., 2003) ; *United States v. Saccoccia, 354 F.3d 9 (1st Cir. 2003)* ; *United States v. Parcel of Property, 337 F.3d 225 (2d Cir. 2003)* .

Add:

State v. Caulfield, 2001 Del. Super. LEXIS 63 (Del. Super. 2001) (right to jury trial in forfeiture proceeding recognized). While some courts have questioned *Austin* (*see Bennis v. Michigan , 516 U.S. 442 (1996)* ; *People v. Hernandez, 694 N.E.2d 1082 (Ill. App. 1998)* ; *People v. Baptist, 672 N.E.2d 398 (Ill. App. 1996)* ; *State ex rel.
