testator's desires. n134 A videotape of a testator reading the will has the potential to diminish the number of wills that are contested, thus reducing the number of such time-consuming, expensive and sometimes frivolous suits. n135 As one author states, a videotape of the will execution ceremony "is not subject to the vagaries of a witness' fading memory, and it presents a more comprehensive and accurate view of the testator and the testator's condition at the time of the will execution than does piecemeal evidence through witnesses' testimony." n136 Professor Beyer discusses four cases in which the judge looked at a videotaped will execution ceremony to establish capacity or undue influence. n137 Although it appears that there are no state statutes or cases allowing a videotaped will to substitute for a written will, our use of modern technology in all phases of the law continues to expand and the future will likely bring acceptance of the video will as a substitute for the written will. n138 There are two potential ways that a videotape could legally substitute for a written will: (1) expansion of the definition of "writing" to include videotapes, or (2) the finding that a videotape satisfies the main policy reasons behind the writing requirements, the avoidance of fraud and proof of the legitimacy of the document. n139

The California Rules of Evidence have expanded the definition of a writing to include, "handwriting, typewriting, printing, photostating, photographing, and every other means of recording upon any tangible thing any form of communication or representation, including letters, words, pictures, sounds, or symbols, or combinations thereof." n140 Under this expanded definition, the California courts have found a videotape to be a "writing." n141

On the policy side, a will must be in writing to prevent alteration, addition or deletion of the intent of the testator. As a practical matter, a videotape is more difficult to alter, and the visual image of the testator assists in establishing undue influence far more completely than a writing.

Another possible application of videotape technology is in the recording of a living will. Each state has its own requirements for a valid living will and all states require a living will to be in writing. No state statute currently allows a videotaped living will to substitute for a living will even though it may be particularly well adapted to this use in certain cases. n142

Videotape use will continue to expand in every area of the law. Because paratexts (electronically recorded words and images) can record present reality, we can expect prospective beneficiaries to introduce electronically recorded wills to support their challenges to written wills. n143 Courts may soon be dependent on electronically recorded testamentary instruments. n144

A few courts have considered the admissibility of an audiotape as a substitute for a holographic will. In the leading case, *Estate of Reed*, n145 the Wyoming Supreme Court refused to admit a tape recording to probate. The court held that a voice-print could not be considered to be a "writing." One author cites an incident where an audio recording was admitted to probate, but without opposition. n146

§ 88.04(d) Statutory Wills.

The term "statutory will" actually encompasses two distinct concepts: (1) a fill-in-the-blank form provided courtesy of the state legislature, and (2) the use of the "incorporation by reference" doctrine to incorporate standard language in a statute into the will. Both types of statutes are used in an effort to make it easier for testators to leave a will, and for will drafters to provide a quick, inexpensive, all-purpose will when necessary. n147

The California Statutory Will is the prototype for the "form will" type of statutory will. n148 The California model has also been adopted in Maine, Michigan, and Wisconsin. n149 The California version provides two will forms, one with a trust and one without. The standard will incorporates definitions and certain other provisions by reference and gives a testator a limited range of choices regarding the distribution of property at death, generally favoring spouses and descendants.

The alternative form of statutory will act is illustrated by the Uniform Statutory Will Act, which uses the doctrine of incorporation by reference to simplify will drafting. It can be used with a simple one-page will, basically incorporating all of the relevant statutory provisions by reference, or selected portions of the statutory will can be incorporated into a more complex scheme. n150 Again, the Uniform Statutory Wills Act contains definitions n151 and has provisions for trusts, n152 if desired. The drafters believe that the design of the Uniform Statutory Wills Act is both simpler and more flexible than the form will device of the California statute. n153 It has been adopted in Massachusetts and New Mexico. n154

Statutory will statutes have not yet been widely adopted. However, the concept is a fairly new one; the California version was adopted in 1983, and the Uniform Statutory Wills Act was approved in 1984. Also, the use of the statutory will still requires execution in accordance with appropriate formalities, such as signature, witnesses, date, etc. n155 Relaxation of execution formalities or the provision of alternative devices (will substitutes) might prove to be even more popular than statutory wills with both legislatures and would-be testators. n156

§ 88.04(e) Conditional Will/Sham Will.

Some wills are written without genuine intent that the will ever take effect, and others are written in a "just in case" state of mind. Conditional wills and sham wills are really issues of testamentary intent, and not unique types of wills. n157

A sham will is one that is written, but the testator did not mean for it to take effect. It might be written to procure a favor or as a joke. n158 Of course, issues involved in a sham will situation may overlap with issues of *quantum meruit*, agreements to make or not to revoke a will, n159 or testamentary capacity of the decedent. n160 A true sham will situation that would be litigated is relatively rare.

Conditional wills are more common. In some cases a testator may write a will before going into the hospital, before taking a trip, or during an illness. n161 There will be some language in the document indicating that the will is written just in case the testator does not return from the trip, or survive the operation or illness. Such wills are typically holographs written by the testator without legal advice. The testamentary intent aspect of a conditional will comes into play when the testator does not die of the anticipated cause or during the stated time, but dies much later or of a different cause.

Some states do allow conditional wills by statute. n162 If the will is clearly contingent on the happening of the specified event, it will usually not be held to be valid n163 in the absence of the occurrence of that event. However, most courts do admit conditional wills to probate under the delayed circumstances described above. Courts have a constructional preference in favor of validity. Also, there is a preference for testacy rather than intestacy. n164

§ 88.04(f) Superwills or Blockbuster Wills.

The debate over acceptance of the "Superwill" or "Blockbuster" will continues to rage. The use of a testamentary document to dispose of non-probate assets is not allowed under current law, although many commentators argue for its adoption. n165 In fact, the Uniform Probate Code specifically provides that a will may not change the beneficiary designation under a POD account or alter the survivorship rights in a multi-party bank account. n166 On the other hand, courts have occasionally given will provisions Superwill-type effects. For example, in *Estate of Lowry*, an Illinois appellate court upheld the testator's purported revocation of an inter-vivos trust in her will. n167 Similarly, a South Dakota court permitted a testamentary revocation of a joint bank account and jointly-held certificates of deposit. n168

Will substitutes, according to Black's Law Dictionary, are documents which accomplish what a will is supposed to accomplish, for example -- trusts, life insurance, joint ownership in real property. n169 Other will substitutes include partnership agreements, government bonds payable to a named person and upon the person's death to a named survivor, joint bank accounts, homestead rights and exemptions, promissory notes given for consideration payable after the maker's death, government savings bonds payable to alternative payees, gifts *causa mortis*, annuity contracts and retirement programs with survivorship provisions. n170

The owner of these will substitutes retains control over them during life and after the owner's death these assets are distributed outside of the probate process n171 without the need for a written will. Will substitutes, since outside the probate process, can be distributed promptly. Quick distribution is an appealing aspect of will substitutes. Also, will substitutes are cheaper and easier to use than most testamentary devices. Joint tenancies and life insurance are the "estate plans" of many people. These can be created, changed, and distributed without the need of an attorney or trips to the probate court.

A Superwill or Blockbuster will allows a testator to dispose of these non-probate assets through a written instrument. With a Superwill, a testator may dispose of testamentary and non-probate assets in one instrument, although such disposition of non-probate assets is not recognized under existing law. n172

Advocates of the Superwill argue that it is a logical progression in the estate planning area. n173 Just as will substitutes have evolved until fully recognized, so will Superwills develop from disfavor to recognition. n174 Second, the Superwill could better effectuate the testator's intent. n175 A testator would have the freedom to make a change in the beneficiaries of will substitutes in one testamentary instrument. For example, the testator could use a Superwill to change the beneficiary designation under an insurance policy or to change the joint tenant(s) of a bank account. The Superwill would be a statement of the testators most recent intent and consequently reflect the principle of the Uniform Probate Code that the testator's intent should always prevail. n176 Third, the Superwill would allow centralization of estate planning. The Superwill could allow the testator to unify all probate and non-probate dispositions in one dispositive source. n177 However, opponents of the use of a Blockbuster will device maintain that the current evolution of non-probate estate planning will cease. n178 The use of non-probate transfers would be made obsolete by the use of Superwills. n179 Some commentators believe use of the Superwill will diminish the popularity of the non-probate disposition of assets, along with the corresponding benefits of reduced expenses and ease of use. A Superwill would interfere with the quick disposition of non-probate assets by financial intermediaries. n180 Since a beneficiary of non-testamentary assets receives these without going through the probate process, they are distributed quickly. The Superwill would expose these assets to the probate process and the advantage of quick distribution would be eroded. With a Superwill, institutions would have to verify disposition of these assets, slowing down the process. Moreover, financial institutions would face potential liability if they distributed assets contrary to a Superwill.

A Superwill might encourage the distribution of assets without proper consideration of estate planning consequences. Finally, any attempt by legislators to allow limited use of the Superwill should address the problem of blind execution

and specificity. That is, a Superwill should only be executed after considering all the estate planning consequences of its provisions, with specific reference to particular probate and non-probate assets disposed of in the will. A Superwill could potentially expose the estate planning practitioner to more liability. Opponents of the Superwill see the added complexities of the Superwill as adding to the practitioner's risk of liability. n181

Before the Superwill can gain wide acceptance, these objections must be considered. For example, the concerns of financial institutions could be dealt with by holding them liable only for those Superwill designations that these institutions have actual notice of. Although requiring the testator to notify these institutions removes some of the testator's flexibility, placing the responsibility for notification on the testator would limit the use of the Superwill so as not to impede non-probate transfers. n182 In summary, although several commentators argue for the limited use of the Superwill, n183 no state statute currently allows the use. Those scholars that advocate some role for the Superwill recommend careful crafting of such statutes to minimize disruption to the probate process and to protect financial institutions, beneficiaries and bona fide purchasers.

CHAPTER 88 TESTAMENTARY TRANSFERS OF REAL PROPERTY

10-88 Thompson on Real Property, Thomas Editions § 88.05

AUTHOR: Professor Victoria Mikesell Mather School of Law St. Mary's University of San Antonio

§ 88.05 Will Contracts.

[Go To Supp]

§ 88.05(a) Introductory Comments.

While "will contracts" have historically been permitted in the law, n184 the very notion raises some inherent problems. Wills are, by their nature, "ambulatory" documents. Wills are capable of being revoked and revised up until the time of death, since a will is not effective until the death of the testator. A contract, on the other hand, is not usually subject to unilateral modification and revocation. Also, contract remedies are separate and distinct from wills remedies. Finally, this section notes that, while contractual wills are sometimes used, the use is frequently criticized.

The law of contracts and the law of wills predictably and inevitably collide in cases involving contracts to make a will, joint and mutual wills, and contracts not to revoke a will. Judicial efforts to reconcile the conflicting principles "have provided both fascinating friction and instructive results." n185 Often the problem is manifested when a court attempts to achieve a just result by ignoring the principle of the revocability of wills in preference to that of contractual rights. A Missouri court expressly addressed this concern in *Owens v. Savage*. n186

"A miscegenation of the law of contracts and the law of wills occurs when courts state that wills are irrevocable." n187

"It is dealing with the 'hybrid' relationship resulting from combining the elements of contracts and wills, that confusion was created and remains." n188

Atkinson offers instruction in the doctrinal conflict: "Our law has no separate concept of 'will made in pursuance of contract'; we must treat the will part as a will and the contract part as a contract." Wills made pursuant to a contract, Atkinson continues, "are revocable although there has been an agreement not to revoke. The matter of the contractual aspect does not properly arise upon probate, but only when the agreement is sought to be established as a claim against the estate or in a proceeding against the successors of the decedent." n189 Another expert also provides a clear statement of the will/contract doctrinal problem: "A contract is never 'revocable' or subject to unilateral rescission, and in this respect a contract to make a joint will is no different from any other contract ... the wills are always revocable, and that the contract is never revocable but may be rescinded provided both, not just one, of the parties so agree." n190

§ 88.05(a)(1) Proof of Contract.

The immediate hurdle confronting litigants in contractual wills cases is proving the existence of a contract. Cases involving contracts to devise realty to elderly persons n191 and cases of joint and mutual wills usually require the strict "clear and convincing" standard of proof; n192 will contracts are not "favored children of the law." n193 Contracts to make a will often involve informal agreements between relatives or close friends; such relationships often lead the parties to discount the need for a writing evidencing their testamentary agreements. Courts, however, must work within the strictures of the law. The Statute of Frauds, for example, generally precludes courts from enforcing oral contracts involving conveyances of land, and many such statutes make *any* oral will contracts unenforceable. n194 This point is discussed below, in more detail. Another basic requirement that a plaintiff must establish to show the existence of a will contract is consideration. n195

§ 88.05(a)(2) Remedy.

While either legal or equitable relief is available in will contracts cases, most reported cases involved equitable remedies. n196 In cases involving a devise of real property, specific performance would seem to be an appropriate remedy due to the presumptive uniqueness of land. n197 However, because no will is irrevocable and the time for performance is at the death of the devisor, the prospective devisee could have to wait years for rights to be established in court. Such rules hobble courts attempting to fashion remedies in cases where the would-be testator breaches during her lifetime, and the contract rights of the promisee also are less clear in such cases. An additional obstruction to providing satisfactory relief to the injured party is presented when the potential devisor conveys to an innocent third party. In such cases, the non-breacher is unlikely to obtain adequate relief since courts will not enforce a will contract at the expense of "superior equities." n198 Another oft-utilized equitable remedy is the imposition of a constructive trust on the property in favor of the promisee. n199 Moreover, some courts have employed declaratory judgment to delineate the promisee's future rights to an action for damages or specific performance when the will-maker dies. Such declaratory relief presumably serves as notice to all would-be purchasers or donees of the land. n200 In cases where a contract to make a will cannot be proved, relief in quantum meruit for services rendered may be the appropriate remedy. n201

§ 88.05(a)(3) Critique.

Criticism of contractual wills, particularly joint and mutual wills, is widespread. n202 Heightened risk of litigation, and its accompanying delay and uncertainty in estate administration and distribution, is one criticism. Others include inflexibility of the testamentary plan and undesirable federal tax consequences. Will contracts are, of course, designed to reduce flexibility. However, as discussed herein, the use of such contracts is fraught with difficulties.

The tax disadvantages of joint and mutual wills can be disastrous. "Federal courts have repeatedly held that the contractual obligation imposed upon the surviving spouse converts what would otherwise have been a bequest or devise in fee simple to the surviving spouse into a mere life estate, a terminable interest which does not qualify for the marital deduction in the estate of the first spouse to die. One need not be too astute to recognize that because the federal estate tax has a graduated tax structure ranging from 3 to 77 percent, it is vitally important to preserve the marital deduction in the estate of the first spouse to die so as to avoid unnecessary tax liability." n203 In place of contractual wills, inter-vivos and testamentary trusts have received the endorsement of the authorities. "Professional management of the trust assets by a bank trust department to protect the surviving spouse from profligate spending and ingenuous unawareness of the predatory schemers can be gained, with the preservation of the marital deduction provision of the [Internal Revenue] Code." n204 Another source states: "It is hard to conceive of any objective of a [will] contract which could not be better accomplished by a trust." n205 The objectives include security, flexibility, and control.

§ 88.05(b) Contracts to Make a Will.

A contract to make a will might be more descriptively and instructively called an agreement to make a *provision* in one's will for a particular person. In practice, contracts to make a will frequently involve an agreement to devise or bequeath real and/or personal property in exchange for personal services, quite often in the context of elderly persons contracting to devise property in exchange for the services of caregivers. n206 Another frequent use of the contract to make a will is an agreement, often oral and informal, to leave property to a relative. Most common, however, are promises to benefit a third party, as where A promises B that she will leave property to B's relatives. n207

One issue that is frequently addressed in a contract to make a will is the Statute of Frauds problem. Some states require that all contracts to make a will be in writing. n208 On the other hand, the will itself may satisfy the writing requirement. n209

The Uniform Probate Code addresses the issue of proof of contractual wills, in § 2-514, which states:

A contract to make a will or devise, or not to revoke a will or devise, or to die intestate, if executed after the effective date of this Act, can be established only by (1) provisions of a will stating material portions of the contract; (2) an express reference in a will to a contract and extrinsic evidence proving the terms of the contract; or (3) a writing signed by the decedent evidencing the contract. The execution of a joint will or mutual wills does not create a presumption of a contract not to revoke the will or wills. n210

At least 24 states have passed statutes either exactly like or modeled after the Uniform Probate Code. n211 Thus, a strictly oral contract to make a will would not be enforceable under the Uniform Probate Code. On the other hand, the will itself may suffice as a writing.

Most courts will permit the doctrine of part performance to take a contract to make a will out of the Statute of Frauds. The elements of part performance are: (1) proof of the terms of the contract, (2) part performance by one party, and (3) *either* that the performance refer to the existence of the contract n212 *or* that the failure to enforce the contract would lead to unjust enrichment. n213 It is sometimes indicated in the cases that Uniform Probate Code provisions are also intended to "tighten up" this area of enforcement of will contracts as well. n214

§ 88.05(c) Joint and Mutual Wills.

Although Lord Mansfield declared in 1775 that "there cannot be a joint will," n215 the term has nonetheless become a fixture in Anglo-American law and legal literature. This is not to say that Lord Mansfield's statement is incorrect: a will is by its nature a one-party instrument, and it is impossible for a will, even when jointly executed by two persons, to operate like a deed executed by joint grantors. n216 Despite this, however, the concept of joint and mutual wills has flourished, and the preponderance of modern authority is that joint and mutual wills are valid if properly drafted (although Louisiana, it must be noted, has declared joint wills void by statute). n217

"A 'joint will' is one where the same instrument is executed as the will of two or more persons and disposes of property owned by them, either jointly or separately." n218 The joint will is then the will of each person, and is probated at each person's death. Mutual wills are separate wills of two or more persons which are similar or reciprocal in their provisions. The mutual wills are two different wills, but the terms are identical, or mirror reflections in terms of disposition. Mutual wills are more common than true joint wills. n219 Joint and mutual will is a term used to describe wills with identical or similar terms as a contract to leave property as provided in the wills. n220

Joint and mutual wills typically are employed in coordinating the disposition of property by members of the same

family. Most often husband and wife, but also other relatives often ask their attorneys for wills that contain more or less reciprocal provisions. n221

In cases of joint and mutual wills, some courts apparently believe that the mere fact that testators have executed mutual wills with knowledge of the contents of each other's documents meets the requirements of a contract. Some courts even hold that joint wills, particularly if they are joint and mutual, were necessarily made pursuant to a contract. n222 The majority of American jurisdictions, however, hold that the mere execution of a joint will is insufficient to prove that a prior contract not to revoke exists. n223

On the other hand, a separate contract to make mutual wills would be upheld n224 or an irrevocability provision in a joint will could be sufficient to show the existence of a contract. n225

COMPUTER-ASSISTED RESEARCH

LEXIS: joint or mutual w/2 will!

§ 88.05(d) Contracts Not to Revoke.

The joint and mutual wills that engender litigation invariably involve a "contract" not to revoke the will. Usually such a contract is the alleged impetus for the execution of joint or mutual wills. The existence or non-existence of the contract not to revoke often is the crucial question in cases involving joint and mutual wills. As one commentator dryly stated, "[a]nalytical difficulties arise when a joint will or mutual wills are accompanied by a contract not to revoke." n226 A typical joint and mutual will, accompanied by a contract not to revoke, consists of reciprocal provisions for a gift over in fee or as a life estate to the survivor, and an agreement that the survivor dispose of the survivor's estate according to the contract.

Assuming the contract is enforceable, many other issues may arise. For example, may the surviving spouse under a joint and mutual will make gifts or sell property during the surviving spouse's lifetime? n227 Does the contract apply to property acquired after the death of one of the contracting parties? n228 Does the contract operate to defeat the forced heirship claims of a new spouse? n229 Does a beneficiary of a joint and mutual will contract have to survive both contracting parties in order to take under the will. n230 These and other questions evidence that joint and mutual wills are typically a bad idea.

CHAPTER 88 TESTAMENTARY TRANSFERS OF REAL PROPERTY

10-88 Thompson on Real Property, Thomas Editions § 88.06

AUTHOR: Professor Victoria Mikesell Mather School of Law St. Mary's University of San Antonio

§ 88.06 Will Construction -- Will Components.

[Go To Supp]

The will is presumptively a conclusive document purporting to contain all necessary papers and information to legally express a testator's true intent. Realistically, this presumption is too simplistic as it may be necessary to understand and consider an array of external circumstances which may serve as interpretation tools when dissecting the will's construction and intent. Discussed below are four distinct will component doctrines: integration, republication by codicil, incorporation by reference, and acts of independent significance. Each doctrine serves a unique function within the law of wills. Each is a construction principle involving parts of wills.

§ 88.06(a) Integration of Wills.

The doctrine of integration contributes to will construction by allowing several sheets of paper to be compiled and executed together in composing a single will. The requisite necessities include: (1) the testator's intent that each sheet contribute to the will, and (2) each sheet must be present at the time of execution. n231 Papers added after execution may not be integrated into the will. Integration may be easily proven by physically attaching the individual sheets together or by a consistent flow of language from one page to the next. n232 The doctrine of integration is almost a simple, common sense rule. Unless there is a reason to think that there is a problem, the will should be admitted to probate. Although traditionally it was preferred that the testator sign each page of the will, the integration doctrine permits a single testator's signature appearing upon the last page of the document. n233

Recently, the doctrine of integration was examined by the Delaware Supreme Court while addressing the issue of a testator's integrated signature. In *Carter*, a lawyer prepared the testator's will consisting of four pages of substantive provisions and an additional fifth page serving as a self-proving affidavit. The five pages were stapled together and forwarded to the testator with instructions for proper execution. The testator mistakenly executed the will by signing only the affidavit in lieu of the will itself. The mistake was repeated on an additional codicil to the will. When admission of the will to probate was appealed, a question arose concerning the improperly executed self-proving affidavit. n234 The Delaware Supreme Court held that the doctrine of integration allowed separate writings to be merged together, thereby creating a single instrument. The court urged the importance of the existence of both writings at the time of execution and the testator's intent that each compose his will. Because the testator's affidavits contained

his signature and were attached to the actual will at all times, the Delaware statutory requirement insisting upon the testator's signature was met. The will and codicil were therefore held valid.

In contrast, an Indiana appellate court restricted the broad application of the integration doctrine to preprinted form wills. n235 In *Keener*, the testator's will consisted of four sheets of paper stapled together. The first two pages contained a preprinted form will and affidavit which were properly signed, witnessed and notarized. The final two pages contained the devisee list which was signed by the testator on the last page. The issue on appeal was whether the devisee list was properly integrated with the preprinted form will and affidavit. n236 The court explained that the integration doctrine allows the compilation of several extraneous documents to create a single will instrument. The appellant argued proper integration existed between the form will and devisee list because they were physically attached and contained a continuous flow of language. The court disagreed and held the will void. Integration failed to occur, and absent proper incorporation by reference, n237 the list was not honored as part of the will since the State of Indiana had not yet adopted the integration doctrine.

§ 88.06(b) Doctrine of Incorporation by Reference.

The doctrine of incorporation by reference is somewhat related to the doctrine of integration, but serves a different function. Incorporation by reference enables an extraneous document to be incorporated into the will by reference, for a specified purpose, without requiring the presence of the document at will execution. At common law, four requirements must be met in order to validate the incorporation by reference in an effort to prevent fraud. First, the will itself must refer to the document to be incorporated; second, the will must contain a reasonable description of the document; third, the document must be in existence at the time the will is executed; and fourth, the testator must evidence an intent to incorporate the document into the will. n238 Proof that the referenced document was in existence at the time of will execution is required in an effort to mandate a testator's compliance with appropriate will statutes, thereby limiting the freedom to change one's will through future documents. If the will makes reference to an unprepared future document, the incorporation will be invalid. n239 In addition, a passing or ambiguous reference in the will does not meet the doctrinal requirements. n240

Although most states recognize the doctrine of incorporating by reference either by statute or case law, a few states reject the doctrine. n241

Many states, and the Uniform Probate Code, have statutory provisions codifying the doctrine of incorporation. Section 2-510 of the Uniform Probate Code states: "Any writing in existence when a will is executed may be incorporated by reference if the language of the will manifests this intent and describes the writing sufficiently to permit its identification." n242 Several states have adopted the Uniform Probate Code definition, or one similar to it, in their relevant state statutes. n243 Other states have added sections which further expand upon the Uniform Probate Code. n244

A related provision of the Uniform Probate Code is § 2-513. It provides:

Whether or not the provisions relating to holographic wills apply, a will may refer to a written statement or list to dispose of items of tangible personal property not otherwise specifically disposed of by the will, other than money. To be admissible under this section as evidence of the intended disposition, the writing must be signed by the testator and must describe the items and the devisees with reasonable certainty. The writing may be referred to as one to be in existence at the time of the testator's death; it may be prepared before or after the execution of the will; it may be altered by the testator after its preparation; and it may be writing that has no significance apart from its effect on the

dispositions made by the will. n245

This provision allows a testator to use a document outside of the will to dispose of personal property, other than money. The document may be prepared or revised *after* the will is executed; it need not be in existence at the time the will is executed. The document must be signed by the testator. The items listed must be described with reasonable certainty, but the comments indicate that phrases such as "all the tangible personal property other than money in my office" would suffice. That is, an inventory or itemized list is not required. n246 It is important to note that such a statement or list may only be used if the will refers to it. The list would be ineffective if the will did not address the issue. Additionally, the list or statement disposing of personal property, other than money, can only affect property not otherwise specifically disposed of in the will. However, the drafters' comments to § 2-513 provide the following sample will clause:

I might leave a written statement or list disposing of items of tangible personal property. If I do and if my written statement or list is found and is identified as such by my Personal Representative no later than 30 days after the probate of this will, then my written statement or list is to be given effect to the extent authorized by law and is to take precedence over any contrary devise or devises of the same item or items of property in this will.

Such a clause would effectively permit a testator to change a will disposition through an unattested list or written statement. The change of disposition is permissible since the will clause suggested above makes any gift in the will contingent on *not* being inconsistent with the written statement or list. If there is an inconsistency, the will does not dispose of the property.

It is important to note that the doctrine of incorporation by reference is often mentioned in connection with pour-over trusts. n247 If an existing inter vivos trust is in existence at the time of will execution, the testator may incorporate the trust terms into the will, thereby "pouring over" part of the estate into the trust at death. n248 Again, the doctrinal requirements must be met by properly identifying the trust within the will and expressly stating the intention to incorporate the existing trust into the will. This obviously works best with non-revokable and non-amendable trusts as the provisions contained therein at the time of will execution cannot be changed over time. Amendable trusts can present difficulties as revisions may be made after the trust was incorporated into the executed will. n249 Two additional legal questions involving the incorporation doctrine deserve mention. They are: (1) whether a holographic will can incorporate other documents that are not in the testator's own handwriting n250 and, (2) whether an improperly executed (and thus invalid) will may be incorporated by reference into a valid codicil.

On the holographic will issue, the cases appear to be split. n251 The difference may be somewhat theoretical. All cases involve the question of whether the incorporated materials become a physical part of the will. n252 In the case of a holographic will, if the addition is a physical part of the will, but is not handwritten, it should not be admitted to probate. Alternatively, if the incorporated material is simply made part of the "scheme of disposition," it should be a valid addition to probate. As to second issue, most courts do allow incorporation by the codicil. n253 One hornbook even calls republication by codicil a type of incorporation by reference. n254 Finally, it should be noted that the republication by codicil doctrine, discussed in the next section, does intersect with the incorporation by reference doctrine. For example, in *Simon v. Grayson*, n255 a leading incorporation by reference case, these two doctrines were combined in order to accomplish the testator's wishes. The testator executed a will dated March 25, 1932, and a codicil dated November 25, 1933. The testator died in 1935. The will referred the executors to a letter located in the testator's safety deposit box. The letter contained directions for the payment of money to certain persons. The letter was dated July 3, 1933, after the will but before the codicil. The California Supreme Court used both doctrines to permit the executors to follow the directions in the letter. The codicil republished the will on November 25, 1933 and thus the letter became a document in existence, referred to in the will, and intended by the testator to be incorporated into his will.

A Michigan appellate court addressed the issue of whether a codicil can serve as the effective will when the original

will has been misplaced. n256 The testator executed a will in October 1980, which granted petitioner one-half of the residual estate. A later codicil republished the will and expressly reconfirmed the October will with a minor modification. Upon testator's death, the original October will could not be located, but a copy was found along with the original codicil. Despite the traditional presumption that a lost will has been destroyed by the testator in an effort to revoke, the Michigan appellate court held that the codicil expressly incorporated by reference the provisions of the original October 1980 will, and thereby served as a valid and independent testamentary instrument. The court allowed admission of both the codicil and will copy to probate.

§ 88.06(c) Doctrine of Republication by Codicil.

The doctrine of republication by codicil allows a previous will to be revived or restated by the subsequent execution of a codicil. The codicil, which is a supplement to the will, updates the will and may even save a defectively executed will when combined with the incorporation by reference doctrine. n257 A codicil can revive a revoked will through operation of the republication doctrine. n258 If a testator revokes a will and then subsequently executes a codicil to that will, the will is republished. The doctrine can also be used to validate prior invalid codicils. n259 The doctrine of republication by codicil relies heavily upon the testator's intent to republish. This intention may be established by a reference within the codicil to a prior will and may be further endorsed by a physical attachment to the prior instrument. Additionally, when revalidating or modifying a prior will through republication by codicil, the date of the codicil becomes the effective date of the will, unless such is contrary to testator's intent. n260 Republication can come up in a variety of contexts. The Georgia Supreme Court decided a case involving the Georgia mortmain statute as it applied to charitable devises established within ninety days of a testator's death. n261 The will in question was originally executed more than ninety days before the testator's death. However, the will was republished by a later codicil granting the testator's widow a life estate with the remainder to a charitable trust. Interestingly, the republication occurred sixty-seven days before the testator's death. The codicil identified the will and stated the testator's intent to republish. The court held that a will republished by codicil becomes effective as of the codicil date, unless the testator intended otherwise. Therefore, the will in question fell well within the 90-day time limit of the mortmain statute.

Another important aspect of the doctrine of republication by codicil was examined in a Connecticut Supreme Court case which addressed the issue of intent. n262 In *Rosenfeld*, the testatrix's original will bequeathed a specific number of shares of stock in eight separate corporations to each of her eight grandchildren. After formal execution of the will, the corporate structures changed, thereby increasing the amount of stock owned by testatrix. The will was later republished by codicil in an effort to modify an unrelated provision, but otherwise made no mention of the additional shares of stock. The issue presented to the court was whether the grandchildren should receive the additional shares of stock, or receive the exact number bequeathed in the will. The court found no clear intention within the codicil to limit the grandchildrens' shares. By looking at the will, it was evident the testatrix intended each grandchild to obtain full ownership interest in one of the eight corporations, since each was granted all of the stock representing ownership in one corporation. Additionally, an anti-ademption clause specifically requested the grandchildren receive full value of any stock divested by the testator prior to her death, further indicating an intent that additional stock should pass to the grandchildren. n263

As an historical note, the doctrine of republication has its roots in the English common law. The Statute of Wills (1540), was construed so that real property acquired after the execution of the will did not pass under the will. n264 A codicil

could republish and update the will, and would permit land acquired after the original execution to pass under the will. The English law was subsequently revised to allow testators to dispose of all real and personal property owned at death. n265

LEXIS: republication or republish! w/2 codicial w/15 will!

§ 88.06(d) The Doctrine of Acts of Independent Significance.

This doctrine is also known as the "facts of independent significance" doctrine, or the "facts of non-testamentary significance" doctrine. The name is quite descriptive. Testators sometimes refer to people or to things in their wills in such a way that courts must go outside the will to determine who or what is intended. For example, a bequest "to those persons who work for me at the time of my death," n266 would be acceptable, or a gift of the contents of a desk or a drawer might be permitted. n267 Other typical examples include such things as "the automobile that I own at the time of my death," "my spouse, if I am married at the time of my death," or "all of the jewelry that I own at my death."

It is important that the acts have independent (non-testamentary) value and motive. The act or fact may be one affecting testator, beneficiary, third person, or any combination thereof, and may occur before or after execution of the will. For example, the testator may make reference within the will to the execution or revocation of a third person's will. n268 A third person's will, already in existence at the time of the testator's will execution, may also be incorporated by reference, assuming all incorporation requirements are met and this occurs within a jurisdiction recognizing the incorporation doctrine. n269

It should also be noted that reference to acts of independent significance may also be applicable to the pour-over trust in jurisdictions that fail to recognize the doctrine of incorporation by reference. The establishment of an inter-vivos trust is an act with independent significance as it is not usually intended to perform a testamentary purpose. n270

Section 2-512 of the Uniform Probate Code codifies the doctrine:

A will may dispose of property by reference to acts and events which have significance apart from their effect upon the dispositions made by the will, whether they occur before or after the execution of the will or before or after the testator's death. The execution or revocation of a will of another is such an event. n271

Several states, including Alabama, California, Colorado, Hawaii, Idaho, Maine, Montana, New Jersey, South Carolina, and Utah have directly incorporated the Uniform Probate Code provision into their relevant statutes. n272

CHAPTER 88 TESTAMENTARY TRANSFERS OF REAL PROPERTY

10-88 Thompson on Real Property, Thomas Editions § 88.07

AUTHOR: Professor Victoria Mikesell Mather School of Law St. Mary's University of San Antonio

§ 88.07 Will Construction and Reformation.

Va. Code 37.1-137.1

§ 88.07(a) Introduction.

One of the basic rules of will construction is that a will should be construed in such a manner that it gives effect to the intention of the testator. n273 In conjunction with this principle, it is generally held that the testamentary instrument should be construed in its entirety, and as a whole document. Some courts will also state the facts and circumstances of the testator's situation and the overall distributional plan should be considered as well. n274 The area of mistake creates a dilemma for the courts. The proposition that a will is subject to change, by a court, without the actual testimony of the testator is contrary to the philosophy of formal will execution. The formalities of a will execution ceremony are designed (at least in part) to protect the testator from later fraud, and to ensure that the testator is making a considered decision in the allocation of assets at death. n275 Also, second guessing testator decisions places a substantial burden on the court system. On the other hand, facts and circumstances sometimes clearly indicate that the testator's actual intent will be thwarted for some reason, if the literal language of the will document is given effect. The general rule is that courts will *not* rewrite a will to fix a testator's mistake, and that extrinsic evidence will *not* be admitted to establish testator's actual intent. Both rules are subject to some exceptions, discussed in the following sections.

The "no reformation" rule and the "no extrinsic evidence" rule have been under attack for many years. The no reformation rule is also referred to as the "plain meaning" rule. If the meaning of the will is plain on its face, no revision will be considered. The rules have been characterized as unrealistic and unnecessarily rigid. As Wigmore has noted, all language is subject to interpretation based on context and circumstances. The meaning of any document can only be some individual's meaning. n276 Other authorities have pointed to the law affecting inter-vivos transfers to criticize the rules. n277 Evidence of intent and surrounding circumstances are frequently admitted to aid in the construction or reformation of inter-vivos trusts or gifts.

§ 88.07(b) Mistake.

§ 88.07(b)(1) Mistaken Descriptions.

One of the most common errors alleged in an otherwise clear will is that the testator did not correctly identify a

beneficiary or items of property. For example, there are several cases regarding charitable bequests, where the designated benficiary is clearly identified in the will, but the circumstances tend to show that the testator intended another charity. n278 Sometimes a testator will leave property to a named individual, but there is evidence that the testator actually meant to name a different individual. n279

In these cases, courts will usually refuse to grant relief, even if the evidence shows that the mistake is the result of a scrivener's error or an attorney error. n280 One exception is the "personal usage" doctrine. In these cases, would-be beneficiaries are permitted to produce evidence that the testator habitually referred to them by an unusual, personal, or pet name. n281 For example, a husband might call his wife "mother," or family members might call a youngest child "baby." Another exception is the ambiguity rule, discussed below. In general, if the courts find that the description constitutes a latent ambiguity, then extrinsic evidence will be admitted to construe it.

§ 88.07(b)(2) Mistake of Fact -- Mistake in the Inducement.

Testators may be mistaken as to the legal effect of their use of words. For example, a gift to "heirs" was held to be a good gift to the testator's aunt as the legal heir, when the facts tended to show that the testator actually wanted the property to go to several cousins. n282 Another example of a mistake of fact is the testator's belief that a would-be beneficiary is dead, when in fact the person is still alive. n283 Again, courts will usually disregard the testator's mistaken belief. The usual problem for a court in a case like this is the uncertainty about what alternative disposition the testator would have made if the testator had known the truth. A limited exception may exist if the mistake of fact is recited on the face of the will, and the alternative disposition is described. n284 For example, a will might recite: "I leave property to my children in equal shares. One-half to Alice and one-half to Bob, since Charlie is dead." It might be implied that the shares should be distributed equally in thirds if Charlie is alive.

The mistaken belief about the death of a child is addressed in the Uniform Probate Code, and in some non-UPC states. The provision treats a child mistakenly believed to be dead as an omitted after-born child. The omitted child may share in the estate. n285 The protection of children from disinheritance is discussed elsewhere in this chapter.

Other than the omission situations discussed above, courts are generally unwilling to add gifts when a beneficiary appears to have been left out by accident, even if the omission is the result of an attorney error.

LEXIS: mistake! w/3 fact! w/15 will! w/15 construct! or reform!

§ 88.07(c) Ambiguity.

One major exception to the "no-reformation" rule and the "no extrinsic evidence" rule is the admissibility of extrinsic evidence to clear up an ambiguity in a will. Most jurisdictions draw a distinction between "latent" and "patent" ambiguities; evidence is admissible to construe a latent ambiguity, but a patent ambiguity just makes the gift void. n286 A latent ambiguity is said to be one that is not apparent from the instrument itself, it is not indicated on the face of the document. For example, a gift to nieces and nephews is a clear gift. However, if the testator had only one niece by blood, but several nieces and nephews by marriage, the question becomes whether the testator intended to include all of the nieces and nephews. n287 Sometimes latent ambiguities are found when the testator has devised property that the testator does not own, or when the name of the beneficiary is wrong. In the former case, the would-be beneficiary will have a stronger claim if the testator indicates that the property belongs to the testator. n288 For example, a gift of property located at 222 Center Street is ambiguous if the testator does not own property at that address. Perhaps the testator holds title to 333 Center Street. The named recipient of the Center Street property will have a stronger case if the will indicated that the testator thought that the Center Street property was the testator's property by making a gift of "my" property on Center Street, or "the property that I own" on Center Street.

A patent ambiguity is one that is obvious from a reading of the will. For example, testator might leave a blank: "$5000 to _____," or "_____ to Alice." Or, the will might make an incomplete disposition. Extrinsic evidence will not be admitted to clarify the testator's intent in the case of a patent ambiguity. n289 A minority of courts will admit extrinsic evidence to clear up an ambiguity when the disposition of testator's estate is incomplete, and will result in a partial intestacy if the gap is not filled. In general wills law, there is a constructional preference for testacy. n290 This type of problem in wills law is also sometimes described as an omission. n291

Courts may elect to construe a patent ambiguity without reference to extrinsic evidence, or may use extrinsic evidence to find that the ambiguity is latent, although it would appear to be patent. n292 In the modern trend, the distinction between latent and patent is criticized as an artificial distinction, which is easily manipulated. Some courts have abolished the distinction for puposes of will analysis. n293

COMPUTER-ASSISTED RESEARCH

LEXIS: patent or latent w/5 ambigu! w/15 will! w/15 construct! or reform!

§ 88.07(c)(1) Equivocation.

Another type of ambiguity is the *equivocation*. The words of the will might describe two persons (or, less often, things) with equal accuracy. For example, testator may leave property to "my nephew, John Jones." Testator has two nephews named John Jones. Extrinsic evidence is admissible to clear up this type of ambiguity. n294

COMPUTER-ASSISTED RESEARCH

LEXIS: equivocation w/15 will!

§ 88.07(d) Extrinsic Evidence.

As previously indicated, extrinsic evidence (evidence outside of the will document) will not be admitted to change the terms of testator's will on the grounds of mistake. n295 However, evidence is admissible to clarify an ambiguity. The reason for this rule is primarily the Statute of Wills and the policies behind it. The will itself is the best evidence of testator's intent, since the formalities of execution should help the testator to avoid fraud as well as inadvertent error. Also, the no extrinsic evidence rule is related to the parol evidence rule for contract construction. Oral evidence is generally not admissible to construe a written contract, since the contract itself is the best evidence of the agreement of the parties. n296 Courts are more willing to admit evidence of circumstances surrounding the testator, rather than direct declaration of intent purportedly made by testator. n297 Circumstances are more capable of objective proof than testator declaration, and are less susceptible to fraudulent misrepresentation. Circumstantial evidence is more reliable for purposes of will interpretation. Usually the standard of evidence required to make a change on the face of the will is fairly compelling. A clear and convincing evidence standard may be applied. n298

Other evidentiary rules may effect the admissibility of extrinsic evidence. The Dead Man's Act may prohibit testimony regarding conversations with the decedent if perceived to be contrary to decedent's interest. The hearsay rule might prohibit third party repetition of statements made by the testator after the execution of the will. (Pre-execution statements could fall under a state of mind exception.) Also, attorney-client privilege might bar an attorney from testifying about conversations with the client if the testimony could damage the clients interest, even after the client's death. n299

COMPUTER-ASSISTED RESEARCH

LEXIS: extrinsic evidence w/5 admi! w/15 will!

§ 88.07(e) Remedies.

It is generally held that courts will not re-write a testator's will. Courts will occasionally add terms under the guise of "construction." One variation of this technique is the willingness of courts to strike out erroneous portions of descriptions of persons or property. This doctrine is sometimes referred to by the Latin phrase, *falsa demonstratio non nocet* (meaning "mere erroneous description does not vitiate"). n300 For example, suppose a testator left property to "my cousins, Charles and Charlene." Evidence tended to show that the testator meant to include all cousins, and forgot to name Colin in the will. The court could accomplish the testator's wishes by striking the words "Charles and Charlene." All three cousins could take the property. The willingness of courts to delete, but not to add words has been criticized as rigid and artificial. n301 The effect of a deletion is often similar to that of an addition. Also, there does not seem to be a strong policy reason to change a will in one way (deletion) and not in another (addition)

Some courts have disregarded the no reformation rule and have actually changed the terms of a will. In a Hawaii case, the state supreme court changed the word "oldest" to "youngest," in order to correct a mistake in a will. n302 The New York Court of Appeals permitted a beneficiary name change in a will where the parties had executed mutual wills, but each executed the will of the other by mistake. n303 The California and Michigan Supreme Courts have also engaged in a substantive revision of testator's will. n304 New Jersey broke new ground in this area with the decision in *Engle v. Siegel*. n305 The New Jersey Supreme Court reformed a will to conform to testator's "probable intent." Although the will did not so provide, the court imputed an intent to the testator to benefit the families of husband (testator) and wife equally.

A constructive trust is also available as a remedy to a mistake in a will, if the mistake was induced by fraud. n306 For example, a constructive trust might be imposed if the benficiary told the testator that Alice was dead, knowing that Alice was alive and that the testator favored Alice. Or, the testator made a testamentary gift to Alex, upon the fraudulent representation that Alex would give the property to Betty. Before a constructive trust can be imposed, the facts must be proved by clear and convincing evidence.

Other will doctrines can be used to remedy "mistakes." For example, a court may remedy a failure to include an individual in a distribution scheme by finding that the testator was under an insane delusion about that individual. n307 The doctrine of dependent relative revocation is used to remedy a revocation made as the result of a mistake. n308

COMPUTER-ASSISTED RESEARCH

LEXIS: (re-write or strike out or change or reform! or remed!) w/15 will! w/15 mistake! or fraud!

§ 88.07(f) Attorney Liability for Malpractice.

Of course, an attorney is liable to the client if the attorney is guilty of negligent drafting. In testamentary transfer situations, the party injured as a result of the attorney's conduct is the disappointed beneficiary. In many cases, the doctrine of privity has operated as a bar to a malpractice claim. n309 Under this reasoning, the would-be beneficiary has no connection to the attorney-client relation with regard to the will, and so a tort suit is barred. Other courts have permitted the suits to proceed, although the damages may be difficult to prove. n310 Attorneys can take some steps to protect themselves. Descriptions of named persons can help to establish clear identity. For example, in a gift to "my sister Sue," add a description such as "now residing in Arizona." Check information such as property description and addresses, as well as the proper names of charities. The testator should carefully read the will, or the attorney may wish to read the will aloud to the testator if it is not too long and complicated. n311

§ 88.07(g) Reforms.

The area of mistake is one where the revised 1990 version of the Uniform Probate Code does not propose significant change. Scholars have some suggestions. Professor Mary Louise Fellows suggests that the courts remedy mistakes and ambiguities in a will by assuming that the testator would intend to do what a competent estate planner would do. n312 A preference for traditional family patterns of distribution, and of equal distribution among family members would be presumed. The law would help to protect testators who act without the benefit of competent legal advice. Professors John Langbein and Lawrence Waggoner suggest that a mistake or ambiguity should be corrected when it has affected the terms of the will, and when the mistake can be proved by clear and convincing evidence. n313

CHAPTER 88 TESTAMENTARY TRANSFERS OF REAL PROPERTY

10-88 Thompson on Real Property, Thomas Editions § 88.08

AUTHOR: Professor Victoria Mikesell Mather School of Law St. Mary's University of San Antonio

§ 88.08 Will Contests.

[Go To Supp]

§ 88.08(a) Introduction; Purpose.

Fundamental to the law of wills is the doctrine that the testator should be allowed free rein in disposing of the testator's property upon death. n314 Nevertheless, wills are creatures existing solely by virtue of statute, and, thus, the law may impose restrictions on the manner in which a person disposes of property. n315 These restrictions serve to ensure that the instrument enforced truly represents the testator's intentions and to promote important policy considerations. n316 In furtherance of the considerations underlying the will statutes, the courts have allowed a will to be invalidated in whole or part due to defects in the testamentary process. Statutory laws and court-created doctrines governing the making and acceptance of wills represent efforts to ensure that the primary goal of implementing the testator's wishes is served. Thus, when the formalities of will execution are not followed or when circumstances arise that call into question the intent of the testator, the will may be partially or wholly rejected, creating full or partial intestacy. Absent another will, disposition of the decedent's assets is then governed by a set of intestacy statutes designed to distribute property in a manner judged to be representative of the average, rational testator, taking into account general policy considerations. In such a case, the law concludes that these intestacy statutes are a better measure of the decedent's wishes than the defective will and offer greater assurance of effecting the decedent's intent while serving public policy.

In order to bring defects in the testamentary process before the court and provide a forum for potential beneficiaries of the estate to assert their rights, the law provides for will contests. The will contest is a procedure by which certain parties may challenge the will's validity by offering evidence of non-compliance with the formalities of execution, or that the will fails to reflect the testator's intent. As discussed below, the parties allowed to bring a contest are those who would benefit from its defeat. Thus, the law employs a natural incentive to encourage challenges. On the other hand, to discourage frivolous lawsuits and those which seek to defeat the testator's intent rather than affirm it, the law places a number of restrictions on will contests. Thus, a balance is struck between the need to ensure fulfillment of the underlying policy, to allow one to dispose of one's property as one pleases, and to accommodate the inherent uncertainties involved in assessing will execution and the deceased person's intent. This process ensures, as best as possible, that the will probated represents the testator's intentions. The effect of a successful contest is to divest devisees under the challenged will of their rights in decedent's property in favor of heirs taking under the intestacy statutes or devisees taking under another will. n317 Will contests are generally predicated on one or a combination of grounds

from three general areas of challenge: n318 (1) the instrument offered lacks testamentary "character," rendering it unsuitable for determining the decedent's intent and, thus, the intestacy statutes represent the best model for disposing of the decedent's property; (2) testator's expressed intent is not the product of an unimpaired will, but is the result of mental deficiency, an insane delusion, or mistake and, thus, does not accurately represent testator's rational intentions; or (3) an expression of intent is present, but circumstances suggest that the expression is that of a third party because of fraud, duress, or undue influence and, therefore, probate should be denied as not representative of the decedent's intent (interference by third parties with testator's intent).

An additional ground for contest may occur where the will admittedly meets the above standards, but has been purportedly revoked by a subsequent instrument or act. Thus, the instrument accurately reflects the testator's intent, but not at the legally determinative time, that is, at death. The law presumes, quite rationally, that the most recent, legally sufficient will provides the most accurate indication of the testator's desires at the moment of death. The law concerning revocation is discussed elsewhere in the text, n319 and this chapter will focus on contests based directly on the instrument challenged.

At the outset it should be noted that will contests constitute only a tiny portion of litigation in U.S. courts. A contributing reason for the lack of will contests is the limited pool of wills probated in the first instance. Several commentators, referring to various studies, have noted the small number of probated wills in this country. n320 According to those studies, only about 1 in 5 decedents, on average, have a will probated. n321 Even considering only probated wills, however, the percentage of contested wills remains low. One study, for example, found only 1% (of wills submitted for probate) were contested and only 38% of those went to trial. n322

§ 88.08(b) Relation to Probate.

Probate is admission to record of a particular instrument and proof of its validity as a will. n323 At heart, it is a formal declaration of the facts underlying the will's validity and perfects the will as a title instrument. Thus, probate of a will creates the circumstances whereby title to the property of the decedent may be transferred to the devisees. The admitted will then serves as evidence of the underlying facts, generally allowing transfers to third parties with assurance that title was properly vested in the transferor. n324

To have the will admitted to probate, the proponent generally files an application for probate which will be heard at a special proceeding, as opposed to an ordinary civil action. Usually the proponent must show the testamentary character of the instrument, testator's intent and capacity to execute the instrument as a will, the testator's knowledge of the contents of the will, and compliance with execution formalities. n325 While, as discussed elsewhere in this text, a number of procedures exist for admission of a will to probate, under usual circumstances the proponent's burden of showing the above conditions is met by showing due execution. n326 However, some jurisdictions may require an additional showing of some evidence of capacity, and, when questions as to undue influence, fraud, mistake, duress, forgery, or revocation arise, their absence must be shown by the proponent. n327

Validity, whether or not the instrument is the will of the decedent, is the only issue in the proceeding. n328 Questions regarding the right of the testator to dispose of particular property, the violation of contract obligations, or the property rights of heirs or devisees by construction of the will, for example, are settled in separate construction or distribution proceedings. The court will, however, look at alterations, such as interlineations or erasures, to determine whether they are part of the will. While the general rule is that courts will look at the instrument as a whole, invalidity of a portion usually will not invalidate the entire will. Substantial variation appears to exist among the jurisdictions regarding when and to what extent partial validity will be applied. n329

The will contest is an independent proceeding by which contestants attempt to thwart the evidentiary effect of probate, thereby denying beneficiaries under the will from taking title to the decedent's property. Because of standing restrictions, any distribution upon denial of probate will then favor the contestants. The contest may come prior to

probate or after. The timing of contest may depend a great deal on the form of probate followed in the jurisdiction of the challenged will. In states applying the "solemn" form of probate, notice to interested parties is given prior to probate allowing such parties an opportunity to contest at the hearing to admit the will to probate. In "common" form jurisdictions, the will is admitted to probate in an ex parte proceeding with notice given subsequently. Therefore, in the jurisdictions following this latter course, challenges are more likely to arise subsequent to probate. When a contest is instituted after common form probate, the action essentially becomes probate in solemn form. n330

§ 88.08(c) Procedure.

§ 88.08(c)(1) Nature and Form.

A will contest is generally in rem n331 and considered to be an independent action, especially if brought after probate. It suspends estate matters, except for preservation and collection of debts, while the contest is pending. Questions of will validity are then tried *de novo.* If brought before probate, the form of the contest is generally by "caveat." When pursued after probate, as is usual, the form is generally by petition to revoke probate. Because the will contest is an independent action, the caveat or petition to revoke should not be considered a response to the application or petition for probate.

Whatever the form, the document asserting the will contest should state the specific reasons for objection or challenge and the interest of the contestant, discussed below. In addition, if the contestant's relationship to the decedent is collateral, some jurisdictions require the contestant to show the absence of persons more directly interested. n332

The Uniform Probate Code (along with most states) continues the distinction between informal and formal probate. n333 A will contest is a formal proceeding, under the Code. n334

The nature and form of a probate or will contest proceeding and their interaction vary considerably from jurisdiction to jurisdiction and often depend on the particular statutory wording. The practitioner is well advised to consult local law and practice to determine how to proceed.

§ 88.08(c)(2) Jurisdiction.

Will contests require statutory authority and courts of equity have no inherent jurisdiction to entertain such suits. Courts with jurisdiction over probate matters are variously named and include probate courts, surrogate courts, orphan's courts, register of wills, court of ordinary, and district, county, circuit, or common pleas courts acting as probate courts. Probate jurisdiction is normally predicated on the decedent's domicile at death, which is generally held to be synonymous with residence. The proof of the decedent's death is also a necessary element to the establishment of jurisdiction. The law of the situs of real property applies irrespective of domicile and the situs of personal property is determined at the time of death. Determination of both domicile and time of death are, therefore, important considerations for probate.

Some statutes allow courts to exercise probate jurisdiction over in-state assets of a non-resident. However, in the absence of such statutory authority, the courts are split as to whether jurisdiction may be exercised. n335

§ 88.08(c)(3) Standing.

§ 88.08(c)(3)(i) General.

Standing to contest a will is controlled by statute. n336 The contestant must generally show that she is an interested

party and this is the standard adopted by the Uniform Probate Code. n337 An interested party is one whose interest in the estate may be impaired or defeated by probate of the will or who will benefit by setting it aside. n338 This requirement has been applied even where the statute, read literally, would permit any person to contest. n339 The court may inquire as to standing *sua sponte* or on motion of a party. n340 The nature of the interest must be pecuniary or beneficial n341 and must be in the probate of the will, rather than the estate itself. In other words, even if the party seeking to contest takes under the will, such party will have no standing if they would take no more if the will were defeated. Thus, heirs or next of kin who take more under the will have no standing to contest. n342 As one court has put it: "The 'interest' of one who may contest is not the interest of every busybody or tomdicary who may not approve of the will. It must be a financial or property interest derived either from inheritance or under a will. The person so contesting must either gain or lose by virtue of the will in question." n343 According to the general rule, vested future interests are sufficient to establish standing and some jurisdictions allow contest when the future interest is contingent or conditional. n344 However, the pecuniary or beneficial interest requirement does not stretch so far as to include fees for serving as executor or trustee, a spouse's interest in administering the estate, or the prior right to be appointed as administrator. n345 Although the courts are stringent in the requirement of an interest in probate of the will, it is not necessary to prove the interest will in fact be impaired or the validity of the underlying claim by which the contestant would take. n346

COMPUTER-ASSISTED RESEARCH

LEXIS: standing w/30 will! w/2 contest!

§ 88.08(c)(3)(ii) Specific Parties.

The common law and a number of statutes deny the killer of a testator the right to take by will, n347 or intestacy. n348 Most commonly applied to the murderer of the testator, some jurisdictions deny the right to inherit for manslaughter. n349 Generally speaking, no knowledge of the beneficial interest is required in order to invoke the rule. It is enough that the killer benefits from the wrongful act. n350 Although some states require a conviction, n351 a number of others do not n352 and a conviction is not necessary under the Uniform Probate Code. n353 When a killer of the testator is not able to take by law, no interest will arise by which the killer will have standing.

The right of a beneficiary to contest a will generally survives in the beneficiary's heirs or the administrator of the beneficiary's estate. n354 However, if the heir is still living and declines to contest, the heir's heirs cannot do so. n355

Pretermitted children generally cannot contest because their rights are independent of the will. n356 However, if the pretermitted child is the only heir, contest will render the will void and should be permitted. Where marriage and child come after execution of the will, the common law provided that the will was revoked. Some jurisdictions, therefore, allow contest in those circumstances. However, other jurisdictions deny such a right.

In general, children born out of wedlock will not have standing unless they have a right to inherit under state law or can establish some other recognized interest. n357

A beneficiary under a prior will generally may contest a later will. This is so even though a subsequent will, probated or not, had revoked the prior will. But, if the prior will was revoked by destruction, a contest will not be allowed. n358 A few cases have held that the beneficiary under a subsequent will has sufficient interest to contest a prior will. However, if the subsequent will has been denied probate, such parties will have no standing. In order to challenge a prior probated will, the beneficiary under a subsequent will must offer prima facie evidence of the validity of the subsequent will. n359

The courts are split concerning the right of an executor of a prior will to contest a subsequent will or codicil which revokes or modifies the prior will. Also, the jurisdictions are split as to whether an intestate administrator can contest a will. Further, the courts are split as to whether a public administrator can contest a will for the purpose of producing an

escheat in favor of the state. n360

The right to contest a will is generally considered transferable property, whether voluntary or involuntary. A few courts have denied the transferability of the bare right to contest, at least when the contest was filed after probate. n361 However, the general rule here must be applied in light of the rules concerning interest in the estate, such as estoppel, which may prevent the assignee from asserting a contest. n362

Purchasers of property from the testator's heir generally have an interest sufficient for contest where probate of the subsequent will would give property to someone other than the heir. However, some cases deny such a right when contest comes after probate. The creditors of an heir generally cannot contest, although some authority exists that a contest will be permitted in limited circumstances where the debtor's actions are designed to defeat the creditor's interests. A judgment or attachment creditor generally has a sufficient interest for standing, but some authorities disallow the contest under certain conditions. n363

§ 88.08(c)(4) Necessary Defendants.

Necessary defendants to be joined often include the executor named in the will, all parties named in the will as beneficiaries, and testamentary trustees, especially as representatives for unborn persons. n364 Some courts hold that there is no authority to proceed with a contest without joinder of all interested parties, even though the contest is a proceeding in rem and binding on all parties with notice, joined or not. n365 However, at least one court has held that it is not fundamental error to proceed to judgment, despite non-joinder of all necessary and indispensable parties, and the court was not deprived of jurisdiction to render a judgment by the failure to join. n366

§ 88.08(c)(5) Timing.

The timing of will contests are usually regulated by statutory limitation provisions. Unless contested within the limitation period following admission to probate, the order of probate becomes final and may not be challenged later. Since will contests are creatures of statute, extensions of the time period for disability generally requires an express statutory provision. Although the courts are split, there is some authority that the disability of one party to the action inures to the benefit of others. n367

Various approaches have been taken to the tolling of statutory limitations periods when fraud is involved. Some courts have allowed tolling for various types of fraud even where no express statutory provision exists, while others have required an express provision. The former courts have tolled the limitations period in particular cases of forgery and general cases of misrepresentation producing delay in contesting the will. Many courts limit tolling for fraud to extrinsic fraud only. n368

§ 88.08(c)(6) Estoppel.

Despite filing within the applicable rules concerning limitations, a contestant may, nonetheless, be prevented from maintaining the contest by virtue of estoppel or laches. n369 Particular conduct that may lead to estoppel includes express or implied consent to probate the will, participation in a previous suit for construction of the will, exercise of a spousal election, acquiescence to the will's provisions by conduct, acceptance of benefits under the will, n370 and failing to challenge the will until administration has been completed. In addition, courts will apply estoppel to a contestant who failed to assert the claimed rights in a previous contest, at least where the issues are the same. n371 Numerous other incidences of estoppel may be gleaned from the many cases in this area. Although the number of fact situations which will raise estoppel are numerous, potential contestants are helped by the rule that a person estopped may join with one who is not and participate in the will contest. n372

§ 88.08(c)(7) Burden of Proof.

A great deal of confusion exists within the body of law concerning burden of proof due to a lack of rigor in discussion and application. n373 Rigorously applied, burden of proof refers to the requirement that the party upon which it is placed will lose the case unless that party can persuade the fact finder that the evidence meets the standard of proof, usually a preponderance of evidence. This burden usually falls on the plaintiff. Meeting the preponderance of the evidence standard means producing evidence that demonstrates that the party's position on the issue, or interpretation of the facts, is more likely than not. Applied in this manner, the burden of proof may be referred to as the burden of persuasion. Thus, in the context of the preponderance of evidence standard, if the party with the burden of proof produces no evidence or the evidence is evenly split on an issue, that party has not sustained the burden of proof on the issue and the fact finder should rule for the opposing party. The location of the burden of persuasion is determined by the pleadings and the nature of the claims and does not change during the course of the trial.

In contrast to the burden of persuasion, the burden of production does change during trial. The burden of production refers to the requirement that a party present evidence on an issue or risk losing on that issue. Thus, at the beginning of the trial when neither party has put on evidence, the party with the burden of proof will lose, since the evidence is evenly split nothing versus nothing, unless that party presents evidence to the trier of fact. Therefore, at the start of trial, the burden of production is on the party with the burden of proof, or persuasion. Once that party has presented credible evidence n374 to the trier of fact, that party's position has become more likely than not because there is some evidence versus no evidence. This means that, absent any evidence to the contrary, the party with the burden of proof will sustain the burden and win on that issue. At this point the burden of production, or going forward with the evidence, switches to the opposing party, since that party will lose unless it produces evidence to counteract the evidence presented by the other side. To win on the issue, the opposing party must, at a minimum, demonstrate that the evidence is evenly split. If the opposing party does meet this burden and the evidence is evenly split or in favor of the opposing party, the burden of producing more evidence returns to the party with the burden of proof.

Thus, the burden of persuasion, which is the "rigorous" application of burden of proof, remains on the same party at all times during the trial and simply means that the party with the burden of proof, or persuasion, is at all times subject to the preponderance of the evidence standard. At the end of the presentation of evidence, regardless of who has produced evidence or in what amount, the weight of all the evidence in favor of the party with the burden of proof must be greater, even if only slightly, than that of the opposing party. Conversely, to remain consistent with the rigorous application of burden of proof, the opposing party can never be required to establish its position by more than equivalent evidence. Making the opposing party subject to a preponderance of the evidence standard in effect switches the burden of proof.

Many cases have not clearly distinguished between these two different burdens and write of the burden of proof "switching" during the course of a trial. This is not an appropriate application of the principles of burden of proof. Adding to the confusion, in the context of will contests, are the variety of positions among the jurisdictions as to which party should be subject to the burden of proof. In the sense that a will contest is an independent action, it would seem that the burden of proof should be placed on the contestant, especially if the action is brought after the will has been admitted to probate. However, due to the unique nature of the probate process, which is a special statutory proceeding in derogation to the common law rather than a traditional civil or common law action, many jurisdictions place the burden of proof on the proponent of the will in a contest proceeding. The Uniform Probate Code has adopted the position that the burden of persuasion should be on the contestant as to issues of testamentary incapacity or lack of intent, undue influence, fraud, mistake, duress or revocation. n375 Because of the wide variety of viewpoints concerning the various elements of the probate process, local law should be consulted to determine the interplay between burden of persuasion or production, the nature of probate proceedings and will contests, and the various presumptions for the particular jurisdiction.

LEXIS: burden w/2 proof w/30 will! w/2 contest!

§ 88.08(c)(8) Summary Judgment.

Summary judgment is available in both probate and will contest proceedings when no triable issues of fact exist. n376 The general rules for submission of evidence and the conclusive establishment of facts will apply, but the practitioner should be especially aware of the role of dead man's statutes, n377 the rules regarding admissibility of extrinsic evidence on the various issues, and special presumptions applied in will cases. A full discussion of the instances where summary judgment has been granted or denied, and the basis therefore, would be little more than a listing of cases. The practitioner should consult the annotations, digests, and other appropriate sources for particular applications in the jurisdiction.

§ 88.08(d) Grounds.

Although any circumstance which could ultimately affect the instrument offered as the decedent's will may be the subject of a contest, the usual grounds fall into three broad areas: the instrument itself; the nature of the decedent's acts as dependent upon the decedent's own condition; and interference with the decedent's acts by third parties. Because attacks on a will ultimately go to the question of testator's intent, the various grounds or general areas of contest may appear to overlap. Indeed, several grounds are often asserted in concert, particular lack of testamentary capacity and undue influence. Nevertheless, questions raised concerning non-compliance with the statutory requirements for will execution, or will formalities, lack of language of intent in the instrument itself, and extrinsic evidence that the expressed language of the instrument does not reflect the testator's intent, would all appear to fall under the broad category of attacks on the instrument itself. That the testator lacked testamentary capacity, or made a mistake regarding disposition or effect of the will, ultimately questions the testator himself rather than the instrument and these grounds are, thus, appropriately grouped together. Finally, issues of undue influence, fraud, forgery, or duress all involve a third party interfering, intentionally or not, indirectly or not, with the testator's actions.

§ 88.08(d)(1) Instrument Lacks Testamentary Character -- Attacks on the Instrument Itself.

§ 88.08(d)(1)(i) Execution.

The first area where problems can arise and offer fodder for challenges of the will is the instrument itself. That is, the contestant seeks to demonstrate that the instrument offered is not a will. As noted previously, to be a valid will the instrument must: be signed by the testator in the presence of two or more witnesses, attested, and signed by two or more witnesses in the presence of the testator, show intent to act as a will, be revocable, and take effect at the death of the testator. n378 Thus, the contestant argues the *contra* of these requirements by attacking the form or substance of the instrument offered as a will. The first three requirements are regarded as formalities of will execution and are extrinsic to the nature of the will. That is, these requirements may change from jurisdiction to jurisdiction in their particularity without changing the essential nature of what our legal system regards as a will. The last three requirements are intrinsic to the nature of the will as we know it.

In attacking the form, the contestant may raise issues concerning whether the particular formalities, the extrinsic requirements, have been complied with and whether the language used by the testator demonstrates sufficient testamentary intent for the court to find the instrument a will. Of course a clearly defective instrument, such as one that lacks the signature of the testator, will be denied probate by the probate official even in an ex-parte proceeding. The admission of a will to probate is dependent on the statutory requirements, not the interests of the proponent or the contestant. This is unlike the normal civil action where failure to assert rights concerning the issues often waives any defects in the process. n379 Defects in the required execution formalities are akin to jurisdictional issues and cannot be waived by either party. Although interested parties are allowed to litigate the issue, the will must stand or fold on its own merits with regard to execution formalities. Because such defects most often give rise to a *sua sponte* refusal of probate by the responsible officer, few challenges are mounted on the ground of failure to comply with will formalities.

§ 88.08(d)(1)(ii) Intent.

A second attack on the form concerns whether language of testamentary intent can be gleaned from the instrument. n380 A putative testator, for example, might execute an instrument conveying land immediately to a third party for consideration, signed by the grantor and two attesting witnesses. However, because the instrument is meant to take effect immediately, not upon the grantor's death, the instrument, although meeting the formal requirements of will execution does not represent testamentary intent. The instrument is simply a deed of real property and could not be probated as a will. The nature of such an instrument would likely be apparent on its face. Likewise, an ambiguity in an instrument giving property to another may be construed by the court as a failed attempt at an *inter vivos* gift, absent language indicating an intent for the disposition to take effect at death. As with other areas of the law, what a thing is called by the parties is not determinative; it is the legal effect of the act or instrument which gives proper title to the act or instrument. n381 After all, the decedent may not understand the legal significance of calling something a will and, therefore, intend something quite different from what the law recognizes as a will. A gift in anticipation of death does not amount to a will even though the testator may mistakenly believe so.

In determining the decedent's intent with regard to language used, the courts will generally not look at extrinsic evidence to supply testamentary intent to an instrument that lacks language of testamentary intent on its face. n382

COMPUTER-ASSISTED RESEARCH

LEXIS: intent! w/5 instrument w/15 will! or testament!

§ 88.08(d)(1)(iii) Substance.

The instrument may also be attacked on the basis of its substance. That is, all the formalities have been complied with, but the instrument, despite, testamentary intent on its face, lacks the substantive intent to act as a will. Contests based on substance can arise in three specific instances: conditional wills or provisions, specimen wills, and sham wills. n383 These types of attack are much harder to sustain because they rely on extrinsic evidence, which is generally disallowed, to contradict a will which is valid on its face. In addition, it is presumed that a properly executed will was done so with testamentary intent. n384 Conditional wills or provisions depend on the happening of a specific contingency in order to operate as a will. n385 A condition may relate to the will as a whole or to a particular provision of the will, but a condition relating to individual provisions only does not make the will conditional. Such wills may be predicated, for instance, on non-survival from a surgical procedure or failure to return from an extended visit abroad, and presumably involve some danger of death from disease or acts of violence. Courts will deny probate of such a will if the condition does not occur, n386 such as when testator dies from an unrelated cause. n387 Extrinsic evidence is generally not admissible to show a condition was intended, n388 but it is admissible to show that the will was intended to be absolute. Courts will often construe a condition as relating to the motive for making the will, rather than a condition intended to invalidate the will, and, thereby, uphold the will even when the condition is not met. For the court to find a conditional will, clear and definite language that a conditional will was intended must appear. n389 Revalidation may occur after a failure of condition and retention for a long period after such failure has been construed by some courts as republication of the will. n390

A specimen will is one intended as a guide for a will to be made in the future. n391 Sometimes the testator validly executes the will as a stopgap measure until the intended will is completed. Generally, extrinsic evidence is barred to show lack of testamentary intent if the will is clear on its face. Clearly, an instrument executed as a stop-gap measure should be given testamentary effect. Finally, even when extrinsic evidence has been permitted to show lack of testamentary intent, such evidence must be clear and convincing.

Sham wills are those executed without real intent to operate, but are executed for non-testamentary reasons, such as to keep peace in the family. n392 For example, in the case of *In re Kennedy's Will*, n393 the decedent had, on the basis of extrinsic evidence offered by the contestants, clearly executed the instrument in order to restrain relatives from pestering

concerning disposition of the decedent's property and not with any real testamentary intent. The court, however, noting that will formalities exist to keep doubt and uncertainty from attending the probate of a will, sustained the trial court's ruling disallowing the consideration of extrinsic evidence to prevent probate of the will. n394 Other courts, however, emphasizing the importance of effecting the testator's intent, have allowed extrinsic evidence admitted in order to show the will is a sham. n395 When extrinsic evidence is allowed to invalidate a properly executed will, clear and convincing evidence is usually required. Finally, some courts allow extrinsic evidence to show lack of testamentary intent when the will was executed as part of an organizational ceremony or initiation rite. n396

§ 88.08(d)(2) Mistake or Lack of Testamentary Capacity -- Attacks on the Testator.

Rather than attacking the will, the testator may be directly attacked through claims of incapacity or mistake. Here, the contestant asserts that the testator's state of mind is defective, not the acts of the testator. The first major area of attacks on the testator concerns lack of testamentary capacity. Two types of capacity are required for a testator to make a valid will, legal capacity and mental capacity.

§ 88.08(d)(2)(i) Legal Capacity -- Age.

Legal capacity, today, refers primarily to statutory age requirements. n397 Typically, the testator must be age 18 or older to make a valid will. n398 This is the standard set by the Uniform Probate Code. n399 This age requirement is measured chronologically and is not a function of mental age. n400 In addition, the age requirement may be superseded by marriage or military service. n401

COMPUTER-ASSISTED RESEARCH

LEXIS: age or legal capacity w/15 testator or will!

§ 88.08(d)(2)(ii) Mental Capacity.

The second type of capacity, mental capacity, has two branches, mental deficiency and insane delusion, both of which are measured at the time of execution of the will. The presence of sufficient mental deficiency or an insane delusion, operative as to the testator's testamentary intent, prevents the will, codicil, or devise from being effective. n402

Statutes providing for mental capacity are usually general in nature, merely providing, for example, that the testator be "of sound mind." n403 Thus, mental capacity is not clearly defined n404 and this ambiguity may be responsible for the large number of contests based on lack of testamentary capacity. n405 A general incapacity or mere eccentricity does not suffice to invalidate the will. n406 In fact, evidence on eccentricity is generally inadmissible, unless corroborative of other evidence of incapacity. The burden of the contestant is to show that the incapacity directly affected the testamentary disposition. n407 The contestant suffers an additional burden in that many jurisdictions presume sanity, and therefore testamentary capacity, either on proof of due execution or when the proponent produces some affirmative evidence of sanity. n408 Thus, testamentary capacity is a very low threshold test. n409 It is possible that the issue of mental capacity will become even more important in the future. With an aging population, the risk of a will being executed by a senile or incompetent testator may increase. n410 The problem of AIDS may also raise issues of testator competence. n411

§ 88.08(d)(2)(ii)(A) Mental Deficiency.

The test for the mental deficiency branch of incapacity requires that the testator comprehend (1) the nature and extent of

the estate, (2) the identity of beneficiaries and their relationship to the testator, n412 (3) the nature of the act which the testator is performing, that is, the distribution the testator is making, and (4) the relationship between the above elements in forming an orderly plan for disposition of the estate. n413 A general incapacity not involving the above elements cannot prevent a finding of testamentary capacity and the testator is not required to know every name or the value of each piece of property. That is, actual understanding is not required, but simply the mental capability of making the listed determinations and judgments. n414 Thus, although the testator may be generally incapacitated, only a "lucid interval" is required to effectuate testamentary intent. n415 If a mental deficiency is demonstrated, the usual course is to invalidate the will as a whole. n416 This serves, in part, as a contrast to insane delusions, discussed below, which generally invalidate the will partially rather than wholly.

§ 88.08(d)(2)(ii)(B) Insane Delusions.

An insane delusion (also known as mental derangement) is "an extravagant belief, adhered to against all reason; which is impossible under the circumstances; and which leads to an unnatural disposition." It is a belief in that which does not exist, which no rational mind would believe to exist, and which cannot be dispelled by reason. n417 While mental deficiency generally operates to negate entire will, insane delusions more often invalidate only those portions of the will directly resulting from the delusion. n418 However, if the delusion affects the will, generally, it will be invalidated *in toto*. n419 As with mental deficiency, an insane delusion must affect the disposition made by the testator in order for the will or devise to be invalidated. n420 Also, similar to mental deficiency, contestants are burdened with stiff hurdles to overcome in order to invalidate the will. Generally, courts will invalidate the will only when overwhelming evidence shows the disposition was caused by the delusion, n421 and will uphold the disposition if any rational basis exists for the testator's belief, n422 some courts even when the delusion goes to the testamentary act complained of. Although some courts apply this standard as an absolute, n423 the real test is whether evidence exists "from which a sane person in the testator's circumstances could rationally draw the same conclusion." n424 That is, mere mistake will not invalidate a will and will not serve as an insane delusion.

Because insane delusions concern rather ambiguous circumstances and standards, this area offers a usual ground for contests. n425 However, the insane delusion does not arise from mere eccentricity or prejudice, n426 and non-customary religious beliefs are insufficient alone. n427 Such factors are of evidentiary value, nonetheless, and cumulatively may sustain a claim of delusion. A mistake of fact is, also, not an insane delusion, n428 but the line between the two can often become confused and uncertain. The distinction between the two has been stated to be that mistake "arises from some external influence which is weighed by reason, however imperfectly; while a delusion arises from a morbid internal impulse, having no basis in reason." n429 Despite the occurrence of an insane delusion, either with respect to the entire will or a particular disposition, testamentary capacity can arise in a lucid interval just as with mental deficiency. n430

LEXIS: (mental w/2 capacity or deficiency) or insane delusion w/15 will!

§ 88.08(d)(2)(iii) Mistake. n431

Two areas of mistake may offer grounds for contest, mistake by the testator or mistake by the draftsperson. The common law rule, with respect to mistakes of the testator, is that only mistakes involving testamentary intent, such as testator executing the wrong instrument, will affect the validity of the will. n432 Thus, in cases where a husband and wife mistakenly sign each other's will, both wills are invalid. n433 Statutory avoidance for mistake must be one of ignorance, not error of judgment or willful failure to make a proper investigation. Generally, courts are without the power to reform a will for mistake, but may, in some circumstances, be allowed to strike a portion of the will or to correct mistakes incidental to construction of the will. Absent fraud or similar grounds, a mistake as to a relationship is not grounds to defeat the will. n434 Parol evidence is generally allowed, at least on mistakes involving intent, but where

the will unambiguously designates a beneficiary, parol evidence will not be admitted to contradict the will. n435 Partial invalidity may occur where avoidance for mistake is allowed. n436

Mistake of a draftsperson does not generally render all or any portion of the will invalid, unless it is shown that the will differs materially from what the testator believed it to contain and it affects the essential provisions of the will. If evidence is presented that the testator read the will, heard it read, or otherwise had reason to trust the result of drafting, any mistake by the draftsperson becomes immaterial. n437

§ 88.08(d)(3) Interference by Third Parties.

A third area that serves as a basis for will contests involves interference with the testamentary process by third parties. The major types of third party interference are undue influence, fraud, and duress.

§ 88.08(d)(3)(i) Undue Influence.

The term "undue influence" is difficult to define, but can be described as a form of substituted judgment. The influence wielded must be sufficient to overcome or destroy the free agency of the testator, such that the will is really the expression of the influencing beneficiary, rather than that of the testator. n438 Mere efforts to prejudice, persuade, or to gain leverage with the testator will not amount to undue influence. Generally, the motive or the character of the person attempting to influence the testator is immaterial. n439 Examples of cases where the courts have found undue influence include situations where the person attempting to influence the testator: made threats to abandon a helpless testator; n440 wrote letters or made statements in an effort to turn the testator against the natural objects of testator's affection; n441 threatened litigation or violence against testator; n442 or cases where a large disposition is made in favor of a non-relative caretaker. n443

The burden of proof of the existence of undue influence is on the contestant to the will. n444 Undue influence is usually exercised in private, and surreptitiously, so it is very difficult to prove. Circumstantial evidence may be used to show undue influence. n445 Undue influence may also be used to challenge the revocation of a prior will, where the undue influence led to the act of revocation. n446

In some situations, a presumption of undue influence arises, which shifts the burden of proof or of persuasion to the proponent of the challenged gift. n447 Again, the level of proof may vary, from preponderance of the evidence, to clear and convincing evidence. The presumption usually arises when the parties are in a fiduciary or confidential relationship. For example, priest-penitent, attorney-client, doctor-patient are all examples of fiduciary relationships. n448 Family members are not necessarily in a fiduciary relationship, but such a relationship may be found under certain circumstances. n449 Normally a husband and wife are not considered to be in a fiduciary relationship for purposes of an undue influence claim, since it is normal for a husband and wife to attempt to influence each other. n450

However, the same rule does not apply to parties in an unmarried sexual relationship. Courts have frequently found undue influence in cases where large gifts are made in favor of unmarried lovers, in both heterosexual and homosexual relationships. n451

The mere existence of the fiduciary relationship is not enough to establish the presumption. n452 Usually the contestant must also show that the testator was physically or mentally weak, and susceptible to undue influence. The beneficiary in question must have had a opportunity and motive to attempt to exercise undue influence, and must have actively participated in the drafting or execution or revocation of the will. The will should also show an unnatural disposition, disinheriting family members and close friends in favor of the person exercising undue influence. n453 If the beneficiary actually drafted the will, and is in a confidential relationship with the testator, then the presumption usually will arise. n454

§ 88.08(d)(3)(i)(A) Attorneys and Undue Influence.

Attorneys should exercise caution in drafting a will for a client that names the attorney as a beneficiary. The risk of a claim of undue influence may be high, and a disciplinary action may also result. Moreover, a will drafting by an attorney as beneficiary gives an appearance of impropriety. n455 Both the Model Code of Professional Responsibility and the Model Rules of Professional Conduct specifically address this issue.

EC 5-5 of the Model Code of Professional Responsibility reads:

EC 5-5 A lawyer should not suggest to his client that a gift be made to himself or for his benefit. If a lawyer accepts a gift from his client, he is peculiarly susceptible to the charge that he unduly influenced or over-reached the client. If a client voluntarily offers to make a gift to his lawyer, the lawyer may accept the gift, but before doing so, he should urge that his client secure disinterested advice from an independent, competent person who is cognizant of all the circumstances. Other than in exceptional circumstances, a lawyer should insist that an instrument in which his client desires to name him beneficially be prepared by another lawyer selected by the client.

The Model Rules of Professional Conduct, Rule 1.8(c) provide:

A lawyer shall not prepare an instrument giving the lawyer or a person related to the lawyer as parent, child, sibling, or spouse any substantial gift from a client, including a testamentary gift, except where the client is related to the donee.

The comment to this Rule states:

A lawyer may accept a gift from a client, if the transaction meets general standards of fairness. For example, a simple gift such as a present given at a holiday or as a token of appreciation is permitted. If effectuation of a substantial gift requires preparing a legal instrument such as a will or conveyance, however, the client should have the detached advice that another lawyer can provide. Paragraph (c) recognizes an exception where the client is a relative of the donee or the gift is not substantial.

The effect of a finding of undue influence is to invalidate the will. If the part of the will that is the result of undue influence can be severed without damage to the testator's general plan of distribution, partial invalidity will result. n456 If the will is executed pursuant to the exercise of undue influence, but the testator later executes a codicil free from undue influence, then the will is good. The codicil operates to ratify the will as originally written. n457

COMPUTER-ASSISTED RESEARCH

LEXIS: undue influence w/15 will! or testator!

§ 88.08(d)(3)(ii) Duress.

Duress is a doctrine related to undue influence. If a party attempts to influence the testator through the threat of unlawful action, then the action taken by testator to benefit that party is again invalid. For example, if a testator signs a will as a result of a threat against life, or a threat to kidnap the testator's child, then the will is invalid, at least to the extent of benefit to the threatening party. The action threatened must be unlawful, so a threat to file for divorce, or to stop seeing someone, or to tell a secret would probably not amount to duress. n458

COMPUTER-ASSISTED RESEARCH

LEXIS: duress w/15 will! or testator!

§ 88.08(d)(3)(iii) Fraud.

If a will is executed, is not executed, or is revoked because of fraud, then the testator's action will be invalid. Fraud is usually defined as a (1) misrepresentation made to the testator with (2) intent to deceive, with the (3) purpose of influencing the disposition of testator's property at death, and the misrepresentation does lead to (4) action on the testator's part as a (5) result of the misrepresentation. The misrepresentation must be material, must relate to the will itself, and must actually influence the testator's behavior. n459

As in other areas, fraud in will executions and revocations can occur in one of two ways. The most common form of fraud is *fraud in the inducement*. The testator is induced to take some action or to fail to take action as a result of the false statement. However, the testator is aware that the document in question is a will, and knows the contents of the will. n460 Fraud in the execution or fraud in the factum occurs when the testator is misinformed about the nature of the document or does not know the contents of the will. For example, if the testator is told that the document being signed is an insurance policy, but the testator is actually handed a will to sign, the will would be void, since it was obtained fraudulently. Or, if the testator dictates a will to a drafter, but the drafter wilfully and with intent to defraud does not write the terms indicated by the testator, and the testator unknowingly signs the will with the substituted terms, then the will is again invalid.

COMPUTER-ASSISTED RESEARCH

LEXIS: fraud w/15 will! or testator!

§ 88.08(d)(3)(iv) Remedies.

§ 88.08(d)(3)(iv)(A) Constructive Trust.

Probate may not provide an adequate remedy for a wrong due to fraud or undue influence. The court cannot write a will for the testator, and cannot substitute its judgment for that of the testator. The court may impose a constructive trust in equity if the legal remedies available to a complainant are adequate. Under a constructive trust, the wrongful beneficiary is treated as a trustee of the property received as a result of the wrongful conduct, for the benefit of the would-be beneficiary or heir. n461

§ 88.08(d)(3)(iv)(B) Tortious Interference with Inheritance.

A remedy outside of the probate system is an action for tortious interference with inheritance. If the defendant causes the decedent to divert the plaintiff's interest under gift, devise or intestacy through the use of undue influence, fraud, duress, or other tortious conduct, then the defendant may be liable for damages. This is not a will contest, and is not covered by *in terrorem* clauses.

§ 88.08(e) *In Terrorem* Clauses.

Testators frequently insert will clauses providing for forfeiture or reduction of will benefits for beneficiaries who contest the will. These clauses are generally referred to as *in terrorem* clauses. n462 The purpose of such clauses, from the standpoint of the testator, is clear: the will represents the testator's intent which the testator does not want frustrated by litigation, especially since the testator cannot participate.

Although courts generally hold such provisions valid, n463 they are highly unpopular and, therefore, strictly construed. n464 This hostile attitude reflects that old legal maxim: the law abhors a forfeiture. n465 The tension between upholding such clauses and striking them down also reflects the courts' difficulties with the conflicting policy considerations involved. Favoring the validity of *in terrorem* clauses is the state's interest in discouraging litigation, especially that which is unmeritorious. n466 The lack of any direct state interest in such proceedings adds weight to this

public policy factor. As one court has put it:

> But, in the case of an [*in terrorem* clause], the state has no interest whatever apart from the interest of the parties themselves. There is no duty, either perfect or imperfect, on the part of an heir to contest his ancestor's sanity. It matters not to the state whether the land is enjoyed by the heir or by the devisee; and we conceive, therefore, that the law leaves parties to make just what contracts and engagements they may think expedient as to raising or not raising questions of law or fact among themselves, the sole object of which is to give the enjoyment of the property to one claimant rather than to another. n467

On the other hand, in addition to the law's abhorrence of forfeitures, it is the duty of the law to safeguard the testator's intent from usurpation in making the will, to protect natural beneficiaries from defects in the testamentary process, and to hold the courts open for those with meritorious claims. n468

In order to address the conflicting policy considerations arising from non-contest clauses, a number of doctrines, generally divisible into two classes, have been developed. One class of doctrines involves avoidance of the conflict by finding that the party's action is not a contest. n469 A will contest is independent of construction or distribution actions and the courts will often find the action to be one to construe the will rather than to determine its validity. In addition, because of the strict construction rule, courts will frequently construe the clause as not applying to the specific challenge or party involved. Thus, in weighing the underlying policy considerations and the specific language of the clause, courts have held that the mere filing of a contest is insufficient to trigger a forfeiture. n470 Similarly, courts have held that testifying in a will contest does not subject a witness to forfeiture under the clause. n471

The second class of doctrines invokes exceptions to the general rule that such clauses are valid. The primary expression of exceptions to the rule's validity is usually given in terms of a "good faith" or "probable cause" exception which has been adopted by the Uniform Probate Code n472 and established by statute or court decision in a number of states. n473 Some testators have tried to get around the probable cause doctrine by inserting express language in the clause providing for forfeiture regardless of good faith or probable cause. n474 The effectiveness of these beefed-up *in terrorem* clauses is currently uncertain and must be resolved in light of the conflicting policy considerations at play.

Also falling into this second class are individual cases where courts have found the clause to be a violation of public policy under the specific circumstances of the case. n475 In addition, citing public policy, some courts hold the clause operable only as to adult beneficiaries, allowing a minor or the representative a minor to contest without forfeiting under the clause. n476 The split among the jurisdictions on the question of whether good faith or probable cause operates to invalidate the effects of an *in terrorem* provision reflects the delicate balancing of the policy considerations mentioned above. Several jurisdictions do not recognize the doctrine at all. n477 Some of the policy considerations, express or implied, in these decisions include avoidance of unmeritorious litigation, protection of the family's privacy, and the uncertainty of judicial determinations of an unavailable testator's intent. n478 Other authorities have limited the exception to contests based upon revocation by a later will or forgery. n479 This limitation is based on the contention that while the ambiguities of undue influence, testamentary capacity, and fraud may encourage unmeritorious, difficult litigation, n480 public policy favors, if not legally demands, the submission of wills, and the discovery of crime. n481 The better view, however, is that a probable cause exception strikes an appropriate balance between the competing policy considerations. Since the right to make a will exists solely by statute and court construction of these statutes is driven by the desire to effectuate the testator's intent, n482 it must be argued that public policy demands exposure of actions intended to thwart the statutory right to dispose of property at death. If this were not so, those who engage in undue influence, fraud, or coercion (imposition of duress) could do so with impunity in each case where a testator seeks to legitimately protect the testamentary intent with an *in terrorem* clause. The probable cause standard allows the court to weigh the motivation of the contestant and the merit of the action in determining applicability of the clause. The possibility that the contestant will engage in expensive litigation for nought should be sufficient discouragement of unmeritorious suits. On the other hand, the doctrine provides a means for preventing interference with the testator's desires concerning disposition of the property and assuring that the testator's natural wishes are unhampered by a failing

mental state.

COMPUTER-ASSISTED RESEARCH

LEXIS: in terrorem w/2 clause!

§ 88.08(f) Action for Malicious Prosecution of Will Contest.

Although the authorities are split, a majority of jurisdictions allow the proponent of the will to institute a tort action for malicious prosecution against an unsuccessful contestant who has pursued the will contest without probable cause. n483 It should further be noted that the courts have allowed a contestant to maintain a tort action for malicious prosecution when the will offered for probate was forged. n484 The elements of such an action are (1) that the will contest (or other action) was instituted or continued, (2) by or for n485 the defendant, (3) terminating in favor of the plaintiff and (4) damaging the plaintiff, and (5) that the defendant acted maliciously n486 (6) and without probable cause in initiating the suit. n487 The California Supreme Court has eloquently stated the rationale underlying the tort of malicious prosecution:

> The malicious commencement of a civil proceeding is actionable because it harms the individual against whom the claim is made, and also because it threatens the efficient administration of justice. The individual is harmed because he is compelled to defend against a fabricated claim which not only subjects him to the panoply of psychological pressures most civil defendants suffer, but also to the additional stress of attempting to resist a suit commenced out of spite or ill will, often magnified by slanderous allegations in the pleadings.
>
> The judicial process is adversely affected by a maliciously prosecuted cause not only by the clogging of already crowded dockets, but by the unscrupulous use of the courts by individuals "... as instruments with which to maliciously injure their fellow men."
>
> [The party who maliciously prosecutes a civil action uses] the judicial process as a vehicle for harassing or vexing his adversary or as a means of coercing the settlement of a collateral matter. The [wronged party] is compelled to expend attorney's fees in defending against the false charge and may suffer ... mental or emotional distress and possible loss of reputation and standing in the community. n488

Consistent with the above reasoning, at least one court, in allowing an action for malicious prosecution, has held that voluntary dismissal of a will contest constituted a favorable termination of the prior action. n489 Thus, the contestant is prevented from using the contest to coerce a settlement and then escape liability by voluntary dismissal of the suit.

§ 88.08(g) Ante-Mortem and Living Will Statutes.

Ante-Mortem (pre-death) probate is sometimes touted as a possible way to prevent will contests. The types of ante-mortem probate procedures to be followed are discussed in § 88.13(e) of this chapter.

(n51)Footnote 364. *See also* U.P.C. § 3-403, 8 U.L.A. 274-5.

(n52)Footnote 365. 80 Am. Jur. 2d *Wills* §§ 922, 1037.

(n53)Footnote 366. *See Jones v. La Fargue, 758 S.W.2d 320, 324 (Tex. App. 1988).*

(n54)Footnote 367. Annotation, *Fraud as Extending Statutory Limitations Period for Contesting Will or its Probate, 48 A.L.R. 4th 1094 (1986).*

(n55)Footnote 368. *See* Annotation, *Fraud as Extending Statutory Limitations Period for Contesting Will or its Probate, 48 A.L.R. 4th 1094 (1986); see, e.g., Neill v. Yett, 746 S.W.2d 32 (Tex. Civ. App. 1988)* (statute tolling limitations period for contest contemplates extrinsic rather than intrinsic fraud).

(n56)Footnote 369. *See generally* Annotation, *Estoppel to Contest Will or Attack its Validity by Acceptance of Benefits Thereunder, 78 A.L.R. 4th 90 (1990).*

(n57)Footnote 370. Some courts will apply estoppel regardless of the contestant's knowledge of the legal effect of their actions. *See, e.g., Sheffield v. Scott, 662 S.W.2d 674 (Tex. Civ. App. 1983).*

(n58)Footnote 371. *Cf. In re Estate of Himmelfarb, 345 A.2d 477 (D.C. Ct. App. 1975)* (absence of prior adjudication of issues raised in second contest prevented application of res judicata and estoppel did not apply where notice given by contestant prior to any detrimental reliance).

(n59)Footnote 372. 80 Am. Jur. 2d *Wills* § 896.

(n60)Footnote 373. *See generally* Jan Ellen Rein-Francovich, *An Ounce of Prevention: Grounds for Upsetting Wills and Will Substitutes*, 20 Gonz. L.R. 1, 29-32 (1984-85) (Ms. Rein-Francovich provides what one might call a "lucid interval" regarding burden of proof. See her further explanation and cases cited). *See also* McCormick on Evidence §§ 336-339 (4th ed., John Strong ed. 1992).

(n61)Footnote 374. That is, the jury is likely to believe the truth of the evidence presented.

(n62)Footnote 375. U.P.C. § 3-407, 8 U.L.A. 279-80. The pertinent text of the section provides:

... Proponents of a will have the burden of establishing prima facie proof of due execution in all cases, and, if they are also petitioners, prima facie proof of death and venue. Contestants of a will have the burden of establishing lack of testamentary intent or capacity, undue influence, fraud, duress, mistake or revocation. Parties have the ultimate burden of persuasion as to matters with respect to which they have the initial burden of proof. If a will is opposed by the petition for probate of a later will revoking the former, it shall be determined first whether the later will is entitled to

probate, and if a will is opposed by a petition for a declaration of intestacy, it shall be determined first whether the will is entitled to probate.

(n63)Footnote 376. *See* Annotation, *Sufficiency of Evidence to Support Grant of Summary Judgment in Will Probate or Contest Proceedings, 54 A.L.R. 4th 561, 570 (1987).*

(n64)Footnote 377. A dead man's statute is "an evidential disqualification which renders inadmissible oral promises or declarations of a dead person when offered in support of their claims by those who bring claims against the estate of the dead person." Black's Law Dictionary 398 (6th ed. 1990). *See generally* Annotation, *Use of Evidence Excludible under Dead Man's Statute to Defeat or Support Summary Judgment, 67 A.L.R. 3d 970 (1975)* ("Dead man's statutes ... typically prevent an interested party from testifying against a decedent's representative as to transactions with the deceased, except on consent or implied waiver.").

(n65)Footnote 378. *See generally* 1 William H. Page, Page on Wills 99-101 (3d ed. 1941). Some jurisdictions add a publication requirement, meaning the testator must make the witnesses aware that the instrument being witnessed is a will. *See also* § 88.03, *supra,* on will execution.

(n66)Footnote 379. For example, the Statute of Frauds requirement for a signature of the party to be held liable under the contract may be waived by failure to plead non-compliance with the statutory requirement.

(n67)Footnote 380. An absence of language of testamentary intent in the instrument will result in a finding of no will in most cases. *See Hinson v. Hinson, 280 S.W.2d 731, 733 (Tex. 1955).* This is because extrinsic evidence generally cannot be used to supply testamentary intent to such an instrument. *See Huffman v. Huffman, 339 S.W.2d 885, 888 (Tex. 1960).*

(n68)Footnote 381. *See First Nat'l Bank v. Gardner, 376 S.W.2d 311, 314 (Ky. 1964).* The court colorfully stated that axiom of the law that the title or name given to a cause of action or document is not controlling in the following manner:

> A bear well painted and drawn to the life is yet the picture of a bear, although the painter may omit to write over it, 'this is the bear.' By parity of reasoning, the bear does not lose its basic characteristics if the artist dubs it a horse. (quoting former *Chief Justice Bibb, Prewitt v. Clayton, 21 Ky. (5 T.B. Mon.) 4, 5 (1827).*

(n69)Footnote 382. *See* Jan Ellen Rein-Francovich, *An Ounce of Prevention: Grounds for Upsetting Wills and Will Substitutes,* 20 Gonz. L.R. 1, 4 (1984-85), citing *Straw v. Owens, 746 S.W.2d 345, 346 (Tex. App. 1988)* (no writ), citing *Huffman v. Huffman, 339 S.W. 885, 888 (Tex. 1960),* (no amount of extrinsic evidence can supply absent testamentary intent and lack of expressed language evidencing testamentary intent renders instrument invalid as will); *Thomas v. Copenhaver, 365 S.E.2d 760, 762 (Va. 1988)* (extrinsic evidence not allowed to show testamentary intent which must appear on the face of the instrument).

(n70)Footnote 383. Presumably general challenges that language of intent in the instrument was not intended could also arise based on other occurrences. Wills executed in jest or with lack of serious intent also fall into this category. *See Nichols v. Nichols, 161 Eng. Rep. 1113 (1814)* (will executed in moment of levity); *Lister v. Smith, 164 Eng. Rep. 1282, 1284 (1863)* (wills executed in jest or boast, etc. are invalid as lacking testamentary intent). *See generally* § 88.04(e), Conditional Wills/Sham wills, *supra.*

(n71)Footnote 384. *See, e.g., In re Kennedy's Will, 124 N.W. 516, 518 (Mich. 1910); see also Recent Decisions, 16 N.Y.U. L.Q. 298, 323-25 (1939).*

(n72)Footnote 385. *See* Black's Law Dictionary 295 (6th ed. 1990). Non-validity of the will may also be

contingent, that is, the testator may provide that the will is not to take effect on the happening of a specified event. *See* William H. Page, Page on Wills 204-05 (3d ed. 1941).

(n73)Footnote 386. Jan Ellen Rein-Francovich, *An Ounce of Prevention: Grounds for Upsetting Wills and Will Substitutes,* 20 Gonz. L.R. 1, 12-13 (1984-85); 1 William H. Page, Page on Wills 205 (3d ed. 1941).

(n74)Footnote 387. *See In re Poonarian's Will, 137 N.E. 606 (N.Y. 1922)* (will condition related to death on trip not death several years subsequent to returning from trip).

Rev. 1043 (1987);* Epstein, *Testamentary Capacity, Reasonableness and Family Maintenance: A Proposal for Meaningful Reform, 35 Temp. L.Q. 231 (1962). See also Bishop v. Kenny, 466 S.E.2d 581 (Ga. 1996).*

(n90)Footnote 403. *See, e.g.*, U.P.C. § 2-501, 8 U.L.A. 102; Tex. Prob. Code Ann. § 57.

(n91)Footnote 404. *See* Milton D. Green, *Proof of Mental Incompetency and the Unexpressed Major Premise, 53 Yale L.J. 271, 273-74 & 310 (1944)* (discussing court standards for mental capacity).

(n92)Footnote 405. *See generally* Jeffrey A. Schoenblum, *Will Contests -- An Empirical Study, 22 Real Prop. Prob. & Tr. J. 607 (Winter 1987)* (noting number of contests based on lack of testamentary capacity and/or undue influence which is similarly ambiguous as to definition).

(n93)Footnote 406. *See* Jan Ellen Rein-Francovich, *An Ounce of Prevention: Grounds for Upsetting Wills and Will Substitutes*, 20 Gonz. L.R. 1, 23 (1984-85); Milton D. Green, *Proof of Mental Incompetency and the Unexpressed Major Premise, 53 Yale L.J. 271, 275 (1944); In re Estate of Roosa, 753 P.2d 1028 (Wyo. 1988).* Old age, physical weakness (including blindness, deafness, mutism), disease, lack of memory, or mistake as to property owned is not conclusive of testamentary incapacity. *Compare Akers v. Morton, 499 F.2d 44 (9th Cir. 1974), cert. denied, 423 U.S. 831 (1975)* (alcoholism did not prevent proper execution in lucid moment) *and Mangan v. Mangan, 554 S.W.2d 418 (Mo. App. 1977)* (physical incapacity did not prevent valid will execution in lucid moment) *with In re Estate of Erickson, 588 P.2d 125 (Or. 1978)* (physical incapacity, intoxication from narcotics, and lack of lucid interval showed testamentary incapacity in execution of codicil) *and Succession of Wright, 376 So. 2d 589 (La. App. 1979)* (physical incapacity, intoxication from narcotics, and lack of lucid interval showed testamentary incapacity in execution of will). *See generally* Jeffrey M. Alden, Note, *Testamentary Capacity in a Nutshell: A Psychiatric Reevaluation, 18 Stan. L. Rev. 1119 (1966);* Sharon Glisson Bradley, Note, *Testamentary Capacity: Is the Alcoholic Incapacitated, 46 Mont. L. Rev. 437 (1985).*

(n94)Footnote 407. *See* Milton D. Green, *Proof of Mental Incompetency and the Unexpressed Major Premise, 53 Yale L.J. 271, 275-76 (1944)* (in order to amount to testamentary incapacity, mental incompetency must destroy party's understanding of the questioned transaction specifically).

(n95)Footnote 408. *See Chambers v. Chambers, 542 S.W.2d 901, 907 (Tex. Civ. App. 1976)* (Texas does not presume sanity in probate matters).

If incapacity is established both prior to and subsequent to execution, the above presumption disappears and the proponent has the burden of proving a lucid interval. Jan Ellen Rein-Francovich, *An Ounce of Prevention: Grounds for Upsetting Wills and Will Substitutes*, 20 Gonz. L.R. 1, 21 (1984-85); John T. Gaubatz, et al., Estates and Trusts: Cases, Problems and Materials 153 (1989); *cf.* Milton D. Green, *Proof of Mental Incompetency and the Unexpressed Major Premise, 53 Yale L.J. 271, 274 n.17 (1944)* (proof of insanity of a permanent type shifts burden to proponent to show lucid interval).

(n96)Footnote 409. Several authorities have noted that juries are not as liberal at finding testamentary capacity as are the courts. *See* John T. Gaubatz, et al., Estates and Trusts: Cases, Problems and Materials 153 (1989); Jesse Dukeminier & Stanley M. Johanson, Wills, Trusts, and Estates 140-41 (4th ed. 1990); Jeffrey A. Schoenblum, *Will Contests -- An Empirical Study, 22 Real Prop. Prob. & Tr. J. 607, 626-27 (Winter 1987). See generally* Note, *Will*

Contests on Trial, 6 Stan. L. Rev. 91, 92 & n.5 (1953) (jury for contestant in 77% of cases involving undue influence and testamentary capacity).

(n150)Footnote 463. Annotation, *Validity and Enforceability of Provision of Will or Trust Instrument for Forfeiture or Reduction of Share of Contesting Beneficiary, 23 A.L.R. 4th 369, 372 (1983).*

One state, Indiana, has expressly invalidated such clauses by statute. Ind. Code Ann. § 29-1-6-2 (Burns 1989) (providing that all such clauses are void). The annotation at *23 A.L.R. 4th 369* concerning validity and enforceability of

such clauses cites the Indiana case *Doyle v. Paul, 86 N.E.2d 98 (Ind. App. 1949)* (construing a prior codification of the above statute), as one upholding the validity of such clauses. This is a dubious reading of both the clause and the case. Under the will in question, the testator's sons were required to make certain payments in order to obtain a devise of land. The will stated that "dissatisfaction" with the conditions would render the gift void. The testator merely provided for a condition precedent to the sons taking under the will and an alternate disposition should they fail to comply. The forfeiture in this case simply reflects a failure or refusal to comply with the condition. The court held that the clause was not a no-contest clause and, therefore, was not subject to the statutory provision.

A Georgia statutory provision provides that an *in terrorem* clause is void unless an alternate disposition has been made. Ga. Code Ann. § 53-2-107.

Dunklin v. Ramsay, 944 S.W.2d 76 (Ark. 1997) (Arkansas Supreme Court has consistently held *in terrorem* clauses valid).

(n151)Footnote 464. *See, e.g., Estate of Wojtalewicz v. Woitel, 418 N.E.2d 418, 420 (Ill. App. 1981).* It has been asserted at times that some early English cases and some U.S. cases, usually in dictum, made a distinction between personalty and realty in applying such clauses. When personalty was involved and the will made no provision for disposition upon forfeiture, these authorities held the clause to be merely *in terrorem*, that is, precatory only, and, therefore, invalid. The better view is that, at least today, this distinction and application is illegitimate and a few cases have expressly repudiated the doctrine. *See* Annotation, *Validity and Enforceability of Provision of Will or Trust Instrument for Forfeiture or Reduction of Share of Contesting Beneficiary, 23 A.L.R. 4th 369, 372 (1983); Burtman v. Butman [sic], 85 A.2d 892, 894 (N.H. 1952); In re Hite's Estate, 101 P. 443, 447 (Cal. 1909).*

(n152)Footnote 465. *Estate of Wojtalewicz v. Woitel, 418 N.E.2d 418, 420 (Ill. App. 1981); Dulak v. Dulak, 496 S.W.2d 776, 782 (Tex. Civ. App. 1973), aff'd in part, rev'd in part, 513 S.W.2d 205 (Tex. 1974)* (clauses given strict construction to avoid forfeiture); *cf. Poag v. Winston, 241 Cal. Rptr. 330, 337 (1987)* (although California favors such clauses, because they may involve a forfeiture, strict construction is to be applied). *See generally* Annotation, *What Constitutes Contest or Attempt to Defeat Will Within Provision Thereof Forfeiting Share of Contesting Beneficiary, 49 A.L.R. 2d 198 (1956)* (strict construction of no-contest clauses consistent with law's abhorrence of forfeitures).

App.), *cert. denied, 254 So. 2d 462 (1971)* (holding clause violated public policy on specific facts). *See generally* Annotation, *Validity and Enforceability of Provision of Will or Trust Instrument for Forfeiture or Reduction of Share of Contesting Beneficiary, 23 A.L.R. 4th 369, 373 (1983).*

(n163)Footnote 476. *See* Annotation, *Validity and Enforceability of Provision of Will or Trust Instrument for Forfeiture or Reduction of Share of Contesting Beneficiary, 23 A.L.R. 4th 369, 373 (1983).*

(n164)Footnote 477. The Annotation at *23 A.L.R. 4th 369* cites California, Massachusetts, Missouri, and Ohio as rejecting a good faith/probable cause exception. *See, e.g., In re Howard's Estate, 155 P.2d 841, 842 (Cal. App. 1945)* (citing *In re Kitchen's Estate, 220 P. 301, 304 (Cal. 1923)* (action falling squarely within forfeiture clause invokes clause's effect regardless of good or bad faith)). Two other jurisdictions listed in the annotation, Michigan and New Jersey, have subsequently adopted U.P.C. § 3-905 which provides for a probable cause exception, thus statutorily overruling the prior cases. *See* Mich. Stat. Ann. § 27.5168; N.J. Stat. Ann. § 3B:3-47; U.P.C. § 3-905, 8 U.L.A. 383. *See also Estate of Vittorio, 546 N.W.2d 751 (Minn. App. 1996).*

(n165)Footnote 478. *See, e.g., In re Hite's Estate, 101 P. 443, 444-45 (Cal. 1909)* (citing private matters, unavailability of testator, and avoidance of litigation). *See generally* Annotation, *Validity and Enforceability of Provision of Will or Trust Instrument for Forfeiture or Reduction of Share of Contesting Beneficiary, 23 A.L.R. 4th 369, 373 (1983).*

(n166)Footnote 479. *See* Annotation, *Validity and Enforceability of Provision of Will or Trust Instrument for Forfeiture or Reduction of Share of Contesting Beneficiary, 23 A.L.R. 4th 369, 373 (1983).* Prior to adoption of the probable cause exception by statutory enactment of U.P.C. § 3-905, New Jersey recognized good faith or probable cause as applying in forgery and revocation cases only. *See Alper v. Alper, 65 A.2d 737, 740 (N.J. 1949).*

(n167)Footnote 480. *See* Jeffrey A. Schoenblum, *Will Contests -- An Empirical Study, 22 Real Prop. Prob. & Tr. J. 607, 649 (Winter 1987)* (noting the ill-defined concept of undue influence may encourage litigation). One commentator has noted that such clauses themselves may encourage litigation by suggesting the testator was worried about a contest and feared it would succeed. Thomas L. Waterbury, Materials on Trusts & Estates 345 (1986).

(n168)Footnote 481. *See Matter of Estate of Westfahl, 674 P.2d 21, 24-25 (Okla. 1983)* (holding that offer of subsequent will for probate, thereafter denied, did not invoke forfeiture clause in prior will and noting split of authority on good faith exception, but that consensus that probable cause based on forgery or subsequent revocation will not invoke clause -- noting also legal duty to offer will for probate). It is not clear whether Oklahoma limits good cause to forgery or revocation.

(n169)Footnote 482. *See* Annotation, *What Constitutes Contest or Attempt to Defeat Will Within Provision Thereof Forfeiting Share of Contesting Beneficiary, 3 A.L.R. 5th 590, 611 (1992)* (although forfeiture clause to be strictly construed, the paramount consideration in construction of wills is the ascertainment and effectuation of testator's intent).

(n170)Footnote 483. *See generally* Annotation, *Liability for Malicious Prosecution Based on Contest or Caveat to Will, 35 A.L.R. 3d 651 (1971).* The "English Rule" requires arrest of the person or seizure of the person's property or special injury. This rule is followed by some U.S. jurisdictions which disallow actions for malicious prosecution based upon a bad faith will contest. *Id. at 653-54.*

(n171)Footnote 484. *See Steiner v. Eikerling, 226 Cal. Rptr. 694 (1986).*

(n172)Footnote 485. *Id.,* (citing Restatement (Second) of Torts § 674: person who initiates civil proceedings is one who sets the machinery of law into motion whether acting in their own name, that of a third party, or whether the proceedings are to enforce his own or a third party's claim).

(n173)Footnote 486. Malice, in this context, has been defined as the intentional doing of a wrongful act without legal justification or excuse. *First Nat'l Bank v. Gardner, 376 S.W.2d 311, 316 (Ky. 1964).*

(n174)Footnote 487. *See* Annotation, *Liability for Malicious Prosecution Based on Contest or Caveat to Will, 35 A.L.R. 3d 651, 653 (1971); Bertero v. National Gen. Corp., 529 P.2d 608 (Cal. 1974).*

10-88 Thompson on Real Property, Thomas Editions § 88.09

AUTHOR: Professor Victoria Mikesell Mather School of Law St. Mary's University of San Antonio

§ 88.09 Attorney Malpractice in the Wills Context.n490

§ 88.09(a) History and Introduction.

The area of malpractice in the will drafting context has been characterized by two major trends in recent years. First, there has been a judicial movement away from the traditional concept of privity required for a malpractice suit. The Supreme Court adopted the English common law view of privity as early as 1879. n491 In this view, the attorney was not liable to the non-client, since the attorney only owed a duty to the client. This was the traditional view for many years. Beginning in the 1960s, however, there has been a movement away from the strict privity requirement, and many states have permitted the non-client (usually a would-be beneficiary) to sue.

The second significant trend is the general increase in the number of malpractice claims arising in the estate planning context, brought by clients as well as non-clients. n492 The abandonment of the strict privity requirement is a contributing factor to this increase. Also, the advancement of consumer interests in the 1960s and 1970s led to greater awareness of the "rights" of clients with regard to proper services in all areas. n493 Further, as one author points out, the legal profession is more willing to police itself than some other service professions, and is, of course, trained in advocacy and litigation techniques. n494 Third, the nature of the wills and estates practice can make attorneys peculiarly vulnerable to malpractice claims. This point is explored in more detail below.

§ 88.09(b) Privity.

Most authorities stress the change in the rules regarding privity as being critical to the change in malpractice claims in the estate planning area. The revolution began in California, in 1958, in *Biankanja v. Irving*. n495 In *Biankanja*, the defendant was a notary public, not an attorney, who negligently failed to ensure that the testator's will was properly attested. The California courts followed up on this decision in *Lucas v. Hamm*, n496 which did have an attorney-defendant. The courts developed a six-factor balancing test, to find a duty to the plaintiff. The factors used were: (1) the extent to which the transaction was intended to affect the plaintiff; (2) the foreseeability of harm to plaintiff; (3) the degree of certainty that the plaintiff suffered injury; (4) the closeness of the connection between the defendant's conduct and the injury suffered; (5) the moral blame attached to the defendant's conduct; (6) the policy of preventing future harm. n497 Other states have followed the California lead in adopting a balancing test in order to assess whether imposition of liability is appropriate. n498

Another approach, taken by the Illinois court in *Ogle v. Fuiten*, n499 is the third-party beneficiary theory. The court reasoned that the intent of the client testator was to benefit the plaintiff (third party), the interests of the client and the third party are virtually identical under those circumstances, so the attorney does owe a duty to the would-be beneficiary in these cases. Other states have gone along with this view. n500 Most courts that have considered the issue in recent years have held that the privity requirement should not apply to the would-be beneficiary non-client. n501 A few states have adhered to the strict privity view, however. n502

§ 88.09(c) Estate Planning Difficulties.

As indicated above, certain aspects of estate planning and will drafting leave the attorney particularly vulnerable to malpractice challenges.

§ 88.09(c)(1) Clear Errors.

Usually when a will is drafted improperly, or executed without requisite formalities, or fails to account for tax consequences, the fact of error is clear. Unlike some other areas of law, the establishment of a negligent mistake is relatively easy for the plaintiff. Also, since courts are reluctant to "fix" problems in wills, n503 or to ignore faulty executions, n504 the harm to the plaintiff is also easy to prove. As one author points out, a mistake in a will is often both indisputable and irreparable. n505 Thus when a court adopts a balancing of factors approach, as outlined above, or a third-party beneficiary theory, the plaintiff may easily establish the elements of a cause of action.

§ 88.09(c)(2) Inadequate Attention to Detail.

Many attorneys draft wills for their clients as a sideline. They do not charge much for the service, and may not put much time and effort into the process. n506 As a result, there may be a failure to collect appropriate information about the client, such as the family situation, the property owned by the client, and future plans of the client. The will that is ultimately drafted may not represent the true wishes of the client. n507 A related problem is the failure of the attorney to advise the client of changes in the law, or to encourage the client to review the will and the estate plan periodically as the situation of the client and the client's family may change. n508 Secondly, many attorneys are sloppy about supervision of the will execution ceremony. Improper attestation is one of the biggest problems in the wills malpractice area. n509 For example, the witnesses may be will beneficiaries, and their interests under the will "purged" as a result. n510 Or the will may not have enough witnesses. Or, more fundamental errors may occur, such as the situation where spouses each execute the will of the other. n511 This failure to supervise may be the result of the attorney's own negligence, or of improper delegation, either to an office staff member or to the client himself. n512 The attorney may have provided detailed instructions, yet the client may or may not follow the instructions to the letter.

Third, attorneys may be lax in understanding and advising the client about the estate administration process. The attorney may not be competent in this area (see below) or may just fail to keep the client advised of what procedures need to be followed, or fail to do so in a timely manner. n513

§ 88.09(c)(3) Competence Questions.

Another problem for attorneys who do will drafting and estate planning as a sideline is the question of competence. The attorney may have a surface understanding of the law of wills, estates and trusts, but not a good grasp of the tax considerations involved in estate planning, n514 or a thorough grounding in the law of future interests and the rule against perpetuities. n515 The level of understanding in the complexities of estate planning may also affect the ability of

the attorney to give effect to the client's desires.

COMPUTER-ASSISTED RESEARCH

LEXIS: competen! w/5 attorney! w/15 will! or estate!

§ 88.09(d) Reform.

As one author points out, the new revision of the Uniform Probate Code may help to alleviate some of the malpractice pressure. n516 For example, the dispensing power, as embodied in the new code, permits a court to disregard some technical attestation problems. n517 Or, the new code uses the self-proving affidavit, which again helps to avoid attestation difficulties. n518 Other, more aggressive reforms could also help, but are not underway at this time. The wise attorney will be aware of the pitfalls in this area. Many malpractice issues are easily avoided by careful drafting and execution of the will. If the estate is complicated or large, then the attorney should be careful to note the limits of the attorney's expertise, and seek out proper assistance.

CHAPTER 88 TESTAMENTARY TRANSFERS OF REAL PROPERTY

10-88 Thompson on Real Property, Thomas Editions § 88.10

AUTHOR: Professor Victoria Mikesell Mather School of Law St. Mary's University of San Antonio

§ 88.10 Will Revocation.

[Go To Supp]

Wills are ambulatory documents, they do not go into effect until the death of the testator. As a result, wills can be changed and/or revoked during the lifetime of the testator. The ability to revoke a will existed in Roman law, and was recognized under the English common law. n519

§ 88.10(a) Revocation by Physical Act.

The English Statute of Frauds permitted revocation of a will by burning, canceling, tearing, or obliterating. n520 Modern statutes may include other methods, such as cutting, mutilating, or destroying. Most of these terms apply to some activity that affects the will as a whole, but the terms "cancel" and "obliterate" apply to the actual writing in the will. n521 All states permit revocation by physical act, and all Uniform Probate Code (UPC) n522 and non-UPC states have something similar to the original English version. Although most attorneys would not use these methods to revoke a will, physical acts are exactly what laypersons are likely to use in order to show revocation.

Revocation by physical act can be a trap for the unwary testator, since the terms of the statute must be followed exactly. For example, if the statute requires burning, tearing, or canceling, cutting the will with scissors may not suffice. Also, some case law indicates that cancellation of a will by physical act means marking on the actual written words of the will. n523 A notation in the margin that the will is cancelled or revoked may not be sufficient if it does not touch the written part of the will. (It may suffice as a revocation by subsequent instrument, however, as discussed in the next section.) The 1990 version of the Uniform Probate Code changes this result, and does not require that the cancellation notice touch the written portions. n524

If a will is in the custody of a testator and is found in a mutilated condition at testator's death, a rebuttable presumption arises that the testator intended to revoke. n525 However, if evidence shows that the will was mutilated by accident (the testator's dog chewed it up, for example), then the will would not be revoked. n526

At common law, partial revocations by physical act were not permitted, although the modern trend and Uniform Probate Code are contra. n527 If the partial revocations are not permitted, the will is probated as written. n528 This can present

a dilemma for courts when the partial revocations are illegible. For example, obliterations may be complete, or portions may be physically cut out of the will. In this situation there are two possibilities: the legible portions of the will can be probated (meaning that the partial revocations are successful) or the will can be denied probate altogether. n529

The connection between wills and codicils can sometimes create problems in the revocation situation. The common law rule is that a codicil is revoked by physical act only if an act is performed on the codicil itself. For example, if a will is marked "cancelled," but an attached codicil were unmarked, the codicil would stand. The modern view is to consider the degree of integration between the will and the codicil. If there is a high degree of interconnectedness, then the codicil will be deemed to be revoked with the will. However, if the codicil can stand alone, that will be permitted. n530

LEXIS: (burn! or cancel! or tear! or obliterat! or cut! or

mutilat! or destroy!) w/15 (revoke! or revoc!) w/5 will!

or

revoke! or revoc! w/5 will! w/30 physical act!

§ 88.10(b) Revocation by Subsequent Instrument.

§ 88.10(b)(1) Express Revocation.

All states permit express revocation by subsequent instrument. n531 This is the preferred method of revocation, used by attorneys. Standard language in wills drafted by attorneys includes a revocation clause, revoking all prior wills. The Uniform Probate Code and the modern trend also permits written revocation to consist solely of a revocation provision, with no new dispositions. n532 In other words, a testator can write a will, revoke the will, and let the property pass by intestacy.

Generally, a proper revocation by written instrument must be executed with the same formalities as those required for the execution of wills. If the state statute requires witnesses, publication, date, or other formalities for will execution, then the same formalities are used for will revocation. If the state recognized holographic wills, it is easier for a written expression of intent to revoke to operate as a proper revocation. For example, a letter or a marginal notation on the will might operate as the equivalent of a holographic will, and serve as a revocation. n533

COMPUTER-ASSISTED RESEARCH

LEXIS: express! w/2 revoc! or revoke! w/15 subsequent! w/2

instrument! w/30 will!

§ 88.10(b)(2) Implied Revocation -- Inconsistency.

A will may also be revoked by implication or by inconsistency with a subsequent written instrument. Although it is possible that a subsequent will revokes a prior will in its entirety, the general rule (in UPC and non-UPC states) is that the first will is revoked only to the extent that it is inconsistent with a subsequent document. n534 Of course, if the intent of the testator is clear regarding a complete revocation, the revocation will be honored.

Revocation by inconsistent document has interesting results at times. Suppose that testator devises a car to A, $10,000

to B, and $3000 to C in will number one. In will number two, testator devises $5000 to A, and $7000 to C. The two wills are not necessarily inconsistent, and if the estate has sufficient assets, A could receive the car and $5000, B and C could receive $10,000 each. If the wills do conflict, the later will is the valid one. If a court is unable to determine which will is the last one executed and the will provisions are inconsistent, then neither will is admitted to probate.

The 1990 version of the Uniform Probate Code makes a significant change in this area. The revised Code creates two presumptions, both rebuttable by clear and convincing evidence. If a new will completely disposes of testator's property, then it is presumed that the will completely revokes all previous wills. If the new will does not completely dispose of testator's property, then it is presumed that the prior wills stand as a supplement to the new will. n535 The presumptions are probably a more accurate assessment of what the average testator intends when writing a new will than the previous inconsistency test.

§ 88.10(c) Revocation by Change of Circumstance.

The only events that may alter a will by operation of law are: the testator's divorce or annulment of a marriage, marriage of testator after execution of a will, birth of a child after execution of a will, or murder of the testator by a will beneficiary. The first circumstance is discussed in this section, the other are discussed are other points in this chapter. n536 The divorce rate has been steadily increasing since the late 1960s. The percentage of marriages ending in divorce was over 50% in the late 1970s and early 1980s. The rate appears to have leveled off or even decreased since that time, but the fact of marriage as a possibly temporary state is a fact for the modern testator. Also, most people who get divorced remarry, so the primary beneficiary of the testator's largess may change over time. n537

The majority of states and the Uniform Probate Code provide that a divorce or annulment revokes a will provisions in favor of an ex-spouse. n538 The statutes usually require that the divorce or annulment be completed at the time of the testator's death. Legal separation of the parties (divorce from bed and board, or divorce a mensa et thoro) is usually sufficient to work a revocation of gifts to a spouse. If the process is incomplete, the will stands as written. n539 In more than half of the states, the remarriage of the parties reinstates the will. If the divorce or annulment effects a partial revocation, usually the ex-spouse is treated as if he or she predeceased the testator. n540 Gifts to former in-laws or stepchildren are typically unaffected by a divorce or annulment, n541 but the Uniform Probate Code changes this result. n542

Proper drafting can avoid unintentional devises in the event of a divorce. Also, attorneys can encourage clients to review their wills periodically. The attorney needs to be careful to avoid the appearance of soliciting business, yet also has the obligation to advise clients in a timely and proper manner. n543

§ 88.10(d) Revocation by a Third Party or Proxy.

Revocation by a third party is permitted under the Uniform Probate Code (pre- and post-1990 versions), as well as most court decisions. The revocation must be performed in the testator's presence and at testator's direction. As a practical matter, these revocations are by physical act. The requirement that the revocation be performed at the testator's direction is easy to meet, but the presence requirement is more frequently in issue. Some courts have held that a revocation performed in another room of the testator's home would be invalid because it was not in testator's presence. n544 The

1990 Uniform Probate Code adopts a more lenient "conscious presence" test. A revocation under this standard (by a third party) does not have to be done in the line of vision of the testator, or in the same room with the testator present. n545 If the third party does not actually revoke the will as directed, or merely pretends to revoke the will, the revocation is improper and does not stand. n546 The will must be admitted to probate. However, if the third party defrauded the testator and receives a benefit under the will, courts may impose a constructive trust. The constructive trust serves as a remedy and will prevent the wrongdoer from gaining profit as a result of the fraud. n547

LEXIS: will! w/30 revoke! or revoc! w/15 proxy or third part!

§ 88.10(e) Lost Wills.

At common law, if it was known that the decedent had executed a will, the decedent had possession of the will, and the will was not found at the death of the decedent, it was presumed that the will had been revoked by the testator. n548 This is still the rule in modern law.

Testators sometimes execute duplicate original wills. The testator may retain possession of all copies; or an attorney or other third party may retain one copy, and the testator have another. Only one of the duplicate originals may be found at the testator's death, and the question arises: Should the law imply that the testator has revoked the will? If the testator retained only one of the duplicate originals, but one is not found in testator's possession at death, the decisions are split about whether a revocation should be implied. For example, if T executes two duplicate wills, and T retains one, but T's attorney has the other, then the failure to find a will in T's possession at T's death is somewhat ambiguous. n549 If both (or more) duplicate originals are in testator's possession, the majority view is that the will should be treated as revoked if all copies are not found. The execution of duplicate wills is not a recommended practice, at least partially because of the problem of proper and unambiguous revocation. n550

Most statutory law focuses on the opposite problem, the admission of a copy or of the contents of a "lost" will to probate. The Uniform Probate Code permits admission to probate if the contents and the execution of the lost will can be established by clear and convincing evidence. n551 Lost wills are subject to formal probate procedures and supervision. Some states also require the testimony of two witnesses to establish the contents of the will and possibly the execution of the will. Normally, a copy of the will can substitute for one witness. n552 The two-witness rule prevented the probate of a purported Howard Hughes will. n553 Still other states have a very strict standard for admission of a lost will to probate: the will must be in existence at the testator's death (an almost impossible requirement for a "lost" will, if taken literally), or the will must have been destroyed as the result of fraudulent conduct or representations. n554 The second requirement is not usually a problem; if a will is destroyed by fraud, it is not revoked, and can be admitted to probate. Most courts construe the first requirement of the will's existence at the time of death to mean a legal existence. A will exists in the legal sense if it is not revoked.

§ 88.10(f) Dependent Relative Revocation.

§ 88.10(f)(1) Introduction.

Mary executes a will, but later decides to revoke the instrument and execute a new one. She does so, but the second will lacks proper attestation and thus is ineffective.

Desiring to be more generous in a particular bequest in her will, Alice draws a line through the original amount in her will and writes in a larger figure.

Betty hears an erroneous report that one of the beneficiaries of her will has been killed; she therefore crosses out the beneficiary's name and pencils in the name of a substitute beneficiary.

Intestacy, or partial intestacy, could result from the facts in all the above hypotheticals. Courts, however, employing the doctrine of dependent relative revocation, may choose to avoid such a result and probate the original will in each case. n555 The courts are attempting to correct the testator's "mistake," in accord with the testator's probable intent. Other courts use a fictional "conditional" revocation analysis; the testator only meant to revoke the will if the testator's assumptions were correct. While this is laudable, it has been said that the doctrine of dependent relative revocation is a fall-back position, or the "doctrine of second best." n556

§ 88.10(f)(2) History and Definition.

The doctrine of dependent relative revocation was originally based on a theory of giving the testator relief from the testator's "mistake." n557 However, some modern courts use a "conditional revocation" analysis; the revocation of the earlier document is conditional on the validity of the later testamentary instrument. n558 The "mistake" theory probably more accurately reflects the reality of the typical dependent relative revocation situation. n559

The term dependent relative revocation, "while not entirely devoid of inherent sense," n560 nonetheless has caused considerable confusion in its meaning, scope and application. Definitions of the term run from concise (a) to near nonsensical (b):

> (a) Under the doctrine of dependent relative revocation, a revocation does not take effect where a testator revokes a will with a present intention to make a new disposition as a substitute and the new disposition is not made or is ineffective. n561
>
> (b) The doctrine which regards as mutually dependent the acts of one destroying a will and thereupon substituting another instrument for distribution of the estate, when both acts are the result of one plan, so that, if the second act, through incompleteness or other defect, fails to accomplish its intended purpose, and it thereby becomes evident that the testator was misled when he destroyed his will, the act of destruction is regarded as bereft of intent of revocation and the way for probate of the destroyed will is opened. n562

"The revoking act is the dependent act, and the proposed new disposition is the relative act," n563 and the attempt to revoke in whole or in part "will be treated as relative and dependent upon the efficacy of the new disposition intended to be substituted." n564 In other words, when circumstances indicate that the testator would not have revoked a will if the testator had known certain pertinent information (e.g., a new will is ineffective), then the court will ignore the revocation and treat the revoked will as a valid testamentary document. It is critical that the court have evidence of testator's purported intent. Also, courts will typically only apply the doctrine if there is an alternative scheme of disposition (different from the revoked will) that fails for some reason.

§ 88.10(f)(3) Intent.

The doctrine of dependent relative revocation is grounded on the assumption that, had the testator known the new disposition would be ineffective, the testator would have foregone the new will in favor of the disposition provided in the original will. n565 The doctrine presumes that the testator would prefer the old will to intestacy, and on the strength of this presumption the old will is admitted to probate. n566 Moreover, revocation by destruction of the will by the testator is effective only if the act is performed with "the intent and for the purpose of revoking" the instrument. n567 Under standard revocation rules, the intention to revoke must be unconditional; revocation subject to an unfulfilled

condition is not effective. n568 A doctrine, sometimes referred to as "provisional" or "conditional" revocation, n569 has been applied to avoid intestacy "where a will has once been duly executed and the acts of a testator in relation to its revocation seem conditional or equivocal." n570

"The doctrine is functionally a rule of interpretation of intention," n571 and analysis sometimes begins with the rebuttable presumption n572 that if a testator has duly executed a will the testator does not intend to die intestate. n573 This is in substance an extension of the basic rule of wills that the intention of the testator governs. n574 The vital question is whether the testator intended the revocation to be absolute or conditional upon the efficacy of a new will. n575 A revocation independent of any condition must be construed as absolute; n576 "being merely a rule of presumed intention, the doctrine ... cannot be carried so far as to defeat the real intention of the testator." n577 Ordinarily, the doctrine is applied when the testator's known dispositive intent cannot be honored. If the revocation goes to the entire will, the court is presented with the dilemma of giving effect to the dispositions in that will or letting the law of intestacy determine the division of the decendent's property. Neither course will carry out precisely the testator's intent, but one will come closer than the other. Dependent relative revocation should be applied and the will ruled unrevoked when the plan of testamentary disposition is close to the later will; if intestacy is closer (to the later plan), the court should refuse to apply the doctrine. n578

COMPUTER-ASSISTED RESEARCH

LEXIS: dependent relative revocation w/30 intent!

§ 88.10(f)(4) Application.

Unsuccessful attempts to revoke a will may be by subsequent instrument such as a later will with an express revocation clause, or by physical acts to the document, such as interlineations n579 or mutilation of all or part of the document. n580 Courts will apply the doctrine of dependent relative revocation to attempts to revoke all or part of a will. n581 Although some courts refuse to apply the doctrine when a will is expressly revoked by a subsequent instrument, the modern trend is to allow the doctrine to be used. n582 The reasoning in cases that refuse to apply the doctrine where there is express written revocation is that such revocation is inherently *unambiguous*. On the other hand, physical destruction, interlineation, or mutilation of a document is inherently *ambiguous*. As a result, the courts reason that it is easier to prove that a testator's revocation was "conditional" in the latter examples. On the other hand, most courts no longer are concerned about the distinction.

Courts also frequently give relief in situations involving a mistake in an underlying assumption. In cases of a mistake, courts most often will admit parol evidence, "but not for mistakes in the execution of a will unless the will itself shows the mistaken belief. Protection against unreliable evidence is preserved ... by requiring that the proof of a mistake be clear and convincing. The extrinsic evidence usually consists of a duly executed will and the scrivener's testimony of what happened, or even the oral declarations of the testator." n583

§ 88.10(g) Revival.

§ 88.10(g)(1) Introduction.

At common law, if a testator executed two wills and later revoked the second will, the first will was thereby revived. n584 The English common law notion of a "will" would recognize the testamentary document in effect at the time of the testator's death. A subsequent will simply "covered" an earlier one. If the covering will was removed, the earlier one was reinstated. Revival is theoretically similar in some respects to the doctrine of dependent relative revocation, n585 and in fact the doctrines sometimes are confused. n586

Accurately ascertaining the true intention of the testator has long occupied and confounded the courts and probably

obscured the real intentions of the testator in the process. The actions of testators are often bewildering to those left behind, but perhaps no situation has produced the variety of interpretations, now entombed as legal doctrines, as the case of a testator who makes a will, then makes another will that expressly or impliedly revokes the first, and then destroys this second will. If the testator intended to die intestate, it is puzzling that he or she left the first will. On the other hand, the testator may have intended the first will to control the devolution of his or her property. If this is the situation, it is equally puzzling that the first will has been revoked. This latter incongruity may be explained, however, by assuming that the act of revoking the second instrument was intended to 'revive' the first instrument. n587

§ 88.10(g)(2) History of Revival.

Development of the doctrine of revival in England, and later the United States was marked by confusion, probably as a result of the division of jurisdiction between the common law courts, which controlled devises of real property, and the ecclesiastical courts, which administered succession to personalty. Because the Statute of Frauds did not address the question of revival, the common law and ecclesiastical courts were left on their own to resolve the issue. n588

At common law, as stated above, revocation or destruction of a subsequent will automatically revived the first will. This was considered logical, on the theory that a will is ambulatory until the testator's death: "A will has no operation until the death of the testator," and thus the "second will never operated," leaving in force the first will. n589 A revoked will, this reasoning continued, could itself have no power to revoke. n590

Conversely, the ecclesiastical courts treated the subsequent will as immediately revoking the first will as of the date of the execution of the subsequent will; should the testator later destroy the subsequent will, the ecclesiastical courts would hear evidence concerning testator's intent in determining whether to revive the initial will. n591

The Wills Act of 1837, brought a halt to these conflicting directions of the law by answering the revival question in the context of formulating a unified treatment of the law of wills and testaments. n592 Under the Wills Act, oral declarations of the testator are inadmissible to determine intent to revive. English courts applying the statute hold that execution of a subsequent will immediately revokes the effectiveness of the first will. n593

§ 88.10(g)(3) Common Law Views in U.S. Jurisdictions.

About ten states do not have statutes on the subject of revival. n594 In these jurisdictions, some states seem to follow the ecclesiastical courts' view that a subsequent will revokes the prior will, and that the prior will is revived only upon evidence of the testator's intent. n595 Some cases hold that a presumption in favor of revival arises from the acts of the testator who destroys a subsequent will while retaining the prior will. n596 The presumption, however, is not conclusive and may be rebutted by evidence that the testator intended otherwise. Determining the intention of the testator is a question of fact, and parol evidence is admissible in making such determination. n597

Other American cases have followed the common law rule handed down in the early English decisions: revocation of the later will automatically revives the first will. n598 Courts sometimes split on whether this view is followed when the subsequent will revokes the first by implication only, n599 or even where the subsequent will expressly revokes the former. n600

Other authorities take the opposite view: revocation of the subsequent will does not revive the former will. On the rationale that a revocatory clause operates immediately, courts have held that an express revocation clause in a subsequent will irreversibly ends the effectiveness of the prior will so that it cannot be revived despite the later destruction or cancellation of the subsequent will. This view is advanced despite the fact that the subsequent will does not "speak" until the death of the testator. Courts following this view require that, in order for the initial will to again take effect after revocation of the subsequent will, there must be a republication, reexamination, or a duly executed codicil expressing the intention that the initial will again be given effect. n601

COMPUTER-ASSISTED RESEARCH

LEXIS: reviv! w/5 will! w/30 automatic! or presum! or intent!

§ 88.10(g)(4) Statutory Rules in U.S. Jurisdictions.

As stated previously, the common law rule that revocation of a subsequent will revives the first will was abrogated by the Wills Act of 1837, which provided that no revoked will could be revived other than by reexecution of the revoked will or by a duly executed codicil showing an intention to revive. n602 No doubt motivated by confusion and conflict concerning the doctrine of revival in the courts, the majority of American states have attempted to settle the question by statute.

The pre- and post-Uniform Probate Code adopts a limited revival doctrine, providing that the initial will can be given effect after revocation of a subsequent will if the testator's intent to do so can be established. There is a presumption against revival, but it can be overcome with evidence of the testator's intent. The testator's statements to that effect, at the time of revocation of the subsequent will or later, can be admitted in evidence to prove such intent. n603 The Uniform Probate Code provision dealing with revival of a revoked will is as follows:

(a) If a subsequent will that wholly revoked a previous will is thereafter revoked by a revocatory act under Section 2-507(a)(2), the previous will remains revoked unless it is revived. The previous will is revived if it is evident from the circumstances of the revocation of the subsequent will, or from the testator's contemporary or subsequent declarations, that the testator intended the previous will to take effect as executed.

(b) If a subsequent will that partly revoked a previous will is thereafter revoked by a revocatory act under Section 2-507(a)(2), a revoked part of the previous will is revived unless it is evident from the circumstances of the revocation of the subsequent will, or from the testator's contemporary or subsequent declarations, that the testator did not intend the revoked part to take effect as executed.

(c) If a subsequent will that revoked a previous will in whole or in part is thereafter revoked by another, later, will, the previous will remains revoked in whole or in part, unless it or its revoked part is revived. The previous will or its revoked part is revived to the extent it appears from the terms of the later will that the testator intended the previous will to take effect. n604

The 1990 version of the Uniform Probate Code § 2-509 made two changes to the 1969 version. n605 The first change is reflected in the comments. The comments criticize the technique used by the Minnesota Supreme Court in *Estate of Boysen*. n606 In *Boysen*, the court was asked to look at all of the circumstances of the revocation to determine if the decedent intended to revive a prior will when he revoked a subsequent instrument. The Minnesota court came up with a neat three-part test in order to determine intent. n607 The comments to the 1990 Uniform Probate Code § 2-509 specifically state that "the open-ended statutory language [of the statute] is not to be undermined by translating it into discrete subsidiary elements, all of which must be met, as the court did in *Estate of Boysen*." n608 The second change in the 1990 Uniform Probate Code revival provision deals with partial revocations. The 1990 provision maintains the rebuttable presumption against revival for wholly revoked wills. However, § 2-509(b) does change the prior rule for partially revoked wills. It creates a rebuttable presumption in favor of revival for previously revoked sections of a will. For example, testator leaves $5000 to Alice, and all other property to Bob. Later testator executed a codicil revoking the

gift to Alice. Still later, testator revokes the codicil. In this context, it does make sense to assume that the testator intended for the original provision to be reinstated. n609 There is criticism of the Uniform Probate Code's admission of parol evidence to prove the intention of the testator. "Arguably, admitting parol evidence to ascertain the testator's intent 'is contrary to the whole spirit and policy of the statute of wills.'" n610 The Code's drafters, however, were cognizant of the dangers accompanying extrinsic evidence to prove intent to revive, but they believed the rule justified for the following reasons:

> 1) Such evidence is admissible in any case involving revocation by act in order to prove that the act itself is intended as a revocation;
>
> 2) in many states the same evidence could be used to establish dependent relative revocation and thus allow probate of the second will as unrevoked; and
>
> 3) there is general understanding among non-lawyers that an earlier will, still intact, is good if the revoking instrument is destroyed. n611

Further, the testator dies intestate if there is no evidence of intent, because the Code presumes against an intent to revive. n612 Several states have patterned their revival statutes either exactly or closely after the Uniform Probate Code. n613 Alabama's revival statute is like the Uniform Probate Code, but the testator declarations must be written. n614

Several other states follow the view that reexecution is a prerequisite to revival (most of these states provide an alternative to reexecution -- see footnote). n615 Other states determine the question of revival by intent (which must be expressed in writing) as embodied in the terms of the subsequent wills or revocation, or by republication of the original will. n616 New Mexico provides that there is no revival "unless the validity of the prior will is acknowledged in writing." n617 The New York statute allows revival in three instances: (1) a codicil that incorporates by reference the prior will, (2) an executed and attested writing declaring the revival of the prior will, (3) or a republication requiring re-execution and re-attestation of the prior will. n618 Two other states, South Carolina and Wisconsin, determine the issue of revival purely on the basis of the testator's intent. South Carolina requires "clear, cogent, and convincing evidence;" Wisconsin requires "clear and convincing evidence." n619 Georgia and Maryland provide for revival only by republication. In Georgia, the republication may be proved by parol evidence; in Maryland, the prior will must still be in existence. n620 In Florida, there is no revival, even where the original will is in existence; n621 in Washington, also, there is no revival. n622

Other cases include: *In re Estate of Francoeur, 290 N.E.2d 396 (Ill. App. 1972); In re Estate of Johnson, 154 Cal. Rptr. 586 (1979); Lane v. Sherrill, 614 S.W.2d 619 (Tex. Civ. App. 1981); In re Estate of LaGreca, 297 N.J. Super. 67 (N.J. Super. Ct. App. Div. 1997)* (the court concluded that the execution of the codicil revoked the inconsistent will provisions, and those provisions were not revived by the destruction of the codicil because the decedent did not observe the formalities required by New Jersey statute).

(n17)Footnote 535. U.P.C. § 2-507(b), (c), (d) and cmts., 8 U.L.A. 118. The subsections provide:

(b) If a subsequent will does not expressly revoke a previous will, the execution of the subsequent will wholly revokes the previous will by inconsistency if the testator intended the subsequent will to replace rather than supplement the previous will.

(c) The testator is presumed to have intended a subsequent will to replace rather than supplement a previous will if the subsequent will makes a complete disposition of the testator's estate. If this presumption arises and is not rebutted by clear and convincing evidence, the previous will is revoked; only the subsequent will is operative on the testator's death.

(d) The testator is presumed to have intended a subsequent will to supplement rather than replace a previous will if the subsequent will does not make a complete disposition of the testator's estate. If this presumption arises and is not rebutted by clear and convincing evidence, the subsequent will revokes the previous will only to the extent the subsequent will is inconsistent with the previous will; each will is fully operative on the testator's death to the extent they are not inconsistent.

(n18)Footnote 536. *See* § 88.12, Limits on Dispositions Under a Will, infra (sections on spouse, omitted children and slayer statutes).

(n19)Footnote 537. The section on protection of a spouse, § 88.12(b), infra, discusses the divorce revolution and remarriage phenomenon.

(n20)Footnote 538. *See, e.g.*, U.P.C. § 2-508, 8 U.L.A. 122; U.P.C. §§ 2-508, 2-804, 8 U.L.A. 120, 164-165. The new U.P.C. attempts to cover both probate and non-probate assets. The section also revokes gifts to relatives of former spouses (who are not related to testator) in subsection (d).

(n21)Footnote 539. *See, e.g., Matter of Estate of Maruccia's, 429 N.E.2d 751 (N.Y. 1981).* But see § 2-204(d) of the U.P.C., 8 U.L.A. 100 (providing that a property settlement agreement prior to divorce or pursuant to separation presumably waives all rights to ex-spouse's estate). The comments to 24, § 2-204 point out that this should help avoid problems that arise when one of the parties dies while a divorce is pending.

(n22)Footnote 540. *See* U.P.C. § 2-804(d), 8 U.L.A. 165. Effect is to assume former spouse died immediately prior to divorce or annulment.

CHAPTER 88 TESTAMENTARY TRANSFERS OF REAL PROPERTY

10-88 Thompson on Real Property, Thomas Editions § 88.11

AUTHOR: Professor Victoria Mikesell Mather School of Law St. Mary's University of San Antonio

§ 88.11 Changes After Will Execution.

[Go To Supp]

§ 88.11(a) Changes in Persons.

§ 88.11(a)(1) Lapse. n623

One of the most common will-drafting oversights is the failure to anticipate the death of will beneficiaries prior to the death of the testator. At common law, a gift to a deceased beneficiary fails, or it lapses. n624 The doctrine of lapse applies automatically in the absence of statute or contrary intent expressed by the testator. The rule of law is that the will does not take effect until the death of the testator, and that the will can only pass property to living persons.

§ 88.11(a)(1)(i) Void Gifts.

Lapsed gifts should be distinguished from void gifts. A testamentary gift is void, rather than lapsed, when the beneficiary is dead at the time the will is executed. Void gifts also fail, at common law. It should also be noted that gifts may lapse or become void for reasons other than the death of the beneficiary, such as a disclaimer, a bequest to an animal, a bequest in violation of public policy, or a beneficiary who is a witness to the will. n625

§ 88.11(a)(1)(ii) Lapse into the Residue.

In general, the common law provides that a specific or general gift will lapse into the residue. n626 A lapse in the residue will pass by intestacy to the testator's heirs. A testator may leave the residue of the estate to more than one beneficiary. The death of one or more of the residue holders can result in a partial lapse. The traditional rule would provide that the lapsed portion of the residue would pass as an intestate share. The modern trend, by case law or statute, is to pass the lapsed gift to the other residue holders. n627 For example, if Testator leaves the residue of his estate to A and B, but A predeceases Testator, the common law would dictate that one-half of the residuary estate should pass to Testator's intestate heirs. The modern trend would give the entire residue to B.

LEXIS: lapse! w/2 residue w/015 gift! w/30 testator! or testament!

§ 88.11(a)(1)(iii) When Lapse Not Applied -- Common Law.

The doctrine of lapse was designed to give effect to the presumed intent of the testator, but modern statutes will frequently change the common law result. n628 Even at common law, however, lapse would not apply if the testator indicated a contrary intent. There are several cases holding that a gift embellished with language beyond that of an outright gift may give inheritance rights to the heirs, issue, or estate of the will beneficiary. n629 For example, a gift to "X and his heirs" is an outright gift and will be subject to the lapse statute. A gift to "Y and her heirs, forever, absolutely, in fee simple" might be construed as making a gift to Y that might reach beyond Y's death. There is a split of authority on this issue, however.

The doctrine of lapse also did not apply to real property, but only to personal property, under very early common law. Lapsed gifts of real property would pass to the beneficiary's heirs, rather than to the residue or to the testator's heirs. A few states preserve this distinction in their statutes. n630

§ 88.11(a)(2) Antilapse Statutes.

Virtually all states have some form of antilapse statute. In a way, "antilapse" is a misnomer, since the gift will still lapse if the beneficiary predeceases the testator. The statute provides a *substitute* gift, which is believed to be more in line with the testator's probable intent. n631 A typical antilapse statute is embodied in pre-1990 Uniform Probate Code § 2-605: n632

If a devisee who is a grandparent or a lineal descendant of a grandparent of the testator is dead at the time of execution of the will, fails to survive the testator, or is treated as if he predeceased the testator, the issue of the deceased devisee who survive the testator by 120 hours take in place of the deceased devisee and if they are all of the same degree of kinship to the devisee they take equally, but if of unequal degree than those of more remote degree take by representation. One who would have been a devisee under a class gift if he had survived the testator is treated as a devisee for purposes of this section whether his death occurred before or after the execution of the will.

Key provisions of this statute include a survivorship requirement (120 hours), limited application regarding beneficiaries, and a substitute gift to beneficiary's issue or rather than to the beneficiary's estate.

Many statutes include a survivorship requirement, such as the one in the Uniform Probate Code requiring the devisee to survive the testator by 120 hours. The common law merely required that the beneficiary survive, for an instant, in order to take under the will. n633 Almost all statutes limit the applicability of the antilapse statutes to close blood relatives of the decedent. The Uniform Probate Code draws the line at the testator's grandparent or lineal decedents thereof. This classification would include testator's siblings, parents, aunts and uncles, cousins, as well as children. Some statutes are broader (any devisee) and others narrower (lineal descendants only). n634 If a beneficiary is not covered under the antilapse statute and yet predeceases the testator, then the gift will lapse under the common law doctrine.

The impact of the antilapse statute is to provide a substitute gift, usually to the issue of the beneficiary, although some states will pass the property to the beneficiary's heirs. n635

Antilapse statutes, like lapse itself, can be defeated by the clearly expressed intent of the testator. Traditionally, simple survivorship language would suffice. For example, a gift of "my house to A, if he survives me," would normally be held

to defeat the application of the antilapse statute. n636

LEXIS: antilapse w/2 statute! w/30 testator!

§ 88.11(a)(2)(i) Application of Antilapse Statutes to Class Gifts.

A gift to members of a class is a gift to a group of persons. For example, devises to my "children," "cousins," "brothers and sisters," or "nieces and nephews" are all class gifts. The nature of a class gift is that it is a group gift, and the individual shares awarded to the members of the class may vary over time. Class members may be added and the class size increased (usually by the birth of new members) and class members may drop out and class size decreased (usually by the death of existing members). n637 In the modern trend, courts apply the antilapse statutes to class gifts, even if the statute itself is silent on the issue. The Uniform Probate Code makes the statute expressly applicable to class gifts. (The 1990 version also extends application to void class gifts -- gifts made without any members of the class in existence when the will was executed and at the death of the testator.) n638 The practical effect of application can be illustrated by an example. Testator leaves property to "my children." At the time of the execution of the will, T has two children, A and B. Later C, another child, is born. Child A predeceases T, leaving issue. If the antilapse statute does not apply, the share of A (deceased) would go to the other members of the class, B and C. If the statute is applied, then the share of A (deceased) would go to A's issue. This is again presumed to be the likely intent of the testator, particularly in the event of multi-generational gifts (i.e. a gift to grandchildren) at least in the absence of contrary instructions. n639

A court will occasionally need to address the issue of whether the gift is a true class gift, or a gift to named individual members of a class. One test is whether the testator is "group-minded." For example, a gift to "Abby and Bob, my children," would not normally be considered a class gift, since Abby and Bob are named persons.

LEXIS: class w/2 gift! w/30 antilapse w/2 statute!

§ 88.11(a)(2)(ii) 1990 Uniform Probate Code Antilapse Provisions.

The revised Uniform Probate Code section on antilapse incorporates some significant changes from prior law. Some important sections are included here:

Section 2-601. Antilapse; Deceased Devisee; Class Gifts

(a) [Definitions.] In this section:

(1) "Alternative devise" means a devise that is expressly created by the will and, under the terms of the will, can take effect instead of another devise on the happening of one or more events, including survival of the testator or failure to survive the testator, whether an event is expressed in condition-precedent, condition-subsequent, or any other form. A residuary clause constitutes an alternative devise with respect to a non-residuary devise only if the will specifically provides that, upon lapse or failure, the non-residuary devise, or non-residuary devises in general, pass under the residuary clause.

(2) "Class member" includes an individual who fails to survive the testator but who would have taken under a devise

in the form of a class gift had he [or she] survived the testator.

(3) "Devise" includes an alternative devise, a devise in the form of a class gift, and an exercise of a power of appointment.

(4) "Devisee" includes (i) a class member if the devise is in the form of a class gift, (ii) an individual or class member who was deceased at the time the testator executed his [or her] will as well as an individual or class member who was then living but who failed to survive the testator, and (iii) an appointee under a power of appointment exercised by the testator's will.

(5) "Stepchild" means a child of the surviving, deceased, or former spouse of the testator or of the donor of a power of appointment, and not of the testator or donor.

(6) "Surviving devisee" or "surviving descendant" means a devisee or a descendant who neither predeceased the testator nor is deemed to have predeceased the testator under § 2-702.

(7) "Testator" includes the donee of a power of appointment if the power is exercised in the testator's will.

(b) [Substitute Gift.] If a devisee fails to survive the testator and is a grandparent, a descendant of a grandparent, or a stepchild of either the testator or the donor of a power of appointment exercised by the testator's will, the following apply:

(1) Except as provided in paragraph (4), if the devise is not in the form of a class gift and the deceased devisee leaves surviving descendants, a substitute gift is created in the devisee's surviving descendants. They take by representation the property to which the devisee would have been entitled had the devisee survived the testator.

(2) Except as provided in paragraph (4), if the devise is in the form of a class gift, other than a devise to "issue," "descendants," "heirs of the body," "heirs," "next of kin," "relative," or "family," or a class described by language of similar import, a substitute gift is created in the deceased devisee or devisee's surviving descendants. The property to which the devisees would have been entitled had all of them survived the testator passes to the surviving devisees and the surviving descendants of the deceased devisees. Each surviving devisee takes the share to which he [or she] would have been entitled had the deceased devisees survived the testator. Each deceased devisee's surviving descendants who are substituted for the deceased devisee take by representation the share to which the deceased devisee would have been entitled had the deceased devisee survived the testator. For the purposes of this paragraph, "deceased devisee" means a class member who failed to survive the testator and left one or more surviving descendants.

(3) For the purposes of § 2-601, words of survivorship, such as in a devise to an individual "if he survives me," or in a devise to "my surviving children," are not, in the absence of additional evidence, a sufficient indication of an intent contrary to the application of this section.

(4) If the will creates an alternative devise with respect to a devise for which a substitute gift is created by paragraph (1) or (2), the substitute gift is superseded by the alternative devise only if an expressly designated devisee of the alternative devise is entitled to take under the will.

(5) Unless the language creating a power of appointment expressly excluded the substitution of the descendants of an appointee for the appointee, a surviving descendant of a deceased appointee of a power of appointment can be substituted for the appointee under this section, whether or not the descendant is an object of the power.

The section preserves the 120-hour survivorship requirement, the limitation of antilapse protection to grandparents and their lineal descendants, as well as the application of the statute to class gifts. The section extends protection to the testator's own stepchildren, but not to the descendants of the stepchildren.

The new section covers void, as well as lapsed gifts. The new version extends the coverage of the statute to the exercise of powers of appointment, as well as bequests and devises. For example, suppose the testator exercises a testamentary power of appointment in favor of a child, Chad. Chad predeceases the testator, leaving issue. The 1990 Uniform Probate antilapse section would allow Chad's children to take their father's share under the exercise of the power. The antilapse provision of the 1990 Uniform Probate Code is limited to wills, but other sections extend antilapse coverage to non-probate instruments, such as insurance policies, pension plans, pay-on-death (POD) accounts, or future interests created under the terms of a trust.

In a controversial move, the 1990 UPC provides that mere survivorship language does not defeat the application of the antilapse provision. For example, if testator leaves property to "X, provided that he survives me," and X does not survive testator, the antilapse statute would still apply (if X were in the protected relative category of grandparent or lineal descendant) The comments to the revised section discuss this issue in detail. The drafters believe that the simple requirement of survivorship does not reveal anything about testator intent with regard to lapse. The provision is easily avoided with proper drafting. For example, the testator could leave property to "X, and not to X's descendants," or to provide that the residue include all lapsed failed devises. Another way to avoid the antilapse statute is to provide an alternative gift beneficiary in the will. For example, the testator could leave property to "A, if A survives me, and if A does not survive me, to B." If A predeceases the testator, the antilapse statute would not apply (even if A is in a protected class of relatives) and the property would go to B. As the comments note, if both A and B predeceased testator, then the antilapse statute would apply.

§ 88.11(a)(3) Simultaneous Death.

As illustrated by the doctrine of lapse, discussed in the previous sections, a person can only inherit from or take under the will of another if the person survives the decedent. Sometimes relatives die in common disasters or accidents, such as a plane crash or automobile accident.

At common law, if two persons died in a common disaster, the law did not provide a presumption as to survivorship. n640 The surviving relatives or other heirs and devisees were forced to provide proof of the order of death. In the

absence of such proof, the presumption was that each person's property would pass as if the other person never existed.

§ 88.11(a)(3)(i) 1940 Uniform Simultaneous Death Act.

In 1940, the Uniform Simultaneous Death Act was first promulgated, and was later amended in 1953. n641 The Act was adopted in every state and the District of Columbia. The Act changed the common law rule. It provides that if there is no evidence of the order of death, then each person's property is distributed as if the person survived the other. n642 Thus, if there is no evidence that a husband survived his wife, then his property is distributed to his relatives, heirs or devisees, because it is assumed that he did survive. This provision has two advantages. First, it saves the time and money of two estate administrations. Second, this disposition is more likely to be in line with testator's intent. In the husband-wife example above, the husband's property would pass to his relatives and the wife's property would pass to hers. This avoids dual administration of husband's property (passing through his estate to her, then through her estate) and it would give his property to his relatives, heirs or devisees, not those of his wife.

Despite the popularity of the Uniform Simultaneous Death Act, it did not prevent disputes in cases where the parties did not die at exactly the same time, but very close in time, perhaps a few hours or even a few minutes apart. The comment to the 1991 version of the Uniform Simultaneous Death Act refers to "unfortunate litigation in which the representative of one of the individuals attempts, through the use of gruesome medical evidence, to prove that the one he or she represents survived the other by an instant or two." n643 One of the best-known examples is *Janus v. Tarasewicz*. n644 In *Janus*, the newly-wed husband and wife returned from their honeymoon, and learned of the death of the husband's brother. The brother had swallowed cyanide-laced Tylenol capsules. Before the cause of death had been determined, both the husband and wife took some capsules. The husband was pronounced dead at the hospital, but the wife remained on life support systems, and was not officially pronounced dead until 2 days later. The families of the couple fought over the proceeds of the husband's life insurance policy, and the court held that the wife's family would be permitted to take since the wife did survive.

LEXIS: 1940 w/5 uniform simultaneous death act or usda

§ 88.11(a)(3)(ii) 1991 Uniform Simultaneous Death Act.

The new 1991 version attempts to deal with this problem by creating a presumption that an heir or devisee who fails to survive the decedent by 120 hours is deemed to have predeceased the decedent. n645 The Uniform Simultaneous Death Act (USDA) is derived from some requirements in the pre-1990 and 1990 versions of the Uniform Probate Code. In the 1969 version of the Uniform Probate Code, §§ 2-104 and 2-601 provided for a 120-hour survival requirement for intestate and testate succession. n646 The provisions were not widely adopted however, since they were inconsistent with the 1940 and 1953 USDA. In the 1990 Uniform Probate Code, § 2-702 extended the 120-hour requirement to all forms of governing instruments, including insurance policies, and joint tenancies and tenancies by the entirety. n647 Another change in the 1990 Uniform Probate Code and the new USDA is the requirement of clear and convincing evidence to show survival of 120 hours. n648 This would help to "reduce litigation and to resolve close cases in favor of non-survival," according to the comment to the 1991 Uniform Simultaneous Death Act. n649 A death certificate serves as prima facia evidence of date and time of death, and in the absence of evidence disputing time of death, such a certificate suffices as clear and convincing evidence. n650

In 1991, the Uniform Simultaneous Death Act was amended to provide that evidence of death was to be determined in accord with the Uniform Determination of Death Act (UDDA) The UDDA was promulgated in 1980 and has been adopted in the majority of states. n651 The definition of death is either (1) irreversible cessation of circulatory and respiratory functions or (2) irreversible cessation of all functions in the entire brain, including the brain stem. The determination must be in accord with accepted medical standards. n652

As a matter of will drafting, it is easy to insert a survivorship clause into the will, with a gift over in the event of a failure to survive. A typical provision would state "For the purposes of this will, a beneficiary will not be deemed to have survived me if the beneficiary dies within (5, 30, 60, 90) days of my death." This language can also be incorporated into a trust document. It is unwise to use phrases such as "if we die simultaneously" or if we die in a "common accident," since litigation and evidentiary issues about survival, as described above, can arise.

§ 88.11(b) Changes in Property.

This section presents some legal doctrines to be used when property owned by the testator at the time of the execution of the will is different, in quality or quantity, than property owned by the testator at death.

§ 88.11(b)(1) Ademption by Extinction.

Generally, the doctrine of ademption by extinction is applied when property owned by the testator and purportedly devised to a beneficiary in a will is no longer in the estate at the time of testator's death. n653 For example, if the testator leaves "my mother's diamond ring" to her daughter in her will, but later sells the ring before death, the gift to the daughter is adeemed. The theory of ademption by extinction is that there is nothing left with which to satisfy the bequest, and this is treated as a revocation of the gift. n654 Ademption by extinction should be distinguished from ademption by satisfaction, which is discussed in the next section.

§ 88.11(b)(1)(i) Classification of Gifts.

Ademption by extinction applies only to *specific* bequests. All gifts in a will can be classified into one of four categories: general, specific, demonstrative, or residuary. n655 A general bequest is one that is satisfied out of any assets of the estate. A typical example would be a monetary gift, such as "$1,000 to each of my nieces and nephews." A specific legacy is a gift of a particular item of real or personal property. Examples are: "my house at 123 Main Street to my son, Sam," or "my stamp collection to my friend, Fred." A demonstrative bequest is a hybrid of the general and specific classifications; it is a gift to be paid out of particular estate assets. Again, the typical example is a monetary gift, but to be paid out of a particular source: "$1,000 each to Alice and Bob, to be paid from my account at the First National Bank." Finally, a residuary gift is the bequest or devise of the remainder of testator's estate, or the "remainder" (or the residue) "of my estate to my husband, Hank."

Only specific gifts are subject to ademption by extinction. It is inherent in the nature of these gifts that they are unavailable for distribution if they are sold, destroyed, condemned or otherwise transferred or transformed.

LEXIS: Gift! w/15 classif! w/15 general or specific or demonstrative or w/15 testator!

§ 88.11(b)(1)(ii) Identity Theory.

The most generally accepted common law view of ademption is that it applies without regard to testator's probable intent. This is called the identity theory because it limits the inquiry to whether the item given in the specific bequest or devise is found in the estate. If the particular item of property is not in the testator's estate at the time of death, it is adeemed. The identity theory was first formulated by Lord Thurlow in 1786. n656 Since that time courts have found that gifts were adeemed even when testator's intent seemed fairly clear that the gift should be given in an alternate form. The identity rule may be illustrated hypothetically; suppose father (F) devises, by properly executed will, his home, Brownstone, to his daughter (D1), leaving the residue of his estate to another daughter (D2) Five years after the will is executed, F sells Brownstone and purchases Whitestone. D1 lives with and lovingly cares for F through extended years of failing health until his death. F, by his every word and deed throughout his lifetime, evinced unequivocally his desire

that his home would go to D1 upon his death. Yet, in jurisdictions strictly following the identity rule of Lord Thurlow, D2, not D1, will take Whitestone under the will's residuary clause. D1 would be left with nothing. Or the testator might sell the property given in a specific devise, but put the proceeds in a bank account. n657 Or, the transfer may be involuntary, such as where the property is condemned by the government using eminent domain power. n658 Or, the property may be subject to an executory contract. n659 Despite this unhappy result, and despite "the cardinal rule for the interpretation of wills ... that they shall be construed so as to give effect to the intention of the testator," n660 there is logic behind Lord Thurlow's seemingly cold, harsh rule. Thurlow himself explained his rule this way:

> If a testator had given a particular horse to A.B., if that horse died during the testator's lifetime, or was disposed of by him, then there is nothing on which the bequest can operate. And I do not think that the question in these cases turns on the intention of the testator... And I believe it will be a safer and clearer way to adhere to the plain rule which I before mentioned, which is to inquire whether the specific thing given remains or not. For where a testator gives by his will a particular sum of money, and he afterwards receives and spends it, I see no end to the confusion arising from the following any other line. n661

The rationale advanced in support of the identity doctrine, and its apparent disregard for testator intent, is that admission of evidence extrinsic to the will would violate formal will requirements by inconsistency with testator intent as expressed in the written instrument. That is, it would shatter the inviolability of the will itself. Under this rationale, then, testator intent is taken into account, but only intent as expressed in the will, while at the same time studiously avoiding any consideration of supervening circumstances or events indicating a contrary intent on the testator's part.

The pro-identity rationale, however, fails to recognize that many if not most ademption problems involve situations wherein the testator fails to foresee events that can and do arise, and consequently remains testamentarily silent concerning the testator's wishes concerning such events. Or, perhaps in ignorance as to its effect on the estate, a testator may voluntarily sell bequeathed real or personal property with no intention that the gift adeem. But the identity doctrine ignores these factors.

On the other hand, some courts have rejected application of the identity theory, and do try to consider testator's intent. n662 However, the court may still require that the beneficiary trace the property and find an appropriate replacement for the (otherwise) adeemed items. n663

One key area of ademption and intent to adeem involves the consequences of the actions of a third party. If a guardian, conservator, or some other person actually sells, transfers, or otherwise disposes of the property specifically devised in the will, the court may hold that the gift is not adeemed. n664 This is particularly true if the principal (testator) is incapacitated and thus incapable of forming the requisite intent to adeem. However, if a competent principal seems to approve the agent's action, the courts will treat the action as ratified and adeem the gift. n665

COMPUTER-ASSISTED RESEARCH

LEXIS: identity theory w/30 ademption w/15 testator!

§ 88.11(b)(1)(iii) Construction Techniques to Avoid Ademption.

Sometimes courts will attempt to avoid the somewhat harsh results of ademption by extinction. One technique is to construe the bequest as general rather than specific. A Wisconsin court did this in *In re Will of Blomdahl*, n666 where the will contained two bequests of 100 shares of the ABC Co. stock. Testator owned 200 shares which were sold before death. The court held that the bequest was general. The executor might be required to purchase the stock for the beneficiary in this situation. However, if the testator uses the word "my" in the bequest, such as by stating, "I bequest my 100 shares of XYZ stock to Sally," it is more difficult for the court to find that it is anything but a specific bequest.

n667 Occasionally, a court may find that a gift is demonstrative, rather than specific. n668 A second constructional device is to find that the property subject to a specific bequest is changed only in form. A leading case is *Goode v. Reynolds*, n669 where the testator left shares of bank stock to the beneficiary. The bank consolidated with another bank and new shares were issued. The court found that this was a change in form, not substance.

A third technique is to hold that the terms of the will refer to the time of death, rather than the time of will execution. For example, "my automobile" or "my house" could mean either the automobile or house owned when the will was executed (and now gone), or the automobile or house owned at the time of death. n670 This construction device could also be extended to include additions to or increases in the value of the property. n671

§ 88.11(b)(1)(iv) Statutory Reforms.

The 1990 Uniform Probate Code provision on ademption made substantial changes to the pre-1990 version. The section is reproduced below:

§ 2-606. Nonademption of Specific Devises; Unpaid Proceeds of Sale, Condemnation, or Insurance; Sale by Conservator or Agent.

(a) A specific devisee has a right to the specifically devised property in the testator's estate at death and:

(1) any balance of the purchase price, together with any security agreement, owing from a purchaser to the testator at death by reason of sale of the property;

(2) any amount of a condemnation award for the taking of the property unpaid at death;

(3) any proceeds unpaid at death on fire or casualty insurance on or other recovery for injury to the property;

(4) property owned by the testator at death and acquired as a result of foreclosure, or obtained in lieu of foreclosure, of the security interest for a specifically devised obligation;

(5) real or tangible personal property owned by the testator at death which the testator acquired as a replacement for specifically devised real or tangible personal property; and

(6) unless the facts and circumstances indicate that ademption of the devise was intended by the testator or ademption of the devise is consistent with the testator's manifested plan of distribution, the value of the specifically devised

property to the extent the specifically devised property is not in the testator's estate at death and its value or its replacement is not covered by paragraphs (1) through (5).

(b) If specifically devised property is sold or mortgaged by a conservator or by an agent acting within the authority of a durable power of attorney for an incapacitated principal, or if a condemnation award, insurance proceeds, or recovery for injury to the property are paid to a conservator or to an agent acting within the authority of a durable power of attorney for an incapacitated principal, the specific devisee has the right to a general pecuniary devise equal to the net sale price, the amount of the unpaid loan, the condemnation award, the insurance proceeds, or the recovery.

(c) The right of a specific devisee under subsection (b) is reduced by any right the devisee has under subsection (a).

(d) For the purposes of the references in subsection (b) to a conservator, subsection (b) does not apply if after the sale, mortgage, condemnation, casualty, or recovery, it was adjudicated that the testator's incapacity ceased and the testator survived the adjudication by one year.

(e) For the purposes of the references in subsection (b) to an agent acting within the authority of a durable power of attorney for an incapacitated principal, (i) "incapacitated principal" means a principal who is an incapacitated person, (ii) no adjudication of incapacity before death is necessary, and (iii) the acts of an agent within the authority of a durable power of attorney are presumed to be for an incapacitated principal. n672

The 1990 Uniform Probate Code version is meant to avoid the identity theory of ademption and to adopt the intent theory. It even goes further, creating a presumption against ademption by extinction, by putting the burden of showing that an ademption was intended on the party claiming the ademption. It also specifically provides that the actions of a conservator or an agent acting under a durable power of attorney of an incapacitated person will not affect a specific devise. However, if the testator recovers capacity and survives for one year, this protection is lost.

The pre-1990 Uniform Probate Code §§ 2-607 and 2-608 provided some relief from the rigid identity theory of ademption. Specific legatees of stock, for instance, received any additional securities of the same entity or "securities of another entity owned by the testator as a result of a merger ... or similar action initiated by the entity." n673 But under the pre-1990 Code, the specific legatee of stock does not receive a cash distribution even when initiated by the entity. In cases in which the testator sold a specifically bequeathed asset, the Uniform Probate Code would award the legatee any part of the proceeds still unpaid at the testator's death. n674 Similarly, cases in which specifically devised real property is taken by eminent domain or lost in a fire or other calamity, or in the event of a foreclosure, proceeds should go to the devisee if paid after testator's death. Should a conservator of a legally impaired testator sell the specifically bequeathed property, the Uniform Probate Code would provide the legatee "a general pecuniary devise equal to the net sale price." n675 Some non-Uniform Probate Code statutes have also adopted provisions that advance the intent theory of ademption. n676

§ 88.11(b)(2) Ademption by Satisfaction.

The doctrine of satisfaction comes into operation when the testator, during her lifetime, gives or transfers to the legatee money or property specifically bequeathed by will, thus extinguishing the legacy. Similarly, a testator may satisfy a bequest earmarked for a specific purpose by himself achieving that purpose during the testator's lifetime. n677 The

effect of such gift, transfer, or accomplishment of purpose is tantamount to the testator giving (or transferring) the bequeathed property to a third person, as in the case of ademption by extinction. n678 Satisfaction, therefore, is similar to ademption. Indeed, a sizable number of authorities, if not most, consider satisfaction to be a form of ademption by extinction in that the subject matter of the bequest is not present in the testator's estate at the testator's death. The doctrine of satisfaction is also similar to the doctrine of advancement in an intestate estate. n679 In fact, the doctrine of ademption by satisfaction is difficult to apply to specific devises. If the testator gives a specific item to the beneficiary, it is adeemed by extinction, not satisfaction.

However, satisfaction, as opposed to the strict doctrine of ademption by extinction, may operate not only on specific devises but also on general, demonstrative or residual devises. The doctrine also differs from ademption by extinction in that the legatee's gift does not in fact disappear from the estate in such cases, but rather moves into the legatee's possession during the testator's lifetime.

The general rule is that testator's intention determines whether the doctrine of satisfaction comes into play. For example, the transfer of mere money to a legatee who would take under a general bequest does not in and of itself indicate that the testator wishes the transfer to satisfy the bequest. If the testator intended for the transfer to satisfy the legacy, it will do so, but if the testator intended the inter vivos transfer as a gift in addition to the bequest, the law will give effect to such intention. Similarly, if the testator intended the transfer to be a partial satisfaction of the bequest, the law will give pro tanto recognition to such intention. Most courts put the burden of disproving testator intent on the party challenging such intent. n680 This critical factor of ascertaining testator intent also distinguishes satisfaction cases from the strict ademption by extinction doctrine. n681

The doctrine of satisfaction is not applied to gifts made before the execution of the will, but it is applied to post-execution gifts if the testator intended such effect. Moreover, satisfaction may apply even when unlike gifts are intended by the testator to fulfill a legacy; a gift of land may even satisfy a bequest of personal property if the testator so intended. n682 Conversely, however, without proof of such testator intent, the legacy will not be satisfied. Courts in many states allow oral evidence to prove testator intent, but the Uniform Probate Code does not apply the doctrine unless the will or some other writing evinces such intent.

At least seventeen states have by statute adopted the doctrine of satisfaction. Other states deal with the doctrine under ademption statutes or through operation of the common law. The states that have adopted the doctrine of satisfaction almost without exception mirror the Uniform Probate Code treatment of the doctrine. The Uniform Probate Code provides that an inter vivos gift of property is treated as satisfaction only if: (1) the will provides for deduction of the gift, (2) the testator declares in a contemporaneous writing that the gift is to be deducted from the devise or is in satisfaction of the devise, or (3) the devisee acknowledges in writing that the gift is in satisfaction of the legacy. n683

LEXIS: ademption w/15 satisfaction w/30 testator!

§ 88.11(b)(3) Abatement.

When a testator's estate is insufficient to meet all debts, estate administration costs and legacies, the legacies are reduced, and in some cases, even destroyed. Testamentary gifts may only be paid out of that portion of the estate remaining after all debts of the testator and charges against the estate are paid. Abatement is the legal mechanism whereby the remaining assets, if any, are apportioned among the beneficiaries named in the will.

In general, gifts abate in a certain order, based on their classification as general, specific, or residuary. The classification system was discussed in the section on ademption. n684 Usually, intestate property, if any, will abate first. A testator would normally leave property intestate only if there were no residuary clause in the will, or if the residuary clause fails

for some reason. Otherwise, residuary gifts abate first, then general gifts, then specific and demonstrative gifts. n685 This is in accord with the presumed intent of the testator, although the residue taker is frequently the testator's primary concern. Gifts of the same type generally abate pro rata. For example, if the estate contains $10,000, but the testator made gifts of $10,000 to Alice, $6,000 to Bob and $4,000 to Connie, then Alice should receive $5,000, Bob gets $3,000, and Connie is left with $2,000.

§ 88.11(b)(3)(i) Intent.

The intention of the testator, if discernable, will receive paramount consideration in questions of abatement. n686 The general rule in abatement cases is that the loss must be borne by those upon whom the testator places it. Courts will presume that the testator intended an equal abatement of all general pecuniary legacies in the absence of a contrary showing. A legacy will be accorded a preference only when such is shown to be the testator's intent; "equality is the rule and preference the exception" in abatement cases. Of course, the testator may have intended a preference, and such intent will be honored. n687 However, the burden of proof falls upon the party seeking the preference. n688 Where the will is ambiguous as to testator's intent to prefer one legacy to another, no preference will be given. An important factor in determining whether a preference exists is whether the will shows the testator foresaw and provided for the possibility of a deficiency in the estate assets.

A provision for time of payment, as indicated by the terms of the will, does not afford a preference to those legacies which are to be paid first. Similarly, no intent to create a preference is to be inferred from such terms as "in the first place," "in the second place," and the like in cases in which the testator obviously expected the estate would be adequate to fully pay all legacies. A testator may, however, expressly direct that legacies assume priority in the order in which they are listed in the will. In brief, intent to prefer a legacy may be shown expressly by the terms of the will, by evidence existing outside the will, or by such extraneous circumstances as the relationship of the beneficiary to the testator, but where the will speaks clearly on the matter, the document will be controlling. n689

COMPUTER-ASSISTED RESEARCH

LEXIS: intent! w/5 testator! w/15 abate!

§ 88.11(b)(3)(ii) History and Common Law.

Historically, personal property was decimated before real estate in payment of legacies. n690 The general rule, traditionally and historically, has been that in the absence of a statute providing otherwise, a shortfall of the personalty to pay legacies in full will cause them to abate, and they are not payable out of the realty, unless of course the testator expressly provides otherwise in the will.

This preference for abatement of personalty comes from the common law rule that real property passed directly to the will beneficiary at testator's death. Personal property passed to the executor of the estate. As a result, only personal property was available to pay estate debts, expenses, legacies and bequests. Real property could not be reached unless the creditor had a lien on the property. n691 Modern probate law no longer draws this title distinction. However, some states retain vestiges of the realty-over-personalty preference. n692

§ 88.11(b)(3)(iii) Uniform Probate Code and Modern Trend.

In the modern trend, the Uniform Probate Code does not distinguish between personal and real property testamentary gifts. n693 Also, several states have by statute expressly abolished the preference for realty over personalty in abatement matters. n694 A majority of modern courts have ruled that in view of the fact that a testator may expressly charge her realty with payment of estate debts, there is no sound reason, where a testator bequeaths both real and personal property, to presume that the testator intended to favor one class of property at the expense of another, n695

and logic would indicate that the classes abate pro rata.

The Uniform Probate Code sets out an order of abatement similar to that of the common law and most of the state statutes; "shares of distributees shall abate ... in the following order: (1) property not disposed of by will; (2) residuary devises; (3) general devises; (4) specific devises." n696 Within each classification, abatement is pro rata, according to the Uniform Probate Code. The text of Uniform Probate Code § 3-902 is:

(a) Except as provided in subsection (b) and except as provided in connection with the share of the surviving spouse who elects to take an elective share, shares of distributees abate, without any preference or priority as between real and personal property, in the following order: (1) property not disposed of by the will; (2) residuary devises; (3) general devises; (4) specific devises. For purposes of abatement, a general devise charged on any specific property or fund is a specific devise to the extent of the value of the property on which it is charged, and upon the failure or insufficiency of the property on which it is charged, a general devise to the extent of the failure or insufficiency. Abatement within each classification is in proportion to the amounts of property each of the beneficiaries would have received if full distribution of the property had been made in accordance with the terms of the will.

(b) If the will expresses an order of abatement, or if the testamentary plan or the express or implied purpose of the devise would be defeated by the order of abatement stated in subsection (a), the shares of the distributees abate as may be found necessary to give effect to the intention of the testator.

(c) If the subject of a preferred devise is sold or used incident to administration, abatement shall be achieved by appropriate adjustments in, or contribution from, other interests in the remaining assets.

By statute or case law, a minority of states favor spouses and relatives in matters of abatement. An Iowa court, for example, held that bequests to the testator's spouse abate last, even if they are residuary bequests. n697 Although the Uniform Probate Code affords no similar preference, the comment to § 3-902 indicates that, "it is commonly held, even in the absence of a statute, that general legacies to a wife, or to persons with respect to which the testator is in loco parentis, are to be preferred to other legacies in the same class because this accords with the probable purpose of the legacies." n698 To the contrary, however, it has been held that general legacies to a testator's brother and sister abated pro rata and with no priority when the estate was insufficient to meet all charges and legacies in full. The fact that the brother and sister of the testator were the nearest relatives, and the only relatives among the general legatees, did not entitle them to a preference in order of payment. n699

It should also be noted that the issue of ademption can arise in conjunction with the surviving spouse's elective share, where a spouse may decide to take a statutory forced share in lieu of the gift under the will, or with the claims of a pretermitted child, born after execution of the will. n700 An older view might require that all of the elective share be paid out of the residue, but the modern trend would apportion the spouse's forced share among all beneficiaries. n701 This is similar to the trend in estate tax apportionment, discussed below.

LEXIS: uniform probate code w/30 abate!

§ 88.11(b)(3)(iv) Estate Tax Note.

Non-probate property, such as property held in joint tenancy or revocable inter vivos trusts, may be included in the federal taxable estate. n702 Or, the estate may not contain non-probate assets, but federal estate tax may still be due. Older cases followed a "burden on the residue" rule, making the residue holder primarily liable for the estate taxes. n703 A modern trend in this area is to apportion the tax among all recipients of property (probate and non-probate) The Uniform Estate Tax Apportionment Act takes this approach. The Uniform Probate Code incorporates the Uniform Estate Tax Apportionment Act in § 3-916. n704

§ 88.11(b)(4) Other Changes.

§ 88.11(b)(4)(i) Exoneration of Liens.

At common law, the courts assumed that the testator intended that liens upon devised land and specific gifts were to be discharged out of the general personal estate. n705 The beneficiary of the property subject to the lien would take free of the lien. For example, suppose testator left Blackacre to A and the rest of the probate property to B. Blackacre is subject to a mortgage. The mortgage would be paid from B's share of the estate, and A would take Blackacre free and clear. The common law presumption was based on the notion that the personal estate was benefitted by the assumption of the lien in the first place. The personal estate would be less if the testator had paid the debt during the testator's lifetime.

The modern trend, as exemplified by the Uniform Probate Code, reverses the presumption. The debt is not exonerated unless the will specifically so provides. n706

§ 88.11(b)(4)(ii) Corporate Stock.

In general, an increase in value of any asset left under a will goes to the beneficiary. Traditionally, courts draw a line between specific and general devises. If a gift is specific, it passes all interest and benefits attached to the item of property. If the gift is general, only the actual items pass. n707

This general/specific distinction was carried over into the area of stock splits. A stock split occurs when a corporation decides to issue more shares of stock, but still maintain the pro rata ownership levels. For example, A owns 1,000 shares of stock, representing 1% of the ownership interest in the company. If the stock splits three-for-one, A will own 3,000 shares, still representing 1% of the total. Also, if the 1,000 shares originally had a total value of $3,000 ($3 apiece) they would still be worth $3,000 ($1 apiece), after the stock split. The former rule was that if testator made a specific devise of stock to a beneficiary, then the beneficiary would receive all the stock. If the bequest was general, the beneficiary was limited to the precise number of shares disclosed in the will. n708 As for dividends, courts have held that cash dividends are not available to the stock devisee, they go to the residue holder. Stock dividends also traditionally were not given to the stock beneficiary.

The Uniform Probate Code treats stock dividends and stock splits in the same manner. However, the pre-1990 Uniform Probate Code still relied on the general/specific distinction. n709 The 1990 version provides that all stock splits *and* stock dividends should go to the stock beneficiary. n710 The 1990 version maintains the exception for cash dividends. It should be noted, however, that the abolition of the specific/general distinction is not yet widely adopted. Section 2-605 of the 1990 Uniform Probate Code provides:

(a) If a testator executes a will that devises securities and the testator then owned securities that meet the description in the will, the devise includes additional securities owned by the testator at the death to the extent the additional securities were acquired by the testator after the will was executed as a result of the testator's ownership of the described securities and are securities of any of the following types:

(1) securities of the same organization acquired by reason of action initiated by the organization or any successor, related, or acquiring organization, excluding any acquired by exercise of purchase options;

(2) securities of another organization acquired as a result of a merger, consolidation, reorganization, or other distribution by the organization or any successor, related, or acquiring organization; or

(3) securities of the same organization acquired as a result of a plan of reinvestment.

(b) Distributions in cash before death with respect to a described security are not part of the devise. n711

CHAPTER 88 TESTAMENTARY TRANSFERS OF REAL PROPERTY

10-88 Thompson on Real Property, Thomas Editions § 88.12

AUTHOR: Professor Victoria Mikesell Mather School of Law St. Mary's University of San Antonio

§ 88.12 Limits on Dispositions Under a Will.

[Go To Supp]

§ 88.12(a) General.

While the general policy of American law favors testamentary freedom, there are some statutory and common law limits, usually protecting family members. There is a strong policy in favor of protecting families from poverty and a state interest in keeping families off of the welfare rolls. On the other hand, testamentary freedom arguably gives the testator the incentive to work hard in order to acquire property, it gives family members the incentive to treat the testator well, and it gives more leeway for thoughtful estate planning and fair distribution. For example, it is very common for a testator to help one child during testator's lifetime, when the child needs help, but to leave other children a greater share of the estate at death. n712 All states have some sort of statutory protection for the family of the decedent. Such protection is usually in the form of a homestead provision, a support allowance (at least for spouses) and an exemption of a certain amount of personal property from estate creditors. United States systems of family protection tend to be fairly rigid, leading some authorities to advocate for a more flexible scheme, giving courts authority to vary from the terms of a will under circumstances where equity requires. n713 The English law establishes such broad powers in the court, and permits the court to provide not only for family members but for any persons maintained by the decedent prior to death. The law would protect former spouses who have not remarried, stepchildren, elderly parents, or even live-in companions. This attitude has not gained popularity in American law. One fear is that such flexibility might promote litigation.

Distribution of property under the homestead and family allowance provisions may well deplete a small estate, making the will irrelevant. Under the 1990 version of the Uniform Probate Code (UPC), the homestead exemption, family allowance, and exempt property allowances total $43,000. n714 The Uniform Probate Code provisions are typical, although states may vary the dollar amounts. The UPC section on homestead is somewhat unusual in that it grants a monetary right in lieu of a right of occupancy. This is meant to protect families of renters, as well as those of homeowners. The UPC also clarifies the point that family allowances and exemptions are not charged against devises under the will or against the elective share of a spouse (discussed below). n715

§ 88.12(b) Protection of a Spouse.

§ 88.12(b)(1) History.

The history of spousal protection can be traced to the English common law doctrines of dower and curtesy. Dower provided a widow with a one-third lifetime interest in the real property of her deceased husband. Curtesy gave the husband a life estate in all of the wife's real and personal property, provided that a child was born during the marriage. n716 At common law, a spouse was not an heir of the decedent. In the United States, the law has moved away from the concepts of dower and curtesy. A spouse is an heir, if the decedent is intestate. In all non-community property states except Georgia, the spouse has a right to take a share of the estate even if there is a will disinheriting him or her. n717 The community property states are discussed separately below. The spouse's right to property was traditionally known as a "forced" share, but a more modern, and more descriptive term is the "elective" share. A surviving spouse may elect to take against the terms of the will. Usually the decision must be made within a limited period of time. The Uniform Probate Code, for example, require that the election be made within 9 months after death, or six months after probate of the will, whichever is later. n718

§ 88.12(b)(2) Theory.

The modern theory of spousal protection is based on the notion of a marriage as an economic partnership. Both spouses contribute, directly or indirectly, to the wealth accumulated during the marriage, and should share the property at death. n719 This idea of marriage has been incorporated into divorce law, in the movement to equitable distribution of property between the spouses at divorce. n720 Historically, spouses were protected on the basis of a concept of need, that society would not want surviving spouses to live in poverty. While both theories are still legitimate, changes in the family and in demographic patterns have created some problems with spousal protection presumptions. n721 Many, if not most, marriages end in divorce, and most of these people remarry. Or, marriages may end by the death of one of the parties, and then a remarriage occurs late in life. In either case, the parties may want to protect children or other dependents from the earlier marriage, even at the expense of the inheritance rights of the new, later spouse. Many of the cases in this area involve this type of situation. The new Uniform Probate Code provisions on spousal elective shares attempt to deal with this issue in a creative way.

§ 88.12(b)(3) Alteration of Rights by Pre- or Post-Nuptial Agreement.

One solution to the second marriage problem is the use of a contract, either before or during the marriage, to alter the inheritance rights of the spouses. This is permitted under both the Uniform Premarital Agreement Act (adopted in 15 states), n722 as well as the Uniform Probate Code. In general, pre- and post-nuptial agreements are governed by general contract law principles. However, since the parties are in a fiduciary relationship, the courts, and the UPAA and the UPC all require that the agreement be fair, and that the financial situation of both parties be fully disclosed. This also parallels the modern trend in divorce settlements. n723

§ 88.12(b)(4) The Spousal Election.

§ 88.12(b)(4)(i) Election Is Personal.

As indicated above, the surviving spouse will have a limited period of time after decedent's death to elect to take a spousal elective share. The election is typically held to be personal to the spouse, exercisable *only* by him or her, even if

the surviving spouse is incompetent. n724 The Uniform Probate Code provides for an exception if the election is used for the economic benefit of the spouse (but not the spouse's heirs or devisees). n725 While the exception is consistent with the "need" theory of spousal elective shares, as discussed above, the requirement that the election is personal is generally inconsistent with the broader and more modern theory of spousal protection, the partnership theory. n726

§ 88.12(b)(4)(ii) Amount of Property Received.

The extent of the property that the spouse may receive upon election varies from state to state. The typical provision for a surviving spouse in an intestate estate might be one-half of the decedent's estate. Some states would allow a similar percentage in a forced share situation, but other states would allow a lesser amount for an elective share, typically one-third. n727 The Uniform Probate Code provisions are discussed below.

§ 88.12(b)(4)(iii) Where Elective Share Is Paid From.

If no statute is in effect, the common law rule determines that the statutory share be paid out of the estate according to the normal order of abatement (residue, general, demonstrative, and specific). n728 Of course, this raises a traditional abatement issue, that the testator normally leaves the residue to the person who is the primary object of the testator's beneficence. The Uniform Probate Code, in both the pre- and post-1990 versions, assign the responsibility for the elective share pro-rata among all of the beneficiaries. n729

§ 88.12(b)(4)(iv) Does Surviving Spouse Acquire the Elective Share *Plus* Bequest or Inter Vivos Transfers?

Another question is what happens if the decedent leaves the surviving spouse a bequest in the will, and the survivor elects to take against the will. Does the survivor take the bequest *and* the elective share, or just the elective share? In most jurisdictions, the survivor who elects a forced share is treated as if the survivor predeceased the testator for purposes of the will. The surviving spouse must choose between the will and the election. n730 The Uniform Probate Code goes a step further and reduces the elective share by the value of assets left to the surviving spouse under the will. n731 A related issue involves non-probate property. If the surviving spouse is the beneficiary of a trust, or the survivor in a joint tenancy, or the recipient of a lifetime gift from the decedent spouse, is the non-probate asset included in determining the statutory share? Most statutes would disregard the inter vivos n732 transfer, but the Uniform Probate Code includes all of this property in calculating the augmented estate, n733 discussed below in § 88.12(b)(7)(i).

COMPUTER-ASSISTED RESEARCH

LEXIS: surviv! w/5 spouse! w/30 elective share w/15 bequest or (inter vivos w/2 transfer).

§ 88.12(b)(5) Omitted Spouse.

In contrast to the disinherited spouse, the situation may arise when the will, written before the marriage of the parties, omits a spouse. Some states will provide protection for an omitted spouse, with a provision similar to the Uniform Probate Code § 2-301. n734 This section provides that a surviving spouse who married the testator after the execution of the will is entitled to at least an intestate share of the decedent's estate. The 1990 UPC limits the spouse's share to that property which is not given to a previously-born child of the decedent or that child's descendants. A few states have marriage revocation statutes, which provide that a premarital will is revoked after marriage. n735 The marital revocation statutes are derived from the English Wills Act of 1837. n736

COMPUTER-ASSISTED RESEARCH

LEXIS: omit! w/5 spouse! w/30 will!

§ 88.12(b)(6) Attempts to Avoid the Spousal Share.

Early statutes indicated that the statutory share of a survivor was calculated on the value of the probate estate. However, the probate estate does not include some will substitutes, such as insurance, pre-death gifts, inter-vivos revocable trusts, joint tenancies, etc. Some states have attempted to prevent or alleviate this "fraud on the spouse's share" by specifically including certain non-probate items in the elective share. n737

The common law also attempted to thwart the fraud on the spouse's share. Courts developed two tests to include property in an elective share calculation, even if not included in the probate estate. First, some cases treat transfers as "illusory," and include them in the elective share. n738 For example, a revocable trust might be considered to be illusory, because the grantor retains so much control over the assets in the trust. A second, but less common theory is the fraudulent motive/intent test. n739 In these cases, if the decedent attempted to transfer property with the intent to defraud the decedent's spouse of a fair share, then the transfer will be disregarded for purposes of calculating the forced share.

§ 88.12(b)(7) Uniform Probate Code.

§ 88.12(b)(7)(i) Augmented Estate. n740

The Uniform Probate Code (both pre- and post-1990) included a provision for a reclaimable estate. n741 The 1990 UPC uses a very broad augmented estate concept to determine the surviving spouse's share. The augmented estate included the decedent's probate estate and reclaimable estate (gifts, life insurance, etc.) It also includes all property that the surviving spouse succeeds to by virtue of decedent's death (other than homestead, family allowance, testate and intestate succession) such as life insurance, retirement plan or other death benefits. n742 Finally, the value of the assets of the surviving spouse (up to an "applicable percentage") are included in the augmented estate, plus any of the survivor's reclaimables (property that would have been reclaimed if the survivor had predeceased the decedent) The applicable percentage is twice the value of the sliding scale percentage for the elective share, based on the length of the marriage. n743 This incremental percentage system is described below. The total augmented estate is then used to determine what the elective share should be.

§ 88.12(b)(7)(i)(A) Supplemental Elective Share.

The new (1990) Uniform Probate Code also includes two other significant changes to the former elective share statute. First, the elective share includes a "supplemental elective share" of $50,000. n744 The survivor's assets must total at least $50,000, when combined with the supplemental elective share making up the difference if the assets do not reach that figure. The comments point out that this provision implements the "support" or "need" aspect of the elective share. The $50,000 amount is computed by totalling the survivor's assets, not including family allowances and exemptions, nor the survivor's Social Security benefits.

§ 88.12(b)(7)(i)(B) Incremental Percentage for Elective Share.

Second, in an effort to make the UPC system similar to a community property system, the drafters included a sliding scale for calculating the elective share, depending on the length of the marriage. This is also called an "accrual" method of calculating the elective share. n745 For example, if the parties were married 18 months, the survivor would be entitled to 3% of the augmented estate, after five years the share would be 15%, after ten years the share would be 30% and after fifteen years the full 50% would be available. This scheme was proposed by Professors Langbein and Waggoner in 1987, in an effort to deal with problems associated with short-term marriages, or later-in-life marriages.

n746 The UPC system differs from a community property scheme in two important ways: the spouse must survive in order to take the statutory share, and the elective share includes all of the decedent's property, including property acquired before marriage and property acquired through inheritance or devise. n747 The new UPC provisions are somewhat complicated to apply in individual situations. The comment to Part 2 of Article II contains several detailed examples which help to explain how the new elective share works. n748

§ 88.12(b)(8) Community Property.

§ 88.12(b)(8)(i) Generally.

The subject of community property is treated extensively elsewhere in this treatise, n749 but the community property concept is important in the area of spousal election. The community property system comes from the civil law (French and Spanish), rather than the common law (English) tradition. Under the common law, each spouse owns what is in his or her name. n750 Modern divorce law has changed this somewhat with the concept of equitable distribution, but the technical rule remains in place. Eight states have a community property system, n751 and Wisconsin has adopted the Uniform Marital Property Act, n752 which has a similar impact on the property of married couples. In a community property system, all property earned or acquired during the marriage belongs to both spouses, in equal shares. Property owned before the marriage is not community property and property received by gift, bequest or inheritance is also not included.

Community property states typically do not have a forced share provision for estates. It is thought that such a share for a surviving spouse is not necessary, since the spouse already owns his or her share of the property acquired during the marriage. While this is consistent with the partnership theory of marriage, it can be deficient for support, particularly in a marriage of short duration. n753 Community property law requires that property be classified either as separate property or as community or marital property. Many of the legal issues involved with community property law involve these classification questions. For example, if separate property is combined with marital property to purchase an asset, is the asset community property, separate property, or a fractional share of each? n754 Also, state law may vary on how these issues are resolved.

§ 88.12(b)(8)(ii) Conflicts Issues.

Migratory couples can have unique problems when they move from a common law state to a community property state, or the reverse. In general, the law of the state where the couple was domiciled when they acquired the assets controls the classification of ownership of the assets. On the other hand, the law of the domicile at the time of death controls the disposition of the decedent's probate estate. n755 For example, if a couple resides in a community property state, such as Texas, for many years, all property acquired during that time is community property and is owned in equal undivided share by the husband and the wife. If the couple later moves to a common law state, a surviving spouse may have the protection of both ownership of former community assets as well as the forced share provisions of a probate statute. n756 The Uniform Disposition of Community Property Rights at Death Act, n757 adopted in 13 states, attempts to deal with this possible double benefit. The property acquired during the marriage while living in a community property state is presumed to be marital property subject to the terms of the Act. At death, one-half the property belongs to the survivor outright, and is not subject to disposition under the decedent's will or subject to distribution in an intestate estate. It is also not included in the survivor's elective share.

If a couple resides in a common law state for most of their married life, and then moves to a community property state, a surviving spouse might lose the protection of the elective share, and yet not have ownership rights to any of the

property acquired during the marriage. n758 Some community property states recognize a "quasi-community property" concept. n759 Quasi-community property is property that would have been community property, except it was acquired when the couple lived in a common law state. This is a type of deferred community property, since it does not take on the quality of community property until the death of one of the spouses. At least two of the community property states recognize "quasi-community property" at divorce, but not at death. n760

LEXIS: uniform disposition w/1 community property rights w/1 death act

§ 88.12(b)(9) Tax Notes. n761

The federal estate tax marital deduction applies to all property that is left to the surviving spouse in an absolute ownership interest. The elective share is an absolute ownership interest, so the deduction would cover this property. The tax laws also permit qualified terminable interest property (QTIP) to be subject to the marital deduction. n762 A QTIP trust, for example, would give the surviving spouse a life interest, but would not permit the survivor to dictate distribution of the remainder at the survivor's death. In non-UPC states, the tax laws give a surviving spouse some incentive to take the elective share (over a QTIP interest in a will) as an absolute ownership interest, particularly if the survivor has children from a previous marriage whom the survivor would like to benefit.

The question also arises whether the elective share should be calculated on the value of the estate before or after estate taxes are deducted. The majority and the Uniform Probate Code adopt the view that the amount of the elective share is calculated before estate taxes are deducted. n763 The UPC incorporates the Uniform Estate Tax Apportionment Act, which provides that a tax deduction that is allowed because of a relationship to the decedent (such as a surviving spouse) should work to the benefit of the person in the relationship (the surviving spouse) Thus, the spouse should get the estate tax benefit. n764

§ 88.12(c) Protection for Children.

§ 88.12(c)(1) Forced Succession -- Legitime.

The European civil law tradition protected children from being disinherited by their parents, through a device known as the legitime. The only United States jurisdiction to follow this tradition is Louisiana. n765 The Louisiana code does permit disinheritance under certain circumstances, listed in the statute, but the reasons must be proved before the disinheritance will be allowed. In all other states, a parent may intentionally disinherit a child. This policy is criticized, particularly in view of the fact that many people now have multiple marriages and multiple families. n766 Divorce settlements or decrees may expressly provide for will bequests for children. These are will contracts, and are discussed in § 88.05 of this chapter. In Wisconsin, the probate court is given the unique authority to provide support for minor children (until age 18) out of a decedent's estate. n767

§ 88.12(c)(2) Drafting Hints -- Testamentary Libel.

Although a parent has the ability to disinherit children, the actual practice is risky, and invites the possibility of a will contest. As a general matter, probate attorneys may try to discourage clients from excluding their children. If a client is determined to disinherit the client's children, the attorney should determine the reason. In drafting the will, specificity is desirable, the child(ren) should be named, issue and descendants of the disinherited child should also be mentioned, if appropriate. The reasons for the exclusion may be set out in the will or included in some other written document, to be

read along with the will. However, the testator will want to avoid any possibility of testamentary libel and the possibility that the disappointed heir would recover through a tort suit. n768

COMPUTER-ASSISTED RESEARCH

LEXIS: draft! w/15 testament! or will! w/30 libel!

§ 88.12(c)(3) Negative Will.

A testator may not disinherit any or all children by decree, in the majority view. This is termed a "negative will," and is not recognized in the common law or in most statutes. n769 The testator must designate who is to receive property under the will, or it will pass by intestate succession. Usually children would be heirs under an intestacy statute. The testator must leave all of the testator's property to someone or something through the provisions of the will. The new Uniform Probate Code does allow a "negative will." n770 The testator may preclude or limit any heir from taking under intestate succession. The property passes as though the excluded person had disclaimed his or her share.

COMPUTER-ASSISTED RESEARCH

LEXIS: negative will!

§ 88.12(c)(4) Pretermitted Heirs.

The law had no difficulty with the intentional disinheritance of children, but most states will offer protection against accidental exclusion. Virtually all states have some statutory provision on this point, and they are usually called pretermitted heir statutes. Statutes fall into two categories: those that protect after-born or after-adopted children only (born or adopted after the execution of the will) n771 and those that will protect any child that is accidently excluded, usually by the use of class gift language in the disinheriting clause. n772 The majority view and the Uniform Probate Code n773 protect only the after-born or adopted child. It is assumed that the testator would only accidently exclude a child that is not yet born or adopted. Most of the cases involved with the second type of statute involve a will that does not specifically name the excluded child. For example, the testator may have an illegitimate child, and may not want to indicate the existence of the child in the will. Phrases indicating that the testator "has no children," or "wishes to exclude any children," may not be sufficient to establish that the disinheritance is intentional. n774 The typical pretermitted heir statute permits the omitted child to take an intestate share. However, this can lead to unfair results. For example, Hank marries Wilma, writes a will leaving everything to Wilma, and then they have a child, Connie. Under some statutes, Connie could take an intestate share, and actually receive more money and property than Wilma. Or, the testator could leave small gifts to each living child, exclude an after-born child, and leave the rest to charity. The excluded child could possibly gain a much greater share than the siblings, probably contrary to the testator's intent. n775 The Uniform Probate Code attempts to deal with these issues. An after-born child may receive an intestate share, but not if the testator left all (or substantially all) property to the other parent of the child, and the will was executed when the testator had no living children. n776 The drafters reasoned that the testator would assume that the other parent would take care of the child. If the testator leaves property to other children, who were living at the time the will was executed, then the Code provides that the omitted child may receive a pro-rata share of the property given to the other children. n777 For example: if testator leaves $30,000 to child A and $30,000 to child B. Child C is born after the will is executed. C may take $20,000 of the $60,000 total bequest. C's share is derived from one third of A's share ($10,000) and one-third of B's share ($10,000) If testator left child A $45,000 and child B $15,000, C would still receive $20,000, but the derivation would be different: one-third of A's share ($15,000), and one-third of B's share ($5000). n778

One frequently litigated issue is whether grandchildren (descendants) of an excluded, but deceased, child may inherit from the testator. The courts have split on this issue, but may allow the succession if the testator has not specifically excluded them. n779 Exclusion provisions should expressly address this issue.

COMPUTER-ASSISTED RESEARCH

LEXIS: pretermitted heir!

§ 88.12(d) Mortmain Legislation and Other Restrictions on Dead Hand Control.

§ 88.12(d)(1) Mortmain Statutes. n780

Only three states retain mortmain legislation, n781 so the interest in these statutes is largely historical. The term mortmain (meaning dead hand) comes from a feudal statute, passed in 1279. Feudal tenants would sometimes give their interest in real property to a monk, priest, or other member of a religious order. As a result, the feudal overlords would lose their ability to claim some of the valuable incidents of feudal ownership. The Statute of Mortmain was passed to prevent these transfers. A later English statute, passed in 1736, was intended to prevent deathbed gifts, via will, to charities. The statute imposed a 12-month waiting period for such bequests. The will had to be executed 12 months before the testator's death in order for the transfer to be effective. n782

The modern mortmain legislation is rooted in the English law. Statutes, when in effect, would regulate the length of time that must pass before a testamentary gift to charity could be effective. A typical period could be ninety days or six months. The statutes might also regulate or limit the value that could be left to a charity under testator's will, such as the 50% cap in the New York statute discussed in *In re Rothko*. n783 The statute has since been repealed. A third type of statute would regulate both the size of the charitable gift and the time of the execution of the will. n784 For example, a statute might limit a gift to charity to no more than one-third of the estate, and the will must be executed no less than 90 days prior to testator's death. Most statutes only applied to charitable gifts, but the Idaho statute, for example, also regulates gifts to employees or owners of nursing homes.

The purpose of mortmain legislation is to protect family members. Therefore, usually, only certain relatives of the testator will have standing to challenge the charitable gift. Some states may limit standing to children of the decedent, or to spouses and children of the decedent. Others may permit any heir to move to set aside the gift. n785

Standing is one reason why the statutes are not frequently in use. The statute can easily be avoided by drafting. For example, if the will specifically disinherits the testator's children, the court may hold that no one has standing to challenge a bequest in violation of a mortmain statute. These statutes can also be avoided through the use of a will substitute. If a testator makes an outright gift to a charity shortly before death, it will be difficult to set the gift aside. n786 Mortmain statutes were often struck down or repealed in the few states that did have them in the 1970's.

§ 88.12(d)(2) The Rule Against Perpetuities.

A significant limit on dead hand control is embodied in the Rule Against Perpetuities. The rule prohibits restrictions on property that will continue too long after the death of the testator. The complexities of the rule are beyond the scope of this chapter, and are treated elsewhere in this treatise. n787 A classic statement of the rule is Gray's: No interest is good, unless it must vest, if at all, not more than twenty-one years after some life in being at the creation of the interest. n788 The rule applies to the creation of future interests in third parties: contingent remainders, class gifts, and executory interests. The rule can be avoided by careful drafting. Modern case law and statutory reforms are also in place to attempt to avoid making the rule a "trap for the unwary." A Uniform Statutory Rule Against Perpetuities has been approved by the National Conference of Commissioners on Uniform Laws and is incorporated into the Uniform Probate

Code. n789 The statutory act provides that interests subject to the rule should be valid for 90 years from creation, and struck down after 90 years only if the interests have not vested after that time. The Uniform Rule has been criticized for combining some of the worst aspects of the common law rule and modern reforms, n790 but it has been adopted in several states.

§ 88.12(d)(3) Testator Post-mortem Attempts to Influence Donee Behavior.

Testators may put conditions on their bequests in a will, but under certain circumstances, courts will refuse to honor some restrictions. Examples include unreasonable restraints on marriage; attempts to encourage divorce, separation or to foster family fights; or efforts to influence the practice of religion. n791

§ 88.12(d)(4) Devises to Animals or Otherwise Contrary to Public Policy.

An outright bequest to an animal or pet will not be honored. An honorary trust for the care of a pet is allowed. n792

§ 88.12(e) Slayer Statutes.

Most states have enacted statutes or have common law rules that prohibit a person who has committed homicide from receiving any property rights or insurance proceeds from the decedent victim's estate. The statutory and common law provisions apply to both intestate inheritance rights and testamentary gifts. The slayer rule evolved from equity principles that "no one shall be permitted to profit by his own fraud, to take advantage of his own wrong, to found any claim upon his own iniquity, or to acquire property by his own crime." n793

The moral justification for denying slayers the right to succeed to their victims' property is indisputable in those cases in which greed motivates the killings. When the killer intends to interfere with the succession law it is fair to deny the killer the benefit of that law. Additionally, denying succession rights to slayers reinforces criminal punishments because the denial serves a deterrence function. n794 The killing of a decedent by an heir or a beneficiary is also disruptive of the system of property distribution at death. These types of killings potentially disrupt the normal disposition of property; the victims lose personal enjoyment of their property, the victims are denied the opportunity to change their existing estate plans, and the killings interfere with the order of death of the victims and the slayers, placing property transfers conditioned on survivorship in jeopardy of being controlled by surviving slayers. n795 One court indicated that the slayer rule is an appendage to the property law transfer system. n796 The *Riggs* court held that the New York slayer statute should not be considered penal in nature but should protect the integrity of the property transfer law in light of the felonious and intentional or reckless killing. Case law on the subject of slayer statutes can be divided into three categories.

First, the killer may still take from decedent. The courts reason that the denial of the inheritance to the slayer because of a crime would impose an additional punishment not provided for by the penal statute. n797 In the second group, the legal title will not pass to the slayer because of the equitable principle that no one should be permitted to profit by one's own fraud, or take advantage and profit as a result of one's own wrong or crime. n798 Finally, under the third rule the legal title passes to the slayer but equity holds the slayer to be a constructive trustee for the heirs or next of kin of the decedent. Because of the unconscionable mode by which the property is acquired by the slayer, equity treats the slayer as a constructive trustee and compels the slayer to convey the property to the heirs or next of kin of the deceased. n799

Virtually all states have some sort of slayer statute. n800 The cases and statutes usually deny the slayer the right to take under a will or by intestacy and may also extend to joint tenancies (right of survivorship), inter-vivos trusts, insurance

benefits or family protection benefits, such as homestead. n801 The Uniform Probate Code adopts this approach, for the most part. n802 However, the joint tenancy provision simply provides for severance, not for complete loss of all property by the killer. n803 The cases and statutes are in conflict, however, when the "killer" is acquitted in a criminal case, or is convicted of involuntary manslaughter, or pleads "no contest" to the murder charge. n804 Normally, a person who acted in self-defense or who was insane at the time of the killing would not be treated as a slayer. n805 The Uniform Probate Code requires either a criminal conviction of a felonious and intentional killing of the decedent, or a probate court determination established by a preponderance of the evidence that the requisite criminal accountability would be found. n806 Some states, however, will deny rights to the slayer even in the absence of an intentional killing as discussed above.

(n3)Footnote 714. U.P.C. § 2-402 (homestead), 2-403 (exempt property), 2-404 (family allowance), 2-405 (source determination and documentation) (1990 version), 8 U.L.A. 108-111 (1993 Supp.). The homestead allowance is $15,000, the exempt property allowance is $10,000 and the family allowance may be up to $18,000.

(n4)Footnote 715. Sections 2-402 to 2-405 are reproduced here:

§ 2-402A Constitutional Homestead.

The value of any constitutional right of homestead in the family home received by a surviving spouse or child must be charged against the spouse or child's homestead allowance to the extent the family home is part of the decedent's estate or would have been but for the homestead provision of the constitution.

§ 2-403 Exempt Property.

In addition to the homestead allowance, the decedent's surviving spouse is entitled from the estate to a value, not exceeding $10,000 in excess of any security interests therein, in household furniture, automobiles, furnishings, appliances, and personal effects. If there is no surviving spouse, the decedent's children are entitled jointly to the same value. If encumbered chattels are selected, and the value in excess of security interests, plus that of other exempt property, is less than $10,000, or if there is not $10,000 worth of exempt property in the estate, the spouse or children are entitled to other assets of the estate, if any, to the extent necessary to make up the $10,000 value. Rights to exempt property and assets needed to make up a deficiency of exempt property have priority over all claims against the estate, but the right to any assets to make up a deficiency of exempt property abates as necessary to permit earlier payment of homestead allowance and family allowance. These rights are in addition to any benefit or share passing to the surviving spouse or children by the decedent's will, unless otherwise provided, by intestate succession, or by way of elective

share.

§ 2-404 Family Allowance.

(a) In addition to the right to homestead allowance and exempt property, the decedent's surviving spouse and minor children whom the decedent was obligated to support and children who were in fact being supported by the decedent are entitled to a reasonable allowance in money out of the estate for their maintenance during the period of administration, which allowance may not continue for longer than one year if the estate is inadequate to discharge allowed claims. The allowance may be paid as a lump sum or in periodic installments. It is payable to the surviving spouse, if living, for the use of the surviving spouse and minor and dependent children; otherwise to the children, or persons having their care and custody. If a minor child or dependent child is not living with the surviving spouse, the allowance may be made partially to the child or his [or her] guardian or other person having the child's care and custody, and partially to the spouse, as their needs may appear. The family allowance is exempt from and has priority over all claims except the homestead allowance.

(b) The family allowance is not chargeable against any benefit or share passing to the surviving spouse or children by the will of the decedent, unless otherwise provided, by intestate succession, or by way of elective share. The death of any person entitled to family allowance terminates the right to allowances not yet paid.

§ 2-405 Source, Determination, and Documentation.

(a) If the estate is otherwise sufficient, property specifically devised may not be used to satisfy rights to homestead allowance or exempt property. Subject to this restriction, the surviving spouse, guardians of minor children, or children who are adults may select property of the estate as homestead allowance and exempt property. The personal representative may make those selections if the surviving spouse, the children, or the guardians of the minor children are unable or fail to do so within a reasonable time or there is no guardian of a minor child. The personal representative may execute an instrument or deed of distribution to establish the ownership of property taken as homestead allowance or exempt property. The personal representative may determine the family allowance in a lump sum not exceeding $18,000 or periodic installments not exceeding $1,500 per month for one year, and may disburse funds of the estate in payment of the family allowance and any part of the homestead allowance payable in cash. The personal representative or an interested person aggrieved by any selection, determination, payment, proposed payment, or failure to act under this section may petition the court for appropriate relief, which may include a family allowance other than that which the personal representative determined or could have determined.

(b) If the right to an elective share is exercised on behalf of a surviving spouse who is an incapacitated person, the personal representative may add any unexpended portions payable under the homestead allowance, exempt property, and family allowance to the trust established under Section 2-204(b).

§ 2-204 Waiver of Right to Elect and of Other Rights.

(a) The right of election of a surviving spouse and the rights of the surviving spouse to homestead allowance, exempt property, and family allowance, or any of them, may be waived, wholly or partially, before or after marriage, by a written contract, agreement, or waiver signed by the surviving spouse.

(b) A surviving spouse's waiver is not enforceable if the surviving spouse proves that:

(1) he [or she] did not execute the waiver voluntarily; or

(2) the waiver was unconscionable when it was executed and, before execution of the waiver, he [or she]:

(i) was not provided a fair and reasonable disclosure of the property or financial obligations of the decedent;

(ii) did not voluntarily and expressly waive, in writing, any right to disclosure of the property or financial obligations of the decedent beyond the disclosure provided; and

(iii) did not have, or reasonably could not have had, an adequate knowledge of the property or financial obligations

of the decedent.

(c) An issue of unconscionability of a waiver is for decision by the court as a matter of law.

(d) Unless it provides to the contrary, a waiver of "all rights," or equivalent language, in the property or estate of a present or prospective spouse or a complete property settlement entered into after or in anticipation of separation or divorce is a waiver of all rights of elective share, homestead allowance, exempt property, and family allowance by each spouse in the property of the other and a renunciation by each of all benefits that would otherwise pass to him [or her] from the other by intestate succession or by virtue of any will executed before the waiver or property settlement.

§ 2-301 Entitlement of Spouse; Premarital Will.

(a) If a testator's surviving spouse married the testator after the testator executed his [or her] will, the surviving spouse is entitled to receive, as an intestate share, no less than the value of the share of the estate he [or she] would have received if the testator had dies intestate as to that portion of the testator's estate, if any, that is neither devised to a child of the testator who was born before the testator married the surviving spouse and who is not a child of the surviving spouse nor devised or passes under Sections 2-603 or 2-604 to a descendant of such a child, unless:

(1) it appears from the will or other evidence that the will was made in contemplation of the testator's marriage to the surviving spouse;

(2) the will expresses the intention that it is to be effective notwithstanding any subsequent marriage; or

(3) the testator provided for the spouse by transfer outside the will and the intent that the transfer be in lieu of a testamentary provision is shown by the testator's statements or is reasonably inferred from the amount of the transfer or other evidence.

(b) In satisfying the share provided by this section, devises made by the will to the testator's surviving spouse, if any, are applied first, and other devises, other than a devise to a child of the testator who was born before the testator married the surviving spouse and who is not a child of the surviving spouse or a devise or substitute gift under Sections 2-603 or 2-604 to a descendant of such a child, abate as provided in Section 3-902.

(n65)Footnote 776. U.P.C. § 2-302(1), 8 U.L.A. 105. Section 2-302 is reproduced here:

§ 2-302 Omitted Children.

(a) Except as provided in subsection (b), if a testator fails to provide in his [or her] will for any of his [or her] children born or adopted after the execution of the will, the omitted after-born or after-adopted child receives a share in the estate as follows:

(1) If the testator had no child living when he [or she] executed the will, an omitted after-born or after-adopted child receives a share in the estate equal in value to that which the child would have received had the testator dies intestate, unless the will devised all or substantially all the estate to the other parent of the omitted child and that other parent survives the testator and is entitled to take under the will.

(2) If the testator had one or more children living when he [or she] executed the will, and the will devised property or an interest in property to one or more of the then-living children, an omitted after-born or after-adopted child is entitled to share in the testator's estate as follows:

(i) The portion of the testator's estate in which the omitted after-born or after-adopted child is entitled to share is limited to devises made to the testator's then-living children under the will.

(ii) The omitted after-born or after-adopted child is entitled to receive the share of the testator's estate, as limited in subparagraph (i), that the child would have received had the testator included all omitted after-born and after-adopted children with the children to whom devises were made under the will and had given an equal share of the estate to each child.

(iii) To the extent feasible, the interest granted an omitted after-born or after-adopted child under this section must be of the same character, whether equitable or legal, present or future, as that devised to the testator's then-living children under the will.

(iv) In satisfying a share provided by this paragraph, devises to the testator's children who were living when the will was executed abate ratably. In abating the devises of the then-living children, the court shall preserve to the maximum extent possible the character of the testamentary plan adopted by the testator.

(b) Neither subsection (a)(1), subsection (a)(2), nor subsection (c) applies if:

(1) it appears from the will that the omission was intentional; or

(2) the testator provided for the omitted after-born or after-adopted child by transfer outside the will and the intent that the transfer be in lieu of a testamentary provision is shown by the testator's statements or is reasonably inferred from the amount of the transfer or other evidence.

(c) Except as provided in subsection (b), if at the time of execution of the will the testator fails to provide in his [or her] will for a living child solely because he [or she] believes the child to be dead, the child is entitled to share in the estate as if the child were an omitted after-born or after-adopted child.

(d) In satisfying a share provided by subsection (a)(1), devises made by the will abate under Section 3-902.

(n91)Footnote 802. U.P.C. § 2-803(b) and (c). The provisions state that:

(b) [Forfeiture of Statutory Benefits.] An individual who feloniously and intentionally kills the decedent forfeits all benefits under this Article with respect to the decedent's estate, including an intestate share, an elective share, an omitted spouse's or child's share, a homestead allowance, exempt property, and a family allowance. If the decedent died intestate, the decedent's intestate estate passes as if the killer disclaimed his [or her] intestate share.

(c) [Revocation of Benefits Under Governing Instruments.] The felonious and intentional killing of the decedent:

(1) revokes any revocable (i) disposition or appointment of property made by the decedent to the killer in a governing

instrument, (ii) provision in a governing instrument conferring a general or nongeneral power of appointment on the killer, and (iii) nomination of the killer in a governing instrument, nominating or appointing the killer to serve in any fiduciary or representative capacity, including a personal representative, executor, trustee, or agent; and

(2) severs the interest of the decedent and killer in property held by them at the time of the killing as joint tenants with the right of survivorship [or as community property with the right of survivorship], transforming the interests of the decedent and killer into tenancies in common.

(n92)Footnote 803. Accord, but against the majority, see *In re Estate of Foster, 320 P.2d 855 (Kan. 1958); Kempaner v. Thompson, 394 So. 2d 918 (Ala. 1981).*

(n93)Footnote 804. *See, e.g., Estate of Kramme, 143 Cal. Rptr. 542 (1978)* (involuntary manslaughter, husband took as heir); *Stickland v. Wysowatcky, 250 P.2d 199 (Colo. 1952)* (same); *In re Tarlo's Estate, 172 A. 139 (Pa. 1934)* (conviction may be required). But see N.C. Gen. Stat. § 31A-3(3) (plea of nolo contendere prevents inheritance by slayer).

(n95)Footnote 806. Unif. Prob. Code § 2-803(g):

(g) [Felonious and Intentional Killing; How Determined.] After all right to appeal has been exhausted, a judgment of conviction establishing criminal accountability for the felonious and intentional killing of the decedent conclusively establishes the convicted individual as the decedent's killer for purposes of this section. In the absence of a conviction, the court, upon the petition of an interested person, must determine whether, under the preponderance of evidence standard, the individual would be found criminally accountable for the felonious and intentional killing of the decedent. If the court determines that, under that standard, the individual would be found criminally accountable for the felonious and intentional killing of the decedent, the determination conclusively establishes that individual as the decedent's killer for purposes of this section.

CHAPTER 88 TESTAMENTARY TRANSFERS OF REAL PROPERTY

10-88 Thompson on Real Property, Thomas Editions § 88.13

AUTHOR: Professor Victoria Mikesell Mather School of Law St. Mary's University of San Antonio

§ 88.13 The Personal Representative, Probate and Administration.

[Go To Supp]

§ 88.13(a) Overview.

Modern probate law offers many options for the administration of estates. These administration options range along a scale of formality, reflecting the differing complexities of individual estates. As the complexity of issues involving estate assets increases, so does the need for consolidated oversight of the estate's administration. On the other hand, when the complexity of the estate is slight and the value low, the inherent costs and delay of formal administration outweigh its advantages, and an informal method of estate administration is desirable. A large percentage of today's estates, due to their simple nature and small amount of assets, pass to the decedent's heirs or will beneficiaries without any administration at all. n807 This absence of administration resembles the disbursement of estates under the Roman civil law system and its successors. n808 According to the civil law tradition, heirs take title to the decedent's property directly as tenants in common, but are personally liable to estate creditors, even if the creditors' claims exceed estate assets. Thus, citizens in civil law jurisdictions may avoid most of the burdensome features found in common law formal administration, cost, delay, and loss of privacy, but risk subjecting their personal assets to liability for the decedent's debts. n809 This process of direct descent without administration is termed "universal succession" and has been adopted in the United States as an option in the Uniform Probate Code and to a limited extent in California. n810

Under the common law, probate and administration were formal. n811 Real property passed directly to heirs or devisees, but personal property passed to an estate administrator. n812 This reflected the common law concern for the protection of creditors and the fact that real property was, in any event, generally beyond the reach of creditors. n813 Personalty was consolidated in a single source, the administrator, in order to expedite satisfaction of creditors' claims. n814 Only after creditors had been satisfied would distribution of any remaining assets to the heirs or devisees occur. Creditors in civil law jurisdictions, on the other hand, are less favored since they are required to trace the assets and either negotiate with or sue individual heirs or devisees to collect on their claims. n815 Thus, universal succession encouraged bargaining among those entitled to the estate's assets as a method of distributing the estate. n816

Modern civil law and common law jurisdictions have moderated the traditional procedures to a great extent in order to effect a better compromise between the twin goals of reducing cost, delay, and disclosure of private matters and the protection of creditors. n817 Today, many of the distinctions between these two systems have faded. n818 The

discussion below will demonstrate how statutory and case law changes in common law jurisdictions have broadened probate and administration options and increased the efficiency with which the goals of administration are served. Although the term "administration" is presented with some ambiguity in the literature, n819 traditionally, administration of an estate has referred to the activities of a person appointed to administer an estate, n820 and that is how the term will be used in this text.

§ 88.13(b) The Uniform Probate Code.

The Uniform Probate Code (the "Code") has set the backdrop for probate reform in this country since 1969. As will be seen below, the current version of the Code provides an array of options, allowing adopting jurisdictions to tailor probate and administration to the needs of particular estates. The Code has greatly expanded the authority of persons who administer estates where necessary and appropriate, while providing stringent mechanisms to address traditional concerns for creditors' rights. Currently, fifteen states have adopted the Code in full, with some amendments. n821 Most other states have either adopted portions of the Code, patterned their statutes after code provisions, or followed the underlying policy considerations involved in the evolution of the Code since adoption. n822

§ 88.13(c) The Personal Representative.

Although not important in the abstract, since duties and liabilities essentially remain the same, an understanding of the various designations for persons appointed to administer estates is useful and necessary and, additionally, helpful when consulting cases and commentaries on this subject. Although the Uniform Probate Code draws all administrators of estates, including executors, under the appellation, "personal representative" n823 two fundamental designations for personal representatives remain alive and well. A personal representative named in a will is titled an executor; executrix is often used when a woman serves, though this practice may be fading. n824 A person appointed who was not named in a will is referred to as an administrator, or administratrix. Thus, if a person dies intestate (without a will), or the appointment of an executor fails because of a failure to specify the executor, refusal of the appointment, death, lack of capacity or other impairment, the probate court will appoint a personal representative who will be called an administrator. Any difference between an executor and administrator arises primarily from the personal representative's source of power and duties. An executor's power and duties are generally enlarged or diminished by the testator's will. The administrator, a creature of statute, is generally empowered or restrained by statutory provisions.

Administrators, and in some instances executors, can be divided further according to the basis upon which they were appointed and their duties. Where the will provides for an executor but does not name who is to fill the position, or if the named person fails to qualify, the administrator appointed is an *administrator with will annexed*, or *administrator c.t.a.* (*cum testamento annexo*) An administrator appointed to complete an administration when the original personal representative has not done so is an *administrator of goods not administered*, or *administrator d.b.n.* (*de bonis non*) These two terms are combined when an administrator d.b.n. takes over from an administrator c.t.a., or an executor if the executor can no longer serve and the will did not name a successor executor, thus becoming an *administrator d.b.n.c.t.a.* (quite a mouthful!) Another type of administrator is the public administrator who is a permanent official appointed when no other suitable person can be found to serve. The *temporary administrator*, or *administrator pendente lite*, is one who serves temporarily during the interim between death and appointment of the general administrator. A *special administrator* may be appointed to deal with specific property as when an executor or named administrator has a conflict of interest with regard to estate property; for example, where an executor is also a beneficiary under the will. Finally, if the decedent owned property located in another state, an ancillary administrator, or ancillary executor, as opposed to the domiciliary administrator or executor, n825 may be necessary due to residency requirements of the situs state. An administrator or executor generally has authority only as to property located within the jurisdiction where she is appointed. n826

The personal representative, unknown to the civil law tradition where property passed directly to the heirs, n827 exists to protect the rights of estate creditors, heirs or devisees, and debtors by providing for the orderly distribution of the

decedent's estate. n828 Thus, discussion of the personal representative focuses on the nature, powers, and responsibilities of the office as related to the realization of the above goals. The reader should analyze the cited cases, statutes, and doctrines in light of these goals. As the discussion progresses, the reader should also keep in mind the historical policy debate shaping the development of modern probate and administration; the traditional common law support for creditors' rights versus the desire of heirs or devisees to expeditious receipt of their benefits. The methods adopted in response to this debate reflect attempts to effect a compromise between the prolonged, high cost process of formal administration, which tends to give greatest protection to creditors, and less formal procedures which lessen delay and, by lowering costs, provide greater distributions to heirs and devisees. Although an important component in the debate, the changing role of the personal representative is only one of several procedural innovations being implemented to address the above concerns.

§ 88.13(c)(1) Competency to Serve, Right of Appointment, and Renunciation.

To be competent to serve as a personal representative, a person must meet three qualifications: capacity, suitability, and residence. n829 These requirements are generally controlled by statutes, but some jurisdictions allow the probate court discretion to supplement the statutory requisites. Capacity requirements are minimal and generally a person capable of making a will is competent to serve. Age may be a factor. Under the Uniform Probate Code, no person under the age of 21 may serve as personal representative. n830 Additionally, a statutory suitability standard for serving is often applied. n831 The Uniform Probate Code, for example, provides that a person is disqualified if found unsuitable by the court in formal proceedings. n832 Factors to consider are character, integrity, soundness of judgment, and any criminal convictions. n833 A final hurdle to appointment may be a residency requirement. n834 When real property of the decedent is located in another jurisdiction, the failure to meet this qualification often requires the appointment of an ancillary personal representative. The ancillary personal representative must, of course, meet the competency requirements of the situs jurisdiction.

A person named as executor in a will or petitioning the probate court to serve as administrator should be appointed if the above qualifications are satisfied. n835 Absent a named executor, the court will appoint a personal representative with preference given to a statutory prioritized list of persons. n836 Preference is normally given to a surviving spouse first, followed by children, parents, siblings, and creditors. n837 Although appointment under these priority systems is often said to be of right, in reality such systems merely create a presumption that the preferred party should be appointed, which may be rebutted by evidence that the above qualifications for service as personal representative are not met. The court's discretion in rejecting a preferred party is generally limited to rulings on these qualifications and choices within a preferred class of entitled persons. n838 The court must appoint according to the statute if the preferred party meets those qualifications. In other words, an entitled person who is suitable may not be passed by in favor of a person with less priority simply because such a person is better suited for the position.

Service as a personal representative is a voluntary action and a party so nominated is given a reasonable time to refuse or renounce. n839 However, if a party wishes to refuse or renounce an attempted appointment, the party should do so immediately in order to avoid incurring any personal liability. As will be seen below in the discussion on duties, a personal representative is required to preserve and protect estate assets. Should any loss of value occur during a period when the personal representative had authority and opportunity to act, the personal representative may well be personally liable for the resulting loss. n840

§ 88.13(c)(2) Authority.

Whether nominated by the testator in a will or selected by the probate court, the personal representative is appointed by the court and is subject to the court's authority and supervision. n841 The nature of the personal representative's authority and the extent of supervision will vary with the form of administration employed.

Once appointed by the probate court, the authority of the personal representative to act is demonstrated by letters testamentary, in the case of an executor, or letters of administration issued by the court. Endorsements on these letters of authority will show the extent of that authority, that is, whether the personal representative is required to obtain court approval for the personal representative's actions. n842 This allows the personal representative to deal with third parties who are in possession of estate assets or who are creditors or debtors of the estate, making collections or paying claims and releasing such parties from further liability. n843 Because the estate is not a legal entity, n844 this also provides a method by which suits may be brought on behalf of the estate. n845 The personal representative, standing in the shoes of the decedent, may sue or be sued with regard, for example, to contracts of the deceased or torts committed or suffered by the deceased. n846 Depending on the particular statute of the jurisdiction, the authority to sue may extend to wrongful death actions. n847

§ 88.13(c)(3) Duties.

The personal representative may be responsible for the following general duties, depending on when and where the personal representative enters the administration proceedings: (1) offer the will, if any, for probate, (2) collect, inventory, and appraise the assets of the decedent, (3) manage those assets during administration, (4) file tax returns with the appropriate tax authorities, (5) receive and pay claims of creditors, including tax authorities, and (6) distribute any remaining assets to those entitled to receive them, whether by intestacy statutes or will. Ultimately, these general duties serve the underlying purpose of administration to liquidate the decedent's assets and wind up the decedent's affairs. n848 In addition, regardless of the designation or manner in which a personal representative is appointed, once the office is accepted, the personal representative has fiduciary responsibilities similar to those of a trustee, which govern the manner in which the general duties are carried out. n849

§ 88.13(c)(3)(i) General Duties.

The first chore for the personal representative upon appointment and probating the will is to inventory, collect, and appraise the assets and determine the liabilities of the deceased. Armed with letters testamentary or letters of administration, the personal representative should claim and take possession or control over all property subject to administration. Recall that once appointment has been accepted, fiduciary duties attach and the personal representative will be personally liable for losses due to improper retention or control of estate property by other parties. Although title to both personal and real property may pass directly to heirs or beneficiaries, the assets are still subject to administration needs. n850 Thus, the personal representative must quickly determine the extent of the estate's assets and liabilities and take command of property needed for proper administration.

Some assets often overlooked are those items associated with the decedent's person, e.g., watches, rings, contents of wallet/purse, etc.; safe deposit boxes; home lock boxes; bank accounts; stocks and bonds; uncashed checks or accruals from sources such as trusts, social security, pensions, wages, or rents; land situated in other jurisdictions; contents of the home or office; causes of action; insurance; contracts; joint ownership property; invalid inter vivos gifts; monies owed

by debtors of the deceased; and debtor's business interest. n851 Because many of these items may require prompt attention in order to preserve their value, time is of the essence in cataloging the deceased's property. For example, statutes of limitation may require that the personal representative take immediate action with respect to certain causes of action. The personal representative must also be aware of the possibility of misappropriation or misplacement of assets.

Once timely inventory and collection of the assets is made, the personal representative must turn attention to appraising and managing those assets. Appraisal is required to determine the extent, priority, and chronology of liquidation in order to pay funeral expenses, administration expenses, and estate creditors. Along these lines, the personal representative is required in many instances to identify creditors and give them notice of the estate proceedings. For unknown creditors, notice by publication will be sufficient, but for known or reasonably ascertainable creditors, personal notice may be required. n852 In addition, notification to heirs and beneficiaries may be required to provide them an opportunity to challenge probate procedures or administration actions, and generally oversee their interests, if any, in the estate's assets.

After a determination of the value of the estate's assets and the nature and extent of claims against the estate, the personal representative has a duty to manage the estate in order to accomplish administration's ultimate goal of winding up the decedent's affairs, that is, liquidating the estate and satisfying claims against the estate from tax authorities, creditors and beneficiaries. Once again, delays in proper management of the decedent's assets can result in lost value and personal liability to the personal representative. The personal representative's management is subject to the concept of waste: avoidable depreciation of value or loss of potential value. Therefore, the personal representative should take care to ensure that property is appropriately insured even if the decedent had not done so. Protection against waste may also include avoidance of environmental liability under CERCLA and making appropriate tax elections.

The personal representative is also responsible for filling out and filing the decedent's last federal and state income tax returns, any estate income tax returns required during the period of administration, and the final estate tax return, and for payment of any amount due. n853 Other state tax duties may arise for the personal representative. n854 In filing the federal income tax return for the estate, the personal representative may elect to use either a calendar or fiscal year, a choice that may have important consequences to management of the estate. n855 Federal estate tax is submitted by filing form 706 with the IRS within nine months after decedent's death. n856 In addition, if the decedent owned a life insurance policy, form 712, supplied by the insurer, and a certified copy of the will must be filed along with form 706.

During this period, the personal representative may be required to submit reports and accounts to the court or beneficiaries. n857 All personal representatives, regardless of the level of court supervision, are generally required to submit an initial report containing an inventory and appraisal of assets and a list of claims against the estate. n858 Interim reports are sometimes required and a final report and accounting will be required to close out the administration. n859 Finally, after funeral expenses, administration expenses, tax liabilities, and creditors have been paid, any remaining assets are distributed to those persons entitled to receive them. n860 This is generally accomplished by an order of distribution issued by the probate court and based on the administrator's final report. n861 Once the final report has been accepted and the distribution approved, the personal representative is relieved of further responsibility or power to manage estate assets. n862 After closing, the personal representative is not subject to liability for losses except for liability for actions taken during administration of the estate. Such issues cannot be raised under the estate administration, but must then be raised in a separate action.

LEXIS: personal representative! w/30 dut! or responsibilit! w/50 estate or testament!

§ 88.13(c)(3)(ii) Fiduciary Duties.

As mentioned previously, all personal representatives are subject to fiduciary duties with respect to the estate's beneficiaries and creditors. n863 These fiduciary duties mirror those of a trustee with the caveat that the personal representative, rather than investing and looking to the future of the assets, is responsible for winding up the estate and liquidating assets to pay claims. n864 Thus, the personal representative's investment powers and duties are sharply restricted compared to those of the trustee, and are to be implemented only to the extent necessary to preserve the estate's assets for the short time needed to wind up the estate's affairs. n865 This is true even when the period of winding up is inordinately long; the personal representative, unlike the trustee who may have a duty to manage the assets with an eye to profit, is confined to preserving the value of the estate and has been found to be in breach of that duty where the sole purpose of a management action is to obtain a profit on an estate asset. n866 Keeping in mind this fundamental difference, a personal representative has the fiduciary duties of confidentiality, loyalty, care, recordkeeping, and management. These basic fiduciary duties cannot be removed by the testator, but are required regardless of the amount of discretion provided for in managing the estate's administration. n867 After all, the personal representative is fiduciary to the creditors and beneficiaries, not the testator; the testator cannot waive the rights of these other parties.

The personal representative owes a duty of confidentiality with respect to the estate's affairs. The personal representative should, therefore, never disclose information concerning the estate, except to the extent required for proper administration. n868 A duty of loyalty is required of the personal representative. The duty of loyalty, also referred to as the duty of faithfulness, requires the personal representative to avoid conflicts of interest and self-dealing with the estate. The executor or administrator cannot favor personal interests, but must serve the interests of the creditors and beneficiaries only. Therefore, the personal representative cannot profit or obtain an advantage in dealing with the estate. n869 As mentioned above, a special administrator may be required to oversee transactions between the estate's primary personal representative and the estate, its creditors, or beneficiaries, or whenever a conflict of interest arises between the personal representative's own affairs and the administration of the estate. The personal representative must also avoid commingling of estate assets. If assets are commingled, the burden of showing the portion attributable to the estate is on her. Any increases in the value of commingled property will be attributed solely to the estate assets, since the personal representative cannot personally profit in dealing with estate assets.

Subsumed under the duty of loyalty is the duty of impartiality. Pursuant to this duty, the personal representative cannot favor one, or a set of beneficiaries, over another. n870 The duty is owed equally to all beneficiaries. n871 The duty of impartiality may arise when tax liabilities must be spread among beneficiaries. n872 Impartiality and self-dealing are implicated concurrently when the executor or administrator is also a creditor or beneficiary of the estate.

The personal representative also has a duty to administer and manage the estate and must do so even in the absence of compensation. The duty to employ reasonable care, skill, prudence, and diligence is the fiduciary duty that accompanies and governs the personal representative's management of estate assets. The personal representative should act in managing the estate as a prudent person would act in the management of their own affairs. This duty, paralleling that of the trustee, forbids speculative investments. Additionally, the personal representative is constrained by the duty to liquidate, rather than continue an investment for profit. n873 Mere error in judgment, however, is insufficient to constitute a breach of duty. The personal representative's actions are to be judged in light of the circumstances at the time of the action, not in light of the actual outcome of that action. Thus, if a reasonably prudent person would make a certain disposition of assets, the personal representative will not be personally liable simply because that action ultimately resulted in a loss of value. As mentioned above, the personal representative, in applying these management concepts in protecting and preserving the estate, may be required to insure uninsured assets, provide that previously insured assets remain insured through transfer of title and reissuance of policies, or employ other methods of asset preservation.

In employing reasonable care and skill, the personal representative is under a duty not to delegate discretionary tasks. The duty not to delegate requires that the personal representative fulfill her duty to personally manage the estate. n874 Administrative or ministerial tasks may be delegated, but the personal representative remains responsible for the actions

of such delegates under a duty to properly select, or retain, and supervise. n875 The ability to delegate administrative or ministerial tasks allows the personal representative to hire appraisers, accountants, or attorneys as required to evaluate or give expert advice. n876 The ultimate decisions and responsibility for those decisions, although based on information acquired through such agents, must rest with the personal representative, who may not employ such help when a reasonable lay investigation would produce the required information or determine the appropriate action. n877 In evaluating whether the personal representative has exercised reasonable care and skill, reliance on professional evaluations or advice is a factor to be weighed, but is not determinative of the personal representative's liability. Finally, in the case of co-executors or co-administrators, the personal representative cannot simply sit idle while other fiduciaries manage the estate. n878 The personal representative's duty is personal and affirmative, not passive, and the duty is to remain aware of actions taken with respect to the estate and to object to any unauthorized or inappropriate actions, in order to protect the personal representative against personal liability. n879 Accurate records must be maintained by the fiduciary in order to track assets and assure the court and the beneficiaries that the personal representative has fulfilled all obligations. n880 Should a question arise as to the value or disposition of an asset, the personal representative will be liable to the extent of any uncertainty. The personal representative carries the burden of showing proper management and disbursement, and any doubt will be resolved in favor of the beneficiaries.

§ 88.13(c)(4) Powers.

The scope of the personal representative's powers is highly dependent on the form of administration. In a formal administration, where court supervision is at its highest level, the personal representative will have few, if any, real powers to manage or dispose of estate assets. n881 Court approval is required for nearly every transaction, either prior to the transaction, after the transaction, or both. n882 On the other hand, personal representatives in independent administrations, similar to outright title owners, have far-reaching powers and can dispose of assets without prior court approval and subject only to a subsequent court challenge by a beneficiary or creditor. n883 Potential sources in determining what powers the personal representative is to have and how they will be exercised are traditional statutory sources, the Uniform Probate Code, and the will itself. n884

Traditional statutory powers of the personal representative facilitate the duties to collect, pay, and distribute. These powers allow the personal representative to take possession of personal property of the decedent, collect debts, and enforce claims of the estate. The specific powers may vary among the jurisdictions. With respect to realty, some statutes direct the personal representative to take realty and subject it to management as with personalty, some statutes pass realty directly to heirs or devisees, and some give discretion to the personal representative to take and retain realty when needed to satisfy estate debts. Nearly all states allow the personal representative to sell land to pay debts on a showing of necessity and a court order. Finally, it should be noted that some rights associated with real property are in the nature of personalty and pass to the personal representative for administration. These personalty rights in real property include situations where decedent was a lessee for a term of years, a vendor in a contract for the sale of land, a lessor with rentals due, or party to a cause of action with respect to land arising inter vivos.

Under the Uniform Probate Code, which provides for unsupervised administration, the powers of the personal representative may be dramatically increased. n885 Although title to both real and personal property passes directly to heirs or beneficiaries under the Uniform Probate Code, all such property is subject to prior claims and administration. n886 The unsupervised administrator has all the powers of an absolute owner, subject to the fiduciary duties as mentioned above. n887 No notice, hearing, or court order is required for the unsupervised administrator to act with respect to estate property. n888 On the other end of the spectrum, the supervised administrator may have little power to act without court approval. n889 Endorsements on the letters of administration show the nature and extent of the

administrator's power.

A final source of powers for the personal representative may be found in the deceased's will, if any. Although the ability of the testator to confer administrative powers on the personal representative is broad, the testator may not authorize actions which are illegal, contrary to public policy, or inconsistent with the personal representative's statutory duties. n890 The testator may, for example, authorize the sale of estate lands without judicial approval or supervision, or the selection of certain tax elections and adjustments. As noted above, however, the testator cannot relieve the personal representative of basic fiduciary duties.

The personal representative must be aware of the extent of the personal representative's powers. Actions in excess of granted, legal powers (ultra vires acts) that result in loss are chargeable to the personal representative regardless of care, diligence, prudence, or good faith. n891

COMPUTER-ASSISTED RESEARCH

LEXIS: personal representative! w/15 power! w/50 testator!

§ 88.13(c)(5) Remedies for Breach of Duty or Unauthorized Acts.

Various remedies are available to the beneficiaries should the personal representative breach a fiduciary duty or act beyond the scope of the powers. The primary vehicle for holding the personal representative answerable for such a breach is for the beneficiary to make a complaint of maladministration and an objection to the personal representative's account. If the personal representative is found to have caused a loss to the estate, through mismanagement or ultra vires acts, an assessment may be made against the personal representative, which is called a surcharge. The surcharge is collectible from the personal assets or bond of the personal representative. Mere errors in judgment will not constitute mismanagement; mismanagement occurs only when the personal representative acted unreasonably. On the other hand, the personal representative is completely liable for ultra vires acts without regard to care, diligence, prudence, or good faith.

Should the personal representative engage in self-dealing, the beneficiaries are entitled to either avoid or ratify the act. Any profits made from self-dealing ratified by the beneficiaries will belong to the estate: the personal representative will not be allowed to profit from self-dealing no matter how fair the transaction.

Finally, a personal representative may be removed or denied compensation for breach of a fiduciary duty. n892

COMPUTER-ASSISTED RESEARCH

LEXIS: personal representative! w/15 breach! w/30 remed! w/15
beneficiar!

§ 88.13(c)(6) Resignation, Removal, and Replacement.

Absent statutory authority or will provision, a personal representative may not resign without leave of court, n893 although some jurisdictions allow an agreement to resign between interested parties and the personal representative. Such an agreement to resign is, in effect, a removal. Removal, otherwise, is usually governed by statute, although some jurisdictions give the probate court discretion to go beyond statutory grounds for removal. n894 Among the grounds for removal are: subsequently arising incapacity, such as illness or a declaration of mental incompetence; failure to file an inventory or accounting as required; default on a requirement to post bond, and interests hostile or adverse to the estate beneficiaries. n895 In addition, removal can occur for misconduct by the personal representative in exercising her fiduciary duties: mismanagement, waste, unfaithfulness, maladministration, etc. The probate court may also "remove" a

personal representative by revoking letters of administration or letters testamentary improperly issued. n896 Unless the will provides for a substitute executor, the probate court will replace a personal representative, who dies or is removed, according to the same procedures for the initial appointment discussed above. n897

LEXIS: personal representative! w/15 resign! or remov! or replace! w/50
testament!

§ 88.13(c)(7) Compensation.

Fees for serving as personal representative are governed by the will or by statute. If a fee is set by the will, the personal representative may renounce the fee, before qualifying, and take a reasonable fee set by statute. n898 For personal representatives subject to a statutory fee structure, the standard measure for compensation generally falls within one of four categories: (1) a true commission, that is, a fixed percentage of the estate's value, (2) a reasonable fee determined by the court on the basis of services rendered, (3) a fixed fee, or (4) the personal representative determines the personal representative's own fee and pays himself or herself subject to court review for reasonableness. n899 Such fees are deductible for federal estate tax purposes. n900 An attorney acting as personal representative is entitled to fees for both positions under the majority view, but a minority of jurisdictions consider this self-dealing. n901 A personal representative may waive the fee in whole or part, but issues are raised in that instance about whether waiver constitutes a gift to the estate subject to a gift tax, and whether the personal representative incurs income tax liability. n902 Therefore, any waiver of fees should occur before services are rendered. If the executor is a beneficiary under the will, devise in lieu of the fee will be income, unless the executor is not required to perform in order to take the devise. n903

LEXIS: personal representative! w/30 fee! or compensat! or commission!

§ 88.13(d) Probate and Administration Options.

Probate and administration are two independent proceedings, with probate applying only when a will is in issue. If the decedent died intestate, that is without a will, proceedings or actions to administer the estate can begin immediately. However, if the decedent left a will, the first issue is probate of the will.

§ 88.13(d)(1) Probate.

As mentioned above, a party named in the will to administer the estate has the duty to offer the will for probate if the party is aware that the will names the party as executor. n904 This may require the named executor, when aware of the existence of the will and the nomination, to locate the will, file it with the probate court, and submit a petition to admit the will to probate. n905 Generally, a party in possession of the will of a deceased person has an obligation to file the will with the appropriate court. n906 Even though the will has been located and filed by another, the personal representative must petition the court for its admission to probate if the filing party has not done so. A failure or delay in doing so, without a renunciation of the appointment, could lead to personal liability for waste to estate assets during the delay.

Two basic methods for probate, solemn form and common form, occur among the various jurisdictions and a third method, informal probate, is found in some jurisdictions as an additional procedure. Probate in solemn form requires notice to interested parties, who may then challenge or object to the will's validity at a contested hearing to determine whether the will is to be admitted to probate. n907 Once the decree admitting the will to probate issues, parties with notice of the contested proceeding are barred from further challenges. Probate in common form, on the other hand,

allows the will to be probated in an *ex parte* proceeding where the petitioner provides *prima facie* evidence of the will's validity. Once the will is admitted to probate, notice is given to interested parties who then have a statutorily limited time period for contesting the will and challenging probate. After the period of limitations has passed, parties who had notice of probate are barred from further challenges. In either situation, of course, if the will is successfully challenged and no other will is probated, the decedent becomes intestate and proceedings advance to the administration stage.

The third method of probate, informal probate, has been adopted in several jurisdictions and allows an uncontested will to be probated on a verified petition or affidavit presented to the appropriate officer, generally a registrar or judge. n908 Similar to the foregoing, at least one jurisdiction allows the probate of a will solely as a muniment of title. n909

§ 88.13(d)(2) Administration.

§ 88.13(d)(2)(i) Avoiding Formal Administration.

Once the will has been probated or intestacy determined, proceedings to administer the estate may begin. The common law presumed that formal administration was necessary. However, because formal probate proceedings are costly and time-consuming, both the common law and the various states, by statute, now provide alternatives where appropriate. Since the primary purpose of administration is the protection of creditors, these alternatives revolve around whether the estate is solvent, the value of assets available, and the existence of creditors. When creditors are non-existent or have worked out a settlement with the estate beneficiaries, no administration should be necessary. Likewise, if the estate is insolvent, or is of so little value that no assets will remain for creditors once homestead, family allowances, or exemptions are applied, administration would be futile and further erode the funds available to the beneficiaries.

The first and most obvious method of avoiding formal administration is to avoid leaving anything to administer. This doesn't mean trying to die broke! What is meant here are methods of non-probate transfer. Many statutory mechanisms exist for disposing of property in a non-probate fashion. Such mechanisms include "payable on death" beneficiary designations on life insurance policies, creation of joint survivorship property, revocable inter vivos trusts, especially those with pour over provisions, and inter vivos gifts, to name a few. n910 The second of these avoidance mechanisms is to employ a non-administrative method. One non-administrative method is the family settlement, which is generally favored among the jurisdictions. n911 This option is available in some states even to the extent of an agreement not to probate a will. n912 This allows estates with no creditors, or where the family members have already informally satisfied any creditors' claims, to be distributed according to an agreement among family members, rather than by intestacy statutes or the will.

In addition, under some statutes, certain types of property may be collected upon affidavit, stating that the claimant is entitled to the property and that there are no creditors or that the claimant has paid such creditors as exist, will pay creditors from the property received, or will otherwise be liable to subsequently arising creditors. n913 Such simplified procedural mechanisms permit the claimant to collect the property and release the obligor from further liability without court proceedings. n914 These statutes generally apply to small bank accounts, automobile certificates of title, wage claims, or specific sums of money, to name a few examples. n915

A third mechanism for removing an estate from formal administration is the small estate or summary administration procedures found in all jurisdictions. These generally cover the situation where the estate is insolvent or consists only of exempt property. n916 Such statutes generally provide that estates valued at less than a statutorily set amount may be administered according to more streamlined, less elaborate procedures, such as collection by affidavit. n917 Because the primary purpose of administration is the protection of creditors, it has been argued that summary administration should be available for any estate where creditors are non-existent, regardless of the amount of the estate. Since these statutes generally exclude non-probate assets, and in some instances homestead, exempt personal property, and family allowance, even relatively large estates may fall within the purview of small estate statutes. n918 Generally, the procedure begins with a petition specifying that a statutorily specified number of days has passed since death, that no

formal administration has begun, that the estate's value is less than the statutory amount, and that the petitioners are beneficiaries under the will or intestacy statutes. In some jurisdictions, a registrar issues an affidavit demonstrating the authority of the petitioner to collect property of the deceased. In other states, a court order or decree of distribution serves the same function. If real property is involved, such an order or affidavit may be filed as a muniment of title in order to establish a marketable chain of title for the heir or beneficiary.

§ 88.13(d)(2)(ii) Administration with a Personal Representative.

None of the above mechanisms require a personal representative and may be implemented, indeed must be implemented in some instances, by the beneficiary. However, some situations call for consolidation of assets in a single source of authority and, in these cases, a personal representative will become necessary. The need for a personal representative, administration, and court involvement may arise in the following situations: (1) family members are in dispute over distribution, (2) third parties refuse to recognize title to estate property in heirs or devisees, (3) creditors' claims exist, (4) tax responsibilities are complicated, (5) suit must be brought to collect from estate debtors. n919

Once a person is appointed as personal representative, the person is generally required to make an oath n920 and post bond. n921 Although an oath is required, a failure to take such an oath does not relieve the personal representative from future liability. n922 For executors, the bond requirement ordinarily may be waived by the testator in the will. On the other hand, administrators, or executors where the will does not expressly waive the bond requirement, commonly are required to post bond, except in the case of a corporate representative who may be excluded from the bond requirement by statute. n923 The Uniform Probate Code ("UPC") changes the common law bond requirements by providing that no bond is required in informal administrations unless the will so requires, an interested person petitions for bond, or a special administrator has been appointed. For formal administration, the Uniform Probate Code makes the bond discretionary unless waived by the will. n924

In an effort to balance the two competing policies underlying distribution of the decedent's estate, some jurisdictions provide for informal, unsupervised, or independent administration. n925 This method of fulfilling administration requirements has long existed in Texas and Washington and is now incorporated, as an option, into the Uniform Probate Code. n926 In Texas, for example, the testator may expressly provide that the executor named is to be independent of court supervision. n927 If the will does not so provide, the executor will administer the estate supervised by the probate court. In addition, an independent administrator may be appointed by the court if all beneficiaries under the will agree. Under independent administration, the independent administrator or executor has the widest ranging powers over the broadest range of assets of any administration process. n928 The independent administrator or executor generally has all the powers of true ownership, subject only to the fiduciary duties. n929 This allows the independent personal representative to proceed without court supervision or approval in most instances, thus lessening the costs and delays inherent in such supervision, while providing protection for creditors by virtue of the fiduciary duties attached to the office. n930 Addressing the criticism that independent administration can be too independent at times, the Uniform Probate Code provides authority for the personal administrator to petition the court for determination of specific issues when necessary, while leaving the bulk of estate administration unsupervised. n931

When circumstances arise which require a more formal administration of the decedent's estate, court involvement becomes necessary and a supervised or dependent administration is undertaken. Under dependent administration, the personal representative, executor or administrator has very limited power, if any, to deal with estate assets without prior court approval, subsequent court approval, or both. n932 As an example, under Texas law n933 a dependent administrator, or her attorney, in order to sell real property must:

(1) file an application for sale which describes the property or interest therein to be sold, the condition of the estate and the amount of claims against it, the property on hand liable for payment of those claims, and any facts tending to show the necessity or advisability of the sale;

(2) set and appear at a hearing, with prior notice to interested parties, to obtain a court order specifying the terms of the sale;

(3) sell the property and report the sale to the court within 30 days; (4) set and appear at a second hearing for court approval of the sale; and

(5) convey the deed to the purchaser. n934

The above example amply demonstrates the attendant costs and delays of formal administration and the widespread frustration and criticism of probate in America. It is likely, therefore, that efforts to modify probate codes to be more efficient and cost-effective will continue, while still addressing the need for assurance of creditor payment.

§ 88.13(e) Ante-Mortem Probate.

Ante-mortem probate, or living probate, is a method of probating a will that permits the will to be validated during the testator's lifetime. Forms of ante-mortem probate date back to biblical times, and the European civil law tradition provides for an authenticated will prior to death. n935 Although it is a relatively recent development in United States wills law, Michigan had a form of ante-mortem probate statute as early as 1833, n936 and there was a resurgence of interest in the 1930s. n937

The primary purpose of allowing probate during the lifetime of the testator is to discourage frivolous will contests by disgruntled would-be heirs and devisees. Also, a form of living probate helps to ensure that the testator's intent is clear, and that the testator's wishes are honored, since if ambiguities arise, the testator is available to clarify the issues. In the absence of ante-mortem probate, testators traditionally use will substitutes (joint tenancy, gifts) or *in terrorem* clauses to avoid will contests and to make their wishes clear. n938 In the modern law, three basic forms of ante-mortem probate have been proposed, although only one, the contest model, has been adopted in any state. All three forms were originally proposed in the mid- to late-1970s.

The contest model was proposed by Professor Howard Fink. n939 This is an adversarial model. The testator submits the will to the court for a declaratory judgment. All would-be heirs, as well as the will beneficiaries, are given standing to contest the will. If the will is declared valid, it is filed with the court. In order to revoke the will, the testator must go back to court. A version of this model has been adopted in Arkansas, North Dakota, and Ohio. n940 One problem with this system is that the contents of the will become "public" knowledge, at least to the family. If the testator anticipates problems with family members, the discussion of the will during the testator's lifetime may lead to strained family relationships. Or, in the alternative, legitimate complaints about the will may not be raised because family members are reluctant to rock the boat. The other two methods avoid this problem, to a certain extent.

The conservatorship model was proposed by Professor John Langbein. n941 This is also a declaratory judgment procedure, except that the prospective heirs and beneficiaries are represented by a conservator who litigates their claims. The model is still somewhat adversarial and the will is still not private, but this model interposes a "screen" between the parties.

Finally, the administrative model takes this a step further and has an administrative law judge review the will *in camera*. The administrative system was proposed by Professors Gregory Alexander and Albert Pearson. n942 This is an *ex parte* proceeding in which the prospective heirs and beneficiaries are still represented, through a guardian ad litem. The guardian does not represent specific persons, but is more in the role of "a court-appointed special master." n943 The

contents of the will are not disclosed unless it is determined to be necessary. The right to contest a will approved by ante-mortem probate procedures would be sharply limited. The authors believe that the previously discussed two models are merely "accelerated will contests," and that this system would be more attractive to potential testators. n944

All three versions have some common problems. First, any sort of will contest (pre- or post-death) can be expensive. It is also more difficult for a testator to change a disposition, since revisions must go through the entire process again. Also, questions have been raised about notice and standing; exactly which heirs are we talking about, since a living person has no heirs, because one's heirs are not determined until the time of death. n945 The class of heirs may undergo substantial change between the time the will is executed and the time of death. Moreover, if actual notice to heirs is required, the search and mailing costs can be high. On the other hand, if interest in ante-mortem probate continues, and particularly if a Uniform Act is approved, n946 then the availability of living probate is likely to increase.

LEXIS: ante-mortem or living w/2 probat!

§ 88.13(f) Disclaimers.

A disclaimer, also known as a renunciation, is a refusal to accept a gift under a will, or to accept an inheritance in the case of intestacy. At common law, an heir could not renounce, on the theory that the transfer of property in intestacy occurred automatically, by operation of law. n947 Even at common law, a will beneficiary could renounce.

Today, most states have some sort of disclaimer statute. Usually the effect of the disclaimer is to treat the disclaiming beneficiary or heir as if he or she predeceased the decedent. n948 The effect of the disclaimer should be limited to the interest disclaimed, not to the estate as a whole. The right to disclaim is personal to the party disclaiming, and cannot be exercised on behalf of a deceased beneficiary. However, the Uniform Probate Code does permit the right to disclaim to be exercised by the personal representative of a deceased party. n949

The National Conference of Commissioners on Uniform State Laws approved three different disclaimer acts: the Uniform Disclaimer of Property Interests Act, n950 the Uniform Disclaimer of Transfers by Will, Intestacy or Appointment Act, n951 and the Uniform Disclaimer of Transfers Under Nontestamentary Instruments Act. n952 The 1990 version of the Uniform Probate Code incorporates the Uniform Disclaimer of Property Interests Act, n953 and the pre-1990 Code incorporated the Uniform Disclaimer of Transfers by Will, Intestacy or Appointment Act. n954 The new section is broader, in accord with the 1990 Code revisions making its provisions applicable to nonprobate transfers. n955 Disclaimers are particularly important today as a form of post-mortem estate or estate-tax planning. n956 A proper disclaimer under the Internal Revenue Code n957 can benefit the estate or the beneficiary, by taking advantage of the marital deduction for estate tax purposes, or to qualify a charitable remainder for deduction, or to reduce estate or income taxes for the renouncing beneficiary or heir.

In order to be a qualified disclaimer under the tax laws, the disclaimer must be in writing. It must be made within nine months after the creation of the interest, or within nine months after the disclaimant reaches age 21. The person disclaiming cannot accept the property disclaimed or any benefits of the property. Finally, the disclaimant cannot disclaim in favor of any particular charity or other individual. n958

§ 88.13(g) Non-claim Statutes.

Most states have a statute barring claims of creditors against an estate, unless the claim is filed within a certain period of time after notice is given to the creditor. n959 Usually the non-claim period is fairly short. For example, the Uniform Probate Code allows creditors four months to present their claims. n960 The short period is designed to facilitate settlement of the estate in a timely manner.

The notice should be given directly to known creditors, and notice by publication is sufficient for unascertainable creditors. n961

A non-claim statute should be distinguished from a statute of limitations. Non-claim statutes run separately from the non-claim provisions. For example, a claim might be timely under a non-claim statute, but be barred under an applicable statute of limitations, or conversely, a claim might be barred with regard to the estate under a non-claim statute, but still be allowable under the normal statute of limitations. The Uniform Probate Code provides a one-year statute of limitations for claims arising before the death of the decedent. n962 The statute starts to run at the decedent's death. The Code also tolls any other relevant statute of limitations for four months after the death of the decedent. n963

Rev. 631, 633 & 641-42 (1959)* (stating heirs or legatees sued severally for proportion of decedent's debts and discussing methods by which creditors obtain satisfaction in French civil law).

(n10)Footnote 816. Cf. John H. Martin, Justice and Efficiency Under a Model of Estate Settlement, *66 Va. L. Rev. 727, 758-60 (1980)* (discussing settlement without administration as bargaining); *Id. at 771-72* (noting Louisiana civil law system of acceptance without administration facilitates bargaining as means of settlement).

(n11)Footnote 817. *See* Eugene F. Scoles, Succession Without Administration: Past and Future, *48 Mo. L. Rev. 371, 373 (1983);* L. Neville Brown, Winding Up Decedents' Estates in French and English Law, *33 Tul. L. Rev. 631, 631 (1959).*

(n12)Footnote 818. Eugene F. Scoles, Succession Without Administration: Past and Future, *48 Mo. L. Rev. 371, 373 (1983).*

(n13)Footnote 819. *See, e.g.*, Jesse Dukeminier, Jr. & Stanley M. Johanson, Family Wealth Transactions: Wills, Trusts, Future Interests, and Estate Planning 89 (1972) (using the terminology "informal administration by family settlement"). Consider that the UPC incorporates a provision for "succession without administration" that parallels in scope and procedure "informal administration by family settlement" (emphasis added in both). Compare U.P.C. § 3-312 to 3-322, 8 U.L.A. 256-69 with Jesse Dukeminier, Jr. & Stanley M. Johanson, Family Wealth Transactions: Wills, Trusts, Future Interests, and Estate Planning 89 (1972).

(n14)Footnote 820. *See* Thomas L. Waterbury, Materials on Trusts & Estates (American Casebook Series) 475 (1986) (citing Eustace W. Tomlinson, Administration of Decedents' Estates 35 § 1.10 (2d ed. 1978) (asserting administration is personal representative's activities). But see Jesse Dukeminier, Jr. & Stanley M. Johanson, Family Wealth Transactions: Wills, Trusts, Future Interests, and Estate Planning 89 (1972) (asserting inappropriate to say no administration in family settlement situation); Basye, Dispensing with Administration, *44 Mich. L. Rev. 329, 331 (1945)* (noting activities of heirs in universal succession might be regarded as administration). Indeed, the terms "universal succession" and "succession without administration" would have no particular meaning or significance if administration referred to the activities beyond those of the personal representative. It is the personal representative that gives meaning to the historical distinctions, even if waning, between the civil and common law systems. The personal representative represents the essence of the common law concept of administration.

(n15)Footnote 821. The fifteen states are, with date of adoption: Alaska (1972), Arizona (1973), Colorado (1973), Florida (1974), Hawaii (1976), Idaho (1971), Maine (1979), Michigan (1978), Minnesota (1974), Montana (1974), Nebraska (1974), New Mexico (1975), North Dakota (1973), South Carolina (1986), and Utah (1975). 8 U.L.A. 1 (Supp. 1993); see also Lawrence H. Averill, An Eclectic History and Analysis of the 1990 Uniform Probate Code, *55 Alb. L. Rev. 891, 900 (1992).*

(n16)Footnote 822. *See* Lawrence H. Averill, An Eclectic History and Analysis of the 1990 Uniform Probate Code, *55 Alb. L. Rev. 891, 900 (1992)* (noting nearly all other states have incorporated U.P.C. piecemeal); see also Wellman, Recent Developments in the Struggle for Probate Reform, *79 Mich. L. Rev. 501, 501-02 (1981).*

(n17)Footnote 823. U.P.C. § 1-201(36), 8 U.L.A. 10. A "general personal representative" excludes special administrator. Id. For convenience and clarity, the term "personal representative" from the U.P.C. will be used to refer to both administrators and executors in the text. Any distinctions between the two will be noted separately, as necessary.

(n18)Footnote 824. *See* Jesse Dukeminier & Stanley M. Johanson, Wills, Trusts, and Estates 32-33 (4th ed., Little Brown 1990).

(n19)Footnote 825. The domiciliary administrator is sometimes referred to as the general, domestic, or primary administrator. A foreign administrator is "one appointed or qualified under the laws of a foreign state or country, where the decedent was domiciled." Black's Law Dictionary 43 (5th ed. 1979). Black's lists 13 different designations for administrations of estates. Id. at 41-42.

(n20)Footnote 826. A personal representative generally cannot maintain derivative actions, that is, those of the decedent, outside the jurisdiction of her appointment. She can, however, maintain her own actions as personal representative -- for example, a suit to secure damages for misappropriated estate property.

(n21)Footnote 827. Basye, Dispensing with Administration, *44 Mich. L. Rev. 329, 331 (1945)* (asserting personal representative unknown to civil law tradition); see also Jesse Dukeminier & Stanley M. Johanson, Wills, Trusts, and Estates 48 (4th ed. 1990) (stating no personal representative in civil law universal succession).

(n29)Footnote 835. Persons named in wills are especially favored and disqualification provisions are narrowly construed. Thomas L. Waterbury, Materials on Trusts & Estates (American Casebook Series) 548 (1986) (noting qualifications for executors may be less stringent than for administrators); Eugene F. Scoles & Edward C. Halbach, Jr., Decedents' Estates and Trusts 577 (3d ed. Little Brown 1981); see *In re Svacina's Estate, 1 N.W.2d 780, 782-83 (Wis. 1942)* (construing statutory provision regarding qualification of named executor).

(n30)Footnote 836. *See also* U.P.C. § 3-203, 8 U.L.A. 239-40 (providing prioritized list for persons seeking appointment as personal representative). Interest in the estate and relationship to the decedent are the primary considerations in establishing the list. Eugene F. Scoles & Edward C. Halbach, Jr., Decedents' Estates and Trusts 577 (3d ed. Little Brown 1981). Gender preference in the probate court's selection of an administrator is constitutionally impermissible as a violation of the equal protection clause of the *Fourteenth Amendment. Reed v. Reed, 404 U.S. 71, 77 (1971)* (striking down an Idaho statute affording a preference to males in appointment of administrators).

(n31)Footnote 837. Cf. U.P.C. § 3-203(a)(2)-(6), 8 U.L.A. 239-40 (providing prioritized list for persons seeking appointment as personal representative).

(n32)Footnote 838. 33 C.J.S. Executors & Administrators § 34 at 924 & § 46 at 946 (1942 & Supp. 1993). The probate court has significant discretion in choosing between applicants with the same priority. 33 C.J.S. Executors & Administrators § 36 at 932-34 & § 41 at 938-39 (1942 & Supp. 1993).

(n33)Footnote 839. 33 C.J.S. Executors & Administrators § 29 at 917 (1942 & Supp. 1993) (concerning executors); 31 Am. Jur. 2d Executors & Administrators § 225 (1989 & Supp. April 1993); cf. 33 C.J.S. Executors & Administrators § 47 at 953 (1942 & Supp. 1993) (concerning administrators). A person who has priority for appointment as administrator may waive the precedent right. Id. at § 47.

(n34)Footnote 840. *See* U.P.C. § 3-712, 8 U.L.A. 329 (providing that personal representative is liable for breach of fiduciary duty to same extent as trustee of express trust).

(n35)Footnote 841. *See* Jesse Dukeminier, Jr. & Stanley M. Johanson, Family Wealth Transactions: Wills, Trusts, Future Interests, and Estate Planning 80 (1972); Thomas L. Waterbury, Materials on Trusts & Estates (American Casebook Series) 475 (1986).

(n36)Footnote 842. Thomas L. Waterbury, Materials on Trusts & Estates (American Casebook Series) 546 (1986).

(n37)Footnote 843. Jesse Dukeminier, Jr. & Stanley M. Johanson, Family Wealth Transactions: Wills, Trusts, Future Interests, and Estate Planning 81-82 (1972).

(n38)Footnote 844. Eustace W. Tomlinson, Administration of Decedents' Estates 7 (1972).

(n39)Footnote 845. Jesse Dukeminier, Jr. & Stanley M. Johanson, Family Wealth Transactions: Wills, Trusts, Future Interests, and Estate Planning 82 (1972).

(n40)Footnote 846. *See* Thomas L. Waterbury, Materials on Trusts & Estates (American Casebook Series) 518 (1986); see also U.P.C. § 3-703, 8 U.L.A. 317 (providing for personal representative's standing to sue). Heirs are often unable to collect debts owed the estate because debtors fear additional liability to a personal representative appointed later. In addition, heirs often have no standing to sue to collect debts owed the estate, necessitating the appointment of a personal representative. This occurs because the absence of creditors entitled to the assets is often considered determinable only in a court proceeding and because the heir lacks title interest in the property. Eugene F. Scoles, Succession Without Administration: Past and Future, *48 Mo. L. Rev. 371, 377 (1983). See also* John Ritchie et al., Decedents' Estates and Trusts 1176 (6th ed. Foundation Press 1982); John T. Gaubatz et al., Estates and Trusts: Cases, Problems and Materials 601 (1989).

Giuliani v. Guiler, 951 S.W.2d 318 (Ky. 1997) (the personal representative had sole authority to bring the action, and the damages belonged to the estate of the deceased, to be distributed in accordance with the last will and testament, or, if none, in accordance with the laws of descent and distribution).

(n91)Footnote 897. Thomas L. Waterbury, Materials on Trusts & Estates (American Casebook Series) 549 (1986). The successor personal representative is often in a more precarious position than the original. In addition to the normal duties, the successor must inquire into the previous administrator's performance and compel redress for any breach of duty. A failure to seek redress or a negligent failure to detect a breach by the prior personal representative may lead to liability for the successor. Thus, a personal representative who replaces another should demand an accounting. Eugene F. Scoles & Edward C. Halbach, Jr., Decedents' Estates and Trusts 641 (3d ed., Little Brown 1981). Under the U.P.C., the personal representative of the deceased representative becomes a temporary administrator for the estate the deceased was administering and has a duty to preserve and protect, account for, and deliver that estate to the successor representative. U.P.C. § 3-609, 8 U.L.A. 305.

(n92)Footnote 898. U.P.C. § 3-719, 8 U.L.A. 341. The personal representative is, also, entitled to reimbursement for litigation expenses incurred on behalf of the estate. U.P.C. § 3-720, 8 U.L.A. 343.

(n93)Footnote 899. Thomas L. Waterbury, Materials on Trusts & Estates (American Casebook Series) 548 (1986); see also A. James Casner & Jeffrey N. Pennell, Estate Planning 147 (5th ed. 1988 & Supp. 1992). The U.P.C. provides that the personal representative pays him- or herself, subject to review by the court on petition of an interested party. U.P.C. § 3-719 & 3-721, 8 U.L.A. 341 & 349.

CHAPTER 88 TESTAMENTARY TRANSFERS OF REAL PROPERTY

10-88 Thompson on Real Property, Thomas Editions § 88.14

AUTHOR: Professor Victoria Mikesell Mather School of Law St. Mary's University of San Antonio

§ 88.14 Health Care Planning Devices.

[Go To Supp]

This section will discuss living will statutes, durable powers of attorney, and the disposition of body parts after death. There are also sample living will and durable health care power of attorney forms, as well as key provisions of the Uniform Anatomical Gifts Act, the Uniform Durable Powers of Attorney Act, and the Uniform Rights of the Terminally Ill Act in an appendix to this section.

§ 88.14(a) Living Wills.

The rather inaptly named "living will" is of course not a will at all, but a directive to health care providers about medical treatment during a terminal illness. These documents are to be executed when one is competent and able to make decisions, and usually provide that extraordinary measures to prolong life not be taken.

Most states have adopted some form of living will statute since California adopted the first such act in 1977. n964 States without living will statutes have sometimes allowed the use of a living will by court decision. n965 The Conference of Commissioners on Uniform State Laws has proposed the Uniform Rights of the Terminally Ill Act. n966 The perceived necessity for living wills comes from several sources: the aging of the population, n967 advances in medical technology, and the publicity surrounding such cases as *Cruzan v. Missouri Department of Health*. n968

In *Cruzan*, a young woman (Nancy) was in a persistent vegetative state for eight years following an automobile accident. Her parents sought to terminate artificial nutrition and hydration, but the hospital refused, and the Missouri Supreme Court found that clear and convincing evidence of Nancy's preference on this issue was not shown. n969 The United States Supreme Court affirmed, holding that the state could require clear and convincing evidence of the patient's preference in the absence of a living will. The case is particularly interesting since it does not *require* states to adhere to a standard of clear and convincing proof, and would seem to allow a state to honor the wishes of family members in the absence of a living will. It also appears that the Court's concept of a terminally ill patient's rights would include honoring the provisions of a living will.

§ 88.14(a)(1) Limits to Effectiveness.

Living will statutes normally require the patient's condition to be terminal and the patient be unable to make decisions about personal health care before the living will can take effect. n970 This seriously limits the effectiveness of the living will statutes. All of the statutes provide for "passive" euthanasia only, and for the majority of states, active euthanasia is expressly prohibited. n971 Active euthanasia, for example, would include administering drugs designed to shorten one's life. Passive euthanasia, however, involves only the withdrawal or removal of existing treatment, or the withholding of potential treatment. Passive techniques would normally exclude the withholding of nutrition and hydration. This, of course, can create a dilemma for health care providers when nutrition and hydration also prolong the pain and misery of the patient.

Most living will statutes require that the declarant be an adult and be competent at the time of the execution of the living will. There is also typically a requirement that the execution be witnessed by two persons. Witnesses may not be family members or the attending physicians, in most states. n972 The requirements are very similar to those for a standard will execution.

§ 88.14(a)(2) Living Wills -- Minors and Pregnant Women.

Two problem areas in the use of living wills concern the ability to make health care decisions for minors or incompetents, and the applicability of a living will when a woman is pregnant.

A few states have provisions regarding decision-making for terminally ill incompetent adults or terminally ill minors (who have not executed a living will) Usually the minor's spouse, if the spouse is an adult, or the minor's parents may make the decision under these acts. n973 Some states may require the court to appoint a guardian ad litem to represent the terminally ill patient's interest. Of course, these cases can also be treated like any other situation where the patient has failed to execute a living will. A court may decide to permit the substituted judgment of relatives or close friends to prevail. In these cases, there typically seems to be an effort to determine what the terminally ill person would have wanted, if possible. n974

A minority of states have incorporated a "pregnancy clause" into their living will statutes, n975 making the provisions of a living will inapplicable when the patient is a pregnant woman. Such clauses directly pit the rights of the individual patient against the possibility of saving the life of the unborn fetus, particularly in light of the constitutional right to privacy embodied by the line of decisions following *Roe v. Wade*. n976

While the living will does arguably preserve an individual's right to bodily integrity, privacy, and to "die with dignity," it also raises serious concerns about the dangers, the advisability, and the encouragement of euthanasia, "mercy" killings, or "assisted" suicides. Moreover, it is possible that an individual might make the decision about life-prolonging health care one way when all is well, and might make a completely different decision when faced with an actual terminal illness.

While the living will is well-known to most lay people, many professionals advocate the use of a durable power of attorney as an alternative, or an addition to the use of the living will. The durable power of attorney is discussed below.

w/30 preganant wom*n!

§ 88.14(b) Durable Powers of Attorney.

A power of attorney creates an agency relationship, where the agent may act for the principal under certain circumstances or for a certain length of time. However, under traditional agency doctrine, the agent's authority terminates when the principal becomes incapacitated. n977 The durable power is unique in that it expressly continues the agent's authority through incapacity until the agent has actual knowledge of the principal's death. n978 Virtually all of the states have some sort of durable power of attorney statute in place and the Uniform Probate Code includes a section authorizing durable powers of attorney. n979 The durable health care power is particularly useful since the person executing the power can designate a trusted relative or friend to make health care decisions for them in the event of incapacity. These are not limited to situations where the patient is terminally ill. Thus, in a case like Nancy Cruzan's (non-terminal persistent vegetative state) the agent could take steps to terminate life support. Durable powers are more flexible than living wills, in that they can give the agent great leeway, or narrow the scope of the agent's authority, to see that all medical means are used to keep the principal alive or that no medical means are used. The agent may be granted the authority to deal with the situation at the time that decisions need to be made, and the principal may retain full authority to direct health care decisions until the principal becomes incompetent to act. n980

Some states specifically authorize durable health care powers of attorney, but it is believed that the general durable power statutes would authorize use in the health care situation as well. n981 Of course the durable powers raise some of the same ethical issues involved in the previous section. Will the use of such devises lead unscrupulous or over-eager family members to "pull the plug" too soon?

§ 88.14(c) Donation/Disposition of Body Parts.

At common law, a decedent had no real control over the disposition of his or her body. Nor did the common law recognize property rights in the corpse of a deceased person. In more recent times, the courts have sometimes permitted individuals to direct the disposal of their remains, even over the objections of family members, or even if the request was an unusual one. n982 The medical field became particularly interested in this area as organ transplants became more and more possible and more and more successful during the 1960s, '70s, and '80s. Accordingly, there is a great demand for body parts for transplant today, a demand that far exceeds the supply. n983

California was the first state to enact a decedent organ donation statute in 1947, and the Uniform Anatomical Gifts Act was promulgated during the 1960s and adopted in some form in every state. n984 The original act requires either a will or a signature on a card with two witnesses. n985 The witnesses must sign in the presence of each other and in the presence of the donor. The act permits a donor to donate his or her body to various medical establishments for research or transplantation. A new act was promulgated in 1987 and has been adopted in several jurisdictions. It simply requires a signature on a card, without witnesses. Of course, the donor may still donate by will, or the next of kin may make the donation. n986 In some states, the donation card may be on the donor's driver's license. The 1987 Uniform Anatomical Gifts Act permits donation for education, therapy, research, or transplantation. It expressly prohibits *sale* of body parts for transplantation. n987

Despite the ease of organ donation, the shortage of available organs for transplants persists. Perhaps people are unwilling to contemplate their own death in such direct fashion, or some people may have religious, moral or aesthetic reasons to decline to execute a donation card. Or, there may be fear that over-eager doctors will hasten death or fail to take appropriate steps to preserve the donor's life in an effort to proceed with a transplant. n988

Other efforts to increase the number of organs available for transplant continue to be considered. Some have proposed a free market in body parts. Not surprisingly, the concept of a market economy in body parts created a public outcry, particularly when the scheme might involve payments to living donors. The concern with living donors is that the poor

would be taken advantage of, in order to benefit the rich. At least partially in response to such proposals, Congress enacted the National Organ Transplant Act (the "Act") in 1984. n989 The Act prohibits the commercial sale of organs in the private market. The Act also established an organ matching network to facilitate the transplantation process. However, this program has been ineffective in increasing the availability of organs for transplants.

Another suggestion is for hospitals or physicians to make regular requests to family members for organ donation at the time of death of potential donors. The federal government incorporated this concept into its regulatory scheme. n990 However, it has been criticized as imposing on grief-stricken families at a particularly vulnerable time. (It is also unlikely that families would be eager to consent at these times, since the most desirable donor would be a young person who is killed in an accident. The family is usually in shock and unable to cope with such possibly upsetting requests.).

A third suggestion is to create a rebuttable presumption of consent to organ transplant in the law. If a person does NOT want to be considered as an organ donor, the person would execute a document revoking the implied permission. Again, this proposal can be criticized on a variety of religious, moral, and aesthetic grounds. However, such routine organ salvaging is not uncommon in Europe. n991

§ 88.14(d) Appendix.

§ 88.14(d)(1) Uniform Anatomical Gift Act -- Key Provisions -- 1987 Act.

All states and the District of Columbia have either the 1987 or the 1968 version of the Uniform Anatomical Gift Act.

§ 1 Definitions.

As used in this [Act]:

(1) "Anatomical gift" means a donation of all or part of a human body to take effect upon or after death.

(2) "Decedent" means a deceased individual and includes a stillborn infant or fetus.

(3) "Document of gift" means a card, a statement attached to or imprinted on a motor vehicle operator's or chauffeur's license, a will, or other writing used to make an anatomical gift.

(4) "Donor" means an individual who makes an anatomical gift of all or part of the individual's body.

(5) "Enucleator" means an individual who is [licensed] [certified] by the [State Board of Medical Examiners] to remove or process eyes or parts of eyes.

(6) "Hospital" means a facility licensed, accredited, or approved as a hospital under the law of any state or a facility operated as a hospital by the United States government, a state, or a subdivision of a state.

(7) "Part" means an organ, tissue, eye, bone, artery, blood, fluid, or other portion of a human body.

(8) "Person" means an individual, corporation, business trust, estate, trust, partnership, joint venture, association, government, governmental subdivision or agency, or any other legal or commercial entity.

(9) "Physician" or "surgeon" means an individual licensed or otherwise authorized to practice medicine and surgery or osteopathy and surgery under the laws of any state.

(10) "Procurement organization" means a person licensed, accredited, or approved under the laws of any state for procurement, distribution, or storage of human bodies or parts.

(11) "State" means a state, territory, or possession of the United States, the District of Columbia, or the Commonwealth of Puerto Rico.

(12) "Technician" means an individual who is [licensed] [certified] by the [State Board of Medical Examiners] to remove or process a part.

§ 2 Making, Amending, Revoking, and Refusing to Make Anatomical Gifts by Individual.

(a) An individual who is at least [18] years of age may (i) make an anatomical gift for any of the purposes stated in § 6(a), (ii) limit an anatomical gift to one or more of those purposes, or (iii) refuse to make an anatomical gift.

(b) An anatomical gift may be made only by a document of gift signed by the donor. If the donor cannot sign, the document of gift must be signed by another individual and by two witnesses, all of whom have signed at the direction and in the presence of the donor and of each other, and state that it has been so signed.

(c) If a document of gift is attached to or imprinted on a donor's motor vehicle operator's or chauffeur's license, the document of gift must comply with subsection 9(b) Revocation, suspension, expiration, or cancellation of the license does not invalidate the anatomical gift.

(d) A document of gift may designate a particular physician or surgeon to carry out the appropriate procedures. In the absence of a designation or if the designee is not available, the donee or other person authorized to accept the anatomical gift may employ or authorize any physician, surgeon, technician, or enucleator to carry out the appropriate procedures.

(e) An anatomical gift by will takes effect upon death of the testator, whether or not the will is probated. If, after death, the will is declared invalid for testamentary purposes, the validity of the anatomical gift is unaffected.

(f) A donor may amend or revoke an anatomical gift, not made by will, only by:

(1) a signed statement;

(2) an oral statement made in the presence of two individuals;

(3) any form of communication during a terminal illness or injury addressed to a physician or surgeon; or

(4) the delivery of a signed statement to a specified donee to whom a document of gift had been delivered.

(g) The donor of an anatomical gift made by will may amend or revoke the gift in the manner provided for amendment or revocation of wills, or as provided in subsection 9(f).

(h) An anatomical gift that is not revoked by the donor before death is irrevocable and does not require the consent or concurrence of any person after the donor's death.

(i) An individual may refuse to make an anatomical gift of the individual's body or part by (i) a writing signed in the same manner as a document of gift, (ii) a statement attached to or imprinted on a donor's motor vehicle operator's or chauffeur's license, or (iii) any other writing used to identify the individual as refusing to make an anatomical gift. During a terminal illness or injury, the refusal may be an oral statement or other form of communication.

(j) In the absence of contrary indications by the donor, an anatomical gift of a part is neither a refusal to give other parts nor a limitation on an anatomical gift under Section 3 or on a removal or release of other parts under Section 4.

(k) In the absence of contrary indications by the donor, a revocation or amendment of an anatomical gift is not a refusal to make another anatomical gift. If the donor intends a revocation to be a refusal to make an anatomical gift, the donor shall make the refusal pursuant to subsection (i).

§ 3 Making, Revoking, and Objecting to Anatomical Gifts, by Others.

(a) Any member of the following classes of persons, in the order of priority listed, may make an anatomical gift of all or a part of the decedent's body for an authorized purpose, unless the decedent, at the time of death, has made an unrevoked refusal to make that anatomical gift;

(1) the spouse of the decedent;

(2) an adult son or daughter of the decedent;

(3) either parent of the decedent;

(4) an adult brother or sister of the decedent;

(5) a grandparent of the decedent; and

(6) a guardian of the person of the decedent at the time of death.

(b) An anatomical gift may not be made by a person listed in subsection (a) if:

(1) a person in a prior class is available at the time of death to make an anatomical gift;

(2) the person proposing to make an anatomical gift knows of a refusal or contrary indications by the decedent; or

(3) the person proposing to make an anatomical gift knows of an objection to making an anatomical gift by a member of the person's class or a prior class.

(c) An anatomical gift by a person authorized under subsection (a) must be made by (i) a document of gift signed by the person or (ii) the person's telegraphic, recorded telephonic, or other recorded message, or other form of communication from the person that is contemporaneously reduced to writing and signed by the recipient.

(d) An anatomical gift by a person authorized under subsection (a) may be revoked by any member of the same or a prior class if, before procedures have begun for the removal of a part from the body of the decedent, the physician, surgeon, technician, or enucleator removing the part knows of the revocation.

(e) A failure to make an anatomical gift under subsection (a) is not an objection to the making of an anatomical gift.

§ 4 Authorization by [Coroner] [Medical Examiner] OR [Local Public Health Official].

(a) The [coroner] [medical examiner] may release and permit the removal of a part from a body within that official's custody, for transplantation or therapy, if:

(1) the official has received a request for the part from a hospital, physician, surgeon, or procurement organization;

(2) the official has made a reasonable effort, taking into account the useful life of the part, to locate and examine the decedent's medical records and inform persons listed in Section 3(a) of their option to make, or object to making, an anatomical gift;

(3) the official does not know of a refusal or contrary indication by the decedent or objection by a person having priority to act as listed in Section 3(a);

(4) the removal will be by a physician, surgeon, or technician; but in the case of eyes, by one of them or by an enucleator;

(5) the removal will not interfere with any autopsy or investigation;

(6) the removal will be in accordance with accepted medical standards; and

(7) cosmetic restoration will be done, if appropriate.

(b) If the body is not within the custody of the [coroner] [medical examiner], the [local public health officer] may release and permit the removal of any part from a body in the [local public health officer's] custody for transplantation or therapy if the requirements of subsection (a) are met.

(c) An official releasing and permitting the removal of a part shall maintain a permanent record of the name of the decedent, the person making the request, the date and purpose of the request, the part requested, and the person to whom it was released.

§ 5 Routine Inquiry and Required Request; Search and Notification.

(a) On or before admission to a hospital, or as soon as possible thereafter, a person designated by the hospital shall ask each patient who is at least [18] years of age: "Are you an organ or tissue donor?" If the answer is affirmative the person shall request a copy of the document of gift. If the answer is negative or there is no answer and the attending physician consents, the person designated shall discuss with the patient the option to make or refuse to make an anatomical gift. The answer to the question, an available copy of any document of gift or refusal to make an anatomical gift, and any other relevant information, must be placed in the patient's medical record.

(b) If, at or near the time of death of a patient, there is no medical record that the patient has made or refused to make an anatomical gift, the hospital [administrator] or a representative designated by the [administrator] shall discuss the option to make or refuse to make an anatomical gift and request the making of an anatomical gift pursuant to Section 3(a) The request must be made with reasonable discretion and sensitivity to the circumstances of the family. A request is not required if the gift is not suitable, based upon accepted medical standards, for a purpose specified in Section 6. An entry must be made in the medical record of the patient, stating the name and affiliation of the individual making the request, and of the name, response, and relationship to the patient of the person to whom the request was made. The [Commissioner of Health] shall [establish guidelines] [adopt regulations] to implement this subsection.

(c) The following persons shall make a reasonable search for a document of gift or other information identifying the bearer as a donor or as an individual who has refused to make an anatomical gift:

(1) a law enforcement officer, fireman, paramedic or other emergency rescuer finding an individual who the searcher believes is dead or near death; and

(2) a hospital, upon the admission of an individual at or near the time of death, if there is not immediately available any other source of that information.

(d) If a document of gift or evidence of refusal to make an anatomical gift is located by the search required by subsection (c)(1), and the individual of body to whom it relates is taken to a hospital, the hospital must be notified of the

contents and the document or other evidence must be sent to the hospital.

(e) If, at or near the time of death of a patient, a hospital knows that an anatomical gift has been made pursuant to Section 3(a) or a release and removal of a part has been permitted pursuant to Section 4, or that a patient or an individual identified as in transit to the hospital is a donor, the hospital shall notify the donee if one is named and known to the hospital; if not, it shall notify an appropriate procurement organization. The hospital shall cooperate in the implementation of the anatomical gift or release and removal of a part.

(f) A person who fails to discharge the duties imposed by this section is not subject to criminal or civil liability but is subject to appropriate administrative sanctions.

§ 6 Persons Who May Become Donees; Purposes for Which Anatomical Gifts may be Made.

(a) The following persons may become donees of anatomical gifts for the purposes stated:

(1) a hospital, physician, surgeon, or procurement organization, for transplantation, therapy, medical or dental education, research, or advancement of medical or dental science;

(2) an accredited medical or dental school, college, or university for education, research, advancement of medical or dental science; or

(3) a designated individual for transplantation or therapy needed by that individual.

(b) An anatomical gift may be made to a designated donee or without designating a donee. If a donee is not designated or if the donee is not available or rejects the anatomical gift, the anatomical gift may be accepted by any hospital.

(c) If the donee knows of the decedent's refusal or contrary indications to make an anatomical gift or that an anatomical gift by a member of a class having priority to act is opposed by a member of the same class under Section 3(a), the donee may not accept the anatomical gift.

§ 7 Delivery of Document of Gift.

(a) Delivery of a document of gift during the donor's lifetime is required for the validity of an anatomical gift.

(b) If an anatomical gift is made to a designated donee, the document of gift, or a copy, may be delivered to the donee to

expedite the appropriate procedure after death. The document of gift, or a copy, may be deposited in any hospital, procurement organization, or registry office that accepts it for safekeeping or for facilitation of procedures after death. On request of an interested person, upon or after the donor's death, the person in possession shall allow the interested person to examine or copy the document of gift.

§ 8 Rights and Duties at Death.

(a) Rights of a donee created by an anatomical gift are superior to rights of others except with respect to autopsies under Section 11(b) A donee may accept or reject an anatomical gift. If a donee accepts an anatomical gift of an entire body, the donee, subject to the terms of the gift, may allow embalming and use of the body in funeral services. If the gift is of a part of a body, the donee, upon the death of the donor and before embalming, shall cause the part to be removed without unnecessary mutilation. After removal of the part, custody of the remainder of the body vests in the person under obligation to dispose of the body.

(b) The time of death must be determined by a physician or surgeon who attends the donor at death or, if none, the physician or surgeon who certifies the death. Neither the physician or surgeon who attends the donor at death nor the physician or surgeon who determines the time of death may participate in the procedures for removing or transplanting a part unless the document of gift designates a particular physician or surgeon pursuant to Section 2(d).

(c) If there has been an anatomical gift, a technician may remove any donated parts and an enucleator may remove any donated eyes or parts of eyes, after determination of death by a physician or surgeon.

§ 9 Coordination of Procurement and Use.

Each hospital in this State, after consultation with other hospitals and procurement organizations, shall establish agreements or affiliations for coordination of procurement and use of human bodies and parts.

§ 10 Sale or Purchase of Parts Prohibited.

(a) A person may not knowingly, for valuable consideration, purchase or sell a part for transplantation or therapy, if removal of the part is intended to occur after the death of the decedent.

(b) Valuable consideration does not include reasonable payment for the removal, processing, disposal, preservation, quality control, storage, transportation, or implantation of a part.

(c) A person who violates this section is guilty of a [felony] and upon conviction is subject to a fine not exceeding [$50,000] or imprisonment not exceeding [five] years, or both.

§ 11 Examination, Autopsy, Liability.

(a) An anatomical gift authorizes any reasonable examination necessary to assure medical acceptability of the gift for the purposes intended.

(b) The provisions of this [Act] are subject to the laws of this State governing autopsies.

(c) A hospital, physician, surgeon, [coroner], [medical examiner], [local public health officer], enucleator, technician, or other person, who acts in accordance with this [Act] or with the applicable anatomical gift law of another state [or foreign country] or attempts in good faith to do so is not liable for that act in a civil action or criminal proceeding.

(d) An individual who makes an anatomical gift pursuant to Section 2 or 3 and the individual's estate are not liable for any injury or damage that may result from the making or the use of the anatomical gift.

§ 12 Transitional Provisions.

This [Act] applies to a document of gift, revocation, or refusal to make an anatomical gift signed by the donor or a person authorized to make or object to making an anatomical gift before, on, or after the effective date of this [Act].

§ 13 Uniformity of Application and Construction.

This [Act] shall be applied and construed to effectuate its general purpose to make uniform the law with respect to the subject of this [Act] among states enacting it.

§ 88.14(d)(2) Uniform Rights of the Terminally Ill Act -- Key Provisions -- 1989.

The 1989 version of this Act has been adopted in seven states. Six other states have the 1985 Act. Also, 31 other states and the District of Columbia have some form of a Living Will Statute or Natural Death Act. A list is found in 9b U.L.A. 109 (1993 Supp.).

§ 1 Definitions.

As used in this [Act], unless the context otherwise requires:

(1) "Attending physician" means the physician who has primary responsibility for the treatment and care of the patient.

(2) "Declaration" means a writing executed in accordance with the requirements of Section 2(a).

(3) "Health-care provider" means a person who is licensed, certified, or otherwise authorized by the law of this State to administer health care in the ordinary course of business or practice of a profession.

(4) "Life-sustaining treatment" means any medical procedure or intervention that, when administered to a qualified patient, will serve only to prolong the process of dying.

(5) "Person" means an individual, corporation, business trust, estate, trust, partnership, association, joint venture, government, governmental subdivision or agency, or any other legal or commercial entity.

(6) "Physician" means an individual [licensed to practice medicine in this State].

(7) "Qualified patient" means a patient [18] or more years of age who has executed a declaration and who has been determined by the attending physician to be in a terminal condition.

(8) "State" means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, or a territory or insular possession subject to the jurisdiction of the United States.

(9) "Terminal condition" means an incurable and irreversible condition that, without the administration of life-sustaining treatment, will, in the opinion of the attending physician, result in death within a relatively short time.

§ 2 Declaration Relating to Use of Life-Sustaining Treatment.

(a) An individual of sound mind and [18] or more years of age may execute at any time a declaration governing the withholding or withdrawal of life-sustaining treatment. The declarant may designate another individual of sound mind and [18] or more years of age to make decisions governing the withholding or withdrawal of life-sustaining treatment. The declaration must be signed by the declarant, or another at the declarant's direction, and witnessed by two individuals.

(b) A declaration directing a physician to withhold or withdraw life-sustaining treatment may, but need not, be in the following form:

DECLARATION

If I should have an incurable and irreversible condition that, without the administration of life-sustaining treatment, will, in the opinion of my attending physician, cause my death within a relatively short time, and I am no longer able to make decisions regarding my medical treatment, I direct my attending physician, pursuant to the Uniform Rights of the Terminally Ill Act of this State, to withhold or withdraw treatment that only prolongs the process of dying and is not necessary for my comfort or to alleviate pain.

Signed this _____ day of _____, _____.

Signature:_____
Address:_____

The declarant voluntarily signed this writing in my presence.

Witness _____

Address _____

(c) A declaration that designates another individual to make decisions governing the withholding or withdrawal of life-sustaining treatment may, but need not, be in the following form:

DECLARATION

If I should have an incurable and irreversible condition that, without the administrations of life-sustaining treatment, will, in the opinion of my attending physician, cause my death within a relatively short time, and I am no longer able to make decisions regarding my medical treatment, I appoint _____ or, if he or she is not reasonably available or is unwilling to serve, _____, to make decisions on my behalf regarding withholding or withdrawal of treatment that only prolongs the process of dying and is not necessary for my comfort or to alleviate pain, pursuant to the Uniform Rights of the Terminally Ill Act of this State.

[If the individual(s) I have so appointed is not reasonably available or is unwilling to serve, I direct my attending physician, pursuant to the Uniform Rights of the Terminally Ill Act of this State, to withhold or withdraw treatment that only prolongs the process of dying and is not necessary for my comfort or to alleviate pain.]

(d) The designation of an attorney-in-fact [pursuant to the Uniform Durable Power of Attorney Act or the Model Health-Care Consent Act], or the judicial appointment of an individual [guardian], who is authorized to make decisions regarding the withholding or withdrawal of life-sustaining treatment, constitutes for purposes of this [Act] a declaration designating another individual to act for the declarant pursuant to subsection (a).

(e) A physician or other health-care provider who is furnished a copy of the declaration shall make it a part of the declarant's medical record and, if unwilling to comply with the declaration, promptly so advise the declarant and any individual designated to act for the declarant.

§ 3 When Declaration Operative.

A declaration becomes operative when (i) it is communicated to the attending physician and (ii) the declarant is determined by the attending physician to be in a terminal condition and no longer able to make decisions regarding administration of life-sustaining treatment. When the declaration becomes operative, the attending physician and other health-care providers shall act in accordance with its provisions and with the instructions of a designees under Section 2(a) or comply with the transfer requirements of Section 8.

§ 4 Revocation of Declaration.

(a) A declarant may revoke a declaration at any time and in any manner, without regard to the declarant's mental or physical condition. A revocation is effective upon its communication to the attending physician or other health-care provider by the declarant or a witness to the revocation.

(b) The attending physician or other health-care provider shall make the revocation a part of the declarant's medical record.

§ 5 Recording Determination of Terminal Condition and Declaration.

Upon determining that a declarant is in a terminal condition, the attending physician who knows of a declaration shall record the determination and the terms of the declaration in the declarant's medical record.

§ 6 Treatment of Qualified Patients.

(a) A qualified patient may make decisions regarding life-sustaining treatment so long as the patient is able to do so.

(b) This [Act] does not affect the responsibility of the attending physician or other health-care provider to provide treatment, including nutrition and hydration, for a patient's comfort, care or alleviation of pain.

(c) Life-sustaining treatment must not be withheld or withdrawn pursuant to a declaration from an individual known to the attending physician to be pregnant so long as it is probable that the fetus will develop to the point of live birth with continued application of life-sustaining treatment.

§ 7 Consent By Others to Withdrawal or Withholding of Treatment.

(a) If written consent to the withholding or withdrawal of the treatment, witnessed by two individuals, is given to the attending physician, the attending physician may withhold or withdraw life-sustaining treatment from an individual who:

(1) has been determined by the attending physician to be in a terminal condition and no longer able to make decisions regarding administration of life-sustaining treatment; and

(2) has no effective declaration.

(b) The authority to consent or to withhold consent under subsection (a) may be exercised by the following individuals, in order of priority:

(1) the spouse of the individual;

(2) an adult child of the individual or, if there is more than one adult child, a majority of the adult children who are reasonably available for consultation;

(3) the parents of the individuals;

(4) an adult sibling of the individual or, if there is more than one adult sibling, a majority of the adult siblings who are reasonably available for consultation; or

(5) the nearest other adult relative of the individual by blood or adoption who is reasonably available for consultation.

(c) If a class entitled to decide whether to consent is not reasonably available for consultation and competent to decide, or declines to decide, the next class is authorized to decide, but an equal division in a class does not authorize the next class to decide.

(d) A decision to grant or withhold consent must be made in good faith. A consent is not valid if it conflicts with the expressed intention of the individual.

(e) A decision of the attending physician acting in good faith that a consent is valid or invalid is conclusive.

(f) Life-sustaining treatment must not be withheld or withdrawn pursuant to this section from an individual known to the attending physician to be pregnant so long as it is probable that the fetus will develop to the point of live birth with continued application of life-sustaining treatment.

§ 8 Transfer of Patients.

An attending physician or other health-care provider who is unwilling to comply with this [Act] shall take all reasonable steps as promptly as practicable to transfer care of the declarant to another physician or health-care provider who is willing to do so.

§ 9 Immunities.

(a) A physician or other health-care provider is not subject to civil or criminal liability, or discipline for unprofessional conduct, for giving effect to a declaration or the direction of an individual designated pursuant to Section 2(a) in the absence of knowledge of the revocation of a declaration, or for giving effect to a written consent under Section 7.

(b) A physician or other health-care provider, whose action under this [Act] is in accord with reasonable medical standards, is not subject to criminal or civil liability, or discipline for unprofessional conduct, with respect to that action.

(c) A physician or other health-care provider, whose decision about the validity of consent under Section 7 is made in good faith, is not subject to criminal or civil liability, or discipline for unprofessional conduct, with respect to that decision.

(d) An individual designated pursuant to Section 2(a) or an individual authorized to consent pursuant to Section 7, whose decision is made or consent is given in good faith pursuant to this [Act], is not subject to criminal or civil liability, or discipline for unprofessional conduct, with respect to that decision.

§ 10 Penalties.

(a) A physician or other health-care provider who willfully fails to transfer the care of a patient in accordance with Section 8 is guilty of [a class _____ misdemeanor].

(b) A physician who willfully fails to record a determination of terminal condition or the terms of a declaration in accordance with Section 5 is guilty of [a class _____ misdemeanor].

(c) An individual who willfully conceals, cancels, defaces, or obliterates the declaration of another individual without the declarant's consent or who falsifies or forges a revocation of the declaration of another individual is guilty of [a class _____ misdemeanor].

(d) An individual who falsifies or forges the declaration of another individual, or willfully conceals or withholds personal knowledge of a revocation under Section 4, is guilty of [a class _____ misdemeanor].

(e) A person who requires or prohibits the execution of a declaration as a condition for being insured for, or receiving, health-care services is guilty of [a class _____ misdemeanor].

(f) A person who coerces or fraudulently induces an individual to execute a declaration is guilty of [a class _____ misdemeanor].

(g) The penalties provided in this section do not displace any sanction applicable under other law.

§ 11 Miscellaneous Provisions.

(a) Death resulting from the withholding or withdrawal of life-sustaining treatment in accordance with this [Act] does not constitute, for any purpose, a suicide or homicide.

(b) The making of a declaration pursuant to Section 2 does not affect the sale, procurement, or issuance of a policy of life insurance or annuity, nor does it affect, impair, or modify the terms of an existing policy of life insurance or annuity. A policy of life insurance or annuity is not legally impaired or invalidated by the withholding or withdrawal of life-sustaining treatment from an insured, notwithstanding any term to the contrary.

(c) A person may not prohibit or require the execution of a declaration as a condition for being insured for, or receiving, health-care services.

(d) This [Act] creates no presumption concerning the intention of an individual who has revoked or has not executed a declaration with respect to the use, withholding, or withdrawal of life-sustaining treatment in the event of a terminal condition.

(e) This [Act] does not affect the right of a patient to make decisions regarding use of life-sustaining treatment, so long as the patient is able to do so, or impair or supersede a right or responsibility that a person has to effect the withholding or withdrawal of medical care.

(f) This [Act] does not require a physician or other health-care provider to take action contrary to reasonable medical standards.

(g) This [Act] does not condone, authorize, or approve mercy-killing or euthanasia.

§ 12 When Health-Care Provider May Presume Validity of Declaration.

In the absence of knowledge to the contrary, a physician or other health-care provider may assume that a declaration complies with this [Act] and is valid.

§ 13 Recognition of Declaration Executed in Another State.

A declaration executed in another state in compliance with the law of that state or of this State is valid for purposes of this [Act].

§ 14 Effect of Previous Declaration.

An instrument executed anywhere before the effective date of this [Act] which substantially complies with Section 2(a) is effective under this [Act].

§ 88.14(d)(3) Uniform Probate Code -- Durable Power of Attorney.

This Act has been adopted in 5 states. It is an alternative to Part 5 of Article V of the Uniform Probate Code.

§ 5-501 Definition.

A durable power of attorney is a power of attorney by which a principal designates another his attorney in fact in writing and the writing contains the words "This power of attorney shall not be affected by subsequent disability or incapacity of the principal, or lapse of time," or "This power of attorney shall become effective upon the disability or incapacity of the principal," or similar words showing the intent of the principal that the authority conferred shall be exercisable notwithstanding the principal's subsequent disability or incapacity, and unless it states a time of termination, notwithstanding the lapse of time since the execution of the instrument.

§ 5-502 Durable Power of Attorney Not Affected by Lapse of Time, Disability or Incapacity.

All acts done by an attorney in fact pursuant to a durable power of attorney during any period of disability or incapacity of the principal have the same effect and inure to the benefit of and bind the principal and his successors in interest as if the principal were competent and not disabled. Unless the instrument states a time of termination, the power is exercisable notwithstanding the lapse of time since the execution of the instrument.

§ 5-503 Relation of Attorney in Fact to Court-Appointed Fiduciary.

(a) If, following execution of a durable power of attorney, a court of the principal's domicile appoints a conservator, guardian of the estate, or other fiduciary charged with the management of all of the principal's property or all of his property except specified exclusions, the attorney in fact is accountable to the fiduciary as well as to the principal. The fiduciary has the same power to revoke or amend the power of attorney that the principal would have had if he were not

disabled or incapacitated.

(b) A principal may nominate, by a durable power of attorney, the conservator, guardian of his estate, or guardian of his person for consideration by the court if protective proceedings for the principal's person or estate are thereafter commenced. The court shall make its appointment in accordance with the principal's most recent nomination in a durable power of attorney except for good cause or disqualification.

§ 5-504 Power of Attorney Not Revoked Until Notice.

(a) The death of a principal who has executed a written power of attorney, durable or otherwise, does not revoke or terminate the agency as to the attorney in fact or other person, who, without actual knowledge of the death of the principal, acts in good faith under the power. Any action so taken, unless otherwise invalid or unenforceable, binds successors in interest of the principal.

(b) The disability or incapacity of a principal who has previously executed a written power of attorney that is not a durable power does not revoke or terminate the agency as to the attorney in fact or other person, who, without actual knowledge of the disability or incapacity of the principal, acts in good faith under the power. Any action so taken, unless otherwise invalid or unenforceable, binds the principal and his successors in interest.

§ 5-505 Proof of Continuance of Durable and Other Powers of Attorney by Affidavit.

As to acts undertaken in good faith reliance thereon, an affidavit executed by the attorney in fact under a power of attorney, durable or otherwise, stating that he did not have at the time of exercise of the power actual knowledge of the termination of the power by revocation or of the principal's death, disability, or incapacity is conclusive proof of the non-revocation or non-termination of the power at that time. If the exercise of the power of attorney requires execution and delivery of any instrument that is recordable, the affidavit when authenticated for record is likewise recordable. This section does not affect any provision in a power of attorney for its termination by expiration of time or occurrence of an event other than express revocation or a change in the principal's capacity.

CHAPTER 88 TESTAMENTARY TRANSFERS OF REAL PROPERTY

10-88 Thompson on Real Property, Thomas Editions § 88.15

AUTHOR: Professor Victoria Mikesell Mather School of Law St. Mary's University of San Antonio

§ 88.15 Will Substitutes.

[Go To Supp]

§ 88.15(a) Introduction.

Will substitutes are frequently used in lieu of transfer by will. n992 Will substitutes are non-testamentary transfers, but do effect a present transfer of the grantor's interest. n993 The use of will substitutes has been called a "revolution" by at least one author, n994 and the increase in use of gifts, joint accounts, life insurance and pension beneficiary designation and other devices has indeed taken over the transfer of wealth at death for most decedents.

The use of will substitutes is at least in part a demonstration of testator attempts to avoid probate. Use of the probate system can be expensive and time-consuming for most testators, and some of the former functions of probate (to clear title and to pay debts). may not be as essential today as they were in the past. The use of will substitutes may also be advantageous for grantors since the devices are usually asset-specific, and transfers do not need to comply with the statute of wills formalities. n995 Although the formalities help to protect testators, and to serve ritual, evidentiary and possibly "safe harbor" functions, the technicalities are frequently at odds with testator's actual intent, and may simply be perceived as roadblocks to the accomplishment of testator objectives. n996

§ 88.15(b) Gifts.

Gifts are probably not one of the most frequently used will substitutes, but may be important after decedent's death, particularly for tax purposes and as causa mortis gifts.

§ 88.15(b)(1) Elements.

Both inter-vivos and causa mortis gifts require that four elements be met. n997 The donor must be of sound mind (this is usually presumed, in the absence of evidence to the contrary), the donor must have present intent to make a gift, the donor must deliver the gift, and the donee must accept the gift. It is also presumed that the donee accepts the gift, in the absence of evidence to the contrary.

Delivery is probably the most frequently litigated issue in the law of gifts. n998 The issue of intent is sometimes closely

linked to the issue of delivery. It is important that the intent to make a gift be a present intent, not an intent or a promise to make a future gift. n999 Actual delivery can help to strengthen the proof of intent, since the donor will feel the "wrench of delivery" in handing over the item to the donee. n1000 The courts normally like to see physical delivery of an item of tangible personal property. However, constructive delivery (delivery of the means of acquiring the item of personal property) or delivery by a written instrument of gift is frequently allowed. n1001 Mere "symbolic" delivery is not allowed. n1002 A gift of real property is delivered by delivery of the deed.

§ 88.15(b)(2) Causa Mortis Gifts.

The typical gift is an *inter vivos* gift, or a gift from one living person to another. Such gifts are irrevocable. A *causa mortis* gift is a gift made in contemplation of death. The donor, believing that he or she is dying, makes a gift of an item to a donee, usually from a deathbed. These gifts are revocable. The essential elements are still the same, including delivery. In many cases, the courts struggle with the issue of whether the delivery was adequate, particularly in light of the limitations involved in the situation of a bedridden donor. n1003

COMPUTER-ASSISTED RESEARCH

LEXIS: causa mortis w/2 gift!

gift! w/5 contemplat! w/2 death or die! or dying

§ 88.15(b)(3) Tax Note.

Gifts (particularly causa mortis gifts) do not create substantial tax savings. Generally gifts made within three years of the decedent's death will be included in the decedent's gross estate. However, certain exclusions apply, and the donor may make tax-exempt gifts during the donor's lifetime, up to $10,000 per donee. n1004

§ 88.15(c) Bank Accounts.

§ 88.15(c)(1) Pay-on-Death Accounts.

The term "pay-on-death" account is quite descriptive. When using a P.O.D. account, the donor deposits funds in a bank account during the donor's lifetime, and designates that the proceeds of the account are to be paid to a certain person at the death of the donor/depositor. Most courts find such accounts to be testamentary in character, and in the absence of statute, the designation of the beneficiary will not be honored. n1005

COMPUTER-ASSISTED RESEARCH

LEXIS: pay on death or pod w/2 account!

§ 88.15(c)(2) Totten Trusts.

A device similar to the P.O.D. account is the Totten trust. n1006 In a Totten trust arrangement, the donor deposits funds into an account, and names him- or herself as trustee of the account for the benefit of another. During the donor's lifetime, the donor has full control of the account and may freely make deposits and withdrawals. The trust is revocable. Many states recognize the Totten trust, either by case law or statute. n1007

COMPUTER-ASSISTED RESEARCH

LEXIS: totten trust!

§ 88.15(c)(3) Multi-Party Accounts.

Joint bank accounts are a popular device to avoid probate transfer at death. However, it is not foolproof, and courts will look beyond the form of the joint account to the substance and the intent of the arrangement between the parties.

If it was the intention of the donor/depositor to transfer a present interest to the other joint tenant(s), then the proceeds of the account will pass automatically to the survivor(s) at the death of one joint tenant. However, if the account was opened merely for the convenience of the donor/depositor, or for the establishment of survivorship rights, then the courts may hold that the account proceeds should not pass to the surviving joint tenants, because it is testamentary in nature. n1008

COMPUTER-ASSISTED RESEARCH

LEXIS: multi-party account! w/50 probate or death or testament!

§ 88.15(d) Life Insurance.

Life insurance can be one of the largest non-probate transfers at death for many individuals and is another popular will substitute device. During the lifetime of the insured, the insured can change the beneficiary designation or revoke the policy altogether. The proceeds of life insurance are universally held not to be testamentary in nature in the case law. Also, unlike most other forms of will substitutes, life insurance proceeds are not susceptible to the claims of decedent's creditors through the estate. A related, widely-used will substitute is the pension fund beneficiary designation. n1009

COMPUTER-ASSISTED RESEARCH

LEXIS: life insurance w/30 probate or testament!

§ 88.15(e) Revocable Inter Vivos Trusts.

The revocable inter vivos trust has become an extremely popular device for avoiding probate ever since the publication of "How to Avoid Probate," by Norman Dacey, in 1960. The book was a bestseller, and an updated version was published in 1988. A fill-in-the-blank form of irrevocable trust, with settlor as trustee, is sometimes known as the "Dacey" trust. Most courts and the Restatement hold that an inter vivos revocable trust is not testamentary in nature, even if the donor/settlor retains a lifetime beneficial interest, and the power to control the trust. n1010 However, the use of the "Dacey" trust is criticized. n1011 The inter-vivos trust may also be used in conjunction with a "pour-over" provision in a will. A "pour-over" provision operates when a will transfers or "pours over" certain assets from the estate into an existing trust. In a similar manner, a pour-over provision in a existing trust document can transfer trust assets into the estate at the death of the donor/settlor. n1012

COMPUTER-ASSISTED RESEARCH

LEXIS: revocable w/2 inter vivos w/2 trust! w/30 probate

§ 88.15(f) Uniform Probate Code.

The Revised Uniform Probate Code attempts to unify the treatment of probate and non-probate transfers. In general, the Code validates will substitutes, making it irrelevant or impossible to say that the transfers are testamentary and therefore invalid. n1013

The Code provisions specifically cover multiple-party bank accounts. n1014 In general the provisions attempt to clarify

some of the difficulties found with bank accounts after the death of a donor/depositor. The Code specifically allows Totten trusts, P.O.D. accounts, and joint tenancy accounts to be effective, unless the intent of the parties is otherwise.

A new section of the Uniform Probate Code creates a new form of ownership for securities, the Transfer-on-Death or T.O.D. registration. n1015 The securities are transferred at death in much the same way as the P.O.D. account proceeds are passed to the designated beneficiary.

The Uniform Probate Code sections on will substitutes are also promulgated as a free-standing Uniform Act, the Uniform Non-probate Transfers on Death Act. The provisions of the Act have been adopted in whole or in part by six states. n1016

CHAPTER 88 TESTAMENTARY TRANSFERS OF REAL PROPERTY

10-88 Thompson on Real Property, Thomas Editions § 88.16

AUTHOR: Professor Victoria Mikesell Mather School of Law St. Mary's University of San Antonio

§ 88.16 International Wills Act.

The Uniform Probate Code also contains a provision on international wills. n1017 The purpose of the act was to provide a form for wills that would be recognized in other countries. The provisions go only to the validity of the form of the will, and not to the substantive law of testamentary transfers for each nation. Eight states have adopted the International Wills Act, either standing alone or in conjunction with the Uniform Probate Code. n1018

FOOTNOTES:
(n1)Footnote 1017. U.P.C. §§ 2-1001 to 2-1010, 8 U.L.A. 181-201.

(n2)Footnote 1018. Non-U.P.C. adopting states include California, Connecticut, Illinois, and Oregon. Adopting U.P.C. states include Colorado, Minnesota, Montana and North Dakota.

Supp. To CHAPTER 88 Testamentary Transfers of Real Property

10-88 Thompson on Real Property, Thomas Editions Supp. to § 88.01

Supp. to § 88.01 Introduction and Overview of the Chapter

[Go To Main]

§ 88.01(d) Uniform Probate Code. [Go To Main]

Change text of third sentence from top of page from, "Fifteen states ... " to read:

Sixteen states...

Add:

Other states have added various provisions of the UPC in a more piecemeal fashion.

At note 10 after the citation "Mich. Comp. Laws Ann ... " add:

"*S.C. Code Ann. §§ 62-1-100 to 62-7-604*; South Dakota (adopted articles I, II, III, V, and VIII in 1995; http://www.sdbar.org/pamphlets/probate.htm) and Kentucky (in part, KY Revised Statutes).

At note 10 after the citation "Hawaii Rev. Stat. ... " add:

Repealed and superseded by: 1996 Haw. Sess. Laws, Act 288

Note 10 after the citation "Mich. Comp. Laws Ann ... " add:

§§ 700.1- 700 .35 *repealed* (effective Apr. 1 2000).

Supp. To CHAPTER 88 Testamentary Transfers of Real Property

10-88 Thompson on Real Property, Thomas Editions Supp. to § 88.03

Supp. to § 88.03 Will Formalities and the Execution Ceremony.

[Go To Main]

§ 88.03(c) Formal Wills--Attestation Requirements. [Go To Main]

§ 88.03(c)(1) Witnesses.

§ 88.03(c)(1)(i) Number.

After the citation "La. Rev. Stat. Ann ... " add:

§§ *repealed* (effective 1999).

§ 88.03(c)(1)(ii) Competence.

Add:

The witnesses must be aware that they are witnessing the execution of a will. *See Estate of Griffith v. Griffith, 30 So. 3d 1190 (Miss. 2010)* .

§ 88.03(c)(1)(iii) Witnessing Procedures.

After "more than 15 months after will executed," add:

See also Matter of Estate of Royal, 826 P.2d 1236 (Colo. 1992) (holding that signing of will by witness after testator's death is not allowed regardless of circumstances).

Add:

In *Chester v. Smith, 677 S.E.2d 128 (Ga. 2009)* , the testatrix was unable to see the witnesses sign the will and thus the will was not validly executed. *Brudz v. Brudz, 1998 Conn. Super. LEXIS 3161 (Conn. 1998)* .

Note 68 change the citation of "Estate of Jefferson ... " to read:

In re Jefferson's Will, 349 So. 2d 1032 (Miss. 1977) .

Add:

In re Will of Young, 1998 Del. Ch. LEXIS 123 (Del. 1998) .

After the citation "In re Davis' Will ... " add:

overruled in part, In re Lappy's Estate 277 P.2d 781 (Or. 1954) .

§ 88.03(c)(2) Publications.

In the sentence beginning "A minority of some states require ... " omit: "some"

§ 88.03(d) Evidence of Attestation. [Go To Main]

§ 88.03(d)(1) Attestation Clause.

Add:

In re Wafer, 715 So. 2d 672 (La. Ct. App. 1998) .

Add:

Parker v. Melican, 684 S.E.2d 654, 657 (Ga. 2009) (holding that despite the presence of an attestation clause, the presumption of proper execution was rebutted by clear proof).

After "(N.J. Super. 1973)," Add:

Koble v. Alfaro (In re Estate of Alfaro), 703 N.E. 2d 620 (Ill. App. 1998) (holding that a notary's signature could serve both as an attestation and a notarial certificate at once).

Add:

Hampton Roads Seventh-Day Adventist Church v. Stevens, 657 S.E.2d 80 (Va. 2008) (holding that the witnesses' signatures on the self-proving affidavit satisfied the requirement that the will be signed in the presence of two witnesses).

§ 88.03(d)(2) Self-proving Affidavit.

Add:

1 A.L.R.5th 965

Note 79 change the citation of "Estate of Charry ... " to read:

359 So. 2d 544 (Fla. Ct. App. 1978) .

§ 88.03(e) Modern Developments. [Go To Main]

Add:

John V. Orth, "Wills Act Formalities: How Much Compliance is Enough?" *43 Real Prop. Tr. & Est. L.J. 73* (Spring, 2008) .

Thompson on Real Property, Thomas Editions

Copyright 2010, Matthew Bender & Company, Inc., a member of the LexisNexis Group.

Supp. To CHAPTER 88 Testamentary Transfers of Real Property

10-88 Thompson on Real Property, Thomas Editions Supp. to § 88.04

Supp. to § 88.04 Certain Types of Wills.

[Go To Main]

§ 88.04(a) Holographic Wills. [Go To Main]

§ 88.04(a)(1) Introduction.

Add:

For a general discussion of holographic wills see Stephen Clowney, "In their Own Hands: An Analysis of Holographic Wills and Homemade Willmaking," *43 Real Prop. Tr. & Est. L.J. 27 (Spring 2008)* .

Add:

After "(1975)" add:

See also Cason v. Taylor, 51 S.W. 3d 397 (Tex. App. 2001) (holding that testimony of content of a lost holographic will was sufficient to set aside earlier formal will.)

Add:

In re Foxley, 575 N.W.2d 150 (Neb. 1998) .

§ 88.04(a)(3) State Statutes.

Note 94 change the citation of the Alaska statute to read:

Alaska Stat. § 13.12.502;

After the citation "Mont. Code Ann § 72-2-503 ... " add:

repealed (1993).

After the citation "N.D. Cent. Code § 30.1-08-03" add:

repealed (1993).

Delete the words:

Pennsylvania has a unique provision permitting *any* will, handwritten or printed, to be probated without witnesses.

Change the citation of "La. Civ. Code Ann ... " to read:

La. Civ. Code Ann. art. 1575

After the citation "S.D. Code Laws § 29-2-8 ... " add:

repealed (1995) (In 1995 South Dakota repealed all previously enacted laws regarding succession and wills and

replaced them with the Uniform Probate Code).

Move the citation "Tenn. Code Ann. § 32-1-105" to footnote 94 since this law supports the position in footnote 94 better than it supports the position in footnote 95.

Change the citation of "In re Will of Parsons ... " to read:

178 S.E. 78 (N.C. 1935) .

Change the citation of the "N.C. Gen Stat." to read:

N.C. Gen. Stat. § 31-18.2

§ 88.04(a)(4)(i) Date.

Change the citation of "La. Civ. Code Ann ... " to read:

La. Civ. Code Ann. art. 1575.

Change the citation of the "Mich. Stat. Ann ... " to read:

Mich. Stat. Ann. § 700.2502

After the citation "S.D. Code Laws § 29-2-8 ... " add:

repealed (1995) (In 1995 South Dakota repealed all previously enacted laws regarding succession and wills and replaced them with the Uniform Probate Code).

After the word capacity, Add new Note 100.1: n100.1

§ 88.04(b)(1). History.

Add:

In re Estate of Cote, 848 A.2d 264 (Vt. 2004) (state nuncupative will statute permits a decedent under such a will to dispose of not more than $200 worth of personal property).

§ 88.04(b)(2)(i) Last Illness.

Following "(1966)," Add:

Some states also allow oral wills to be made by soldiers and sailors if certain circumstances are met. Joseph M. Mentrek, "Estate Planning in a Digital World," 19 *Ohio Prob. L.J.* 195 (2009). *See also 32 McGeorge L. Rev. 681;* Torounian, Vartuhi Review of Selected 2000 California Legislation: Estates and Trusts Chapter 17: An Attempt to Improve the Existing Probate Law (discussion of oral wills).

After the citation "S.D. Code Laws § 29-2-9 ... " add:

repealed (1995) (In 1995 South Dakota repealed all previously enacted laws regarding succession and wills and replaced them with the Uniform Probate Code).

§ 88.04(b)(2)(ii) Testamentary Intent.

Change the citation "Nev. Rev. Stat. § 133.100.1(b)" to read:

Nev. Rev. Stat. § 133.100 (Nevada no longer accepts nuncupative wills).

§ 88.04(b)(2)(iii) Witnesses.

Change the citation "Nev. Rev. Stat. § 133.100.1(a)" to read:

Nev. Rev. Stat. § 133.100 (Nevada no longer accepts nuncupative wills).

Change the citation "Nev. Rev. Stat. § 133.100.2" to read:

Nev. Rev. Stat. § 133.100 (Nevada no longer accepts nuncupative wills).

§ 88.04(b)(2)(iv) Reduction to Writing.

After the citation "S.D. Code Laws § 30-6-33 ... " add:

repealed (1995) (In 1995 South Dakota repealed all previously enacted laws regarding succession, wills and probate and replaced them with the Uniform Probate Code).

Change the citation of "Tenn. Code Ann ... " to read:

Tenn. Code Ann. § 32-1-106.

§ 88.04(b)(2)(vi) Miscellaneous.

After the citation "Alaska Stat. § 13.11.158(c)" add:

repealed (1996).

§ 88.04(c) Videotaped and Audiotaped Wills. [Go To Main]

Add:

Joseph K. Grant, "Shattering and Moving Beyond the Gutenberg Paradigm: The Dawn of the Electronic Will," *42 U. Mich. J.L. Reform 105 (Fall 2008).*

§ 88.04(d) Statutory Wills. [Go To Main]

Change the citation of "Cal. Prob. Code § 56-56.14" to read:

Cal. Prob. Code § 56.14 repealed (1985).

After the citation "Mich. Comp. Laws Ann. § 700.123a-c" add:

repealed (2000).

§ 88.04(e) Conditional Will/Sham Will. [Go To Main]

After the citation "S.D. Code Laws § 30-6-32 ... " add:

repealed (1995) (In 1995 South Dakota repealed all previously enacted laws regarding succession, wills and probate and replaced them with the Uniform Probate Code).

After the first sentence, Add new Note 164.1: n164.1

§ 88.04(f) Superwills or Blockbuster Wills. [Go To Main]

Add:

but see In re Estate of Sanders, 929 P.2d 153 (Kan. 1996) .

FOOTNOTES:
(n1)Footnote 100.1. *Estate of Lightfield, 213 P.3d 468 (Mont. 2009)* , (the) testator had executed two different wills, and was held to have lacked testamentary capacity when he signed the second, holographic, will).

(n2)Footnote 164.1. For a discussion on both superwills and blockbuster wills see John H. Martin, "Reconfiguring Estate Settlement," *94 Minn. L. Rev. 42 (November 2009).*

Supp. To CHAPTER 88 Testamentary Transfers of Real Property

10-88 Thompson on Real Property, Thomas Editions Supp. to § 88.05

Supp. to § 88.05 Will Contracts.

[Go To Main]

§ 88.05(a). Introductory Comments. [Go To Main]

Add:

In the *Estate of Friesenhahn, 185 S.W.3d 16 (Tex. App. 2005)* (a testamentary devise was upheld when the will was held to be not a contractual will).

§ 88.05(a)(2) Remedy.

After the case "Green v. Richmond ... " add:

but see Wilcox v. Trautz, 693 N.E.2d 141 (Mass. 1998) .

§ 88.05(b) Contracts to Make a Will. [Go To Main]

Add:

Aubuchon v. Howort, 1998 Mass. Super. LEXIS 313 (Mass. 1998) .

Add:

Estate of Draper v. Bank of America, N.A., 205 P.3d 698 (Kan. 2009) (wife violated duty of good faith in prenuptial agreement to leave assets to her husband's sons by removing huge sums from her estate).

Add:

In *Ray v. McMaster, 296 S.W.3d 344 (Tex. App. 2009)* , the court explained that the following factors are illustrative of a contractual will: "(1) a statement about the consideration for making the agreement; (2) a statement that the agreement cannot be changed or varied without the consent in writing of each person making the will; (3) a reference to the section of the Probate Code addressing the requirements for contractual wills; and (4) a specific description of what the contract requires in the event of the death of the first person making the contractual will."

Change the citation of "Silianoff v. Silianoff ... " to read:

399 So. 2d 462 (Fla. Ct. App. 1982) .

Add:

In *Mangels v. Cornell, 189 P.3d 573 (Kan. App. 2008)* , the court explained that the existence of the following terms demonstrate an intent to be contractually bound by a joint and mutual will: "(1) A provision in the will for a distribution of property on the death of the survivor; (2) a carefully drawn provision for the disposition of any share in case of a lapsed residuary bequest; (3) the use of plural pronouns; (4) joinder and consent language; (5) the identical distribution of property upon the death of the survivor; (6) joint revocation of former wills; and (7) consideration, such as mutual promises."

§ 88.05(c) Joint and Mutual Wills. [Go To Main]

Change the citation of "Kitchen v. Estate of Blue ... " to read:

498 N.E.2d 41 (Ind. Ct. App. 1986) .

After the citation "Crain v. Mitchell ... " add:

disapproved, Jones v. Jones, 718 S.W.2d 416 (Tex. Ct. App. 1986) .

§ 88.05(d) Contracts Not to Revoke. [Go To Main]

Change the citation of "Ray v. Rider" to read:

650 F. Supp. 518 (E.D. Tex. 1986)

Change the citation of "Estate of Chayka ... " to read:

76 N.W.2d 560 (Wis. 1970) .

Supp. To CHAPTER 88 Testamentary Transfers of Real Property

10-88 Thompson on Real Property, Thomas Editions Supp. to § 88.06

Supp. to § 88.06 Will Construction--Will Components.

[Go To Main]

§ 88.06(b) Doctrine of Incorporation by Reference. [Go To Main]

Add:

In *In re* Estate of Herold, *76 Cal. Rptr. 3d 546 (2008)* , the court explained that provisions from wills should not be incorporated into decrees of trust distributions because such decrees are intended to be final and to supersede the will.

Change the citation "Clark v. Greenhalge ... " to read:

582 N.E.2d 949 (Mass. 1991) .

Change the citation "Mont. Code Ann ... " to read:

Mont. Code Ann. § 72-2-530.

Change the citation of "Fla. Stat. Ann ... " to read:

Fla. Stat. Ann. § 732.512.

Add:

In re Pozarny, 677 N.Y.S.2d 714 (N.Y. 1998) , but see, In re Wickwire, 270 A.D.2d 659 (N.Y.A.D. 2000) (noting the effect of New York statutes on the issue).

§ 88.06(c) Doctrine of Republication by Codicil. [Go To Main]

After the citation "In re Estate of Foxley ... " add:

rev'd, 575 N.W.2d 150 (Neb. 1998) .

Supplements to a will made by codicil must still comply with some of the formalities subject to wills. *See Parker v. Melican, 684 S.E.2d 654 (Ga. 2009)* (holding that a testator's failure to sign a codicil in the presence of witnesses rendered the codicil improper).

Change the citation of "In re Johnson Trust ... " to read:

255 A.2d 571 (Pa. 1969) .

§ 88.06(d) The Doctrine of Acts of Independent Significance. [Go To Main]

Add:

Van Moorleghan v. Taylor, 10 S.W.3d 244 (Tenn. Ct. App. 1998) .

Thompson on Real Property, Thomas Editions

Copyright 2010, Matthew Bender & Company, Inc., a member of the LexisNexis Group.

Supp. To CHAPTER 88 Testamentary Transfers of Real Property

10-88 Thompson on Real Property, Thomas Editions Supp. to § 88.07

Supp. to § 88.07 Will Construction and Reformation.

[Go To Main]

§ 88.07(a) Introduction. [Go To Main]

Add:

American Finance & Inv. Co. v. Herrera, 20 S.W.3d 829 (Tex. Ct. App. 2000) (Real Estate described in codicil as "property located on the west side of [city] with house on it" was sufficiently clear that there was no controversy surrounding the intent of the testator).

Change the citation of "In re Gulbenkian's will..." to read:

174 N.E.2d 481 (N.Y. 1961) .

Smith v. Buckley, 753 N.Y.S.2d 581 (2003) (will bequeathed land on condition that a private road be kept open for use by specified landowners); *Dyer v. Dyer, 566 S.E.2d 665 (Ga. 2002)* (will construed so that provisions were not irreconcilable).

At the end of first paragraph, Add new Note 275.1: n275.1

§ 88.07(b)(1) Mistaken Descriptions.

After the citation "Connecticut Junio Republic v. Sharon Hosp..." add:

rev'd, Erickson v. Erickson, 716 A.2d 92 (Conn. 1998) .

After "estator meant Hamilton Ross Simpson)" add:

Restatement (Third) of Property (Don. Trans.) s 12.1, Reforming Donative Documents To Correct Mistakes (1995).

Add:

But see Jeffrey A. Cooper, "Empty Promises: Settlor's Intent, The Uniform Trust Code and the Future of Trust Investment Law," *88 B.U. L. Rev. 1165 (December 2008)* (arguing that the modern trend is to avoid technical obstacles in order to effectuate the testator's intent).

§ 88.07(b)(2) Mistake in Fact--Mistake in Inducement.

Add:

Kale v. Wilson, 668 S.E.2d 729 (Ga. 2008) (the court was required to interpret the will so that language proclaiming the niece as "honor bound to distribute items I have designated to my loved ones" did not result in a condition precedent to the vesting of the estate).

§ 88.07(c). Ambiguity. [Go To Main]

After first sentence, Add new Note 285.1: n285.1

Add:

In re Estate of Vincent, 98 S.W.3d 146 (Tenn. 2003) (general language in the will directing payment of all "just debts" was not sufficiently clear to justify exoneration of the mortgage).

§ 88.07(c)(1) Equivocation.

After the citation "Estate of Bergau..." add:

rev'd, 693 P.2d 703 (Wash. 1985) .

§ 88.07(d) Extrinsic Evidence. [Go To Main]

Add:

In re Estate of Cole, 621 N.W.2d 816 (Minn. Ct. App. 2001) .

After parenthetical ending with "... language)" add:

See also Hershman, Jay N.; 15 Quinnipiac Prob. L.J. 143 (2000).

Add:

San Antonio Area Foundation v. Lang, 35 S.W.3d 636 (Tex. 2000) (stating that the term "real property" did not require extrinsic evidence to understand).

Add:

Garrett v. Read, 102 P.3d 436 (Kan. 2004) (testimony from the will's scrivener about an asset distribution agreement between the testator and his spouse was admitted) *overruled in part by, Nelson v. Nelson, 288 Kan. 570, 205 P.3d 715.*

Add:

In re Robinson, 720 So. 2d 540 (Fla. App. 1998) .

Add:

In re Estate of Cole, 621 N.W.2d 816 (Minn. Ct. App. 2001) .

Add:

Succession of Delcambre, 893 So. 2d 167 (La. App. 2005) (extrinsic evidence excluded because the terms of the bequest were clear and unambiguous).

§ 88.07(f) Attorney Liability for Malpractice. [Go To Main]

Add:

See Rydde v. Morris, 675 S.E.2d 431 (S.C. 2009) (holding that an attorney owed no duty to prospective beneficiaries when the attorney failed to prepare a will for execution prior to the decedent's death).

FOOTNOTES:
(n3)Footnote 275.1. *See Handelsman v. Handelsman, 852 N.E.2d 862 (Ill. App. 2006)* (holding that extrinsic evidence could not be used in reforming a testamentary trust to reflect the settlor's alleged actual intent).

(n4)Footnote 285.1. *See*, e.g., *Dyess v. Brewton, 669 S.E.2d 145 (Ga. 2008)* (holding that parol evidence was permissible to explain an ambiguity in a codicil which referenced a will).

Supp. To CHAPTER 88 Testamentary Transfers of Real Property

10-88 Thompson on Real Property, Thomas Editions Supp. to § 88.08

Supp. to § 88.08 Will Contests.

[Go To Main]

§ 88.08(a) Introduction; Purpose. [Go To Main]

Change the citation of "In re Estate of Herr..." to read:

60 N.W.2d 699, 703 (N.D. 1990) .

§ 88.08(c) Procedure. [Go To Main]

§ 88.08(c)(1) Nature and Form.

Add:

Estate of Smith, 71 Cal. Rptr. 2d 424 (Cal. App. 1998) .

§ 88.08(c)(3) Standing.

§ 88.08(c)(3)(i) General.

Add:

Barrera v. Vanpelt, 965 S.W.2d 780 (Ark. 1998) .

Add:

See, e.g., *In Re Estate of Eguia, 917 N.E.2d 166 (Ind. App. 2009)* (holding that a personal representative lacked standing to contest a will because he was not a beneficiary).

§ 88.08(c)(3)(ii) Specific Parties.

Change the citation of the "Conn. Gen. Stat. Ann..." to read:

Conn. Gen. Stat. Ann. § 45a--447

Change the citation of the "Conn. Gen. Stat. Ann..." to read:

Conn. Gen. Stat. Ann. § 45a--447

§ 88.08(d) Grounds. [Go To Main]

§ 88.08(d)(1) Instrument Lacks Testamentary Character--Attacks on the Instrument Itself.

§ 88.08(d)(1)(ii) Intent.

Add:

Estate of Smith, 71 Cal. Rptr. 2d 424 (Cal. App. 1998) .

See In re Estate of Pruitt, 249 S.W.3d 654 (Tex. App. 2008) (holding that there was a genuine issue of material fact whether or not the testator and the witnesses signed the will at the same time).

Add:

An issue regarding the intent of the testator also arises as to whether the testator intended to revoke a will prior to his death. See, e.g., *Brown v. Brown, 21 So.3d 1 (Ala. Civ. App. 2009)* ; *In re Estate of Turner, 265 S.W.3d 709 (Tex. App. 2008)* .

Change the citation of "Huffman v. Huffman ..." to read:

339 S.W.2d 885, 888 (Tex. 1960) .

§ 88.08(d)(2) Mistake or Lack of Testamentary Capacity--Attacks on the Testator.

§ 88.08(d)(2)(ii) Mental Capacity.

Add:

Succession of Wiggins, 984 So. 2d 948 (La.App. 3 Cir. 2008) (decedent could not be shown as unable to read and write in a manner necessary to possess testamentary capacity).

Add:

See In re Succession of Furlow, 17 So.3d 475 (La. App. 2009) (holding that the plaintiffs failed to meet their burden of proving that testator lacked testamentary capacity).

§ 88.08(d)(2)(ii)(B) Insane Delusion.

Add:

Shook v. Pendley, 1998 Ark. App. LEXIS 869 (Ark. App. 1998) .

§ 88.08(d)(3) Interference by Third Parties.

§ 88.08(d)(3)(i) Undue Influence.

Add:

Lakes v. Ryan, 2003 Ohio App. LEXIS 501 (No. CA2002-05-118, Feb. 3, 2003) (held that the testator was not under undue influence at the time he executed the will)

Change the citation of "Ginter v. Ginter..." to read:

101 P. 634 (Kan. 1909) .

Add:

See In re Estate of Henry, 250 S.W.3d 518 (Tex. App. 2008) (holding that a will was not the product of undue influence); *Harris v. Jourdan, 180 P.3d 119 (Or. App. 2008)* (holding that a will was the product of undue influence).

Add:

See In re Last Will and Testament of Kistler, 22 So.3d 1209 (Miss. App. 2009) (holding that the evidence was sufficient to overcome a presumption of undue influence).

After the citation "In Wood's Estate..." add:

overruled, Widmayer v. Leonard, 373 N.W.2d 538 (Mich. 1985) , overruling recognized, State Farm Mut. Auto. Ins. Co. v. Allen, 477 N.W.2d 445 (Mich. Ct. App. 1991) .

After the citation "Estate of Pedrick..." add:

see also Estate of Younger, 508 A.2d 327 (Pa. Super. Ct. 1986) .

§ 88.08(d)(3)(i)(A) Attorneys and Undue Influence.

After the citation "McCarthy v. Fidelity Nat'l Bank & Trust Co..." add:

but see, Mundwiller v. Mundwiller, 822 S.W.2d 863 (Mo. Ct. App. 1991) (stating that *McCarthy* has been overruled by *Mo. Rev. Stat. § 473.081* (1986)) called into doubt by statute as stated in *Burke v. Kehr, 826 S.W.2d 855 (Mo. App. 1992)* .

§ 88.08(d)(3)(iii) Fraud.

Add:

Bohlen v. Spears, 509 S.E.2d 628 (Ga. 1998) . Influencing disposition of testator's property can take numerous forms; *see, e.g., Dietter v. Dietter, 737 A.2d 926 (Conn. App. 1999)* (fraudulent transfer of assets from testamentary trust to inter vivos trust).

§ 88.08(d)(3)(iv) Remedies.

§ 88.08(d)(3)(iv)(B) Tortious Interference with Inheritance.

At end of subsection, add new footnote: n461.1

§ 88.08(e) *In Terrorem* Clauses. [Go To Main]

Add:

Sinclair v. Sinclair, 670 S.E.2d 59 (Ga. 2008) ("Because in terrorem clauses result in forfeitures, they must be strictly construed. Moreover, conditions in terrorem that are impossible, illegal, or against public policy shall be void").

Add:

In re Ellis, 683 N.Y.S.2d 113 (N.Y.A.D. 1998) .

Add:

See Peter G. Billings, "Infants and In Terrorem Clauses: Rethinking *New York Estate Powers and Trusts Law Section 3-3.5*," 22 *Quinnipiac Prob. L.J.* 397 (2009) (arguing that a New York statute which exempts minors from in terrorem clauses is against public policy).

Change the citation of "Mich Stat. Ann... ." to read:

Mich. Stat. Ann. § 700.2518

§ 88.09(b) Privity. [Go To Main]

After the citation "Auric v. Continental Cas. Co..." add:

see also, Beauchamp v. Kemmeter, 629 N.W.2d 785 (Wis. App. 2000) .

After the citation "Hale v. Groce..." add:

but see, Mieras v. DeBona, 550 N.W.2d 202 (Mich. 1996) disagreed with by *Blair v. Ing, 21 P.3d 452 (Hawaii 2001)* .

Change the citation of "Guy v. Liederbach..." to read:

459 A.2d 744 (Pa. 1983) .

Add:

Blair v. Ing, 21 P.3d 452 (Hawaii 2001) .

Add:

See, e.g., Rydde v. Morris, 675 S.E.2d 431 (S.C. 2009) (holding that prospective beneficiaries could not prevail in a legal malpractice claim against the decedent's attorney because the attorney did not owe the prospective beneficiaries fiduciary duties).

§ 88.09(c)(2) Inadequate Attention to Detail.

After the citation "Heyer v. Glaig..." add:

but see, Laird v. Blacker, 279 Cal.Rptr. 700 (Cal. Ct. App. 1991) (stating that *Heyer* has been superseded by statute); however, the Laird v. Blacker case may not be cited, *see* Cal. Rules of Court 976, 977, and 979.

After the citation "Guy v. Liederbach..." add:

but see, Blair v. Ing, 21 P.3d 452 (Hawaii 2001) .

After the citation "Auric v. Continental Cas. Co..." add:

see also, Beauchamp v. Kemmeter, 629 N.W.2d 785 (Wis. App. 2000) .

§ 88.09(c)(3) Competence Questions.

After the citation "Horne v. Peckham ... " add:

but see, ITT Small Business Finance Corp. v. Niles, 885 P.2d 965 (Cal. 1994) overruled, Jordache Enterprises, Inc. v. Brobeck, Phleger & Harrison, 958 P.2d 1062 (Cal. 1998) (discussing the time at which the statute of limitations begins to run in attorney malpractice cases).

FOOTNOTES:
(n5)Footnote 461.1. *See, e.g., Rienhardt v. Kelly, 164 F.3d 1296 (10th Cir. 1999)* (action on tortious interference with expected inheritance).

Supp. To CHAPTER 88 Testamentary Transfers of Real Property

10-88 Thompson on Real Property, Thomas Editions Supp. to § 88.10

Supp. to § 88.10 Will Revocation.

[Go To Main]

§ 88.10(a) Revocation by Physical Act. [Go To Main]

Add:

In *Morrison v. Morrison, 655 S.E.2d 571(Ga. 2008)* , the court held that a testator could not revoke his will by obliterating a copy of his will.

Add:

In *Gushwa v. Hunt, 197 P.3d 1(N.M. 2008)* , the court held that the testator could not revoke his will by writing "revoked" on a photocopy of his will.

After ".. The Law of Will 195-197 (1928)," Add:

Board of Trustees v. Calhoun 514 So. 2d 895 (Ala. 1987) (holding that an entire will is invalid where the will had been in control of the testator and the signature page had been removed.)

Add:

Hansel v. Head, 706 So. 2d 1142 (Ala. 1997) .

§ 88.10(e) Lost Wills. [Go To Main]

Add:

In re Estate of Wilson, 252 S.W.3d 708 (Tex. App. 2008) ; *Mincey v. Deckle, 662 S.E.2d 126 (Ga. 2008)* .

After the citation "Estate of Shaw ... " add:.

see also, In re Estate of Goodwin, 18 P.3d 373 (Okla. App. 2000) .

change the citation of "Ark. Stat. Ann..." to read:

Ark. Stat. Ann. § 28-40-302

§ 88.10(f)(3) Intent.

Add:

In re Estate of Oliva, 880 N.E.2d 1223 (Ind. App. 2008) (holding that the doctrine of dependent relative revocation applied where the testator destroyed his prior will only after he or she had created and signed a new one).

Add:

In re Estate of Sharp, 889 N.Y.S.2d 323 (2009) ("The doctrine of relative revocation ... is usually applied where the testator cancels a will with a present intention to make a new testamentary disposition and the new disposition is not made, or if made, fails of effect for some reason ... ").

After the citation "Carter v. First United Methodist Church ... " add:

but see Havird v. Schlachter, 470 S.E.2d 657 (Ga. 1996) .

§ 88.10(f)(4) Application.

Change the citation of "Crosby v. Alton Ochoner Med. Fed'n ... " to read:

276 So. 2d 661 (Miss. 1973) .

§ 88.10(g)(4) Statutory Rules in U.S. Jurisdictions.

Add:

In re Estate of Creech, 989 A.2d 185 (D.C. 2010) ("[A] prior will may not be revived unless it has been re-executed or a codicil is executed in accordance with other statutory provisions.").

Change the citation of "Estate of Boysen ... " to read:

309 N.W.2d 45 (Minn. 1981) .

Change the citation of "Alaska Stat ... " to read:

§ 13.12.509

Change the citation of "Cal. Code ... " to read:

Cal. Prob. Code § 6123.

Change the citation of "Me. Rev. Stat. Ann ... " to read:

18-A Me. Rev. Stat. Ann. § 2-509

After the citation "Mich. Comp. Laws. Ann ... " add:

repealed, (effective Apr. 1 2000).

Change the citation of "Mont Code Ann ... " to read:

Mont. Code Ann. § 72-2-529

After the citation "S.D. Codified Laws Ann § 29-3-6" add:

repealed (1995) (In 1995 South Dakota repealed all previously enacted laws regarding succession, wills and probate and replaced them with the Uniform Probate Code).

Change the citation "MD. Ann. Code ... " to read:

Md. Estate & Trust Code § 4-106

Supp. To CHAPTER 88 Testamentary Transfers of Real Property

10-88 Thompson on Real Property, Thomas Editions Supp. to § 88.11

Supp. to § 88.11 Changes After Will Execution.

[Go To Main]

§ 88.11(a) Changes in Persons. [Go To Main]

§ 88.11(a)(1) Missing

§ 88.11(a)(1)(iii) When Lapse not Applied--Common Law.

After the citation "Richland Trust Co. v. Bicvar ... " add:

but see Matter of Estate of Winslow, 934 P.2d 1001 (Kan. Ct. App. 1997) .

§ 88.11(a)(2) Antilapse Statutes.

Add:

Makepeace v. Mosser, 591 S.E.2d 191 (W. Va. 2003) (when testator intended real property to pass to his sister or her heirs, the anti-lapse statute authorized the property to pass to the sister's heirs).

Add:

Iowa Code § 633.273 (revised to read "issue" and not "heirs").

Add:

Jacobsen v. Flathe, 1997 Tenn. App. LEXIS 635 (Tenn. App. 1997) .

Change the citation "Estate of Kehler ... " to read:

411 A.2d 748 (Pa. 1980) .

§ 88.11(a)(2)(i) Application of Antilapse Statutes to Class Gifts.

Add:

In Re Estate of Lensch, *99 Cal. Rptr. 3d 246 (2009)* (holding that an anti-lapse statute caused the gift to pass to the diseased legatee's children).

§ 88.11(a)(3) Simultaneous Death.

§ 88.11(a)(3)(ii) 1991 Uniform Simultaneous Death Act.

Add:

See Waldman v. Maini, 195 P.3d 850 (Nev. 2008) .

§ 88.11(b) Changes in Property. [Go To Main]

§ 88.11(b)(1). Ademption by Extinction.

Add:

In re Estate of Frank, 189 P.3d 834 (Wash. App. 2008) (action over whether real property devised to a foundation was adeemed).

Bolte v. Robertson, 2006 Ala. LEXIS 88 (Ala. 2006) (devisee of property sold before testator's death was not entitled to payments made on the property purchase price before testator's death).

Mattlage v. Mattlage, 243 S.W.3d 763 (Tex. App. 2007) (devise in will adeemed by contract for the sale of the land).

For a discussion on the development of the law of ademption by extinction see Joshua Mullen, "Property: Administration of Wills: Common Law Ademption by Extinction and the Applicability of the *Tennessee Code Annotated Section 32-3-111*." *75 Tenn. L. Rev. 577 (2008).*

Add:

Estate of Pickett v. Johnson, 2004 Miss. App. LEXIS 67 (No. 2002-CA-01748-COA, Feb. 3, 2004) (a sales contract not cancelled by the vendor's death resulted in ademption of the devise for that land).

§ 88.11(b)(1)(ii) Identity Theory.

Change the citation of "In re Dugan's Estate ... " to read:

In re Dungan's Estate, 73 A.2d 776 (Del. Ch. 1950) .

Change the citation of "Hoben v. O'Donnell ... " to read:

Hobin v. O'Donnell, 451 N.E.2d 30 (Ill. Ct. App. 1983) .

Change the citation of "White v. White ... " to read:

251 A.2d 470 (N.J. Super. 1969) .

§ 88.11(b)(1)(iii) Construction Techniques to Avoid Ademption.

Change the citation of "Milton v. Milton ... " to read:

10 So. 2d 175 (Miss. 1942) .

§ 88.11(b)(1)(iv) Statutory Reforms.

Change the citation of "N.Y. Est. Powers & Trusts Law ... " to read:

§ 3-4.5

Change the citation of "Pa. Sta. Ann ... " to read:

20 Pa. Stat. Ann. § 2514(16.1).

§ 88.11(b)(2) Ademption by Satisfaction.

After the citation "Austin v. Austin ... " add:

but see, In re Estate of McFayden, 454 N.W.2d 676 (Neb. 1990) (stating that the use of parol evidence in matters of ademption as discussed in *Austin* had been superceded by statute).

After the citation "In re Estate of Wantz ... " add:

but see, In re Estate of McFayden, 454 N.W.2d 676 (Neb. 1990) (stating that *Wantz* has been superceded by statute).

§ 88.11(b)(3) Abatement.

§ 88.11(b)(3)(i) Intent.

Add:

In re Estate of Oberstar, 709 N.E.2d 872 (Ohio Ct. App. 1998) .

§ 88.11(b)(3)(iv) Estate Tax Note.

Change the citation of "Habert v. Monroe County ... " to read:

Haberl v. Monroe County, 491 N.E.2d 909 (Ill. Ct. App. 1986) .

Supp. To CHAPTER 88 Testamentary Transfers of Real Property

10-88 Thompson on Real Property, Thomas Editions Supp. to § 88.12

Supp. to § 88.12 Limits on Dispositions Under a Will.

[Go To Main]

§ 88.12(a). General. [Go To Main]

Add:

Bernard v. Foley, 139 P.3d 1196 (Cal. 2006) (care custodians presumptively disqualified from receiving testamentary transfers).

Henry v. Henry, 670 N.W.2d 431 (Iowa App. 2003) (gifts to a son were not advancements of amounts he would have received under his parents' wills).

§ 88.12(b) Protection of Spouse. [Go To Main]

§ 88.12(b)(2) Theory.

Add:

However, the decedent's spouse's legal right to her elective share can be forfeited through improper conduct such as fraud or undue influence. See *Campbell v. Thomas, 897 N.Y.S.2d 460 (2010)* (holding that although the wife had known the decedent for 25 years she forfeited her elective share by inducing the decedent into marriage through undue influence).

After the citation "Painter v. Painter ... " add:

but see, Landwehr v. Landwehr, 545 A.2d 738 (N.J. 1988) (Pointing out that subsequent statutes have altered the original rationale in the *Painter* case).

Change the citation of the case "O'Brien v. O'Brien ... " to read:

489 N.E.2d 712 (N.Y. 1985) .

After the citation "O'Brien v. O'Brien ... " add:

but see, Hoak v. Hoak, 370 S.E.2d 473 (W.Va. 1988) .

§ 88.12(b)(3) Alteration of Rights by Pre or Post-Nuptial Agreement.

After the first sentence, Add new Note 721.1: n721.1

After the citation "Osborne v. Osborne ... " add:

Robbat v. Robbat, 643 So. 2d 1153 (Fla. Ct. App. 1994) .

§ 88.12(b)(4) The Spousal Election.

§ 88.12(b)(4)(iv) Does Surviving Spouse Acquire the Elective Share *Plus* Bequest or Inter Vivos Transfers?

Add:

In re Estate of Erwin W. Peterson, 576 N.W.2d 767 (Neb. 1998) .

After the citation "Ohio Rev. Code § 2107.42" add:

repealed.

Change the citation of "Ill. Rev. Stat ... " to read:

755 Ill. Rev. Stat. 5/2-8.

§ 88.12(b)(5) Omitted Spouse.

Change the citation of "Ky. Rev. Stat ... " to read:

but see, Ky. Rev. Stat. § 394.090

§ 88.12(b)(8)(i) Generally.

Change the citation of "Wirth v. Wirth ... " to read:

Wirth v. Wirth, 326 N.Y.S.2d 308 (N.Y. App. Div. 1971) .

For a discussion of how protection differs for spouses in community and marital property states see Benjamin Erlick, "Varying Levels of Protection Afforded: Disinherited Spouses in the Marital Property and Community Property States," *1 Phoenix L. Rev. 501 (2008)* .

§ 88.12(b)(8)(ii) Conflicts Issues.

Change the citation of "Cal. Prob. Code ... " to read:

Cal. Prob. Code § 66.

Change the citation of "Idaho Code ... " to read:

Idaho Code § 15-2-201.

Change the citation of "Wash. Rev. Code ... " to read:

Wash. Rev. Code § 26.16.220 - 26.16.250

After the citation "Tex. Fam. Code Ann. § 363(b) ... " add:

repealed.

§ 88.12(c)(2) Drafting Hints--Testamentary Libel.

Add:

See Adam Dayan, "The Kids Aren't Alright: An Examination of some of the Flaws in American Law Regarding Child Disinheritance, the Reasons that Children should be Protected, and a Recommendation for the United States to Learn from the Australian Model that Protects Children Against Disinheritance." *17 Cardozo J. Int'l & Comp. L. 375 (2009).*

§ 88.12(c)(4) Pretermitted Heirs.

Change the citation of "110 1/2 ILCS 4-10 ... " to read:

755 I.L.C.S. 5/4-10

§ 88.12(d)(1) Mortmain Statutes.

Change the citation of "Ga. Code 113-117" to read:

Ga. Code Ann. § 53-2-9, 53-2-10.

After the citation "Idaho Code § 15-2-615" add:

repealed (1994).

After the citation "Miss Code § 91-5-31" add:

repealed (1993).

§ 88.12(d)(2). The Rule Against Perpetuities.

Add:

Griffith v. Kirsch, 886 A.2d 249 (Pa. 2005) (language in will did not constitute an unreasonable restraint on alienation).

§ 88.12(e) Slayer Statutes. [Go To Main]

Change the citation of "Schifanelli v. Wallace ... " to read:

315 A.2d 513 (Md. 1974) .

Add:

In re Estate of Morris P. Van Der Veen, 935 P.2d 1042 (Kan. 1998) .

Add:

In re Estate of Kissinger, 206 P.3d 665 (Wash. 2009) (holding that a slayer statute could not apply to a killer who was found not guilty of murder by reason of insanity).

Add:

In *Levenson v. Word, 686 S.E.2d 236 (Ga. 2009)* , the Georgia Supreme Court held that the administrator of a husband's estate could not succeed in a conversion claim when the wife used estate property to procure legal representation to defend a murder prosecution against her.

FOOTNOTES:
(n6)Footnote 721.1. *See e.g., Foster v. Estate of Gomes, 27 So.3d 145 (Fla. App. 2010)* ; *Taylor v. Taylor, 1 So.3d 348 (Fla. App. 2009)* .

CHAPTER 89 INTESTATE SUCCESSION

10-89 Thompson on Real Property, Thomas Editions § 89.01

AUTHOR: Professor Buddy O.H. Herring Wake Forest University School of Law

§ 89.01 Introduction.

[Go To Supp]

The laws of intestate succession affect the lives of millions of people each year. While a growing number of people are taking the time to draft and execute last wills and testaments, a significant number of people owning property die each year without a will, in other words they die intestate. When that happens, the laws of the state will determine how their property is distributed. Also, the laws of intestacy will apply if a person dies and leaves a will that does not fully dispose of their property. Finally, the laws of intestate succession will apply to certain assets regardless of whether or not the deceased has a will. An example would be wrongful death judgment proceeds. In some states, these funds are to be distributed according to the laws of intestate succession and not under the residuary clause of a will. n1

The laws of intestate succession apply to any property which the decedent owned at death not properly disposed of by a valid last will and testament or not controlled by contract. They apply to present as well as future interests in property. Theoretically, these laws will distribute the intestate's property the way an average, reasonable and prudent person would dispose of his or her property. This may or may not be the way the actual intestate would have distributed property and cannot take into account special circumstances that only pertain to this family. Also, since there are 50 different legislatures fashioning the intestate laws of each state, there may be at least 50 different ideas as to what a reasonable and prudent person would do with his or her property in a given set of circumstances.

This chapter will summarize the transformation of intestate succession laws in the United States from colonial times to the present, pointing how the early English common law influence has been supplanted by statutes in each of the states. The chapter will describe the principal state legislative approaches toward distributing an intestate's real and personal property.

FOOTNOTES:
(n1)Footnote 1. *Matter of Estate of Richardson, 695 So.2d 587 (Miss. 1997)* (illegitimate children may recover as heirs in a wrongful death suit despite the residuary clause of the decedent's will); *Estate of J. W. Hessenflow v. Hessenflow, 909 P.2d 662 (Kan. App. 1995)* (election by decedent's widow to take by intestate succession); *Estate of Chong v. Chong, 906 P.2d 710 (Nev. 1995)* (two bank accounts not disposed of by will were distributed according to intestate

succession); *In re Estate of Marguerite Hunt, 908 S.W.2d 483 (Tex. App. 1995)* (remainder interest not disposed of by will passed by intestacy); *In re Will of Moore v. Eckliln, 428 S.E.2d 855 (N.C. App. 1993); McKinney v. Mosteller, 365 S.E.2d 612 (N.C. 1988).*

CHAPTER 89 INTESTATE SUCCESSION

10-89 Thompson on Real Property, Thomas Editions § 89.02

AUTHOR: Professor Buddy O.H. Herring Wake Forest University School of Law

§ 89.02 Historical Background.

With the development of individual property rights came the question as to what happened to these rights upon the owner's death. The development of succession rules and the right to make a will can be traced back at least to Roman society. If a person died without making a will, he was said to die intestate and most post-Roman societies have developed a scheme to deal with a deceased person's property. This scheme is referred to as intestate succession. The development of most modern intestate succession laws can be traced back to feudal England and the Norman Conquest of 1540.

The Norman Conquest brought two important features into English law that impacted greatly on the law of intestate succession. These were the Norman brand of feudalism with its hallmark concept of primogeniture and the separation by William the Conqueror of the lay, or royal courts and the ecclesiastical courts. As a result of this division of courts, the laws regarding descent of land were determined by the more legalistic royal law courts and the rules regarding succession to personal property or chattels were developed by the more liberal ecclesiastical courts.

Thus, two sets of rules were developed by two different courts which applied to two different kinds of property. If one wanted to know what happened to a person's real property one looked to the rules of feudalism, as defined by the royal law courts. If one wanted to know what was to be done with a decedent's personal property, one had to examine the rules established by the ecclesiastical courts. This distinction between succession to real property and to personal property continued well into the 20th century in the United States.

AUTHOR: Professor Buddy O.H. Herring Wake Forest University School of Law

§ 89.03 Descent of Real Property -- England.

After the Norman Conquest, descent of real property in England was governed by principles of feudalism. The hallmark of the feudal system, as far as descent of land was concerned, was the concept of primogeniture. Primogeniture provided that the eldest son had the right to inherit real property to the exclusion of his sisters and his younger brothers. The major rules concerning descent of real property were established by 1272, but it was not until Sir Matthew Hale wrote his *History of the Common Law* in 1713 that the principles were articulated in one place. n2

Perhaps the most famous statement of the rules concerning descent of real property in England was set forth by Blackstone in his *Commentaries*. n3

These Canons of Descent were as follows:

1. Inheritances shall lineally descend to the issue of the person who last dies actually seised in infinitum; but shall never lineally ascend.

2. The male issue shall be admitted before the female.

3. Where there are two or more males in equal degree, the eldest only shall inherit; but the females all together.

4. The lineal descendants in infinitum of any person deceased shall represent their ancestor; that is shall stand in the same place as the person himself would have done, had he been living. n4

5. On failure of lineal descendants or issue of the person last seised, the inheritance shall descend to his collateral relatives being of the blood of the first purchaser; subject to the three preceding rules.

6. The collateral heirs of the person last seised must be his next collateral kinsman of the whole blood.

7. In collateral inheritance the male stock shall be preferred to the female, unless the lands have in fact descended from a female.

Under these rules, the eldest son of the intestate would inherit all of the real property of the intestate. If the eldest son predeceased the intestate and left issue, those issue would take to the exclusion of the other children of the intestate. If the eldest son predeceased the intestate and left no issue, then the next eldest son or his issue, if he predeceased the intestate, would take all of the estate. Only if there were no sons or lineal descendants of sons would a daughter take the intestate's real property. If that situation arose, all daughters would share equally in the real property of the intestate.

One of the most striking features of the ancient system of intestate succession was the fact that the spouse was never included in the inheritance of real property and that under no circumstances would the parents or grandparents of the intestate take a share of the real property. If there were no children or lineal descendants of children, the real property would go to the intestate's brothers or sisters or their issue -- again preferring the eldest male over all others. If the land was obtained by purchase, the entire paternal line would have to be exhausted before even a much closer collateral on the maternal line would take the real property. This system placed a high premium on being male, being born first and having lineal descendants as quickly as possible.

Spouses were never allowed to inherit real property under the Canons of Descent. Spouses did have the protection of the rights granted by dower and curtesy, but would never inherit, in fee simple, any of the lands of a spouse.

Children born out of wedlock were not included under the term child and could not inherit from anyone. Also, the collateral relatives could not inherit from the illegitimate person. When the illegitimate person died intestate, the real property could descend to the children or other lineal descendants, but not to the collateral relatives. The personal property could pass to the spouse and children.

The Canons of Descent remained in force in England until the passage of the Inheritance Act of 1833. n5 This act made some sweeping changes in the system and abolished such things as non-inheritance by parents. However the system of primogeniture remained in force until 1925. n6

The Canons of Descent had a profound influence on the intestate succession laws of the United States. While most of the states governed intestate succession by statute, many of the principles contained in the Canons were incorporated in the new intestate succession statutes. However, the states generally rejected the concept of primogeniture, the prohibition on spouses inheriting, and the prohibition on inheritance by lineal ancestors.

CHAPTER 89 INTESTATE SUCCESSION

10-89 Thompson on Real Property, Thomas Editions § 89.04

AUTHOR: Professor Buddy O.H. Herring Wake Forest University School of Law

§ 89.04 Distribution of Real Property -- England.

While the descent of real property was controlled by the Canons of Descent and the law courts, the distribution of personal property was controlled by the ecclesiastical courts. Before 1670, there was much uncertainty about the distribution of personal property of a deceased and often the battle was between the deceased's family members and the church itself. This confusion threatened the ecclesiastical court's jurisdiction. In 1670, the Church sponsored the Statute of Distribution n7 to bring some order to the distribution of personal property.

The main difference between the Statute of Distribution and the Canons of Descent was the recognition in the Statute of the right of the spouse to a share of the deceased's estate. There was also no prohibition against the parents taking a share and, of course, primogeniture was not a feature of the Statute of Distribution.

§ 89.04(a) Widow's Share.

The first thing that one had to do in distributing the personal property was to ascertain the widow's n8 share of the estate. It was only after her share was computed that the share of children and other relatives could be determined. Under the Statute, if there were any children or surviving heirs of children, the widow was entitled to one-third of her deceased husband's personal property. If there were no children and no surviving heirs of predeceased children, the widow got one-half of her husband's personal property. The share not taken by the surviving spouse was then distributed as described in the next two subsections.

§ 89.04(b) Children's Share.

Once the widow's share was determined, the remainder of the personal property could be divided. Where both a widow and children survived, the children would divide equally that share of the estate not allocated to the widow. In other words, the children would divide equally two-thirds of the deceased's personal property. If there was a single child, that child would take the entire two-thirds. n9

Grandchildren took nothing so long as their parents were alive. If, however, a child predeceased the intestate, leaving issue, those issue would take their parent's share. For example, suppose that X died leaving three children (A, B, and C) and a widow (W), A had two children (C-1 and C-2) and B had one child (C-3) and C had no children. Under the

Statute of Distribution, W would be entitled to 1/3 of the personal property and A, B and C would divide the remaining 2/3 of the personal property equally. Each would get 2/9 of the personal property. Now suppose that A predeceased X. Again W gets 1/3 of the personal property and the remaining 2/3 is now divided between X's children or their representatives. In this case, B would get 2/9 and C would get 2/9 and A's share of 2/9 would be divided equally between C-1 and C-2. They would each get 1/9. Notice that C-3 got nothing because his parent was still alive. Now suppose that both A and B predecease X. W will still get her 1/3 of the personal property. Since one of the children is still alive, we divide the remaining 2/3 by the number of children alive, plus those who died leaving issue, in this case 3. So C still gets her 2/9 of the personal property. The remaining 4/9 of the property is to be divided between C-1, C-2, and C-3. The question is how is it to be divided. If it was divided as was done under the Canons of Descent, we would used the concept of representation and C-1 and C-2 would divide their parent's 2/9th share. C-3 would then take her parent's 2/9ths share. If the theory of representation was used C-1 and C-2 would each get 1/9th and C-3 would get 2/9ths. This would be a *per stirpes* distribution. If, on the other hand, a *per capita* distribution was made, then C-1, C-2 and C-3 would divide the 4/9ths share of their parents equally. Arguments can be made for either scheme and in 1741 the Lord Chancellor expressed the opinion that a *per stirpes* distribution would be proper. n10 It was later decided that a *per stirpes* distribution would be proper in such cases. n11

If the deceased left no widow, but had surviving children or heirs of children, the children or their heirs took the whole estate. If there was a single child, that child took all the personal property. So long as there were children or heirs of children, the parents and collateral relatives would take none of the personal property.

§ 89.04(c) Next of Kin.

If the deceased left a widow and no children and no representatives of predeceased children, the widow took one-half of the personal property. The remaining one-half went to the next of kin to be divided equally by those in the nearest degree of kinship. If the deceased left no widow and no children or representatives of predeceased children, then the next of kin took all the personal property.

The rules for determining next of kin were quite different than the rules for determining heirs under the Canons of Descent. The principles of primogeniture and the preference for males over females were not followed. Also, the rule against property lineally ascending was not followed. Thus, if X died intestate and left no widow and no children or heirs of predeceased children, but was survived by father and mother (F and M) and a brother and a sister (B and S), the real property would all go to B, but the personal property would be divided equally between F and M. If X's parents had predeceased X, then the personal property would be divided equally between B and S.

The ecclesiastical courts did not follow the Canons of Descent in computing degree of kinship. Under the Canons of Descent the nearest collateral line would be exhausted before moving to the next parentela. (The first parentela are the descendants of the intestate's parents. The second parentela would be descendants of the intestate's grandparents.) Thus, if X died leaving no widow, no children, no parents, the land would then descend to X's brother or the brother's heirs, no matter how remote those heirs might be. An heir of the brother, even if three or four times removed from the brother, would take the land, by representation, to the exclusion of an uncle. The closest stock was exhausted before the land would pass to a more remote stock. n12

In determining degree of kinship, the ecclesiastical courts adopted the civil law method of counting. Under this method, one first counted the steps from the deceased to a common ancestor and then the steps from the ancestor to the claimant. The sum of the two numbers represented the degree of kinship of the claimant to the deceased. Thus, a nephew was in the third degree of kinship. It was one step from the deceased to the parents and then one step to the decedent's brother and then one step to the brother's child. An uncle would be in the third degree also. There would be one step to the deceased's parents, one step to the grandparents (the common ancestor), and then one step to the uncle. Absent a widow and children or representatives of children, those in the closest degree of kinship would share equally in the personal property of the deceased.

In the example above, if the intestate left no widow, no children, no representatives of children, and no parents, but did leave a nephew and a grandfather, the grandfather would take all the personal property since he was in the second degree of kinship and the nephew was in the third degree. However, the nephew would take all the real property.

Generally representation was not allowed. The one exception was in the case where there were brothers or sisters and children of predeceased brothers and sisters. In this case, alone, the Statute allowed the children of a predeceased brother or sister to move up and share in the estate with the surviving brothers and sisters. The children would share equally in their parent's share. If there were no surviving brothers and sisters, but there were nephews and nieces, they would share equally with aunts and uncles who were also in the third degree.

§ 89.04(d) Miscellaneous.

Unlike the rules under the Canons of Descent, the source of the deceased's title was irrelevant in the passing of personal property. No preference was given to the maternal or paternal side of the family. Also, relatives of the half-blood would inherit equally with relatives of the whole blood.

However, just as in the case of descent of land, illegitimate children would take none of their parent's personalty.

CHAPTER 89 INTESTATE SUCCESSION

10-89 Thompson on Real Property, Thomas Editions § 89.05

AUTHOR: Professor Buddy O.H. Herring Wake Forest University School of Law

§ 89.05 Intestacy -- United States.

[Go To Supp]

§ 89.05(a) Introduction.

The English law of intestacy has had a great influence on the law of intestacy in the United States. While all of the American states have rejected the concepts of primogeniture and the preference of males over females and most reject the distinctions England drew between real and personal property, many of the patterns and concepts developed in England have served as the basis for American intestate succession laws.

Since the colonies did not have bishops and a strongly developed state church, no ecclesiastical courts developed. Since there were not two courts vying for power in the area of intestate succession, most of the states decided to treat real and personal property alike. There were some exceptions concerning the share of the surviving spouse and even today some state statutes make reference to a different share of the real property and the personal property of the intestate. n13

Generally, the legislatures decided to follow the scheme set forth in the English Statute of Distribution, 1670. The concepts of dower and curtesy were abolished and the surviving spouse was entitled to share in the estate of the deceased. Also, the Canons of Descent's prohibition on property lineally ascending never became a part of the laws of most states. Finally, most states decided to follow the civil law method of determining next of kin.

While the English law served as a model for most states, there is no universal law of intestate succession in the United States today, n14 each state has developed its own laws of intestate succession. Also, while there is no universal intestate succession law in this country, there are certain areas of agreement among the states and the various jurisdictions can be placed in groups depending on how they deal with certain areas, such as the share of the surviving spouse. n15

§ 89.05(b) The Surviving Spouse.

In England, under the common law, the surviving spouse was not entitled, outright, to any of the decedent spouse's real property. The common law provided that the surviving spouse would get a life interest in the lands of the deceased spouse under the principles of dower or curtesy. This right could not be defeated by will. Under the Statute of

Distribution, 1670, the widow took either a third or a half of the personal property, depending on whether or not there were descendants of the deceased. This share could be defeated by will.

This situation has been greatly changed in the United States. Dower and curtesy have largely been abolished or greatly changed. Generally speaking, the surviving spouse is given a share of the realty and personalty of the deceased spouse. In many jurisdictions there is no distinction. The surviving spouse is given a fixed share of the intestate's estate, regardless of what comprises the estate. n16

There is, however, a wide variance as to what is the surviving spouse's share and exactly what comprises that share. Since the surviving spouse is considered a special case, different legislatures have adopted different means to deal with the surviving spouse. Also, many states reduce the share of the surviving spouse if he or she is a second or successive spouse and there are children by a previous marriage. n17 There is, however, one area of agreement and that is that the surviving spouse's share is to be allocated before any other relative receives any of the estate of the deceased.

Thus, the first thing the administrator must do in distributing an intestate estate is determine what is the share of the surviving spouse.

§ 89.05(b)(1) Share of the Surviving Spouse -- Uniform Probate Code.

The Uniform Probate Code n18 contains a basic pattern of intestate succession. This pattern, presumably, reflects how most people would dispose of their property if they were to die without a will. The Code has been adopted in sixteen states. n19

The share of the surviving spouse varies according to a number of factors. The intestate share of a decedent's estate is:

(1) the entire estate if:

(i) no descendant or parent of the decedent survives the decedent; n20 or

(ii) all of the decedent's surviving descendants are also descendants of the surviving spouse and there is no other descendant of the surviving spouse who survives the decedent; n21

(2) the first [$200,000], plus three-fourths of any balance of the intestate estate, if no descendant of the decedent survives the decedent, but a parent of the decedent survives the decedent;

(3) the first [$150,000], plus one-half of any balance of the intestate estate, if all of the decedent's surviving descendants are also descendants of the surviving spouse and the surviving spouse has one or more surviving descendants who are not descendants of the decedent;

(4) the first [$100,000], plus one-half of any balance of the intestate estate, if one or more of the decedent's surviving descendants are not descendants of the surviving spouse. n22

COMPUTER-ASSISTED RESEARCH

LEXIS: intestate succession w/30 surviving w/1 spouse! w/5 share

§ 89.05(b)(2) Share of the Surviving Spouse -- Issue and Parents.

Even if a jurisdiction has not adopted the Uniform Probate Code, one of the most important factors in determining the intestate share of the surviving spouse is whether or not the intestate left issue or descendants of issue surviving. In many states, the surviving spouse's share is reduced if there are issue. n23 The Alabama Code n24 now requires that if

there is no surviving issue or parent of the decedent, the entire estate goes to the surviving spouse. If there is no surviving issue, but the decedent is survived by a parent or parents, the surviving spouse receives the first $100,000 in value, plus one-half of the balance of the intestate estate. If there are surviving issue all of whom are also issue of the surviving spouse, the surviving spouse receives the first $50,000 in value, plus one-half of the balance of the intestate estate. If there are surviving issue one or more of whom are not issue of the surviving spouse, one-half of the intestate estate goes to the surviving spouse. Similar provisions are found in Alaska, n25 Connecticut, n26 Nebraska, n27 New Hampshire, n28 New Jersey, n29 North Dakota n30 and Pennsylvania. n31 In some of these states the share is reduced if there are issue which are not issue of the surviving spouse. n32

Some states give the surviving spouse the entire estate if there are no issue of the intestate regardless of what other relatives survive. n33 In other states, the spouse's share is determined not only by whether or not there are issue, but whether or not parents survive the intestate. n34 For example, in Indiana, n35 the spouse's share is one-third of the estate if there are two children, one-half if there is one child, three-quarters if there is a parent, and the entire estate if there are no issue or parents. n36

If the intestate left issue that are not the issue of the surviving spouse, the surviving spouse's share is most often reduced. The most general reduction is 50%. In other words, where the surviving spouse was to get the entire estate, if there were surviving issue, but if those issue are not issue of the surviving spouse, he or she would get only 50% of the estate. n37

A few states provide that the surviving spouse shall receive the entire estate even if there are issue and parents. n38 In Arizona, n39 the surviving spouse receives the entire estate, including the intestate's interest in community property, if there are no issue or if all the surviving issue of the intestate are also issue of the surviving spouse. n40 Iowa also gives the surviving spouse all of the estate if all the issue are issue of the surviving spouse. n41

One state, Arkansas, provides the surviving spouse no intestate share if children of the intestate survive. However, where there are no issue, the spouse receives all of the estate if the parties have been married at least three years. If they have not been married three years, the surviving spouse receives one-half of the estate. n42

In the great majority of the states, if the intestate is not survived by any issue or by any parents, the surviving spouse takes the entire estate. n43

COMPUTER-ASSISTED RESEARCH

LEXIS: intestate succession w/30 issue or parent!

§ 89.05(c) Descendants.

If the law of a particular jurisdiction does not give the entire estate to the surviving spouse, the next group of people who usually take part of the intestate estate are the lineal descendants. The share allocated to lineal descendants by statute is markedly different from that allocated at the common law. Whereas the eldest son was the preferred beneficiary of land and the children took the largest share of the intestate's personal property, today in most states the surviving spouse is the prime beneficiary. n44

The share that the lineal descendants take is specified by statute. Lineal descendants include posthumously born children n45 and in most states adopted children, though reference to the specific adoption statute must be made to determine if a child inherits through his adopted parents.

Generally speaking, after the allocation of the share for the surviving spouse, the remainder of the intestate's estate goes to his or her lineal descendants in equal shares. n46

The situation becomes more difficult when the intestate is survived by living children, plus descendants of predeceased children. Here the question is what share do the descendants of the predeceased child take? Do they take equally or do they take their parent's share by representation? On this question there is universal agreement among the states. Where there is a living child or children and heirs of a predeceased child, the shares are determined by counting the number of living children plus those who died leaving issue. n47 For example, if an intestate died leaving three living children and a fourth predeceased child who had two children (grandchildren of the intestate), each of the living children would receive one-fourth of the estate and the two grandchildren would divide their parent's one-fourth. However some states have modified this rule when there are two or more predeceased children leaving issue. n48

The distribution becomes more complicated when all of the children have died and have left issue. The question then is whether or not these descendants take *per stirpes* or *per capita*. For example, suppose that the intestate had three children (A, B, and C) and when he died all of his children had predeceased him. Suppose that A had one child (C-1); that B had two children (C-2 and C-3) and that C had three children (C-4, C-5, and C-6). The question is whether these grandchildren take their parent's share or take equally as grandchildren. If they take on a *per stirpes* bases, C-1 gets one-third, C-2 and C-3 each get one-sixth, and C-4, C-5 and C-6 each get one-ninth. If they take on a *per capita* basis, then each child would take one-sixth of the estate. At the common law, the division was *per stirpes*. n49 A growing number of states have abandoned this division and will now allow all the surviving grandchildren to take equally. n50

However, in all states a grandchild will take nothing so long as his or her parent is alive. Also, there is no preference given between males and females.

COMPUTER-ASSISTED RESEARCH

LEXIS: intestate succession w/30 descendant!

§ 89.05(d) Lineal Ascendants.

At the common law, real property could never lineally ascend. n51 Thus, parents could never take any of the intestate's real property, but they could share in the intestate's personal property. Today, no state follows the common law rules concerning real property. As a matter of fact, in many states, if the intestate does not leave lineal descendants, the parents will share in the estate with the surviving spouse. n52 Some states do exclude lineal ascendants if there are no lineal descendants, but there is a surviving spouse. n53 In all cases, the lineal ascendants will not take any of the property if there are any lineal descendants.

In almost all jurisdictions, parents are the preferred beneficiaries when there are no lineal descendants and no spouse. n54 However, in a few jurisdictions, the parents will divide the share of the estate not going to the surviving spouse with surviving brothers and sisters of the intestate. n55

Under certain circumstances, the majority of jurisdictions provide for ascendants even beyond parents. n56

COMPUTER-ASSISTED RESEARCH

LEXIS: intestate succession w/30 lineal w/2 ascendant!

§ 89.05(e) Collateral Succession.

If there are no lineal descendants, no spouse, and no parents, most statutes provide for the intestate's estate to go equally to brothers and sisters. n57 Again, there is no distinction made between males and females. If there are surviving brothers and sisters as well as issue of predeceased brothers and sisters, most states provide that the surviving nephew

and nieces will take their parent's share on a *per stirpes* basis. n58 However, a growing number of states are taking the position that the division is made at the brother and sister level and the shares not taken by living brothers and sisters are lumped together and taken on a *per capita* basis by the surviving nephews and nieces. n59 When there are no surviving brothers and sisters, most states will make a *per capita* division among nephew and nieces. n60

Most states allow descendants of brothers and sisters to represent predeceased brothers and sisters to the exclusion of grandparents and descendants of grandparents. n61 The effect of this position is to exhaust the first parentela, before moving up to the grandparents and the second parentela.

If there are no brothers and sisters or descendants of brothers and sisters, most states will divide the estate among surviving grandparents, usually with one-half the estate going to the maternal side of the family and one-half going to the paternal side of the family. n62 The surviving maternal grandparents would share equally in the one-half share, but if only one of the maternal grandparents were alive, the survivor would take the entire one-half share, the same rule applying on the paternal side of the family. If neither paternal grandparent survived the intestate, then the one-half share allocated to the paternal side of the family would go to the descendants of the paternal grandparents by representation. If there are no paternal relatives, that share would then go to maternal side of the family. On each side of the family, the states will usually allow representation. n63

COMPUTER-ASSISTED RESEARCH

LEXIS: intestate succession w/30 collateral w/2 succession.

§ 89.05(f) Half-Bloods.

In dealing with collateral relatives of the half blood, the states have completely rejected the common law Canons of Descent prohibition against half-bloods taking a share of the intestate's real property. Almost all of the states have abolished the different treatment of collateral relatives of the half and whole bloods. n64

However, some states have special rules when it comes to half-bloods. Connecticut allows half-bloods to take only when there are no collateral relatives of the whole blood in the same degree. n65 Mississippi has a similar statute. n66 A number of states only give half-bloods one-half the amount that a whole blood in the same degree would take. n67

§ 89.05(g) Illegitimates.

At the English common law, an illegitimate child was a *filius nullius*, a child of no one. Such children could not inherit from either mother or father and the parents could not inherit from the child. The only heirs that the illegitimate child would have would be the child's own children. The illegitimate person would have no lineal ascendants, nor any collateral relatives, n68 but instead would establish a new family.

This harsh rule has been modified in all states. The most common rule is that the illegitimate child can inherit from the mother and she can inherit from the child. The child is placed in her bloodline as a child. n69

In most states, an illegitimate child cannot inherit from his or her father unless the child has been legitimated by a subsequent marriage or some other formal acknowledgement has been given by the father, usually during his lifetime. n70 In some states that acknowledgment must be in writing. n71 Another method accepted by most states is if the father is declared in a judicial proceeding to be the father of the child. n72

Some states are less strict and will allow succession between an illegitimate child and the father when the father has openly and notoriously acknowledged his paternity. n73

Oregon allows the child to inherit from its father regardless of the marital status of the parents. n74

Once a state allows the illegitimate to inherit from a parent, the general rule is that the parent can inherit from the child and that the child can also inherit through the parent. In other words, if the child is allowed to inherit from his or her mother, then the child is treated the same as a legitimate child. The same is true once the state has declared that the child can inherit from his or her father. n75

There are a few exceptions; California, for example, limits the rights of relatives of illegitimate children unless they also acknowledge the relationship and help support the child. n76 In New Hampshire and Vermont, the relatives of an illegitimate child have no rights of succession. n77

LEXIS: intestate succession w/30 illegitima!

§ 89.05(h) Adoption.

Adoption was unknown at the common law and has become an area almost completely controlled by statutes in this country. One of the main problems in dealing with adopted children in an intestate situation is that many of the rules governing the adoptee's status are found in statutes located outside the Intestate Succession Act. n78 One must be sure to examine the adoption statutes of a particular jurisdiction before deciding what share the adopted child is entitled to or how to divide an adopted child's estate.

Three areas must be examined in dealing with an adopted child in an intestate situation: (1) whether the child can inherit from the natural parents, or the adoptive parents, or both; (2) whether the adoptive parents, or the natural parents, or both, can inherit from the adopted child; (3) and from whose kin can the adopted child inherit?

There is almost universal agreement on the first issue. The general rule is that the adopted child will inherit from the adoptive parents. n79 A few states do allow the adoption decree to restrict the broader inheritance rights granted by the statute. n80 A few states still allow the adopted child to inherit from the natural parents. n81 But, clearly, the general scheme is to place the adopted child into the bloodstream of the adoptive family and to treat the adopted child as a natural born child and to remove the adopted child from his or her natural family.

In following the idea of placing the adopted child into the bloodstream of his adoptive family, most states provide that only the adoptive parents can inherit from the adopted child. n82 Even states which allow the adopted child to inherit from the natural parents n83 do not allow the natural parents to inherit from the adopted child, unless very special circumstances exist. The most common situation where a natural parent is permitted to inherit from the adopted child is when one of natural parents and one of the adoptive parents marry. n84

Generally speaking, the adopted child will inherit from his adoptive parents' kin and not from the natural parents' kin. Also, the adoptive kin and not the natural kin will take the adopted child's property on intestacy. There are a few exceptions, especially in dealing with natural grandparents, n85 but generally the adopted child is placed into the family of the adopting parents for inheritance purposes.

CHAPTER 89 INTESTATE SUCCESSION

10-89 Thompson on Real Property, Thomas Editions § 89.06

AUTHOR: Professor Buddy O.H. Herring Wake Forest University School of Law

§ 89.06 Advancements.

[Go To Supp]

Intestate succession laws are premised on the idea that a reasonable and prudent person would want to treat children equally. Thus, if, while alive, the intestate made a substantial transfer of property to one child it was probably in anticipation of that child's inheritance. The doctrine of advancements is based on these two ideas. The doctrine will force a child, or other beneficiary, to account for the early distribution in the final distribution of the intestate's estate. Generally speaking, the advance will have to account for so much of the advancement that does not exceed the advance's share of the estate. If an advance received in excess of what would be the advance's share of the estate, the excess will not have to be refunded. n86

One must look at the specific state statute to determine who must account for advancements. At English common law, the doctrine was limited to children of the intestate. n87 A few jurisdictions follow the English common law. n88 However, most have expanded the class of those who must account for an advancement to include grandchildren and other lineal heirs. A few states apply the doctrine to all heirs. n89 Since the foundation of the doctrine of advancements is the presumed equal treatment of children, to extend the doctrine beyond lineal heirs seems somewhat arbitrary.

If a recipient is in a class of people covered by the statute, the first problem is to determine if the payment or transfer of property was an advancement. Not all transfers of property or gifts of money even between parent and child are intended to be an advancement. There are other possibilities. For example, a parent could make a gift or loan to a child. Neither of these would be advancements. Clearly, the intent of the intestate is the controlling factor in determining whether or not an advancement had taken place. The intent at the time of the transaction is the pertinent factor. n90

Determining the intent of a deceased person is often very difficult. Courts are usually quite liberal in admitting evidence to establish that intent. n91 However, a number of states have addressed this problem by enacting statutes which either create a presumption of gift n92 or require that an advancement be in writing. n93 Absent a statute, a number of states have created a presumption that any substantial inter vivos transfer of property between an intestate and a person covered by the advancement statute is an advancement. n94 This presumption is rebuttable and the burden is on the heir to show that an advancement was not intended. n95

Once the intent of the intestate at the time of the transfer is established, it is not fixed for all time. The intestate may have a change of mind and turn the transfer into something more favorable to the donee. For example, a transfer that was intended to be an advancement can be altered by the intestate to an inter vivos gift. However, something that was a gift at the time of transfer cannot be changed to an advancement. n96

Once the facts establish that an advancement was the intent of the intestate, the question is then how must the advance account for the advancement? The advance must bring the advancement into "hotchpot" before sharing any further in the estate of the intestate. n97 What this means is that the value of the advancement, usually determined as of when the advance came into possession of the advancement, n98 will be added to the value of the intestate's estate and then the required division made among the persons enumerated in the statute. For example, suppose the intestate died leaving three children and no spouse. Suppose further that the intestate succession statute required the estate to be divided equally among the children and that the value of the estate was $90,000. Now suppose that the decedent made an advancement to one child in the amount of $30,000. The law of advancements would require adding the advancement to the net estate (bringing it into "hotchpot"). This would create an estate of $120,000. Each child would be entitled to one-third of the $120,000 or $40,000 each. The two children who had not received advancements would each get $40,000 and the child who had received the $30,000 advancement would get $10,000, thus distributing the $90,000 estate. If the advancement had been $50,000, the child who received it would now be precluded from any share of the $90,000 and the remaining children would split the $90,000 equally. n99

What if the child who had received the advancement died before the intestate, leaving two children, would the children have to account for the advancement? Most states, either by statute, n100 or case law n101 require the grandchildren to account as long as at least one of them survives.

CHAPTER 89 INTESTATE SUCCESSION

10-89 Thompson on Real Property, Thomas Editions § 89.07

AUTHOR: Professor Buddy O.H. Herring Wake Forest University School of Law

§ 89.07 Unworthy Heirs.

[Go To Supp]

There are a variety of situations where the conduct of a person entitled to a share of the intestate's estate under the intestate succession acts may be barred from taking. For example, a spouse who abandons his or her spouse my lose the right to intestate succession. n102 Likewise a parent who abandons his or her child will be barred from taking by intestate succession. n103

At the common law, a murderer could inherit from his or her victim. While this result may be shocking, it was also the law in many states. Today, however, all states, either by statute or decision have abrogated the common law rule. n104

If one intentionally kills another, he or she will not be allowed to take from the estate of the deceased. Most states will treat the slayer as having predeceased the intestate victim. n105 Whatever share the slayer would have taken will then go to the heirs.

The statutes only cover intentional killings. Thus, if one accidently kills a decedent, the killer would still be entitled to take. n106 Also, a slayer who did not know the nature and extent of the acts will be permitted to take. n107

Under most statutes, criminal charges are not required in order to bar the slayer. For example, a person who committed suicide before charges could be filed could still be barred from taking. n108 The burden would be on the slayer's estate to show that the slayer should not be excluded under the statute. n109

CHAPTER 89 INTESTATE SUCCESSION

10-89 Thompson on Real Property, Thomas Editions § 89.08

AUTHOR: Professor Buddy O.H. Herring Wake Forest University School of Law

§ 89.08 Escheats.

It is generally provided that if there is no one to take under the intestate succession statutes, the intestate's property will escheat to the state. n110 These escheat funds are often used for some public purpose. n111

However, with the expansion of those entitled to take under modern intestacy laws, the number of escheats has been on the decline. The question each legislature must ask before limiting intestate succession is whether it is better for the state to take the property or a "laughing heir." North Carolina is an example of a state which has limited collateral succession to persons who are within five degrees of kinship to the intestate, but will allow unlimited collateral succession to avoid escheats. n112

COMPUTER-ASSISTED RESEARCH

LEXIS: intestate succession w/30 property w/5 escheat!

FOOTNOTES:
(n1)Footnote 110. *See, e.g.*, N.C. Gen. Stat. § 29-12.

(n2)Footnote 111. In North Carolina, the funds are used for scholarships at the University of North Carolina. The same is true in Nevada. Nev. Rev. Stat. Ann. § 134.120 (1949).

(n3)Footnote 112. N.C. Gen. Stat. § 29-7. But the statute will not allow inheritance by persons claiming through a common ancestor not mentioned in the statute, even if that means the property will escheat. *Newlin v. Gill, 237 S.E.2d 819 (1977).*

Supp. To CHAPTER 89 INTESTATE SUCCESSION

10-89 Thompson on Real Property, Thomas Editions Supp. to § 89.05

Supp. to § 89.05 Intestacy--United States.

[Go To Main]

§ 89.05(a) Introduction. [Go To Main]

Change U.P.C. § 1-101 to:

U.P.C. § 1-102

Add:

In re Estate of Prestie, 138 P.3d 520 (Nev. 2006) (decedent's will revoked under a statute providing for revocation of will by marriage; decedent's widow obtained one-half of the estate by intestate succession).

In re Estate of Bonde, 694 N.W.2d 74 (Minn. App. 2005) (in Minnesota, a homestead under debtor-creditor law is classified as other real estate for purposes of intestate succession).

Estate of Crenshaw, 100 P.3d 568 (Colo. App. 2004) (the testimony of a purported common law wife was barred by the state's dead man's statute).

§ 89.05(b) The Surviving Spouse. [Go To Main]

Add:

Gillette v. Wurst, 869 A.2d 488 (Pa. 2005) (a widow was allowed to disclaim her interest in a wrongful death settlement and the proposed intestate distribution of settlement funds).

Change to:

See note 20, *infra.*

§ 89.05(b)(1) Share of the Surviving Spouse--Uniform Probate Code.

Add to list of states that have adopted the U.P.C.:

Kentucky (in part).

Change to:

U.P.C. § 2-102(1).

Change to:

U.P.C. § 2-102(2)-(4).

§ 89.05(b)(2) Share of the Surviving Spouse--Issue and Parents.

Add:

In re Estate of Hinderliter, 882 P.2d 1001 (Kan. App. 1994) (dealing with intestacy statute where decedent leaves spouse and children).

Add:

Dial v. Dial, 38 N.E. 2d 43 (Ill.1941) (dealing with intestate succession when parents and surviving spouse exist); *Lane v. Scarborough, 200 S.E.2d 622 (N.C. 1973)* (dealing with the disposal of an estate where spouse impliedly released her

share with the estate passing to the deceased's parents).

delete note 36.

Change Okla. Stat. to:

tit. 84, § 213(B)(1) nsert 3

Add:

Anderson v. Greenleaf, 165 A. 730 (N.J. Sup. 1933) (holding that in the absence of issue, surviving spouse takes the estate); *In re Dumas' Estate, 413 So. 2d 58 (Fla. App. 1982)* ("pretermitted spouse receives entire estate when no lineal descendant survives decedent"); *Lowe v. Fulford, 442 So. 2d 29 (Ala. 1983)* (holding that in the absence of issue, surviving spouse takes the estate).

§ 89.05(c) Descendants. [Go To Main]

Add:

Estate of Calden, 712 A.2d 522 (Me. 1998) (holding that the wife of devisee was entitled to her intestate share of her deceased husband's inheritance from his step-mother's will).

Add:

Vogel v. Mercantile Trust Co. Nat. Ass'n., 511 S.W.2d 784 (Mo. 1974) (holding that statute providing for posthumous child does not indefinitely postpone the vesting of estates); *Wolyniec's Estate v. Moe, 226 A.2d 743 (N.J. Super. 1996)* (holding that posthumous grandchild qualified to take under statute).

See also Woodward v. Commissioner of Social Security, 760 N.E.2d 257 (Mass. 2002) (holding that under limited circumstances posthumously conceived children may have inheritance rights of issue).

Add:

Bahl v. Lambert Farms, Inc., 819 A.2d 534 (Pa. 2003) (heirs seeking to partition real estate that passed under intestacy were not entitled to inherit under the doctrine of maternity by estoppel).

Morris v. William L. Dawson Nursing Center, Inc., 719 N.E.2d 715, (Ill. 1999) (grandchildren, not siblings considered "next of kin" for entitlement of proceeds.

Craig v. Carrigo, 121 S.W.3d 154 (Ark. 2003) (in probate proceeding, pretermitted children were allowed to inherit as if testator had died intestate).

Add:

In re Estate of Kendall, 968 P.2d 364 (Okla. Civ. App. 1998) (holding that where deceased "was not survived by issue, spouse, parent, grandparent or sibling, all nieces and nephews" took *per capita* succession).

Cook v. Grierson, 845 A.2d 1231 (Md. App. 2004) (grandchildren are not issue under the state's intestate succession statute).

Add:

In re Estate of Fosler, 13 P.3d 686 (Wyo. 2000) (describing distribution of property among lineal descendants).

§ 89.05(d) Lineal Ascendants. [Go To Main]

After entire note, add:

Hess v. Hess, 758 So. 2d 1203 (Fla. App. 2000) (holding that even though the mother was divorced from the father and was 100% responsible for the death of her daughter because of negligent driving, settlement proceeds from the suit on behalf of the daughter must be evenly divided between estranged parents).

Add:

Bray v. Taylor, 36 N.J.L. 415 (N.J. Err.& App. 1872) (holding that an estate can not lineally ascend to grandparents).

Add:

In re Estate of Swartz, 870 P.2d 179 (Okla. Civ. App. 1994) (dealing with grandparents as lineal descendants).

§ 89.05(f) Half-Bloods. [Go To Main]

Add:

In re Estate of Thiemann, 992 S.W.2d 255 (Mo.App. 1999) (holding that half-bloods receive half share of whole bloods, but a whole share where all "collaterals are of half-blood").

§ 89.05(g) Illegitimates. [Go To Main]

Add:

Trimble v. Gordon, 430 U.S. 762, 4 Ohio Op. 3d 296 (1977) (provision of state probate code permitting intestate succession by illegitimates only through mothers but not fathers denied equal protection); *Turner v. Perry County Coal Corp., 242 S.W.3d 658 (Ky. App. 2008) cert. denied, 129 S. Ct. 80, 172 L. Ed. 2d 29* (*Trimble* decision did not apply retroactively so as to invalidate succession statute in effect at time of landowner's death).

Add:

In re Estate of Williams, 891 N.Y.S.2d 268 (2009) (a posthumous non-marital child was entitled to DNA testing to establish his right to inherit).

Add:

Baugh v. Baugh, ex rel, 973 P.2d 202 (Kan. App. 1999) (holding that no parentage action need be brought for illegitimate child to take by succession).

Estate of Morningstar, 794 N.Y.S.2d 205 (2005) (results of DNA testing could be used to satisfy the burden of establishing paternity).

Jenkins v. Johnson, 128 S. Ct. 920 (2008) (illegitimate daughters were not required to comply with proof of paternity provisions of the estate settlement statute in order to assert their rights as legal heirs to the real property owned by the decedent).

In paragraph 4, last sentence, remove the phrase "and Vermont."

Add:

Bahl v. Lambert Farms, Inc., 819 A.2d 534 (Pa. 2003) (in an action by heirs of the decedents' putative son to partition and obtain intestate shares of decedents' farm sold to a purchaser, the court held that the heirs were not entitled to inherit under the doctrine of maternity by estoppel).

Change N.H. Rev. Stat. Ann. § 561.4 to:

§ 561:4 and remove the Vermont statute reference.

§ 89.05(h) Adoption. [Go To Main]

Remove reference to Utah Code.

Add:

Rist v. Taylor, 955 P.2d 436 (Wyo. 1998) (holding that second adoption terminated the parent-child relationship of the previous adoption for inheritance purposes).

Barnum-Smith v. Joseph, 949 P.2d 472 (Cal. 1998) (dealing with foster parents and foster child as adoptive parents and child).

Remove Alaska Stat. § 13.11.045 and remove Colo Rev. Stat. § 15-11-109.

Add at the end of the first paragraph:

Additionally, many states recognize a virtual or implied adoption, in which a non-adopted child is treated as an adopted child for purposes of the intestate succession laws.[81.1]

CHAPTER 90 LAND DESCRIPTIONS, BOUNDARIES AND SURVEYS *

10-90 Thompson on Real Property, Thomas Editions § 90.01

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 90.01 Introduction to the Chapter.

This chapter treats the legal rules applicable to land descriptions, boundaries dividing described parcels of land, and the surveys by which such descriptions are derived. These legal rules arise largely from the process of common law, produced by individual judicial decisions in unconnected cases. Some of the rules have been codified, especially in attempts to make consistent the land regulation activities of state and local governments, but even in codified form the statutory rules generally reflect the common law rules.

* This chapter is drawn in part from chapter 45 of George W. Thompson, Commentaries on the Modern Law of Real Property (John S. Grimes ed. 1979), which made a significant contribution to preserving the American common law governing land descriptions and boundaries.

§ 90.02 Land Descriptions.

[Go To Supp]

§ 90.02(a) The Purpose of a Description in a Conveyance of Land.

A proper and sufficient description is an essential element of a conveyance of land. The description must either identify the land or furnish the key or means by which the description can be obtained from other sources. n1 Some cases impose no heavier burden on the description than to require only that something in the description suggest the possibility of locating the land by competent explanatory evidence. n2 Thus, in one case, a reference to the described land as being "the interest in two shares, adjoining lands" of persons named, belonging to the vendor, was held sufficient to support explanatory evidence that there was a tract of land which fitted the rest of the description, in which it was known that the vendor claimed two shares, and that the land had been more particularly described in a partition proceeding. n3

The particular function of the description is to identify n4 or furnish the means of identifying the property conveyed. n5 Some courts have even stated that the purpose of a description is *not* to identify the land, but merely to *furnish the means* of identifying the land. n6 The language of description in a conveyance of land furnishes the means of locating the land conveyed, but the actual locating of that land is a separate and independent activity. n7

A description is sufficient if it furnishes the means or key to identifying the land. n8 A description is sufficiently certain when it enables the land to be identified n9 either by a person who is familiar with the area n10 or by means of an actual survey. n11 A description is not insufficient merely because the land cannot be identified without the aid of extrinsic facts. n12 However, a description is insufficient for uncertainty if it cannot be applied to any definite land even with the aid of extrinsic evidence. n13

A description is sufficient if, by any reasonable construction and with the aid of extrinsic evidence, it enables one to determine the land intended to be conveyed; n14 of course, if the land cannot be located even under those circumstances, the description and the conveyance are void for uncertainty. Likewise, if the starting point of a described boundary cannot be identified, the conveyance is void; n15 and if the description omits one or more boundaries, so the quantity of land is undetermined, the conveyance is void. n16

A description will be liberally construed to afford the basis of a valid grant that will carry out the intent of the parties. n17 However, a description consisting only of the words, "a piece or parcel of land near [a topographical feature]" is too vague and indefinite to create a right of property in any particular parcel of land. n18 Ordinarily, the description need not be by boundaries, corners, distances, or monuments, if with the aid of parol evidence location of the land is possible. n19

LEXIS: Description w/10 (land or real) and purpose

§ 90.02(b) The Requirement of Certainty in a Description.

A valid description must designate with reasonable certainty the land intended to be conveyed. n20 Deeds purporting to convey land, but which do not describe or designate the land, are invalid for uncertainty; n21 however, a general description of all lands belonging to the grantor is sufficient to pass title to all lands belonging to the grantor. n22

No standard rule defines the sufficiency of a description. n23 Rules which prefer one form of description over another are merely rules of construction used to discover the real intent of the parties, n24 if the description contains a latent ambiguity. n25

A description must identify the land with reasonable certainty, but the degree of certainty required is qualified by the rule that that is certain which can be made certain. n26 A description is sufficiently certain if it can be rendered certain with the aid of extrinsic evidence relative to the surrounding circumstances. n27 Only if an ambiguity is patent and appears on the face of the description will the description be void for uncertainty. n28

In a deed, the description of the land follows immediately after the operative words, and should contain all the particulars necessary to identify the land clearly and accurately, such as its situation in a town and county named, its boundaries, their measurements, and the total area. A house in a town is usually described as part of subdivision, or as situated in a particular street or road, and the dimensions of the lot of land are usually given in linear feet. The street number of the house is a useful particular. Land in the country is usually described by reference to government surveys, or to the private surveys of the particular property.

Boundaries are sometimes identified by reference to the land of adjoining owners, or are sometimes determined by reference to fixed monuments, or by their distance from streets or natural or permanent objects. A reference to the occupancy of the property by a former occupant can be useful. The description need not be by government survey, lots and blocks, or metes and bounds, if it still is sufficient to permit the property to be located definitely. n29 The description may be general and need not be by boundaries, corners, distances, or monuments if, with the aid of parol evidence, location of the land is possible. n30 A description is sufficient if it enables one pursuing an inquiry upon information given in the deed to identify the land to the exclusion of all other land. n31

A description is not void for uncertainty if it is possible, by any reasonable rules of construction, to ascertain from the description, aided by extrinsic evidence, what land it was intended to convey. n32

The law will not declare the instrument void for uncertainty until it has been examined with all the light which contemporaneous facts may furnish. If these render the intention clear and the words of the instrument are, by fair rendering, susceptible of a construction to uphold such intention, then they will be so construed and the instrument enforced. n33

It is only when it remains a matter of conjecture what property was intended to be conveyed, after resorting to such extrinsic evidence as is admissible, that a deed will be held void for uncertainty in the description of land. n34 Resort

may be had to other parts of a deed to aid in determining what property the deed was intended to convey. If the description in a deed was sufficient when the deed was executed, no subsequent change in conditions can render such description insufficient. n35

If there is a mistake in the deed as to the general location of the land, even though the description is perfect, parol evidence is admissible to identify the land, and the erroneous general location may be rejected as surplusage. n36 A deed void for uncertain description cannot be saved by resorting to extrinsic proof as to the secret and undisclosed intention of the maker; n37 however, a deed will not be held void for uncertainty in the description of property if by the aid of extrinsic evidence it can be made certain and the property located, and in such case the intention of the grantor is controlling. n38

If the description in the deed is clear, but contains an exception that is unclear, the grantee takes the entire tract without respect to the purported exception. n39

The description must identify the interest conveyed as well as the area. n40

LEXIS: Description w/10 (land or real) and certain!

§ 90.02(c) Rules of Construction for Land Descriptions.

A description is not invalid for uncertainty so long as by reasonable construction it can be ascertained what the parties intended to be embraced in the description. n41 Any form of agreement to convey may be used to assist in explaining an ambiguity in the deed description related to such agreement; even though the parties' negotiations are merged in the deed and may not control the deed, they may explain an ambiguity or indicated an error. n42

If a valid description is ambiguous on its face, two sources of information may be used to help resolve the ambiguity, the facts and circumstances pertinent to the conveyance, and the intentions of the parties as manifested before, at, or after the creation of the description. n43 Thus, in determining the sufficiency of a description, resort may be had not only to the words used but also to the other facts and circumstances suggested by the description. A description should be construed with reference to the actual state of the land at the time the description was created or the deed containing it was executed. A court construing a description in a deed should as nearly as possible assume the position of the parties to the deed, and consider the circumstances of the transaction between them, and then read and interpret the words used in light of these circumstances. n44 A court construing an ambiguous description will put itself in the position of the parties at the time the deed containing the description was executed and determine the parties' intent in the light of the surrounding circumstances. n45

Possession may render certain what otherwise would be an uncertain description. n46

Regardless of the parties' intent, a deed passes title to only that property actually described in the deed. n47 A deed cannot extend possession or title to lands not described in the deed, n48 nor can a specific description be extended to include property not within its terms. n49 Where the description is too indefinite to afford means of identifying the land, no title or color of title is given. n50 Even though parol evidence is often admissible to ascertain what lands are embraced in the description, such evidence cannot make the deed operative over lands not embraced in the descriptive words. n51 Thus a deed is void for uncertainty where it contains no definite or ascertainable description of the property intended to be conveyed. n52

The interplay between specific and general descriptive language is illustrated by the case in which a deed described the land conveyed as beginning at a certain rock, and running thence one mile east, one mile north, one mile west, and one

mile south, to the place of beginning, and also stated that it was the land set off to a certain Indian under a treaty with the government. The Indian had previously selected land as "a tract one mile square, the exact boundaries of which may be defined when the surveys are made." After the deed was given, the Indian's land was located and patented on land that was not within square boundaries and did not lie within the boundaries named in the deed at issue. In construing the deed's description, the court held that, because the deed was for a specific tract of land, it could not be construed to convey the grantor's interest in the land actually patented to the Indian. n53

If a deed describes a parcel or some portion of the land to be conveyed with insufficient certainty, other portions of the description that are adequate are not thereby invalidated. n54

Extrinsic evidence used to interpret a deed description may not be used to contradict or otherwise control the language of the description. n55 A deed describing land merely as lying on Flat River, including a house and lot named, adjoining lands of persons named, is void for uncertainty, because no quantity of land is given, or any means pointed out by which the land about the house and lot named could be laid off. n56 Parol evidence will not be received to show that a marked tree is the boundary line in a case where the line was described in a deed by courses and distances and the marked tree was not mentioned in the deed. n57 Because ascertaining the intent of the parties frequently depends not only upon the language used in the deed description but also upon all the circumstances of the transaction, it is usually a question of fact. However, if the intent of the parties is to be determined from the description alone, then the rule prevails that the construction of a written instrument is for the court. n58

Another prevailing rule of construction is that, if possible, a deed description should be construed so that no part needs to be rejected. n59 Similarly, a deed description should be so construed that some effect will be given to it. n60 A deed description should not be voided for uncertainty if any reasonable construction can confer upon it the requisite certainty. n61 In making such construction of a description, the words used need not be construed literally or strictly, because greater regard is accorded to the intention of the parties as manifested in the entire document than to any particular word or expression. n62 Courts are usually liberal in upholding a description and giving effect to the evident intention of the parties. n63

In this regard, two basic rules of construction sometimes conflict. On the one hand, the deed and description as a whole are available to determine what property the parties intended to convey; n64 when several descriptions appear in a deed and all of them are general, the deed as a whole governs. n65 One part of a description is usually not permitted to control absolutely other parts. n66 The whole description of a deed that is inartfully drawn will be considered without giving special prominence to any one expression. n67

This rule of construing the deed description as a whole, however, is not permitted to avoid an even more basic rule, which is that nothing will pass by a description, except what is actually in or indicated by the description, whatever the intention of the parties may have been. n68 The description as it stands in the deed is presumed to be as the parties intended it, until it is clearly made to appear that a mistake exists. Every word is to have effect and to be harmonized with the rest of the description, if this is possible. Where a deed contains a valid general description followed by an inconsistent second or cumulative description, the latter will be rejected. n69 The punctuation within a description is generally not considered in construing the description. n70

If the deed description gives rise to doubt or uncertainty, the court may place itself in the position of the grantee, read the description in light of the circumstances under which it was executed, and consider the condition of the property, state of the title, boundaries, or other material matters in interpreting the deed. n71 A description that may be rendered certain by averment is not void for uncertainty. n72

§ 90.02(c)(1) Presumption that Course or Line is Straight.

A course or line stated in a deed description is presumed to be a straight line, but the presumption does not apply if

anything in the description indicates that the course is to be determined by a fixed monument, such as a wall. Even a line extending beyond the line of such a wall or monument may be deflected from a straight line in order to conform to the distance given for the next boundary line. n73 A call in the description of a survey for the marked "line" of another survey between designated points which is not a straight line, but consists of several lines and marked corners, is sufficient. n74 A line should be construed, if possible, to mean a continuous and straight line, and should not be deflected except to conform to the parties' intentions. n75

A "meander line," whether state or national, is not considered a boundary line, but is used only for determining the acreage when title is transferred to private parties, or for convenience. n76 A meander line is not a boundary, but the water of the body which is meandered is the true boundary, whether or not the meander line coincides with the shore line. n77 A boundary line presumably runs straight across between known corners. n78

COMPUTER-ASSISTED RESEARCH

LEXIS: Description w/10 (land or real) and (course or line) w/10 straight

§ 90.02(c)(2) Meaning of Particular Words Used in Descriptions.

The word "half," when used in describing land, should be construed as meaning "half in quantity," unless the context or surrounding facts and circumstances show a contrary intention. It was so held in a case where two tenants in common of a parcel of land, which could not be easily divided by a north and south line drawn equidistant from its east and west lines, conveyed to each other the "east half" and "west half," respectively, of the parcel, containing an equal number of acres and without reference to the government survey. n79

In government surveys of public lands the terms "east half" and "west half" are used, not with reference to quantity, but to a line equidistant from the boundary lines of the parcel subdivided, and those terms have the same signification in patents issued by the government, as provided by statute. A deed of the "east half" of a parcel of land "according to the United States survey" is definite, and excludes the idea of two equal quantities, and fixes the dividing line equidistant from the boundary lines of the parcel. n80 If a section or tract of land has been divided into designated subdivisions, a subsequent deed describing the land to be conveyed as "one-half" of the section or tract will pass the area contained in the designated subdivision, regardless of whether it is more or less than the corresponding one-half subdivision. n81

In a description of land under government surveys, if part of a section or of a quarter section is described as the "north side" or the "north end," the words may be taken to mean the north half of the section or quarter section. n82 The word "part" may be so used as to show that it means "half"; n83 but it may be so used that it is uncertain what meaning is attached to it, and in that case the description will be insufficient. n84 Thus a description in a deed as "part of the southwest east quarter, containing 31 1/4 acres," was held void for uncertainty. n85

As a general rule, where a deed describes the land conveyed by metes and bounds, or as containing a specific quantity, qualified by the words "more or less," the qualifying words will relieve the grantor or grantee, as the case may be, from the obligation to make compensation for any excess or deficiency, absent fraud or bad faith, if there is a reasonable approximation to the quantity specified in the deed. n86 The use of such words does not affect the positive character of the representations as to acreage. Their use does not bar an inquiry into a fraud or misrepresentation as to quantity on the part of the grantor, and a very material misrepresentation in quantity is itself some evidence of such fraud or misrepresentation. n87

The purchaser's previous knowledge of the land or its boundaries does not preclude the purchaser from recovering for fraudulent misrepresentation of quantity if, without fault of the purchaser, the purchaser was actually deceived and defrauded by the misrepresentation, if the deficiency is more than can be fairly covered by the phrase "more or less." n88

The words "more or less" and the word "about," used in connection with quantity or distances, are words of safety and precaution. They are intended merely to cover some slight or unimportant inaccuracy, and, while enabling an adjustment to the rigidity of fixed monuments, they do not weaken or destroy the statements of distance and quantity when no other guides are furnished. n89 These words do not imply that the purchaser takes the risk of the quantity. If the variation is slight, the purchaser has no remedy; if the variation is large or materials, the purchaser may be relieved from paying for the deficient quantity. n90

The words "more or less" are not descriptive of the boundaries, and they become important only where the description is by metes and bounds or other definite description of a particular tract of land, as qualifying an estimate of the quantity contained in the described tract. n91

The words "more or less," when used in deed descriptions following the quantity of land named, ordinarily mean "about." n92 If the land is described as so many acres "more or less," the sale will be treated as a sale by the acre unless from the whole deed it plainly appears that a sale in gross was intended. n93 If the land was described by metes and bounds, the words "containing by estimate" a certain number of acres were held equivalent to the words "more or less." n94 If the description is by acreage and courses and distances, and "more or less" is used in both calls and area, the description is void for indefiniteness. n95 Usually such words are added to an estimate of the quantity of the land following a particular description, and although they contribute little or nothing to identifying the land, they are taken as prima facie evidence that the parties intended to risk a reasonable gain or loss in the estimated quantity. n96

If the description by metes and bounds is unambiguous, the added clause "being the same" cannot be taken to create an ambiguity in an antecedent unambiguous description, even though the clause itself is of doubtful meaning as embracing either "part of the same" or "all the same." n97

A conveyance described by metes and bounds is limited to an undivided interest by the addition of words such as "being an undivided half thereof." The plain meaning of the language used determines the interest conveyed. n98 However, where a deed described the property conveyed as "the north one-half of the southwest undivided quarter," and it appeared that the quarter, as divided by the government lines, would consist of two unequal fractions, the court held that the word "undivided" was used with reference to a division of the quantity of land, so as to give the grantee but one-half of the quantity. n99 A deed conveying a number of tracts described by government numbers and "also the undivided half of the N. E. 4 of section 30; and the S. W. 4 of the S. W. 4 of section 31," was held to pass the whole of the S. W. 1/4 of the S. W. 1/4 of section 31. n100

The word "adjoining" in a description means next to, or in contact with, and excludes the idea of any intervening space. n101 The word "adjoining" implies a closer relation than "adjacent." If "adjacent" is uncontrolled by context or subject matter, it is not inconsistent with the idea of something intervening. The description of premises "adjoining the Atlantic Ocean," with the additional words "bounded on the ocean," carries title to the line of ordinary high water, with all the incidents of riparian ownership upon tidal waters. n102 Land is adjacent to other land when it lies near or close to it, even though it is not in actual contact to the other land. n103

The word "contiguous" means in actual contact or touching, and therefore a deed conveying certain saltworks, and "land contiguous thereto," does not embrace a parcel of land three-quarters of a mile from such works, and separated therefrom by the lands of other persons. n104 It has been held that two quarter sections of land which only touch at the corner, no other parts or sides being common, do not constitute contiguous bodies of land. n105 However, in Georgia, "tracts of land which corner with one another are contiguous." n106 The line of an adjacent tract, if known and established, may be a call in a deed or a natural object. n107

The terms "north," "south," "east," and "west," or "northerly," "southerly," "easterly," and "westerly," when not controlled by definite courses, monuments or other definite descriptions, mean due north, south, east, or west. n108 A

court may hold that true north is intended when the word "north" or "northerly" is used without qualification. n109

The word "northerly" in a deed description must be taken to mean due north, if there is no object to direct its course. However, if monuments apply to the description, the course may incline either way any distance, as long as it tends toward the north. n110 Where a conveyance described the property by metes and bounds, but incidentally mentioned that the northerly and southerly lines ran through a party wall, the description by metes and bounds controlled. n111 The term "south" in a description was held to mean a southwardly course, not due south. n112

§ 90.02(c)(3) Rules of Contruction for Descriptions Generally.

A deed is not held void for uncertainty in its description so long as it can be reasonably ascertained what both parties understood to be included in the description. n113 The negotiations of the parties that led to the making of the deed are merged in the deed and cannot control a deed that is otherwise clear on its face, such negotiations may serve to explain an ambiguity or error in the deed. n114

If a deed description is ambiguous on its face, two sources of information may be used to resolve the ambiguity: the circumstances within which the deed description was created, and the intention of the parties, expressed at or after creating the description. n115

A court trying to determine the sufficiency of a deed description may refer to the words used in the description itself or to facts and circumstances suggested in the description. n116 A deed description is construed with reference to the circumstances that existed at the time the description was created; the court assumes as much as possible the position of the parties to interpret the description in light of their understanding. n117 If possession under an ambiguous description has already taken place, that possession may be taken into account in assessing the intention of the parties. n118

Interpretation of a deed description by means of assessing the parties' intent cannot cause the deed to convey land not actually included within the description. n119 Thus, even though parol evidence is often admissible to ascertain what lands are embraced in the description, such evidence cannot make the deed operative upon lands not included within the descriptive words. n120 A deed description that is specific cannot be extended by generalization to lands not included within the terms of the description. n121 If the description is too indefinite to enable identification of the land, no title or color of title is given. n122 If one parcel in a deed description is described with insufficient clarity, that does not nullify the deed with respect to other parcels that are sufficiently described. n123

The language of a deed description cannot be controlled or contradicted by use of extrinsic evidence. n124 A grant will be held void for uncertainty when, after resort to oral proof, the identification of the parcel is still uncertain and the parties' intent is conjectural. n125 In such cases, the deed is wholly ineffective to pass any title. n126

A deed describing land as simply lying near a certain topographical feature, including a house and lot named, adjoining the land of named persons, is void for uncertainty because no quantity of land is given or any means given by which the land around the house and lot could be laid out. n127 Similarly, parol evidence cannot be used to invoke use of a marked tree as a boundary marker when the tree was not mentioned in the deed. n128

Ascertaining the intent of the parties from the circumstances of the transaction is usually a question of fact; but ascertaining intent only from construction of the deed is usually a matter of law for the court. n129

A deed description should, if possible, be so construed so that all parts of the deed can be upheld as valid n130 or that at least some effect will be given to the deed. n131 In other words, a deed description will not be held void for uncertainty if by any reasonable construction the deed can be made valid. n132 Words need not be construed literally or strictly, since greater regard is accorded to the real intention of the parties as manifested in the entire deed than to any particular word or arrangement in its expression. n133 This rule is rather liberally invoked. n134

What property the parties intended the deed to convey is determined by a consideration of the deed as whole, n135 particularly when several descriptions appear in the deed and all of them are general, n136 and especially by a consideration of all parts of the description without arbitrarily permitting any one part to control absolutely. n137 The whole description of a deed will be read without giving special prominence to any one expression. n138 The description as it stands in the deed is presumed to be as the parties intended it, until it is clearly made to appear that a mistake exists. Every word is to have effect and to be harmonized with the rest of the description, if possible. If a deed contains a general description followed by an inconsistent second description, the latter description will be disregarded. n139

Traditionally, the punctuation of a deed description is not to be regarded in construing the description. n140

A description that may be rendered certain by averment is not void for uncertainty. n141

COMPUTER-ASSISTED RESEARCH

LEXIS: Description w/10 (land or real) and constru!

§ 90.02(c)(4) Rules of Construction for "Mother Hubbard" Descrip-tions.

The so-called "Mother Hubbard" descriptions purport to convey all of the grantor's land or all the grantor's land situated in a certain area. Despite the problems caused by such descriptions they traditionally have been upheld. n142 The apparent vagueness or uncertainty of such a description may be clarified by proving what lands the grantor owned within that description at the time the conveyance was executed. n143 Therefore, a description by which the grantor conveys "all in my possession" will stand when aided by extrinsic evidence. n144

When land is conveyed by such words without description, only the land to which the grantor holds legal title is passed. Likewise, a conveyance describing "all lands the grantor holds on the Dry Fork of Otter Creek" is not void for uncertainty. n145 A conveyance is sufficient which describes land as situated in a named county, containing a certain number of acres, and being the land on which the grantor now resides. n146 Descriptions of all the grantor's land in a certain town, county, or state, or wherever situated, are sufficient. n147

A deed that described the land as being "a lot ninety by four hundred and fifty feet on the northwesterly corner" of a named street, in a specified city, county and state was not void for uncertainty where the evidence showed that the grantor owned a lot of land at that corner, the lot was 90 feet by 450 feet, and the grantor owned no other land in that neighborhood. n148

A deed conveying the portion of a designated tract of land that had not been included in a previous conveyance by the grantor to a third person is insufficient of itself to show title to any of such lands in the grantee, although the deed may be made effectual by showing what part of the tract had not been conveyed to the third person. n149 A deed may convey title to such lands as the grantor actually owns within the limits of the whole tract described. n150 A deed conveying certain described lands, "not including any lands now sold off to other parties who hold deeds" therefore, is not void for uncertainty of description. n151 Thus, if land is described as part of a larger tract, and as the remainder of that tract not already sold by the grantor, sufficient data exists for determining the land to be conveyed. n152

Some states do not uphold a description that specifies land to be conveyed and then adds to the conveyance a more general reference to all the grantor's land in a particular locality; that is, the more general portion of the description is subordinated to the specific part, if the general wording conveys more than the specific wording. n153 A "Mother Hubbard" clause that is too general is not recognized in some states. n154

COMPUTER-ASSISTED RESEARCH

LEXIS: Description w/10 (land or real) and ("Mother Hubbard")

§ 90.02(c)(5) Rules of Construction for Descriptions Incorporated by Reference to Other Instruments.

Generally, descriptions in other instruments may be incorporated by reference into deeds. n155 If the reference in the deed is to a public record in which the property to be conveyed is sufficiently described, then the reference is a sufficient description. n156 Such a description referring to a recording office record, however, has been held insufficient where it omitted the number of the book of deeds and the page where the description was to be found. n157 If the reference to be incorporated is to other deeds or title documents, then such a reference will be an adequate description if the description information in both the referencing and the referenced documents is sufficient; n158 the full descriptions in such referenced documents are incorporated n159 and competent evidence may be admitted to locate the land described. n160

If a reference is made to another deed for the purpose of obtaining a more detailed description, the referencing document is considered a general description, and the referenced document is a more particular description which controls the general description. n161

A reference to other deeds or title instruments must be specific. A general reference to the land records of the county is ineffective as a description. n162 A deed which is fulled identified in a reference need not be recorded in order to provide the needed description information. n163 A deed that incorporates a description in land patent is effective even if the patent is not actually issued to the grantor until after the referencing deed is executed. n164

Although a general description in a referencing deed incorporates a more specific description in a referenced document, n165 if the description in the referencing document is already clear and complete, the description in the referenced document will not restrict the other description. n166

A deed may so refer to all instruments in the chain of title as to incorporate them by reference. n167 If a recorded deed refers to an unrecorded deed for a description, and the description is sufficient to identify the property, the unrecorded deed is considered incorporated and admissible with the recorded deed, even though the unrecorded deed was improperly executed and not entitled to be recorded. n168

A deed which plainly refers to the legal proceeding by which a parcel of land was designated may also contain a sufficient description by reference. Thus, a deed which described land only by the number of acres in the parcel, and as lying on the north and east side of a specified lot, but subject to the dower of a named widow, "which [dower right] has been laid off and assigned to her for life in said lot of land," is not void for uncertainty, for there is a plain reference to the proceedings by which dower was assigned to the widow, and the import of the deed is to convey the reversion to the identical parcel embraced in the assignment of dower. n169

A deed referring accurately to another deed made to the grantor and conveying all the parcels of land described in the other deed and not already disposed of, sufficiently describes the land to be conveyed. n170

A deed describing land as "all that certain interest in the landed estates of H, deceased, to which we are or may be entitled by gift, devise, or descent, or otherwise," describes the property conveyed with sufficient certainty; n171 but a deed of land described as "inherited" from a certain person is not sufficient to embrace land which the grantor received by devise under the will of such person. n172

If a deed is blank as to description, but refers to another deed or instrument which does contain a sufficient description, the latter instrument becomes part of the deed and the description is sufficient. n173

If a deed refers to an authentic plat of land, the plat becomes a part of the deed as if incorporated into the deed. However, where a deed referred to two tracts of land and a subsequent deed gave a more particular description which included only one of the tracts of land and declared that the subsequent deed conveyed the same land as conveyed by the original deed, the more specific description prevailed over the more general reference and the tract referred to but not described was not included in the conveyance. n174

A map may be made part of a deed description if the reference to it is definite and certain. n175 To incorporate a plat into a deed description, the words of reference usually simply connect the deed with the plat. n176 A plat that was referred to in a deed description as being annexed to the deed, but was in fact not so annexed and not recorded with the deed, was not valid evidence to aid in description of the property. n177

A deed description that refers to a description in another deed prevails over a metes and bounds description that is inaccurate and does not reflect the parties' intentions. n178 However, if the metes and bounds description is accurate, a reference to a description in another deed does not control it. n179 If a deed refers to land deeded to the grantor by named persons but the referenced deed mentions no date or recording information, the referenced deed is not competent evidence to identify the land described. n180 In a case of inconsistency between the descriptions in the referencing and referenced deeds, the court will simply try to ascertain the intentions of the parties. n181

LEXIS: Description w/10 (land or real) and (reference or incorporat!)

§ 90.02(c)(6) Grant of Structure as Passing Land Under It.

The grant of a house, store, wharf, mill or other structure passes the fee in the land occupied and improved for that structure at the time of the grant for the use or purpose designated. n182 This is because the grant of such a structure necessarily includes the entire continuous and permanent beneficial occupation and enjoyment of the land itself, and not construed as embracing a public burial ground included within the described boundaries, even though the description does not exclude the burial ground. n183 Reservation of a barn in a description includes a sheepshed, a fenced barnyard and the land covered by these buildings and used with the barn. The term "barn" should be construed to include whatever is connected with the barn and is essential to its use and enjoyment as a barn. n184

COMPUTER-ASSISTED RESEARCH

LEXIS: Description w/10 (land or real) and (structure or building)

§ 90.02(c)(7) Exclusion of the Highway from the Description.

§ 90.02(c)(7)(i) Generally.

In most jurisdictions, a grantee of a "lot" in a recorded plat takes title to the center of an adjoining street subject to the public easement, even though the land may be described only by lot number, n185 or by metes and bounds extending to the line of the highway or street without express reference to the center line. n186 However, if the grantor conveys lots according to such a plat, and bounds the lots on the plats expressly on the exterior lines of the streets, the grantee does not acquire the fee to any part of the street. n187 In California, generally, the word "lot" does not include a portion of the street bounding the road. n188

The fact that the measurements and coloring of a plan referred to in a description exclude the streets is not sufficient to overcome the presumption that the deed passes the fee to the center of the streets. n189 Accordingly, the fact that a deed to land abutting on a highway, which highway was subsequently abandoned with the title reverting to the owners of the

fee, contained after the description a diagram of the lands but excluding half of the highway, did not show an intention to retain a reversionary interest in the highway. n190

Of course, if statute or ordinance requires that streets shown on recorded plats are vested in the city, town or county, land conveyed by reference to such plats necessarily excludes the streets. n191 If a starting point is given as the side of a street and thence along the street, the description did not run to the center; n192 but if the starting point were merely a stake at the edge of the street, so that it would be impractical for the boundary marker to be in the center of the street, the line has been held to run to the center of the street. n193

If the road is referred to at a point where one normally enters the road ("*terminus a quo*"), more uncertainty exists over whether the boundary is at the center of road; if the road is referred at a point where the roadway ends ("*terminus ad quem*"), the boundary line is more likely to be in the center of the road. This is because in some jurisdictions or localities it is common to measure from the side of the road instead of the center, giving rise to a rebuttable presumption that the measurement was indeed from the side. n194 Also, it is possible that a deed of a platted lot conveying the measurement from a corner of the lot at the street may convey the land according to the measurement from the border of the street, rather than from the center of the street, even though the plat gives measurements to the center of the street. n195

The general rule of measuring boundaries from the center of the street does not apply if the grantor does not own the fee of the street, as there is no presumption that a grantor intended to convey what the grantor did not own. n196 For instance, if land taken for a canal has been acquired in fee from adjoining owners, a conveyance by such owners of land bounded by the canal is a conveyance only to the exterior line of the canal. n197

Where one conveys land bounded expressly on the exterior lines of existing or proposed streets, the grantee obtains no fee interest in the land underlying any part of the street. n198 Nor does the grantee obtain the fee interest in land underlying a highway through a conveyance whose description -- regarding the highway -- is couched in such phrases as "by the side of," "by the margin of," or "by the line of." n199 Description phrases such as "from," "to," "alongside of," or "by" may extend the boundary line only to the street's center line, but on even slight evidence for such intent, the boundary will be extended only to the side of the street. n200 A boundary line which runs across a road, and thence by the side of the road, is by the margin of the road and not by its center. n201

If a boundary is described as running between fixed monuments on the side of a street, the parcel described does not include the fee of the street to the center line of the street. n202 Thus, where one end of a boundary line is fixed on the side of a highway, no rule of construction will result in the other end of the boundary line being located in the center of the street; only express words would accomplish such a result. n203 As stated above, if a starting point is given as the side of a street and thence along the street, the description did not run to the center; n204 but if the starting point were merely a stake at the edge of the street, so that it would be impractical for the boundary marker to be in the center of the street, the line has been held to run to the center of the street. n205

In some states, the presumption or intention that the highway is completely excluded from the description may be inferred from words used in any part of the description or deed. In these states, if a boundary commences at a point or monument on the side of a road and thence runs along the road, the boundary is set as by the margin of the road and not by its center line. n206 The rule is the same even if the deed states that the road was laid out to accommodate purchasers of lots bounding on the road, with the locations of lots and road shown on a plat. n207 The presumption may be rebutted by evidence of differing intentions. n208 A deed conveying land lying on the east side of a road, describing the land as "beginn-ing in the east line of the road," thence running around the lot to the east, "thence southerly by the sea to a road or passway," and "thence northerly in the east line of said road to the place of beginning," was held to exclude the road. n209

LEXIS: Description w/10 (land or real) and highway w/10 exclusi!

§ 90.02(c)(7)(ii) Non-Exclusion of Underlying Fee.

According to the general rule, excepting a highway from a conveyance does not except the fee, unless the intention to except the fee clearly appears; without such intention, what is excepted is the public easement to use the highway. n210 Accordingly, the grant of a way or the privilege of a highway carries an easement only. n211 If a grantor reserves a road through land conveyed, to provide access for other land owned by the grantor, the reservation is presumed to be merely of the use of the road and not the fee in the road. n212 An exception of a highway from a conveyance does not constitute a dedication. n213

LEXIS: Description w/10 (land or real) and highway w/10 exclusi! w/10 fee

§ 90.02(c)(7)(iii) The Rule When the Highway is Not Yet Opened.

A street which is only proposed, or which does not yet exist, may be used as a monument in a description. If a street extends up to an unplatted and unsurveyed tract of land but not yet into the tract, and a lot is sold with boundaries fixed by the street as if it had been extended into the tract, and the location of the future extension is clear, use of the street as a boundary will control the courses and distances of the description. n214 If a deed purports to convey land up to one side of a designated but still unopened street, the deed is construed as conveying only up to that point, even though the courses, distances and statement of amount conveyed would carry the grant to the other side of the road. n215 Even though an abutting way is used as a boundary, if it has not been dedicated, it gives rise to no easement. n216

As a majority rule, where the outside line of a proposed street is given as the boundary, an easement arises in the course of the street; n217 however, contrary authority exists. n218

Where a boundary is fixed by the location of a street that is installed after execution of the deed, when the street is accepted it is presumptively the street referred to in the deed. n219 If a lot is bounded upon a street that is projected but not yet installed, and the street is laid out and opened on the grantor's land some distance in front of the lot, according to the measurements and plat referred to, the land between the lot as described and the street as laid out passes by the deed. n220

Where land was conveyed to a railroad company by a deed that described the land by reference to the line of the company's railroad as then located but not built, the boundary line was not affected by a later change in the location of the road. n221

The fact that land conveyed is described in the deed as situated on a certain street is not an implied covenant that such a street exists, where there is no reference to any plan or to the street except in the description of the land. n222

In sales by plats an implied covenant arises that the abutting streets or ways are or will be laid out as described, are of the width represented, and that the grantor will do nothing to defeat or impair the right-of-way conveyed to the grantee. n223 If a grantor conveys land as fronting on or bounded by a certain space designated in the deed as a street or way, which the grantor also owns, the grantors covenants that such land is indeed a street or way and that the grantor will not thereafter deny it as against the grantee or the grantee's successors; it is immaterial whether such a description carries the fee to the center of the designated street or way or only to the side line. n224

If a street has not yet been accepted as a public street, one who purchases a lot according to a plat showing the street

immediately adjoining, even if the fee of the street to the center line is conveyed, acquires only an easement in the street, and may not take possession of any part of the street so as to exclude the vendor. n225

A deed designating a private lane or road as one of the boundaries of the land conveyed, passes title to the the middle line of the lane or road. n226 Where a plat of land is recorded and land appears thereon bounded by lines clearly intended to represent the lines of a street, and lots are sold as being bounded on such street, the land shown for the street is dedicated for a public street even though not so named on the plat. n227 As to the grantee in such a case, the way shown on the plat is a street, whether it has been opened or not. n228 This also applies to land sold by an attorney-in-fact, even if the power of attorney did not include the power to dedicate streets to the public. n229

According to the general rule, a grant of land bounded on a highway, street or alley carries with it the fee to the center line of the street, subject to the public easement, provided that the grantor owned thereto and signified no contrary intent, even if the street is not yet accepted or opened. n230 Other authorities, however, favor the rule that carrying the fee conveyed to the center line of a street or highway does not apply to mere paper or proposed streets, but applies only to actual streets. n231 Certainly the rule of conveyance to the center line does not apply when the grantor lays out the street after the conveyance, and the conveyance did not refer to the street. n232 If one side of a street has been described as the boundary of land conveyed, but the street is not yet laid out as of the date of the deed, the street side is considered the intended boundary if the street is shortly thereafter laid out. n233

A grant of land bounded upon a public street will be referred to the street as actually built and used rather than to the street as shown on a recorded plat or map or by survey, especially when these lines nearly coincide. n234 A road or highway mentioned as a boundary means the existing road or highway and not that which may exist of record or may be determined by a survey; as all monuments, it means a monument existing in fact. n235 If the road has not been actually opened by the date of the conveyance, but there was a recorded plat of it, the location of the road must be determined by the plat, as the description in the deed must necessarily refer to that. n236

Where land is bounded on the west by a street according to a map referred to, the western boundary is eventually determined by wherever the eastern boundary of the street is laid out or actually surveyed. n237 A deed describing land as beginning at a point "ranging" with the south line of a street refers to the street as extended to the property on a recorded plat, and not as it actually exists some distance away. n238

Some authorities limit the doctrine carrying the fee to the center line of a street to actual highways and is not to be applied to mere paper streets. n239 Thus one who buys lots according to a plat and the streets are unopened acquires only an easement therein and cannot take actual possession of any part of the land designated for the street, n240 unless the conveyance expressly grants to the center line. n241 If a grant is bounded by a way or lane and coupled with the privilege of using it, such an easement may show that no fee was granted over any part of the way or lane. n242 If the granted premises are bounded by a passageway, the grantee has only a right of way over the passageway. n243

If a deed describes one of the boundaries as a street of a certain width "but not yet opened," reserves the exclusive right to represent the land in all proceedings pertaining to the opening of the street, and the city repeals the ordinance locating the street, the grantee takes no interest in the street nor in the land within the lines of the street. n244

In a grant of land upon a highway, the grantor does not convey to the grantee a right of way, for this already exists and is to be kept in repair at the public expense; if the grantor has expressly or implicitly assured the right of way to the grantee, then the grantor retains the fee to make good the assurance of the easement. n245

A deed describing the land as extending "to a driveway, thence easterly on said driveway" a certain distance, and reserving all existing rights of way over the driveway, and declaring that the driveway shall remain open and common to all parties having a right therein, conveys title in fee to its center, subject to such easements, and with a corresponding easement over the other half. n246

Where a private driveway or alley was carved from the lots on one side thereof only and not from the other lots abutting on the opposite side, and no special reservation appeared in the deeds conveying the lots, the rights of the grantees extended to the whole of the driveway or alley and not to the middle line only. n247

COMPUTER-ASSISTED RESEARCH

LEXIS: Description w/10 (land or real) and highway w/10 open!

§ 90.02(c)(7)(iv) The Effect of Abandoning the Highway.

A grantee who holds no fee interest in any part of a street may, however, have a perpetual easement of way, to be kept open even if the street is no longer used as a public highway. Thus, if a grantor has bounded land by a street in such a way as to retain title to the soil of the entire street, and the street is later abandoned as a public highway, the grantee still retains an implied grant of a private easement in the street. n248 In such a case, the grantee has the right to have the ground over which the street was laid left open forever as a way to be used for every ordinary purpose accommodating use of the grantee's adjoining land. n249

If a deed conveys land without reference to a street which had formerly abutted the land but which had been vacated, the grantee acquires no interest in the street. n250 As a rule, when a street or way is discontinued, the owners of land adjacent to it as a rule are entitled to the full possession and use of the land which was already theirs in fee. The public easement expires, and adjacent owners take possession under their respective titles. n251

When a street is vacated, the land within the boundaries of the street attaches itself in the nature of an accretion to the adjacent land in proportion to frontage, and becomes the private property of the owners of such adjacent land. n252 These changes are regulated by statutes in some states. In some states the absolute title to land covered by an abandoned highway reverts to the owner of the fee even if the owner's land is not abutting the highway. n253 Owners with abutting land and who obtain title to the soil covered by an abandoned highway need not take actual possession to establish their rights when the highway is abandoned. n254 Where a conveyance limits the grant to the side lines of the street, no fee interest in the street has passed to the grantees holding abutting lots, and they acquire no interest in the soil of the street when the street is abandoned and its land relieved of the public easement. n255 Similarly, if the original grantor restricts the conveyance by words so as to reserve title to the land within the street in the grantor, upon abandonment of the street the fee reverts to the grantor free of the easement's burden. n256

COMPUTER-ASSISTED RESEARCH

LEXIS: Description w/10 (land or real) and highway w/10 abandon!

§ 90.02(c)(8) Sale of Land by Plat as Dedicating Streets.

If land is sold by a plat on which are indicated streets, such streets are not necessarily dedicated to the public for use as highways. n257 Some jurisdictions hold that sales with references to plats on which streets are indicated constitute only offers to dedicate, and the offers may be withdrawn if not accepted by the public within a reasonable time. n258 Other cases hold that such a sale constitutes a dedication of streets and alleys only as between the grantors and purchasers, n259 and if the claims of the purchasers are extinguished, revocation is possible if the public has not yet acquired affirmative rights by adopting the property designated for streets by official acts of the municipality or user. n260 A few cases hold, however, that land sold with reference to a plat on which streets are indicated perfects a dedication without any affirmative or official act on the part of the public. n261 The owner's acts and declarations may evidence an intent, either for the present or future, to dedicate the streets to public use, but they are not of themselves a conclusive surrender of the land for such dedication.

If the plat contains a statement reserving all rights and privileges not expressly granted, and providing that nothing should be taken by implication to be granted, no implication of a dedication of streets or land reserved for parks to the use of the public may be drawn from the plat. This limitation persists even if the grantor, before executing the deed, made representations that land marked upon the plat for use as streets or parks should be dedicated to the public; acceptance of the deed waives the benefit of such representations and affirms the restrictions of the statements on the plat. n262

If the deed description calls for a street as one of the boundaries of the land, that is not sufficient to establish a dedication of the street to public use, if at the date of the deed no such street existed in fact or on paper or had ever been dedicated, accepted or used by the public or by public authority. By comparison, a deed describing the conveyed land as bordering on a designated street may constitute a dedication by the grantor of such street, n263 or at least indicate an intention to dedicate the street to the public. n264

A reference in a deed to a point in the middle of a proposed street about to be laid out, and which point is to be used as a monument fixing one corner of the land conveyed, is too indefinite to be either a present dedication or a reservation of the land included in the proposed street for future dedication. An owner may subdivide a tract of land so as to establish over it only private rights of way for the sole benefit of purchasers of lots in the tract, ways in which the public will have no interest or control. n265

LEXIS: Description w/10 (land or real) and dedicat! w/10 street!

§ 90.02(c)(9) Distribution of Variances in Distance.

If the survey of a line reveals a length that is less than the length called for in a description, it is not presumed that the survey of any portion of the line is defective, but that the entire measurement of the line is imperfect. If the line is subdivided, such as for lots, the deficiency is distributed proportionately along the whole line, n266 except as to those parts of the boundary already fixed by possession. n267 Thus if land is subdivided in lots shown on a recorded subdivision plat, with a deficiency between the actual frontage and that shown on the plat, the deficiency must be divided among the lots in proportion to their respective frontages as indicated on the plat. n268

This same principle of distributing deficiencies applies also to excesses, n269 subject to exceptions related to the particular cause of the error. n270 Where in a platted block the lots are marked as having the same frontage, except one with specific dimensions, and a survey shows excess frontage, the excess is distributed to all lots, not just to the lot that differs from the others. n271 Averages in a block should be divided between lot owners according to the percentage of frontage held by each. n272

If a disputed boundary line is to be established by proportional measurement, a proved surplus or shortage must be shown. n273 If all the lots except one in a block have specified frontages, any deficiency is taken out of the lot with the unspecified frontage, so that its frontage is the length of the block less the stated frontages of all the other lots. n274

Where title to adjoining lots comes from the same grantor, and there is a shortage, the first innocent grantee of one of the lots need not contribute to make up the shortage. n275

§ 90.02(c)(10) Construction of Description Against the Grantor.

According to a common rule of construction for private conveyances, ambiguous description language is construed in favor of the grantee, because it is assumed that the language was provided by the grantor. n276 Applying this rule of

construction, however, does not extend the description to include land the deed does not convey. n277

If a conveyance is defined by two inconsistent descriptions, one general and one specific, the grantee may adopt the most favorable. n278 This privilege, however, is subject to the rule that, if one of two inconsistent descriptions is more certain than the other, the more certain description must govern, even if that one is less beneficial to the grantee. n279

The common rule of construction for conveyances from a public grantor is just the opposite of the rule applied to private grants. n280 The description for a conveyance of land from the state is construed most strongly against the grantee. n281

If the description creates a mistake in the quantity of land conveyed, and the parties have dealt at arm's length, the burden of the mistake falls on the grantor. n282

§ 90.02(c)(11) Identifying and Resolving Latent and Patent Ambiguities in Descriptions.

§ 90.02(c)(11)(i) Latent Ambiguities.

A latent ambiguity occurs when the deed or other instrument appears sufficiently certain and free from ambiguity, but the ambiguity is produced by something extrinsic, or some collateral matter out of the instrument. Where a description is apparently clear and complete, yet when it is applied to the land it appears that the words are applicable to different things, and there is nothing in the deed to show which is meant, extrinsic evidence is admissible to show the true meaning of the words used. n283

Parol evidence may be admissible to resolve latent ambiguities in a deed, but not to resolve patent ambiguities. n284 The general rule is that if the deed description is so ambiguous as to leave doubt as to what the parties intended, extrinsic evidence may be resorted to as an aid in its construction. n285 Such extrinsic evidence is always admissible to explain any uncertainty or latent ambiguity in the deed description, so as to make it apply to the parcel of land intended to be conveyed and give effect to the deed. n286 Thus, where a right of way over certain lots was described as laid out by a named civil engineer, in accordance with a map attached to the deed, but the map did not identify the location apart from the survey on the ground, explanatory evidence was admissible to show that the map was made from an actual survey and to show the location of the right of way as surveyed upon the ground. n287 Where the calls in a deed are conflicting or ambiguous, or when an effort to apply the description to the ground gives rise to ambiguity, parol evidence is admissible to show where a survey or a line of survey was actually made on the ground. n288

A description that could apply equally to two or more parcels contains a latent ambiguity which may be explained by parol evidence. n289 Where land conveyed is described as a lot bearing a designated number in a certain tract, and in such tract can be found more than one lot with such number, the description may be cured by evidence that only one of the thus numbered lots was owned by the grantor. n290

The function of extrinsic evidence as applied to a deed description is to explain the latent ambiguity or to identify on the ground the property described. Such evidence must not contradict the deed or make a description of other land than that described in the deed. n291 It cannot be used to make the deed convey land not embraced in the words used to describe the subject matter of the deed, but only to ascertain the intention of the parties as expressed by such words. n292

Parol evidence may be used not only in cases of conflict or interpretation, but also for purposes of explanation. It is always permissible to give evidence of existing circumstances, such as the actual condition and situation of the land,

buildings, passages, watercourses, and local objects in order to give definite meaning to the language used in a deed and to show the sense in which particular words were used by the parties. n293 Admissibility of extrinsic evidence turns on whether the evidence tends to explain some descriptive word or expression of doubtful meaning, so that the description language, aided by such evidence, identifies the land conveyed. n294 Thus, where no testimony shows that the surveyor actually marked the line from a given point to the bank of a river and where there is no call in the description for the line and objects testified to, parol evidence is admissible to established the boundary line from such given point to the river bank. n295

Where a deed description reserves or excepts one acre of land from the southwest corner of the land described, "together with the buildings thereon," and grantor remained in possession of all the buildings, the grantor was permitted to show that one square acre in the southwest corner of the land would not include the buildings reserved by the grantor, and that it was intended to reserve an acre of such shape as would include the buildings not so reserved. n296

Where parol evidence is admitted to remove a latent ambiguity, the identity of the land is a mixed question of law and fact. n297

LEXIS: Description w/10 (land or real) and ambiguit! w/10 latent

§ 90.02(c)(11)(ii) Patent Ambiguities.

A deed contains a patent ambiguity if the description describes the acreage in part of a tract, but the tract cannot be located. n298 Similarly, if a deed conveys a part of tract without describing what part of the tract is intended to be conveyed, a patent ambiguity exists which parol evidence cannot aid. n299 A deed for a tract of land in a named county, described as adjoining land held by two other named owners, is void if the tract is part of a larger tract held by the grantor, because the part intended to be conveyed cannot be known; if the land intended to be conveyed is not part of a larger tract held by the grantor, and the quantity is given in the description, the ambiguity is not patent and may be located by parol evidence. n300 A description of the land as simply (part of) a tract, without further identification in the deed, is void for indefiniteness. n301

If the description is so inaccurate that the land cannot be identified, the deed is void n302 and parol evidence may not be admitted in aid of the description. n303 A deed description equally applicable to more than one tract of land is void for indefiniteness. n304

A description in a tax deed as "Home lot in lot 6, block 4, ward 1" contains an ambiguity patent on the face of the deed, and parol evidence is not admissible to explain the description. n305 A deed description as "northwest quarter of section 7, north of Castor River, where there are several sections 7 north of Castor River in the county, and no range or township is mentioned, a patent ambiguity exists and the deed is void. n306 Added for land "except such portion as has been laid out in town lots, and sold prior to the execution of the mortgage," and which does not show which lots have been so sold, is patently ambiguous, void for uncertainty, and unable to be aided by parol evidence. n307

LEXIS: Description w/10 (land or real) and ambiguit! w/10 patent

§ 90.02(c)(11)(iii) Statements of Intention of the Parties.

A clause in a deed describing the parties' intention as to the property conveyed may be given a controlling effect upon all prior phrases used in the deed's general description. n308 And if elements of the description are in conflict, the

parties' intentions will be given effect. n309 Language in the description apparently used to clear up indefiniteness or ambiguity in the description will be given effect according to that purpose. n310

A conveyance describing land by lots, blocks, or government subdivisions and adding, at the end of the description, "also together with all other lands that may not have been heretofore described belonging to said" grantor, passes title to a lot not expressly mentioned. n311

In cases of conflicting elements in a description, the element with respect to which there is the least likelihood of error should control, because it is the most likely to effectuate the parties' intentions. n312 Determining the grantor's intention is the primary purpose for which rules determining boundaries exist, and all such rules yield to such intention when discovered. n313

LEXIS: Description w/10 (land or real) and ambiguit! w/20 (part! or intent!)

§ 90.02(c)(11)(iv) The Parol Evidence Rule as Applied to Descriptions.

A deed, in so far as it is contractual, is subject to the parol evidence rule. n314 According to this rule, parol evidence is not admissible to contradict or vary a description which is definite and certain, n315 or to control the legal effect of the words used, but if susceptible to different meanings, a construction must be put upon the terms used. n316

Parol evidence is not admissible to prove that the parties intended something different from that which the written language expresses or which may be the legal inference and conclusion to be drawn from it. n317 Thus, where a description was clear and exact in giving metes and bounds but, as applied to the land, conveyed a lot adjoining the land of the grantor, it was held that parol evidence could not be introduced to show that the grantor intended to convey his own lot, even though his deed referred to the deed by which he acquired title, which deed correctly described the land intended to be conveyed. This result was reached because there was no ambiguity in the metes and bounds description, and the clause referring to the prior deed did not create any ambiguity in the prior description, but was repugnant to it. n318 If, on inspection of the deed, the identity of the land is altogether uncertain, the court should pronounce the deed void. n319 Thus a deed which on its face contains two inconsistent descriptions, either of which will identify a different piece of property, is void for uncertainty. n320

If the description in the deed is ambiguous, the parol evidence rule is much relaxed. Boundaries may be proved by hearsay. n321 Evidence may be introduced to prove boundaries that is admissible to prove any other fact. n322 Indeed, in boundary disputes, the rules of evidence are more liberal than those governing other actions, especially where the surveyor's marks have disappeared. n323 Lost boundaries may be established by the best evidence available under the circumstances, n324 so parol evidence is admissible to prove boundaries. n325 Traditionary evidence is not inadmissible hearsay. n326

The *identity* of a monument in a deed is always recognizable by parol evidence. n327 By the weight of authority, parol evidence as to monuments to prove practical *location* is not admissible unless the monuments were erected prior to or contemporaneous with the deed. n328 Parol evidence is admissible to show the position of the monuments and boundary marks mentioned in a deed n329 or fixed by the parties at the time of or soon afterwards. Where the land has been actually surveyed and stakes set at the corners, parol evidence is competent to prove their location, and, if lost or destroyed, the places where they were set. n330 If such corners and monuments can be determined by the field notes of the government survey of the land, they are not so unknown or uncertain as to allow the admission of parol evidence to locate them. n331 If the means are at hand to establish the line, and a competent surveyor could locate it, it is not uncertain in a legal sense. n332 Resort must often be had to the existing circumstances, and to the construction put upon the description by the parties, to ascertain where on the face of the earth the monuments and lines described really are.

n333

In determining whether disputed land was included in a conveyance, where the description in the deed was not ambiguous, but conflicts and ambiguities arise in applying the description to the ground, parol evidence as to how the land was actually surveyed on the ground and as to the original surveyor's footsteps, is admissible to show where the line is established. n334 The lines and courses mentioned in a deed may be established upon the land by showing the survey actually made at the instance of the parties to the deed with a view to its execution. n335

Although the calls for courses and distances cannot be limited to reference to objects found on the ground, as indicating the footsteps of the surveyor, but not mentioned in the field notes, evidence of such objects may be introduced to aid a call found in the field notes by removing an ambiguity and to determine which one of conflicting calls shall prevail. n336 When the description is by survey, however full and precise the survey may be, resort must be had to extrinsic evidence to identify the survey on the ground. If by such evidence the land described can be found and identified with reasonable certainty, the description is sufficient. n337

Where the boundaries are actually located may be proved by any kind of evidence which is admissible to prove any fact. As evidence which may tend to establish this fact, the jury may consider, among other things, actual occupation, ancient reputation, the admission of a party against the party's interest, and the agreement of the parties as to the actual location of the boundary. n338 Reference may also be had to prior deeds conveying the same land. n339

Because a deed conveys only what is described in it, regardless of the grantor's intent, n340 proof of the grantor's intent is inadmissible to explain a deed which is on its face void for uncertainty, n341 or to enlarge or change the meaning of the words used in the deed. n342 Parol evidence cannot make a deed convey land that it does not purport to convey, nor prevent it from conveying that which it does clearly purport to convey. n343

When the parties have reduced their contract to writing in the form of a deed, this is taken to be the final expression of their intention, and extrinsic evidence cannot be employed to show that their intention was different from what is expressed on the face of the deed. n344 Where the description in field notes or in the deed is unambiguous on its face and in its application to the ground, parol evidence is not admissible to show that the surveyor actually ran a line of the survey at a different place from that described in the deed. n345 If the land intended to be conveyed can be ascertained from the deed itself by rejecting a part of the description as manifestly false, resort should not be had to extrinsic evidence. n346

A grantor is not allowed to contradict the deed or to vary the description of the land thereby conveyed. n347 Where the description of property intended to be conveyed by deed is ambiguous, its identity must be gathered from the intention of the parties as shown by the instrument itself and accompanying circumstances. n348 If the intention of the parties can be ascertained from the language of the deed with due consideration to the situation in which they were when the writing was made, parol or extraneous evidence is not admissible; but if in attempting to apply the language to the subject matter two situations should be presented, either of which would answer the terms of the writing with equal certainty, parol evidence is admissible to prove which of the two situations the parties had in mind. n349

Parol evidence is admissible to apply the description to the parcel intended to be conveyed, when the terms used in the deed leave it uncertain what property was intended to be embraced in it. n350 Such evidence cannot be used to enlarge the scope of the descriptive words, but only to fit them to the land intended to be described. n351 The deed must itself point to the source from which evidence from any other source (sometimes referred to as evidence "aliunde") to make the description complete is to be sought. n352 This may sometimes be done by the use of a single word, as for instance where the language used is "my" farm, or "my" homestead. n353 A description of land as lying in a designated county on a named creek, "in the _____ district of said county and known as the south half of lot 30 in a survey of said district and containing 101 1/4 acres," is not void for uncertainty, since it may be shown by parol evidence that there is only one lot 30 and the county mentioned on the creek specified. n354

The question of the application of a description to its property subject matter is for the jury, who may have the aid of all competent extrinsic evidence. n355 The question of the identity of the location is always a question of fact for the jury. n356 The construction of the terms used in a deed, aside from extraneous evidence, is for the court. n357 It is, however, the province of the jury to determine the boundaries in controversy from all the evidence, including the description in the deed. n358

The particular terms used to describe the property may be defined by parol evidence. The term "messuage" properly includes a dwelling house and the land usually held with it. Therefore, where land is described as a "messuage" in the occupation of a person named, oral evidence is admissible to show that a garden adjoining had always been occupied with the messuage and passed by deed. A "farm" may be defined by parol evidence showing what lands, house, and buildings have been used and known as "constituting the farm." Land described as "my residence," "my homestead," "my place," or "my lot" may be identified by parol evidence if necessary. n359 Thus, it is held that a deed for "one half of my lot," accompanied by proof that the grantor owned at the time but one lot in the place, was not void for uncertainty in the description. n360 A description of the property conveyed as "my house and lot" or "one-half of my lot" may be made sufficient by extrinsic evidence. n361 If the land is described as the land inherited by the grantor from the grantor's parents or from others named, evidence to identify the land so inherited is admissible. n362 Parol evidence is admissible to identify land described by a name applied by the parties to the property, though not so known by the entire neighborhood. n363

If the property is described as a house and lot in a named street, evidence is admissible that the vendor or grantor had only one house and lot on that street, and that the parties had been in negotiations for the purchase and sale of such house and lot. n364 Such evidence identifies the property and applies the description to the property intended.

In a deed the words of description are, of course, intended to relate to an estate owned by the grantor. And, in our opinion, this is also the presumption in construing a contract for a future conveyance. If the party who enters into the agreement in fact owns a parcel answering to the description, and only one such, that must be regarded as the one to which the description refers. With the aid of this presumption, the words "a house and lot," on a street where the party who uses the language owns only one estate, are as definite and precise as the words "my house and lot" would be a description the sufficiency of which has been placed beyond all doubt by very numerous authorities. n365

A description of a town lot by its length and breadth, and also by the improvements upon it, is sufficient when it is shown that no other lot in the town has improvements of a like character. n366 The omission from the description of the name of the township, range, county, and state will not render the deed void if the description given can, without alteration, be applied to a particular tract, so that the court can, from extrinsic evidence, say that the minds of the parties met and agreed upon the identity of the distinct parcel intended to be conveyed. n367 Evidence from other sources (sometimes referred to as evidence "aliunde") is pointed to by a reference to another deed for the description, or some part of the description, n368 or by a description of the land as being the same inherited by the grantor from or devised to the grantor by some other person, or as called by a distinct name, or described as known by that name. n369 Parol evidence cannot be adduced to identify land insufficiently described in a contract of sale. n370

§ 90.02(d) Types of Descriptions.

§ 90.02(d)(1) General and Particular Descriptions.

The rule that the intention of the parties to a deed is the test by which to determine its legal effect applies to the

description as well as other parts of the deed. n371 The general description is usually followed by another description which gives further details regarding the property and usually cites some characteristic that distinguishes the land from other land. This is known as the particular description, and as found in practice may be so mathematically defined that the engineer can stake out the bounds without reference to other documents or plats, or it may be so broad that from the engineer's standpoint it is general. n372 The most common form of description is the combined general and particular. The general often serves as a means of identification and the particular for purpose of definition. The two should be in perfect accord and together express the intention of the parties.

A particular description is not necessarily limited by the general words of intention, nor does such language restrict the grantor's covenants to the grantor's title and interest, when the land itself is the subject matter of the conveyance. n373 This rule applies to cases where the particular description is unambiguous; n374 but if the general description harmonizes with the manifest intention of the parties as disclosed by any proper evidence, including the terms of the instrument, and the particular description does not, the ordinary rule of preference does not apply, and the general description prevails. n375

If a deed contains both a specific and a general description that are in conflict with or repugment to each other, the specific description controls. n376 This preference for the specific or particular description is one of the strongest of the construction rules. n377 This presumption favoring the specific description will prevail unless it appears that the parties intended otherwise n378 or the specific or particular description is incomplete or defective. n379 Also, a specific description cannot be varied or enlarged by a more general and less definite description. n380

The words "meaning to convey lot known as the Seal Cove lot" following a particular description by metes and bounds, do not enlarge the grant unless the contrary intent appears. n381 Where the calls of the description are definite and clearly expressed, they should not be extended to conform to an intent which might be discovered from other parts of the description. n382 However, the intent to restrict the conveyance as made in the particular description may be made so clear that effect must be given to the general expression of intent. Thus, where three parcels of land were described as if the grantor were conveying the full and absolute interest in the parcels, but the grantor added, "meaning to convey all the land I purchased," of three persons named, "referring to their deeds for particulars," and again saying, "meaning to convey all the land set forth in said deed, and no more," and it appeared that the land acquired by the deeds referred to was only an undivided one-half interest in the land described, it was held that the deed conveyed only the undivided half interest. n383

If a particular or specific description makes a general reference to a description in a prior deed made for another purpose, the specific description prevails over the general reference. n384 This is because if a description in a deed is clear and complete, a reference to another deed cannot restrict the description. n385 If the reference to an earlier deed is "for a more particular description," but the earlier deed conveyed only part of the land conveyed by the later deed, which later deed clearly describes the property, the whole of the land so described will pass to the grantee. n386 If a grantor refers to a prior deed and declares the intention "to convey the same and identical real estate conveyed by such deed," the grant is still not necessarily controlled by such a reference. n387 When land is described as the same conveyed to the grantor under a deed referred to for a particular description, the title to a lot excepted from the deed referred to does not pass, even though the grantor owned the lot at the time. n388 A reference to a description in a prior deed becomes of importance when the particular description is imperfect or doubtful, and the particular description is in such case aided rather than controlled by the reference. n389

A particular description by metes and bounds prevails over the insertion of a general description, especially if the general description was inserted to reveal the grantor's source or chain of title, n390 or to further identify the land, n391 or give emphasis or clarification to the description. n392 If a general description is followed by a more particular description, the more particular description controls unless other provisions of the instrument or the surrounding circumstances clearly indicate a different intention. n393 If a general description is inserted merely to fortify the particular description or to show chain of title rather than fix boundaries, the particular description prevails. n394 A

general description of a farm described by name, or as that farm on which the grantor lives, may control a reference to a deed by which the grantor holds title, so that if the deed referred to describes more or less land than the farm contains as described, the parcel that passes is the farm described by the more general description of name or occupancy. n395

Where a deed contains a general description, definite and certain in itself, and is followed by a particular description, such particular description will not limit or restrict the grant which is clear and unambiguous by the general description. n396 A general description may be limited, restrained or controlled by a particular description, but as a rule a particular description is not limited, restrained or controlled by a general description. A description of land as "60 acres off of the south end of the west half of the southwest quarter" of a certain section is no less certain and definite than a conflicting metes and bounds description in the same instrument, but the metes and bounds description controls. n397

A particular description prevails over a general reference to the premises as being in possession of the grantor, or of some other person named, n398 or as belonging to a person named, n399 or as "being the land set off" by a certain Indian treaty to a person named. n400

After a definite description by metes and bounds, the grant cannot be enlarged by adding the words, "together with the buildings thereon standing," if the buildings project beyond the boundaries of the land. n401 Where the parcel described was of a specified farm, but a schedule and plan referred to did not include a close which was proved to have been held and treated as part of the farm, it was held that this close did not pass.

The rule that when particular words of description are following by general terms, the latter will be regarded as referring to things of a like class applies mostly where the general words follow the particular, and not where the particular words follow the general. n402

If the general description is definite and certain, and is proved to be correct by reference to the land itself, or in any other way, or if in any way the intention of the parties appears to have been to convey the land thus generally described, the general description will prevail as against a description by course and distances, so far as these descriptions differ. n403 Where a deed contains conflicting calls, and the first call is followed by a general description which manifestly was intended to be a summing up of the intention of the parties as to the premises conveyed, the general description controls all prior words or phrases used, if sufficient to identify with certainty the property conveyed. n404 Where fixed boundaries are clearly and certainly established, they prevail over courses and distances. n405 Where a conflict exists between the calls of a deed for courses and distances and its calls for the lines in a prior deed of the grantor to another, the latter controls, n406 especially because it is recognized that mistakes often occur in descriptions by courses and distances. n407

COMPUTER-ASSISTED RESEARCH

LEXIS: Description w/10 (land or real) and (general or particular)

§ 90.02(d)(2) Maps and Plats as Descriptions.

A description in a deed may be sufficient if it describes land by reference to a map or plat, n408 if the reference is definite and certain in connecting the deed with the map or plat. n409 A description containing numbered lots without reference to a particular map or plat will not suffice. n410

As a general rule, a distinct and definite reference in a deed to a plan, map or plat has the effect of incorporating such plan, map or plat in the deed, n411 especially if the instrument referred to is recorded n412 or is annexed to the deed. n413 When sufficient reference is made to a map or plat, the courses and distances and other details which appear on the map or plat are considered true and correct, and as adopted by the grantor through the reference. n414

A plat becomes a monument when made part of a patent by reference, n415 but, even if property conveyed may be described by reference to a map, the deed and the map, when construed together, must furnish a description having the same degree of certainty as would be required of a description appearing only in the deed itself. n416 A recorded plat that is referred to in a deed for a description of property conveyed, and which, thus, becomes a part of the description thereof, is subject to the same kind of construction as to errors as governs the remainder of the description. Inconsistencies in the plat will be harmonized by eliminating the features of lower evidentiary rank and giving effect to those of higher rank. n417

A reference to a survey, whether or not noted on a plat, makes the survey part of the deed, and both must be construed together. n418 Both the survey and plat referred to are as much a part of the deed as if they were actually included within the deed. n419 Therefore, the boundaries, monuments, courses, and distances laid down on a map referred to are as much to be regarded as the true descriptions of the land as if they were expressly recited in the deed. n420 A conveyance of land according to a plat or by governmental subdivisions carries all the land lying within the lines so run and platted. n421 If a plat or survey enables a surveyor to locate the boundary lines with certainty, a reference to this is in itself a sufficient description. n422 A reference to the field notes of a survey for a description of the land renders such notes admissible in evidence to show the location of the land. n423 A description in a deed is valid if it refers to recorded or official maps or plats. n424

When lands are granted according to an official plat of a survey, the plat itself, with all its notes, lines, descriptions and landmarks, becomes as much a part of the grant or deed by which the lands are conveyed, and controls so far as limits are concerned, as if such descriptive features were written out upon the face of the deed or the grant itself. n425 Where the deed contains particular words of description and also refers to a plat, which is more definite than the particular words of description and is not inconsistent therewith, the description by plat controls in ascertaining the property conveyed. n426 Some courts, however, have held that the description by words prevails over the description by reference to a plat or map. n427

Where the deed describes the land by reference to a plat or map, the grantee takes title in accordance with the boundary so identified. n428 Where the plat or map is referred to only for the purpose of boundary, the fact that the plat or map has been illegally laid out and platted into lots and streets does not affect the validity of the deed or reference. n429 Even if the deed does not expressly refer to a recorded plat of the land and make it a part of the description, if the only way of making out the description and identifying the land is by means of the plat, it is presumed that the parties contracted with reference to the plat, and the plat may be viewed as part of the description. n430 Where one granted two lots, each sixty feet wide, in a certain block owned and laid out by the grantor, a plat of which the grantor filed in the county clerk's office, according to which the block contained a large number of lots, all of which were twenty-six feet wide, it was held that the words describing the width of the lot must be rejected as erroneous description; therefore, in the absence of competent proof to the contrary, the parties must be presumed to have contracted with reference to the real condition of the property. n431 Where lots were sold according to an unrecorded plat and the later recorded plat contained a mistake in that the lots were numbered in the opposite order, it was held that the original plat governed. n432

A plat of land made for the grantor, but not shown to the grantee before or at the time of the conveyance, and not referred to in the deed, is inadmissible to control the boundaries as described in the deed. n433 However, if a grantor who conveyed a house with land was familiar with a village atlas showing the lot on which the house stood, it may be presumed that the deed was intended to convey the lot shown by the atlas. n434

To be of weight in locating particular lines or objects, a map need not be based on a survey accurately made or absolutely correct, but need only have a degree of certainty that is reasonable and practical under the circumstances; n435 however, an erroneous map n436 or plat n437 cannot have controlling effect in applying the description of the property conveyed. If a recorded plat erroneously gives acreage, the shortage will be taken out of the lot or lots included in the plat that do not have definite frontage. n438

If a plat referred to for description of land is imperfect or incomplete, the description is still valid to pass title if the parcels intended to be conveyed are known to the parties and are susceptible of identification according to the actual survey on the ground. n439 A description of land as a numbered lot or block on a certain plat is sufficiently definite, even though the plat on its face furnished no data for locating the lot or block, but with the aid of parol evidence the land can be identified. n440 If a plat is referred to as recorded when in fact it is not, the conveyance is not therefor invalidated, and the unrecorded plat or other parol evidence may be used to identify the parcel. n441 The statement in the description that the plat is recorded is simply rejected as erroneous description.

Evidence that the recorded plat referred to in a deed differs from the original plat should not be received; such a mistake in the reference should instead be redressed by an attempt to reform the deed. n442

Where a description refers to a map and to monuments at the corners of the lot, parol testimony is admissible to show that the map is inaccurate, and was compiled from other maps without an actual survey, and that the land which the parties intended to convey was the land that was staked off and located by the survey. n443 In such a case, the survey governs the plan in determining the location of the boundary lines of lots in a subdivision. n444 Also, where a survey was not made according to law, the survey was held not to be evidence as to the boundary between two quarter sections severed by the survey. n445 It has also been held that even though a plat is so defective as not to be entitled to record, if it had been recognized as valid for sixty years and used as the foundation of deeds, it is admissible in evidence to how the description and location of a given lot. n446

An unrecorded plan or map that is referred to in a deed may be identified by parol evidence; n447 and as against the grantor and those in privity with the grantor, it is a sufficient identification to show that the grantor exhibited the plan or map as the plat referred to. n448 A deed to land described by reference to a map prepared by the grantor implies a representation to the grantee as an inducement to purchase that a street shown by the map and furnishing the only outlet has been dedicated, even though the map is not recorded and the street line is not indicated thereon. n449

Where a conveyance of lots is made with reference to a map, it is immaterial who made the map or whether it is recorded or whether a copy can be produced, if the location can be proved with reference to streets by any method which the law recognizes. n450 Where a private survey showing a boundary line was admissible, a map showing that survey and identified by witnesses who made it is likewise admissible. n451 Maps, survey, monuments, pedigree and even reputation evidence are admissible to establish boundaries. n452

When a description reference is made to a plat, the plat may be used to identify the lands referred to, even if the plat does not conform to a statute and is not duly certified. n453 When a plat is so defective as not to be entitled to record, but according to which deeds have been executed for years, it is admissible as an instrument referred to. n454

Although a map or plat may be identified by parol evidence n455 it is preferable for the map or plat to be annexed to or endorsed upon the deed, if the deed is not already recorded. Plans made at the time of a conveyance are usually recorded with it, and the deed should then refer to the plan and state that it is to be recorded contemporaneously with the deed.

In case of ambiguity as to which one of two plats is referred to in a description, the courts will take into consideration the circumstances attending the transaction, the situation of the parties, and the state of the thing granted, and it will be presumed that a purchase according to a plat refers to a plat legally existing at the time of the deed. n456

A map or diagram drawn on a deed, in such relation or connection with the descriptive words of the deed as to indicate to any reasonable person that the grantor intended it to be taken as a part of the description, is admissible in evidence as a part of the deed when that is admitted in evidence, although not referred to in the deed itself. "When the map is on the deed itself, the court of necessity must examine it, and from it, taken together with the words of description, determine what the deed conveys." n457

To make a map or plat a part of a conveyance there must be a definite reference therein to the map or plat showing the land intended to be conveyed. n458 A deed including the descriptive elements in the body of the instrument, as well as those in a plat referred to as an additional description of the land, should be construed as a whole, and effect given to every part thereof if practicable. n459 If a plat has not been properly filed, a description by the congressional survey may be valid. n460

A plat referred to as annexed to a deed but which has become separated from the deed may be identified as the plat annexed, and it is then admissible in evidence. n461 A reference in a deed to a plat is evidence as against the grantor of the existence of such a plat; and evidence tending to show a survey of the town prior to the conveyance, and that the grantor produced the plat in question some years afterwards as such plat, is sufficient to identify the survey as that mentioned in the deed. n462 A map or plan referred to in a deed is a material and essential part of the conveyance, and is to be so construed when attempted to be controlled by the general language of the deed calling for natural monuments and boundaries. n463

It is not necessary that a plan incorporated in a deed by reference be recorded, if its existence and veracity are proved otherwise. n464 The fact that the plat referred to is invalid because it was not made and filed in accordance with statutory provisions, does not affect the deed making the reference. A reference to a void deed, or a void plat, for a description is just as effectual as a reference to a valid deed or valid plat, if the description is correct and the deed or plat referred to is accessible. n465

Maps or plans that have been in use many years and which agree with the original surveys are not to be held erroneous because they do not agree with resurveys made long afterwards, and based upon information furnished by persons living. n466 When there is a conflict between a map or plat and an actual survey the latter controls, and the reference to the map may be rejected as surplusage, n467 assuming that the corners and lines established by the survey can be identified. n468 This is true even though the map is the official map of a town. Where no monuments are shown contradicting the measurements given on a recorded plan, and no substantial reasons shown to establish their inaccuracy, the plat must control. n469 Where a deed contains words of description such as that the land conveyed is bounded by the lands of named parties, and also refers to a plat which contains definite boundaries as to courses, distances and monuments, the description by plat controls. n470 Parol evidence is admissible to show that there is a conflict between the survey in the field from which the map was made and the map itself, in order to determine the correct boundary of a parcel. n471 A call in a deed for a natural boundary, such as a lake, controls the grant as against a plat annexed and referred to upon which the lake does not appear. n472

The lines of a survey marked on the ground constitute the actual survey and control courses. n473 They control a general description of a boundary, such as "up the bayou." n474 If a discrepancy exists between the plat and the field notes of the original survey of public lands, the former must control, since it represents the lines and corners as fixed by the surveyor-general, and by which the land was sold. n475 A description in a deed following the description in a patent which contained a mistake as to one of the calls must yield to the actual facts, if shown by the plat filed with the registrar of the land office. n476

In construing a deed describing land by the government survey, the court must ascertain the corners of the survey as actually established, and not as they ought to have been established. The presumption is that the deed was intended to convey according to the established corners. This presumption may be rebutted by evidence that the parties were mistaken as to the location of the government line and intended to convey a definite tract, but it is by no means conclusive. And, while parol evidence will not be admitted to dispute the written contract, it may be admitted to explain it and to show the understanding of the parties. n477

Where a plat delineates an actual survey, the survey rather than the plat fixes the location and the boundaries of the land. The plat is a picture and the survey is the substance. In a conveyance referring to a plat, the lot bounded by the lines

actually run upon the ground is the lot intended to be conveyed. The plat may be all wrong, but that does not matter if the actual survey can be shown. n478 If there is a dispute as to the boundary line between a street and the abutting lots, the original survey will control the recorded plat. Where a surveyor of the land marks the division lines on the ground by monuments, such lines control calls and distances indicated on the surveyor's map. n479 A boundary by a street which has been surveyed and marked by visible monuments prevails as against a plat that varies the location of the street. The line of the street is determined by the survey rather than by the recorded plat. The courses and distances of a survey are always regarded as more or less uncertain and always yield, in cases of doubt or discrepancy, to known monuments and boundaries referred to as identifying the land, whether such monuments be natural or artificial objects, such as rivers, streams, springs, lakes, marked trees, fences, or buildings. n480 The lines of a survey marked upon the ground, if they can be located, govern plans made from such a survey. n481

A reference in a deed to a patent of the United States of the same land makes the patent and the survey upon which the patent was issued a part of the deed. n482

If an experienced surveyor familiar with the land testifies as to having surveyed the land many years ago and found it to correspond with certain maps then in existence, and further testifies by the aid of those maps that the line was straight in contradiction to testimony of a job, the surveyor's testimony is admissible even though the maps are shown to be not authentic. n483

The loss of a plat referred to in a deed does not invalidate the deed if the land can be laid out upon the ground in substantial accordance with the plan. n484 A description by reference to a map, field notes or plats governs over statements of quality. n485 Reference to a plat in a deed estops the seller from denying rights obtained by the purchaser in the streets and alleys designated in the plat. n486

LEXIS: Description w/10 (land or real) and (map! or plat!)

§ 90.02(d)(3) Description by Name of Tract.

If a tract of land bears a name of such common repute that its boundaries can be identified through use of the name alone, such use of name is a valid and sufficient description in a deed. n487 Traditional evidence may be resorted to in order to establish a boundary line under such circumstances. n488 Deed language that gives the boundary of the land on all sides and describes the land and gives the land's name as generally known has been held a sufficient description to convey the land. n489 If more than one tract of land is known by the same name, that name will not suffice as a description of the land conveyed. n490

A description of a tract of land by name only points to outside evidence showing the existence of a tract of land generally known by that name, and such evidence is admissible to apply the name to the land intended. n491 A grant of land by name passes the title to the entire tract of land known by that name. n492 Where a mortgage conveyed "the following described tract or parcel of land, to wit, the property known as 'K's Grist and Saw Mill and Gin,' together with all the privileges and appurtenances belonging thereto," parol evidence was admitted to show that two acres of land on which the mill and gin were situated had always been used in connection therewith, and were necessary to the enjoyment of the same. n493

A general description giving the name by which the estate is commonly known is controlled by a subsequent particular description. n494 However, in order for a general grant to be limited by a subsequent particular description, such an intention must definitely appear from the terms of the particular description. n495 An exception in a deed which reads, "except the dower of fifty acres, as fully described in the deed given to C. B. Co.," is not void, although the boundaries of the excepted land are not defined in any way, because reference may be had to the deed to the C. B. Co. to ascertain

them. n496

COMPUTER-ASSISTED RESEARCH

LEXIS: Description w/10 (land or real) and (name w/5 tract or lot or parcel)

§ 90.02(d)(4) Prevalence of Description by Name Over Other Forms of Description.

A description of property by a name well known and usually applied to it prevails over a description by measurement. n497 When the subject matter of a conveyance is completely identified by its name, the addition of another particular which is inconsistent will be rejected as surplusage. "When property has a descriptive name, it may be conveyed by that name, and defects in other parts of the description may be disregarded." n498

A description of a lot by name or number, upon a plat or map referred to, ordinarily prevails over a description by courses and distances, and over calls for monuments, or other particulars used in a description, because the lot itself, with the name or number by which it is known, is the prominent thing. Therefore, there is less likelihood of uncertainty in regard to it than in regard to the particulars of the description, which are employed to identify more particularly the principal thing, the lot itself. n499 Thus, where a lot was conveyed by number upon a recorded plat, and was also described as being 60 feet wide and 120 feet deep, but the lot on the plat was only 26 feet wide, it was held that, although the grantor owned the adjoining land, his deed conveyed only the lot described by the plat, and that the word in the deed describing the width of the lot must be rejected as an erroneous description. n500 Where there is a variance between a plat and the field notes of an original survey of public lands, the plat must control. n501 The area of a lot conveyed by number has been held not reduced by the words "being the property purchased by me from" a named person, although the grantor, at the time of her receiving a quitclaim deed to such lot from the person named, held a part of the lot by adverse possession. n502

If there is indicated an intention that the description by monuments or measurements shall prevail over the general description by lot, this intention will be enforced. n503 If there appears to be an error in the number of a lot, a description by definite boundaries will prevail. This was the case where "beach and water property" was conveyed by definite exterior boundaries and was further described as blocks numbered one to thirty-two inclusive on a map referred to, but one block within such boundaries was numbered thirty-three; it was held that the description by boundaries controlled. n504

A description of land by lot numbers is not void though the recorded plat shows no division into lots, but merely into blocks, if it be shown that the owner had always treated it as divided into lots, and it appears that the property had been conveyed and generally known by lot numbers. n505

LEXIS: Description w/10 (land or real) and name

§ 90.02(d)(5) Description by Statements of Quantity.

A statement of quantity ordinarily adds nothing to the particular description, except where the grantor has unequivocally expressed an intention to pass only a certain quantity of land; such a description prevails over a specific metes and bounds description. n506

The quantity of land named in a deed is ordinarily one of the descriptive elements that is lowest on the scale of importance. n507 Quantity is usually less certain than any other element of the description n508 and, as a general rule, a call for quantity is not conclusive. A call for quantity yields to calls for monuments and course and distances, n509

unless it appears that the parties intended otherwise, n510 or other calls are doubtful, n511 or the result is unconscionable. n512 A statement of the quantity, in the absence of an express covenant that the land conveyed contains that quantity, has very little weight when the deed contains an accurate description by permanent boundaries capable of being ascertained. n513 Quantity is ordinarily not controlling unless the deed contains no calls for monuments or for courses and distances. n514

The method of identifying boundary by acreage is generally considered the weakest method and yields to every other method, n515 especially where the words "more or less" are added. n516 The quantity of land is not a factor in establishing boundaries, unless the more particular description expressed is indefinite and uncertain. n517 Quantity does become important where the location or boundary is doubtful, and in doubtful cases quantity may have weight in aid of the description, even controlling effect in some cases. n518 Thus a deed containing an indefinite description was applied, by the use of the survey's measurements of the disputed distances for clarification, so as to embrace the acreage indicated in the deed. n519

Parol evidence is usually not admissible to determine whether the words relating to quantity are merely descriptive or are used as a warranty of quantity. The meaning of the words used must be sought only in the deed itself. n520 A description of land in a deed by metes and bounds and natural landmarks, pointing out the boundaries by metes and bounds, is held controlling over a statement in the deed as to the quantity of land there described. n521 Where a grantee accepted a deed containing a metes and bounds description, it was held that the grantee could claim only to the boundaries fixed by the lines and corners called for and could not extend the tract over onto other lands in order to claim the quantity called for in the deed. n522

While quantity is a circumstance of slight or no weight in a question of title, it may have a marked effect on the question of boundary, and in some cases be controlling, n523 especially if there is uncertainty in the specific description of the deed. n524

A call for quantity usually yields to a more definite description by metes and bounds. n525 However, while the reference to quantity usually has no effect beyond assistance to the description, in some cases where the grantor unequivocally expressed an intention to pass only a certain quantity of land, quantity prevails over a specific description by metes and bounds. n526 The deed may make quantity the controlling element, as where a deed, after describing the land by courses and distances, declared that "said tract shall contain just one acre, and the distances shall be so construed." n527

In the construction of a deed, the quantity of the land is comparatively unimportant, distances are of less weight than courses, and monuments are usually given more weight than either. n528 When the boundaries of a parcel are definite, a statement of the quantity of the land does not generally have any effect. Such a statement is considered merely as descriptive, and, as the quantity is the least reliable part of the description, quantity must yield to the boundaries or other definite elements of the description, such as name, number, map or survey. n529 The most material and particular part of the description controls that which is less natural and certain. It is only in the absence of monuments, courses and distances that the quantity of land named in the deed will govern. n530

A description by metes and bounds controls a statement of the quantity, unless a contrary intention appears in the deed. n531 Where a description is by government survey, recitals of acreage are unimportant. n532 Quantity will prevail in the absence of monuments and courses and distances. n533 The call for quantity may be resorted to for the purpose of making that certain which otherwise would be uncertain, and especially is this the case when the lands are described by sectional subdivisions. n534 It is only where all other elements of the description are ambiguous that the quantity of land called for will be considered. n535 In doubtful cases, the quantity of land called for may have weight as a circumstance in aid of the description, and in the absence of other definite descriptions, it may have a controlling effect. n536 Quantity will control when the superior calls are not set forth in the deed, n537 or when the superior calls leave the boundary doubtful. n538 The call for quantity may serve to show that the courses and distances are right, and that a

further description by visible monuments is wrong. Thus, when it is apparent upon the face of a deed that the intention was to convey a specific quantity of lands, and the courses and distances given that precise quantity, but the description by fixed monuments would embrace more or less than that quantity, it is clear that the description by courses and distances should be followed. n539

Juries must be instructed as to the materiality of a call for quantity. When one of the boundaries is uncertain, upon an issue as to the location of one of the lines the jury should be instructed to take into consideration the quantity of land granted; and they should not be instructed that the quantity is immaterial if the boundaries can be fixed in harmony with the calls of the survey. n540

A call for quantity may be considered and, under some circumstances, may have controlling weight on the question of the parties' intentions. n541 Such a call is part of the description and must be so considered in identifying the land conveyed. n542 Thus, where a deed conveys a given quantity of land, and describes it as bounded by a stream on one side, starting from a point named, and containing a certain number of acres in a square form, all the boundaries may be determined by the quantity given and the location on the stream. n543 Where there is uncertainty in the specific description of a tract of land, the quantity named in the deed may be of decisive weight, especially so if the intention to convey only so much and no more is plain. n544 Where a mathematical calculation disclosed that the lines as given in the deed did not embrace the quantity of land mentioned, it was held that the line necessary to include the quantity will be supplied where the intention of the grantor was clear. n545 Where the general boundaries given may either exclude or include a tract of land and are to that extent ambiguous, the number of acres which the parties have fixed may be looked to in defining the boundary. n546

Quantity has been given controlling effect in numerous cases. Each case has been decided upon its own merits, with the only general rule being that, if possible, effect shall be given to the intention of the parties, if this can be ascertained. n547 Quantity will control when it is made the essence of the contract, n548 or there is an express or implied covenant in the deed to convey a definite quantity. n549 A grant of a mine with one thousand acres of land "around, circumjacent, and adjoining said mine," the grantor owning a larger tract, may according to the California decisions be located in a square form around the mine, taking the mine as the center of the location. n550

A deed to a specified number of acres out of a larger tract with the right in the grantees to select the location of the acreage will be valid provided the grantee actually makes a selection. n551 No title passes until the selection is made, and the deed gives only the right to make a selection and to enforce a conveyance of the land that is chosen in the manner provided by the deed. n552 Until a selection is made, the grantee's continuing right to select will pass to subsequent grantees. n553 A right given to the vendee to select a definite number of acres of land out of a larger tract affords the means of rendering the description certain. n554

The general rule is that a deed must contain such description of the land as will enable the land to identified, and this applies to deeds executed in blank as to the description, with respect to which the grantor has authorized another person to fill in the blank. n555 A deed with a blank description is void, of course, but the grantor may authorize an agent to select the land and fill in the description; if this selection is not made during the lifetime of the grantor, then the deed is void. If the grantee enters into possession under such a deed, this may be used as evidence of the land selected. n556 A deed of land located by a general description, with a direction that a certain quantity of land is to be surveyed by a surveyor designated and the field notes attached to the deed, is not void for indefiniteness if the survey is made and the field notes attached as directed. n557 The grantor cannot by parol, after delivery of the deed, authorize the grantee to fill in the description. n558 Greater strictness is required in a tax deed that conveys a part of a larger tract, than in the case of a voluntary conveyance, as the description must correspond substantially with that employed in the prior proceedings. n559

A description that excepts acreage that is not located is void for ambiguity. n560 Land may not be described by quantity alone, or by a quantity to be taken out of a larger tract without indicating out of what part it is to be taken, n561 unless it

is for a specified undivided interest, n562 or one party, such as the purchaser, is given the right to select the tract. n563 A grant of the south part of a subdivision of a government section of land containing a certain number of acres is sufficiently certain, inasmuch as the quantity of land specified may be laid off in a strip of equal depth on the southern boundary of the named subdivision. n564 If the land conveyed be a certain number of acres in a certain corner in a named section, enough land may be selected in such corner, in a square bounded by four equal sides, to satisfy the call for quantity. n565

Where the description of land conveyed is by government section numbers, the land conveyed, without more, is that which is situated within the designated sections as surveyed and platted by the government. n566 Where a tract of land is subdivided and thereafter is found to contain either more or less than the aggregate amount called for in the surveys of the tract within it, the proper method is to apportion the excess or deficiency among the several tracts. n567

A description as "the southeast part of a quarter section containing thirty-two acres" is insufficient, because it is impossible to determine whether the form of the parcel should be a square or some other shape. n568 However, numerous courts have held that such a description is sufficient, because the land is to be laid off in such case in the form of a square. n569 A deed describing the land as "ten acres off the south end of the northeast quarter of section 35, township 19 north, in range 7 east, except four acres off of the west side of said ten-acre tract, heretofore conveyed to Cassana McGill," was held to properly describe the land. n570 A grant of "sixteen feet of the north end" of a lot described is not so uncertain as to render the grant void. n571

Where land is purportedly conveyed out of a larger tract and no attempt is made to located the land conveyed, some courts have given the grantee an undivided interest in the larger tract. n572 Others have treated the deed as void for ambiguity. n573 A third view permits the parties to informally agree after execution of the deed as to the tract conveyed. n574 A conveyance of a definite quantity of land out of a larger tract well described, but without locating the land thus conveyed, is construed as conveying a proportionate undivided interest in the larger tract, provided the deed does not purport specifically to describe the smaller tract so conveyed, nor attempt to do so with any certainty. n575 The legal effect is the same as though the interest were directly expressed as an undivided fractional part; n576 but if the deed attempts to describe a specific part of the larger tract, but fails to give sufficient description to convey that part, the deed does not convey any undivided interest in the whole tract, even though the quantity intended to be conveyed is given. n577 Where a deed conveying a tract of land, consisting of a specified number of acres out of a larger tract, describes the tract so faultily that the tract cannot be located and it is apparent that the intention was to convey in severalty, rather than an undivided interest, the conveyance will fail for want of a description and will not be upheld as a conveyance of an undivided interest in the larger tract. n578 A deed describing the premises conveyed as being all of a designated tract not conveyed by the grantor to a third party named is sufficient of itself, and without proof as to what part of the tract had not been conveyed to the third party, to show title to any part of such lands in the grantee. n579 Such a deed, however, is rendered certain in its description by showing what part of the whole tract has been conveyed, and the deed is sufficient to convey any remaining land as against a subsequent purchaser for value without notice. n580

A deed that conveys a certain number of acres on the north side of a lot, described by its number, the lot being a square, is sufficiently certain to embrace such a parallelogram as would result from drawing a line across the lot, parallel with its northern boundary, so as to cut off the required quantity. n581

A description of a half acre "where the graveyard is not situate" was sufficient identification and could be laid off with the old graveyard as the center of the tract. n582 A deed conveying 20 acres in a square in the northeast corner of the east half of the northwest quarter of a named section, was held valid, since a "square" is a figure having four sides of equal length. n583

COMPUTER-ASSISTED RESEARCH

LEXIS: Description w/10 (land or real) and quantit!

§ 90.02(d)(6) Description by Designation of the Area in Which the Description is Located.

A misnomer of the city, town, or county in which the land is located does not invalidate the deed if the description is sufficient to identify the land. n584 Thus, if the land is described as being in a certain city, but because of a change in city limits the land is actually in another town, and the grantor owns the land when the conveyance is made, and the land can be identified by the description in the deed, the deed is valid. n585

A deed that fails to designate the state, county or quarter section in which the property is located is ineffective, unless the property can still be sufficiently identified. n586 When land is described according to the federal public lands survey system, the description is sufficient even if the name of the county and state or territory in which the land is located is not given, because judicial notice is taken of such surveys. n587 If the county or school district in which the land is located is named, with a particular description by metes and bounds, even if the section and township information is omitted, the land can be identified. n588 However, if the township, range or county information is omitted, and the land is described only by the number and subdivisions of a section, the description is void on its face. n589 A deed may be valid, even though it fails to specify the state and county in which the land is located, if the description given corresponds to that of the grantor's land in the county in which the deed is acknowledged and recorded. n590 A presumption prevails that, in the absence of anything in the instrument to the contrary, the land is in the state in which the parties reside and in which they execute the deed. n591 This presumption is one of fact and may be rebutted by oral evidence. n592 If, in a description by section, township and range, the state and county are omitted, parol evidence is admissible to complete the description and identify the property. n593 However, where the property intended to be conveyed was described as "lot No. 3, containing two acres more or less, bounded as follows: North by land of G; east by street running north and south; south by A, railroad company; west by lands of L. Sr.," and the names of the town, county and state were omitted, the description was too uncertain to pass title. n594 Title also does not pass if the deed fails to show the meridian to which the range should be referred, whether the township is north or south, and to mention the state and county. n595

COMPUTER-ASSISTED RESEARCH

LEXIS: Description w/10 (land or real) and (area or locat!)

§ 90.02(d)(7) Description by Abbuttals.

If the land is described or a call for description is given by reference to abutting land or monuments, the description is good if the abutting lines can be accurately determined. The line of an adjacent tract of land is a monument of well established. n596 It may be a sufficient description of the land conveyed to state that it is bounded by or adjoins lands belonging to named persons. n597 When one accepts a deed for land bounded by another's land, the land referred to becomes a monument; n598 "in this connection a boundary line of a named adjoiner is a fixed natural object." n599

A parcel of land described as adjoining the lands of persons named and as containing a specified number of acres, is sufficiently described to admit parol evidence as to the land intended to be conveyed. n600 If the quantity of land is given, and the land is described as situated in a certain county adjoining the lands of other named persons, the question left open for explanation by outside evidence is whether the grantor had a tract of land of the quantity specified in that county, and so bounded by the lands of the named persons so as to separate it from other tracts, and to indicate its boundaries with reasonable certainty. n601 Where land was described as "a certain tract or parcel of land in the county aforesaid fronting the farm of C.W.T., adjoining the farm of T.H.R. and others, and known as the B.H.T. place, being 150 acres more or less," it was held that the description was sufficiently certain to permit the reception of parol evidence to fit the description of the property. n602

When the boundary given is the land of a named person, the description of this particular boundary will be sufficient even if the title of the named person is defective, if it is shown that the grantor recognized the person as the owner and

as claiming the land and the boundary line of the adjacent tract is established by extrinsic evidence. n603 If the land is described as bounded on one side by the land of a named person, the true boundary line of the person's land must be taken as the boundary line, and not the boundary line as it was understood and agreed to exist at the time the deed was executed, if there is a difference between the two lines. n604 An abutting line is not a valid call unless it is definitely fixed. n605 Land described as 100 acres, more or less, bounded on the north by the lands of a specified person, on the east by the lands of another specified person, on the south by the lands of a third specified person, and on the west by the lands of the grantor, was held too indefinite to pass title. n606

COMPUTER-ASSISTED RESEARCH

LEXIS: Description w/10 (land or real) and abuttal!

§ 90.02(d)(8) Weighing the Importance of Different Modes of Description.

The calls of a land description may be either natural or artificial and are further divided into descriptive (or directive) calls and special locative calls. The special locative calls are more precise and particular and thus prevail over the descriptive calls in case of conflict. n607 However, whether one mode of description prevails over another also depends on the accuracy of each call. A clear and definite description by boundary will prevail over any additional but inconsistent and inaccurate description by occupancy. n608 In a deed containing two descriptions, the more certain one governs. n609 A mistake made in one version of the description discredits that part of the description, so that another part of the description, ordinarily not so important, becomes controlling. For instance, a description by occupancy is ordinarily a minor and unimportant form of description; but this form of description may through inaccuracy or ambiguity in a more important form of description, or from failure to employ a more important form, become an essential part of the description and control the rest of it. A specific reference to the land of another person for a boundary controls a general reference to the boundary as land formerly conveyed to the grantor by a person named.

If the deed contains two descriptions, one of which describes the land with reasonable certainty, and the other giving some additional particular is incorrect, the incorrect particular or circumstance of description will be rejected as surplusage. n610 If the parties go upon the land and make a physical survey, giving a boundary that is actually run and marked, intending to convey the land surveyed, such land will pass as between the parties, even though a different and erroneous description appears in the deed. n611

§ 90.02(e) Defective Descriptions.

§ 90.02(e)(1) Conflicting Descriptions.

If the deed description is erroneous, that which is intended to be conveyed, rather than that which is described, is conveyed. n612 Also, a subsequent erroneous addition to the description will not be permitted to limit or impair what has been described with certainty in the deed. n613 If land is described by two equally explicit and unambiguous descriptions, that description controls which best expresses the intentions of the parties, and was manifested by the entire instrument. n614 If a deed contains two descriptions, one general and the other particular, the particular will prevail in case of any conflict or inconsistency between the descriptions. n615 Where a general description is followed by a more particular description, the latter controls, unless other provisions of the instrument and the surrounding circumstances clearly indicate a different intention. n616

If an accurate description is followed by an inaccurate description, the inaccurate description is merely cumulative and will be disregarded. n617 If land is sufficiently described for the purpose of identification after eliminating an incorrect part of the description, the deed is read as if such description were eliminated and effect is given to the remaining part of the description. n618 If the land is described by a name which is applicable to the entire parcel intended to be conveyed, a subsequent description, which appears to be merely a second description, and in fact covers only a part of the land first

described, does not affect the general description, and will be rejected. n619 However, if the further descriptive phrase restricts or qualifies the general terms of the description, effect must be given to the words of restriction or qualification. n620 Where a description applicable to land to which the grantor had title is followed by a description of land to which the grantor had no title, the former will be taken as the true description and the latter will be rejected. n621

An erroneous statement of a monument does not invalidate a deed when the remaining description is sufficiently certain to locate the land. n622 When, by omitting one part of a description which is false or impossible, a perfect description remains, the false part should be rejected and the deed held as effectual to carry out the intention of the parties. n623

An incorrect description will not be allowed to invalidate the deed n624 and thus defeat the parties' manifest intentions, n625 provided the deed contains in addition a description which will permit the parties' intentions to be given effect; n626 the incorrect description will be treated as surplusage n627 and will be disregarded. n628 With the incorrect part disregarded, the deed is read as if such description were eliminated and effect is given only to the remaining part of the description. n629 A call for a wrong county when the record is in the right county, when the description is otherwise certain, is sufficient. n630 Where there is inconsistency between different parts of the description, the part which exhibits the greatest certainty or best expresses the intention of the parties will prevail. n631

To justify the suppression of a part of a description, this must not only be out of harmony with the other parts of the description, but it must be undeniably so, in some important respect, after putting a reasonable construction upon the rest of the description. Words of general description will not always prevail over an enumeration of particulars, because, in cases where there is an enumeration of particulars which on their face purport to be designed as qualifications or restrictions of a preceding general description, the general description must yield to the particular description. n632

Where a description commenced on the "westerly" line of a designated street, but a consideration of the remainder of the description disclosed that "westerly" should be read "easterly," the court property so treated the description. n633 Where a general description is followed by a more particular description, the latter controls, unless other provisions of the instrument and the surrounding circumstances clearly indicate a different intention. n634

Traditionally it has been held that first calls prevail over later conflicting calls in deeds. n635 Accordingly, a rule of construction developed that the first description in a deed is presumed to express the true intention of the parties. n636 However, "a specific description, whether it comes before or after a general designation, must prevail, upon the underlying principle that the law will always demand the production of the highest evidence, and, as between two descriptions, will prefer that which is most certain." n637 Thus, there is in fact no rule that, if clauses in a description of land are repugnant, the first necessarily prevails over the last. n638

Where property is sufficiently described as a whole, the description is not invalidated or restricted by a further general reference or statement which is inconsistent with the description as a whole. Thus, a description of property as the grantor's farm or homestead on which he resides, or on which some other person lives, is sufficient to pass the farm or homestead so occupied, although some particular circumstance be added which is inconsistent with such description, as for instance a reference for boundaries to a deed which embraced only a part of the farm or homestead; n639 or a statement of quantity which is much less that the whole farm; n640 or even a particular description by courses and distances which does not include the whole farm. n641

Where a description is sufficient within itself, any additional indefinite term will be rejected as surplusage. n642 Where one made a deed of land situate in a town named, and containing 230 acres, more or less, being "all the lands which I own in said town, the butts and bounds to be found in the county records," and an examination of the records shown that the grantor owned by purchase 235 acres of land in that town, but it appearing that he had acquired title to possession to another tract of about 50 acres, it was held that the latter tract as well as those of which he had record title passed by his deed. n643 A grant of all the grantor's real estate situation in a town named conveys all the grantor's land there situated. n644 Likewise, a particular description by metes and bounds prevails over a general description of the lands as being

"all" of a certain tract, even though the particular description does not cover all the lands in the tract named. n645 A sufficient general description will not be limited by a subsequent particular description, unless an intention definitely appears from the terms of the particular description to limit the general description. n646

Where a general description is followed by a more particular description, the latter controls, unless other provisions of the instrument and the surrounding circumstances clearly indicate a different intention. n647 Several lots were described by numbers, with the further description, "being all of block 25" The lots so numbered were not in that block, but in another. It appearing to be the grantor's intention to convey the block in which he resided, and that he resided in the block passed by the deed, it was accordingly held that that block passed by the deed. n648 Thus, where a lot was described as bounding on a street named, and the remainder of the description was by metes and bounds, but this further description was added, "intending to include only the land on which said buildings are situated, and the yard inclosed within the fence now built," it was held that the latter description was incorrect because it would leave a narrow strip of land between the fence and the street, and it could not have been the intention of the parties to do this. n649

In determining the intention of the parties to a deed as to the boundaries, the actual condition and situation of the land, ways, and other local objects must be considered. n650 Where one of two descriptions in a deed is consistent with a reasonable hypothesis and the evident intention of the parties, and the other renders the instrument absolutely inoperative, the false or incorrect call will be rejected, and the description applied in light of fact existing at the time. n651 A general description controls when the particular description is uncertain or impossible. n652 Parts of the particular description found to be in harmony with the general description may be used in defining the limits of the grant. n653

LEXIS: Description w/10 (land or real) and conflict!

§ 90.02(e)(2) Correcting Descriptions.

A description is considered certain if it can be rendered certain. n654 Mistakes in deed descriptions may arise from human or instrument error, n655 and such mistakes may be corrected if no injustice will be done. n656 The mistake, however, must be a material one, n657 and it must be corrected before rights have been acquired by presumption. n658 Thus, where a division fence between lands of adjoining owners had been standing more than twenty-one years, it constitutes the boundary line between them, although it is crooked and the deeds of both parties call for a straight line between acknowledged landmarks. n659 Where the grantee under a defective description takes possession of the land actually intended to be conveyed, a court of equity may, as against the grantor, correct the description. n660

A deed cannot be reformed for mutual mistake where rights of bona fide purchasers for value have intervened. n661 The parol evidence rule is not applicable to actions for reform of instruments where the reason for the action is mutual mistake. n662

COMPUTER-ASSISTED RESEARCH

LEXIS: Description w/10 (land or real) and correct!

§ 90.02(e)(3) Acts of Parties to Cure Defective Descriptions.

A description which does not in itself identify the land may be cured by the acts of the parties. n663 Thus, where a grantor conveyed 300 acres out of a much larger tract, directing that it be laid off in a convenient form, and the grantee entered into possession of that quantity of land out of the larger tract, and continued in possession for many years, and then conveyed the land so occupied by metes and bounds, the last grantee cannot object that the deed to his grantor was

void because it did not sufficiently identify the land. n664 The parties' treatment of the description in the deed must be treated as a weighty circumstance in ascertaining their intention, where the words used in the description do not definitely identify the land. n665

An ambiguous description may be cured by the parties' practical construction thereof. n666 A conveyance of a certain number of acres of land to be selected out of a larger tract by the grantee is not void for uncertainty, n667 but no title to any specific land passes until the selection is made; and, if the selection be not made within twenty years, the grantee's right is barred. n668 If the parties to a deed which does not describe the property with certainty, either before or after the date of the same, mark out or identify and appropriate certain land as the exact and identical parcel conveyed or to be conveyed by such deed, it will be held to be effective to convey such land. Their declarations and acts at the time of the conveyance may be proved to determine the intent of the parties. n669 Thus, where a grantor conveys a wharf property by clear and definite description, and then adds to the description the following, words, "Also one-half of an acre of land near the wharf, or at the wharf," the deed will be regarded as effective to convey a particular half-acre near the wharf which the parties to the deed, near the time of its execution, surveyed or otherwise marked out and appropriated. n670 However, a description in a deed cannot be contradicted by the declarations of the grantor, made at the time of the deed, that it erroneously embraced a certain strip of land. n671

The practical construction to be given to a doubtful description by the subsequent acts of the parties may be proved by parol evidence; n672 but a description that is clear and unambiguous cannot be set aside and a different one substituted in its place by parol proof of the acts of the parties, either before or after the execution of the deed. n673 On the other hand, if it appears that certain land was not claimed by the grantee as being embraced in the grant, that the grantee then conveyed all the land definitely granted, but did not attempt to convey the land in question, and that the grantor, the commonwealth of Massachusetts, did subsequently authorize a location on such land, these contemporaneous and subsequent acts of the parties are sufficient evidence that such land was not included in the grant. n674 Where a grantee establishes a right to the recovery of a certain number of acres of land that had been conveyed to the grantors with the right to select the tract from a larger tract, the grantee will be confined to the land occupied and claimed by the grantors. n675

The doctrine of estoppel does not extend to mere descriptive matter or statements or recitals that are immaterial and not contractual or essential to the purpose of the instrument. n676 An immaterial recital does not estop the parties from denying its truth. Thus, in the description of lands excepted from a conveyance, a recital that such lands had been conveyed to another does not estop the grantor, nor anyone to whom the grantor may convey the excepted lands, from alleging that no such conveyance had in fact occurred. n677 This is on the ground that a recital is conclusive of the facts stated, only in an action of which the deed itself is the foundation or defense. n678 Descriptive language cannot be inserted after the deed is executed. n679

LEXIS: Description w/10 (land or real) and defect! w/20 cur!

§ 90.02(e)(4) Judicial Acts in Correcting Descriptions.

Absent statutory command to the contrary, the settlement of boundary disputes is a matter of law rather than equity in those jurisdictions and cases where the distinction is material. n680 Equity may be invoked in appropriate cases, especially if the legal remedy is inadequate. n681 Equity has no place unless the parties are adjoining landowners n682 or one of the parties has no equity against the party in possession. n683 In some states actions of this type are statutory. n684

As a general rule what constitutes boundaries are questions of law, n685 and where the boundaries are actually located on the ground are questions of fact. n686 If the description in a deed is clear and unambiguous, the terms used are to be

construed by the court; n687 but if the terms themselves are unambiguous, or their presumptive meaning is rebutted by other evidence, the question of the deed's meaning may be for the jury in some jurisdictions. n688 Even though the construction of a deed is for the court, whether certain land is within the description in a deed may be a question of fact for the jury, n689 or reserved. n690 However, if the facts are not in dispute and the only question involved is the correct application of well-known principles of law to the facts, the location of a boundary is a question of law for the court. n691 Whether a latent ambiguity in the description renders the deed void, if the land can be identified by extrinsic evidence has been held to be a mixed question of law and fact. n692

Where there is no want of certainty or definiteness in the clauses of a survey as disclosed by the deed, their meaning must be determined by the court. n693 Where a government corner between adjoining landowners has been obliterated, the exact location of the corner may be determined by the jury from the evidence. n694 Where the monuments called for by a survey have disappeared, but there is evidence of their existence and location, it is a question for the jury whether the line was indicated by monuments. n695

Where the true location of a government corner is in doubt, evidence is admissible to show where the original marks of such corner were years before, when they were very plain and distinct, and were generally regarded and recognized as indicating the original government corner; and to that end it may be shown that permanent improvements, such as lines of trees, roads, public and private improvements, were, when such indications were plain and visible, located with reference thereto as the true government corner by persons who had no other interest than to locate them correctly. n696

A court of law can correct a description only by way of a construction of the language used, and with a view to carry out the manifest intention of the grantor. One part of a description cannot be rejected merely because it is inconsistent with another part. If the ambiguity is patent, the deed is void; but if from the whole deed it appears that the intention of the grantor can evidently be carried out by the rejection of a repugnant clause or word, this can be done by construction in a court acting as a court of law; otherwise, the parties must seek a remedy of equity, by which alone a deed can be reformed. n697 If an ambiguity in the description is patent and thus incapable of being removed by extrinsic evidence, a suit in equity to reform the deed is the proper remedy. n698 Where a deed as written was meaningless, but the through the correction of an error, a reasonable layout of the land was obtained, the court was held justified in treating the error as a clerical error. n699

A mistake in naming the owner of the land, when the real owner actually conveys it, is immaterial. Thus, a deed by a married woman, properly describing land which she had inherited from her father, is not invalidated by her describing it as land which her husband had inherited from her father. n700 If a grantor through mistake makes a deed of gift for more land than was intended, the deed may be reformed, even though the grantee was unaware of the execution and delivery of the deed. n701

LEXIS: Description w/10 (land or real) and correct! w/10 (court or judicia!)

FOOTNOTES:
(n1)Footnote 1. *Lee v. Wal-Mart Stores, Inc., 34 F.3d 285 (5th. Cir. 1994)* (insofar as the description of the property to be conveyed is concerned, the writing must furnish within itself the means or data by which that particular land may be identified with reasonable certainty); *Howard v. Rivers, 465 S.E.2d 666 (Ga. 1996)* (description of easement is sufficient if it provides key so that land where easement is located can be identified); *Atlanta v. Atlanta Trailer City Trailer Park, Inc., 102 S.E.2d 23 (Ga. 1958); Haney v. Molko, 844 P.2d 1382 (Idaho App. 1992)* (a deed is void when it does not provide an adequate description to identify the land it purports to convey, using means either directly from its language or by something extrinsic to which it refers); *Hoelscher v. Simmerock, 921 S.W.2d 676 (Mo. App. 1996)* (in general, any description in conveyance of interest in real property is sufficient if it affords means of identifying property); *Eland Energy, Inc. v. Rowden Oil & Gas, Inc., 914 S.W.2d 179 (Tex. App. 1995)* (for description of land in

contract to comply with statute of frauds, writing must furnish within itself, or by reference to some other existing writing, means or data by which land to be assigned may be identified with reasonable certainty); *Warner Communications, Inc. v. Keller, 888 S.W.2d 586 (Tex. App. 1994)* (generally, any description is sufficient by which the identity of the premises can be established, or which furnishes the means of identification); *Skinner v. Francisco, 88 N.E.2d 867 (Ill. 1949); State v. Rosenquist, 51 N.W.2d 767 (N.D. 1952)* (description is adequate if it can be made certain by extraneous evidence of physical conditions referred to in the deed).

(n2)Footnote 2. *Mull v. Mickey's Lumber & Supply Co., Inc., 461 S.E.2d 270 (Ga. App. 1995)* (to be valid, real property description in deed must identify land, or must contain key by use of which description may be applied by extrinsic evidence); *Harry Bourg Corp. v. Punch, 653 So. 2d 1322 (La. App. 1995)* (one must be able to identify and locate the property from description in deed itself or from other evidence which appears in public records); *O'Brien v. Alcus Lands Partnership Trust, 577 So. 2d 1094 (La. App. 1991)* (one must be able to identify and locate property from description in deed itself or from other evidence appearing in public records); *Quarles v. Arcega, 841 P.2d 550 (N.M. App. 1992)* (but where the description in the deed, aided by extrinsic evidence, is insufficient to identify the property, the deed cannot serve as color of title); *Deaver v. Jones, 19 S.E. 637 (N.C. 1894); Cathey v. Buchanan Lbr. Co., 66 S.E. 580 (N.C. 1909); Masterson v. Todd, 24 S.W. 682 (Tex. App. 1894); Dixon v. Bremerton, 171 P.2d 243 (Wash. 1946)* (reasonable certainty alone is required by deed); *Jones v. Mabry, 225 S.W.2d 561 (Tenn. App. 1949); Broaddus v. Grout, 258 S.W.2d 308 (Tex. 1953); Highway Properties v. Dollar Sav. Bank, 431 S.E.2d 95 (W. Va. 1993)* (deed granting to railroad land for its right-of-way must contain on its face description of land in itself certain so as to be identified or, if not in itself so certain, must give such description as, with aid of evidence outside deed and not contradicting it, will identify and locate land; otherwise, deed is void for uncertainty).

(n3)Footnote 3. *Farmer v. Batts, 83 N.C. 387 (1894). See McGlawhorn v. Worthington, 3 S.E. 633 (N.C. 1887); Edwards v. Bowden, 5 S.E. 283 (N.C. 1888).*

(n4)Footnote 4. *Bissette v. Strickland, 131 S.E. 655 (N.C. 1926); Powers v. Rawles, 112 S.E. 78 (S.C. 1922).*

(n5)Footnote 5. *Kyle v. Jordan, 65 So. 522 (Ala 1914); Robinson v. Allison, 19 So. 837 (Ala. 1896); Gould v. Gould 21 S.E.2d 64 (Ga. 1942); Smith v. Federal Land Bank, 181 S.E. 149 (Ga. 1935); Swint v. Swint, 94 S.E. 571 (Ga. 1917); Davis v. Harden, 84 S.E. 426 (Ga. 1915); Andrews v. Murphy, 12 Ga. 431 (1853); Collins v. Dressler, 32 N.E. 883 (Ind. 1892); Lingeman v. Shirk 43 N.E. 33 (Ind. App. 1896); De Long v. Starkey, 92 N.E.2d 228 (Ind. App. 1950); Stack v. Commercial Towel & Uniform Service, 91 N.E.2d 790 (Ind. App. 1950); Crawford v. Crawford, 271 P.2d 240 (Kan. 1954); Cupples v. Harris 11 So. 2d 609 (La. 1942); Lewis v. Kinnaird, 65 A. 365 (Md. 1906); Armijo v. New Mexico Town Co., 5 P. 709 (N.M. 1885); Cherry v. Roanoke Tobacco Warehouse Co., 75 S.E.2d 124 (N.C. 1953); Norwood v. Totten, 82 S.E. 951 (N.C. 1914); Bachelor v. Norris, 82 S.E. 839 (N.C. 1914); Hinton v. Moore 51 S.E. 787 (N.C. 1905); Euliss v. McAdams, 13 S.E. 162 (N.C. 1891); Allen v. Sallinger, 12 S.E. 986 (N.C. 1891); Felty v. Calhoun, 21 A. 19 (Pa. 1891); Peart v. Brice, 25 A. 537 (Pa. 1893); Chaney v. Maupin 153 S.W.2d 187 (Tex. App. 1941); McElroy v. Danciger, 241 S.W. 1098 (Tex. App. 1922); Diffie v. White 184 S.W. 1065 (Tex. App. 1916); Gresham v. Chambers 16 S.W. 326 (Tex. 1891); Smith v. Bailey 127 S.E. 89 (Va. 1925); Pilkerton v. Roberson 65 S.E. 835 (Va. 1909); Sulphur Mines Co. v. Thompson 25 S.E. 232 (Va. 1896); Barth v. Barth, 143 P.2d 542 (Wash. 1943); Goff v. Goff 89 S.E. 9 (W. Va. 1916);* "All real estate in my name" was a sufficient description to permit parol identification. *Thorn v. Phares, 14 S.E. 399 (W. Va. 1891). Lavendar v. Ball 100 So. 2d 331 (Ala. 1958).* Description is sufficient if it can be identified by extrinsic evidence admissible under evidence rules, *Magnolia Petroleum Co. v. Marks, 74 So. 2d 36 (La. 1984);* provided it refers to one and only one tract, *Skinner v. Noland, 277 S.W.2d 812 (Tex. App. 1955).*

(n6)Footnote 6. *Dimond v. Kelly, 629 P.2d 533 (Alaska 1981)* (the purpose of a deed description is not to identify the land, but to furnish the means of identification); *Sanders v. Baker 231 S.W.2d 106 (Ark. 1950); Anderson-Cottonwood Irr. Dist. v. Zinzer, 125 P.2d 106 (Cal. App. 1942); Gould v. Gould 21 S.E.2d 64 (Ga. 1942); Haney v. Molko, 844 P.2d 1382 (Idaho App. 1992)* (the purpose of a deed description is not to identify the land, but to furnish the means of identification); *Taylor v. Taylor, 93 N.E. 9 (Ind. 1910); Burrow v. Terre Haute & L. R.R., 8 N.E.*

167 (Ind. 1886); Rucker v. Steelman, 73 Ind. 396 (1881); Gilbert v. Lusk, 106 N.E.2d 404 (Ind. App. 1952); Koons v. Burkhart, 119 N.E. 820 (Ind. App. 1918); Daigle v. Calcasieu Nat'l Bank, 9 So. 2d 394 (La. 1942); North Mankato v. Carlstrom, 2 N.W.2d 130 (Minn. 1942); Mitchell v. Nicholson, 3 N.W.2d 83 (N. D. 1942); Wyatt v. McGregor, 855 S.W.2d 5 (Tex. App. 1993) (the purpose of the deed description is to furnish the means of identification of the land, not to identify the land); *Mitchell v. Robinson, 136 S.W. 501 (Tex. App. 1911); Meadow River Lbr. Co. v. Smith, 30 S.E.2d 392 (W. Va. 1944); Holley v. Curry, 51 S.E. 135 (W. Va. 1905); Thorn v. Phares, 14 S.E. 399 (W. Va. 1891). Gullett v. Burton, 345 S.E.2d 323 (W. Va. 1986)* (main object of description of land sold or conveyed, in deed of conveyance or in contract of sale, is not in and of itself to identify land sold, but rather to furnish means of identification, and when this is done it is sufficient). A description or designation in itself may be deemed sufficient on its being made to appear by proper allegations and proof that at the place indicated the vendor owned premises answering its terms and owned at that place no other such property. *Beverage v. Canton Placer Min. Co., 278 P.2d 694 (Cal. 1955).* A description is considered sufficiently certain which can be made certain. A description in a deed will be deemed sufficient if a person of ordinary prudence, acting in good faith and making inquiries suggested by the description given in such deed, would be enabled to identify the property. *Ford v. Ford, 124 N.W. 1108 (S. Dak. 1910).*

(n7)Footnote 7. *Yaist v. U.S., 17 Cl. Ct. 246 (Cl. Ct. 1989)* (although the location of land conveyed through a deed is typically determined by the deed description, the interpretation of a written instrument is a question of law, which is to be determined by the court). *Parkman v. Ludlum, 69 So. 2d 434 (Ala. 1953).*

(n8)Footnote 8. *Bryant v. Chicago Mill & Lbr. Co., 120 F. Supp. 463 (E.D. Ark. 1854); Mullinax v. Galen-Marshall, Inc., 642 So. 2d 431 (Ala. 1994)* (the instrument must at least furnish the means of identification or key to the identification, the applicable principle being that that is certain which can be made certain); *Alabama Processing Co., Inc. v. Utilities Bd. of Town of Citronelle, 527 So. 2d 690 (Ala. 1988)* (the test for sufficiency is, "does the writing furnish the means of identification, or provide the key to the identification," the applicable principle being that that is certain which can be made certain); *Sanders v. Gaker, 231 S.W.2d 106 (Ark. 1950); Brasher v. Tanner, 353 S.E.2d 478 (Ga. 1987)* (those descriptions are valid which, while not sufficient to independently identify the land, provide a key which will unlock the mystery to the location of the real estate conveyed); *Gainsville Midland R.R. v. Tyner, 50 S.E.2d 108 (Ga. 1948); Rogers v. Manning, 48 S.E.2d 527 (Ga. 1948); Gilbert v. Lusk, 106 N.E.2d 404 (Ind. App. 1952); Rodgers v. Baughman, 342 N.W.2d 801 (Iowa 1983)* (the land must be so described that it can be identified with reasonable certainty; the writing must disclose a description which is itself definite and certain or it must furnish the means or key by which the description may be made certain and identified with its location on the ground).

(n9)Footnote 9. *Tolle v. Curley, 251 S.W. 377 (Ark. 1923); Mull v. Mickey's Lumber & Supply Co., Inc., 461 S.E.2d 270 (Ga. App. 1995)* (test for sufficiency of description in materialman's lien document is whether description makes possible identification of real property described); *State ex rel. Taraloca Land Co. v. Fawley, 639 N.E.2d 98 (Ohio 1994)* (in every voluntary instrument used to transfer a part of land conveyed by a certificate of title, an accurate description of such part enabling it to be definitely located and platted shall be given); *Harlan v. Vetter, 732 S.W.2d 390 (Tex. App. 1987)* (if the instrument containing the reference has enough information to enable one, by pursuing an inquiry based upon the information contained therein, to identify the particular property to the exclusion of all others, the reference and description are sufficient). *Contrast Fuller v. Mountain Sculpture, Inc., 314 P.2d 842 (Utah 1957)* (holding a description valid if a reasonably intelligent person could locate it on the ground) with *Robinson v. Laffon, 311 P.2d 768 (Mont. 1957)* (defaulting a mining claim for insufficiency of description in posted and recorded notices).

(n10)Footnote 10. *Westside Galvanizing Services, Inc. v. Georgia-Pacific Corp., 724 F. Supp. 644 (W.D. Ark. 1989)* (the established test in Arkansas is that the property description be sufficient to enable any one familiar with the locality to identify the premises intended to be described with reasonable certainty, to the exclusion of others); *In re Koski, 149 B.R. 170 (Bankr. D. Idaho 1992)* (so long as the description contains information sufficient to enable a party familiar with the locality to identify the premises intended to be described with reasonable certainty, to the exclusion of others, the description is sufficient); *McCarron's Bldg. Center, Inc. v. Einertson, 482 N.W.2d 529 (Minn. App.1992)* (if there appears enough in the description to enable a party familiar with the locality to identify the premises intended to be described with reasonable certainty, to the exclusion of other premises, it will be sufficient); *Breckenridge Material*

Co. v. Byrnesville Const. Co., Inc., 842 S.W.2d 551 (Mo. App. 1992) (description of property need not be letter perfect; rather, when rights of third parties are not involved, description need only be sufficient to enable one familiar with locality to identify the premises intended to be covered by lien); *Allied Pools, Inc. v. Sowash, 735 S.W.2d 421 (Mo. App. 1987)* (the description is sufficient where enough appears in the statement to enable one familiar with the locality to identify the intended premises); *Brown v. Hurley, 90 S.E.2d 324 (N.C. 1955); Easterling v. Simmons, 293 S.W. 690 (Tex. App. 1927).*

(n11)Footnote 11. *City of Birmingham v. Smith, 507 So. 2d 1312 (Ala. 1987)* (an ambiguity in the property description will not void the description if a surveyor can locate the property on the ground); *Thompson v. Southern Cal. Motor Road Co., 23 P. 130 (Cal. 1890); Wagnor v. Blume 161 P.2d 1001 (Cal. App.1945); Howard v. Howard, 226 P. 984 (Cal. App. 1924); Kester v. Bostwick, 15 So. 2d 208 (Fla. 1943); Bank of South Jacksonville v. Cammar, 103 So. 827 (Fla. 1925); Ansley v. Graham, 74 So. 505 (Fla. 1917); Walker v. Lee, 40 So. 881 (Fla. 1906); Campbell v. Carruth, 13 So. 432 (Fla. 1893); O'Berry v. Gray, 510 So. 2d 1135 (Fla. App. 1987)* (a land description is legally sufficient if it will enable a surveyor to ascertain, identify, and locate the land intended to be described); *Farrell v. Brown, 729 P.2d 1090 (Idaho App. 1986)* (a description is sufficient if from the description given a competent surveyor can locate the land on the ground with or without the aid of extrinsic evidence); *Brunotte v. DeWitt, 196 N.E. 489 (Ill. 1935); Brenneman v. Dillon, 129 N.E. 564 (Ill. 1920); Kane v. McDermott, 547 N.E.2d 708 (Ill. App. 1989)* (description of property is sufficiently definite if it will enable a surveyor, by aid of extrinsic evidence, to locate the property); *Reid v. Mitchell, 95 Ind. 397 (1884); Pennington v. Flock, 93 Ind. 378 (1884); Meikel v. Greene, 94 Ind. 344 (1883); Brown v. Anderson, 90 Ind. 93 (1883); Guy v. Barnes, 29 Ind. 103 (1867); Drake v. City of Fort Wayne, 543 N.E.2d 1145 (Ind. App. 1989)* (legal description of annexed territory contained in annexation ordinance was sufficient, where qualified land surveyor testified that he could identify territory covered solely by reference to ordinance and to recorded documents referred to therein); *Downing v. Thompson, 92 S.W. 290 (Ky. 1906); Goodbar v. Dunn, 61 Miss. 618 (1884); Podlesak v. Wesley, 849 S.W.2d 728 (Mo. App. 1993)* (otherwise put, a description of a particular parcel is sufficient if a competent surveyor can locate the land on the ground); *First Sec. Bank, Underwood, N.D. v. Enyart, 439 N.W.2d 801 (N.D. 1989)* (a liberal rule of construction will be applied, and if a surveyor with the deed can, with the aid of extrinsic evidence if necessary, locate the land and establish its boundaries, the description therein is sufficient); *Throckmorton v. Moon, 10 Ohio 42 (1840); Hardy v. California Trojan Powder Co., 219 P. 197 (Or. 1925); Reeder v. Reeder, 135 P. 176, 137 P. 191 (Or. 1913); Brogard v. Barhan, 96 P. 673,* (Or. 1908); *Marks v. Ligionier Borough, 82 A. 477 (Pa. 1912); Aquila Southwest Pipeline Corp. v. Gupton, 886 S.W.2d 497 (Tex. App. 1994)* (description of property in petition for condemnation is sufficient for purposes of trial court's jurisdiction over subject matter in condemnation proceeding if it is such that surveyor, or other person skilled in such matters, could take such description and definitely locate same on ground); *Harris v. Iglehart, 113 S.W. 170 (Tex. App. 1908).*

(n12)Footnote 12. *Copeland v. Carpenter, 59 S.E.2d 245 (Ga. 1950); White v. Spahr, 59 S.E.2d 916 (Ga. 1907); Mull v. Mickey's Lumber & Supply Co., Inc., 461 S.E.2d 270 (Ga. App. 1995)* (to be valid, a real property description in deed, contract for sale of land, or materialman's lien document must identify the land, or must contain the key by use of which a description may be applied by extrinsic evidence); *Hayes v. O'Brien, 37 N.E. 73 (Ill. 1894); De Long v. Starkey, 92 N.E.2d 228 (Ind. App. 1950); McRoberts v. McArthur, 64 N.W. 903 (Minn. 1895); Podlesak v. Wesley, 849 S.W.2d 728 (Mo. App. 1993)* (the conclusion that no one could locate the real estate based on the description alone is not solely determinative here; however, it is not required that a deed contain a sufficient description so that, based on it alone, the property can be located; extrinsic facts pointed out in the description may be resorted to in order to ascertain the land conveyed, and the property may be identified by extrinsic evidence); *Connell v. Galligher, 55 N.W. 229 (Neb. 1893); Foreman v. Sholl, 439 S.E.2d 169 (N.C. App. 1994)* (a description, though indefinite, is sufficient if court can, with the aid of extrinsic evidence which does not add to, enlarge, or in any way change the description, fit it to the property conveyed by the deed); *Flanagan v. Prudhomme, 644 A.2d 51 (N.H. 1994)* (extrinsic evidence of parties' intentions and circumstances surrounding conveyance may be used to clarify terms of ambiguous deed; deed is patently ambiguous, and extrinsic evidence can be used to clarify its terms, when language in deed does not provide sufficient information to adequately describe conveyance without reference to extrinsic evidence); *Wall v. Carrell 894 S.W.2d 788 (Tex. App. 1994)* (extrinsic evidence is admissible to identify land from sources other than the deed itself); *Wyatt v. McGregor, 855*

S.W.2d 5 (Tex. App. 1993) (a deed is not void for uncertainty unless the description cannot be made to apply to any definite piece of land even with the aid of extrinsic evidence).

(n13)Footnote 13. *Mull v. Mickey's Lumber & Supply Co., Inc., 461 S.E.2d 270 (Ga. App. 1995)* (if descriptive words, when aided by extrinsic evidence, fail to locate and identify a certain tract of land, the description fails and the instrument is void); *Hoelscher v. Simmerock, 921 S.W.2d 676 (Mo. App. 1996)* (a description of interest in real property is sufficient unless, after resorting to oral proof or after relying upon other extrinsic or external proof or evidence, that which was intended by instrument remains a mere matter of conjecture); *Haith v. Roper, 88 S.E.2d 142 (N.C. 1955); Wiggins v. Short, 469 S.E.2d 571 (N.C. App. 1996)* (an easement is void when there is such an uncertainty appearing on the face of the instrument itself that the court -- reading the language in the light of all the facts and circumstances referred to in the instrument -- is yet unable to derive therefrom the intention of the parties as to what land was to be conveyed); *Sanderson v. Sanderson, 82 S.W.2d 1008 (Tex. App. 1935).*

(n14)Footnote 14. *Brunotte v. DeWitt, 196 N.E. 489 (Ill. 1935)* (any description in a deed is sufficient if it contains a means of identification); *Crawford v. Crawford, 271 P.2d 240 (Kan. 1954); Smith v. Wedgewood Builders Corp., 590 A.2d 186 (N.H. 1991)* (a deed generally will be held sufficiently definite if it is possible by any reasonable rules of construction to ascertain from the description, aided by extrinsic evidence, what property is intended to be conveyed); *Hill v. U.S. Life Title Ins. Co. of New York, 731 S.W.2d 910 (Tenn. App. 1986); In re Gatlinburg Motel Enterprises, Ltd., 119 B.R. 955 (Bankr. E.D. Tenn. 1990)* (it is said to be a broad general principle that a deed will not be declared void for uncertainty in a description if it is possible by any reasonable rules of construction to ascertain from the description, aided by extrinsic evidence, what property is intended to be conveyed); *Meyer v. Kesterson, 1997 WL 749478 (Or. App. 1997)* (description of land in contract is sufficient if surveyor is able to ascertain by extrinsic evidence what property was intended to be conveyed).

(n15)Footnote 15. *Brasher v. Tanner, 353 S.E.2d 478 (Ga. 1987)* (if a party attacking a deed can show a recited boundary does not exist or that the point of beginning of a courses and distances description does not exist, the deed fails unless it is saved by additional words in the description); *Stephenson v. Rowe, 338 S.E.2d 301 (N.C. 1986)* (the will furnished no means by which the twenty-five acres could be identified and set apart, nor did the will refer to anything extrinsic by which the twenty-five acres could be located; the will fixed no beginning point or boundary; it was too vague and indefinite to admit of parol evidence to support it); *Deaver v. Jones, 19 S.E. 637 (N.C. 1894); Archibald v. Davis, 50 N.C. 322 (1858); Mann v. Taylor, 49 N.C. 272 (1857); Foreman v. Sholl, 439 S.E.2d 169 (N.C. App. 1994)* (valid metes and bounds description must contain a certain starting point and the direction and length of each boundary line); *Town of Cary v. Franklin-Sloan V.F.W. Post 7383, 443 S.E.2d 791 (N.C. App. 1994)* (a drawing which does not have any ascertainable monuments, does not indicate the size of the tracts of land shown, does not indicate any courses and very few distances, and has no ascertainable beginning point is not a sufficient description); *Sullivan v. Fant, 160 S.W. 612 (Tex. App. 1914).*

(n16)Footnote 16. *Hanners v. Woodruff, 354 S.E.2d 826 (Ga. 1987)* (where the description in a land sale Contract specifies the exact quantity of the parcel to be conveyed, it is not void for lack of definiteness if the shape can be determined from the intention of parties and lines fixed mathematically so as to encompass the exact quantity conveyed); *Haney v. Molko, 844 P.2d 1382 (Idaho App. 1992)* (the description contained in the deed will be sufficient so long as the quantity, identity or boundaries of the property can be determined from the face of the instrument or by reference to extrinsic evidence); *Island Coal Co. v. Streitlemier, 37 N.E. 340 (Ind. 1894).*

(n17)Footnote 17. *Nolen v. Henry, 67 So. 500 (Ala. 1914); Bajrangi v. Magnethel Enterprises, Inc., 589 So. 2d 416 (Fla. App. 1991)* (the modern tendency is to allow a liberal interpretation of the description of land and to uphold the validity of such description if there is any way possible to arrive at the intention of the parties thereto); *Calton v. Lewis, 21 N.E. 475 (Ind. 1889); Hannon v. Hilliard, 101 Ind. 310 (1885); McDonald v. Jones, 852 P.2d 588 (Mont. 1993)* (when interpreting validity of deeds, a deed will be liberally construed to give it effect, rather than to render it a nullity); *Peterson v. Taylor, 735 P.2d 1120 (Mont. 1987)* (the general rule is that a deed will be liberally construed so as to give it effect, rather than to render it a nullity); *Gernt v. Floyd, 174 S.W. 267 (Tenn. 1915); Wyatt v. Mcgregor, 855 S.W.2d 5*

(Tex. App. 1993) (the high court held that courts should liberally construe a deed's descriptive words in order to uphold the conveyance); *Palomita, Inc. v. Medley, 747 S.W.2d 575 (Tex. App. 1988)* (the general requirement for a sufficient legal description of property is: the descriptive words in an instrument should be given a liberal construction, in order that the writing may be upheld); *Chambers v. Huggins, 709 S.W.2D 219 (Tex. App. 1985)* (grants in deeds are liberally construed); In re King County for Foreclosure of Liens for Delinquent Real Property Taxes for Years 1985 through 1988, *811 P.2d 945 (Wash.1991)* (to determine if a property description is sufficient, the description should be liberally construed).

(n18)Footnote 18. *George v. Bates, 20 S.E. 828 (Va. 1894); See* the following cases: *Ketchum v. Cook, 247 S.W.2d 1002 (Ark. 1952)* (description as "a part of" is void for indefiniteness); *Capps v. Holt, 58 N.C. 153 (1859); Munnink v. Jung, 22 S.W. 293 (Tex. App. 1893); Westfall v. Cottrills, 24 W. Va. 763 (1884).*

(n19)Footnote 19. *Chidester v. Newark, 58 F. Supp. 787 (D.N.J. 1945).*

(n20)Footnote 20. *Lee v. Wal-Mart Stores, Inc., 34 F.3d 285 (5th Cir. 1994)* (in order for writing to satisfy statute of frauds requirement that lease of real property for more than one year be in writing, there must be description of property to be conveyed sufficient that particular land may be identified with reasonable certainty); *Thompson v. Abbott, 229 S.W.2d 660 (Ark. 1950); Haney v. Molko, 844 P.2d 1382 (Idaho App. 1992)* (to be sufficient, a property description must designate the land intended to be conveyed with reasonable certainty); *McHale v. Treworgy, 90 N.E.2d 908 (Mass. 1950); Podlesak v. Wesley, 849 S.W.2d 728 (Mo. App.1993)* (no sale or conveyance of land for taxes shall be valid if the description is so imperfect as to fail to describe the land or lot with reasonable certainty); *Phoenix Mut. Life Ins. Co. v. Kingston Bank & Trust Co., 112 S.W.2d 381 (Tenn. 1938); Boyert v. Tauber, 834 S.W.2d 60 (Tex. 1992)* (insofar as the description of the property to be conveyed is concerned, the writing must furnish within itself the means or data by which that particular land may be identified with reasonable certainty); *Walchshauser v. Hyde, 890 S.W.2d 171 (Tex. App. 1994)* (an instrument conveying real estate is void under the statute of frauds unless the real estate's description is so definite and certain upon the face of the instrument itself, or in some other writing referred to, that the land can be identified with reasonable certainty); *Wallace v. McKinzie, 869 S.W.2d 592 (Tex. App. 1993)* (description of land must be so definite and certain upon face of conveying instrument itself, or in some other writing referred to, that land can be identified with reasonable certainty); *Wyatt v. McGregor, 855 S.W.2d 5 (Tex. App. 1993)* (the description in the writing memorializing the transfer of ownership must furnish within itself, or by reference to some other existing writing, the means or data by which that particular land may be identified with reasonable certainty); *Sovran Bank, N.A. v. Creative Industries, Inc., 425 S.E.2d 504 (Va. 1993)* (a deed conveying land must give such a description of the property intended to be conveyed as will be sufficient to identify it with reasonable certainty); *Meadow River Lbr. Co. v. Smith, 30 S.W.2d 392 (W. Va. 1944);* (when the location is made later, even by parol, the title is valid); *Schenk v. Evoy, 24 Cal. 104 (1864); Simpson v. Blaisdell, 27 A. 101 (Maine 1892).* A deed delivered without a written description has been held to be void, and not to be validated by the grantee's filling in the description later. *Boyd Lbr. Co. V. Mills, 92 S.E. 534 (Ga. 1917); Hulburt v. Walker, 179 N.E. 34 (N.Y. 1931).* A description in a deed of "100 acres more or less in the south side of lot No. 69" was void for indefiniteness. *Bennett v. Rewis, 96 S.E.2d 257 (Ga. 1957).* A description, "50 acres east and 50 acres west," of a stated house held void for indefiniteness as not indicating a shape. *Williams v. Manchester Bldg. Supply Co., 97 S.E.2d 129 (Ga. 1957).* A description so indefinite that no parcel is described cannot be aided by parol. *Harris v. Woodard, 41 S.E. 790 (N.C. 1902).* In *Turner v. Hunt, 116 S.W.2d 688 (Tex. 1938),* when a specific plot in the rear was conveyed, the deed also called for one acre along the road for a house site, the plot to be surveyed and set off later. The court held that the grantee received no fractional interest as tenant in common, but acquired a mere equitable interest which could be lost by abandonment or laches.

Va. 1905).*

(n27)Footnote 27. *Bryant v. Chicago Mill & Lbr. Co., 120 F. Supp. 463 (E.D. Ark. 1954); Aiken v. McMillan, 106 So. 150 (Ala. 1925); Lemon v. Tanner, 292 S.W. 668 (Ark. 1927); Howard v. Howard, 226 P. 984 (Cal. 1924); Thompson v. Southern California Motor Road Co., 23 P. 130 (Cal. 1890); Andrews v. Moss, 129 S.E. 62 (Ga. 1925); Haney v. Molko, 844 P.2d 1382 (Idaho App. 1992)* (while it is indisputable that deed must describe with reasonable certainty property it purports to convey, description contained in deed will be sufficient so long as quantity, identity, or boundaries of property can be determined from face of instrument or by reference to extrinsic evidence); *Patterson v. McClenathan, 129 N.E. 62 (Ill. 1920); Abercrombie v. Simmons, 81 P. 208 (Kan. 1905); Tircuit v. Burton-Swartz Cypress Co., 110 So. 489 (La. 1926); Brooks v. Hackney, 404 S.E.2d 854 (N.C. 1991)* (if the description is sufficiently definite for the court, with the aid of extrinsic evidence, to apply the description to the exact property intended to be sold, it is enough); *Foreman v. Sholl, 439 S.E.2d 169 (N.C. App. 1994)* (a description, though indefinite, is sufficient if court can, with aid of extrinsic evidence which does not add to, enlarge, or in any way change the description, fit it to the property conveyed by the deed); *Smith v. Wedgewood Builders Corp., 590 A.2d 186 (N.H. 1991)* (a deed generally will be held sufficiently definite if it is possible by any reasonable rules of construction to ascertain from the description, aided by extrinsic evidence, what property is intended to be conveyed); *Peart v. Brice, 25 A. 537 (Pa. 1893); In re Barnacle, 623 A.2d 445 (R.I. 1993)* (where the description used furnishes a key whereby a person, aided by extrinsic evidence, can ascertain what property is covered, such description is sufficient); *Battle v. Wolfe, 283 S.W. 1073 (Tex. App. 1926); Blair v. Rorer, 116 S.E. 767 (Va. 1923);* In re King County for Foreclosure of Liens for Delinquent Real Property Taxes for Years 1985 through 1988, *811 P.2d 945 (Wash. 1991)* (to determine if a property description is sufficient, the description should be liberally construed and extrinsic evidence may be consulted). Description is sufficient if it will enable a surveyor to locate the property. *Anderson v. Anderson-Tully Co., 196 F.2d 684 (5th Cir. 1952); Ken-Tex Exploration Co. v. Conner, 251 S.W.2d 280 (Ky. 1952); Gubser v. Town, 273 P.2d 430 (Or. 1954); Dixon v. Bremerton, 171 P.2d 243 (Wash. 1946).* Deed must furnish the key to identification. *Turner v. Boyd, 91 S.E.2d 502 (Ga. 1956); White v. Spahr, 59 S.E.2d 916 (Ga. 1950).*

(n28)Footnote 28. *Bajrangi v. Magnethel Enterprises, Inc., 589 So. 2d 416 (Fla. App. 1991)* (a patent ambiguity in a description could not be cured by parol evidence because to do so would be the insertion of new language into the instrument); *Ashauer v. Peer, 147 S.W.2d 144 (Mo. App. 1941); Brooks v. Hackney, 404 S.E.2d 854 (N.C.1991)* (parol evidence may not be introduced to remove a patent ambiguity since to do so would not be a use of such evidence to fit the description to the land but a use of such evidence to create a description by adding to the words of the instrument); *Foreman v. Sholl, 439 S.E.2d 169 (N.C. App. 1994)* (parol evidence may not be introduced to remove a patent ambiguity since to do so would not be a use of such evidence to fit the description to the land but a use of such evidence to create a description by adding to the words of the instrument); *Amerson v. Lancaster, 415 S.E.2d 93 (N.C. App. 1992)* (if description of property in conveying instrument is so vague and indefinite that court would have to insert new language into instrument in order to make instrument effective, ambiguity in deed is patent and parol evidence is inadmissible so that attempted reservation will be void for uncertainty); *Frizeen v. Swanton, 34 P.2d 939 (Or. 1934); Davis v. Kirby Lbr. Corp., 158 S.W.2d 888 (Tex. App. 1942).* Parol evidence was admitted to explain patent ambiguity in deed. *Sharpe v. Savannah River Lbr. Corp., 87 S.E.2d 398 (Ga. 1955),* similar as to latent ambiguity; *Richardson v. Register, 87 S.E.2d 40 (S.C. 1955); Gates v. Asher, 280 S.W.2d 247 (Tex. 1955).*

(n29)Footnote 29. *Brenneman v. Dillon, 129 N.E. 564 (Ill. 1920); Hamm v. Town of Medway, 644 A.2d 1388 (Me. 1994)* (the Town's reference to the assessor's tax maps by name was a legally sufficient description to withstand a facial attack); *Bell Hardware of Medford, Inc. v. Ed Szoyka Woodworking Co., 879 P.2d 208 (Or. App. 1994)* (real property

shall be described for recordation by giving the subdivision according to the United States survey, or by lots, blocks or by giving the boundaries thereof by metes and bounds, or in such other manner as to cause the description to be capable of being made certain); *Fairfax County Park Authority v. Atkisson, 445 S.E.2d 101 (Va. 1994)* (although partition decree which preserved portion of land for family cemetery did not contain metes and bounds description of cemetery, chancellor made factual finding that portion of cemetery was located on parcel). *But see Zelnik Realty, Inc. v. York, 566 N.Y.S.2d 752 (N.Y. App. Div. 1991)* (natural landmarks and artificial monuments take precedence over mere metes and bounds descriptions); *Dovin Const. Co., Inc. v. 7MDR of Queens, Inc., 566 N.Y.S.2d 994 (N.Y. Sup. Ct. 1991).*

(n30)Footnote 30. *Mullinax v. Galen-Marshall, Inc., 642 So. 2d 431 (Ala. 1994)* (the statute of frauds does not invalidate a contract merely because it contains a general uncertain description, where that description can be made specific and certain by parol evidence of concurrent facts and circumstances sufficient to that end); *Bajrangi v. Magnethel Entrp., 589 So. 2d 416 (Fla. App. 1991)* (where the description shows that a particular tract as distinguished from other lands is meant, then parol evidence can be resorted to to apply the description, or identify or locate the land, though the description be somewhat general); *Conyers v. West, 78 S.E.2d 422 (Ga. 1953); Long v. Martin, 234 S.W. 91 (Tex. App. 1921).*

(n31)Footnote 31. *In re Horton Vaults, Inc., 109 B.R. 356 (Bankr. E.D. Ark. 1989)* (the property must be described with sufficient definiteness to enable a party familiar with the locality to identify the premises with reasonable certainty, to the exclusion of others); *Rye v. Baumann, 329 S.W.2d 161 (Ark. 1959)* (if the descriptive words furnish a key for identifying the land there is a valid description); *Bajrangi v. Magnethel Enterprises, Inc., 589 So. 2d 416 (Fla. App. 1991)* (description is sufficient if reference to property in the deed is such that the court, by pursuing an inquiry based on the words of reference, is able to identify the particular property to the exclusion of all other property); *Jordan v. Boisvert, 632 So. 2d 254 (Fla. App. 1994)* (the modern view is to find the description sufficient if the reference to the property in the deed is such that the court is able to identify the particular property to the exclusion of all other property, by pursuing an inquiry based upon the words of reference); *In re Koski, 149 B.R. 170 (Bankr. D. Idaho 1992)* (so long as the description contains information sufficient to enable a party familiar with the locality to identify the premises intended to be described with reasonable certainty, to the exclusion of others, the description is sufficient); *McCarron's Bldg. Center, Inc. v. Einertson, 482 N.W.2d 529 (Minn. App. 1992)* (if there appears enough in the description to enable a party familiar with the locality to identify the premises intended to be described with reasonable certainty, to the exclusion of other premises, it will be sufficient); *First Sec. Bank, Underwood, N.D. v. Enyart, 439 N.W.2d 801 (N.D. 1989)* (in the context of a description in a deed, the description is sufficient if the reference to the property in the deed is such that the court, by pursuing an inquiry based upon the words of reference, is able to identify the particular property to the exclusion of all other property); *Harlan v. Vetter, 732 S.W.2d 390 (Tex. App. 1987)* (if there appears in the instrument enough to enable one by pursuing an inquiry based upon the information contained in the deed to identify the particular property to the exclusion of others, the description will be held sufficient); *Wyatt v. Mcgregor, 855 S.W.2d 5 (Tex. App. 1993)* (the description need not be mathematically certain, but only reasonably certain so as to enable a party familiar with the locality to identify the premises to the exclusion of others); *Abercrombie v. Bright, 271 S.W.2d 734 (Tex. App. 1954).*

(n32)Footnote 32. *Los Angeles v. Hannon, 112 P. 878 (Cal. 1910); Benedict v. Gaylord, 11 Conn. 332 (1836);* Works v. State, 22 N.E.127 (Ind. 1889); *Calton v. Lewis, 21 N.E. 475 (Ind. 1889); Roehl v. Haumesser, 15 N.E. 345 (Ind. 1888); Pursley v. Hayes, 22 Iowa 11 (1867); Edwards v. Bowden, 5 S.E. 283 (N.C. 1888); Harkness, v. Devine, 11 S.W. 872 (Tex. 1889); Williams v. Western Union R.R., 5 N.W. 482 (Wis. 1880).*

(n35)Footnote 35. *Blair v. Rorer, 116 S.E. 767 (Va. 1923).*

(n36)Footnote 36. *Lochte v. Austin, 13 So. 838 (Miss. 1891).*

(n37)Footnote 37. *Oglesby v. Volunteer State Life Ins. Co. of Tennessee, 23 S.E.2d 404 (Ga. 1942).*

(n38)Footnote 38. *Smith v. Wilkinson, 67 S.E.2d 698 (Ga. 1951)* (a deed is sufficient to pass title, and will not be declared void for uncertainty of description, if descriptive averments are certain, or if they afford a key by which land can be definitely located by aid of extrinsic evidence); *Lewis v. Bowen, 75 S.E.2d 422 (Ga. 1953)* (a deed is sufficient to pass title and will not be declared void for uncertainty of description, if descriptive averments contained therein are certain, or if they afford a key by which the realty conveyed thereby can be definitely located by the aid of extrinsic evidence); *Mcdilda v. Lankford, 102 S.E.2d 41 (Ga. 1958)* (a deed is sufficient to pass title and will not be declared void for uncertainty of description, if descriptive averments contained therein are certain, or if they afford a key by which the realty conveyed thereby can be definitely located by the aid of extrinsic evidence); *Wallace v. Adamson, 201 S.E.2d 479 (Ga. App. 1973)* (a deed is sufficient to pass title, and will not be declared void for uncertainty of description, if the descriptive averments contained therein are certain, or if they afford a key by which the land can be definitely located by the aid of extrinsic evidence); *Suttle v. Northside Realty Associates, Inc., 321 S.E.2d 424 (Ga. App. 1984)* (a deed is sufficient to pass title, and will not be declared void for uncertainty of description, if the descriptive averments are certain, or if they afford a key by which the land can be definitely located by the aid of extrinsic evidence); *Chauvin v. Leblanc, 148 So. 2d 182 (La. App. 1962)* (deed will not be declared void for uncertainty in description if it is possible by reasonable rules of construction to ascertain from description, aided by extrinsic evidence, what property is intended to be conveyed; it is sufficient if description furnishes means of identification of land or by which property can be located); *Mitchell v. Nicholson, 3 N.W.2d 83 (N.D. 1942); Kuklies v. Reinert, 256 S.W.2d 435 (Tex. App. 1953)* (a deed will not be declared void for uncertainty of description if it is possible by any rules of construction to ascertain from description, aided by extrinsic evidence, what property it is intended to convey, and it is sufficient if description points out and indicates the premises so that by applying description to land involved it can be found and identified); *American Spiritualist Association v. City of Dallas, 366 S.W.2d 97 (Tex. App.1963)* (deed is not void for uncertainty unless description cannot be made to apply to any definite piece of land even with aid of extrinsic evidence, and a description that does not fully define land but when aided by extrinsic testimony enables land to be identified with certainty, is sufficient); *Colman v. Butkovich, 556 P.2d 503 (Utah 1976)* (problem lies in ascertaining intent with which deed was executed and it should be resolved, if possible, by looking to terms of instrument itself and any reasonable inferences to be drawn therefrom, and if there then remains any uncertainty or ambiguity, it can be aided by extrinsic evidence; accordingly, if from that process property can be identified with reasonable certainty, deed is not invalid for uncertainty); *Consolidation Coal Co. v. Mineral Coal Co., 126 S.E.2d 194 (W. Va. 1962)* (when the description of the land conveyed in a deed is general, the deed will not be held void for uncertainty, if by the aid of extrinsic evidence it can be located and its boundaries ascertained).

(n39)Footnote 39. *Moss v. Crabtree, 18 So. 2d 467 (Ala. 1944); Rye v. Baumann, 329 S.W.2d 161 (Ark. 1959)* (land embraced in an exception in a deed must be described with the same certainty that is required when describing the property conveyed and failure to do so will render the exception void and the grantee takes the whole tract, including that part which was intended to be excepted); *Glasscock v. Mallory, 213 S.W. 8 (Ark. 1919); Blevins v. Manufacturers Record Publishing Co., 105 So. 2d 392 (La. 1957); Day v. Pounders, 94 So. 2d 620 (Miss. 1957); Beasley v. Beasley, 171 So. 680 (Miss. 1937); Contra Farrell v. Bowker, 123 A. 305 (Pa. 1924).*

(n40)Footnote 40. *Bailey v. Martin, 237 S.W.2d 16 (Ark. 1951); Dahlberg v. Holden, 238 S.W.2d 699 (Tex1951).*

(n41)Footnote 41. Descriptions do not identify of themselves; they only furnish the means of identification. They give us certain marks or characteristics -- perhaps historical data or incidents -- by the aid of which we may single out the thing intended from all others; not by the description alone but by that explained and applied. Even lands are not identified by description until we place ourselves in the position of the parties by whom the description has been prepared, and read it with the knowledge of the subject matter which they had at the time.

Jackson v. Woods, 876 P.2d 116 (Colo. App. 1994) (in case of repugnant or contradictory descriptive calls in a deed, court may reject or disregard the one which is false or mistaken); *In re Gatlinburg Motel Enterprises, Ltd., 119 B.R. 955 (Bankr. E.D. Tenn. 1990)* (a deed will not be declared void for uncertainty in description if it is possible by any reasonable rules of construction to ascertain from the description, aided by extrinsic evidence, what property is intended to be conveyed); *Hill v. U.S. Life Title Ins. Co. of New York, 731 S.W.2d 910 (Tenn. App. 1986)* (it is said to be a broad general principle "that a deed will not be declared void for uncertainty in description if it is possible by any reasonable rules of construction to ascertain from the description, aided by extrinsic evidence, what property is intended to be conveyed); *Teledyne Isotopes, Inc. v. Bravenec, 640 S.W.2d 387 (Tex. App. 1982)* (deed should not be declared void for uncertainty if it is possible, by any reasonable rules of construction, to ascertain from description, aided by extrinsic evidence, what property parties intended to convey); *Henderson v. Coombs, 453 S.E.2d 415 (W. Va. 1994)* (no part of a deed should be declared void for uncertainty if it is possible, by any reasonable rule of construction, to ascertain from the description, aided by extrinsic evidence, the property intended to be affected); *Sally-Mike Properties v. Yokum, 332 S.E.2d 597 (W. Va. 1985)* (no part of a deed should be declared void for uncertainty if it is possible, by any reasonable rule of construction, to ascertain from the description, aided by extrinsic evidence, the property intended to be affected); *McCullough v. Waterfront Park Ass'n, Inc., 630 A.2d 1372 (Conn. App. 1993)* (when determining boundary line in deed, if description in deed is clear and unambiguous, it must be given effect; in such case, inquiry is not intent of parties but intent that is expressed in deed). *Lewis v. Saucer, 653 So. 2d 1254 (La. App. 1995)* (in determining true boundary line, even if calls in deed are erroneous, good faith purchaser who buys in accordance with fixed boundaries stated on deed is entitled to land within those fixed boundaries); *Hoffman v. Port Huron, 60 N.W. 831 (Mich. 1894); Willey v. Snyder, 34 Mich. 60 (1876); United States v. 0.08246 Acres of Land, 888 F. Supp. 693 (E.D. Pa. 1995)* (under Pennsylvania law, primary function of trial court in resolving boundary dispute is to ascertain intent of the parties at time of original subdivision of the tract). *Pennsylvania Elec. Co. v. Waltman, 670 A.2d 1165 (Pa. App. 1995)* (primary function of a court faced with a boundary dispute is to ascertain and effectuate intentions of parties at time of original subdivision). *Wall v. Carrell, 894 S.W.2d 788 (Tex. App. 1994)* (when location for boundary line of land is uncertain, primary focus is to ascertain the intention of the parties and apply all rules of construction designed to carry out that intention). *Booten v. Peterson, 209 P.2d 349 (Wash. 1949)* (the purpose of a description is not to identify but to furnish a means of identification).

(n42)Footnote 42. *Moran v. Lezotte, 19 N.W. 757 (Mich. 1884).* A mill site was described in a course as "commencing at a point 50 links east of the bank of the slough." There were no objects which would satisfy the remainder of the description whether such starting point was taken to be fifty links east of the east bank or east of the west bank of the slough, but, under the circumstances, the latter construction was held to be the correct one. *Mack v. Bensley, 23 N.W. 97 (Wis. 1885).*

(n43)Footnote 43. *Arab Corp. v. Bruce, 142 F.2d 604 (5th Cir. 1944); Hare v. McClellan, 662 A.2d 1242 (Conn. 1995)* (in arriving at intent expressed in language used in deed or other conveyance, it is always admissible to consider situation of the parties and circumstances connected with transaction, and every part of writing should be considered with help of that evidence). *Nationsbanc Mortg. Corp. of New York v. Cazier, 908 P.2d 572 (Idaho App. 1995)* (in interpreting and construing deeds, uncertainties should be treated as ambiguities subject to be cleared up by resort to intention of the parties as gathered from the deed, circumstances attending and leading up to its execution, subject matter, and situation of the parties at that time); *McCoy v. McCoy, 868 P.2d 527 (Idaho App. 1994)* (where deed's language is ambiguous, parol or extrinsic evidence describing surrounding facts and circumstances is admissible to prove parties' intent; in such case, interpretation of intent is question of fact to be determined by trier of fact, not only from instrument itself but from extrinsic evidence as well); *Foster v. Foster, 652 N.E.2d 350 (Ill. App. 1995)* (to resolve ambiguity in deed, parties' intentions may be determined by examining language of deed, circumstances surrounding its execution, and parties' subsequent conduct); *Flanagan v. Prudhomme, 644 A.2d 51 (N.H. 1994)* (Supreme Court's interpretation of disputed deeds is based on parties' intentions gleaned from construing language of deed from as nearly as possible the position of parties at time of conveyance and in light of surrounding circumstances; extrinsic evidence of parties' intentions and circumstances surrounding conveyance may be used to clarify terms of ambiguous deed);

Crockett v. McKenzie, 867 P.2d 463 (Okla. 1994) (when court determines that deed is ambiguous, it has duty to resolve ambiguity by considering parol and extrinsic evidence, including parties' admissions and other circumstances; in interpreting conveyance, court must give effect to intent of parties); *Sheaffer v. Caruso, 676 A.2d 204 (Pa. 1996); Davis v. Henning, 462 S.E.2d 106 (Va. 1995)* (in construing deeds, it is duty of court to ascertain intention of parties, gathered from language used, and general purpose and scope of instrument in light of surrounding circumstances).

Bank & Trust Co. v. Elgin, 225 P. 582 (N.M. 1924); People v. Call, 223 N.Y.S. 257 (N.Y. App. Div. 1927); Blair v. Rorer, 116 S.E. 767 (Va. 1923); Sanborn v. Miski, 209 N.W. 759 (Wis 1926).*

(n46)Footnote 46. *Cardin v. Outdoor East, 468 S.E.2d 31 (Ga. App. 1996)* (even if lease description of the leased property were insufficient for uncertainty or vagueness, taking of actual possession by lessee would have cured deficiency); *Richards v. Snider, 3 P. 177 (Or. 1884).*

(n47)Footnote 47. *Alford v. Rodgers, 6 So. 2d 409 (Ala. 1942); Price v. Price, 182 S.W.2d 879 (Ark. 1944); Andreau v. Watkins, 7 So. 876 (Fla. 1890); Oglesby v. Volunteer State Life Ins. Co., of Tennessee, 23 S.E.2d 404 (Ga. 1942); Caddell v. Eagle Coal Co., 138 S.W. 304 (Ky. 1911); Cupples v. Harris, 11 So. 2d 609 (La. 1942); Beugnot v. New Orleans Land Co., 71 So. 947 (La. 1916); Schroeder v. Turpin, 161 S.W. 716 (Mo. 1913); Blumenthal v. Blumenthal, 158 S.W. 648 (Mo. 1913); Webster Oil Co., Inc. v. McLean Hotels, Inc., 878 S.W.2d 892 (Mo. App. 1994)* (deed conveying real estate passes title to land described in the instrument); *Foreman v. Sholl, 439 S.E.2d 169 (N.C. App. 1994)* (description of land that must be contained in all conveyances, including deeds, purporting to be color of title must be either certain in itself or capable of being reduced to certainty by something extrinsic to which deed refers; description, though indefinite, is sufficient if court can, with aid of extrinsic evidence which does not add to, enlarge, or in any way change the description, fit it to the property conveyed by the deed); *Jones v. Smith 73 N.Y. 205 (1878); Coleman v. Manhattan Beach Imp. Co., 94 N.Y. 229 (1883); Thayer v. Finton, 15 N.E. 615 (N.Y. 1888); Lockwood v. Hall, 44 N.Y.S.2d 345 (N.Y. App. Div. 1944); Lott v. Dashiell, 233 S.W. 1103 (Tex. App. 1921); Minor v. Powers, 26 S.W. 1071 (Tex. App. 1893); Meadow River Lbr. Co. v. Smith, 30 S.E.2d 392 (W. Va. 1944).*

(n48)Footnote 48. *Brown v. Powers, 52 So. 647 (Ala. 1910); Foreman v. Sholl, 439 S.E.2d 169 (N.C. App. 1994)* (all conveyances purporting to be color of title, including deeds, must contain, as essential element of conveyance, description of identifying land; if conveyance does not contain such description, it is void); *Baylor v. Soska, 658 A.2d 743 (Pa. 1995)* (the only method by which adverse possessor may convey title asserted by adverse possession is to describe in the instrument of conveyance by means minimally acceptable for conveyancing of realty that which is intended to be conveyed).

(n49)Footnote 49. *Beugnot v. New Orleans Land Co., 71 So. 947 (La. 1916); Thayer v. Finton, 15 N.E. 615 (N.Y. 1888); Robbins v. HNG Oil Co., 878 S.W.2d 351 (Tex. App. 1994)* (recitation in deed that it conveyed all property inherited through decedent could not operate to enlarge specific description given in deed of property conveyed) (where a recitation was made to another deed or another record for the purpose of showing from what source the real property had been derived and as a help in tracing the title, then such a reference or referral will not and could not operate to enlarge the specific description given in the deed which contained the reference); *Hansen v. Stichting Mayflower Recreational Fonds, 898 F.Supp. 1503 (D. Utah 1995)* (under Utah law, complete and unambiguous absence of any description of parcel of mined property in deeds conveying interests in surrounding properties was conclusive evidence of parties' intent not to convey unmentioned parcel).

(n50)Footnote 50. *Youmans v. Moore, 87 S.E. 273 (Ga. 1915); Foreman v. Sholl, 439 S.E.2d 169 (N.C. App. 1994)* (description of land that must be contained in all conveyances, including deeds, purporting to be color of title must be either certain in itself or capable of being reduced to certainty by recurrence to something extrinsic to which deed refers; description, though indefinite, is sufficient if court can, with aid of extrinsic evidence which does not add to, enlarge, or in any way change the description, fit it to the property conveyed by the deed).

(n51)Footnote 51. *Durden v. Reynolds, 440 S.E.2d 170 (Ga. 1994)* (parol evidence may not add to, enlarge or any way change description of property contained in deed); *Coleman v. Manhattan Beach Imp. Co., 94 N.Y. 229 (1883); Dodge v. Lavin, 83 A. 1009 (R.I. 1912); Minor v. Powers, 26 S.W. 1071 (Tex. App. 1893); Ward v. Nelson, 131 S.W. 310 (Tex. App. 1910).*

(n52)Footnote 52. *Sepulveda v. Apablasa, 77 P.2d 526 (Cal. App. 1938); Foreman v. Sholl, 439 S.E.2d 169 (N.C. App. 1994)* (all conveyances purporting to be color of title, including deeds, must contain, as an essential element of the conveyance, "a description identifying the land;" if the conveyance does not contain such a description, it is void; the description must be "either certain in itself or capable of being reduced to a certainty by a recurrence to something extrinsic to which the deed refers."); *Byars v. Johnson 213 S.W.2d 294 (Tex. App. 1948); Walchshauser v. Hyde, 890 S.W.2d 171 (Tex. App. 1994)* (the principle that an instrument conveying real estate is void under the Statute of Frauds unless the real estate's description is so definite and certain upon the face of the instrument itself, or in some other writing referred to, that the land can be identified with reasonable certainty); *City of Parkville v. Northern Farms, 950 S.W.2d 882 (Mo. App. 1997)* (city petitioned for declaratory judgment authorizing it to annex contiguous farmland).

(n53)Footnote 53. *Prentice v. Stearns, 113 U.S. 435,* (1885); *Prentice v. Duluth Storage & Forwarding Co., 58 F. 437 (8th Cir. 1893); Prentice v. Northern Pac. R.R., 43 F. 270 (C.C. Minn. 1890).*

(n54)Footnote 54. *Tatum v. Tatum, 1 So. 195 (Ala. 1887); Grimes v. Jordan, 260 S.W.2d 220 (Tex. App. 1953); Greenan v. Solomon 472 S.E.2d 54 (Va. 1996)* (if an estate is conveyed in one part of an instrument, by clear, unambiguous, and explicit words, such estate of interest or benefit is not diminished nor destroyed by words in another part of instrument, unless terms that diminish or destroy estate before given be as clear and decisive as terms by which it was created).

(n55)Footnote 55. *Hansen v. Stichting Mayflower Recreational Fonds, 898 F.Supp. 1503 (D. Utah 1995)* (under Utah law, parol evidence may not Contradict, vary, or add to deeds); *Bliss v. Bliss, 898 P.2d 1081 (Idaho 1995)* (evidence regarding intent and conversations when deed was executed was inadmissible to contradict deed); *Robbins v. HNG Oil Co., 878 S.W.2d 351,* (Tex. App. 1994) (the deed was unambiguous on its face so that extrinsic evidence could

not be admitted to contradict the deed or to create ambiguities); *Jasper State Bank v. Goodrick, 107 S.W.2d 600 (Tex. App. 1937).*

(n56)Footnote 56. *Foreman v. Sholl, 439 S.E.2d 169 (N.C. App. 1994)* (description of land that must be contained in all conveyances, including deeds, purporting to be color of title must be either certain in itself or capable of being reduced to certainty by something extrinsic to which deed refers).

(n57)Footnote 57. *Schweitzer v. Heppner, 622 N.Y.S.2d 142 (N.Y. App. Div. 1995)* (parol evidence may not be used to vary a boundary description or call set forth in a deed).

(n58)Footnote 58. *Hansen v. Stichting Mayflower Recreational Fonds, 898 F.Supp. 1503 (D. Utah 1995)* (when construing deeds in the absence of ambiguity, the construction of deeds is a question of law for the court, and the main object in construing a deed is to ascertain the intention of the parties, especially that of the grantor, from the language used; the description of the property in a deed is prima facie an expression of the intention of the grantor); *Morse v. Kelley, 26 N.E.2d 326 (Mass. 1940).*

(n59)Footnote 59. *Maier v. Continental Oil Co., 120 F.2d 237 (7th Cir. 1941); Fletcher v. Lyon, 123 S.W. 801 (Ark. 1909); More v. Massini, 37 Cal. 432 (Cal. 1869); Blume v. MacGregor, 148 P.2d 656 (Cal. App. 1944); Law v. Hempstead, 10 Conn. 23 (1833); Black v. Skinner Mfg. Co., 43 So. 919 (Fla. 1907); Harris v. Hull, 70 Ga. 831 (1883); Henry v. Metz, 46 N.E.2d 945 (Ill. 1942); Case v. Owen, 38 N.E. 395 (Ind. 1894); Patton Park, Inc. v. Pollack, 55 N.E.2d 328 (Ind. App. 1944); Consolidated Rail Corp., Inc. v. Lewellen, 666 N.E.2d 958 (Ind. App. 1996)* (a deed to a railroad is to be construed in its entirety and the parts are to be construed together so that no part is rejected); *Hess v. Kernen Bros., 149 N.W. 847 (Iowa 1914); Smyth v. Fogle, 129 N.W. 735 (Iowa 1911); Wendtlandt v. National Coop. Refinery Ass'n, 215 P.2d 209 (Kan. 1950); Runyon v. Hatfield, 157 S.W. 17 (Ky. 1913); Coombs v. Frey, 133 S.W. 758 (Ky. 1911); Williams v. Grimm 112 S.W. 839 (Ky. 1908); Funkhouser v. Porter, 107 S.W. 202 (Ky. 1908); Pierce v. Hunter, 13 So. 2d 259 (La. 1943); Simpson v. Deslonde, 6 S.W. 786 (Tex. 1888); Owen v. Henderson, 47 P. 215 (Wash. 1896).* But "half" may be used by the parties to convey a particular tract, not merely a half in quantity. *Brewer v. Schammerhorn, 332 P.2d 526 (Kan. 1958).*

(n80)Footnote 80. *Jones v. Pashby, 12 N.W. 884 (Mich. 1882), 29 N.W. 374 (Mich. 1886).*

(n81)Footnote 81. *Sun Oil Co. v. Smith, 113 S.W.2d 683 (Tex. App. 1938).*

(n82)Footnote 82. A deed purporting to reconvey one-half of a tract of land which was previously conveyed by the grantee to the grantor containing one hundred acres, and stating that, "This deed is intended to convey fifty acres of land," was held ineffective as a conveyance, where it furnished no means of identifying the fifty acres or the one-half of the one hundred acres attempted to be conveyed; *Lampier v. Ley, 113 S.W.2d 955 (Tex. App. 1938).* "The term 'eastern one-half,' in a deed conveying one-half of a tract of land, in the absence of admissible parol evidence disclosing a different intention, would mean the eastern half, formed by a line to be run due north and south through the tract; but if it appears that before the deed was executed a division in two parts, supposedly equal in area, had been made by a line, having a different bearing actually marked on the ground by stakes and fences, according to which possession had been held for a number of years, and the parties have since held possession according to such line, the words must be taken to mean the eastern one-half as so laid off and held in severalty." *Bank v. Catzen, 60 S.E. 499 (W. Va. 1908).*

(n83)Footnote 83. *Soukup v. Union Inv. Co., 51 N.W. 167 (Iowa 1892).*

(n84)Footnote 84. *Collins v. Storm, 39 N.W. 161 (Iowa 1888); Roberts v. Deeds, 10 N.W. 740 (Iowa 1881).*

(n85)Footnote 85. *W.C. Early & Co. v. Long, 42 So. 348 (Miss. 1906); Parrow v. Proulx, 15 A.2d 835 (Vt. 1940).*

(n86)Footnote 86. *Hughes v. Fifer, 31 N.E.2d 634 (Ind. 1941); Kitzman v. Carl, 110 N.W. 587 (Iowa 1907); Frey v. Etzel, 151 N.W. 807 (Wis. 1915). See Eastland v. Robinson, 25 S.W.2d 1028 (Ky. 1930).* "More or less" means that each party runs risk of gain or loss but they will abide by their bargain. *Spires v. Nix, 57 So. 2d 89 (Ala. 1952).*

(n87)Footnote 87. *Estes v. Odom, 18 S.E. 355 (Ga. 1893).*

(n88)Footnote 88. *Id.*

(n89)Footnote 89. *Harrell v. Hill, 19 Ark. 102 (1957); Russo v. Corideo, 129 A. 849 (Conn. 1925); Mahrt v. Mann, 210 N.W. 566 (Iowa 1926); Kitzman v. Carl, 110 N.W. 587 (Iowa 1907); Eastland v. Robinson, 25 S.W.2d 1028 (Ky. 1930); Brewer v. Schammerhorn, 332 P.2d 526 (Kan. 1958); Pierce v. Lefort, 200 So. 801 (La. 1941); Oakes v. De Lancey, 30 N.E. 974 (N.Y. 1892); Frey v. Etzel, 151 N.W. 807 (Wis. 1915).* "More or less" is merely a waiver of quantity

and means that the parties take the risk as to quantity; *Salyer v. Poulos, 122 S.W.2d 996 (Ky. 1938).* They are words of precaution and do not destroy statements of distance and quantity if there are no other guides; *Parrow v. Proulx, 15 A.2d 835 (Vt. 1940).* A description, 24 acres more or less off the north end takes 24 acres off the north end the words more or less being disregarded. *Lovejoy v. McKibben, 74 So. 281 (Miss. 1917).*

(n112)Footnote 112. *Martt v. McBrayer, 166 S.W.2d 823 (Ky. 1942).*

(n113)Footnote 113. Descriptions do not identify of themselves; they only furnish the means of identification. They give us certain marks or characteristics -- perhaps historical data or incidents -- by the aid of which we may single out the thing intended from all others, not by the description alone but by that explained and applied. Even lands are not identified by description until we place ourselves in the position of the parties by whom the description has been prepared, and read it with the knowledge of the subject matter which they had at the time. *See Hoffman v. Port Huron, 60 N.W. 831 (Mich. 1894).* The purpose of a description is not to identify but to furnish a means of identification; *Booten v. Peterson, 209 P.2d 349, 384 (Wash. 1949).*

(n114)Footnote 114. *Moran v. Lezotte, 19 N.W. 757 (Mich. 1884); Alexy v. Salvador, 630 N.Y.S.2d 133 (N.Y. App. Div. 1995)* (prior negotiations and agreements regarding sale of land merge into and are extinguished by deed of conveyance and any inconsistencies between contract and deed are presumed to be explained and governed solely by the latter except where there is clear intent evidenced by parties that particular provision shall survive delivery of deed or where there exists collateral undertaking that is not connected with title, possession or quantity of land).

A mill site was described in a course as "commencing at a point 50 links east of the bank of the slough." There were no objects which would satisfy the remainder of the description whether such starting point was taken to be fifty links east of the east bank or east of the west bank of the slough, but, under the circumstances, the latter construction was held to be the correct one. *Mack v. Bensley, 23 N.W. 97 (Wis. 1885).*

(n115)Footnote 115. *Arab Corp. v. Bruce, 142 F.2d 604 (5th Cir. 1994); Department of Conservation v. Fairless, 653 N.E.2d 446 (Ill. App. 1995)* (the fundamental purpose of the construction of a deed is to ascertain the intention of the parties; where, however, an uncertainty as to a description of land exists, extrinsic evidence of the facts and circumstances attending the transaction merit consideration in construing the deed); *Schweitzer v. Heppner, 622 N.Y.S.2d 142 (N.Y. App. Div. 1995); Foreman v. Sholl, 439 S.E.2d 169 (N. C. App. 1994)* (a patent ambiguity is such an uncertainty appearing on the face of the instrument that the court, reading the language in the light of all the facts and circumstances referred to in the instrument, is unable to derive therefrom the intention of the parties as to what land was to be conveyed); *Rath v. Haycock, 905 P.2d 854 (Or. App. 1995); Doman v. Brogan, 592 A.2d 104 (Pa. Super. Ct. 1991)* (where calls in deed conflict to present latent ambiguity, before issue of true location of boundary line is submitted to jury, court must first ask whether conflicting boundary descriptions admit of more than one reasonable division; in making this determination, court should consider all evidence of parties' intentions, extrinsic or otherwise, offered in support of conflicting boundary descriptions, including consideration of instrument as whole, its subject matter and circumstances attending its execution).

(n116)Footnote 116. *Saulsberry v. Saulsberry, 121 F.2d 318 (6th Cir. 1941); Ezikovich v. Linden, 618 A.2d 570 (Conn. App. 1993)* (to determine the nature of an easement created by deed, we must discern the intention of the parties to the deed by considering the language of the deed, the situation of the property and the surrounding circumstances);

Arab Corp. v. Bruce, 50 F. Supp. 350 (E.D. La. 1943); Magnolia Petroleum Co. v. West, 30 N.E.2d 24 (Ill. 1940); Bryant v. Fordyce, 78 P. 32 (Kan. 1938); Sermersheim v. Ackerman, 144 S.W.2d 804 (Ky. 1940); Bice v. Holmes, 14 N.W.2d 800 (Mich. 1944); Western Auto Supply Co. v. Komiz Tire Co., 48 N.Y.S.2d 256 (N.Y. App. Div. 1944); Monk v. Kornegay, 29 S.E.2d 754 (N.C. 1944); North Shore, Inc. v. Wakefield, 530 N.W.2d 297 (N.D. 1995) (the language of the deed, if clear and explicit, governs its interpretation; the parties' mutual intentions must be ascertained from the four corners of the deed, if possible, although a court may look to the circumstances under which a deed was made to explain ambiguous language); *Crockett v. McKenzie, 867 P.2d 463 (Okla. 1994)* (when court determines that deed is ambiguous, it has duty to resolve ambiguity by considering parol and extrinsic evidence, including parties' admissions and construction and other circumstances); *Sides v. Cleland, 648 A.2d 793 (Pa. Super. Ct. 1994)* (in ascertaining the scope of an easement created by express grant, the intention of the parties to the grant must be advanced); *Wiegand v. Wiegand, 37 A.2d 492 (Pa. 1944); Green v. Kunkel, 183 S.W.2d 585 (Tex. App. 1944); Davis v. Henning, 462 S.E.2d 106 (Va. 1995)* (in construing deeds, it is the duty of the court to ascertain the intention of the parties, gathered from the language used, and the general purpose and scope of the instrument in the light of surrounding circumstances); *Phillips v. Fox, 458 S.E.2d 327 (W. Va. 1995)* (as a general principle, ambiguities in a deed are to be clarified by resort to the intention of the parties ascertained from the deed itself, the circumstances surrounding its execution, as well as the subject matter and the parties' situation at that time).

(n117)Footnote 117. *Scott v. Dunkle Box & Lbr. Co., 152 S.W. 1025 (Ark. 1912); Schweitzer v. Crandell, 291 S.W. 68 (Ark. 1927); Thompson v. Southern California Motor Road Co., 23 P. 130 (Cal. 1890); Truett v. Adams, 5 P. 96 (Cal. 1884); Devlin v. Powell, 227 P. 231 (Cal. App. 1924); Matter of Marriage of Wade, 884 P.2d 736 (Kan. App. 1994)* (the court puts itself as nearly as possible in the situation of the grantors when they made the deed and, from a consideration of that situation and from the language used in each part of the deed, determine as best it can the purpose of the grantors and the intentions they endeavored to convey); *Cilley v. Childs, 73 Me. 130 (1882); Jones v. Pashby, 29 N.W. 374 (Mich. 1886); Hubbard v. Whitehead, 121 S.W. 69 (Mo. 1909); Wolfe v. Dyer, 8 S.W. 551 (Mo. 1888); Boland v. Byrne, 145 S.W.2d 755 (Mo. App. 1940); Flanagan v. Prudhomme, 644 A.2d 51 (N.H. 1994)* (Supreme Court's determination of disputed deeds is based on parties' intentions gleaned from construing language of deed from as nearly as possible the position of parties at time of conveyance and in light of surrounding circumstances); *Elliott v. Gilchrist, 9 A. 382 (N.H. 1887); First Sav. Bank & Trust Co. v. Elgin, 225 P. 582 (N.M. 1924); People v. Call, 223 N.Y.S. 257 (N.Y. App. Div. 1927); Darling v. Alexander, 114 N.Y.S. 334 (N.Y. App. Div. 1909); Gernt v. Floyd, 174 S.W. 267 (Tenn. 1915); Blair v. Rorer, 116 S.E. 767 (Va. 1923); Sanborn v. Miski, 209 N.W. 759 (Wis. 1926); Whitney v. Robinson, 10 N.W. 512 (Wis. 1881); Messer v. Oestreich, 10 N.W. 6 (Wis. 1881).*

(n118)Footnote 118. *Prieto v. St. Tammany Homesites, Inc., 602 So. 2d 1111 (La. App. 1992)* (physical occupancy of any part of tract specifically described in deed, with intent to possess the whole, will constitute possession of all the property included therein, for purposes of maintaining possessory action); *Richards v. Snider, 3 P. 177 (Or. 1884).*

(n119)Footnote 119. *Alford v. Rodgers, 6 So. 2d 409 (Ala. 1942); Brown v. Powers, 52 So. 647 (Ala. 1910); Price v. Price, 182 S.W.2d 879 (Ark. 1944); Maltby v. Conner, 660 So. 2d 353 (Fla. App. 1995)* (desire to reduce litigation costs and possibly estate taxes following death of elderly grantor could not justify order directing that corrective deed be issued to convey out parcel which was not included in metes and bounds descriptions in prior deeds conveying property to revocable trust); *Andreu v. Watkins, 7 So. 876 (Fla. 1890); Oglesby v. Volunteer State Life Ins. Co. of Tennessee, 23 S.E.2d 404 (Ga. 1942); Houston v. Pritchett, 287 S.W. 936 (Ky. 1942); Caddell v. Eagle Coal Co., 138 S.W. 304 (Ky. 1911); Bryan v. Breyer, 665 A.2d 1020 (Me. 1995)* (purchasers were not entitled to reformation of purchase-and-sale agreement and accompanying deed to include lot that was excluded from legal description of land conveyed, even though parties all assumed when they entered into agreement that lot was included); *Schroeder v. Turpin, 161 S.W. 716 (Mo. 1913); Blumenthal v. Blumenthal, 158 S.W. 648 (Mo. 1913); Jones v. Smith 73 N.Y. 205 (1878); Thayer v. Finton, 15 N.E. 615 (N.Y. 1888); Lockwood v. Hall, 44 N.Y.S.2d 345 (N.Y. App. Div. 1943); Minor v. Powers, 26 S.W. 1071 (Tex. 1894); 233 S.W. 1103 (Tex. App. 1921); Meadow River Lbr. Co. v. Smith, 30 S.E.2d 392 (W. Va. 1944).*

(n120)Footnote 120. *Durden v. Reynolds, 440 S.E.2d 170 (Ga. 1994)* (parol evidence may not add to, enlarge or in any way change description of property contained in deed); *Chappell v. Donnelly, 439 S.E.2d 802 (N.C. App. 1994)*

(parol evidence cannot enlarge the scope of the descriptive words because "[t]he purpose of parol evidence is to fit the description to the property, not to create a description"); *Carll v. Little Miami R.R., 32 Ohio C.C. 667 (1911); Dodge v. Lavin, 83 A. 1009 (R.I. 1912); Minor v. Powers, 26 S.W. 1071 (Tex. 1894); Ward v. Nelson, 131 S.W. 310 (Tex. App. 1910).*

(n121)Footnote 121. *Jayore v. Hall, 624 So. 2d 522 (Ala. 1993)* (his deed to include a 23-acre parcel that had been omitted from deeds and that most specific description of 4.79-acre parcel in sister's deed prevailed over general description of same parcel in brother's); *Maltby v. Conner, 660 So. 2d 353 (Fla. App. 1995)* (where a specific description is given in clear, explicit language completely identifying the land being conveyed, it may not be varied by a more general statement of intent concerning the extent of the conveyance); *Beugnot v. New Orleans Land Co., 71 So. 947 (La. 1916); Hoffman v. Kaplan, 875 S.W.2d 948 (Mo. App. 1994)* (although specific description contained in deed generally prevails over general description, whenever possible, real intent is to be gathered from the whole description as well as the particular); *Thayer v. Finton, 15 N.E. 615 (N.Y. 1888); Vicars v. First Virginia Bank-Mountain Empire, 458 S.E.2d 293 (Va. 1995)* (general language in a deed was not sufficient to convey mineral interests in a tract of land which was not specifically identified in the deed).

(n122)Footnote 122. *McCone v. Butts, 616 So. 2d 535 (Fla. App. 1993)* (to establish adverse possession by color of title based upon instruments of conveyance, instrument must contain description of property legally sufficient to identify land with degree of certainty essential to ascertain boundaries and identity of the land); *Youmans v. Moore, 87 S.E. 273 (Ga. 1915); Foreman v. Sholl, 439 S.E.2d 169 (N.C. App. 1994)* (all conveyances purporting to be color of title, including deeds, must contain, as essential element of conveyance, description of identifying land; if conveyance does not contain such description, it is void).

(n123)Footnote 123. *Tatum v. Tatum, 1 So. 195 (Ala. 1887); Grimes v. Jordan, 260 S.W.2d 220 (Tex. App. 1953).*

(n124)Footnote 124. *Michael J. Uhes, Ph.D., P.C., Profit Sharing Plan & Trust v. Blake, 892 P.2d 439 (Colo. App. 1995)* (extrinsic evidence should not be considered in construing deed if intent of parties is discernible from deed itself); *Terry v. Salazar, 892 P.2d 391 (Colo. App. 1994)* (if deed is unambiguous, extrinsic evidence is inadmissible and must be ignored, even if received without objection); *Bidstrup v. Brignac, 631 So. 2d 637 (La. App. 1994)* (meaning and intent of parties to deed must be sought within four corners of instrument and cannot be explained or contradicted by extrinsic evidence when words of deed are clear, explicit, and lead to no absurd consequences); *Pennsylvania Elec. Co. v. Waltman 670 A.2d 1165 (Pa. Super. Ct. 1995)* (where deed is uncertain because of vague or ambiguous language, extrinsic evidence may be used to explain, but not vary, the writing in the deed); *Doman v. Brogan, 592 A.2d 104 (Pa. Super. Ct. 1991)* (where there exists an uncertainty due to use of vague or ambiguous language in the deed, resort may be had to extrinsic or parol evidence to explain, but not vary, written word of deed); In re Tennessee *Gas Transp., Inc., 169 B.R. 643 (Tenn. Bkrtcy. Ct. 1994)* (because the description fails to identify a particular tract of land, extrinsic evidence is not admissible to supply the location of the land in question); *Robbins v. HNG Oil Co., 878 S.W.2D 351 (Tex. App. 1994)* (under Texas law, parol evidence will not be received or admitted to create ambiguity or to give contract or deed meaning different from that which its language imparts); *Johnson v. Dale, 835 S.W.2d 216 (Tex. App. 1992)* (extrinsic evidence was inadmissible to prove location of easement at variance with unambiguous description in deed); *Jasper State Bank v. Goodrich, 107 S.W.2d 600 (Tex. App. 1937).*

App. 1993)* (deeds are construed as a whole and meaning is given to every part without reference to formal divisions of the deed); *Shultz v. Young, 25 N.C. 385 (1843); Troy & North Carolina Gold Min. Co. v. Snow Lbr. Co., 87 S.E. 40 (N.C. 1915); Brown v. Brown, 84 S.E. 25 (N.C. 1915); Shaffer v. Hahn, 15 S.E. 1033 (N.C. 1892); In re Wyatt's Claim, 141 N.E.2d 308 (Ohio App. 1955); Handley v. Santa Fe Minerals, Inc., 849 P.2d 433 (Okla. App. 1992)* (intention of parties to oil or gas leases or royalty deeds must be deduced from entire agreement, and every provision must be construed so as to be consistent with each other and that construction adopted, if possible, which gives effect to every part of the contract); *Franklin Drilling Co. v. Jackson, 217 P.2d 816 (Okla. 1950); In re Laurel Run Corp., 166 B.R. 242 (Bkrtcy. Ct. M.D. Pa. 1994)* (effect must be given to all the language of the instrument and no part shall be rejected if it can be given a meaning); *Lake View Acres Development Co. v. Tindal, 412 S.E.2d 457 (S.C. App. 1991)* (in the construction of this deed, the court is guided by two settled rules of law: first, the intention of the grantor; ... secondly, in ascertaining such intention the deed must be construed as a whole, and effect given to every part thereof, if such can be done consistently with law); *Brier Hill Collieries v. Gernt, 175 S.W. 560 (Tenn. 1915); Garrett v. Dils Co., 299 S.W.2d 904 (Tex. 1957); Harris v. Windsor, 294 S.W.2d 798 (Tex. 1956); Benge v. Scharbauer, 259 S.W.2d 166 (Tex. 1953); Cleveland v. Sims, 6 S.W. 634 (Tex. 1887); White v. White, 830 S.W.2d 767 (Tex. App. 1992)* (in seeking to ascertain intention of parties, court must attempt to harmonize all parts of deed); *Aelvoet v. Schutz, 181 S.W.2d 1011 (Tex. Ct. App 1944); Burgess v. McCommas, 129 S.W. 382 (Tex. App. 1910); Carpenter v. Camp Mfg. Co., 71 S.E. 559 (Va. 1911); Young v. Camp Mfg. Co., 66 S.E. 843 (Va. 1910); Skamania Boom Co. v. Youmans, 116 P. 645 (Wash. 1911); McDougal v. Musgrave, 33 S.E. 281 (W. Va. 1899); Parkinson v. McQuaid, 11 N.W. 682 (Wis. 1882).*

(n131)Footnote 131. *Timmons v. Timmons, 96 N.E. 622 (Ind. App. 1911); Maxwell v. McCall, 124 N.W. 760 (Iowa*

1910); Brungardt v. Smith, 290 P.2d 1039 (Kan. 1955); Maxwell v. Harper, 98 P. 756 (Wash. 1909).

(n132)Footnote 132. *McLendon v. Ravesies, 173 So. 303 (Miss. 1937); Jasper State Bank v. Goodrich, 107 S.W.2d 600 (Tex. App. 1937); Henderson v. Coombs, 453 S.E.2d 415 (W. Va. 1994)* (no part of a deed should be declared void for uncertainty if it is possible, by any reasonable rule of construction, to ascertain from the description, aided by extrinsic evidence, the property intended to be affected).

(n133)Footnote 133. *City of Manhattan Beach v. Superior Court, 914 P.2d 160 (Cal. 1996)* (deeds are to be construed like any other contract and the intent of parties arrived at by a consideration of the whole instrument and not of detached clauses); *Magnolia Petroleum Co. v. West, 30 N.E.2d 24 (Ill. 1940); Bidstrup v. Brignac, 631 So. 2d 637 (La. App. 1994)* (cardinal rule to be followed in construing deeds, uncertain because of ambiguity, is to ascertain intention of parties from entire language of deed); *Peoples Bank and Trust Co. v. Nettleton Fox Hunting & Fishing Ass'n, 672 So. 2d 1235 (Miss. 1996)* (under "four corners doctrine," instrument is considered as a whole, to ascertain intention of parties; particular words should not control but, rather, entire instrument should be examined); *Crum v. Butler, 601 So. 2d 834 (Miss. 1992)* (deed must be construed as whole without separating it from its formal parts and intent of parties may be gathered from instrument; intent of parties as expressed in deed's language must govern); *Peterson v. Beck, 537 N.W.2d 375 (S.D. 1995)* (the paramount rule of construction is that the intention of the parties, and the grantor in particular, is to be ascertained by a fair consideration of the entire instrument and the language therein, without undue emphasis on any particular part or provision of the document); *Bank One v. Alexander, 910 S.W.2d 530 (Tex. App. 1995)* (in construing deed, Court of Appeals must ascertain intent of parties by looking to four corners of deed; that is to say, intention of parties must be gathered from entire instrument, and not from some isolated clause or paragraph); *Grill v. West Virginia R.R. Maintenance Authority, 423 S.E.2d 893 (W. Va. 1992)* (in construing a deed, it is duty of court to construe it as whole, taking and considering all parts together, and giving effect to intention of parties whenever that is reasonably clear and free from doubt, unless to do so will violate some principle of law inconsistent therewith).

(n134)Footnote 134. *Mitchell v. Moore, 13 So. 2d 314 (Fla. 1943); Wolfson, v. Succession of Lisso, 6 So. 2d 231 (La. App. 1942).*

(n135)Footnote 135. *Skerritt Inv. Co. Englewood, 248 P. 6 (Colo. 1926).* Not only should the entire description be considered in determining the identity of the land conveyed but the entire deed itself is to be considered. *Mitchell v. Mays, 268 S.W. 806 (Ky. 1925); Dill-Cramer-Truitt Corp. v. Jacksonville Lbr. Co., 112 S.E. 740 (N.C. 1922); Batesburg-Leesville School Dist. No. 3 v. Tarrant, 361 S.E.2d 343 (S.C. App.1987)* (estate conveyed by deed must be determined from the whole deed); *Moore v. Gilchrist, 273 S.W. 308 (Tex. App. 1925); Sanborn v. Miski, 209 N.W. 759 (Wis. 1926).*

(n136)Footnote 136. *James River & Kanawha Power Co. v. Old Dominion Iron & Steel Corp., 122 S.E. 344 (Va. 1924).*

(n137)Footnote 137. *Gregory v. Floyd, 435 S.E.2d 808 (N.C. App.1993); Powers v. Rawles, 112 S.E. 78 (S.C. 1922).* In determining the location of the beginning corner of the land conveyed, the court must look to the entire description contained in the deed; *Battle v. Wolfe, 283 S.W. 1073 (Tex. App. 1926); Smith v. Nugget Exploration, Inc., 857 P.2d 320 (Wyo. 1993)* (in interpreting written instrument, all parts and every word should be given effect, if possible, though no one clause, phrase or sentence should be determinative of intent; intention of parties, as expressed in a deed, is to be determined from entire instrument without undue preference given to any part).

(n138)Footnote 138. *Bentley v. Napier, 122 S.W. 180 (Ky. 1909).*

(n139)Footnote 139. *Mt. Maumee Partnership v. Peet, 673 A.2d 127 (Conn. App. 1996)* (when deed contains multiple descriptions that appear to be inconsistent and irreconcilable, description containing less certainty must yield to that with greater certainty); *Haley v. Murray, 177 S.W.2d 333 (Tex. App. 1944). But see Glover v. Giraldo, 824 P.2d*

552 (Wyo. 1992) (where a deed contains references of both a general and particular nature, the particular description is preferred and will control over or limit a more general description).

(n140)Footnote 140. *Thatcher v. St. Andrews Church, 37 Mich. 264 (Mich. 1877); see United States v. 12,918.28 Acres of Land in Webster Parish, La., 61 F. Supp. 545 (W.D. La. 1945).*

(n141)Footnote 141. *Pence v. Armstrong, 95 Ind. 191 (1883); Mettart v. Allen, 39 N.E. 239 (Ind. 1894).*

Schroeder; *846 S.W.2d 905 (Tex. App. 1993).* "All of my land wherever situate" conveys all of land owned at time of deed. *Pettigrew v. Dobbelaar, 63 Cal. 396 (1883).* Option to purchase "my farm" valid where only one farm owned, *Cramer v. Ballard, 24 N.W.2d 80 (Mich. 1946),* but optionee was in possession. A description by reference to the grantor's ownership is sufficient. *Crockett v. Housing Auth. of City of Dallas, 274 S.W.2d 187 (Tex. App. 1954).* A deed conveying that part of a tract owned by the grantor is valid since the portion owned can be proved by parol evidence. *Heirs & Unknown Heirs of Barrow v. Champion Paper & Fibre Co., 327 S.W.2d 338 (Tex. App. 1959).*

(n143)Footnote 143. U.S. v. 9.41 Acres Located in Sebastian County; *725 F. Supp. 421 (W.D. Ark. 1989); Ketchum v. Cook, 247 S.W.2d 1002 (Ark. 1952); Pettigrew v. Dobbelaar, 63 Cal. 396 (1883); Blair v. Bruns, 8 P. 569 (Colo. 1885); Clifton Heights Land Co. v. Randell, 47 N.W. 905 (Iowa 1891); Ison v. Wolf, 156 S.W. 129 (Ky. 1913); Maker v. Lazell, 22 A. 474 (Me. 1891); Fitzgerald v. Libby, 7 N.E. 917 (Mass. 1886); Harmon v. James, 15 Miss. 111 (1846); Bank of Missouri v. Bates, 17 Mo. 583 (1853); Brown v. Warren, 16 Nev. 228 (1881); Baird v. Campbell, 73 N.Y.S. 617 (1901); Pate v. Sampson Lumber Co., 81 S.E. 132 (N. C. 1914); Stambaugh v. Smith, 23 Ohio St. 584 (1873); Smith v. Westall, 13 S.W. 540 (Tex. 1890); Falls Land & Cattle Co. v. Chisholm, 9 S.W. 479 (Tex. 1888); Hervey v. Edens, 6 S.W. 306 (Tex. 1887); Witt v. Harlan, 2 S.W. 41 (Tex. 1886).*

Contra Waterman v. Tidewater Associated Oil Co., 35 So. 2d 225 (La. 1947). "All the land of the grantor adjoining" a specifically described tract was a valid description. *Union Cent. Life Ins. Co. v. Smith, 190 S.E. 651 (Ga. 1937).* Description of all land situate in a particular county is valid if county identified. *Crocker v. Smith, 9 N.E.2d 309 (Ill. 1937).* In *Hoover v. Roberts, 74 P.2d 152 (Kan. 1937),* the grantor conveyed "the undivided eighth interest of the grantor, being all of the interest of the grantor as heir-at-law and devisee under the last will, etc." The grantor was one of eight children, of whom three had died. Under the construction of the will the grantor received a one-fifth interest. A Kansas statute provided that a grantor presumably conveyed all of the interest the grantor had unless his intent was clearly expressed to convey less. The court held that the grantee received a one-fifth share. "All the land I own in _____ Parish" was a valid desciption. *Willimas v. Bowie Lbr. Co., 38 So. 2d 729 (La. 1948).* All grantor's property in a given locality is a valid description. *Smith v. Westall, 13 S.W. 540 (Tex. 1890).* A "Mother Hubbard" clause, whereby the grantor purports to convey the land described and any other land owned by the grantor in the same described area, is ambiguous and parol evidence was admissible; *Smith v. Allison, 301 S.W.2d 608 (Tex. 1956).* Deed of all oil and gas rights owned by the grantor in the United States held valid. *Texas Consol. Oils v. Bartels, 270 S.W.2d 708 (Tex. App. 1954).* All land owned in named county is sufficient; *Patterson v. Twaddell, 301 S.W.2d 680 (Tex. App. 1957).* Identification made by notary's notation. *Holley v. Curry 51 S.E. 135 (W. Va. 1905).*

(n144)Footnote 144. *Brusseau v. Hill, 256 P. 419 (Cal. 1927); see Hightower v. Blakely Hard Wood Lbr. Co., 137 S.E. 22 (Ga. 1927); Patterson v. McClenathan, 129 N.E. 767 (Ill. 1921); Jones v. Colle, 727 S.W.2d 262 (Tex. 1987).* Deed of all of grantor's property or all in a certain location was sufficient. *Wilson v. Boyce, 92 U.S. 320, 23 L. Ed. 608 (1875); Wright v. Louisville & N.R.R., 82 So. 132 (Ala. 1919); Snyder v. Bridewell, 267 S.W. 561 (Ark. 1924); Davis v. Horne, 45 So. 476 (Fla. 1907); Lewis v. Kinnaird, 65 A. 365 (Md. 1906); Drew v. Carroll, 28 N.E. 148 (Mass. 1891); Brown v. Warren, 16 Nev. 228 (1881); Merrill v. Bradley, 119 S.W. 297 (Tex. 1909).* The mortgage of all the property of the mortgagor without further describing it is insufficient. *Herman v. Deming, 44 Conn. 124 (1876).* Deed of all of land owned by the grantor in a certain stream was held valid. *Albertson v. Prewitt, 49 S.W. 196 (Ky. 1899).*

(n145)Footnote 145. *Albertson v. Prewitt, 49 S.W. 196 (Ky. 1899).* "All of the swamp river land" in a described tract was a valid description only if the line of demarcation could be accurately made, not being void as a matter of law. *Sharpe v. Savannah River Lbr. Corp., 87 S.E.2d 303 (Ga. 1957); Roeder Co. v. Burlington N. Inc., 716 P.2d 855 (Wash. 1986).*

In *Gentile v. Crossan, 38 P. 247 (N.M. 1894),* a deed described a boundary as follows: "Y del camino a las lomas;" meaning, "And from the road to [las lomas] the hills." There was strong evidence that "las lomas" signified, in that vicinity, a certain kind of hills. It was held that the use of the term constituted a latent ambiguity which could be explained by parol evidence.

In *Minor v. Powers, 24 S.W. 710 (Tex. App. 1893),rev'd, 26 S.W. 1071 (Tex. 1894),* Fisher, C. J., said: "The instrument itself may not disclose any uncertainty or doubt, and may upon its face give a perfect description; but in an attempt to apply it, when it is found that the description will apply to two or more objects or subjects, or is a misdescription of the object or subject intended by the conveyance, a latent ambiguity results, and evidence is admissible to explain and remove it." A boundary line was described as drawn from a house named, and reference was made to a map for a more particular description. On the map referred to the line appeared to be drawn from the northeast corner of the house. It appeared in evidence that the position of the house was incorrectly represented on the map. It was held, however, that the trial judge was bound to look to the map as forming part of the deed, and to tell the jury that the line was to be drawn as marked on the map. *Warren v. Tom, 946 S.W.2d 754 (Mo. App. 1997)* (vendors of parcel brought action against purchasers to determine boundary line; parol evidence admissible to explain ambiguity).

(n343)Footnote 343. *Frost Lbr. Industries, Inc. v. Brantley, 109 S.W.2d 999 (Tex. App. 1937).*

A boundary deed ran from a point thence "west with the highway to a stake." The question was whether this meant the survey of the original highway or the road as it existed at the time the deed was executed. It was held that parol evidence would not be admitted to show the line of the original survey where no road had actually been constructed according to the survey. *Brown v. Hodges, 61 S.E.2d 603 (N.C. 1950).*

Va. 1920).* Description of "78 acres known as the Malone Place and being" followed by a description which did not embrace all of the tract, the particular description did not limit the general tract. *Sithers v. Burton, 106 So. 2d 876 (Ala. 1958).*

(n379)Footnote 379. *Cornett v. Creech, 100 S.W. 1188 (Ky. 1907); Haley v. Murray, 177 S.W.2d 333 (Tex. App. 1944).*

(n380)Footnote 380. *Sugg v. Greenville, 86 S.E. 695 (N.C. 1915).* A just and reasonable rule which the courts have long followed in harmonizing conflicting calls in a deed or survey is to ascertain which calls are locative, and which are merely directory, and conform the lines to the locative calls. Directory calls are those which merely direct the neighborhood wherein the different calls may be found; whereas locative calls are those which serve to fix the boundaries. Therefore locative calls control in case of conflict. It is less likely that the surveyor or the parties to the instrument under interpretation would make a mistake in describing the exact boundaries than when merely calling attention to the neighborhood where they should be found; *Cates v. Reynolds, 228 S.W. 695 (Tenn. 1921).*

(n484)Footnote 484. *New Hampshire Land Co. v. Tilton, 19 F. 73 (N.H. Cir. 1884).* In *Hicklin v. McClear, 22 P. 1057 (Or. 1889),* it was held that in an action involving the title to certain town lots, the facts relating to platting of the town site by the proprietors, their dedication of the streets and alleys by conveying lots therein, the existence of the two plats, and their similitude in fact, were admissible in evidence to identify the property then in controversy. Where the plat of a town site has been lost, a deed of one who, at the time it was executed, owned property within and without the tract alleged to have been covered by the plat, and which conveyed land outside the tract, describing the land by bounding by a portion of the town-site tract, is admissible to show the location of the land covered by the plat, in order to defeat the title of one claiming under such former owner. *Sperry v. In *Baker v. Light, 16 S.W. 330 (Tex. 1891),* the deed was of "400 acres, more or less, out of the southeast corner" of a certain survey, and described that the tract conveyed did not reach to the east line of the survey. It was proved that, when the tract conveyed was surveyed, the east line of the survey could not be found, and that the surveyor only established the west corners of the tract. The position of these corners was not disputed. Although there were 400 acres within the courses and distances named in the deed, the deed passed title to all the land between the west corners of the tract and the east line of the survey.

is situated. The deed, however, was made and acknowledged in Scott County, Indiana, and the parties thereto are described as being residents of that county. The cause was tried in Scott County, Indiana, in a court of general jurisdiction, without objection, and the witnesses spoke of the property as being situated in Scottsburg. Under this state of facts we will presume that the land in controversy is in Scott County, Indiana." *Warmoth v. Dryden, 25 N.E. 433 (Ind. 1890).*

(n670)Footnote 670. In *Smipson v. Blaisdell, 27 A. 101 (Me. 1892)*, Chief Justice Peter, delivering the decision upon the point whether the land had been defined, said:

> It can be defined by the parties going down with the surveyor and surveying it off and putting down marks. It can be defined in other ways, perhaps. It need not be done necessarily by both parties being upon the ground at the time. If George Hinman went upon the land himself, and began to use a half acre, -- a well-defined half acre, -- marked it out by piling paving all over a well-defined half acre, or in any other way, so as to make it clear and distinct that he was appropriating a certain specific half acre under his deed, and the grantor knew it and saw it, and acquiesced therein for a number of years, -- that would be evidence from which the jury might infer that it had been in that way marked out and appropriated,

but it would not be conclusive.

CHAPTER 90 LAND DESCRIPTIONS, BOUNDARIES AND SURVEYS *

10-90 Thompson on Real Property, Thomas Editions § 90.03

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 90.03 Land Boundaries.

[Go To Supp]

§ 90.03(a) Establishing Boundary Lines.

§ 90.03(a)(1) Methods of Establishing Boundary Lines.

Sometimes when adjoining landowners attempt to agree on a boundary different from the record boundary, their effort is hindered by requirements of the statute of frauds. Moreover, some states may require words of grant to transfer an interest in realty. In this situation, therefore, adjoining landowners wishing to adjust their boundary line must either execute an appropriate instrument n702 or shift title by adverse possession.

The two requirements of an instrument in writing and words of grant have caused courts to render inconsistent decisions about whether and how adjoining landowners can agree upon a line. Some courts rely on the doctrine practical location, n703 others refer to acquiescence, others to estoppel, others depend on the statute of limitations n704 and still others on adverse possession n705 or prescription. Thus, establishing boundaries by agreement may be described in courts by such terms as "practical location," "acquiescence," "implied agreement," "estoppel," "prescription," "adverse possession" and "statute of limitations," n706 and the evidence necessary to prove the boundary may vary greatly depending on which theory is employed in the jurisdiction. In the absence of estoppel or adverse possession, there must be a controversy or uncertainty about the boundary before the location can be established by agreement.

The evidence for adverse possession theory boundary cases requires a showing of continuous adverse possession for the statutory period, sometimes with payment of taxes. In many states a form of "hostility" is required. Thus, in a boundary line case the adverse possessor must know the line is different and must intend to hold to the wrong line. Agreement between the parties ends the adverse possession.

By contrast, establishing practical location of a boundary by the method of acquiescence requires the parties' knowledge of the real boundary as described in the deed, so that a claim of different location rests upon the principle of estoppel. n707 In some states title will pass by prescription. Under prescription, the requirements of hostility and taxes are not present, but the duration of time requirement is; there must be no agreement by the parties, but there must be intent on one side and passive acquiescence on the other side to promote the lost grant theory. Most states do not permit title but

only an easement to pass by prescription. Protest by one party terminates the prescription.

Use of a boundary agreement requires proof of an actual contract between the adjoining landowners, written evidence to avoid the statute of frauds and, in many states, words to grant to transfer title and consent of spouses to release inchoate rights. By comparison to acquiescence, practical location requirements include a disputed or doubtful boundary, an agreement as to the line between the adjoining landowners, a taking of possession by each up to the agreed upon line, and holding that possession for a long period of time. In boundary disputes the rules of evidence are more liberal than in other forms of actions, especially where the original surveyor's marks have disappeared. n708 The problem of practical location is often intertwined with that of the requirement of hostile intent that pertains to adverse possession. n709

§ 90.03(a)(2) Practical Location of Boundaries.

In many jurisdictions, landowners may agree with one another as to their boundaries in disregard of their deeds, and in a way that binds themselves and their successors. This is called "practical location." n710 Practical location is limited by the general rule that an oral agreement is not effective to establish an arbitrary but already marked line for an unascertained or disputed boundary, n711 nor to change a known boundary line. n712 A boundary line established by adverse possession prior to the agreement is not uncertain and may not be established by oral agreement. n713 The rationale of these restrictive rules is that any oral agreement to establish a line other than the true or marked line constitutes a conveyance of land in violation of the statute of frauds. n714 Also, a definite boundary whose location is known cannot be changed by a parol agreement n715 in the absence of subsequent adverse possession in accordance with the new line. n716 A parol agreement between the owners of adjacent land, which has been partitioned between them, that they will disregard the boundary fixed by the partition and establish another line, violates the statute of frauds when unaided by adverse possession. n717

Courts generally favor boundary line agreements, n718 and therefore a few courts will enforce otherwise invalid oral agreements, n719 but most, because of the statute of frauds, will deny enforcement of an oral boundary agreement if the true boundary is known. n720 Practical location in some states consists of an agreement followed by taking possession. n721 In many states, where a dispute or uncertainty exists as to the true line, the agreement need not be evidenced by execution of formal instruments. n722 The agreement to settle a disputed line will be upheld n723 even if a line has in fact been established by acquiescence and is no longer actively disputed. n724 Under proper circumstances, there may be a practical location n725 of a doubtful boundary line by an agreement between the adjoining owners, followed by acquiescence in the location made and by occupancy in accordance with the location, and this will be binding on the owners and their successors. n726

Practical location is simply an actual designation by the parties of the monuments and bounds called for by their deeds, n727 and one owner cannot make a practical location with the other. n728 The mere fact that one owner knew of a survey and saw the actual setting of the stakes is insufficient to establish a practical location in the absence of proof that the owner agreed to the line or that improvements were made according to the survey. n729 Thus a boundary line may be established by agreement after controversy before the limitations period has run. n730 In other jurisdictions, however, practical location is recognized only where the parties have held to the agreed line for a sufficient time for prescription to run. n731

Practical locations do not act as a transfer of title, because this would violate the statute of frauds. n732 Instead, they are treated as fixing by agreement where the true line, as set out in the respective title claims, really is. n733 Hence the necessity that the line be in controversy or doubt. n734

The mutual promises of the parties are sufficient consideration to sustain an agreement to locate an uncertain boundary line. n735 The basis of a practical location is the intent of the parties to settle a questionable line. n736

Where there has been a bona fide dispute as to the true line and the parties have made, n737 acted upon and acquiesced

in a peaceful settlement, a legal line is established. n738 The agreement may be expressed or implied. n739 Adjacent landowners can only agree in writing for consideration on a boundary known not to be the true one. n740 If the agreement is based on an honest mistake, it is not binding upon the parties. n741 An agreement or acquiescence in a wrong boundary when the deed gave the true lines or they were known is treated as a mistake and is not binding upon the parties. n742 The location of a common boundary by a grantor is binding upon the grantees. n743

Practical location requires that there be a dispute or uncertainty in regard to the boundary line. That there is a question between adjoining landowners in regard to the boundary line is not enough to serve as the foundation of a valid and conclusive agreement between them. Thus, where a question arose as to the boundary line, and one of the parties expressed themselves as satisfied with the line of the survey, and a partition wall was placed upon the line, it was found that the line was not drawn and fixed as a compromise of any dispute between the parties, and that the true line was susceptible to demonstration by a survey correctly made. The agreed line was not, therefore, binding upon either party. The only effect of the agreement was that the parties were to accept and abide by the line established by the survey if it was the true line, and not otherwise. When it was shown that this was not the true line, either party was free to repudiate the erroneous line. n744

The rule that a parol agreement between owners of adjacent tracts of land that a certain line is the true dividing line is binding if accompanied by possession to the agreed line, or otherwise duly executed, and if the boundary is indefinite, unascertained or disputed, is in applicable where, at the time of the parol agreement, there is no line in dispute. n745 It is only where the true line is unknown or is difficult to ascertain, and the parties by agreement establish the line to settle a disputed and vexatious question as to the boundary line between them, that the parties are bound. n746

If the beginning point is definite, neither the intention nor the belief of grantors can change it. n747 Some courts have required that there be facts present sufficient to constitute an estoppel before a boundary "agreement" is considered effective. n748 Other courts require only that facts show that a contract was entered into by the parties. n749 An agreement may be presumed from long acquiescence. n750

There need be no actual dispute between the parties as a basis for an agreed line if the true boundary lines are in fact uncertain, and can be determined only by judicial inquiry. n751 Where one adjoining owner, in the absence of the neighbor, causes the position of a fence to be changed, the fact that the neighbor does not seek to put the fence back, but merely disputes it with the owner who made the change, does not estop the neighbor from demanding such restoration. n752 The owners of adjoining lands are not bound by an erroneous survey made at their request, without knowledge of the error. n753 Thus, to establish an agreed boundary line, it is necessary to show that there was an uncertainty or belief of uncertainty in the location of the line, that there was an agreement express or implied in fixing the line and that there was an actual designation of the line upon the ground and occupation in accordance with that line. n754 The dispute or uncertainty as to the true line is sufficient consideration for the making of an agreed boundary. n755

Silence during the making of a survey does not constitute an agreement to make the survey a boundary. n756 In order for an agreement to settle a disputed boundary line to be binding, there must be (a) a line sufficiently definite to be traced and (b) a definite agreement that this is to be the line. n757 The agreed upon boundary line must be definite, certain and clearly marked and must result from an uncertain boundary. n758

A line between adjoining lands marked by a fence and mutually acquiesced in by the adjoining landowners for ten years as the division line between their properties becomes the true line. n759 Where the location of a boundary line has not been established, or is otherwise doubtful, and the adjoining landowners orally agree to a survey and to be bound by the result, they are concluded by the line run by the survey. n760

There is a marked distinction between an undertaking to settle a dispute boundary, on the one hand, and, on the other hand, the mere consent of the parties to adopt a dividing line, in regard to which line no doubt or dispute has arisen and where both parties are mistaken as to the true line. The acquiescence or admission of the owner of land, made under a

mistake as to rights, should neither estop nor prejudice the owner from subsequently enlarging possession to the limits of the true title, provided no actual adversary possession has intervened to defeat the title. This has long been the settled rule. n761

Where adjoining owner deliberately erect monuments, fences or improve-ments on a line between their lands with the understanding that it is the true line, it amounts to a practical location n762 but the mere fact that an owner sets a fence within the owner's boundary does not give the adjoining owner the right to the land fenced out. n763 It must first be considered if the fence is merely temporary and erected without the intention of marking the boundary, so that it cannot be regarded as a boundary fence; also, it cannot be so regarded if its location is the result of fraud or mistake. Nevertheless, a practical loction may be along a wrong line, and either of the parties so making the location may be estopped to claiming the true line, n764 when the parties have acquiesced in the location over a long period of years. n765 While a landowner is not compelled to build a fence, where an owner builds a fence on a line laid out by surveyors, it is in a sense a monument which is held out as the true line and which will estop the builders from denying the right of innocent purchasers obtaining land to regard it as such after its establishment for many years. n766

It has been held that where a barn and a fence built on the rear line of a lot encroached on the adjoiner, and upon tearing down the barn a fence was built on the same line, a practical location was made by acquiescence and the adjoiner was estopped to claim to true line. n767 If one owner merely permits an adjoining owner to construct a fence on an asserted boundary line, the owner is not estopped thereby from questioning the correctness of such line. n768 If an owner of land repudiates a boundary which has long been observed, and insists on a survey to determine the line as fixed by the government, that owner cannot afterward insist on the location by acquiescence. n769 When a practical location is not induced by fraud or mistake, it concludes the parties and those in privity with them. n770 It has been so held where, after long acquiescence, a location was found to vary from the course called for in the deeds and grants under which the parties claimed before agreeing to the line. n771 However, an irregular pasture fence running from tree to tree on or near the line, and which was in a sense a practical location based on an error and acquiesced in, was held to not preclude either party from asserting the ownership of the land beyond the true line. A practical location made by a mutual grantor is binding on the grantees, n772 for it is presumed to be the line mentioned in the deeds. n773

An agreement that settled a disputed boundary is a finality and cannot be disturbed, even though the parties afterwards learn that the true line could have been found, or the parties were mistaken as to the true line. n774 The fact that a boundary line established by agreement of the parties is not the true boundary line, that the agreement does not correctly locate the boundary line, and that the parties to the agreement were mistaken as to its correct location, does not affect the validity of the oral agreement establishing the boundary line, and the parties will be held to the line agreed on. n775 A boundary line fixed by agreement of the adjoining landowners constitutes an "agreed boundary," in contradistinction to the "geographical" or "surveyed boundary." n776

After a disputed boundary has been established by agreement, a subsequent by the parties to the agreement and their privies, by the same description as that under which the title was acquired and possession held prior to the agreement, will pass the title according to the agreed boundary. n777 If the agreed line is marked by monuments, subsequent purchasers would be bound to take notice of them for this reason; n778 but, if the agreement is susceptible of clear proof, it is undoubtedly binding upon subsequent purchasers, even though there are no visible monuments of the agreed line. n779 An agreement between adjoining landowners, fixing their boundary, executed either by a marked line or by actual adverse possession, carries notice to all the world of the fact. n780 An oral agreement as to boundaries was binding on a subsequent owner acquiring title through tax deed. n781

The parties to an effectual agreement establishing a boundary line must be owners in fee of the lands contiguous to the disputed or uncertain boundary. n782 Only owners abutting on a disputed line may make agreement fixing its location, n783 and it has been held that a municipality as well as any other owner may by agreement determine the boundary line of its property. n784 While a mortgagor may make such an agreement, the agreement will not be binding on the mortgagee or those claiming under the mortgagee. n785

Location of boundaries by parties at or before the time of purchase is competent. n786 The fact that a purchaser of land has not yet paid the consideration for the purchase does not invalidate a parol agreement made by the purchaser with the adjoining owners fixing the boundary line between their lands. n787 An agreement between a vendor and a proposed purchaser fixing the boundary line between the part to be purchased and the part retained by the vendor, followed by the completion of the sale, taking possession, and making improvements in reliance on the agreement is conclusive upon the parties. n788

An agreement between a grantor and the grantee's husband fixing the division line between the land conveyed and that retained by the grantor at a line different from the one stated in the deed, in consequence of which the grantor extended improvements up to the new line, is not binding on the grantee when the agreement and the improvements were made without her knowledge. n789 The agreement or acquiescence of one heir does not bind the other heirs, who are all tenants in common of the property. n790 The location of a boundary line by an agent of the owner will not necessarily bind the owner in a subsequent controversy between the owner and an adjoining owner. n791

A mere intruder is not allowed to question the boundaries defined in a deed, and assert the title to a portion of the land to be in an adjoining owner, especially when it appears that the grantee by the deed has had long-continued possession of the land in accordance with the boundaries described in the deed. n792

Parol evidence cannot be admitted to establish an act as a practical location of boundaries. n793 It must be shown that boundary monuments were erected prior to or contemporaneously with the execution of the deed before such parol is admissible. n794 Where it can be proved that the grantor and the grantee went upon the land and made a physical survey of the land, giving a boundary that was actually run and marked, and a corner was made, the party claiming under the deed will hold according to the agreed line, notwithstanding a varying description. n795

A stranger to the chain of title cannot take advantage of a boundary agree-ment. n796 A common grantor may establish a line that is binding on the grantees and their successors. n797 Such a boundary line agreement may be implied as well as express. n798 A section line cannot be relocated by agreement. n799 A practical location is binding upon all successors in interest and privities to the parties, n800 but it does not affect adjoining landowners who are not parties to the agreement. n801

§ 90.03(a)(3) Fences as Boundaries.

Whether a fence line has been established as a boundary depends on the intent of the parties at the time the fence is constructed and on the parties' subsequent conduct with respect to the fence. A fence does not establish a line in the absence of an agreement to that effect. n802

A permanent division fence may have the effect of establishing conclusively the boundary line between adjoining owners. n803 Where a permanent fence was erected to mark the boundary line between adjoining owners, and for more than ten years had been regarded by the parties as being upon the true line, it was held to mark the true boundary between them. n804 A permanent fence built upon a portion of the line between adjoining owners does not entitle either of them to hold by adverse possession upon another part of the same line, when a temporary fence has been kept up varying from the line of the permanent fence. n805 A division line between lands of adjoining owners which is agreed on and thereafter recognized and treated as the true division line for fifteen years will be regarded by the court to be so located. n806 The fixing of lines by common consent and the recognition by adjoining owners involves an element of estoppel and mere acquiescence is not sufficient. n807

To become an established line, the fence must have been accepted as an agreed boundary and not merely as a barrier. n808 When parties agree upon a line, neither of them knowing the true line, but each intending to fix upon it, and each acting on the best information available, and not relying wholly upon the other, and each makes a mistake in locating the line, neither of them is estopped from asserting claim to the true line when this is afterwards ascertained. n809 Where one of two adjoining owners constructs a fence on what by mistake was supposed to be the boundary line between them, that owner is not precluded from afterwards claiming land outside the fence, in the absence of adverse occupancy thereof by the other owner for the prescriptive period under a claim of title. n810

The owner of a city lot, upon part of which a neighbor has constructed a building, is not estopped from asserting title to such part by the fact that the building construction proceeded without objection, where it appears that the lot owner honestly believed that the neighbor knew the correct location of the boundary line between their lots. n811

Even though one of two adjoining owners has been led to establish or acquiesce in the establishment of a line as the true boundary between the lots by the misrepresentation of the other, still the line is binding when purchasers from the misrepresenter make improvements relying on the supposed boundary. However, notice to such purchasers that the line is not recognized is sufficient to save the other owner's rights and the other owner need not take steps to prevent their trespass. n812 Acquiescence does not presume an agreement, either express or implied, but an agreement may be inferred from acquiescence. n813 One adjoining owner who is unwilling for a neighboring owner to construct a fence on an asserted boundary line, but who does not block such construction, is not estopped thereby from questioning the correctness of that line. n814

A tenant in common who, on partition, makes the allotment, fixes the amount of owelty, points out to the cotenant a boundary that is wrong, and permits the cotenant to make the election and pay the owelty without disclosing to the cotenant where the true boundary is, will be estopped to deny that the line pointed out is the true boundary, regardless of any fraudulent intent. n815

Where neighboring owners establish a line by mistake, believing it is the true line and not in settlement of a controversy, the mistake may be corrected. n816 Although there may be a mistake as to the location of the true boundary line, occupancy by one of the neighboring owners beyond such line and up to the line which is actually recognized as the boundary will give title up to the purported boundary when such occupancy has all the requisites of adverse possession. n817 However, if adjoining owners hold to a division fence or line under the mistaken belief that it is the true line, such occupancy, though continuous and uninterrupted, is not adverse. Such occupancy without the intent of claiming beyond the true line is no evidence of an agreement between such owners establishing the line of occupation as the division line between them. Possession in accordance with a division fence, built for convenience and not to establish a line, is not bar to a claim of title according to the true line. n818

An owner who does not know of the exact location of the boundary line is not deprived of title unless the opposing claimant has actually acquired title by adverse possession. n819 A court may infer from adjoining landowners' long-standing acceptance of a fence as the boundary between their lands that they agreed that such fence should be the boundary in case of uncertainty as to the true boundary line. n820

An ancient fence may be competent evidence of the location of a boundary line, n821 particularly where corners have been obliterated n822 or original monuments cannot be found. n823 The position of old fences may be considered in ascertaining disputed boundaries, n824 and the conduct of the parties with reference to old fences may be such as to justify the conclusion that the fences were established by agreement of the parties, or have been recognized by them for such a length of time as to determine the line of ownership between the parties. Fences built by adjoining landowners on the line of the street, according to stakes set by the surveyors soon after the original survey was made, and maintained for forty-five years, are better evidence of the location of such line than a new survey, made forty years after the original survey, which changes such line. n825 Ancient fences built on what were supposed to be boundary lines of the tract of

land in dispute and maintained for at least thirty years are held to fix the correct boundaries, as against modern surveys conflicting therewith and with each other. n826 But the weight accorded to ancient fences of the true line between tracts of land is not so great where such line was not at any time marked by original monuments. n827 Evidence that a fence was built according to stakes set by a surveyor who made the original plat and that the fence has been maintained on substantially the same line for more than forty years, was held to warrant the holding that the fence was built on the true line. n828 Evidence that there was a very ancient fence between the lots of adjoining owners, and that the fence has been maintained as it now stands for more than forty years, and that during such time the owners have openly and continuously held possession under a claim of right up to the line of such fence, warrants a finding that the fence was constructed by agreement of the parties; and a slight variation from the position of the boundary line as described in a deed made sixty years ago, when the land was of little value, does not affect the conclusiveness of the evidence. n829

A division fence maintained only for convenience is not evidence of the establishment of a boundary line, either by agreement, n830 acquiescence, n831 or adverse possession. n832 Thus, a brush fence maintained near the line between adjoining owners, and continued for forty years, but not at all times in the same place, does not bind either party to the line usually occupied by such fence. n833 Neither are the parties in such case bound for the reason that they have cut wood, or pastured their cattle, or mowed the grass, up to such fence, each on the party's own side, and never on the other side. n834

A fence between adjoining owners, placed by mistake on a line different from the true boundary line, does not estop the owner upon whose land the fence stands from claiming up to the true line; and the owner's grantee, under a deed conveying the land "bounded by the lands of" the adjoining owner, may claim title according to the true boundary line, and is not restricted to the line of the grantor's occupancy as shown by the fence. n835

A fence built by an adjoining owner nearly on the true line is not notice to the other adjoining owner that any portion of the other's land is enclosed. The other owner is justified in assuming that the neighbor is enclosing only the neighbor's own land, and the other is not estopped to claim to the true line. n836 Possession held under a mistaken impression of the location of the true line is not adverse, unless the party holds the property up to the line under claim of ownership. n837 If one takes possession of the land and holds it by mistake, with no intention of taking what the possessor does not own, that would not destroy the adverse character of the possession, if it was the possessor's intention to hold all that was possessed, believing it to be owned, n838 and therefore, the question of color of title does not apply in boundary disputes. n839 Hence where improvements have stood for over twenty-one years, title to the land covered by them is determined by adverse possession, and the excess or deficiency in the block cannot disturb the lines of possession so fixed; but if adverse possession is claimed by occupancy during a shorter statutory period, and the statute requires color of title, then the absence of such is fatal, and the shortage or surplus is to be apportioned. n840 Where a division fence is constructed under an agreement that in case a survey should determine that the fence line is not the true line, the fence line should be changed to the true line, possession of both adjoining landowners is permissive possession and will not ripen into a title by adverse possession. n841 In the absence of direct evidence, an uncertainty in the location of a boundary line and an agreement fixing the line may be deduced from the circumstances and inferred from the conduct of the parties, particularly from long acquiescence, but acquiescence must be in regard to a fence or monument as a boundary line, and not merely as to its existence as a barrier. n842

§ 90.03(a)(4) Center of Way as Dividing Line.

In most jurisdictions the state has only an easement or right-of-way on land used for highway purposes. The owner of the abutting land owns the underlying fee. Where land on each side of the highway is owned by different persons the title of each runs to the center, unless the highway was originally carved out of one tract alone. n843

It is an established rule that a conveyance of land bounded by or along an existing way, whether public or private, carries the title to the center of the way, subject, of course, to the public use of it as a highway, unless there be something showing an intent to the contrary. n844 Chief Justice Chase said, "It is a familiar principle of that law [referring to the statute law of Illinois regarding dedication], that a grant of land bordering on a road or river, carries title to the center of the river or road, unless the terms or circumstances of the grant indicate a limitation of its extent by the exterior lines." n845 The intent is to be gathered from the description, in connection with other parts of the grant, and by reference to the situation of the land, and the relation of the parties to the land conveyed and to other adjacent lands; and, if an intent to exclude the highway appears by the terms of the grant as interpreted by the surrounding circumstances, the title does not pass. n846 The intent to convey to the middle line of the highway arises from the presumption that the adjoining owners originally furnished the land for a right-of-way in equal proportions, and from the further presumption that such owner, in selling land bounded upon the highway, intended to sell to the center line of the street, and not to retain a narrow strip which could hardly be of use or value except to the owner of the adjoining land. n847 The public policy of discouraging separate ownership of narrow strips of land is the basis for the rule. n848 It is against public policy to allow hostile owners to own small strips of land that were created upon abandonment of a highway. n849

Generally, the rule that a conveyance carries to the center of a right-of-way unless the right-of-way is expressly reserved in a deed is a rule of conveyance, and not mere presumption rebuttable by parol evidence of the grantor's intent. n850 It is applicable even if the conveyance is by the state. n851 But it is sometimes spoken of as a presumption. n852 By public policy, description runs to center. n853 Various reasons are given for the rule, such as that "the way was taken out of the party that hath other lands adjoining," n854 and that the owner of the land laid out in lots and streets gets compensation for the streets in the increased value of the lots, n855 and so purchasers, one after another, pay for the street in paying for the lots. n856 Other reasons for the rule are the absence of practical use to the grantor of relatively small, odd-shaped parcels of land which would otherwise remain in the grantor's possession; n857 the greater value to the grantee who has acquired adjacent land, and who has an immediate interest in the properties adjoining; n858 the public convenience, which is best served by having control of highways and streets in the owners of adjacent properties, rather than in distant owners, who have no incentive to keep them up; n859 the concern of the state and other political units as to who shall determine and pay for improvements; n860 prevention of disputes regarding precise boundaries; n861 and the embarrassment and confusion which would prevail if a different rule existed. n862 The rule is the same whether applied to the streets of a city or to the highways in the country. n863

A grant of land bounded by a highway or river carries to the center if the grantor owns that far, in the absence of contrary language. n864 The reasons for the rule are variously assigned as public policy to prevent disputes and litigation over narrow tracts of land, n865 that a highway being a monument, the call should run to the center, n866 or that the small strip is of little value to the grantor as compared with the grantee. n867

The presumption that a deed carries to the center of an abutting road applies to private as well as public roads. n868 It also applies to railroad rights-of-way. n869

Where the fee to the roadway is in an abutting owner, the title is not a contingent interest or mere expectancy, but is a present ownership of the fee with full dominion. The owner has full dominion and control over land and all rights of the absolute owner of soil, subject only to easements and servitudes in favor of public. The owner may use land for purposes in any way not inconsistent with public easement. n870 A servient estate in a strip of land set apart for railroad right-of-way, highway, or other comparable public purpose passes with a conveyance of the fee to an abutting legal subdivision or tract out of which a right-of-way or other strip was carved, even though no express provision to that effect is contained in conveyance, and on abandonment of the strip for the purpose for which it was set apart, the dominant estate becomes extinguished and the entire title and estate vest in the owner of such abutting legal subdivision or tract. n871

This rule is generally applied equally to boundaries by public and by private ways and alleys. n872 Thus, in case land is laid out in blocks and lots as represented on a map or plat, and lots are sold bounded upon the projected streets, the deed passes the fee to the center of the street adjoining such land. n873 The grantor in such case is regarded as dedicating the ways to use as streets or ways, so far as the grantees are concerned, and the grantor is not allowed afterwards to say they are not streets or ways. The grantor's deed thus operates not only to create a street, but also, through the presumption arising from the fact that there is a street, to extend the grant to its center. n874 The rule of ownership to the center of a public highway does not apply to a public common, n875 nor to an abandoned railroad right-of-way bordered by two streets. n876

An intent to exclude an abutting highway will never be presumed, but must appear from the terms of the deed and be interpreted in the light of the surrounding circumstances. n877 The rule of construction is not uniform, for in some states strong language indicative of the intention to exclude a grant of the fee of the street is required to rebut the presumption of intent to grant the way. Thus, in several states the rule seems to be that nothing short of direct expression of intention to exclude the soil of the highway will have the effect of excluding it. n878 In these states the mere mention of the side of the road, or of a monument on the side of a road, as the place of beginning or end of a line, is not sufficient to exclude the road from the grant. n879 The fact that the monument at one end of the street boundary is stated to be in the line of the street does not necessarily require a construction that the fee did not extend to the center of the street. n880 Even a boundary by the south line of a street has been held to pass the title to the center line of it. n881 If, however, in addition to such words, there are other words or metes and bounds showing an intention to exclude the highway, such intention must prevail. n882 Thus, if two points on the side line of a street are fixed as the beginning and end of the course, the boundary will be the side line of the street. As respects a statutory presumption that the owner of land bounded by a road or street is presumed to own to the center of the way, where all contracts and deeds show the grantor's intention to reserve title to the way, title thereto remains in the grantor, and the grantor will be held to own all the road or street subject to easements granted. n883

The intention as regards conveying to the middle of the street is to be found not only in the terms used in the deed, but in the circumstances attending the transaction. Each case is to be decided in large part according to its own circumstances; n884 and intent to exclude the highway will never be presumed, but must appear from the terms of the deed as read and interpreted in the light of surrounding circumstances. n885 Thus, if a deed calls for a monument at the side of the street and thence "along the street," or "by the street," the conveyance carries the fee to the center line of the street, even though the distances may reach only to the side line. n886 It is to be remembered, however, that this presumption is a rule of construction and is to be applied to ascertain the intention of the parties n887 as determined by the consideration of the language used and such circumstances as may be properly considered, such as reference to the situation of the lands and the relation of the parties to them. n888 The presumption yields to language showing a contrary intention. n889 Thus, a description commencing at the intersection of the northerly side of a street with a creek, shows an intention to exclude the fee of the street. n890 A manifest intention not to grant the fee to the center of the street was shown in a case where a town granted to the owner of land bordering on a highway, the fee of which was in the town, a strip of land from the highway, and discontinued such strip as a part of the highway. n891 Where the deed clearly shows, in conjunction with the surrounding circumstances, that the grantor of land bordering on a street the fee of which the grantor owns, intends to reserve the fee in the street, such intent will be given effect. n892 The mere fact that the land is not described as abutting or bounding on a highway, and that the highway is not mentioned, does not prevent the application of the rule if in fact the land borders on it. n893 Thus, where the property conveyed was described as a store building, and the land on which it stood in fact bounded upon the highway, the mere fact that the highway is not mentioned does not vary the general rule that a conveyance by a highway carries the fee to the center of it. n894

When a conveyance is made of lands abutting upon a public highway, and the deed contains no words of exception or reservation, or any language expressing a contrary intention, the presumption arises that the fee to the center of the highway passes to the grantee as a part of the grant. n895 Where the grantor owns the fee of the entire street, a presumption arises that, upon a sale of land bounded upon the street, the grantor intended to convey the fee in the street

to the opposite boundary, if the grantor owns no land on the opposite side of the street, and did not intend to retain an interest in any portion of the street fronting the land so conveyed. n896 If a highway be laid off entirely upon the land of the grantor, running along the margin of the grantor's tract, the fee in the whole of the soil of the highway vests in the grantee. n897 Thus, a conveyance of a lot abutting on a street adjacent to a river bank carries title to the stream rather than to the center of the street, if such is the grantor's intention. n898 If there is no property susceptible of private ownership beyond a public street, a conveyance of lots fronting on such street passes the fee to the entire street, unless the terms of the grant of the circumstances limit the grant to the center of the street. n899 Of course, if there is any reason for supposing the grantor did not intend to convey the fee of the entire width of the street, such as where the grantor has an interest such as riparian rights in the land on the other side of the street, then the ordinary presumption will apply, and the grantee will take the fee only to the middle of the street. n900 The rule that the grant of a lot in an original plat of a village bounded on a street is presumptive evidence of an intention to convey title to the full width of the street, and to the shore of a lake opposite the street, has been held not to apply to a conveyance made after the street had been vacated. n901 A deed conveying the blocks on each side of a street passes the title to the fee of the street to the grantee. n902

Whether a deed passes the fee in a road which runs across the land conveyed is a question of intention and in determining such question the court may look beyond the words of description contained in the deed and consider the location of the land, the purpose of the deed, and the circumstances under which it was made. n903 Where a grantor laid out a street through the land and divided into lots all of such land abutting on the south side of such street and the deeds to such lots described them, in each instance, as lying on the south side of the street, the title to the bed of the street remained in the grantor. n904

A deed merely describing land as situated on the side of a street passes the title to the center of the street, n905 and so a deed describing land as "beginning on the southerly side" of a road, at the corner of land belonging to a third personal named, and thence running on said road, conveys the title to the middle of the road. n906 In these cases no fixed monument, such as a stake and stones at the edge of the road, is referred to, and there is nothing to prevent the application of the general rule. In case a stake and stones referred to are not to be found, it seems the title to the center line of the road would pass. n907

On the other hand, some of the cases go even to the extent of holding that the point of intersection of two streets taken as a starting point may indicate an intention to exclude a grant of the fee of a street. The point thus established is regarded as controlling the other parts of the description, and lines running thence along the streets are confined to the exterior lines of the streets, and the soil of the street is not included. n908 So, it is held that if the deed clearly expresses that the side line of a street restricts the conveyance, the presumption is clearly overcome, and the street is excluded. n909

The fact that the measurements of the side line reach only to the outer line of a highway is not sufficient to control the presumption of an intention to convey the fee to the center of the highway. n910 Thus, proof that the distance stated in the description of a deed conveying land bounded on a way do not extend to the center of the way is not enough to exclude the operation of the rule that a deed conveying land as bounded on a way conveys title to the center thereof. n911 The use of the words "thence along said road" in the boundary description of land conveyed has been held to mean "thence along the center of said road." n912 If it is clearly expressed that the side line of a street restricts the conveyance, the presumption is clearly overcome, and the street is excluded; n913 and where a deed describes land as "beginning at a certain point" and running "to the road" and thence in "line of road" the measurements being exact and reaching only to the side of the road, it has been held that the title does not include the highway. n914 A grantee under a deed describing the land by metes and bounds without reference to a highway, but intended to convey to the highway, acquires title to the fee under the highway. n915 Where the description carried the parcel so many feet to a street named, "thence along the northerly side of said street," it was held that the fee of the street to the center passed by the deed. n916 Where a description by metes and bounds beings "at a point" on the exterior line of a highway, and returns thereto, it has been held to evince an intention that the grantee shall take to the side line of the highway only. n917 The

presumption of a conveyance to the center of the street is not rebutted in case of a boundary by a road "to a stone wall," and thence by the wall, by the fact that the wall terminated at the side of the street. In such case the boundary is by the center of the road to the line of the wall extended. n918 A boundary by "other land of the grantor on a passageway," when in fact there is no passageway and the only reference to it is in this description, includes no part of any passageway. The boundary is controlled by the measurements. n919

A deed of land by a plat showing a street or alley as a boundary conveys the title to the center of the street or alley, provided the grantor's title extends to the center. n920 So it is generally held that a conveyance of land bounded on a highway, street, or alley carries with it the fee to the center thereof, subject to the public easement, provided that the grantor at the time of the conveyance owned thereto and there are no words in the deed showing a contrary intent, regardless of whether or not the highway, street, or alley has been accepted or opened. n921 Even if the grantor retains the fee of the streets, the grantee acquires a right-of-way over them as an easement appurtenant to the land conveyed. n922 There is no presumption that a conveyance carries the title to the center of a street after the street has been vacated. n923

Where the city had issued a permit to an abutting property owner to connect water, the city was liable for a person injured in an excavation between the sidewalk and the curb. n924

In two or three states this rule does not apply, where the plat is made out and recorded in conformity with the statutes of such states upon that subject; but this is because the courts of those states hold that the statutes vest the entire title, beneficial and otherwise, in the city, town, or county, so that the dedicator has no interest left in the land which is the subject of grant. n925 Under such a statute the fee in the streets is held in trust for street purposes, and for no other use of purpose. Every other beneficial use is in the lot owners, and this interest of the lot owners will pass by a conveyance of the lot. n926 The conveyance of a lot facing on a street set apart in the plat for the use of the owners of the lots abutting thereon conveys only an easement in the street. n927 Adjacent landowners do not own to center of a public common. n928

Where owners of a tract of land create a railroad right-of-way and later dedicate a street adjoining the right-of-way, a subsequent grantee of the land abutting on the other side of the street takes to the center of the street but not to the middle of the right-of-way. n929

The rule that a conveyance of land on an alley carries with it ownership of a fee to the center thereof if the grantor owned to the center and there are no other words in the deed showing a contrary intent applies whether or not the alley has been open or the dedication accepted. n930 The cases are divided as to whether the line runs to the center of an alley platted but vacated before the date of the conveyance. n931

A deed carries to the center of a projected road, even though the road was never opened or was abandoned. n932 If the highway is laid off entirely on the grantor's land so that the grantor owns the underlying fee, the later conveyance of the adjoining land carries title under the entire highway right-of-way. n933 It is the weight of authority that regardless of whether the way referred to actually exists as such, where a way is called for as the boundary in the conveyance of land and the grantor owns the fee which is covered by the way, the grantee acquires an easement in the way named and the grantor is estopped to deny that the way exists. n934 However, the deeds of conveyance may be such as to deny the grantee an easement in the abutting way. n935

§ 90.03(a)(5) Court Determination of Boundaries.

In some states special statutory proceedings are used to establish disputed boundaries. n936 In these proceedings the function of the statutory officials may be to find ancient boundaries rather than to determine and fix new lines. n937

Generally a court of equity has no jurisdiction to fix boundaries merely because they are disputed or uncertain. To give such jurisdiction there must be some equity interjected by the acts of the parties or their situation or relation. n938 A court of equity has no jurisdiction to determine disputed questions of boundary, except as incidental to the granting of some equitable relief. n939 It has been held, nevertheless, that equity has jurisdiction to determine disputed boundary lines, n940 notwithstanding acts of ownership that may have been done by the respective parties, or that the suit may be a substitute for an action at law to settle the ownership of a strip of land. n941 A demurrer for lack of equity to a bill to correct a boundary line was held properly overruled, since, though the controversy might have been settled in an ejectment suit, equity had jurisdiction to settle it. n942

A suit in equity to determine controverted boundaries of adjacent parcels of land may be maintained where the confusion results from the defendant's fraud or misconduct, or the defendant breaches a duty to preserve a marking line, or where the settlement of a boundary cannot be had at law without a multiplicity of actions. n943 Equity has jurisdiction to establish boundaries which have once been defined and established but have become lost or obliterated, where the owners of the adjacent premises are responsible for the loss or obliteration of the boundary, and to prevent a multiplicity of suits. n944

Even in case there has been a mistake as to the boundary line, and one owner has placed a building a little over the line upon land of the adjoining owner, a court of equity will not order the removal of the building, but will leave the party to the remedy at law. The court may, however, enter a decree that, if the plaintiff will release the strip of land so built upon within a certain time, judgment shall be entered for the value of the land as found by a referee, and costs. The court will not aid the plaintiff in obtaining an exorbitant price for land which is comparatively valueless except for purposes of litigation. n945 Where adjacent landowners have a dispute over the location of their boundary line, the remedy is either ejectment or an action to establish the boundary. n946 Under some statues, however, equity has jurisdiction to determine a disputed boundary, though the title to the land is incidental thereto. n947 A court of law will declare the meaning of a description in a deed when the real intent of the parties can be gathered from the whole description in a deed by a reasonable construction of the instrument. n948

Boundary questions may be adjudicated in a suit brought in the statutory form of trespass to try title. n949 Some statutes permit courts to direct the running of lines to determine boundaries. n950

An agreement to submit to arbitration a question of boundary is valid, n951 the decision of the arbitrators being binding upon the parties concerned, even though there is no written agreement, n952 and the award made thereunder will be subject to impeachment only as in other arbitration cases. n953 The award is regarded as an adjudication by a tribunal of the parties' own choice, n954 and is not to be set aside for errors of judgment; n955 if it conforms to the submission, it may be impeached only for fraud, partiality, misconduct, or gross mistake on the part of the arbitrators to the evident injury of the party claiming it, n956 and it cannot be impeached for irregularities not objected to at the time. n957 The decision may be impeached upon the grounds that the arbitrators exceeded their authority and that the award was not within the submission, or that they acted under a miscomprehension based on erroneous interpretation of the intention of the parties to the agreement. n958 Neither a conveyance nor an order for a conveyance is essential to the validity of the award, which acts as an estoppel and precludes the losing party and those claiming under that party from denying the superior title of the successful party. n959

A division line between adjoining owners established by the award of referees, under a written agreement entered into by them for the purpose, is binding upon them where possession of the land is taken and held by them respectively under the award. n960

An award on an oral submission as to the division line between adjoining pro-prietors is not conclusive between them

unless followed by an acquiescence for a time sufficient to give title by prescription. n961 Fence-viewers have no official authority to establish a disputed boundary line, so their establishment of one is merely an award on an oral submission, or a parol contract between the parties. n962

A written agreement merely providing for a survey at joint expense does not bind the parties thereto to the boundary established, and if one party adopts the line so run and builds in conformity with it, the other party is not thereby estopped from claiming that it is not the true line, if it does not appear that the claiming party knew the other was incurring expense upon the faith of a supposed agreement in regard to the line so run as the true one. n963

A boundary line fixed by a surveyor employed by various property owners is not binding upon an owner who was not a party to the surveying and who never acquiesced in the line fixed by the surveyor. n964 Where two adjoining owners agreed that two surveyors, one selected by each, should run a boundary line between their lands, and the line was run in the presence of both landowners, neither of whom objected, the running of such line was an award conclusive upon both. n965 Where adjoining owners agree to have a disputed boundary located by a surveyor and to abide by the location made, they will be bound by such location if it appears that some definite survey was made approximating the proper method, or that the parties acquiesced in and recognized the line located. n966

§ 90.03(a)(6) Admissibility of Evidence to Establish Boundaries.

The destruction of a monument does not affect its identity if its previous site is capable of location. n967 Ancient boundaries and landmarks may be established by traditional evidence. n968

The declarations of deceased persons made when they were in possession of land and in the act of pointing out their boundaries are admissible in evidence as to those boundaries when nothing appears to show an interest to deceive or misrepresent. n969 Statements made by persons when pointing out boundaries are admissible when those persons are not available as witnesses. n970 The declarations as to boundaries made by a deceased person while living are admissible where the person is shown to have had an actual knowledge on the subject, and there was no inducement for the person to misrepresent, n971 regardless of whether the person owned the land or adjacent land at the time the declarations were made, n972 and there is no reasonable probability, because of lapse of time, that testimony could be obtained from persons having actual knowledge thereof. n973 It need not appear affirmatively that the declarations were against the interest of the person making them, n974 but they must be so in fact, n975 or it must at least appear that such person had no interest to make false representations; n976 and it must appear that the declarations were made by a former owner in possession of the land at the time, n977 in the act of pointing out the boundaries. n978 The declarations must be those of a person who has since deceased. n979 The declarations derive their force from the fact that they accompany the act of pointing out the boundaries, and are thus a part of the act. n980

The declarations of a surveyor, subsequently deceased, made on the spot while running or pointing out a line are admissible to identify the monuments of a survey. n981 Thus the declarations of a surveyor while making a survey have been admitted to identify a monument pointed out by him as a corner of the same survey, established in making the original survey many years before, in which he had participated before he died.

The decisions in South Carolina and Texas have gone so far as to admit not only evidence of the declarations of a surveyor made while surveying the land, and since deceased, but also those of a chain bearer who had pointed out to the witness the place of a corner, and subsequently died. n982 The acts and declarations of a surveyor while surveying an adjacent lot, upon the question of boundary, are admissible, the surveyor being now deceased, and having no interest to misrepresent at the time of such survey. What the surveyor did and said at the time the surveyor found the corner of the

land in question may be regarded as something more decisive than the expression of a mere opinion. n983

In some states the declarations of a surveyor or other disinterested person, since deceased, are admissible in a controversy about a survey line, if the person was in a position to know the boundary line, corner, or monument, and the declarations were made before the controversy commenced, n984 provided the declarations were made while the declarant was pointing out or marking the boundaries, or discharging some related duty. n985 More generally, however, and upon sound principles, the rule is restricted to the admission of declarations only when made by persons owning the land and being at the time in possession of it, n986 and even then the declarations must be either a part of the matter at issue, n987 or be made against the interest of the owner. Thus the declarations of the owner, while standing on the land, in the owner's own favor, are not competent evidence in favor of one claiming under the owner, to prove right-of-way over adjacent land of another person. n988

The declarations of a surveyor made while engaged in making the survey are held admissible as a part of the matter at issue, and it is not necessary to prove the surveyor's subsequent death. n989 Surveys by the same surveyor made at about the same time as a survey in dispute, and locating the same lines, are admissible as declarations of the surveyor, who is dead; n990 but declarations of a surveyor, since deceased, who was not present at or connected with the original survey, are inadmissible though the surveyor took part in a subdivision of the survey. n991 A surveyor cannot testify to a boundary unless the surveyor produces the data of the survey. n992

In establishing a boundary years after the survey, a court may admit any evidence tending to establish the place where the original surveyor ran the line, which is the best evidence of which the case is susceptible. n993

The opinion of a witness as to the location of a disputed division line is incompetent testimony, though the witness had long been intimately acquainted with the premises. n994 The opinion of surveyors to the effect that, when the land was originally surveyed, only one line of the survey was actually run, is inadmissible. It is the province of the jury to conclude from the facts proved whether the lines were actually run or whether the survey was merely an office survey. n995 The rule that monuments which are not called for in the filed notes cannot be considered for the purpose of locating the footsteps of the surveyor does not apply where a witness who accompanied the surveyor testifies that such monuments indicate the line marked by the surveyor. n996

Traditional evidence is now generally admissible to prove boundaries. n997 Evidence of common reputation and understanding, so far as it definitely exists, is admissible to prove the location of private boundaries. n998 In some states, ancient boundaries in dispute, whether public or private, may be proved by the common reputation and understanding of the neighborhood where the land lies. Such reputation or understanding, to be admissible, must be shown to be general and concurrent, and it must have been in existence before the controversy commenced in which it is used as evidence. n999 Such proof must also show the boundary with reasonable certainty. n1000

Where the location of a private boundary depends upon showing the original section line, this may be shown by proof of general reputation. n1001 Common reputation of the location of boundaries is received, provided it had its origin at a time comparatively remote, and attached to some monument or natural object, or is fortified by evidence of occupation and acquiescence giving the land a definite location. n1002

If the field notes of a survey are inconsistent or uncertain, the true location of the survey may be shown by the testimony of the surveyor who made it. n1003 A plat made by that surveyor may be admitted in evidence to explain and illustrate the surveyor's testimony in regard to the lines and measurements the surveyor has made. n1004 The surveyor may use such map in explaining the surveyor's testimony, which would not be clearly intelligible without it, though the plat is not shown to be correct or official. n1005

If it is apparent on the face of the field notes that there is a mistake in them, it is not competent for a witness to state that there is such a mistake. n1006 This must be determined from the paper itself. Where natural or artificial objects are

called for in the field notes of official surveyors, the presumption is that such objects actually existed n1007 at the places indicated by the field notes. n1008 If, however, the survey was a mere chamber or office survey, the calls for such objects afford but slight evidence of their existence. n1009

In establishing a boundary years after a survey, the court may resort to any evidence tending to establish the place where the original surveyor ran a line, which is the best evidence of which the case is susceptible. n1010 An ancient survey qualifying as a public document is admissible. n1011 The testimony of persons who saw monuments now lost is admissible to locate those monuments. n1012

COMPUTER-ASSISTED RESEARCH

LEXIS: Boundar! w/10 (eviden! w/20 admissi!)

§ 90.03(a)(7) Acquiescence in Establishing Boundaries.

A substantial line of authority relies upon the doctrine of acquiescence by adjoining landowners for a long period of time as being sufficient to establish a boundary line, even though it does not correspond with the original true line. n1013 Acquiescence differs from practical location in that no agreement is present. Instead one party lays out the line and the other does not dispute it. It may or may not require dispute or doubt as to the true line and may or may not require a holding for the full period of adverse possession. Estoppel requires either of the three elements of an estoppel in pais, i.e., equitable estoppel: (a) a holding out, (b) a reliance thereon, and (c) injury, or estoppel by document. n1014

The essence of the doctrine of fixing a boundary by acquiescence is the implied agreement by the parties that the fence or other boundary is the true line. The failure of the parties to object is essential and the doctrine is a mixture of implied agreement and estoppel. n1015 The adoption of a division line by acquiescence is distinguished from adverse possession and rests upon a different factual situation. n1016

The doctrine of acquiescence rests on a public policy that seeks to avoid litigation over boundary lines. n1017 While the interests of society demand that title shall not be transferred for slight cause and except as required by law yet the same interests favor stability of boundaries. n1018

Sometimes acquiescence is considered a type of estoppel. n1019 In other states acquiescence is an independent doctrine. n1020 Mere acquiescence in a boundary line is not of itself sufficient to constitute it the true line or to prevent the owners from disputing it unless the acquiescence results from an agreement based on a doubt or dispute between the parties. n1021

As in practical location, the cases are divided as to whether acquiescence can be established short of the period of the statute of limitations. n1022 There is also dispute as to whether possession up to the line is required. n1023 The cases further lack accord as to whether acquiescence is a legal conclusion or merely evidence of establishment of a line. n1024 Under some cases acquiescence is actually evidence of an agreement to establish a line.

Some cases decline to recognize acquiescence as a method of establishing a boundary line and require either a boundary agreement n1025 or elements of estoppel. n1026 Acquiescence is a question of fact, n1027 and each case must furnish its own holding, to be deduced from its own facts and circumstances. n1028 Acquiescence, under circumstances not amounting to an estoppel, is a mere fact to be considered by the jury in determining the true location of a boundary line. n1029

Where there was a dispute as to the division line, and one of the adjoining owners occupied the disputed land, and the other, because misled by the adverse claim and by advice received in reference to it, acquiesced for less than twenty years in such occupation, the adjoining owner was not estopped from asserting title. n1030 If an owner ignorant of his

true boundaries by mistake acquiesces in a line as a boundary, the owners and grantees are not thereby precluded from afterwards claiming to the true line, n1031 and it has been held that one who has no knowledge that the adjoining owner has encroached upon the land cannot be held to have lost his rights by acquiescence in such occupancy no matter how long continued, for one cannot waive or acquiesce in a wrong while ignorant that it has been committed, n1032 especially where each party has equal means of ascertaining the correct line. n1033

Acquiescence requires the consent of both landowners. n1034 A line established by acquiescence is binding on successors in interest if sufficient time has elapsed. n1035 The line established by acquiescence must be definite and certain and not speculative. n1036

Some of the cases confound acquiescence and practical location and require a dispute as to the true line before acquiescence is applicable. n1037 Others merely require that the line be uncertain. n1038 Others do not insist that either dispute or doubt be present in all cases. n1039 Boundaries by acquiescence are established only after the parties become aware of a dispute. n1040

An agreement or acquiescence in a wrong boundary line where the true boundary is known or can be ascertained from the deed is treated as a mistake and does not establish title. n1041 So where the true line is known the principles of adverse possession must apply to transfer the title. n1042

A division line established by the admission of one of the parties, and acted upon by the other, may estop the former from denying that it is not. Thus, where one of two adjoining landowners, for the purpose of enabling the other to locate a division fence, pointed out a line as the true dividing line between them, and the latter, relying upon this information, built the fence and cultivated the land and made improvements up to this line, it was held that, as against the latter, the former proprietor and grantees were estopped to claim that a mistake had been made, and the line established was not the true line. n1043 Where a landowner surveys a boundary line for his land, which is publicly marked, and sells land with reference thereto, that other is estopped from denying the correctness of its location as against one purchasing with reference thereto. n1044 An agreed location may be inferred from long standing acceptance by the parties as to the line. n1045

Many cases hold that acquiescence in a boundary line for a shorter period than that fixed by the statute of limitations is not conclusive on the owners of abutting land. n1046

A boundary line between a public highway and an abutting owner cannot be fixed by acquiescence, for no one representing the public is authorized to acquiesce in any particular location. n1047 When the statement of the boundaries is indefinite, much weight is to be given to the construction put upon the deed by the parties themselves through their acts and admissions. n1048

Ratification or equitable estoppel is the basis of the doctrine of acquiescence, n1049 and such doctrine may apply even though the adjoining owners, actually thus locating a different line, did not intend any line other than that fixed by their deeds or patents. n1050 Where, however, a boundary line has been definitely established, mere passive acquiescence will not establish a different line on the principle of practical location. n1051 The boundary line between a highway and land abutting thereon cannot, as against the public, be fixed by acquiescence. n1052

A boundary agreed to by adjoining landowners' predecessors, where the agreement did not remain unchallenged for a period equal to the statute of limitations and it was not inequitable to disregard the agreement, is no defense to an action to quiet title. n1053 The doctrine of acquiescence is not applicable where only evidenced by actions or words prior to knowledge of encroachment. n1054 In other states, however, a boundary may be established by acquiescence over a period of time shorter than that required for adverse possession. n1055

The rule of acquiescence appears to have been adopted as a rule of repose, for the purpose of quieting titles, and

preventing the uncertainty, confusion and consequent litigation which would be likely to result from the disturbance of boundary lines so long established. n1056 Where a corner, or a line, supposed to have been established by the government in the surveys of public lands, has been acquiesced in by adjoining owners of such lands for many years, and improvements made, and the land broken up to the line thus established, there is a presumption in favor of such corner being the true one, which can only be overcome by clear proof that it was not established by the government. n1057 In other states, however, acquiescence does not establish a legal line where there is no other evidence than the acquiescence of an agreement fixing the line and the acquiescence was the result of mistake. n1058

Where the exact location of a boundary line is not definitely known, a dispute involving the boundary line must be determined by looking to the conduct of the parties with reference thereto. n1059 Thus, long acquiescence by the owners of adjoining lands in the location of the dividing line between their lands may, in effect, establish such line, if the acquiescence be for a period of effect, establish such line, if the acquiescence be for a period of time equal to that fixed by the statute of limitations. n1060 When there is honest mistake as to boundaries, adverse possession runs. n1061 While some courts permit the fixing of boundary lines by parol, n1062 others by reason of the statute of frauds decline to so do where there is knowledge of the true boundary. n1063 Under the one theory title may be acquired to a boundary line by acquiescence short of the statutory period of limitations. n1064

In the absence of direct evidence, an uncertainty in the location of a boundary line and an agreement fixing the line may be deduced from the circumstances and inferred from the conduct of the parties, particularly from long acquiescence, but the acquiescence must be in regard to a fence or monument as a boundary line, and not merely as to its existence as a barrier. n1065 In general, acquiescence depends on the words, declarations, or silence of the parties or inferences and presumptions of their conduct. Acquiescence exists where a one who knows of being entitled to impeach a transaction or enforce a right neglects to do so for such a length of time that, under the circumstances of the case, the other party may fairly infer that the first has waived or abandoned the right. n1066 Where it was shown by uncontradicted evidence that the parties and their predecessors in title acquiesced in the dividing line for several years, such acquiescence operated to establish the line. n1067 It has been said that a supposed boundary line, long acquiesced in, is better evidence of the true location of the line than any survey made after the original monuments have disappeared. n1068

The distinction should be kept in mind that acquiescence in a boundary line without any agreement is not conclusive, unless it is continued under circumstances of adverse occupation long enough to give title by adverse possession; while acquiescence in a boundary line which, by reason of uncertainty or dispute, the parties have established by agreement, need not be continued for any definite time. n1069 Acquiescence in a wrong boundary line will not establish it as the true line, but such acquiescence for a long period of time is evidence that such line is the true line. n1070 It has been held that a boundary may be established by acquiescence for a period of twenty, n1071 fifteen, n1072 ten, n1073 and seven years. n1074 The acquiescence is, then, of importance only as showing the agreement. n1075 A survey of lands intended to locate a boundary between adjoining lands, followed by acquiescence and possession by both adjoining owner to the line thus located, is evidence of the verity of such line, without regard to limitations. n1076

Where an assumed or agreed boundary is located through mistake and there is no intent to treat it as an agreed line, it is not binding upon the parties. n1077 The establishment of a boundary line by adjoining owners may be without binding effect, if such owners were mistaken as to the actual location of the true line. n1078 The acquiescence of the owners of adjoining lands to a line created by a fence is only evidence of an "agreed boundary line," but not conclusive. n1079 Acquiescence in a boundary line may be implied by reason of use over a period of time shorter than that required for adverse possession. n1080 An agreement or acquiescence in a wrong boundary when the true boundary is known, or can be ascertained from the deed, is treated both in law and equity as a mistake, and neither party is estopped from claiming the true line. n1081 Accordingly, where adjoining landowners employ a surveyor to run the boundary line between the lands, not because they have a dispute about it, but merely because they are ignorant of its exact location, the line so run, if incorrectly located, is not conclusive on the parties, even though they acquiesce in it, believing it to be correct. n1082 Where both parties acquiesce, the line becomes the legal boundary, though both parties were acting under an honest mistake and there was no intent to hold adversely. n1083

Where the owner of land, desiring to break it, calls upon the owner of adjoining land to point out the boundary between them, and the latter indicates what is supposed to be the line, no estoppel is created against such adjoining owner to claim the true line if different from the one pointed out. n1084 It is universally recognized that acquiescence necessitates a knowledge of facts which will enable a party to take effectual action, n1085 and, therefore, on these grounds it is rightly held that where a landowner in good faith points out to the owner of adjoining land an incorrect boundary line, both parties being ignorant of the true line, the first owner is not estopped from denying such line as the true boundary. n1086

There is disagreement among the courts as to whether acquiescence itself establishes a line or whether it is merely evidence of an existing boundary line n1087 not based on mistake. n1088 When the line has been established by acquiescence, all land included within it passes with a conveyance of the property to which it has become attached. n1089 The United States government is not subject to the doctrine of acquiescence, n1090 nor are the state governments affected by the doctrine.

LEXIS: Boundar! w/10 acquiesc!

§ 90.03(a)(8) Estoppel to Deny Boundary Lines.

A number of the courts uphold parol boundary agreements upon the theory of estoppel. n1091 In some instances this is the case where the three elements of an estoppel in pais are present, a holding out, a reliance thereon and injury. n1092 Other cases speak of estoppel without anything being present except the agreement. So the parties to a verbal agreement establishing a boundary, where its correct location is in dispute, are bound by the agreement and each is estopped to deny the location of the line. n1093 If a boundary line is in dispute the parties may agree upon a boundary. If there is no bona fide controversy then adverse possession must be completed to pass title. n1094

In these states, even though title to real estate cannot be transferred by a verbal agreement, yet, where a boundary between contiguous lands is uncertain or disputed, the respective owners of such lands may verbally agree on a certain line as the permanent boundary line. n1095 An oral agreement fixing a dividing line between adjoining owners is not within the statute of frauds, if the dividing line had been in doubt or dispute; and the agreement may be enforced both in equity at law. n1096 Such agreement is not regarded as passing the title to any real estate, but merely as defining the line between such owners, n1097 Abecause that can only be done by deed properly executed; but such settlement determines the location of the existing estate of each, and, when followed by possession and occupancy, binds then, not by way of passing title, but as determining the true location of the boundary line between their lands." n1098

Where the location of a boundary line is uncertain or in dispute, an oral agreement determining the question will not be invalid under the statute of frauds, at least when possession is subsequently maintained with reference to the agreed line. n1099

Where adjoining owners have established a dividing line by a parol agreement, and have executed the agreement by taking actual possession of the parts allotted to them, respectively, up to the agreed line, and have for a long time recognized that line as a true dividing line, there is an estoppel to claim otherwise. n1100 If the parties have carried the agreement into execution, and entered into possession in accordance with it, the courts will not disturb it, even if both parties were mistaken as to the true location of the line. n1101

The courts actually encourage such private settlements as a means of suppressing litigation. n1102 To make the agreement effective, however, by way of estoppel, it is necessary that the line established by agreement should be followed by possession according to that line. n1103 It is not necessary that possession under the agreed line should be

had for the statutory period of limitation to give validity to the agreement, even though the agreement derives additional weight by long acquiescence. n1104 Where disputed boundary lines have been established by express agreement, and the parties have recognized them and expended large sums of money under the agreement, they will be upheld, although title by adverse possession has not be acquired. The application of the doctrine of estoppel as to a voluntary adjustment between contiguous lands is not within the statute of frauds, n1105 because no estate is created. n1106

Parol evidence is admissible to show the location of a boundary line established by agreement between the adjoining landowners. n1107 In case one of the parties at once repudiated the line as fixed, and retained possession of the land in controversy, and there has been no possession acquired or taken by the other according to the line claimed to have been established by the agreement of the parties, it is clear that there has been no practical location of the line by which the parties are estopped. n1108

A party may, by acts and conduct, be estopped from questioning a boundary line acted upon by another even though such line is not the true boundary line. n1109 Where the defendants in 1932 witnessed the rebuilding of a fence on the line adopted by their predecessors in interest as the correct boundary and acquiesced in that line for eight years, they were estopped to asset that the fence was not on the true boundary line. n1110 A boundary agreement which did not set out true boundary is binding on one who came into title through a tax deed (which did not vitiate the boundary agreement) and succeeding mesne conveyances. n1111

An estoppel does not arise from an agreement to deviate from a known boundary, since this is treated by the courts as a mistake. n1112

Construction of improvements alone is not sufficient to establish a boundary line in the absence of an agreement. n1113

§ 90.03(b) Boundaries Related to Water.

§ 90.03(b)(1) Title to Bed of Body of Water Determined by Question of Navigability.

Where a flowing or stationary body of water is given as a boundary in deeds, the great weight of authority distinguishes between navigable and nonnavigable water. Distinction is also made between fresh and tidal waters. A call to such a body of water creates five possibilities as to the boundary: high watermark, low watermark, the meander line, the center line, the trend of the stream or the thread of the stream.

The question of what are navigable waters depends on their capacity for navigation, not their actual usage. n1114 High watermark is the line which the water ordinarily covers for periods of time sufficient to destroy vegetation. n1115

The question of whether a description in a deed carries title underneath the surface of abutting fresh waters depends to a considerable extent on whether such waters are navigable or nonnavigable. Basically, if the waters are navigable or are "public" the state or the federal government owns the bed while the title is in private ownership if the water is nonnavigable or nonpublic.

The great weight of authority does not stop the line at the water's edge if the body of water is nonnavigable but carries it to the middle of the stream. "Navigability" is actually used in two senses, one to determine rights to the bed of the body of water, the other governing the problem of whether or not the state or federal government can control right of commerce, flowage and other riparian rights. So a federal finding as to navigability does not disturb title to the bed but does affect riparian and public rights and places limitations on the state's control over the use of water. n1116 Once a

body of water has been declared navigable it always remains as such. But a declaration of navigability by state or federal act cannot control title to the bed without the riparian owner being compensated by eminent domain for the taking of title to the property.

At common law the term "navigable river" was confined to rivers or arms of the sea in which the tide ebbed and flowed. n1117 The reason for this rule was that the limit of the tide in all the waters of England was the limit of practical navigation and was, as a consequence, made the test for determining navigable capacity of the stream. n1118 This test is totally inapplicable in the United States. Fresh water is navigable in the American common law sense, if it is, in fact, in its natural condition, reasonably capable of valuable use as a public way. n1119 Consequently, the English common law rule regarding navigable lakes and rivers has been changed, and in its place the civil law rule has been adopted, which recognizes as navigable all streams and lakes which are really so, though they are not tidewater rivers. n1120 This is the prevailing doctrine in this country. The earliest judicial statement of it is found in a case before the Supreme Court of Pennsylvania in 1807, in which Chief Justice Tilghman, after observing that the rule of the common law upon the subject had not been adopted in Pennsylvania, said:

> The common-law principle is, in fact, that the owners of the banks have no right to the water of navigable rivers. Now, the Susquehanna is a navigable river, and therefore the owners of its banks have no such right. It is said, however, that some of the cases assert that by navigable rivers are meant rivers in which there is not flow or reflow of the tide. This definition may be very proper in England, where there is no river of considerable importance, as to navigation, which has not a flow of the tide; but it would be highly unreasonable when applied to our large rivers, such as the Ohio, Allegheny, Delaware, Schuylkill, or Susquehanna and its branches. n1121

Congress, by earlier legislation with regard to the survey of public lands, recognized the same rule, declaring that navigable rivers shall be public highways. n1122 By the common law, even such rivers as the Mississippi, the Missouri, the Ohio, the Hudson, and the Connecticut and other great rivers, above the point where the tide ebbs and flows, would not be navigable rivers, though they are navigable in fact; and therefore, where such a river formed the boundary of land the grantee became a riparian owner, and the grant extended to the center of the river. n1123 The courts have greatly varied their tests as to what constitutes navigability. If the water by its depth, width, and location is rendered available for commerce, it is navigable whether it is actually so used or not. n1124 So it has been held that a river is navigable if it may support any form of commerce. Thus, it has been held that a river is navigable if the tide ebbs and flows therein, or if it is in fact navigable during some seasons of the year for the floatages of boats, lighters, rafts, logs, and the like, n1125 and it is not necessary that the waters be navigable in all their parts, n1126 or that the navigable portion be open to use all of the year. n1127 The criterion for determining whether or not a stream is navigable is its capability of use for transportation, and this is a question of fact. n1128 In view of this legislation the Federal courts, in construing grants of the United States, hold that the common law rules of riparian ownership do not apply to navigable streams, even in those states in which this rule has been adopted. n1129 The question of whether a riparian owner holds the fee to the middle thread of the stream or the river's bank, is governed by the law of the states. It depends upon the laws of each state to what extent the prerogative of the state to lands under water shall extend; and, therefore, it happens that the Mississippi River, by that settled policy of the state of Iowa, is regarded as a navigable river, and the title of a riparian owner on the banks of this river extends only to ordinary high watermark, and that the shore between high and low watermark, as well as the bed of the river, belongs to the state; while on the other side of the same great river, in the states of Illinois and Mississippi, the common law doctrine prevails, and in those states the title of the riparian proprietor extends to the middle of the current. n1130

Navigability, when claimed as the basis of a right asserted "under the Constitution of the United States, is necessarily a question of Federal law to be determined according to the general rule recognized and applied in the Federal courts," and "the rule long since approved [by the Supreme Court of the United States] ... in applying the Constitution and laws of the United States is that streams or lakes which are navigable in fact must be regarded as navigable in law; that they are navigable in fact when they are used, or are susceptible of being used, in their natural and ordinary condition as

highways for commerce, over which trade and travel are or may be conducted in the customary modes of trade and travel on water; and further that navigability does not depend on the particular mode in which such use is or may be had, -- whether by steamboats, sailing vessels or flatboats, -- nor on an absence of occasional difficulties in navigation, but on the fact, if it be a fact, that the stream in its natural and ordinary condition affords a channel for useful commerce." n1131 It is capacity for navigation, not usage, that determines question of navigability. n1132

LEXIS: Boundar! w/10 (bed w/10 body w/3 water) Boundar! w/10 navigab!

§ 90.03(b)(2) Title to Bed of Nonnavigable Streams.

The rule is almost universal that if the stream or river is not navigable as navigability is determined in the particular jurisdiction for purposes of determination of title, but not necessarily riparian rights, the title to the bed of the stream is in private hands.

Where the body of water is a nonnavigable stream the weight of authority makes the boundary line the thread of the stream, not the meander line. n1133 The meander line is merely drawn to determine acreage above water usually for the purpose of sale in the case of government owned lands.

Where the boundary line is not that of the stream, the cases are divided as to whether the tract expands or contracts as the stream adjoining the boundary moves. n1134 Even though the street or stream is not mentioned as the boundary, if the call was to such a monument it will run to the center. n1135

The land covered by fresh-water streams not navigable is prima facie the property of the riparian proprietors, "usque ad filum aquae" (as far as the thread of the water or stream). n1136 If the same person owns the land on both sides of the stream, that person owns the entire river bed so far as the owned lands extend. n1137 One who owns the bank on one side of the stream only, owns the bed of the stream "ad medium filum aquae" (to the center of the thread of the water or stream). A conveyance of land on a fresh-water river, which contains a call to Athe river," makes the river the boundary, and conveys the land to the center of the stream. n1138

By the "thread of the stream," strictly speaking, is meant the center of the main channel of the stream. n1139 The thread of a stream is the middle line between its shores at its lowest flow, not at the time of normal water. n1140 Ordinarily, the middle line between the shores is regarded as the thread of the stream, taking it in the natural and ordinary stage of the water, irrespective of the depth of the channel. n1141 Moreover, it is the middle line of the stream for the time being that is the boundary. The boundary line may change from time to time by the gradual wearing away of the bank upon one side of the stream and the depositing of the soil upon the opposite side, and the land before covered by water belongs to the riparian proprietor, n1142 although, if the bed of the stream be suddenly changed by a freshet (sudden overflow from a heavy storm or accumulation of water), the boundary is not changed; the ownership remains according to former bounds. n1143 The thread of the stream must be the line which would give the owners on each side access to the water whatever its stage might be, and particularly at its lowest flow. n1144

If one owning land on both sides of a river grants the land on the westerly side of it, bounding it by the river, the grant includes an island lying between the westerly bank and the middle of the main channel of the river. n1145 If such owner in making a grant excepts an island, the grantor makes the thread of the channel between the island and the mainland the boundary. n1146 If an island gradually forms in the bed of a river wholly on one side of the thread of the stream, it is the property of the riparian owner on that side; n1147 but if the island is so situated that it is partly on one side and partly on the other of the thread of the river, it belongs in severalty to the proprietors on each side, the division line being the thread of the old river before the formation of the island. n1148 So, of course, if a point of land on one side is cut off, making an island, this belongs to the original owner.

If the old bed of the river, being gradually deserted by the current, fills up and new land is formed, this belongs to the riparian proprietors on each side, the division line being the thread of the old river; n1149 but if the bed of the river, as it existed at the time of the grant, cannot be found or traced, the courses and distances of a survey giving the meander line of the river may be resorted to. n1150

The right of the riparian proprietor to alluvion, or accretions to the land through the gradual action of the water, is everywhere admitted. The rule applies to lands bounding on tidewaters and to lands bounding on fresh waters. It applies to the state equally and to private persons; and it is independent of the law governing the title in the soil covered by the water. n1151 The thread of the stream is the true boundary of lands conveyed by a municipal judge by a deed naming a nonnavigable river as the boundary. n1152

The exact boundary line of a navigable stream is the point midway between the level of water which exactly reaches the cut bank and the higher level of water which does not overtop the bank. n1153

Among two or more channels, the middle line of the channel having the greater depth of water, and being the one generally used for the purposes of navigation, is regarded as the thread of the stream, even though the greater quantity of water may flow in the other channel. n1154 If there is a main channel through which the water flows at all times, and an auxiliary channel which furnishes a passage for surplus water in times of freshet, the center of the main channel is the thread of the stream. n1155 A change in the course of a stream caused by a freshet (sudden overflow from a heavy storm or accumulation of water) so as to cut off a point of the property of a landowner and leave it beyond the thread of the stream does not effect a change of ownership. n1156 A sudden variation or abandonment of the old channel and the formation of a new one (avulsion) does not change the boundary from the thread of the old to the thread of the new channel; n1157 but where the change in the course of a stream constituting a boundary is gradual and made little by little (accretion), the boundary follows the thread of the stream. n1158

A "meander line" is a line run by the government for the purpose of designing the sinuosities of the shore or bank of a body of water and as a means of ascertaining the quantity of land in adjoining fractional areas subject to sale by the government and, as a general rule, it is not necessarily such line but rather the watercourse itself, which constitutes the boundary of land bordering thereon. n1159 It is recognized, however, that the intention of the parties governs. n1160 In cases of fraud or mistake in running the meander line it has been held that the meander line was a boundary line. n1161 If there is a strip of land between the meander line and bank of the stream, lake or bayou, the question of intention, fraud or error in the survey becomes of controlling importance in determining whether the meander line forms the boundary. n1162 A "meander corner" is a marker for courses but, unlike section and quarter corners, it is not a fixed point for measurements. n1163 It was held in a Minnesota case that where a government lot abuts on a lake, the shifting water line, as the lake recedes, and not the meander line, is the boundary of the lot. n1164

In ascertaining the measurement from one point to another on navigable water, the measurement is by its meanders and not in a direct line. n1165 In determining the division line between adjoining owners on navigable water the measurement is by the general trend of the water line. n1166 Measurement in a straight line is sometimes adopted in the case of streams not navigable. n1167 A government meander line is not the boundary line, but the lake water line is. n1168 A river boundary is not meander line, but the thread of the river is. n1169

While ordinarily the high watermark and not the meander line is the boundary, the parties may extend the meander line; occasionally the discrepancies between the meander line and high watermark may be so great as to indicate a mistake. n1170 A meander line may be the boundary if the parties so intended or where the public officials making the sale have made it so. In such a case accretion is not applicable. n1171

The boundary along the "bank" or "shore" of a stream is the boundary of land; n1172 the boundary line is a thread of the stream, and not the bank, unless the contrary intention appears. n1173 In a number of states in the absence of any call in

the deed to the contrary, it is presumed that a grant of land on a navigable freshwater river is carried to the thread of the stream, n1174 but the question of the title and boundary of a riparian owner is purely one of local law. n1175

In Maryland, if the owner of the bed of a nonnavigable stream conveys land bordering thereon, title to the middle of the stream passes to the grantee even though the deed does not expressly so provide. n1176 In New Jersey, a deed to land bordering a stream above tidewater carries title to the center of the stream, provided the grantor's title extends that far. n1177 In New York where the deed of a grantor who owns to the center of a nontidal stream describes the land conveyed as bounded by such stream or with reference to a map showing it to be thus bounded, the grantee will take to the thread of the stream unless the deed clearly indicates that the grantor's intent was to the contrary. n1178

The effect of the deed depends upon its terms and the presumptions arising therefrom, unless the terms used are uncertain or ambiguous, so that parol evidence is admissible to explain them. Thus, a deed which describes a line along a nontidal river as running "with" or "along" the stream, or as running "by" or "on" the stream or "up" or "down" the stream, carries the title to the center of the stream, unless a contrary intention appears. n1179

In certain jurisdictions a boundary by a navigable stream takes to high water, n1180 while in others it takes to low water. n1181 Where a grant is bounded on a river, the presumption that the grantor intends the boundary should extend to the stream is rebuttable. n1182

When the starting point is a monument on the bank of a river, and the line runs thence along the river or by it or on it, the boundary is still but the thread of the stream, unless by other terms used in the deed it appears that it was intended to limit the boundary to the bank of the stream. n1183 Where a deed contains a call "to the river," the river is the boundary, and the land conveyed extends to the center of the stream. n1184 The same rule applies when a boundary line runs to a terminus on the bank of a river, and thence by or along the river to another terminus. n1185 A boundary line running from a post on the north bank of a creek, "thence down the same and along the several meanders thereof to the place of beginning," which was also on the bank, includes the bed of the stream to the center. n1186 A survey running to a point on a river, and "thence down said river, and binding thereon," to another point, includes a sand bar on the same side of the river, between the two points. n1187

The "right bank" of a stream as used in a land description is the bank on the right hand as one faces downstream. n1188 If, however, the course of a river is changed by digging an artificial channel, a deed of land bounded by the river may mean the river as it ran it its old channel. Thus, where, before the making of a deed of land on the north side of a river, the owners of the land on the south side had dug a channel through a part of the grantor's land, and the river changed its course to the artificial channel, so that it ran in a straight line, the old channel being a bow, leaving a strip of land belonging to the grantor lying between the old channel and the new channel, the grantor's deed bounding upon the river was held to convey the land to the old river bed, and to include the strip in question. n1189 A change by artificial means in the boundaries of a stream, so as to form a millpond, does not have the effect of changing the boundary of lands from the thread of the original stream, and a deed of land described as "along the bank of said millpond," carried the title to the center of the original stream. n1190 Where a pond formed by changing the boundaries of a stream has existed until it has become a well-known landmark, and is considered a permanent body of water with well-defined banks, the rule regarding boundaries as applied to natural lakes will be applied to such artificial pond. n1191

While, as already noted, in many states a boundary starting at a monument on the bank of a stream, and thence running along the stream, includes the stream to the middle of the channel, yet there are decisions to the effect that in such case the stream is wholly or partly excluded. n1192 Thus, where the starting point was a hickory tree standing on the bank of the Ohio River, thence after several courses to a corner ironwood tree on the bank of the river, and thence by the river to the starting point, the boundary was held to be by the river. n1193 A grant of land bordering the Potomac River and described as beginning at a certain tree and extending "down" the river's various courses to another tree has been held not to purport to convey land in the river proper. n1194 In California, a deed which carries to the bank of a stream the side lines of the land conveyed, without describing the line connecting such side lines, will pass title to the center of the

stream. n1195 In Texas, a deed calling for the bank of a river, thence with the meanderings of the bank to a stake, has been held to convey to the water's edge, Athe bank" meaning the land adjacent to the water. n1196 In New York, it has been held that a boundary line which runs "from," "to," "alongside of," or "by" a stream will run, as a general rule, only to the center line thereof and that the stream will be excluded altogether by only slight evidence of an intention to that effect. n1197 In the same state, it has been held that, if a grant of land "near or adjoining unto Harlem River" meant "along" such river, such grant passed title only to high watermark. n1198 In Oregon, however, it has been held that deeds conveying land "to the river" assumed to convey to low watermark. n1199

The fact that the quantity of land called for in a deed is satisfied without including the bed of a stream which constitutes the boundary does not limit the title to the bank of the stream. n1200 In the purchase of land bounded upon a river at a stipulated price per acre, it would seem that the purchaser would be required to pay for land to the line of ordinary low water only, though the title might extend to the thread of the stream. n1201

On the other hand, if the quantity of land and measurements require the inclusion of the shore, or land covered by the water between high and low watermark, this affords a reason for extending a boundary to meet this requirement. Thus, in a deed of land on Long Island Sound, the first course, starting from a point accurately fixed, ran a certain distance to a point on the Sound, thence along the shore to the intersection of the center line of a certain street, and thence by said street a certain distance to the point of beginning. It appeared by a survey that the first and last courses, if run in obedience to the distance given, would extend to low watermark, and that, to give the quantity the deed purported to convey, the land to low watermark must be included. It was accordingly held that the boundary line was along the low watermark. n1202 Where a tract of land appears to have as one of its boundaries a body of water, such body of water will constitute the boundary however distant or variant from the position indicated for it by the meander line, and will control as a call of the survey over the quantity of land designated. n1203

Even if the monument is some distance from the river, the boundary thence by the river will be by the thread of the stream, if there is nothing further in the deed to show an intention to limit the boundary to the bank. n1204 A boundary marker on the bank of a nonnavigable stream has been held not to indicate the end of the boundary line, but only the point where the line strikes the water. n1205 A corner tree or other monument is not always to be had near a river, and, therefore, one may be taken at some distance from it, but if the course is by a river, this is regarded as the boundary. n1206 The stream is a natural boundary, and controls a call for a monument on the bank; and it is not to be presumed that the grantor retains a strip of land between the line indicated by the monuments and the line of low water. n1207 This presumption does not apply when the boundary is a millrace owned and retained by the grantor, for in such case there is an obvious reason why the grantor should wish to retain such a narrow strip between the top of the bank of the millrace and the water-edge of the millrace at low watermark. n1208 There are many reasons why the usual presumption is reversed in the case of an artificial waterway, and a grant that clearly limits the boundary to a line upon or beyond its bank passes no fee to the soil in the artificial channel. n1209 If the meander line is the boundary, accretion does not apply. n1210

Where land is described as lying on a river named, the meander line of the river as surveyed does not constitute the boundary of the land, but the grantee is a riparian owner, and has title to the land lying between such meander line and the river in case the boundary line is governed by the commonlaw rule. n1211

Under one line of authority, where the boundary was determined definitely by the shoreline as it existed at the time of the land grant or the old boundary is otherwise definitely known, the question of definitely known boundaries is disregarded and the shoreline proprietor may consider the shore the boundary which through general gradual changes the proprietor may follow across definite boundaries of others. n1212 The other line of authority does not apply the rule of succession of property by accretion where there was a definite boundary but only where the boundaries were determined by the shoreline. n1213

In apportionment for pertinent riparian rights areas in a river or river bed as between several riparian tracts fronting on

one bank, the course of the divisional lines extending from the shore out to or toward the thread of the river is not controlled by the course or direction of the respective upland side lines dividing the respective riparian tracts. The direction in which upland division lines run between the riparian tracts to the bank or shore of the river does not control the direction of the division line to be projected into the river. n1214

A call in a description for a boundary line ending at a creek must be extended to such a creek, although the stated length thereof may not reach the creek. n1215

A boundary marker on the bank of a nonnavigable stream did not indicate the end of the boundary line, but only the point where the line strikes the water. n1216

§ 90.03(b)(3) Title to Bed of Navigable or Public Streams.

As the converse of nonnavigable or nonpublic bodies of water, title to the bed or navigable or public water is in the state n1217 or the federal government. In the case of navigable water, however, there is disagreement as to whether high watermark, low watermark or the meander line marks the boundary. n1218

The "shore" or navigable water is the land which lies between high and low watermarks, n1219 and as a general rule a grant extending thereto extends only to high watermark. n1220 The high watermark is the line where the water stands sufficiently long to destroy vegetation below it; it is not to be determined by mathematical calculation but is a physical fact to be determined by inspection of the river bank. n1221 The space between high and low watermark is variously denominated "the shore," "the beach," "the flats," "the strand," "the sand," and is also designated by several other less familiar terms. The proprietor of land on the shore or bank is presumed to own to high watermark only. If the proprietor claims ownership below this line, the proprietor must establish the claim. n1222 "Ordinary" high watermark, as used in this connection, is not the limit of the monthly spring tides, but the limit reached by the neap tides (the tide that occurs when the difference between high tide and low tide is the smallest). n1223 It has also been defined as the line "limited by the outflow of the medium high tide between the spring and neap tides." n1224 It has generally been used in the sense of average. n1225 The general rule is, that a boundary on the sea, a bay, navigable or tidewater river is a boundary at the ordinary high watermark. n1226 This rule is not applicable to a case where, by the cutting of a canal between a fresh-water pond and some body of salt water, the water of the former becomes salt, and the tide ebbs and flows therein; n1227 but it is held that a deed conveying a parcel of land and rocks situated by a harbor bounded by the ledgy shore passed the title to low watermark. n1228 It is a general rule that a boundary by the beach, the shore, the strand, or the space between high and low watermark, whatever name may be given to it, excludes such space unless there is something else in the deed to indicate an intention to pass the title to low watermark. n1229 Where, however, there is a tract of land conveyed by metes and bounds, and within the tract thus exactly defined there is a portion of tidewater, then the grant carries the land under water, subject to the right of navigation over it, and the continuance of the water's conditions there prevailing. n1230

In Massachusetts, it is held that the ownership of land between high and low watermarks is ownership of a substantial nature rendering the land subject to taxation unless otherwise exempted, notwithstanding the use of the land is restricted by state and federal regulations to protect the public right therein. n1231 In Pennsylvania it is held that title to land bordering on a navigable stream extends to low watermark subject to the rights of the public to navigation and fishery between high and low water. n1232 The call of a deed runs to the thread of a navigable fresh-water stream in Wisconsin. n1233

LEXIS: Boundar! w/10 (navigab! w/10 bed)

§ 90.03(b)(4) Title to Tide Lands.

The question of whether the state or the federal government had title to the tidelands was finally resolved by the Supreme Court of the United States in favor of the latter. However, this title was partially relinquished by act of Congress following the Supreme Court decision. n1234 Save for that act, the United States holds title to all coastal waters and the resources of the soil thereunder, despite state acts attempting to enlarge boundaries. n1235

Before that decision of the Supreme Court, in a number of cases decisions had been rendered as to the rights to the tidelands. It was held under these cases the new states admitted into the Union have the same rights as the original states in the tidewaters and in the lands below the high watermark, within their respective jurisdictions. Thus, upon the admission of Alabama into the Union, the title in the lands below high watermark of navigable waters passed to the state, and could not afterwards be granted away by the Congress of the United States. n1236 The same doctrine is applicable to California, which was acquired from Mexico by the 1848 treaty of Guadalupe Hidalgo. n1237 Other states having the ownership and control of all navigable waters and of the beds thereof are Florida, n1238 Maine, n1239 Massachusetts, n1240 Oregon n1241, and Washington n1242. The question of the applicability of these cases to the present law remains to be determined.

In Washington a sale of tidelands by the state is subject to the paramount right of the public in navigable waters thereof and confers no right to obstruct navigation therein. n1243

This summary "shows that there is no universal and uniform law upon the subject, but that each state has dealt with the lands under the tidewaters within its borders according to its own views of justice and policy. Great caution, therefore, is necessary in applying precedents in one state to cases arising in another."

As a general rule, a state may, in conveying tidelands, either grant or completely withhold rights in the adjoining water areas as it chooses. n1244 A grant from the sovereign of land bounded by the sea, or by any navigable tidewater, does not pass any title below high watermark, unless either the language of the grant, or long usage under it, clearly indicates that such was the intention. n1245 Thus it was held that a grant from the Mexican government, confirmed by a decree of a court of the United States under authority of Congress, of land bounded "by the bay" of San Francisco, did not include land below the ordinary high watermark of the bay. n1246 It was also held that a person afterwards acquiring the title of the city in a lot and wharf below high watermark had no right to complain of work constructed by a commissioner of the state, under authority of the legislature, for the protection of the harbor and the convenience of shipping, in front of the wharf, and preventing the approach of vessels to it. n1247 "Whether a conveyance made by the state of land abutting upon navigable water does confer upon the grantee any right or interest in those waters or in the land under the same is a matter wholly of local law"; n1248 however, "the dominion over navigable waters and property in the soil under them, are so identified with the exercise of the sovereign powers of government that a presumption against their separation from sovereignty must be indulged, in construing all grants by the sovereign, of lands to be held in private ownership... Such grants are peculiarly subject to the rule, applicable generally, that all grants by or to a sovereign government as distinguished from private grants, must be construed so as to diminish the public rights of the sovereign only so far as is made necessary by an unavoidable construction." n1249 By direct statutory provision in some states, lands covered by navigable waters, though vacant and unappropriated, are not the subject of grant. n1250

LEXIS: Boundar! w/10 (tide w/5 land!)

§ 90.03(b)(5) Ownership of the Seashore.

Problems involving ownership of land under the ocean bed are fourfold: ownership as between nations, ownership as between the federal government and the states, ownership as between the states of the federal government and individuals and ownership as between individual persons. The situation is complicated by the questions of what constitutes the foreshore, the tidelands, the bed of bays and inlets and the bed of the ocean itself.

The rule formulated by Grotius gave each nation title to its coastal waters three miles from shore, the effective limit of cannon fire in the seventeenth century. This arbitrary measurement, long since outmoded in practice, was seriously questioned by the United States during Prohibition, when an effort was made to extend it to twelve miles and numerous and large extensions have been implemented since by most nations.

The basic principle of ownership of land subject to the ebb and flow of the tide is that title is in the sovereign. Under the common law the seaward boundary of the land was the mean high tide of the sea waters. n1251

Land by the sea, between high and low watermark, and by rivers where the tide ebbs and flows, is vested in the state. The rule of law in regard to public and private ownership of the shore is exhaustively stated in a decision of the Supreme Court of the United States rendered by Mr. Justice Gray: n1252

> By the common law, both the title and the dominion of the sea, and of rivers and arms of the sea, where the tide ebbs and flows, and of all the lands below high watermark, within the jurisdiction of the crown of England, are in the king. Such waters, and lands which they cover, either at all times, or at least when the tide is in, are incapable of ordinary and private occupation, cultivation, and improvement; and their natural and primary uses are public in their nature for highways of navigation and commerce, domestic and foreign, and for the purpose of fishing by all the king's subjects. Therefore the title, jus privatum, in such lands, as of waste and unoccupied lands, belongs to the king, as the sovereign, and the dominion thereof, jus publicum, is vested in him, as the representative of the nation and for the public benefit... In England, from the time of Lord Hale, it has been treated as settled, that the title in the soil of the sea, or of arms of the sea, below ordinary high watermark, is in the king except so far as an individual or a corporation has acquired rights in it by express grant, or by prescription or usage, and that this title, jus privatum, whether in the king or in a subject, is held subject to the public right, jus publicum, of navigation and fishing. The same law has been declared by the House of Lords to prevail in Scotland...
>
> The common law of England upon this subject, at the time of the emigration of our ancestors, is the law of this country, except so far as it has been modified by the charters, constitutions, statutes, or usages of the several colonies and States, or by the Constitution and laws of the United States. The English possessions in America were claimed by right of discovery. Having been discovered by subjects of the king of England, and taken possession of in his name, by his authority or with his assent, they were held by the king as the representative of, and in trust for, the nation, and all vacant lands, and exclusive power to grant them, were vested in him. The various charters granted by different monarchs of the Stuart dynasty for large tracts of territory on the Atlantic coast conveyed to the grantees both the territory described and the powers of government, including the property and the dominion of lands under tidewaters; and upon the American Revolution all the rights of the crown and of Parliament vested in the several States, subject to the rights surrendered to the national government by the Constitution of the United States.
>
> In Connecticut, also, the title in the land below high watermark is in the state. But by ancient usage, without any early legislation, the proprietor of the upland has the sole right, in the nature of a franchise, to wharf out and occupy the flats, even below low watermark, provided he does not interfere with navigation; and this right may be conveyed separately from the upland, and the fee in flats so reclaimed vests in him.

The title to the soil under navigable waters, except so far as private rights in such soil have been acquired by express grant or by prescription, is in the sovereign. "The rule is applied both to the territory of the United States ... and to land within the confines of the states, whether they are original states ... or states admitted into the Union since the adoption of the Constitution." n1253 The law is settled "that lands underlying navigable waters within a state belong to the state in its sovereign capacity and may be used and disposed of as it may elect, subject to the paramount power of Congress to control such waters for the purposes of navigation in commerce among the states and with foreign nations, and subject to the qualification that where the United States, after acquiring the territory and before the creation of the state, has granted rights in such lands by way of performing international obligations, or effecting the use or improvement of the lands for the purposes of commerce among the states and with foreign nations, or carrying out other public purposes appropriate to the objects for which the territory was held, such rights are not cut off by the subsequent creation of the state, but remain unimpaired, and the rights which otherwise would pass to the state in virtue of its admission into the Union are restricted or qualified accordingly... But, as was pointed out in *Shively v. Bowlby*, n1254 "... the United States early adopted and constantly has adhered to the policy of regarding lands under navigable waters in acquired territory, while under its sole dominion, as held for the ultimate benefit of future states and so has refrained from making any disposal thereof, save in exceptional instances when impelled to particular disposals by some international duty or public exigency. It follows from this that disposals by the United States during the territorial period are not lightly to be inferred, and should not be regarded as intended unless the intention was definitely declared or otherwise made very plain." n1255 In Maine, the owners of land adjoining tidewater are prima facie owners of the shore. n1256 At common law the title to that part of the beach below high watermark is in the state, n1257 and consequently where land is bounded by the ocean, sea, or bay, or along the shore line of tidal water, the line of ordinary high water marks the limit of a grant; n1258 but if the body of water is distinctly called for in the deed, the water proper and not the shore is the boundary of the land conveyed. n1259

The statute of Washington, providing that any accretions that may be added to any tract of tideland heretofore sold or that may hereafter be sold by the state, is held to apply only to instances where the accretion occurs after the state has divested itself of title. n1260

Subject to the constitutional power of Congress to regulate commerce, it is state rather than federal law that determines the rights of adjoining owners in navigable waters and the lands lying thereunder. n1261 "Although presumptively title to the soil under navigable waters within the state is in the state ... the nature and extent of the rights of the state and of riparian owners in navigable waters within the state and to the soil beneath are matters of state law to be determined by the statutes and judicial decisions of the state." n1262 Where there is no Acontrolling local law otherwise limiting the rights of a riparian owner upon a navigable river, ... he has, in addition to the rights common to the public, a property right incident to his ownership of the bank, of access from the front of his land to the navigable part of the stream, and when not forbidden by public law may construct landings, wharves or piers for this purpose ... This right of a riparian owner, it is true, is subordinate to the public right of navigation, and subject to the general rules and regulations imposed for the protection of such public right. And it is of no avail against the exercise of the absolute power of Congress over the improvement of navigable rivers, but must suffer the consequences of the improvement of navigation, if Congress determines that its continuance is detrimental to the public interest in the navigation of the river." n1263 Cases declaring the law of various of the states concerning rights in navigable waters as between the state and adjoining owners are cited below. n1264

The law of the several states bordering on the sea, in regard to the private ownership of the shore, is stated in detail by Mr. Justice Gray in *Shirley v. Bowlby*. n1265 Passing by the New England states for the present, because an exceptional rule prevails there, the following is a summary of the law of the other original states: In New York it was long considered as settled law that the state succeeded to all the rights of the crown and Parliament of England in lands under tidewaters, and that the owner of land bounded by a navigable river within the ebb and flow of the tide had no private title or right in the shore below high watermark, and was entitled to no compensation for the construction, under a grant from the legislature of the state, of a railroad along the shore between high and low watermark, cutting off all access

from his land to the river, except across the railroad. n1266 The owner of the upland has no right to wharf out without legislative authority; and titles granted in lands under tidewater are subject to the right of the state to establish harbor lines. n1267 In New York a patent from the crown of lands bounded by navigable tidewater has been held to convey no title to land below high water, but merely jurisdiction over the same which is to be upheld and administered for the crown, n1268 and a similar grant to the city of New York was held to convey the land between high and low water to the city in trust for the public; so that a later conveyance by the city to a private person describing the land as bounded by the Hudson River was limited to the line of high water. n1269 The law of that state, as formerly understood, has been so far modified as to hold that the owner of land bounded by tidewater may maintain an action against a railroad corporation constructing its road, by authority of the legislature, so as to cut off his access to the water. n1270

In New Jersey it is the settled rule that the lands under water, including the shore on the tidewaters of New Jersey, belong absolutely to the state, which has the power to grant them to anyone, free from any right of the riparian owner in them. n1271

In Pennsylvania likewise, upon the Revolution, the state succeeded to the rights, both of the crown and of the proprietors, in the navigable waters and the soil under them; n1272 but, by the established law of the state, the owner of lands bounded by navigable water has the title in the soil between high and low watermark, subject to the public right of navigation and to the authority of the legislature to make public improvements upon it, and to regulate the owner's use of it. n1273

In Delaware, all navigable rivers within the state belong to the state, not merely in right of eminent domain, but in actual propriety. n1274

In Maryland, the owner of land bounded by tidewater is authorized, according to various statutes beginning in 1745, to build wharves or other improvements upon the flats in front of the land, and to acquire a right in the land so improved. n1275

In Virginia, by virtue of statutes beginning in 1679, the owner of land bounded by tidewaters has the title to ordinary low watermark, and the right to build wharves, provided they do not obstruct navigation. n1276

In North Carolina, when not otherwise provided by statute, the private ownership of land bounded by navigable waters stops at high watermark, and the land between high and low watermark belongs to the state, and may be granted by it. n1277 The statutes of that state, at different periods, have either limited grants of land bounded on navigable waters to high watermark, or have permitted owners of the shore to make entries of the land in front, as far as deep water, for the purpose of a wharf; and any owner on the shore appears to have the right to wharf out, subject to such regulations as the legislature may prescribe for the protection of the public rights of navigation and fishery. n1278

In South Carolina the rules of common law, by which the title in the land under tidewaters is in the state, and a grant of land bounded by such waters passes no title below high watermark, appear to be still in force. n1279

In Georgia, also, the rules of the common law would seem to be in force as to tidewaters, except as affected by statutes of the state providing that the right of the owner of lands adjacent to navigable streams extends to low watermark in the bed of the stream. n1280

In the New England states the rule of private ownership of the shore was established by the Massachusetts Colonial Ordinance of 1641-1647, and by usage founded thereon. This ordinance, which remains in force to this day, related to land adjoining creeks, coves, and other places about and upon salt water, where the sea ebbs and flows. It establishes that the proprietor of such land Ashall have propriety to the low watermark, where the sea doth not ebb above a hundred rods, and not more wheresoever it ebbs further." By low watermark is meant the lowest line made by the receding tide with the land; not the lowest line which a stream of fresh water emptying into the sea, or a cove or a tidal river, makes

with the land. It has nothing to do with a fresh-water stream, or with a tidal channel through which only fresh water flows at low tide. Nothing in the ordinance indicates an intention to preserve the freshwater stream or channel as a boundary below ordinary high watermark. And the cases cited show it has not been done in applying it. The channel would not be the boundary even above high watermark. The rules of proprietorship on a fresh-water stream may furnish in a given case the best analogy for the division of interjacent flats on a stream below a point where the tide ebbs and flows, but beyond that they have no force. n1281 The rule or principle of the Massachusetts ordinance has been adopted and practiced in Plymouth, Maine, Nantucket, and Martha's Vineyard since their union with the Massachusetts colony under the Massachusetts province charter of 1692. n1282 And a conveyance of upland bounded by such waters passes the grantor's title to the same extent. n1283

This ordinance or custom does not apply to streams above the point where they are affected by the ebb and flow of the tide; but it applies wherever the tide ebbs and flows, though the water be fresh and is merely thrown back by the influx of the sea. n1284 In the New England states, a boundary by the sea or seashore, or beach or tidewater, prima facie includes the land between high and low watermark to the extent of the grantor's title. n1285 A deed with such a boundary passes the flats adjoining the upland conveyed, though the description, regarding both the quantity of the land conveyed and the length of the lines, would be satisfied by applying it to the upland alone. n1286 A boundary by a tidal creek, the bed of which is bare at low water, prima facie conveys the title to the center of the channel of the creek. n1287 The grant of a wharf will carry with it the grantor's flats in front of the wharf to low watermark, unless there are words in the deed that restrict its operation in respect to the land covered by the water. n1288

The title to an island situated within one hundred rods from the opposite upland, there being no channel between the island and the mainland at low water, does not extend, as between the island and the mainland, unless by special grant, to any flats circling the island, except such as lie on the sea side of the island, between the island and the receded sea. n1289

"In New Hampshire a right in the shore has been recognized to belong to the owner of the adjoining upland, either by reason of its having once been under the jurisdiction of Massachusetts, or by early and continued usage." n1290

"In Rhode Island the owners of land on tidewater have no title below high watermark, but by long usage, apparently sanctioned by a colonial statute of 1707, they have been accorded the right to build wharves or other structures upon the flats in front of their lands, provided they do not impede navigation, and have not been prohibited by the legislature; and they may recover damages against one who, without authority from the legislature, fills up such flats so as to impair that right." n1291 Under this ordinance, the ownership of upland adjoining tidewater prima facie extends to low watermark, not exceeding one hundred rods and subject to public rights of passage by boat. n1292

"In Connecticut the public whose representative is the state, is the owner of the soil between high and low watermarks upon a navigable river in which the tide ebbs and flows. The owner of the adjoining upland has the exclusive privilege of wharfing and erecting stores and piers over and upon such soil and of using it for any purpose which does not interfere with navigation, and he may convey this privilege separately from the adjoining uplands. Over such soil he has the exclusive right of access to the water, the right to accretion and generally to reclamation... The owner of the fee to the high waterline has such riparian rights below the high waterline, unless such rights have been legally separated from the upland either by some owner of it by alienation, by deed or by exception of reservation in a conveyance of the upland or otherwise." n1293

The common-law rule that the title to the shore is in the state does not exclude the possibility of private title derived from the sovereign or obtained by prescription. Thus in New York, where the common-law rule generally prevails, there may be private title to land under bays and harbors, as well as to beaches and the shore, to low watermark, derived from early colonial grants, or grants from the English sovereign. n1294 The state of New York is authorized, subject to the limitations of the Federal Constitution, to grant lands under water and rights therein. n1295 The city of New York holds title by grant from the king of England to a strip of land extending beyond low watermark a distance of four hundred

feet and entirely around the island. n1296 The patent of 1685 to the town of Hempstead, which describes one boundary as running around the points of the necks along the sound, conveyed the land under the water of Manhassett Bay. n1297 "The shore," said Lord Hale, "doth prima facie and of common right belong to the king, both in the shore of the sea and the shore of the arms of the sea... Yet they may belong to the subject in point of propriety, not only by charter or grant, whereof there can be but little doubt, but also by prescription or usage."

At the time when the kings of England were required at their coronation to grant their individual rights in waste land to their subjects at large, they could have granted, not only the shore of the sea to a subject, but also the bed of the sea itself; but since the Magna Charta, land covered by the sea will not pass by general words in a grant of upland.

Some later New York cases take the view that the title of the sovereign to the seacoast and the shores of tidal rivers is different from the fee simple which a person holds to an estate in lands. They assert that it is not a proprietary, but a sovereign right, and it has been frequently said that a trust is engrafted upon this title for the benefit of the public, of which the state is powerless to divest itself. n1298 In Florida, it is held that the title to marshlands, subject to tidal overflow, and to the shoal waters of bays is in the state and under its control subject to the control of the federal government for purposes of navigation. n1299

But where title in the foreshore is in the state in trust for its citizens and not in a proprietary sense it is questionable whether the state can relinquish this title.

Accretions along the shores of the Gulf of Mexico which have been added by artificial means do not belong to the upland owners, but remain the property of the state. n1300

There is a presumption that the grantor conveys the title to land covered by water so far as the grantor's own title extends, whether the conveyance is bounded by the sea, a tidal river, or a fresh-water stream, unless the grantor expressly reserves the land under the water, or the terms of the deed indicate an intention to reserve it. n1301 The presumption is similar to that already mentioned which pertains to a conveyance bounded by a highway, street, or private way. It is also a presumption founded upon a similar reason; and that reason is, that the land adjacent to the bank of a stream, or to the shore of the sea or other tidal waters, is necessary or valuable to the adjoining proprietor, but ordinarily is of no use to one who has conveyed land bounded upon the water.

This presumption may always be overcome by language in the deed showing an intention not to convey any title to the land covered by water. n1302 The grantee's title will be limited to the shore land in case the grantee purchases by a plat which shows that the land in front of the granted land is platted into blocks which have been sold or reserved for sale; and the grantee acquires no riparian rights in the unplatted land between the water blocks and navigable water; for the plat contemplates on its face that the exterior line of the outermost blocks is to be treated as the shore line, and that the rights usually appurtenant to riparian land attach to these blocks. n1303

In Connecticut, there is a rebuttable presumption that riparian rights attached to upland bordering on a navigable tidal river pass with a conveyance of such upland. n1304

In Virginia, by virtue of the operation of a statute extending the rights of individuals to low watermark, riparian rights, including the right to the soil between ordinary high and low watermark, as incident or appurtenant to the adjacent land, pass to the grantee, although the conveyance is in terms made to "high watermark," unless the deed manifests a clear intention to control the operation of the statute. n1305

A gradual encroachment by the sea or navigable river carries the title underneath the eroded land to the state. n1306 If the water subsequently rebuilds the land there is a conflict as to whether the original owner takes by accretion n1307 or by the original title. n1308 The United States, however, reserves title to the continental shelf.

LEXIS: Boundar! w/10 seashore

§ 90.03(b)(6) Rule as to Lakes Forming State Boundaries.

Where stationary bodies of water form the boundary line between states the problem arises as to whether the bed is owned by the United States or the adjacent states and where the division line lies. Naturally there is a vast difference between a large lake and a small lake as to the rights of the riparian owners. The various jurisdictions do not agree as to the extent of the rights of such owners. Should a lake lie between two states or nations the boundary line between them would be the center line of the lake, and each would have title to such center line. n1309 The rule relative to the boundary between states and nations may be changed by treaty, by prior discovery and possession, and by cession of the sovereign power, and the "three mile" limit is not usually applicable to such lakes. n1310

The rule of ownership ad filum aquae (to the thread or center of the stream) is not applicable to the great fresh-water lakes which form the boundary between the United States and Canada, or to lakes which form the boundary between states, such as Lake Champlain, for example. These are regarded as inland seas, and the title of their beds is in the adjoining states, and not in the individual owners of the adjoining land. The matter of title to the beds of such lakes is wholly unprovided for by the common law of England. n1311 In this country the rule has been adopted that such lakes are not private property but public. There may be a reason for this exception to the rule, not depending upon the size of the lake as regards those lakes which form the natural boundaries between this country and a foreign nation, or those that form the boundaries between states, but the reason for the exception may also be founded upon the size and navigable character of such lakes. n1312

The title and the dominion of the beds of the Great Lakes belong to the state adjacent to which the same is located. n1313 The same rule is applied to beds of Great Lakes as is as applied at common law to the beds of tidewaters. n1314 The state is the owner of the fee of all lands under the navigable waters of the Great Lakes, but in trust for the use of the public. n1315 This rule applies to navigable bodies of water other than the Great Lakes. n1316 The sovereignty of the state of Wisconsin extends to the center of Lake Michigan, and its laws, so far as they do not conflict with the laws of the United States, are operative within such limits. n1317 "The title to such lands being in the states, they are subject to state regulation and control, under the condition, however, of not interfering with the regulations which may be made by Congress with regard to public navigation and commerce, ... state control and ownership therein being supreme, subject only to the paramount authority of Congress in making regulations of commerce, and subjecting the lands to the necessities and uses of commerce." n1318 "We are quite ready to assume, as a general proposition, that the title to all the lake beds in the state, especially those of navigable lakes, is in the state, and that the general government never had any control or ownership thereof." n1319 To what extent a state may exercise its prerogative over the land covered by the waters of these lakes depends upon the law of each state, just as it does in the case of the great navigable rivers. The states may, if they so determine, resign to the riparian proprietor rights which properly belong to them in their sovereign capacity. n1320 Thus it is held that it is within the power of a state legislature to authorize the extension of a boulevard and driveway over and upon the bed of Lake Michigan, and to sell and convey submerged lands which might be reclaimed by such extension. n1321

In Michigan, it has been held that "a grant to the shore of Lake Erie means to the water's edge at its lowest mark." n1322

Title to the bed of other large lakes like Lake Champlain is in the states in trust for the people. n1323 There are, however, a few early Connecticut grants in the "fire lands" of the Western Reserve which go under the bed of Lake Erie. n1324 Michigan alone of all of the states takes the position that the meander lines along the Great Lakes fix the boundary line of the riparian owners. Therefore under the Michigan rule, although riparian owners may exercise the ordinary riparian rights along the Great Lakes, they acquire no title by accretion or reliction. n1325 Michigan does not hold to this meander line rule, however, in the case of streams. n1326 It has been suggested that the Michigan rule

comes from an early misinterpretation of the Swamp Lands Act.

LEXIS: Boundar! w/10 (lake! w/20 state)

§ 90.03(b)(7) Nonnavigable Lakes and Ponds.

If the body of water does not have an appreciable flowage current and is nonnavigable -- that is, if it is a small lake or pond and is natural in its origin -- then the adjacent or littoral owners hold title to the center of the body of water under ordinary conditions. The federal government, when it created states out of areas where title to the land was basically in the United States, surrendered to the state so created title to the beds of all navigable bodies of water. Title to the beds of nonnavigable bodies of water passed to the riparian owners to whom the federal government sold the adjoining land.

The problem is therefore presented as to the construction of a description in a deed that carries to the shore of such a quiet nonnavigable body of water. Riparian rights are incident to the ownership of land bordering on water and pass with the transfer of such property, although not designated as such in the deed. In general terms they connote the rights and profits to the owner of the upland arising from its connection with the water, such as the easement of passage and use, subject, however, to governmental regulation for the improvement of navigation. n1327 A boundary by the shore of a lake conveys all the riparian rights of the grantor in the lake, in front of the land conveyed, and as against the grantor, any land made by filling in the lake at the shore. n1328 It is never presumed that the grantor reserves any proprietary rights in front of the land conveyed. The intention to do so must clearly appear from the conveyance; and the mere fact that the boundary of the lot conveyed is indicated by a line on the plat will not limit the grant to the line on the plat, or operate to reserve to the grantor proprietary rights in front of the lot. n1329

A street, one side of which is by a navigable lake or river, extends to low watermark, and the dedication of it to public use is held to have been intended to enable the public to get to the water for the better enjoyment of the public right of navigation. n1330 A purchaser of a lot fronting on such street acquires the fee, subject to the public easement to the entire street and shore to low watermark, including all riparian rights. n1331 Where the grantor conveys the entire estate up to the line of a public road or street bordering on a navigable lake, the grantor conveys to the grantee the fee to the entire road or street and the grantor retains no riparian rights. n1332 Ordinarily, a conveyance of land abutting upon the shore carries with it to the grantee therein all rights incident to the shore land; but, when the deed shows an intention on the part of the grantor to reserve the riparian rights, they will not pass to the grantee. n1333

The common-law rule is that a deed of land bordering on a small lake not navigable is presumed to convey title to the center of the lake, unless it appears that there was an intention otherwise, for the riparian owner has title to the land under such lake or pond extending to the center. n1334 A boundary on a natural pond or lake carries title to the center thereof, n1335 unless the deed makes it plain that the grantor's intent was to the contrary. n1336 The fee owner of all of the land which borders on a lake owns also the land under the lake. n1337 In a few jurisdictions the contrary is held, and the fee is limited to the shore or low watermark. n1338 The owner of a fractional subdivision of a section bordering on a small inland lake owns the land under the lake embraced within the extended lines of the subdivision of which the owner has title. n1339 The rule is otherwise in Massachusetts, because of the Colonial Law or ordinance adopted in 1641, and amended in 1647, declaring great ponds, which were defined as those containing more than ten acres, to be public property, and since that time such ponds have not been subject to private ownership. n1340 In New York, and other states having no similar statute, the land under small lakes and ponds is the subject of private ownership, and a boundary thereon, in a conveyance by the owner of the adjoining lands, passes the owner's title to the center line of such lake or pond. n1341

The presumption of a boundary by the center of a pond or lake may be excluded by any description which indicates an intention to limit the grant by the shore or edge of the lake. Thus, if the boundary is described to be "at low-water

mark," n1342 or "meandering along the water's edge," n1343 by the "margin" of the lake, n1344 "on the edge of the pond," n1345 or "to the edge of my millpond," n1346 a boundary by the center of the lake is excluded.

The land covered by a lake or millpond which is the subject of private ownership may be conveyed separate and apart from the land surrounding the lake or pond, such as when such owner conveys a mill and mill privilege "embracing as far as high watermark." n1347

Land conveyed by a deed which bounds it by the high watermark of a tideless lake, into which only a small stream runs, does not extend to the lake's center. n1348

One line of authority treats a description running to the edge of a pond and thence along the pond as indicating an intention to exclude the pond. n1349 The general rule of private ownership of lakes applies to natural lakes of considerable size, n1350 such as a lake about seven miles long and half a mile wide, n1351 a lake three miles in length and one mile in width, n1352 or a lake four or five miles long and eight hundred feet wide. n1353

A conveyance of land on a natural navigable lake passes title only to the water's edge. n1354 In case government surveys have been extended over small lakes, just as though the whole was dry land, and titles have been conveyed with reference to such surveys, the boundaries of lands under such surveys may be confined to the terms of the patents and deeds. n1355 Nonnavigable lakes and ponds are subject to the doctrine of "reliction" so that as the lake recedes the shifting water line is the boundary. n1356

COMPUTER-ASSISTED RESEARCH

LEXIS: Boundar! w/10 (nonnavigab! w/5 lake! or pond!)

§ 90.03(b)(8) Boundaries by Large Lakes and Ponds.

Where a stationary body of water is navigable or has by statute or custom a similar characteristic, title of the littoral owners -- like that of riparian owners of a navigable stream -- does not carry to the bed. The boundary line upon a large natural lake or great pond is the low waterline at which the water usually stands when free from disturbing causes. n1357 The line will extend to the height of the water at ordinary stages of low water, and not to the lowest stage of the water in seasons of great drought. n1358 If the water be raised to an artificial height in the winter, but in the summer is allowed to remain at its natural level, a boundary by the lake or pond conveys the land to the low watermark of the lake or pond in its natural state, and it is immaterial that the conveyance was executed in the winter, when the water was high. n1359 In case a natural pond has been permanently enlarged and raised by means of a dam at its outlet, a boundary upon the pond carries the title to the low watermark of the pond in its enlarged state. n1360 Of course, the general rule that the boundary by a natural lake is a boundary by low watermark gives way to any clearly expressed intent to the contrary. n1361

The grant of an island in a swamp or a natural lake carries the title to low watermark; but if the swamp or lake is afterwards drained by artificial means, the grantee's title does not extend to and include the land laid bare by such drainage, but remains at the line of low water, as it was when the grant was made, and evidence to determine where such line was is admissible. n1362 If there is a stream running through the swamp, a boundary by the swamp is by the middle of the stream. n1363 A boundary by a slough or arm of a navigable river is by the middle of the slough; n1364 but where the calls of a deed are to points on the margin or banks of a swamp and thence with the swamp, the title extends only to the banks of the swamp. n1365

Where land bordering upon a large lake, such as the Winnipesaukee or any navigable lake, is conveyed, the right of the purchaser to erect a wharf or building in the lake below the low watermark, as against everybody but the state, passes as an appurtenance to the land. n1366

COMPUTER-ASSISTED RESEARCH

LEXIS: Boundar! w/10 (lake! or pond!)

§ 90.03(b)(9) Public and Nonpublic Waters.

Some cases extend and assert public rights as against private ownership in lakes and rivers, without much regard to any test of definition of navigability. This is well illustrated in an important decision of the Supreme Court of Minnesota, in which Mr. Justice Mitchell said:

> In this country, while still retaining the common-law classification of navigable and nonnavigable, we have, in view of our changed conditions, rejected its test of navigability, and adopted in its place that of navigability in fact; and, while still adhering to navigability as the criterion whether waters are public or private, yet we have extended the meaning of that term so as to declare all waters public highways which afford a channel for any useful commerce, including small streams, merely floatable for logs at certain seasons of the year. Most of the definitions of 'navigability' in the decided cases while perhaps conceding that the size of the boats or vessels is not important, and, indeed, that it is not necessary that navigation should be by boats at all, yet seem to convey the idea that the water must be capable of some commerce of pecuniary value, as distinguished from boating for mere pleasure. But if, under present conditions of society, bodies of water are used for public uses other than mere commercial navigation in its ordinary sense, we fail to see why they ought not to be held to be public waters, or navigable waters, if the old nomenclature is preferred. Certainly, we do not see why boating or sailing for pleasure should not be considered navigation, as well as boating for mere pecuniary profit... If the term 'navigable' is not capable of a sufficiently extended meaning to preserve and protect the rights of the people to all beneficial public uses of these inland lakes to which they are capable of being put, we are not prepared to say that it would not be justifiable, within the principles of the common law, to discard the old nomenclature and adopt the classification of public waters and private waters. But, however that may be, we are satisfied that, so long as these lakes are capable of use for boating, even for pleasure, they are navigable within the reason and spirit of the common-law rule. When the waters of any of them have so far receded or dried up as to be no longer capable of any beneficial use by the public, they are no longer public waters, and their former beds, under the principles already announced, would become the private property of the riparian owners." n1367

In some cases, it is held that public waters are those where the tide ebbs and flows, and the ownership of which is in the state. n1368 It would seem that any body of water that is capable of being generally and commonly useful for some purpose of trade and the transportation of property may be properly designated as public water. n1369 In one case it was held that a natural fresh-water pond containing fifteen or more acres, though situated in the midst of and entirely surrounded by the land of a private owner, is public water, and the title of such owner extended only to the water's edge or at high watermark. n1370

A boundary upon a public navigable river or lake is a boundary by the edge of the water at ordinary low watermark, that is, the deed with such boundary passes to the grantee the title to the land between such stage of the water and high watermark. n1371

In accordance with this rule, where a navigable river is one of the boundaries of a municipality, the low waterline, and not the thread of the stream, is the boundary, in the absence of express language to the contrary in the act of incorporation. n1372

But, under the older rule, it is held that navigability and nonnavigability mark the distinction between public waters and

private waters. n1373 A riparian owner of both sides of a stream may in Virginia enjoin trespassing for fishing since the colonial grants gave title to the waters and fishing rights. n1374

COMPUTER-ASSISTED RESEARCH

LEXIS: Boundar! w/10 (public or nonpublic w/5 water!)

§ 90.03(b)(10) Boundary by Artificial Body of Water.

The rules governing title to the bed of artificial bodies of water do not necessarily coincide with those applicable to natural bodies of water. n1375 A boundary by a ditch or canal ordinarily extends the grant to the center line of the ditch, if the grantor's title extends so far and not farther. n1376 If the ditch is wholly upon the grantor's land, the deed bounding the grantor's land upon the ditch would carry the title to the whole of the ditch, because it would not be presumed that the grantor would retain a strip of land occupied by half of the ditch, which would be useless without the land adjoining. However, this rule does not apply in case of a boundary upon an artificial watercourse, like a millrace, flume, or ditch, in which the grantor still has an interest as owner of a mill, or of other land for the beneficial use of which such watercourse is necessary, or in case the flume or ditch is owned by another. n1377 A grant that clearly limits the boundary to a line upon or beyond its bank passes no fee to the soil in the artificial channel. n1378 The rule in Pennsylvania is that when a deed calls for a canal as a boundary, unless a contrary intention clearly appears, the grantee takes title, as against the grantor, to the middle of the canal, but nothing more, and this whether the grantor owns the fee in the entire canal, and nothing upon the other side, or whether the grantor owns land extending beyond the other side of the canal. n1379

A boundary by an artificial pond, formed by erecting a dam across a stream, passes the land to the thread of the original stream, n1380 unless qualified to the contrary, but when such a pond has existed for a long period of years, and has become regarded as a permanent feature of the topography, it may acquire the properties of a natural lake, and the rule applicable to such may fix the boundary. n1381 A deed bounding the land conveyed by the Ahigh watermark" of a pond contemplates the pond's high watermark at the time the deed is given. n1382 Where the thread of a stream has always been apparent through a pond formed by an artificial dam, a deed of land bounded by the pond passes the land to the thread of the stream, even though the deed purports to convey a strip of land extending along the stream for some distance above and below the dam. n1383 Where an artificial pond was created by damming a stream, it is held that the same rule applies to a pond as to the steam before the dam was built. n1384 The rule that the boundary upon an artificial pond does not extend to the thread of the stream, where the pond has been so long kept up as to have become permanent and to have acquired another well-defined boundary, does not apply in the case of a purely artificial pond temporarily maintained, the margin and banks of which had not been long established and clearly marked. n1385 A boundary line given as commencing at "a stake near the highwater mark" of a pond, thence running "along the high watermark" is fixed at the high watermark, and that mark is a permanent one, and does not follow the changes in the high watermark of the pond. n1386 Parol evidence is admissible to show that it was intended to limit the grant to the margin of the water as it overflowed the land in the spring. n1387

COMPUTER-ASSISTED RESEARCH

LEXIS: Boundar! w/10 (water w/20 artificial)

§ 90.03(b)(11) Sale of the Bed Separate from the Shore.

It is possible for one who owns the bed of a body of nonnavigable or nonpublic water to convey title to the bed or even to reserve title separate from the area not covered by water. n1388 The owner may sell or reserve the title to the soil in the bed of the river, separate from the upland, or the upland without the bed of the river. n1389 It is only necessary to use such terms in describing the land that the ordinary presumption shall not apply. The owner may convey the land

bounding it by a river at high watermark or at low watermark. n1390 A boundary on or along the "bank of" a stream, or "the shore" of a stream instead of "on" or "along" the stream, is generally held to restrict the title to the water's edge, at low watermark. n1391 Where the description in a deed began on a river, and the last two calls were "to" the river, and "thence up said river with its meanders to the beginning," it was held that the title conveyed extended to the thread of the main channel of the river, so as to include an island between the bank and such channel, though the distance given in the call to the river fell short of the channel. n1392 Where a line is described as running across a brook to a monument placed on its farther bank, and the boundary is thence down said brook to a stake and stones on said bank, the boundary is along the bank of the brook, and not by the center line of the stream. n1393

Where the language of a deed shows a manifest intention to stop at the water's edge, it will prevail over the general presumption. The intention of the party is the real object sought. If the meaning is not clear, resort is had to rules of construction. n1394

As bearing upon the construction of the deed in this respect, other instruments may be considered, if they are executed between the same parties at the same time and respecting the same subject matter. n1395 However, such instruments are not to be considered for this purpose unless they are between the same parties, or, if they are between different parties, unless they relate to the same transaction and are, in effect, parts of one transaction. n1396 Thus, if one advertises and sells land bounded on a stream, and on the same day, and as part of the same sale, sells the bed of the stream to another person, the deeds being executed the same day and containing the same recitals, the intention thus shown to separate the ownership of the bed of the stream from the ownership of the lot overcomes the presumption that the deed of the lot carries the title to the bed of the stream to its center. n1397

A conveyance describing the land conveyed as being bounded by the west bank of a river was held to convey riparian land in the absence of language showing an intention of the grantor to reserve the land lying between the bank and the thread of the stream. n1398

Accretion lands may be severed by grant. When this is done they do not pass by a conveyance of the upland to a bona fide purchaser. n1399 There is a presumption that the parties intended accretions to pass with the sale of the upland without being specifically described therein. n1400 But the accretion may be severed from the upland and conveyed separately, n1401 and a purchaser of the upland is not protected by the recording acts from a previous unrecorded conveyance of the accretion. n1402

§ 90.03(b)(12) Determining Title to an Irregular Shore Line.

Descriptions are often delightfully ambiguous in purporting to convey title to an irregular shore line. A similar problem arises where the record line has been changed by accretion or reliction. There is basic disagreement between the courts as to whether the extent of shore frontage or the area of the upland should govern. If the shore line is concave, converging lines are run from the divisional shore line to the line of navigability. If convex, the lines are run divergent to the line of navigability. n1403

One rule to determine the division line between adjoining holdings in the shallow waters of the ocean, or of a navigable river or lake, of owners of land bordering thereon, and located on a curved or irregular shore, is: First, to measure the whole extent of the shore line, and compute how many rods, yards, or feet each riparian proprietor owns thereon; second, to divide the navigable water line into as many equal parts as such shore line contains rods, yards, or feet of the shore line; and third, to draw a line from the point of division on the shore line to the point thus determined as the point of division on the navigable water line. This general rule was early adopted in Massachusetts, and has since been adhered to there, and adopted by the United States courts, and the courts of New York, Michigan and Wisconsin. n1404

The rights of the owners of adjoining lands bordering on navigable or tidewaters are not fixed by extending the boundary line into the waters in the direction of its last course but by a line perpendicular to the shore line or, if the

shore line is circular, perpendicular to a tangent drawn on the circle at the point of intersection. n1405

In a Michigan case it was said that the rule was well settled that the boundary line between two adjoining riparian owners, as to the land covered by water, was not in any way dependent upon the direction of the lines on the land, but that the lines from the shore should run, as near as may be, perpendicular to the course of the stream. n1406

It will be seen by an examination of the cases that the courts have applied a different rule for the division of the rights of riparian owners to the shores of lakes and rivers. Much of the apparent confusion of the authorities can be traced to the fact that a river has a "thread of the stream," while no such term is applied to a lake, the sea, or a large pond. n1407

Another rule of measurement is given as follows: (1) measure the shoreline, (2) divide the navigable waterline into as many parts as each shore line contains feet and give to each proprietor as many parts as the proprietor has feet of shoreline, (3) draw line from the shore boundary to the applicable point of division of the water. n1408

The court should so divide the river bed between two tracts fronting the same bank that each tract will have an extended frontage in the river based on and proportionate to the length of each tract's frontage on the shore. n1409 It is the frontage on the river bank or shore rather than the tract's depth area, or configuration or the direction in which its upland sides run, which governs. n1410 The lines must be run so as not to deprive the riparian tract of its proportionate frontage rights on the outer river line. n1411

Different methods are applicable to division of a lake bed. If the lake is circular, division lines form a triangle with the shore the base and the lake center the vertex. n1412 If lake is oblong, the lines are drawn perpendicular to a median center. n1413 If neither of the other two are practical, the lake bed is divided in proportion to the shore line owned. n1414

LEXIS: Boundar! w/10 (shore w/10 irregular)

§ 90.03(b)(13) Private Deeds to the Foreshore.

Where ownership of the foreshore is in private hands, as in the case of tidal waters pursuant to act of Congress or to the bed of bays and inlets, there arises a problem of such ownership of the ocean bed as between owners of the upland. Various suggestions are offered to measure the area of each upland owner in inlets and bays.

Of course, the owner in any sale may sever the upland from the flats, selling either without the other at his pleasure. n1415 The owner may convey the interest in the land below high watermark separately from the upland. n1416 Thus a deed calling for a line running to the shore or bank of a tide river and thence along the bank or shore, or for a line running on the beach or shore of the sea, excludes the shore or flats, which is the term applied to the ground between high and low watermark. n1417 The bank or shore becomes a monument limiting the land thereto when the deed clearly shows this to be the intention of the grantor; but when the land is described as bounded by a monument standing on the bank of a tidal stream, or on the shore of the sea and thence by the stream or sea, the monument does not generally restrict the boundary to the bank or shore. n1418 Moreover, while a boundary by the shore is ordinarily a boundary by high watermark, yet it may appear from the whole instrument and from monuments referred to that the term was used as importing low watermark. The word may always be controlled by other expressions used in the conveyance. n1419 A deed conveying a parcel of land bounded by the shore of the sea at high watermark, "including all the privileges of the shore to low watermark,"was held to pass the fee in the land to low watermark. n1420 Deeds conveying all the tidelands in front of the lots mentioned therein extended the title thereunder to low watermark wherever that might be, then or afterwards. n1421

Under a statute giving the owner of land on tidewater the title to low watermark, a conveyance by metes and bounds which are substantially coincident with high watermark carries all the rights of the grantor to the strip lying between high and low watermark. n1422

If land be described as running "to a cove and thence along the margin of the cove," the grant excludes adjoining flats. n1423 The same effect follows when the call is "on the west bank of the creek;" n1424 also where the words are "by the bank of the stream." n1425 A grantor may so definitely and specifically bound the conveyance by the bank of a stream that the grantor will retain title to the land from the bank to the bed. n1426

A conveyance of the upland possesses all accretions, though not described in the deed, unless there has been a severance. But a deed of severance need not be recorded as against a purchaser of the upland where the upland deed does not describe the accretions. n1427

A boundary marker on the bank of a nonnavigable stream was held not to indicate the end of the boundary line, but only the point where the line strikes the water. n1428

The principle of these cases is also recognized and applied in *McShane v. Moberly, 79 Mo. 41 (1883); Dill v. Board of Education, 20 A. 739 (N.J. Ch. 1890); Palmer v. East River Gas Co., 101 N.Y.S. 347 (N.Y.A.D. 1906); In re Ladue, 23 N.E. 465 (N.Y. 1890); Hicklin v. McClear, 22 P. 1057 (Or. 1889); Meier v. Portland Cable R.R., 19 P. 610 (Or. 1888); In re Ferguson's Appeal, 11 A. 885 (Pa. 1888).*

Vice-Chancellor Van Fleet stated it to be established that, where land was conveyed as abutting on a proposed street, before a public highway in fact existed there, and a way over such proposed street was essential to the beneficial enjoyment of the land granted, or even a desirable accessory to it, the implication was that, until the proposed street became an actual highway, the grantee had the use of it as a means of passage to and from his [or her] land; *Dodge v. Pennsylvania R.R., 11 A. 751 (N.J. Ch. 1888), aff'd, 19 A. 622* (N.J. Err. & App. 1889).

See White v. Tide-Water Oil Co., 25 A. 199 (N.J. Ch. 1892); Booraem v. North Hudson County R.R., 5 A. 106 (N.J. Err. & App. 1885); *Attorney General ex rel. Stickle v. Morris & E. R.R., 19 N.J. Eq. 386 (N.J. Ch. 1869), rev'd, 19 N.J. Eq. 575* (N.J. Err. & App. 1869), *rev'd, 20 N.J. Eq. 530 (1869).*

No one but the absolute owner of the land can dedicate land to a public use so as to pass the fee, and the dedication of land upon which there is a deed of trust is subject to be avoided by a sale under the deed. *McShane v. Moberly, 79 Mo. 41 (1883).* A conveyance describing land as bounded by the street corner extends to the center of the street; *Coumas v. Transcontinental Garage, 230 P.2d 748 (Wyo. 1951).*

(n349)Footnote 1050. *Carestensen v. Brown, 236 P. 517 (Wyo. 1925). See Nusbickel v. Stevens Ranch Co., 200 P. 651 (Cal. 1921).*

(n350)Footnote 1051. *People v. Livingston, 220 N.Y.S. 82 (1926).* Passive acquiescence with knowledge of the adverse parties' claim will forfeit a right to dispute a boundary; *Shaw v. Williams, 50 So. 2d 125 (Fla. 1950).* An agreement fixing a boundary line under the belief that it is the true line, when in fact it is not, is not binding, and may be set aside by either party when the mistake is discovered, unless some principle of estoppel prevents it, as where the rights of innocent third parties have intervened. The mere making of declarations and admissions as to position of boundary lines, when made in good faith and by mistake, and in ignorance of the true location of the line, does not work an estoppel; *Brewer v. Boston & W. R. Corp., 46 Mass. 478 (1843).* The weight of authority is that, where the intention was to establish the line according to the true boundary, and by mistake the parties agreed upon a line which does not conform to such a boundary, the line so agreed on is not conclusive, and the agreement may be set aside by either party; *Bemis v. Bradley, 139 A. 593 (Me. 1927).*

(n351)Footnote 1052. *Langle v. Brauch, 185 N.W. 28 (Iowa 1921).*

(n381)Footnote 1082. *Pickett v. Nelson, 47 N.W. 936 (Wis. 1891).* In *Hartung v. Witte, 18 N.W. 175 (Wis. 1884),* Orton, J., said:

> There must be an uncertainty as to the true line, and some question, dispute, or controversy about it which can be settled by such an agreement or acquiescence. In other words, that is certain which can be made certain; and if the true line cannot be made certain by the deed and a survey, or by the calls and monuments mentioned in the deed, then only it may be made certain by an agreement or acquiescence of the parties. There must be such uncertainty as to cause a dispute of controversy of the parties before resort can be had to such evidence. In this deed there is no uncertainty as to the true west line of the premises, and there is no evidence of any question or dispute of the parties concerning it, and both parties know or can ascertain where the true line is... When the true line can be ascertained by a correct survey, it is considered certain;

Coats v. Taft, 12 Wis. 388 (1860).

Johnson, 235 S.W.2d 876 (Ark. 1950)* (a call running "to the north bank" of a lake ran to the center of the lake); *Johnson v. Smith, 219 S.W.2d 926 (Ark. 1949); Stoner v. Rice, 22 N.E. 968 (Ind. 1889); Ridgway v. Ludlow, 58 Ind. 248 (1877); Earhart v. Rosenwinkel, 25 N.E.2d 268 (Ind. App. 1940); Ottowa Shores Home Owners Ass'n v. Lechlak, 73 N.W.2d 840 (Mich.*

1955); Burt v. Munger, 23 N.W.2d 117 (Mich. 1946); Clute v. Fisher, 31 N.W. 614 (Mich. 1887); Tucker v. Mortenson, 148 N.W. 60 (Minn. 1914); Kirkpatrick v. Yates Ice Co., 45 Mo. App. 335 (1891); Barcus v. Blanchard, 39 A.2d 499 (N.J. Ch. 1944), aff'd, 42 A.2d 271 (N.J. Err. & App. 1945); *Kanouse v. Stockbower, 21 A. 197 (N.J. Ch. 1891), rev'd, 26 A. 333* (N.J. Err. & App. 1893); *Gouverneur v. National Ice. Co., 31 N.E. 865 (N.Y. 1892); Lewis v. Clark, 133 N.Y.S.2d 880 (1954); Waters of White Lake, Inc. v. Fricke, 123 N.Y.S.2d 400* (N.Y.A.D. 3 Dept. 1953), *aff'd, 126 N.E.2d 568 (N.Y. 1955); Hammel v. Camp Ranger, 87 N.Y.S.2d 892* (N.Y.A.D. 3 Dept. 1949), *aff'd, 90 N.E.2d 63 (N.Y. 1949); Lembeck v. Nye, 24 N.E. 686 (Ohio 1890); Olson v. Huntamer, 61 N.W. 479 (S.D. 1894); Providence Forge Fishing & Hunting Club v. Miller Mfg. Co., 83 S.E. 1947 (Va. 1915); Snively v. Jaber, 296 P.2d 1015 (Wash. 1956)* (boating, swimming, fishing and similar rights in nonnavigable lakes are held by all riparian owners as tenants in common); *Snively v. State, 9 P.2d 773 (Wash. 1932); Bernot v. Morrison, 143 P. 104 (Wash. 1914).* A boundary in a deed as the meanders of a contour line of a lake where the grantor had previously given an easement to a federal authority to flood to the contour line carried title only to the contour line and not to the center of the lake but gave an easement to use the land below the contour line to the water's edge as lake frontage; *Ulbricht v. Friedsam, 325 S.W.2d 669 (Tex. 1959).*

(n634)Footnote 1335. *Linthicum v. Shipley, 116 A. 871 (Md. 1922); Haines v. McLean, 276 S.W.2d 777 (Tex. 1955).* But if there is a body of swamp or wasteland between the government meander line and the river bank, the patents do not cover such land but run only to the meander line; *McDonald v. Mason, 76 P.2d 212* (Cal. 1 Dist. App. 1938).

(n635)Footnote 1336. *Stewart v. Turney, 142 N.E. 437 (N.Y. 1923); Ubricht v. Friedsam, 325 S.W.2d 669 (Tex. 1959)* (denying ownership to the center of the bed where it was too difficult to measure).

(n636)Footnote 1337. *St. Helen Shooting Club v. Mogle, 207 N.W. 915 (Mich. 1926).* In Arkansas each riparian owner holds title of the bed to the center if nonnavigable lake; *Person v. Johnson, 235 S.W.2d 876 (Ark. 1949),* and this is the presumption in New York; *Johnson v. Smith, 219 S.W.2d 926 (Ark. 1949); Lewis v. Clark, 133 N.Y.S.2d 892 (1954); Hammel v. Camp Ranger, 87 N.Y.S.2d 892* (N.Y.A.D. 3 Dept. 1949), *aff'd, 90 N.E.2d 63 (N.Y. 1949).* So in Michigan; *Ottowa Shores Home Owners Ass'n v. Lechlak, 73 N.W.2d 840 (Mich. 1955); Burt v. Munger, 23 N.W.2d 117 (Mich. 1946).* Ownership of bed of nonnavigable lake is in severalty among the riparian owners; *Schmidt v. Marschel, 2 N.W.2d 121 (Minn. 1942).* Deed to land on Aeast side" of pond conveyed to the center; *Confer v. Pirman, 286 N.Y.S. 192* (N.Y.A.D. 3 Dept. 1936), *aff'd, 7 N.E.2d 706 (N.Y. 1937).* Those who acquire title from the United States to land bordering a nonnavigable lake acquire title to the bed of the lake; *Ozark-Mahoning Co. v. State, 37 N.W.2d 488 (N.D. 1949).* So in Utah if lake was nonnavigable at time of admission of state to the union; *Monroe v. State, 175 P.2d 759 (Utah 1946).* So also North Dakota; *State v. Brace, 36 N.W.2d 30 (N.D. 1949).* Land under public pond as belonging to people in sovereign character, *See State v. Quattropani, 133 A. 352 (Vt. 1926).*

(n637)Footnote 1338. *Hardin v. Shedd, 190 U.S. 508, 23 S. Ct. 685, 47 L. Ed. 1156 (1903); Boardman v. Scott, 30 S.E. 982 (Ga. 1897); Noyes v. Collins, 61 N.W. 250 (Iowa 1894); Stevens v. King, 76 Me. 197 (1884); Patapsco Guano Co. v. Bowers-White Lbr. Co., 59 S.E. 538 (N.C. 1907); Diedrich v. Northwestern Union R.R., 42 Wis. 248 (1877).* In Pennsylvania the mere fact that a conveyance contains a call bounding on a nonnavigable lake with no course and distance does not carry the grantee's title beyond the lake shore or give any rights of fishing therein; *Matthews v. Bagnik, 41 A.2d 875 (Pa. Super. 1945).* If the state is the grantor, title goes only to the edge of the lake, *Strayhorn v. Jones, 300 S.W.2d 623 (Tex. 1957); Heard v. Refugio, 103 S.W.2d 728 (Tex. 1937); Welder v. State, 196 S.W. 868 (Tex. App. 1917),* or to the bank of a river. In Texas the rule that a call was to the center of a nonnavigable stream is not applicable to lakes. In the case of lakes the call excludes the bed; *Friedsam v. Ulbricht, 315 S.W.2d 442 (Tex. App. 1958), aff'd in part, rev'd in part, 325 S.W.2d 669 (Tex. 1959).*

(n638)Footnote 1339. *Clute v. Fisher, 31 N.W. 614 (Mich. 1887).* Where a lake-shore line is uneven before the area of the bed owned by the respective riparian owners is determined, all must be joined in a court action; *Grand Rapids Ice & Coal Co. v. South Grand Rapids Ice & Coal Co., 60 N.W. 681 (Mich. 1894); Snively v. Jaber, 296 P.2d 1015 (Wash. 1956); Seattle Factory Sites Co. v. Saulsberry, 229 P. 10 (Wash. 1924).*

Co., 91 P. 469 (Or. 1907).* In Wisconsin, it has been held that as to United States

survey where the river is a boundary, the starting point projecting the division line between lots extended out into the stream is the bank of the river itself at the time of the government survey rather than the meander line; *Menasha Wooden-Ware Co. v. Lawson, 36 N.W. 412 (Wis. 1888).*

(n703)Footnote 1404. *Johnston v. Jones, 66 U.S. 209, 17 L. Ed. 117 (1861); Jones v. Jonston, 59 U.S. 150, 15 L. Ed. 320 (1855); Emerson v. Taylor, 9 Me. 42 (1832); Sparhawk v. Bullard, 42 Mass. 95 (1840); Clark v. Campau, 19 Mich. 325 (1869). See* the following cases: *Blodgett v. Davis Lbr. Co. v. Peters, 49 N.W. 917 (Mich. 1891); Bay City Gas-Light Co. v. Industrial Works, 28 Mich. 182 (1873); Aborn v. Smith, 12 R.I. 370 (1879); Northern Pine Land Co. v. Bigelow, 54 N.W. 496 (Wis. 1893); Menasha Wooden-Ware Co. v. Lawson, 36 N.W. 412 (Wis. 1888). See In re Application of Central Nebraska Public Power & Irr. Dist., 295 N.W. 386 (Neb. 1940).* Tide line boundaries must be extended out from the shore at right angles to the shore line or the line of navigable water instead of extending the course of the upland division line; *Oregon Coal & Nav. Co. v. Anderson, 206 F. 404 (9th Cir. 1913); Shawmut Mfg. Co. v. Benton, 122 A. 49 (Me. 1923).* The upland boundary lines are to be continued into the river in the regular course so as to determine the ownership of land beneath the water; *Hagan v. Campbell, 8 Ala. 9 (1838).* Where the shore line is fairly straight the tendency is to project the division line out into the river at right angles from the line of the shore but from a base line representing the shore line; *Frazers Million Dollar Pier Co. v. Ocean Park Pier Co. v. Ocean Park Pier Co., 197 P. 328 (Cal. 1921), 198 P. 212 (Cal. 1921); Baltimore v. Baltimore & Philadelphia Steamboat Co., 65 A. 353 (Md. 1906); Manufacturers Land & Imp. Co. v. Board of Commerce & Nav., 121 A. 337 (N.J. Supp. 1923), aff'd, 127 A. 924* (N.J. Err. & App. 1925); *People ex rel. Cornwall v. Woodruff, 51 N.Y.S. 515 (N.Y. App. Div. 1898); O'Neal v. Rollison, 192 S.E. 688 (N.C. 1937); Ludwig v. Overly, 19 Ohio C.C. 709 (1895); McCullough v. Wall, 4 S.C. 68 (1850); Lambert's Point Co. v. Norfolk & W. R.R., 74 S.E. 156 (Va. 1912).* Line drawn perpendicular to the line or general course of the channel; *Merril Stevens Co. v. Durkee, 57 So. 428 (Fla. 1912).* In the case of *Hayes v. Bowman, 91 So. 2d 795 (Fla. 1957),* involving tidal waters, it was held that the riparian rights of an upland owner must be preserved over an area as near as practicable in the direction of the channel so as to distribute equitably the submerged lands between the upland and the channel. Running the side line as perpendicular to the thread of the stream; *Ulbright v. Baslington, 119 P. 292 (Idaho 1911); Bay City Gas-Light Co. v. Industrial Works, 28 Mich. 182 (1873).* Title to accretions is determined by extending the boundary lines of the upland; *McCamon v. Stagg, 43 P. 86 (Kan. App. 1896).* In *Emerson v. Taylor, 9 Me. 42 (1832),* title plats were divided by drawing a base line from the corner of each lot where they strike the shore and extending these corners in a parallel line to the low watermark at right angles to the base line. This method was attacked in *Stockham v. Browning, 18 N.J.Eq. 390 (1867)* and in *Call v. Carroll, 40 Me. 31 (1855),* was held to apply only to the original division of lots on the upland and not to be applicable so as to change the areas, boundaries and plats by reason of any subsequent subdivision of any upland lot. In other cases the dividing line is made by projecting at right angles to the "course of the river;" *A. M. Campau Realty Co. v. Detroit, 127 N.W. 365 (Mich. 1910).* The following general rules for the apportionment of riparian rights are firmly established: If the shore line is straight, the riparian lines are to be extended from the divisional lines on shore into the water, perpendicular to the shore line. If, on the other hand, the shore line is concave, converging lines shall be run from the divisional shore lines to the line of navigability; *Baltimore v. Baltimore & Philadelphia Steamboat Co., 65 A. 353 (Md. 1906).* If the shore lines are convex, the lines will be divergent to the line of navigability; *Mutual Chem. Co. v. Baltimore, 33 F. Supp. 881 (D. Md. 1940).* Division line between adjoining riparian tracts should run out from the shore so as to strike the thread of the river at right angles under the Michigan rule; *Bay City Gas-Light Co. v. Industrial Works, 28 Mich. 182 (1873), McKain v. Central Nebraska Public Power & Irr. Dist., 295 N.W. 386 (Neb. 1940).* If there has been an official bulkhead line, or pierhead line or harbor line extended out into the river for improvements such as for wharfage purposes, a few cases have apportioned the river area by drawing division lines perpendicular to such officially prescribed lines extending along the river; *Columbia Land Co. v. Van Dusen Inv. Co., 91 P. 469 (Or. 1907); Taber v. Hall, 51 A. 432 (R.I. 1902); Manchester v. Point Street Iron Works, 13 R.I. 355 (1881); Aborn v. Smith, 12 R.I. 370 (1879).* General principles from which the disputed boundary line may be determined: First: In adjudicating the ownership of tidelands between adjoined upland owners on a concave shore line, each upland owner is entitled to a proportionate share of the tidelands extending to the low watermark. Second: The course or courses of the boundaries of the upland properties should be disregarded, each upland owner being entitled to share ratably in the adjoining tidelands having regard only to the amount of shore line which the owner owns, lying between the points where the lateral boundaries of the upland meet

the shore line or the government meander line, whichever, in the particular case constitutes the water boundary of the upland. Third: Tidelands should be apportioned between the respective upland owners to that as the whole length of the low waterline, so is each landowner's proportion of the shore line to each owner's share of tidelands along the line of low water. Tidelands may be divided between adjoining owners by erecting lines perpendicular to the general course of shore line only in cases where the shore line is straight, or substantially so. In *Spath v. Larsen, 148 P.2d 834 (Wash. 1944),* each owner of uplands along a concave shore line of navigable waters was held entitled to share ratably in adjoining tidelands considering only the amount of shore line which the owner owns between points where the lateral boundaries of the upland meet shore lines or government meander line, whichever is the boundary.

§ 90.04 Land Surveys.

[Go To Supp]

§ 90.04(a) Official Surveys.

Lines established by official surveys control over those made by private parties. Particularly is this true in the case of original surveys made by the United States government. These surveys, however erroneous, are conclusive and cannot be barred by private act, since they are extensive and comprehensive in nature and the entire survey system depends on interlocking. If the original government survey is shown with certainty, a purchaser of a subdivision of such survey takes by that survey, and calls in the purchaser's deed that are inconsistent with such survey must yield to it. n1429 The original government survey, even though incorrect, is conclusive between individual buyers and sellers who deal with the property on the basis of such survey, n1430 and the courts will protect the rights of property acquired on the faith of an original survey. n1431 However, a deed purporting to convey a half of a government quarter section of land that has not been previously subdivided is operative as a conveyance of a quantitative half of the tract without regard to the rules of the United States Land Department with reference to the subdivision of such tracts. n1432

Where a line was actually run and a division made in an original government survey, established in accordance with the field notes, and the line of division was marked by corners or natural objects, the patentee from the government will take according to such survey without regard to a mistaken description of courses and distances or quantity. n1433 Where the description in a deed is by government section numbers, the land conveyed is such only as is situated within the designated sections as surveyed and platted by the government, the original government corners and lines being such sections' true and only boundaries. n1434 Although, by reason of errors or defects in the original survey, a section has been divided unequally and the purchaser of one "quarter" or "forty" in such section has acquired a larger acreage than the purchaser of another "quarter" or "forty" therein, the former is under no obligation, either legal or equitable, to divide the excess with the latter. n1435

Where the line of an older survey is given as a boundary, but the distance given in the course towards the survey will not carry the land to the line thereof, the survey line will control, n1436 but where a survey calls for the lines of another survey, courses and distances must yield, so that the survey may run with the lines called for. n1437

In a conflict between two surveys, the later of which was not made on the ground, but in the office of the surveyor from

the surveyor's memory of the former survey, calls for certain trees as an established corner must yield to the earlier survey. n1438

A deed of a lot by number conveys the lot as it is bounded by the lines actually run by the survey, when they can be ascertained. n1439

The object of all rules for the establishment of boundaries is to ascertain the actual location of the boundary as made at the time. n1440

Statutes in some states provide for establishing disputed boundaries by an official survey. n1441 To make such a survey final and binding upon the parties, notices must be given, and all proceedings had in substantial conformity with the statute. n1442 The fact that notice was given to the parties to be affected should appear on the face of the proceedings; n1443 but such notice may be waived by appearing and asking the decision of the court on an agreed statement of facts with a view of appealing from the survey. n1444

Such official survey may establish the permanent boundaries between two tracts of land, but cannot change the title to the land. n1445 A survey made under a state law without regard to government corners, and with no thorough attempt to locate obliterated or lost corners is not binding. n1446 An official survey merely establishing the true lines and corners has been held not to affect the location of an independent agreed boundary or ownership or possession depending on a valid boundary agreement. n1447 A proceeding to establish a boundary line is a special proceeding so that it is competent for the defendant to plead the equitable defense of mutual mistake. n1448 Authority under an equitable proceeding to ascertain the true boundary lines between adjacent lands cannot be extended to the determination of the title. Title must be determined by a suit at law to recover the land. It is true that the determination of the boundary may involve the title to some portion of the land. n1449

What constitutes a boundary line is matter of law to be determined by the court, but where the boundary is, is a matter of fact to be ascertained by the jury. n1450

§ 90.04(b) Government Surveys as Controlling.

As a general rule, government surveys, even though incorrect, are conclusive on private persons. n1451 A survey governs a plan in a dispute over a boundary as regards grants in severalty of lots of land laid off on a particular plot. n1452 Field notes and a plat of government surveys of record are controlling, even though the established monuments have disappeared. n1453 Where government section corners are obliterated, the resurvey must, if possible, locate the corners where they were originally placed by the government, even though the government survey was inaccurate and to thus relocate the corners will distort the shape of the section or other tract of land affected. n1454

The plats and surveys made by the United States government cannot be contradicted by parol evidence, private surveys, and plats. n1455 If the stakes or monuments set by the government surveyors cannot be found, the point of the original location must be determined from other evidence. n1456 After the title to public land has passed out of the government by the issuance of a valid patent, the courts will protect private rights thereby acquired against interference by corrective surveys subsequently made by the federal land department. n1457 A government survey, even though incorrect, is conclusive where there is a controversy between persons asserting conflicting claims under grants or patents based on such survey. n1458 Corners shown to have been originally made by government surveyors are conclusive, and must be accepted as the true corners, no matter how inaccurately they may have been originally established. n1459

If the cornerstones or other monuments established by the government surveyor can be ascertained as originally located, these control the survey, and the lines shown by the field notes of the survey must be disregarded. n1460 If such a corner is made a starting point of a description, it will prevail as against an actual survey and a corner fixed by the grantor at the time of the conveyance. n1461 Where it is doubtful which of two lines of monuments is the true government line, other things being equal, that one is to be so considered which most nearly conforms to the field notes. n1462 A surveyor called on to locate government corners and lines should merely locate those without acting as arbiter of disputes or correcting mistakes in the original survey. n1463 A purchaser has a right to be protected in the land which purchased with reference to the original monuments or locations, whether right or wrong. n1464 A statute, providing for the permanent survey of lands, confers no power upon the commissioners to run new boundary lines, but their duty is simply to ascertain as near as possible lost corners, and to retrace and reestablish the lines of the original government survey and those by which purchasers have been influenced and governed in previous conveyances. n1465

Official government surveys are not open to attack between private parties in boundary disputes. n1466 Where there is a discrepancy in a government survey between the monuments and the distances given in the field notes, the monuments will control, even though the result be that some of the quarter sections will contain less than their proper number of acres. n1467 There is a presumption, however, that the corners were established at the places indicated by the field notes; and the proof that they were not so established must be clear and convincing where the actual location as claimed does not accord with the section lines in adjoining sections, and will establish the claim in an irregular shape. n1468 Where the location of the government corner is established by clear and satisfactory evidence, it will control over the field notes of the government survey. n1469 In relocating lost corners on township lines, when the monuments claimed to be government monuments are disputed and not clearly established, these should be established on a line coinciding with the township line at the points indicated by the government field notes, that is, on a straight line connecting known and undisputed government monuments on such township line. n1470

Monuments and boundary lines as established by the government survey control the description of lands patented by the United States, and mistakes in the surveys cannot be corrected by the judicial department of the government. n1471 If the field notes of the government survey afford sufficient data for running the lines of that survey, the fact that certain monuments marking the corners of the survey cannot be found does not render the lines unknown or uncertain so that they can be proved by parol evidence. n1472

An original government survey, under which adjoining owners have purchased, governs the boundary between them as against a subsequent survey made many years afterwards under an act of Congress which recited that the town had never been properly surveyed. n1473 Where it appears that a purchaser of a part of a government section of land built a fence upon the boundary lines as located by a surveyor at that time, and he testifies that he found the original stake of the government survey and used it as a starting point, this line will prevail over one surveyed twenty years later, when the corner stake had disappeared. n1474

A government description point will control over conflicting calls for course and distance. n1475 Official government surveys are not subject to attack by private persons in boundary disputes. n1476 Surveys run by county surveyors are only prima facie correct. n1477 Where both titles are derived from a common grantor the older deed governs as to a disputed boundary. n1478 Errors in United States surveys cannot be corrected by the courts since such surveys create boundaries and do not merely ascertain them. n1479 There is a presumption in favor of the correctness and regularity of an official survey. n1480

§ 90.04(c) Tracing Survey Lines Backwards

It sometimes becomes necessary to make a resurvey of land in order to find lost lines or monuments, n1481 and in such case the original survey must be retraced when possible, n1482 using the field notes of the original survey for this purpose. n1483 The original survey may be traced backward as well as forward. n1484 Thus, if in running a line in one direction, a difficulty is met with and all of the known calls in the survey can be met by running in the reverse direction, the running of such reverse course is permissible. n1485 The beginning corner of a survey is of no higher dignity than any other corner. n1486 In establishing lost corners, one should go to the known corners of the survey and reverse the calls, and in that manner find the lost corner. n1487 It is true, nevertheless, that "the natural order of survey is that which the deed shows the parties to the deed adopted to identify, to their own satisfaction, the land intended to be conveyed by the one to the other. It may be considered as their direction for how the identity shall be established by survey at any future time, and it supposes certain points as the beginning to be established. If, therefore, the description of a particular line be complete in itself, the court cannot vary from that description of a posterior line, unless the description of the latter be more specific than the former, and unless from the latter a mistake in the former can be clearly inferred." n1488

COMPUTER-ASSISTED RESEARCH

LEXIS: Survey! w/10 (trac! w/5 backward!)

§ 90.04(d) Comparing Conflicting Surveys.

A resurvey does not affect rights previously vested, its purpose being to ascertain the lines of the original survey without regard to their correctness. n1489 Where there is a conflict between the field notes of different surveys, the field notes of the senior survey will prevail. n1490 A surveyor's call to tie to a junior survey has been held not to control over another call to tie to a senior survey. n1491

Where adjoining owners have entered into possession of land according to boundaries marked by stakes, these are monuments which prevail over the courses and distances of a subsequent corrected survey. n1492 It has been held that a survey merely establishing the true lines and corners does not affect the location of an independent agreed boundary or ownership or possession depending on a valid boundary agreement. n1493 Subsequent surveys may aid in finding lost corners, but where the old and recognized corners are well known, these must control. n1494 When a boundary mark made in a government survey has been obliterated or lost, in relocating it by a resurvey made by township officers the question is, not where the mark ought to be, if the township had been correctly surveyed, but where it is according to the original survey. n1495 A "lost corner" is a point of a survey the position of which cannot be determined beyond reasonable doubt, either from original traces or from other reliable evidence as to the position of the original monument, and the restoration of which on the ground can be effected only by means of a proper survey with reference to interdependent existent corners. n1496

If a purchaser takes possession of the land and fences it soon after the making of a survey, and the person who made the plat pointed out the bounds, it is presumed that the purchaser's possession was taken according to the lines of the actual survey. n1497 It is also competent to establish the lines and courses of a tract of land by showing where the surveyor actually ran when making the survey at the instance of the parties to the conveyance, and with a view to its execution. n1498

Where a description called for a stake on the quarter section line, the deed was held to convey no land beyond that line notwithstanding that the parties may have placed the stake at some other point.

In the absence of other means of identifying a survey it may be identified by known calls of other surveys. n1499 As a general rule, where there is a conflict between the lines of different surveys, it is the lines of the older survey which will prevail. n1500 Where there is a conflict between the field notes of a patent and the field notes of a surveyor filed in the general land office, if the surveyor's field notes represent the footsteps of the surveyor on the ground, the original field

notes rather than those contained in the patent control. n1501 A call for another and older survey will be taken to be the correct boundary, and the location will extend to such survey when no material excess of land is shown. n1502 Where a survey calls for the lines of another survey, these control courses and distances, so that the survey may run with the lines called for. n1503 A call for another survey definitely located is properly ignored where, if followed, it necessitates a total disregard of course and distance, and causes the remaining bounds to conflict with other surveys, and to make the quantity of land very different from that called for. n1504

COMPUTER-ASSISTED RESEARCH

LEXIS: Survey! w/10 (conflict w/20 compar!)

§ 90.04(e) Influence of Field Notes.

A survey is to be located by the calls of its own field notes, and such notes cannot be varied by extrinsic evidence. n1505 Field notes will be read into a deed when they are referred to therein. n1506 Objects not called for in the deed cannot be accepted as corners if they conflict with the field notes. n1507 The field notes of a junior survey may be admissible as evidence of the boundaries of a senior survey, but their relevancy and materiality must be shown. n1508 A certified copy of the surveyor's field notes is admissible to identify the land. n1509 The original field notes and plats of a survey are admissible to identify the land, or to remove doubts as to the description, without any reference being made to them in the deed. n1510 Field notes do not locate lines on the ground, but merely furnish data by which surveyors can locate them. n1511

The boundaries of a survey may be located by surrounding surveys referred to in its field notes, even though its corners and lines cannot be found on the ground, and even though there is a discrepancy in its area between the field notes and its boundaries as so located. n1512 Where the boundaries of a survey cannot be located by its own calls and field notes, they may be established by the field notes of adjacent surveys. n1513 The field notes of a block constituting a prior survey might be explained by subsequently made field notes of another block. n1514 To render field notes of the surveyor admissible as evidence to identify the land, under a statute requiring the county surveyor to record all surveys with the county with plats thereof, it is necessary to certify that the field notes were correctly copied from the record. n1515 In an action involving a disputed boundary, the field notes of a survey of the land made when it was owned by the parties' common grantor was held inadmissible, where it did not appear under what circumstances the survey was made and the defendant's deed in no way referred to it.

An identified government monument will prevail over a call of the field notes for measurements. n1516 Calls for monuments in the field notes of a government survey control in relocating the boundaries. Thus, when a patent is issued with boundaries as described in a survey and with a map made by a government surveyor who has also made field notes giving not only courses and distances, but also monuments and the various topographical features of the country, the calls for monuments will control the courses and distances. n1517 Incidental calls for monuments, or natural objects noted in field notes as such in passing, unless specially designated in such manner as to show an intention to make them locative, are not such calls as will ordinarily have precedence over calls for courses and distances. n1518 A court will attach considerable importance to a call in a grant from a Mexican state for stone monuments in the field notes, where the law of the state required corners to be erected on quarried rock and lime mortar. n1519 In establishing a boundary between coterminous quarter sections within the interior of a township, where the government corners are obliterated and their locations cannot be established by witnesses who know the sight thereof, surveys according to the government field notes from known government corners, both north and south and east and west of the corner in dispute, so as to locate the contested corner on a line with other corners on both of those lines, and to give each owner an equal amount of land, should ordinarily be preferred to a survey which does not commence at a known or conceded government corner, and gives to one owner much more land than is accorded the other. n1520

An actual survey established by evidence controls course and distance. n1521 The monuments of the original survey

control if these can be found, or the places where they were established can be ascertained; n1522 but if a monument cannot be located or definitely identified, it must give way to a more certain method of locating the boundary. n1523

A house referred to in the field notes of a survey, and marked upon a map, becomes a monument as much as a tree or a stake. n1524

Generally, the location of corners of a survey may not be established or controlled by artificial objects or marks not called for in the field notes. n1525 In relocating old points the footsteps of the surveyor should be followed. n1526

COMPUTER-ASSISTED RESEARCH

LEXIS: Survey! w/10 (field note!)

§ 90.04(f) Control by Lines Marked or Surveyed.

The line actually run is the true boundary, n1527 provided the actual survey can be found and identified as the one called for, n1528 and prevails over maps, plats, and field notes. n1529 Lines actually run and marked upon the ground control calls for natural or other fixed boundaries, and calls for adjoining boundaries and for courses and distances. n1530 The lines marked on the ground constitute the actual survey, and where those lines are located is a matter to be determined by the jury from all the evidence. n1531 If the stakes and monuments set at the corners of the parcel in making the survey have disappeared, it is competent to show their location by parol evidence. n1532 It is presumed that a line in a call from one monument to another is a straight line; n1533 but this is rebutted when the language of the deed shows that a different line was intended. n1534 When a line was actually run and marked and corners made, and the marks and corners can be found, the line will control, although the deed calls for a natural object not reached by such line. n1535 It is only when the marked lines can be identified on the ground that they will control a call for course and distance. n1536 A call for course and distance will control a call for an unmarked line which cannot itself be ascertained except by running the boundaries of another survey according to course and distance. n1537 Generally where an artificial object such as a marked line is called for as a monument, the monument when found and identified will be taken as a better guide in following the footsteps of the surveyor than the call for distance. n1538 A new survey cannot affect lines established pursuant to an earlier survey. n1539

LEXIS: Survey! w/10 (lines w/5 mark!)

§ 90.04(g) Superiority of Calls for Monuments.

Where a deed has calls or other descriptions which are not in agreement, certain general laws have been established to govern the conflicts. The basic rule governs priority of calls. In the absence of proof of a conflict between natural objects or monuments and other elements, such as courses and distances, the presumption is that no conflict exists. n1540

A "monument" is a tangible landmark, n1541 and monuments, as a general rule, prevail over courses and distances, for the purpose of determining the location of a boundary, n1542 even though this means either the shortening or lengthening of distance, n1543 unless the result would be absurd and one clearly not intended, n1544 or all the facts and circumstances show that the call for courses and distances is more reliable than the call for monuments. n1545 This general rule is applicable to all lines sought to be established by field notes containing calls for either natural or artificial objects. This rule does not apply when it is evident that the call for a natural object or established boundary line was made under a mistaken belief with reference to the survey. n1546 These preferences are merely constructional preferences and will yield to the manifest intent of the grantor if this can be ascertained. n1547 This, however, is limited

by the absurdity theory holding that the monuments will yield to the course and distance if the following monuments will defeat the conveyance, but if barring course and distance would effectuate all the other parts of the description. n1548 Nor does the rule apply where the reference to a natural monument is incidental. n1549

Generally, in determining boundaries, natural and permanent monuments are the most satisfactory evidence and control all other means of description, n1550 in the absence of which the following calls are resorted to, and generally in the order stated: First, natural boundaries; second, artificial marks; third, adjacent boundaries; fourth, course and distance, course controlling distance, or distance controlling course, according to circumstances. n1551 Area is the weakest of all means of description. n1552 The rationale of these rules is that mistakes are deemed more likely to occur with respect to courses and distances than in regard to objects which are visible and permanent; n1553 monuments are considered more reliable evidence than courses and distances. n1554

In determining a common corner of four sections, monuments left by a United States survey on the ground are the best evidence as to where the corner should be, and any monument so established can only be disputed by evidence of other monuments. n1555 A description by course and distance is regarded as the most uncertain kind of description, because mistakes are likely to occur in the making of the survey, in entering the minutes of it, and in copying the same from the field book. n1556

When it comes to courses and distances, the latter yield to the former. n1557 The weight of authority gives courses control over distances. n1558 There is no magic, however, in a monument which gives invariable control in cases of conflicting calls. It controls only because it is regarded as more certain than a given course and distance. If it should in a given case be less certain, the rule would fail with the reason for it, and the monument would yield to course and distance, and artificial monuments would yield more readily than natural ones. n1559 The rule naturally does not apply when no call is made for the particular monument, because objects not called for in the deed cannot be looked to as corners, if they are in conflict with field notes. n1560

The general rule that gives monuments controlling effect does not apply where the monuments are uncertain or cannot be identified, n1561 or the calls therefor are admittedly erroneous. n1562 Natural objects cannot prevail where they are doubtful, in which case recourse is had to artificial marks or monuments or other calls of inferior accuracy. n1563

The rule applies where the monuments or boundaries described in the deed are certain, or capable of being made certain, n1564 but where there is a doubt as to the monuments, as well as to the course and distance, there is no reason for declaring that the monuments shall prevail. n1565 It does not apply where the monuments or boundaries cannot be found, where they contravene all the other terms of the description, or where an adherence to them would defeat the evident intent of the parties. n1566 Though the monument referred to does not actually exist at the time, but is afterwards erected by the parties with the intention that it shall conform to the deed, it will control. n1567 Where natural monuments referred to in the deed can be found, they fix the boundary, though they correspond neither with the courses and distances nor with the quantity of land specified in the deed. n1568 It has been held that the rule that courses and distances in a deed give way to monuments in the ground is inapplicable to a deed conveying a seam of coal by deed wherein the descriptions extended by courses and distances to Athe coal crop line," since the coal crop line cannot be regarded as a fixed monument. n1569 If the land be described by courses and distances only, or by natural objects not distinguishable from others of the same kind, course and distance, though not safe guides, are the only guides given, and must be used. n1570

The rule is not applicable moreover where the reference to the monument is incidental, the monument is an intermediate point and no clear intention is shown to make such call locative. n1571

The monument rule is a rule of construction and not one of law and is not imperative and exclusive, but is to be applied in determining the intent of the grantor. n1572 So a call for a monument in a deed does not control absolutely, so as to preclude the consideration of other evidence as to the true locality of the land. n1573 Calls for distance and quantity

must yield to conflicting calls for natural or artificial objects, in the absence of extraneous evidence showing a contrary intention. n1574 Courses and distances will prevail over monuments, if the former best comport with the circumstances of the case and the manifest intention of the parties, n1575 or where it is obvious that the former furnish the most certain guides to the location and quantity of the land. n1576 Courses and distances will prevail over monuments, if it appears that the latter were inserted by mistake, or were laid down by conjecture, and without regard to the rule. n1577 When it is manifest that there is a mistake as to the monument, or the monuments are uncertain, inferior evidence of location may control the higher. n1578 Where the boundary is not fixed and known, and the location of monuments is in dispute, is lost, or is left in doubt by the evidence, courses and distances will be considered in fixing boundaries. n1579 Where no monuments are referred to in the description, and none are intended to be erected, the distance stated therein must control the location. n1580

The rule that courses and distances yield to monuments will not be applied where to give it effect would result in destroying the continuity of a line and such continuity can be preserved by rejecting a call which is manifestly erroneous. n1581 A monument inadvertently referred to, or inconsistent with the rest of the description, may be rejected. n1582 So, if the monuments described in a deed cannot be found, nor their location proved, resort must be had to other parts of the description to identify the land; and courses and distances, if they are given and appear to be correct, may be relied upon. n1583 "The courses and distances," said Chief Justice Marshall, "are less certain and less permanent guides to the land which was actually surveyed and granted than natural and fixed objects on the ground; but they are guides to some extent, and, in the absence of all others, must govern us. If a grant be made which describes the land granted by course and distance only, or by natural objects not distinguishable from others of the same kind, course and distance, though not safe guides, are the only guides given us, and must be used." n1584

If it is not proved that the monument exists at the point in conflict with stated courses, courses prevail. n1585

When it is apparent upon the face of the deed that the intention was to convey a specific quantity of land, if the courses and distances given would include that precise quantity, but the description by fixed monuments would embrace more or less, it is clear that the courses and distances should be followed. To do otherwise would be to defeat the plain intent of the parties. n1586

Where the starting point in a description is known, or ascertained by a survey, but at the time of making the deed the parties placed a monument in another place as the starting point, this must yield to the survey and the requirements of the description given. n1587

The metes and bounds in a description prevail in a conveyance of the land Awith the buildings thereon," even though one of the buildings extends five feet over upon other land of the grantor; the deed does not convey the strip of land covered by the building, or any easement therein; n1588 but all the calls for monuments must be satisfied if this is reasonably possible. n1589 Where it appears by a survey actually made for the purpose of conveying the land that a different corner was established or a different line was actually run and marked, courses and distance will control. n1590

Some of the natural objects referred to in deeds as monuments are streams, rivers, ponds, lakes, shores, beaches, rocks, highways, streets, trees, and hills. n1591 They are objects permanent in character which are found on the land as they were placed by nature. n1592 Such natural objects serve the same purpose as artificial monuments and are better because they are more permanent and more readily ascertained. A call for "the hills" might in many cases be too indefinite a monument; but if there is a studied repetition of this call in several deeds, effect must be given to it, and it will prevail over a call for distance. n1593 As a general rule, where by the original survey and government plat, a tract of land appears to have as its boundary a body of water, such body of water is a natural monument, and will constitute the boundary, however distant or variant from the position indicated for it by the meander line, and hence will control as a call of the survey over either distances or quantity of land designated in the conveyance or on the government plat. n1594 The margin of a lake, the location of which is shown to vary, is not such a natural monument as will control

courses and distances. n1595 Natural objects called for in field notes of a survey are of controlling importance in locating a survey on the ground. n1596 A call for a river will prevail over calls for stakes or movable stones, where there is no evidence that there was a mistake in the call for the river or that there is no river at the place called for. n1597

Boundaries marked out on the ground by vendor and purchaser control over courses and distances set out in the subsequent deed of conveyance. n1598

When different and conflicting monuments are given, that which is the most substantial, the most clearly identified, and must certain to be that with reference to which the patties contracted, must be regarded as controlling. n1599 Where one of two conflicting monuments corresponds with courses and distances, it is the one which should prevail. n1600 Where there is a conflict in the calls of description, such elements of description will be preferred as are the least susceptible to mistake. n1601 The owner of a large tract of land, divided into lots for houses, sold a lot with a house built upon it, bounding it, beginning at a fence two hundred and thirty feet distant, and thence by a line running around the lot, the courses and distances of which were given. One of the conditions of the conveyance was that the house should occupy the entire width of the lot, and it was recited that the house then upon the lot was in compliance with the conditions named. Afterwards the owner sold the adjoining house and lot by a deed containing a similar description. It was held that the center of the partition wall between the two houses was the true boundary, although the effect of measuring from the fence referred to would be to place the whole of the partition wall on the lot last sold. The house itself was the controlling monument rather than the distant fence. n1602

When there is conflicting evidence as to natural objects named in running the lines, this is not to be put wholly out of view; but if the jury, after considering such evidence, are left in doubt, they will be justified in locating the land by referring to such natural objects mentioned as are certain. n1603

The initial monument of a survey is not usually of any more importance in determining the location of the survey than any other monument therein. n1604 When a monument is named as the point of beginning, words descriptive of the locality do not control, except as indicating the general locality of the monument. n1605 Thus in a grant "beginning on the side of Gallon Creek, at a small oak, John Edward's corner," the side of the creek is merely a description of the locality. The true point of beginning is the small oak. n1606

The starting call of a description, being more important than any other call, usually controls any other call with which it is in conflict, for it is supposed that a mistake in regard to that is less likely to occur; n1607 but when the succeeding calls are as readily ascertained, and are as little susceptible to mistake, they are of equal dignity with the first; and when all the subsequent calls conflict with the first, and agree with each other, their united testimony controls the point of beginning. n1608

Artificial monuments are more readily disregarded than natural monuments in favor of other modes of description. n1609 When it is apparent from the designation of quantity or other elements of description that the courses and distances given are correct, an artificial monument is readily discarded in favor of the description by courses and distances. n1610 The general rule that monuments control over courses and distances applies to artificial monuments as well as to natural monuments, though the former are less certain than the latter. n1611 A ditch may be dug as a boundary, but the evidence must establish the fact that it was the intention in the digging of the ditch that it was to constitute the boundary line. n1612 A deed of a house and lot in a row or block of houses described the side lines as being "eighty feet, or a fraction more or less." The grantor owned the land only to the depth of about sixty-five feet from the front; and extrinsic evidence showed that at the time of the conveyance a fence ran along the rear of the block of houses at that depth from the front. It was held that the fence formed a visible boundary and controlled the distance as expressed in the deed, and consequently there was no breach of the covenant of ownership. n1613

Monuments erected by the parties immediately after a conveyance have the same effect as if they had been in existence

at the time of the conveyance. n1614 Long recognized landmarks do not yield to private surveys. n1615 If the monuments themselves have disappeared, the positions where they were placed may be shown, and, when established with reasonable certainty by evidence, they govern, just as the monuments themselves, had they been found, would govern. n1616 In boundary disputes, courses and distances must yield to natural objects proved and established by evidence, and where courses and distances are not in harmony, courses must yield to distances. n1617 Roads and well-marked outlines which have been recognized by people over a long period of time control in a boundary dispute. n1618

A boundary upon a river is a monument that controls courses and distances as well as the corners and meander lines of a survey. n1619 A ditch is spoken of as a natural monument. n1620 Highways, fences, and walls are regarded as artificial monuments when referred to in deeds and the land conveyed abuts upon them. n1621 Houses, fences, and the like, may be adopted as landmarks in the place of natural landmarks, and their removal does not affect the boundaries of the land bought and sold with reference thereto. n1622 If a fence or wall on or near a boundary line is not called for or mentioned in a deed, there is no presumption that it was or was not intended for a line. Any inference from the fact is for the jury. n1623

A boundary by a monument has its legal terminus at the monument's central point, n1624 unless the monuments are structures such as a house, which ordinarily includes the land it stands upon. n1625 The presumption that the description runs to the center of the monument applies to both public and private rights-of-way, n1626 and regardless of whether opened at the time to the public. n1627 The weight of authority is that outside evidence cannot be introduced to contradict the running of a description to the center of a monument. n1628

Where the grantor owns the fee under the monument but no land on the other side, most cases -- on grounds of public policy against retention of a dangling strip -- hold the description to run under the entire monument, n1629 unless it is to the advantage of the grantor to retain the other half of the strip. n1630 The majority rule applies, even though the sovereign is the grantor. n1631 The measurement of the area, however, begins from the side of the monument. n1632

Ordinarily, if the boundary of land runs to or by the line of an object, the exterior limit of the object is intended. n1633 When a boundary is by a building, whether the boundary line is wholly outside of every portion of the building is a question upon which there is conflict of authority. In one case, where a deed described one of the boundaries of the land as four feet from the "northerly side" of a building, the boundary was held to be four feet from the most extreme part of the building, which in that case was the edge of the eaves. n1634 Where a conveyance described the boundary line of the land as commencing twelve and one-half feet east of a house, it was held that the distance should be measured from the foundation of such house; n1635 but in another case, where a deed described one of the boundaries as eight feet four inches from the "south side" of a building, that court held that measurement should be made from the corner board on the side of the building. n1636

The decision calling for measurement from the most extreme part of the building seems to be the better one in the case of a boundary by a building. The parties may well be presumed to intend that the boundary line shall be wholly on one side of every portion of the building; for it would be unreasonable to assume that the parties to the conveyance intended that the main portion of the building should be on one side of the line, and the cornices, and other projecting finish, on the other. n1637 This inference, however, may be controlled by other expressions in the deed, or rebutted by competent evidence showing a practical location by the parties, or working an estoppel of the plaintiff; n1638 but however this may be, in the case of a right-of-way, even if created by express grant, it is not an unreasonable presumption that such way was intended to extend under the projecting finish of a building. n1639

Some of the states decline to give a stake the dignity of a monument. n1640 In other states description by reference to stakes was held good, since parol evidence could show location of stakes. n1641 So a description by stakes is valid, even though stakes are not actually set. n1642 Stakes, when relied upon by purchasers. prevail over survey notes. n1643

LEXIS: Survey! w/10 (call! w/10 monument!)

§ 90.04(h) Adjoining or Adjacent Lands as Monuments.

Where there are inaccuracies in the descriptions of large bodies of land, courses and distances yield to calls for lines of adjacent owners. n1644 The line of adjoining land may constitute a monument n1645 and control courses and distances, n1646 unless the call for such line was a mistake or was based on conjecture, n1647 or the boundaries of the adjoining land are indefinite. n1648 The line which is to prevail, however, is not necessarily the line of occupancy n1649 but is the true line n1650 at the date of the deed. n1651 A description by well-ascertained monu-ments prevails over a description by reference to the limits of the lands of adjacent owners. n1652 If a boundary be by the line of a railroad, the line of the railroad becomes a monument and controls the boundary, instead of a line running "to a stake and stones"; n1653 if the railroad is then located, but not built, a subsequent change of location does not affect the boundary. n1654

If there are no monuments or marks upon the ground, a call for the adjoining lands prevails in case there is any discrepancy between such call and the courses and distances given. n1655 The length of the boundary line upon adjoining land is that named in the deed, if the distance is given. n1656

When a boundary is "by land of" another, the phrase means land belonging to that other owner, and does not include land in which that owner has simply an easement, n1657 such as a right-of-way, and does not include land occupied by that owner without having the title. n1658 The true line of the ownership of the adjoining land is the monument, rather than the line marked by possession, n1659 or that which the parties supposed was the line at the time the deed was executed; n1660 or that which the adjoining owner had contracted to purchase, and had paid the price for, and was occupying as the adjoining owner's own land, but for which that owner received no conveyance. n1661 If line of an adjoining owner's land, or a corner of the land referred to, has not been determined, the line or corner is wherever it may be finally located. n1662 If a mistake be made in the name of an owner of adjoining land, as where the name given is that of the owner's agent instead of the owner, this fact may be shown, and the boundary is sufficiently identified. n1663 A connecting call in the description of two tracts by metes and bounds cannot be disregarded, such call being a part of the description to be considered in determining the true intention of the parties. n1664 Under a deed wherein a particular description contained two calls, the court properly adopted the call in harmony with the preceding general description describing the land by calls for adjoining surveys rather than a call which undertook to describe the land by course and distance specifications conflicting with the preceding general description, since the general description is not to be disregarded where it can be harmonized with the particular one, and in case of conflict, the lot and block number by which the tract is conveyed will prevail over a specific description by metes and bounds. n1665

In the absence of monuments or calls for adjoiners to designate the land conveyed, the courses and distances in the deed must govern. n1666 Boundaries and abuttals in the description control the estimate of quantity. n1667

COMPUTER-ASSISTED RESEARCH

LEXIS: Survey! w/10 (adjoin! or adjacent w/10 monument!)

§ 90.04(i) Courses and Distances.

Courses and distances control the lines of a survey in the absence of calls for natural or artificial monuments or lines, n1668 or in case the monuments cannot be found, n1669 or in case the survey was erroneous. n1670 Where the description in a deed of land is by course and distance only, or by natural objects not distinguishable from others of the same kind, course and distance, though not safe guides, are the only guides given, and must be used. n1671

Course and distance will prevail over less certain descriptive elements where there is no practical location of the parties or no monuments in the deed are to be ascertained by the evidence. n1672 A metes and bounds description will control over a general description unless the parties contemplated otherwise. n1673

A supposititious call in a survey, made under a mistake as to the location of the object called for, will yield to a call for course and distance, whether the survey was an office survey or was actually made on the ground. n1674 An unmarked line is neither a natural nor an artificial monument, and it does not, when called for in a deed, overcome a call for distance. n1675 A description of land by courses and distances, without any mention of monuments, is not controlled by monuments subsequently erected. n1676 While monuments capable of identification always control courses and distances, the measurements of lines where courses and distances are given should not be disregarded in determining the identity of the monuments claimed to have been found with those referred to in a deed. n1677 Where the location of a boundary is not fixed and shown, and monuments are uncertain or left in doubt by the evidence, courses and distances will be considered in fixing the boundaries. n1678 Course and distance in a description will be preferred according to the intention of the parties. n1679 The courses and distances of a disputed survey prevail over the courses and distances of adjacent surveys. n1680 A course is given priority over a distance. n1681 A stated angle of a boundary line will control the line, even though it changes the distance from the end of the line to the next monument. n1682 Distances may control determination of boundaries if clearly expressed. n1683

COMPUTER-ASSISTED RESEARCH

LEXIS: Survey! w/10 (course! or distance!)

§ 90.04(j) Control of Boundary Line Angle.

The angle of a boundary line will control as against a measurement of another boundary line, when it appears to have been the intention of the parties to make the angle a controlling consideration. Thus, if a boundary line is described as running at a right angle to a street, this determines the shape of the lot, though this makes the area of the lot, and the measurement of it on the street, much more than the area and measurement expressed in the deed, these being given with the qualification of the words "more or less." n1684 A call in a description for a boundary line parallel with the center line of a section, is controlled by shown angles and end measurements which locate such boundary line as not parallel with such section line. n1685

It is sometimes said that courses control measurements. This can hardly be given as a rule. When there is a discrepancy between a course and distance, one or the other is preferred, according to circumstances. n1686 Thus, where corners marking three successive lines of a survey are lost, the distance of the three lines will be altered proportionately to make them conform to the known parts of the boundary rather than to radically alter the course of one of the lines. n1687

A deed describing a line as running at right angles to a creek or other stream of water is not on its face void for uncertainty, in the absence of anything to show that the creek does not run in a straight course, or that a straight line drawn along the thread of the stream would not intersect the beginning point. A perpendicular line drawn from this base line would answer the call in the deed. n1688 A call in a deed for a line running from a street at right angles thereto is not varied because the next call is for a distance of thirty feet, more or less, from the end of the line to a monument, when in fact the end of the line run at right angles is thirty-three feet and six inches from the monument. n1689 Where a boundary line is to run to an extended line, such as a river, a swamp, or the line of another tract of land, such line must run to the nearest point on such river, swamp, or line of another tract; and in carrying out this rule, even a call for a course and distance will be disregarded. n1690 Thus, where a deed to a lot described the property as beginning at a certain post and running to a certain street line, "in all being sixty feet," it was held to be the intention of the grantor merely to convey the land between those two monuments, and not an unconditional sixty feet. n1691 The course of a line beginning at a street or any other extended boundary line is presumed to be at a right angle to the street when the

angle is not specified. Magnetic variations must be considered in running old lines. n1692

COMPUTER-ASSISTED RESEARCH

LEXIS: Survey! w/10 (boundar! w/5 angle!)

§ 90.04(k) Control by Corners.

Marked corners are conclusive n1693 and will control over courses and distances. n1694 Although stakes and monuments are susceptible to being displaced or removed, they control so long as it is certain that they mark the corners of the original survey. n1695

If a line in the description of land in a deed is given as running a certain distance to a stake and stones, and no such monument exists, the end of the line, in the absence of evidence showing a contrary intent, is to be determined by the measurement. n1696

In case there is no error or inconsistency in the boundaries described in a deed until the last line is reached, which is declared to run a given course and distance Ato the place of beginning," but the given course and distance would not bring it to that point, nor complete the enclosure of any land, the course and distance of the last line should be rejected as erroneous, and effect be given to the more certain designation, "thence to the place of beginning." n1697

Town lots may be located according to the stakes found planted and recognized, and no subsequent survey can be allowed to unsettle the lines. n1698 Points marked by the original stakes and monuments placed by the government surveyors, if they can be found, or the place where they were can be identified, govern. n1699 The stakes of an original survey of city lots are more satisfactory evidence of the boundaries thereof than a location based upon marks and field notes of a subsequent survey not shown to be correct. n1700 A call for the corners of the land described in a lease, which were actually fixed on the ground and could be located, control over a call for a survey, so that the lease covered land within such boundaries regardless of whether they were included in the designated survey. n1701

The actual beginning corner, if this can be ascertained, must control in locating original surveys; n1702 yet, when a survey is made upon paper, and not upon the ground, the intention of the parties making the survey should control. This intention is to be ascertained by all the facts and circumstances connected with the case. n1703 Where the location of the survey's beginning corner is uncertain, the survey's lines may be run by starting with any other corner which is marked by either a natural or an artificial object called for, found, and identified. n1704 The beginning corner of the original survey does not control more than any other corner definitely ascertained, and it is not necessary to follow the calls of the grant in the order they stand in the field notes thereof, but they may be reversed and the lines traced the opposite way whenever by so doing the land embraced will more nearly harmonize all the calls and objects of the grant. n1705 In order to have a valid survey there must be a beginning point established by government or other official survey. n1706

If the beginning corner of a survey is on the bank of a stream, in running the other lines measurement must be made from the place where the beginning corner stood at the date of the deed, or else the whole tract would move with the bank of the stream. n1707

The question of the location of a starting point of a survey is one of fact for the jury, and not one of theory to be determined finally upon the opinion of surveyors or experts. Expert opinion as to the location of a corner post by a survey made more than forty years before is inadmissible. n1708

Testimony of a civil engineer that he had taken pains to establish the correctness of a stake designating a section corner; that he knew it to be approximately the location of the original section corner; that he had used the stake so frequently

with reference to other surveys that he was perfectly sure of its correctness; and that, if it were not correct, the streets would all be thrown out of line, is sufficient to warrant the admission of a survey the starting point of which was the stake alluded to, as against an objection that such point had not been located. n1709

Various definitely fixed corners from which a surveyor must operate and from which a court must form conclusions control in a boundary dispute. n1710 A corner or boundary well established by marks or monuments controls a description by a map or plat or survey, although this is made contemporaneously with the grant. The map or plat made by the surveyor is admissible in evidence as indicating the location of the survey, but at last the question of boundary is one of fact to be determined by the force and character of the testimony. Looking at the evidence in this way, the conclusion which is the most reasonable and satisfactory is the one to be adopted. n1711

Where a survey can be located according to its own field notes from established corners called for therein, such is the proper method of location rather than to look to the field notes of other surveys. n1712 A call for corners which were actually fixed on the ground and could be located were held to control over a call for survey, so that a lease embraced the land within such boundaries regardless of whether included in the designated survey. n1713 Where two corners of a survey can be definitely identified, the courses and distances may be ascertained from the field notes, and the entire survey constructed therefrom, and in such case the distance and quantity must yield to course. n1714 Where the monuments of the original survey of a town site have been destroyed, the descriptive words in a plat of the town site are controlling as to the location of the town site. n1715

Although the survey be an official one, if the surveyors were directed to establish a beginning corner, and then confine themselves to strict courses and distances, inasmuch as such a direction adopts the most unreliable indicia of location and boundaries know to conveyancers, the courts, in locating these surveys, will resort to every kind of evidence that is competent to establish a disputed boundary. n1716 The reference in the field notes to a brook may control as against a quarter corner marked by a stone not shown to have been in place. n1717 Government monuments of corners, as placed upon public lands surveyed, control the calls of the maps, plats, and field notes. n1718 A section corner of a government survey, when shown with certainty, must control even though it is in a different place from that given in the field notes and plat. n1719 An "obliterated corner" is one where no trace remains of the original surveyor's work but which may be located by competent evidence, while a "lost corner" cannot be replaced by reference to any existing data or sources of information. n1720

LEXIS: Survey! w/10 (corner w/10 control)

§ 90.04(*l*) Locating Lost Corners.

Distinction must be made between the legal processes of re-establishing obliterated corners of government surveys and of locating lost corners. The United States government has from time to time established procedures for use by its surveyors in locating lost corners. It must be emphasized that these procedures do not create new boundaries but are merely governmental regulations to establish acreage and federal titles. They are not binding upon private individuals as to former government land now in private hands.

COMPUTER-ASSISTED RESEARCH

LEXIS: Survey! w/10 (corner w/5 lost)

§ 90.04(m) Parallel Lines.

Parallel lines are strictly and usually straight lines; but sometimes lines which are not straight are so designated. n1721

Thus a line may be described as parallel to a winding river. The sides of a stream are presumed to be parallel. n1722 In identifying a tract of land, it will be presumed that lines are to run straight and parallel with other lines, unless a contrary intention expressly appears; n1723 but a line described as running along the top of a hill down a creek was held to run with the hill only so far as it ran parallel with the creek, and not to encircle the watershed of a tributary of the creek. n1724 Where a line is marked for only a part of a required distance, it should be followed in the same direction unless there is some marked corner to divert it. n1725 A stated amount of acres off of one side is taken to be by parallel lines and is an adequate description. n1726

COMPUTER-ASSISTED RESEARCH

LEXIS: Survey! w/10 (parallel w/5 line!)

§ 90.04(n) Locating Dividing Lines of Fractions of Sections.

Where the description of land in a deed calls for legal subdivision of a section of surveyed land, the quarter section corners being lost and the section exceeding six hundred and forty acres in area, the division lines of the fractions of the section are determined by a division pro rata of the lines of the section as they appear upon the ground. n1727 This method should not be applied, however, if there are data in the field notes and maps from which the court may find and declare the actual position or location of the line. n1728

The center of a section cannot be ascertained by running a line directly south from the quarter section corner on the north side and marking off 160 rods on such line. Lines must be run from quarter section corner to quarter section corner and the center must be placed on the intersection of these lines. n1729

Where a tract of land was platted into many lots, all but two of which were of a uniform width of twenty-five feet, and two were irregular, containing the remnant of the tract, but the tract was too small to leave the two irregular lots as wide as they appeared upon the plat, it was held that the regular lots were entitled to the full size as platted, and that the width of the irregular lots must be diminished. n1730

A space left between two surveys made at the same time by the same surveyor, calling for each other, will be apportioned to the owners of the tracts in proportion to their respective interests, in case no boundary line was fixed on the ground. n1731 This rule presupposes that the other corners of the surveys are fixed and certain. In case there is no defined line between the two surveys, and a common boundary is not reached by running from the established corners towards the boundary of the two surveys by course and distance, even though there was a manifest mistake in the distance, there is no rule of law which, in the absence of evidence, would raise a presumption against or in favor of either survey. n1732

While the interior subdivision lines of a section are not surveyed or marked in the government survey, yet they are not the less certain in legal contemplation than section lines and hence cannot be relocated by acts of the parties. n1733

COMPUTER-ASSISTED RESEARCH

LEXIS: Survey! w/10 (divid! w/3 line! and fraction! w/5 section!)

§ 90.04(o) Detached and Block Surveys.

If a tract is part of a block, it must be so located, and can be located in no other way. If it is a separate survey, it must be located by its own monuments, aided, if need be, by the legal presumption that the lines were run as returned. Where the lines which enclose four surveys in the interior of a block of surveys are marked on the ground by interior lines of the block and by lines peculiar to the four surveys, the lines which separate them from each other cannot be located by

marks on the lines which enclose the block. If marks of the original survey are found on three sides of a tract, and some of these marks are peculiar to the tract, and are not common to the other tracts alleged to form part of the block, and individual or separate location is established. n1734 It is held that the field notes of a block constituting a prior survey may be explained by subsequently made field notes of another block. n1735

In determining the true location of a block, the conditions and circumstances surrounding its location, as well as the lines actually run and the corners fixed on the ground by the surveyor, should be taken into consideration to ascertain, if possible, the surveyor's intent in placing the block. n1736

(n211)Footnote 1639. *Farnsworth v. Rockland, 22 A. 394 (Me. 1891),* Walton, J., said: "Not only cornices, but small balconies and bay windows, often overhand sidewalks; and, if they do not in any way interfere with or incommode the public travel, such structures are not unlawful. The owner of land over which a public way passes has a right to occupy the land above and below its surface to any extent that will not impair its usefulness for a way. Of course a bay window, or a balcony, or a cornice even, may be so low down, and project so far into the street, as to obstruct or incommode the public travel; and in such a case the structure would be a public nuisance, and its removal could be compelled."

(n212)Footnote 1640. *Boudreaux v. Shadyside Co., 111 So. 2d 891 (La. App. 1959)* (calls for stakes do not control

over course and distance unless there is sufficient data to give a legal meaning to the stake); *Brown v. (n266)Footnote 1694. *Fordson Coal Co. v. Spurlock, 19 F.2d 820 (6th Cir. 1927); Hill v. Taylor, 4 N.E.2d 1008*

(Mass. 1936); Lawler v. Rice & Goodhue Counties, 178 N.W. 317 (Minn. 1920); Littlejohn v. Fink, 190 N.W. 1020 (Neb. 1922); Muldoon v. Sternenberg, 161 S.W.2d 783 (Tex. Com. App. 1942); Puget Mill Co. v. North Seattle Imp. Co., 206 P. 954 (Wash. 1922); West Virginia Pulp & Paper Co. v. J. Natwick & Co., 21 S.E.2d 368 (W. Va. 1941). See Stewart v. Latimer, 30 S.E.2d 633 (Ga. 1944).

(n267)Footnote 1695. *Lankford v. Pope, 57 S.E.2d 538 (Ga. 1950); Jones v. Poundstone, 14 S.W. 824 (Mo. 1890); Brown v. Hodges, 61 S.E.2d 603 (N.C. 1950)* (otherwise, if a beginning corner).

(n268)Footnote 1696. *Lincoln v. Edgecomb, 28 Me. 275 (1848); Meade v. Leon & H. Blum Land Co., 22 S.W. 298 (Tex. App. 1893).*

(n269)Footnote 1697. *Owings v. Freeman, 51 N.W. 476 (Minn. 1892).*

(n270)Footnote 1698. *Le Compte v. Lueders, 51 N.W. 542 (Mich. 1892).*

(n271)Footnote 1699. *Radford v. Johnson, 77 N.W. 601 (N.D. 1898).*

(n272)Footnote 1700. *Kuglin v. Bock, 54 N.E. 907 (Ill. 1899).*

(n273)Footnote 1701. *Farrell & Co. v. Arkansas Fuel Oil Co., 84 F.2d 887 (C.C.A. 5 1936).* The true boundary lines of a city lot are where they are actually marked by the monuments placed by the surveyor to indicate where they are to be found, and the most satisfactory evidence of the place where the lines were located is afforded by the original stakes. The monuments must necessarily control the field notes and maps of the survey, as well as courses, distances, and quantity. These monuments are facts. The field notes and plats are but descriptions which serve to assist in ascertaining facts; *Decaur v. Niedermeyer, 48 N.E. 72 (Ill. 1897).*

(n274)Footnote 1702. Evidence of a survey which did not start with a government corner is not probative; *Stevens v. French, 302 S.W.2d 286 (Ark. 1957); Klaar v. Lemperis, 303 S.W.2d 55 (Mo. 1957).* Corner can be located from the plat and field notes of the original survey or by competent extrinsic evidence; *Marshfield v. Haggard, 304 S.W.2d 672 (Mo. App. 1957).* True corner unless lost is where the surveyor actually located it regardless of error; *Martin v. Neeley, 347 P.2d 529 (Wash. 1959).* To begin at the posterior corner of property it must appear that the anterior corner is not established and known and the posterior corner is; *Martin v. Neeley, 347 P.2d 529 (Wash. 1959).*

(n275)Footnote 1703. *Ocean Beach Ass'n v. Yard, 20 A. 763 (N.J. Ch. 1890); Norwood v. Crawford, 19 S.E. 349 (N.C. 1894). See Broadwell v. Morgan, 55 S.E. 340 (N.C. 1906).*

(n276)Footnote 1704. *Kennard v. Maxwell, 287 S.W. 60 (Tex. App. 1926).*

(n277)Footnote 1705. *Ayers v. Watson, 137 U.S. 584, 11 S. Ct. 201, 34 L. Ed. 803 (1891); Justice v. Kentland Coal & Coke Co., 327 S.W.2d 740 (Ky. 1959); Coffey v. Greer, 106 S.E.2d 209 (N.C. 1958)* (calls in a deed are not competent evidence to locate a corner in a second deed which is a beginning corner of the first deed).

(n278)Footnote 1706. *Childers v. Hoffer, 277 P.2d 625 (Kan. 1954).*

(n279)Footnote 1707. *Ashville Land Co. v. Lang, 59 S.E. 703 (N.C. 1907).*

(n280)Footnote 1708. *Burt v. Busch, 46 N.W. 790 (Mich. 1890); Lemon v. Chicago & G. T. R.R., 26 N.W. 791 (Mich. 1886); Gregory v. Knight, 14 N.W. 700 (Mich. 1883); Stewart v. Carleton, 31 Mich. 270 (1875); Randall v. Gill, 14 S.W. 134 (Tex. 1890).*

(n281)Footnote 1709. *Manistee Mfg. Co. v. Cogswell, 61 N.W. 884 (Mich. 1885).*

(n282)Footnote 1710. *Texas Co. v. McMillan, 13 F. Supp. 407 (N.D. Tex. 1935).*

Pilot Mountain Coal & Min. Co., 15 S.W. 737 (Tenn. 1890); New York & T. Land Co. v. Thomson, 17 S.W. 920 (Tex. 1891); Montague v. Clay County Land & Cattle Co., 15 S.W. 902 (Tex. 1891); Withers v. Connor, 13 S.W. 743 (Tex. 1890).*

(n284)Footnote 1712. *State v. Sun Oil Co. v. Arkansas Fuel Oil Co., 114 S.W.2d 936 (Tex. App. 1938).*

(n285)Footnote 1713. *Farrell & Co. v. Arkansas Fuel Oil Co., 84 F.2d 887 (5th Cir. 1936).*

(n286)Footnote 1714. *Rand v. Cartwright, 18 S.W. 794 (Tex. 1891).*

(n287)Footnote 1715. *Sperry v. Wesco, 38 P. 623 (Or. 1894).*

(n288)Footnote 1716. *Yard v. Ocean Beach, 24 A. 729* (N.J. Err. & App. 1892); *Scott v. Yard, 18 A. 359 (N.J. Ch. 1889).*

(n289)Footnote 1717. *Beaver Book Resort Co. v. Stevens, 230 P. 121 (Colo. 1924).*

(n290)Footnote 1718. *Galbraith v. Parker, 153 P. 283 (Ariz. 1915).*

(n291)Footnote 1719. *Peterson v. Skjelver, 62 N.W. 43 (Neb. 1895); Woods v. West, 58 N.W. 938 (Neb. 1894); Thompson v. Harris, 58 N.W. 712 (Neb. 1894).*

(n292)Footnote 1720. *Martin v. Neeley, 347 P.2d 529 (Wash. 1959)* (the burden of proof is on one *See* king to establish that a corner was lost, not merely obliterated). In relocating lost or obliterated corners surveyors can consider extrinsic evidence only if the field notes are uncertain; *Glenn v. Whitney, 209 P.2d 257 (Utah 1949).* If the corners cannot be relocated a resurvey is run from the east boundary westward so as to preserve the amount of land included in the government patent; *Glenn v. Whitney, 209 P.2d 257 (Utah 1949).*

(n293)Footnote 1721. *Fratt v. Woodward, 32 Cal. 219 (1867); Hicks v. Coleman, 25 Cal. 122 (1864).* The west 50 feet of Lot 13 means a strip of land 50 feet in width measured on a perpendicular to the west side, not along the frontage (land in form of a parallelogram); *Walters v. Tucker, 281 S.W.2d 843 (Mo. 1955).* In a trapezoid shaped tract 100 acres on the east end was a valid description; *O'Dwyer v. Ream, 136 A.2d 90 (Pa. 1957).*

(n294)Footnote 1722. *Minor v. Daspit, 54 So. 413 (La. 1911).*

(n295)Footnote 1723. *Collins v. Dresslar, 32 N.E. 883 (Ind. 1892); DeLong v. Starkey, 92 N.E.2d 228 (Ind. App. 1950).*

(n296)Footnote 1724. *Burchett v. Clark, 172 S.W. 1048 (Ky. 1915).*

(n297)Footnote 1725. *Banks v. Talley, 194 A. 362 (Del. Super. 1937).*

(n298)Footnote 1726. *Hassie Hunt Trust Co. v. Proctor, 60 So. 2d 551 (Miss. 1952)* (Aten acres off the south side" meant by parallel lines); *Fowler v. Tarbet, 274 P.2d 341 (Wash. 1954)* (Atwo acres in width" was a valid description).

(n299)Footnote 1727. *Eshleman v. Malter, 35 P. 860 (Cal. 1894); Miller v. Topeka Land Co., 24 P. 420 (Kan. 1890).*

(n300)Footnote 1728. *Weaver v. Howatt, 118 P. 519 (Cal. 1911).*

Supp. To CHAPTER 90 LAND DESCRIPTIONS, BOUNDARIES AND SURVEYS

10-90 Thompson on Real Property, Thomas Editions Supp. to § 90.02

Supp. to § 90.02 Land Descriptions.

[Go To Main]

§ 90.02(a) The Purpose of a Description in a Conveyance of Land. [Go To Main]

After the citation for Warner Communications, Inc. v. Keller, add:

rev'd 928 S.W.2d 479 (Tex. 1996) .

Add:

Miller v. The Provident Bank, 260 B.R. 158 (D. Ida. 2001) (lack of legal description of land in the deed of trust did not affect the validity of the deed as between the parties).

Change citation for Allen v. Sallinger to:

Allen v. Sallinger, 12 S.E. 896 (N.C. 1891) .

Change the spelling of the citation for Lavendar v. Ball to:

Lavender v. Ball.

Change the date on Magnolia Petroleum Co. v. Marks to:

Magnolia Petroleum Co. v. Marks, 74 So. 2d 36 (La. 1954) .

Cousatte v. Collins, 61 P.3d 728 (Kan. App. 2003) (lis pendens could not be applied without a property description).

Change the citation for *Anderson-Cottonwood Irr. Dist. v. Zinzer, 125 P.2d 106* to:

Anderson-Cottonwood Irr. Dist. v. Zinzer, 125 P.2d 82 .

Add:

McClung v. Atlanta Real Estate Acquisitions, LLC, 639 S.E.2d 331 (Ga. App. 2006) (insufficient description did not satisfy the statute of frauds).

Change the date on ardy v. California Trojan Powder Co. to:

Hardy v. California Trojan Powder Co., 219 P. 197 (Or. 1923) .

Change the date for Sullivan v. Fant to:

Sullivan v. Fant, 160 S.W. 612 (Tex. App. 1913) .

Add:

Fairfax Homes, Inc. v. Blue Belle, Inc., 2006 Ohio 2261 (Ohio Ct. App. 2006) (the land description was definite and sufficient so a contract for the sale of land could be enforced).

§ 90.02(b) The Requirement of Certainty in a Description. [Go To Main]

Add:

Town of Brilliant v. City of Winfield, 1999 Ala. LEXIS 310 (Dec. 3, 1999) (Alabama courts hold that "substantial accuracy, not perfection, is all that is required in an annexation description."); *Berger v. Fitzgerald, 739 A.2d 287 (Conn. App. 1999)* (if doubt exists concerning the land at issue, the owner of real property must go beyond the land

description in a notice of tax sale); *Coulter & Smith, Ltd. v. Russell, 976 P.2d 1218 (Utah App. 1999)* (extrinsic evidence used to identify the property); *Shelton v. Williamson, 975 S.W.2d 508 (Mo. App. 1998)* (adequate land descriptions derived from tax receipts and handwritten notation).

Add:

Hilbert v. Hough, 969 P.2d 836 (Idaho App. 1998) (land description in purchase agreement was inadequate and incomplete).

In re Vondall, 364 B.R. 668 (8th Cir. 2007) (an error in the legal description in a mortgage prevented the mortgage from giving constructive or implied notice of the mortgagee's interest; *In re Walterman Implement, Inc. 360 B.R. 275 (N.D. Iowa 2007)* (erroneous description in a mechanics lien statement prevented validity of mechanics' lien).

Add:

Ratcliff v. Cyrus, 544 S.E.2d 93 (W. Va. 2001) (extrinsic evidence needed to determine the location of an easement).

Add:

Daniel Mill, LLC v. Lyons, 642 S.E.2d 226 (Ga. App. 2007) (the description of the property in a contract was too indefinite to satisfy the statute of frauds).

§ 90.02(c) Rules of Construction for Land Descriptions. [Go To Main]

Add:

City of Kellogg v. Mission Mountain Interests, Ltd., Co., 16 P.3d 915 (Ida. 2000) (the description "the lodge and the land on which it is located, along with the ski lift" was sufficient to identify what property was being conveyed).

Christopher Steadham, "Land Description Errors: Recognition, Avoidance, and Consequences," 78 *J. Kan. B.A.* 20 (September 2009).

Add:

Gateway Family Worship Centers, Inc. v. H.O.P.E. Foundation Ministries, Inc., 535 S.E.2d 286 (Ga. App. 2000) (sales contract did not contain a valid property description or the key to identifying the property by extrinsic evidence).

Add:

Preston Exploration Co. v. Chesapeake Energy Corp., 2009 U.S. Dist. LEXIS 126694 (S.D. Tex. 2009) (holding that a land description must be written in the contract regardless of an actual mutual understanding of the property descriptions).

Change the date for Gates v. Asher to:

Gates v. Asher, 280 S.W.2d 247 (Tex. 1955) .

Change the date for Department of Conservation ex rel. People v. Fairless to:

Department of Conservation ex rel. People v. Fairless, 653 N.E.2d 446 (Ill. App. 1995) .

§ 90.02(c)(3) Rules of Construction for Descriptions Generally.

Change the date for Arab Corp. v. Bruce to:

Arab Corp. v. Bruce, 142 F.2d 604 (5th Cir. 1944) .

Change spelling of Jayore v. Hall to:

Jayroe v. Hall.

Add:

Belcher v. Stone, 998 S.W.2d 759 (Ark. App. 1999) (A deed is not void for uncertainty if any reasonable construction can be made).

§ 90.02(c)(4) Rules of Construction for "Mother Hubbard" Descriptions.

After first sentence of subsection, Add new Note 141.1: n141.1

§ 90.02(c)(5) Rules of Construction for Descriptions Incorporated by Reference to Other Instruments.

Add:

Agricredit Acceptance Company v. Singleton, 767 So. 2d 137 (La. App. 2000) (the lender's security agreement incorporated by reference the land description in an attachment to the financing statement).

Change the date for M.C. Dixon Lumber Co. v. Mathiason to:

M.C. Dixon Lumber Co. v. Mathison, 266 So. 2d 841 (Ala. 1972) .

Change spelling in Robbins v. HNG Oil Co. to:

Robbins v. HNG Oil Co.

After *Nodvin v. Plantation Pipe Line Co., 420 S.E.2d 322 (Ga. App. 1992)* add:

abrogated by Yaali Ltd. v. Barnes & Noble Inc., 506 S.E.2d 116 (Ga. 1998) .

§ 90.02(c)(7) Exclusion of the Highway from the Description.

§ 90.02(c)(7)(iv) The Effect of Abandoning the Highway.

Add:

Martini v. Smith, 42 P.3d 629 (Colo. 2002) (an ordinance de-annexing a subdivision did not conclusively vacate the public roadways in the subdivision); *U.S. Silica Company v. Wooldridge, 799 So. 2d 693 (La. App. 2001)* (although roadway was abandoned, landowner did not own the land under the road).

Add:

Martini v. Smith, 42 P.3d 629 (Colo. 2002) (an ordinance de-annexing a subdivision did not conclusively vacate the public roadways in the subdivision).

§ 90.02(c)(11) Identifying and Resolving Latent and Patent Ambiguities in Description.

§ 90.02(c)(11)(i) Latent Ambiguities.

Add:

Andersen v. Mazza, 684 N.Y.S.2d 687 (App. Div. 1999) (While parol evidence may be used to explain latent ambiguities, it cannot be used to vary valid boundary descriptions in a deed description).

§ 90.02(d) Types of Descriptions. [Go To Main]

§ 90.02(d)(1) General and Particular Descriptions.

Change date for Carter v. White to:

Carter v. White, 7 S.E. 473 (N.C. 1888) .

§ 90.02(d)(2) Maps and Plats as Descriptions.

Add:

Lawrence v. Jones, 18 P.3d 1245 (Ariz. App. 2001) (supplementary zoning map constituted a legal description of the property).

Add:

Clark v. Smay, 110 P.3d 140 (Utah App. 2005) (boundary was controlled by the metes and bounds description in a deed, rather than by a creek as drawn on the plat map).

§ 90.02(d)(7) Description by Abbuttals.

Change date for Hofer v. Carino to:

Hofer v. Carino, 72 A.2d 335 (N.J. 1950) .

Trustees of Freeholders and Commonality of Town of Southampton v. Buoninfante, 756 N.Y.S.2d 629 (2003) (ambulatory boundary based on high water mark of the bay).

§ 90.02(d)(8). Weighing the Importance of Different Modes of Description.

Add:

Khalsa v. Ward, 101 P.3d 843 (Utah App. 2004) (a description referring to a ditch as the boundary line controlled over a metes and bounds description).

§ 90.02(e) Defective Descriptions. [Go To Main]

§ 90.02(e)(1) Conflicting Descriptions.

Add:

In re Thomas, 387 B.R. 4 (N.D. Iowa 2008) (erroneous legal description of mortgaged land prevented recording from providing constructive notice).

§ 90.02(e)(2) Correcting Descriptions.

Add:

First National Bank of Polk County v. Carr, 2003 Ga. App. LEXIS 409 (No. A02A1816, Mar. 20, 2003) (no mutual mistake of fact regarding property description).

Anderson v. City Development Board of the State of Iowa, 631 N.W.2d 671 (Iowa 2001) (typographical errors in the description of the land did not invalidate the conveyance).

§ 90.02(e)(3). Acts of Parties to Cure Defective Descriptions.

Add:

Pullar v. Huelle, 73 P.3d 1038 (Wyo. 2003) (a description of real property as "as parcel of land" was insufficient for an enforceable real estate contract).

FOOTNOTES:
(n1)Footnote 141.1. *Ultra Resources, Inc. v. Hartman, 226 P.3d 889 (Wyo. 2010)* (interpretation of net profit interest agreement regarding leases outside the unit).

Supp. To CHAPTER 90 LAND DESCRIPTIONS, BOUNDARIES AND SURVEYS

10-90 Thompson on Real Property, Thomas Editions Supp. to § 90.03

Supp. to § 90.03 Land Boundaries.

[Go To Main]

§ 90.03(a) Establishing Boundary Lines. [Go To Main]

§ 90.03(a)(1) Methods of Establishing Boundary Lines.

Add new footnote at end of next to last sentence on the page: n706.1

In the third line of the second paragraph, change "words to" to:

"words of."

§ 90.03(a)(3) Fences as Boundaries.

Add:

Griffin v. Anderson, 162 P.3d 755 (Idaho 2007) (the parties did not establish a boundary by agreement, because the fence was built to hold cattle, not to mark the boundary of the land).

In the third line, change "with" to:

"without."

Change spelling of Scanlon v. Miller to:

Scanlan v. Miller

Add:

Wilson v. Handley, 119 Cal. Rptr. 2d 263 (2002) (a row of trees planted on or near the boundary line could serve as a fence or a structure in the nature of a fence).

§ 90.03(a)(5) Court Determination of Boundaries.

Add:

Ramsey v. O'Neal, 812 So. 2d 324 (Ala. 2001) (the trial court did not have authority to establish new boundaries by ordering the parties to engage in a land exchange).

§ 90.03(a)(6) Admissibility of Evidence to Establish Boundaries.

Add:

Dowley v. Morency 737 A.2d 1061 (Me. 1999) (The existence of a blaze line is evidence of the boundary).

§ 90.03(a)(7) Acquiescence in Establishing Boundaries.

Add:

Myers v. Yingling, 279 S.W.3d 83 (Ark. 2008) (boundary by acquiescence to fence); *Boyster v. Shoemake, 272 S.W.3d 139 (Ark. App. 2008)* (boundary by acquiescence to fence).

Sanders v. Thomas, 821 So. 2d 1214 (Fla. App. 2002) (title not affected by adverse possession, boundary by acquiescence or boundary by agreement).

Oliphant v. Zubrod, 711 N.W.2d 732 (Iowa App. 2006) (parties acquiesced in barbed wire fence as boundary).

Huntington v. Riggs, 862 N.E.2d 1263 (Ind. App. 2007) (title to a strip of land obtained through acquiescence).

Add:

Griffel v. Reynolds, 34 P.3d 1080 (Ida. 2001) (in an unusual decision, the court held that an agreement between adjacent landowners created a boundary by acquiescence, thus confusing the two concepts and that farming lines had remained stable, despite significant evidence to the contrary).

Add:

Beitner v. Marzahl, 819 N.E.2d 1266 (Ill. App. 2004) (boundary by acquiescence marked by a fence); *Paseka v. Weaver Farms Limited Liability Company, 682 N.W.2d 81 (Iowa App. 2004)* (boundary by acquiescence marked by a dirt ridge).

Add:

Argyle v. Jones, 118 P.3d 301 (Utah App. 2005) (in Utah, mere failure to object is insufficient to establish boundary by acquiescence).

line 2, change "1028" to superscript.

Add:

Paseka v. Weaver Farms Limited Liability Company, 2004 Iowa App. LEXIS (No. 03-0417, Mar. 24, 2004) (a dirt ridge was sufficiently definitive for boundary by acquiescence).

§ 90.03(b) Boundaries Related to Water. [Go To Main]

Add:

Edlund v. 4-S, LLC, 702 N.W.2d 812 (Neb. App. 2005) (the thread of the river channel lies in its main channel).

Add:

Madson v. TBT Ltd. Liability Co., 686 N.W.2d 85 (Neb. App. 2004) (ownership of land established through the theory of accretion).

§ 90.03(b)(3) Title to Bed of Navigable or Public Streams.

Add:

Idaho v. United States, 533 U.S. 262 (2001) (an executive order reserving to the Indian tribe the title to submerged lands within the reservation precluded the state from acquiring titles to those lands upon statehood).

Change 'What constitutes Abed" of navigable stream' to:

What constitutes "a bed" of navigable stream.

§ 90.03(b)(4) Title to Tide Lands.

Add:

Estate of Hobbs, 2002 Mont. LEXIS 186 (Feb. 16, 2002) (claimant was determined to be not the owner of land between the high water mark and the lake meander line).

Trustees of Freeholders and Commonality of Town of Southampton v. Buoninfante, 756 N.Y.S.2d 629 (2003) (one boundary of the property was ambulatory and based on the high water mark of the bay).

§ 90.03(b)(5) Ownership of the Seashore.

Add:

But see Riceland Petroleum Company v. North American Land Co., Inc. 869 So. 2d 894 (La. App. 2004) (the state retained ownership of accretion that formed between the boundary of state land and the sea).

Change the Marcus Sayre Co. v. Newark citation to read:

Marcus Sayre Co. v. Newark, 45 A. 985 (N.J. Err. & App. 1900) .

§ 90.03(b)(12) Determining Title to an Irregular Shoreline.

Add:

Daisy Farm Ltd. Partnership v. Morrolf, 886 N.E.2d 604 (Ind. App. 2008) ("straight extension method" used to determine riparian boundaries of abutting lots).

FOOTNOTES:
(n2)Footnote 706.1. *Wanha v. Long, 255 Neb. 849, 587 N.W.2d 531 (Neb. 1998)* (adverse possession claim not defeated by the fact that the disputed property was platted).

CHAPTER 91 TITLE AND MARKETABLE TITLE *

11-91 Thompson on Real Property, Thomas Editions § 91.01

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 91.01 Introduction.

This chapter defines the concept of title in Anglo-American law and discusses some of the less familiar ways that title may be transferred by operation of law, including escheat, forfeiture, abandonment. The chapter also covers the concept of marketable title, reviews the wide variety of definitions of marketable or merchantable title issued by the state courts, and reviews the impact of marketable record title acts.

* This chapter is based in part on Chs. 34-36, 57 of George W. Thompson, Commentaries on the Modern Law of Real Property (John S. Grimes ed. 1963, 1978), which made a significant contribution toward preserving the American common law governing title to real property interests.

§ 91.02 The Concept of Title.

[Go To Supp]

Any attempt to define "title" to real estate is problematic. If "property" is the sum of all the rights, powers, privileges, and immunities that a society recognizes in a certain specific thing, then title is the sum total of all such interests that the society permits any person or entity to exercise.

§ 91.02(a) Title and Possession.

In a society without law, title and possession are synonymous. As legal rights are evolved it becomes possible to separate possession and title. Title is still sometimes defined in terms of a just right of possession n1 exclusive in the title holder. n2 It is better described as a combination of all the possessory and statutory rights that the political philosophy of the jurisdiction permits to be held by persons. n3 It is not a thing of physical attributes, but is a conglomerate of jurisdiction and substantive legal rights fused with the residuals of equitable remedies all developed historically out of feudal notions and medieval conditions. n4

§ 91.02(b) Title and Ownership.

As used with respect to real estate, title is usually conceived as a fee interest. n5 A person is said to have title to that which is by right that person's property, and that property is that over which the person may by right exercise an exclusive dominion. Actual or constructive possession of the property, coupled with the legal right of possession, will constitute a good and sufficient title. So, the union of possession, the right of possession, and the right of property constitute a complete title to lands, tenements, and hereditaments. n6

The term indicates the evidence of ownership, or the channel through which an estate in land is acquired, and when used in a legal sense, it is sometimes said to mean:

- ownership, n7
- an estate in fee, n8

- a right of possession, n9 or
- the evidence of one's right of possession. n10

It must be understood, however, that while there must be a union of these elements to constitute a complete and perfect title, one may have title to a lesser estate than a fee simple. n11

Title signifies, not the fact of one's possession, but the right of possession. n12 Possession is prima facie evidence of a title in fee and implies a right to possession and ownership of title conclusive except as against one who proves a better title. n13 Possession is title as against all the world except the true owner in many states, n14 and it may be synonymous with title as in the acquisition of abandoned property or unclaimed land, and possession may ripen into title by adverse possession.

§ 91.02(c) Title and Estate.

Sometimes the word "title" is used in a general sense, as including any title or interest; but "title" in common acceptance, and when used in reference to real property, implies an estate in fee. n15 An estate in real property is something entirely distinct, not only from the property itself, but also from the method of holding it and from the title by which it may be acquired or held. The term "estate" signifies the relation in which one stands with regard to the property, or the interest one has therein, while "title" indicates the evidence of ownership or the channel through which it is acquired, or the means whereby one is able to assert, maintain, or continue one's possession. n16 Title to real estate is in someone at all times, hence there is no such thing as an unvested title. n17

§ 91.02(d) The Concept of Marketable Title.

The adjectives imperfect, good, marketable, merchantable, clear, and perfect are often applied to title generally to denote the presence or absence of facts that would indicate that another than the one claiming to be the owner may be claiming an interest in or to hold a claim against the property, or to have made such claim at one time. The words insurable title have also come into prominence, being used to denote a claim of ownership so supported by the facts that an insurance policy can be written thereon insuring against any other claims to the property asserted by others and not specifically excepted.

A clear and perfect title is one that shows an unblemished record in the chain from the original grant by the sovereign down to the present owner or where any defects of record have been cleared by proper judicial proceedings, such as a quiet title suit, together with the absence of any parol evidence denoting hidden claims or equities. n18 The words good, merchantable, or marketable n19 are commonly used to denote a title that, while subject to some defects of record, can be proven by affidavits, proof of adverse possession, or other evidence supportable in a court of law, to be valid as against all comers, i.e., one that could be sustained if tested in a legal proceeding. n20 Other courts take the position, however, that a title is not marketable if it must depend on parol evidence to clear a defect of record. n21 The courts are divided as to whether a title can be said to be "good" unless all claimants can be brought before the court that is called to pass upon it. n22

Actually a title may present a perfect record and still not be "good." n23 Deeds may be forged or there may be foreign adoptions, divorces, marriages, or other situations not shown on the record that give rise to valid legal or equitable interests in the property enforceable against even bona fide purchasers for value without notice. But if the title is clear of record a burden is placed on one questioning it to prove the existence of facts off the record that establish the existence of other claims. n24 If the title is not "clear" of record some jurisdictions permit the alleged owner to prove its validity in a dispute with a third party, n25 while others decline to hold the title "good" in such circumstances, n26 because the party in whose favor the defect runs is not before the court, holding in effect that a title dependent upon adverse

possession is not "good." n27 While there has been some attempt to make "insurability" and "marketability" synonymous, most courts distinguish between the two, holding, however, that a title that cannot be insured is also not "marketable." n28 Marketable title is discussed more fully in this chapter at § 91.09 *infra*.

CHAPTER 91 TITLE AND MARKETABLE TITLE *

11-91 Thompson on Real Property, Thomas Editions § 91.03

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 91.03 Slander of Title.

[Go To Supp]

Slander of title is the oral or written false and malicious statement, made in disparagement of a person's title to real or personal property causing the titleholder special damage. The essential elements of such an action are:

- the uttering and publication of the slanderous words by the defendant,
- the falsity of the words,
- malice, and
- special damages. n29

In an early New York case it was said that the cause of action "is denominated slander of title, by a figure of speech, in which the title to land is personified, and made subject to many of the rules applicable to personal slander, when the words themselves are not actionable." n30 The element of malice, express or implied, in making slanderous statements respecting the title of another's property, is essential to the recovery of damages, and in the absence of proof of such malice the action will fail. n31 While the statement may be false, or made without right, there can be no legal malice and no action will lie, if the statement is made in good faith and with probable cause. n32 If the statement is made by a stranger, the law presumes malice; but if the party making the statement is also interested in the matter and announces the defect of title in good faith, either to protect the party's own interest or to prevent the commission of a fraud, malice is not presumed. n33

CHAPTER 91 TITLE AND MARKETABLE TITLE *

11-91 Thompson on Real Property, Thomas Editions § 91.04

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 91.04 Acquisition of Title.

[Go To Supp]

The common-law writers recognized the methods of acquiring title to real property as acquisition in case of abandonment, by descent, by act of law, and by purchase or act of the parties. n34 Acquisition by act of law may be said to include escheat and forfeiture. n35 By "descent or hereditary succession" is understood the means whereby a person upon the death of the ancestor acquires the estate of the ancestor as the ancestor's heir at law. n36 It is only when the law transfers property to an heir that title is obtained by descent. n37 The principal distinction between title by descent or succession and title by purchase is that the estate by purchase acquires a new inheritable quality and is rendered descendible to the blood in general of the person acquiring it. An estate thus acquired does not, like that acquired by descent, render the owner answerable for the acts of the ancestors. n38 Such statutory rules as require ancestral blood as a prerequisite to descent do not operate upon estates acquired by purchase. n39 Whenever one's heirs obtain title to lands by a will in which estates or shares are devised in a manner different from that in which the law would give it, they get it by purchase, but where the heirs take neither a greater nor a lesser estate by the devise than they would have done without it, they are deemed to get it by descent. n40

A record title is the best evidence of ownership and is not easily defeated. n41 Ordinarily the transfer or assignment of realty must be by a deed of conveyance. n42 One cannot lose vested title to land by an oral admission that it is the property of another. Disclaimer of freehold can only be by deed or in a court of record. n43

For convenience, title by purchase may be divided into two divisions: First, title by purchase other than by alienation; and second, title by alienation. Under the first division are included:

(1) Title by escheat,

(2) by occupancy,

(3) by accretion,

(4) by forfeiture,

(5) by abandonment,

(6) by eminent domain,

(7) by estoppel,

(8) by prescription, or title by adverse possession.

Title by alienation may be divided into:

(1) alienation other than by private grant, and

(2) alienation by private grant.

Alienation other than by private grant may be divided into these divisions: by devise, by matter of record, by special custom, by public grant, and title by office grant. The term "alienation" embraces every mode of passing real estate by act of the parties, as distinguished from passing it by operation of law. n44

CHAPTER 91 TITLE AND MARKETABLE TITLE *

11-91 Thompson on Real Property, Thomas Editions § 91.05

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 91.05 Title by Escheat.

[Go To Supp]

All states today have some type of legislation that provides for title to property, of one who dies intestate with no heirs within the statutory circle of consanguinity, to pass to the state. Some have other causes for the state acquiring title. n45 And even the United States has reasons for sharing in such windfalls. n46

§ 91.05(a) Origin of Escheat.

The historical origin of escheat in English law dates back to the Norman Conquest when all title rested with the crown. Grants by the king to tenants in chief were either defeasible life estates or defeasible fees. In either situation the feoffor retained a future interest when the feoffee or his successors died without lawful heirs. This reversion was in addition to the possibility of forfeiture for failure to pay the feudal dues and reliefs and for greater or lesser treason. Under subinfeudation, such escheat or forfeiture would benefit the immediate feoffor rather than the king. But with the workings of Quia Emptores Terrarium n47 over the years, which halted the process of subinfeudation, the crown became the beneficiary of escheat.

Today under certain peculiar circumstances the sovereign may acquire, or under the philosophy of seisin, reacquire, title to land other than by purchase or eminent domain. To such methods of acquisition is given the general term of "escheat." Escheat or forfeiture of title under one theory or another was the custom in many ancient lands. n48 It arose either through misconduct of the owner toward the sovereign, or through death of the owner without heirs recognized by the state as such. n49 What is now embraced in the modern conception of escheat had several sources of origin at common law. While seisin and subinfeudation were in full flower a felon's lands escheated to the lord and the felon's heirs were disinherited. n50 This was modified by statute n51 and escheat for treason can operate in the United States only during the lifetime of the traitor. n52 Moreover, state statutes generally prohibit attainder for felony today. Likewise, when a feoffee died without heirs, the feoffee's lands escheated to the lord. n53 If a corporation held lands and the corporation became extinct, the land reverted to the donor and did not escheat to the lord since a grant to a corporation was a grant upon condition subsequent that if it be dissolved the grantee could reenter. n54

§ 91.05(b) Historical Types of Escheat.

Common-law escheat arose from two sources:

(1) escheat propter singalis, or escheat because of failure of the blood, and

(2) escheat propter delictum tenentis, n55 or escheat by reason of the tenant's delinquency.

Escheat propter delictum tenentis, or punishment for felony, was really a type of forfeiture, since it operated to terminate the tenant's interest immediately rather than waiting until the tenant's death. Escheat propter singalis or for failure of the blood was escheat as we recognize it today. The word "escheat" originally signified anything going accidentally, or by chance, and when applied to realty it meant the going back or reversion thereof to the original owner. n56 According to the common law, the word escheat means the return of real property to the lord of the fee when the person last seised dies without heirs, or that person's blood has been attainted. n57 It seems to have been founded on the want of a tenant to perform the services required by the tenure. n58

In England the ground upon which land escheated to the lord was based on the fact that no person remained to perform the feudal services that were the condition upon which the land was granted, the interest of the lord being in the nature of the reversion contingent upon the property becoming tenantless; n59 as a result of Quia Emptores n60 virtually all land came to be held of the crown, hence, escheats were to the crown.

Originally escheat was one of the incidents of feudal tenure, and is still occasionally mentioned as marking the feudal origin of land titles in this country. But the term is generally applied in a sense far different from its original meaning. Escheat, in this country, depends upon positive statutes. In some states the doctrine of escheat rests upon the broad principle that when the title to land fails from defect of heirs, or when from any cause there ceases to be an individual proprietor of the land, it reverts back to the community. n61 Under the feudal system escheat was a privilege of the feudal lord, but in modern times, it is the collective right of all when the individual right has failed. n62 In this country "escheat" is an attribute of sovereignty, n63 the term signifying a falling of a decedent's estate into the general property of the state upon the decedent's death intestate and without lawful heirs, and is applied to all kinds of property of whatever nature. n64 The state is deemed to occupy the place and hold the rights of the feudal lord in case the property escheats, n65 and there is nothing about it now but the name which is feudal. n66 In the United States the state stands in the shoes of the crown and escheats benefit the state.

§ 91.05(c) The Theory of Modern Escheat.

In this country "escheat" now means the passing of an intestate's property into the general property of the state on the death of the intestate owner without heirs. It is applied indifferently to all rights of property on the theory that, when the owner dies leaving no one entitled to take it either by will or descent, the state is the universal heir, n67 it is a fundamental principle that, if the ownership of property becomes vacant, the right must necessarily subside into the whole community in whom it was vested at the origin of society. n68 Some courts hold that the state, in its right of sovereignty, has original and ultimate property rights in all lands within its jurisdiction, and on the death of the owner of realty intestate and without heirs, the property shall return to the state. n69 The abolition of feudal tenure and the making of all land in the state allodial makes "escheat" an incident of sovereignty instead of an incident of tenure. n70 Under this theory the state is the original and ultimate proprietor of all lands within its limits, and thus the state takes the land of the owner who dies intestate without lawful heirs as the sovereign, and not as an heir. n71 Other courts treat the state as the ultimate heir and thus consider escheat as a type of descent. n72

If the state does take as the feudal lord, then it so reacquires title through something in the nature of a reversion. This would indicate that--as at early English law after the conquest--the holder of even a fee simple title holds of the sovereign and, upon escheat, the land reverts to the sovereign free of all encumbrances with which it had been burdened at the time of escheat. n73 If, however, the state merely takes as the ultimate heir, then the title in the hands of the state

after escheat is subject to the same encumbrances as it had in the hands of the former title holder. The public policy in favor of freedom of alienation would seem to demand this interpretation. Otherwise, land as security for debt would be an uncertain factor depending upon the lienee not dying intestate without heirs. This is the English rule today. n74

It would appear both in the common-law history and from the standpoint of public property that in the case of real property the state should take the title at the moment there ceases to be an owner. The theory found in the law of personalty that abandoned property becomes as a wild animal, title to which passes to the first person to reduce it to possession would lead to endless litigation in realty. Hence, the state in the absence of statute should take title to realty as soon as it is ascertained that there is no owner, even in the absence of statute. Where there is a title holder, however, that holder cannot be divested of that title in the absence of statute and subsequent proper judicial proceedings. Cases and statutes on the subject of escheat are of comparative rarity in the United States.

LEXIS: escheat w/15 title or property or interest!

§ 91.05(d) Interests Subject to Escheat.

Originally equitable interests did not escheat, since common-law escheat arose out of the principle of seisin. n75 Now it is generally held that, tenure no longer existing, the state may also take equitable interests by escheat. n76 At common law only land was subject to escheat. n77 In the United States the word "escheat" is sometimes used and applied to all kinds of property of whatever nature and is not always used in the sense of reversion of real property alone. n78 The common-law rule limiting escheat to real estate or an interest therein has, in some states been changed by statute so that all property, real and personal, and every right in property of whatever nature is subject to escheat to the state. n79 The principle underlying American escheat is that all property not belonging to anybody else shall go to the state, n80 since a freehold cannot be held in abeyance. n81 Therefore, the practically uniform rule of this country is that both legal and equitable interests escheat to the state. n82 An estate held in trust may be subject to escheat when the trust expires. n83 At common law, trustees held beneficially on the death of the beneficiary intestate and without heirs. n84 But as a general rule today, the beneficiary's portion of trust corpus escheats upon death of the beneficiary without heirs. n85 Where all members of a partnership have died intestate and without heirs or known kindred, the property of the firm escheats to the state. n86 Only the balance of an estate after the expense of administration and claims against the estate have been paid will escheat. n87 All doubt as to whether the property is subject to escheat is resolved against the state. n88

§ 91.05(e) Reasons Underlying Modern Escheat.

The United States Constitution has effected substantial changes in the law of escheat by prohibiting bills of attainder for murder and treason. This has caused dissent among the courts over whether this prohibition extended to inheritance in the case of killers benefiting from their crime and in the case of disfranchised felons. Likewise, the United States Supreme Court frowned upon laws prohibiting inheritance by aliens where treaties intervened and nowhere today does lack of virginity affect inheritance.

Forfeiture of property for such causes cannot extend beyond the criminal's lifetime. Very few states today carry in their criminal codes civil penalties for murder except where the killer profits from the crime. Hence, escheat today arises from one of four causes, death without legal heirs, alienage, termination of corporation and special bona vacantia or abandoned property statutes. When a person dies intestate and leaves no heirs capable of inheriting the real estate, the title thereto vests at once, by escheat, in the state, n89 since a freehold must always vest somewhere. n90 But title does not vest in the state pending the outcome of an action brought to determine heirship. n91 The rule that land escheats on failure of heirs does not, of course, apply where the owner dies leaving a will disposing of the land thereby. n92 If the deceased attempted to dispose of his property by will, but the will is void or ineffective as to all or part of the property

devised, and as a result the ownership is left as though the deceased had died intestate, the property may escheat. n93 Although the decedent may have left heirs capable of inheriting the land, it escheats on failure of such heirs to claim the land. n94 Some statutes provide that if any person shall disappear and the person's whereabouts remain unknown for the period of stated years, and no knowledge of such person can be procured for a period of time, the person shall be presumed to be dead, and if there are no person or persons found who would be the heir or heirs-at-law, if such person were dead, the estate of such absentee escheats to the state. n95

At common law if an alien who was entitled to hold and did hold bond died without having made a conveyance of land acquired by deed or devise, the same vested immediately by escheat in the state, without any inquest of office found. n96 This was sometimes spoken of as a punishment to the alien for attempting to acquire realty. n97 If all the heirs of the intestate are aliens the title escheats to the state without office found. n98 At common law a nonresident alien could take and hold real estate by act of the parties, that is, by grant, deed, or will. The alien could hold against all the world except the state, and could hold even as against the state until office found or other equivalent act. In this regard no distinction was made between alien friends and alien enemies. n99 Before death and until the state brings proceedings to enforce the escheat, the alien has complete dominion over the property which has been acquired by grant or demise, and by making a valid conveyance may defeat the right to an escheat; n100 but if it be shown that such conveyance was fraudulently made for the purpose of preventing the escheat, it may be set aside by the state. n101 Likewise, the possibility of an escheat cannot be avoided by taking title in the name of a trustee for the benefit of an alien. n102 If heirs at law are incapable of taking by reason of their alienage, the situation is the same as if there were no heirs, and the property escheats. Where only some of the persons who are heirs at law are incapable of taking by reason of their alienage, the land does not escheat, but the whole title vests in those heirs who are competent to take. n103 In order that an estate may escheat on account of alienage of heirs, it is necessary that all the heirs be aliens; but if those who are not aliens trace their descent through an alien, they will not stand in the way of an escheat. n104 Lacking federal interference, a state may impose such conditions as to it may seem proper, upon the right of aliens to take property within the jurisdiction of the state by will or by succession. n105 The necessity for judicial proceedings is denied in some jurisdictions. n106 By statute in many states the disability of aliens to take and hold lands has been wholly removed, so that an alien, whether a resident or not, is permitted to take and hold lands in fee simple absolute, thus permitting the alien to transmit the property by descent to children, or to alien heirs. n107

The right of states to limit inheritance by aliens has been greatly restricted by decisions of the Supreme Court to the effect that under its treaty-making power the federal government may override state laws and make aliens of a particular nation heirs despite contrary state laws. This is particularly true where there are reciprocal inheritance rights. n108

Ironically title to land on which Indians are settled rests in the United States under long-established doctrine. n109 Traditionally, in the absence of any special right given by treaty or special act of Congress the Indians had but a right of occupancy and when actual occupancy ceased the land reverts to the United States. n110

Sometimes corporation statutes or charters, particularly those governing charitable or nonprofit organizations, contemplate that upon dissolution of the corporation, all of its property or so much of the funds otherwise distributable to its members or shareholders who cannot be located shall escheat to the state. n111 Other statutes prohibit the holding of land by certain types of corporations and provide for forfeiture to the state of lands so illegally held.

Some states today have adopted bona vacantia (ownerless property) statutes. Under the theory of these laws the state becomes the custodian of property of those who have disappeared or who for any reason have failed to claim such property, whether abandoned or placed in the custody of others. Such statutes usually contemplate that the state shall take possession of all property which has not been claimed for a period of years, and if the owner does not appear within a reasonable time, usually after advertisement, the title passes permanently to the state as a form of escheat. n112 The true escheat statutes thus differ from bona vacantia laws. In the former situation, the title vests immediately in the sovereign. In bona vacantia situations, the state becomes custodian of the property with the responsibility of seeking the owner; only after statutory time has elapsed does title pass to the state by escheat. In some states, if there is a devise for

charitable purpose which cannot be carried out, the property escheats, rather than passing by intestacy. n113

Many states have adopted the Uniform Disposition of Unclaimed Property Act providing for disposition of abandoned property and property of those who have died intestate without leaving legal heirs. n114

Where escheat is based on the philosophy that the state takes as the ultimate heir, property goes to the state, subject to all mortgages, judgment liens, mechanics' liens, easements, and other restrictions and encumbrances thereon at the time the escheat occurs. n115 The state is not considered a purchaser for value and takes only such title and right as the owner actually had when the title was escheated. n116 Lands that have escheated to the state are subject to the widow's dower. n117 At common law where the theory was that the king or the lord took by forfeiture or by way of reversion and not as the ultimate heirs, however, the creditors of the late owner lost all means of recourse to the land for the purpose of the satisfaction of their debts. n118 None of the present American statutes proceed upon the theory of reversion to the lord or of forfeiture, except in the case of property illegally used. Hence, the state takes such property subject to outstanding interests and valid liens. n119

§ 91.05(f) Enforcement of Escheat.

As a general rule no one can enforce or establish an escheat except the state. n120 An action in escheat is essentially one in rem and the court must have jurisdiction over the res. n121 An inquest is not always necessary in order that there may be an escheat. Thus, where a citizen dies intestate without heirs, the real property immediately reverts to the state without the necessity of a judicial proceeding n122 or office found. n123 The state need not enter upon the land nor obtain a judgment of a court to consummate title of an estate under an escheat. n124 In some states, however, a judicial proceeding is required to effect an escheat for want of inheritable blood. n125 Thus a valid escheat proceeding must necessarily establish the fact of death and that there is no one qualified after such death to take the property. n126 The declaration and enforcement of an escheat is ordinarily a special proceeding regulated by statute. n127 The initiation and prosecution of escheat proceedings must be in conformity with the statute. n128 When the statute allows a period of time within which heirs may appear and claim the property, no escheat can be declared until after the expiration of such period of time. n129 An escheat proceeding cannot be maintained while administration upon the estate is pending. n130 Some statutes for enforcing escheat require an administration of the estate to determine whether the estate has escheated by default of heirs, even though there are no outstanding debts. n131

There is a presumption that an intestate left heirs and such presumption obtains until the claimant by escheat overcomes it by strong and convincing evidence. n132 The statutes ordinarily give the attorney general the power and the duty of instituting or causing to be instituted actions to enforce escheats to the state. n133 When the estate is under administration the proper method of procedure is for the state to appear in response to the usual statutory notice that the estate is about to be distributed and present its claim, although the state is entitled to intervene in the probate proceedings. n134 A statute dispensing with such preliminary notice of the appointment of an administrator has been held constitutional. n135

At common law, upon the death of a person intestate and without heirs, the escheat takes place instantly, and the title passes to the state without any legal procedure or ceremony. n136 No interval elapses between the death of the owner without heirs and the vesting of the title in the state under a constitutional provision that all lands, the title to which shall fail from defect of heirs, shall escheat to the people. n137 Some judicial process may be necessary to dispossess a tenant or occupant, n138 but the title has usually passed before such action is taken. The same interest passes to the state as would have passed to the intestate's heirs if there had been any. n139 A judgment escheating property to the state is conclusive and binding upon all persons having either actual or constructive notice of the proceedings. The proceedings are presumed regular but this presumption does not prevail against record evidence of insufficiency or conclusive evidence of basic falsity. In a collateral attack on a judgment or decree of escheat only the existence of jurisdiction in the trial court can be considered. n140 The judgment or decree, made under statutory authority, after appropriate notice, is not open to collateral attack by a person claiming title as heir, n141 and such decree, if made in a state court having

jurisdiction of property located in such state, is binding against the world. n142 While a judgment of escheat is res judicata as to persons claiming as heirs, yet it is not conclusive of the nonexistence of heirs where the statute under which the escheat was taken provides for a restoration upon proof of heirship. n143 Real estate subject to escheat as where improperly held by a corporation or an alien, may be conveyed to a third person and good title passed as against the state prior to the institution of escheat proceedings. n144

The Uniform Unclaimed Property Act swallows most of the common-law instances of escheat. n145 The uniform act treats the state as the custodian of property which has not been claimed by its owner for seven years. The holder of such property is required to deliver it to the state which advertises for its owner, holds in custody for five years and then takes measures to escheat it.

CHAPTER 91 TITLE AND MARKETABLE TITLE *

11-91 Thompson on Real Property, Thomas Editions § 91.06

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 91.06 Title by Forfeiture.

[Go To Supp]

Blackstone n146 recognized forfeiture as one of the recognized means of passing title to real estate at common law. Today forfeiture is to all interests a type of escheat if it involves a taking of title by the state. Forfeiture has been defined as "a punishment annexed by law to some illegal act or negligence in the owner of lands, tenements or hereditaments whereby he loses all his interests therein." n147 To some extent as in the case of a convicted felon, the passing of title by forfeiture and escheat were synonymous: the felon forfeited the lands and they passed by escheat to the lord, since the felon had no inheritable blood.

§ 91.06(a) Title by Forfeiture of Property Wrongfully Acquired.

From very early times English public policy also struck at the accumulation by religious institutions of great amounts of land which was thus, theoretically at least, forever locked up out of the channels of trade. The constitutions of Clarendon n148 and later the statutes of Edward II n149 prohibited alienations in "mortmain," i.e., to the church, religious institutions or religious personages. One of the motivating factors of the development of the "use" n150 may have been to avoid mortmain. But even the use was limited for this purpose by the statutes of Richard II and Henry VIII. n151 The effect of these acts was to forfeit to the lord, or to the king if the lord failed to act, all lands or leaseholds so held in mortmain. n152 To a limited extent the mortmain prohibitions continued after the reformation but rather to prohibit gifts than as forfeitures. n153 The mortmain statutes have been reenacted in this country only to a limited extent and with respect to charitable gifts. The doctrine affected corporation law substantially. The statutes and the cases dealing with such improper holding of lands by corporations talked loosely of "escheat," yet their approach was more akin to that of Blackstone's attitude of forfeiture. Statutes restricting the power of corporations to acquire land usually provided in terms or by implication that land acquired by the corporation in violation of such restriction should be forfeited to the state; n154 but in the absence of such a provision for forfeiture, the state could not declare a forfeiture of the land which the corporation has wrongfully acquired. n155 While the inherent right of a corporation to acquire lands is generally recognized, n156 yet in the absence of express statutory license to retain such lands, the general policy of mortmain has been held to apply n157 and so where the corporation has no statutory license to hold land, such lands when acquired are forfeited to the state. n158 The statutes of some states today specifically prohibit certain types of corporations from owning land, n159 or limit the amount of land other corporations can hold n160 or the time of

holding. n161 These acts operate so as to forfeit the improperly held land to the state n162 after appropriate judicial proceedings. n163 Such results are to be distinguished from statutes that merely prohibit certain conveyances, devises or gifts. In this latter situation the transfer fails and the title remains in the original owner.

These statutes prohibit corporations from holding lands, except for the purposes of their charters, or from holding more than a prescribed quantity. A violation of such statutory restrictions has been held not of themselves to accomplish an escheat. n164 Although a corporation may have acquired real estate in such a manner as to render it subject to be escheated by proper action begun for that purpose, yet if such corporation shall, prior to the commencement of such proceedings, make a bona fide sale or conveyance of said real estate for value, the purchaser at such sale will take a good title thereto. n165 The right of a corporation to hold property in excess of that which is necessary to carry on its legitimate business can be questioned only by the state. n166

At common law, the state acquired by forfeiture the property of a felon who, with heirs, devisees, and legatees, were deprived of it on account of, and as a punishment for, high crimes. n167 All the property real and personal, of one attainted was forfeited, and the blood so corrupted that nothing could pass by inheritance to, from, or through the attainted one. n168

§ 91.06(b) Title of Forfeiture of Property Held by Felons or Used in Committing Crimes.

In the United States this doctrine was deemed repugnant to the ideas of justice and was not included as part of the common law, so conviction of an offense does not work corruption of blood or forfeiture of estate. n169 However, it is provided by the laws of the United States that no attainder of treason shall work corruption of blood or forfeiture, except during the life of the person attainted, and several of the state constitutions have provided that no attainder of treason or felony shall work corruption of blood or forfeiture of estate except during the life of the offender, while others of them have taken away the power of forfeiture absolutely, without any such exception. n170 Forfeiture of an estate is not an incident of conviction of a felony. n171 A felony is not subject to forfeiture of property rights as a penalty. n172 At the common law, an attainder or conviction of treason or felony worked a forfeiture of the culprit's lands to the king.

In the case of treason the forfeiture was forever, and in the case of any other felony, for the life of the felon and a year and a day thereafter. n173 A state has a right to declare a forfeiture of property used in the commission of a criminal offense. n174 Occasionally, a state statute provides for complete forfeiture of property for some specified cause, n175 but the general trend of the constitutions and legislation is not to allow any forfeiture to the state for crime, for longer than the life of the criminal; and in many states even this result cannot flow from any crime but treason. n176 Today, forfeiture depends upon the applicable statute. n177

§ 91.06(c) Title by Forfeiture for Other Landholder Misconduct.

Sometimes, as between individuals, the term forfeiture is used to denote the method by which an interest or estate in lands reverts to a former owner by operation of law, as by a breach of condition in a deed or lease. n178 More properly, upon the breach of such a condition subsequent, the grantor could exercise a right of reentry to regain the fee and put an end to the fee upon condition subsequent. Forfeitures at common law did arise to put an end to estates of less than fee (a) by attempted alienation of a greater estate than the tenant held (b) by waste and (c) disclaimer or denial of the superior title as where a lessee denies the lessor's title. n179

A tenant for life or years usually holds the land subject to certain implied conditions; and if the tenant violates any of these conditions, the tenancy estate is thereby forfeited to the remainderman or reversioner. At common law, the life tenant held subject to an implied prohibition against making an attempted feoffment of the life estate in fee simple, since this divested the whole fee-simple title, and by so doing the life tenant forfeited the life estate. This ground of forfeiture is now obsolete, since a modern conveyance, though purporting to pass a fee simple, passes only such interest as the grantor has; n180 but life tenants and other temporary owners may forfeit their estates to the reversioners or

remaindermen by the commission of waste. n181 Also, tenants for years and the holders of lesser interests may lose their estates or interests by reason of illegal use or through attempted disclaimer of the landlords' titles. n182 Forfeitures are not favored in law, n183 and courts eagerly seize hold of any circumstance by which forfeitures may be defeated, and where adequate compensation can be made, the law in many cases, and equity in all cases, discharges the forfeiture upon such compensation being made. n184 In some jurisdictions forfeitures have been done away with by statute. n185

CHAPTER 91 TITLE AND MARKETABLE TITLE *

11-91 Thompson on Real Property, Thomas Editions § 91.07

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 91.07 Title by Abandonment.

[Go To Supp]

As noted earlier, title to personalty could be acquired by occupancy of abandoned property. "Abandonment" is the final relinquishment of a right; the giving up of something to which one is entitled, but without vesting the ownership thereof in any other person. n186 The legislature may determine the subject of abandoned property. n187 The intention to abandon and the act of abandonment must concur. n188 Property is "abandoned" when the owner absolutely discards it with no intention to again claim it or exercise rights of ownership over it. n189 It is the giving up of a thing absolutely, without reference to any particular person or purpose. n190

There is a distinction between the abandonment of property and the mere neglect thereof. n191 "Abandonment'" is a voluntary act which must be proved by competent evidence. n192 It means the intentional relinquishment of a known right. n193 "The abandonment of property is the relinquishing of all title, possession or claim to or of it,--a virtual intentional throwing away of it." n194 The word "abandonment" has a well-defined meaning in law, which does not embrace a sale or gift of the property. If it were made for a consideration, it would be a sale or barter; and if without consideration, but with an intention that some other person should become the possessor, it would be a gift. n195

Where an act is induced entirely by misrepresentation and fraud there is no abandonment. n196 The characteristic element of abandonment is the voluntary relinquishment of ownership. n197 It depends on an intention to abandon or relinquish, coupled with some overt act or some failure to act, which carries the implication that the owner neither claims nor retains any interest in the subject-matter of the abandonment. n198 Mere nonuser, n199 or neglect n200 to assert rights in an estate does not result in the loss of ownership thereof in the absence of adverse possession. n201 But nonuser, coupled with an intention on the part of the dominant owner to release the right of ownership, constitutes an abandonment. n202 However, if the nonuser continues during the statutory period of limitation of actions to recover the right of property, this is evidence of an abandonment, n203 and may be entitled to great weight, when considered with other circumstances. n204 Abandonment is a question of fact to be determined by the jury from the circumstances of each particular case. n205 Time is not an essential element of abandonment. The moment the intention to abandon and the relinquishment of possession unite, the abandonment is complete. n206 Direct evidence of an intent to abandon property or rights of property is not required, but may be inferred from all the circumstances. n207

The problem of abandonment never seems to have arisen as affecting realty at common law. Presumably whenever a tenant departed the problem was solved by reversion to the overlord resulting from nonpayment of the feudal dues. The doctrine of abandonment does not apply to a perfect title which is the possession, right of possession, and right of property. n208 So it is the general rule today that no legal title to corporeal real property can be lost or destroyed by any act of abandonment on the part of the owner. n209 Certainly it does not appear that where liability attaches by reason of ownership of realty the owner could plead abandonment as a defense. Thus one is not divested of title by reason of the fact that for many years one was unaware of one's interest in the land and practically abandoned it when title was a matter of record. n210 One does not abandon title by acquiring a new title. n211 The doctrine of abandonment does not apply to a perfect title, but only to imperfect titles, n212 hence a vested fee simple title to real estate cannot be abandoned; n213 a writing signed by the owner being the only way of passing title thereto, in view of the statute of frauds. n214 "An abandonment ... so far as it relates to a vested estate in real property is ineffectual to transfer the title." n215 A merely equitable title not perfected into a grant or vested by deed, as in the case of settlers under the public land laws, may be lost by abandonment; n216 but legal rights, when once vested, must be divested according to law. n217 Once properly vested, a legal title can be divested by abandonment only when the circumstances of the case are sufficient to raise an estoppel, or where the possession is acquired by one in consequence of the abandonment, and held under claim of title for the period of limitation. n218 Once title vests it stays vested until it passes by grant, descent, adverse possession, or some operation of law such as escheat or forfeiture. n219

The owner of a fee simple title to land, even under an unrecorded deed, or a vendor in an executory contract for the sale of land, does not forfeit title by failure to assert it affirmatively for any period of time. n220 One in possession of land under a record title did not abandon such possession by putting a tenant on the land. n221

It is generally recognized that a householder for the purposes of health, pleasure, business, or for any cause deemed sufficient, may be absent from the homestead without forfeiting homestead rights, and when no new homestead has been acquired, absence from the old one, unless for an extended period, does not create a presumption of its abandonment. n222 A few cases have spoken of abandonment of real property, n223 but one authority n224 has concluded that the true doctrine of abandonment does not exist with respect to realty in the common law. There can be no such thing as an abandonment of land in favor of a particular person, or for a consideration. Such an act would be a gift or sale. n225 Abandonment of real estate does not confer title on the next occupant or any other person, but disentitles the person who has abandoned it to reclaim it. n226 A true abandonment must result in returning that which is abandoned to the public domain. n227 The term "abandonment" is somewhat loosely used in connection with the yielding up of claims to or interests in real estate. But in such cases the interest so given up goes to some person or persons, not to the public domain to be seised upon by the first occupant. To constitute abandonment of real property by the owner, there must be a concurrence of the act of leaving the premises vacant so that they may be appropriated by the next occupant, and the intention of not returning. n228

Interests in the land of another, such as easements, licenses and profits, may be yielded by the holder, n229 and such an act is often spoken of as an abandonment. So easements and other incorporeal rights may be lost by abandonment; n230 but not a fee simple. n231 Actually, however, the courts require an intent to release such interests. n232 Mere nonuse, though for long periods, does not constitute "abandonment." n233 The equitable doctrine of laches or abandonment applies only to easements or licenses or other claims against or by surrender or release of rights in lands and has no application to an actual estate in the land itself which can only be lost or barred by operation of the statute of limitations. n234 The title, though not lost by abandonment, may be barred by estoppel or by the statute of limitations n235 in favor of a third person. But this actually means a transfer of title from one individual to another through the doctrine of adverse possession, not an abandonment and occupancy as in the case of personalty. If there is such a doctrine as loss of title to realty by abandonment, then the title reverts to the state, which acts as the ultimate owner under the theory of escheat.

A boundary line may be changed by acquiescence so as to constitute abandonment over a period of time other than that

required for adverse possession. n236 Abandonment by the owner of an easement therein or other charge against the realty is distinguished from dedication in that in the case of dedication the land is set apart or appropriated for some public use. n237 Mining claims on the public domain may be lost by abandonment. n238

Until title by adverse possession n239 has become absolute by operation of the statute of limitations, it may be lost or destroyed by surrender of possession. As to the effect of abandonment of the possession of land after the title thereto has become absolute by adverse possession under the statute of limitations the cases are conflicting. Such a title cannot be lost by abandonment after the full statutory period has expired. n240 Thus, where title of the former owner has been divested by adverse possession for the statutory period, a lapse in possession thereafter does not defeat the title of the adverse holder. n241 Other courts, however, have held that title by adverse possession affects only the remedy of the original owner and that the right so acquired may be lost by abandonment. n242 It seems the better rule to hold that a title acquired by adverse possession can no more be lost by abandonment than a title acquired by deed or descent from the true owner. Abandonment by one in adverse possession under color of title before the expiration of the statutory period of limitations has elapsed would break the continuity of possession, and would prevent such possession from ripening into a title. After such possession has ripened into a title, and the period ends, abandonment cannot destroy the title already acquired, unless such abandonment brings about an estoppel, or unless the title to the abandoned property afterwards goes into another by reason of such other's adverse possession. n243 Reentry by the original owner, after the bar is complete, does not revest the title in the original owner. n244

Renunciation has been defined as "a legal act by which a person abandons a right without transferring it to another." n245 A problem exists as to whether renunciation by an heir in the ancestor's estate is a type of abandonment. One authority insisted that on the ancestor's death realty passed automatically to the heir, who could not renounce, n246 although the heir could renounce personalty as next of kin. This view has received American support. n247 Thus an attempted release by the heir after the ancestor's death would amount to a gift. Modern taxing authorities n248 have accepted the proposition n249 that real estate descended to the heir by operation of law and that the heir could not renounce. Since mort d'ancestor n250 was designed at least in part to force the lord to permit the heir to enter, the historical correctness of this doctrine at least under the concepts of seisin is open to question.

A grantee who has voluntarily consented to the destruction or surrender of the deed, with the intention of defeating the grantee's title, is not allowed to have an affirmation of the deed. Such a grantee is estopped from setting the deed up, or from showing the deed's contents by parol evidence. n251 In this way the destruction of the deed has the effect of a reconveyance, because there is no competent evidence that the title ever passed by deed. The destruction of the deed by consent of both parties is not a reconveyance, but in its effect operates like a conveyance. n252 The mere cancellation, destruction, or surrender of a deed does not divest the grantee of the title, nor revest it in the grantor, though such was the intention of the parties. n253 A written indorsement upon a deed surrendered, that the grantee "relinquishes all his right and title to the within deed," does not operate as a reconveyance of the legal title, though it may be evidence of an agreement to reconvey, which a court of equity might enforce by specific performance if it is supported by a valuable consideration. n254 An effective abandonment would result from a surrender of the deed only where the circumstances give rise to an estoppel, or where all the muniments of title have been voluntarily destroyed and the grantee would have to resort to parol evidence to prove title. n255 Upon the delivery of an executed deed the legal title passes to the grantee, and any subsequent alteration of the deed by changing the name of the grantee does not divest the grantee of title or revest title in the grantor. n256 A surrender can only be made to the grantor, and nothing short of cancelation or destruction of a deed before the same is recorded would have the effect of passing the title back to him. n257

CHAPTER 91 TITLE AND MARKETABLE TITLE *

11-91 Thompson on Real Property, Thomas Editions § 91.08

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 91.08 Title by Occupancy.

Under the feudal concept, title depended upon possession. Hence when one was ousted from possession one also lost title. Today this precept has almost entirely vanished in the realm of real property. The doctrines of prescription and adverse possession have replaced title by occupancy.

A discussion of the power to acquire title of ownerless things by occupancy lies primarily in the field of personal rather than real property. Occupancy in its technical sense is the taking possession of those things corporeal which are without an owner, with an intention of appropriating them to one's own use. In the realm of personal property, ferae naturae, n258 wild things, and abandoned property bona vacantia n259 are subject to acquisition of title by occupancy. Either there is no outstanding title to such property or, as is the case of wild game in some states, title is in the public but may be acquired by individuals through capture.

Title to realty by occupancy under the English law is of more limited scope than that of personalty. Unquestionably, however, the Anglo-Saxon tribal states as they developed into a nation, despite Danish retardation, did unfold the property concept as to all areas except wild lands. n260 The Norman conquest was merely a transfer of titles that had already become fixed. Under the English theory the ultimate source of title of all lands came eventually to rest in William the Conqueror. Only a few of the channel isles were owned allodially. There was therefore no doctrine of ferae naturae applicable to realty, and the crown graciously extended its seisin to the American continent. Even the Jamestown settlements, allodial at first, in theory eventually admitted the overlordship of Charles II. n261 Thus, the English crown and its successors in title, the thirteen original states and the United States of America held basic title to all land as successor to the English crown by virtue of the treaty of Ghent. n262 Some grants from foreign sovereigns were acknowledged in certain parts of this country, areas formerly under French and Spanish rule and in areas later acquired by treaty. But the doctrine of original title in realty in an individual never has found root in the United States. Not even the aboriginal population were accorded titular rights to the lands occupied by them. Under the philosophy of the white conqueror the Indian had no legal title, but merely a possessory interest.

In its broad sense, the term occupancy has reference to the right or title derived from an original state of nature. Thus the native Indian population had a certain right or title to the lands they occupied, and while the courts have respected these rights, they have held that the right does not extend to property in the soil. This government, while acknowledging

the Indian right of occupancy, and recognizing the principle of acquiring their claims by purchase, has at least until recent years ever reserved the exclusive right to extinguish this title by conquest. n263 The claim of Indian tribes of a right, because of immemorial occupancy, to roam certain territory to the exclusion of any other Indians is known as "Indian Title" or "right of occupancy." n264 This was true even where the Indians had themselves recognized some individual interest in particular tracts, such as among the agricultural Cherokees and the Hopis and Navajos of the southwest.

To achieve the concept of possession there must be (1) an object capable of being possessed (2) an animus possidendi or intent to possess and (3) manucaptione or occupancy to the extent required by the law considering the nature and location of the property. n265 Possession is itself a property right of a low degree. n266 One having possession may defend this right against all the world except the true owner, n267 and some cases go so far as to give the possessor titular rights as against all the world except the true owner. n268 Others permit the stranger to plead "ius tertia" or title in a third person as a defense against a real property action brought by an occupant. n269 As against the holder of the legal title, a mere occupant has no rights. Nor does mere occupancy ever give use to title. n270 There must be a claim of right against the true owner before adverse possession begins to run.

American laws do not recognize any such thing as general or common lands. All American lands are held and owned either by private individuals, or by the state or federal government. n271 Mere settlement upon public lands without taking some steps required by law to acquire title thereto is wholly inoperative as against the United States; n272 but while a person who enters upon public lands without license from the government is a mere trespasser, the policy of the government toward actual settlers has been a liberal one, and occupation of land has been often recognized or sanctioned as initiating a right to acquire it. n273 While settlers who have made valuable improvements on public lands with a view of purchasing or acquiring them under the law prescribing the method of acquiring title thereto, have a possessory right therein, as against the general public, a mere settlement on or occupancy of such lands confers no rights upon such settlers as against the government or persons claiming by reason of a legal title issued by the federal government. n274 It is not uncommon for general grants of public land to except from location thereunder land in the occupancy of persons who have settled upon it without right. n275 A private citizen cannot initiate or acquire under public land laws rights in land occupied by others claiming under the United States, though the claim and occupation of the others is fraudulent and wrongful as against the government. n276 Under some particular circumstances, however, an occupant may acquire property rights. So some states permit the filing of mining claims on public lands, and in a few states the owner or discoverer of an outcrop of a mineral lode may follow it into the bowels of the earth, even though the mine may lead down beneath another property.

Today, the problem of acquiring fee title by occupancy arises only in connection with new lands. Where the lands arise out of nonnavigable waters, the problem is solved by application of the principles governing accretion and reliction. Where the new lands arise out of navigable waters and accretion or reliction does not apply, the title is in the sovereign. It then becomes a question as to whether the sovereign is the United States or the individual state. n277 In the case of tidelands this point has been resolved by judicial decision in favor of the United States. n278 The point is certain to be pressed further as attempts are made to artificially create new land along the shores of the oceans and the Great Lakes. Heretofore, there seems to have been a strong assumption that such new-made land belonged to the state. n279 This thinking may now be seriously altered by the tidelands decisions. Under statutes of the states riparian owners are permitted to reclaim land that is submerged under private waters and to take title thereto. n280 This rule has also been applied to lands under waters over which the Federal government has control. n281 Even though such lands are again submerged, title so acquired is not lost. n282 Today, the sovereign is moving into the field of abandoned property and is, under the doctrine of escheat resulting from the *bona vacantia*, taking away much of the individual's rights to acquire title to abandoned goods through occupancy.

CHAPTER 91 TITLE AND MARKETABLE TITLE *

11-91 Thompson on Real Property, Thomas Editions § 91.09

AUTHOR: Professor David A. Thomas J. Reuben Clark Law School Brigham Young University

§ 91.09 Marketable Title.n283

[Go To Supp]

§ 91.09(a) The Common Law.

§ 91.09(a)(1) Various Definitions of Marketable Title.

If the real estate sale contract directly or by inference contemplates that the vendor shall furnish to the vendee a marketable or merchantable title, the question of what is a marketable title in a particular situation may be as easy to answer as what is right and what is wrong. A marketable title is one that a prudent person with full knowledge of all facts would be willing to accept. n284 The leading rule follows the principle that to make a title unmarketable it is not necessary that proof establish that it is defective, if there is reasonable doubt in the minds of the court. n285 The doubt must be not remote but rational. n286 The test has been said to be whether a court could direct a verdict. n287 A vendee who takes possession under the contract of sale may not dispute the vendor's title. n288

A merchantable or marketable title has also been defined as one that is "a title that a man of reasonable prudence, familiar with the facts and apprised of the questions of law involved, would in ordinary course of business accept." n289 The test of a marketable title is not the hazard of possible litigation but the chance of successful attack. n290 A marketable title must be salable without abatement of price and salable on the face of the record. n291 If the defect complained of is not applicable to bona fide purchasers the title is considered "marketable." n292

The term "marketable title," when applied to real estate, means a "title free from reasonable doubt." n293 It means a title that is reasonably free from such doubts as will affect the market value of the estate; one which a reasonably prudent person with knowledge of all the facts and their legal bearing would be willing to accept. n294 It has even been held to be a title in which there is no doubt involved either as to a matter of law or fact. n295 It is one in which the possession can be acquired and retained without litigation or judicial decision. n296 It is a title free from apparent defects, grave doubts, and litigious uncertainties. n297 A title is "unmarketable" when for the purchaser to accept the title proffered would lay the purchaser open to a fair probability of vexatious litigation with the possibility of serious loss. n298

The test is whether the purchaser can peaceably enjoy and use the property for the intended and announced purposes. n299 "Less certainty of proof is required to justify vendee's refusal to accept title than to open up a case after title is

passed and the consideration has been paid." n300 A title subject to an encumbrance is not a good marketable title. n301 A "clear record title" requires that the record should show an indefeasible unencumbered estate. n302 The purchaser is entitled to have a title which is not doubtful and which does not suggest the possibility of a lawsuit, but which a well-informed and prudent person paying full value would be willing to take. n303 The doubt to render a title unmarketable must be a reasonable doubt that would induce a prudent person to hesitate. n304

An "equitable title" is not a "marketable title." n305

> A title open to reasonable doubt is not a marketable title. The court cannot make it such by passing upon an objection depending upon a disputed question of fact or a doubtful question of law, in the absence of the party in whom the outstanding right was vested. Such party would not be bound by the adjudication, and could raise the same question in a new proceeding ... It would especially be unjust to compel a purchaser to take a title, the validity of which depended upon a question of fact, where the facts presented upon the application might be changed on a new inquiry or are open to opposing influences. n306

A reasonable doubt concerning the title exists when there is uncertainty as to some fact appearing in the course of its deduction, and the doubt must be such as affects the value of the property or will interfere with its sale. n307

The title should not only be good, but indubitable. n308 It should at least be such a title as would insure to the purchaser a peaceful enjoyment of the property. n309 If a reasonable doubt remains, after the vendor has produced all the proof the vendor is able to produce, the title is not marketable, and the purchaser is not obliged to take it. n310 A title may be perfect, and yet not marketable. For instance, suppose the validity of A's title depends upon whether or not A is next of kin to B. If A is in fact the next of kin to B, A's title is perfect; but if A is unable to show that fact to the court beyond a reasonable doubt, then A's title, although really perfect if all the facts could be shown, will be deemed unmarketable. n311 The title may be good in fact; but to be marketable it must be possible to be good of record. n312 It may be marketable if there is no reasonable doubt how the fact is and the proof is readily accessible at any time to show how it is. n313 Such proof, however, must be very clear. n314 The sufficiency of a title may depend on proof of facts not of record. n315 Some courts take the view that the fact that the title is capable of being made good by the production of oral testimony or by affidavits does not make it a marketable title where the record does not show the title to be good. n316 However, the vendee is not entitled to demand a title absolutely free from all suspicion or possible defect, n317 or that it will be satisfactory to the vendee or his attorney, unless the contract so provides. n318 The doubt must be rational or real, and not fanciful. n319 The purchaser may waive the right to a marketable title, n320 and may bargain to take realty subject to existing encumbrances. n321 The motive of the vendee in raising the question of unmarketability is not important if the title is actually unmarketable. n322 Statutory uniform title standards have been approved. n323

The courts are not in agreement as to the extent to which a title will be held marketable where the facts are in dispute. n324 So by one rule the vendee cannot be compelled to accept a title based on affidavits where the vendee is entitled to marketable title, n325 under another rule the opposite result is reached. n326

Where all parties having a possible interest are not before the court, not only will a purchaser not be required to take a title depending upon a doubtful question of fact, which is applicable to all cases, but will also not be required to take a title depending upon a doubtful question of law, since the decision thereof would not be binding upon those who are not parties to the action and who might thereafter assert a claim of title. n327 If doubt exists as to the title the courts will usually avoid determining the title to make it marketable. n328

Judicial opinions divide as to whether, in an action between the vendor and the vendee, the court may pass upon a title that requires a determination of a question of fact or of law where all the parties are not before the court. n329 Under the New York rule, if the court in which specific performance is brought can determine the question of title, it may hold the title to be marketable. But if the same question can later be raised in another court, such as where a federal

constitutional question is involved, the title is not marketable. n330 But Massachusetts refuses in a specific performance action to determine whether or not a state constitution question is involved. n331

Under one rule the court will determine the marketability of the title and then decree specific performance if it is satisfied with the law, even though all of the persons who might raise the question are not before the court. n332 Under another rule, if all parties cannot be brought before the court the court will not try the title. But some courts will try the title in a specific performance action if all parties are joined. n333 It has been squarely held that the question of marketability of a title is one of law and that the opinion of witnesses is not receivable. n334

§ 91.09(a)(2) The Effect of Area Discrepancies on Marketability.

If the vendor is unable to deliver the area expected by the vendee the court must determine whether the agreement contemplated the sale of a certain unit of property regardless of its size or whether a definite area played a part in the agreement, i. e., whether the sale was in bulk. If there is a deficiency the "lex non curat de minimis" rule must be considered. If the deficiency is material and such part is not contemplated by the agreement--the question of the vendee's remedy is material--may the vendee rescind or elect to pay a pro tanto diminished purchase price? If the realty is deficient in quantity the weight of authority denies specific performance to the vendor, n335 unless the de minimis rule applies, n336 or the vendee had prior notice of the deficiency before executing the contract, n337 or the contract had waived deficiencies. n338 Where a designated tract is sold as a whole for a gross sum and there is no express or implied warranty as to quantity the sale is deemed to be in gross and not by the acre. n339 Where the sale is not in bulk and there is a material deficiency in quantity the vendee may have specific performance with corresponding abatement in price. n340 Thus where the purchase price has not been paid, the purchaser may have the deficiency in the land conveyed credited against the amount agreed to be paid. n341

If the parties to a contract for the sale of land estimate the quantity at so much and the amount of land has a direct influence on the price to be paid or was a controlling motive in entering into the contract, equity will grant relief in case there is a material excess or deficiency, by compelling a reconveyance of the excess, n342 or fixing an equitable compensation, n343 or rescinding the agreement. n344 Where the sale of a tract of land was in gross and described as containing one hundred fifty-two acres and a fraction in fact only contained one hundred thirty-one acres, more or less, it was held that the extent of the deficiency was sufficient to entitle the purchaser to relief. n345 Where a purchaser agreed to purchase property described with reference to a certain map, the tender of a deed which conveyed the property according to its exact dimensions on the map was held a substantial compliance with the terms of the contract of sale. n346 Where the land is sold in bulk for a lump sum, then quantity is not generally of the essence of the contract and the parties take the risk of deficiency or excess, n347 except in cases where there is actual fraud. n348 Mere shortage does not conclusively show that the purchaser is entitled to compensation for such shortage, but other facts and circumstances tending to show the intention of the parties must be taken into consideration in order to determine whether the contract would have been consummated if both of the parties had known the facts. n349 Quantity is of essence in cases where the sale is by the acre and abatement is allowed for deficiency. n350 It is not essential to the right to abatement that the vendor should have known of the acreage shortage. n351 The words "more or less" mean "substantially" or "approximately" and imply that both parties assume the risk of an ordinary, n352 but not of a gross, discrepancy, n353 except where fraud is practiced in the transaction. n354 Where both parties were mistaken as to the land described, the courts will usually allow abatement of the purchase price for deficiency. n355 Specific performance has been refused in several instances where the mistake was not mutual but was caused by the act of the other party. n356 Specific performance was refused where the purchaser knew that the vendor was making a mistake as to the size of the lot to be conveyed, n357 or where it would be inequitable to enforce the agreement. n358 However, where a tract of land is sold as a whole, the amount may be immaterial even though greater than the vendor supposed, and the contract be valid and enforceable. n359 The vendee cannot have any action for misrepresentation as to quantity where the vendee has information as to the area before the consummation of the contract. n360 If both vendor and vendee believe that the land contracted to be sold contains a certain number of acres and the transaction is based on that belief, the vendee may recover for the deficiency where the acreage is subsequently discovered to be deficient. n361 The

general rule of compensation or abatement in case of deficiency in the quantity of land sold is according to the average value per acre of the whole tract, unless particular circumstances require a departure therefrom. n362

Whether the sale is intended to be in bulk or by the acre is to be determined from all the terms of the contract, including a lump-sum purchase price, conduct of the parties, value and extent, and location of the land and its description. n363 If the vendor has fraudulently misrepresented the quantity the vendor cannot defend on grounds that the sale was in bulk. n364 The use of the words "more or less" or "approximately" n365 are evidence, n366 but not conclusive evidence, n367 that the parties expected a deficiency, but do not excuse a large deficiency. n368 It is not a defense to specific performance at the suit of the vendor that there was a highway across the premises which took a portion of the premises, where the contract did not call for a specific acreage. n369 Where the vendor represented that the land contained more than the number of acres conveyed to the purchaser, the purchaser may recover the proportionate part of the amount paid, if the deficiency is sufficient to warrant it. n370

§ 91.09(a)(3) Situations Making Title Unmarketable.

For a title to be unmarketable the defect must be a reasonable one. n371 A purchaser seeking specific performance must take deed subject to dower, is not entitled to abatement for purchase price because of dower, and must rely on covenants of warranty. n372 Recitals in deeds are not usually allowed to be marketable title. n373 Most of the cases hold that a restriction against the manufacture or sale of intoxicating liquor on the premises makes the title unmarketable. n374

A title derived from a tax deed is marketable if there are no defects in the proceedings under the leading rule, n375 but some cases hold that a tax deed of itself is not prima facie evidence of merchantable title, lacking independent proof that all provisions of the statutes regarding tax sales were met. n376 Tax sales supported by affidavits of adverse possession have been held to support marketable title. n377 An easement makes a title unmarketable unless open and notorious. n378

Under one rule, to make a title marketable a grantor must be shown to have been unmarried, n379 but other cases hold there is no presumption that the grantor was married. n380

A prospective assessment for contemplated improvements which had not become a lien when the title was closed was held not an encumbrance or valid objection to taking title under the contract. n381 A land purchaser assumes the annoyance involved in an adjoining prior existing landowner's use of the land in a reasonable manner. n382 The vendor and the vendee contract with notice of visible easements. n383

A vendee was not bound by constructive notice of zoning ordinance which the vendor was violating. n384 It is possible for a title to be "marketable" and yet contain such collateral infirmities as would deny specific performance to the vendor. n385 Ordinarily, the vendor must have discharged all encumbrances before tendering a deed and may not impose on the purchaser the burden of procuring satisfaction of encumbrances. n386 The inability of the vendor to convey a full title because of a reservation of riparian water rights may or may not excuse performance of the contract by the purchaser, this depending upon the value of the rights reserved. n387

The purchaser cannot be compelled to take a partial interest, n388 and also cannot be compelled to accept a title under encumbrance which the vendor cannot or will not remove and which the purchaser cannot remove by application of the purchase money. n389 Very generally, an encumbrance will not render the title unmarketable where it may be removed by the vendee out of the purchase money to be paid, n390 or the vendor is obligated to pay it out of the money to be received. n391 An encumbrance will include charges which burden, obstruct, or impair the use of the land or impair its transfer. n392 Other matters considered as encumbrances warranting rejection of title as unmarketable are outstanding dower interests, n393 future interests, n394 a pending suit for condemnation of part of the property, n395 judgments, n396 executions, n397 unreleased mortgages, n398 easements, n399 encroachments on the premises, n400 the encroachment of buildings on the premises over adjoining premises or streets, n401 party walls, n402 building and

business restrictions, n403 tax titles n404 or tax liens, n405 an outstanding oil lease, n406 sale of coal and mineral rights, n407 an unascertained transfer tax lien, n408 income tax liens, n409 mechanics' liens, n410 the undisposed of interests of minors, n411 administrators' or guardians' deeds without showing court authority for such deeds, n412 titles containing restrictive covenants, n413 confusion and differences in names and initials of prior grantors, n414 corporate deeds not showing authorization by the corporation, n415 options to purchase, n416 and titles on decrees still subject to appellate or other review. n417 A permanent easement visible to the purchasers, such as a public road or telephone right-of-way, has been held not to be an encumbrance. n418 Authorities divide as to whether public highways are encumbrances. n419

Where the lien can be satisfied out of the unpaid purchase price the title is generally held marketable. n420 The title is not marketable if it depends upon an unconstitutional statute, n421 but it is marketable if the statute which would have created the encumbrance is unconstitutional. n422 Indeed the cases are divided on whether a vendee must accept a title subject to an encumbrance, even though there is reserved from the purchase money a sufficient amount to pay the lien when determined. n423

Marketable title vests title and is more than a statute of limitations being valid as against those under disability. n424 Encroachments are not fatal to title if removable before closing. n425

A purchaser of property entitled to a "marketable title" may not be required to accept a conveyance if the title is in such condition that the purchaser may be required to defend litigation challenging possession and interest. n426 A title may be regarded as unmarketable if a reasonably careful and prudent man, familiar with the facts, would refuse to accept the title in the ordinary course of business. It is not necessary that the title be actually bad in order to render it unmarketable. It is sufficient if there is such a doubt or uncertainty as may reasonably form the basis of litigation. n427

A condition is implied in a land sales contract that the seller shall convey a marketable title, n428 unless the contrary is stipulated, n429 but after the deed is executed this condition is usually merged and the grantee must depend upon the covenants in the deed for relief. n430 The willingness of a title company to insure is not a test of marketability. n431 Marketable title must be of record and not be based on parol evidence. n432

An equity of rescission because of fraud of a former grantee in obtaining the deed makes the title unmarketable. n433

A zoning regulation does not make the title unmarketable, unless the present use is in violation of the zoning ordinance. n434

Where the record owner has died and the estate has not been settled so as to cut off the creditors, the cases are not in accord as to whether the title is marketable. n435 There is also a problem in such instances as to the determination of heirs or devisees. n436 The cases are at variance as to whether the purchaser can be required to accept a title where there has been no administration of the estate of the deceased titleholder. n437 Where the interest of a minor or of an unborn person is involved, the title is not marketable if the interest has not been properly divested of record. n438 A vendee's interest in a land contract must be foreclosed to clear the title. n439 The question of marketability of the real estate of a deceased person upon a sale by the purported heirs also depends on the possibility of an outstanding will. n440 It further depends upon who are the true heirs. n441

An interloping mortgage is not a defect, n442 and a mortgage that can be paid out of the purchase price is not a defect. n443

The vendor and the vendee contract with notice of visible easements. n444

Under the leading rule the taking of possession by the purchaser prior to the closing day does not waive any objections to the title, n445 but there is contrary authority. n446 A third rule holds that no waiver occurs if the purchaser is

ignorant of the particular defect, n447 but the cases do hold that the purchaser, by retaining possession after making title objections waives such objections. n448 Other cases do not see a waiver by retaining possession where the vendee was ignorant of the objections at the time of the contract. n449 Of course if the vendee is responsible for the defect, the vendee cannot rescind. n450 Where it is apparent that the vendor can never acquire good title, the vendee may rescind before closing. n451 Some cases have placed a burden on the vendee by holding that the vendee waives all objections to title unless the vendee particularly calls attention to them if they were of such a character that they could be cured by the vendor. n452

LEXIS: unmarketable w/2 title

§ 91.09(a)(4) Title Based on Adverse Possession.

While adverse possession will transfer title, such transfer is dependent upon a number of diverse facts. n453 The final conclusion as to whether there has been "adverse possession" for the requisite period, therefore, is one that must be determined by judicial opinion. Can a buyer be required to accept a title which rests on the concept of adverse possession? Ordinarily, where the contract calls for record title, the title by adverse possession will not suffice. n454 Marketable title requires an abstract "free from reasonable doubt in law and in fact as to its validity." Affidavits and claim of adverse possession are not sufficient. n455 Where the contract does not call for a perfect record title, a title by adverse possession will suffice; but the proof must be convincing and readily available. n456 In many jurisdictions, clear title by adverse possession is marketable, and the purchaser may be required to accept it. n457

Undoubtedly a title by prescription is as high as any known to the law, but the facts upon which it is based should be legally established. n458 A court of equity will never compel a purchaser to take a title where the point on which it depends is too doubtful to be settled without litigation, or where the purchaser would be exposed to the hazard of such proceeding. n459 So, under a contract to furnish a marketable title, one rule holds that a marketable title must be shown on the abstract and not by adverse possession. n460 An agreement to convey by warranty deed, with abstract showing good title, is not satisfied by the offer of a title based on oral evidence of adverse possession. n461 Where the contract calls for a "perfect title," the purchaser may insist upon good title of record, and a perfect title by adverse possession is insufficient. n462 It has even been held that in the absence of a stipulation to furnish a title of record the purchaser is not required to accept a title based on adverse possession which requires parol proof to establish it. n463 On the other hand, where the contract does not stipulate for a title of record, the cases in most jurisdictions hold that the purchaser is bound to accept a title resting upon a hostile, adverse, and uninterrupted possession under color of title for a period of time sufficient to bar the rights of any possible adverse claimant. n464 It has been held that a vendor who for the full period of limitation prescribed by statute has been in peaceable and uninterrupted possession of lands has a marketable title which the vendee who has stipulated for a "clear and indefeasible title" is bound to accept. n465 If the fact as to adverse possession is clear, the title is marketable and the purchaser may be required to accept it. n466 A contract calling for a conveyance by "a good and sufficient general warranty deed, in fee simple" is satisfied by the giving of a good and marketable title, which is a title not open to reasonable objection; and such is a title by prescription. n467 It has been held that a purchaser is not entitled to rescind a land contract on the ground that a reasonable doubt existed as to whether the vendor's title was good, where a will gave power of sale to trustees under whom the vendor claimed title and such a long time had elapsed since the death of the testator that his heirs could not successfully claim the property. n468

Distinction is made between a "clear title" and a "marketable title," n469 but there is considerable confusion as to the extent to which a marketable title can be established by bolstering the record with affidavits. n470 A title based on adverse possession is good if proved. n471 The statute of limitations ordinarily cannot be relied upon as to unreleased or defectively released mortgages because of the danger that the mortgagor may have taken an action to keep the mortgage alive. n472 An adverse possession claim is invalid against Torrens property where no disputed interest existed at the

time of registration and where there was no ambiguity in the property description. n473

LEXIS: title w/15 adverse possession

§ 91.09(a)(5) Abstracts as Requirements of Marketable Title.

The contract may contemplate that the vendor will furnish the vendee with an abstract of title or in the alternative with title insurance. The vendor is under no duty to furnish an abstract where the contract does not require it. n474 The vendee may waive a provision in the contract to furnish an abstract. n475 An agreement in the contract to furnish an abstract means an abstract taken from the record, n476 and is to be furnished to the vendee on or before tender of the deed. n477 An abstract is not contemplated to be the complete evidence of title, but is a mere synopsis of the record as to the title, n478 but the purchaser is entitled to rely on the abstract. n479 The abstract may be supplemented in some instances by affidavits clearing omissions and obscure and defective recitals. n480 Under an agreement to furnish "an abstract of title" the contract was held to require a record title and would not be satisfied by furnishing extrinsic evidence of title by adverse possession. n481 The contract may provide for the approval of the abstract by an attorney, and his decision will generally be conclusive. n482 The provision requiring the vendor to furnish an abstract showing a good and merchantable title means that this title should be in the vendor. n483 The abstract is generally held not defective for omission of the original government grant. n484 The vendee has a reasonable time for the examination of the abstract, n485 and the vendor should have a reasonable time to correct defects. n486 Objections to defects in the abstract may be waived. n487

The abstracter ordinarily insures the accuracy of the work. n488 An abstracter is not liable for loss incurred by one who, at the time of taking the action resulting in the loss, does not rely on the abstract. n489 If the vendor agrees to furnish an abstract showing title, the vendee is not liable if such abstract is not furnished. n490

The weight of authority does not place upon the vendor, in the absence of contract, the duty of furnishing an abstract of title. n491 If the contract requires the vendor to furnish an abstract such abstract is a condition precedent to the vendee's liability to perform, n492 and the vendor may not have specific performance without furnishing the abstract. n493 The abstract must show all matters of record detrimental to the title. n494 It must show grantor's marital status. n495 It must show all defective descriptions. n496 The abstract must reveal the present status of all liens and encumbrances of record. n497 It must contain an abstract of all court proceedings affecting the title. n498 If the instrument appears in the abstract of title, it gives notice to the purchaser even though the instrument was not itself entitled to record because of a defective acknowledgment. n499 The abstract must reveal all instruments of record affecting title to the realty. n500 Where the chain of title depends on court proceedings the abstract must show sufficient indication thereof to support the title. n501

LEXIS: requir! w/15 abstract! w/30 marketable title

§ 91.09(a)(6) Vendee's Rights When the Vendor's Title Is Inadequate.

If the vendor cannot furnish the title contemplated by the contract the vendee may rescind, and the court will not decree specific performance of a contract to convey if the grantor cannot make a good title to the property, if the title is doubtful, n502 or not marketable, n503 or if the vendor can convey only an undivided interest therein. n504 It is the duty of a vendor to tender to the vendee a safe title, and a purchaser is never bound to accept a defective title in the absence of express agreement. n505 A promise to convey such title is always implied in an executory contract for the sale of real estate, and a purchaser is never bound to accept a defective title, unless the purchaser expressly stipulates to

take such title, knowing its defects. n506 In the absence of a specific provision to the contrary, the vendor must convey a title that is free from encumbrances. n507

When a vendor agrees to sell a parcel of land, the law imputes to the vendor a covenant to convey a marketable title, unless the vendee stipulates to accept something less. n508 An agreement to convey, unless otherwise provided, obligates a conveyance of a title in fee simple free from liens and encumbrances. n509 A purchaser who has been promised a good title cannot be compelled to accept a defective title even though the vendor is ignorant of the defect when making the promise. n510

Where the vendor agrees to convey to the vendee "by warranty deed with abstract showing good title," this has reference to the record title, which may be epitomized in the abstract, and is a condition precedent to the vendor's right to demand the deferred payments. n511 In case of defect of title as to which the vendor was ignorant, the vendee may rescind or disaffirm the contract and sue to recover any part of the purchase money he has paid. n512 Where the seller of a business free and clear of encumbrances refused the purchaser's demand to comply with bulk sales law, it was a failure to perform and the purchaser is entitled to return of the escrow deposit. n513

Where the contract stipulates the character of title to be conveyed, effect will be given to such stipulation. n514 The covenant for "good and lawful title" intends a title free from encumbrance. n515 The title must be a good record title and not one that may be shown to be good by oral proof or writings not subject to registration. n516 Thus, a contract providing for the conveyance of an estate in fee simple, clear of all encumbrances whatever, by a good and sufficient warranty deed, requires a conveyance of a good, merchantable title. n517 Strictly speaking, there is no such title as a "perfect title," but where the contract calls for such title the purchaser is entitled to a title free from reasonable doubt and fairly deducible of record, n518 and cannot be compelled, for example, to accept a title encumbered by a recorded oil and gas lease. n519

Where the phrase, "perfect title," was embodied in a contract of sale, it was said to mean such a title as is perfect and safe to a moral certainty; a title which does not disclose a patent defect that suggests the possibility of a lawsuit to defend it; a title such as a well-informed and prudent person paying full value for the property would be willing to take. n520 "A perfect title always carries with it, in legal contemplation, a lawful seisin and possession. Such seisin and possession is coextensive with the right, and deemed to continue until ouster by actual possession of another under claim of right." n521

Like a "perfect title," a "complete title" requires the union in one person, from one or more sources, the possession, the right of possession, and the right of property. n522

Where the contract contemplates the conveyance of a good title when the purchase price is paid, it is the duty of the vendor to have such title and to be able to convey same when the time for performance arrives. n523 The purchaser is not required to accept a defective title, n524 and is not required to accept title from a third person. n525 The term "good title," used in a contract of sale, does not necessarily mean one perfect of record. n526 It consists in the rightful ownership of property and in the rightful possession thereof, together with the appropriate legal evidence of rightful ownership. As between vendor and purchaser, it means the legal estate in fee, free and clear of all valid claims, liens or encumbrances whatsoever. n527 It means a title free from all litigation, palpable defects, and grave doubts. It should consist of both legal and equitable titles, fairly deducible of record; n528 but the purchaser will not be permitted to object to the title on account of the bare possibility that it will prove defective. n529 A defect which will excuse performance must be such as to cast a cloud on the title in the minds of reasonable persons. n530 "A good title means not merely a title valid in fact, but a marketable title, which can again be sold to a reasonable purchaser or mortgaged to a person of reasonable prudence as security for a loan of money. A purchaser will not generally be compelled to take a title when there is a defect in the record title which can be cured only by a resort to parol evidence." n531 In a contract to convey a good title, the word "good" comprehends all that the word "clear" does. n532 The term "clear title," as used in such contract, means that there are no encumbrances on the land. n533 An agreement to convey "in fee simple, clear

of all encumbrances whatsoever, by a good and sufficient warranty deed" requires conveyance of a good title in law, which means a good merchantable title. n534

It is the duty of vendors to tender to their vendees a safe title, and purchasers are never bound to accept a defective title in the absence of express agreement. A promise to convey such title is always implied in an executory contract for the sale of real estate, and purchasers are never bound to accept a defective title, unless they expressly stipulate to take such title, knowing its defects. n535 Where there was a failure to furnish title insurance as stipulated for in the contract, the purchaser was held not bound to perform the contract. n536 Likewise, a failure to furnish an abstract showing a clear title as provided in the contract will absolve the purchaser from performance thereof. n537 A purchaser is not compelled to take property, the possession of which the purchaser may be obliged to defend by litigation. n538

Title to a whole tract will not suffice if title to any part of it is bad. n539 It is the condition of the title at the time fixed for performance which determines the rights of the parties. A vendor may not have title at the time of the contract and yet will fulfil the obligation if title is held at the time of closing. n540 Where the time to perform is indefinite, it is sometimes held that the vendor will be given a reasonable time to perform after the time is fixed and definite. n541 The purchaser is not obligated to advance money to the vendor to enable the vendor to secure title. n542 The contract may give the vendor a reasonable time in which to cure defects, n543 and it may obligate the vendor to furnish an abstract showing good title, which will constitute a condition precedent to payment of the purchase money. n544

In order to entitle a vendor to the equitable relief of specific performance, he must tender to the vendee a marketable title by a conveyance containing the usual covenants, unless the contract provides otherwise. n545 Equity will not compel a purchaser to accept a doubtful title. n546 The title of the vendor of land must be marketable although the contract does not so stipulate. Such a condition is implied in all contracts for sale of real property. n547

The purchaser, before being required to pay the purchase price, is entitled, unless stipulated to the contrary, to receive a marketable title, n548 a title that is fairly deducible of record and not depending on matters resting in parol, n549 but it is said that a "marketable title" is not necessarily one that can be fully established merely by recourse to the public records. n550

The purchaser may enforce rescission where the vendor is unable or unwilling to perform his contract to convey a merchantable title. n551 The purchaser also may rescind for failure of title to a portion of the land covered by the contract. n552 Where a contract for the sale of realty is executory on both sides, a failure of title is a failure of consideration, and a rescission of the contract may be had and the consideration recovered, but the vendee must restore the possession and the estate of the vendor. n553 This rule applies to a contract for the exchange of land. n554 On refusal of the vendor to deliver a deed according to the terms of the contract, the vendee may sue for rescission and the recovery of the purchase price already paid in. n555 Where a vendor is unable to convey good title within the time stipulated in his contract, the purchaser may rescind without tendering the remainder of the unpaid purchase money, n556 and it is immaterial that the vendor believed the vendor had a good title. n557 A purchaser will not be denied the right to rescind a contract because of the falsity of the vendor's representation that the title was good, or by the fact that by the lapse of time the title has become good. n558 It has been held, however, that equity will refuse a purchaser relief if the defects of which the purchaser complains might with reasonable diligence have been discovered prior to the execution of the contract. n559 The prevailing rule in this country is that in a sale of real estate the vendor is bound to disclose any defect in the title to or encumbrance on the property sold, known to the vendor and not known to the purchaser, and that failure so to do will render the contract voidable at the vendee's option. n560 This has been held to be true even though the encumbrance is of record. n561 In the absence of fraud, an executed sale of real estate will not be rescinded for failure of title, but the purchaser's remedy then is an action on the covenants of the deed. n562 Time fixed for the performance of such contract is generally of the essence thereof, and a long delay in offering a marketable title agreed to be purchased warrants the purchaser in rescinding the contract; n563 but rescission will not be decreed unless facts are pleaded showing why the vendor will not be able to perform when the time for performance arrives. n564 The failure of title that will warrant rescission is the failure of title at the time the contract is to be performed. The

seller has until that time, or a reasonable time thereafter, to make the title good. n565 Ordinarily, there will be no case for rescission for a partial failure of title which does not materially take away the enjoyment, and which can be compensated in damages. n566 Expressions of opinion as to the sufficiency of the title, when the means of information on the subject are accessible to the purchaser, do not ordinarily amount to deceit. n567

The vendor must furnish the exact title called for by the contract. n568 In an action by the vendor for specific performance, the defendant must point out defects relied upon to defeat the action. n569 Where the title is good, specific performance will be decreed although the abstract through oversight failed to show clear title. n570 In a case where the vendor's title was through one described as "agent," specific performance was decreed where it appeared that such agent had an absolute fee-simple title. n571 Where there was a failure to furnish title insurance n572 or an abstract showing a clear title as stipulated in the contract, specific performance was denied. n573

A purchaser cannot be compelled to take a doubtful title, but will not be permitted to object to a title on account of a bare possibility that it will prove defective. n574 Where there is any doubt about the title being free from liens or encumbrances, the court will not decree a specific performance. Its validity must not rest upon some fact not before the court. n575 Specific performance will not be decreed even at the suit of the vendee, if it would compel the vendee to accept an imperfect title which was not in the contemplation of the parties when the contract was made. n576 The vendor must own the land at the time suit is brought or the relief will usually be denied. n577 Where the vendor's title rests on an indefeasible title under the statute of limitations, however, it has been held that equity may enter a decree in his favor enforcing specific performance of the contract. n578

Where the wife has a dower right, most courts permit the vendee to have specific performance plus abatement of the purchase price. n579 Where the wife may contract and convey without the husband's consent, the problem as to curtesy is handled the same as outstanding dower.

Where a defense of lack of marketability is raised based on title defects the action may be only between the parties, or the plaintiff may have made all holders of alleged outstanding interests parties in the nature of a quiet title action. The standard test of the sufficiency of the vendor's title to justify a decree of specific performance is its marketability. n580 The vendor cannot be forced to take action to clear the title. n581

Where a clause in a sales contract required that by accepting deed vendee acknowledged full performance of sales contract to deliver good title, vendee could not complain of an outstanding lease which was not discovered until after deed delivered. n582 It is not essential that the vendor actually have the legal title if the vendor has the certain means of procuring it, or can control it and have it conveyed to the purchaser and offers to do so. n583 Where a vendor has been acting in bad faith a court of equity may require the vendor to correct title defects so as to convey a marketable title. n584

If the vendor is the equitable owner of the property, is under contract to convey, and has the right to call for the legal title, the vendee may have specific performance of the contract. n585 Unless time is held to be of the essence, the vendor is allowed a reasonable time after the closing date in which to clear the title. n586

Many contracts now call for a marketable or an "insurable title." n587 If the contract calls for an insurable title, a title that is good but not insurable is insufficient. n588 An "insurable title" is one which the insurance company will insure without exceptions. n589

A vendor who cannot make out a clear and good title, cannot set up, in defense, the plaintiff's delay in payment, even though there is a stipulation that the contract shall be avoided if the payment is not made at the time. This is in accordance with the rule that a defendant cannot rely as a defense upon a breach which the defendant has caused. n590 Where a title defect or other defect exists and the extent of such defect can be measured in monetary terms, the courts will modify the contract to permit the vendee to pay the purchase price so reduced. n591 The vendee's failure to give

timely notice of defects is a waiver. n592 In order to rescind a contract because of defects in a title, the party must act promptly and within a reasonable time. n593 To justify rescission there must be a reasonable doubt as to the validity of the title, one which will cause a prudent person to hesitate to invest money. A mere possibility of a defect does not justify rescission. n594 Where a "perfect title" is called for the vendor must furnish a title free from litigation, palpable defects or grave doubts, and a legal and equitable title fairly deducible from the record. n595

A title is not marketable if it exposes the owner to the hazard of litigation. n596

Marketable title is decided as of date of closing. n597

Title which requires parol evidence to prove its validity is not marketable. n598

"Marketable title" is what a man of ordinary prudence would find sufficient. n599 Under one rule, if the vendor is able to pay off a lien out of the purchase money the title is not unmarketable. n600 There is contrary authority. n601 A third rule depends on contract. n602 Marketable title is one free from reasonable doubt. Mere possibility or suspicion of defect is not unmarketable. n603 The standard applied in marketability of title is not that the complainant must show a reasonable probability of litigation in order to have the title held unmarketable, but that the party asserting the validity of the title must show with reasonable certainty that litigation will not occur. n604 Some courts make the marketability problem depend upon whether the action is at law or in equitity, refusing specific performance where the title has reasonable doubt, but on the law side requiring a showing that the title is bad. n605

The problem of marketable title has been ameliorated in a few states through the passage of so-called "marketable title" acts. These purport to terminate the existence of outstanding future interests and other title clouds after a period of time, usually limited to fifty years or less. Some statutes cut off all outstanding interests more than fifty years old if not rerecorded within a period of time, usually one year, after passage of the statute. n606 Two states have held unconstitutional at least parts of marketable title acts that destroy existing future interests not rerecorded within the time specified by the act. n607 Others have held such provisions constitutional. n608

Marketable title acts have the effect of converting defeasible fees, possibly even life estates, into fee simple absolutes. n609

State statutes on marketable title are limitations and cannot interfere with the relationship of trust and guardianship between the United States and Indians and cannot be enforced. n610

LEXIS: vendee! w/5 right! w/30 title w/5 inadequate or doubtful or unmarketable

§ 91.09(b) Marketable Title Acts and Other Curative Acts.

§ 91.09(b)(1) Curative Acts Generally.

Theoretically, obtaining assurance of good or marketable title is much facilitated by a reliable recording system in which one may examine all the essential conveyancing documents in the chain of title for a particular parcel of land. In fact, various small imperfections in every aspect of both conveyancing procedures and recording systems can, in their cumulative effect, render almost every title subject to some sort of defect, many of them only minor. In addition, certain types of future interests may be unlikely to ripen into possession, but remain matters of record, retarding the free marketability of the lands to which they apply.

Several types of state legislation have attempted to relieve these burdens on real property titles. The most basic of these enactments are statutes of limitations that bar actions to recover interests in land after relatively few years from the time

such rights arise. These provisions are most commonly manifested in situations of adverse possession, of which it has been said: "There is no doubt that adverse possession has cured millions of title defects; indeed, that is probably the main justification for the doctrine." n611

Another type of curative legislation is represented by provisions that declare certain real property-related documents valid and recordable despite minor defects in execution or contents. n612 Other acts cut off certain types of very old interests, such as reversionary interests and old mortgages (which may sometimes be foreclosed even if the underlying debt is barred by a statute of limitations).

Many states have enacted a variety of marketable record title acts, which effectively

> void most types of claims to land if they are not reflected in the records between the date of the "root of title" and a date some stated number of years later. The root of title is defined as the most recent deed or other title transaction recorded in an unbroken chain of title at least some specified number of years in the past--typically 20 to 40 years. For example, if the statute specified 30 years and a search were being made in 1985, a deed recorded in 1960 could not be the root of title, but one recorded in 1950 could be. If there were no exceptions to the coverage of the acts, it would be entirely unnecessary to search earlier than the root of title, since nothing found there could affect the present title. n613

The effectiveness of these acts in clearing land titles tends to be compromised by a number of standard and nonstandard special interest exceptions. n614

§ 91.09(b)(2) The Uniform Marketable Title Act.

The Uniform Marketable Title Act was originally promulgated by the National Conference of Commissioners on Uniform State Laws as part of the Uniform Simplification of Land Transfers Act in 1977. It was approved as a separate act in 1990. The drafters have described the main features of this act as follows:

> The basic idea of the Marketable Title Act is to codify the venerable New England tradition of conducting title searches back not to the original creation of title, but for a reasonable period only. The Model Act is designed to assure a title searcher who has found a chain of title starting with a document at least 30 years old that he need search no further back in the record.
>
> Provisions for rerecording and for protection of persons using or occupying land are designed to prevent the possibility of fraudulent use of the marketable record title rules to oust true owners of property.
>
> The most controversial issue with respect to marketable title legislation is whether or not an exception should be made for mineral rights. This Act follows the Model Act in making no such exception. Any major exception largely defeats the purpose of marketable title legislation, by forcing the title examiner to search back for an indefinite period for claims falling under the exception. n615

The text of the Uniform Marketable Title Act is as follows:

UNIFORM MARKETABLE TITLE ACT

1990 ACT n616

§ 1. Definitions.

§ 2. Notice; Knowledge; Giving Notice; Receipt of Notice.

§ 3. Marketable Record Title.

§ 4. Matters to Which Marketable Record Title is Subject.

§ 5. Interests Extinguished by Marketable Record Title.

§ 6. Effect Upon Marketable Record Title of Recording Notice of Intent to Preserve an Interest.

§ 7. Interests Not Barred by [Act].

§ 8. Effect of Contractual Liability as to Interests Antedating Root of Title.

§ 9. Limitations of Actions.

§ 10. Abandonment in Fact.

§ 11. Effect of Indefinite Reference in Recorded Instrument.

§ 12. Uniformity of Application and Construction.

§ 13. Short Title.

§ 14. Severability.

§ 15. Time of Taking Effect, Provisions for Transition.

§ 1. Definitions.

In this [Act], unless the context otherwise requires:

"Conveyance" means a transfer of real estate other than by will or operation of law.

(2) "Document" means a writing, plat, or map, and includes information in electronic, mechanical, or magnetic storage; microfilm; electronic data transmission signals; and other media that can be converted into a legible writing, plat, or map by a machine or device.

(3) "Effective date of root of title" means the date on which the root of title is recorded.

(4) "Law" includes statutes, case law, administrative actions, and legislative acts of local governments.

(5) "Marketable record title" means a title of record, complying with Section 3, that operates to extinguish interests and claims existing before the effective date of the root of title, as provided in Section 5.

(6) "Person" means an individual, corporation, business trust, estate, trust, partnership, association,

joint venture, government, governmental subdivision or agency, or other legal or commercial entity. [In the case of a land trust, however, the term means the beneficiary of the trust rather than the trust or the trustee.]

(7) "Real estate" means an estate or interest in, over, or under land, including minerals, structures, fixtures, and other things that by custom, usage, or law pass with a conveyance of land though not described or mentioned in the contract of sale or instrument of conveyance and, if appropriate to the context, the land in which the interest is claimed. The term includes rents and the interest of a landlord or tenant.

(8) "Record," used as a verb, means to present to the recording officer for the place in which the land is situated a document that the recording officer accepts and either enters in a daily log or notes thereon an identifying number, whether or not under applicable law the recording officer is directed to file the document or otherwise to maintain a record of it. "Recorded" and "recording" have corresponding meanings.

(9) "Record chain of title" means the series of recorded documents creating or evidencing rights of the successive holders of title to real estate.

(10) "Record location" means the location by book and page, document number, electronic retrieval code, or other specific place of a document in the public records accessible in the same recording office in this State where the document containing the reference to the location is found.

(11) "Recording office" means [].

(12) "Records" includes probate and other official records available in the recording office.

(13) "Restriction" means a covenant, condition, easement, or other limitation created by agreement, grant, or implication affecting the use or enjoyment of real estate, but does not include a security interest or lien.

(14) "Root of title" means a conveyance or other title transaction, whether or not it is a nullity, in the record chain of title of a person, purporting to create or containing language sufficient to transfer the interest claimed by that person, upon which that person relies as a basis for marketability of title, and which was the most recent to be recorded as of a date 30 years before the time marketability is being determined.

(15) "Signed" includes the use of a symbol executed or adopted by a party with present intention to authenticate a writing.

(16) "Title" means the right to an interest in real estate, including the interest of an owner, lessee, possessor, lienor, holder of a security interest, and beneficiary of a restriction including an owner of an easement.

(17) "Title transaction" means a transaction purporting to affect title to real estate, including title by will or descent, by tax deed, by trustee's, referee's, guardian's, executor's, administrator's, master in chancery's, or sheriff's deed, by decree of a court, by warranty deed, by quitclaim deed, and by a security interest.

(18) "Utility easement" means an easement (i) of way for a railroad, subway, street railway, or trolley bus line; (ii) for the transmission line for the transmission of electricity, electronic communications, water, oil, gas, or other goods; (iii) for sewerage or drainage; or (iv) for similar utility

uses.

(19) "Writing" includes printing; typewriting; electronic, mechanical, or magnetic storage; microfilm; electronic data transmission signals; and any other intentional reduction of language to tangible form that can be converted into legible form by a machine or device.

§ 2. Notice; Knowledge; Giving Notice; Receipt of Notice.

(a) A person has notice of a fact if:

(1) the person has actual knowledge of it;

(2) the person has received a notice of it; or

(3) from all the facts and circumstances known to the person at the time in question that person has reason to know it exists.

(b) Except as provided in subsection (e), a person has knowledge or learns of a fact or knows or discovers a fact only when the person has actual knowledge of it.

(c) A person notifies or gives or sends notice to another, whether or not the other person actually comes to know of it, by taking steps reasonably required to inform the other in ordinary course, but if this [Act] specifies particular steps to be taken to notify or to give or send notice, those steps must be taken.

(d) A person receives a notice at the time it:

(1) comes to the person's attention; or

(2) is delivered at the place of business through which the person conducted the transaction with respect to which the notice is given or at any other place held out by the person as the place for receipt of the communication.

(e) Notice, or knowledge of a notice, received by a person is effective for a particular transaction at the earlier of the time it comes to the attention of the individual conducting the transaction or the time it would have come to the individual's attention had the person maintained reasonable routines for communicating significant information to the individual conducting the transaction and had there been reasonable compliance with the routines. Reasonable compliance does not require an individual acting for the person to communicate information unless the communication is part of the individual's regular duties or the individual has reason to know of the transaction and that the transaction would be materially affected by the information.

§ 3. Marketable Record Title.

(a) A person who has an unbroken record chain of title to real estate for 30 years or more has a marketable record title to the real estate, subject only to the matters stated in Section 4.

(b) A person has an unbroken chain of title if the official public records disclose a conveyance, or other title transaction, of record not less than 30 years before the time marketability is determined, and the conveyance or other title transaction, whether or not it was a nullity, purports to create the interest in or contains language sufficient to transfer the interest to:

(1) the person claiming the interest; or

(2) some other person from whom, by one or more conveyances or other title transactions of record, the purported interest has become vested in the person claiming the interest.

(c) If anything appears of record, in either case described in subsection (b), purporting to divest the claimant of the purported interest, the chain of title is broken.

§ 4. Matters to Which Marketable Record Title Is Subject.

The marketable record title is subject to:

(1) all interests and defects that are apparent in the root of title or inherent in the other muniments of which the chain of record title is formed, but a general reference in a muniment to an easement, restriction, encumbrance, or other interest created before the effective date of the root of title is not sufficient to preserve it unless a reference by record location is made in the muniment to a recorded title transaction that created the easement, restriction, encumbrance, or other interest;

(2) all interests preserved by the recording of proper notice of intent to preserve an interest;

(3) all interests arising out of title transactions recorded after the effective date of the root of title, and which have not been previously extinguished; [and]

(4) all interests preserved under Section 7 [; and][.]

[(5) all interests preserved by the [Torrens Title Act].]

§ 5. Interests Extinguished by Marketable Record Title.

(a) In this section, "person dealing with the real estate" includes a purchaser of real estate, the taker of a security interest, a levying or attaching creditor, a real estate contract vendee, or another person seeking to acquire an estate or interest therein, or impose a lien thereon.

(b) Subject to Section 4, a marketable record title is held by its owner and is taken by a person dealing with the real estate free and clear of all interests, claims, and charges, the existence of which depends upon an act, transaction, event, or omission that occurred before the effective date of the root of title. All interests, claims, or charges, however denominated, whether legal or equitable, present or future, whether the interests, claims, or charges are asserted by a person who is or is not under a disability, whether the person is within or without the state, whether the person is an individual or an organization, or is private or governmental, are null and void.

(c) Recording an interest after the effective date of the root of title does not revive an interest previously extinguished.

§ 6. Effect Upon Marketable Record Title of Recording Notice of Intent to Preserve an Interest.

(a) A person claiming an interest in real estate may preserve and keep the interest, if any, effective by recording during the 30-year period immediately following the effective date of the root of title of the person who would otherwise obtain marketable record title, a notice of intent to preserve the interest. Disability or lack of knowledge of any kind on the part of anyone does not suspend the running of the 30-year period. The notice may be recorded by the claimant or by another person acting on behalf of a claimant who is:

(1) under a disability;

(2) unable to assert a claim on his [or her] own behalf; or

(3) one of a class, but whose identity cannot be established or is uncertain at the time of recording the notice of intent to preserve the interest.

(b) The notice must:

(1) state the name of the person claiming to be the owner of the interest to be preserved;

(2) contain a reference by record location to a recorded document creating, reserving, or evidencing the interest to be preserved or a judgment confirming the interest;

(3) be signed by or on behalf of the person claiming to be the owner of the interest; and

(4) state whether the person signing claims to be the owner or to be acting on behalf of the owner.

(c) A notice recorded to preserve a utility easement claimed in the real estate of another may include a map incorporating the claim.

§ 7. Interests not Barred by [Act].

This [Act] does not bar:

(1) a restriction the existence of which is clearly observable by physical evidence of its use;

(2) a use or occupancy inconsistent with the marketable record title, to the extent that the use or occupancy would have been revealed by reasonable inspection or inquiry;

(3) rights of a person in whose name the real estate or an interest therein was carried on the real property tax rolls within three years before marketability is to be determined, if the relevant tax rolls are accessible to the public when marketability is to be determined; [and]

(4) a claim of the United States not subjected by federal law to the recording requirements of this State and which has not terminated under federal law[; and] [.]

[(5) oil, gas, sulphur, coal, and all other mineral interests, whether similar or dissimilar to those minerals specifically named.]

§ 8. Effect of Contractual Liability as to Interests Antedating Root of Title.

This [Act] does not relieve a person of contractual liability with respect to an interest antedating the person's root of title to which the person has agreed to be subject by reason of the provision of a deed or contract to which the person is a party, but a person under contractual liability may create a marketable record title in a transferee not otherwise subjected to the interest antedating root of title by this [Act].

§ 9. Limitations of Actions.

This [Act] does not extend the period for bringing an action or for doing any other required act under a statute of limitations.

§ 10. Abandonment in Fact.

This [Act] does not preclude a court from determining that an interest has been abandoned in fact, whether before or after a notice of intent to preserve it has been recorded.

§ 11. Effect of Indefinite Reference in Recorded Instrument.

(a) Unless a reference in a document is a reference to another document by its record location, a person by reason of the reference is not charged with knowledge of the document or an adverse claim founded on it, and the document is not in the record chain of title by reason of the reference to it.

(b) References that are not to a record location and are too indefinite to charge a person with knowledge of an interest or to bring the document within the record chain of title include:

(1) "subject to the terms of a deed dated July 4, 1976, from A to B;"

(2) "subject to a mortgage from A to B;"

(3) "subject to existing encumbrances;"

(4) "subject to easements of record;"

(5) "subject to mortgages of record;" and

(6) "excepting so much of the described premises as I have heretofore conveyed."

(c) This section does not prevent an indefinite reference from constituting a waiver or exception or from being taken into account in determining the existence of:

(1) a contractual obligation or condition between the immediate parties to the document in which the reference occurs; or

(2) a negation of a warranty of title.

This section does not limit the effect of recording a memorandum of lease or other document the recording of which is permitted by law.

§ 12. Uniformity of Application and Construction.

This [Act] shall be applied and construed to effectuate its general purpose to make uniform the law with respect to the subject of this [Act] among states enacting it.

§ 13. Short Title.

This [Act] may be cited as the Uniform Marketable Title Act.

§ 14. Severability.

If any provision of this [Act] or its application to any person or circumstance is held invalid, the invalidity does not affect other provisions or applications of this [Act] which can be given effect without the invalid provision or application, and to this end the provisions of this [Act] are severable.

§ 15. Time of Taking Effect, Provisions for Transition.

(a) Except as otherwise provided in this section, this [Act] takes effect at 12:01 a.m. on [].

(b) If a period of limitation specified in this [Act] would result in prohibiting commencement of a judicial proceeding before the effective date of this [Act] or within two years after its effective date, the period during which the proceeding may be brought is extended until two years have expired after the effective date, but only if the period would have continued to run under the former law until after the effective date. In all other cases the period of limitation is that specified in this [Act].

(c) A person who claims an interest that would be extinguished under this [Act] may preserve the interest by recording a notice of intent to preserve the interest within two years the effective date of this [Act]. The notice has the effect provided in Section 6.

(n42)Footnote 324. *Contrast, Barger v. Gery, 53 A. 483 (N.J. Eq. 1902),* holding to the limited rule, with *Fahy v. Cavanagh, 44 A. 154 (N.J. 1899),* where the court stated: "That titles must be held marketable, although dependent on the proofs of facts, cannot be disputed. If this were not so, a vendor holding title as heir or devisee, in a large number of cases, could not have the remedy of specific performance." When the authorities speak of the hazard of litigation to which the purchaser must not be subjected, it seems to me that they must refer to a hazard which is to be determined by the chance of successful attack as viewed by the court in the suit for specific performance. When, also, they speak of a doubt or a supposed flaw as affecting the salability of a title, they must refer to the character of the doubt or flaw as the court views it, and not as it may be viewed by the intermediate judgment of the real estate market. Some purchasers, guided by cautious counsel, will not accept a title against which the slightest possibility of doubt is suggested; and yet there is no title concerning which a possible doubt or the possibility of a future flaw cannot be raised.

> "The authorities, I think, establish the rule as a safe one that a title dependent on a fact must be regarded as marketable when (1) the fact is so conclusively proved in the suit for specific performance that a verdict against the existence of the fact would not be allowed to stand in a court of law, and (2) where there is no reasonable ground for apprehending that the same fact cannot be, in like manner, proved, if necessary, at any time thereafter for the protection of the purchaser."

In the case of marketable title the idem sonans rule must be such as to preclude questions of identity. *Douglass v. Ransom, 237 N.W. 260 (Wis. 1931).*

(n324)Footnote 606. Michigan has a 20-year statute concerning oil and gas leases, Mich. Comp. Laws § 554.281, similar to the 40-year marketable title act, Mich. Comp. Laws § 565.101

The Marketable Record Title Act does not extinguish interests that have been properly recorded or easements or servitudes as long as they are used. Fla. Stat. § 712.03, as amended by Laws 1973, No. 73-218.

Kansas has adopted a 40-year marketable record title act. Kan. Stat. Ann. §§ 58-3401 through 58-3412.

Thirty-year bar to rights of reentry and possibilities of reverter. Md. Real Prop. Code Ann. § 6-101.

North Carolina has adopted a 30-year marketable title act with numerous exceptions. N.C. Gen. Stat. §§ 47B-1 -

47B-9. *See 10 Wake Forest L. Rev. 312.*

Ohio has a 40-year marketable title act. Ohio Rev. Code § 5301:49 (A). In Ohio, coal and other mineral interests are, under the 1952 act, effective September 30, 1974, exempted from the provisions of the 40-year marketable title act (§§ 5301.47 - 5301.56). Ohio Rev. Code § 5301.53.

In Wisconsin restrictive covenants existing within a city block and existing for more than 30 years are voided if 75% or more of the area has not been developed as allowed by the restrictions. Wis. Stat.§ 847.03. Marketable title act cannot be applied retrospectively except where the savings clause is included. *Trustees of Tufts College v. Triple R. Ranch, Inc., 275 So. 2d 521 (Fla. 1973); Williston Highlands Dev. Corp. v. Hogue, 277 So. 2d 260 (Fla. 1973). See* Fla. Stat. § 704.05 (mining claims). The marketable record title act is valid. *Marshall v. Hollywood, Inc., 236 So. 2d 114 (Fla. 1970). See* Fla. Stat. §§ 712.01 - 712.10.

Rev. 647 (1972);* Polstone, Ronald W., *Legislation, Existing and Proposed, Concerning Marketability of Mineral Titles, 7 Land & Water L. Rev. 73 (1972); Remedial Title Legislation for Wyoming, 7 Land & Water L. Rev. 561 (1972); Retroactive Termination of Interests in Land--Nebraska Reverter Act Held Constitutional [Hiddleston v. Nebraska Jewish Educ. Soc'y, 186 N.W.2d 904 (Neb. 1971)] 38 Mo. L. Rev. 140,* Ryman, Arthur E., Jr., *The Iowa "Stale Uses and Reversions Statute": Parameters and Constitutional Limitations, 19 Drake L. Rev. 56 (1969); The Mechanics of Iowa's Marketable Title Legislation, 22 Drake L. Rev. 326 (1973). See* Iowa Code § 614.17.

See Okla Stat. Ann., tit. 16 §§ 71 - 81.

See Property Law--North Carolina's Marketable Title Act--Will the Exceptions Swallow the Rule? *52 N.C. L. Rev. 211 (1983).*

The Georgia Marketable Title Act limits the enforceability of restrictive covenants to 20 years. *House v. James, 207 S.E.2d 201 (Ga. 1974).*

Under N.C. Gen. Stat. § 47-18, as amended, the conveyances or contracts to convey or options to lease for more than three years are valid as against creditors for purchasers for valuable consideration, only from the time of the registration thereof in the county where the land lies.

North Carolina has adopted the Marketable Title Act. N.C. Gen. Stat. § 47-B *et seq*.

Ohio has a Marketable Title Act. Ohio Rev. Code § 5301.47 *et seq.*

Vermont has a Marketable Record Title Act. Vt. Stat. Ann., tit. 27, § 601 *et seq.*

Attempted conveyance of fee held a "root of title" under *Marketable Title Act. ITT Rayonier, Inc. v. Wadsworth, 346 So. 2d 1004 (Fla. 1977).*

Marketable Title Act had no effect on reversions which had occurred before passage. *Caldwell v. Brown, 553 S.W.2d*

692 (Ky. 1977).

Conveyances by the state more than 30 years old vest absolute title where the state has made no effort to correct erroneous deeds. *Starnes v. Marcom Inv. Group, 571 F.2d 1369 (5th Cir. 1978).*

Connecticut has a 40-year marketable title act. Conn. Gen. Stat. § 47-33 *et seq.*

South Dakota has a marketable title act. S.D. Comp. Laws. Ann. § 43-30-1 *et seq.* This includes unrecorded mineral interests. S.D. Comp. Laws § 43-80-8.1. Utah has a 40-year marketable title act. Utah Code §§ 57-9-1 *et seq.* Railroad easements are not barred. *Boise Cascade Corp. v. Union P. Co., 454 F. Supp. 531 (D. Utah 1978).*

Wyoming has a 40-year marketable title act. Wyo. Stat. Ann. § 34-10-101 *et seq*. Marketable title statute extinguished all remainder interests predating a certificate of title. *ITT Rayonier, Inc. v. Wadsworth, 346 So. 2d 1004 (Fla. 1977).*

Supp. To CHAPTER 91 TITLE AND MARKETABLE TITLE

11-91 Thompson on Real Property, Thomas Editions Supp. to § 91.02

Supp. to § 91.02 The Concept of Title.

Add to "§ 91.10 Bibliography" to chapter contents.
[Go To Main]

§ 91.02(a) Title and Possession. [Go To Main]

Add:

Strother v. Bootheel Rail Properties, Inc., 66 S.W.3d 751 (Mo. App. 2001) (when the holder of a perpetual easement abandons the easement, title to the fee is in the owner of the underlying land).

Add:

Lee v. Southern Telecom Co., 694 S.E.2d 125 (Ga. App.2010) (Possession alone is sufficient to bring an action in trespass); *Guiffrida v. Storico Dev., 876 N.Y.S.2d 793 (2009)* (A right to possession is sufficient to seek damages for conversion.)

§ 91.02(b) Title and Ownership. [Go To Main]

Add:

Besnilian v. Wilkinson, 25 P.3d 187 (Nev. 2001) (one spouse cannot transfer title to homestead property without the consent of the other spouse).

Koepp v. Holland, 2010 U.S. Dist. LEXIS 9606 (N.D.N.Y Feb. 4, 2010) (A continuous chain of title is evidence of property ownership.)

Add:

Poruba v. Poruba, 919 N.E.2d 1066 (Ill. App. 2009) (For purposes of partition, concurrent rights to possession are necessary for "co-ownership.")

§ 91.02(c) Title and Estate. [Go To Main]

Add:

Idaho v. United States, 533 U.S. 262 (2001) (the state does not have title to lands submerged by lake and river within the boundaries of the Indian reservation); *Roach v. Gwinnett County, 545 S.E.2d 912 (Ga. 2001)* (termination of life estate by condemnation leaves remainderman as exclusive title holder); *Cox v. F-S Prestress, Inc., 797 So.2d 839 (Miss. 2001)* (change in river course by avulsion does not affect title to land).

§ 91.02(d) The Concept of Marketable Title [Go To Main]

Add:

Mansur v. Muskopf, 977 A.2d 1041 (N.H. 2009) (Bona fide purchasers are obligated to investigate discrepancies in chain of title)

[Go To Main]

Add:

Sanders v. Brown, 571 S.E.2d 532 (Ga. App. 2002) (claim to title by adverse possession of land in dispute constituted slander of title); *Boaz v. Latson, 2003 Ga. App. LEXIS 319* (No. A02A1663, Mar. 7, 2003) (slander of title can arise from document prepared according to statutory requirements).

Pelc v. Berg, 893 N.Y.S.2d 404 (2009) (A pleading of special damages is required for a slander of title action.); *Glenn v. Dunlop, 2009 U.S. Dist. LEXIS 14912 (D.V.I. 2009)* (Plaintiff must prove pecuniary losses and provide evidence of actual and concrete damages, estimated in money and expressed in figures.); Manhattan Loft, LLC v. Mercury Liquors, Inc., *93 Cal. Rptr. 3d 457 (Cal. App. 2d Dist. 2009)* (Plaintiff must demonstrate actual pecuniary losses.)

[Go To Main]

Add:

In re Estate of Savich, 671 N.W.2d 746 (Minn. App. 2003) (quitclaim deeds conveying land to grantee, delivered after her death, were void).

Gargano v. Gargano, 2009 Mass. LCR LEXIS 10 (Mass. Land Ct. 2009) (A conveyance obtained by threats or fraud is voidable.)

Add:

Caruso v. Parkos, 262 Neb. 961, 637 N.W.2d 351 (Neb. 2002) (title acquired by deed that was properly delivered and not subject to undue influence).

Add:

Baker v. Lang, 2002 Cal. Unpub. LEXIS 7946 (No. A095695, Aug. 23, 2002) (title to real property passed to husband's girlfriend who used fictitious name of wife, as the intended recipient); *Behymer v. Six, 2002 Ohio App. LEXIS 6217* (No. CA02-006, Nov. 20, 2002) (title passed when deed presented for recording, not later when full purchase price received).

Szawicki v. Szawicki, 772 N.W.2d 110 (Neb. App. 2009) (A deed from husband to wife does not need to be signed by the wife to be valid.)

Supp. to § 91.06 Title by Forfeiture.

Add to "§ 91.10 Bibliography" to chapter contents.
[Go To Main]

§ 91.06(b) Title of Forfeiture of Property Held by Felons or Used in Committing Crimes. [Go To Main]

Add:

United States v. Hull, 606 F.3d 524 (8th Cir. Iowa 2010) (Property used, or intended to be used, in the commission of a crime is subject to forfeiture. Property need not be indispensible to the commission of the crime. A home used in the commission of a child pornography offense is subject to forfeiture.); *United States v. Herder, 594 F.3d 352 (4th Cir. 2010)* (Property that allows the commission of the crime to be less difficult or more or less free from obstruction or hindrance may be subject to forfeiture.)

Add:

United States v. Totaro (345 F.3d 989 (8th Cir. 2003) (wife's claim to property interest under RICO forfeiture provision).

§ 91.06(c) Title for Forfeiture for Other Landholder Misconduct. [Go To Main]

Add:

New Covenant Worship Center v. Wright, 601 S.E.2d 245 (N.C. App. 2004) (a deed from grantors who had never re-entered the property or terminated the precedent estate after obtaining the right to do so was ineffective to convey title).

Supp. To CHAPTER 91 TITLE AND MARKETABLE TITLE

11-91 Thompson on Real Property, Thomas Editions Supp. to § 91.07

Supp. to § 91.07 Title by Abandonment.

Add to "§ 91.10 Bibliography" to chapter contents.
[Go To Main]

Add:

Crystal Farms, Inc. v. Road Atlanta, LLC, 690 S.E.2d 666 (Ga. App. 2010) (Abandonment of an easement need not be evidenced by an affirmative act. Definite and intentional nonuse may suffice.)

Wiser v. Elliott, 209 P.3d 337 (Or. App. 2009) (Non-use alone is insufficient proof of abandonment.)

Grady v. Narragansett Elec. Co., 962 A.2d 34 (R.I. 2009) (There must be evidence of a decisive action by the holder of an easement demonstrating an unequivocal intent to abandon.)

Add:

Cragnolin v Gallagher, 892 N.Y.S.2d 197 (2010) (Failure to use or maintain only certain portions of an easement is not sufficient evidence of abandonment.); *Wiser v. Elliott, 209 P.3d 337 (Or. App. 2009)* (The change in the nature of use, i.e. from railroad to paved road, does not evidence the abandonment of an easement.)

Add:

McAdams v. Town of Barnard, 936 A.2d 1310 (Vt. 2007) (action to quiet title to lands upon state's discontinuance of roads).

Add:

Calhan Chamber of Commerce v. Town of Calhan, 166 P.3d 200 (Colo. App. 2007) (title to former railroad land reverts automatically to the town after abandonment by the railroad).

Timberlake, Inc. v. O'Brien, 902 N.E.2d 843 (Ind. App. 2009) (Upon abandonment of a railroad easement, the interest in the land reverts to the grantor.)

Add:

Stone v. U.S.D. 222, 77 P.3d 509 (Kan. App. 2004) (reversion of land to adjacent owners after abandonment by railroad).

Add:

Laughlin v. Nouveau Body & Tan, L.L.C. (In re Laughlin), 602 F.3d 417 (5th Cir. 2010) (In bankruptcy proceeding, a prepetition renunciation of interest is not a transfer of property.)

Supp. To CHAPTER 91 TITLE AND MARKETABLE TITLE

11-91 Thompson on Real Property, Thomas Editions Supp. to § 91.09

Supp. to § 91.09 Marketable Title.

Add to "§ 91.10 Bibliography" to chapter contents.
[Go To Main]

§ 91.09(a) The Common Law. [Go To Main]

§ 91.09(a)(1). Various Definitions of Marketable Title.

Add:

Legacy Development v. Liberatore, 886 N.Y.S.2d 275 (2009) (Marketable title is such that a reasonable and prudent person would ordinarily purchase the property.)

Add:

325 *Schermerhorn, LLC v. Nevins Realty Corp., 886 N.Y.S.2d 69 (2009)* (A marketable title is free from reasonable doubt but not from all doubt. Impairments and encumbrances affecting ownership and possession create marketability defects.)

Add:

Johnson v. Lambros, 147 P.3d 100 (Idaho App. 2006) (vendor has implied obligation to make a good faith effort to obtain a marketable title).

§ 91.09(a)(2) The Effect of Area Discrepancies on Marketability.

Add:

Holoubek v Romshek, 749 N.W.2d 901 (Neb. App. 2008) (purchasers entitled to rescind purchase agreement for vendors' failure to provide marketable title; neighbors claimed 27 feet of the land to be purchased).

§ 91.09(a)(3) Situations Making the Title Unmarketable.

Add:

Apple Valley Gardens Ass'n v. MacHutta, 763 N.W.2d 126 (Wis. 2009) (A condominium subject to a bylaw prohibiting the rental of the condominium is not considered unmarketable.)

After "are," add "no right of access, n. 392.1"

Add new note 392.1

Haines v. Old Republic Nat. Title Ins. Co., 178 P.3d 1086 (Wyo. 2008) .

Add:

Legacy Development v. Liberatore, 886 N.Y.S.2d 275 (2009) (Holding that an easement blocking one of several points of access to the property did not render title unmarketable, even if the blocked point of access would be landowner's preferred point of access.)

Add:

Cavagnaro v. Coldwell Banker Alfonso Realty, Inc., 995 So. 2d 754 (Miss. App. 2008) (vendors unable to provide marketable title because their driveway encroached on adjacent land).

Add:

Cavagnaro v. Coldwell Banker Alfonso Realty, Inc., 2008 Miss. App. LEXIS 108 (Miss. Ct. App. Feb. 19, 2008) (vendors unable to provide marketable title because of driveway encroachment).

Add:

Homeside Dev. Corp. v. Dassa Brill, LLC, 2006 NY Slip Op 1711 (N.Y. App. Div. 2006) (a deed restriction that the property be used for community rather than residential or commercial purposes did not render the title unmarketable).

Holoubek v. Romshek, 16 Neb. App. 677 (Neb. Ct. App. 2008) (marketability breached when it was revealed that the neighbors claimed the southernmost 27 feet of the land).

Add:

Gloucester Landing Associates Limited Partnership v. Gloucester Redevelopment Authority, 802 N.E.2d 1046 (Mass. App. 2004) (no mutual mistake of fact regarding whether owner held marketable title).

§ 91.09(a)(6) Vendee's Rights When the Vendee's Title is Inadequate.

Add:

Schaumberg v. Friedmann, 888 N.E.2d 963 (Mass. App. 2008) (various recoveries, including treble damages awarded against vendor who refused to provide marketable title).

§ 91.09(b) Marketable Title Acts and Other Curative Acts. [Go To Main]

§ 91.09(b)(1) Curative acts Generally

Add:

Blanton v. City of Pinellas Park, 854 So. 2d 729 (Fla. App. 2003) (a claim for a statutory way of necessity was subject to the limitations period in the state marketable record title act).

Add:

Irving v. Firehouse Associates, LLC, 898 A.2d 270 (Conn. App. 2006) (right of way not extinguished under state marketable title act); *Bitting v. Gray, 897 A.2d 25 (R.I. 2006)* (easement not extinguished by the state marketable title act); *Cupola Golf Course, Inc. v. Dooley, 898 A.2d 134 (Vt. 2006)* (real covenant enforcement not prevented by the state marketable title act).

Add:

Jackson v. Lee, 2009 Conn. Super. LEXIS 1344 (2009) (A general and vague reference of a "right of way" is insufficient to put a title searcher on notice according to the Marketable Title Act.)

Add:

King Associates, LLPv. Bechtler Development Corp., 632 S.E.2d 243 (N.C. App. 2006) (exception for railroad rights of way in state marketable title act).

Ung v. Koehler, *37 Cal. Rptr. 3d 311 (2005)* (Marketable Record Title Act time limit on enforcing liens did not apply to non-judicial foreclosure); *Pinkney v. Southwick Invs., L.L.C., 2005 Ohio 4167 (Ohio Ct. App. 2005)* (Nos. 85074, 85075, Ohio App., Aug. 11, 2005) (the Marketable Title Act was held to be not unconstitutional retroactive legislation).

Berger v. Riverwind Parking, LLP, 2003 Fla. App. LEXIS 2862 (No. 5D02-726, Mar. 7, 2003) (Marketable Record Titles to Real Property Act extinguished subdivision restrictions which were over 30 years old); *State v. Hess, 684 N.W.2d 414 (Minn. 2004)* (possibility of reverter extinguished by the state Marketable Title Act).

CHAPTER 92 RECORDING, REGISTRATION, AND SEARCH OF TITLE

11-92 Thompson on Real Property, Thomas Editions § 92.01

AUTHOR: Professor John L. McCormack School of Law Loyola University, Chicago

§ 92.01 Overview of Recording, Registration, and Search of Title.

Governmentally maintained land title record systems are used in many countries throughout the world. n1 These systems serve the dual and often conflicting purposes of providing security of ownership and facilitating transfer of real estate. Security of ownership means that title to real estate should not be diminished or lost except through either the consensual act of the owner or through some specific legal process, such as foreclosure, condemnation, or execution. Facility of transfer means that purchasers and certain other transferees should be able to acquire an interest in real estate promptly, inexpensively, and with assurance that the title is as indicated by the land title system records. These purposes may conflict. Measures that promote security of ownership may impair facility of transfer and vice versa. For example, a land title record system that protects good faith purchasers promotes facility of transfer, but at the expense of security of title, because the system may give the good faith purchaser's interest priority over a prior owner's title.

Public land title record systems may be classified as either recording or title registration systems. Under title registration systems the governmental entity that maintains the system affirms the existence or priority of registered interests in the real estate and the identities of their owners or claimants. Recording systems generally do not provide such affirmations. Instead, such systems provide notice or written evidence of claims which interested persons may use to assess priority or ownership. Under recording systems the governmental agency that maintains the system is only a record keeper. Land title record systems in actual use frequently have both title registration and recording characteristics. Some title registration systems generally affirm ownership or priority of most interests, but simply give notice of other possible interests or claims. Except for a few localities where the Torrens system of land title registration is used, land title record systems in the United States are recording systems. n2

American recording systems effectively promote security of ownership, usually at the cost of facility of transfer. There are two ways in which facility of transfer is inhibited under the American recording systems. First, searching and examining title in a recording system can be expensive and time-consuming. Because of the sorry state of the public records in many areas, searching for the information pertaining to a particular interest can be a lengthy and difficult process, a process that may have to be repeated every time the title is examined. Poorly organized or maintained public records have caused the wasteful duplication of these records by private entities (mainly abstracting and title insurance companies). n3 Examination of the assembled title information can also be time-consuming where the relevant amount of data is large. Inefficient duplication of effort occurs where identical data have to be reevaluated in subsequent

transactions involving the same interest. For example, a purchaser of a parcel of real estate may have to review all of the prior documents concerning that real estate. These same documents may have to be reevaluated every time an interest in the property is transferred.

Second, recording systems fail to serve facility of transfer because certain claims or interests may be valid even though a purchaser has no notice of them from the record or any other source. These "off the record risks" include the very serious possibility that the title or interest of the purported owner that is being searched and examined is completely void. n4

The perceived deficiencies of the recording system as a source of land title assurance to purchasers have stimulated voluminous commentary. n5 This commentary criticizes recording systems and proposes solutions to their problems. Some proposals to improve recording systems have been implemented, the most noteworthy of which are the marketable title acts currently in force in at least eighteen states. These acts attempt to promote facility of transfer by voiding old title claims not preserved under the act by a filing within a specified time period.

The most radical reform proposal made from time to time was to replace the American recording systems with a Torrens title registration system. There was great interest in Torrens title registration in the United States during the late 19th and early 20th centuries. Twenty states or territories enacted Torrens system enabling legislation during this time. Torrens, therefore, was a substantial success in enactment, but it was almost a total failure in implementation. Torrens enabling legislation was later repealed by many enacting states. Torrens is not used today in most of those jurisdictions that have not repealed the enabling legislation. Illinois, one of the jurisdictions with the most substantial use of Torrens, repealed its enabling legislation in 1991. n6

After the initial legislation was passed, interest in Torrens faded except for periods of renewed interest in the 1930s and 1970s. Currently, there appears to be a consensus among real estate lawyers and academics that there is no foreseeable prospect for implementation of Torrens or any other type of title registration system in the United States. n7

Developments in recent decades have helped make recording systems more effective in facilitating real estate transfer. These developments include the greatly increased use of title insurance and the greater availability of computers to maintain and manage land title records. While some lawyers and academics were devising improvements in the recording system, such as marketable title acts or proposing replacement of the system with Torrens, the title insurance industry was evolving. Title insurance is now the dominant method of title assurance in most urban areas of the United States and in the entire western portion of the nation. The services provided by the title insurance industry do much to remedy the inadequacies of the recording system as a source of title assurance. Some critics of the industry argue, however, that the cure comes at too great a cost to consumers. n8

Computers are causing a revolution in land title record management. In the 1960s, title insurance companies and governments used the growing access to mainframe computers to begin implementing computerized land title record systems. The tremendous decrease in the cost of acquiring and maintaining computer-based systems brought on by the advent of the low-cost microcomputer in the mid to late 1970s led to increased use of computerized land title records. In 1984, after years of study, the Province of Ontario, Canada, began implementation of an official computerized land title record system. n9 Unofficial systems currently used by some local governments and title insurance companies in the United States are similar. With computerization, title searches that consumed hours in manual records may be completed in minutes or seconds. A process called "imaging" allows documents to be scanned and stored electronically, enabling persons with access to retrieve them through modems and remote terminals. n10 Access to the records through remote terminals, where available, saves time and promotes efficiency. Computers are also used to prepare documentation required in real estate transactions. A number of providers sell software used in searching titles and preparing documentation. n11 It is generally agreed by persons in the real estate title services industry that computers substantially facilitate real estate transfer by accurately and efficiently producing documentation and by greatly increasing the speed and efficiency of title searches and examinations.

COMPUTER-ASSISTED RESEARCH:

In LEXIS, state codes may be searched for provisions dealing with recording, registration, and search of title. Using "title" as a search term is essential but problematic. The term "title" is also used in reference to titles for personal property, such as automobiles and boats, and as a popular name for state and federal legislation. When used without further qualifiers, "title" will retrieve the voluminous statutory references to those activities. To sharpen the search, "title" must be combined with other terms typically found in provisions dealing with titles to real property, such as record, register, land, real property, search, torrens, index, grantor, grantee, parcel identifier, marketable, curative, and notice. Even this search will miss miscellaneous provisions associated with titles to real property but not containing any of those terms, or the occasional isolated provision. Using the term "deed" rather than "title" in the search will miss those provisions associated with titles to real property that do not contain the term "title." For best results, the direct search of the code provisions should be combined with a search of the code's general index.

CHAPTER 92 RECORDING, REGISTRATION, AND SEARCH OF TITLE

11-92 Thompson on Real Property, Thomas Editions § 92.02

AUTHOR: Professor John L. McCormack School of Law Loyola University, Chicago

§ 92.02 Historical Background.

The American recording system has five basic characteristics:

(1) instruments are operative without recordation;

(2) recording instruments perfect the legal priority of transferees named in them;

(3) the entire texts of the instruments are copied into the record, not just summaries or memoranda of them;

(4) government does not evaluate the legal effect of recorded instruments; and

(5) instruments are not entitled to recordation unless they are acknowledged before public officials.

A system having all of these features was being used in Massachusetts Bay Colony by the mid-1600s. n12 This system had numerous antecedents in the North American colonies and in Europe. Direct influences on the Massachusetts system may have included the Dutch recording system, English borough and manorial recording customs, and various colonial record-keeping practices, primarily those used in the Plymouth and Massachusetts Bay Colonies.

By American colonial times, three different types of public land title records were used in Europe: n13

(1) Systems where parties to a transaction appeared before a public or quasi-public official and acknowledged the transaction, after which the official made a short note of the substance and effect of the transaction;

(2) Systems where instruments were either completely copied or a memorial of them was entered in the public record; and

(3) Systems where title was registered with largely conclusive effect and the act of registration was

necessary to give the transaction legal effect.

The system that eventually developed in the United States was a combination of the first two types.

Dutch institutions and practices probably influenced the development of the American recording system. n14 The earliest known record of a deed in what is now the United States is an original instrument written into a 1627 record book of Plymouth Colony. n15 The Dutch recording system had been in operation for many years when the Pilgrims who later settled Plymouth Colony arrived at Leyden in the Netherlands. n16 By the 1500s, the Dutch also required acknowledgment of land transfers before courts. n17 It seems reasonable to surmise that early New England real estate record keeping practices were Dutch influenced because of the sojourn of the Pilgrims in the Netherlands and the proximity of the Dutch in New Netherlands (later New York).

The English Statute of Enrollments n18 probably did not directly influence the early Massachusetts Recording Act. n19 The wording of the Statute differs substantially from that of the 1640 Massachusetts Bay Colony Ordinance. The ordinance provided:

> For avoyding all fraudulent conveyances, & that every man may know what estate or interest other men may have in any houses, land or other hereditaments they are to deale in, it is therefore ordered that after the end of this month no morgage, bargaine, sale, or graunt hearafter to bee made of any houses, lands, rents, or other hereditaments, shalbee of force against any other person except the graunter & his heires, unlesse the same bee recorded, as in hereafter expressed: And that no such bargain, sale, or graunt already made in way of morgage, where the graunter remaines in possession, shalbee of force against any other but the graunter or his heires, except the same shalbee entered, as is hereafter expressed, within one month after the end of this Courte, if the partye bee within this jurisdiction, or else within 3 months after hee shall returne. And if any such graunter, etc, being required by the grauntee, etc, to make an acknowledgment of any graunt, etc, by him made, shall refuse so to do, it shalbee in the power of any magistrate to send for the party so refuseing, & commit him to prison without baile or mayneprize, until he shall acknowledge the same.
>
> And the grauntee is to enter his caution with the recorder, & this shall save his interest in the meane time; & if it bee doubtfull whether it bee the deed or graunt of the party, hee shall be bound with surities to the next court, & the caution shall remaine good as aforesaid.
>
> And for the recording of all such bargaines, etc, it is further ordered, that there shalbee one appointed at Ipswich, for which Mr. Samuel Symonds is chosen for that Court to enter all such bargaines, sales, etc, of all lands, etc, within the jurisdiction of that Court; & Mr. Emmanuell Downing is chosen in like sort for the jurisdiction of the Court of Salem; & all the rest to bee entered by Mr. Stephen Winthrop, the recorder at Boston.
>
> And that it is not intended that the wholebargaine, sale, etc, shalbee entered, but only the names of the graunter and grauntee, the thing & the estate granted, & the date; and all such entryes shalbee certified to the recorder at Boston within 6 months yearely.
>
> And it is ordered that the fee for every such entry shalbee 6[d].
>
> And it is hereby declared, that this order shall not extend to any graunt made or to bee made by any township. n20

In contrast, the English Statute of Enrollments, provided, in part:

> Be it enacted ... That ... no manors, lands, tenements or other hereditaments, shall pass, alter or

> change from one to another ... by reason only of any bargain and sale thereof, except the same bargain and sale be made by writing indented sealed, and enrolled ... to the intent that every party that hath to do therewith, may resort and see the effect and tenor of every such writing so inrolled. n21

Later American recording acts were clearly influenced by the Statute of Enrollments. n22

The Massachusetts Bay Colony ordinance was amended in 1647 to require recordation of copies of the instruments rather than just memoranda of them. n23 Additionally, the amendment clarified that the statute applied only to conveyances where the grantor remained in possession. n24 This limitation on applicability remained in effect throughout the colonial period. n25

This early legislation was intended to prevent fraudulent conveyances of land and to publicize real estate ownership. n26 As recording systems evolved over the years, a broader purpose has emerged. Modern recording systems are aimed primarily at facilitating real estate transfer by protecting good faith purchasers who may have relied on the record as indicating the actual state of ownership.

COMPUTER-ASSISTED RESEARCH:

LEXIS: Statute of Enrollments w/50 title or deed

NOTE:
Many cases relevant to this section pre-date the earliest cases in the database.

FOOTNOTES:
(n1)Footnote 12. George L. Haskins, *The Beginnings of the Recording System in Massachusetts, 21 B.U. L. Rev. 281-83 (1941).* Mark DeWolfe Howe has shown that the Colonial Massachusetts recording act only applied to conveyances where the grantor remained in possession. Mark DeWolfe Howe, *The Recording of Deeds in the Colony of Massachusetts Bay, 28 B.U. L. Rev. 1 (1948).*

(n2)Footnote 13. Sir Ernest Dobson & V.L.O. Sheppard, Land Registration: 46 2d ed. 1964; Rudolph Huebner, A History of Germanic Private Law 219-21 (Francis S. Philbrick, trans., 1918).

(n3)Footnote 14. Professor Beale's conclusion that it was not probable that Pilgrim colonists were influenced by the Dutch system was based on his belief that the Dutch system was a title registration system, not a recording system. Joseph H. Beale, *The Origins of the System of Recording Deeds in America*, 19 the Green Bag 335, 338 (1907). As pointed out by Professor Haskins, an "unregistered" conveyance under the Dutch system was effective between the parties. "The deed, in other words, was clearly the instrument of transfer, and was fully as important as the act of registration--a fact which considerably narrows the gap between the Dutch practice and the system which was worked out at Plymouth." George L. Haskins, *The Beginnings of the Recording System in Massachusetts, 21 B.U. L. Rev. 281, 291 (1941).* Because of the use of "registration" to refer to both recording or title registration, is sometimes difficult to ascertain readily whether the system being referred to is one or the other. The difficulty may be exacerbated where the system is referred to in a foreign language in writings that are centuries old. The modern Dutch system is clearly recording, not title registration. "Although registration on the public registers is an indispensable requirement for an effective conveyance, on the other hand the fact that registration has taken place does not guarantee that the transferee has indeed become owner. This is called the *negatief stelsel (negative system)* which is known in common law countries as Registration of Deeds, as distinct from Registration of Title." W.M. Kleijn, *The Law of Property, in* Introduction to Dutch Law for Foreign Lawyers 86 (1978).

CHAPTER 92 RECORDING, REGISTRATION, AND SEARCH OF TITLE

11-92 Thompson on Real Property, Thomas Editions § 92.03

AUTHOR: Professor John L. McCormack School of Law Loyola University, Chicago

§ 92.03 Common-Law Priority Rules.

Recording acts or other statutes may apply to determine the priority of conflicting claims to real estate. For example, if O conveys to A and later purports to convey the same interest to B, B will have priority over A if B qualifies for protected party status under the applicable recording act. If no statute applies to determine priority, then priority is determined by common law rules. The basic common-law priority rule was "first in time, first in right." n27 However, in certain specific instances, there were exceptions to this basic rule. These exceptions resulted primarily from: (1) the law and equity dichotomy; and (2) the application of equitable doctrines, particularly the doctrine of good faith purchase. The common-law priority rules and exceptions may be summarized as follows:

> (1) Where the conflicting interests are legal claims, priority is determined by order of time, unless a prior claimant is estopped from asserting priority.
>
> (2) Where the conflicting interests are equitable claims, priority is determined by order of time, unless estoppel applies to subordinate a prior claimant or unless a subsequent equitable claimant becomes a good faith purchaser of the legal title (i.e., acquires the legal title without notice of the prior equitable interest and for a valuable consideration).
>
> (3) Where one claim is legal and the other is equitable, the legal claim will have priority: (a) if it is prior in time; or (b) if subsequent in time and it was purchased for a valuable consideration without notice of the prior equitable claim.

The development of these rules and exceptions was influenced by the former separation of law and equity. The law courts recognized and enforced only legal interests. Therefore, the priority problems addressed by law courts involved legal interests only and their priority was determined in order of time: "first in time, first in right." n28 Except where estoppel applied to subordinate a prior claimant, questions of good faith, notice, and payment of valuable consideration were immaterial when the law courts considered a priority problem. n29

Equity courts, on the other hand, recognized both types of interests and created exceptions to the "first in time, first in right" rule. Where the conflicting claims were purely equitable, the equity courts refused to follow the "first in time,

first in right" rule when the equities were unequal. n30 Where the conflict was between an equitable interest and a legal interest, the legal interest prevailed if it was prior in time. If the legal interest was subsequent in time, it was subordinate unless its holder was a good faith purchaser. In that event, the equity court declined to exercise jurisdiction, leaving the problem to the law courts, which solved it by refusing to recognize the validity of the prior equitable claim, thereby giving precedence to the legal interest. n31

Because law and equity have been merged in the United States for many years, the resolution of a priority problem should not be based on whether particular interests were historically considered legal or equitable interests. If the exceptions to the "first in time, first in right" rule are founded in policies that are presently sound, then the exceptions should apply regardless of whether the prior or subsequent interests are labelled "equitable" or "legal." In other words, if there are current policies that support giving priority to a subsequent purchaser without notice of an earlier interest, then priority should be given to that purchaser regardless of the historical label attached to the purchaser's claims. n32 Nevertheless, the refusal to give good faith purchasers of equitable claims priority over at least some previous conflicting interests still persists. For example, the interest of a subsequent good faith vendee, which is an equitable interest, is subject to prior equities; however, the interest of a subsequent good faith purchaser of legal title is not. n33

All other things being equal, assignment of priority to the prior or subsequent claimant should depend on whether security of ownership or facility of transfer is considered paramount. Favoring the prior claim promotes security of ownership, while favoring the subsequent good faith purchaser promotes facility of transfer. One reason for denying priority to a subsequent good faith purchaser of an equitable interest over earlier claims might be to promote predictability in law and stability of titles. The good faith purchase exception to the "first in time, first in right" rule of priority has been limited to legal title purchasers by long-established and followed authority. However, modern recording acts reflect a legislative policy judgment that security of ownership should yield to facility of transfer in cases of good faith purchase. Where recording acts are used to solve priority problems, it generally does not matter whether the conflicting interests are labelled "legal" or "equitable." Perhaps the common law should follow suit in priority cases where no statute applies.
