If an incentive payment is to be made immediately upon or at a specified interval after the achievement of a performance goal, any earlier payment must be appropriately discounted or it will be treated as a discretionary increase.ⁿ⁶⁴ Conversely, a delayed payment with interest at a reasonable rate--or with the earnings or losses from pre-determined investments of the principal amount payable according to the pre-determined formula--remains deductible if it otherwise meets the Section 162(m) requirements.ⁿ⁶⁵

Whether the conditions for payment of the compensation meet the requirements of Section 162(m) is determined on a grant-by-grant basis.ⁿ⁶⁶ To qualify for the Section 162(m) deduction, the incentive payment for which the executive is eligible for any given level of performance under the pre-defined performance goals the committee sets must be payable *only* if the specified goal is achieved; that is, the payment must be truly performance-based, with the committee having no discretion to increase the award and with no back-up plan (written, spoken or implied) to pay the compensation (or any part of it) in any event.ⁿ⁶⁷

[iv] Grants of Stock Options and Stock Appreciation Rights

An independent compensation committee's awards of at-the-money stock options or stock appreciation rights ("SARs") are considered inherently performance-based, since the executive does not realize any value under such instruments unless the price of the company's stock appreciates from the time of the grant. Values earned under options or SARs qualify for the Section 162(m) tax deduction as long as the plan specifies the maximum number of shares under options or of rights that may be granted during a specified period to any employee.ⁿ⁶⁸

The regulations are designed to penalize option (or SAR) cancellation and repricing by denying the Section 162(m) "qualified performance-base compensation" deduction to the extent that the total number of options awarded exceed the number authorized under the shareholder-approved plan, *after taking into account all cancelled options*, as well as other

options granted under the plan. Reductions in the exercise price after the initial grant are treated as cancellations and corresponding new grants. After-the-fact reductions in the base price of SARs are treated similarly.ⁿ⁶⁹

[d] Step III: Assessing Performance and Making the Awards

The final step in the process is for the compensation committee to "certify in writing prior to payment of the compensation that the performance goals and any other material terms were in fact satisfied."ⁿ⁷⁰ As a practical matter, the chief financial officer normally makes a presentation to the board of directors to review actual performance against the pre-established targets. The committee then adopts a resolution certifying that (or the extent to which) the targets were met. Approved committee minutes satisfy the certification requirement. For this purpose, the approved minutes of the compensation committee meeting in which the certification is made are treated as a written certification. Certification by the compensation committee is not required for compensation that is attributable solely to the increase in the value of the stock of the publicly held corporation.

[5] Procedures Related to the Stimulus Programs

The Stimulus Programs impose new responsibilities on the compensation committees of participating companies. While guidance remains forthcoming, compensation committees of participating companies must comply with the following requirements:

- (a) Compensation committee must be composed solely of independent directors;ⁿ⁷¹
- (b) The compensation committee must meet at least semi-annually to assess whether compensation arrangements for all employees encourage unnecessary and excessive risk-taking behavior (*i.e.*, whether compensation arrangements incentivize employees to take risks that are unhealthy for the company in order to earn the compensation in question);ⁿ⁷² and
- (c) The compensation committee must certify, in the Compensation Committee Report as required by the SEC, to be included in the company's annual proxy statement or annual report on Form 10-K filed with the SEC, that it has met with senior risk officials to make sure that compensation does not encourage senior executive officers to take unnecessary risks that threaten the value of the company.

LEXIS 307, *94 ; *see id.* at *94-*95 ("From a broad philosophical standpoint, that question is more complex than would appear, if only because (as the Chancellor and others have observed) 'issues of good faith are (to a certain degree) inseparably and necessarily intertwined with the duties of care and loyalty ... ' ... But, in the pragmatic, conduct-regulating legal realm which calls for more precise conceptual line drawing, the answer is that grossly negligent conduct, without more, does not and cannot constitute a breach of the fiduciary duty to act in good faith. The conduct that is the subject of due care may overlap with the conduct that comes within the rubric of good faith in a psychological sense, but from a legal standpoint those duties are and must remain quite distinct. Both our legislative history and our common law jurisprudence distinguish sharply between the duties to exercise due care and to act in good faith, and highly significant consequences flow from that distinction.") (emphasis added).

(n15)Footnote 15. In *In re Oracle Corp. Derivative Litig.*, 824 A.2d 917 (Del. Ch. 2003) , in finding that a special litigation committee (the "SLC") was not independent for purposes of dismissal of a shareholders' derivative action, Vice Chancellor Strine took into account a number of connections between the CEO of the defendant corporation and Stanford University, on the one hand; and between Stanford University and each of the otherwise independent members of the two-member SLC (both of whom were Stanford professors, including former SEC commissioner and current

Stanford law professor Joseph Grundfest), on the other hand. It remains to be seen whether the courts will extend this mode of analysis beyond the shareholder-derivative dismissal context but it seems virtually certain that the plaintiffs' bar will continue push for such an extension of the independence doctrine.

(n16)Footnote 16. *See, e.g.*, Report of the NACD Blue Ribbon Commission on Executive Compensation and the Role of the Compensation Committee 8 ("Board and committee members should resist the tendency to 'go along' for the sake of harmony or to simply rely on the precedents set by others. An effective group dynamic encourages members to speak their minds, examine assumptions, thoroughly discuss the issues, and arrive at appropriate decisions."), 16 ("Each member of the committee should have the resolve and skepticism to ask probing questions, to speak honestly, to set and adhere to necessary limits, to be an advocate for change when a current practice results in the wrong outcome, and to ask 'why'--and if necessary say 'no'--to questionable proposals.") (2003).

(n40)Footnote 40. See instruction 4 to item 402(b) of Regulation S-K, *17 CFR 229.402(b)*. In adopting the disclosure requirements, the SEC stated that companies' claims that disclosure of specific targets would cause competitive harm to them should be subject to the same standard that applies when companies request confidential treatment for material filed with the SEC. SEC Release Nos. 33-8732A, 34-54302A, "Executive Compensation and Related Person Disclosure," *71 Fed. Reg. 53158 (Sept. 8, 2006) at 53166-53167*. Such confidential treatment requests are made pursuant to Securities Act Rule 406 (17 CFR § 406) and Exchange Act Rule 24b-2 (*17 CFR § 240.24b-2*), which incorporate the criteria for non-disclosure under Exemption 4 of the Freedom of Information Act, *5 USC § 552(b)(4)*, and Rule 80(b)(4), *17 CFR 200.80(b)(4)* thereunder. In deciding to withhold information on executive compensation targets from the annual disclosure documents, registrants are not required to seek confidential treatment under such procedures if they determine that disclosure would cause competitive harm (but such decisions are subject to challenge by the SEC upon review of such documents).

(n41)Footnote 41. *26 CFR § 1.162.27(e)(4)(iii)(A)*.

(n42)Footnote 42. 26 CFR § 1.162-27(e)(2)(vi).

(n43)Footnote 43. See SEC Releases Nos. 34-48627 (Oct. 14, 2003) (NASDAQ), 34-48610 (Oct. 9, 2003) (Amex), 34-48108 (June 30, 2003) (NYSE & NASDAQ).

(n44)Footnote 44. 26 CFR § 1.162.27(e)(2)(v).

(n45)Footnote 45. In February 2008, in *IRS Revenue Ruling 2008-13*, the IRS clarified (and went back on its earlier position) that compensation cannot be performance-based if it is payable in the event of the covered employee's without cause/good reason termination or voluntary retirement without regard to whether the performance goal is achieved. However, the Revenue Ruling provides important transition relief. In particular, the IRS will not enforce its new position in the following circumstances: (i) the period of service to which the performance goals relate begins on or before January 1, 2009; or (ii) the compensation is paid pursuant to the terms of an employment agreement in effect on February 21, 2008 (without respect to future renewals or extensions, including renewals or extensions that occur automatically absent further action by the employee or the company).

(n46)Footnote 46. 26 CFR § 1.162.27(e)(4)(iv).

(n47)Footnote 47. 26 CFR § 1.162.27(e)(4)(iv).

(n48)Footnote 48. 26 CFR § 1.162.27(e)(4)(iv).

(n49)Footnote 49. 26 CFR § 1.162.27(e)(4)(vi).

(n50)Footnote 50. 26 CFR § 1.162.27(e)(2).

(n51)Footnote 51. See 26 CFR § 1.162.27(e)(2).

(n52)Footnote 52. 26 CFR § 1.162.27(e)(2).

(n53)Footnote 53. *Shaev v. Saper*, No. 02-2206, 2003 U.S. App. Lexis 3272, at *18 (3d Cir. Feb. 21, 2003) ("In the absence of special circumstances, such as when a new company is formed or when an established company changes its fiscal year in good faith, a performance period shorter than one year makes it much less likely that the ... [incentive plan in question] will meet" the Section 162(m) timing requirements.).

(n54)Footnote 54. This author would recommend getting it done by the end of the 22nd day so there is no room for doubt.

(n55)Footnote 55. 26 CFR § 1.162.27(e)(2)(vii), Example 2.

(n56)Footnote 56. 26 CFR § 1.162.27(e)(2)(vii), Example 3. Under the analysis of the substantial uncertainty requirement that some commentators have applied, a \$2 million bonus payable to a major car manufacturer if the company sells at least 1,000 cars should be regarded as substantially uncertain for purposes of Section 162(m). See Kevin J. Ryan, *Note: Rethinking Section 162(m)'s Limitation on the Deduction of Executive Compensation: A Review of the Commentary*, 15 Va. Tax Rev. 371, 386 (1995), citing Jack S. Levin, George B. Javaras, and William R. Welke, *Code Section 162(m)--\$ 1 Million Deduction Limit on Executive Compensation*, 63 Tax Notes 723 (May 9, 1994).

(n57)Footnote 57. 26 CFR § 1.162.27(e)(2)(i).

(n58)Footnote 58. See § 10.06[3][c][iii] below.

(n59)Footnote 59. See 26 CFR § 1.162.27(e)(2)(i) ("A performance goal is objective if a third party having knowledge of the relevant facts could determine whether the goal is met.").

(n60)Footnote 60. *26 CFR § 1.162.27(e)(2)(i)*. See also § 15.03[2][b] below, "Choosing the Right Performance Measure."

(n61)Footnote 61. *26 CFR § 1.162.27(e)(2)(ii)*.

(n62)Footnote 62. *26 CFR § 1.162.27(e)(2)(iii)(A)*.

(n63)Footnote 63. *26 CFR § 1.162.27(e)(2)(iii)(A)*.

(n64)Footnote 64. *26 CFR § 1.162.27(2)(iii)*.

(n65)Footnote 65. *26 CFR § 1.162.27(2)(iii)*.

(n66)Footnote 66. *26 CFR § 1.162.27(e)(2)(iv)*.

(n67)Footnote 67. *26 CFR § 1.162.27(e)(2)(v)*.

(n68)Footnote 68. *26 CFR § 1.162.27(e)(2)(vi)(A)*.

(n69)Footnote 69. *26 CFR § 1.162.27(e)(2)(vi)(B)*.

(n70)Footnote 70. *26 CFR § 1.162.27(e)(5)*.

(n71)Footnote 71. It remains unclear whether the independence standards of the SROs will be applied for purposes of the Stimulus Programs. Further, private companies who receive less than \$25 million may satisfy this condition by having the board of directors carry out this duty.

(n72)Footnote 72. A recent SEC proposed rule contemplates an amendment to Item 402 of Regulation S-K to require all companies to discuss and analyze in the Compensation Discussion and Analysis their overall compensation policies and practices for employees generally, including non-executive officers, if the risks arising from the incentives created by these policies and practices could have a material effect on the company as a whole. See SEC Release Nos. 33-9052.

* The authors gratefully acknowledge the assistance of Dina Bernstein, an associate at Gibson, Dunn & Crutcher, with the updates to this chapter.

Appendix 10-A: Sample Compensation Committee Charter

1-10-A Corporate Governance: Law and Practice [10-A]

[10-A] Sample Compensation Committee Charter

1. Members. The Board of Directors of _____ (the "Company") appoints a Compensation Committee of at least three members, consisting entirely of independent directors, and designates one member as chairperson. For purposes hereof, an "independent" director is a director who meets the New York Stock Exchange definition of "independence," as determined by the Board. Additionally, members of the Compensation Committee must qualify as "non-employee directors" for purposes of Rule 16b-3 under the Securities Exchange Act of 1934, as amended, and as "outside directors" for purposes of *Section 162(m) of the Internal Revenue Code*.

2. Purpose, Duties, and Responsibilities. The purpose of the Compensation Committee is to discharge the responsibilities of the Board relating to compensation of the Company's [senior] [executive] officers [and directors] and produce the annual report on executive compensation for inclusion in the Company's proxy statement. The duties and responsibilities of the Compensation Committee are to:

- (a) Oversee the Company's overall compensation structure, policies and programs, and assess whether the Company's compensation structure establishes appropriate incentives for management and employees.
- (b) Administer and make recommendations to the Board with respect to the Company's incentive-compensation and equity-based compensation plans.
- (c) Review and approve corporate goals and objectives relevant to the compensation of the Chief Executive Officer ("CEO"), evaluate the CEO's performance in light of those goals and objectives, and set the CEO's compensation level based on this evaluation.
- (d) Set the compensation of other [senior] [executive] officers based upon the recommendation of the CEO.
- (e) Approve stock option and other stock incentive awards for [senior] [executive] officers.
- (f) Review and approve the design of other benefit plans pertaining to [senior] [executive] officers.

- (g) Review and recommend employment agreements and severance arrangements for [senior] [executive] officers, including change-in-control provisions, plans or agreements.
 - (h) Approve, amend or modify the terms of any compensation or benefit plan that does not require shareholder approval.
 - (i) Monitor compliance by [senior] [executive] officers and directors with the Company's stock ownership guidelines. **[If the company has stock ownership guidelines]**
 - (j) Review the compensation of directors for service on the Board and its committees and recommend changes in compensation to the Board. **[This may be done by the Nominating/Governance Committee at some companies, in whole or in part]**
 - (k) Review periodically succession plans relating to positions held by senior [executive] officers, and make recommendations to the Board regarding the selection of individuals to fill these positions.
 - (l) Annually evaluate the performance of the Compensation Committee and the adequacy of the committee's charter.
 - (m) Perform such other duties and responsibilities as are consistent with the purpose of the Compensation Committee and as the Board or the committee deems appropriate.
3. Subcommittees. The Compensation Committee may delegate any of the foregoing duties and responsibilities to a subcommittee of the Compensation Committee consisting of not less than two members of the committee.
4. Outside advisors. The Compensation Committee will have the authority to retain [at the expense of the Company] such outside counsel, experts, and other advisors as it determines appropriate to assist it in the full performance of its functions, [including sole authority to retain and terminate any compensation consultant used to assist the committee in the evaluation of director, CEO or senior executive compensation, and to approve the consultant's fees and other retention terms]. [Note: this is a NYSE suggestion rather than a requirement]
5. Meetings. The Compensation Committee will meet as often as may be deemed necessary or appropriate, in its judgment, either in person or telephonically, and at such times and places as the Compensation Committee determines. The majority of the members of the Compensation Committee constitutes a quorum. The Compensation Committee will report regularly to the full Board with respect to its activities.

COMPENSATION COMMITTEE COMPLIANCE CHECKLISTn*

To be completed by the General Counsel or Corporate Secretary. n**

Check Yes or No; if No, explain.

1. Does the compensation committee have a written charter that meets the proposed listing standards of the New York Stock Exchange?

Yes _____

No _____

2. Is the compensation committee composed entirely of independent directors?

Yes _____

No _____

3. Do all members of the compensation committee meet:

a. U.S. Treasury requirements for independence under Section 162(m) of the tax code, stating that to be tax-deductible as a company expense, compensation of more than \$1 million must be awarded under a compensation plan approved by a compensation committee composed of independent directors, defined as persons who are not current employees, are not former employees who receive pay for prior services, are not

former officers of the company, and do not receive significant remuneration form the company, either directly or indirectly, in any capacity other than as a director?

See Section162(m) of the Internal Revenue Code.

b. New York Stock Exchange standard for independence (pertaining to audit, compensation, and governance committees for listed companies), which specifies, in part, that the director cannot be considered independent unless the board "affirmatively determines that the director has no material relationship with the listed company (either directly or as a partner, shareholder, or officer of an organization that has a material relationship with the company)"?

Yes _____

No _____

4. Does the compensation committee annually review and approve the company's goals and objectives for CEO compensation, executive officer compensation, and employment contracts?

See best practices as set forth in "Performance Evaluation of Chief Executive Officers, Boards, and Directors-Report of the NACD Blue Ribbon Commission."

Yes _____

No _____

5. Does the compensation committee, at least once a year, evaluate the CEO's performance in regard to these goals and objectives and then set the CEO's annual compensation, including salary, incentive compensation, and benefits?

Yes _____

No _____

6. Does the compensation committee review the company's incentive-compensation, employee benefit programs, and stock-based plans and, as needed, recommend changes in the plans to the board?

See pertinent regulations under the Employee Retirement Income Security Act of 1974 (ERISA).

Yes _____

No _____

7. Does the compensation committee prepare and publish, in the company's proxy statement, an annual executive compensation report that explains the reasons for its key compensation actions?

Yes _____

No _____

8. Does the compensation committee have the sole authority to retain (and approve fees and set terms for) compensation consultants as the committee deems appropriate?

Yes _____

No _____

9. Does the compensation committee annually conduct an evaluation of its performance and present it to the board?

Yes _____

No _____

10. Are all members of the compensation committee in compliance with the company's code of ethics?

Yes _____

No _____

§ 1.162-27 Certain employee remuneration in excess of \$1,000,000.

(a) Scope. This section provides rules for the application of the \$1 million deduction limit under *Section 162(m) of the Internal Revenue Code*. Paragraph (b) of this section provides the general rule limiting deductions under Section 162(m). Paragraph (c) of this section provides definitions of generally applicable terms. Paragraph (d) of this section provides an exception from the deduction limit for compensation payable on a commission basis. Paragraph (e) of this section provides an exception for qualified performance-based compensation. Paragraphs (f) and (g) of this section provide special rules for corporations that become publicly held corporations and payments that are subject to section 280G, respectively. Paragraph (h) of this section provides transition rules, including the rules for contracts that are grandfathered and not subject to Section 162(m). Paragraph (j) of this section contains the effective date provisions. For rules concerning the deductibility of compensation for services that are not covered by Section 162(m) and this section, see section 162(a)(1) and § 1.162-7. This section is not determinative as to whether compensation meets the requirements of section 162(a)(1).

(b) Limitation on deduction. Section 162(m) precludes a deduction under chapter 1 of the Internal Revenue Code by any publicly held corporation for compensation paid to any covered employee to the extent that the compensation for the taxable year exceeds \$1,000,000.

(c) Definitions -- (1) Publicly held corporation -- (i) General rule. A publicly held corporation means any corporation issuing any class of common equity securities required to be registered under section 12 of the Exchange Act. A corporation is not considered publicly held if the registration of its equity securities is voluntary. For purposes of this section, whether a corporation is publicly held is determined based solely on whether, as of the last day of its taxable year, the corporation is subject to the reporting obligations of section 12 of the Exchange Act.

(ii) Affiliated groups. A publicly held corporation includes an affiliated group of corporations, as defined in section 1504 (determined without regard to section 1504(b)). For purposes of this section, however, an affiliated group of corporations does not include any subsidiary that is itself a publicly held corporation. Such a publicly held subsidiary, and its subsidiaries (if any), are separately subject to this section. If a covered employee is paid compensation in a

taxable year by more than one member of an affiliated group, compensation paid by each member of the affiliated group is aggregated with compensation paid to the covered employee by all other members of the group. Any amount disallowed as a deduction by this section must be prorated among the payor corporations in proportion to the amount of compensation paid to the covered employee by each such corporation in the taxable year.

(2) Covered employee -- (i) General rule. A covered employee means any individual who, on the last day of the taxable year, is --

(A) The chief executive officer of the corporation or is acting in such capacity; or

(B) Among the four highest compensated officers (other than the chief executive officer).

(ii) Application of rules of the Securities and Exchange Commission. Whether an individual is the chief executive officer described in paragraph (c)(2)(i)(A) of this section or an officer described in paragraph (c)(2)(i)(B) of this section is determined pursuant to the executive compensation disclosure rules under the Exchange Act.

(3) Compensation -- (i) In general. For purposes of the deduction limitation described in paragraph (b) of this section, compensation means the aggregate amount allowable as a deduction under chapter 1 of the Internal Revenue Code for the taxable year (determined without regard to Section 162(m)) for remuneration for services performed by a covered employee, whether or not the services were performed during the taxable year.

(ii) Exceptions. Compensation does not include --

(A) Remuneration covered in section 3121(a)(5)(A) through section 3121(a)(5)(D) (concerning remuneration that is not treated as wages for purposes of the Federal Insurance Contributions Act); and

(B) Remuneration consisting of any benefit provided to or on behalf of an employee if, at the time the benefit is provided, it is reasonable to believe that the employee will be able to exclude it from gross income. In addition, compensation does not include salary reduction contributions described in section 3121(v)(1).

(4) Compensation Committee. The compensation committee means the committee of directors (including any subcommittee of directors) of the publicly held corporation that has the authority to establish and administer performance goals described in paragraph (e)(2) of this section, and to certify that performance goals are attained, as described in paragraph (e)(5) of this section. A committee of directors is not treated as failing to have the authority to establish performance goals merely because the goals are ratified by the board of directors of the publicly held corporation or, if applicable, any other committee of the board of directors. See paragraph (e)(3) of this section for rules concerning the composition of the compensation committee.

(5) Exchange Act. The Exchange Act means the Securities Exchange Act of 1934.

(6) Examples. This paragraph (c) may be illustrated by the following examples:

Example 1.

Corporation X is a publicly held corporation with a July 1 to June 30 fiscal year. For Corporation X's taxable year ending on June 30, 1995, Corporation X pays compensation of \$2,000,000 to A, an employee. However, A's compensation is not required to be reported to shareholders under the executive compensation disclosure rules of the Exchange Act because A is neither the chief executive officer nor one of the four highest compensated officers employed on the last day of the taxable year. A's compensation is not subject to the deduction limitation of paragraph (b) of this section.

Example 2.

C, a covered employee, performs services and receives compensation from Corporations X, Y, and Z, members of an affiliated group of corporations. Corporation X, the parent corporation, is a publicly held corporation. The total compensation paid to C from all affiliated group members is \$3,000,000 for the taxable year, of which Corporation X pays \$1,500,000; Corporation Y pays \$900,000; and Corporation Z pays \$600,000. Because the compensation paid by all affiliated group members is aggregated for purposes of Section 162(m), \$2,000,000 of the aggregate compensation paid is nondeductible. Corporations X, Y, and Z each are treated as paying a ratable portion of the nondeductible compensation. Thus, two thirds of each corporation's payment will be nondeductible. Corporation X has a nondeductible compensation expense of \$1,000,000 ($\$1,500,000 \times \$2,000,000 / \$3,000,000$). Corporation Y has a nondeductible compensation expense of \$600,000 ($\$900,000 \times \$2,000,000 / \$3,000,000$). Corporation Z has a nondeductible compensation expense of \$400,000 ($\$600,000 \times \$2,000,000 / \$3,000,000$).

Example 3.

Corporation W, a calendar year taxpayer, has total assets equal to or exceeding \$5 million and a class of equity security held of record by 500 or more persons on December 31, 1994. However, under the Exchange Act, Corporation W is not required to file a registration statement with respect to that security until April 30, 1995. Thus, Corporation W is not a publicly held corporation on December 31, 1994, but is a publicly held corporation on December 31, 1995.

Example 4.

The facts are the same as in Example 3, except that on December 15, 1996, Corporation W files with the Securities and Exchange Commission to disclose that Corporation W is no longer required to be registered under section 12 of the Exchange Act and to terminate its registration of securities under that provision. Because Corporation W is no longer subject to Exchange Act reporting obligations as of December 31, 1996, Corporation W is not a publicly held corporation for taxable year 1996, even though the registration of Corporation W's securities does not terminate until 90 days after Corporation W files with the Securities and Exchange Commission.

(d) Exception for compensation paid on a commission basis. The deduction limit in paragraph (b) of this section shall not apply to any compensation paid on a commission basis. For this purpose, compensation is paid on a commission basis if the facts and circumstances show that it is paid solely on account of income generated directly by the individual performance of the individual to whom the compensation is paid. Compensation does not fail to be attributable directly to the individual merely because support services, such as secretarial or research services, are utilized in generating the income. However, if compensation is paid on account of broader performance standards, such as income produced by a business unit of the corporation, the compensation does not qualify for the exception provided under this paragraph (d).

(e) Exception for qualified performance-based compensation --

(1) In general. The deduction limit in paragraph (b) of this section does not apply to qualified performance-based compensation. Qualified performance-based compensation is compensation that meets all of the requirements of paragraphs (e)(2) through (e)(5) of this section.

(2) Performance goal requirement -- (i) Preestablished goal. Qualified performance-based compensation must be paid solely on account of the attainment of one or more preestablished, objective performance goals. A performance goal is considered preestablished if it is established in writing by the compensation committee not later than 90 days after the commencement of the period of service to which the performance goal relates, provided that the outcome is substantially uncertain at the time the compensation committee actually establishes the goal. However, in no event will a performance goal be considered to be preestablished if it is established after 25 percent of the period of service (as scheduled in good faith at the time the goal is established) has elapsed. A performance goal is objective if a third party

having knowledge of the relevant facts could determine whether the goal is met. Performance goals can be based on one or more business criteria that apply to the individual, a business unit, or the corporation as a whole. Such business criteria could include, for example, stock price, market share, sales, earnings per share, return on equity, or costs. A performance goal need not, however, be based upon an increase or positive result under a business criterion and could include, for example, maintaining the status quo or limiting economic losses (measured, in each case, by reference to a specific business criterion). A performance goal does not include the mere continued employment of the covered employee. Thus, a vesting provision based solely on continued employment would not constitute a performance goal. See paragraph (e)(2)(vi) of this section for rules on compensation that is based on an increase in the price of stock.

(ii) Objective compensation formula. A preestablished performance goal must state, in terms of an objective formula or standard, the method for computing the amount of compensation payable to the employee if the goal is attained. A formula or standard is objective if a third party having knowledge of the relevant performance results could calculate the amount to be paid to the employee. In addition, a formula or standard must specify the individual employees or class of employees to which it applies.

(iii) Discretion.

(A) The terms of an objective formula or standard must preclude discretion to increase the amount of compensation payable that would otherwise be due upon attainment of the goal. A performance goal is not discretionary for purposes of this paragraph (e)(2)(iii) merely because the compensation committee reduces or eliminates the compensation or other economic benefit that was due upon attainment of the goal. However, the exercise of negative discretion with respect to one employee is not permitted to result in an increase in the amount payable to another employee. Thus, for example, in the case of a bonus pool, if the amount payable to each employee is stated in terms of a percentage of the pool, the sum of these individual percentages of the pool is not permitted to exceed 100 percent. If the terms of an objective formula or standard fail to preclude discretion to increase the amount of compensation merely because the amount of compensation to be paid upon attainment of the performance goal is based, in whole or in part, on a percentage of salary or base pay and the dollar amount of the salary or base pay is not fixed at the time the performance goal is established, then the objective formula or standard will not be considered discretionary for purposes of this paragraph (e)(2)(iii) if the maximum dollar amount to be paid is fixed at that time.

(B) If compensation is payable upon or after the attainment of a performance goal, and a change is made to accelerate the payment of compensation to an earlier date after the attainment of the goal, the change will be treated as an increase in the amount of compensation, unless the amount of compensation paid is discounted to reasonably reflect the time value of money. If compensation is payable upon or after the attainment of a performance goal, and a change is made to defer the payment of compensation to a later date, any amount paid in excess of the amount that was originally owed to the employee will not be treated as an increase in the amount of compensation if the additional amount is based either on a reasonable rate of interest or on one or more predetermined actual investments (whether or not assets associated with the amount originally owed are actually invested therein) such that the amount payable by the employer at the later date will be based on the actual rate of return of a specific investment (including any decrease as well as any increase in the value of an investment). If compensation is payable in the form of property, a change in the timing of the transfer of that property after the attainment of the goal will not be treated as an increase in the amount of compensation for purposes of this paragraph (e)(2)(iii). Thus, for example, if the terms of a stock grant provide for stock to be transferred after the attainment of a performance goal and the transfer of the stock also is subject to a vesting schedule, a change in the vesting schedule that either accelerates or defers the transfer of stock will not be treated as an increase in the amount of compensation payable under the performance goal.

(C) Compensation attributable to a stock option, stock appreciation right, or other stock-based compensation does not fail to satisfy the requirements of this paragraph (e)(2) to the extent that a change in the grant or award is made to reflect a change in corporate capitalization, such as a stock split or dividend, or a corporate transaction, such as any merger of a corporation into another corporation, any consolidation of two or more corporations into another corporation, any

separation of a corporation (including a spinoff or other distribution of stock or property by a corporation), any reorganization of a corporation (whether or not such reorganization comes within the definition of such term in section 368), or any partial or complete liquidation by a corporation.

(iv) Grant-by-grant determination. The determination of whether compensation satisfies the requirements of this paragraph (e)(2) generally shall be made on a grant-by-grant basis. Thus, for example, whether compensation attributable to a stock option grant satisfies the requirements of this paragraph (e)(2) generally is determined on the basis of the particular grant made and without regard to the terms of any other option grant, or other grant of compensation, to the same or another employee. As a further example, except as provided in paragraph (e)(2)(vi), whether a grant of restricted stock or other stock-based compensation satisfies the requirements of this paragraph (e)(2) is determined without regard to whether dividends, dividend equivalents, or other similar distributions with respect to stock, on such stock-based compensation are payable prior to the attainment of the performance goal. Dividends, dividend equivalents, or other similar distributions with respect to stock that are treated as separate grants under this paragraph (e)(2)(iv) are not performance-based compensation unless they separately satisfy the requirements of this paragraph (e)(2).

(v) Compensation contingent upon attainment of performance goal. Compensation does not satisfy the requirements of this paragraph (e)(2) if the facts and circumstances indicate that the employee would receive all or part of the compensation regardless of whether the performance goal is attained. Thus, if the payment of compensation under a grant or award is only nominally or partially contingent on attaining a performance goal, none of the compensation payable under the grant or award will be considered performance-based. For example, if an employee is entitled to a bonus under either of two arrangements, where payment under a nonperformance-based arrangement is contingent upon the failure to attain the performance goals under an otherwise performance-based arrangement, then neither arrangement provides for compensation that satisfies the requirements of this paragraph (e)(2). Compensation does not fail to be qualified performance-based compensation merely because the plan allows the compensation to be payable upon death, disability, or change of ownership or control, although compensation actually paid on account of those events prior to the attainment of the performance goal would not satisfy the requirements of this paragraph (e)(2). As an exception to the general rule set forth in the first sentence of paragraph (e)(2)(iv) of this section, the facts-and-circumstances determination referred to in the first sentence of this paragraph (e)(2)(v) is made taking into account all plans, arrangements, and agreements that provide for compensation to the employee.

(vi) Application of requirements to stock options and stock appreciation rights- (A) In general. Compensation attributable to a stock option or a stock appreciation right is deemed to satisfy the requirements of this paragraph (e)(2) if the grant or award is made by the compensation committee; the plan under which the option or right is granted states the maximum number of shares with respect to which options or rights may be granted during a specified period to any employee; and, under the terms of the option or right, the amount of compensation the employee could receive is based solely on an increase in the value of the stock after the date of the grant or award. Conversely, if the amount of compensation the employee will receive under the grant or award is not based solely on an increase in the value of the stock after the date of grant or award (e.g., in the case of restricted stock, or an option that is granted with an exercise price that is less than the fair market value of the stock as of the date of grant), none of the compensation attributable to the grant or award is qualified performance-based compensation because it does not satisfy the requirement of this paragraph (e)(2)(vi)(A). Whether a stock option grant is based solely on an increase in the value of the stock after the date of grant is determined without regard to any dividend equivalent that may be payable, provided that payment of the dividend equivalent is not made contingent on the exercise of the option. The rule that the compensation attributable to a stock option or stock appreciation right must be based solely on an increase in the value of the stock after the date of grant or award does not apply if the grant or award is made on account of, or if the vesting or exercisability of the grant or award is contingent on, the attainment of a performance goal that satisfies the requirements of this paragraph (e)(2).

(B) Cancellation and repricing. Compensation attributable to a stock option or stock appreciation right does not satisfy the requirements of this paragraph (e)(2) to the extent that the number of options granted exceeds the maximum number

of shares for which options may be granted to the employee as specified in the plan. If an option is canceled, the canceled option continues to be counted against the maximum number of shares for which options may be granted to the employee under the plan. If, after grant, the exercise price of an option is reduced, the transaction is treated as a cancellation of the option and a grant of a new option. In such case, both the option that is deemed to be canceled and the option that is deemed to be granted reduce the maximum number of shares for which options may be granted to the employee under the plan. This paragraph (e)(2)(vi)(B) also applies in the case of a stock appreciation right where, after the award is made, the base amount on which stock appreciation is calculated is reduced to reflect a reduction in the fair market value of stock.

(vii) Examples. This paragraph (e)(2) may be illustrated by the following examples:

Example 1.

No later than 90 days after the start of a fiscal year, but while the outcome is substantially uncertain, Corporation S establishes a bonus plan under which A, the chief executive officer, will receive a cash bonus of \$500,000, if year-end corporate sales are increased by at least 5 percent. The compensation committee retains the right, if the performance goal is met, to reduce the bonus payment to A if, in its judgment, other subjective factors warrant a reduction. The bonus will meet the requirements of this paragraph (e)(2).

Example 2.

The facts are the same as in Example 1, except that the bonus is based on a percentage of Corporation S's total sales for the fiscal year. Because Corporation S is virtually certain to have some sales for the fiscal year, the outcome of the performance goal is not substantially uncertain, and therefore the bonus does not meet the requirements of this paragraph (e)(2).

Example 3.

The facts are the same as in Example 1, except that the bonus is based on a percentage of Corporation S's total profits for the fiscal year. Although some sales are virtually certain for virtually all public companies, it is substantially uncertain whether a company will have profits for a specified future period even if the company has a history of profitability. Therefore, the bonus will meet the requirements of this paragraph (e)(2).

Example 4.

B is the general counsel of Corporation R, which is engaged in patent litigation with Corporation S. Representatives of Corporation S have informally indicated to Corporation R a willingness to settle the litigation for \$50,000,000. Subsequently, the compensation committee of Corporation R agrees to pay B a bonus if B obtains a formal settlement for at least \$50,000,000. The bonus to B does not meet the requirement of this paragraph (e)(2) because the performance goal was not established at a time when the outcome was substantially uncertain.

Example 5.

Corporation S, a public utility, adopts a bonus plan for selected salaried employees that will pay a bonus at the end of a 3-year period of \$750,000 each if, at the end of the 3 years, the price of S stock has increased by 10 percent. The plan also provides that the 10-percent goal will automatically adjust upward or downward by the percentage change in a published utilities index. Thus, for example, if the published utilities index shows a net increase of 5 percent over a 3-year period, then the salaried employees would receive a bonus only if Corporation S stock has increased by 15 percent. Conversely, if the published utilities index shows a net decrease of 5 percent over a 3-year period, then the salaried employees would receive a bonus if Corporation S stock has increased by 5 percent. Because these automatic adjustments in the performance goal are preestablished, the bonus meets the requirement of this paragraph (e)(2), notwithstanding the potential changes in the performance goal.

Example 6.

The facts are the same as in Example 5, except that the bonus plan provides that, at the end of the 3-year period, a bonus of \$750,000 will be paid to each salaried employee if either the price of Corporation S stock has increased by 10 percent or the earnings per share on Corporation S stock have increased by 5 percent. If both the earnings-per-share goal and the stock-price goal are preestablished, the compensation committee's discretion to choose to pay a bonus under either of the two goals does not cause any bonus paid under the plan to fail to meet the requirement of this paragraph (e)(2) because each goal independently meets the requirements of this paragraph (e)(2). The choice to pay under either of the two goals is tantamount to the discretion to choose not to pay under one of the goals, as provided in paragraph (e)(2)(iii) of this section.

Example 7.

Corporation U establishes a bonus plan under which a specified class of employees will participate in a bonus pool if certain preestablished performance goals are attained. The amount of the bonus pool is determined under an objective formula. Under the terms of the bonus plan, the compensation committee retains the discretion to determine the fraction of the bonus pool that each employee may receive. The bonus plan does not satisfy the requirements of this paragraph (e)(2). Although the aggregate amount of the bonus plan is determined under an objective formula, a third party could not determine the amount that any individual could receive under the plan.

Example 8.

The facts are the same as in Example 7, except that the bonus plan provides that a specified share of the bonus pool is payable to each employee, and the total of these shares does not exceed 100% of the pool. The bonus plan satisfies the requirements of this paragraph (e)(2). In addition, the bonus plan will satisfy the requirements of this paragraph (e)(2) even if the compensation committee retains the discretion to reduce the compensation payable to any individual employee, provided that a reduction in the amount of one employee's bonus does not result in an increase in the amount of any other employee's bonus.

Example 9.

Corporation V establishes a stock option plan for salaried employees. The terms of the stock option plan specify that no salaried employee shall receive options for more than 100,000 shares over any 3-year period. The compensation committee grants options for 50,000 shares to each of several salaried employees. The exercise price of each option is equal to or greater than the fair market value at the time of each grant. Compensation attributable to the exercise of the options satisfies the requirements of this paragraph (e)(2). If, however, the terms of the options provide that the exercise price is less than fair market value at the date of grant, no compensation attributable to the exercise of those options satisfies the requirements of this paragraph (e)(2) unless issuance or exercise of the options was contingent upon the attainment of a preestablished performance goal that satisfies this paragraph (e)(2).

Example 10.

The facts are the same as in Example 9, except that, within the same 3-year grant period, the fair market value of Corporation V stock is significantly less than the exercise price of the options. The compensation committee reprices those options to that lower current fair market value of Corporation V stock. The repricing of the options for 50,000 shares held by each salaried employee is treated as the grant of new options for an additional 50,000 shares to each employee. Thus, each of the salaried employees is treated as having received grants for 100,000 shares. Consequently, if any additional options are granted to those employees during the 3-year period, compensation attributable to the exercise of those additional options would not satisfy the requirements of this paragraph (e)(2). The results would be the same if the compensation committee canceled the outstanding options and issued new options to the same employees that were exercisable at the fair market value of Corporation V stock on the date of reissue.

Example 11.

Corporation W maintains a plan under which each participating employee may receive incentive stock options, nonqualified stock options, stock appreciation rights, or grants of restricted Corporation W stock. The plan specifies that each participating employee may receive options, stock appreciation rights, restricted stock, or any combination of each, for no more than 20,000 shares over the life of the plan. The plan provides that stock options may be granted with an exercise price of less than, equal to, or greater than fair market value on the date of grant. Options granted with an exercise price equal to, or greater than, fair market value on the date of grant do not fail to meet the requirements of this paragraph (e)(2) merely because the compensation committee has the discretion to determine the types of awards (i.e., options, rights, or restricted stock) to be granted to each employee or the discretion to issue options or make other compensation awards under the plan that would not meet the requirements of this paragraph (e)(2). Whether an option granted under the plan satisfies the requirements of this paragraph (e)(2) is determined on the basis of the specific terms of the option and without regard to other options or awards under the plan.

Example 12.

Corporation X maintains a plan under which stock appreciation rights may be awarded to key employees. The plan permits the compensation committee to make awards under which the amount of compensation payable to the employee is equal to the increase in the stock price plus a percentage "gross up" intended to offset the tax liability of the employee. In addition, the plan permits the compensation committee to make awards under which the amount of compensation payable to the employee is equal to the increase in the stock price, based on the highest price, which is defined as the highest price paid for Corporation X stock (or offered in a tender offer or other arms-length offer) during the 90 days preceding exercise. Compensation attributable to awards under the plan satisfies the requirements of paragraph (e)(2)(vi) of this section, provided that the terms of the plan specify the maximum number of shares for which awards may be made.

Example 13.

Corporation W adopts a plan under which a bonus will be paid to the CEO only if there is a 10% increase in earnings per share during the performance period. The plan provides that earnings per share will be calculated without regard to any change in accounting standards that may be required by the Financial Accounting Standards Board after the goal is established. After the goal is established, such a change in accounting standards occurs. Corporation W's reported earnings, for purposes of determining earnings per share under the plan, are adjusted pursuant to this plan provision to factor out this change in standards. This adjustment will not be considered an exercise of impermissible discretion because it is made pursuant to the plan provision.

Example 14.

Corporation X adopts a performance-based incentive pay plan with a four-year performance period. Bonuses under the plan are scheduled to be paid in the first year after the end of the performance period (year 5). However, in the second year of the performance period, the compensation committee determines that any bonuses payable in year 5 will instead, for bona fide business reasons, be paid in year 10. The compensation committee also determines that any compensation that would have been payable in year 5 will be adjusted to reflect the delay in payment. The adjustment will be based on the greater of the future rate of return of a specified mutual fund that invests in blue chip stocks or of a specified venture capital investment over the five-year deferral period. Each of these investments, considered by itself, is a predetermined actual investment because it is based on the future rate of return of an actual investment. However, the adjustment in this case is not based on predetermined actual investments within the meaning of paragraph (e)(2)(iii)(B) of this section because the amount payable by Corporation X in year 10 will be based on the greater of the two investment returns and, thus, will not be

based on the actual rate of return on either specific investment.

Example 15.

The facts are the same as in Example 14, except that the increase will be based on Moody's Average Corporate Bond Yield over the five-year deferral period. Because this index reflects a reasonable rate of interest, the increase in the compensation payable that is based on the index's rate of return is not considered an impermissible increase in the amount of compensation payable under the formula.

Example 16.

The facts are the same as in Example 14, except that the increase will be based on the rate of return for the Standard & Poor's 500 Index. This index does not measure interest rates and thus does not represent a reasonable rate of interest. In addition, this index does not represent an actual investment. Therefore, any additional compensation payable based on the rate of return of this index will result in an impermissible increase in the amount payable under the formula. If, in contrast, the increase were based on the rate of return of an existing mutual fund that is invested in a manner that seeks to approximate the Standard & Poor's 500 Index, the increase would be based on a predetermined actual investment within the meaning of paragraph (e)(2)(iii)(B) of this section and thus would not result in an impermissible increase in the amount payable under the formula.

(3) Outside directors -- (i) General rule. The performance goal under which compensation is paid must be established by a compensation committee comprised solely of two or more outside directors. A director is an outside director if the director --

(A) Is not a current employee of the publicly held corporation;

(B) Is not a former employee of the publicly held corporation who receives compensation for prior services (other than benefits under a tax-qualified retirement plan) during the taxable year;

(C) Has not been an officer of the publicly held corporation; and

(D) Does not receive remuneration from the publicly held corporation, either directly or indirectly, in any capacity other than as a director. For this purpose, remuneration includes any payment in exchange for goods or services.

(ii) Remuneration received. For purposes of this paragraph (e)(3), remuneration is received, directly or indirectly, by a director in each of the following circumstances:

(A) If remuneration is paid, directly or indirectly, to the director personally or to an entity in which the director has a beneficial ownership interest of greater than 50 percent. For this purpose, remuneration is considered paid when actually paid (and throughout the remainder of that taxable year of the corporation) and, if earlier, throughout the period when a contract or agreement to pay remuneration is outstanding.

(B) If remuneration, other than de minimis remuneration, was paid by the publicly held corporation in its preceding taxable year to an entity in which the director has a beneficial ownership interest of at least 5 percent but not more than 50 percent. For this purpose, remuneration is considered paid when actually paid or, if earlier, when the publicly held corporation becomes liable to pay it.

(C) If remuneration, other than de minimis remuneration, was paid by the publicly held corporation in its preceding taxable year to an entity by which the director is employed or self-employed other than as a director. For this purpose, remuneration is considered paid when actually paid or, if earlier, when the publicly held corporation becomes liable to pay it.

(iii) De minimis remuneration- (A) In general. For purposes of paragraphs (e)(3)(ii)(B) and (C) of this section, remuneration that was paid by the publicly held corporation in its preceding taxable year to an entity is de minimis if payments to the entity did not exceed 5 percent of the gross revenue of the entity for its taxable year ending with or within that preceding taxable year of the publicly held corporation.

(B) Remuneration for personal services and substantial owners. Notwithstanding paragraph (e)(3)(iii)(A) of this section, remuneration in excess of \$60,000 is not de minimis if the remuneration is paid to an entity described in paragraph (e)(3)(ii)(B) of this section, or is paid for personal services to an entity described in paragraph (e)(3)(ii)(C) of this section.

(iv) Remuneration for personal services. For purposes of paragraph (e)(3)(iii)(B) of this section, remuneration from a publicly held corporation is for personal services if --

(A) The remuneration is paid to an entity for personal or professional services, consisting of legal, accounting, investment banking, and management consulting services (and other similar services that may be specified by the Commissioner in revenue rulings, notices, or other guidance published in the Internal Revenue Bulletin), performed for the publicly held corporation, and the remuneration is not for services that are incidental to the purchase of goods or to the purchase of services that are not personal services; and

(B) The director performs significant services (whether or not as an employee) for the corporation, division, or similar organization (within the entity) that actually provides the services described in paragraph (e)(3)(iv)(A) of this section to the publicly held corporation, or more than 50 percent of the entity's gross revenues (for the entity's preceding taxable year) are derived from that corporation, subsidiary, or similar organization.

(v) Entity defined. For purposes of this paragraph (e)(3), entity means an organization that is a sole proprietorship, trust, estate, partnership, or corporation. The term also includes an affiliated group of corporations as defined in section 1504 (determined without regard to section 1504(b)) and a group of organizations that would be an affiliated group but for the fact that one or more of the organizations are not incorporated. However, the aggregation rules referred to in the preceding sentence do not apply for purposes of determining whether a director has a beneficial ownership interest of at least 5 percent or greater than 50 percent.

(vi) Employees and former officers. Whether a director is an employee or a former officer is determined on the basis of the facts at the time that the individual is serving as a director on the compensation committee. Thus, a director is not precluded from being an outside director solely because the director is a former officer of a corporation that previously was an affiliated corporation of the publicly held corporation. For example, a director of a parent corporation of an affiliated group is not precluded from being an outside director solely because that director is a former officer of an affiliated subsidiary that was spun off or liquidated. However, an outside director would no longer be an outside director if a corporation in which the director was previously an officer became an affiliated corporation of the publicly held corporation.

(vii) Officer. Solely for purposes of this paragraph (e)(3), officer means an administrative executive who is or was in regular and continued service. The term implies continuity of service and excludes those employed for a special and single transaction. An individual who merely has (or had) the title of officer but not the authority of an officer is not considered an officer. The determination of whether an individual is or was an officer is based on all of the facts and circumstances in the particular case, including without limitation the source of the individual's authority, the term for which the individual is elected or appointed, and the nature and extent of the individual's duties.

(viii) Members of affiliated groups. For purposes of this paragraph (e)(3), the outside directors of the publicly held member of an affiliated group are treated as the outside directors of all members of the affiliated group.

(ix) Examples. This paragraph (e)(3) may be illustrated by the following examples:

Example 1.

Corporations X and Y are members of an affiliated group of corporations as defined in section 1504, until July 1, 1994, when Y is sold to another group. Prior to the sale, A served as an officer of Corporation Y. After July 1, 1994, A is not treated as a former officer of Corporation X by reason of having been an officer of Y.

Example 2.

Corporation Z, a calendar-year taxpayer, uses the services of a law firm by which B is employed, but in which B has a less-than-5-percent ownership interest. The law firm reports income on a July 1 to June 30 basis. Corporation Z appoints B to serve on its compensation committee for calendar year 1998 after determining that, in calendar year 1997, it did not become liable to the law firm for remuneration exceeding the lesser of \$60,000 or five percent of the law firm's gross revenue (calculated for the year ending June 30, 1997). On October 1, 1998, Corporation Z becomes liable to pay remuneration of \$50,000 to the law firm on June 30, 1999. For the year ending June 30, 1998, the law firm's gross revenue was less than \$1 million. Thus, in calendar year 1999, B is not an outside director. However, B may satisfy the requirements for an outside director in calendar year 2000, if, in calendar year 1999, Corporation Z does not become liable to the law firm for additional remuneration. This is because the remuneration actually paid on June 30, 1999 was considered paid on October 1, 1998 under paragraph (e)(3)(ii)(C) of this section.

Example 3.

Corporation Z, a publicly held corporation, purchases goods from Corporation A. D, an executive and less-than-5-percent owner of Corporation A, sits on the board of directors of Corporation Z and on its compensation committee. For 1997, Corporation Z obtains representations to the effect that D is not eligible for any commission for D's sales to Corporation Z and that, for purposes of determining D's compensation for 1997, Corporation A's sales to Corporation Z are not otherwise treated differently than sales to other customers of Corporation A (including its affiliates, if any) or are irrelevant. In addition, Corporation Z has no reason to believe that these representations are inaccurate or that it is otherwise paying remuneration indirectly to D personally. Thus, in 1997, no remuneration is considered paid by Corporation Z indirectly to D personally under paragraph (e)(3)(ii)(A) of this section.

Example 4.

(i) Corporation W, a publicly held corporation, purchases goods from Corporation T. C, an executive and less-than-5-percent owner of Corporation T, sits on the board of directors of Corporation W and on its compensation committee. Corporation T develops a new product and agrees on January 1, 1998 to pay C a bonus of \$500,000 if Corporation W contracts to purchase the product. Even if Corporation W purchases the new product, sales to Corporation W will represent less than 5 percent of Corporation T's gross revenues. In 1999, Corporation W contracts to purchase the new product and, in 2000, C receives the \$500,000 bonus from Corporation T. In 1998, 1999, and 2000, Corporation W does not obtain any representations relating to indirect remuneration to C personally (such as the representations described in Example 3).

(ii) Thus, in 1998, 1999, and 2000, remuneration is considered paid by Corporation W indirectly to C personally under paragraph (e)(3)(ii)(A) of this section. Accordingly, in 1998, 1999, and 2000, C is not an outside director of Corporation W. The result would have been the same if Corporation W had obtained appropriate representations but nevertheless had reason to believe that it was paying remuneration indirectly to C personally.

Example 5.

Corporation R, a publicly held corporation, purchases utility service from Corporation Q, a public utility. The chief executive officer, and less-than-5-percent owner, of Corporation Q is a director of Corporation R. Corporation R pays Corporation Q more than \$60,000 per year for the utility service, but less than 5 percent of Corporation Q's gross revenues. Because utility services are not personal services, the fees paid are not subject to the \$60,000 de minimis rule for remuneration for personal services within the meaning of paragraph (e)(3)(iii)(B) of this section. Thus, the chief executive officer qualifies as an outside director of Corporation R, unless disqualified on some other basis.

Example 6.

Corporation A, a publicly held corporation, purchases management consulting services from Division S of Conglomerate P. The chief financial officer of Division S is a director of Corporation A. Corporation A pays more than \$60,000 per year for the management consulting services, but less than 5 percent of Conglomerate P's gross revenues. Because management consulting services are personal services within the meaning of paragraph (e)(3)(iv)(A) of this section, and the chief financial officer performs significant services for Division S, the fees paid are subject to the \$60,000 de minimis rule as remuneration for personal services. Thus, the chief financial officer does not qualify as an outside director of Corporation A.

Example 7.

The facts are the same as in Example 6, except that the chief executive officer, and less-than-5-percent owner, of the parent company of Conglomerate P is a director of Corporation A and does not perform significant services for Division S. If the gross revenues of Division S do not constitute more than 50 percent of the gross revenues of Conglomerate P for P's preceding taxable year, the chief executive officer will qualify as an outside director of Corporation A, unless disqualified on some other basis.

(4) Shareholder approval requirement -- (i) General rule. The material terms of the performance goal under which the compensation is to be paid must be disclosed to and subsequently approved by the shareholders of the publicly held corporation before the compensation is paid. The requirements of this paragraph (e)(4) are not satisfied if the compensation would be paid regardless of whether the material terms are approved by shareholders. The material terms include the employees eligible to receive compensation; a description of the business criteria on which the performance goal is based; and either the maximum amount of compensation that could be paid to any employee or the formula used to calculate the amount of compensation to be paid to the employee if the performance goal is attained (except that, in the case of a formula based, in whole or in part, on a percentage of salary or base pay, the maximum dollar amount of compensation that could be paid to the employee must be disclosed).

(ii) Eligible employees. Disclosure of the employees eligible to receive compensation need not be so specific as to identify the particular individuals by name. A general description of the class of eligible employees by title or class is sufficient, such as the chief executive officer and vice presidents, or all salaried employees, all executive officers, or all key employees.

(iii) Description of business criteria- (A) In general. Disclosure of the business criteria on which the performance goal is based need not include the specific targets that must be satisfied under the performance goal. For example, if a bonus plan provides that a bonus will be paid if earnings per share increase by 10 percent, the 10-percent figure is a target that need not be disclosed to shareholders. However, in that case, disclosure must be made that the bonus plan is based on an earnings-per-share business criterion. In the case of a plan under which employees may be granted stock options or stock appreciation rights, no specific description of the business criteria is required if the grants or awards are based on a stock price that is no less than current fair market value.

(B) Disclosure of confidential information. The requirements of this paragraph (e)(4) may be satisfied even though information that otherwise would be a material term of a performance goal is not disclosed to shareholders, provided

that the compensation committee determines that the information is confidential commercial or business information, the disclosure of which would have an adverse effect on the publicly held corporation. Whether disclosure would adversely affect the corporation is determined on the basis of the facts and circumstances. If the compensation committee makes such a determination, the disclosure to shareholders must state the compensation committee's belief that the information is confidential commercial or business information, the disclosure of which would adversely affect the company. In addition, the ability not to disclose confidential information does not eliminate the requirement that disclosure be made of the maximum amount of compensation that is payable to an individual under a performance goal. Confidential information does not include the identity of an executive or the class of executives to which a performance goal applies or the amount of compensation that is payable if the goal is satisfied.

(iv) Description of compensation. Disclosure as to the compensation payable under a performance goal must be specific enough so that shareholders can determine the maximum amount of compensation that could be paid to any employee during a specified period. If the terms of the performance goal do not provide for a maximum dollar amount, the disclosure must include the formula under which the compensation would be calculated. Thus, for example, if compensation attributable to the exercise of stock options is equal to the difference in the exercise price and the current value of the stock, disclosure would be required of the maximum number of shares for which grants may be made to any employee and the exercise price of those options (e.g., fair market value on date of grant). In that case, shareholders could calculate the maximum amount of compensation that would be attributable to the exercise of options on the basis of their assumptions as to the future stock price.

(v) Disclosure requirements of the Securities and Exchange Commission. To the extent not otherwise specifically provided in this paragraph (e)(4), whether the material terms of a performance goal are adequately disclosed to shareholders is determined under the same standards as apply under the Exchange Act.

(vi) Frequency of disclosure. Once the material terms of a performance goal are disclosed to and approved by shareholders, no additional disclosure or approval is required unless the compensation committee changes the material terms of the performance goal. If, however, the compensation committee has authority to change the targets under a performance goal after shareholder approval of the goal, material terms of the performance goal must be disclosed to and reapproved by shareholders no later than the first shareholder meeting that occurs in the fifth year following the year in which shareholders previously approved the performance goal.

(vii) Shareholder vote. For purposes of this paragraph (e)(4), the material terms of a performance goal are approved by shareholders if, in a separate vote, a majority of the votes cast on the issue (including abstentions to the extent abstentions are counted as voting under applicable state law) are cast in favor of approval.

(viii) Members of affiliated group. For purposes of this paragraph (e)(4), the shareholders of the publicly held member of the affiliated group are treated as the shareholders of all members of the affiliated group.

(ix) Examples. This paragraph (e)(4) may be illustrated by the following examples:

Example 1.

Corporation X adopts a plan that will pay a specified class of its executives an annual cash bonus based on the overall increase in corporate sales during the year. Under the terms of the plan, the cash bonus of each executive equals \$100,000 multiplied by the number of percentage points by which sales increase in the current year when compared to the prior year. Corporation X discloses to its shareholders prior to the vote both the class of executives eligible to receive awards and the annual formula of \$100,000 multiplied by the percentage increase in sales. This disclosure meets the requirements of this paragraph (e)(4). Because the compensation committee does not have the authority to establish a different target under the plan, Corporation X need not redisclose to its shareholders and obtain their reapproval of the material terms of the plan until those material terms are changed.

Example 2.

The facts are the same as in Example 1 except that Corporation X discloses only that bonuses will be paid on the basis of the annual increase in sales. This disclosure does not meet the requirements of this paragraph (e)(4) because it does not include the formula for calculating the compensation or a maximum amount of compensation to be paid if the performance goal is satisfied.

Example 3.

Corporation Y adopts an incentive compensation plan in 1995 that will pay a specified class of its executives a bonus every 3 years based on the following 3 factors: increases in earnings per share, reduction in costs for specified divisions, and increases in sales by specified divisions. The bonus is payable in cash or in Corporation Y stock, at the option of the executive. Under the terms of the plan, prior to the beginning of each 3-year period, the compensation committee determines the specific targets under each of the three factors (i.e., the amount of the increase in earnings per share, the reduction in costs, and the amount of sales) that must be met in order for the executives to receive a bonus. Under the terms of the plan, the compensation committee retains the discretion to determine whether a bonus will be paid under any one of the goals. The terms of the plan also specify that no executive may receive a bonus in excess of \$1,500,000 for any 3-year period. To satisfy the requirements of this paragraph (e)(4), Corporation Y obtains shareholder approval of the plan at its 1995 annual shareholder meeting. In the proxy statement issued to shareholders, Corporation Y need not disclose to shareholders the specific targets that are set by the compensation committee. However, Corporation Y must disclose that bonuses are paid on the basis of earnings per share, reductions in costs, and increases in sales of specified divisions. Corporation Y also must disclose the maximum amount of compensation that any executive may receive under the plan is \$1,500,000 per 3-year period. Unless changes in the material terms of the plan are made earlier, Corporation Y need not disclose the material terms of the plan to the shareholders and obtain their reapproval until the first shareholders' meeting held in 2000.

Example 4.

The same facts as in Example 3, except that prior to the beginning of the second 3-year period, the compensation committee determines that different targets will be set under the plan for that period with regard to all three of the performance criteria (i.e., earnings per share, reductions in costs, and increases in sales). In addition, the compensation committee raises the maximum dollar amount that can be paid under the plan for a 3-year period to \$2,000,000. The increase in the maximum dollar amount of compensation under the plan is a changed material term. Thus, to satisfy the requirements of this paragraph (e)(4), Corporation Y must disclose to and obtain approval by the shareholders of the plan as amended.

Example 5.

In 1998, Corporation Z establishes a plan under which a specified group of executives will receive a cash bonus not to exceed \$750,000 each if a new product that has been in development is completed and ready for sale to customers by January 1, 2000. Although the completion of the new product is a material term of the performance goal under this paragraph (e)(4), the compensation committee determines that the disclosure to shareholders of the performance goal would adversely affect Corporation Z because its competitors would be made aware of the existence and timing of its new product. In this case, the requirements of this paragraph (e)(4) are satisfied if all other material terms, including the maximum amount of compensation, are disclosed and the disclosure affirmatively states that the terms of the performance goal are not being disclosed because the compensation committee has determined that those terms include confidential information, the disclosure of which would adversely affect Corporation Z.

(5) Compensation committee certification. The compensation committee must certify in writing prior to payment of the compensation that the performance goals and any other material terms were in fact satisfied. For this purpose, approved

minutes of the compensation committee meeting in which the certification is made are treated as a written certification. Certification by the compensation committee is not required for compensation that is attributable solely to the increase in the value of the stock of the publicly held corporation.

(f) Companies that become publicly held, spinoffs, and similar transactions -- (1) In general. In the case of a corporation that was not a publicly held corporation and then becomes a publicly held corporation, the deduction limit of paragraph (b) of this section does not apply to any remuneration paid pursuant to a compensation plan or agreement that existed during the period in which the corporation was not publicly held. However, in the case of such a corporation that becomes publicly held in connection with an initial public offering, this relief applies only to the extent that the prospectus accompanying the initial public offering disclosed information concerning those plans or agreements that satisfied all applicable securities laws then in effect. In accordance with paragraph (c)(1)(ii) of this section, a corporation that is a member of an affiliated group that includes a publicly held corporation is considered publicly held and, therefore, cannot rely on this paragraph (f)(1).

(2) Reliance period. Paragraph (f)(1) of this section may be relied upon until the earliest of --

(i) The expiration of the plan or agreement;

(ii) The material modification of the plan or agreement, within the meaning of paragraph (h)(1)(iii) of this section;

(iii) The issuance of all employer stock and other compensation that has been allocated under the plan; or

(iv) The first meeting of shareholders at which directors are to be elected that occurs after the close of the third calendar year following the calendar year in which the initial public offering occurs or, in the case of a privately held corporation that becomes publicly held without an initial public offering, the first calendar year following the calendar year in which the corporation becomes publicly held.

(3) Stock-based compensation. Paragraph (f)(1) of this section will apply to any compensation received pursuant to the exercise of a stock option or stock appreciation right, or the substantial vesting of restricted property, granted under a plan or agreement described in paragraph (f)(1) of this section if the grant occurs on or before the earliest of the events specified in paragraph (f)(2) of this section.

(4) Subsidiaries that become separate publicly held corporations -- (i) In general. If a subsidiary that is a member of the affiliated group described in paragraph (c)(1)(ii) of this section becomes a separate publicly held corporation (whether by spinoff or otherwise), any remuneration paid to covered employees of the new publicly held corporation will satisfy the exception for performance-based compensation described in paragraph (e) of this section if the conditions in either paragraph (f)(4)(ii) or (f)(4)(iii) of this section are satisfied.

(ii) Prior establishment and approval. Remuneration satisfies the requirements of this paragraph (f)(4)(ii) if the remuneration satisfies the requirements for performance-based compensation set forth in paragraphs (e)(2), (e)(3), and (e)(4) of this section (by application of paragraphs (e)(3)(viii) and (e)(4)(viii) of this section) before the corporation becomes a separate publicly held corporation, and the certification required by paragraph (e)(5) of this section is made by the compensation committee of the new publicly held corporation (but if the performance goals are attained before the corporation becomes a separate publicly held corporation, the certification may be made by the compensation committee referred to in paragraph (e)(3)(viii) of this section before it becomes a separate publicly held corporation). Thus, this paragraph (f)(4)(ii) requires that the outside directors and shareholders (within the meaning of paragraphs (e)(3)(viii) and (e)(4)(viii) of this section) of the corporation before it becomes a separate publicly held corporation establish and approve, respectively, the performance-based compensation for the covered employees of the new publicly held corporation in accordance with paragraphs (e)(3) and (e)(4) of this section.

(iii) Transition period. Remuneration satisfies the requirements of this paragraph (f)(4)(iii) if the remuneration satisfies all of the requirements of paragraphs (e)(2), (e)(3), and (e)(5) of this section. The outside directors (within the meaning of paragraph (e)(3)(viii) of this section) of the corporation before it becomes a separate publicly held corporation, or the outside directors of the new publicly held corporation, may establish and administer the performance goals for the covered employees of the new publicly held corporation for purposes of satisfying the requirements of paragraphs (e)(2) and (e)(3) of this section. The certification required by paragraph (e)(5) of this section must be made by the compensation committee of the new publicly held corporation. However, a taxpayer may rely on this paragraph (f)(4)(iii) to satisfy the requirements of paragraph (e) of this section only for compensation paid, or stock options, stock appreciation rights, or restricted property granted, prior to the first regularly scheduled meeting of the shareholders of the new publicly held corporation that occurs more than 12 months after the date the corporation becomes a separate publicly held corporation. Compensation paid, or stock options, stock appreciation rights, or restricted property granted, on or after the date of that meeting of shareholders must satisfy all requirements of paragraph (e) of this section, including the shareholder approval requirement of paragraph (e)(4) of this section, in order to satisfy the requirements for performance-based compensation.

(5) Example. The following example illustrates the application of paragraph (f)(4)(ii) of this section:

Example. Corporation P, which is publicly held, decides to spin off Corporation S, a wholly owned subsidiary of Corporation P. After the spinoff, Corporation S will be a separate publicly held corporation. Before the spinoff, the compensation committee of Corporation P, pursuant to paragraph (e)(3)(viii) of this section, establishes a bonus plan for the executives of Corporation S that provides for bonuses payable after the spinoff and that satisfies the requirements of paragraph (e)(2) of this section. If, pursuant to paragraph (e)(4)(viii) of this section, the shareholders of Corporation P approve the plan prior to the spinoff, that approval will satisfy the requirements of paragraph (e)(4) of this section with respect to compensation paid pursuant to the bonus plan after the spinoff. However, the compensation committee of Corporation S will be required to certify that the goals are satisfied prior to the payment of the bonuses in order for the bonuses to be considered performance-based compensation.

(g) Coordination with disallowed excess parachute payments. The \$1,000,000 limitation in paragraph (b) of this section is reduced (but not below zero) by the amount (if any) that would have been included in the compensation of the covered employee for the taxable year but for being disallowed by reason of section 280G. For example, assume that during a taxable year a corporation pays \$1,500,000 to a covered employee and no portion satisfies the exception in paragraph (d) of this section for commissions or paragraph (e) of this section for qualified performance-based compensation. Of the \$1,500,000, \$600,000 is an excess parachute payment, as defined in section 280G(b)(1) and is disallowed by reason of that section. Because the excess parachute payment reduces the limitation of paragraph (b) of this section, the corporation can deduct \$400,000, and \$500,000 of the otherwise deductible amount is nondeductible by reason of Section 162(m).

(h) Transition rules -- (1) Compensation payable under a written binding contract which was in effect on February 17, 1993- (i) General rule. The deduction limit of paragraph (b) of this section does not apply to any compensation payable under a written binding contract that was in effect on February 17, 1993. The preceding sentence does not apply unless, under applicable state law, the corporation is obligated to pay the compensation if the employee performs services. However, the deduction limit of paragraph (b) of this section does apply to a contract that is renewed after February 17, 1993. A written binding contract that is terminable or cancelable by the corporation after February 17, 1993, without the employee's consent is treated as a new contract as of the date that any such termination or cancellation, if made, would be effective. Thus, for example, if the terms of a contract provide that it will be automatically renewed as of a certain date unless either the corporation or the employee gives notice of termination of the contract at least 30 days before that date, the contract is treated as a new contract as of the date that termination would be effective if that notice were given. Similarly, for example, if the terms of a contract provide that the contract will be terminated or canceled as of a certain date unless either the corporation or the employee elects to renew within 30 days of that date, the contract is treated as renewed by the corporation as of that date. Alternatively, if the corporation will remain legally obligated by the terms of

a contract beyond a certain date at the sole discretion of the employee, the contract will not be treated as a new contract as of that date if the employee exercises the discretion to keep the corporation bound to the contract. A contract is not treated as terminable or cancelable if it can be terminated or canceled only by terminating the employment relationship of the employee.

(ii) Compensation payable under a plan or arrangement. If a compensation plan or arrangement meets the requirements of paragraph (h)(1)(i) of this section, the compensation paid to an employee pursuant to the plan or arrangement will not be subject to the deduction limit of paragraph (b) of this section even though the employee was not eligible to participate in the plan as of February 17, 1993. However, the preceding sentence does not apply unless the employee was employed on February 17, 1993, by the corporation that maintained the plan or arrangement, or the employee had the right to participate in the plan or arrangement under a written binding contract as of that date.

(iii) Material modifications.

(A) Paragraph (h)(1)(i) of this section will not apply to any written binding contract that is materially modified. A material modification occurs when the contract is amended to increase the amount of compensation payable to the employee. If a binding written contract is materially modified, it is treated as a new contract entered into as of the date of the material modification. Thus, amounts received by an employee under the contract prior to a material modification are not affected, but amounts received subsequent to the material modification are not treated as paid under a binding, written contract described in paragraph (h)(1)(i) of this section.

(B) A modification of the contract that accelerates the payment of compensation will be treated as a material modification unless the amount of compensation paid is discounted to reasonably reflect the time value of money. If the contract is modified to defer the payment of compensation, any compensation paid in excess of the amount that was originally payable to the employee under the contract will not be treated as a material modification if the additional amount is based on either a reasonable rate of interest or one or more predetermined actual investments (whether or not assets associated with the amount originally owed are actually invested therein) such that the amount payable by the employer at the later date will be based on the actual rate of return of the specific investment (including any decrease as well as any increase in the value of the investment).

(C) The adoption of a supplemental contract or agreement that provides for increased compensation, or the payment of additional compensation, is a material modification of a binding, written contract where the facts and circumstances show that the additional compensation is paid on the basis of substantially the same elements or conditions as the compensation that is otherwise paid under the written binding contract. However, a material modification of a written binding contract does not include a supplemental payment that is equal to or less than a reasonable cost-of-living increase over the payment made in the preceding year under that written binding contract. In addition, a supplemental payment of compensation that satisfies the requirements of qualified performance-based compensation in paragraph (e) of this section will not be treated as a material modification.

(iv) Examples. The following examples illustrate the exception of this paragraph (h)(1):

Example 1.

Corporation X executed a 3-year compensation arrangement with C on February 15, 1993, that constitutes a written binding contract under applicable state law. The terms of the arrangement provide for automatic extension after the 3-year term for additional 1-year periods, unless the corporation exercises its option to terminate the arrangement within 30 days of the end of the 3-year term or, thereafter, within 30 days before each anniversary date. Termination of the compensation arrangement does not require the termination of C's employment relationship with Corporation X. Unless terminated, the arrangement is treated as renewed on February 15, 1996, and the deduction limit of paragraph (b) of this section applies to payments under the arrangement after that date.

Example 2.

Corporation Y executed a 5-year employment agreement with B on January 1, 1992, providing for a salary of \$900,000 per year. Assume that this agreement constitutes a written binding contract under applicable state law. In 1992 and 1993, B receives the salary of \$900,000 per year. In 1994, Corporation Y increases B's salary with a payment of \$20,000. The \$20,000 supplemental payment does not constitute a material modification of the written binding contract because the \$20,000 payment is less than or equal to a reasonable cost-of-living increase from 1993. However, the \$20,000 supplemental payment is subject to the limitation in paragraph (b) of this section. On January 1, 1995, Corporation Y increases B's salary to \$1,200,000. The \$280,000 supplemental payment is a material modification of the written binding contract because the additional compensation is paid on the basis of substantially the same elements or conditions as the compensation that is otherwise paid under the written binding contract and it is greater than a reasonable, annual cost-of-living increase. Because the written binding contract is materially modified as of January 1, 1995, all compensation paid to B in 1995 and thereafter is subject to the deduction limitation of Section 162(m).

Example 3.

Assume the same facts as in Example 2, except that instead of an increase in salary, B receives a restricted stock grant subject to B's continued employment for the balance of the contract. The restricted stock grant is not a material modification of the binding written contract because any additional compensation paid to B under the grant is not paid on the basis of substantially the same elements and conditions as B's salary because it is based both on the stock price and B's continued service. However, compensation attributable to the restricted stock grant is subject to the deduction limitation of Section 162(m).

(2) Special transition rule for outside directors. A director who is a disinterested director is treated as satisfying the requirements of an outside director under paragraph (e)(3) of this section until the first meeting of shareholders at which directors are to be elected that occurs on or after January 1, 1996. For purposes of this paragraph (h)(2) and paragraph (h)(3) of this section, a director is a disinterested director if the director is disinterested within the meaning of Rule 16b-3(c)(2)(i), *17 CFR 240.16b-3(c)(2)(i)*, under the Exchange Act (including the provisions of Rule 16b-3(d)(3), as in effect on April 30, 1991).

(3) Special transition rule for previously-approved plans -- (i) In general. Any compensation paid under a plan or agreement approved by shareholders before December 20, 1993, is treated as satisfying the requirements of paragraphs (e)(3) and (e)(4) of this section, provided that the directors administering the plan or agreement are disinterested directors and the plan was approved by shareholders in a manner consistent with Rule 16b-3(b), *17 CFR 240.16b-3(b)*, under the Exchange Act or Rule 16b-3(a), *17 CFR 240.16b-3(a)* (as contained in 17 CFR part 240 revised April 1, 1990). In addition, for purposes of satisfying the requirements of paragraph (e)(2)(vi) of this section, a plan or agreement is treated as stating a maximum number of shares with respect to which an option or right may be granted to any employee if the plan or agreement that was approved by the shareholders provided for an aggregate limit, consistent with Rule 16b-3(b), *17 CFR 250.16b-3(b)*, on the shares of employer stock with respect to which awards may be made under the plan or agreement.

(ii) Reliance period. The transition rule provided in this paragraph (h)(3) shall continue and may be relied upon until the earliest of --

(A) The expiration or material modification of the plan or agreement;

(B) The issuance of all employer stock and other compensation that has been allocated under the plan; or

(C) The first meeting of shareholders at which directors are to be elected that occurs after December 31, 1996.

(iii) Stock-based compensation. This paragraph (h)(3) will apply to any compensation received pursuant to the exercise of a stock option or stock appreciation right, or the substantial vesting of restricted property, granted under a plan or agreement described in paragraph (h)(3)(i) of this section if the grant occurs on or before the earliest of the events specified in paragraph (h)(3)(ii) of this section.

(iv) Example. The following example illustrates the application of this paragraph (h)(3):

Example. Corporation Z adopted a stock option plan in 1991. Pursuant to Rule 16b-3 under the Exchange Act, the stock option plan has been administered by disinterested directors and was approved by Corporation Z shareholders. Under the terms of the plan, shareholder approval is not required again until 2001. In addition, the terms of the stock option plan include an aggregate limit on the number of shares available under the plan. Option grants under the Corporation Z plan are made with an exercise price equal to or greater than the fair market value of Corporation Z stock. Compensation attributable to the exercise of options that are granted under the plan before the earliest of the dates specified in paragraph (h)(3)(ii) of this section will be treated as satisfying the requirements of paragraph (e) of this section for qualified performance-based compensation, regardless of when the options are exercised.

(i) (Reserved)

(j) Effective date -- (1) In general. Section 162(m) and this section apply to compensation that is otherwise deductible by the corporation in a taxable year beginning on or after January 1, 1994.

(2) Delayed effective date for certain provisions -- (i) Date on which remuneration is considered paid. Notwithstanding paragraph (j)(1) of this section, the rules in the second sentence of each of paragraphs (e)(3)(ii)(A), (e)(3)(ii)(B), and (e)(3)(ii)(C) of this section for determining the date or dates on which remuneration is considered paid to a director are effective for taxable years beginning on or after January 1, 1995. Prior to those taxable years, taxpayers must follow the rules in paragraphs (e)(3)(ii)(A), (e)(3)(ii)(B), and (e)(3)(ii)(C) of this section or another reasonable, good faith interpretation of Section 162(m) with respect to the date or dates on which remuneration is considered paid to a director.

(ii) Separate treatment of publicly held subsidiaries. Notwithstanding paragraph (j)(1) of this section, the rule in paragraph (c)(1)(ii) of this section that treats publicly held subsidiaries as separately subject to Section 162(m) is effective as of the first regularly scheduled meeting of the shareholders of the publicly held subsidiary that occurs more than 12 months after December 2, 1994. The rule for stock-based compensation set forth in paragraph (f)(3) of this section will apply for this purpose, except that the grant must occur before the shareholder meeting specified in this paragraph (j)(2)(ii). Taxpayers may choose to rely on the rule referred to in the first sentence of this paragraph (j)(2)(ii) for the period prior to the effective date of the rule.

(iii) Subsidiaries that become separate publicly held corporations. Notwithstanding paragraph (j)(1) of this section, if a subsidiary of a publicly held corporation becomes a separate publicly held corporation as described in paragraph (f)(4)(i) of this section, then, for the duration of the reliance period described in paragraph (f)(2) of this section, the rules of paragraph (f)(1) of this section are treated as applying (and the rules of paragraph (f)(4) of this section do not apply) to remuneration paid to covered employees of that new publicly held corporation pursuant to a plan or agreement that existed prior to December 2, 1994, provided that the treatment of that remuneration as performance-based is in accordance with a reasonable, good faith interpretation of Section 162(m). However, if remuneration is paid to covered employees of that new publicly held corporation pursuant to a plan or agreement that existed prior to December 2, 1994, but that remuneration is not performance-based under a reasonable, good faith interpretation of Section 162(m), the rules of paragraph (f)(1) of this section will be treated as applying only until the first regularly scheduled meeting of shareholders that occurs more than 12 months after December 2, 1994. The rules of paragraph (f)(4) of this section will apply as of that first regularly scheduled meeting. The rule for stock-based compensation set forth in paragraph (f)(3) of this section will apply for purposes of this paragraph (j)(2)(iii), except that the grant must occur before the shareholder

meeting specified in the preceding sentence if the remuneration is not performance-based under a reasonable, good faith interpretation of Section 162(m). Taxpayers may choose to rely on the rules of paragraph (f)(4) of this section for the period prior to the applicable effective date referred to in the first or second sentence of this paragraph (j)(2)(iii).

(iv) Bonus pools. Notwithstanding paragraph (j)(1) of this section, the rules in paragraph (e)(2)(iii)(A) that limit the sum of individual percentages of a bonus pool to 100 percent will not apply to remuneration paid before January 1, 2001, based on performance in any performance period that began prior to December 20, 1995.

(v) Compensation based on a percentage of salary or base pay. Notwithstanding paragraph (j)(1) of this section, the requirement in paragraph (e)(4)(i) of this section that, in the case of certain formulas based on a percentage of salary or base pay, a corporation disclose to shareholders the maximum dollar amount of compensation that could be paid to the employee, will apply only to plans approved by shareholders after April 30, 1995.

CHAPTER 11 SPECIAL COMMITTEES OF THE BOARD *

1-11 Corporate Governance: Law and Practice § 11.01

AUTHOR: S. Mark Hurd Andrew M. Johnston

§ 11.01 Introduction: Special Committee Purposes

Other chapters in this volume deal with standing committees of the board of directors, such as the audit and compensation committees.ⁿ¹ These committees have important roles and, although their authority and responsibilities may change over time, they remain as committees of the board, year after year. Occasionally, a "special" situation may arise that calls for the formation of a "special" committee. Although the responsibility for one of these "special" situations can be (and sometimes is) lodged with a standing committee, more frequently a new committee, formed to deal solely with the "special" situation, is created.

This chapter deals with two frequently used "special" committees--the special negotiating committee ("SNC") and the special litigation committee ("SLC").ⁿ² As the name implies, SNCs are formed to negotiate a particular transaction, typically one with or involving a corporate insider such as the CEO, a director or a significant stockholder. As will be discussed in this chapter, "negotiate" will often include decisions relating to whether to proceed with a transaction at all. An SLC wrestles with whether the corporation should pursue claims against a director or officer by someone (most often a stockholder) who contends that such claim should be brought.

CHAPTER 11 SPECIAL COMMITTEES OF THE BOARD *

2-11 Corporate Governance: Law and Practice § 11.02

AUTHOR: S. Mark Hurd Andrew M. Johnston

§ 11.02 Why Have a Special Negotiating Committee?

An SNC is established to deal with a proposed transaction between or involving the corporation and one or more of the corporation's directors, senior officers or stockholders. Because of the relationship the directors, officers or stockholders have to the corporation, the transaction may have the appearance (or the reality) of a conflict of interest transaction. Illustrative is the Delaware Supreme Court's opinion in *Weinberger v. UOP Inc.*,ⁿ¹ a seminal case in the SNC area. The Delaware Supreme Court reviewed a proposed merger transaction between UOP, Inc. and its majority stockholder parent. The court found that the parent had conducted itself in such a way in the transaction that the burden of proof in the litigation would be on the parent to prove that the transaction was entirely fair to the minority stockholders of UOP. In its discussion of the legal standard, the court noted in a footnote that:

Although perfection is not possible, or expected, the result would have been entirely different if [the subsidiary] had appointed an independent negotiating committee of its outside directors to deal with [parent] at arm's length. [citation omitted]. Since fairness in this context can be equated to conduct by a theoretical, wholly independent, board of directors acting upon the matter before them, it is unfortunate that this course apparently was neither considered or pursued. [citation omitted]. Particularly in a parent-subsiary context, a showing that the action taken was as though each of the contending parties had in fact exerted its bargaining power against the other at arm's length is strong evidence that the transaction meets the test of fairness. [citation omitted].ⁿ²

The precise effect of the approval of a transaction by an SNC comprised of independent directors is discussed in more detail below. However, as a general matter, the approval of a transaction by an SNC will result in a transaction that is much more likely to be sustained in the face of a judicial challenge.

[1] Alternatives to a Special Negotiating Committee

[a] Board Action

There are alternatives to an SNC. First, in a situation where a majority of the members of the board are independent and disinterested, the board, rather than a committee, can act with respect to a conflict transaction, if it does so in a

deliberate, informed manner.ⁿ³ Of course, the court will expect the board to have an active role in the consideration and negotiation of the transaction, particularly if a person with conflicting interests has significant involvement in the transaction. For instance, in *Alidina*, plaintiffs alleged that, as part of a sale of the Company, the CEO to whom the board had delegated the negotiation of the sale, also negotiated the sale to himself of a corporate asset at a price that was unfair to the corporation. In addressing the plaintiff's contention that the board had a duty to form a special committee, the court said:

Plaintiffs contend that the board breached its duty of care by yielding to [the CEO's] negotiations, by not using a special committee, and by not appropriately educating itself on the value of [corporate asset sold to the CEO]. Here, the board was admittedly not self-interested. It was within the board's business judgment to delegate the negotiation of the Transactions to its CEO. There is nothing inherently wrong with allowing an interested CEO to negotiate a transaction. [footnote omitted]. What does matter is whether the directors sufficiently oversee such negotiations by scrutinizing the resulting transaction in order to assure themselves that it is fair to the shareholders and to the company. There is no automatic requirement that the board employ a special committee to perform this evaluation, especially when a majority of the board is disinterested and independent. Here, the board considered whether a special committee was needed and explicitly found that one was not. This is a valid exercise of the board's business judgment. Therefore, the only questions remaining are whether the board was informed and whether its decision was based on a rational business purpose.ⁿ⁴

The court ultimately concluded that the board, having put the CEO in charge of the negotiations, did not do enough to monitor, and inform itself concerning, the results of the negotiations given the CEO's differing roles and interests.

[b] Minority Stockholder Approval

Case law makes clear that approval of a transaction involving a majority stockholder by a majority of the minority stockholders will have the same effect as approval by an SNC.ⁿ⁵

[c] Choosing Among the Alternatives

Each of the alternatives will have advantages in a particular circumstance. For instance, as discussed later in this chapter, the question of the independence of the members of a board of directors can be intensely factual and it may not be entirely clear that a corporation has any independent directors to serve on an SNC. In such a situation, the vote of a majority of the disinterested stockholders will provide greater certainty that, if the transaction is approved, it will be reviewed under the most beneficial legal standard attainable. By contrast, if a transaction does not otherwise require a stockholder vote,ⁿ⁶ use of an SNC can avoid the cost, expense and delay associated with seeking and obtaining stockholder approval.

In many situations, an SNC is preferable to a stockholder vote for a variety of practical reasons. First, from the perspective of the conflicted fiduciary (such as a majority stockholder), an SNC may be preferable because the majority stockholder will have somebody with whom to negotiate. In this way, the majority stockholder will be able to decide much sooner in the transaction whether it will be able to reach acceptable terms. In a situation involving a stockholder vote, it is much more difficult for the interested party to know how to get to the point of having a transaction it can present to the stockholders: with whom should it negotiate? how should it conduct the negotiations? As a result, there is a greater potential in a stockholder vote situation than in an SNC scenario that the interested party can spend a great deal of time and resources without knowing until the very late stages whether the transaction will be approved.

[2] Legal Principles Applicable to a Special Negotiating Committee

To understand the effect of the approval of a transaction by an SNC in various circumstances, it is necessary first to understand several general principles.

[a] Business Judgment Rule

A decision by a board of directors in which the directors have no direct or indirect personal interest, which is based upon all reasonably available material information and after careful consideration of alternatives and which is in the good faith furtherance of some identifiable corporate purpose, will not be interfered with by the courts or result in the imposition of liability for damages upon the directors, even if the decision later appears to have been unwise or to have caused harm to the corporation.ⁿ⁷ This is the so-called "business judgment rule."

A related concept is the business judgment presumption, which provides that if a decision of directors is challenged, it will be presumed that the directors satisfied their fiduciary duties and hence, for a plaintiff to obtain relief, such as enjoining the transaction or holding the directors personally liable for damages resulting from the decision, the plaintiff must rebut the presumption by alleging facts which, if true, would support liability.ⁿ⁸

[b] Directorial Duties

One way for a plaintiff to overcome the business rule presumption is to allege (and ultimately prove) facts that support the conclusion that the directors breached their fiduciary duties. These duties are, in general, the duties of care and loyalty.ⁿ⁹ In the context of deciding whether to approve a transaction, the fiduciary duty of care requires the directors "inform themselves, prior to making a business decision, of all material information reasonably available to them."ⁿ¹⁰ The duty of loyalty, requires that directors make decisions based on what is in the best interest of the corporation and its shareholders, free of any extraneous considerations. In the SNC context, the duty of loyalty is most often implicated.

[c] Fairness Standard

If a plaintiff is able to overcome the business judgment rule presumption by, for instance, pleading facts that demonstrate that a majority of the directors were interested in the particular transaction that was approved by the board of directors, the directors, to avoid liability, will have to prove that the transaction is "fair."ⁿ¹¹ Fairness is a broad-ranging, fact-intensive concept that has to do both with the economic or financial result achieved and the process by which it was achieved.ⁿ¹²

The Delaware courts have recognized that the burden of proving fairness is a difficult one and that the determination of which standard--fairness or the business judgment rule--applies in a particular context can be outcome determinative. As stated by the Delaware Supreme Court:

It is often of critical importance whether a particular decision is one to which the business judgment rule applies or the entire fairness rule applies. It is sometimes thought that the decision whether to apply the business judgment rule or the entire fairness test can be outcome determinative.

[B]ecause the effect of the proper invocation of the business judgment rule is so powerful and the standard of entire fairness is so exacting, the determination of the appropriate standard of judicial review frequently is determinative of the outcome of derivative litigation.ⁿ¹³

Although there have been cases in which courts have sustained a transaction as fair,ⁿ¹⁴ in general, well-advised business people do not want to plan to have to prove fairness in planning a transaction because "the doctrine of entire fairness does not lend itself to bright line precision or a rigid doctrine."ⁿ¹⁵

This is where the SNC comes into play. Depending on the type of transaction that is at issue and the parties to that transaction, approval of the transaction by an SNC can be substantial evidence of fairness, can shift the burden of proving unfairness to the plaintiff, or may result in a shift in the burden of proof from a fairness standard to the business judgment rule standard. Several identifiable types of transactions and the legal standard applicable to that type of transaction are discussed below.

(n5)Footnote 5. *Kahn v. Lynch Communication Sys.*, 638 A.2d 1110, 1117 (Del. 1994) .

(n6)Footnote 6. In general, stockholder approval is required as a matter of state law to authorize a merger effected under Section 251 of the Delaware General Corporation Law, a sale, lease or exchange of all or substantially all of the assets of a Delaware corporation (*Del. Code Ann. tit. 8, § 271*), to amend the certificate of incorporation of the corporation (*Del. Code Ann. tit. 8, § 242*) or to dissolve the corporation (*Del. Code Ann. tit. 8, § 275*). Stock exchange rules may also require stockholder approval of the issuance of stock by the listed corporation, typically exceeding 20 percent of the outstanding stock of the corporation. For instance, Section 312.03(c) of the Rules of the New York Stock Exchange requires shareholder approval prior to the issuance by a corporation, the shares of which are listed on the New York Stock Exchange of common stock or securities convertible into common stock, if the stock has or will have upon issuance voting power equal to or in excess of 20 percent of the voting power outstanding before the issuance.

(n7)Footnote 7. Drexler et al., *Delaware Corporation Law and Practice*, §15.03 (LexisNexis Matthew Bender).

(n8)Footnote 8. *Aronson v. Lewis*, 473 A.2d 805, 812 (Del. 1984) . See also Drexler et al., *Delaware Corporation Law and Practice*, §15.04 (LexisNexis Matthew Bender).

(n9)Footnote 9. The Delaware Supreme Court has also articulated a fiduciary duty of "good faith." *Cinerama, Inc. v. Technicolor, Inc.*, 663 A.2d 1156 (Del. 1995) . One Vice Chancellor has described the duty of good faith as "a subset of a director's duty of loyalty," *Orman v. Cullman*, 794 A.2d 5, 14 n.3 (Del. Ch., 2002). The Delaware Supreme Court has described the duty so as to suggest an element of "recklessness," stating that an "intentional dereliction of duty, a conscious disregard for one's responsibilities" would constitute bad faith. *In re the Walt Disney Co. Deriv. Litig.*, 906 A.2d 27, 66 (Del. 2006) .

(n10)Footnote 10. *California Pub. Employees' Ret. Sys. v. Coulter*, CA 19191, 2002 Del. Ch. LEXIS 144, at *34 (Dec. 18, 2002) .

(n11)Footnote 11. As stated in *Weinberger*, 457 A.2d at 710 :

When directors of a Delaware corporation are on both sides of a transaction, they are required to demonstrate their utmost good faith and the most scrupulous inherent fairness of the bargain... . The requirement of fairness is unflinching in its demand that where one stands on both sides of a transaction, he has the burden of establishing its entire fairness, sufficient to pass the test of careful scrutiny by the courts.

(n12)Footnote 12. As stated in *Weinberger*:

The concept of fairness has two basic aspects: fair dealing and fair price. The former embraces questions of when the transaction was timed, how it was initiated, structured, negotiated, disclosed to the directors, and how the approvals of the directors and the stockholders were obtained. The latter aspect of fairness relates to the economic and financial considerations of the proposed merger, including all relevant factors: assets, market value, earnings, future prospects, and any other elements that affect the intrinsic or inherent value of the company's stock... . All aspects of the issue must be examined as a whole since the question is one of entire fairness.

CHAPTER 11 SPECIAL COMMITTEES OF THE BOARD *

2-11 Corporate Governance: Law and Practice § 11.03

AUTHOR: S. Mark Hurd Andrew M. Johnston

§ 11.03 Transactions in Which to Use the Special Negotiating Committee

[1] Controlling Stockholder Squeezeout

Where a controlling stockholder¹ seeks to acquire the shares of the minority stockholders in a merger transaction (assuming the majority stockholder owns less than 90 percent of the corporation's outstanding voting stock), the majority stockholder will have the burden of proving fairness in the context of a stockholder challenge to the transaction.²

Prior to 1994, the effect of the approval of a properly functioning SNC was unclear because there were two lines of cases in the Delaware Court of Chancery concerning the effect of approval of an SNC. Under the first, the approval of the SNC had the effect of changing the substantive standard of review from fairness to the business judgment rule.³ Courts applying this approach reasoned that if the SNC process really did replicate arm's-length negotiating, there was no reason not to apply the business judgment rule standard. In contrast, other decisions, such as *Citron v. E.I. duPont de Nemours & Co.*, emphasized the dominating role of the majority stockholder and held that even in the face of arm's-length negotiations, the dominant role of the majority stockholder was such to negate the change in standard.⁴

Ultimately the Supreme Court determined that the fairness standard should apply in *Kahn*. As the rationale for this holding, the Supreme Court in *Kahn*, quoted with approval the following passage from the *Citron* ⁵ case:

Parent subsidiary mergers, unlike stock options, are proposed by a party that controls, and will continue to control, the corporation, whether or not the minority stockholders vote to approve or reject the transaction. The controlling stockholder relationship has the potential to influence, however subtly, the vote of [ratifying] minority stockholders in a manner that is not likely to occur in a transaction with a noncontrolling party.

Even where no coercion is intended, shareholders voting on a parent subsidiary merger might perceive that their disapproval could risk retaliation of some kind by the controlling stockholder. For example, the controlling stockholder might decide to stop dividend payments or to effect a subsequent cash out merger at a less favorable price, for which the remedy would be time consuming and costly litigation. At the very least, the potential for that perception, and its possible impact upon a shareholder vote, could never be fully eliminated. Consequently, in a merger between the

corporation and its controlling stockholder--even one negotiated by disinterested, independent directors--no court could be certain whether the transaction terms fully approximate what truly independent parties would have achieved in an arm's length negotiation.⁶ The debate on this issue may not be over however. In a recent decision, Vice Chancellor Strine suggested in *dicta* that Delaware law should be reformed to provide for business judgment rule review if a squeeze-out transaction initiated by a majority stockholder is approved by an independent special committee and subject to the approval of a majority of the minority stockholders.⁷

[2] Other Transactions Involving Controlling Stockholder

If a controlling stockholder wishes to transact business with the corporation by, for instance, selling assets to the corporation, the fairness standard will apply.⁸ A properly functioning SNC will shift the burden to the plaintiff to prove the transaction is unfair.⁹

[3] Transactions Involving Directors

A transaction between the corporation and a director or a transaction in which some members of the board may have interests different than the stockholders generally could, under certain circumstances, be reviewed under the fairness standard. For instance, in *Chaffin v. GNI Group, Inc.*,¹⁰ the board approved a merger agreement with a third party by a vote of 5-1. Two of the five board members were interested in the transaction because of the benefits they would receive under their employment agreements as a result of the merger. Of the three independent directors, two voted in favor of the transaction and one voted against. The court found that the business judgment rule did not apply because the one independent director who voted against the transaction prevented approval of the transaction by a disinterested majority. However, if an SNC negotiates and approves the transaction, the business judgment rule standard of review should apply.¹¹

[4] Transactions in Which Management Has an Interest

Sometimes it will be necessary or appropriate to have an SNC function not because of conflicts of interest at the shareholder or director level, but because of the interest of officers and management of the company in a particular transaction. The quintessential example of this type of transaction is the management buyout ("MBO") proposal in which some group from within the management of the corporation makes a proposal to buy the company.¹² In some cases, management will own some but not a significant amount of the company's stock. Classically, if only a few members of management are board members, and independent directors constitute a majority of the board, it might not be necessary to form an SNC.¹³ However, in most instances, an SNC is advisable, particularly in the context of an MBO. First, an SNC will be better able to function in the face of the MBO proposal than the full board. In the MBO context, as a practical matter, there will be heightened responsibilities placed on the committee because management, from whom board members will typically receive information and recommendations, will now be less available to the board as a source of information that can be accepted uncritically. Accordingly, the board or the committee will have to function more intensely in a "quasi management" role than it would in other contexts.¹⁴

The second reason MBO proposals typically require an SNC is that an MBO proposal will often require the board to test the market to see what other transactions are available. Thus, it is not unusual for these situations to result in a wholesale auction of the company, which could well further isolate management and diminish its role, and, in turn, require even greater participation of the committee. As a practical matter, it will be easier for a smaller group of directors to function in this context than a large group. Thus, SNCs comprised of less than all of the independent directors are sometimes formed even if a clear majority of the board is independent.

Management interests may arise in other contexts that might call for an SNC. For instance, if the company is reviewing all of its strategic alternatives, including a sale of the company, senior management may well have employment contracts that would be triggered upon a change in control. In this situation, management will have interests that are

different from the stockholders. Thus, the independent members of the board need to be able to assess the wisdom of the various strategic alternatives in such a way to be able to filter out the interests or biases of management.ⁿ¹⁵

Stockholder, director or management interests may arise in any variety of situations and transactions and corporate planners should do their best to anticipate likely scenarios which might result in the need for a special negotiating committee to function. There can be difficult judgments that must be made in this context. For instance, assume that the company has put itself up for sale and wants to conduct an active auction so as to maximize shareholder value. At the beginning of the process, senior management is asked whether it intends to participate in the auction as a buyer and its members state that they do not intend to participate in the auction. In this circumstance, it is a reasonable conclusion that an SNC is not required. However, corporate planners should carefully assess the nature of the assets of the company and the possibility that, in light of the sales process, management may change its mind.

Even in those cases where a judgment is made that an SNC is not necessary, care should be taken to preserve the flexibility to have a committee formed later in the transaction with as little disruption and delay as possible. For instance, even if a decision is made that an SNC is not necessary, it may be advisable to have the independent directors of the company, or some subgroup of them, involved in the process of interviewing and retaining advisors. In this way, if management later becomes a bidder and it is determined to be necessary to form an SNC, then the significant involvement of the independent directors early on in the advisor-retention process may permit the advisors to move into the role of advisors to the SNC.ⁿ¹⁶

(n7)Footnote 7. *In re Cox Communs., Inc. S'holders Litig.*, 879 A.2d 604, 606 (Del. Ch. 2005).

(n8)Footnote 8. *Kahn v. Tremont Corp.*, 694 A.2d 422, 428 (Del. 1997).

(n9)Footnote 9. *Kahn v. Tremont Corp.*, 694 A.2d at 428-29 ; see also *In re Emerging Communications, Inc. Shareholders Litig.*, C.A. 16415, 2004 Del. Ch. LEXIS 70, at *123-24 (Del. Ch. May 3, 2004) . In *Emerging Communications*, a member of the special committee formed to assess a going private transaction initiated by the corporation's controlling stockholder/CEO was found not to be independent because the fees he earned from consulting agreements with the CEO formed a significant percentage of his income. In addition, the committee member's son-in-law had consulting arrangements with the CEO that "would be put at risk if [the committee member] took a position overly adversarial to [the CEO]." *Id.*

(n10)Footnote 10. Chaffin, (Sept. 3, 1999) .

(n11)Footnote 11. See, e.g., *In re Western Nat'l Corp. S'holders Litig.*, Consol. CA 15927, 2000 Del. Ch. LEXIS 82 (May 22, 2000) ; *In re Nabisco, Inc. S'holders Litig.*, Consol. CA 10389, 1989 Del. Ch. LEXIS 9 (Jan. 31, 1989) .

(n12)Footnote 12. *In re Nabisco, Inc. S'holders Litig.*, Consol. CA 10389, 1989 Del. Ch. LEXIS 9 (Jan. 31, 1989) .

(n13)Footnote 13. *Puma v. Marriott*, 283 A.2d 693 (Del. Ch. 1971) .

(n14)Footnote 14. Advisors representing an SNC in the context of an MBO should expect that more will be required of them than in a typical assignment because they will need to carry out staff and information-gathering functions that would normally be handled by management.

(n15)Footnote 15. Some might say that directors have the same conflict (i.e., a desire to stay in office) and that, for that reason, no director is independent. In general, the courts have stated that an allegation that a director took a particular action to preserve his or her director's fees or office is not sufficient to support a claim that the director is not disinterested. *Aronson v. Lewis*, 473 A.2d 805 (Del. 1984) . However, this decision is premised on "typical" director fees being at issue. More recently, courts have been more receptive to allegations that a director's compensation was sufficiently large to result in the director not being disinterested. See § 11.04[1] below.

(n16)Footnote 16. This was the fact pattern in *In re Cysive, Inc., S'holder Litig.*, 836 A.2d 531 (Del. Ch. 2003) .

CHAPTER 11 SPECIAL COMMITTEES OF THE BOARD *

2-11 Corporate Governance: Law and Practice § 11.04

AUTHOR: S. Mark Hurd Andrew M. Johnston

§ 11.04 Special Committee Membership

The cornerstone concepts in most of the cases dealing with both SLC and SNCs are "disinterestedness" and "independence." Except with respect to a very narrow statutory provision in the Delaware General Corporation Law,ⁿ¹ these concepts have been developed almost wholly in the case law using a common law approach. This contrasts with definitions of independence crafted by others, such as the drafters of the Model Business Corporation Act and the American Law Institute Corporate Governance Project on the one hand, and regulatory bodies such as the New York Stock Exchange, American Stock Exchange and the National Association of Securities Dealers, on the other.

The tension between a common law approach and a statutorily-defined approach has been well articulated in the commentary to Subchapter F of Chapter 8 of the Model Business Corporation Act, which deals with directors' conflicting interest transactions.ⁿ² A statutory approach provides certainty and predictability to business people so that they can plan business transactions accordingly. However, a rigid set of rules may by definition yield anomalous results in the case of conduct or decisions that seem as though they ought to be proscribed but yet fall on the "wrong" (or right depending on your perspective) side of a definition. Although which is the better approach will continue to be debated, Delaware has for the most part, adopted a common law approach. The balance of this section discusses some of the key concepts in determining independence.ⁿ³

The two paramount concepts used throughout discussions of SNCs and their functioning are "disinterestedness" and "independence." Committee members are supposed to be "independent" and free of any disabling conflict of interest ("disinterested"). The committee needs to retain "independent" advisors. A great deal is packed into these concepts and it is helpful to dissect their components carefully because interest and independence are often confused.ⁿ⁴

[1] "Disinterestedness"

A director is "disinterested" if he or she neither appears on both sides of the transaction in question nor will gain any "personal financial benefit 'from the transaction' in the sense of self-dealing, as opposed to a benefit which devolves upon the corporation or all stockholders generally."ⁿ⁵ The classic example of someone who is not disinterested is the director who is conducting business with the corporation by, for example, selling assets to or buying assets from the corporation. Note that a director may be disinterested for one purpose but not for another: a director who is buying

assets from the corporation is not disinterested in the decision whether to effect that sale or its terms. That same director may be disinterested for purposes of consideration of an unrelated transaction involving another director.

Direct involvement in a transaction is not the only factor bearing on interest. A director may also be interested if "a corporate decision will have a materially detrimental impact on a director, but not on the corporation and the stockholders."⁶ An ongoing commercial relationship with the corporation may affect a director's judgment such that she may not be disinterested. For instance, assume that Director D, in addition to being a director of Corporation A, is also the owner of Supplier Corporation, all the income of which comes from a contract between Corporation A and Supplier. The board of Corporation A is considering selling Corporation A to a competitor of Supplier. If the sale is completed, Supplier's contract with Corporation A will be terminated. It is unlikely that Director D is independent for purposes of deciding whether to sell Corporation A.

Having an interest alone is not necessarily enough to disqualify a director from serving on an SNC. The interest must be "material."⁷ The relevant determination is whether interest is significant enough to the particular director in question "in the context of the director's economic circumstances, so as to have made it improbable that the director could perform her fiduciary duties ... without being influenced by her overriding personal interest."⁸ In one case involving a challenge to the purchase by one affiliate of a controlling stockholder of shares in another corporation owned by another affiliate of the controlling stockholder, a member of the SNC who was a partner in a small law firm that received large fees from the controlling stockholder was found not to be independent.⁹ Similarly, other members of the committee who had significant consulting arrangements with the controlling stockholder and its affiliates were also found not to have been independent as a result of those consulting arrangements.¹⁰

As a general rule, because of the nature of the materiality test, it will often be difficult to conclude with certainty whether particular directors who have ongoing commercial or consulting arrangements with the corporation or affiliates of parties involved in a transaction will be disinterested. As discussed elsewhere, counsel should keep in mind the purpose of having an SNC in the first place and, in consultation with his or her clients as appropriate, weigh the benefits and risks of proceeding in the face of the uncertainty. One reasonably clear exception is in the case of high net worth individuals who serve on committees and for whom consulting or employment arrangements, while perhaps significant in an objective way, may be found to be insignificant to the particular individual.¹¹

It is also important for counsel to understand where the consulting arrangements originated and how they were approved. For instance, did they come about solely with the approval of management or was the board involved in approving the particular relationship. In the former case, it is more likely that the director will be seen by a court as being "in the pocket" of management.

There are several well-recognized situations that cause directors not to be disinterested. First, if D is a director of both Corporation A and Corporation B, and Corporation A and Corporation B are engaging in a significant commercial transaction, D cannot be deemed disinterested because she will have fiduciary duties to act in the best interest of each of the corporations.¹²

Second, the transaction may be between the corporation and the director herself, or an entity in which she has a significant (material) economic interest.

Third, other financial or business relationships may compromise disinterestedness. A director who is also an officer or employee of the corporation may have significant interests in his status as an officer or employee, as opposed to his status as a shareholder.¹³ Similarly, directors sometimes have consulting arrangements with the corporation. Those consulting arrangements may be significant enough to cause the director to be considered non-independent. A 2003 case raises the possibility that, depending on a director's income and net worth, a director's expectation of compensation as a director may need to be analyzed to determine disinterestedness.¹⁴ The key in examining each of these relationships is whether the director will have a sufficient economic interest in continuing or maintaining the relationship with the

corporation, or in the terms of the consulting contract or his office as a director, such that the director is not in a position to make a business judgment based on what is in the best interest of the stockholders.

In a recent case, the Delaware Court of Chancery assessed whether a *potential* conflict of interest of two special committee members was enough to find them interested in a decision to terminate the employment of the corporation's founder, who was also the Chairman, CEO and President of the company.¹⁵ After the special committee decided to terminate the founder, one Committee member took over the position of "non-executive Chairman" and the other became the president and CEO. The Court found that the committee members were not motivated by the potential to fill the offices vacated by the individual whose employment they voted to terminate. In so finding the Court wrote about potential conflicts:

Directors are not conflicted simply because they have the potential to be conflicted; they are conflicted because their loyalties are divided in such a way that they are unable to serve in the best interests of the corporation. Thus, to declare a director to have a disabling, disqualifying conflict of interest requires a finding that the nature of the director interest is "substantial" or "material," but not "merely incidental" or, in this case, "potential."¹⁶

The Court reached this conclusion even though the resolutions forming the special committee included a recital that the committee was to be comprised "exclusively of non-management directors who have no potential conflict of interest."¹⁷

[2] Independence

The directors serving on the SNC must also be "independent." Independence means that the "director's decision is based on the corporate merits of the subject before the board rather than extraneous considerations or influences."¹⁸ This concept can be somewhat more amorphous than "interest" and involves determining whether the director is " beholden " to an interested party in the particular transaction or otherwise incapable of independent judgment.

Familial relationships are one reasonably clear factor that will compromise independence. Thus in one case, a director was found to have lacked independence with respect to a transaction that financially benefited his son.¹⁹ In another case, a director who was the brother-in-law of the chief executive officer of a corporation and involved in various businesses with the CEO was found not to have been able to consider impartially a stockholder demand that was adverse to the CEO's interest.²⁰ Note that the courts have not typically inquired into the nature of or details concerning the familial relationship. Thus, courts have not considered whether the *actual* relationship between a mother and daughter is so estranged that one could be considered independent from one another.

The strong, domineering personality of a chairperson of the board of directors could result in directors, even though outwardly independent, being found not independent. Thus, in one case, the Chancery Court found that two of the three directors of a company were dominated by the third director who was the company's president and controlling stockholder.²¹ The court stated:

It is perfectly evident to me that Odlum dominated and controlled those members of Airfleet's board who [made the decision in question]. I use "dominated" and "controlled" in the sense that, criminality aside, his wishes were their commands. My conclusion is drawn from the interplay of several circumstances; some tangible and others intangible: the two directors who voted to reject the offer were both, realistically speaking, beholden to Odlum; Odlum was and is Airfleet's president and a member of its board; the manner in which the corporate affairs were handled as among the board members showed that realistically this was a one-man board - an Odlum board... I emphasize that my conclusion is based not merely on the manner in which the various director relationships were created but on the cumulative effect of the trial record.²²

In contrast to this finding, which was made after trial, the election of a director by a controlling stockholder, standing alone, does not compromise the independence of the directors.ⁿ²³

Actions by a controlling person may result in a director being found to be not independent, as was the case in *Kahn*. Other, less obvious relationships, may bear on independence and can require some skillful vetting by counsel. For instance, in one case,ⁿ²⁴ the acquisition of a private corporation by a public corporation was challenged. The corporations had a common stockholder that owned approximately 40 percent of the common stock of each. The common stockholder had the same representative (Mr. Wadsworth) on the board of each corporation. The Court of Chancery, ruling on the defendants' motion to dismiss the complaint, questioned the independence of one member (Mr. Blaesar) of a special committee appointed by the board of directors of the public company to negotiate the transaction because Mr. Wadsworth was also the chair of the compensation committee of a third corporation of which Mr. Blaesar was president and chief executive officer. The court found that Mr. Wadsworth was "uniquely situated to influence the level and timing" of Mr. Blaesar's compensation. Although acknowledging that Mr. Wadsworth, as the chair of the compensation committee, undoubtedly had "limited power to act unilaterally,"ⁿ²⁵ the court found reason (at least at the motion to dismiss stage) to doubt Mr. Blaesar's ability to disregard Mr. Wadsworth's interests as the representative of a significant investor in the acquiring and acquired companies.

It is an unhappy fact of life that, in some circumstances, generally dependent upon when counsel is hired in the SNC formation process, counsel to the SNC may have to "fire" one of his clients in the sense that she may have to recommend to the SNC or to the full board that a director previously placed on the SNC no longer serve on the SNC.

When faced with these situations and in assessing generally questions of committee membership and independence, counsel, the SNC and the board should keep in mind the purpose of the SNC process--ensuring that if the SNC decides to approve or recommend a transaction, that transaction will be completed. A transaction has a greater likelihood of being sustained in the face of a challenge if it has been approved by a committee comprised of clearly independent directors. In light of this, in cases in which the independence of any particular director is not clear, counsel and the SNC should carefully weigh including that director on the committee.

FOOTNOTES:

(n1)Footnote 1. *Del. Code Ann. tit. 8, § 144*.

(n2)Footnote 2. Model Bus. Corp. Act--Official Text, Section 8.60 pp. 8-134-8-136 (2005).

(n3)Footnote 3. Note that the cases discussing disinterestedness and independence in the special litigation committee context have generally had equal application to special negotiating committees and vice versa. A recent case in the special litigation committee area, *In re Oracle Corp. Derivative Litig.*, 824 A.2d 917 (*Del. Ch.* 2003), discussed below, suggests that equal application should not necessarily be the case. Specifically, the court stated that a director might find it:

[E]asier to say no to a friend, relative, colleague, or boss who seeks assent for an act (*e.g.*, a transaction) that has not yet occurred than it would be to cause a corporation to sue that person... . Denying a fellow director the ability to proceed on a matter important to him may not be easy, but it

must, as a general matter, be less difficult than finding that there is reason to believe that the fellow director has committed serious wrongdoing and that a derivative suit should proceed against him.

Oracle Corp., 824 A.2d at 940 . Similarly, in *Beam v. Stewart*, 845 A.2d 1040, 1055 n.45 (Del. 2004) , the court noted that the analysis applied to determine the independence of a special negotiating committee has procedural characteristics different from those applied to a special litigation committee or to presuit demand cases. Exactly where the line of demarcation is (or will be) between the concepts of disinterestedness and independence for special litigation committees and special negotiating committees cannot be identified with certainty at this point, although it appears that the standards will be more exacting for SLCs than SNCs. Counsel faced with the question should carefully review developments in the area.

(n4)Footnote 4. *See Orman v. Cullman*, 794 A.2d 5, 25 n.50 (Del. Ch. 2002) .

(n9)Footnote 9. *Kahn v. Tremont Corp.*, 694 A.2d 422, 429 (Del. 1997) .

(n10)Footnote 10. *Kahn v. Tremont Corp.*, 694 A.2d at 429 . *see also In re Emerging Communications, Inc. Shareholders Litig.*, C.A. 16415, 2004 Del. Ch. LEXIS 70, at *123-24 (Del. Ch. May 3, 2004) . In *Emerging Communications*, a member of the special committee formed to assess a going private transaction initiated by the corporation's controlling stockholder/CEO was found not to be independent because the fees he earned from consulting agreements with the CEO formed a significant percentage of his income. In addition, the committee member's son-in-law had consulting arrangements with the CEO that "would be put at risk if [the committee member] took a position overly adversarial to [the CEO]." *Id.*

(n11)Footnote 11. *In re The Student Loan Corp. Derivative Litig.*, CA 17799, 2002 Del. Ch. LEXIS 7 (Jan 8, 2002) suggests that the case in which the compensation of a person does not create an interest will be the exception, not the rule:

Absent some unusual fact--such as the possession of inherited wealth--the remuneration a person receives from her full-time job is typically of great consequence to her. It is usually the method by which bills get paid, health insurance is affordably procured, children's educations are funded, and retirement savings are accumulated.

Student Loan, 2002 Del. Ch. LEXIS 7, at *9, n.3 .

(n12)Footnote 12. *See, e.g., In re Freeport-McMoRan Sulphur, Inc. Shareholder Litig.*, C.A. 16729, 2005 Del. Ch. LEXIS 96, at *29 (Del. Ch. June 30, 2005) ("[E]ven if their economic interests were immaterial, the Common Directors were still not able to act independently in the transaction because they sat on both boards and owed the same duty of loyalty to both companies.").

(n13)Footnote 13. *See, e.g., In re Lear Corp. S'holder Litig.*, 926 A.2d 94 (Del. Ch. 2007) (explaining how a CEO's desire to secure the payment of accrued retirement benefits, his interest in continued employment, and achieving

liquidity for his shares made his economic motivations in supporting a going-private merger sufficiently different from those of public stockholders and made his appointment by a special committee of admittedly independent, disinterested directors as a negotiator to represent the interests of the public stockholders "less-than-ideal"); *But see Benihana of Tokyo, Inc. v. Benihana, Inc.*, 891 A.2d 150, 175-76 (Del. Ch. 2005) (finding that a CEO was not interested in a transaction that effectively diluted the percentage of shares held by the plaintiff, the controlling stockholder, and, according to the plaintiff, "removed a threat" to the CEO's incumbency).

(n14)Footnote 14. *See In re Cysive, Inc., S'holder Litig.*, 836 A.2d 531, 536 (Del. Ch. 2003) (noting that the compensation of a particular director was not "a material portion of his annual income or of his net worth"). The Court in *Emerging Communications* found that a member of a special committee was not independent due in part to "generous" director and committee fees that represented 10% of the committee member's annual income. The committee member's expectation of continued service as a director in the majority shareholder/CEO's companies after the closing of the going private transaction that the special committee was assessing was also a factor. The Court wrote: "That expectation, coupled with the fact that his director and committee fees represented a sizeable portion of his income, was sufficient to vitiate [the committee member's] independence for purposes of considering objectively whether the Privatization was fair to minority stockholders." *In re Emerging Communications*, 2004 Del. Ch. LEXIS 70, at *126-127 .

CHAPTER 11 SPECIAL COMMITTEES OF THE BOARD *

2-11 Corporate Governance: Law and Practice § 11.05

AUTHOR: S. Mark Hurd Andrew M. Johnston

§ 11.05 Simulating Arm's Length Negotiations

As discussed earlier, the essence of the SNC process is to simulate arm's-length negotiating so that investors and a reviewing court can have confidence in the result. There are two paramount elements in determining whether the SNC's work should be respected: the committee's authority to negotiate, and its ability to be informed.

[1] Committee Authority

The SNC's authority is largely a function of the terms of action, typically a board resolution. The second aspect is the reality of negotiation, which in turn depends on the SNC's understanding of its job and the other party not acting in such a way as to deprive the SNC of its ability to negotiate.

As to the committee's understanding of its role, courts have found the approval of a transaction by an SNC wanting when it was apparent that the SNC did not understand that its job was not simply to "bless" a transaction, but to assess it critically and rigorously, and then act on the transaction in light of the SNC's authority. This does not mean simply achieving a "fair transaction" or a transaction as to which an investment banker can deliver a fairness opinion. Rather, the SNC's responsibility is to approve a transaction only if it believes that it is the best transaction available to the company.ⁿ¹

An example of a misguided committee is found in *In re Trans World Airlines, Inc. Shareholders Litigation*.ⁿ² In that case, involving an offer by a majority stockholder to buy the interests of the minority stockholders, the court found that the members of the special committee "did not seem to understand that their duty was to strive to negotiate the highest or best available transaction for the shareholders whom they undertook to represent."ⁿ³ As support for this conclusion, the court quoted a testimony from the two members of the special committee that suggested that they believed that the committee's obligation was to achieve a transaction as to which their investment banker could render a fairness opinion.ⁿ⁴ Ultimately, the court stated that:

The special committee did not supply an acceptable surrogate for the energetic, informed and aggressive negotiation that one would reasonably expect from an arm's-length adversary. *Weinberger v. UOP Inc.* envisions that minority interests can be protected by a special committee that emulates that arm's-length process. But the burden shifting effect will not occur where the special committee did not

adequately understand its function--to aggressively seek to promote and protect minority interests--or was not adequately informed about the fair value of the firm and the minority shares in it.ⁿ⁵

Although the court did not reach a final conclusion as to the efficacy of the committee because of the preliminary nature of the relief sought, it found that "substantial questions" had been raised about the effectiveness of the committee.

An SNC may be faced with situations in which it is unable to negotiate actual improvements in a transaction by the time the transaction is presented to it. For instance, assume that active and independent management "pre-negotiates" a transaction with a majority stockholder so that, by the time the transaction is presented to the SNC, there is nothing left to negotiate (at least from the perspective of the party proposing the transaction). Is an SNC required to reject a transaction in this circumstance? Delaware courts have recognized that the essence of negotiation is the ability of an SNC to say no to a transaction.ⁿ⁶ If the SNC fully understands that it has this ability, understands the basis for improvements to the transaction that have already been previously negotiated, and ultimately satisfies itself, perhaps through an attempt to negotiate improvements itself, that a better transaction is not available, the "pre-negotiation" should not necessarily mean that the SNC cannot appropriately approve the transaction. This scenario puts the SNC in an awkward position, however, and should be avoided.ⁿ⁷

An example why this scenario should be avoided is found in *In re SS&C Technologies, Inc. Shareholders Litig.*ⁿ⁸ In this case, the Delaware Court of Chancery disapproved a settlement agreement between plaintiff stockholders challenging a management-led cash-out merger and the defendants. The corporation's Chairman and CEO had initiated talks with a private equity group that eventually led to the corporation being taken private and the CEO gaining a large equity interest in the surviving entity as well as a new employment agreement. The board of directors established a special committee of disinterested directors that was given the power to explore alternatives to the deal that the CEO brought to the corporation. The committee also had the power to consider, accept, or reject any acquisition proposal and to retain independent legal and financial advisors. The committee ended up accepting the CEO's deal but managed to win some advantages for the stockholders-including a slight bump in the offering price. However, in rejecting the settlement, the Court discussed its discomfort with the process by which the deal was approved:

[D]id [the CEO's] general agreement to do a deal with [the private equity firm] make it more difficult for the special committee to attract competing bids, especially from buyers not interested in having [the CEO] own a significant equity interest in the surviving enterprise? And, did [the CEO's] negotiation of a price range with Carlyle unfairly impede the special committee in securing the best terms reasonably available?ⁿ⁹

Although this case did not deal directly with the efficacy of the special committee, the Court did raise some important questions regarding the pre-negotiation of some of the terms of a transaction. The Court had these reservations despite the committee's broad powers and independence and despite its ability to win some concessions for stockholders.

The SNC and its advisors should also be clear about the interests the SNC is seeking to protect in the transaction. In *Levco Alternative Fund Ltd. v. The Readers Digest Association, Inc.*,ⁿ¹⁰ plaintiff challenged a recapitalization transaction for a company with two classes of common stock: Class A common stock, which was nonvoting and was held by the public; and Class B common stock, which was entitled to vote and was held by members of the family that founded the corporation and trusts that were affiliated with those family members. In the transaction, the company had agreed to purchase shares of its Class B common stock for cash from certain holders. The remaining Class B common shares would be reclassified at a premium for shares of a new class of common stock, and each outstanding share of nonvoting Class A common stock would be reclassified into one share of the new common stock. An SNC was appointed to evaluate the fairness of the transaction. The Chancery Court had found that the SNC regarded its role as protecting the interests of the corporation as a whole rather than the interests of the holders of any particular stock.

On appeal, the Supreme Court of Delaware ruled that, given the differing interests of the two classes of common stock

in the transaction, the special committee's functioning was flawed because it evaluated the transaction (and the purchase of the Class B common stock for cash in particular) from the perspective of the corporation as a whole rather than from the perspective of the holders of the Class A common stock. In this regard, the Supreme Court of Delaware found it important that the special committee did not obtain from its financial advisor an opinion that the transaction was fair to the holders of the Class A common stock.ⁿ¹¹

Second, the process must be conducted in such a way that the court will have confidence that the SNC was actually able to negotiate. Thus, if one party acts in such a way so as to effectively deprive the SNC of its ability to negotiate or if the SNC conducts negotiations in a problematic way, an SNC's ultimate approval of the transaction may not have any legal effect. For example, in *Kahn*, the court found that the SNC had been effectively deprived of its ability to negotiate a transaction as a result of threats by the majority stockholder to circumvent the SNC by making a business acquisition proposal directly to the stockholders at a lower price than it had been discussing with the SNC.ⁿ¹²

Precisely where the line is between "hard bargaining" by an interested party and actions that deprive an independent committee of its ability to negotiate a transaction is not necessarily clear. For instance, in one case, the Delaware Chancery Court found no fault with the 80 percent stockholder who initially began negotiations with an SNC but later broke off those negotiations and made a tender offer directly to the corporation's stockholders and subsequently effected a short-form merger.ⁿ¹³ Nonetheless, interested parties in transactions, particularly majority stockholders in light of the *Kahn* case, must be careful to avoid tactics that might be seen as "heavy handed" or threatening if they wish to have the benefits of SNC approval.

Courts will also take into account how the SNC chose to negotiate the transaction. Of particular importance is who the SNC selects to conduct the negotiations and the involvement of the SNC in the negotiations themselves (or in overseeing the negotiations). Typically, the SNC's investment banker will negotiate the financial parameters of the transactions. Counsel to the SNC will tend to the legal issues, and one or more members of the SNC would be involved in direct, face-to-face negotiations on significant, "deal breaker" points. Other approaches are, of course, possible but the SNC and its advisors should be sensitive to options that could cause concern about the effectiveness of the negotiating strategy. For instance, in one case,ⁿ¹⁴ an SNC was formed to negotiate the terms of an acquisition with the corporation's chief executive officer, who was also a director and a significant stockholder. The complaint alleged that the SNC delegated to another director, who was not a member of the SNC, the authority to negotiate the terms of the transaction. This director was also an officer of the corporation and, so the complaint alleged, beholden to the CEO. On the basis of this allegation and other alleged flaws in the process, the Court of Chancery denied defendants' motion to dismiss the plaintiff's claims.

In a recent case, *In re Lear Corporation*, the special committee gave the CEO the power to negotiate, without the participation or supervision of the special committee, a going-private merger that allowed him to liquidate his equity holdings, accelerate and secure his retirement benefits, and continue in a managerial position in the private company.ⁿ¹⁵ The Court found that this method of conducting negotiations was "far from ideal and unnecessarily raises concerns about the integrity and skill of those trying to represent [the target's] public investors."ⁿ¹⁶ The special committee's decision to delegate to the CEO the power to negotiate the merger was a factor in the Court's decision to grant an injunction preventing a vote on the merger. The merger proxy materials did not disclose that, prior to entering into merger discussions with the buyer, the CEO negotiated with the board over concerns he had about his retirement and his equity stake in the company.ⁿ¹⁷ The Court wrote:

Because the CEO might rationally have expected a going private transaction to provide him with a unique means to achieve his personal objectives, and because the merger ... in fact secured for the CEO the joint benefits of immediate liquidity and continued employment that he sought just before entering the merger, [the target] stockholders are entitled to know that the CEO harbored material economic motivations that differed from their own that could have influenced his negotiating posture... . Given that the Special Committee delegated to the CEO the sole authority to conduct the merger negotiations, this

concern is magnified.ⁿ¹⁸

The Court issued an injunction until the proxy statement could be amended to inform the stockholders of the CEO's prior talks with the board.ⁿ¹⁹

As a result of the nature of most SNC projects, it is to be expected that decisions made by the SNC will be looked at, second-guessed and perhaps criticized. This highlights the need for the SNC to ask hard questions, test assumptions, be thoroughly informed and explore alternatives. Although no process is ever perfect, SNC assignments demand prudent, informed action. If, as a result of deadlines or other time pressures, the SNC is not able to explore an area or procure information that, without the time constraint, it would otherwise obtain, the SNC should specifically consider the constraint and make a decision not to get the additional information. As one court has recognized, a decision not to obtain more information either because of its cost or otherwise, is much a business judgment that ought to be respected as any other decision that a board or committee can make.ⁿ²⁰

In this context, SNCs and their counsel should be aware that, in certain circumstances, legal avenues to obtain information that might not be available in other circumstances may be available in the SNC process. Specifically, in *Kahn v. Tremont*,ⁿ²¹ Chancellor Allen found that a majority stockholder had a duty to provide to an SNC certain information that the majority stockholder had prepared in connection with a proposal to have two affiliated companies with a common parent swap certain assets. This information included material facts relating to the use or value of the assets in question to the corporation including, for instance, alternate uses of assets or "hidden value" (e.g., there is oil under the land subject to negotiation) and all material facts that the majority stockholder knows relating to the market value of the corporation including such facts as "forthcoming changes in legal regulation or technological changes that would affect the value of the assets in question" either to the corporation or to others. On the other hand, the Chancellor recognized that there were certain categories of information that a majority stockholder did not have a duty to disclose, such as the top price the majority stockholder would pay.

The extent of financial data that a controlling stockholder must provide may not always be completely clear. In one case,ⁿ²² for example, the Delaware Court of Chancery found that the controlling stockholder's failure to provide the SNC with the company's most recent financial projections, which were markedly improved over earlier projections, resulted in an uninformed SNC. In contrast, in *In re Cysive, Inc., Shareholders Litigation*,ⁿ²³ a case involving a management buyout by the CEO (who controlled approximately 40% of the company's stock), the CFO, and other members of senior management, the Court of Chancery Court, while noting that the CFO's failure to provide a budget featuring revised revenue figures to the SNC was "unwise and improper" nonetheless held that this omission did not impair the functioning of the SNC or its advisors. The financial projections withheld in these cases are factually distinguishable, which may explain this disparity of treatment. First, unlike the financial data in *Emerging Communications*, the financial projections withheld in *Cysive* reflected a less favorable forecast of the company's value than the financial data previously provided to the *Cysive* SNC. Moreover, the *Cysive* court found that the projections that the CFO failed to provide to the SNC were not reliable revenue projections, while the *Emerging Communications* court did not discuss the reliability of the omitted information in that case. These cases therefore illustrate that withholding certain, but not all, types of financial information from an SNC may render the SNC uninformed.

[2] Committee Powers

Typically, an SNC would be established as the result of the adoption by a board of directors of a resolution establishing the committee, appointing its members and specifying the committee's authority and responsibilities. Several factors can affect the powers and responsibilities that are delegated to the SNC. First, the applicable corporation statute and the corporation's certificate of incorporation and bylaws may limit the board of directors' authority to delegate powers to an SNC. For instance, under Section 141(c)(2) of the Delaware General Corporation Law, a board of directors may delegate to a committee all of the powers and authority of the board of directors in the management of the business and affairs of the corporation except that the committee may not have the power or authority to: (1) approve or adopt, or

recommend to the stockholders, any action or matter expressly required by the Delaware General Corporation Law to be submitted to stockholders for approval; or (2) adopt, amend or repeal any bylaws of the corporation. Thus, an SNC may not be delegated the authority to approve a proposal to acquire the corporation by merger under Section 251 of the Delaware General Corporation Law, as that section generally requires stockholder approval of such a merger.ⁿ²⁴ Second, the certificate of incorporation and bylaws of a corporation may also limit or proscribe what may be delegated to a committee.

Each of these limitations should be kept in mind throughout the committee process. For instance, a committee assignment that began as the negotiation and approval of the issuance of a large block of stock to an existing stockholder, which can be delegated to a committee, may evolve into a merger transaction, which, under the Delaware General Corporation Law, cannot.

An SNC that cannot be delegated the authority to approve a transaction because of limitations imposed by the corporation law may be given the authority to negotiate the transaction on behalf of the corporation and to make a recommendation to the full board of directors whether the board approve the transaction. Even if a transaction is one which can be fully delegated to an SNC, counsel, and ultimately the full board, must nonetheless decide at the outset whether the transaction should be brought back to the full board for approval. In some cases, this will be a fairly straightforward question. For instance, if all of the non-committee members on the board have a direct conflict of interest because they are officers of a corporation that is the other party to the transaction, in most cases it will be clear that the SNC should have the full authority to approve the transaction. Suppose, however, that some board members do not (or may not) have a conflict of interest but they are nonetheless not on the committee.ⁿ²⁵ Nonconflicted board members in this position may feel a responsibility as board members to be involved in the final decision to approve the transaction. It is hard to argue with them if they decide to have the SNC negotiate a transaction that is brought back to the full board for consideration and approval.

Dec. 21, 2005) , in which, the Court denied the defendant's motion to dismiss plaintiffs' claim that a merger was not entirely fair. The suit was brought by holders of a series of stock (Series A) who claimed that they had been treated unfairly in the merger relative to the Series B holders. The Court first found that entire fairness applied to the merger because a majority of the directors owned more Series B shares than Series A. The approval of the transaction by a special committee did not shift the burden of proof because the special committee's two members, when their holdings were combined, owned more Series B stock than the Series A stock. When combined with their compensation, which the Court described as very high (\$1 million a piece) and the amount of which was established only after the committee had completed its work and approved the transaction, the unbalanced holdings led the Court to conclude that the burden of proving entire fairness should not be shifted. Following *Levco*, the Court found that the committee failed to properly assess the merger from the perspective of the Series A holders: "In the present transaction, the Special Committee failed to examine, and [the financial advisor] failed to opine upon, the fairness of the [Series B] premium to the [Series A] holders." *Id.* at *54-55.

(n16)Footnote 16. *Id.* at 116-17 . Even though the Court found the special committee's approach to negotiations "less than confidence inspiring," it held that the plaintiffs were unable to make a valid *Revlon* claim. In this case, allowing the CEO to negotiate merger terms did not adversely affect "the overall reasonableness" of the effort to secure the highest possible value for the company. *Id.* at 97-98 .

(n17)Footnote 17. *Id.* at 114 .

(n18)Footnote 18. *Id.* at 98 .

(n19)Footnote 19. *Id.*

(n20)Footnote 20. *In re Nabisco S'holder Litig.*, 1989 Del. Ch. LEXIS 9 (Feb. 14, 1989) . Compare this to *In re Walt Disney Co. Derivative Litig.*, 825 A.2d 275, 289 (Del. Ch. 2003) in which the Chancellor refused to dismiss a claim that implied that the directors who knew they were making a decision without adequate information and deliberation and "simply did not care if the decisions caused the corporation and its stockholders" to suffer loss or

injury.

(n21)Footnote 21. *Kahn v. Tremont Corp.*, CA 12339, 1996 Del. Ch. LEXIS 40 (Mar. 21, 1996) , rev'd on other grounds, 694 A.2d 422 (Del. 1997) .

(n22)Footnote 22. *In re Emerging Communications, Inc. S'holders Litig.*, 2004 Del. Ch. LEXIS 70 (June 4, 2004) .

(n23)Footnote 23. *In re Cysive, Inc., S'holder Litig.*, 836 A.2d 531 (Del. Ch. 2003) .

(n24)Footnote 24. Subsection 2 was added to Delaware General Corporation Law § 141(c) in 1996. Prior to that time, Section 141 was more restrictive in terms of the powers that could be delegated to a committee. The pre-1996 provision, which is now found in Section 141(c)(1), is applicable to corporations incorporated prior to July 1, 1996 that do not, by board resolution, opt into the liberalized provisions of Section 141(c)(2). Corporations incorporated on or after July 1, 1996 are automatically governed by Section 141(c)(2). *See Del. Code Ann. tit. 8, § 141(c)(1), (2)* (2007).

(n25)Footnote 25. This situation could occur for a variety of reasons including a director having other commitments that prevent him or her from devoting adequate time to the assignment. If nonconflicted board members choose not to serve on an SNC, the minutes should reflect the reason for the decision not to have those members on the committee to avoid questions regarding composition of the committee.

CHAPTER 11 SPECIAL COMMITTEES OF THE BOARD *

*2-11 Corporate Governance: Law and Practice § 11.06***AUTHOR:** S. Mark Hurd Andrew M. Johnston**§ 11.06 Common Committee Characteristics and Issues****[1] Committee Composition**

Once counsel has identified who the disinterested and independent members of the board of directors are, he or she will have to consider who among the board members ought to be on the SNC. Many factors enter into this decision, such as the subject matter of the special committee assignment and the availability of the potential SNC members. For instance, directors who have a technical background may be better suited to negotiate the terms of a licensing agreement for complicated intellectual property than other directors. Similarly board members who have substantial merger and acquisition experience may be better suited to assist in the negotiation of a change of control transaction. Knowing who on the SNC might have this background can be particularly important in SNC assignments because the SNC may not have the kind of access to some of the usual sources of background information and expertise that it would normally have. For instance, in a management buyout transaction, the SNC likely will not have the access to management that it would in a third-party transaction. A properly prepared authorizing resolution should permit the SNC to hire experts to work with it. However, there is no substitute for first-hand experience in the subject matter of the committee's assignment.

Although the composition of the committee may vary depending on the nature of the assignment, there is one universal: SNC members should understand that serving on an SNC will often involve a significant commitment of time, attention and energy. If a prospective committee member is either unable or unwilling to make himself or herself available to meet those commitments, he or she should not serve on the committee. The benefits to be derived from establishing an SNC are not well served by having committee members who are unable or unwilling to function effectively.

[2] Number of Committee Members

The number of members that should serve on the SNC will depend on several factors, including practicality and effectiveness.¹ An SNC that has too many members may not be able to function effectively because it will be difficult to bring committee members together as needed. An SNC with too few members may not have the collegial exchange of views and perspectives that make the committee process effective. This is particularly true when one or more committee members is regularly absent from committee meetings. For an SNC of two members, counsel should be sure that the members understand the importance of participation at all SNC meetings because if one SNC member is

unavailable, the SNC is incapable of action. Generally an SNC of three to four members is preferable.

SNCs made up of a single member are to be avoided if at all possible. The courts will be suspicious of an SNC with only one member, perhaps in part because having a one-person committee places a significant burden on that director and his or her advisors as she will not have the benefit of interaction with other committee members that is such an important part of an SNC's decision-making process.ⁿ² On occasion, a one-member committee is unavoidable. In such a situation, all steps possible should be taken to make sure that the SNC member has advisors with whom he or she is comfortable and trusts and that the SNC has whatever additional supporting cast, such as consultants and experts, that she feels may be necessary.

[3] Compensation of Committee Members

As discussed above, members of an SNC should expect that significant demands will be made on them when serving on an SNC. It is only appropriate in those circumstances that the SNC members be adequately compensated for these demands. Standard fee arrangements include: a fixed, flat amount; a per meeting fee; or a combination thereof. Depending on the nature of the assignment, a fee of as much as \$50,000 or more is not out of the question. Although flexibility in structuring the fees for the SNC is possible, a compensation arrangement that is contingent on a particular outcome, such as a fee expressed as a percentage of the transaction that is contingent on the closing of a transaction, should be avoided.ⁿ³ This type of fee arrangement could be seen as giving the SNC members an incentive to reach a particular result, *i.e.*, the one that results in the fee being paid, in a circumstance in which that result might not be in the best interests of the stockholders. As a result, this type of fee arrangement could cause the committee members to be seen as no longer disinterested and independent, when it is their disinterestedness and independence that has resulted in their membership on the SNC in the first place. Although there may be a highly unusual circumstance in which this type of arrangement could be considered,ⁿ⁴ it generally should not be recommended.

The fee arrangement should account for the SNC work that might be conducted outside of meetings. Important work of the SNC, such as discussing committee business with other SNC members or advisors, reviewing materials, interviewing personnel, participating in negotiations or having a deposition taken, will take place outside of the meeting context.

It is a good idea to reflect in the minutes of the board meeting at which the SNC is created the board's expectation for the duration of the SNC's activities. In this way, if the work of the SNC ends up taking significantly longer than had been originally expected, there is a basis for the SNC members and the board to revisit the SNC's compensation.

Counsel should have a candid discussion with the SNC members about their expectations concerning fees and fee arrangements should be made at the *beginning* of the committee process. If discussions about fees are put off until the end of the committee process, it could appear that the SNC was somehow "bought off."ⁿ⁵ A fee discussion will also be a good opportunity for counsel to impress upon the SNC members the time commitment necessary for the effective operation of the SNC. Changing the compensation arrangement in the middle of the SNC process can bring about problematic consequences.ⁿ⁶

[4] Indemnification and Director Liability Protections

At an early stage in the SNC assignment, counsel should review the relevant documents to ascertain what indemnification rights, rights to the advancement of expenses, protections from liability provisions and rights under insurance policies are available to committee members, so as to identify any "holes" in or deficiencies from the protections typically afforded directors.ⁿ⁷ Counsel should consult with the SNC members concerning the available protections and the means, if any, available to fill any holes. Given the heightened scrutiny and responsibility of members of an SNC, it is appropriate for its members to be comfortable that they will have adequate protections from personal liability and that their litigation expenses will be advanced to them if their decision is judicially challenged. If

gaps are found, they may be able to be addressed.ⁿ⁸ If they can not be addressed, at a minimum, each committee member can decide for himself, based on a more complete understanding of the situation, whether he wants to serve on the SNC.

As with compensation issues, it is important that the issues identified by SNC counsel are resolved early in the process. Putting off the consideration of these questions until late in the process can take on the unfortunate appearance of a *quid pro quo* for a particular committee action or decision. Sometimes, in transactions involving a compressed timeframe, there may not be a significant amount of time between the committee's formation and its ultimate decision. Nonetheless, indemnification and compensation issues should be considered by counsel and discussed with committee members as early as possible.

[5] Chairing the Committee

Which of the committee members will chair the SNC is an important decision. Although all committee members should be actively involved in the business of the SNC, the chairperson sees that the committee runs effectively. The chairperson will often take the lead role in helping to select the SNC's advisors (although all committee members should be involved in that decision) and the chairperson will often be the sounding board for the SNC's advisors between meetings when issues arise. Finally, the chairperson of the committee will often be the person chosen to lead discussions and negotiations if necessary. For this reason, selection of the chairperson is important and ought to be made by the SNC itself rather than by the board establishing the SNC.ⁿ⁹

What characteristics should the chairperson have? Simply, the patience of Job, the wisdom of Solomon and the foresight of a prophet. Lacking a committee member with all of these qualities, the chairperson most typically will be an experienced director who, in one way or another, has significant experience in major corporate transactions of the type under consideration.

[6] Committee Advisors

The selection by the SNC of competent, able advisors is of critical importance to the proper discharge of the SNC's responsibilities. Legal counsel, investment banking advisors, appraisers and other advisors often end up having to take on many more functions in an SNC assignment than they ordinarily would in other types of assignments. For instance, committee members will not necessarily have the full and free access to management that it would if it were simply operating as members of a board of directors. As a result, many functions usually performed by management and staff need to be performed by the advisors. Both the SNC and the advisors need to be aware of this necessity at an early stage.

In almost all instances, the SNC should have the power and authority to hire its own advisors, and it needs to exercise that authority (or, at a minimum, thoughtfully consider whether it needs to hire advisors). Examples abound of situations where advisors were "preselected" by someone other than the SNC--either management or the interested party--which, in turn, compromised the work of the SNC.ⁿ¹⁰ Although it is certainly appropriate for the SNC to ask the company's management for recommendations concerning advisors,ⁿ¹¹ the ultimate decision must be the SNC's.

Two key cases highlight this issue. In *In re Tele-Communications*, a special committee was formed in response to a merger proposal that had the support of the target company's chairman/CEO and its president/COO.ⁿ¹² The special committee decided to retain the same firms that had represented the target company. Of its decision, the Court wrote: "Rather than retain separate legal and financial advisors, the Special Committee chose to use the legal and financial advisors already advising [the target]. This alone raises questions regarding the quality and independence of the counsel and advice received."ⁿ¹³

Less than a year later, the Delaware Court of Chancery revisited this issue in *Gesoff v. IIC Industries*.ⁿ¹⁴ The special

committee in *Gesoff* was formed to assess a cash-out merger proposal from a majority stockholder. Although the one person committee had the authority to choose its own financial and legal advisors, the Court found that "both the special committee's financial and legal advisors were handpicked by [the majority stockholder]."n15 The Court also found the financial advisor to be "actively and persistently disloyal to the special committee and to its aims of ensuring a fair transaction for IIC's minority stockholders,"n16 because it had, without the special committee's knowledge, sent the majority stockholder a "stream of draft valuation reports on which to base his negotiating strategy against the special committee."n17 About this conduit of information between the advisor and the majority stockholder, the Court wrote: "This sieve-like separation between [the financial advisor and the majority stockholder] was obviously inimical to the special committee's power to negotiate a fair transaction."n18 The legal advisor was compromised because he "was beholden for his job to a board entirely dominated by [the majority holder], and had indeed been advising [the majority holder] on its approach to the tender offer from the beginning."n19 The Court concluded that the case presented a "situation in which the special committee's advisors are of little use in establishing the fairness of the merger."n20

Counsel's first task in considering possible retention as SNC counsel is to make sure that he or she understands how he or she came to be considered for retention by the committee. He or she should be sure that the SNC exercised its own judgment in hiring his or her firm and that the decision was not made for the SNC without the SNC's input. Counsel should also be sure to double check his or her and his or her firm's prior or pending involvement with the company and other parties involved in the transaction. Any prior or current representations and their significance to his or her firm should be disclosed to the SNC so that the SNC can decide whether to retain (or continue to retain) the firm. It is not unusual for the SNC to interview more than one law firm in deciding who to hire. This can often be a helpful exercise to the SNC, as it will help to establish the qualifications of the advisor and impose some "price discipline" on the advisors interviewing for the engagement. The committee can also gain different perspectives on its work during the interview process. In other cases, the SNC or members of the SNC will have counsel with whom it has work previously and there is no need to conduct an interview process.

Counsel should work with the SNC and company management in connection with the retention of other advisors. Prior and current engagements of a prospective advisor by the company and others involved in the transaction need to be scrutinized carefully to be sure of the advisor's independence. Recommendations or suggestions by management, although welcome and helpful, should not be followed blindly by the SNC.

The SNC and its advisors should be clear at the outset about the scope of the advisor's duties. This will often first come up in the context of the engagement letter for the advisor, a proposed version of which will, in almost all instances, be provided by the advisor selected by the SNC. The process of negotiating the terms of the engagement letter can be helpful in assisting the SNC and counsel to understand the subtleties and nuances of the SNC process. For instance, the negotiation of the terms of the investment banker's engagement letter will often be the vehicle for defining the banker's role. Will the banker simply be rendering a fairness opinion to the SNC? What is the proper form of the fairness opinion? Does the opinion address fairness from the perspective of the proper group or groups?n21 Will the banker assist the SNC in negotiations? Will the investment banker assist the SNC is assessing broader strategic issues that might be a necessary part of the SNC's work?

The SNC and its counsel should be sure to analyze critically the "boilerplate" provisions in the proposed engagement letter to be sure that it does not include provisions that could compromise the advisor's independence. For instance, the proposed engagement letter from the advisor might contain a provision that would permit the advisor to participate in a financing transaction for either party to the transaction under consideration by the SNC. Obviously the prospect of significant fees from the party on the other side of the transaction, even if only after an agreement has been negotiated and signed, could be seen as comprising the independence of the advisor and its advice to the SNC.n22 The engagement letter should also make clear that the SNC is the advisor's client. This can require some careful drafting because, although the SNC is the client, the company will be paying the advisor's fees and agreeing to indemnify the advisor. In addition, engagement letters will often require affirmative representations and covenants from the company. SNC counsel needs to be sure that the SNC has the authority to cause the company to comply with those representations and

covenants.

FOOTNOTES:

(n1)Footnote 1. Counsel should be sure to review the applicable corporation law and the certificate of incorporation and bylaws of the corporation as they can sometimes impose requirements for the number of directors that must be on a committee. One requirement seen from time to time provides that a board committee have a least two members.

(n2)Footnote 2. One court has described a one person special committee as "oxymoronic and unwise." *Hollinger Int'l, Inc. v. Black*, 844 A.2d 1022 (Del. Ch. 2004) , *aff'd*, 872 A.2d 559 (Del. 2005) . *See also Gesoff v. IIC Indus. Inc.*, 902 A.2d 1130, 1149 (May 18, 2006) (finding that the formation of a special committee of one independent director "causes the court to examine the entire process with a higher level of scrutiny, and equally causes the court to require more of [the committee member] than it would had he been joined by other independent directors"). In a case involving an SLC, the Delaware Chancery Court stated that: "If a single member committee is to be used, the member should, like Caesar's wife, be above reproach." *Lewis v. Fuqua*, 502 A.962, 967 (Del. Ch. 1985) .

(n3)Footnote 3. In *In re Tele-Communications*, the Court was troubled by the high fee paid to a special committee and the seemingly contingent nature of that fee. The compensation arrangements for the committee were not decided upon until after the committee approved the transaction. The two committee members were paid \$1 million each for their work, which involved meeting four times over a one-week period. The Court found that the special committee process was flawed in part because of the "suspiciously contingent compensation" paid to its members. *In re Tele-Communications*, 2005 Del. Ch. LEXIS 206, at *34.

(n4)Footnote 4. Assume that an irrevocable decision has been made by the board to "sell the company" so as to maximize the price stockholders of the company are to receive. One might argue that a "success fee" is appropriate in this unusual instance because the interests of the committee members resulting from the fee--getting the highest price in a transaction--are aligned with the interests of the stockholders. However, consider how this type of arrangement could arguably skew the decision of an SNC whether to terminate an agreement that it had approved because of a breach of representation by the party on the other side of the transaction.

(n5)Footnote 5. *See, e.g., In re Tele-Communications*, 2005 Del. Ch. LEXIS 206, at *49.

(n6)Footnote 6. In *In re National Auto Credit, Inc. S'holders Litig.*, CA 19028, 2003 Del. Ch. LEXIS 5 (Jan. 10, 2003) , the Court of Chancery viewed with suspicion an increase in fees paid to a board of directors from \$1,000 per meeting to \$55,000 annually plus an award of stock options, particularly because the increase occurred around the time of the board's approval of a transaction with corporate insiders. In the context of the defendants' motion to dismiss, the court inferred that the increase in fees was a *quid pro quo* for the approval of the transaction.

(n7)Footnote 7. *See Chapter 5 above* discussing statutory limitations on director and officer liability, indemnification and director and officer insurance.

(n8)Footnote 8. For instance, if the corporation's indemnification bylaws do not mandate the advancement of litigation expenses, the committee members can require that the corporation enter into indemnification agreements with the committee members mandating advancement of expenses.

(n21)Footnote 21. *See Levco Alternative Fund Ltd.*, 803 A.2d 428 .

(n22)Footnote 22. *See, e.g., In re Toys "R" Us, Inc., S'holder Litig.*, 877 A.2d 975, 1006 (Del. Ch. 2005) in which the Court stated that the decision of the seller's financial advisor to provide financing to the buyer after the transaction had been effectuated "was unfortunate, in that it tends to raise eyebrows by creating the appearance of impropriety, playing into already heightened suspicions about the ethics of investment banking firms." The financial advisor asked the seller's permission and the seller acceded to this request. However, the Court opined: "Far better, from the standpoint of instilling confidence, if [the financial advisor] had never asked for permission, and had taken the position that its credibility as a sell-side advisor was too important in this case, and in general, for it to simultaneously play on the buy-side in a deal when it was the seller's financial advisor." *Id.*

CHAPTER 11 SPECIAL COMMITTEES OF THE BOARD *

2-11 Corporate Governance: Law and Practice § 11.07

AUTHOR: S. Mark Hurd Andrew M. Johnston

§ 11.07 Committee Meetings and Record-Keeping

[1] Committee Meetings

How meetings of the SNC are to take place may be a function of the corporation's charter or bylaws, which may specify general requirements for board committee's meetings and voting procedures. More often, the bylaws will be silent and the rules and procedures governing SNC meetings will be less than clear. Generally, a majority of the members of an SNC will constitute a quorum for the conduct of SNC business and the SNC will take action on the basis of a majority vote of its members. In some sense, these rules are important because they set forth the requirements for the SNC to take valid action. In another sense, they are inconsequential. Most SNCs act on important matters only if all SNC members are present and only if the SNC members all agree to the particular action: committee action taken on the basis of less than unanimous votes is highly unusual. More routine matters, such as updates to the SNC, can be handled with the participation of less than all of the SNC members' participation.

Many factors will dictate how often meetings will be held. During a lengthy sales process, for instance, it can be important to have regular meetings of the SNC at which the SNC can be apprised of significant developments, even if no decision is required. Often times, well-functioning SNCs with experienced committee members will have important and useful input, even at simple update meetings. Sometimes the advisors may need direction from the SNC on important business points or strategy decisions and, after consultation with the chairperson, a meeting will be called to have the SNC's input on that issue.n1

Much of the business of the SNC can be conducted during telephonic committee meetings, and oftentimes, this is the only practicable way for the SNC to operate, particularly when SNC members and the advisors are located in different parts of the country. However, it is important that meetings at which significant decisions will be made or critical presentations are to be made be held in person if at all possible. There is no substitute for an in-person meeting at which body language and facial expressions can be as evocative as the spoken word.n2

The SNC should take care in controlling who attends its meetings, including meetings with its advisors. In one case, the court found that three independent directors of a corporation who were negotiating an acquisition proposal from the other directors of the corporation (and who were functioning like an SNC) permitted the interested directors to attend

board meetings at which the proposal was discussed and to confer with the independent directors' investment banker.ⁿ³ Although the court was able to determine after trial that the attendance of the interested directors did not influence the independent directors in any way, this issue could have been avoided.ⁿ⁴ A 2005 case also addressed the issue of an interested director, who was also the company's president and CEO, attending special committee meetings.ⁿ⁵ The Court denied defendants' motion to dismiss in part because certain facts, including the interested director's presence at the committee meetings, raised a triable issue as to the independence of the committee.ⁿ⁶

[2] Committee Record-Keeping

It is a reality of the SNC process that many parties may be reviewing the SNC's activities at one time or another and those parties will sometimes question or ask hard questions about the SNC's work and decisions. Depending on the transaction, other board members and management may want to view the SNC's work; the SEC may ask pointed questions about SNC process during its review of preliminary proxy statements submitted by the corporation; a losing bidder in an auction may suggest "unfairness" in the SNC's handling of an auction process; stockholders of the company may demand to know how the SNC reached the decision it did; and committee members may have to answer questions of a plaintiff's lawyer in litigation against the company and the directors at a deposition. In each of these situations, it is important that the SNC and its members have a single, accurate record of the SNC's deliberative process, the information it received in reaching its decision, the reasons for its decision and, of course, its ultimate decision. Accordingly, it is of paramount importance that proper minutes be maintained and that the SNC have a policy or practice in place concerning notes of SNC members.

[a] Minutes

Minutes form the backbone of the record of the SNC's deliberations. Given their importance, there is surprisingly little written about minutes and how they should be kept. Responsibility for the preparation of minutes almost always falls to the SNC's counsel. Although it might seem extravagant to some, it is good practice for a lawyer to attend the meeting whose sole job it is to take notes of the meeting that will form the basis of the minutes. It is too difficult for one person to attend a meeting for the dual purposes of advising the SNC, which necessitates his or her undivided attention to presentations and discussions, and recording accurately the discussions as they take place. There is simply too much potential for one of the two functions to be short changed. The lawyer's notes will then be the basis for the preparation of drafts of minutes of the SNC's meeting.

Counsel have different styles of minutes. Some prefer short form minutes that simply recite that the committee met, received a presentation from XYZ Investment Banking Firm, deliberated and then reached a decision. Although there may be a place for this style of minutes, it is preferable to keep more detailed minutes that reflect, for instance, the important elements of the presentations made to the SNC, material advice that the SNC received from counsel, the various facts and factors weighed by the SNC in its deliberations, and the SNC's decision and reasons for its decision. Although it is not necessary (or desirable) to have minutes that are a transcript of the meeting, it is better to err on the side on more detail than less.ⁿ⁷

Clements v. Rogers,ⁿ⁸ highlights the importance of proper minutes. *Clements* involved a merger in which Texas Industries, Inc. acquired the 16 percent of the equity of Chaparral Steel Company it did not own. A special committee of the board of directors of Chaparral was appointed to negotiate the purchase price for the shares. The negotiations took place over a period of several months during the summer of 1997. The merger agreement was approved at the end of July, 1997. A proxy statement for the transaction was issued at the end of November 1997 and the merger closed at the end of December 1997. Plaintiff filed her suit in May of 1997. After some preliminary discovery, she amended her complaint on May 26, 1999. After additional discovery, plaintiff filed another amended complaint and defendants thereafter moved for summary judgment. Depositions of the committee members were taken during the summer of 2000, three years after the negotiations had taken place. By that point, the chairperson of the special committee was in his early eighties. His deposition testimony, as described by the court, was sufficiently confused and unclear on several

important points that the court refused to grant the defendants' summary judgment motion in full. The court suggests that the chairperson's deposition testimony might "simply result [] from memories rusty from disuse."⁹

Nothing in the court's decision suggests that inadequate minutes were taken. Indeed, minutes were probably part of the record support for the court's observation that: "There is record evidence that suggests that when all is said and done, the Special Committee and its advisors will be found to have acted vigorously, informedly, and effectively ..." ¹⁰ However, this case is the type of instructional case that highlights the reasons why good minutes can be so important: the memories of witnesses may become "rusty" or the witnesses may be unavailable for a variety of reasons, including disability, sickness or death. Without minutes that will help refresh the memories of "rusty" witnesses or that, standing alone, provide the trier of fact with details of the SNC's work that missing witnesses can not, the possibility of personal liability and damages becomes more likely and the potential for personal embarrassment to the SNC members becomes greater.

Ideally, draft minutes should be circulated for review by meeting participants reasonably promptly after the meeting, while memories are fresh.¹¹ In other cases, it may be prudent to wait until after another meeting has taken place before draft minutes of the prior meeting are circulated for approval. Sometimes points or themes that were not clear in the first meeting may become clearer in the second, and the minutes of the first meeting can be prepared to place appropriate emphasis on those facts or themes. In some cases, circumstances may dictate a prompt preparation and circulation of draft minutes. For instance, the negotiation of a transaction may be moving so quickly that the other parties to the transaction may, as a matter of their due diligence, require an opportunity to review committee meeting minutes prior to entering into a transaction.¹²

[b] Note Taking by Committee Members

Litigators are fond of saying that the surest way for an SNC member to have his or her deposition taken first and to have that deposition last the longest is to take and keep copious notes. There is a kernel of truth in this adage. Almost by their nature, the notes taken by SNC members during a meeting will be cryptic and incomplete and therefore subject to varying interpretations. It is the possible varying interpretations that plaintiff's counsel will want to explore at a deposition (and perhaps later exploit in the litigation). Some will advise SNC members not to take notes at all. However, to some SNC members, note taking is an important part of their deliberative process and placing artificial limitations on note taking can inhibit the effective functioning of the SNC. For this reason, more important than the issue of note taking is note retention. SNC members should be advised that, prior to the time that litigation is commenced challenging the SNC's decision or the transaction it approved, if they need to take notes, they should feel free to do so. However, once they are finished with the notes, the notes should be discarded.¹³ Assurances to the SNC members that the minutes will accurately reflect the SNC meetings should help dissuade members from taking *and keeping* notes that simply outline the meeting. As a result, notes that SNC members do take should simply be questions that they may have or points or issues that appear to require clarification or further discussion. Once questions have been answered and the discussion has taken place, SNC members should be comfortable that they no longer need the notes and that they can safely be discarded.

[c] Materials Distributed to the Committee

In many cases, materials distributed to the SNC, such as presentation books prepared by the investment bankers, drafts of material agreements and summaries thereof, and memos from counsel addressing legal issues, will be distributed to SNC members in advance of the meeting. These materials should be prepared with the expectation that they may have to be made available to, or described to, stockholders with or in proxy statements or other disclosure documents. The SEC has in recent years insisted in many situations that investment banker board books, even those that are in draft form, distributed to SNC members be filed with the SEC or described in the disclosure document being prepared.¹⁴

Every effort should be made to distribute materials to the SNC members sufficiently in advance of a meeting that they

will have an opportunity to study the materials. In this way, SNC members can come to the meeting with adequate background for an effective meeting. Advance distribution will make it less likely that SNC members will want to take materials with them following the meeting. Care should be taken regarding how information is disseminated to committee members. For example, in *Emerging Communications*, the chairperson of the committee routed all of his correspondence to the other committee members through the controlling stockholder's secretary, thereby giving the controlling stockholder "access to the committee's deliberations and strategy."¹⁵ The Chancery Court cited this action as one of the factors rendering the SNC ineffective.

Occasionally, it is not possible to get materials to SNC members in advance of the meeting. In these circumstances, counsel should consider ways to have the SNC informed about the contents of the documents. In some cases, executive summaries of the documents can be prepared for the SNC and the meeting can be briefly adjourned to enable the SNC members the chance to review the summary. Having counsel review the relevant document in more detail than usual at the meeting is another option.

After the meeting, what should be done with materials given to committee members? Sometimes SNC members will want to take a copy with them for further study and review. If SNC members find this necessary, they should be asked to return the materials when they are done with them. In such circumstances, counsel may wish to note which SNC members take materials with them and to follow up on the return of the materials at a later date.

FOOTNOTES:

(n1)Footnote 1. Here again, the important role of the chairperson is highlighted. He or she will have to know his or her fellow committee members, and be able to judge whether a particular issue about which the advisors consult him or her is one on which the committee members may want input.

(n2)Footnote 2. Jeff Bezos, the CEO of Amazon.com, the well-known internet retailer, stated during an interview, in response to a question about his company's board meetings, that: "We are a little old-fashioned in this respect. There's nothing better than an in-person meeting. Nothing yet has replicated that as far as I know. For quick interaction, e-mail and phone are great. But for really getting into something, a physical meeting is much better." *Taming the Out-of-Control In-Box*, Wall St. J., Feb. 4, 2000, at 134. See also *In re Emerging Communications, Inc. S'holders Litig.*, 2004 Del. Ch. LEXIS 70, at *6 (June 4, 2004) (noting that the committee's failure to have met collectively in person or even by phone prevented the committee from functioning).

(n3)Footnote 3. *Emerald Partners v. Berlin, CA 9700, 2003 Del. Ch. LEXIS 42 (Apr. 28, 2003)* .

(n4)Footnote 4. Careful minute taking can be helpful with an issue like this. For instance, the minutes can record, if true, that particular individuals attended the meeting at the invitation of the SNC or note the point in the meeting at which particular individuals joined, or were excused from, the meeting.

(n5)Footnote 5. *In re Freeport-McMoran, 2005 Del. Ch. LEXIS 96* .

(n6)Footnote 6. *Id. at *13*.

(n7)Footnote 7. Of course, one of the burdens associated with having detailed minutes is that they be accurate. The

burden for accuracy will typically fall on counsel, although as discussed *below*, input from the SNC and other participants in the meeting can be important as well.

(n8)Footnote 8. *Clements v. Rogers*, 790 A.2d 1222 (Del. Ch. 2001) .

(n9)Footnote 9. *Clements*, 790 A.2d at 1231 .

(n10)Footnote 10. *Clements*, 790 A.2d at 1231, n.14 .

(n11)Footnote 11. The Court in *In Re Netsmart* took a jaundiced view of minutes from ten meetings that were approved all at once and after some time had passed. The Court wrote: "After this litigation commenced, the Special Committee met on December 21, 2006 and approved formal minutes for ten meetings ranging from August 10, 2006 through November 28, 2006. That tardy, omnibus consideration of meeting minutes is, to state the obvious, not confidence-inspiring... ." 924 A.2d at 191 .

(n12)Footnote 12. This may not always be appropriate, particularly before a transaction is signed or completed, as the minutes may disclose negotiating positions, reserve prices and other sensitive information that, until the transaction has been completed, would not be appropriate for the counter party to know. Of course, this information need not be included in the minutes in the first instance.

(n13)Footnote 13. The appropriate procedures to follow after litigation has commenced will vary from jurisdiction to jurisdiction and litigation counsel should be consulted in each case.

CHAPTER 11 SPECIAL COMMITTEES OF THE BOARD *

2-11 Corporate Governance: Law and Practice § 11.08

AUTHOR: S. Mark Hurd Andrew M. Johnston

§ 11.08 An Overview of Special Committees in the Litigation Context

Derivative lawsuits are a significant exception to the general principle that the board of directors manages the corporation's business and affairs, but special committees of directors can still be used in certain instances to avert threatened litigation or to take from the stockholder-plaintiff the right to prosecute a properly-filed derivative complaint. Two fundamental predicates of derivative litigation are "standing" and the "demand" requirement. After examining these two predicates of derivative litigation, the balance of this chapter examines the use of a special committee of independent directors in two common contexts: (1) responding to a stockholder demand that the board take action to redress perceived harm to the corporation; and (2) investigating and making a determination regarding claims asserted by a stockholder in a derivative complaint.

[1] What are the Requirements for Stockholder Standing?

Each of the American Bar Association's Model Business Corporation Act ("ABA Model Business Act"), the American Law Institute's Principles of Corporate Governance: Analysis and Recommendations ("ALI Principles of Corporate Governance") and the Delaware General Corporation Law imposes a "continuous ownership" requirement upon any stockholder who wishes to assume the role of a derivative plaintiff. To have standing under the ABA Model Business Act to commence a derivative proceeding, the stockholder must: (1) have held shares at the time of the allegedly wrongful act or omission (or have become a stockholder through transfer by operation of law from one who held shares at such time) and continue to be a stockholder throughout the litigation, and (2) fairly and adequately represent the interests of the corporation.ⁿ¹

Under the ALI Principles of Corporate Governance, the stockholder also must fairly and adequately represent the interests of the stockholders. The requirement of continuous ownership under the ALI Principles of Corporate Governance may be excused if the failure to continue holding shares "is the result of corporate action in which the holder did not acquiesce, and either (1) the derivative action was commenced prior to the corporate action terminating the holder's status, or (2) the court finds that the holder is better able to represent the interests of the shareholders than any other holder who has brought suit."ⁿ²

Delaware General Corporation Law § 327 requires that the stockholder-plaintiff includes in the complaint an allegation

that the "plaintiff was a stockholder of the corporation at the time of the transaction of which such stockholder complains or that such stockholder's stock thereafter devolved upon such stockholder by operation of law."³ The purpose of the standing requirement is to prevent persons from purchasing stock for the purpose of maintaining a derivative action challenging a transaction that occurred before the purchase of stock in the corporation.⁴ Not unlike the ALI Principles of Corporate Governance, the stockholder under Delaware law also must be qualified to serve in a fiduciary capacity as a representative of the other stockholders.⁵ Delaware law accords to both record stockholders and beneficial owners standing to prosecute a derivative action,⁶ and recognizes stockholder standing to challenge a continuing transaction that is not consummated before the plaintiff acquired stock.⁷

[2] When Is a Demand Required?

In certain jurisdictions, a stockholder with standing must first make a demand before commencing a derivative lawsuit and, in other jurisdictions, a stockholder must either make a demand and allege facts establishing that the demand was wrongfully refused or allege facts establishing that demand should be excused as futile. Compliance with the demand requirement generally is governed by the law of the state of incorporation.⁸

A "demand" often takes the form of a letter, frequently from the stockholder's counsel, raising concerns about recent events and demanding that the corporation's board of directors take action against certain identified individuals to redress an alleged harm to the corporation.⁹ The demand requirement seeks to balance the right of the directors to manage the corporation's business against the rights of stockholders when a corporation unjustifiably fails to act for itself.

[a] How Do Courts Distinguish between Derivative and Direct Claims?

The ABA Model Business Act, the ALI Principles of Corporate Governance and the Delaware General Corporation Law all recognize that the demand requirement applies only to derivative claims belonging to the corporation, and not to direct claims belonging to the stockholders individually.¹⁰ In distinguishing derivative from direct claims, the ABA Model Business Act simply provides that a derivative proceeding is one "in the right of" the corporation.¹¹ Section 7.01 of the ALI Principles of Corporate Governance provides more guidance, explaining that a derivative action is one brought "to redress an injury sustained by, or enforce a duty owed to, a corporation. An action in which the holder can prevail only by showing an injury or breach of duty to the corporation should be treated as a derivative action." Section 7.01 further provides that in the case of a closely held corporation, the court "may treat an action raising derivative claims as a direct action... ." ¹²

The Delaware Supreme Court revisited the approach for distinguishing between derivative and direct claims in 2004. In *Tooley v. Donaldson, Lufkin & Jenrette, Inc.*,¹³ the court concluded that certain concepts in Delaware jurisprudence for distinguishing between direct and derivative claims were "not helpful" and held that the analysis "must turn *solely* on the following questions: (1) who suffered the alleged harm (the corporation or the suing stockholders, individually); and (2) who would receive the benefit of any recovery or other remedy (the corporation or the stockholders, individually)?"¹⁴ Accordingly, Delaware law will no longer look for the existence of "special injury" as the basis for determining that a claim is direct.

Notwithstanding the newly-refined approach in *Tooley*, practitioners and courts likely will continue to struggle to determine whether claims are derivative or direct, especially in the context of mergers, where there is a "thin grey line" separating direct challenges to the merger itself from wrongs associated with the merger that harm the corporation.¹⁵ The analytical difficulty associated with distinguishing between direct and derivative claims in the context of a merger is significant not only to whether the stockholder is required to make a demand but also to the fundamental question of whether the plaintiff has standing to prosecute the claim. If the claim associated with a merger is derivative, the plaintiff generally loses standing to prosecute the claim upon the merger's closing because he or she ceases to be a stockholder of the corporation.¹⁶

[b] Universal Demand States

Under both the ABA Model Business Act and the ALI Principles of Corporate Governance, a demand is required in all cases, unless making demand would result in irreparable injury to the corporation. Advocates of this "universal demand" argue that it promotes the principle that directors should govern the corporation's business and affairs by encouraging corrective action that may moot the need for litigation altogether and that, in all events, it eliminates threshold litigation regarding whether demand was required.

Many states have adopted statutes requiring universal demand and Pennsylvania has, by court decision, adopted such a requirement.ⁿ¹⁷ Although each imposes a universal demand requirement, the ABA Model Business Act and the ALI Principles of Corporate Governance adopt differing standards of judicial review of a corporation's response to a demand. The ABA Model Business Act generally establishes pleading rules and allocates the burden of proof depending on the composition of the board of directors. Judicial review under the ALI Principles of Corporate Governance varies depending on the nature of the alleged wrongdoing. If the underlying transaction or conduct would be governed by the business judgment rule or constitutes a breach of the duty of care, the court should dismiss the action unless the determination to refuse the demand fails to satisfy the requirements of the business judgment rule.ⁿ¹⁸ In cases where the business judgment rule is not applicable or in which a breach of the duty of fair dealing is at issue, the court should dismiss if the court concludes the board or committee was adequately informed "and reasonably determined that dismissal was in the best interests of the Corporation," based on grounds that the court deems to warrant reliance.ⁿ¹⁹ Dismissal is prohibited if the plaintiff establishes that a defendant would be permitted "to retain a significant improper benefit" where the defendant, alone or with others who received an improper benefit, possesses control of the corporation, or if the benefit was obtained through a "knowing and material misrepresentation or omission" or without "advance authorization or the requisite ratification of such benefit by disinterested directors...".ⁿ²⁰

[c] Delaware

[i] Demand Excused

Under Delaware law, the demand requirement generally is excused when one-half or more of the corporation's directors are "incapable of making an impartial decision regarding such litigation."ⁿ²¹ When challenging a decision of the board of directors, demand will be excused if the plaintiff alleges particularized factsⁿ²² creating a reasonable doubt regarding (1) director disinterest or independence or (2) whether the directors exercised proper business judgment in approving the transaction.

Director interest is established by particularized facts demonstrating a material financial interest in the challenged decision or an entrenchment motive. Lack of independence exists when directors are beholden to or otherwise controlled by a person with an interest in the transaction. As the Delaware Supreme Court recently explained in a high-profile case involving Martha Stewart, independence is a "contextual inquiry" that *requires* courts to consider whether a particular relationship "is so close that the director's independence may *reasonably* be doubted."ⁿ²³

Particularized facts that, if proven, would constitute gross negligence on the part of the directors also will excuse demand. In circumstances when the challenged conduct does not involve an actual business decision by the board, the complaint must contain particularized factual allegations creating a reasonable doubt that, at the time the complaint was filed, a majority of the directors could have exercised independent and disinterested business judgment in responding to the subject of the complaint.

[ii] Demand Wrongfully Refused

The making of a demand under Delaware law is significant because once "made, absent a wrongful refusal, the

stockholder's ability to initiate a derivative suit is terminated."²⁴ The stockholder must give the directors "an adequate and reasonable amount of time" to respond to the demand,²⁵ the making of which operates as a concession that a majority of the corporation's directors is disinterested and independent with respect to the subject of the demand. A court's analysis of whether a complaint should be dismissed following a demand is therefore limited to the "good faith and reasonableness" of the investigation.²⁶ In short, the only issue the court addresses on a motion to dismiss a complaint filed following a stockholder demand is "the application of the traditional business judgment rule to the Board's refusal of [the] demand."²⁷

By making a demand, a stockholder does not, however, "waive the right to claim that demand has been wrongfully refused."²⁸ Nor will the decision of one stockholder to make a demand affect another stockholder's right to argue that demand is excused as futile.²⁹ As in the demand excused context, naming a majority of the directors as defendants and advancing conclusory allegations of laxity or conspiracy, are insufficient to establish that a demand was wrongfully refused.³⁰ Conclusory allegations that the corporation's board "did nothing" and refused to permit plaintiff's counsel to make a presentation regarding the subject of the demand likewise are insufficient to establish that demand was wrongfully refused.³¹

CHAPTER 11 SPECIAL COMMITTEES OF THE BOARD *

2-11 Corporate Governance: Law and Practice § 11.09

AUTHOR: S. Mark Hurd Andrew M. Johnston

§ 11.09 The Demand Investigation or Evaluation Committee

[1] Was There a Demand?

How does a corporation or its legal advisor determine if a communication from or on behalf of a stockholder of the corporation constitutes a "demand"? Although a stockholder demand need not assume a particular form, at least some courts have concluded that it must be directed to the board as a whole--not solely to the board's chair or to the corporation's general counsel--and must identify the stockholder.ⁿ¹

To constitute a demand, courts generally have held that the communication must "identify the alleged wrongdoers, describe the factual basis of the wrongful acts and the harm caused to the corporation, and request remedial relief."ⁿ² The burden of proving that a demand has been made rests upon the party claiming that there was a demand and, absent a proper demand, the corporation need not respond.ⁿ³ Because of the "weighty consequences" of making a demand, Delaware courts have determined that the communication must "clearly and specifically" satisfy each of the requirements for a demand and, accordingly, they will not construe "ambiguous communications" to be demands.ⁿ⁴

[2] Forming the Demand Investigation or Evaluation Committee

Once a board and its advisors have determined that the board has received a demand, there are a variety of available options. Merely declining to take a position with respect to the demand, however, is not one of them because the failure to take a position will be "viewed as tacit approval for the continuation of the litigation."ⁿ⁵ A corporation, or in appropriate circumstances a special committee of its board,ⁿ⁶ can: (1) accept the demand and prosecute the action on behalf of the corporation, (2) permit the stockholder to prosecute the claims contained in the demand, (3) resolve the grievance internally without resort to litigation, or (4) refuse the demand.

[a] Who Should Be on the Committee?

In determining the membership of a demand investigation or evaluation committee, the board should avoid appointing persons who are alleged in the demand to have committed some wrong, as well as any other person with a financial interest in the challenged action. To the extent possible, directors who participated in the action and persons whose independence is subject to challenge should not be members of the committee.

Mere approval of a challenged transaction, however, does not disable a director from investigating or evaluating a demand.ⁿ⁷ Moreover, so long as a committee is given only the authority to make a recommendation, and not the authority to act on the demand, its members may include non-directors, an exception to the requirements for the composition of other types of special committees.ⁿ⁸

[b] What is the Appropriate Scope of Authority?

If the board determines to form a special committee, corporate formalities, including relevant provisions of state law and the corporation's charter and bylaws, must be observed. Board resolutions appointing the committee should set forth the scope of the committee's authority (*e.g.*, to investigate or evaluate the matters set forth in the demand and make a recommendation to the full board), empower it to retain, at the corporation's expense, independent legal and other advisors to assist it in the investigation, grant the committee access to any information it requests, instruct the corporation's employees and agents to cooperate with the committee, and compensate and potentially provide for indemnification of the individuals who serve as members of the committee. Because a demand operates as a concession that a majority of the board is disinterested and independent, there is little incentive under Delaware law to vest the demand investigation or evaluation committee with final decision-making authority with respect to the substance of the demand.

[c] The Retention of Counsel

If the directors already have sufficient information regarding the subject of the demand, a formal investigation may not be required. Generally, however, one of the committee's first tasks will be to engage qualified counsel to assist the committee. Although that assistance may in certain minor matters be provided by the corporation's in-house or regular outside counsel, in circumstances where the subject matter of the demand involves claims against senior management, the committee should retain special counsel experienced in the representation of special committees and whose independence from management cannot reasonably be challenged. Although counsel that has represented the alleged wrongdoers with respect to the subject of the demand obviously should not be engaged by the demand investigation committee,ⁿ⁹ counsel that regularly has represented the corporation also should be avoided as the prior relationship may cause a reviewing court to question counsel's independence.ⁿ¹⁰

Early in the representation, counsel should provide to the committee members an overview of their duties in investigating or evaluating the demand. This advice may be given orally, but directors who are new to the process often appreciate a written overview of their duties. Rather than devote the time and expense to the preparation of a memorandum for the committee, discovery of which later may be permitted by a court, a publicly available article authored by recognized authorities that describes issues applicable to the use of a special committeeⁿ¹¹ may provide a cost-efficient means of educating the committee members. The committee also must be advised of the importance of confidentiality during its investigation, and should avoid discussion with management or other directors regarding the investigation or the committee's tentative conclusions.

The committee and its counsel also should consider whether the assistance of other advisors, such as accounting or financial experts, will be required. The goal for counsel representing a demand investigation or evaluation committee is to assist its members in determining how "best to inform themselves of the facts relating to the alleged wrongdoing and the considerations, both legal and financial, bearing on a response to the demand."ⁿ¹²

[3] The Investigation or Evaluation Process

There is no universally prescribed procedure for investigating or evaluating a demand. As a general matter, however, the directors charged with such a task often conduct a factual investigation, described in more detail below, so as to assess the merits of the claims of alleged wrongdoing. In addition to the merits, the committee also may consider other,

non-legal factors such as commercial, promotional, public relations and employee morale concerns.

[a] Issues of Timing

Once the corporation determines who will investigate or evaluate the allegations made in the demand, the stockholder or counsel to the stockholder should be advised of that decision. If possible, the stockholder or counsel also should be given an indication of when a further response to the demand may be expected. In cases where the issues are complex, it may be advisable to communicate only that a committee has been appointed and that the committee or its advisors will notify the stockholder's counsel within 30 days of the expected timetable for the investigation.

Under Delaware law, the board is entitled to a "reasonable amount of time" to respond to a demand.¹³ The amount of time that is reasonable varies depending on the number of alleged wrongdoers, the length of the alleged wrongdoing and the "complexity of the technological, quantitative, and legal issues raised by the demand."¹⁴ If a complaint is filed before a reasonable time to respond has elapsed, the court either will dismiss it as premature (with leave to refile) or stay the action.¹⁵

[b] Collecting and Reviewing Documents

Among the first things the committee and its counsel should do is to identify and collect copies of any relevant documents, including any that the stockholder or the stockholder's counsel believes the committee should consider. Among the documents that should be collected are minutes of any board or committee meetings that pertain to the subject matter of the demand, any documents distributed at such meetings and, for SEC-reporting corporations, relevant public filings. Other materials that may be helpful include press releases, closing binders, due diligence schedules and analyst reports. These documents will help the committee make preliminary determinations regarding the identity of potential witnesses, the potential merits of the claims and the prospect that the corporation was injured by the alleged wrongdoing.¹⁶ Because the committee frequently will need documents in the possession of various corporate personnel and third parties, counsel to the committee investigating or evaluating a demand often will need to develop a written, easily understood request for other categories of documents.

Very early in the process, counsel to the committee will need to meet with one or more knowledgeable members of the corporation's management, often the general counsel, regarding the corporation's record keeping system (including electronic materials such as e-mail), the corporation's document retention and destruction policies, and the most efficient way to locate relevant documents. When the relevant documents are voluminous, counsel will need to adopt procedures applied in litigation to manage the document production, including keeping a record of what files have been reviewed and placing identification numbers on documents.

[c] The Interview Phase

Following the collection and review of relevant documents, the demand investigation or evaluation committee and its counsel typically will proceed to identify persons to be interviewed.¹⁷ While the putative wrongdoers should almost always be interviewed, the number and identity of other witnesses will necessarily vary depending upon the nature of the claims and issues identified in the documents. The committee should exercise its judgment to determine which persons should be interviewed, and need not interview each person who has knowledge of the subject matter. Thought should be given to requesting an interview of the stockholder or the stockholder's counsel who made the demand.¹⁸ Face-to-face meetings provide a better opportunity to assess demeanor and credibility, and facilitate the use of documents. To the extent possible, interviews should be conducted in a location where the witness is comfortable, and not distracted by work or other matters.

Counsel should prepare for interviews in much the same way as they would prepare for a deposition, thoroughly reviewing relevant documents and preparing an outline of the subjects of inquiry. Committee counsel should begin the

interview itself with explanations of the reason for the interview, that counsel represents the committee and not the interviewee,ⁿ¹⁹ and that the interviewee has the option of having his or her own counsel present. To protect the confidentiality of the process, the committee's counsel also should encourage interviewees not to discuss the interview with others. Although the demand investigation committee lacks subpoena power, most relevant witnesses generally are willing to cooperate because they will either be employees of the corporation or third parties who were retained or engaged to provide services to the corporation.

Although it may be appropriate to have an interview recorded, interviews frequently occur without a court reporter or other recording because the absence of a reporter or other recording tends to encourage the free-flow of information and permits the committee and counsel, at a later date, to pose follow-up questions. Committee counsel should take notes during the interview process and use those notes to create a written summary of the interview, copies of which should be shared with the committee members for their comments or questions.

[d] Record-keeping

Meetings of the committee often may be held telephonically and should be conducted like other board meetings with minutes of each meeting kept by counsel to the committee.ⁿ²⁰ Counsel should, after advising committee members of their legal obligations, attempt to encourage active participation in the committee's processes, which will improve the quality of the investigation and assist the decision-making process.

When the investigation or evaluation is sufficiently complete that the committee may begin its preliminary assessment of a response to the demand, counsel should emphasize that preliminary conclusions are subject to revision or change based on the continuing investigation, and help the committee members identify relevant considerations in their analysis, including the extent of any damage to the corporation, the likelihood of recovering for such injury weighed against the direct and indirect costs of seeking redress, and other available remedial options.ⁿ²¹

In circumstances where a demand investigation committee has been formed to make a recommendation to the full board of directors regarding a demand, the committee and counsel must consider how they want to document the committee's conclusions and recommendation, and how the recommendation should be presented to the full board. Often, especially when the issues are serious or complex, the committee's conclusions and recommendation will be included in a written report. While the precise contents of the committee's report will vary significantly depending on the unique facts of each investigation, the report generally should include a description of the claims made in the demand, the nature and scope of the committee's investigation, including documents reviewed and witnesses interviewed by the committee or its counsel, a discussion of applicable legal standards, a comprehensive recitation of the committee's factual findings and reasons for its recommendation regarding the claims asserted in the demand.

After the committee completes its report and reaches its recommendation regarding the demand, the committee and its counsel must determine how to communicate the committee's conclusions and recommendation to the full board. Copies of the report often will be provided to the board of directors and a meeting date set for the committee to present its recommendation. If the board accepts the committee's recommendation, the corporation must determine what amount of detail regarding the decision should be communicated to the stockholder.

[4] How Will Courts Review the Committee's Recommendation?

As noted above, a demand investigation or evaluation committee can recommend that the corporation accept and prosecute the demand, permit the stockholder to prosecute the litigation, resolve the grievance internally or refuse the demand. In the first two situations, there is little chance a court will review the committee's recommendation because the stockholder is unlikely to challenge it.

If the committee recommends internal resolution of the issues raised in the demandⁿ²² or recommends that the demand

be refused, the stockholder may seek judicial review. Under the ABA Model Business Act and the ALI Principles of Corporate Governance, both of which require that a demand be made, differing standards of judicial review may be applied to the decision to refuse a demand, based in part on the independence of the board or the committee and the nature of the alleged wrongdoing. Under Delaware law, if the board appoints a committee to investigate the demand and make a recommendation to the full board, the court considers the good faith and reasonableness of both groups.ⁿ²³ The court may consider the contents of a board letter refusing the demand and must, absent particularized allegations rebutting the truth of its contents, presume its statements are true.ⁿ²⁴

Cases applying this standard have concluded that the board's refusal to permit plaintiff's counsel to make a presentation regarding the claims did not make a refusal wrongful, nor did the refusal to provide a copy of the report to plaintiff's counsel.ⁿ²⁵ Similarly, allegations that the letter refusing the demand was drafted and signed by counsel, failed to indicate that the directors had met to consider the demand, failed to respond to each allegation of the demand and was dated only nine days after the demand, are insufficient to survive a motion to dismiss.ⁿ²⁶ Allegations of reliance upon counsel to the alleged wrongdoers, however, may be sufficient to withstand a motion to dismiss on grounds that the demand was wrongfully refused.ⁿ²⁷

Under Delaware law, a stockholder who makes a demand generally is not permitted any discovery in opposing a motion to dismiss for failure to allege specific facts showing that the demand was wrongfully refused.ⁿ²⁸ Despite the general prohibition on discovery, however, Delaware law recognizes, through Delaware General Corporation Law § 220, a possible method for the stockholder to avoid the prohibition on discovery where a demand has been made.

In *Grimes v. DSC Communications Corp.*,ⁿ²⁹ the plaintiff made a demand on DSC's board that it rescind a compensation package awarded to its CEO, urging that the package amounted to an impermissible abdication of the directors' duties. After the board rejected the demand, the stockholder, Mr. Grimes, filed a complaint asserting various derivative claims, one of which (the abdication claim) the Delaware Court of Chancery dismissed for failure to state a claim, and others of which it dismissed for failure to make a demand, the necessity for which Mr. Grimes had conceded by making a demand with respect to his abdication claim. The Delaware Supreme Court affirmed the dismissal, noting that Mr. Grimes was not precluded from making another demand with respect to the claims that were not in his first demand and that he had "the right to use the 'tools at hand' [*i.e.*, Delaware General Corporation Law § 220] to obtain the relevant corporate records, such as reports or minutes, reflecting the corporate action and related information in order to determine whether or not there is a basis to assert that demand was wrongfully refused."ⁿ³⁰ Mr. Grimes made a second demand and, nearly one year later, DSC sent him a brief, one-page letter, referencing but not including the demand investigation committee's report to the board, rejecting the demand.

After receiving the single-page letter rejecting the demand, the stockholder asserted his right under Delaware General Corporation Law § 220 to inspect certain books and records relating to "the formation, investigation and report of the Special Committee and the board's decision to accept the Special Committee's recommendation."ⁿ³¹ DSC produced certain documents in response to the Delaware General Corporation Law § 220 demand, but refused to produce the committee's report or documents accompanying it. DSC also resisted further production on the grounds that Mr. Grimes did not have a proper purpose, that the documents were not necessary to his stated purpose, and were protected by the attorney-client privilege and the work product doctrine.

Noting the Delaware Supreme Court's admonition to stockholders to avail themselves of Delaware General Corporation Law § 220 before filing a derivative lawsuit, the Court of Chancery held that Mr. Grimes' purpose was proper, and rejected the corporation's claims of privilege and work product. The court required the corporation to produce a copy of the report, minutes of all meetings of the special committee, and all board minutes referring to the special committee. The Court specifically rejected, absent a further showing of need, Mr. Grimes' request for interview summaries prepared by counsel and all records of every disbursement made in connection with the investigation.

(n4)Footnote 4. *See Khanna v. McMinn*, 2006 Del Ch. LEXIS at *49; *Parfi Holding AB v. Mirror Image Internet, Inc.*, 794 A.2d 1211, 1237 n.75 (Del. Ch. 2001), *rev'd on other grounds*, 817 A.2d 149 (Del. 2002); *Leslie v. Telephonics Office Techs., Inc.*, CA 13045, 1993 Del. Ch. LEXIS 272, at *32-33 (Del. Ch. Dec. 30, 1993) (holding that letter enclosing draft complaint did not constitute a demand).

(n5)Footnote 5. *Kaplan v. Peat, Marwick, Mitchell & Co.*, 540 A.2d 726, 731 (Del. 1988).

(n6)Footnote 6. When the subject matter of the demand is sufficiently serious, investigation of the demand generally should be conducted by the board or a committee thereof. The benefits of using a committee include relieving at least some of the directors from the time commitment of the investigation, and excluding persons at whom the charges of wrongdoing have been directed.

(n7)Footnote 7. *Aronson v. Lewis*, 473 A.2d 805, 815 (Del. 1984). However, the Delaware Court of Chancery has ruled that there is reason to doubt the disinterestedness of a director who approves the backdating of options such that he or she is "incapable of impartially considering demand." *Ryan v. Gifford*, 918 A.2d 341, 355-56 (Del. Ch. 2007) ("Backdating options qualifies as one of those 'rare cases [in which] a transaction may be so egregious on its face that board approval cannot meet the test of business judgment, and a substantial likelihood of director liability exists.'").

(n8)Footnote 8. *Scattered Corp. v. Chicago Stock Exch., Inc.*, 1996 Del. Ch. LEXIS 73, at *11 n.4. (Del. Ch. July 12, 1996), *aff'd*, 701 A.2d 70 (Del. 1997).

(n9)Footnote 9. *Stepak v. Addison*, 20 F.3d 398 (11th Cir. 1994) (refusal of demand wrongful where complaint alleged the committee relied upon the same law firm that represented the alleged wrongdoers in prior criminal proceedings involving same subject).

(n10)Footnote 10. *See Klein v. FPL Group, Inc.*, 2004 U.S. Dist. LEXIS 919 (S.D. Fla. Jan. 20, amended Feb. 5, 2004).

(n11)Footnote 11. Because of the overlap in principles of independence, both with respect to committee membership and outside advisors, it may be possible to use an article regarding SNCs. *See, e.g.*, A. Gilchrist Sparks, III and S. Mark Hurd, *Special Negotiating Committees*, 30 Rev. of Sec. & Comm. Reg. 97 (Apr. 23, 1997).

(n12)Footnote 12. *Rales v. Blasband*, 634 A.2d 927, 935 (Del. 1993) .

(n13)Footnote 13. Jurisdictions following the ABA Model Business Act presume an investigation period of 90 days is reasonable. *See* ABA Model Business Act § 7.42. The ALI Principles of Corporate Governance presumes 60 days is reasonable. *See* ALI Principles of Corporate Governance § 703 (commentary).

(n14)Footnote 14. *Baron v. Siff*, CA 15152, 2004 U.S. Dist. LEXIS 14772 (Del. Ch. Oct. 17, 1997) (internal quotation omitted).

(n15)Footnote 15. *See, e.g., MacCumber v. Austin*, CA 03 C 9405 1997 Del. Ch. LEXIS 152, at *11(N.D. Ill. Aug. 2, 2004) (motion to dismiss, without prejudice, granted where board was not given adequate time to investigate and give a definitive response).

(n16)Footnote 16. The corporation's records will almost always prove to be the most complete source of relevant documents. The committee nonetheless should ascertain if directors and officers, including any of the alleged wrongdoers identified in the demand, have relevant documents in their possession.

(n17)Footnote 17. Documents often will be organized in separate files for use in witness interviews, including documents copied from the files of the particular witness and documents authored by or provided to the witness.

(n18)Footnote 18. *See Brady*, (Tenn. Ct. App. Jan. 11, 2005) (SLC requested interview of plaintiff, who refused to be interviewed, but did interview plaintiff's counsel).

(n19)Footnote 19. The importance of a clear statement from counsel that he or she represents the corporation, and not the individual being interviewed, was recently underscored by the court's decision in *In re Grand Jury Subpoena: Under Seal*, 415 F.3d 333 (4th Cir. 2005) . Counsel should consult and carefully consider applicable ethics rules before conducting interviews.

(n20)Footnote 20. *See § 11.07 above*, for additional discussion regarding minutes, note-taking by committee members, and the benefits of face-to-face committee meetings.

(n21)Footnote 21. The committee should assume that all documents created during the investigation will be discoverable. Although the scope of permissible discovery generally is limited, there can be no certainty regarding the precise scope of discovery that a court may permit and, in some instances, it may not be possible or advisable to assert the attorney-client privilege or other immunity.

(n22)Footnote 22. In the event of an internal resolution, counsel to the stockholder may seek an award of attorneys' fees premised upon the argument that the demand conferred a corporate benefit.

CHAPTER 11 SPECIAL COMMITTEES OF THE BOARD *

2-11 Corporate Governance: Law and Practice § 11.10

AUTHOR: S. Mark Hurd Andrew M. Johnston

§ 11.10 The Special Litigation Committee

[1] Governing Law and Federal Policy

The power of a special committee of independent directors to exercise the full power of the board in making a decision to terminate a derivative lawsuit or permit it to proceed is a reflection of the fact that the board of directors governs the business and affairs of the corporation, including whether claims that belong to the corporation should be pursued. Absent an "overriding" federal policy, whether demand is excused and the ability of a special litigation committee or "SLC" to terminate a derivative action are determined by the law of the state where the corporation is incorporated.ⁿ¹

In *Burks v. Lasker*,ⁿ² for example, the United States Supreme Court concluded that permitting a committee of disinterested directors to move to terminate a derivative action under state law was not inconsistent with the policies underlying the Investment Company Act of 1940. The courts are split on the question of whether federal policy permits a special litigation committee to dismiss claims arising under Section 14(a) of the Securities Exchange Act of 1934 ("1934 Act"), which governs disclosures made in proxy statements.ⁿ³ The competing positions are set forth in *Galef v. Alexander* and *Lewis v. Anderson*. In *Galef*, the plaintiff alleged that the defendants improperly granted stock options and violated Section 14 of the 1934 Act by omitting material information in the proxy statement seeking stockholder approval of the options. A special committee of directors who had been named as defendants, but who had not received any options, recommended dismissal of the action. The Second Circuit held that the purpose of Section 14(a) would "clearly be frustrated" if directors who had been named as defendants for omitting material information in a proxy "were permitted to cause the dismissal of the action simply on the basis of [their] judgment that its pursuit was not in the best interests of the corporation."ⁿ⁴

In *Lewis v. Anderson*,ⁿ⁵ in contrast, the court held that permitting termination of an action asserting Section 14(a) claims would not frustrate federal policy where a special litigation committee comprised of one director-defendant and two non-defendant directors determined the corporation should move to dismiss.ⁿ⁶ Other courts have declined to follow the holding of *Galef* based on a finding that the harm from the wrongdoing was not the "result of" the false or misleading proxy solicitations.ⁿ⁷

[2] Issues Surrounding the Formation of the Special Litigation Committee

The first step upon receiving service of a derivative lawsuit is to examine critically the complaint to determine if it alleges particularized facts establishing that demand (assuming the stockholder did not make one) is excused as futile.ⁿ⁸ If the complaint lacks such allegations, the defendants typically will move to dismiss under Delaware Chancery Court Rule 23.1. Even if counsel determines that a Rule 23.1 motion to dismiss or other motion to dismiss (*e.g.*, based on lack of standing, absence of personal jurisdiction or failure to state a claim) can be brought, depending on the nature of the claims of wrongdoing, it is possible that public relations and other concerns will nonetheless weigh in favor of appointing a special committee in addition to, or in lieu of, a motion to dismiss the derivative lawsuit.

Before appointing a special litigation committee, counsel should consider whether such action might be construed as a concession that demand is excused. Under Delaware law, a concession of demand futility may be found if the plaintiff alleges particularized facts supporting a finding that the board made such a concession.ⁿ⁹

If the particularized allegations of the complaint are sufficient to establish that demand is excused and there is no other potentially case dispositive motion, the corporation and its counsel can either decide to proceed with the litigation or to appoint an SLC with the full authority of the board of directors with respect to the derivative claims.

The choice between proceeding with litigation or appointing an SLC is made more difficult because it typically must be made without full knowledge of all the relevant facts. If demand is excused, in most situations the entire fairness standard will apply and proceeding with litigation typically will result in the considerable expense of a trial. Subject to any applicable retention, the corporation's directors and officers' liability insurance policy often will cover defense costs.ⁿ¹⁰ Although substantial cost savings are possible, the SLC process also may cost hundreds of thousands of dollars, some or all of which may not be covered by the corporation's insurance. Generally, the more complex the issues in the litigation, the more closely the cost of the special committee process will approximate the cost of litigation. Before appointing an SLC, moreover, the corporation's board of directors must be prepared to accept the SLC's determination, including the prospect that the corporation be realigned as the plaintiff.ⁿ¹¹

On the other hand, the SLC process can be valuable not only because of its potential cost savings and as a means of directing the inquiry to an objective investigator and away from the traditionally adversarial derivative plaintiff, but also for independent business reasons, such as minimizing disruption to particularly important management endeavors. Perhaps the most significant consideration in determining whether to appoint an SLC is a thorough assessment of the attitude of the court where the derivative action is pending.

[a] Who Should Be on the Committee?

As with other types of special committees, directors serving on a special litigation committee must be disinterested and independent. The ideal candidate for the position is a director who was not a director at the time of the alleged wrongdoing and, for this reason, a corporation's directors may, if permitted by the charter and bylaws, vote to increase the size of the board of directors and fill the vacancies. The newly-appointed directors are then appointed to the SLC.ⁿ¹²

If there are no directors who were not on the board at the time of the alleged wrongdoing, the SLC should be comprised of those directors who are not named defendants or, in cases where all directors have been named as defendants,ⁿ¹³ with those directors who are not alleged to have divided loyalties with respect to the alleged wrongs. In those instances where a Delaware corporation has a charter provision adopted pursuant to Delaware General Corporation Law § 102(b)(7), and absent a loyalty claim or other exception to the protections offered by Delaware General Corporation Law § 102(b)(7), such directors will not face a reasonable prospect of monetary liability with respect to plaintiff's claims, and may appropriately serve on an SLC.ⁿ¹⁴

As a general matter, the independence and disinterest of the committee members will not be examined until after the SLC has completed its investigation and made a determination regarding the disposition of the derivative suit.ⁿ¹⁵ For

that reason, it is imperative that counsel and the committee completely vet questions of independence--ideally before the SLC is appointed and, in all events, early in the investigation.

A recent decision from the Delaware Court of Chancery, *In re Oracle Corp. Derivative Litigation*,ⁿ¹⁶ suggests that a court may apply more rigorous scrutiny of the independence of SLC committee members than it does in other contexts.ⁿ¹⁷ Specifically, the court suggested that directors would find it "easier to say no to a friend, relative, colleague, or boss who seeks assent for an act (e.g., [an SLC member asked to consider a self-dealing] transaction) that has not yet occurred" than to authorize a lawsuit against them for claims that constitute a criminal offense.

In *Oracle*, shareholder plaintiffs alleged that four directors sold Oracle stock before public announcement of disappointing earnings results. Oracle's board of directors appointed two new directors to an SLC, both tenured and highly-respected professors at Stanford University, neither of whom was "compromised by a fear that support for the prosecution of this suit would endanger his ability to make a nice living."ⁿ¹⁸ Notwithstanding these observations, the court denied the SLC's motion to dismiss, stating that "[h]omo sapiens is not merely *homo economicus*" and finding that the two SLC members lacked the requisite independence from the four Oracle directors based upon a variety of relationships those four directors also had with Stanford University.ⁿ¹⁹ Although the record before the court suggested that the SLC members may have been unaware of some of the facts upon which the court relied, practitioners should note the court's admonition that this board must undertake "a thorough consideration of the facts bearing on the independence of the proposed SLC members from the key objects of the investigation."ⁿ²⁰

[i] Scope of Authority

Although the demand investigation or evaluation committee and the SLC both play important roles within the context of potential and pending derivative litigation, the Delaware Supreme Court has observed that it is "important that these discrete and quite different processes not be confused."ⁿ²¹ As noted above, the demand investigation or evaluation committee generally makes a recommendation to the full board.

The resolutions creating an SLC, unlike those creating a demand investigation or evaluation committee, must delegate to the committee complete board authority with respect to the litigation. A "mere advisory role" is legally deficient because such a limited role "fails to bestow sufficient legitimacy on the Board's decision to warrant deference" by the reviewing court.ⁿ²² In addition to delegating all of the board's authority with respect to a derivative action, the resolutions creating the SLC also should authorize retention of independent legal and other advisors, instruct corporate personnel to cooperate with the committee, address compensation of the committee members and other matters, including indemnification.

[ii] Retaining Counsel

The SLC's determination regarding who to engage as counsel should be governed by the same considerations of independence and familiarity with the process as applies to determining who may serve as a committee member. Under Delaware law, retention of "capable counsel" is deemed an indicia of the SLC's good faith and reasonableness.ⁿ²³ Accordingly, when there is a "vast amount" of documentary or other information to review, an SLC may properly delegate "a large percentage of this work to its counsel and their expert assistants."ⁿ²⁴ An SLC does not, therefore, abdicate its function merely because its counsel devotes substantially more time to the investigation than the committee members do.

Where the committee members exhibit "an understanding of their role, a familiarity with the record, and confidence that the decisions they made were in the best interests of the company," a Delaware court will not "second guess the SLC's decisions regarding the role which counsel played in assisting them in their task."ⁿ²⁵ Some courts, however, have refused to accept an SLC's determination that derivative litigation be dismissed where the committee "relied almost exclusively" on its counsel to conduct the "substantive aspects" of the investigation, thereby shielding the investigation

from scrutiny.ⁿ²⁶

[b] The Investigation Process

[i] *Stay of Discovery during the Investigation*

Upon the formation of an SLC, one of the first steps will be to attempt to secure a stay of any discovery in the derivative action.ⁿ²⁷ Although the first cases in the Delaware Court of Chancery considering the issue held that it was "a foregone conclusion" that a stay of discovery pending an SLC investigation was to be granted,ⁿ²⁸ at least three subsequent decisions from that court have emphasized the trial court's discretion in determining whether a stay of discovery should be ordered and have denied, at least in part, a corporation's motion to stay discovery pending an SLC's investigation.ⁿ²⁹

In the first such case, *Carlton Investments v. TLC Beatrice*,ⁿ³⁰ the corporation did not move for a stay of discovery until eighteen months after the complaint had been filed, and the parties had for months propounded and responded to discovery requests. When the corporation then determined to appoint an SLC and moved for a stay of discovery, the court observed that the grant of a stay was not a matter of right but a matter of discretion implicating the "efficient and fair administration of the machinery of justice."ⁿ³¹ The court also observed that the plaintiff had brought substantial claims and was a large stockholder, thereby obviating the risk that the action was a strike suit, and that plaintiff had a "right to bring its suit and to proceed with its suit."ⁿ³² Exercising its discretion, the court denied the corporation's motion for a stay of discovery. When moving to stay discovery, counsel to the SLC should place before the court information regarding the identity and independence of the SLC members so as to provide some comfort that a stay would be appropriate.ⁿ³³

[ii] *How to Conduct a Special Litigation Committee Investigation*

After retaining counsel and (ideally) securing a stay of discovery in the derivative litigation, the SLC and its counsel will need to identify and collect relevant documents. The process applied to the collection and review of documents by a demand investigation or evaluation committee, described above, also can be applied to the SLC's work. In identifying relevant documents, the SLC and its counsel should consider any discovery requests that the plaintiff may have served with the derivative complaint. In addition to the defendants and the corporation, the SLC also should request copies of relevant documents in the files of third parties, such as outside counsel and other advisors to the corporation.

Following the collection, review and organization of relevant documents, the SLC and its counsel will need to schedule interviews of the named defendants, members of the corporation's management and outside, third-party advisors with knowledge of the facts pertaining to the claims asserted in the derivative complaint. Here, because of the pending lawsuit, it is especially important that the interviewees understand the process and that they are *not* represented by counsel to the SLC. As is true in the investigation of a demand, a written record or summary of each interview generally should be created, one or more committee members should attend and participate in the interviews, and the SLC should consider whether and when it would like to interview the plaintiff or plaintiff's counsel.

As with the interview process, the SLC and its counsel need to be sensitive to the existence of the pending derivative lawsuit when preparing committee minutes, taking notes and drafting the special litigation committee's report regarding the derivative claims.ⁿ³⁴ While no two investigations or reports are identical, most reports will include a description of the claims, a description of the SLC's investigation (including documents reviewed, witnesses interviewed and number of meetings of the committee), detailed factual findings from the SLC's investigation, legal analysis of the claims in light of the committee's factual findings, and a description of the factors considered by the SLC in reaching its determination regarding the disposition of the derivative claims.

[iii] *What Are the Committee's Options?*

The range of options available to the SLC includes a determination that: (1) the corporation should be aligned as the

plaintiff and prosecute some or all of the claims against some or all of the defendants, (2) the plaintiff be permitted to continue to prosecute the litigation, (3) the claims in the litigation be settled, or (4) the lawsuit be dismissed as not in the best interest of the corporation. There is, however, limited case law available regarding what rights and remedies are available to a stockholder plaintiff in the event an SLC makes a determination other than dismissal.

Presumably, if the SLC determines that the corporation should take over all claims against all defendants, the stockholder is not entitled to discovery to challenge that determination.ⁿ³⁵ The SLC also could determine that the corporation should prosecute certain claims against certain of the defendants, but that other claims should be dismissed.ⁿ³⁶ Such a result could occur if the SLC were to determine that there was no reasonable prospect for a recovery against certain of the defendants (because, for example, certain directors were immune from liability based upon a charter provision adopted pursuant to Delaware General Corporation Law § 102(b)(7)), but that claims could be brought against others, including third parties.ⁿ³⁷ The stockholder plaintiff in such a scenario presumably would be allowed limited discovery to challenge the decision to dismiss certain claims or certain defendants.

The SLC also may determine that the derivative action should be settled. Any proposed settlement will require court approval. If an SLC determines to propose a settlement, the stockholder plaintiff will be entitled to limited discovery to evaluate "whether the SLC knew enough about the strengths and weaknesses of the claims to negotiate a fair and reasonable settlement, and whether the settlement reached is in fact fair and reasonable."ⁿ³⁸ In *Carlton*, the court, over plaintiff's objection, approved a multi-million dollar settlement of derivative claims brought against the corporation's CEO, noting that the SLC could "legitimately sacrifice present compensation in the settlement if its good faith, informed judgment indicates to it that that course is best for the corporation."ⁿ³⁹

Another case involving a proposed settlement of derivative litigation, *In re Oracle Securities Litigation*,ⁿ⁴⁰ demonstrates the importance of independent counsel and the scope of the committee's authority. In *Oracle*, a case decided under Delaware law, the committee was formed only after the parties had agreed to a settlement and was represented by the corporation's general counsel. Observing that "in-house attorneys are inevitably subservient to the interests of the defendant directors and officers whom they serve," the court rejected the committee's recommendation that the settlement be approved because the committee had failed to show it acted with the requisite independence and good faith.ⁿ⁴¹

The court instructed that before any further proceedings, the committee would be required to "retain independent counsel having no prior relationship with the corporation or the individual defendants."ⁿ⁴² In response, the corporation formed a two person special litigation committee with full authority over the derivative litigation. The SLC then retained independent counsel and prepared a report detailing the results of its investigation. After reviewing the independence of the committee members and reasons for its conclusion, the court approved the proposed settlement of the derivative claims.ⁿ⁴³

A special litigation committee also is empowered to determine that derivative claims should be dismissed as not in the corporation's best interest. The scope of discovery to which a plaintiff is entitled to challenge that determination, and the scope of judicial review, are discussed below.

[iv] *Discovery after the Special Litigation Committee Completes its Report*

Under Delaware law, following a determination by an SLC that derivative litigation should be dismissed, "[l]imited discovery may be ordered" by the court regarding the independence and good faith of the SLC and its investigation.ⁿ⁴⁴ Discovery "may be undertaken only if first authorized by the court" and does not include discovery into the merits of plaintiff's claims.ⁿ⁴⁵ To the contrary, the limited discovery ordered by the court is directed to an inquiry "into the independence and good faith of the committee and reasonableness of the bases for its conclusion that the derivative action should be dismissed."ⁿ⁴⁶

Although the first opinion in Delaware to consider the scope of discovery suggested it would include the production of all documents reviewed by the committee, subsequent decisions have made it clear that such broad discovery will not be ordered.ⁿ⁴⁷ As a general matter, the SLC will be required to produce the report, minutes of SLC meetings, documents regarding the creation and appointment of the SLC, and retention letters between or among the SLC and its advisors. In other cases, the court also has ordered production of interview summaries, any memoranda prepared by advisors to the committee and drafts of the report. Plaintiff's counsel also will be permitted to depose the members of the committee and may, in certain circumstances, be permitted to depose any nonlegal advisor to the committee. Absent special circumstances, the court will not order a deposition of counsel to the SLC.ⁿ⁴⁸

[c] How Will a Court Review a Special Litigation Committee's Determination?

In those jurisdictions that have considered the issue, courts generally have held that an SLC has the power to cause derivative litigation to be terminated,ⁿ⁴⁹ and many jurisdictions have adopted statutes recognizing that power. The principal approaches to the special litigation process are reviewed below.ⁿ⁵⁰

[i] New York's Auerbach Model

In *Auerbach v. Bennett*,ⁿ⁵¹ the New York Court of Appeals concluded that a special litigation committee could determine to terminate a properly-filed derivative action and held that judicial review of such a decision should be limited to an examination of the SLC's good faith, the independence of its members, and the sufficiency of the committee's investigation. The *Auerbach* court reasoned that courts are "well equipped" to assess the "methodologies and procedures best suited to the conduct of an investigation of facts and the determination of legal liability" but are not well-versed in the "weighing and balancing of legal, ethical, commercial, promotional, public relations, fiscal and other factors familiar to the resolution of many if not most corporate problems."ⁿ⁵²

Under *Auerbach*, "the substantive aspects of a decision to terminate a shareholder's derivative action ... are beyond judicial inquiry under the business judgment doctrine."ⁿ⁵³ Courts applying the law of Alabama, California, Minnesota and Ohio have adopted the *Auerbach* approach to judicial review of SLC determinations.ⁿ⁵⁴

[ii] Delaware's Zapata Model

Two years after *Auerbach* was decided in New York, the Delaware Supreme Court also held that a special litigation committee could terminate derivative litigation, but reached a different conclusion regarding the scope of judicial review. The two-step scope of review announced in *Zapata Corp. v. Maldonado* ⁿ⁵⁵ applies to cases where demand is excused as futile. In the first step of the analysis, the court examines the "independence and good faith of the committee and the bases supporting its conclusions."ⁿ⁵⁶ The presumptions of the business judgment rule do not apply to the SLC, and the corporation bears the burden of proving the independence and good faith of the committee, as well as the reasonableness of its determination.

Even when the corporation satisfies the burden imposed by the first step of *Zapata*, the court may still apply a second, discretionary step in which it exercises its own "independent business judgment" as to whether dismissal of the action is appropriate. The Delaware Supreme Court concluded that the possibility of this second step was required essentially for the reasons articulated by proponents of the structural bias theory. The court remarked that the committee members were passing judgment on their fellow directors and that "[t]he question naturally arises whether a 'there but for the grace of God go I' empathy might not play a role [in the SLC's decision-making]."ⁿ⁵⁷ The court concluded that the discretionary second step provided a "middle course" between the "business judgment of a board committee" and "unbridled plaintiff stockholder control."ⁿ⁵⁸

Despite the existence of the second step under *Zapata*, at least one Delaware lawyer and former Chief Justice of the Delaware Supreme Court, has suggested it is more properly viewed as a "half-step" in which the trial court analyzes the

reasonableness of the SLC's business judgment to seek dismissal of derivative litigation, rather than imposing its own business judgment.ⁿ⁵⁹ A subsequent decision in the Court of Chancery similarly suggests that *Zapata's* second step is "designed to offer protection for cases in which, while the court could not consciously determine on the first leg of the analysis that there was no want of independence or good faith, it nevertheless 'felt' that the result reached was 'irrational' or 'egregious' or some other such extreme word."ⁿ⁶⁰

In *Kaplan v. Wyatt*, former Chancellor Brown described the "practical complications" of the *Zapata* process, which he described as adding "at least three new hearings to a derivative suit brought by a shareholder in the absence of demand on the board of directors."ⁿ⁶¹ The first hearing involves a motion to stay discovery in which the court may be called upon to resolve competing views regarding the length of the stay. In the event the SLC determines the case should be dismissed, the court again must become involved in the case, after reading the SLC's report, to determine the scope of permissible discovery plaintiff will be allowed to pursue.

At the third and final hearing, following limited discovery, the court considers the motion to dismiss.ⁿ⁶² The court described the motion as:

neither a motion to dismiss under Rule 12(b), nor is it a motion for summary judgment pursuant to Rule 56. This is because it is not addressed to the adequacy of the cause of action alleged in the complaint, on the one hand, nor, on the other, is it addressed to the merits of the issues joined by the pleadings. Rather, the motion is a hybrid one, derived by analogy to a motion to dismiss a derivative suit based upon a voluntary settlement reached between the parties and to a motion brought pursuant to Rule 41(a)(2) whereby a plaintiff unilaterally seeks a voluntary dismissal of the complaint subsequent to the filing of an answer by the defendant.ⁿ⁶³

[iii] Statutory Provisions

As noted above, many states have enacted statutory provisions based upon the ABA Model Business Act or, in one instance, the ALI Principles of Corporate Governance.ⁿ⁶⁴ Those provisions contemplate that directors may properly refuse a demand, thereby foreclosing derivative litigation before it starts.

Other states that continue to recognize the distinction between cases where demand is required and cases where demand is excused as futile, have adopted statutes addressing the powers of an SLC. Some statutes merely recognize the existence of special litigation committees, while others address the standards of judicial review. A statute in Alaska, for example, recognizes that a committee of "disinterested, noninvolved directors" may petition a court to dismiss derivative litigation based upon the committee members' "independent, informed business judgment [that] the action is not in the best interest of the corporation." If the committee members prove their disinterest and independence, and the informed basis on which they exercised their business judgment, the court must then "exercise an independent appraisal of the plaintiff's action" to determine whether dismissal is warranted.ⁿ⁶⁵ A statute in Indiana, in contrast, provides that an SLC's determination that derivative litigation should be dismissed "shall be presumed to be conclusive" unless the plaintiff proves the committee was not disinterested or that its determination was not made after a good faith investigation.ⁿ⁶⁶

(n7)Footnote 7. *Abbey v. Control Data Corp.*, 603 F.2d 724, 732 (8th Cir. 1979) , *cert. denied*, 444 U.S. 1017, 100 S. Ct. 670, 62 L. Ed. 2d 647 (1980) . See also *In re General Tire & Rubber Co. Sec. Litig.*, 726 F.2d 1075 (6th Cir.) , *cert. denied*, 444 U.S. 1017, 100 S. Ct. 670, 62 L. Ed. 2d 647 (1980) ; *Gaines v. Haughton*, 645 F.2d 761 (9th Cir. 1981) , *cert. denied*, 454 U.S. 1145, 102 S. Ct. 1006, 71 L. Ed. 2d 297 (1982) .

(n8)Footnote 8. As explained above, demand is excused when there is reason to doubt that a majority of the directors is disinterested and independent with respect to the subject of the lawsuit or if there is reason to doubt that the underlying transaction is subject to the business judgment rule. See § 11.08[2] above.

(n9)Footnote 9. See *Seminaris v. Landa*, 662 A.2d 1350, 1353 (Del. Ch. 1995) .

(n10)Footnote 10. Counsel should be aware, however, of the possibility that a provider of directors and officers' liability insurance will seek a judicial determination that the carrier is entitled to rescind the policy due to wrongdoing in the application process.

(n11)Footnote 11. Even in the event the SLC determines the action should be dismissed, moreover, if the court rejects that determination the plaintiff will have the SLC's report as a roadmap for further discovery. See *Teachers' Ret. Sys. of La. v. Aidinoff*, 900 A.2d 654, 664 (Del. Ch. 2006) (noting that access to SLC report provided an opportunity to "craft a high-quality complaint").

(n12)Footnote 12. See *Carlton Investments v. TLC Beatrice Int'l Holdings, Inc.*, CA 13950, 1997 Del. Ch. LEXIS 86, at *4 (Del. Ch. May 30, 1997) . In many jurisdictions other than Delaware, the mere fact that a director was on the board at the time of the alleged wrongdoing and has been named as a defendant is sufficient to preclude that director from serving on an SLC.

(n13)Footnote 13. That a person approved a transaction and has been named as a defendant typically does not disqualify that person from service on an SLC. See *Kindt v. Lund*, CA 17751- NC, slip op. at 5 (Del. Ch. May 30, 2003); *Katell v. Morgan Stanley Group, Inc.*, CA 12343, 1995 Del. Ch. LEXIS 76, at *19-21 (Del. Ch. June 15, 1995) ; *Zapata Corp. v. Maldonado*, 430 A.2d 779, 785 (Del. 1981) .

(n14)Footnote 14. See § 5.02 above for discussion of exculpation under § 102(b)(7) of the Delaware General Corporation Law.

(n15)Footnote 15. *Biondi v. Scrushy*, 820 A.2d 1148 (Del. Ch. 2003) .

(n16)Footnote 16. *In re Oracle Corp. Derivative Litig.*, 824 A.2d 917 (Del. Ch. 2003) , summary judgment granted, 867 A.2d 904 (Del. Ch. 2004) , *aff'd*, 2005 Del. LEXIS 150 (Apr. 14, 2005) .

(n17)Footnote 17. *But see Beam v. Stewart*, 845 A.2d 1040, 1056 (Del. 2004) (citing the decision in *Oracle* in context of demand analysis, but not deciding whether independence for purposes of demand differed from independence in the SLC context).

(n18)Footnote 18. *Oracle*, 824 A.2d at 930 .

(n19)Footnote 19. *Oracle*, 824 A.2d at 938 , 942-47.

(n20)Footnote 20. *See Oracle*, 824 A.2d at 943 .

(n21)Footnote 21. *Grimes v. Donald*, 673 A.2d 1207, 1216 n.13 (Del. 1996) .

(n22)Footnote 22. *In re Par Pharm., Inc. Derivative Litig.*, 750 Supp. 641, 647 (S.D.N.Y. 1990). *See also Biondi*, 820 A.2d 1148 (criticizing board resolutions creating an SLC that reserved for the company the ability to seek dismissal of the litigation).

(n23)Footnote 23. *Kaplan v. Wyatt*, 499 A.2d 1184, 1191 (Del. 1985) . The same court also took a critical view of the presence of the corporation's in-house counsel during interviews conducted by the SLC. *See Kaplan*, 499 A.2d at 1190 .

(n24)Footnote 24. *Carlton Investments v. TLC Beatrice Int'l Holdings, Inc.*, CA 13950, 1997 Del. Ch. LEXIS 86, at *32 (Del. Ch. May 30, 1997) .

(n25)Footnote 25. *Carlton Investments*, CA 13950, 1997 Del. Ch. LEXIS 86, at *47 .

(n26)Footnote 26. *See Peller v. Southern Co.*, 707 F. Supp. 525, 529 (N.D. Ga. 1988) , *aff'd*, 911 F.2d 1532 (11th Cir. 1990) ; *see also Johnson v. Hui*, 811 F. Supp. 479, 488-89 (N.D. Cal. 1991) .

(n27)Footnote 27. The appropriate length of a stay may vary with the circumstances. One court has observed that "courts generally allow SLCs between six and ten months to investigate and report on pending derivative actions." Silverstein, (D. Minn. Feb. 25, 2005) .

(n28)Footnote 28. *Kaplan v. Wyatt*, 484 A.2d 501, 510 (Del. Ch. 1984) , *aff'd*, 499 A.2d 1184 (Del. 1985) ; *see also Peller v. Southern Co.*, 707 F. Supp. 525, 529 (N.D. Ga. 1988) , *aff'd*, 911 F.2d 1532 (11th Cir. 1990) .

(n29)Footnote 29. Courts generally will not stay an action under § 220 to compel production of books and records, notwithstanding an ongoing SLC investigation, because rights under § 220 exist independently of derivative litigation and because of the policy encouraging the use of § 220 as an information gathering tool. *See, e.g., Kaufman v. Computer Assocs. Int'l, Inc.*, C.A. No. 699-N, 2005 Del. Ch. LEXIS 192, at *11-12 (Del. Ch. Dec. 21, 2005) ; *Romero v. Career Educ. Corp.*, C.A. No. 793-N, 2005 Del. Ch. LEXIS 112, at *8-9 (Del. Ch. July 19, 2005) .

(n30)Footnote 30. *Carlton Invs. v. TLC Beatrice Int'l Holdings*, CA 13950, slip op. at 26 (Del. Ch. June 6, 1996).

(n31)Footnote 31. *Carlton Invs.*, CA 13950, slip op. at 26.

(n32)Footnote 32. *Carlton Invs.*, CA 13950, slip op. at 29. *See also Milstein v. Milstein*, CA 18180 (Del. Ch. Oct. 13, 2000).

(n33)Footnote 33. *Biondi*, 820 A.2d 1148 (court declined to grant a stay where undisputed facts demonstrated that a subsequent decision to dismiss could not be respected by the court).

(n34)Footnote 34. Although a written report is almost always advisable, "there is no authority that suggests that Delaware law requires a formal 'report' as a matter of law." *Gatz v. Ponsoldt*, CA 174- N, slip op. at 13 (Del. Ch. Nov. 5, 2004).

(n35)Footnote 35. Plaintiff's counsel may be entitled to an award of attorneys' fees, although the determination of the amount (unless agreed to by the corporation) might reasonably be deferred until after the litigation is finally concluded. It should be noted that once the corporation assumes control of the litigation, Rule 23.1 is no longer applicable and the action could be settled without court approval.

(n36)Footnote 36. *See, e.g., Teachers' Ret. Sys. Of La. v. Aidinoff*, 900 A.2d 654, 661 (Del. Ch. 2006) (finding that the defendants who were not dismissed could not challenge the plaintiffs' complaint for failure to plead demand excusal).

(n37)Footnote 37. The effect of pending claims against third parties when a corporation appoints an SLC has not been developed in the case law, resulting in a number of open questions. For example, issues regarding whether a stay of discovery would apply to third parties who were unwilling to cooperate with the SLC process have not been addressed by the courts.

(n38)Footnote 38. *Carlton Invs. v. TLC Beatrice Int'l Holdings, Inc.*, CA 13950, 1997 Del. Ch. LEXIS 4, at *3 (Del. Ch. Jan. 28, 1997) .

CHAPTER 12 GOVERNANCE IN THE CORPORATE CONTROL CONTEXT

1-12 Corporate Governance: Law and Practice § 12.01

AUTHOR: Meredith M. Brown William D. Regner Meredith Brown is a retired partner and William Regner is a partner in the Mergers and Acquisitions Group of Debevoise & Plimpton LLP. Portions of this Chapter 12 have been adapted from materials used by the authors and their colleagues in other publications, including the book *Takeovers: A Strategic Guide to Mergers and Acquisitions* (Brown, et al.), © Aspen Publishers 2008, and may be contained in other publications by the authors and their colleagues. § 12.01 Introduction to Governance in the Corporate Control Context

This chapter will discuss the legal standards to which boards of directors are subject in the context of corporate control transactions, and will also discuss board best practices in connection with such transactions. Corporate control transactions are transactions in which someone acquires control of a public company. Corporate control transactions, by definition, represent defining moments for an enterprise, and demand extensive board involvement and input. In light of their importance and the danger of premature disclosure, such transactions tend to move at a fast pace. Further, the public scrutiny and heightened litigation risk to which transactions are subject make advance preparation--to ensure that the board can meet its exacting duties--all the more important for boards and their legal advisers.

The applicable standards and practices will vary depending on the facts and circumstances and the particular form that the control transaction takes. The transaction may take the form of a cash tender offer or cash merger where the target's public holders are bought out and no longer share in the future value of the enterprise, it may take the form of an exchange offer or stock-for-stock merger where target shareholders become shareholders of the combined enterprise, or it may be some combination of these forms. The target may have a controlling stockholder or it may not. In a stock-for-stock transaction, the acquiring entity may have one larger stockholder or it may have a fluid aggregation of unaffiliated stockholders of which the former target stockholders become part. The applicable standards will be affected significantly if the acquiring party is an insider of the target rather than an unaffiliated third party.

In addition to setting out the applicable standards and practices that would apply in the case of an actual change of control transaction, this chapter also discusses how a board might prudently prepare itself long before it is faced with responding to a change of control proposal.

§ 12.02 Standards for Reviewing Actions by the Target's Directors

Publicly traded corporations in the United States are incorporated under state law. State corporation law--not federal securities law--governs the duties of directors in responding to a takeover proposal. The United States Supreme Court has made clear that, while claims of nondisclosure by a bidder or a target can be brought under the federal securities laws, claims that directors have breached their fiduciary duties in connection with a tender offer or merger must be based on state law.ⁿ¹

More publicly held companies in the United States are incorporated in Delaware than in any other state.ⁿ² Accordingly, the case law in Delaware relating to directors' duties in responding to acquisition proposals is far more extensive than that in any other state. For these reasons, this discussion of directors' duties in the corporate control context focuses on Delaware case law. Directors of, and lawyers for, companies incorporated in other states should be aware that the standards in those states may differ from those in Delaware.

If state standards are not uniform, it is also true that the standards Delaware courts apply to test directors' responses to takeovers have evolved over time and differ in their formulation depending on the circumstances. The principal standards include:

- *The general business judgment rule.* Under the general business judgment rule, there is a presumption that, in making a business decision, the directors acted on an informed basis, in good faith and in the honest belief that the action was in the best interests of the company.ⁿ³ Under this test, courts will respect the decisions of directors unless they are interested or lack independence relative to the decision, do not act in good faith, act in a manner that cannot be attributed to a rational business purpose, or reach their decision by a grossly negligent process that includes the failure to consider all material facts reasonably available.ⁿ⁴

- *The enhanced business judgment rule: the Unocal test.* In reviewing a board's decision to take defensive action against a threatened acquisition of control, Delaware courts apply an enhanced business judgment rule, requiring the directors to show the existence of a threat to corporate policies and that the action they have taken was reasonable in relation to the threat posed. This test is sometimes referred to as the *Unocal* test, since it was first articulated by the Delaware Supreme Court in a case involving a defense by Unocal Corporation against a takeover bid by an affiliate of T. Boone Pickens, Jr.ⁿ⁵

- *Seeking the best price reasonably available: the Revlon test.* If the directors authorize the sale of control of the company, they have a duty to seek the best price reasonably available. This duty is often referred to as a *Revlon* duty, since it was described by the Delaware Supreme Court in a case involving Revlon's reaction to a takeover bid.ⁿ⁶

- *Shareholders should not be disenfranchised: the Blasius test.* An action taken without shareholder approval, with the sole or primary purpose of thwarting a shareholder vote or disenfranchising shareholders, will be upheld only if the directors can show a compelling justification for the action. This is sometimes called the *Blasius* test, after a leading case articulating it.ⁿ⁷

- *The entire fairness test.* If the directors have economic interests that are in material conflict with those of the shareholders, the general business judgment rule may not be applicable, and the directors may have to demonstrate that the transaction is entirely fair to the corporation and the shareholders.ⁿ⁸ This test is sometimes referred to as the "entire fairness" test. The entire fairness test may also apply if the directors are not able to show the other predicates of the business judgment rule--for example, if the directors have disregarded a manifest problem to a degree calling into question whether they were acting in good faith. In some circumstances--for example, if the transaction is made subject to the approval of holders of a majority of the publicly held shares, or a committee of disinterested directors has vigorously represented the interests of the public shareholders--the burden shifts to the plaintiff to show why the transaction is not entirely fair.

The array of different tests that courts apply to review the conduct of directors of target companies appears to be bewildering. If directors' conduct is challenged in the courts, litigators can spend many hours and produce reams of briefs arguing over which test is applicable in a given case. From a counseling point of view, however, we can articulate the following general principles (not expressly articulated in the cases):

- *Judges are reluctant to impose their business judgment on corporations.* Courts do not generally like to substitute their business judgment for that of the directors. Courts know that state legislatures have entrusted the management of corporate affairs to directors, not to the courts. Courts also know that shareholders have elected the directors, not the judge, to supervise the management of the company. In reviewing directors' responses to a takeover, it is comforting to a court if public shareholders have the power to vote the incumbent board out of office if the board thwarts shareholder wishes in resisting a takeover.

- *Good process is important.* The fairness of a corporate transaction has two components: substantive fairness ("fair price") and procedural fairness ("fair dealing").ⁿ⁹ Courts do not generally like to decide whether a corporate transaction is substantively fair--for instance, whether the terms of a merger are fair. The more the defendants can show procedural fairness--for example, careful study by disinterested directors with access to relevant material information and with good and knowledgeable advisers--the less likely it is that a court will overturn the directors' determination as to the economic fairness of a transaction.

■ *Conflicts of interest tend to lead to greater judicial review.* If directors have material economic interests in a transaction different from those of the public shareholders, courts are more likely to review the transaction carefully. Good process--for example, effective use of a committee of outside directors--is important in satisfying this heightened judicial review.

■ *Shareholder disenfranchisement is disfavored.* A corollary of the importance of the shareholder vote as a safeguard against unreasonable defensive actions is that courts are more likely to scrutinize a defensive action that tends to disenfranchise the shareholders of the target company.¹⁰

(n9)Footnote 9. *Weinberger v. UOP, Inc.*, 457 A.2d 701, 711 (Del. 1983) .

(n10)Footnote 10. In an unusual article published in 2001, former Delaware Chancellor William T. Allen and two then-sitting Vice Chancellors, Jack Jacobs and Leo Strine (Jacobs has since been elevated to the Delaware Supreme Court), suggested that the standards of review applied in the Delaware cases needed to be changed. William T. Allen, Jack B. Jacobs & Leo E. Strine, Jr. *Function Over Form: A Reassessment of Standards of Review in Delaware Corporation Law*, 56 *Bus. Law.* 1287, 1310-11 (2001). First, the authors argued that the *Unocal* test should be uncoupled from the business judgment and entire fairness standards. If directors take actions that impede stockholders' ability to sell their shares or to elect a new board, the authors suggested a unitary inquiry into whether such defensive measures were reasonable in light of the circumstances, without a need to examine whether an inadequately informed board acted "fairly," for "it seems highly unlikely that the board could show that those measures [that failed the *Unocal* standard] were, nonetheless, 'fair.' " Nor would the authors require directors shown to have breached their duty of care to demonstrate entire fairness. *Id.* at 1304-05. Further, the authors saw no need for a separate *Blasius* test, which

overlaps the *Unocal* test. Instead, the authors submitted that board actions that threaten the shareholders' franchise should be evaluated under the *Unocal* standard, "trusting the courts to recognize that there are fundamental limitations on the power of corporate directors to impair the ability of the governed to remove them at the polls." *Id. at 1320* (emphasis omitted).

Also, apart from the requirement that, in a sale of control, directors' actions must be evaluated solely with reference to their duty to obtain the best price reasonably available, the authors believed that the *Revlon* and *Unocal* standards are similar--particularly since Delaware courts give directors discretion to seek the best price by a variety of methods, including single-bidder negotiations supplemented with a market check. *Id. at 1321*. Further, the authors submitted that the directors should have to prove entire fairness only if the transaction involves self-dealing. The business judgment standard should apply to a going private merger if the merger (1) was expressly conditioned on approval by an informed and uncoerced majority of the minority, or (2) was approved as fair by an effective and uncoerced special committee of independent directors. *Id. at 1317*. Finally, the authors would eliminate the rule that a fully informed approval by the disinterested shareholders does not insulate directors from claims if the transaction involved a waste of corporate assets. *Id. at 1317-18*.

CHAPTER 12 GOVERNANCE IN THE CORPORATE CONTROL CONTEXT

1-12 Corporate Governance: Law and Practice § 12.03

AUTHOR: Meredith M. Brown William D. Regner Meredith Brown is a retired partner and William Regner is a partner in the Mergers and Acquisitions Group of Debevoise & Plimpton LLP. Portions of this Chapter 12 have been adapted from materials used by the authors and their colleagues in other publications, including the book *Takeovers: A Strategic Guide to Mergers and Acquisitions* (Brown, et al.), © Aspen Publishers 2008, and may be contained in other publications by the authors and their colleagues. The authors gratefully acknowledge the assistance of their colleague Dmitriy A. Tartakovskiy in the updating of this chapter.

§ 12.03 Business Judgment Rule: Special Considerations

As the Delaware Supreme Court has indicated, a director's decision will not be respected by the courts if the director is interested in the transaction, lacks independence relative to the decision, or does not act in good faith.ⁿ¹ The "interest" and "independence" components of the duty of loyalty frequently create confusion, because similar factual circumstances may implicate both interest and independence, one but not the other, or neither.ⁿ²

The Delaware Supreme Court first explained the meaning of "interest" and "independence" under Delaware law in *Aronson v. Lewis*.ⁿ³ In that case, the court stated that, with respect to "interest," the business judgment rule requires that "directors can neither appear on both sides of a transaction nor expect to derive any personal financial benefit from it in the sense of self-dealing, as opposed to a benefit which devolves upon the corporation or all stockholders generally."ⁿ⁴ This definition was further refined in *Rales v. Blasband*,ⁿ⁵ where the Delaware Supreme Court explained that "directorial interest also exists where a corporate decision will have a materially detrimental impact on a director, but not on the corporation and the stockholders."ⁿ⁶

In *Cede & Co. v. Technicolor, Inc.*, the Delaware Supreme Court rejected the contention that "any" director self-interest, standing alone and without evidence of self-dealing, is sufficient to rebut the presumption of loyalty under the business judgment rule.ⁿ⁷ Rather, such self-interest must be material to the director. In *Cinerama, Inc. v. Technicolor, Inc.*,ⁿ⁸ the Delaware Supreme Court adopted a subjective "actual person" standard for determining materiality, which requires the court to determine whether "this director in fact was or would likely be affected" by the self-interest in question.ⁿ⁹ The court further explained that the "actual person" standard requires an independent judicial determination of whether the director in question had "some special characteristic that [made] him ... especially susceptible to or immune to opportunities for self-enrichment" or whether there is "evidence that [the director] in fact behaved differently in this instance than one would expect a reasonable person in the same or similar circumstances to act."ⁿ¹⁰

Thus, a disabling director "interest" may exist in two instances. First, it exists where a director personally receives a benefit (or suffers a detriment) as a result of the challenged transaction that is not generally shared by the shareholders of the corporation and that is of such subjective material significance to that particular director that it is reasonable to question whether the director objectively considered the advisability of the challenged transaction to the corporation and its shareholders.ⁿ¹¹ Second, a director is "interested" if the director stands on both sides of the challenged transaction. In this latter situation, a showing of materiality is not required.ⁿ¹²

On the separate question of "independence," the Delaware Supreme Court stated in *Aronson* that "independence means that a director's decision is based on the corporate merits of the subject before the board rather than extraneous considerations or influences."ⁿ¹³ The court explained that such extraneous considerations or influences may exist when the challenged director is controlled by another, and that to raise a question concerning the independence of a particular board member, a plaintiff asserting the "control of one or more directors must allege particularized facts manifesting 'a direction of corporate conduct in such a way as to comport with the wishes or interests of the corporation (or persons) doing the controlling.'" The shorthand shibboleth of 'dominated and controlled directors' is insufficient."ⁿ¹⁴ One way to allege successfully that an individual director is under the control of another is by pleading "such facts as would demonstrate that through personal or other relationships the directors are beholden to the controlling person."ⁿ¹⁵

Thus, as Chancellor Chandler stated in summarizing Delaware law on the question of independence, "independence" does not involve a question of whether the challenged director derives a benefit from the transaction that is not generally shared with the shareholders of the corporation. Rather, the inquiry must focus on whether the director's decision resulted from that director's being controlled by another. The Chancellor explained that

[a] director can be controlled by another if in fact he is dominated by that other party, whether through close personal or familial relationship or through force of will. A director can also be controlled by another if the challenged director is "beholden" to the allegedly controlling entity, which is the case where the allegedly controlling entity "has the unilateral power (whether direct or indirect through control over other decision makers), to decide whether the challenged director continues to receive a benefit, financial or otherwise, upon which the challenged director is so dependent or is of such subjective material importance to him that the threatened loss of that benefit might create a reason to question whether the controlled director is able to consider the corporate merits of the challenged transaction objectively."ⁿ¹⁶

In assessing director independence, Delaware courts apply the same subjective "actual person" standard that they apply in cases involving director self-interest, in order to determine "whether a 'given' director was likely to be affected in the same or similar circumstances."ⁿ¹⁷ Thus, both in the case of "interest" and in the case of "independence," the key issue is not simply whether a particular director receives a benefit from a challenged transaction not shared with the shareholders of the corporation, or solely whether another person or entity has the ability to take some benefit away from a particular director, but "whether the possibility of gaining some benefit or the fear of losing a benefit is likely to be of such importance to that director that it is reasonable for the court to question whether valid business judgment or selfish considerations animated that director's vote on the challenged transaction."ⁿ¹⁸

An example of the approach of the Delaware courts can be seen in the decision of the Delaware Court of Chancery in *Kohls v. Duthie*,ⁿ¹⁹ where the court declined to enjoin a management buy-out transaction in which a small publicly held utility company was to be acquired by a financial sponsor. In *Kohls*, the CEO of the target owned 35 percent of the company's stock and was contributing his shares into the offer in exchange for equity in the purchaser. The transaction was negotiated by a special committee advised by independent legal and financial advisers, and was subject to a condition that 85 percent of the shares owned by persons other than the CEO be tendered. The plaintiffs alleged that the entire fairness standard was applicable to the transaction in question, because one member of the two-member special committee that negotiated the transaction lacked independence as a result of his friendship with the CEO and because the company had invested \$5 million in a fund of which the committee member was COO and CFO. In addition, the

plaintiffs alleged that the other committee member was a defendant in a derivative suit alleging as a usurpation of a corporate opportunity the purchase by the CEO--rather than by the company--of a large block of stock at a low price, and arguing that the committee's work was therefore tainted by his self-interest in seeing an end to the litigation.ⁿ²⁰

Vice Chancellor Lamb rejected these arguments, stating that "the law is clear that 'evidence of personal and/or business relationships does not raise an inference of self-interest.'" ⁿ²¹ The court found nothing about the first committee member's relationship with the CEO to suggest that he could not exercise independent judgment, as required by his fiduciary duties, when acting as a member of the special committee. Nor was the company's \$5 million investment in a \$1.3 billion fund of which the director was an officer so material as to make the committee member dependent upon or subject to the domination of the CEO of the company.ⁿ²² The court also rejected the plaintiffs' argument that the other committee member's status as a defendant in the derivative litigation was such a material interest in the proposed transaction as to taint the special committee by his involvement. This conclusion was based on the overall weakness of the derivative suit as well as the fact that the only remedy available to the plaintiffs on the derivative claim was the cancellation of the shares acquired by the CEO, rather than any possibility of a money judgment against the director defendant. For these reasons, the Vice Chancellor concluded that the functioning of the committee should be reviewed under the business judgment rule rather than the more rigorous entire fairness standard.ⁿ²³

The Delaware Chancery Court in *In re Oracle Corp. Derivative Litig.* ⁿ²⁴ looked at the issue of independence in a different context, but its decision may nevertheless suggest a shift in how Delaware courts look at outside personal and business relationships in assessing the independence of directors. This decision arose out of a shareholder derivative litigation, asserting claims on behalf of the corporation, claiming that Oracle's CEO and several other Oracle directors had breached their duties to the company by engaging in insider trading--selling Oracle shares before the announcement of an earnings shortfall. Often, in response to such an action, a corporation's board of directors appoints a special litigation committee ("SLC") made up of independent directors to consider whether the action should proceed. If the SLC is independent and decides after careful review not to proceed with the litigation, the SLC's motion to terminate the action is likely to be granted.

Oracle set up an SLC made up of two directors, both of whom had joined the board well after the earnings announcement. The SLC's counsel interviewed 70 witnesses, with SLC members participating in several of the key interviews. The SLC produced an 1,100-page report, concluding that the defendants did not have any material nonpublic information about the earnings shortfall and that Oracle should not pursue the claims against the defendants. The SLC moved to terminate the derivative litigation.

The court denied the motion to dismiss, finding that the SLC had failed to demonstrate that no material factual question existed regarding its independence. The court noted that: both SLC members were professors at Stanford University; one of the defendants was also a professor at Stanford and had taught one of the SLC members; another defendant was a big donor to Stanford (one of his gifts was \$50,000, made after an SLC member gave a speech at the defendant's request); and Oracle's CEO himself was reported to be considering giving \$170 million to Stanford.ⁿ²⁵ The court reached its conclusion even though the two SLC members had tenure at Stanford and so were not vulnerable to being fired, had no fund-raising responsibilities at Stanford, and were not shown to be controlled by any of the defendants.

In a subsequent decision, the Delaware Supreme Court went out of its way to limit the reach of *Oracle*. In *Beam v. Stewart*,ⁿ²⁶ Delaware Chief Justice Veasey noted that mere allegations that directors are friends or move in the same business and social circles is not enough to negate independence for purposes of excusing the requirement for demand on directors in a shareholder derivative action. He contrasted the concept of independence in the context of a special litigation case such as *Oracle*, noting that an SLC has the burden of establishing its own independence. Similarly, in a case arising from JP Morgan Chase's acquisition of Bank One, Delaware Vice Chancellor Lamb rejected a claim that a majority of JP Morgan Chase's directors lacked independence as a result of business, charitable or family relationships with JP Morgan Chase or its CEO.ⁿ²⁷ He found that the relationships alleged failed to demonstrate that the directors were beholden to the CEO.

Finally, on the issues of interest and independence, to rebut successfully the business judgment rule presumption that the board acted loyally, a plaintiff must show that "a majority of the director defendants have a financial interest in the transaction or were dominated or controlled by a materially interested director."²⁸ If a single director, or a minority of the directors, has a conflicting interest or lacks independence, the decision of the board as a whole still may be entitled to the protection of the general business judgment rule, if the material facts as to such conflicting interests or lack of independence are disclosed or are known to the board of directors, and the board in good faith authorizes the transaction by the affirmative vote of a majority of the disinterested directors.²⁹ However, the business judgment rule would not be applicable if the interested or dependent directors controlled or dominated the board and the decision-making by the disinterested directors.³⁰ To increase the likelihood that the decision of the directors of a target company will be entitled to the protection of the business judgment rule, it is generally desirable, at the outset of a board meeting considering a possible business combination transaction, to make known to the board any interests that directors have in the bidder(s) for the company or any controlling influences by such bidder(s).

In *Malpiede v. Townson*,³¹ the Delaware Supreme Court followed this approach in affirming the dismissal for failure to state a claim of an action arising out of a sale of Frederick's of Hollywood. In *Malpiede*, the Frederick's board signed a merger agreement, subject to shareholder approval, accepting a two-step tender offer of \$7.75 per share from Knightsbridge Capital Corp., thereby effectively ending the bidding process, and subsequently rejected an offer of \$9 per share from a competing bidder, Veritas Capital Fund. Frederick's shareholders brought suit alleging that the directors had breached their duty of loyalty.

Only one of the directors appeared to have a conflict of interest--the CEO, who was to receive \$0.05 for each underwater option, a severance payment of \$750,000 on consummation of the merger, and a payment of \$250,000 on the date of the merger in sixteen quarterly payments of \$100,000 under a non-compete and consulting agreement--and the plaintiffs did not allege that the apparently conflicted director dominated the other directors. The plaintiffs also alleged that the directors were concerned that if they decided to enter into the merger agreement with Veritas, Knightsbridge would sue them, and therefore, the directors' individual interests in avoiding personal liability to Knightsbridge influenced their decision to approve the merger. The Supreme Court of Delaware disagreed, reasoning that "[e]xcept in egregious cases, the threat of personal liability for approving a merger transaction does not in itself provide a sufficient basis to question the disinterestedness of directors, because the risk of litigation is present whenever a board decides to sell the company."³² Moreover, there was evidence that Veritas agreed to indemnify the directors in the event Knightsbridge sued them. Therefore, the court concluded that the merger with Knightsbridge was approved by a majority of disinterested directors and that "the facts alleged in the complaint do not state a cognizable claim that the directors acted in their own personal interests rather than in the best interests of the stockholders when they approved the Knightsbridge merger."³³

FOOTNOTES:

(n1)Footnote 1. *Brehm v. Eisner*, 746 A.2d 244, 264 n.66 (Del. 2000) . The Delaware Supreme Court has held that the duty of good faith is separate from - though intertwined with - the duties of care and loyalty. *In re The Walt Disney Co. Derivative Litig.*, 906 A.2d 27 (Del. 2006) . The court acknowledged, however, that the duty of good faith "is not a well-developed area of [Delaware's] corporate fiduciary law" *In re The Walt Disney Co.*, 906 A.2d at 64 . In *Orman v. Cullman*, Chancellor Chandler had suggested that the duty to act in good faith was not a separate fiduciary duty of corporate directors, but merely a subset of the duty of loyalty (*quoting Emerald Partners v. Berlin*, C. A. No. 9700, 2001 Del. Ch. LEXIS 20, at *86 n.63 (Del. Ch. Feb. 7, 2001)) , vacated and remanded on other grounds by 787 A.2d 85

(*Del. 2001*) ("[a]lthough corporate directors are unquestionably obligated to act in good faith, doctrinally such obligation does not exist separate and apart from the fiduciary duty of loyalty. Rather, it is a subset or 'subsidiary requirement' that is subsumed within the duty of loyalty, as distinguished from being a complementary distinct fiduciary duty of equal dignity with the two bedrock fiduciary duties of loyalty and due care"). In *Stone v. Ritter*, 911 A.2d 362, 370 (*Del. 2006*), the Delaware Supreme Court confirmed this view, holding that the requirement to act in good faith is a "subsidiary element" of the duty of loyalty, not "an independent fiduciary duty that stands on the same footing as the duties of care and loyalty."

(n2)Footnote 2. See *Orman v. Cullman*, 794 A.2d 5 (*Del. Ch. 2002*), for a good summary by Delaware Chancellor Chandler of "established Delaware law" on director self-interest and lack of independence.

(n3)Footnote 3. *Aronson v. Lewis*, 473 A.2d 805 (*Del. 1984*).

(n4)Footnote 4. *Aronson*, 473 A.2d at 812. See also *Cede & Co. v. Technicolor, Inc.*, 634 A.2d 345 (*Del. 1993*), where the Delaware Supreme Court explained that "[c]lassic examples of director self-interest in a business transaction involve either a director appearing on both sides of a transaction or a director receiving a personal benefit from a transaction not received by the shareholders generally." 634 A.2d at 362.

(n5)Footnote 5. *Rales v. Blasband*, 634 A.2d 927 (*Del. 1993*).

(n6)Footnote 6. *Rales*, 634 A.2d at 936. See also *In re the Walt Disney Co. Derivative Litig.*, 731 A.2d 342, 354 (*Del. 1998*) (citing the definition of interest in *Rales*).

(n7)Footnote 7. *Cede*, 634 A.2d at 364.

(n8)Footnote 8. *Cinerama, Inc. v. Technicolor, Inc.*, 663 A.2d 1156 (*Del. 1995*).

(n9)Footnote 9. *Cinerama*, 663 A.2d at 1167. In *Cede*, the Delaware Supreme Court had rejected the use of an objective "reasonable person" standard for determining the materiality of a given director's self-interest in a challenged corporate transaction. The court stated that "the reasonable person standard ... has no applicability where there is a breach of the duty of loyalty." *Cede*, 634 A.2d at 364 & n.31.

(n10)Footnote 10. *Cinerama*, 663 A.2d at 1167 (quoting the decision below, 663 A.2d 1134, 1151-52 (*Del. Ch. 1994*)).

(n11)Footnote 11. A director's interest in maintaining his or her office following a transaction does not, in and of itself, constitute a disabling personal interest under Delaware law. See, e.g., *Gantler v. Stephens*, C.A. No. 132, 2009 Del. LEXIS 33, *24-25 (*Del. Jan. 27, 2009*) (claims that directors had an entrenchment motive solely because they could lose their positions following an acquisition are tautological; plaintiffs must plead, in addition to a motive to retain corporate control, other facts sufficient to state a cognizable claim that directors acted disloyally); *Shaper v. Bryan*, 864 N.E.2d 876, 885 (*Ill. App. 2007*) (under Delaware law) ("Delaware law has routinely rejected the notion that a director's interest in maintaining his office is a debilitating factor.") (citing *Benihana of Tokyo, Inc. v. Benihana, Inc.*, 891 A.2d 150, 175 (*Del. 2005*)).

(n12)Footnote 12. To illustrate his analysis in *Orman*, the Chancellor discussed, by way of example, a case where a plaintiff shareholder of company X, which is to merge with company Z, challenges the vote of director A, who is both a director and officer of company X, in favor of recommending shareholder approval of the merger. The Chancellor stated that, if one of the terms of the merger agreement was that director A was to be an officer in surviving company Z, and that maintaining his position as a corporate officer in the surviving company was material to director A, those facts, when considered in light of all the facts alleged, might lead the court to conclude that director A had a disabling interest. *Orman*, 794 A.2d 5. at 25.

(n13)Footnote 13. *Aronson*, 473 A.2d at 816 .

(n14)Footnote 14. *Aronson*, 473 A.2d at 816 (quoting *Kaplan v. Centex Corp.*, 284 A.2d 119, 123 (Del. 1971)) .

(n15)Footnote 15. *Aronson*, 473 A.2d at 815 . See also *Rales*, 634 A.2d at 936 (explaining that lack of independence may be shown when a plaintiff alleges facts that show "that the directors are 'beholden' to the [controlling person] or so under their influence that their discretion would be sterilized").

(n16)Footnote 16. *Orman*, 794 A.2d at 25 n.50 .

(n17)Footnote 17. *McMullin v. Beran*, 765 A.2d 910, 923 (Del. 2000) .

(n18)Footnote 18. *Orman*, 794 A.2d at 25 .

(n19)Footnote 19. *Kohls v. Duthie*, 765 A.2d 1274 (Del. Ch. 2000) .

(n20)Footnote 20. *Kohls*, 765 A.2d at 1277 .

(n21)Footnote 21. *Kohls*, 765 A.2d at 1284 & n.19 (quoting *State of Wis. Inv. Bd. v. Bartlett*, C.A. 17727, 2000 Del. Ch. LEXIS 42, at *20 (Del. Ch. Feb. 24, 2000)) . But see *California Public Employees Ret. Sys. v. Coulter*, C.A. 19191, 2002 Del. Ch. LEXIS 144, at *29 (Del. Ch. Dec. 18, 2002) (taken together, allegations of personal friendships, outside business relationships and approval of or acquiescence in challenged transactions were sufficient to raise inference of lack of independence).

(n22)Footnote 22. *Kohls*, 765 A.2d at 1284-85 .

(n23)Footnote 23. *Kohls*, 765 A.2d at 1285 .

§ 12.04 Enhanced Scrutiny in the Case of Defensive Actions

[1] *Unocal*

The Delaware courts give enhanced scrutiny to board authorization of defensive actions that make it more difficult for a bidder to acquire a target company.

Some of the older Delaware cases apply a primary purpose test: did the board, in taking the challenged action, act primarily to benefit the corporation or to entrench and perpetuate itself in office? In two relatively early cases involving struggles for corporate control, the Delaware Chancery Court, applying the primary purpose test, approved a repurchase of stock from a notorious corporate raider¹ and the use of corporate funds to repurchase a block of stock held by another company whose president was well known as a proponent of aggressive tactics that threatened the target's normal operations.² The primary purpose test, however, was distressingly subjective, requiring a court to examine what was in the hearts and minds of the directors of the target company.

In 1985, in *Unocal Corp. v. Mesa Petroleum Co.*,³ the Delaware Supreme Court adopted an objective enhanced scrutiny standard to review defensive measures implemented in anticipation of or in response to an unsolicited takeover threat, although in that case the *Unocal* court also referred to the primary purpose test. The court noted that whenever a board takes steps to defeat or deter an unsolicited offer, there is the "omnipresent specter that a board may be acting primarily in its own interests, rather than those of the corporation and its shareholders."⁴ Accordingly, the court stated that, when a board undertakes defensive measures in anticipation of or in response to a possible takeover attempt, the board has the burden of demonstrating both that (1) it had "reasonable grounds for believing that a danger to the corporate policy and effectiveness existed"⁵ and (2) the defensive measure adopted was "reasonable in relation to the threat posed."⁶ If the board is able to satisfy both elements of this additional test, the directors' actions will be entitled to the protection of the business judgment rule.

The *Unocal* case arose out of Unocal's defense against a hostile tender offer by Mesa Petroleum, headed by T. Boone Pickens, who had made numerous hostile bids. During the pendency of Mesa's tender offer, Unocal sought to make a selective exchange offer for its own shares and to exclude Mesa from participating in that offer. Mesa, already the owner of approximately 13 percent of Unocal's stock, had commenced a two-tier, "front-end-loaded" cash tender offer for 37 percent of Unocal's outstanding shares at \$54 per share. The second tier "back end" of the offer was intended to eliminate remaining publicly held shares through an exchange of "junk bond" securities purportedly worth \$54 per share, but highly subordinated.

Unocal's board met twice, for a total of eleven and a half hours, to consider Mesa's offer and determine how to respond to it. The first meeting, held five days after Mesa had launched its bid, lasted nine and a half hours and featured detailed presentations by counsel concerning the board's state and federal law obligations and by an outside investment banker concerning the inadequacy of the offer. Using slides to outline the valuation techniques employed to analyze recent business combinations in the oil and gas industry, the investment banker opined that Unocal shareholders could expect to receive more than \$60 per share as the minimum cash value from a sale or orderly liquidation of all of Unocal's stock. He also presented various defensive strategies--including a self-tender at \$70 to \$75 per share--that the directors could adopt if they deemed Mesa's offer inadequate and decided to oppose it. The board's outside directors then met separately with the attorneys and financial advisers and determined to advise the board to fight the Mesa bid with a self-tender. Two days later, in a two-hour meeting, the board approved a self-tender for 49 percent of the shares, at \$72 per share.

The board resolved, however, to exclude Mesa from the offer and thus to deny Mesa the opportunity to tender to Unocal, at \$72 per share, Mesa's holdings of Unocal stock.ⁿ⁷ As the court explained:

Legal counsel advised that under Delaware law Mesa could only be excluded for what the directors reasonably believed to be a valid corporate purpose. The directors' discussion centered on the objective of adequately compensating shareholders at the "back-end" of Mesa's proposal, which the latter would finance with "junk bonds". To include Mesa would defeat that goal, because under the proration aspect of the exchange offer (49 percent) every Mesa share accepted by Unocal would displace one held by another stockholder. Further, if Mesa were permitted to tender to Unocal, the latter would in effect be financing Mesa's own inadequate proposal.ⁿ⁸

Mesa sued to enjoin the selective exchange offer and obtained a preliminary injunction. The Delaware Supreme Court reversed.

The court held that Unocal's directors had authority under Delaware law to deal selectively with the corporation's shareholders, "provided the directors have not acted out of a sole or primary purpose to entrench themselves in office."ⁿ⁹ Moreover, the board had a "fundamental duty and obligation to protect the corporate enterprise, which includes stockholders, from harm reasonably perceived, irrespective of its source."ⁿ¹⁰ The court then proceeded to examine whether the directors had acted in good faith to fulfill their duty of loyalty to Unocal and its shareholders or whether they primarily had sought to perpetuate their own tenure.

The court concluded that the board had acted with a valid purpose: the directors' intent was either to defeat what they reasonably believed to be an inadequate offer or, in the alternative, to provide \$72 worth of senior debt to the 49 percent of Unocal's shareholders who, in the second tier of Mesa's offer, otherwise would be forced to accept "junk bonds" worth far less than \$54. The court also recognized that Mesa's two-tier, "front-loaded" offer was:

a classic coercive measure designed to stampede shareholders into tendering at the first tier, even if the price is inadequate, out of fear of what they will receive at the back end of the transaction. Wholly beyond the coercive aspect of an inadequate two-tier tender offer, the threat was posed by a corporate raider with a national reputation as a "greenmailer."ⁿ¹¹

The fact that Mesa would be excluded from participating in the offer did not render the directors' actions improper, for inclusion of Mesa would have negated the very purposes behind the self-tender: it would have compelled Unocal effectively to subsidize Mesa's continuing effort to buy Unocal at \$54 per share and would have allowed Mesa to reap the same benefits allotted to the other shareholders, whom the board sought to protect from Mesa's own coercive and inadequate offer. "The board," observed the court, "continues to owe Mesa the duties of due care and loyalty. But in the face of the destructive threat Mesa's tender offer was perceived to pose, the board had a supervening duty to protect the corporate enterprise, which includes the other shareholders, from threatened harm."¹² The board thus had fulfilled its duties to Unocal and its shareholders. The case law after *Unocal* gives guidance as to what is needed to satisfy the *Unocal* test and, in the process, has made it easier to show whether a threat exists and whether the reaction to the threat is reasonable.

[2] Are There Reasonable Grounds for Believing There is a Danger to Corporate Policy and Effectiveness?

The cases make clear that the board can find a threat, even if no one has actually launched a takeover, if there is a possibility that a takeover attempt will be made.¹³

In *Paramount Communications, Inc. v. Time, Inc.*,¹⁴ the Delaware Supreme Court, upheld, under *Unocal*, Time's response to a cash tender offer by Paramount, noting Time's arguments that the Paramount bid was inconsistent with a proposed combination between Time and Warner Brothers that was necessary to implement Time's long-term business plans and its views as to which combination provided the best strategic fit with Time's policy and culture.

Time had entered into a negotiated stock merger with Warner. Time's board of directors had determined to search for a strategic alliance to allow it to expand further into entertainment from its original journalistic base. Time's board was concerned about preserving Time's culture, including its commitment to journalistic integrity. Time's board determined that an alliance with Warner would best fit with Time's existing businesses. Moreover, under the merger agreement, the "Time culture" was to be preserved by elaborate provisions relating to the composition of the board and the selection of the chief operating officer of the combined company.

Paramount made a hostile offer of \$175 per Time share (later raised to \$200 per share) (Time stock had been trading at about \$126 per share), contingent on Time's calling off its proposed merger with Warner. The Time board rejected Paramount's bid, and instead restructured its merger with Warner to be accomplished, without a vote by Time's shareholders, by an immediate all-cash tender offer for 51 percent of Warner's outstanding stock at \$70 per share, the remaining 49 percent to be purchased at some later date for a mixture of cash and securities worth \$70 per share.

Paramount brought suit to enjoin the revised Time-Warner merger, arguing that Time's board had breached its fiduciary duties under *Unocal*. Paramount argued that since its tender was an all cash offer for all shares, its offer did not represent a threat to Time's shareholders, and accordingly, defensive tactics were unwarranted under *Unocal*.

The Delaware Supreme Court declined to enjoin the revised Time-Warner merger. The court rejected Paramount's proposed rule of law, extrapolated from some earlier Chancery Court decisions, "that an all-cash, all-shares offer with values reasonably in the range of acceptable price cannot pose any objective threat to a corporation or its shareholders."¹⁵ According to the Delaware Supreme Court, the Chancery Court cases cited by *Paramount-Time*¹⁶ fundamentally misconceived the *Unocal* standard of review, in that they "would involve the court in substituting its judgment as to what is a 'better' deal for that of a corporation's board of directors."¹⁷ The Delaware Supreme Court also rejected the concept that current or discounted future price for shares should be the only standard taken into account by a board in evaluating a threat under *Unocal*. Instead, the board must be free to examine the "nature and timing of the offer, questions of illegality, the impact on 'constituencies' other than shareholders ... the risk of nonconsummation, and the quality of securities being offered in the exchange."¹⁸ The court stated in broad language:

The fiduciary duty to manage a corporate enterprise includes the selection of a time frame for achievement of corporate goals. That duty may not be delegated to stockholders ...Directors are not obliged to abandon a deliberately conceived corporate plan for a short-term shareholder profit unless there is clearly no basis to sustain the corporate strategy.¹⁹

The *Paramount-Time* decision indicates that careful articulation of a corporate strategy, including the strategic advantages of a particular merger, may help a board in taking action to defend the strategy, because it may help to establish a threat under *Unocal*. The court in *Paramount-Time* relied on Time's having charted its strategic corporate goals in advance of the events that led to the litigation, and on the fact that Time's directors decided to stay on that strategic course despite the intervention of Paramount's cash tender offer.²⁰

The directors may satisfy the first element of the *Unocal* test--reasonable grounds to believe there is a danger to corporate policy and effectiveness--"by showing good faith and reasonable investigation."²¹ Evidence of their good faith and reasonable investigation is "materially enhanced" if a majority of the directors approving the defensive action consists of outside independent directors.²² In such cases, plaintiffs bear a "heavy burden of overcoming the presumptions thus attaching to the board's decisions."²³

In *Mills Acquisition Co. v. MacMillan, Inc.*,²⁴ the Delaware Supreme Court provided a non-exclusive list of factors that the board of a target company might consider in conducting a reasonable investigation as to whether a particular takeover offer constituted a threat to corporate policy and effectiveness. The court stated that the board should engage in an analysis that considers:

among various proper factors, the adequacy and terms of the offer; its fairness and feasibility; the proposed or actual financing for the offer, and the consequences of that financing; questions of illegality; the impact of both the bid and the potential acquisition on other constituencies, provided that it bears some reasonable relationship to general shareholder interests; the risk of non-consummation; the basic stockholder interests at stake; the bidder's identity, prior background and other business venture experiences; and the bidder's business plans for the corporation and their effects on stockholder interests.²⁵

In *Unitrin, Inc. v. American General Corp.*,²⁶ the Delaware Supreme Court considered defensive actions taken by Unitrin in response to an offer by American General to buy all of Unitrin for \$2.6 billion, about 30 percent above the then market price. In response to the American General offer, Unitrin adopted a poison pill, amended its bylaws to require advance notice for actions proposed by shareholders, and also authorized the repurchase of close to 20 percent of its outstanding shares--a repurchase program that would increase the percentage ownership of Unitrin's directors so as to enable them to block a merger with a more-than-fifteen-percent owner, under a supermajority provision in Unitrin's charter, unless the merger was approved by Unitrin's continuing directors.

The Chancery Court entered a temporary restraining order and a preliminary injunction against repurchases by Unitrin of its own shares, on the grounds that the repurchase program was "unnecessary" and therefore a disproportionate response to the threat posed by American General. The Delaware Supreme Court reversed. In analyzing whether there was a threat that warranted a defensive response, the Delaware Supreme Court noted three types of threats:

- *opportunity loss*, where a hostile offer might deprive target shareholders of the opportunity to select a superior alternative;
- *structural coercion*, in that disparate treatment of non-tendering shareholders might distort shareholders' tender decisions; and
- *substantive coercion*, the risk that shareholders will mistakenly accept an underpriced offer because

they do not believe management's representations of intrinsic value.ⁿ²⁷

According to the court, the record appeared to support the conclusion that Unitrin's board reasonably perceived American General's offer to involve a threat of substantive coercion: that shareholders might accept American General's inadequate offer because of ignorance or mistaken belief as to the board's assessment of the stock's long-term value. Stock of the target was moving into hands of arbitrageurs, and the board had found that the market was undervaluing the target's stock.ⁿ²⁸

The *Unocal* test would also be applicable if parties to a negotiated merger take actions to defend against the possibility of a competing bid. That has long been recognized if the actions are taken in response to an actual competing bid.ⁿ²⁹ More recently, case law has suggested that deal protection provisions such as covenants not to talk to others and "break-up fees" payable if one party terminates in order to accept a better transaction should be subjected to enhanced scrutiny under *Unocal*, as defensive actions taken in response to the possibility of a competing transaction.ⁿ³⁰ Finally, the majority in the Delaware Supreme Court's decision in *Omnicare, Inc. v. NCS Healthcare, Inc.*,ⁿ³¹ held that deal protection devices put in place to protect a stock-for-stock merger even in the absence of an active threat are subject to enhanced scrutiny under the *Unocal* test.

[3] Is the Defensive Response Reasonable in Relation to the Threat Posed?

In *Unitrin*, the Chancery Court had enjoined a repurchase program undertaken in response to an offer to buy the whole company because the response was not "necessary." The Delaware Supreme Court reversed, in effect holding that the Chancery Court's application of *Unocal* placed too great a burden on the directors of the target company. According to the Delaware Supreme Court, the Chancery Court should have reviewed first whether the repurchase program was "draconian, by being either preclusive or coercive," and second, if not, whether it was "within a range of reasonable responses to the threat ... posed."ⁿ³²

The *Unitrin*, court noted that the lower court had mistakenly concluded that the effect of the repurchase program would be to preclude the possibility of a successful proxy contest by American General to take over Unitrin. In fact, so long as a bidder did not buy more than 15 percent of Unitrin's stock, it would be able to wage a proxy contest to elect directors who could redeem the poison pill and approve a merger that would require for its approval only a bare majority of Unitrin's stock. The court also pointed out that, even if the director-stockholders increased their stockholdings as a result of the repurchase program, it could not be presumed that the desire to remain on the board would prevail over a stockholder-director's economic interest. In the court's view, it did not appear that the repurchase program would have a preclusive effect on a proxy contest, or that a limited non-discriminatory self-tender or repurchase program would be inherently coercive.ⁿ³³

If a defensive measure is found not to be preclusive or coercive, the court should not substitute its business judgment for that of the target company directors in assessing whether the defensive measure was reasonable in relation to the threat posed. Rather, it should determine only whether the measure fell within a "range of reasonableness."ⁿ³⁴

While the Delaware Supreme Court sent the case back to the Chancery Court to assess the defensive measure under these tests, it did note broadly that a board needs "latitude in discharging its fiduciary duties to the corporation and its shareholders when defending against perceived threats," and pointed out a concomitant need for judicial restraint.ⁿ³⁵

The *Unitrin* court indulged in an extended image of medieval defensive warfare:

When a corporation is not for sale, the board of directors is the defender of the metaphorical medieval corporate bastion and the protector of the corporation's shareholders [I]f a board reasonably perceives that a threat is on the horizon, it has broad authority to respond with a panoply of individual or combined defensive precautions, e.g., staffing the barbican, raising the drawbridge, and lowering the

portcullis. Stated more directly, depending upon the circumstances, the board may respond to a reasonably perceived threat by adopting individually or sometimes in combination: advance notice by-laws, supermajority voting provisions, shareholder rights plans, repurchase programs, etc.ⁿ³⁶

The Delaware Supreme Court instructed the lower court, in determining whether the repurchase program was within the range of reasonableness, to take into consideration whether:

(1) it is a statutorily authorized form of business decision which a board of directors may routinely make in a non-takeover context; (2) as a defensive response to American General's offer it was limited and corresponded in degree or magnitude to the degree or magnitude of the threat ...; (3) with the Repurchase Program, the Unitrin Board properly ... provided immediate liquidity to those shareholders who wanted it.ⁿ³⁷

The court strongly hinted--by citing with approval an earlier case upholding a repurchase program and other measures adopted by Polaroid in response to a takeover bid--that the defensive measures taken by Unitrin were within a range of reasonableness.ⁿ³⁸

The Chancery Court never decided the question of the reasonableness of the repurchase program on remand, as American General determined not to press its pursuit of Unitrin.

In its decision in *Omnicare, Inc. v. NCS Healthcare, Inc.*,ⁿ³⁹ the Delaware Supreme Court applied the initial *Unitrin* test in a way that did not lessen the burden placed on target directors by *Unocal*. In *Omnicare*, the court elaborated on when a response is "preclusive" or "coercive," as follows:

... A response is "coercive" if it is aimed at forcing upon stockholders a management- sponsored alternative to a hostile offer.

... A response is "preclusive" if it deprives stockholders of the right to receive all tender offers or precludes a bidder from seeking control by fundamentally restricting proxy contests or otherwise.ⁿ⁴⁰

Omnicare involved a challenge to the proposed merger between Genesis Health Ventures, Inc. and NCS Healthcare, Inc., a public corporation on the brink of insolvency. Genesis and NCS had entered into a merger agreement, pursuant to which NCS's creditors were to be paid in full and NCS's stockholders were to exchange their shares for the shares of Genesis.

The merger agreement contained a provision, authorized by the Delaware corporation law, requiring that the merger be placed before the NCS stockholders for a vote even if NCS's board of directors no longer recommended approval of the merger. In addition, two stockholders of NCS, who held a majority of its voting power, had agreed unconditionally to vote their shares in favor of the merger, making it a certainty that the merger would be approved by the stockholders. Genesis had insisted on a firm lock-up as a condition of its willingness to enter into a transaction with NCS.

Thereafter, *Omnicare, Inc.* made an acquisition proposal to the board of NCS, pursuant to which the stockholders of NCS would receive consideration of greater value than they would receive under the merger agreement with Genesis. As a result, the NCS board withdrew its prior recommendation that the stockholders approve the merger agreement with Genesis, and NCS's financial advisers withdrew their fairness opinion. Shareholders brought a class action to enjoin the merger with Genesis.

The Chancery Court concluded that "the directors acted in conformity with their fiduciary duties in seeking to achieve the highest and best transaction that was reasonably available to them."ⁿ⁴¹ On appeal, the Delaware Supreme Court reversed, holding that the deal protection provisions were invalid under *Unocal*, on two separate grounds.

First, the court reviewed the deal protection provisions under the *Unocal* test. The court held that enhanced scrutiny should apply to deal protection provisions because "[t]he stockholders' ability to effectively reject a merger agreement is likely to bear an inversely proportionate relationship to the structural and economic devices that the board has approved to protect the transaction."ⁿ⁴² Applying *Unocal*, the court examined whether the board's response to a reasonably perceived threat--in this case, agreeing to the lock-up provisions to keep Genesis from making good on its threat to terminate discussions--was reasonable in relation to the threat. The court explained that to sustain the defensive measure under *Unocal*, the court must first determine that the devices are not "preclusive" or "coercive," and then determine that they are within a "range of reasonable responses" in relation to the threat posed. The court found the lock-up given to Genesis to be both preclusive and coercive. According to the majority, the lock-up arrangements "accomplished a fait accompli" and were "designed to coerce the consummation of the Genesis merger and preclude the consideration of any superior transaction."ⁿ⁴³ The court noted that the combination of the firm requirement to submit the merger to a stockholder vote, the voting agreements and the absence of an effective fiduciary out made it impossible and unattainable "for the Omnicare transaction or any other transaction to succeed, no matter how superior the proposal."ⁿ⁴⁴

The court also found the deal protection provisions to be invalid on a separate basis: they prevented the NCS directors from exercising their continuing fiduciary duties to minority stockholders. By agreeing to the fully locked-up deal, the NCS board "disabled itself from exercising its own fiduciary obligations at a time when the board's own judgment is most important, i.e. receipt of a subsequent superior offer."ⁿ⁴⁵ Acknowledging that boards may agree to merger protection devices that are "economic and reasonable," even if they increase the cost to a competing bidder, the majority stated that defensive measures "cannot limit or circumscribe the directors' fiduciary duties," which the court described as "unremitting."ⁿ⁴⁶ The court held that the NCS board had no authority to approve a merger agreement that prevented it from executing its ongoing fiduciary responsibilities, and that the board was "required to contract for an effective fiduciary out clause to exercise its continuing fiduciary responsibilities."ⁿ⁴⁷

The Delaware Chancery Court's subsequent decision in *Orman v. Cullman* ⁿ⁴⁸ suggests that courts will apply *Omnicare* narrowly. In *Orman*, the court declined to invalidate, on *Omnicare* grounds, a controlling stockholder's voting agreement that precluded the possibility of completing a competing deal for 18 months.

The Cullman family, controlling stockholders of General Cigar, agreed to vote for a transaction in which Swedish Match would acquire half the Cullman family's interest and the public shareholders' interest in General Cigar. After the merger, General Cigar would be owned 64 percent by Swedish Match and 36 percent by the Cullmans, although two members of the Cullman family would remain in control of General Cigar's operations.

The transaction, approved by a special committee of General Cigar's board, was conditioned on approval by a majority of the shares held by the public. The Cullmans, whose high-vote Class B shares gave them voting control over General Cigar but not a majority economic interest, agreed not to sell their shares and to vote their shares against any alternative proposal, for a specified period after termination of the merger agreement between General Cigar and Swedish Match. The period was originally to be one year, but was increased to 18 months after Swedish Match agreed to improve the deal price by \$0.25, to \$15.25 per share--a 75 percent premium over the market price. The public shareholders approved the transaction.

Chancellor Chandler then applied a *Unocal* analysis, as required by *Omnicare*, to determine whether the deal protection mechanisms were adopted in response to a reasonably perceived threat and whether they were "coercive." The Chancellor noted that the plaintiff had not argued that the lockup was "preclusive" under *Unocal*, and so only coercion was at issue.

Chancellor Chandler concluded that the first prong of *Unocal* was easily satisfied: the General Cigar board risked losing the transaction if it did not accede to the lockup, since Swedish Match said it would not proceed without deal protection.

Turning to the second prong, the Chancellor decided the deal protection measures were not coercive because they do not "cause the vote to turn on factors extrinsic to the merits of the transaction."ⁿ⁴⁹

Chancellor Chandler distinguished the deal protection devices in *Omnicare*, which made approval of the Genesis/NCS merger a "*fait accompli*" from the ones before it: the *Omnicare* merger was required to go to a shareholder vote even if the NCS board withdrew its recommendation, and NCS's controlling shareholders had entered into a watertight voting agreement, making the NCS board's ability to change its recommendation meaningless. In contrast, the General Cigar board's ability to change its recommendation was meaningful, since the public shareholders could reject the merger - "even though, permissibly, their vote may have been influenced by the existence of the deal protection measures."ⁿ⁵⁰ The Chancellor also noted that, unlike in *Omnicare*, "there was no competing bid for General Cigar."ⁿ⁵¹

Chancellor Chandler acknowledged that the Cullmans' agreement to vote against alternative deals for 18 months meant that "[i]t was this deal or nothing, at least for that period of time," but questioned whether an 18 month delay was "a meaningful 'cost' that could be said realistically to 'coerce' the shareholders' vote."ⁿ⁵² He also questioned whether "it is fair to say that a minority was coerced by a voting and ownership structure that was fully disclosed to the minority before they bought into a corporation whose capital structure was so organized."ⁿ⁵³ Ultimately, the Chancellor concluded that the coercion being complained of resulted from the fact that the Cullmans owned a controlling interest, and declined to hold that "being in a voting minority automatically means that the shareholder is coerced."ⁿ⁵⁴

Ch. 2000) (deal protection terms will be considered defensive and reviewed under *Unocal*; however, as long as such provisions are non-preclusive, non-coercive, and otherwise within the boundaries of reason, Delaware law will generally recognize them as valid); *Hills Stores Co. v. Bozic*, 769 A.2d 88, 93 (Del. Ch. 2000) (a termination fee payable in the event of a negative stockholder vote on a merger places an economic toll on the franchise, and therefore, Delaware law has traditionally reviewed the propriety of such fees under the *Unocal* or *Revlon* standards depending on the circumstances, or under a comparable liquidated damages standard); *Ace Ltd. v. Capital Re Corp.*, 747 A.2d 95, 108 & n.42 (Del. Ch. 1999) (when corporate boards assent to no-shop, no-talk or termination fee provisions in merger agreements that have the primary purpose of acting as a defensive barrier to other transactions not sought out by the board, some of the policy concerns that animate the *Unocal* standard of review might be implicated); *Phelps Dodge Corp. v. Cyprus Amax Minerals Co.*, C.A. 17398, 1999 Del. Ch. LEXIS 202, at *4 (Del. Ch. Sept. 27, 1999) ("No-talk provisions ... are troubling precisely because they prevent a board from meeting its duty to make an informed judgment with respect to even considering whether to negotiate with a third party"); *Goodwin v. Live Entertainment, Inc.*, C.A. 15765, 1999 Del. Ch. LEXIS, at *69-70 (Del. Ch. Jan. 22, 1999) (upholding a 3.125 percent termination fee in a merger agreement as not being unreasonable under the *Unocal* standard). See also *Brazen v. Bell Atlantic Corp.*, 695 A.2d 43 (Del. 1997) , where the Delaware Supreme Court held that a termination fee in a merger agreement should be analyzed as a liquidated damages provision if the merger agreement specifically so provides, and therefore, a test that requires determining whether the amount agreed upon is "within a range of reasonableness" should be applied to such provisions, rather than the business judgment rule. In *Hills Stores*, 769 A.2d 88, 104 , Vice Chancellor Strine stated that the liquidated damages standard used in the *Brazen* case is comparable to the *Unocal* standard.

(n31)Footnote 31. *Omnicare, Inc. v. NCS Healthcare, Inc.*, 818 A.2d 914 (Del. 2003) . The *Omnicare* decision discussed in greater detail in 12.05[1] below . See also *Orman v. Cullman*, C.A. 18039, 2004 Del. Ch. LEXIS 150 (Del. Ch. Oct. 20, 2004) (following *Omnicare* in applying a *Unocal* analysis to determine whether a lock-up was a reasonable response to a reasonably perceived threat).

(n33)Footnote 33. *Unitrin*, 651 A.2d at 1388 . See also *Orman v. Cullman*, C.A. No. 18039, 2004 Del. Ch. LEXIS 150 (Del. Ch. Oct. 20, 2004) (holding not coercive a voting agreement locking up a majority of the voting power that would prevent its holder from voting for a competing bid for 18 months after termination of the merger agreement with the first bidder). But cf. *Omnicare*, 818 A.2d 914 (holding preclusive and coercive the combination of a voting agreement locking up a majority of the target's stock and a requirement in the merger agreement that the merger be put to a stockholder vote even if the target board no longer recommended approval of the merger).

(n34)Footnote 34. *Unitrin*, 651 A.2d at 1388 (citing *Paramount Communications, Inc. v. QVC Network, Inc.*, 637 A. 2d 34, 45-46 (Del. 1994)) . It should also be noted that defensive mechanisms must be properly adopted. For example, in *Goldstein v. Lincoln Nat'l Convertible Securities Fund, Inc.*, 140 F. Supp. 2d 424 (E.D. Pa. 2001) , the court held that, under Maryland law, an advance notice provision in a fund's proxy statement, but not in the fund's bylaws or charter, was unenforceable.

§ 12.05 Enhanced Scrutiny in the Case of a Sale of Control**[1] *Revlon***

In 1985, in *Revlon, Inc. v. MacAndrews & Forbes, Inc.*,ⁿ¹ the Delaware Supreme Court articulated a different form of enhanced scrutiny standard for reviewing transactions involving a sale of control or a break-up of the company. Once a target company's board decides to sell the company, the court said the role of directors changes "from defenders of the corporate bastion to auctioneers charged with getting the best price for the stockholders at a sale of the company."ⁿ² The obligation of the directors then becomes to act reasonably to seek the transaction offering the highest value reasonably available to the stockholders.ⁿ³

The *Revlon* case arose out of Pantry Pride's dogged effort to acquire Revlon--an effort that had begun well before Pantry Pride announced, on August 14, 1985, that it would make a hostile tender offer for Revlon at \$45 per share. The Revlon board met five days later and, on the advice of the company's investment bankers, concluded that the Pantry Pride proposal was inadequate. The investment bankers also explained that Pantry Pride intended to finance the tender offer with "junk bonds," followed by a break-up of Revlon and disposition of its assets (a "bust-up" tender offer). At the recommendation of its attorneys, Revlon adopted two defensive measures: a "poison pill" and a stock repurchase plan.

On August 23, Pantry Pride commenced its cash tender offer for any and all shares of Revlon at \$47.50 per common share and \$26.67 per preferred share. Revlon's board advised shareholders to reject the offer and commenced the stock repurchase program, exchanging for each tendered share of common stock one Senior Subordinated Note (the "Notes") and one-tenth of a share of Cumulative Convertible Exchangeable Preferred Stock. In response to these maneuvers, Pantry Pride announced a new tender offer and ultimately raised its bid to \$53 per share.

Meanwhile, Revlon hunted around for an appropriate "white knight" and finally found one: Forstmann Little & Co. On

October 3, the Revlon board agreed to a leveraged buy-out ("LBO") of the company by Forstmann at \$56 per share. The plan also involved selling off various Revlon divisions to facilitate the acquisition. To effectuate this scheme, the Revlon board agreed to waive certain covenants contained in the Notes, which limited Revlon's ability to sell assets. When the company announced the waiver of the covenants, the market value of the Notes fell sharply, and noteholders complained and threatened litigation.

Pantry Pride still had not lost interest in Revlon and raised its \$53 offer to \$56.25. Pantry Pride also announced its intention to engage in fractional bidding and to top any Forstmann offer by a slightly higher one. Forstmann then raised its own offer to \$57.25 per share, conditioned on (a) a lock-up option to purchase two Revlon divisions at \$100-\$175 million below fair value if another acquiror were to purchase 40 percent of Revlon's shares, (b) a no-shop provision, (c) the removal of the poison pill and the Notes covenants, and (d) a \$25 million cancellation fee. In return, Forstmann agreed to support the faltering market value of the Notes by an exchange of new notes. The Revlon board approved the offer (which was contingent on immediate acceptance) because (i) the offer was higher than Pantry Pride's, (ii) it protected the noteholders, and (iii) Forstmann's financing was in place. Pantry Pride challenged the Revlon agreement and defensive measures; it also raised its own bid to \$58 per share. The trial court granted a preliminary injunction, and the Delaware Supreme Court affirmed.

The court held that the Revlon board had acted reasonably, and in accordance with its fiduciary obligations, in adopting the poison pill and the exchange offer. These measures were taken at the beginning of the battle, in the face of an inadequate offer of \$45 or \$47.50 per share. The pill and the exchange offer undoubtedly were major factors in causing Pantry Pride to raise its bid to an eventual high of \$58 per share and, at least initially, in protecting Revlon from a "bust-up," "junk bond" takeover by a small, highly leveraged company.

In time, however, the corporation's situation--and thus the directors' responsibilities--changed. Instead of keeping the company intact and protecting its shareholders from being stampeded into tendering at an inadequate price, the focus shifted to selling and dismantling the company on the most favorable terms. As the court explained:

[W]hen Pantry Pride increased its offer to \$50 per share, and then to \$53, it became apparent to all that the break-up of the company was inevitable. The Revlon board's authorization permitting management to negotiate a merger or buyout with a third party was a recognition that the company was for sale. The duty of the board had thus changed from the preservation of Revlon as a corporate entity to the maximization of the company's value at a sale for the stockholders' benefit. This significantly altered the board's responsibilities under the *Unocal* standards. It no longer faced threats to corporate policy and effectiveness, or to the stockholders' interests, from a grossly inadequate bid. The whole question of defensive measures became moot. The directors' role changed from defenders of the corporate bastion to auctioneers charged with getting the best price for the stockholders at a sale of the company.ⁿ⁴

In light of the directors' new role as "auctioneers," the court found that the board had breached its "primary duty of loyalty" to Revlon's shareholders by acceding to the lock-up option and the other conditions (the no-shop clause and the cancellation fee) that Forstmann had demanded in exchange for its bid of \$57.25 per share. Once they decided to sell the company, the directors had a duty to obtain "the highest price for the benefit of the stockholders."ⁿ⁵ Forstmann's offer of \$57.25 (contingent on the lock-up) admittedly exceeded Pantry Pride's then-current offer of \$56.25 but only marginally, when adjusted for the time value of money. The Forstmann bid, however, did have one unique feature: Forstmann had promised to shore up the sagging value of the Notes, whose holders were threatening litigation.

But it was precisely this advantage that, according to the court, the board had no right to consider. In exchange for an offer of only marginal superiority, Revlon had granted a lock-up option that effectively ended bidding for the company (despite Pantry Pride's stated intention to top any Forstmann offer), that protected the noteholders, and that saved the directors from litigation--all at the expense of the shareholders, who might have received at least \$58 per share had the lock-up (and the poison pill) been rescinded. In preferring the interests of the noteholders (whose rights already were

fixed by contract and who required no further protection) to those of the shareholders, the board breached its duty of loyalty. Moreover, the board had sacrificed the shareholders' interests to protect their own. "In reality," held the court,

the Revlon board ended the auction in return for very little actual improvement in the final bid. The principal benefit went to the directors, who avoided personal liability to a class of creditors to whom the board owed no further duty under the circumstances. Thus, when a board ends an intense bidding contest on an insubstantial basis, and where a significant by-product of that action is to protect the directors against a perceived threat of personal liability for consequences stemming from the adoption of previous defensive measures, the action cannot withstand the enhanced scrutiny which *Unocal* requires of director conduct.ⁿ⁶

The no-shop provision was similarly improper: it ended, rather than enhanced, the bidding contest at a time when the board's primary duty became "that of an auctioneer responsible for selling the company to the highest bidder."ⁿ⁷

The *Revlon* court also observed that "the directors must analyze the nature of the takeover and its effect on the corporation in order to ensure balance--that the responsive action taken is reasonable in relation to the threat posed."ⁿ⁸ The poison pill and the exchange offer met this proportionality test,ⁿ⁹ but the lock-up and the ancillary agreements did not: they obtained for the shareholders an almost insignificant improvement in the final bid and served only to end the auction for the company.ⁿ¹⁰

[2] What Circumstances Trigger the Duty to Seek the Best Value?

Two decisions by the Delaware Supreme Court involving Paramount Communications, Inc. have helped to clarify when *Revlon* duties apply. The first decision, *Paramount Communications Inc. v. Time, Inc.*,ⁿ¹¹ discussed above in connection with the *Unocal* standard, held that *Revlon* duties were not triggered by the decision by the board of directors of Time to enter into a stock merger with Warner Brothers, or its subsequent decision to revise that merger agreement to provide for a first step tender offer by Time for Warner. Even though Time had decided to merge with Warner, the court found there was no substantial evidence that "Time's board, in negotiating with Warner, made the dissolution or breakup of the corporate entity inevitable, as was the case under *Revlon*."ⁿ¹²

The court identified two circumstances that would implicate *Revlon* duties and so require the board to maximize immediate shareholder value in a sale: "when a corporation initiates an active bidding process seeking to sell itself or to effect a business reorganization involving a clear break-up of the company" and "where, in response to a bidder's offer, a target abandons its long-term strategy and seeks an alternative transaction also involving the breakup of the company."ⁿ¹³ In those circumstances, there is a duty on the board "to maximize immediate shareholder value."ⁿ¹⁴ In the *Paramount-Time* case, however, the court found that a sale of Time was never inevitable and that Time never abandoned its corporate strategic plan. As a result, neither of the *Revlon*-triggering circumstances existed.ⁿ¹⁵

The second decision that helped clarify when *Revlon* duties apply was *Paramount Communications, Inc. v. QVC Network Inc.*ⁿ¹⁶ In 1993, the directors of Paramount Communications, Inc. approved a merger agreement with Viacom, Inc., under which Paramount shareholders would receive a package consisting mostly of non-voting Viacom stock, some voting Viacom stock and some cash. If the merger went through, the combined company would have been controlled by Sumner Redstone, Viacom's Chairman and CEO, who would have ended up with approximately 70 percent of the voting stock of the combined company.

The merger agreement contained three obstacles to a competing bid:

... A no-shop provision, under which Paramount would not solicit, encourage, discuss, negotiate or endorse a competing bid unless (i) the competing bidder made an "unsolicited written ... proposal, which is not subject to any material contingencies related to financing" and (ii) the Paramount board determined

that discussions were necessary to comply with its fiduciary duties.

... A termination fee of \$100 million, payable if, among other things, Paramount's directors recommended a competing transaction or Paramount's stockholders did not approve the merger.

... A stock option, allowing Viacom to buy 19.9 percent of Paramount's stock for \$69.14 per share (the value of the Viacom merger consideration) under the same conditions as would trigger payment of the termination fee. In addition to the usual terms of a stock lock-up, this option permitted Viacom to pay all but \$1.00 per share of the exercise price with a note "of questionable marketability." Viacom could also require Paramount to pay Viacom in cash the excess--no matter how great that excess might become--of the then market price of Paramount stock over the option exercise price.

QVC Network Inc. told Paramount it was prepared to buy the whole company on a part-cash, part-stock basis, and brought suit in Delaware seeking to invalidate, among other things, the stock option in favor of Viacom.¹⁷

The Delaware Supreme Court affirmed the Chancery Court decision enjoining exercise of the stock option and also enjoining Paramount from redeeming its poison pill shareholder rights to permit Viacom to close its tender offer without doing the same thing to permit consummation of the QVC offer. According to the Delaware Supreme Court, the directors of a target company are obliged to seek the best price reasonably available to stockholders whenever a corporation undertakes a transaction that will result in either a "change in corporate control" or a "break-up of the corporate entity."¹⁸

[3] How Does the Board Seek the Best Value?

Despite the suggestion in *Revlon* that directors who decide to sell a company become "auctioneers," in *Paramount-QVC* the Delaware Supreme Court noted that there is "no single blueprint" that directors must follow in seeking best value in a sale of control. An auction is one way; signing up with one bidder but with a post-signing canvassing of the market is another. Whatever method is used, however, it must be "designed to determine the existence and viability of possible alternatives."¹⁹

In *Paramount*, the Delaware Supreme Court recognized "the complexity of the directors' task" and the "many business and financial considerations implicated in investigating and selecting the best value reasonably available."²⁰ While emphasizing that the court's role is only to determine "whether the directors made a *reasonable* decision, not a *perfect* decision,"²¹ the court gave some guidance as to how directors should proceed in determining which alternative provides the best value for stockholders.

The board "is not limited to considering only the amount of cash involved" and need not "ignore totally" the future value of a strategic alliance.²² However, if stock or other non-cash consideration is involved, "the board should try to quantify its value, if feasible, to achieve an objective comparison of the alternatives." The board should "focus on [the] value as of the date it will be received by the stockholders," presumably because future actions by the new majority shareholder could deprive minority shareholders of anticipated future growth in value. Also, the court noted that such value will "normally" be determined "with the assistance of experts using generally accepted methods of valuation."²³ Other considerations relating to alternative offers may also be assessed, including each offer's feasibility, financing, legality and risk of non-consummation, and the bidder's identity and business plans.²⁴

While an auction is not necessary, *Paramount-QVC* makes clear that deal protection measures adopted without a market test must not unduly inhibit the ability of the board of a target to negotiate with other potential bidders to obtain the highest possible value for the target's stock.²⁵ Directors also should not favor a bidder in which they have an interest. In *Mills Acquisition Co. v. MacMillan, Inc.*,²⁶ target directors who were members of management helped a favored bidder, Kohlberg Kravis Roberts & Co. (KKR), to obtain a favorable bidding position by means of a lock-up option. In

enjoining the option, the court emphasized that the inside directors (who would end up with 20 percent of the company if KKR succeeded in its bid), and not the independent directors, controlled the bidding process. According to the court, when the "intended effect" [of a lock-up provision] is to end an active auction, at the very least the independent members of the board must attempt to negotiate alternative bids before granting such a significant concession."ⁿ²⁷

The Delaware Supreme Court discussed the extent and the limitations of the use of a market test by a company in Revlon mode in its decision in *Barkan v. Amsted Industries Inc.*ⁿ²⁸ In *Barkan*, a special committee had failed to conduct a market test, although it had been fully advised by investment bankers, and had negotiated and consummated a management LBO. Noting that Amsted's directors "had acted in good faith to arrange the best possible transaction for shareholders," the *Barkan* court put an interesting and important gloss on *Revlon*:

Revlon does not demand that every change in the control of a Delaware corporation be preceded by a heated bidding contest. *Revlon* is merely one of an unbroken line of cases that seek to prevent the conflicts of interest that arise in the field of mergers and acquisitions by demanding that directors act with scrupulous concern for fairness to shareholders. When multiple bidders are competing for control, this concern for fairness forbids directors from using defensive mechanisms to thwart an auction or to favor one bidder over another.ⁿ²⁹ When the board is considering a single offer and has no reliable grounds upon which to judge its adequacy, this concern for fairness demands a canvas of the market to determine if higher bids may be elicited.ⁿ³⁰ When, however, the directors possess a body of reliable evidence with which to evaluate the fairness of a transaction, they may approve that transaction without conducting an active survey of the market [T]he circumstances in which this passive approach is acceptable are limited The need for adequate information is central to the enlightened evaluation of a transaction that a board must make. Nevertheless, there is no single method that a board must employ to acquire such information.ⁿ³¹

Because Amsted had been known to be "in play" for ten months, even though no alternative to the LBO emerged, because the board had reason to understand that the tax advantages of including an employee stock option plan ("ESOP") in the LBO transaction allowed the management group to receive significant tax advantages over other bidders that could be reflected in the price offered to shareholders, and because of a cyclical downturn in Amsted's business that might have discouraged other bidders, the court believed that "the directors could conclude in good faith that they had approved the best possible deal for the shareholders," even though the LBO was the only option.ⁿ³²

Nevertheless, the *Barkan* court appears to have dispensed with the need for a market test in the case before it with reluctance, and it sounded a warning for single bidders who seek to use "no-shop" clauses:

We certainly do not condone in all instances the imposition of the sort of "no-shop" restriction that bound Amsted's Special Committee. Where a board has no reasonable basis upon which to judge the adequacy of a contemplated transaction, a no-shop restriction gives rise to the inference that the board seeks to forestall competing bids. Even here, a judicious market survey might have been desirable, since it would have made it clear beyond question that the board was acting to protect the shareholder's interests.ⁿ³³

That there is still uncertainty in this area is underscored by the *Barkan* court's refusal to announce "an iron-clad rule for determining when a market test is not required." Rather, said the court, "[t]he evidence that will support a finding of good faith in the absence of some sort of market test is by nature circumstantial; therefore, its evaluation by a court must be open-textured." Nevertheless, "the crucial element supporting a finding of good faith is knowledge," and "[i]t must be clear that the board had sufficient knowledge of relevant markets to form the basis for its belief that it acted in the best interests of the shareholders."ⁿ³⁴

The Delaware Court of Chancery followed this approach in *In re Pennaco Energy, Inc. S'holders Litig.*,ⁿ³⁵ which

involved a tender offer by an acquisition subsidiary of Marathon Oil for the shares of Pennaco Energy, Inc., at \$19 per share, to be followed by a back-end merger at the same price. In a shareholder action for a preliminary injunction against the closing of the tender offer, Vice Chancellor Strine held that, even though the Pennaco board did not actively shop the company and relied solely on a post-merger agreement market check, its actions were not so deficient under *Revlon* as to justify the entry of an injunction.ⁿ³⁶

The vice chancellor pointed out that the board's actions should be evaluated in the context of the company's market posture. Pennaco was a source of industry interest. It was followed by reputable analysts, communicated with the market in a bullish manner, and freely communicated with interested parties. Previously, the company had done an extensive search for a joint venture partner, which brought it to the attention of a number of industry players, including Marathon, a major energy company with great financial clout. Moreover, the company had reincorporated in Delaware to facilitate its participation in the M&A market.ⁿ³⁷

As important, the court emphasized that the Pennaco board's knowledge of the company had not been seriously challenged. The board was composed of directors with relevant expertise and substantial experience in the energy business. This gave them a sound basis to evaluate the price at which a sale of the company would be advantageous to the Pennaco shareholders. In these circumstances, it was not unreasonable for the Pennaco board to deal with Marathon on an exclusive basis.ⁿ³⁸ The court pointed out that there is no risk-free approach to selling a company, and dealing with one bidder at a time has its own advantages. Accordingly, the mere fact that the board decided to focus on negotiating a favorable price with one bidder and not to seek out other bidders was insufficient to support a breach of fiduciary duty claim.ⁿ³⁹

The *Pennaco* court noted, however, that it "would not commend the Pennaco board's actions as a business school model of value maximization."ⁿ⁴⁰ Moreover, the vice chancellor warned that "there [was] little doubt that the validity of the Pennaco board's decision to proceed in the manner it did would [have been] subject to great skepticism had the board acceded to demand to lock up the transaction from later market competition."ⁿ⁴¹ The opinion went on to say that "if the merger agreement with Marathon contained onerous deal protection measures that presented a formidable barrier to the emergence of a superior offer, the Pennaco board's failure to canvass the market earlier might [have] tilt[ed] its actions toward the unreasonable."ⁿ⁴²

Chancery Court followed *Barkan* in its 2004 decision in *In re MONY Group Inc. S'holder Litig.*ⁿ⁴³ There, the court declined to issue a preliminary injunction against a vote by MONY stockholders on a cash merger with AXA Financial. The plaintiffs' argument for an injunction had been based on claims that MONY's directors breached their fiduciary duties by agreeing to the merger without a pre-signing auction.ⁿ⁴⁴

MONY had been losing money. Its board rejected the idea of a public auction, fearing that a failed auction would expose its weaknesses and furnish competitors with information that could be used to steal its career agents. The board authorized discussions with AXA, a large company with a similar business model. MONY's CEO also spoke to the CEO of New York Life, but those discussions did not lead to an offer.

AXA offered \$26.50 per share in cash, after taking into account the roughly \$163 million payable to MONY management under change in control agreements. In May 2003, MONY's board rejected an AXA proposal for a stock merger. Thereafter the board, after getting advice from a compensation consultant, negotiated with MONY management a reduction (to \$79 million) in the amounts payable in their change in control payments. In September 2003, AXA and MONY agreed to a cash merger at \$31 per MONY share. The merger agreement included a broad "window-shop" provisionⁿ⁴⁵ and a "fiduciary out" termination clause. In the five months following announcement of the merger, no one made a competing proposal.

The plaintiffs alleged that the director defendants breached their duties under *Revlon* to get the best possible price for MONY. The court found that the *Revlon* claim lacked merit, noting that the Delaware Supreme Court in *Barkan* had

held that a target's board could satisfy its duty to obtain the best price reasonably available by entering into a merger agreement with a single bidder to establish a floor and then doing a post-signing market check.

The court found it was reasonable for MONY's board to rely on MONY's CEO to negotiate with AXA. The board had decided to explore a sale and had actively supervised the CEO. Given the nature of MONY's business and the risk of losing career agents in a failed auction, the court also found reasonable the board's judgment that the risks of a pre-signing auction, as opposed to a post-signing market check, outweighed the benefits.ⁿ⁴⁶

Vice Chancellor Lamb also found reasonable the board's decision to accept a low-premium transaction. He noted that CSFB--financially incentivized to find the best available price due to a fee of one percent of transaction value--rendered a fairness opinion and was not aware of any entity with an interest in buying MONY at a higher price. Moreover, because AXA and MONY shared the same business model, the career agency system, AXA was a perfect fit, qualified to offer the best price for MONY.

The court found there had been ample time for a competing bidder to emerge and complete its due diligence. To the court, the \$50 million termination fee was "well within the range of reasonableness," representing only 3.3 percent of MONY's equity value and only 2.4 percent of the total transaction value. The court quoted with approval from the 1996 *Kysor* decision, to the effect that commentators "have expressed the view that liquidated damage provisions in the one-to-five percent range of the proposed acquisition price are within a reasonable range."ⁿ⁴⁷

The Delaware Chancery Court's 2005 decision in *In re Toys "R" Us, Inc. Shareholder Litig.* ⁿ⁴⁸ also supports the notion that boards have broad latitude in designing and executing a sale process. After publicly announcing it would explore strategic alternatives for the company, the Toys "R" Us board decided to pursue the sale of the company's most valuable asset, its toy retailing business. During the ensuing auction process, when one of the four competing bidders made an attractive offer for the entire company, the board switched course and solicited entire-company bids from all four bidders. Eventually the board reached an agreement to sell the company to a group led by Kohlberg Kravis Roberts & Co. ("KKR").

Noting that *Revlon* "is not a license for law-trained courts to second-guess reasonable, but debatable, tactical choices that directors have made in good faith," Vice Chancellor Strine rejected the argument that the Toys "R" Us board breached its fiduciary duties by declining to solicit entire-company bids from parties other than the four bidders for the toy business. ⁿ⁴⁹ The Vice Chancellor found that the board's publicly announced search for alternatives gave potential buyers ample notice that the board would entertain offers for the company. The Vice Chancellor also held that the board had not breached its duties by allowing KKR and another of the four bidders to join together to make a "club" bid for the entire company, finding that the board otherwise risked losing a "powerful bidding competitor" to the group that had first proposed an entire-company transaction.ⁿ⁵⁰

The Vice Chancellor found that the deal-protection provisions granted to KKR--which included a 3.75 percent break-up fee and a right to match any competing bid--were reasonable in light of the company's "lengthy search for alternatives, the obvious opportunity that unsolicited bidders had to come forward over the last year, and the large gap" between KKR's bid and that of its nearest competitor.ⁿ⁵¹ The Vice Chancellor was skeptical that the size of the break-up fee or the existence of the matching rights would deter a bidder willing to pay a substantially higher price, noting that topping bids in the face of such provisions "are simply not that unusual."ⁿ⁵²

In three 2007 decisions applying *Revlon* in the context of a sale of a company to a private equity buyer, Vice Chancellor Strine provided further guidance regarding the relationship between the sales process and the package of deal protections built into acquisition agreements. These cases, *In re Netsmart Technologies, Inc. S'holders Litig.*,ⁿ⁵³ *In re Topps Co. S'holders Litig.*ⁿ⁵⁴ and *In re Lear Corp. S'holder Litig.*,ⁿ⁵⁵ reveal an apparent skepticism on the part of Vice Chancellor Strine that management always acts in the best interests of stockholders when private equity comes knocking, given that executives inevitably think about their roles--and compensation--after a deal is done. However,

these cases also demonstrate the continued reluctance of the Delaware Chancery Court to enjoin transactions on the basis of breach of fiduciary duty claims when doing so could deny stockholders the opportunity to consider a proposed transaction, particularly in the absence of a competing bid.

Netsmart Technologies Inc. was a "micro-cap" company, with a market capitalization of around \$100 million and a thinly traded public float. It was not generally known in the market that Netsmart was for sale. After deciding to seek interest from potential buyers, Netsmart's board determined to limit its search to private equity buyers and only then formed a special committee of non-management members of the board. After a limited auction process with several potential private equity buyers, Netsmart entered into a merger agreement with Insight Venture Partners and Bessemer Venture Partners in November 2006. Netsmart's CEO was involved significantly in the negotiation of the merger agreement. Netsmart's board relied on a standard "fiduciary out" clause and a 3% termination fee to allow for a post-signing market check. The buyers rejected a "go-shop" provision proposed by Netsmart.

In contrast, Lear Corporation was a Fortune 200 company with a market capitalization in excess of \$2.5 billion and deep analyst coverage. In 2006, Carl Icahn made a large investment in Lear, and, in part because of Icahn's reputation for takeovers, the market knew that Lear was "in play." Icahn approached Lear's CEO in January 2007 about a going private transaction; a week later, Lear's CEO reported Icahn's overture to the board. A special committee of non-management directors was formed, but Lear's CEO led most of the merger agreement negotiations. Icahn threatened to withdraw his bid if Lear conducted a pre-signing sale process. Lear and Icahn came to terms on a transaction in February 2007, which included a 45-day go-shop period and a two-tier termination fee (2.8% during the go-shop period and 3.5% thereafter). Lear's stockholders ultimately rejected a sweetened version of the proposed deal in July 2007.

Topps also involved a high-profile suitor--Michael Eisner. *Topps*, a company struggling financially and run by the son of one of its founders, had a market cap of less than \$500 million. It was the subject of a proxy fight in 2005, which resulted in the compromise election of three insurgent directors to its board. Eisner approached the *Topps*' CEO to express an interest in being helpful and ultimately in acquiring the company and keeping management in place. The parties negotiated a merger agreement with a 40-day go-shop period, a 3% go-shop termination fee and a 4.6% post-go-shop termination fee. At the last minute, *Topps* was approached by its rival (and frequent suitor) The Upper Deck Company, which expressed interest in making a bid but did not receive any serious response from *Topps*. The *Topps* board eventually held discussions with Upper Deck during the go-shop period, and Upper Deck bid \$1.00 per share more than Eisner. However, the *Topps* board did not treat Upper Deck as a party eligible for the lower break-up fee under the merger agreement, nor would it waive a standstill to allow Upper Deck to make a public competing bid. Both Upper Deck and stockholders of *Topps* brought claims in connection with the proposed Eisner transaction.

It is not uncommon for an interested buyer to contact a potential target's CEO to float the possibility of an acquisition. The Chancery Court was not perturbed that the CEOs received the initial overtures in *Lear* and *Topps*, although Vice Chancellor Strine was critical of Lear's CEO for waiting a full week after Icahn's initial contact before notifying the Lear board. Of greater concern to the court was the fact that, in both cases, the CEO was approached by a buyer who expressed interest in retaining the CEO after closing. Likewise, in *Netsmart*, management was interested in continuing in its current role and having a "second bite at the apple."⁵⁶ Could management, conflicted in this way, be trusted to negotiate on behalf of the company for the highest price reasonably available? And, more generally, would management steer the company towards private equity buyers rather than strategic buyers who were less likely to keep management in place?

In *Lear*, Vice Chancellor Strine found that the CEO-led negotiation process was "far from ideal" and "unnecessarily raises concerns about the integrity and skill of those trying to represent Lear's public investors."⁵⁷ Moreover, Lear's CEO had previously expressed concern to the board about the majority of his wealth's being tied up in Lear stock and retirement benefits; a transaction such as the one Icahn proposed would allow him to cash out his stock and safeguard his retirement benefits. As the court put it, the CEO was in a "fiduciary quandary."⁵⁸ In *Topps*, the court was similarly

concerned about the long-time CEO of Topps favoring a private equity buyer over Topps' main competitor, a strategic player with its own management team, because of his desire to keep his family in charge of Topps.ⁿ⁵⁹

Finally, in *Netsmart*, the court was highly critical of the board's failure to seek out strategic buyers in any meaningful manner and its decision to ride "the private equity wave"ⁿ⁶⁰ because they "desired to continue as executives and they desired more equity."ⁿ⁶¹ The Vice Chancellor was also bothered by the failure of the Netsmart board to form a special committee until after the board decided to focus only on private equity buyers, suggesting that a potentially conflicted management could have influenced that decision. The Vice Chancellor also criticized the "virtually unlimited access" to special committee deliberations given to Netsmart's CEO and chided the special committee for permitting management to drive the due diligence process, which could allow management to give different "body language" to preferred buyers.ⁿ⁶² Ultimately, however, Vice Chancellor Strine did not find that management's role in negotiating the transactions on behalf of the company fatally tainted the process in any of the cases.

In *Netsmart*, *Lear* and *Topps*, the Delaware Chancery Court reiterated the established principle that no single blueprint exists for boards to fulfill their *Revlon* duties. The right sale process depends on the particular facts and circumstances applicable to the target, including the strategic landscape of its industry; its market capitalization, trading volume and volatility; the extent to which the market is aware it is on the block; the results of any recent discussions with potential suitors; the extent to which deal protection provisions are viewed as reasonable; and possible risks of undertaking a process that involves public disclosure or exposure of sensitive information to competitors.ⁿ⁶³ Much also depends on the court's perception of the extent to which deal protection devices will chill competing bids.

For example, Vice Chancellor Strine found the deal protection terms and the contemplated post-signing market check in the Topps transaction to be reasonable. Although the Vice Chancellor said that the 4.3% termination fee was "a bit high in percentage terms," it was explainable because it included Eisner's expenses and because of the relatively small size of the deal.ⁿ⁶⁴ Topps' decision to enter into the merger agreement with Eisner in the face of a rival bid from Upper Deck was a closer call for the court, but the court found that Topps rightfully was suspicious of Upper Deck's sincerity and noted that Upper Deck's bid excluded a "floundering" business line of Topps.ⁿ⁶⁵ In addition, the merger agreement with Eisner provided for a 40-day go-shop period.ⁿ⁶⁶

In *Lear*, the Chancery Court also found that the deal protection terms were reasonable. Vice Chancellor Strine once again placed great weight on the particular facts and circumstances of the company and the transaction: *Lear* was a large company with substantial analyst coverage, the public knew *Lear* was in play, and Icahn made a credible threat that he would withdraw his bid if any pre-signing market check were performed. Notably, the Vice Chancellor gave little weight to the lower termination fee during the go-shop period. The go-shop provision in *Lear* required a competing bidder to reach a definitive agreement during the 45-day period in order to have the lower termination fee apply--which Vice Chancellor Strine considered unlikely.ⁿ⁶⁷

Although in both *Topps* and *Lear* the court found the use of a go-shop to be reasonable, Vice Chancellor Strine made clear that go-shops are not a panacea that can be used in every context in lieu of a pre-signing market check, and that the specific terms of any go-shop provision can make a difference.

In *Netsmart*, the court found a reasonable probability of success for the plaintiff's claims that the board members' failure to seek out strategic buyers was unreasonable and breached their *Revlon* duties. Vice Chancellor Strine criticized the board for relying on only limited contacts with potential strategic buyers over a long period of time.ⁿ⁶⁸ Vice Chancellor Strine also questioned the Netsmart board's "rote assumption" that the terms of the merger agreement would allow for an adequate, post-signing market check.ⁿ⁶⁹ The Netsmart merger agreement included a "fiduciary out" provision allowing the board to consider unsolicited superior proposals, and the Netsmart board had determined that this provision, in light of a termination fee of approximately 3 percent, would allow a sufficient post-signing market check. The court disagreed, largely because Netsmart was a "micro-cap" company, thinly traded and with limited analyst coverage.

Despite Vice Chancellor Strine's criticisms of the processes followed by these target boards, the only *Revlon* claim that resulted in a preliminary injunction related to Topps' failure to release Upper Deck from its standstill agreement. The court believed the Topps board was using the standstill improperly as a way of fending off an undesired acquirer. In *Netsmart*, even though the court determined that the plaintiffs had a reasonable probability of success on the merits, the court declined to issue an injunction. The Vice Chancellor was concerned that the buyer would walk, depriving the stockholders of the ability to decide for themselves once armed with more complete and accurate information. Instead, in each of *Netsmart*, *Lear* and *Topps*, the court ordered supplemental disclosure regarding the defects in the sale process or management's conflicting interests, and allowed the stockholders to decide for themselves.

[4] When Does the Duty to Seek Best Value Not Apply?

In the *Paramount- QVC* case, Paramount and its directors argued that *Revlon* should not apply, since Paramount had not put itself on the block, but was simply seeking to effect a strategic alliance with Viacom that did not involve the break-up of Paramount and that would give the Paramount shareholders a substantial, although mostly non-voting, stake in the equity of the combined business.

The Delaware Supreme Court rejected this argument, noting that one person, the controlling shareholder of Viacom, was to become the controlling shareholder of the combined enterprise. The court distinguished that situation from a stock merger in which control of the combined company would continue to be vested in a "fluid aggregation of unaffiliated stockholders"ⁿ⁷⁰

The Delaware Supreme Court reasoned that the duty to seek the best value should apply whenever "a majority of a corporation's voting shares are acquired by a single person or entity, or by a cohesive group acting together."ⁿ⁷¹ In those circumstances, "there is a significant diminution in the voting power" of the former public shareholders. The new controlling shareholder can deprive the former public shareholders of their continuing interest in the corporation through a cash-out merger or can otherwise alter the long-term strategic vision of the prior board of directors. As a result, the public shareholders "are entitled to receive, and should receive, a control premium and/or protective devices of significant value."ⁿ⁷²

In contrast, no duty to seek best value should arise in a stock-for-stock merger between two companies, if no individual or "cohesive group" will end up with a controlling block of stock after the merger. This rule, which the Delaware Chancery Court first formulated in the *Time-Warner* case, was reinforced by the Delaware Chancery Court in *Paramount*. Three decisions since *Paramount* bear this out.

In *Arnold v. Society for Savings Bancorp, Inc.*,ⁿ⁷³ the Delaware Supreme Court held that there was no need to apply "enhanced scrutiny" in reviewing the action of the directors of an acquired company with respect to a transaction in which the shareholders of a company ("Bancorp") received stock of Bank of Boston ("BOB") in exchange for each Bancorp share. The court noted that there was no sale or change of control when control of the constituent companies remained in a large, fluid, changeable and changing market. Although the plaintiff argued that there had been a change of control in Bancorp because its former stockholders ended up as minority shareholders in the surviving company, thereby losing their opportunity to enjoy a control premium, the court noted that "plaintiff's opportunity to receive a control premium is not foreclosed"ⁿ⁷⁴ in view of the fact that the plaintiff would continue as a stockholder in BOB. The court also found that Bancorp had not initiated an active bidding process.

In a case involving the competing efforts of Burlington Northern, Inc. and Union Pacific Corporation to acquire Santa Fe Pacific Corporation, the Delaware Supreme Court held that Santa Fe's board did not become subject to a duty to obtain the best immediate value reasonably available for shareholders, after Union Pacific had proposed to acquire Santa Fe, by supporting a merger agreement in which Santa Fe stockholders would receive shares of Burlington (following a joint tender offer in which Santa Fe and Burlington would buy up to 33 percent of Santa Fe's stock for

cash, conditioned on the approval of the back-end merger).ⁿ⁷⁵ The court noted that there was no allegation that the Santa Fe board had decided to pursue a transaction that would result in the sale of control of Santa Fe to Burlington. Instead, the board appeared to have been committed to a stock-for-stock merger with Burlington, and there was no allegation that control of the post-merger company would not remain in a "large, fluid, changeable and changing market."ⁿ⁷⁶

However, the Delaware Supreme Court concluded that Union Pacific had stated a triable issue concerning whether certain actions taken by the Santa Fe board--for example, implementing the joint Santa Fe-Burlington tender offer which resulted in Burlington's owning 16 percent of Santa Fe; adopting a poison pill; and applying the poison pill to exempt the Burlington offer but not the Union Pacific offer--were reasonable in relation to the threat posed, under the Delaware Supreme Court's decision in *Unocal*.ⁿ⁷⁷ The court stated: "As the terminology of enhanced judicial scrutiny implies, boards can expect to be required to justify their decision-making, within a range of reasonableness, when they adopt defensive measures with implications for corporate control."ⁿ⁷⁸

A similar decision arose out of the bidding by Wells Fargo & Co. and First Bank System, Inc. for First Interstate Bancorp.ⁿ⁷⁹ After receiving a merger proposal from Wells Fargo, First Interstate entered into a stock-for-stock merger agreement with First Bank, involving shares having a somewhat lower market value than the Wells Fargo proposal. First Interstate also amended its rights plan to make it inapplicable to the First Bank merger. The merger agreement provided for a break-up fee of up to \$100 million if certain triggering events occurred, and for reciprocal options, exercisable if someone else bought 20 percent or more of the optionor. The options were capped so that the total profit to the holder could not exceed \$100 million.

The First Bank merger had a total value of about \$10 billion, so that the cost to First Interstate of backing out of a merger with First Bank would have been about two percent of the transaction value. In litigation brought by Wells Fargo, which had announced its intention to proceed with a hostile exchange offer for First Interstate shares, Delaware's Chancellor Allen concluded that the directors of First Interstate were not under a *Revlon* duty to seek the highest present value reasonably available.

Chancellor Allen said, however, that the fact that *Revlon* did not apply did not mean that the First Interstate directors had no duty, when they rejected the Wells Fargo proposal and entered into the First Bank merger, to proceed advisedly in a good faith attempt to advance the interests of First Interstate. The court accepted the argument that the First Interstate board's actions in entering into the merger agreement with First Bank and refusing to redeem the First Interstate rights with respect to the Wells Fargo offer could be characterized as defensive actions under *Unocal*. First Interstate had argued that, even if so, the directors' acts were reasonable. In passing, the court stated that "[o]ne might well be tempted to agree with the defendants in respect to the break-up fees and stock-options provisions of the merger agreement; the effect of the rights plan, however, is plainly of a different order of magnitude."ⁿ⁸⁰

[5] The Duty to Be Informed About Alternatives in a Negotiated Stock Merger

Even in the context of a stock-for-stock merger not involving a change of control, Delaware law requires directors to act on an informed basis consistent with their ongoing duty of care. Accordingly, Delaware decisions in such cases have questioned the validity of flat "no-talk" covenants prohibiting the target from providing information to or entering into merger discussions with alternative suitors--in part because these no-talk provisions meant the directors were not fully informed.ⁿ⁸¹

In *Ace Ltd. v. Capital Re Corp.*,ⁿ⁸² Ace, which owned 12.3 percent of Capital Re's shares, agreed to acquire the remainder of Capital Re in a stock merger. Ace obtained agreements to vote in favor of the merger from holders of 33.5 percent of Capital Re's shares. The voting agreements terminated only if the merger agreement itself terminated. The merger agreement contained a no-talk clause with a narrow "fiduciary out"--Capital Re could respond to an unsolicited superior proposal by providing information or entering into discussions, but only if its board decided, on the basis of

written advice of counsel, that this were required to prevent the board from breaching its fiduciary duties. If Capital Re complied with these restrictions and was not otherwise in breach of the agreement, gave advance notice to Ace, and paid a \$25 million termination fee, it could terminate the agreement to accept the superior deal.

Ace sought an order restraining Capital Re from terminating the agreement to accept a competing higher bid from XL Capital Ltd. Ace claimed that Capital Re had failed to comply with the no-talk covenant. The Capital Re board had received written advice of counsel that entering into discussions with XL was "consistent with"--rather than required by--the board's fiduciary duties. The lawyer orally advised the directors that if they considered the XL offer to be reasonably likely to result in a superior proposal, it would be appropriate for them to conclude that their fiduciary duties required them to consider XL's offer. The Chancery Court declined to enjoin Capital Re from terminating the agreement.ⁿ⁸³

Vice Chancellor Strine found that the better reading of the no-talk clause was that the board retained the ultimate judgment about whether its fiduciary duties required it to enter into discussions with XL, even if that judgment must be "based" on written advice of counsel. According to the Vice Chancellor, if the no-talk provision in fact prevented Capital Re's board from discussing another offer unless it received an opinion that discussions were required, the provision "comes close to self-disablement by the board" and was likely to be found invalid.ⁿ⁸⁴

Ace argued that, in the case of a stock merger not involving a change of control, the *Revlon* and *QVC* cases would not require a board to talk to other suitors because, in such a case, it would not have a *Revlon* duty to obtain the highest value reasonably available. The court stated that, even if the board has no *Revlon* duties, this "does not mean that it can contractually bind itself to sit idly by and allow an unfavorable and preclusive transaction to occur that its own actions have brought about."ⁿ⁸⁵

The court considered whether the no-talk covenant, as construed by Ace, constituted an unreasonably preclusive and coercive defensive obstacle under the *Unocal* case, as well as whether the Capital Re board might have violated its duty of care if it agreed to the covenant under the mistaken belief that it retained the ability to consider a superior offer. The court found that, "under either doctrinal rubric, [the no-talk covenant] as construed by Ace is of quite dubious validity."ⁿ⁸⁶

The Vice Chancellor did not question the provisions of the no-talk covenant that prohibited Capital Re from soliciting alternative transactions: "It is one thing for a board of directors to agree not to play footsie with other potential bidders or to stir up an auction. That type of restriction is perfectly understandable, if not necessary, if good faith business transactions are to be encouraged."ⁿ⁸⁷ Further, the court suggested that there may be limited circumstances where a board could prudently place itself in the position of not being able to entertain and consider a superior proposal in these circumstances. The court noted that one such legitimate circumstance may be where a board "has actively canvassed the market, negotiated with various bidders in a competitive environment, and believes that the necessity to close a transaction requires that the sales contest end."ⁿ⁸⁸ However, where a board has not explored the market thoroughly and is negotiating a transaction that requires stockholder approval and would result in a change in stockholder ownership interests, "a board's decision to preclude itself--and therefore the stockholders--from entertaining other offers is less justifiable."ⁿ⁸⁹

Moreover, the court put substantial weight on its belief that, if Capital Re were unable to terminate the merger agreement, Capital Re's shareholders would be forced to accept a financially inferior proposal because of Ace's 12.3 percent ownership position and voting agreements with holders of 33.5 percent of Capital Re's shares. The vice chancellor stated that it might be a different matter for the board to agree to put the merger agreement to a vote "if there are no other provisions tied to the agreement that operate to preclude the stockholders from freely voting down the merger and accepting another deal or opting for no deal at all."ⁿ⁹⁰ The court found this was not such a case: "In this context where the board is making a critical decision affecting stockholder ownership and voting rights, it is especially important that the board negotiate with care and retain sufficient flexibility to ensure that the stockholders are not

unfairly coerced into accepting a less than optimal exchange for their shares."⁹¹

In *Phelps Dodge Corp. v. Cyprus Amax Minerals Co.*,⁹² when Asarco and Cyprus Amax agreed to a stock merger, their agreement contained a flat no-talk covenant, with no fiduciary-duty exception. Phelps Dodge subsequently proposed stock-for-stock mergers with both companies. Asarco and Cyprus Amax declined to talk to Phelps Dodge, citing the no-talk provisions. Phelps Dodge commenced exchange offers for both companies and brought suit challenging the no-talk clause. Phelps Dodge also challenged as excessive the merger agreement's termination fee provisions.

Delaware Chancellor Chandler denied Phelps Dodge's request for a preliminary injunction striking down the provisions, on the ground that there was no showing that irreparable injury would result from not issuing the injunction: if the shareholders of Asarco and Cyprus Amax wanted their companies to consider the Phelps Dodge proposal, they could vote at the shareholder meetings to reject the Asarco-Cyprus Amax merger agreement.⁹³

The Chancellor held, however, that Phelps Dodge had shown a reasonable probability of success on the merits. Although, under Delaware case law, directors in a transaction not involving a change of control are not required to negotiate with a competing bidder, the decision not to negotiate "must be an informed one."⁹⁴ The *Phelps Dodge* court found no-talk provisions to be "troubling precisely because they prevent a board from meeting its duty to make an informed judgment with respect to even considering whether to negotiate with a third party."⁹⁵ The directors should not have completely foreclosed the opportunity to negotiate with a third party, "as this is the legal equivalent of willful blindness, a blindness that may constitute a breach of a board's duty of care; that is, the duty to take care to be informed of all material information reasonably available."⁹⁶

In light of its decision concerning the duty of care, the *Phelps Dodge* court did not reach the question whether the merging companies' deterrents against competing bids were, under the *Unocal* case, unreasonable responses to a threat to corporate policy. The court did say, however, that the termination fee, which amounted to 6.3 percent of the equity value of the transaction for Asarco, certainly seemed to "stretch the definition of range of reasonableness and probably stretches the definition beyond its breaking point."⁹⁷

These cases show that the validity of no-talk covenants will very much depend on the facts and circumstances surrounding their negotiation. These two decisions do not suggest that no-talk provisions are necessarily invalid--a view that was reinforced in a Chancery Court decision handed down shortly after *Ace*, in which Vice Chancellor Steele noted that no-talk provisions "are common in merger agreements and do not imply some automatic breach of fiduciary duty."⁹⁸ However, the *Ace* and *Phelps Dodge* decisions make clear that in a stock merger not involving a sale of control:

... while companies may flatly agree not to solicit competing bids, limitations on a board's ability to enter into discussions or provide information may not be so strict as to prevent the board from exercising its fiduciary duties; and

... while directors may decide not to negotiate with another company, that decision should be an informed one.

[6] Transactions Involving Controlling Shareholders

In *McMullin v. Beran*,⁹⁹ the Delaware Supreme Court addressed the issue of whether the *Revlon* duty to maximize shareholder value in change of control transactions applies to situations where control of the company rests with a single shareholder, rather than with the public. *McMullin* arose out of a 1998 proposal by Lyondell Petrochemical Company to buy ARCO Chemical Company ("Chemical") in a cash tender offer and second-step cash merger. At the time of the tender offer, Atlantic Richfield Company ("ARCO") owned approximately 80 percent of Chemical's

common stock. The Lyondell proposal contemplated a tender offer to purchase all outstanding shares of Chemical for \$57.75 per share, a commitment from ARCO to tender all of its shares at the same price, and a second-step merger whereby all untendered shares would be cashed out at the same time. The transaction was unanimously approved by Chemical's board.

The plaintiff argued, among other things, that Chemical's board had breached its fiduciary duties under *Revlon* and had abdicated its fiduciary responsibilities by leaving it to the minority shareholders to determine how to vote on the merger proposal. The Delaware Chancery Court rejected both arguments. With respect to the first argument, the Chancery Court reasoned that, because in such a case public shareholders never have a right to a control premium in the first place, there "could not be a change of control costing them the opportunity to participate in a change of control premium."¹⁰⁰ Thus, the court concluded, it would be inappropriate to extend the *Revlon* duties to such cases. With respect to the second argument, the court concluded that, because the minority shareholders were powerless to prevent the proposed merger, it did not matter how they voted on the acquisition proposal and, therefore, it would have been fruitless for Chemical's board to try to influence their decision. Therefore, the board had no duty to take a more active role in that process.¹⁰¹

The Delaware Supreme Court reversed, noting that, while the public shareholders could not defeat a transaction proposed by the majority shareholder, they still had a choice between accepting the price offered or seeking appraisal of their shares.¹⁰² In making this decision, the public shareholders were entitled to look to the board for guidance as to whether the transaction maximized value for all shareholders.¹⁰³ Therefore, the court concluded that while, in these circumstances,

"the board cannot realistically *seek* any alternative because the majority shareholder has the right to vote its shares in favor of the third-party transaction it proposed for the board's consideration, [n]evertheless, in such situations, the directors are obliged to make an informed and deliberate judgment, in good faith, about whether the sale to a third party that is being proposed by the majority shareholder will result in a maximization of value for the minority shareholders."¹⁰⁴

The court found that there were triable issues as to whether the Chemical directors had breached their duties of care and loyalty: care, in light of allegations that the Chemical directors met only once to consider the transaction and had not adequately informed themselves whether the consideration was at least equal to the appraisal value of Chemical; loyalty, in that a majority of the directors were affiliated with ARCO and had not abstained from the discussions or vote on the transaction.¹⁰⁵

In contrast, in *In re CompuCom Systems, Inc. S'holders Litig.*,¹⁰⁶ the Delaware Chancery Court held that a minority shareholder suing the board of CompuCom for allegedly selling the company at a "fire sale price" at the behest of the company's controlling shareholder failed to overcome the presumption of the business judgment rule that the board acted in good faith and on an informed basis--even though the merger price per share was less than the stock's market price on the day before the announcement of the transaction. The court rejected the plaintiff's claim that the board improperly allowed the controlling shareholder of CompuCom to unload the company at an inadequate price to satisfy "its pressing need for cash."¹⁰⁷

On May 28, 2004, CompuCom announced that it would merge with Platinum Equity Capital Partners L.P. Under the terms of the merger agreement, Platinum would buy CompuCom for \$254 million, or \$4.60 per share. The day before the transaction was announced, CompuCom's stock was trading at \$4.84 per share. The controlling shareholder of CompuCom, Safeguard Scientifics Inc., would receive about \$128 million in the sale.

A CompuCom shareholder, Central Laborer's Pension Fund, brought a class action against the CompuCom board, alleging that the board breached its *Revlon* duty to obtain the best price for the company. The plaintiff claimed that the motivation for the sale was that Safeguard and its founder and CEO, Warren V. Musser, had a "pressing need" for cash

after losing millions on risky Internet and technology stocks. According to the plaintiff, when those stocks crashed, Musser was in "dire straits" and owed \$26.5 million to Safeguard for covering his margin loans. Musser also owned a significant stake in CompuCom, and a quick sale of the company would generate cash to repay Safeguard. The complaint alleged that the defendant directors were dominated and controlled by the majority shareholder when they sold the company to Platinum and that they improperly agreed to sell the company in a "fire sale" for an inadequate price in order to satisfy the majority shareholder's need for cash.¹⁰⁸

The plaintiff cited *McMullin* as controlling precedent. However, Vice Chancellor Lamb distinguished the facts of this case from those in *McMullin*, concluding that, "[u]nlike *McMullin*, the complaint itself reveal[ed] that the board of CompuCom undertook its fiduciary duty of care with all the seriousness and diligence that was required."¹⁰⁹ The Vice Chancellor noted with approval that the board had formed a special committee of outside directors to negotiate the sale with Platinum and that the special committee evaluated indications of interest received from potential acquirors, reviewed the company's strategic alternatives, negotiated the deal with Platinum and made recommendations to the full board. All of this was done with the assistance of independently selected legal and financial advisors and in reasonable reliance on the financial advisors' opinions to the effect that the \$4.60 per share cash consideration was fair to the CompuCom public stockholders. The court noted also that the CompuCom board "did not hastily approve a transaction about which it was not fully informed."¹¹⁰ Unlike in *McMullin*, where the board met once to consider the transaction, the sale of CompuCom was the result of a multi-year process in which the special committee explored various strategic alternatives to maximize stockholder value.¹¹¹

Accordingly, the court rejected the plaintiff's claim that the board had "orchestrated a 'fire sale' and rashly sold CompuCom for a discounted price."¹¹² Nor would the court "infer that the price of the challenged merger was so inadequate as to overcome the business judgment rule."¹¹³ Vice Chancellor Lamb pointed out that it was not enough for the plaintiff to argue that the financial press objected to the adequacy of the merger price or that the final price was below the market price. Moreover, the court noted that, "if the plaintiff was dissatisfied with the price, it could have exercised its appraisal remedy."¹¹⁴

[7] States Other Than Delaware

As stated at the outset of this chapter, while more public companies are incorporated in Delaware than anywhere else, advisers to target company directors should bear in mind that laws of other states may differ significantly from that of Delaware. Not all states would apply the Delaware case law in requiring enhanced scrutiny of decisions to sell the company, beyond the usual business judgment tests. It is also worth noting that the law on directors' duties in change of control situations is simply not as well developed in other states as it is in Delaware and that such other states' courts may or may not follow Delaware's lead when they are faced with similar issues for the first time.

For example, in reviewing (under New York law) a decision of a target company to go with one bidder rather than another, a federal district court noted that the New York courts had not adopted *Paramount- QVC* and *Revlon* and that, under New York's business judgment rule, a court would not overturn an informed decision of directors absent some showing of fraud, illegality or self-dealing.¹¹⁵

Similarly, a North Carolina state court declined to apply *Revlon* to strike down a stock option provision that resulted in a \$780 million break-up fee in a merger agreement between Wachovia Corp. and First Union Corp.¹¹⁶ Although the court looked in part to Delaware case law for guidance, it noted that under the North Carolina statute, "the duties of a director weighing a change of control situation shall not be any different, nor the standard of care any higher, than otherwise provided in this section."¹¹⁷ The court interpreted this provision as intended "to eliminate by statute the unidimensional requirement imposed on directors by *Revlon*."¹¹⁸ The court concluded that the provision in question "evidenced a policy that obtaining the highest dollar value for the shareholders was not the *sole* criteria by which the courts could or should judge the conduct of directors in change of control situations."¹¹⁹ In addition, the court noted that, "[t]o the extent *Revlon* could be read to require a higher level of attentiveness from directors in change of control

situations than in other situations, the [statute] eliminated that requirement as well."n120

(n21)Footnote 21. *Paramount-QVC*, 637 A.2d at 45 (emphasis in original). Chancellor Allen, in his decision on remand in *Cede & Co. v. Technicolor*, 663 A.2d 1134, 1143 (Del. Ch. 1994) made a related point: As to price, at least

in the non-self-dealing context, a fair price does not mean the highest price financeable; "it means a price that is one that a reasonable seller, under all of the circumstances, would regard as within a range of fair value; one that such a seller could reasonably accept." The Delaware Supreme Court, in affirming Chancellor Allen's decision that the sale in question satisfied the test of entire fairness, stated that "a finding of perfection is not a *sine qua non* in an entire fairness analysis." *Cinerama Inc. v. Technicolor, Inc.*, 663 A.2d 1156, 1179 (Del. 1995) . The court reviewed both components of fairness, fair dealing and fair price, noting among other things evidence of vigorous arm's-length negotiation and an increase in the offered price; the ability of the target company to furnish information to competing bidders and to terminate the merger agreement with the first bidder if a merger was not completed by a specified drop-dead date; the fact that more than 75 percent of the shares of the target company had been tendered; the size of the premium involved; the willingness of large stockholders on the board to sell to the bidder at the transaction price; and the fact that no rival bidder came forward even though the transaction did not close for several months after it had been announced. *Cinerama*, 663 A.2d at 1172-1180 .

No. EDCV 99-182, 2001 U.S. Dist. LEXIS 3918 (C.D. Cal. Feb. 23, 2001) , in which a U.S. District Court held, under Delaware law, that *Revlon* did not require an auction in every case, and that a transaction with one bidder could be approved if the directors possessed a body of reliable evidence with which to evaluate the fairness of the transaction. In *McMichael*, the target company's directors spent almost two years negotiating the transaction, conducting "due diligence," approving possible merger partners, and retaining investment banks to conduct market checks and issue fairness opinions. These circumstances supported a finding that the directors exercised the requisite due care. *McMichael*, 2001 U.S. Dist. LEXIS 3918, at *41 (citing *Barkan*, 567 A.2d at 1287).

CHAPTER 12 GOVERNANCE IN THE CORPORATE CONTROL CONTEXT

1-12 Corporate Governance: Law and Practice § 12.06

AUTHOR: Meredith M. Brown William D. Regner Meredith Brown is a retired partner and William Regner is a partner in the Mergers and Acquisitions Group of Debevoise & Plimpton LLP. Portions of this Chapter 12 have been adapted from materials used by the authors and their colleagues in other publications, including the book *Takeovers: A Strategic Guide to Mergers and Acquisitions* (Brown, et al.), © Aspen Publishers 2008, and may be contained in other publications by the authors and their colleagues. The authors gratefully acknowledge the assistance of their colleague Dmitriy A. Tartakovskiy in the updating of this chapter.

§ 12.06 Actions That Thwart a Shareholder Vote

One of the reasons courts defer to directors' business decisions is their recognition that the shareholders have elected the directors and have the power to remove them if they disapprove of their decisions. By the same token, courts tend to be critical of defensive actions that work to limit the shareholders' ability to remove directors.

In *Blasius Industries, Inc. v. Atlas Corp.*,ⁿ¹ the Delaware Chancery Court held that if a board acts "for the sole or primary purpose of thwarting a shareholder vote," the board is not entitled to the protection of the business judgment rule, unless it can overcome "the heavy burden of demonstrating a compelling justification for such action."ⁿ²

In the *Blasius* case, Blasius commenced a consent solicitation to increase the number of directors of Atlas from 7 to 15 (the maximum permitted under Atlas's charter) and to elect 8 named persons to fill the vacancies. The board of Atlas held an emergency directors' meeting to amend the bylaws to increase the number of directors from 7 to 9 and to appoint two persons to fill the new vacancies. In so doing, they knew they were precluding the holders of a majority of the company's stock from placing a majority of the new directors on the board through the consent solicitation, if the shareholders wished to do so.

In *MM Companies Inc. v. Liquid Audio Inc.*,ⁿ³ the Delaware Supreme Court held that in cases involving a hostile contest for corporate control, the *Blasius* "compelling justification" test is not an independent standard of judicial review, but rather an extension of the *Unocal* analysis to cases where a defensive measure interferes with the shareholder franchise.

In *Liquid Audio*, as the first stage of its takeover plan, the plaintiff MM nominated candidates for two board seats that were up for election on Liquid Audio's five member board of directors. When it became clear that MM's nominees would be elected, the board of Liquid Audio increased its size from five to seven members and appointed two directors

to fill the new seats. Because Liquid Audio had a staggered board and only one or two directors were up for election in any year, the expansion of the board guaranteed that the incumbent directors would retain control of the board for at least two years. MM sued Liquid Audio and its directors, claiming that the addition of the new directors interfered with the ability of MM's candidates, once elected, to gain a substantial presence on Liquid Audio's board. On appeal from a decision of the Delaware Chancery Court, the Delaware Supreme Court found the board action invalid.

The court explained that the *Blasius* and *Unocal* standards are not mutually exclusive.ⁿ⁴ Rather, the "compelling justification" test of *Blasius* must be applied within the *Unocal* reasonableness standard where the primary purpose of a board's action, taken as a defensive measure, is to "interfere with or impede the effective exercise of the shareholder franchise in a contested election of directors."ⁿ⁵ The court indicated that while the *Unocal* requirement of proportionality applies in such cases, "the special import of protecting the shareholders' franchise within *Unocal*'s requirement" mandates the initial application of the compelling justification test of *Blasius* before applying the more general reasonableness test of *Unocal*.ⁿ⁶

The *Blasius* standard does not apply to the adoption of a notice bylaw that merely defers a shareholder vote, giving directors a limited period of time within which to explore alternatives to a takeover proposal. In *Kidsco, Inc. v. Dinsmore*,ⁿ⁷ the Delaware Chancery Court upheld the adoption by a target company of an amendment to a bylaw to extend the time within which a special meeting called by shareholders had to be held. After The Learning Company ("TLC") had entered into a stock merger agreement with Broderbund Software, Inc., a competing bidder, Softkey International Inc., launched a tender offer for TLC shares conditioned on rejection of the Broderbund transaction, and also announced its intention to call a special meeting of TLC shareholders under a bylaw permitting holders of 10 percent of TLC shares to call a special meeting. The bylaw contemplated that the special meeting had to be held not less than 35 days nor more than 60 days after receipt of the request. The directors extended the period of time from 60 days to 90 days, giving them an additional 25 days to look for alternatives to the Softkey bid. The Chancery Court said that the amendment was not a disenfranchisement under *Blasius*, because shareholders would be permitted to vote, and the amendment merely delayed the vote by 25 days.

Similarly, in *Aquila, Inc. v. Quanta Services, Inc.*,ⁿ⁸ the Chancery Court applied the more lenient *Unocal* test to a management attempt to issue shares likely to be voted for management and against an insurgent stockholder as a defensive measure in a proxy contest, on the basis that such issuances would only make it more difficult, and not impossible, for the insurgent stockholder to win the proxy contest. In this case, Aquila owned approximately 30 percent of Quanta's stock and sought to increase its interest in Quanta by buying shares on the open market and directly from Quanta officers and directors. When Aquila's ownership reached 38.5 percent of Quanta voting power, Quanta amended its poison pill so that it would be triggered if Aquila's ownership exceeded 39 percent.

Aquila responded by announcing its intention to nominate an opposing slate of directors at Quanta's annual meeting. Quanta then formed a special committee of non-Aquila directors to "maximize [the] odds" of winning the proxy contest. The committee approved the creation of a Stock Employee Compensation Trust ("SECT"), whereby Quanta issued 8 million of its shares--about 10 percent of the outstanding shares--to the SECT for use in Quanta's employee compensation plans. Shares in the trust that had not yet been allocated to employee benefit plans were to be voted in accordance with instructions from Quanta employees participating in the company's employee stock plan--increasing the proportional voting power of Quanta employees at the expense of other shareholders and diluting Aquila's voting power 10 percent from 38 percent to 34 percent. Aquila sued Quanta for an injunction against voting the SECT shares.ⁿ⁹

The court found that the director defendants' authorization of the SECT was a defensive measure taken in the context of a proxy fight and other takeover related activity, but nevertheless concluded that the terms of the SECT, including its voting mechanic, were neither preclusive nor coercive. The 10 percent dilution only made it more difficult, but not impossible, for Aquila to win the proxy contest and, thus, more likely, but far from certain, that the members of the special committee would be reelected as directors.ⁿ¹⁰

Although Vice Chancellor Lamb noted that Delaware courts "are particularly vigilant in protecting against 'legal strategies ... to frustrate ... a shareholder vote,'"n11 he refused to apply the strict "compelling justification" test set out in *Blasius* to the actions of the special committee and examined them under the general *Unocal* and *Unitrin* standards.n12 Under those standards, the Vice Chancellor found that there was no or little relationship between the particular mechanism for voting the SECT shares and a threat of employee instability on which the special committee claimed to have relied in adopting the SECT. Therefore, there was a "reasonable probability" that the adoption of the SECT, with its dilutive voting provisions, was not a permissible defensive measure under the *Unocal* and *Unitrin* standards and that the SECT voting mechanism was "illegally dilutive."n13

In *Mercier v. Inter-Tel (Delaware) Inc.*,n14 the Delaware Chancery Court held that a special committee of Inter-Tel's board did not breach its fiduciary duties by postponing a shareholder vote for the purpose of gaining more time to convince stockholders to approve a merger. Vice Chancellor Strine rejected the plaintiff's argument that the "primary purpose" of the special committee's action was to thwart the expression of the stockholders' will that should be subject to the *Blasius* "compelling justification" standard. Rather, the Vice Chancellor held that the actions of the Inter-Tel board should be examined under the *Unocal* standard.

In April 2007, Inter-Tel agreed to be acquired by its competitor Mitel Networks Corp. and private equity firm Francisco Partners for \$26.50 per share in cash. A special meeting of shareholders to vote on the proposed merger was scheduled for June 29, 2007. On June 13, 2007, a large institutional shareholder announced that it was seriously considering opposing the merger, and Institutional Shareholder Services ("ISS") (presently RiskMetrics Group, the largest proxy advisor in the United States) subsequently recommended that Inter-Tel stockholders vote against the transaction. Inter-Tel had not conducted an auction prior to signing the merger agreement, and ISS believed its adverse recommendation might help Inter-Tel extract a higher price. In addition, as an alternative to the Mitel merger, Inter-Tel's founder made a proposal to buy 60% of the company's shares at \$28 per share. However, on June 22, Mitel issued a press release stating that it would not increase its price, citing Inter-Tel's lower-than-expected quarterly earnings.

As the date for the special meeting approached, Inter-Tel's special committee came to understand that a majority of the shares would likely be voted against the merger. On the morning of June 29, the special committee decided to postpone the special meeting to allow stockholders more time to digest recent developments, including deterioration of the debt capital markets, Inter-Tel's lower-than-expected sales numbers, the announcement by Mitel that it would not raise its bid, and the filing of definitive proxy materials by the company's founder in connection with his recapitalization proposal. Inter-Tel's full board ratified the postponement, set the vote for July 23 and changed the record date for the special meeting to July 9, 2007. Thereafter, ISS changed its recommendation to favoring the merger, the founder withdrew his recapitalization proposal, and the stockholders approved the merger on the new special meeting date.

A shareholder sued to enjoin the merger, alleging that the special committee breached its fiduciary duty by, among other things, thwarting the will of Inter-Tel's stockholders by postponing the special meeting at the eleventh hour when it knew the proposed merger would be voted down. The plaintiff also complained that the change in the record date permitted hedge funds and arbitrageurs to acquire Inter-Tel stock they would vote in favor of the merger to gain a short-term profit.

In declining to enjoin the merger, Vice Chancellor Strine stated that, in situations where a vote "touch[es] on matters of corporate control," the appropriate standard of review is a "reasonableness standard consistent with the *Unocal* standard."n15 The Vice Chancellor noted that the "[t]he core of *Unocal's* utility" rests in the burden it imposes on directors: (1) to identify the proper corporate objectives served by their actions; and (2) to justify their actions as reasonable in relationship to such objectives.n16 Vice Chancellor Strine explained further that

directors are not supposed to be neutral with regard to matters the propose for stockholder action. As

a matter of fiduciary duty, directors should not be advising stockholders to vote for transactions ... unless the directors believe [they] are in the stockholders' best interests.n17

Vice Chancellor Strine concluded that the special committee's objective in rescheduling the special meeting--to improve the chances that stockholders would approve the proposed merger by a more fully informed vote--was proper and legitimate. The Vice Chancellor also found that a short delay in the special meeting was a reasonable action in relation to the special committee's objective and that by delaying the meeting, the special committee had not precluded the stockholders from voting or coerced them into voting in a particular way. Accordingly, the court held that the actions of Inter-Tel's special committee satisfied the reasonableness standard of *Unocal*.

The Vice Chancellor further found that, even if the *Blasius* standard applied, Inter-Tel's special committee had demonstrated a compelling justification for its actions. According to the Vice Chancellor, compelling circumstances exist where (1) directors believe that stockholders are about to reject a transaction that is in their best interests, (2) information useful to the stockholders' decision has not been publicly disclosed or adequately considered and (3) if the stockholders vote against the transaction, the buyer will walk and the opportunity will be irretrievably lost.n18

By contrast, in *Steel Partners II, L.P. v. Point Blank Solutions, Inc., C.A. No. 3695-CC*,n19 the Delaware Supreme Court applied the *Blasius* test to an attempt by Point Blank Solutions, Inc. to postpone its annual meeting of shareholders in order to pursue a possible sale. On April 8, 2008, Point Blank announced the postponement of its annual meeting, which was originally scheduled for April 22, 2008, until August 19, 2008, in order to allow the company additional time to pursue possible strategic alternatives. The company's most recent annual meeting had been held in 2005. After the company's April 8, 2008 announcement, shareholder Steel Partners II, L.P., which was seeking to elect a slate of directors in furtherance of a takeover attempt, brought suit pursuant to Section 211 of the DGCL to compel the company to hold an annual meeting. The company, after agreeing to hold its annual meeting not later than August 19, 2008, made a motion to postpone its annual meeting until November 19, 2008 in order to complete its exploration of strategic alternatives.

In support of its request for postponement, the company alleged that Steel Partners and the former CEO of Point Blank together controlled approximately 40 percent of the company's voting power. The company argued that because Steel Partners was a potential buyer of the company, the slate of directors that Steel Partners had nominated, if elected, would be conflicted and would seek to sell the company to Steel Partners at the lowest possible price. The company also alleged that the former CEO had a personal interest adverse to the company's public shareholders because he was litigating a claim to advancement fees against the company and a breach of contract claim filed by the company against him.

The court, citing *Blasius* and *Liquid Audio*, held that the company's allegations failed to provide a basis upon which the shareholder franchise could be "further impinged by any additional delay of the exercise of that fundamental right."n20 The court noted that, although it recognized that the influence that Steel Partners and the former CEO might have on the outcome of a shareholder vote, the company's proper recourse under the circumstances was to communicate its concerns directly to its stockholders. The court stated that it was "up to the stockholders to vote their prerogative" after evaluating all the information made available to them, and there was no good cause shown to further delay their ability to do so.n21

By contrast, the *Blasius* standard has been held to be applicable to a provision in a poison pill that prevents any directors, other than those who are in office at the time the pill was adopted or their designated successors, from redeeming the pill (a "dead hand" provision). In *Carmody v. Toll Brothers Inc.*,n22 the court held that the *Blasius* standard was applicable to such a provision, in that the shareholders had been disenfranchised because the provision deprived them of their ability to elect a board willing and able to accept a hostile bid.n23

In *Chesapeake Corp. v. Shore* n24 the Delaware Chancery Court struck down bylaw amendments adopted by the

directors of a target company in the face of a tender offer. The court found that the bylaw amendments--which included a requirement for a supermajority vote to amend the bylaws--were designed to make it harder for a bidder to change the target's bylaws so as to declassify the board and elect a new board that favored the bidder's offer. Vice Chancellor Strine found that, under *Unocal*, this was an unreasonable response to the bidder's offer. The Vice Chancellor thought the threat posed by the offer was modest, since it was an all-cash offer, and the target's poison pill gave directors time to explain to shareholders why they believed the offer was inadequate.ⁿ²⁵

The Vice Chancellor also held that the supermajority requirement added by the bylaw amendment had a preclusive effect, leaving the bidder with no realistic chance of winning a consent solicitation, since the target's directors owned about 24 percent of the company's stock and had determined to oppose the consent solicitation. After reviewing the evidence of proxy solicitors of both sides, the court concluded it was reasonable to expect that about 90 percent of the shares would vote in the consent solicitation, and that the bidder would need the affirmative vote of holders of over 88 percent of the shares voted to prevail.ⁿ²⁶ The Vice Chancellor also found that the bylaw amendment interfered with the shareholder franchise and therefore found it invalid under *Blasius* without a showing of compelling justification--which the court found to be lacking.ⁿ²⁷

It is likely that courts in other states, too, will give careful scrutiny to defensive actions that have the effect of disenfranchising shareholders. After Hilton Hotels Corporation launched a hostile tender offer for ITT Corporation, a federal district court, applying Nevada law, enjoined ITT from implementing without a shareholder vote a spinoff of most of ITT's assets into a company having a staggered board. ITT itself did not have a staggered board. The court noted that "interference with the shareholder franchise is especially serious [and] ... is not to be left to the board's business judgment, precisely because it undercuts a primary justification for allowing directors to rely on their business judgment in almost every other context."ⁿ²⁸

§ 12.07 The Entire Fairness Test

[1] Introduction

Under Delaware case law, the most exacting standard for judicial review of a decision by directors is the "entire fairness" test, which requires the courts to determine whether the decision is entirely fair to the stockholders.

The entire fairness standard is applicable if a majority of the directors has an actual conflict of interest in approving a transaction, such as where directors stand on both sides of a transaction.ⁿ¹ The Delaware Court of Chancery held in *In re Tele-Communications, Inc. S'holders Litig. Cons. C.A. No. 16470*,ⁿ² that a conflict requiring the demonstration of entire fairness also exists where directors are significant non-majority shareholders of a corporation and have personal interests in a transaction between the corporation and a third party that significantly diverge from those of other equity holders.ⁿ³ In the TCI case, which arose out of TCI's merger with AT&T Corp. in 1999, TCI had two classes of stock, Class A and Class B. The two classes had identical economic rights, but Class A had one vote per share, whereas Class B had ten. John Malone, TCI's controlling stockholder, insisted from the outset of merger discussions with AT&T that, in order to obtain his consent to the transaction, the Class B shares must receive a 10 percent premium (valued at \$240 million) relative to the Class A shares. The TCI directors held significantly more Class B shares than Class A shares, while the public shareholders held predominantly Class A shares. Moreover, Class B was almost entirely comprised of members of the board: 84 percent of the outstanding Class B shares were held by five directors, which constituted a majority of the board. Thus, any premium exclusively granted to the Class B shares would primarily benefit these directors rather than the public shareholders. The court observed that based on the AT&T common stock price on the date immediately before the date on which the board approved the merger, these five directors would have received an additional \$220 million premium at the expense of the Class A shareholders. Because such a significant benefit accrued primarily to directors controlling such a large vote of the corporation, at the expense of another class of shareholders to whom these directors owed a fiduciary duty, the court concluded that the entire fairness standard should apply.ⁿ⁴

The entire fairness test is also applicable to a going private transaction that is a corporate transaction such as a merger--rather than a tender offer⁵- and that involves a controlling shareholder.⁶ In analyzing a transaction under the entire fairness standard, Delaware courts look at both the procedural fairness ("fair dealing") and the substantive or price fairness ("fair price").⁷

Even if the entire fairness test is applicable, it is not necessary to show that the price paid was the highest price the bidder could have afforded to pay. As the Delaware Supreme Court said in *Cinerama*, "a finding of perfection is not a *sine qua non* in an entire fairness analysis."⁸

In *In re Pure Resources, Inc. S'holders Litig.*,⁹ Vice Chancellor Strine identified two strands of authority in the relevant Delaware case law.¹⁰ In one strand, which applies to situations where controlling shareholders negotiate a merger agreement with the target board to buy out the minority, the cases emphasize the protection of minority shareholders against unfairness caused by the "inherent coercion" that exists in such transactions.¹¹ In the other strand, which deals with cases where a controlling shareholder seeks to acquire the minority's shares through a tender offer followed by a short-form merger, Delaware case precedent "facilitates the free flow of capital between willing buyers and willing sellers of shares, so long as the consent of the sellers is not procured by inadequate or misleading information or by wrongful compulsion."¹²

[2] Negotiated Mergers

A going private transaction involving a controlling shareholder that is structured as a negotiated merger--or that otherwise requires the target's board of directors to take action to facilitate the transaction--must satisfy the test of entire fairness, rather than the normal business judgment rule.¹³ Moreover, the entire fairness form of review governs negotiated going private transactions involving a controlling shareholder even if the target board was comprised of a majority of independent directors, a special committee of the target's independent directors was empowered to negotiate and veto the merger, and the merger was subject to approval of a majority of the disinterested target shareholders.¹⁴

Nevertheless, although normally the controlling shareholder has the burden of showing that the transaction meets the entire fairness standard, if the transaction is negotiated and approved by a special committee of independent directors that has the freedom to negotiate at arm's length, the burden of persuasion on the issue of entire fairness shifts from the controlling shareholder and the target board as proponents of the transaction in question to shareholder-plaintiffs challenging it, unless the functioning of the special committee in negotiating and approving the transaction is flawed in some way.¹⁵ Similarly, the burden of proof on the issue of entire fairness may be shifted to the plaintiff if the merger is conditioned on the approval of a majority of the publicly held shares, provided there is adequate disclosure to the public shareholders.¹⁶

In a management buyout ("MBO"), the transaction should not be subject to a test of entire fairness unless the buying group dominates the target company's board. However, special committees are often used in MBO transactions as a way of addressing the conflicts of interests these transactions present.

[3] Going Private Tender Offers

In going-private transactions involving tender offers, the controlling shareholder typically promises to buy as many shares as the minority will sell, but conditions the offer on enough minority shares being tendered for it to obtain 90 percent of the target's shares, so that the controlling shareholder can then consummate a short-form merger under the Delaware short-form merger statute,¹⁷ at either the same or a different price. The Delaware courts have held that the entire fairness test does not apply to going private transactions structured as tender offers by controlling shareholders.

In *Solomon v. Pathe Communications Corp.*,¹⁸ the Delaware Supreme Court held that, unlike in negotiated merger

transactions, a controlling shareholder making a non-coercive tender offer to acquire shares directly from the minority holders does not have a duty to offer a "fair" price in the proposed tender offer.ⁿ¹⁹ In *In re Siliconix S'holders Litig.*,ⁿ²⁰ the Delaware Chancery Court explained the difference in the way courts treat going-private transactions structured as tender offers followed by short-form mergers, as opposed to going-private transactions structured as long-form mergers:

The difference in judicial approach can be traced to two simple concepts. The first is that accepting or rejecting a tender is a decision to be made by the individual shareholder, and at least as to the tender itself, he will, if he rejects the tender, still own the stock of the target company following the tender. The second concept is that the acquired company in the merger context enters into a merger agreement, but the target company in the tender context does not confront a comparable corporate decision because the actual target of a tender is not the corporation (or its directors), but, instead, is its shareholders.ⁿ²¹

However, for the business judgment rule standard of review to apply to a going-private tender offer, two conditions must be satisfied. First, the tender offer must be voluntary and non-coercive, in contrast to "inherently coercive" cash-out mergers. Second, there must be no materially false or misleading disclosures made to shareholders in connection with the offer.ⁿ²²

Unlike the "inherent coercion" that *Lynch* held to exist where a controlling shareholder seeks to acquire the minority's stake in a negotiated merger, "in the tender offer context addressed by *Solomon* and its progeny, coercion is defined in the more traditional sense as a wrongful threat that has the effect of forcing stockholders to tender at the wrong price to avoid an even worse fate later on," a type of coercion ... [called] "structural coercion."ⁿ²³ In *Pure Resources*, the Delaware Chancery Court held that there is no actionable structural coercion if the controlling shareholder:

- makes the tender offer subject to a non-waivable majority of the minority tender condition;
- promises to effect a short-form merger at the same price if it obtains 90 percent or more of the shares; and
- makes no retributive threats (e.g., to cut the dividend or to delist the stock if the tender offer is not successful).ⁿ²⁴

With regard to the adequate disclosure condition, Vice Chancellor Strine explained in *Pure Resources* that "[t]he informational and timing advantages possessed by controlling stockholders require some countervailing protection if the minority is to truly be afforded the opportunity to make an informed, voluntary tender decision."ⁿ²⁵ To that end, the *Pure Resources* court held that a controlling shareholder making a tender offer for the minority's shares has a duty under Delaware law to make disclosure in the tender offer of "all material facts pertinent to the decisions that they [the minority shareholders] are being asked to make."ⁿ²⁶ This duty may go beyond the specific line items of the applicable SEC form.

Further, Vice Chancellor Strine stated that, to compensate for its informational and timing advantages, the controlling shareholder "owes a duty to permit the independent directors on the target board both free reign and adequate time to react to the tender offer, by (at the very least) hiring their own advisors, providing the minority with a recommendation as to the advisability of the offer, and disclosing adequate information for the minority to make an informed judgment."ⁿ²⁷

Finally, the court held that for their part, the independent directors of the target have a duty to undertake these tasks in good faith and diligently, and to pursue the best interests of the minority.ⁿ²⁸ However, there is no duty on the part of the board to give the special committee the power to block the tender offer, through use of a poison pill or otherwise, nor any duty on the part of the independent directors to seek such blocking power.ⁿ²⁹

[4] Short-Form Mergers

The Delaware Chancery Court has held that the entire fairness test does not apply to short-form mergers under Section 253 of the Delaware General Corporation Law.ⁿ³⁰ Vice Chancellor Lamb stated in *In re Unocal Exploration Corp. S'holders Litig.*ⁿ³¹ that, when a controlling shareholder consummates a statutory short-form merger that is not preceded by any prior transaction subject to entire fairness review, in the absence of "fraud, gross overreaching, or other such wrongful conduct" or inadequate disclosure, the only remedy of an unhappy minority shareholder is appraisal.ⁿ³² The court reasoned that a rule imposing an equitable requirement of fair process on statutory short-form mergers would be inconsistent with the statute's authorization of a simplified procedure for such mergers.ⁿ³³

(n5)Footnote 5. A going private tender offer that is coercive--in the sense that it involves a "wrongful threat that has the effect of forcing stockholders to tender at the wrong price to avoid an even worse fate later on"--may also be subject to the entire fairness standard of review. See *In re Pure Resources S'holders Litig.*, 808 A.2d 421, 438 (Del. Ch. 2002) .

(n6)Footnote 6. *Kahn v. Tremont Corp.*, 694 A.2d 422, 428 (Del. 1997) . See also *In re Siliconix Inc. S'holders Litig.*, Cons. C.A. 18700, 2001 Del Ch. LEXIS 83 (Del. Ch. June 19, 2001) , where the Delaware Court of Chancery rejected the argument that the Delaware Supreme Court's decision in *McMullin v. Beran*, 765 A.2d 910 (2000) , required application of the entire fairness standard to going private transactions involving a tender offer by a controlling shareholder for the stock held by the minority shareholders, to be followed by a short-form merger. As Vice Chancellor Noble pointed out, in *McMullin*, the Supreme Court was careful to note that the duties involved in that case were statutory duties under the Delaware merger statute and "attendant" fiduciary duties. Because the Supreme Court in *McMullin* emphasized that fiduciary duties are "context specific," the Vice Chancellor declined to read into the *McMullin* holding a new approach to assessing the conduct of directors of a tender target. *Siliconix*, 2001 Del. Ch. LEXIS 83, at *7-9 .

(n11)Footnote 11. *Pure Resources*, 808 A.2d at 435 . See also *Emerald Partners v. Berlin*, 787 A.2d 85, 95 (Del. 2001) ("the category of transactions that require judicial review pursuant to the entire fairness standard *ab initio* do so

because, by definition, the inherently interested nature of those transactions are inextricably intertwined with issues of loyalty"). This strand is discussed in 12.07[2] below.

(n12)Footnote 12. *Pure Resources*, 808 A.2d at 435 . This strand is discussed in 12.07[3] below.

(n13)Footnote 13. *Kahn v. Tremont Corp.*, 694 A.2d 422, 428 (Del. 1997) . See also *Emerald Partners v. Berlin*, 787 A.2d 85, 94 (Del. 2001) (reiterating that entire fairness applies where controlling shareholder stands on both sides of challenged transaction).

(n14)Footnote 14. *Kahn v. Lynch Communication Sys.*, 638 A.2d 1110, 1117 (Del. 1994) . In contrast, in a negotiated going private transaction involving a significant, but non-controlling, shareholder, who may sit on the board or have the right to appoint one or more directors to the board, a properly constituted and functioning committee of disinterested directors can ensure that the deferential "business judgment" standard of review will apply. See, e.g., *Kohls v. Duthie*, 765 A.2d 1274, 1285 (Del. Ch. 2000) (management buyout led by CEO who owned 35 percent of corporation's stock). In an article discussing the standards of judicial review in Delaware, former Delaware Chancellor William Allen and Vice Chancellors Leo Strine and Jack Jacobs suggested that the business judgment rule should apply to "self-interested mergers that are approved by either an effective independent committee or by a majority of the minority shareholder vote." William T. Allen, Jack B. Jacobs & Leo E. Strine, Jr., *Function Over Form: A Reassessment of Standards of Review in Delaware Corporation Law*, 56 *Bus. Law* 1287, at 1317 (2001).

(n15)Footnote 15. *Pure Resources*, 808 A.2d at 436 (citing *Lynch*, 638 A.2d at 1117 ("An approval of the transaction by an independent committee of directors or an informed majority of minority shareholders shifts the burden of proof on the issue of fairness from the controlling or dominating shareholder to the challenging shareholder-plaintiff.")). See also *Levco Alternative Fund Ltd. v. Reader's Digest Ass'n*, 803 A.2d 428 (Del. 2002) (citing *Emerald Partners v. Berlin*, 726 A.2d 1215, 1221 (Del. 1999)) . Note also that, while the entire fairness standard remains applicable to the actions of the controlling shareholder in a negotiated going private transaction, the use of a properly functioning special committee of disinterested, independent and informed directors will result in the application of the business judgment rule to the decisions of the directors sitting on the special committee. See, e.g., *In re Western Nat'l Corp. S'holders Litig.*, C.A. 15927, 2000 Del. Ch. LEXIS 82 (Del. Ch. May 22, 2000) .

(n16)Footnote 16. See *Rosenblatt v. Getty Oil Co.*, 493 A.2d 929, 937 (Del. 1985) . However, the Delaware Supreme Court has held in a case involving the merger of a public company with an 80-percent majority shareholder into a third company (unaffiliated with the majority shareholder) that the board of the target has "an affirmative duty to protect [the] minority shareholders' interests" and to assist the minority shareholders by ascertaining the target's value as a going concern so that the shareholders may make an informed decision as to whether to pursue appraisal rights. *McMullin v. Beran*, 765 A.2d 910 (Del. 2000) . At the very least, this holding implies that, even where a controlling shareholder seeks to rely on a "majority of the minority" condition to shift the burden of proof, it should institute a special committee process in order for the target's board to meet its duty to advise the public shareholders how to vote on the merger. In *In re Cox Communications, Inc. S'holders Litig.*, 879 A.2d 604 (Del. Ch. 2005) , Vice Chancellor Strine reasoned that a going private transaction negotiated with and approved by an independent committee, and subject to approval of a majority of the publicly held shares, should not be subject to entire fairness review.

Jan. 23, 2009) ("Delaware law does not impose a duty of entire fairness on controlling stockholders making a non-coercive tender or exchange offer to acquire shares directly from the minority holders") (quoting *Aquila*, 805 A.2d at 190); *Pure Resources*, 808 A.2d 421 ; *Siliconix*, 2001 Del. Ch. LEXIS 83, at *22 ("as a general principle, our law holds that a controlling shareholder extending an offer for minority-held shares in the controlled corporation is

under no obligation, absent evidence that material information about the offer has been withheld or misrepresented or that the offer is coercive in some significant way, to offer any particular price for the minority-held stock") (quoting *In re Ocean Drilling & Exploration Co. S'holders Litig.*, C.A. 11898, 1991 Del. Ch. LEXIS 82, *9-10, Chandler, V.C., mem. op. at 6-7 (Apr. 30, 1991)); *Joseph v. Shell Oil Co.*, 482 A.2d 335, 341 (Del. Ch. 1984) .

(n20)Footnote 20. *In re Siliconix Inc. S'holders Litig.*, C.A. 18700, 2001 Del. Ch. LEXIS 83 (Del. Ch. June 19, 2001) .

(n21)Footnote 21. *Siliconix*, 2001 Del. Ch. LEXIS 83, at *26 .

(n22)Footnote 22. *In re Pure Resources, Inc. S'holders Litig.*, 808 A.2d 421, 438 (Del. Ch. 2002) (citing *Solomon v. Pathe Communications Corp.*, 672 A.2d 35, 39 (Del. 1996)) .

(n23)Footnote 23. *Pure Resources*, 808 A.2d at 438.

(n24)Footnote 24. *Pure Resources*, 808 A.2d at 436, 451-52. See also *In re Aquila, Inc. S'holders Litig.*, 805 A.2d 184, 188, 190 (Del. Ch. 2002) (holding that a tender offer was not coercive and "clearly a voluntary one" because the terms of the offer included a majority of the minority condition and a commitment to effect a short-form merger on the same terms if the offer was successful). See also *In re Next Level Communications, Inc. S'holders Litig.*, 834 A.2d 828 (Del. Ch. 2003) (applying the framework applied in *Pure*, the court refused to enjoin an offer by a 74 percent holder that it found to be both structurally non-coercive and fully and fairly disclosed).

(n25)Footnote 25. *Pure Resources*, 808 A.2d at 438.

(n26)Footnote 26. *Pure Resources*, 808 A.2d at 447. In *Pure Resources*, the court enjoined a going private tender offer in part because of nondisclosure of the valuation analyses of the financial adviser to the special committee and inadequate disclosure of the parent company's reasons for undertaking the transaction and of the proceedings of the special committee (which had sought a broader grant of authority but had been rebuffed). Similarly, in *In re Emerging Communications S'holder Litig.*, C.A. No. 16415, 2004 Del. Ch. LEXIS 70, at *111-*15 (Del. Ch. May 3, 2004) , the Delaware Court of Chancery applied the entire fairness standard to a negotiated two-step going private transaction where the controlling shareholder omitted to disclose material information in the tender offer documents and the proxy statement. Moreover, the court held that this material omission "[was] sufficient, in and of itself, to undermine the informed character of the Special Committee approval that is a predicate to shifting the burden of proof in an entire fairness case." *Emerging Communications*, 2004 Del. Ch. LEXIS 70, at *114 . Nor was the burden shifted by the condition that a majority of the minority shareholders tender into the offer, because conditioning a tender offer that is part of a going private transaction does not have the same burden-shifting effect as conditioning a merger on approval by holders of a majority of the publicly held shares. *Id.* The court explained that "no Delaware case has held that burden-shifting can be accomplished by a tender of shares rather than by an actual vote. Nor should a tender be treated as the equivalent of an informed vote Stockholders have materially different interests at stake when tendering as opposed to voting their shares." *Id.* at *114-15.

(n27)Footnote 27. *Pure Resources*, 808 A.2d. 421, 445 at n.47. (stating that the foregoing "is not to slight the controlling stockholder's fiduciary duty of fair disclosure and its duty to avoid misleading the independent directors and the minority"). However, the court also stated that there is no duty on the part of the controlling shareholder to permit the target board to block the tender offer through the use of a poison pill. 808 A.2d 445, 446 .

(n28)Footnote 28. *Pure Resources*, 808 A.2d. at 445 . Cf. *In re Siliconix Inc. S'holders Litig.*, CA 18700, 2001 Del. Ch. LEXIS 83 (June 19, 2001) , where the court declined to extend the *McMullin* doctrine to tender offers or to impose on the board of the target a duty to take an affirmative position on a proposed tender offer by a controlling shareholder. However, in *Pure Resources*, Vice Chancellor Strine, seemingly alluding to the then-recently enacted Sarbanes-Oxley Act of 2002 and the then-recently proposed SRO governance rules, also noted that "whether a majority stockholder can compose a subsidiary board entirely of persons beholden to itself and use this fact as the reason for

depriving the minority of a board recommendation is a question about which I need not speculate, and which recent corporate governance developments suggest will not likely need to be answered definitively." *Pure Resources*, 808 A.2d. at 445 n.48 .

(n29)Footnote 29. *Pure Resources*, 808 A.2d. at 446 . For a post-*Pure Resources* decision permitting a going-private tender offer to go forward because it was structurally non-coercive and entailed sufficient disclosure, see *Next Level Communications v. Motorola*, 834 A.2d 828 (Del. Ch. 2003) . In that case, the court found there was adequate disclosure of the large stockholder's projections for the target and, by the target in its Schedule 14D-9, of the target's more bullish projections. The court also found that the offer was not made coercive by the disclosure of the facts that the target company needed additional funding and had been threatened with de-listing from Nasdaq.

(n30)Footnote 30. *In re Unocal Exploration Corp. S'holders Litig.*, 793 A.2d 329 (Del. Ch. 2000) , *aff'd sub nom.*, *Glassman v. Unocal Exploration Corp.*, 777 A.2d 242 (Del. 2001) . Under Del. CHAPTER 12 GOVERNANCE IN THE CORPORATE CONTROL CONTEXT

1-12 Corporate Governance: Law and Practice § 12.08

AUTHOR: Meredith M. Brown William D. Regner Meredith Brown is a retired partner and William Regner is a partner in the Mergers and Acquisitions Group of Debevoise & Plimpton LLP. Portions of this Chapter 12 have been adapted from materials used by the authors and their colleagues in other publications, including the book *Takeovers: A Strategic Guide to Mergers and Acquisitions* (Brown, et al.), © Aspen Publishers 2008, and may be contained in other publications by the authors and their colleagues. The authors gratefully acknowledge the assistance of their colleague Dmitriy A. Tartakovskiy in the updating of this chapter.

§ 12.08 Shareholder Ratification

In *Smith v. Van Gorkom*, the Delaware Supreme Court described it as the "settled rule" that "where a majority of fully informed shareholders ratify action of even interested directors, an attack on the ratified transaction normally must fail."ⁿ¹ However, in 2009, the Delaware Supreme Court held in *Gantler v. Stephens* ⁿ² that shareholder ratification is inapplicable to any situation in which the shareholder vote is required by law.

The *Gantler* case arose out of a sale process for First Niles Financial, Inc., a small, Nasdaq-listed bank holding company. Although the company received three bids, no sale resulted: the board declined to pursue one bid that expressly stated the bidder's intention not to retain the First Niles board; another bid was withdrawn after First Niles failed to provide requested due diligence materials; and a third bid, a proposed stock merger, was rejected by the board without discussion or deliberation. Instead, the board pursued a "privatization" transaction in which shares of holders of 300 or fewer shares were reclassified into a preferred stock with no voting rights other than upon a sale of the company, and the company's shares were de-listed from Nasdaq. The reclassification was approved by holders of a majority of First Niles's outstanding shares. Plaintiff shareholders alleged that the defendant directors and officers breached their fiduciary duties by rejecting the stock merger proposal and abandoning the sale process, by disseminating a false and misleading proxy statement, and by effecting the reclassification.

The Delaware Chancery Court dismissed the complaint.ⁿ³ The court held that *Unocal* did not apply to the board's decision not to sell the company because the board itself initiated the sale process and there was no hostile takeover attempt or any threatening action to indicate that the board's actions were "defensive" in nature. The court applied the business judgment rule and held that, where a board decides not to pursue a merger, the board must (1) reach its decision "in good faith pursuit of legitimate corporate interests" and (2) it must do so "advisedly."ⁿ⁴ On the first question, the court found that there was no evidence that the directors acted for the primary purpose of entrenching themselves in office. On the second question, the court held that the extensive discussions that the board had with its

financial adviser concerning the offers and the involvement of specially retained outside counsel made the plaintiffs' allegations insufficient to infer that the board did not act with due care. The Chancery Court also agreed with the defendants that because First Niles shareholders ratified the reclassification, the board's decision to effect the reclassification was protected by the business judgment rule under *Smith v. Van Gorkom*.ⁿ⁵ On appeal, the Delaware Supreme Court, sitting *en banc*, reversed.

The Delaware Supreme Court agreed with the Chancery Court's view that the board's decisions to reject the merger proposal and abandon the sale process were not subject to enhanced scrutiny under Unocal because the actions of the board could not properly be called "defensive."ⁿ⁶ However, the court found that the board was not eligible for the protection of the business judgment rule at this stage because the plaintiffs had adequately alleged conflicting interests. While acknowledging that the prospect of directors losing their jobs was in itself insufficient to support an allegation of disloyalty, the court noted that the proxy statement for the reclassification conceded that First Niles' directors and officers had a conflict because each could structure the reclassification "in such a way that benefits his or her interests differently from the interests of unaffiliated shareholders."ⁿ⁷ In addition, the complaint alleged that one director was president of a company that provided heating and air conditioning services to the bank, and that another director was a principal in a law firm that represented First Niles and the bank. Lastly, allegations of the President, Chairman and CEO's "unexplained" failure to respond to a bidder's due diligence request and to inform the board of the due diligence problem, together with the bidder's stated intention to terminate the incumbent board, were sufficient for the Court to infer that the CEO had acted disloyally.ⁿ⁸

In considering the claims against the defendants who were officers of First Niles, the Delaware Supreme Court explicitly held that the fiduciary duties of officers are the same as those of directors--a rule a number of Delaware cases had assumed, but one not previously expressly embraced by the Delaware Supreme Court--and that the plaintiffs had adequately pled that First Niles officers breached their duties by "sabotaging" the due diligence process.ⁿ⁹ The court noted an important difference between the consequences of an officer's and a director's fiduciary breach: unlike directors, officers cannot be exculpated for breaches of the duty of care under DGCL § 102(b)(7).ⁿ¹⁰

The Delaware Supreme Court next held that the Chancery Court erred by dismissing the plaintiffs' disclosure claims, holding that complaint sufficiently alleged that the disclosure in the proxy statement stating that the board rejected the merger proposal only after "careful deliberations" was materially misleading because it failed also to disclose the circumstances under which one of the bidders withdrew, the insufficient deliberations by the board, and the directors' personal financial motivations in effecting the reclassification.ⁿ¹¹

Finally, the Delaware Supreme Court rejected the shareholder ratification defense accepted by the Chancery Court. The court could have done so on the limited basis that the proxy disclosure was defective, making informed ratification impossible. Instead, the court stated that the scope and effect of the common law doctrine of shareholder ratification were "unclear," and that, to "restore coherence and clarity to this area," the shareholder ratification doctrine "must be limited to its so-called 'classic' form; that is, to situations where a fully informed shareholder vote approves director action that does not legally require shareholder approval in order to become legally effective."ⁿ¹² The court went further, narrowing the scope of the doctrine by holding that "the only director action or conduct that can be ratified is that which the shareholders are specifically asked to approve," and that, with one exception (ratification of an action the directors lacked authority to make), shareholder ratification does not extinguish a challenge to director action, but rather subjects the challenged action to business judgment review.ⁿ¹³ The Delaware Supreme Court overruled *Smith v. Van Gorkom* to the extent it holds otherwise.ⁿ¹⁴

CHAPTER 12 GOVERNANCE IN THE CORPORATE CONTROL CONTEXT

1-12 Corporate Governance: Law and Practice § 12.09

AUTHOR: Meredith M. Brown William D. Regner Meredith Brown is a retired partner and William Regner is a partner in the Mergers and Acquisitions Group of Debevoise & Plimpton LLP. Portions of this Chapter 12 have been adapted from materials used by the authors and their colleagues in other publications, including the book *Takeovers: A Strategic Guide to Mergers and Acquisitions* (Brown, et al.), © Aspen Publishers 2008, and may be contained in other publications by the authors and their colleagues. The authors gratefully acknowledge the assistance of their colleague Dmitriy A. Tartakovskiy in the updating of this chapter.

§ 12.09 Responding to a Third-Party Takeover Proposal

[1] Introduction

As the foregoing review indicates, there is a wide array of standards that can be applied to reviewing the decisions of the directors of a target company in response to a takeover proposal. From a counseling point of view, however, much of the case law boils down to elaborations of the two fundamental duties applicable to corporate directors: the duty of loyalty and the duty of care. In deciding upon an appropriate response to a takeover proposal, directors should act with the best interests of the corporation and its shareholders in mind, and should act carefully and in an informed manner.

There is no cookbook recipe for what is needed to discharge these basic duties in all cases. Directors' responses must be tailored to the facts and circumstances of the particular takeover proposal. Nevertheless, some approaches are generally applicable to show that the directors of a target have acted carefully and loyally. These include:

- adequate notice and the absence of unnecessary rush;
- proper documentation;
- adequate information;
- appropriate reliance on experts; and
- minimization of conflicts of interest.

[2] Adequate Notice and the Absence of Unnecessary Rush

If practicable, directors should be informed of the nature of the proposed transaction before the meeting at which they have to consider it. The absence of such advance notice proved to be a devastating factor against the defendants in *Smith v. Van Gorkom*,ⁿ¹ a case in which the Delaware Supreme Court found that target company directors were grossly negligent in approving a proposed merger.

Courts recognize that some decisions--especially those made during a hostile tender offer--may have to be made expeditiously. As the Delaware Chancery Court has noted, "[t]he time constraints and rush of events which occur when a company is 'in play' dictate a quick response by the board of a target company."ⁿ² If, however, there is no business reason for haste, the record should show the absence of precipitate action.

After *Van Gorkom*, it has become more common for boards of directors considering a response to a takeover proposal--whether an unsolicited tender offer or a negotiated merger--to have more than one meeting before deciding on a course of action. The board may have at least one information meeting, to understand and discuss fully the proposal, the discussions with the bidder and the alternatives and a second meeting to decide finally, and take formal action on, whether to accept or reject the acquisition proposal.

[3] Proper Documentation

In *Van Gorkom*, neither the chief executive nor any other director of the target company had read the merger agreement before it was signed. This fact clearly troubled the court. More recent cases not involving mergers have underscored the importance of careful review by directors of important draft agreements.ⁿ³

If at all possible, directors should be sent drafts of the major documents in advance of the meeting at which they are asked to take action with respect to a takeover or other acquisition proposal--for example, in the case of an unsolicited takeover offer, the bid and information about the bidder; in a negotiated merger, the merger agreement. It may be helpful also to send a summary of the main documents. Often it is desirable for the target company's management or the target's advisers (the investment bankers and the lawyers) to take time at the meeting to summarize the key terms of the documents not previously reviewed by the board, including the differences from previous drafts sent to the board.

[4] Adequate Information

The target company's board should consider the "material facts that are reasonably available."ⁿ⁴ The information furnished to the directors will depend very much on the nature of the proposed transaction and the circumstances of the target company. Here are some of the elements that may be appropriate to serve as a basis for informed decision-making:ⁿ⁵

- *The transaction or proposal.* What is the offer or proposed transaction that the board is being asked to accept or reject? What are its economic terms? What are the principal conditions to the purchaser's obligations? If the transaction is subject to financing, what is the bidder's ability to obtain financing? What is the risk of non-completion--for example, for failure to satisfy the conditions in the proposal, or because of antitrust or other regulatory problems? It is also helpful for the directors to be informed of the background of the transaction--for example, who approached whom, and the course of negotiations between the parties.
- *Current information about the target company and its prospects.* If the directors have not been recently informed by management of the state of the company's business and prospects, and how the company is doing relative to its forecast, it is generally appropriate to bring the directors up to date on these matters before the directors decide whether or not to accept an acquisition proposal.
- *The fairness of the offer.* In reviewing the adequacy and fairness of the offer, it is helpful for the

board to review the historical trading prices for the company's shares. In addition, with the assistance of experts (such as investment bankers), a board might compare (a) the proposed price as a multiple of various measures (such as the target's historical or projected earnings, book value, cash flow, etc.) to (b) the corresponding multiples represented by (i) the prices of the publicly traded shares of comparable companies and (ii) prices that other acquirors have paid in comparable transactions. Another method that allows the board to assess the adequacy of the proposed price is a discounted cash flow analysis, which gives some indication (beyond the current price of the publicly traded shares) of the company's value as a stand-alone enterprise (based on various assumptions).ⁿ⁶

If the proposed transaction is a stock-for-stock merger, it is typical for the target's directors to be given information as to the bidder's business and prospects (since the transaction will involve an investment decision to replace an investment in the target company with an investment in the bidder's stock). Information could also include information as to the implied exchange ratio based on historical trading prices for both companies' stock; the pro forma effect of the transaction on book value and earnings per share; and a comparison of the percentage of stock of the combined entity to be owned by shareholders of the target company with the percentage that the target company will contribute to the combined enterprise's sales, earnings and book value.

It is relevant to analyze the shareholder profile of the combined company. Will there be one or more controlling shareholders? If so (unless the target company had a controlling shareholder before the transaction), the directors of the target company (if it is a Delaware company) may be obliged to seek the best price reasonably available. In addition, it is often helpful in a stock-for-stock merger to provide information as to how the merger achieves strategic objectives for the target company.

- *Impact on constituencies.* How will the bid affect non-shareholder constituencies of the target company--for example, employees, customers, suppliers, and the communities in which the company does business?ⁿ⁷
- *Timing.* Is now the right time for the target company to engage in a sale or a merger? Is it likely that the target company's shareholders would do better if the sale happened in the future?
- *Alternatives.* What are the alternatives to the proposed transaction? Continuing the company as a stand-alone company without major change; a restructuring or recapitalization of the target company? A transaction with another bidder? What alternative transactions has management or its representatives explored?

[5] Appropriate Reliance on Experts

Under Delaware General Corporation Law Section 141(e), and comparable provisions of other state corporation statutes, a director is protected if the director relies in good faith in the performance of his duties on information presented to the company by a person as to matters the director reasonably believes are within the person's professional or expert competence, if the person has been selected with reasonable care by or on behalf of the company.

An investment banker's opinion is not legally required. That is particularly true if there is no conflict of interest, of the sort that exists in a management leveraged buyout. Nevertheless, investment bankers can help to analyze a proposed transaction, and to assist the target's directors in evaluating the fairness of the proposed transaction (including by examining the likelihood that the company can create comparable or greater shareholder value without doing the transaction). Legal advice is also important concerning the directors' fiduciary duties in responding to an acquisition proposal, the nature of the antitrust or other regulatory issues presented by the proposal, the details of the transaction agreement, and the relevant tax considerations.

[6] Minimization of Conflicts of Interest

If directors have an interest on the other side of a proposed corporate transaction, they should disclose that interest to the other directors. If the other directors approve the transaction after such disclosure, that tends to demonstrate the fairness of the transaction.

§ 12.10 Responding to a "Going Private" Offer from a Controlling Shareholder

[1] Introduction

In a going private transaction, a large shareholder of a publicly held company proposes to take the company private by buying out the public's stockholdings. Transactions involving financial sponsors joining with management to acquire a target company are also commonly referred to as "going private" transactions--although, as discussed further below, these transactions (sometimes referred to as "management buyouts" or "MBOs") raise somewhat different issues from those arising in the classic case of an acquisition by a controlling shareholder.

Here are some of the special issues and problems that make a going private transaction different from an acquisition by an unaffiliated buyer:

- *The buyer has conflicting interests.* The large shareholder typically is represented on the board of the company (and, in the case of an MBO, some of the managers participating in the transaction are often also board members). The directors appointed by the large shareholder--and the large shareholder itself, if it is a controlling shareholder--have fiduciary obligations to the public shareholders of the company. At the same time, the buyer's financial interest is to pay as little as possible to buy out the public shareholders.
- *A higher legal standard may apply.* If the large shareholder is a controlling shareholder, the transaction may be subject to a higher legal standard under applicable state corporation law. For example, in Delaware, a going private transaction structured as a long-form merger (that is, as a transaction that must be approved by the board of directors of the target) must satisfy a test of "entire fairness," rather than the normal business judgment rule test.¹

- *The potential for litigation is greater.* Because of the conflicting interests of the buyer and the public shareholders, and the different legal test, going private transactions tend to produce litigation.
- *A special committee of outside directors should review the proposal.* To address the conflicts noted above, and to make the transaction as arm's length as possible, the company's board of directors typically appoints a special committee of outside directors to review the acquisition proposal, negotiate with the buyer and make recommendations to the full board. The special committee appoints its own financial and legal advisers, at the company's expense.
- *Enhanced disclosure requirements apply.* Going private transactions that buy out the minority's stockholdings for cash are subject to enhanced disclosure requirements under the federal securities laws.ⁿ²

Because of these special issues and problems, the directors--in particular, the disinterested directors--of the target company that receives a going private proposal need to proceed even more carefully than the directors of a target company that receives a third party acquisition proposal.

[2] The Controlling Shareholder and the Special Committee

Going private transactions are not all the same. Before starting to work on a going private transaction, those advising the board should look closely at the facts relating to each of the key players in the cast.

Start with the large shareholder. Is it a single entity, or a group of entities (such as a major shareholder and members of management) working together to take the company private? Alternatively, if the transaction is an MBO, what is the relationship between the managers and the private equity sponsor? What information has been provided to the private equity sponsor, and by whom? What agreements have been reached between the managers and the sponsor? What percentage of the company's stock is owned by the large shareholder(s) or management? Does the large shareholder already have majority control? If not, is its ownership high enough so that the public could not--without the large shareholder's approval--sell control and get a control premium? In the case of the MBO, does the private equity sponsor (or any of its affiliates) own any shares of the target company's stock? Does the buyer have sufficient shares, and are the remaining shares sufficiently widely held, such that the buyer would have a reasonable prospect of obtaining 90% of the outstanding shares in a tender offer? If the large shareholder is not yet a majority stockholder, is it subject to any standstill agreement limiting its ability to increase its holdings?ⁿ³ Does the target company have a poison pill that would restrict the ability of the large shareholder to buy additional shares of the target?

What are the buyer's objectives and business purpose in the proposed transaction? Why does it want to buy out the public at this precise moment? Are there market inefficiencies--for example, the company's public float is so small that analysts and institutional investors do not follow the company, or the company is in a sector that is out of favor--that result in the public market's not appropriately reflecting the company's value? Are these short-term factors--a hiccup or two that make now an opportunistic time to buy out the public on the cheap--or a reflection of long-term trends?ⁿ⁴ Is the large shareholder a potential seller, or only a buyer? In case of MBO, are managers free--and willing--to work with other private equity sponsors? If private equity sponsors are involved, do they have any existing portfolio companies that make them particularly logical buyers because of their industry knowledge or ability to achieve synergies? What is the appropriate process for the target company to evaluate the proposed transaction--a pre-signing market check in the form of a broad public auction or private contacts with a limited number of likely buyers, or an exclusive negotiation with the buyer followed by a post-signing market check?

Next look closely at the special committee. Are the members truly independent, or do they have some financial interest in the large shareholder or in the large shareholder's paying as little as possible for the public interest in the company?

Consulting or other financial arrangements with the controlling shareholders--including service on the boards of other companies controlled by the controlling shareholder, and even the expectation of continued service on the board of the privatized target--may be held to vitiate independence.ⁿ⁵ Apart from economic interests, do committee members have other ties with the large shareholder that might call into question the independence and disinterestedness of the members of the committee?ⁿ⁶ A special committee member's stockholdings in the company are not disqualifying, and in fact serve to align the member's interests with those of public shareholders.ⁿ⁷ Is there more than one member of the special committee? Courts may give particularly careful scrutiny to a case in which there is only one member of the committee.ⁿ⁸

A special committee should select its own financial and legal advisers--not blindly choose ones suggested by the large shareholder.ⁿ⁹ Who are the special committee's advisers, and how have they been chosen? Do the committee's advisers do any work for the large shareholder, or have any other relationships that bring into question their independence from it?

[3] The Work of the Special Committee and Its Legal Advisers

At the outset, the special committee and its legal advisers will want to be comfortable that the special committee's charter--that is, its authorization in resolutions adopted by the full Board--is sufficiently broad.

For example, is the special committee authorized only to approve or disapprove the large shareholder's initial proposal, or is it also authorized to negotiate with the large shareholder? The record is better if the special committee is authorized to negotiate. Under Delaware case law,ⁿ¹⁰ a long-form merger with a controlling shareholder must be shown to be entirely fair to the public shareholders, but the burden shifts to the plaintiff to show that the transaction was not entirely fair if the transaction is negotiated by a special committee of independent directors that has the freedom to negotiate at arm's length, and that in fact does so.ⁿ¹¹ To shift the burden, "the committee must function in a manner which indicates that the controlling shareholder did not dictate the terms of the transaction and that the committee exercised real bargaining power 'at an arms-length.'" ⁿ¹²

Is the special committee also authorized to explore alternatives? Is that realistic, given the large shareholder's stockholdings? Is the large shareholder a potential seller, or only a buyer? Often, the large shareholder will make clear in its initial proposal that it has no interest in selling its position. If so, and if the large shareholder has a controlling position, then the task of the special committee, under the Delaware case law, becomes, not to obtain a full control premium for the public shareholders, but to get the best price available from the large shareholder for a non-controlling block of stock.ⁿ¹³

The resolutions setting up the special committee should also make clear that the committee is authorized to hire its own advisers at the company's expense. Often, the resolutions will spell out the compensation to be paid to the chairman and members of the special committee,ⁿ¹⁴ and will make clear that committee members are to be indemnified by the company to the fullest extent permitted by applicable law. Appendix 16-A to this chapter contains model resolutions to establish a special committee to consider a going private proposal.

To establish that the special committee has done its work carefully, so as to shift the burden of proof to the plaintiff, it is important to make a record of the meetings of the committee, including telephonic meetings, with appropriate minutes reflecting the members' knowledge of the company's business and their careful consideration of the issues.ⁿ¹⁵

[4] The Financial Adviser's Work

[a] Selecting The Financial Adviser

As noted earlier, the special committee typically will engage a financial advisor, usually an investment bank, to help it

evaluate the large shareholder's proposal. The financial advisor's tasks would include understanding the value of the target, assisting the special committee in its negotiations with the large shareholder and, if requested, furnishing an opinion as to the fairness of the proposal from a financial point of view.

In selecting its financial adviser, the special committee should inquire into whether a potential adviser has done business for or is otherwise beholden to the large shareholder. If the financial adviser is part of a multi-function financial services organization, the special committee should consider ties and business relationships of affiliates of the financial adviser (for example, banking relations, underwritings, or other advisory relationships).¹⁶ Note that the adviser's recent material business relationships both with the company and with the large shareholder must be disclosed to the company's shareholders.¹⁷

[b] Terms of the Financial Advisor's Engagement

The terms of the financial advisor's engagement will be set out in a formal engagement letter. Each investment bank has its own form of engagement letter.

How is the financial adviser to be compensated? If the transaction were an acquisition of the company by an unaffiliated third party, you would expect to see the target company's investment banker receive most of its fee only on closing of the transaction. In a going private transaction, it might be argued that such a fee structure would tend to give the special committee's financial adviser an economic incentive to issue a favorable opinion as to the fairness of the transaction so as to make it more likely that the transaction will close (and that the advisor would receive a transaction fee).¹⁸

For this reason, it is not uncommon in a going private transaction to see most or all the financial adviser's fee (apart from an initial portion intended to compensate the adviser for the cost of the time needed to become familiar with the company's business) become payable when the financial adviser, at the special committee's request, is prepared to deliver its opinion (favorable or unfavorable) about the proposed transaction with the large shareholder. In addition, any portion of the fee payable upon closing is often due even if the transaction proceeds without the approval of the special committee.

Other aspects of the financial adviser's engagement letter also tend to look different from an engagement letter in a third party acquisition. The letter should make clear that the special committee is engaging the financial adviser and will be requesting the adviser's opinion, but that the company will be paying the adviser's fee and indemnifying it against third party claims. The letter typically will contemplate that the adviser's fairness opinion will be addressed to the special committee--but may also state that all the directors (including the conflicted directors) may rely on it.

[c] The Fairness Opinion

The financial adviser's opinion typically will be as to fairness from a financial point of view of the consideration to be received by the public shareholders.¹⁹ Each investment bank will use its own form of opinion. Depending on the facts, the financial adviser's opinion might include, in addition to the usual assumptions (such as: the projections from management have been reasonably prepared on bases reflecting management's best current estimates; the representations are true and correct; the covenants will be performed and the conditions satisfied):

- the financial adviser's understanding, based on the large shareholder's statements, that the large shareholder has no interest in any transaction that would result in the sale of its shareholdings in the company;
- the fact that the financial adviser was not requested or authorized to solicit, and did not solicit, proposals from third parties relating to the acquisition of the company; and

- the fact that the financial adviser had been informed by the large shareholder that it had no intention to pursue a sale of the company after consummating the transaction.

The special committee's financial adviser, before rendering its opinion, should undertake an appropriate "due diligence" review of the company and its prospects and review valuations of comparable public companies and comparable transactions.

[d] Board Books and Disclosure Issues

The special committee will wish to have the benefit of "board books" containing summaries of the financial adviser's analyses. The financial adviser will need to be cautious in preparing even preliminary "board books," since they may need to be filed with the SEC. Under the federal going private rule, Exchange Act Rule 13e-3, an issuer or affiliate engaging in a "Rule 13e-3 transaction" (for example, a tender offer or merger solicitation as a result of which the company's shares will no longer be listed on an exchange or quoted on NASDAQ) must file a Schedule 13E-3 statement with the SEC. The statement must specify whether the company or its affiliate has received any "report, opinion (other than an opinion of counsel) or appraisal from an outside party which is materially related to the Rule 13e-3 transaction."²⁰ The statement must also contain a summary of the report, opinion or appraisal (including the findings and the bases for and methods of arriving at the conclusions contained therein), and a copy of the report, opinion or appraisal must be filed as an exhibit to the Schedule 13E-3.²¹

What about drafts of the adviser's analyses? The company and the special committee may well take the position that a draft is not a "report or opinion" and that only the final board book--the one considered by the special committee and the board in approving the going private transaction--is covered by the rule. But the SEC staff, in its comments on the Schedule 13E-3, is likely to request all drafts of the analyses that were furnished to the special committee or the board, and may request inclusion in the text of the merger proxy statement or the tender offer of a description of any material differences between earlier drafts and the final board book.

What if the financial adviser for the special committee prepares a talking paper that is used solely in bargaining with the other side, in an effort to encourage the large shareholder to increase its bid? The special committee's counsel may take the position that talking points for bargaining are not a "report, opinion ...or appraisal" that is materially related to the transaction, but the SEC staff tends to read the disclosure requirement broadly.²²

Apart from disclosure requirements under federal securities laws, state law may impose a separate disclosure obligation, which may require detailed disclosure of the investment banker's financial analysis, even if such disclosure is not required by the line items of the relevant SEC forms. In *In re Pure Resources, Inc. S'holders Litig.*, Delaware Vice Chancellor Strine noted a historical ambivalence in Delaware law with respect to disclosure of the financial analysis of investment bankers.²³ The Vice Chancellor then stated that in his view, "this ambivalence [should] be resolved in favor of a firm statement that stockholders are entitled to a fair summary of the substantive work performed by the investment bankers upon whose advice the recommendations of their board as to how to vote on a merger or tender rely."²⁴

Vice Chancellor Strine reasoned that although the law should not encourage unnecessary prolixity, that concern does not apply to investment bankers' analyses, "which usually address the most important issue to stockholders--the sufficiency of the consideration being offered to them for their shares in a merger or a tender offer."²⁵ Moreover, in Vice Chancellor's view, "the disclosure of the banker's 'fairness opinion' alone and without more, provides stockholders with nothing other than a conclusion, qualified by a gauze of protective language designed to insulate the banker from liability."²⁶ He concluded that "[t]he real informative value of the banker's work is not in its bottom-line conclusion, but in the valuation analysis that buttresses that result."²⁷ Subsequent cases have emphasized that *Pure Resources* "establishes that stockholders of Delaware corporations 'are entitled to a fair summary of the substantive work performed by investment bankers.'"²⁸

Must the financial projections underlying the financial adviser's fairness opinion be disclosed? Several Delaware cases decided in 2007 and 2008 suggest that the answer depends on whether the projections are "material"--which requires a facts-and-circumstances analysis.

In *Netsmart Technologies, Inc. Shareholders Litig.*,ⁿ²⁹ the Delaware Chancery Court held that a merger proxy statement was materially incomplete because it failed to disclose the projections used by the target's financial adviser to perform the discounted cash flow valuation supporting its fairness opinion. Although Netsmart's proxy statement contained two sets of management projections, neither was identical to the final projections used by the financial adviser in preparing its fairness opinion. In particular, the projections used by the financial adviser included projections for 2010 and 2011, while the disclosed projections ended at 2009.

The *Netsmart* defendants argued that the undisclosed projections were not material because, among other things, they were not provided to any of the bidders, and the omitted 2010 and 2011 estimates were too distant--and therefore too speculative--to require disclosure. The court disagreed, pointing out that the fact that the 2010 and 2011 projections were not provided to bidders did not undercut the materiality of those forecasts to Netsmart's stockholders. Unlike the bidders, the Netsmart stockholders had been presented with the fairness opinion and were being asked to make an important voting decision to which the company's prospects were directly relevant. Moreover, although the proxy statement clearly stated that the discounted cash flow analysis performed by the financial adviser covered the period from January 1, 2007 to December 31, 2011 and that approximately 82 percent to 86 percent of the present value of Netsmart's enterprise value was attributable to the terminal value calculated from the 2011 projected EBITDA, nowhere in the proxy was there any financial information covering that "critical, terminal year (or the prior year for that matter)."n30

According to the court, when a financial adviser's endorsement of the fairness of a proposed transaction is touted to stockholders, the valuation methods used by the financial adviser to arrive at its fairness opinion as well as the "key inputs and range of ultimate values generated by those analyses must also be fairly disclosed."n31 Providing only a portion of that information is insufficient to fulfill the duty of providing a "'fair summary of the substantive work performed by the investment bankers upon whose advice the recommendations of the ... board as to how to vote ... rely.'"n32

In contrast, in *In re CheckFree Corp. S'holders Litig.*,ⁿ³³ the Delaware Chancery Court declined to enjoin a stockholder vote on a merger where the target's proxy statement failed to disclose management's financial projections used by the target's financial adviser in analyzing the fairness of the merger price. In *CheckFree*, the court found that the proxy statement detailed the various sources upon which the financial adviser relied, explained some of the assumptions and calculations on which management's estimates were based and described management's estimates of the target company's earnings and EBITDA for the current year and two subsequent years. In addition, the proxy statement explained that, in conveying its estimates to the financial adviser, management had discussed with the bankers the particular risks it foresaw that might undercut those estimates. Accordingly, the court concluded that the proxy statement contained an "adequate and fair summary" of the work performed by the financial adviser and noted that the plaintiffs had to explain "why receiving information in addition to the basic financial data already disclosed [would] significantly alter the total mix of information available."n34

Moreover, the court concluded that this analysis was not altered by *Netsmart*. In *Netsmart*, the proxy statement "affirmatively disclosed an early version of some of management's projections."n35 Because management must give materially complete information "[o]nce a board broaches a topic in its disclosures," the *Netsmart* court held that additional disclosure was required.n36 In contrast, CheckFree's proxy statement never purported to disclose management's projections.

Similarly, in *Globis Partners, L.P. v. Plumtree Software, Inc.*,ⁿ³⁷ the Delaware Chancery Court dismissed the plaintiff's

claim that Plumtree's merger proxy statement was false and misleading because, among other things, it failed to provide projections of the target's future performance and product pipeline. The court explained that the omitted information was not material merely because it might be helpful and that disclosure that does not include all financial information necessary to make an independent determination of fair value is not per se misleading or materially incomplete. The fact that the target's financial advisers may have considered certain non-disclosed information does not change this analysis. The court concluded that, given the extensive disclosure of the key terms, purposes and anticipated effects of the proposed merger, none of the omitted information could have been viewed by a reasonable stockholder as significantly altering the total mix of available information.ⁿ³⁸

The court further noted that unreliable projections may in fact be misleading. In explaining why the financial adviser determined that a discounted cash flow analysis would be inappropriate for its valuation, Plumtree stated that its intermediate and long-term visibility was very limited. The court pointed out that the plaintiff did not allege that Plumtree in fact had reliable projections or any other facts that reasonably would have called into question the veracity of that disclosure.ⁿ³⁹

The Delaware Chancery Court recently expanded on the *CheckFree* and *Globis Partners* line of cases in *Simonetti Rollover IRA v. Margolis*.ⁿ⁴⁰ In this case, a shareholder of The TriZetto Group, Inc. sought a preliminary injunction to prevent a proposed merger between TriZetto and Apax Partners, L.P. The plaintiff alleged, among other things, that TriZetto's merger proxy statement failed to disclose that the financial projections used by the target's investment banker in preparing its fairness opinion were the most conservative of three sets of projections prepared by TriZetto's management.

The court noted that a proxy statement should give the shareholders the "best estimate" of the company's future cash flows as of the time the board approved the transaction.ⁿ⁴¹ In this connection, Delaware law "places a premium on management's predictions of future performance."ⁿ⁴² The court found that the record indicated that the projections used by the investment banker reflected management's best estimates at the time. Therefore, the court concluded that, although including the more optimistic projections in the proxy statement and then explaining why they were not relied upon may have been somewhat helpful to shareholders, such additional disclosures would not have materially altered the total mix of information provided.ⁿ⁴³

Target companies should keep in mind that, even if a particular presentation or other analysis is not required to be filed with the SEC, it will almost certainly have to be provided to plaintiff's counsel if there is litigation challenging the transaction. Both the special committee and the financial adviser (and their respective counsel) should take care to make sure that these documents do not have inconsistencies that cannot be explained.

[5] Going Private Transactions Involving Financial Sponsors

Although MBOs are not generally subject to a test of entire fairness, they do involve a higher litigation risk--and greater disclosure obligations--than other acquisition transactions because of the target company management's conflict of interests. As a result, the special committee structure used for going private transactions involving controlling shareholders is frequently used in MBOs as well. MBO transactions involving financial sponsors also raise the following particular issues:

- *Group status.* Management members joining to pursue an MBO--with or without a financial sponsor--may inadvertently form a group having separate legal status under state anti-takeover laws (*e.g.*, Section 203 of the Delaware corporation statute), poison pills and change of control provisions in the target company's debt documents, employment agreements, benefit plans, joint venture and other agreements. Formation of a group can also trigger disclosure obligations under Section 13(d) of the Exchange Act.--It may be possible to deal with this issue by expressly providing, in any arrangements among a buying group, that all agreements or understandings among the parties are subject to special

committee approval, although particular care needs to be taken here given the potentially dire consequences--particularly under a poison pill and state anti-takeover laws--of the premature formation of a group.

- *Process.* Private equity sponsors generally have a strong preference to negotiate an MBO through an exclusive, non-public process, rather than a pre-signing auction process, whether public or private. As discussed further below, whether to go along with this approach will be one of the earliest--and potentially among the most important--decisions that the special committee will have to make in responding to a going-private proposal.

- *Role of management.* The special committee will often want to ensure that the target company's management does not reach agreement with any particular financial sponsor as to the terms of management's post-transaction employment and equity participation arrangements, in order to ensure that other financial sponsors can compete on an equal footing. Particularly if there is no pre-signing market check, these restrictions should survive the signing in order to maximize the ability of competing sponsors to make bids between signing and closing.

- *Financing.* MBOs typically require debt financing, and the extent to which obtaining financing is a condition to the buyers' obligation to close is often a topic of intense negotiation. Prior to the credit crisis that began in the summer of 2007, the trend that developed in large going private transactions involving financial sponsors was not to condition the transaction on obtaining financing, but instead to have a reverse termination fee payable by the buyers if financing cannot be obtained--thereby limiting the buyers' potential exposure for failing to close.⁴⁴ Whether or not a transaction is subject to a financing condition, the special committee and its advisers will want to review carefully the buying group's financing commitments to ensure that they are not substantially more conditional than the merger agreement itself.

[6] Structuring The Transaction

Structuring a going private transaction raises a number of basic issues. These include:

- Should the transaction be structured as one-step merger or a two-step transaction with a tender offer followed by a merger?
- Should the transaction be conditioned on the support of a majority-of-the-minority?
- What if no agreement can be reached between the special committee and the controlling shareholder?
- How will the transaction be financed?
- The need for expanded SEC disclosure.
- The increased likelihood of shareholder litigation.
- The need to be especially mindful of the process.

[a] One-Step vs. Two-Step

Should the transaction take the form of a one-step merger, or be effected pursuant to a merger agreement that

contemplates a tender offer as its first step? The company's shareholders will usually get their money sooner in a tender offer than in a merger, because there is no need for prior SEC review before launching a tender offer, as there is before a merger proxy statement can be mailed. Moreover, if enough stock is tendered in the tender offer, the merger typically could be effected on a short-form basis, with the approval of controlling shareholder's directors only, and without the need for a meeting of the company's shareholders or the solicitation of proxies.

From the point of view of the buyer, there are other reasons to prefer a first-step tender offer. The company's shareholders will not have any appraisal rights with respect to shares that they tender (although they would have appraisal rights with respect to the second-step cash-out merger). Moreover, as noted above, while under the Delaware case law a controlling shareholder must offer a fair price in a merger,ⁿ⁴⁵ a controlling shareholder does not, subject to the principles discussed above, have a fiduciary duty to offer a fair price in a non-coercive tender offer, since that is viewed as a transaction with shareholders rather than with the corporation, and the transaction is not subject to the test of "entire fairness." In a tender offer, the controlling shareholder does, however, have a duty under the Delaware case law to disclose all material information.

Despite these considerations, many negotiated transactions are structured as one-step mergers rather than as tender offers followed by a back-end merger. Assuming that the large shareholder owns a majority of the target company, there is no chance of a topping bid and hence, from the large shareholder's perspective, little benefit to the shortened time period in which the first-step tender offer can be closed. It is also usually substantially easier to finance a one-step transaction, as it facilitates the granting of security interests at closing and avoids margin loan concerns.ⁿ⁴⁶

[b] Majority-of-the-Minority Condition

Should the merger be conditioned on approval by holders of a majority of the company's publicly held shares (or if there is a first-step tender offer, should it be conditioned on tender of a majority of the publicly held shares)?

As discussed above, under the Delaware case law, if there is adequate disclosure to the public shareholders, conditioning a merger on approval by a majority of the publicly held shares will shift to the plaintiff the burden of showing that the transaction is not entirely fair. In a tender offer context, making the tender offer subject to a non-waivable majority-of-the-minority tender condition will help the controlling shareholder show that the offer is non-coercive and, therefore, is not subject to the entire fairness test, although in either case care must be taken to be sure that the publicly held shares are defined so as to exclude holders who have an economic interest (other than as target shareholders) in effecting the transaction (for example, directors or officers of the controlling shareholder, or target employees with severance agreements).ⁿ⁴⁷

On the other hand, particularly if the public float is small, conditioning the deal on approval by a majority of the public float may invite gamesmanship by hedge funds and other arbitrageurs. Moreover, if the transaction is a merger rather than a tender offer, the controlling shareholder may see little incremental benefit from such a minimum condition because, if the special committee is appropriately constituted and does its job correctly, that in itself should shift to the plaintiff the burden of showing that there was something not entirely fair about the transaction.ⁿ⁴⁸

[c] Failure to Reach an Agreement

One of the primary functions of the special committee is to negotiate with the buyer. Typically, the process will commence with an offer by the large shareholder made in writing to the target company's board, or by a request by the large shareholder that the board form a special committee for the purpose of receiving and evaluating an offer to be made formally once the special committee is established.

Once the board or the special committee receives a going-private proposal, an early decision will be whether to make the offer public--assuming that the large shareholder has not itself already made a public announcement. In some cases,

either the large shareholder or the special committee will publicly announce the proposal and the fact that the special committee has been formed, for various reasons, including to avoid the possibility of leaks or selective disclosure. In addition, special committees often find that the reaction of the target company's stockholders and the analyst community can be useful data points in negotiating with the large shareholder.ⁿ⁴⁹

Recently, however, it has become increasingly common, particularly in transactions involving private equity sponsors, for the parties to keep the negotiations confidential until the terms of the transaction have been agreed upon and a merger agreement signed. The Delaware Supreme Court has made clear that there is "no single blueprint" for seeking the best value in a change of control.ⁿ⁵⁰ An auction is one way; signing up with one bidder and having a post-signing canvassing of the market is another. Whatever method is used, however, it must be "designed to determine the existence and viability of possible alternatives."ⁿ⁵¹ The courts have blessed a variety of approaches.ⁿ⁵²

If the special committee determines not to pursue a pre-signing market check, it should be prepared to explain its reasoning, including as to potential risks to the business from following a different process, its views as to the quality of the proposal on the table, and its efforts and ability to inform itself about alternatives. A recent trend has been for financial sponsors to negotiate going private deals on a confidential, exclusive basis, but subject them to a "go shop" provision that allows the target company, for a limited period post-signing, actively to solicit competing bids.ⁿ⁵³ Often, the break-up fee payable by the target company if it terminates the merger agreement to accept a topping bid is lower if the topping bid is made by a party that emerges during the "go shop" period.ⁿ⁵⁴

In terms of the negotiations themselves, the buyer's initial proposal will in most cases not represent its best price. Rather, the buyer will often start with a reasonable offer (typically at a substantial premium over the pre-announcement market price) and negotiate upwards. Such a negotiation may help to demonstrate that the special committee has effectively represented the interests of the public shareholders, and that therefore the burden in shareholder litigation challenging the transaction should be on the plaintiff to show that the transaction is not entirely fair.ⁿ⁵⁵

What if the buyer is not willing to increase its bid price to a level the special committee is willing to recommend? In this case, the buyer will typically have the option of taking its offer directly to the target company's shareholders, by a tender offer, without having a merger agreement that must be approved by the target's directors--although in some cases the buyer may be constrained from proceeding with a tender offer by the terms of a standstill agreement or by the existence of a poison pill rights plan preventing bidders from acquiring more than a specified threshold amount of the target's stock.ⁿ⁵⁶ Financial sponsors may also be limited by their agreements with investors in their funds, which often preclude the funds from participating in hostile bids. Even where such constraints do not exist, taking the offer directly to the target company's shareholders can be an uphill slog, as the special committee will control the target company's response to the tender offer and can be expected not only to recommend that the shareholders reject it but also put forth their analysis as to why the price being offered is inadequate. If, however, a controlling shareholder is heavy-handed about threatening the special committee that it will proceed with a tender offer at a lower price unless the special committee recommends the controlling shareholder's proposed merger, that kind of hardball tactic may result in the controlling shareholder's having the burden of proving the entire fairness of the transaction notwithstanding special committee approval.ⁿ⁵⁷

If the controlling shareholder does decide to go directly to the public by means of a tender offer--either because the controlling shareholder has been unable to reach agreement with the special committee or because there was no special committee process--it will often include a majority of the minority condition, in an attempt to get the benefit under Delaware law of having the tender offer not be subject to the entire fairness standard of review. The controlling shareholder might also condition the tender offer on obtaining sufficient shares that it can effect a short-form merger, thus avoiding the entire fairness test altogether.

Absent a standstill agreement or a poison pill rights plan preventing the large shareholder from proceeding with a tender offer, usually the only leverage available to the special committee to deter the controlling shareholder from going

directly to shareholders without special committee approval is the special committee's power to bestow or withhold its blessing of the transaction--or, in the words of the Delaware Chancery Court, "the power to say no."⁵⁸

If the special committee approves a transaction with the controlling shareholder after careful consideration, that will make the transaction harder for plaintiffs to attack in the courts. Conversely, if the controlling shareholder goes ahead with a tender offer at a price the special committee was unable to recommend, the shareholders will need to be informed of the special committee's position, and that position will make it harder for the controlling shareholder to obtain tenders from holders of a majority of the shares held by the public (if the tender offer is subject to a majority of the minority condition) or sufficient shares to effect a short-form merger. Moreover, if the controlling shareholder fails to obtain enough tenders for a short-form merger, the absence of the special committee's approval will also make it much more difficult for the controlling shareholder to demonstrate the fairness of the transaction in an ultimate cash-out merger.

[7] Financing the Deal

How is the transaction (and any related required debt refinancing) to be financed? If the real credit is not an equity infusion from the large shareholder, but the credit of the company itself, and if the transaction will leave the company highly leveraged or arguably with impaired capital or without the ability to pay its debts as they become due, it may be necessary to analyze whether the transaction could be viewed as an improper dividend to the company's shareholders under state dividend statutes--which typically would involve personal liability of directors to the company's creditors⁵⁹--or a fraudulent conveyance.

[8] Disclosure Issues

There is nothing private about going private; it is a transaction that happens in a goldfish bowl. Schedule 13E-3 and Regulation M-A, which contain the SEC's disclosure requirements for a going private transaction, call for much more disclosure than would be required for a tender offer or merger with an unaffiliated third party.

For example, in a going private transaction, disclosure must be made as to:

- all expenses incurred in connection with the transaction;
- the purpose of the transaction;
- what alternatives were considered and why they were rejected;
- the reasons for the structure of the transaction;
- why the transaction is being undertaken at this time;
- why the company or affiliate believes the transaction is fair;
- firm offers made by any third party for the company during the past 18 months;
- whether the transaction is structured so that approval of at least a majority of the public shares is required;
- any reports, opinions or appraisals relating to the consideration to be received or the fairness of that consideration (similar information is called for in third party merger proxy statements); and
- extensive financial information (including two years of audited financial statements and the most

recent quarterly interim financial statements of the company, and the pro forma effect of the transaction on the company).

Moreover, going private disclosure documents often attract SEC scrutiny. While all merger proxy statements are subject to review and comment by the SEC staff, the odds of being reviewed are higher, and the extent of the review greater, in a going private transaction than in an ordinary takeover.

As noted above, because of the target company management's conflict of interests, MBOs also involve greater disclosure obligations under state corporate law than other acquisition transactions. For example, in *In re Netsmart Technologies, Inc. S'holders Litig.*,ⁿ⁶⁰ *In re Topps Co. S'holders Litig.*,ⁿ⁶¹ and *In re Lear Corp. S'holder Litig.*,ⁿ⁶² the Delaware Chancery Court declined to enjoin the transactions on the basis of *Revlon* claims, but it did require corrective disclosure about the sale processes and management conflicts.

[9] Going Private Litigation

In light of the conflicting interests between the controlling shareholder and the public stockholders, it is not surprising that shareholder litigation is common in going private transactions. Shareholders may allege that the controlling shareholder has breached a fiduciary duty (if the transaction is a long-form merger)ⁿ⁶³ or has made inadequate disclosure.ⁿ⁶⁴ In the case of a merger, shareholders may also seek an appraisal of their shares.ⁿ⁶⁵ In *Gilliland v. Motorola*, the Delaware Chancery Court noted the general principle that, in a short-form merger, the "majority stockholder ... must disclose all information materially related to the decision whether to accept the consideration offered or seek appraisal."ⁿ⁶⁶ The Court stressed that "the fiduciary duty of disclosure requires that a notice of short-form merger either be accompanied by detailed disclosures or disclose summary financial information and adequately advise stockholders where and how to obtain more detailed information."ⁿ⁶⁷

Claims of breach of fiduciary duty are often made soon after a going private proposal is announced--even before the special committee has had a chance to retain advisers and decide whether to recommend the buyer's proposal.ⁿ⁶⁸ Plaintiff's counsel often will not seek expedited discovery or a preliminary injunction against the transaction while the special committee and the buyer are negotiating. If and when the buyer and the special committee agree on the terms of the transaction, the buyer may simultaneously enter into a memorandum of understanding with plaintiff's lawyers for the settlement of the shareholder litigation, subject to certain conditions, including confirmatory discovery as to the fairness of the transaction.ⁿ⁶⁹

[10] Minding the Process

To complete a going private transaction successfully requires continuous sensitivity to the conflicts inherent in the transaction. The better the process, the less likely a court will be to set aside the conclusions of the special committee and the company's full board as to the fairness of the transaction. Aspects of good process include:

- an independent and hard-working special committee, with a sufficiently broad authorization;
- knowledgeable and diligent legal and financial advisers to the special committee;
- at least if the transaction is a merger rather than a tender offer, a price that is demonstrably fair;
- if the transaction is a tender offer, a non-waivable majority-of-the-minority tender condition and a promise to effect a short-form merger at the same price if 90 percent or more of the shares are tendered;
- arm's length negotiations not involving retributive threats;

- a detailed and accurate record;ⁿ⁷⁰ and
- careful preparation of the disclosure documents.

FOOTNOTES:

(n1)Footnote 1. *See* § 12.07[2] above.

(n2)Footnote 2. *See, e.g.*, 17 CFR §§ 229, 1013, 1014, 240.13e-3, 13e-4(e)(2).

(n3)Footnote 3. There are decisions involving going private transactions in which courts have found, on the facts and circumstances, that a large shareholder with less than 50 percent was a controlling person, owing a duty of fairness to the public shareholders. *See, e.g., Kahn v. Lynch Communication Sys., Inc.*, 638 A.2d 1110, 1112 (Del. 1994) (43.3 percent shareholder designated five of 11 directors, opposed alternative transactions, and had a veto on alternative transactions because of a supermajority voting requirement in the company's charter); *In re Cysive, Inc.*, 836 A.2d 531 (Del. Ch. 2003) (Vice Chancellor Strine held that 40 percent ownership by CEO and CFO and family members should be deemed to be a controlling block so as to make the entire fairness test applicable; the analysis must take into account "whether the stockholder, as a practical matter, possesses a combination of stock voting power and managerial authority that enables him to control the corporation"); *Mendel v. Carroll*, 651 A.2d 297, 304 (Del. Ch. 1994) (family group that at all relevant times owned between 48 percent and 52 percent of a company's stock had the effective power to control the outcome of any stockholder election). On the other hand, in *In re Western Nat'l Corp. S'holders Litig.*, C.A. 15927, 2000 Del. Ch. LEXIS 82, at *26 (Del. Ch. May 22, 2000), the Chancery Court held that the ordinary business judgment rule, not the entire fairness standard, applied to a transaction with a 46 percent shareholder who was not represented on the target company's board of directors.

(n4)Footnote 4. In *In re Emerging Communications S'holder Litig.*, C.A. 16415, 2004 Del. Ch. LEXIS 70 (Del. Ch. May 3, 2004), the Delaware Chancery Court held that the fact that a going private transaction was "timed in a manner that is financially disadvantageous to the [public] stockholders and that enable[d] the majority stockholder to gain correspondingly" was evidence of the absence of fair dealing that supported an award of damages against the controlling shareholder for breach of fiduciary duty.

(n5)Footnote 5. *CompuCom*, 2005 Del. Ch. LEXIS 145, at *28.

(n6)Footnote 6. *See, e.g., In re Oracle Corp. Derivative Litig.*, 824 A.2d 917 (Del. Ch. 2003) (denying a motion to dismiss derivative action based on the recommendation of a special litigation committee because of question as to non-economic ties between members of the committee and defendants in the derivative action).

(n7)Footnote 7. *Cf. In re Tele-Comms., Inc. S'holders Litig.*, (Del. Ch. Dec. 21, 2005) (questioning suitability of a member of a special committee that represented the interests of holders of one class of stock, where that member primarily held another class of stock receiving a premium to the class whose holders were represented by the special committee).

(n8)Footnote 8. *See, e.g., Gesoff v. IIC Industries Inc.*, 902 A.2d 1130 (Del. Ch. 2006); *Kahn v. Dairy Mart Convenience Stores, Inc.*, C.A. 12489, 1996 Del. Ch. LEXIS 38 (Del. Ch. Mar. 29, 1996). In *In re Loral Space and Communications Inc.*, C.A. Nos. 2808-VCS, 3022-VCS, 2008 BL 222903, 2008 Del. Ch. LEXIS 136 (Del. Ch. Sept. 19, 2008), the Delaware Court of Chancery held that Loral's \$300 million securities purchase agreement with its largest shareholder, MHR Fund Management LLC, failed the entire fairness test because, among other things, the composition of the special committee was flawed. The special committee was composed of only two members, one of which had a

close relationship with MHR's principal who also served as Loral's chairman of the board. Moreover, neither committee member had any experience in the satellite industry. As a result, the special committee "immediately allowed itself to go down the most dangerous path for anyone dealing with a controlling shareholder--that of believing that its only option was to deal with the controller." *Loral Space, 2008 Del. Ch. LEXIS 136, at *29*. In particular, the special committee failed to conduct a market check or to contact other potential financing sources, one of which apparently had offered the same \$300 million investment on better economic terms. The court also found that Loral chose not to search for a buyer for the whole company because the company was controlled by MHR and its special committee and advisers were "passive." *Id. at *99*.

(n9)Footnote 9. *See, e.g., Kahn v. Tremont Corp., 694 A.2d 422, 426 (Del. 1997)* (in concluding that the defendants should still bear the burden of proof despite the use of a special committee, the court noted that the committee member with the closest ties to the controlling shareholder chose the advisers, and the company's general counsel, who was also general counsel for the affiliated company, suggested the committee's law firm); *In re Tele-Comms., Inc. S'holders Litig., (Del. Ch. Dec. 21, 2005)* (use of company's existing legal and financial advisers "raises questions regarding the quality and independence of the counsel and advice received"); *In re LNR Property Corp. S'holders Litig., 896 A.2d 169 (Del. Ch. 2005)* (special committee had its own counsel but used company's financial adviser); *Gesoff v. IIC Industries Inc., 902 A.2d 1130, 1138 (Del. Ch. 2006)* (committee had "no real authority" to choose its own lawyer or financial adviser); *Kahn v. Dairy Mart Convenience Stores, Inc., CA 12489, 1996 Del. Ch. LEXIS 38 (Del. Ch. Mar. 29, 1996)* (not helpful that the committee's investment banker was recommended by the controlling stockholder's counsel).

(n10)Footnote 10. As discussed in 12.07[2] above.

(n11)Footnote 11. *See, e.g., Kahn v. Lynch Communication Sys., 638 A.2d 1110, 1117 (Del. 1994)*; *see also Emerald Partners v. Berlin, 726 A.2d 1215, 1223-24 (Del. 1999)*.

(n12)Footnote 12. *Kahn v. Tremont, 694 A.2d at 429*.

(n13)Footnote 13. *See Mendel v. Carroll, 651 A.2d 297, 304-06 (Del. Ch. 1994)*; *Weinberger v. UOP, Inc., 457 A.2d 701, 713 (Del. 1983)*.

(n14)Footnote 14. *See, e.g., In re Tele-Comms., Inc. S'holders Litig., (Del. Ch. Dec. 21, 2005)* (failure to specify compensation of special committee members at the outset, together with \$1 million payments to those members following approval of the transaction, raised questions as to independence of committee members).

(n15)Footnote 15. *See, e.g., Kahn v. Tremont Corp., 694 A.2d 422, 429-30 (Del. 1997)* (Delaware Supreme Court noted lack of attendance and diligence by some committee members as part of the basis for its conclusion that the defendants retained the burden of showing the entire fairness of the transaction, despite the use of a special committee).

(n16)Footnote 16. An especial area of concern arises in transactions where a financial adviser furnishes a fairness opinion to a target while also providing so-called "stapled financing" to the bidder. In *Toys "R" Us, Inc. S'holder Litig., 877 A.2d 975, 1006 & n.46 (Del. Ch. 2005)*, the Delaware Chancery Court noted that playing such a dual role creates "the appearance of impropriety." Investment banks have developed a number of policies to address potential conflicts of interest, including declining to offer stapled financing when representing a special committee evaluating an MBO.

(n17)Footnote 17. *See* Schedule 13E-3 Item 9 and Regulation M-A Item 1015(b)(4) (requiring a description of any material relationship between the financial adviser and the issuer or their respective affiliates during the past two years or which is mutually understood to be contemplated, and of any compensation received or to be received as a result of such relationship).

(n18)Footnote 18. *See, e.g., In re Tele-Comms., Inc. S'holders Litig., (Del. Ch. Dec. 21, 2005)* (large contingency fee created serious issue of material fact as to whether financial adviser and its counsel could provide independent

advice to special committee).

(n19)Footnote 19. In *Levco Alternative Fund Ltd. v. Reader's Digest Ass'n*, 803 A.2d 428 (Del. 2002) , the Delaware Supreme Court indicated that in a transaction where the public shareholders receive different consideration from the consideration the large shareholder receives, the financial adviser's opinion should address fairness with respect to the public shareholders (rather than just with respect to the company). See also *In re Tele-Comms., Inc. S'holders Litig.*, (Del. Ch. Dec. 21, 2005) (financial adviser issued separate opinions as to each of company's two classes of stock, without express discussion of whether the relative impact of a premium paid to one class of stock was fair to holders of the other class of stock).

(n20)Footnote 20. Schedule 13E-3 Item 9; Regulation M-A Item 1015(a).

(n21)Footnote 21. See Schedule 13E-3 Items 9 and 16; Regulation M-A Items 1015(b)(6) and 1016(c).

(n22)Footnote 22. For example, the SEC staff has explained that if investment bankers made oral presentations to directors, the oral presentation should be summarized in detail in the disclosure document provided to target shareholders, and any documents, talking papers or background materials presented to the board must be filed as exhibits to the Schedule 13E-3 and summarized in the disclosure document. See SEC, Division of Corporation Finance, *Compliance and Disclosure Interpretations*, "Going Private Transactions, Exchange Act Rule 13e-3 and Schedule 13E-3," Question 117.06 (Jan. 26, 2009); *Ephraim, Charles L.*, SEC No-Action Letter, Applicability of Item 9 of Schedule 13E-3 to Certain Reports, 1987 SEC No-Act., LEXIS 2687 (Sept. 30, 1987).

(n36)Footnote 36. *CheckFree*, 2007 WL 3262188, at *3 (quoting *Netsmart*, 924 A.2d at 203).

(n37)Footnote 37. C.A. No. 1577-VCP, 2007 WL 4292024 (Del. Ch. Nov. 30, 2007).

(n38)Footnote 38. *Globis*, 2007 WL 4292024, at *12.

(n39)Footnote 39. 2007 WL 4292024, at *13 (citing *In re JCC Holding Co. S'holder Litig.*, 843 A.2d 713, 718 (Del. Ch. 2003) (finding no disclosure violation where the corporation "did not have reliable recent long-term projections from which [the bank] could perform a [discounted cash flow] valuation analysis")). In *In re BEA Systems, Inc. S'holder Litig., Cons.* C.A. No. 3298-VCL (Del. Ch. Mar. 26, 2008) (Lamb V.C., oral op.), Vice Chancellor Lamb held that Delaware law does not require disclosure documents to explain why the financial adviser did not perform and include in its final valuation materials a particular valuation analysis, such as a discounted cash flow analysis, so long as the disclosure document accurately describes the financial analyses relied upon by the financial adviser.

(n40)Footnote 40. *Simonetti Rollover IRA v. Margolis*, C.A. No. 3694-VCN, 2008 Del. Ch. LEXIS 78 (Del. Ch. June 27, 2008) .

(n41)Footnote 41. 2008 Del. Ch. LEXIS 78, at *30 (quoting *Netsmart*, 924 A.2d at 203).

(n42)Footnote 42. 2008 Del. Ch. LEXIS 78, at *30 .

(n43)Footnote 43. 2008 Del. Ch. LEXIS, at *32-33. See also *Wayne County Employees' Retirement Sys. v. Corti*, 954 A.2d 319 (Del. Ch. 2008) (the fact that certain projections were reviewed by a target's board does not in and of itself make those projections material in the absence of evidence that the board relied on them).

(n44)Footnote 44. Traditional financing conditions continue to be common in smaller or middle market transactions.

(n45)Footnote 45. See *Weinberger v. UOP, Inc.*, 457 A.2d 701, 703-08 (Del. 1983) .

(n46)Footnote 46. Two-step transactions formerly raised difficult issues under the "best price" requirements of Exchange Act Rule 14d-10, which generally requires that the consideration paid to any security holder pursuant to a tender offer be equal to the highest consideration paid to any other security holder during that tender offer. Tender offers often were not used in going private transactions because of concerns about Rule 14d-10 claims where, for example, the transaction involved a management rollover of equity into a new vehicle formed to take the target company private, or where in connection with the transaction severance or other benefits were granted to the target company's managers who were also stockholders. However, the SEC amended Rule 14d-10 in 2006 to add, among other things, a specific exemption for consideration paid pursuant to employment compensation, severance or other employee benefit arrangements. The SEC also added a safe harbor protecting compensatory arrangements approved by an independent compensation committee or comparable body.

(n47)Footnote 47. See *In re Pure Resources S'holders Litig.*, 808 A.2d 421, 445-446 (Del. Ch. 2002) .

(n48)Footnote 48. Delaware Vice Chancellor Leo Strine has observed that "the absence of any additional standard of review-affecting benefit for a Minority Approval Condition, has made the use of that independent, and functionally distinct, mechanism less prevalent" and that accepting this condition adds "an element of transactional risk without much liability-insulating compensation in exchange." *In re Cox Communs., Inc. S'holders Litig.*, 879 A.2d 604 (Del. Ch. 2005) .

(n49)Footnote 49. On the other hand, it is possible for the market to misjudge the dynamics of the situation and for the price of the target company's stock to trade above the price that the large shareholder is willing to pay and that the special committee would otherwise be willing to accept, which can make it harder for the parties to come to an

agreement.

(n50)Footnote 50. *Paramount*, 637 A.2d at 44. See also *In re The MONY Group Inc. S'holder Litig.*, 852 A.2d 9, 19 (Del. Ch. 2004) (noting that Revlon "does not demand that every change in control of a Delaware corporation be preceded by a heated bidding contest," but rather that the "directors must act in accordance with their fundamental duties of care and loyalty" (quoting *Barkan v. Amsted Indus., Inc.*, 567 A.2d 1279, 1286 (Del. 1989))).

(n64)Footnote 64. See *Joseph*, 482 A.2d at 339 (enjoining tender offer because controlling shareholder had not made full disclosure of all relevant information). See also *In re Pure Resources S'holders Litig.*, 808 A.2d 421 (Del. Ch. 2002) (enjoining a tender offer because disclosure documents provided to minority shareholders failed to make materially complete and accurate disclosure). Cf. *In re Siliconix Inc. S'holders Litig.*, CA 18700, 2001 Del. Ch. LEXIS 83 (June 19, 2001) (declining to enjoin tender offer because there were no disclosure violations and tender offer was not coercive).

(n65)Footnote 65. See, e.g., Del. Gen. Corp. L. § 262 (appraisal rights).

(n66)Footnote 66. *Gilliland v. Motorola*, 859 A.2d 80, 87 (Del. Ch. 2004) , citing *Zirn v. VLI Corp.*, 681 A.2d 1050 (Del. 1996) .

(n67)Footnote 67. *Gilliland*, 859 A.2d at 81 .

(n68)Footnote 68. Delaware Vice Chancellor Strine has criticized this practice, observing that "complaints attacking negotiable proposals are not meritorious and do not give rise to a presumptive claim to a fee". See *In re Cox Communs., Inc. S'holders Litig.*, (June 6, 2005), 879 A.2d 604 .

(n69)Footnote 69. In *In re SS&C Techs. S'holders Litig.*, 911 A.2d 816 (Del. Ch. 2006) , the Delaware Court of Chancery declined to approve a proposed settlement of a stockholder class action challenging an MBO because, among other things, the settlement agreement was brought before the court nearly ten months after the transaction closed. The court pointed out that it is "imperative to present settlements for approval before the terms of the settlement are performed" and explained that where a settlement of a lawsuit challenging a pending transaction is reached before the transaction is completed and involves a change in transaction terms, court approval of the settlement should, where possible, occur before the transaction closes. *SS&C Techs.*, 911 A.2d at 817. Where circumstances warrant closing the transaction prior to obtaining court approval of the settlement, at a minimum, leave of court should be obtained for presenting the settlement for approval after closing, and the settlement should be presented to the court promptly after the transaction is consummated. The court concluded that, as a result of the earlier performance of the settlement "consideration" (which consisted entirely of the publication of supplemental disclosure) followed by the closing of the transaction, the court's review of the settlement terms was "substantially emptied of meaning or purpose." *SS&C Techs.*, 911 A.2d at 817. The court noted that "there is simply little to commend the process of weighing the merits of a 'settlement' of litigation where the only continuing interest is that of the plaintiffs' counsel in recovering a fee." *SS&C Techs.*, 911 A.2d at 818.

(n70)Footnote 70. In *In re Netsmart Technologies, Inc. S'holders Litig.*, 924 A.2d 171, 191 (Del. Ch. 2007) , Vice Chancellor Strine observed that the "tardy, omnibus consideration of meeting minutes is, to state the obvious, not confidence-inspiring," particularly when coupled with the absence of minutes for at least one meeting.

CHAPTER 12 GOVERNANCE IN THE CORPORATE CONTROL CONTEXT

1-12 Corporate Governance: Law and Practice § 12.11

AUTHOR: Meredith M. Brown William D. Regner Meredith Brown is a retired partner and William Regner is a partner in the Mergers and Acquisitions Group of Debevoise & Plimpton LLP. Portions of this Chapter 12 have been adapted from materials used by the authors and their colleagues in other publications, including the book *Takeovers: A Strategic Guide to Mergers and Acquisitions* (Brown, et al.), © Aspen Publishers 2008, and may be contained in other publications by the authors and their colleagues. The authors gratefully acknowledge the assistance of their colleague Dmitriy A. Tartakovskiy in the updating of this chapter.

§ 12.11 Preparing in Advance for Hostile Tender Offers**[1] Introduction**

Tender offers can move extraordinarily fast. There is often no time for leisurely contemplation of strategic alternatives. Immediate action and reaction are the orders of the day. Because the target may have very little time for organization and planning once a hostile bidder announces an unsolicited tender offer, advance preparation is essential. The target must remember, however, to conform its ultimate responses to the specific circumstances of a particular offer.

This section discusses the principal elements of a program of preparation for a hostile tender offer, including the preparation of the target's officers and directors, the possible amendment of the target's certificate of incorporation and bylaws, and the adoption of a shareholder rights plan (or "poison pill") and other potentially useful measures to assure that the target will be in the best position to evaluate a tender offer and to respond appropriately, should the target's directors determine that the offer is not in the best interests of the company's shareholders.

[2] Preparation of Directors and Officers

The target's directors should become familiar with their responsibilities in the event of a tender offer. Periodic presentations by the company's advisers are useful to familiarize the directors as to their obligations in the event of an offer, and as to developments in mergers and acquisitions law and practice. It is also helpful to review with the board the defensive provisions available to assist the directors in discharging their fiduciary responsibilities should an unsolicited offer be made for the company.

Moreover, it is appropriate to remind the directors that it is permissible for a healthy company to have a policy of continuing as an independent entity, and that there is no obligation to follow up on preliminary inquiries, although the board is obliged to consider formal offers for the company. It is important to review in general with the board how the

company, through its officers, proposes to respond to inquiries with respect to possible acquisition transactions. This enables the target's CEO to tell an inquirer that the topic has been discussed with the board, and that the company's policy is not to encourage takeover discussions and to continue as an independent entity.

A bidder may seek to sound out in advance the attitudes of the directors of a prospective target company to acquisitions. The directors should report all inquiries in this area, however informal, to a central person--usually the CEO. This is important for two reasons. First, it is important that the company speak with one voice, through a single spokesperson. Second, if "nibbles" are reported to a central person, tidbits of information, meaningless individually, may in the aggregate form a mosaic from which an intelligible pattern can become visible.

If the company's policy is not to encourage takeover discussions, the directors should be careful not to give a misleading impression of willingness to pursue unsolicited takeover discussions to inquirers. For example, if an investment banker or another company asks a director whether the company might be interested in pursuing takeover discussions, a response such as: "It all depends on the price" or "Sure, we'd certainly consider it" might be read as inviting a takeover inquiry.

If the company has a policy of not encouraging unsolicited takeover inquiries, a better response might be: "We believe strongly in our future as an independent company, and we're definitely not looking to be acquired." Such a response, like the similar possible responses discussed below, does not preclude (1) a potential acquiror from submitting an offer, nor (2) the board of directors from considering carefully an offer if one were to be made. If an inquirer persists, it should also be made clear that all acquisition discussions must be with the CEO. The CEO, in turn, should keep the board informed of all substantial inquiries.

[3] Pre-Tender Offer Defensive Measures

In addition to preparing its directors and officers for future hostile tender offers, a potential target can take a number of defensive measures that will better prepare it to respond to such offers. The target should consider these measures before a hostile tender offer is launched against it.

[a] Charter Amendments

A potential target might make itself less attractive to corporate raiders by amending its charter in such a way as to make it more difficult for a hostile acquiror to change control of the target even after purchasing a majority of the target's shares. Such charter amendments could include:

- Classification of the board of directors, so that the whole board is not up for election in any one year. This can have the effect of delaying the time within which a bidder could obtain effective control of the board.
- Requiring a supermajority vote on a merger with someone who owned more than a specified percentage of the company's stock, unless the transaction had been approved by the board before the threshold had been crossed or unless fair price tests have been met.
- Eliminating the ability of shareholders to act by written consent, rather than only at an annual or special meeting of shareholders.
- Restricting the ability of shareholders to call a special meeting of shareholders.
- Authorizing "blank check preferred"--that is, preferred stock issuable in series, the terms of which can be fixed by the directors without a shareholder vote. A new series of preferred stock could be used to

underlie a poison pill or, subject to compliance with requirements under stock exchange rules and applicable law, could be issued to a favored minority investor.

- Requiring a supermajority vote before shareholders can amend the bylaws.
- Prohibiting "greenmail"--that is, the payment of a significant premium over market price to repurchase shares from a significant shareholder of the company, absent approval by the company's shareholders.
- Authorizing the board to consider non-economic factors--for example, the impact of a proposed acquisition not only on shareholders but also on employees, customers, suppliers and the communities in which the company's facilities are located--in evaluating a takeover bid.

None of these "shark repellents" is a "showstopper"; indeed, many hostile takeovers in recent years have involved targets whose charters have contained many of the provisions discussed above. Nevertheless, shark repellents may have some deterrent effect, particularly against smaller, ill-financed bidders.

In submitting such charter amendments for shareholder approval, management must take care to disclose the effects that the amendments might have. Specifically, the SEC requires a company that is proposing a defensive charter amendment to spell out the overall effects of the amendment and also to describe other antitakeover provisions applicable to the company.ⁿ¹ Moreover, the adoption of certain provisions, such as board classification and supermajority voting, can affect corporate governance even absent a takeover bid.

Before proposing any charter amendments, the company should carefully evaluate the likelihood that the shareholders will vote to adopt them. Most institutional investors tend to vote against charter amendments that they perceive as creating an impediment to an acquisition of a company. Proxy advisory firms tend to recommend that their clients vote against such amendments. A proxy solicitation firm can assist in assessing particular institutional investors' and advisory firms' likely reaction to particular proposed amendments. Proposals that are not adopted could send signals to potential acquirors that the company's shareholders might look sympathetically upon an acquisition proposal. The company also should remember that a number of these amendments, while discouraging unsolicited tender offers, might also reduce the board's flexibility to act in the aftermath of a tender offer.

In addition, even if the company is able to adopt such a charter amendment, the company should bear in mind that the amendment may irritate some institutional investors and precipitate a future stockholder proposal requesting the directors to eliminate the amendment. If the stockholders support such a proposal and the directors do not eliminate the amendment, that would increase the likelihood that stockholders will withhold authority to elect directors--which, if the SEC's proposed rule for stockholder nominations of directors were to be adopted, would in turn increase the likelihood of a stockholder-nominated director candidate in the company's proxy statement.ⁿ²

A potential target incorporated in a state that does not permit certain defensive charter amendments might consider reincorporating itself in a state with more flexible corporate laws, such as Delaware. The company should be aware, however, that, although Delaware law grants the target's board great leeway in responding to a hostile bid, it also might increase the target's vulnerability to a takeover attempt unless the target adopts protective charter amendments.

The famous Bendix-Martin Marietta battle illustrates the difficulties that an unprotected target can experience under Delaware law: the hostile bidder, Bendix, was vulnerable to a counter-offer by the target, Martin Marietta, because Bendix's charter (and applicable Delaware law) permitted the holder of a majority of Bendix's shares to take immediate action by written consent, without having to call a shareholders' meeting. Such action was not possible under Maryland law, however, with respect to Marietta. Thus, Marietta would find it easier to gain control over Bendix than would Bendix over Marietta. A comparable result was obtained in the 1999 fight between Shorewood and Chesapeake, in

which Shorewood, the initial maker of a unsolicited proposal to acquire Chesapeake, found itself vulnerable to a counteroffer by Chesapeake because Shorewood was more vulnerable to a consent solicitation, which was not possible under Virginia law, the law applicable to Chesapeake.ⁿ³

[b] Bylaw Amendments

If the company's bylaws permit the board of directors to amend the bylaws without obtaining shareholder approval, the board might consider inserting "shark repellent" amendments in the bylaws, without going through the more elaborate process of amending the certificate of incorporation (which requires shareholder approval). The company must bear in mind that state corporation law often provides that shareholders always are free to amend bylaws.ⁿ⁴ Accordingly, the company might wish to propose a charter amendment requiring a supermajority vote of shareholders to amend the bylaws.

Possible bylaw amendments (if permitted by applicable state law) might include the following:

- *Calling of special meetings.* The company might wish to make clear that shareholders do not have the power to call a special meeting of shareholders, by providing in the bylaws that special meetings are to be called only by directors or officers--for example, by the CEO or by the secretary at the request of a majority of the board of directors.ⁿ⁵ This limitation would increase the difficulty of waging a proxy fight against management or of taking control of the company with less than a majority of shares. If such an amendment was coupled with a charter amendment requiring written consent of all of the company's shareholders in order to take action without a meeting, a would-be acquiror would find it difficult to change the composition of the board promptly and to assert effective control even after acquiring a majority of the company's shares.

- *Notice of shareholders' proposals.* The company could amend the bylaws to require that any shareholder who wishes to bring any business before a meeting must give written notice of the matter at issue within a reasonable period (*e.g.*, 90-120 days) before that meeting. A similar provision could apply to shareholder nominees for election as directors. These amendments might help the company in dealing with a large, aggressive shareholder or, at least, would limit the time during which the company would be exposed to a proxy fight. The provisions also could help to ensure that shareholders would hear both sides (and not just the bidder's arguments) before voting.

In *In re Gaylord Container Corp. S'holders Litig.*,ⁿ⁶ Gaylord's board adopted various defensive measures, including an advance notice bylaw under which a shareholder was required to make nominations at least 60 days in advance of the meeting. The court said this provision "merely lengthens the electoral contest in a way that appears to strike a reasonable balance between the electorate's need to hear out all participants in the debate and the acquiror's need for an adequate opportunity to line up a slate before the meeting."ⁿ⁷

- *Consent procedure.* If the bylaws authorize the board to establish a record date for such business as the taking of actions by written consent, the board could amend the bylaws to require that any shareholder desiring to act by consent notify the board and request the board to set a record date. The amendment then could require the board to set a record date that would give management a reasonable opportunity to react to the proposed transaction and, if desirable, to solicit proxies in opposition. A related amendment could fix a date (*e.g.*, 30 days after the mailing of proxy materials) for determining whether the proposed action received the approval of a majority of shares. Bylaws relating to consent procedures must be reasonable.ⁿ⁸

Under Section 213(b) of the Delaware corporation statute, if the board has not established a record date and no prior action by the board is required by the Delaware corporation statute, the record date for determining stockholders entitled to consent is the first date on which a signed written consent setting forth the action is delivered to the corporation. Thus, a significant minority shareholder might be able to solicit consents and then spring a *fait accompli* on the board, which would have no time to solicit opposing proxies.

[c] Structural Changes

Before confronting an unwanted tender offer, a potential target might consider a number of possible changes in the company's structure that either would make the company less attractive to raiders or would put the company in a better position to resist an offer that it determines not to be in the best interests of the shareholders. These structural changes might include placing "crown jewels"--the company's most desirable assets--in freestanding subsidiaries, to facilitate their rapid sale or spin-off; insuring that indentures and loan agreements do not restrict spin-offs, self-tender offers, or recapitalizations; developing a plan of liquidation; arranging for adequate financing to permit reverse tender offers, preemptive strikes against raiders, and self-tender offers; implementing a program for periodic repurchases of company stock; issuing company stock to a "white squire" (a friendly third party) or an employee stock option plan; effecting a leveraged buyout; recapitalizing the company to increase the debt-to-equity ratio; creating two classes of stock, one with higher voting rights (but restrictions on transfer), the other with lower voting rights (but freely tradeable); and adopting "golden parachutes" for top management. The implementation of these and other structural defenses before a raider strikes may assist the board in establishing that it approved the measures after careful consideration consistent with the directors' fiduciary obligations to the shareholders.

[d] Poison Pills

A potential target might also elect to adopt a "poison pill" to deter unwanted tender offers. Poison pills, which have become one of the most effective defensive techniques, are intended to encourage bidders to seek board approval before acquiring more than a specified percentage of a target's stock, by causing substantial dilution to the bidder if it crosses the relevant threshold without such prior approval. While the pills may tend to discourage bidders from proposing weak offers, they do not operate as a total bar to takeovers--and are not intended to do so.

Poison pills come in different packages but contain essentially similar toxins. The most common form of pill is a "call" plan, pursuant to which a company declares to shareholders a dividend of a right to buy (or "call") shares of the issuer. An example illustrates how call plans work.

Assume a target with 10,000,000 shares of outstanding common stock that trade at \$25 per share. The target may choose to distribute one right for every share of outstanding common stock. The distribution is effected as a dividend, without shareholder approval. Each right entitles the holder to purchase a share of common (or of a new series of preferred designed to resemble common stock) for \$75 per share. The rights trade with the common shares and are not initially exercisable; indeed, no one would even wish to exercise a right to pay \$75 for shares trading at \$25. Thus, the rights presumably have no present market value, and each unit of common-plus-right probably is worth only \$25.

The toxic feature of the pill, however, lies elsewhere. In the event that a hostile tender offer is announced, the purchase rights become detachable from the common shares. If the bidder acquires more than a threshold amount (typically in the range of 10 to 20 percent) of the target's stock, the typical rights agreement requires that the rights held by the bidder automatically become void, and that every other holder of an outstanding right thereafter be entitled to purchase, say, \$150 worth of the target's stock for \$75. The offer or thus would suffer severe dilution if it bought more than the triggering amount of the target's stock.

The rights issuer's board retains control of the poison through its authority to redeem the rights for a nominal amount (*e.g.*, one cent per right) typically until (or for a limited period of time after) someone acquires at least the threshold

percentage of the target's stock and through its authority to amend the plan. It is this redemption and amendment power that encourages the bidder to negotiate with the board.

With a pill in place, the takeover scenario might play out as follows. A bidder might offer to effect a friendly merger with the target, paying \$300,000,000 (or \$30 per share) to buy the 10,000,000 outstanding shares currently trading at \$25 per share. If the target's board rebuffs the bidder's friendly overtures, the bidder must decide whether to pursue a hostile tender offer, in which case it would have to address the rights that would become detachable from the common shares soon after the launching of that hostile offer.

The bidder might attempt to negate the rights by making its tender offer for both common stock and rights and by conditioning its obligation to purchase *any* securities on the tender of, for example, at least 95 percent of the rights. The problem with this approach, however, is obvious: every rights holder will know that, upon a subsequent merger, his right will be worth far more than he would be paid for it up front, during the tender offer; he therefore will have a strong incentive to withhold his rights, hoping--probably in vain--that other, less calculating holders will tender sufficient rights to satisfy the bidder's minimum. It is a classic "prisoner's dilemma."

The bidder also could condition its tender offer on elimination of the rights, either through redemption by the target's board or through judicial invalidation. If the target's board has not come up with better alternatives for shareholders as the end of the tender offer approaches, and if most shareholders have shown their approval of the offer by tendering their shares, the target's directors may be under heavy pressure to redeem the rights. Failure to do so may expose the directors to shareholder suits if the bidder withdraws its offer and the price of the target's stock falls back to its pre-bid levels.

Alternatively, the bidder could seek to replace the board of directors of the target with a slate of new directors who would be receptive to dismantling the pill to facilitate the bidder's offer, in the absence of a better offer. If, however, the target has a staggered board, this could not be done in one fell swoop. Conceivably, a court could invalidate the rights plan if it contains unusual features or the court could order the board to redeem the rights or make them inapplicable to the tender offer--although such injunctions are rare.

Users (and victims) of poison pills should realize, however, that pills tend not to be "showstoppers," guaranteed to scare away or defeat hostile offerors. Rather, pills far more often constitute negotiating tools that the target may be able to use to obtain better offers.⁹

(n8)Footnote 8. "In evaluating the reasonableness of a bylaw, which purports to establish ministerial review of the validity of consents, several factors are relevant. First, a court must determine the purpose sought to be served. A bylaw whose real purpose is delay of shareholder action is per se unreasonable. Second, the court should consider the impact of the bylaw upon the effective exercise of the power conferred under Section 228. Finally, the bylaw should contain only the minimal requisites for a reliable and prompt ministerial review to ensure the orderly function of corporate democracy. Such ministerial review must not be unduly elaborate, should contain reasonable time periods only necessary to the circumstances, and should be one which, when administered in good faith, is reasonable and balanced." *Allen v. Prime Computer, Inc.*, 540 A.2d 417, 420 (Del. 1988) . For an example of one bylaw relating to consent procedures that was upheld by the Delaware Chancery Court, *see* *Edelman v. Authorized Distribution Network*, CA 11104, 1989 Del. Ch. LEXIS 156 (Nov. 3, 1989) .

(n9)Footnote 9. While a rights plan can be adopted by the board without stockholder approval, the board should bear in mind that adopting a poison pill may irritate institutional investors--particularly if the pill is not used to explore value-maximizing alternatives--and could in the future lead to stockholder proposals to redeem the pill. RiskMetrics Group (formerly Institutional Shareholder Services (ISS)), a leading proxy voting advisory service, has a policy of recommending that its clients withhold authority to vote for directors of any company that adopts a poison pill without shareholder approval, does not put the pill to a vote at the current annual meeting and does not require the pill to be put to a vote within 12 months of its adoption.

Appendix 12-A: Model Board Resolutions Establishing a Special Committee

1-12-A Corporate Governance: Law and Practice [12-A]

[12-A] Model Board Resolutions Establishing a Special Committee

RESOLVED, that [Names of Directors of the Special Committee] are hereby appointed as a Special Committee (the "Committee") of the Board, with the power to select their own chairperson, if they so desire, and with full power and authority (i) to consider any proposal (in its initial form or as the same may be modified, the "Proposal") from [Name of the Purchaser], (ii) to consider whatever action with respect to the Proposal may be appropriate in the best interests of the Company, including without limitation whether the transaction contemplated in the Proposal should be consummated and whether the terms and conditions of the Proposal should be modified, and to negotiate with the prospective purchaser with respect to any such modification as the Committee may deem appropriate or desirable, (iii) to consider and negotiate with respect to any alternatives to the Proposal as the Committee believes to be available and in the best interests of the Company and (iv) to report back to the Board its conclusions and recommendations.

RESOLVED, that the Committee is authorized to retain, at the expense of the Company, financial advisers, legal counsel, accountants and other advisers as it deems appropriate to advise the Committee and to assist it in discharging its responsibilities, and to enter into engagement letters with such advisers and counsel on such terms as the Committee deems advisable.

RESOLVED, that the officers, employees and agents of the Company are directed to provide to the Committee and its advisers all such information, documents and assistance as they may request, and to cooperate with the Committee and its advisers in all respects.

RESOLVED, that, in consideration of their service on the Committee with respect to the matters set forth in these resolutions and the significant time commitment that such service will entail, the Company will (i) pay each member of the Committee a fee of \$_____, (ii) indemnify and hold harmless each member of the Committee against any and all liabilities and expense (including without limitation legal fees and expenses) arising in connection with such service, heretofore or hereafter rendered, to the fullest extent permitted by the Company's Certificate of Incorporation and Bylaws, as in effect on the date hereof, and (iii) reimburse each member of the Committee for all out-of-pocket travel and other expenses incurred in connection with the member's service on the Committee.

RESOLVED, that the Committee be, and hereby is, authorized to adopt such procedures concerning its operations as it deems necessary or appropriate.

CHAPTER 13 COMPLIANCE AND THE CODE OF CONDUCT

2-13 Corporate Governance: Law and Practice § 13.01

AUTHOR: Jay M. Cohen

§ 13.01 The Code of Conduct

Mandates in the Sarbanes-Oxley Act of 2002ⁿ¹ (the "Sarbanes-Oxley Act" or "Sarbanes-Oxley") and related regulations have made the code of conduct a required element of an organization's overall program for communicating and fulfilling its commitment to ethics, integrity, and compliance with laws and regulations. Moreover, in deciding whether to pursue settling securities fraud and other cases, or on what terms to settle them, regulatory and enforcement agencies consider, among other factors, whether companies have adopted and used reasonable efforts to enforce codes of conduct. In this chapter, we will analyze the legal, regulatory and "best practice" requirements for codes of conduct and offer some practical advice on how to best implement them.

We also will review more than two decades of efforts, in addition to the Sarbanes-Oxley Act, to develop, implement and enhance standards for organizational codes of conduct. These initiatives—from government, private industry and interest groups—are worth examining for several reasons.

First, these efforts have defined the substance and goals of organizational compliance programs and the role of codes of conduct within such programs. In the process, they have contributed to the widespread recognition of the code as an indispensable means of promoting organizational integrity.

Second, these initiatives offer a large body of information regarding what works in the design, implementation and enforcement of organizational codes of conduct. This practical experience can assist organizations in meeting the more recent mandates and in ensuring that their codes have a demonstrable, positive impact on organizational behavior.

This is a critical point for compliance officers and corporate counsel considering how best to develop or improve their organizations' codes of conduct. After all, a number of companies caught up in scandals and misconduct had codes of conduct, but those documents were not taken seriously enough. For example, the Enron Board of Directors approved three separate waivers of the conflicts of interest provisions in its code of conduct when it allowed the chief financial officer to have large, personal financial interests in entities doing business with the company and then to profit at the company's expense. As summarized by the report of an investigative committee of the United States Senate, "the Enron Board's decision to waive the company's code of conduct and allow its Chief Financial Officer ("CFO") to establish and operate off-the-books entities designed to transact business with Enron was also highly unusual and disturbing." The

refusal to enforce the code of conduct contributed to the collapse of the company and the defrauding of shareholders, because "hundreds of millions of dollars that should have stayed with Enron shareholders instead lined the pockets" of the CFO and other investors in these entities.ⁿ²

It is not sufficient to have a code of conduct on paper, even one that on its face meets all of the legal requirements, if that code is not understood, respected and followed, from the top of the organization on down. The practical information we will review can help organizations ensure that their codes receive the required attention and respect.

The third reason to examine the history of codes of conduct is that, in several instances, regulators, prosecutors and courts have articulated their expectations for codes of conduct, as well as the possible advantages to organizations of having and enforcing a suitable code of conduct. These expectations and advantages continue to this day and, if anything, have grown as the result of the regulatory responses to the many scandals of this millennium.

Fourth, these experiences have guided Congress, the Securities and Exchange Commission (the "SEC") and the stock exchanges in their decisions about the specific elements to require for codes in the Sarbanes-Oxley Act and related regulations. Indeed, more recent mandates were informed by-and in many cases taken directly from-these efforts.

There is remarkable consistency in the structure and substance of the codes of conduct that we will review from throughout this period; what has changed is that mandates for codes have now spread from highly-regulated industries such as defense and health care to a far broader universe of companies. This structure and substance offers a useful and practical guide for the on-going development and effective application of the code of conduct in any organization.

Our fifth goal for this chapter is to place the regulatory and practical development of the organizational code of conduct in the context of another element that has emerged from scandals: the focus on the organization's "culture of compliance" in addition to its compliance structure and process. We will examine what it means to have such a culture, at least according to the regulators; how to promote and encourage this culture; and some ways of determining if these efforts are succeeding in an organization.

Reactions to the financial crisis that began in 2007 have demonstrated that--despite what many have expected and some may have hoped--the intense focus by regulators, prosecutors and the public on corporate integrity will not change anytime soon. If anything, criticism of the SEC and other regulators for failing to properly investigate the Madoff Ponzi scheme and other frauds ensures that this pressure will only intensify.

For any organization to succeed in this challenging environment, it is essential to have a corporate code of conduct that is comprehensive, realistic, and consistently enforced. The choice corporations have is to do it on their own terms or, as companies that run afoul of regulations and regulators continue to learn, be forced to strengthen their compliance programs and controls as part of a costly settlement and subject to the supervision of the government.ⁿ³

CHAPTER 13 COMPLIANCE AND THE CODE OF CONDUCT

2-13 Corporate Governance: Law and Practice § 13.02

AUTHOR: Jay M. Cohen

§ 13.02 Legal and Regulatory Background

[1] Goals of Organizational Compliance Programs and Codes of Conduct

Organizational compliance programs are designed to accomplish two fundamental goals. First, they seek to prevent, detect and appropriately respond to violations of laws, regulations, and company policies and, in the process, to promote ethical behavior within the organization. In so doing, these programs strive to lessen the likelihood that the organization or its individual employees will fail to meet legal and regulatory obligations and commitments to customers, fellow employees, shareholders and other stakeholders. Compliance programs with codes of conduct accomplish this by making sure that employees know what these obligations and commitments are and by giving them avenues (such as confidential hotlines) to ask questions or report concerns. These programs also can minimize adverse consequences and prevent small problems from becoming more serious ones, by identifying and detecting problems quickly.

Second, a carefully-organized and consistently-enforced compliance program can enable a company to limit or even avoid corporate liability for the compliance failures of individual employees. A corporate compliance program that includes a code of conduct will not absolutely "immunize the corporation from liability when its employees, acting within the scope of their authority, fail to comply with the law."¹ Nevertheless, even if it does not stop every instance of corporate wrongdoing by errant employees, a well-designed and consistently enforced code of conduct makes the organization look less culpable in the eyes of regulators and prosecutors.

Thus, there are at least three compelling reasons for companies to have and to enforce a strong code of conduct. First, legal mandates for such codes are reaching more organizations and becoming increasingly prescriptive. In this regard, for example, the Sarbanes-Oxley Act of 2002 and the regulations thereunder mandate that public companies (1) either (a) adopt codes of conduct applicable to their principal executive officers, principal financial officers, principal accounting officer or controller, or persons performing similar functions, or (b) disclose why they have not done so, and (2) disclose any waivers or amendments of such codes in a current report on SEC Form 8-K.² Second, regulators often expect regulated entities to have comprehensive codes of conduct, even when the law does not explicitly require it. Third, having and enforcing a code of conduct can prevent or limit the legal and regulatory consequences for the organization of wrongdoing by errant employees.

The common elements of compliance programs have been defined by the developments discussed below. One common element is the code of conduct. A code of conduct contributes to the objectives of organizational compliance programs by emphasizing senior management's commitment to compliance and then informing employees about the organization's fundamental principles and values; its key compliance issues, regulations and standards; the resources available to help employees understand and meet these values and standards; and the means of monitoring and enforcing them.

[2] Key Events in the Development of Organizational Codes of Conduct

[a] Defense Industry Initiative

[i] *The Packer Commission*

The defense industry was one of the first to adopt the code of conduct as an essential element of a comprehensive program to prevent corporate misconduct. Much like today, it did so in the face of scandals and at the prodding of the government. In 1985, President Reagan appointed the President's Blue Ribbon Commission on Defense Management (the "Packer Commission"), following a number of reported instances of fraud or waste in defense procurement in the mid-1980s. The Packer Commission concluded that the defense contracting process, and public confidence in the defense industry, would benefit from better corporate self-governance. In its Interim Report dated February 28, 1986, the Packer Commission stated:

To assure that their houses are in order, defense contractors must promulgate and vigilantly enforce codes of ethics that address the unique problems and procedures incident to defense procurement. They must also develop and implement internal controls to monitor these codes of ethics and sensitive aspects of contract compliance.ⁿ³

[ii] *The Defense Industry Initiative Principles*

In response to this report, a number of defense contractors met in the spring of 1986 and founded the Defense Industry Initiative on Business Ethics and Conduct ("DII"). The goals were "to create a heightened level of ethical conduct 'from the board room to the mail room' in every company in the defense industry" and to "promote self-governance as a means of confirming management's commitment to abide by ethical standards."ⁿ⁴

The DII continues to the present, and as of the end of 2008, 90 companies, representing the largest defense contractors as well as a number of smaller companies, were signatories to its compact.ⁿ⁵ These companies have all agreed to adopt the six DII principles, which require that each member company:

- (1) adopt and adhere to a written code of conduct;
- (2) train employees about the code, which "establishes the high values expected of employees and the standards by which they must judge their own conduct and that of their organization";
- (3) encourage internal reporting by employees of violations of the code, without fear of retribution;
- (4) implement systems to monitor compliance with the code and with federal procurement laws, and to provide for voluntary disclosure of violations;
- (5) share "best practices" with other firms in order to "preserve the integrity" of the industry; and
- (6) be accountable to the public through public reports and disclosures about its "commitment to these principles."ⁿ⁶

It bears emphasizing that, under the DII principles, the code of conduct is the foundation of each organization's compliance program, with other principles defining the means by which the code is effectively communicated and enforced.

[iii] *Substance, Training and Enforcement of the Code of Conduct*

Each DII signatory has flexibility within the principles to construct a compliance program and code of conduct that best fits its organization and business. Nonetheless, most organizations have adopted codes of conduct that combine general expressions of fundamental values and principles, such as honesty, integrity and fair-dealing, with more specific provisions to address relevant risk areas. The latter subjects may include issues that apply to the widest range of officers and employees in the company such as conflicts of interest, antitrust, employment of former government employees, gifts and entertainment, use of company resources, books and records, bidding for and pricing of government contracts, procurement integrity, confidential information, work place conduct issues such as discrimination and harassment, political contributions, privacy and insider trading.ⁿ⁷

This model of combining the general with the specific--of addressing both values and conduct--is one that can prove useful to organizations in any industry, in response to the requirements of Sarbanes-Oxley and the stock exchange listing standards. As noted by the DII in its 2008 Report,

A written code of conduct is also intended to provide clear guidance to employees as they face an ethics dilemma. Thus, codes commonly pinpoint the major ethics and conduct risks of the particular business, as well as including more general, aspirational objectives.

Thus, codes commonly pinpoint the major ethics and conduct concerns of the particular business, as well as a statement of more general corporate aspirational objectives. All the codes of DII signatories state unequivocally the expectation that employees will comply with applicable laws, regulations, and company policies. All codes contemplate that employees will "do the right thing" when there is no rule.ⁿ⁸

The DII has worked since its inception to improve the communications, training, monitoring, enforcement and reporting mechanisms that are reflected in its principles and that can help make the codes of conduct more effective. For example, DII signatories typically provide a copy of their code to all employees and require that they acknowledge receipt of the code and their obligation to comply with it. Companies may also distribute their code to subcontractors, consultants, vendors, and suppliers. The codes all emphasize the importance of asking questions, reporting concerns or seeking guidance when the legality or propriety of an action is unclear. Annual DII conferences and other meetings review new on-line and in-person training methods, monitoring and auditing techniques, discipline programs and recent regulatory concerns.

The DII Principles and guidance are more important than ever, The Defense Contract Audit Agency of the U.S. government has issued formal letter requests to major defense contractors seeking detailed information about their "control environments." The agency is requesting, among other things, information about "the existence of written codes of conduct" as well as "compliance training, communication and periodic reviews."ⁿ⁹

The DII is thus an excellent source of examples, ideas and best practices regarding codes of conduct. Indeed, the DII's goals for its principles echo the post-Enron hopes for codes of conduct and related corporate governance mandates, that they will help each organization "maintain the highest ethical standards, [by] encouraging employees to ethical conduct, and requiring compliance in the course of its business activities."ⁿ¹⁰

[b] Federal Sentencing Guidelines for Organizations

[i] *Development of the FSGO*

The DII principles contributed greatly to the development of the federal sentencing guidelines for organizations ("FSGO"), perhaps the single most influential step in the evolution of corporate codes of conduct until the Sarbanes-Oxley Act.

In the five years between the founding of the DII and adoption of the FSGO, many voices urged more widespread adoption of corporate codes of conduct. As one relevant example, the Treadway Commission, which examined fraudulent financial reporting well before the twenty-first century financial scandals, recommended that every public company have a code of conduct:

Public companies should develop and enforce written codes of corporate conduct. Codes of conduct should foster a strong ethical climate and open channels of communication to help protect against fraudulent financial reporting. As part of its ongoing oversight of the effectiveness of internal controls, a company's audit committee should review annually the program that management establishes to monitor compliance with the code.ⁿ¹¹

The FSGO subsequently gave companies a very good reason to follow that advice. These guidelines were developed as part of a congressionally-mandated reform of federal sentencing that began with the creation and appointment of the United States Sentencing Commission (the "Sentencing Commission") in 1984.ⁿ¹² The Sentencing Commission, a permanent body of three judges and four other persons appointed by the President and confirmed by the Senate, was given the responsibility to create rules that would reduce the vast sentencing discretion then given to federal judges. In 1987, the Sentencing Commission issued the first binding sentencing guidelines applicable to individual defendants. The guidelines created ranges for each sentence, based on the "offense level" for the particular crime and the offender's "criminal history" score.

The Sentencing Commission next focused on the adoption of guidelines for the sentencing of organizations convicted of federal crimes.

[ii] Purpose and Structure--The "Carrot and Stick"

After three years of study and public comment, the FSGO were adopted as Chapter Eight of the sentencing guidelines and became effective on November 1, 1991.ⁿ¹³ They contain a similar system of sentencing ranges, this time using two criteria: a "base fine" that reflects the seriousness of the offense and a "culpability score" for the offending organization. Taken together, these factors define a range of possible fines for the sentencing court to use in determining the penalty imposed on an organization in each case. In addition to being fined, organizations can be placed on probation and ordered to make restitution.

Like its efforts with the sentencing guidelines for individuals, the Sentencing Commission sought through the FSGO to reduce variations in the sentencing of organizations by limiting the discretion of federal judges. But the Sentencing Commission hoped to influence organizational behavior in far broader and more fundamental ways.ⁿ¹⁴

First, the FSGO are not limited to corporations. Instead, they apply to "any organization," which includes "corporations, partnerships, associations, joint-stock companies, unions, trusts, pension funds, unincorporated associations, government and political subdivisions thereof, and non-profit organizations."ⁿ¹⁵

Second, the guideline ranges for organizations generally result in much stiffer fines being imposed than was the case under the prior system. The Sentencing Commission was concerned that the "unpredictability and variation in the sanctions imposed on convicted corporations meant that there was no obvious incentive to galvanize resources to avoid such sanctions." Fines were inconsistently imposed, or "less expensive than avoiding liability in the first place."ⁿ¹⁶

Third, and most important, the Sentencing Commission expressly adopted what many commentators have called a "carrot and stick" approach to the sentencing of organizations, one that offers a tangible benefit to organizations with codes of conduct and compliance programs. The key for our purposes is that an organization's culpability score generally will be determined by (i) the steps taken by the organization prior to the offense to prevent and detect criminal conduct, (ii) the level and extent of the involvement in or tolerance of the offense by senior management or the board of directors, and (iii) the organization's actions after the offense has been committed.¹⁷

As noted by the Ad Hoc Advisory Group on the Organizational Sentencing Guidelines (the "Ad Hoc Advisory Group"), which was appointed by the Sentencing Commission in February 2002 to review and suggest changes in the FSGO: The centerpiece of the [FSGO] is the fine range, from which a sentencing court selects the precise fine to impose on a convicted organization ... Guidelines provide for substantial fines when a convicted organization has encouraged, or has been indifferent to, violations of the law by its employees, but impose significantly lower fines when a corporation has demonstrated in specified ways its antipathy toward lawbreaking.¹⁸

In fact, organizations can reduce their culpability score, and thus their possible fine, by as much as 90 percent, which can translate into savings of millions of dollars, if they have taken the steps outlined below, including the adoption of a code of conduct. This "carrot and stick" approach remains in the Guidelines today, even after recent changes in the definitions of the specific steps that organizations must take to earn this credit.

One reason that the Sentencing Commission chose this approach was to address, albeit in an indirect way, standards of organizational criminal liability that were (and remain), as one expert explains, "indifferent to the culpability of the organization--as opposed to those agents within the organization--for the criminal acts." Criminal liability can attach to an organization based on the conduct of its employees or agents, *even when that conduct is contrary to company policy*:

The imputed culpability liability theory fails to distinguish between offenses committed with the participation or encouragement of upper management, pursuant to corporate policies or procedures, and those committed by "rogue employees" whose acts violated company policy or could not have been prevented by careful supervision.¹⁹

The Sentencing Commission wanted to address this issue by distinguishing those organizations which tried to prevent the wrongdoing from those which did not, and at least giving the former meaningful credit at sentencing for their efforts.

The Sentencing Commission's goals--reflected in its "carrot and stick" approach--were even more ambitious than that. As noted in the report of the Ad Hoc Advisory Group, the Sentencing Commission wanted not only to define the punishment for convicted organizations but also to affect organizational behavior outside the courtroom. The idea was to create a sentencing system that encourages organizations to prevent crime in the first instance, and to detect and disclose offenses more often and much sooner when they do occur. The Sentencing Commission "structured its framework to create a model for the good 'corporate' citizen; use the model to make organizational sentencing fair and predicable; and ultimately employ the model to create incentives for organizations to deter crime."²⁰ It is because of these incentives that the impact of the FSGO on organizational governance and compliance activities has been so profound.

[iii] Definition of an "Effective" Compliance Program in the 1991 Guidelines

The Sentencing Commission's "carrot and stick" approach was codified in the 1991 FSGO in several related provisions. An organization's culpability score--and thus the penalty that it faced--could be substantially reduced if "the offense occurred despite an effective program to prevent and detect violations of law."²¹ The FSGO defined an "effective program" as one "that has been reasonably designed, implemented, and enforced so that it generally will be effective in preventing and detecting criminal conduct." To meet this standard, an organization was obligated to exercise "due

diligence in seeking to prevent and detect criminal conduct by its employees and other agents."n22

This due diligence required "at a minimum" that the organization have taken seven steps including the establishment of compliance policies and procedures such as a code of conduct; compliance background reviews of key personnel; compliance communications and training; monitoring and auditing of business unit compliance with the policies and procedures; consistent enforcement and discipline; appropriate responses to compliance problems; and assignment of compliance responsibility and oversight to "specific individual(s) within high-level personnel of the organization."n23

These seven elements of an effective compliance program represented the first time that compliance program standards were defined in federal law. Here, as with the DII Principles, the code of conduct--representing "compliance standards and procedures"--was the centerpiece of an "effective" compliance program.

In addition to the credit that an organization could get for taking these steps, it could reduce its culpability score by reporting the offense to the government, cooperating with any investigation into the matter and accepting responsibility for the crime.n24

The FSGO further provided that the structure and shape of each organization's compliance program should depend on the size of the organization, the "likelihood that certain offenses may occur" because of the nature of its business and its prior history, including any previous offenses. Indeed, "an organization's failure to incorporate and follow applicable industry practice or the standards called for by any applicable governmental regulation weighs against a finding of an effective program to prevent and detect violations of law."n25 Moreover, even organizations with compliance programs could be denied sentencing credit if "high-level personnel ... or an individual responsible for the administration or enforcement of [the] program ... participated in, condoned, or was willfully ignorant of the offense."n26

The original FSGO served as the foundation for two decades of organizational compliance efforts, and they continue to influence and be reflected in judicial criteria, regulatory expectations and compliance "best practices."

[iv] *The November 2004 Amendments to the FSGO*

The compliance program elements of the FSGO were not altered from their inception in 1991 until November 2004. As discussed above,n27 in February 2002, the Sentencing Commission appointed the Ad Hoc Advisory Group to review and evaluate the effectiveness of the guidelines, with "particular emphasis on examining the criteria for an effective program to ensure an organization's compliance with the law."n28 The Ad Hoc Advisory Group decided at the outset that the "widespread misconduct in some of the nation's largest publicly held companies ... required evaluation of whether the compliance efforts precipitated by the organizational sentencing guidelines could be made more effective in preventing and detecting violations of law."n29 It then spent eighteen months studying the evolution and impact of organizational compliance programs in the period since the adoption of the FSGO.

The conclusions of the group are reflected in its report to the Sentencing Commission on October 7, 2003. The Ad Hoc Advisory Group recommended that the Sentencing Commission create a stand-alone guideline defining an "effective" compliance program, in order to highlight the importance of these provisions.n30 The compliance program definition was, at the time, part of the "Commentary to United States Sentencing Guidelines § 8A1.2 (Application Instructions-Organizations)" in Chapter Eight of the sentencing guidelines.

The group also reiterated the basic elements of the existing FSGO, but at the same time, proposed substantive changes to the seven elements, including amendments that would mandate, rather than suggest, the steps that organizations must take to qualify for this credit. These changes were designed to create more rigorous standards for evaluating organizational compliance programs.

In another significant development, the Ad hoc Advisory Group recommended that the Guidelines spell out the

responsibilities of an organization's governing authority and organizational leadership for compliance efforts and the compliance culture.ⁿ³¹ Finally, the changes sought to extend compliance efforts beyond mere compliance with written legal standards to the development of "an organizational culture that encourages a commitment to compliance." This emphasis on culture and leadership is likewise reflected in the rules for codes of conduct that were developed in 2003 by the SEC and the stock exchanges after Sarbanes-Oxley. In each of these efforts, the code of conduct became an even more central part of an effective compliance program.

On April 30, 2004, the Sentencing Commission submitted its final proposal to Congress, otherwise largely adopting the recommendations of the Ad Hoc Advisory Group, including the recommendation to create a standalone guideline.ⁿ³² The Commission's proposed changes to the FSGO took effect on November 1, 2004, without any further modifications by Congress.ⁿ³³ This created a new standard against which organizational compliance programs are now evaluated.

The amended FSGO continue to reflect many of the same elements of an "effective" compliance program that were central to the 1991 guidelines. For example, the amended guidelines continue to require that organizations (1) "establish standards and procedures to prevent and detect criminal conduct," (2) use reasonable efforts not to employ in key positions "any individual whom the organization knew, or should have known through the exercise of due diligence, has engaged in illegal activities or other conduct inconsistent with an effective compliance and ethics program," and (3) respond appropriately and effectively to criminal conduct.ⁿ³⁴

At the same time, the 2004 FSGO amendments make three significant changes to the original guidelines.

First, the 2004 amendments have made mandatory certain elements that were simply encouraged in the prior version. For the first time, they provide that:

- (1) Organizations must conduct "effective training programs" and otherwise disseminate information about their compliance and ethics programs.ⁿ³⁵
- (2) Organizations must include "monitoring and auditing" in their efforts to ensure that the compliance and ethics program "is followed."ⁿ³⁶
- (3) Organizations "shall periodically assess the risk of criminal conduct and shall take appropriate steps to design, implement, or modify" their programs to reduce that risk. These risk assessments must be customized to reflect the specific issues and concerns faced by the organization based on its industry, size and structure, and compliance history.ⁿ³⁷
- (4) Organizations must "have and publicize a system, which may include mechanisms that allow for anonymity or confidentiality, whereby the organization's employees and agents may report or seek guidance regarding potential or actual criminal conduct without fear of retaliation."ⁿ³⁸
- (5) The compliance and ethics program must be "promoted and consistently enforced" through both "appropriate incentives" and "appropriate disciplinary measures."ⁿ³⁹

Second, as recommended by the Ad Hoc Advisory Group, the 2004 FSGO amendments have added specific references to the responsibilities of the board of directors and senior management:

- (1) "The organization's governing authority [its Board of Directors] shall be knowledgeable about the content and operation of the compliance and ethics program and shall exercise reasonable oversight" of the implementation and effectiveness of the program.ⁿ⁴⁰
- (2) Senior leaders of the organization must ensure that it has an effective compliance and ethics program,

as defined by the guidelines.ⁿ⁴¹

(3) Senior leaders and the Board must also receive periodic reports about the effectiveness of the compliance and ethics program, from the individuals with operational responsibility for the program.ⁿ⁴²

(4) The individual responsible for the compliance and ethics program must be given "adequate resources, appropriate authority, and direct access" to the organization's board of directors. The Sentencing Commission also noted that "a large organization shall devote more formal operations and greater resources in meeting the requirements of this guideline than shall a small organization."ⁿ⁴³

This means that board members and senior executives must be knowledgeable about substantive compliance issues and risks, as well as about compliance program activities. According to the Conference Board, because of these standards and the recent scandals, most boards of directors will now "have greater involvement with or oversight" of their organization's compliance and ethics program.ⁿ⁴⁴

Third, and perhaps most significant, the 2004 amendments to the FSGO added an entirely new element to the definition of an "effective" compliance program. For the first time, they required organizations to "promote an organizational culture that encourages ethical conduct and a commitment to compliance with the law." This simple, straightforward, one-line emphasis on culture in addition to process has introduced a more demanding and intrusive element into the equation, one that has the potential to dramatically broaden the impact of the FSGO on organizational leadership and conduct. That this potential is already being realized is reflected in the comments and expectations of regulators, especially the Securities and Exchange Commission, which we will explore in more detail later in this Chapter.

Like the 1991 guidelines, the amended FSGO also provide that, in addition to having an effective compliance and ethics program, organizations can get credit at sentencing for "self-reporting, cooperation and acceptance of responsibility."ⁿ⁴⁵ In fact, the "Introductory Commentary" that accompanies the revised guidelines in Chapter Eight of the Guidelines Manual states that "[t]he two factors that mitigate the ultimate punishment of an organization are: (i) the existence of an effective compliance and ethics program; and (ii) self-reporting, cooperation, or acceptance of responsibility." This latter factor, as we shall see below, has become increasingly important to regulators and prosecutors.

One change in 2004 proved especially controversial and was later reversed by the Sentencing Commission, in response to complaints from the Association of Corporate Counsel, the United States Chamber of Commerce and other interested parties. Commentary to this section in 2004 explained that "[w]aiver of attorney-client privilege and of work product protections is not a prerequisite to a reduction in culpability score [under these provisions] unless such a waiver is necessary in order to provide timely and thorough disclosure of all pertinent information known to the organization."ⁿ⁴⁶ A group of former U.S. attorneys general wrote in August 2005 that this commentary—rather than encourage a case-by-case consideration of the issue—has instead been interpreted by prosecutors as providing "[c]ongressional ratification of the Department [of Justice's] policy of routinely asking that privilege be waived."ⁿ⁴⁷ The National Association of Criminal Defense Lawyers (NACDL) called this "probably one of the most important issues, post-Enron, facing the white-collar criminal defense bar"ⁿ⁴⁸ On May 1, 2006, the Commission ruled on the controversy and submitted to Congress proposed changes in the FSGO, including a recommendation to eliminate the language regarding waiver of the attorney-client privilege and work-product protections. According to the Commission, this provision was added in 2004 with the expectation that "such waivers will be required on a limited basis. Subsequently, the Commission received public comment and heard testimony [at two public hearings] that the sentence at issue could be misinterpreted to encourage waivers."ⁿ⁴⁹ On November 1, 2006, this change became effective in the absence of action by Congress. The battle over waivers by organizations of the attorney-client privilege is still being waged on other fronts, as discussed later in this chapter.

The FSGO can be found in Appendix 13-A to this Chapter.

On January 12, 2005, the United States Supreme Court ruled that the federal sentencing guidelines must be treated as only advisory, not mandatory.ⁿ⁵⁰ This means that judges must still consider the guidelines when imposing sentences on individual or corporate defendants but are not obligated to apply them in each case. Nonetheless, an organization finding itself in front of a federal judge for sentencing should still want to be able to demonstrate its commitment to compliance, ethics and self-policing, as evidenced by its faithful and effective adherence to the principles and elements of the FSGO. More important, the use of the FSGO as the standard by which organizations are judged--and the impact of the FSGO outside the courtroom--remain as real as ever, for the reasons discussed below.

[v] *Impact of the FSGO*

The Sentencing Commission has succeeded, perhaps beyond even its own expectations, in promoting the growth of organizational compliance programs and the adoption of codes of conduct as part of these programs. Its "elements of an effective compliance program" have become--as we shall see in subsequent sections of this chapter--common elements of compliance programs regardless of the industry and irrespective of whether the organization using them has ever been investigated or prosecuted for a federal crime.

Companies have developed compliance programs based on these elements in response to industry regulations, in an effort to adopt "best practices" or simply for protection in the event of federal prosecution if one or more employees do engage in misconduct. According to the report of the Ad Hoc Advisory Group, "there is abundant evidence that the organizational sentencing guidelines have, directly and indirectly, galvanized organizations to focus on their responsibility to detect and prevent violations of law and to institute compliance programs toward this goal."ⁿ⁵¹

This influence far exceeds the direct impact of the FSGO in the federal courts. According to a report by the Conference Board, from 1993 through 2008, only three of the 2,811 sentenced organizations received any credit for having an effective compliance program.ⁿ⁵² In its 2008 Annual Report, the Sentencing Commission noted that none of the organizations sentenced that year saw its culpability score reduced for having an "effective" compliance program, although 77 organizations did get credit for self-reporting, cooperating with the authorities and/or accepting responsibility.ⁿ⁵³ However, as noted by the Ad Hoc Advisory Group: The extremely small number ... is potentially misleading because it seriously understates the value of an effective compliance program. A number of government programs offer leniency to organizations that self-report violations in a timely manner, such as the U.S. Department of Justice's Antitrust Division's Corporate Amnesty policy. Moreover, the key regulatory and enforcement agencies, including the SEC and the Department of Justice, continue to use the elements of the FSGO as *their* guide in determining how organizations should be treated. Current and former U.S. Justice Department officials have stated to the Advisory Group that the Department has declined prosecutions based on the existence of an effective compliance program. An effective compliance program enables organizations to detect violations at an earlier stage than might otherwise occur, and it may thus give them the opportunity to self-report and qualify for lenient treatment under government policies.ⁿ⁵⁴

In 2002, representatives of the U.S. Department of Justice ("DOJ") told the Ad Hoc Advisory Group that "the organizational sentencing guidelines have been a dramatic step forward in corporate criminal law and organizational management ... We strongly believe that these efforts by managers can significantly reduce the likelihood and impact of organizational crime." These high-ranking officials made clear the DOJ's view that, at least "for large publicly-traded corporations the absence of any compliance program will signal a significant deviation from recognized practice."ⁿ⁵⁵

The amendments to the FSGO, and also the entire report of the Ad Hoc Advisory Group, should be carefully reviewed by compliance officers and counsel, even in those organizations which already have compliance programs based on the original elements in the sentencing guidelines. The amended FSGO represent the current, most influential standard by which organizational compliance programs and codes of conduct will be evaluated and the actual conduct of directors and officers will be judged.

[c] *Caremark* and Related Cases

[i] *The Caremark Case*

Whereas the DII made codes of conduct a key part of a prominent industry's response to scandal and the FSGO made codes of conduct an element of our criminal justice system, it was the *Caremark* decision⁵⁶ that brought compliance and codes of conduct into the boardrooms of American corporations. In what is widely regarded as a watershed case, the influential Delaware Chancery Court considered the responsibility of corporate directors to make sure that their organizations implement programs for legal and regulatory compliance. The court also addressed the personal liability of directors for failing to do so. *Caremark*, a health-care company, had pleaded guilty to criminal fraud in 1995, in connection with allegations that it illegally paid doctors for patient referrals to *Caremark* facilities and violated other federal and state health-care laws. The company paid \$250 million in criminal fines and civil penalties.

One year later, the Delaware Chancery Court was asked to approve the settlement of a shareholder derivative suit alleging that the *Caremark* directors had breached their duty of care by failing to prevent the fraud by the company's employees. The suit sought reimbursement to the company of the fines and penalties, but the settlement did not provide such relief. The court approved the settlement, concluding that there was little likelihood that the directors in this case had "breached any duty to appropriately monitor and supervise the enterprise."⁵⁷

At the same time, the court did not let corporate directors off the hook in regards to oversight of their organization's legal and regulatory compliance:

[A] director's obligation includes a duty to attempt in good faith to assure that a corporate information and reporting system, which the Board concludes is adequate, exists, ... [T]he failure to do so may, in theory at least, render a director liable for losses caused by non-compliance with applicable legal standards.⁵⁸

The goal of this system is "to provide to senior management and the Board itself timely, accurate information sufficient to allow management and the Board, each within its scope, to reach informed judgments concerning both the corporation's compliance with law and its business performance." The required system of information and reporting must be on ongoing, so that it is "in concept and design adequate to assure the Board that appropriate information will come to its attention in a timely manner as a matter of ordinary operations, so that it may satisfy its responsibility."⁵⁹

The *Caremark* court specifically referred to the FSGO in connection with the kind of system that corporations should implement, noting that the sentencing guidelines "offer powerful incentives for corporations today to have in place compliance programs to detect violations of law, promptly to report violations to appropriate public officials when discovered, and to take prompt, voluntary remedial effort ... Any rational person attempting in good faith to meet an organizational governance responsibility would be bound to take into account this development and the enhanced penalties and the opportunities for reduced sanctions that the federal sentencing guidelines offer."⁶⁰

Moreover, in approving the settlement, the court favorably reviewed the compliance procedures that the company had adopted. These included:⁶¹

- (1) Adoption and publication of a new ethics manual for employees that included a toll-free hotline for employees to confidentially report possible violations of law or company policy;
- (2) New policies to prevent misconduct in government programs; and
- (3) Establishment of an audit plan to test legal and regulatory compliance.

[ii] Cases Interpreting *Caremark*

Cases interpreting *Caremark* have admonished corporate directors that they breach their duty of care if they intentionally or recklessly disregard "'red flags' that warned of systematic fraudulent practices employed and encouraged by ... management."ⁿ⁶² In one case, the red flags included audit results, a whistleblower lawsuit, a federal investigation and a series of articles in the *New York Times* regarding a hospital company's billing practices.ⁿ⁶³ In another case, the court found a "sustained and systematic failure of the Board to exercise oversight" when the Audit Committee of the Board of Directors "took no steps in an effort to prevent or remedy" the company's repeated and well-documented noncompliance with FDA requirements.ⁿ⁶⁴ In a third case, the Delaware Chancery Court provided some examples that would constitute a failure to meet the *Caremark* standards: "That the company lacked an audit committee, that the company had an audit committee that met only sporadically and devoted patently inadequate time to its work, or that the audit committee had clear notice of serious accounting irregularities and simply chose to ignore them or, even worse, to encourage their continuation."ⁿ⁶⁵

In the absence of "red flags" that put them on notice of wrongdoing, directors are liable for breaching their duty of oversight under Delaware law only if (a) they "failed to implement any reporting or information systems or controls; or (b) having implemented such a system or controls, consciously failed to monitor or oversee its operations."ⁿ⁶⁶ Thus, directors may discharge their duty of oversight, in appropriate circumstances, by ensuring that a company has an adequate compliance program and periodically receiving reports from the officers responsible for the operation of the program.

In *Stone v. Ritter*, the Delaware Supreme Court affirmed the dismissal of a derivative action when it was clear from the face of the pleadings (including from a report incorporated by reference) that "the Board received and approved relevant policies and procedures, delegated to certain employees and departments the responsibility for filing ... [reports required under the Bank Secrecy Act] and monitoring compliance, and exercised oversight by relying on periodic reports from them."ⁿ⁶⁷

More recently, the Delaware Chancery Court refused to second-guess the directors of Citigroup for failing to protect the organization and its shareholders from the risks of the sub-prime mortgage market.ⁿ⁶⁸ The court explained that the "[o]versight duties under Delaware law are not designed to subject directors, even expert directors, to *personal liability* for failure to predict the future and to properly evaluate business risk."ⁿ⁶⁹ The court noted that the plaintiffs had conceded that "Citigroup had a risk monitoring system in place."ⁿ⁷⁰

Especially following these cases interpreting *Caremark*, there can be no doubt that having an effective corporate compliance program and code of conduct protects directors, as well as their organizations. The board of every U.S. public company, as a whole or through one of its committees, should be sure that (a) an "adequate" compliance program, with a suitable code of conduct a centerpiece, has been implemented and is operating effectively, (b) relevant legal and regulatory risks are addressed as part of this program, and (c) any serious compliance-related problems are brought to the attention of senior management for review and response and, when they are material to the consolidated enterprise as a whole, are reported to the board of directors.

[d] The Government's View of Codes of Conduct--Compliance Guidance for Health-Care Companies

[i] *OIG Compliance Guidance--General*

Organizations in any industry searching for the government's perspective about, and expectations for, codes of conduct and compliance programs should also review the model "Compliance Program Guidance" documents issued for the various components of the health-care system by the Office of Inspector General (OIG) of the federal Department of Health and Human Services. These are the most detailed and comprehensive organizational compliance guidance prepared by regulators in any industry, and they have been relied upon by other government agencies outside of health

care, including the Department of Justice. The OIG has stated that "[t]he development of these types of compliance program guidances is based on our belief that a health care provider can use internal controls to more efficiently monitor adherence to applicable statutes, regulations and [federal] program requirements."ⁿ⁷¹

The OIG has issued compliance program guidance for at least 13 separate segments of the health-care industry. While each contains sections geared toward the specific component at issue such as managed care organizations or physician practices, these guidance documents share many common characteristics and provisions.ⁿ⁷² Moreover, although adoption of the program elements and activities in these documents is "voluntary," every organization involved in federal health-care programs must have a compliance program, and most have wisely taken the OIG's guidance and advice about the shape and substance of those programs.

Each of these guidance documents is based on the compliance program elements of the FSGO. One of the steps recommended by the OIG in every compliance program guidance document is for health-care organizations to implement "compliance and practice standards through the development of written standards and procedures." According to the OIG, "[w]ritten standards and procedures are a central component of any compliance program." Other basic components, reflecting the compliance program elements found in the DII Principles and the FSGO, include monitoring and auditing, training and education, discipline procedures, "open lines of communication," prompt disclosure of compliance violations and the designation of a compliance officer.ⁿ⁷³

The standards "should function in the same fashion as a constitution, i.e., as a fundamental document that details the fundamental principles, values and framework for action within the organization." Much like the DII principles,ⁿ⁷⁴ these regulations include the consequences for failure to comply with these rules:

The standards should not only address compliance with statutes and regulations, but should also set forth broad principles that guide employees in conducting business professionally and properly. In short, the standards should promote integrity, support objectivity and foster trust.ⁿ⁷⁵

The OIG recommends that companies also establish "a comprehensive set of written policies addressing all applicable statutes, rules, and [Medicare] program instructions." These policies should address identified risk areas and contain more specific procedures for employees to follow, than would be found in the standards of conduct.

[e] Compliance Perspectives of Other Agencies

Similar reliance on the compliance program elements of the FSGO, including the requirement for compliance-related policies and procedures such as a code of conduct, can be found in the policies of other agencies.

[i] *The Environmental Protection Agency*

In 2000, the federal Environmental Protection Agency ("EPA") issued a revised enforcement and voluntary disclosure policy that expressly provides incentives for "self-policing: discovery, disclosure, correction and prevention."ⁿ⁷⁶ This policy gives organizations the opportunity to avoid prosecution for environmental law violations if, among other things, they discover violations through "a compliance management system that reflects due diligence in preventing, detecting and correcting violations." According to the policy, this system must specifically reflect compliance program elements that are similar to those in the FSGO, including "compliance policies, standards and procedures that identify how employees and agents are to meet the requirements of laws, regulations, permits, enforceable agreements and other sources of authority for environmental requirements."

[ii] *The State Department*

As another example, the U.S. Department of State has issued compliance criteria for registered exporters and manufacturers of arms.ⁿ⁷⁷ These criteria include "corporate commitment and policy with directives by senior company

management; ... internal monitoring and audits to ensure the integrity of the compliance program; training; procedures for voluntary disclosure; confidential advice ... to employees; procedures to foster employee discipline such as keying certain types of advancement to compliance understanding and implementation; and the establishment of internal disciplinary mechanisms."

[iii] *Financial Services Regulators--Anti-Money Laundering*

The USA Patriot Act of 2001 (the "Patriot Act"), the congressional response to the attacks of September 11, 2001, requires a broad range of financial institutions to establish programs to prevent and combat money laundering.ⁿ⁷⁸ These programs must include, at a minimum:

- (1) Internal policies, procedures and controls;
- (2) Designation of a compliance officer for the program;
- (3) Ongoing employee training; and
- (4) An independent audit of the program.

Regulations to implement this section of the Patriot Act, from various agencies including the New York Stock Exchange, the Financial Industry Regulatory Authority (FINRA) and its predecessor the National Association of Securities Dealers ("NASD") and the U.S. Treasury Department, go into greater detail about what must be in the anti-money-laundering compliance programs. In every instance, the regulations reflect the FSGO's elements of an effective compliance program and, in the process, place a set of compliance policies and procedures at the center of these private-sector efforts to fight terrorism and crime.

For example, one of the first anti-money laundering regulations, Special NASD Notice to Members 02-21, provided that member financial services firms must "establish and implement policies and procedures that can be reasonably expected to detect and cause" the reporting of possible money laundering and that are "reasonably designed to achieve compliance" with federal anti-money laundering regulations:

Further, in developing program criteria, firms should consider the guidelines established by the United States Sentencing Commission in the U.S. Sentencing guidelines for organizations, as well as the fiduciary responsibilities of officers and directors to ensure that the firm's compliance programs are viable and effective.ⁿ⁷⁹

For another example, in 2007, the Federal Financial Institutions Examination Council issued the latest in a series of Comprehensive Bank Secrecy Act/Anti-Money Laundering Examination Manual.ⁿ⁸⁰ This Manual reiterates the obligations of banks to "develop, implement and maintain effective AML (anti-money laundering) programs that address the ever changing strategies of money launderers and terrorists." These programs must be tailored to each bank's specific risks and must include "policies, procedures, and processes" for ensuring compliance with all applicable regulations. Similarly, on November 3, 2005, the Financial Crimes Enforcement Network (FINCEN) issued a final rule requiring that insurance companies establish anti-money laundering compliance programs that, at a minimum, include policies, procedures and internal controls; a designated compliance officer; on-going training for "appropriate persons"; monitoring of compliance by the company's brokers and agents; and a process for updating the program "as necessary."ⁿ⁸¹

[iv] *The Securities and Exchange Commission*

WorldCom

In 2002, the SEC responded to one of the more spectacular corporate frauds of the era--WorldCom--by obtaining a permanent injunction requiring the company to secure an independent review of its "corporate governance systems, policies, plans and practices" including "whether WorldCom has an adequate and appropriate code of ethics and business conduct, and related compliance mechanisms."⁸² In addition to this requirement, the federal judge overseeing the securities fraud case against WorldCom ordered the company to train employees on business ethics and required that a sworn "Ethics Pledge" be signed by the Chief Executive Officer. The company then agreed to extend the pledge requirement to others in senior management and ultimately to all employees.⁸³

Investment Advisors

Similarly, one reaction of regulators to the mutual fund scandals that erupted in 2003 was a final rule from the SEC to require that all registered investment companies adopt a code of ethics, including comprehensive written policies and procedures designed to prevent violations of federal laws and regulations. These organizations must also appoint designate a compliance officer to implement and help enforce these policies and procedures:

We urge advisors to take great care and thought in preparing their codes of ethics, which should be more than a compliance manual. Rather, a code of ethics should also set out ideals for ethical conduct premised on fundamental principles of openness, integrity, honesty and trust. A good code of ethics should effectively convey to employees the value the advisory firm places on ethical conduct, and should challenge employees to live up not only to the letter of the law, but also to the ideals of the organization.⁸⁴

The Seaboard Report

On October 23, 2001, the SEC issued an influential document--the so-called 21(a) Report in the *Seaboard* case.⁸⁵ This report explained why the agency was taking enforcement action against the former controller of a public company's subsidiary, but *not* taking action against the public company itself. The SEC noted that "self-policing, self-reporting, remediation and cooperation with law enforcement" are "unquestionably important in promoting investors' best interests." It then detailed 13 criteria that the agency will consider in determining whether to bring charges and, if so, the *severity* of charges brought and sanctions to be sought. Among these criteria are the extent of the harm, the level of personnel involved, the immediacy and effectiveness of the company's response to the misconduct, and the timeliness and completeness of its notification to and cooperation with regulators. Moreover, regulators must ask if the company has adopted "new and more effective internal controls and procedures designed to prevent a recurrence of the misconduct?"

The Seaboard report has become a must-read for corporate counsel and compliance officers confronted with allegations of misconduct and a road-map for how their organizations should respond to these allegations in an effort to avoid the most damaging outcomes. As former SEC Commissioner Glassman has remarked, companies in trouble should "get good counsel--counsel that understand our rules and processes ... [I]t is [also] important that you are aware of and understand the relationship of cooperation to SEC enforcement decisions--the so-called 'Seaboard' factors that we may consider in determining sanctions."⁸⁶

In a significant, related development, the SEC on January 4, 2006, issued a "Statement of the Securities and Exchange Commission Concerning Financial Penalties".⁸⁷ The statement was released to "provide the maximum possible degree of clarity, consistency, and predictability" in the Commission's exercise of its authority to punish organizations for violations of federal securities laws and regulations. Among the factors that the SEC will consider are whether the organization has taken any remedial steps and the extent of the company's cooperation with the regulators: "The degree to which a corporation has self-reported an offense, or otherwise cooperated with the investigation and remediation of the offense, is a factor that the Commission will consider in determining the propriety of a corporate penalty." In one

contemporaneous example, the SEC charged six former officers of a financial institution with fraud but not the institution itself because of the company's "swift, extensive and extraordinary cooperation." This cooperation included "prompt self-reporting, an independent internal investigation, sharing the results of that investigation with the government [without asserting applicable privileges], terminating and otherwise disciplining responsible wrongdoers, providing full restitution to its defrauded clients, and implementing new controls designed to prevent the recurrence of fraudulent conduct."ⁿ⁸⁸

This policy statement has been the subject of fierce debate regarding the appropriateness and scope of corporate versus individual penalties. In the course of this debate, SEC commissioners and staff have offered their views on the value of organizational compliance efforts. Commissioner Louis Aguilar has suggested that, in determining whether a corporate penalty is warranted, regulators should consider "[t]o what degree was the company's culture respectful of the law, on the one hand, or driven to achieve particular results on the other hand? Did the company have appropriate policies and procedures reflecting best practices for its size, business and other circumstances? Was the board vigilant in overseeing management and steering the company?" He added his confidence "that companies can design efficient systems of compliance if properly motivated."ⁿ⁸⁹

In September 2009, the SEC filed settled Regulation FD charges against a chief financial officer for his selective disclosure of material, non-public information to a group of analysts. In deciding not to bring charges against the company, the SEC explained that the organization had "cultivated an environment of compliance" by adopting relevant policies and providing training. The company also promptly reported the matter, cooperated with the investigation and added controls to prevent future problems.ⁿ⁹⁰

However the larger debate about corporate penalties turns out, it is likely that regulators will continue responding to scandals, organizational failings and industry problems by either mandating that organizations adopt and enforce codes of conduct and other appropriate controls in the relevant areas of concern or giving credit to those organizations that have done so when they decide whether to pursue penalties against the organization and, if so, how harsh those penalties should be.

[f] The Department of Justice

[i] *The Holder Memorandum*

In 1999, the Department of Justice (the "DOJ") officially added its influential voice to the encouragement and advice received by organizations regarding codes of conduct, by issuing for all federal prosecutors a document entitled *Bringing Criminal Charges Against Corporations*.ⁿ⁹¹ This document, named the "Holder Memorandum" because it was written by then Deputy Attorney General (later Attorney General) Eric Holder, provided "guidance as to what factors should generally inform a prosecutor in making the decision whether to charge a corporation in a particular case." By its terms, then, this document moved questions about acceptable compliance programs from the end of the criminal justice process--the sentencing of convicted organizations--to far more frequent, and much earlier, pre-charging deliberations by prosecutors.

The Holder Memorandum devoted an entire section to corporate compliance programs. This section began by noting that the DOJ "encourages such corporate self-policing, including voluntary disclosures to the government of any violations that a corporation discovers on its own."ⁿ⁹² The memorandum then followed with the less encouraging statement that "the existence of a compliance program is not sufficient, in and of itself, to justify not charging a corporation for criminal conduct undertaken by its officers, directors, employees, or agents. Indeed, the commission of such crimes in the face of a compliance program may suggest that corporate management is not adequately enforcing its program."

Nonetheless, a compliance program could make a difference, according to the Holder Memorandum, especially with

regard to whether the corporation would be criminally charged for the misdeeds of its employees:

Prosecutors should ... attempt to determine whether a corporation's compliance program is merely a "paper program" or whether it was designed and implemented in an effective manner ... In addition, prosecutors should determine whether the corporation's employees are adequately informed about the compliance program and are convinced of the corporation's commitment to it. This will enable the prosecutor to make an informed decision as to whether the corporation has adopted and implemented a truly effective compliance program that, when consistent with other federal law enforcement policies, may result in a decision to charge only the organization's employees and agents.ⁿ⁹³

The memorandum explained that the DOJ did not have its own "formal guidelines for effective compliance programs," and it specifically referred prosecutors to the FSGO "[f]or a detailed review of these and other factors concerning corporate compliance programs." The memorandum further suggested that prosecutors look to the experiences of the Department of Defense, the Department of Health and Human Services, the EPA and the SEC (experiences we have discussed earlier in this chapter) for assistance in this regard.ⁿ⁹⁴

[ii] *The Thompson Memorandum*

Three and a half years after issuing the Holder Memorandum, in the midst of the Enron investigation and other corporate scandals, the DOJ revised its guidance for prosecutors who were deciding whether to charge organizations with federal crimes. On January 20, 2003, the Department issued the "Thompson Memorandum," which was authored by then Deputy Attorney General Larry D. Thompson, who was also head of the President's Corporate Fraud Task Force. This document, entitled *Principles of Federal Prosecution of Business Organizations* (hereinafter referred to as the "Principles"), reaffirmed the guidance in the Holder Memorandum, with some important changes.ⁿ⁹⁵ For example, in contrast to its predecessor, it specifically defines "corporation" to include "all types of business organizations, including partnerships, sole proprietorships, government entities, and unincorporated associations."ⁿ⁹⁶

More importantly, the Thompson Memorandum said that "in all cases involving corporate wrongdoing, prosecutors *should* consider the factors discussed herein."ⁿ⁹⁷

The compliance program section provided that federal prosecutors, in "conducting an investigation, determining whether to bring charges, and negotiating plea agreements" should consider, among a number of factors, "the existence and adequacy of the corporation's compliance program."ⁿ⁹⁸ This section largely repeated the corresponding section of the Holder Memorandum, including the references to the FSGO and related compliance guidance from various regulators. Prosecutors had to ask the same questions that corporate counsel should be asking about the organization's compliance program: "Is the compliance program well-designed?" and "Does the corporation's compliance program work?" Among the issues that prosecutors should review are whether the organization's compliance program is "designed to detect the particular types of misconduct most likely to occur" in its line of business and whether the program has been given "staff sufficient to audit, document, analyze, and utilize the results" of its compliance efforts.

Federal prosecutors were urged to determine whether the organization has established "corporate governance mechanisms" to prevent and detect misconduct:

[A]re the directors provided with information sufficient to enable the exercise of independent judgment; are internal audit functions conducted at a level sufficient to ensure their independence and accuracy and have the directors established an information and reporting system in the organization reasonably designed to provide management and the board of directors with timely and accurate information sufficient to allow them to reach an informed decision regarding the organization's compliance with the law.ⁿ⁹⁹

The Thompson Memorandum then cited the *Caremark* decision to support this line of inquiry. This discussion of corporate governance and the role of the board of directors undoubtedly reflected the government's view that the failure of the Enron board of directors to meet this standard contributed to the company's collapse, and that an organization cannot have an "effective" compliance program without the active involvement of its "governing authority" in establishing, overseeing and continually evaluating the program.

Another section of the Thompson Memorandum echoed the recommendation of its predecessor that a prosecutor also consider a corporation's remedial actions once misconduct has been revealed, "including any efforts to implement an effective corporate compliance program or to improve an existing one, to replace responsible management, to discipline or terminate wrongdoers, to pay restitution, and to cooperate with the relevant government agencies."¹⁰⁰

One change in the Thompson Memorandum proved especially contentious. It instructed prosecutors to increase their "emphasis on and scrutiny of the authenticity of a corporation's cooperation" with the government. In deciding whether to charge an organization, prosecutors were to consider the organization's "timely and voluntary disclosure of wrongdoing and its willingness to cooperate in the investigation of its agents, including, if necessary, the waiver of corporate attorney-client privilege and work product protection." The Memorandum further explained that, in assessing an organization's cooperation, prosecutors should determine if the company has retained errant employees without sanction or advanced attorneys' fees to employees under investigation. Among the difficult issues that the memorandum raised was whether the government would expect or require that an organization waive its protections to receive credit for cooperation.¹⁰¹

An unlikely coalition of corporate counsel, defense attorneys and business groups including the Business Roundtable and the U.S. Chamber of Commerce was organized to resist this perceived effort to weaken the attorney-client privilege. One outcome of the efforts of this Coalition to Preserve the Attorney-Client Privilege was the introduction in the 110th Congress by Senator Arlen Specter (R-Pa) of the "Attorney-Client Privilege Act of 2007." The Act finds that "the ability of an organization to have effective compliance programs and to conduct comprehensive internal investigations is enhanced when there is clarity and consistency regarding the attorney-client privilege." As such, the Act would generally prohibit federal prosecutors from demanding waiver of the privilege from an organization under investigation or from conditioning "a civil or criminal charging decision" on "any valid assertion of the attorney-client privilege or privilege for attorney work product." On February 13, 2009, the Act was reintroduced by Senator Specter.

In the meantime, the application of the Thompson Memorandum was successfully challenged in a prosecution involving KPMG, in which the district court issued three successive opinions.¹⁰² In the first opinion, the court found that pressure from prosecutors, based on the Thompson Memorandum, caused KPMG to refuse to advance attorneys' fees for its current and former employees, reversing longstanding company policy. Such pressure, the court held, violated the individual defendants' *Fifth* and *Sixth Amendment* rights. In the second ruling, the court suppressed statements made by two of the defendants following threats by KPMG to fire them if they did not cooperate with the government. In the court's view, "the government is responsible for the pressure that KPMG put on its employees. It threatened KPMG with the corporate equivalent of capital punishment. KPMG took the only course open to it."¹⁰³ [Citation.]

In the third ruling, dismissing the charges against 13 of the individual defendants, the court concluded that the prosecution's application of the Thompson memorandum violated due process because none of the defendants had "the resources to defend this case as he or she would have" had the prosecutors not "prevented" KPMG from continuing to pay their defense costs. The government's "deliberate interference with the defendants' rights was outrageous and shocking in the constitutional sense because it was fundamentally at odds with two basic constitutional values—the right to counsel and the right to fair criminal proceedings."¹⁰⁴

These events led the Justice Department to issue yet another memorandum on this subject.

[iii] *The McNulty Memorandum*

On December 12, 2006, then Deputy Attorney General Paul McNulty issued a memorandum superseding the Thompson Memorandum.ⁿ¹⁰⁵ While the McNulty Memorandum carried over many of the principles of the Holder Memorandum and the Thompson Memorandum, it departed from the prior guidance in two significant ways. The changes largely reflected pressure from defense lawyers, bar associations and others--as well as litigation, court decisions and the proposed legislation--in response to the Department of Justice's policies and practices in the areas of (a) waivers of the attorney-client privilege and (b) corporations' advancement of legal fees to subjects and targets of investigations.

The McNulty Memorandum required that federal prosecutors seek written approval within the Department of Justice before requesting waivers of the attorney-client privilege or work-product protection. It also stated the Department's policy regarding the attorney-client privilege and the work product doctrine. In remarks accompanying release of his memorandum, Deputy Attorney General McNulty asserted that "attorney-client communications should only be sought in rare cases." The Memorandum then detailed the test that prosecutors must meet in order to demonstrate these uncommon circumstances. Even with regard to "relatively non-controversial" requests to companies for *factual* information, the McNulty Memorandum required that prosecutors now establish a need for the information in written requests for approval to their United States Attorney, who must consult with officials of DOJ's Criminal Division. Further, the McNulty Memorandum generally prohibited prosecutors, in assessing companies' cooperation with the government, from considering whether they are advancing attorneys' fees to their employees or agents. In return for these concessions, Deputy Attorney McNulty challenged corporate counsel to "insist on compliance with the law ... to stand up against those in corporate leadership who pillage corporate coffers to benefit themselves rather than their shareholders."ⁿ¹⁰⁶

Contrary to the Justice Department's hope, the McNulty memorandum did not end the debate or the pressure to modify its approach to corporate cooperation and privilege. So the Justice Department produced yet another memorandum, one that seems to have quieted many of the critics.

[iv] *The Filip Letter and Memorandum*

On July 28, 2008, then Deputy Attorney General Mark Filip sent a letter to Senators Patrick Leahy and Arlen Specter informing them that he had completed an internal review of the Justice Department's Principles of Federal Prosecution of Business Organizations. He did so in response to the continuing claim that the Department was forcing corporations to waive their attorney-client and work product privileges in order to get credit under these principles for cooperating with the government. He also was responding to concerns, reflected in the KPMG case, that the Department was improperly limiting or refusing to grant cooperation credit when "the corporation has advanced attorneys' fees to its employees, failed to fire or sanction allegedly culpable employees, or entered into joint defense agreements."

In August 2008, following a series of meetings the Department held with in-house counsel, criminal-defense attorneys and other interested parties, the Justice Department completed revisions to the Principles to address these issues. These revisions provide that:

- Cooperation by organizations will be determined based on the facts that are disclosed to the prosecution, not by the waiver of privileges.
- Prosecutors will not insist on the disclosure of "core attorney-client privileged communications" or "non-factual" work product before granting cooperation credit.
- Prosecutors will not consider either the advancement of attorneys' fees or joint defense agreements in evaluating cooperation.
- In evaluating the organization's compliance program but not in assessing its cooperation, the

government will consider whether and how a company disciplines its employees.

Most important for purposes of this chapter, this new version of the Principles maintains the emphasis on whether the corporation being sentenced has an effective compliance program, reiterating the language from the Holder Memorandum that a corporation's adoption of "a truly effective compliance program ... may result in a decision to charge only the corporation's employees and agents or to mitigate charges or sanctions against the corporation." This emphasis in the revised Principles substantiates one of the underlying principles of this chapter: A compliance program can prevent violations of law or regulations or, in the case of violations by individual employees, can help insulate a company from prosecution or an enforcement action.

The Filip Letter and Memorandum with the revised Principles of Federal Prosecution of Business Organizations can be found in Appendix 13-B to this chapter.

[g] The United States Supreme Court

Beginning in 1998, the United States Supreme Court decided a series of cases that further enhanced the value of organizational compliance programs and codes of conduct. These cases all arose in the context of employment discrimination litigation.

In two of these cases, the Court gave employers an affirmative defense to their liability for sexual harassment by supervisory employees, at least in those cases in which a "hostile work environment" rather than a tangible employment action such as discharge or demotion is at issue:

The defense comprises two necessary elements: (a) that the employer exercised reasonable care to prevent and correct promptly any sexually harassing behavior, and (b) that the plaintiff employee unreasonably failed to take advantage of any preventive or corrective opportunities provided by the employer or to avoid harm otherwise.¹⁰⁷

Among the steps that could constitute "reasonable care" by an employer are the adoption and effective communication of a policy against sexual harassment, as well as the availability to all employees of "a sensible complaint procedure" that enables them to raise issues and instances of concern to the management of the organization.¹⁰⁸

The following year, the Court held that an employer can avoid liability for punitive damages in connection with "the discriminatory management decisions of managerial agents" if it can show that "those decisions are contrary to the employer's good faith efforts" to comply with anti-discrimination laws. The Court in this case made reference to the policies and "grievance mechanisms" discussed in the two earlier cases, concluding that the purposes of anti-discrimination laws are "advanced where employers are encouraged to adopt anti-discrimination policies and to educate their personnel."¹⁰⁹

A number of lower court cases interpreting and applying these opinions by the Supreme Court have stressed the importance of developing and implementing an anti-discrimination policy; repeatedly communicating this policy to all employees; training employees about its provisions; providing a means for employees to report instances of possible discrimination; promptly and thoroughly investigating those reports; and taking appropriate action to enforce the policy, including discipline of offenders.¹¹⁰ As one court explained, there is "a form of safe haven for employers who promulgate and support an active anti-harassment policy."¹¹¹

In one such case involving a claim of sexual harassment, the New Jersey Supreme Court held that employer's anti-harassment policy must be more than just a "paper policy"; it must reflect an "unequivocal commitment from the top that [the organization's policy against sexual harassment] is not just words but is backed up by consistent practice."¹¹² The court emphasized the policy should also be part of a comprehensive program including formal

policies prohibiting harassment, training for supervisors and managers, "complaint structures" for employees to use, and a demonstrated commitment to monitoring and consistent enforcement.¹¹³

These steps mirror the FSGO's elements of an effective compliance program, and as a result, many organizations have incorporated their anti-discrimination policy into an overall compliance program. These organizations have included the substantive and procedural program elements listed in these cases in their company-wide codes of conduct.

[h] The Business Community Responds

[i] *The Business Roundtable & The Conference Board*

The business community responded to the corporate accounting scandals that began with the collapse of Enron in 2001 by encouraging self-policing and correction. In May 2002, the Business Roundtable issued an influential report, *Principles of Corporate Governance*.¹¹⁴ It concluded that:

A corporation should have a code of conduct with effective reporting and enforcement mechanisms. Employees should have a means of alerting management and the board to potential misconduct without fear of retribution, and violations of the code should be addressed promptly and efficiently.¹¹⁵

This report recommended that senior management, particularly the CEO, set a "tone at the top" that establishes an organizational "culture" of compliance and integrity and also that the audit committee of the board of directors--if not the full board--review the corporation's procedures addressing legal and regulatory compliance, including the code of conduct. The Business Roundtable updated these Principles in November 2005, reinforcing the importance of a comprehensive code of conduct and reminding management of its responsibility "to take reasonable steps to develop, implement and maintain an effective legal compliance program."¹¹⁶

Another influential business organization, The Conference Board, called for companies to make their boards of directors "responsible for overseeing corporate ethics ... including adherence to the law's requirements." Specific "best practices suggestions" included a list of items that matched the FSGO's elements of an effective compliance program:

- (1) Programs to ensure that employees understand, apply, and adhere to the company's code of ethics;
- (2) Designation of an officer to oversee ethics and compliance with the code of conduct;
- (3) Processes that encourage and make it safe for employees to raise ethical issues and report possible ethical violations;
- (4) Processes for prompt investigation of complaints and prompt disposition, including discipline and corrective action, if necessary; and
- (5) Processes to measure and track employees' adherence to the company's ethical requirements and to assess the ethical performance of the company.¹¹⁷

These organizations recognized that it was better to implement a compliance program proactively, based on the FSGO and including a code of conduct, than to do so during or after an investigation.

[ii] *Sarbanes-Oxley Act Emergers*

This is where matters stood in the spring of 2002, as Congress considered the Sarbanes-Oxley Act--its response to the scandals in corporate governance and accounting. There was a large body of experience with corporate codes of conduct, and growing acceptance by public officials and private industry of the merits of including such codes in any

comprehensive measures to address organizational misconduct. The Sarbanes-Oxley Act became the first of three steps that--over a two-year period--brought all of this experience to bear in a highly significant way.

CHAPTER 13 COMPLIANCE AND THE CODE OF CONDUCT

2-13 Corporate Governance: Law and Practice § 13.03

AUTHOR: Jay M. Cohen

§ 13.03 Section 406 of the Sarbanes-Oxley Act of 2002

[1] Objectives for Sarbanes-Oxley Section 406

Congress demonstrated more than just acceptance of organizational codes of conduct in the Sarbanes-Oxley Act of 2002ⁿ¹ (the "Sarbanes-Oxley Act" or "Sarbanes-Oxley"); in Section 406, it made these codes a necessary part of the governance of every public company.ⁿ² Section 406 occupied little more than one page of the 130-page Act, but its construction has ensured a much bigger impact. In fact, this section set off a round of rule-making by the SEC and the stock exchanges that--at each step along the way--dramatically broadened both the subjects that must be included in an organizational code of conduct and the number of people covered by it.

By its title, Code of Ethics for Senior Financial Officers, Section 406 was clearly aimed at the perceived self-dealing and conflicts of interests involving the Enron chief financial officer and other high-ranking financial officials at that company. Congress acted contemporaneously with influential professional organizations like the Financial Executives International, which recommended--in light of Enron--that "all senior financial professionals be required to adhere to a strong ethical code of conduct."ⁿ³

The report of the Senate Committee on Banking, Housing and Urban Affairs, which accompanied the adoption of the Sarbanes-Oxley Act, explained Congress' reason for including Section 406 in the Act:

The problems surrounding Enron Corp. and other public companies raise concerns about the ethical standards of corporations and their senior financial managers. The Committee believes that investors have a legitimate interest in knowing whether a public company holds its financial officers to certain ethical standards in their financial dealings.ⁿ⁴

[2] Elements of the Section 406 Code

[a] "Comply or Explain"

Sarbanes-Oxley Section 406 can be divided into five elements. First, the section did not mandate that every public company have a code of ethics. Instead, it adopted a "comply or explain" approach, commanding the SEC to "issue

rules to require each issuer ... to disclose whether or not, and if not, the reason therefor, such issuer has adopted a code of ethics for senior financial officers."⁵ Organizations could legally choose not to have such a code as long as they justified their decision. Of course, what organization would decide to publicly explain why it did not believe such an effort at organizational integrity was necessary or appropriate, especially given the enormous public skepticism about corporate ethics and integrity at the time the Sarbanes-Oxley Act was passed?

[b] Senior Financial Officers

Second, Section 406 listed the senior financial officers required to be covered by this code as "the principal financial officer and comptroller or principal accounting officer, or persons performing similar functions."⁶ This meant that only a small number of officers and employees in each organization were implicated by this mandate although, as noted below, the SEC and the stock exchanges would choose to include a substantially wider group.

[c] Definition of "Code of Ethics"

Third, Section 406 defined the term "code of ethics" as:

Such standards as are reasonably necessary to promote--

- (1) honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships;
- (2) full, fair, accurate, timely, and understandable disclosure in the periodic reports required to be filed by the issuer; and
- (3) compliance with applicable governmental rules and regulations.⁷

Understandably, in light of the scandals at the time, this section specifically referenced conflicts of interest and the accuracy and integrity of publicly-issued financial reports. Then Senator John Corzine, who proposed inclusion of the code of ethics in the Sarbanes-Oxley Act, noted that "there have been 1,100 corporate earnings reinstatements in the last 4 years. There is a basic loss of more than just the simple sense of trust that people get from the headlines. It is hard for people to make investment decisions when they don't have good facts, good numbers, and the ability to draw good conclusions about where the investor dollar should go."⁸

What is striking is that Congress also mentioned regulatory compliance and more general "honest and ethical conduct" in this section. The standards in Section 406 thus go well beyond conflicts of interest and financial reporting to potentially encompass a much broader range of organizational issues. The far reach in practice of this seemingly simple section of the Sarbanes-Oxley Act would be demonstrated in the compliance rule-making that followed.

[d] Disclosure of Changes or Waivers

Fourth, Congress ordered the SEC to mandate "the immediate disclosure, by means of filing such form [8-K], dissemination by the Internet, or by other electronic means ... of any change in or waiver of the code of ethics."⁹ Again, this was a direct response to revelations that the Enron Board of Directors may have waived the conflicts of interest provisions in that company's code of conduct, when the board approved some of the financial arrangements that led to the company's downfall. This further reflected Congress' view that requiring public disclosure of these activities would be as effective in promoting corporate integrity as prohibiting them.

CHAPTER 13 COMPLIANCE AND THE CODE OF CONDUCT

2-13 Corporate Governance: Law and Practice § 13.04

AUTHOR: Jay M. Cohen

§ 13.04 SEC Rules to Implement Section 406 of the Sarbanes-Oxley Act

[1] "Comply or Explain" Remains

On January 23, 2003, the SEC issued final rules to implement Section 406, in addition to rules related to other sections of the Sarbanes-Oxley Act.ⁿ¹ This was the second step in the evolution of the code of conduct mandate. Like the Act itself, the SEC did not insist that companies have codes of ethics:

The final rules require a company to disclose whether it has adopted a code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. If the company has not adopted such a code of ethics, it must explain why it has not done so.ⁿ²

However, "comply or explain" did not last much longer. The stock exchange listing standards that were approved after the release of these rules eliminated the "explain" option.ⁿ³

In other areas, the SEC took full advantage of the authority it was given by Congress to make a number of significant changes to the code of ethics defined by Sarbanes-Oxley.

[2] The "Principal Executive Officer" Also

The SEC determined that this code of ethics should apply to "a company's principal executive officer" in addition to the senior financial officers who had to be covered under the Sarbanes-Oxley Act. In proposing this change, the SEC said that "[i]nvestors not only have an interest in knowing whether a public company holds its senior financial officers to certain ethical standards, but also whether a public company holds its principal executive officer to ethical standards as well." At the same time, the SEC rejected suggestions to apply this requirement to other individuals in the organization such as directors, all executive officers, and employees generally, but it did "encourage companies to apply the code of ethics to as broad a spectrum of personnel and affiliates as possible."ⁿ⁴

[3] Substantive Changes

The final SEC rule defined the term "code of ethics" much more broadly than Section 406. It was now defined as "written standards that are reasonably designed to deter wrongdoing and to promote:

- (1) Honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships;
- (2) Full, fair, accurate, timely and understandable disclosure in reports and documents that a registrant files with, or submits to, the Commission and in other public communications made by the registrant;
- (3) Compliance with applicable governmental laws, rules and regulations;
- (4) The prompt internal reporting to an appropriate person or persons identified in the code of violations of the code; and
- (5) Accountability for adherence to the code."⁵

[4] Process Also Matters

In the most drastic changes from the statute, the SEC added two new sections (numbers (4) and (5) in § 13.04[3] above) which require organizations to provide mechanisms for "prompt internal reporting" of any code violations and the identification of a person or persons to receive such reports,⁶ and some means to promote "accountability" for compliance with the code provisions.⁷ They were needed, according to the SEC, because "an effective code of ethics should describe the company's system for the internal reporting of code violations. The code should state clearly the consequences for non-adherence to code provisions."⁸

As the result of these substantive and procedural enhancements, the "code of ethics" mandate now incorporated a number of the elements of an "effective" compliance program, as detailed in the FSGO and the other expert guidance discussed above. The mandate's inclusion of "honest and ethical conduct" in addition to legal and regulatory compliance parallels the FSGO's new focus on an organizational culture that promotes "ethical conduct and legal compliance." It thereby has brought into play much of the private-sector experiences and public-sector expectations that we reviewed earlier in this chapter.

With regard to the individual or individuals who must be designated to help administer the code, the SEC said that "although the company would retain discretion to determine the identity of the appropriate person or persons ... we believe the person identified in the code should have sufficient status within the company to engender respect for the code and the authority to deal with persons subject to the code regardless of their stature in the company."⁹ This corresponds to the "high-level" personnel envisioned by the FSGO and adds weight to the view that compliance and ethics officers must have clout, resources and access to top management in order to be effective and acceptable to the regulators.

[5] One Code or Two?

The SEC recognized that "[m]any companies already maintain codes of ethics or conduct" and that "a pre-existing code may satisfy the requirements" of this rule. However, "if a company has a code but it does not satisfy parts of the definition [in the rule,] the company would not be able to affirm that it has the type of code contemplated by the rules." Companies may have "separate codes of ethics for different types of officers" or they may include the SEC-prescribed code as part of "a broader document that addresses additional topics or that applies to more persons" than those specified in the rule.¹⁰ The SEC, in essence, told organizations that they should choose to do the latter,

We strongly encourage companies to adopt codes that are broader and more comprehensive than

necessary to meet the new disclosure requirements.¹¹

[6] Disclosure of the Code

With respect to disclosure of the code, the SEC again went further than Section 406 in commanding that each company disclose the entire code (if it has one), as well as any waivers and amendments of it. A company can:

- (1) File the code as an exhibit to its annual report, as part of the Form 10-K;
- (2) Post the ethics report and code of conduct on the company website normally used for investor relations, as long as the company disclosed in its annual report both its intention to do so and the website address; and
- (3) Indicate in the annual report that it will provide a copy of the code to any person, without charge, upon request.¹²

Organizations which have more extensive codes, or codes that apply to a larger group of employees, need disclose only "the portions of a broader document that constitutes a code of ethics" as defined by this rule.¹³

[7] Changes or Waivers

In accordance with Section 406, the SEC rules require that companies file a Form 8-K to disclose any amendments to or changes in this code of ethics, other than technical, administrative or "non-substantive" amendments. Companies must "briefly describe the date and nature of any amendment" and then also file the amendment with its annual report. The Form 8-K must be filed within five business days of the occurrence of the event. As an alternative to filing a Form 8-K, companies can make such disclosures on their website but only with prior notice in their most recent annual report that they will be using this method of disclosure.¹⁴

Companies must similarly disclose any grant of a "waiver" including an "implicit waiver" of the provisions and application of the code. This description must include "the nature of the waiver, the name of the person to whom the waiver was granted, and the date of the waiver."

The rules define waiver as the approval by the company of a "material departure" from a provision of the code of ethics and define "implicit waiver" as the company's failure to take action "within a reasonable period of time" regarding a material departure from the code that has been made known to one of the company's executive officers.¹⁵ This places an added burden on the organization's systems for identifying, analyzing and responding to potential code violations, and for evaluating such information for possible disclosure. Interestingly, while the rules require that companies disclose waivers, they do not require that companies disclose violations.

The SEC added that:

Only amendments or waivers relating to the specified elements of the [SEC's] code of ethics and the specified officers must be disclosed. This clarification is intended to allow and encourage companies to retain broad-based business codes. For example, if a company has a code of ethics that applies to its directors, as well as to its principal executive officer and senior financial officers, an amendment to a provision affecting directors would not require Form 8-K or Internet disclosure.¹⁶

Not surprisingly, waivers of company codes of conduct have been relatively rare. Those waivers that have been disclosed range from the significant--permitting fairly substantial business dealings with outside organizations associated with company executives--to the mundane--such as permitting executives to accept gifts that exceed value

limits in the code or allowing employees who travel on company business to accept, for personal use, gifts from incentive programs offered by airlines, hotels, and car rental companies. One insurance company disclosed that it was paying a bank to provide it with commercial banking services while also owning nearly 10 percent of that bank's common stock. Another company disclosed the waiver of its code of ethics to allow it to acquire commercial real estate interests that were owned by the company's Chairman and CEO and two other directors.

CHAPTER 13 COMPLIANCE AND THE CODE OF CONDUCT

2-13 Corporate Governance: Law and Practice § 13.05

AUTHOR: Jay M. Cohen

§ 13.05 Related Sections of the Sarbanes-Oxley Act

[1] Whistleblowers

Several sections of the Sarbanes-Oxley Act were included to help encourage and protect corporate whistleblowers. These sections are relevant to our discussion about codes of conduct because organizations may choose to use their codes to explain, implement and enforce these provisions. The sections in question were included in the Sarbanes-Oxley Act in reaction to reports that Enron employees brought the company's accounting and other problems to the attention of senior management, including the chief executive officer, but got little response. It was reported that, in at least one instance, the company investigated whether it could take some employment action against an employee who raised such concerns. According to the Report of the Senate Judiciary Committee:

These examples further expose a culture, supported by law, that discourages employees from reporting fraudulent behavior not only to the proper authorities, such as the FBI and SEC, but also internally. This "corporate code of silence" not only hampers investigations, but also creates a climate where ongoing wrongdoing can occur with virtual impunity. The consequences of this corporate code of silence for investors in public-traded companies, in particular, and for the stock market in general, are serious and adverse, and they must be remedied.ⁿ¹

One important objective for the organization's code of conduct, and for the compliance officer and other internal resources helping to administer the code, is to help prevent this "code of silence" from developing.

Section 301 of the Sarbanes-Oxley Act requires that public company audit committees establish procedures for "the receipt, retention and treatment" of complaints or other concerns--from any source--about auditing and accounting matters, and for the "confidential, anonymous submission by employees" of concerns about these issues.ⁿ² Organizations may use their codes of conduct for publicizing to both employees and external audiences the availability of special telephone lines and other communications vehicles for this purpose.

Another section of the Sarbanes-Oxley Act, Section 1107, makes it a federal crime to take harmful employment action against any employee because the employee has provided law enforcement officers with "any truthful information relating to the commission or possible commission of any Federal offense."ⁿ³

A third section of Sarbanes-Oxley, Section 806, creates a civil cause-of-action for employees of public companies who believe they have suffered retaliation for providing information to the authorities, or otherwise assisting in the investigation of securities violations and other federal frauds. This section is enforced by the United States Department of Labor or by civil lawsuits in the federal courts.ⁿ⁴ The Department of Labor has assigned its responsibility to the Occupational Safety and Health Administration ("OSHA"), which administers several other whistleblower statutes for the federal government.

Three important points must be made about the scope of Section 806. First, the employee's allegations need not be correct to trigger the whistle-blower protection. The law prohibits retaliation against an employee who reports misconduct that the employee "reasonably believes" is a violation of law, even if it turns out that those violations never occurred. In 2009, the United States Court of Appeals for the Ninth Circuit ruled that two former in-house lawyers could sue for wrongful termination under section 806 of Sarbanes-Oxley without proving the truth of their claims that company officials engaged in misconduct.ⁿ⁵ In fact, OSHA does not even determine if there has been corporate wrongdoing; it only decides if the employee has been mistreated.

Second, contrary to what might be expected in a section of the Sarbanes-Oxley Act, the reported legal violations covered by this section are not limited to those involving accounting fraud and financial reporting by public companies. Under the Act, whistleblowers are protected for complaints involving possible violations of securities, bank, mail or wire fraud laws, as well as "any rule or regulation of the Securities and Exchange Commission, or any provision of federal law relating to fraud against shareholders."ⁿ⁶ In one case, Judge Sterling Johnson in the Eastern District of New York concluded that a corporate official who assisted a colleague in "opening a channel of communication with the company's CEO" in order for the colleague to complain about compensation and accounting practices had himself engaged in protected activity, even though he had "no knowledge of the company's accounting practices" other than what he was told by the colleague.ⁿ⁷ In another example, an administrative law judge held that the full protections of this section of the Sarbanes-Oxley Act applied to a vice president of the non-public subsidiary of a public company. The judge also rejected the argument that the protections did not apply because the allegedly "manipulated" financial reports were never publicly disclosed and were immaterial to the public parent company, concluding that "Sarbanes-Oxley is largely a prophylactic, not a punitive measure."ⁿ⁸ By contrast, the Department of Labor's Administrative Review Board concluded that, when a Sarbanes-Oxley whistleblower complaint relies on alleged violations of the federal mail and wire fraud statutes, "the alleged fraudulent conduct must at least be of the type that would be adverse to investors' interests."ⁿ⁹

Third, the consequences to organizations that lose whistleblower cases can be quite significant. OSHA or the courts can order reinstatement, back-pay and other awards such as attorney's fees and litigation costs.ⁿ¹⁰ To these formal consequences must be added the additional reputational damage that will follow, in the current environment, to companies deemed unfriendly to employee whistleblowers. At the same time, while the potential consequences from a whistleblower action are great, the likelihood that they will come to pass is small. According to the Department of Labor, nearly 1,300 whistleblower complaints have been filed since the passage of the Sarbanes-Oxley Act. The Department has dismissed 841 of these cases as without merit. As of the date of this writing, only 17 cases have resulted in a ruling in favor of the complainant. Of course, even with these favorable odds, no company welcomes a whistleblower claim. Companies that are now spending much time and resources on other sections of the Sarbanes-Oxley Act, such as Sections 302 and 404, would do well to make sure that they are also paying attention to Section 806.

Here again, organizations should use their codes of conduct to reinforce prohibitions against such retaliation and to inform employees of internal procedures for addressing their concerns, so that employees will not feel the need to access outside resources. As the United States Supreme Court made clear in March 2005 in a related context, when the Court concluded that the private right of action under Title IX of the Education Act encompassed claims of retaliation, "[w]ithout protection from retaliation, individuals who witness discrimination would likely not report it, indifference

claims would be short-circuited, and the underlying discrimination would go unremedied."¹¹ The Court reemphasized the importance of employee protection against retaliation in a 2009 case, in which it concluded that the law protected an employee who did not initiate a complaint but who reported evidence of sexual harassment in response to questions during an internal investigation.¹²

This reasoning applies with equal force to the full-range of organizational misconduct.

[2] Internal Controls and Codes of Conduct

Section 404 of the Sarbanes-Oxley Act requires the CEO and CFO of a public company to certify that they have established "an adequate internal control structure and procedures for financial reporting" in their organization; assessed the effectiveness of the design and operation of those controls; and had an independent evaluation by the company's outside auditor of this assessment.¹³ It is important to recognize that internal controls in this context potentially includes those non-financial business processes and procedures that can significantly impact the quality and accuracy of the information that goes into financial reports, and not just those controls specifically related to the preparation of these reports.

The SEC's final rule to implement this section requires that management identify "the framework used to evaluate the effectiveness of the organization's internal controls over financial reporting."¹⁴ The SEC further suggested that companies consider using for this purpose the control framework published in 1992 by the Committee of Sponsoring Organizations ("COSO") of the Treadway Commission. This framework requires internal controls to help organizations address the "effectiveness and efficiency of operations; reliability of financial reporting; and compliance with applicable laws and regulations."¹⁵ Obviously, companies will take seriously any suggestion from the SEC about the process they should use to comply with this mandate.

On March 9, 2004, the Public Company Accounting Oversight Board ("PCAOB")--the government agency established by the Sarbanes-Oxley Act to oversee the accounting industry--issued standards for auditing firms to use in evaluating management's actions under Section 404. These standards also reference the COSO framework.¹⁶ As part of its evaluation of internal controls at a public company, the external auditor must review the "code of ethics/conduct provisions, especially those related to conflicts of interest, related party transactions, illegal acts, and the monitoring of the code by management and the audit committee or board." Auditors must also test and evaluate "company-level controls" including the "tone at the top."¹⁷ The PCAOB issued additional guidance in this regard on May 16, 2005, reiterating that "the auditor begins by identifying, understanding, and evaluating the design of company-level controls." These include "the controls within the control environment, such as the tone at the top" and "all five COSO internal control components."¹⁸

One accounting firm has concluded that "a company's failure to have a documented code of conduct approved by the board of directors and its audit committee that is operating effectively is, at a minimum, a significant deficiency and a strong indicator of a material weakness" in internal controls.¹⁹ This means that a comprehensive and effective code of conduct is necessary to help organizations address a number of their obligations under the Sarbanes-Oxley Act, in addition to Section 406.

CHAPTER 13 COMPLIANCE AND THE CODE OF CONDUCT

2-13 Corporate Governance: Law and Practice § 13.06

AUTHOR: Jay M. Cohen

§ 13.06 The Stock Exchange Code of Conduct Listing Standards

[1] SEC Approves Stock Exchange Code of Conduct Requirements

The passage of the Sarbanes-Oxley Act was the first of three key steps in making the code of conduct a required part of the governance and management of every public company. The second step was the SEC's rulemaking related to Section 406 of Sarbanes-Oxley. The third step came on November 4, 2003, when the SEC approved proposals by the New York Stock Exchange ("NYSE") and the NASDAQ Stock Market, Inc. ("NASDAQ") to require codes of conduct for all companies listed on these exchanges.ⁿ¹ The SEC worked throughout 2003 to "harmonize" the separate NYSE and NASDAQ proposals to the extent possible and to assure that the proposals from both exchanges conformed to all of its regulations adopted pursuant to the Sarbanes-Oxley Act.ⁿ²

The SEC, in finally approving these rules, noted that "requiring listed issuers to adopt a code of conduct should help foster the ethical behavior of directors, officers and employees" because they "will know the standards expected of them ... and will be made fully cognizant that their actions will be monitored."ⁿ³

The result of this rulemaking process was the adoption of similar, but not identical, codes of conduct standards for each stock exchange. In general, the NYSE standards provide more detailed and specific guidance about the substantive elements of the code.

[2] The NYSE Code of Conduct Requirements

[a] NYSE Code of Business Conduct and Ethics

Section 303A.10 of the NYSE listing standards is entitled Code of Business Conduct and Ethics. The standard itself is simple and straightforward:

Listed companies must adopt and disclose a code of business conduct for directors, officers and employees, and promptly disclose any waivers of the code for directors or executive officers.ⁿ⁴

The NYSE standards continue the trend of expanding the reach and substance of the code of conduct requirement. First,

companies must *adopt* and disclose their code, eliminating the option in both Sarbanes-Oxley Section 406 and the SEC rules for organizations to choose to explain why they did not need to have a code. Second, the code will now apply to all *directors, officers and employees*. Thus, a code of ethics mandate that began, in the Sarbanes-Oxley Act, by applying only to "senior financial officers" will now apply to every director, officer and employee in the organization.

Third, the NYSE standards were accompanied by a lengthy commentary, providing guidance to listed companies about the substance and operation of their codes. The NYSE made clear in the first paragraph of this commentary its goals for these codes:

No code of business conduct and ethics can replace the thoughtful behavior of an ethical director, officer or employee. However, such a code can focus the board and management on areas of ethical risk, provide guidance to personnel to help them recognize and deal with ethical issues, provide mechanisms to report ethical conduct, and help to foster a culture of honesty and accountability.⁵

[b] Content of a NYSE-Listed Company's Code

The commentary to the standards gives NYSE-listed companies concrete guidance about the subjects to cover in their codes of business conduct and ethics. "Each company may determine its own policies, but all listed companies should address the most important topics, including the following":⁶

- Conflicts of interest--the commentary provides examples of conflicts and declares that the company "should have a policy prohibiting such conflicts of interest, and providing a means for employees, officers and directors to communicate potential conflicts to the company."
- Corporate opportunities--employees, officers and directors should be prohibited from using corporate assets for personal gain, competing against the company or taking personal advantage of "opportunities" discovered through the use of company information or other assets.
- Confidentiality--employees, officers and directors should "maintain the confidentiality of information entrusted to them by the company or its customers."
- Fair dealing--everyone should "endeavor to deal fairly with the company's customer, suppliers, competitors and employees. None should take advantage of anyone through manipulation, concealment, abuse of privileged information, misrepresentation of material facts, or any other unfair-dealing practice."
- Protection and proper use of company assets--"all company assets should be used for legitimate business purposes."
- Compliance with laws, rules and regulations (including insider trading laws)--"Insider trading is both unethical and illegal, and should be dealt with decisively."
- Encouraging the reporting of any illegal or unethical behavior.

[c] Reporting Without Retaliation

The commentary to the NYSE standards advises companies, in no uncertain terms, that they must ensure their employees can raise issues and report concerns without fear of adverse consequences as a result. First, companies should "encourage employees to talk to supervisors, managers or other appropriate personnel when in doubt about the best course of action in a particular situation." Second, employees should be told that they have an obligation to "report

violations of laws, rules, regulations or the code of business conduct to appropriate personnel." Third, "to encourage" such reports, companies must inform employees that they "will not allow retaliation for reports made in good faith."ⁿ⁷

[d] CEO Certification

The NYSE has mandated that each listed company CEO annually certify that "he or she is not aware of any violation by the company of NYSE corporate listing standards."ⁿ⁸ This certification, which will "focus the CEO and senior management on the company's compliance with the listing standards," must be disclosed in the company's annual report or in the annual Form 10-K filed with the SEC.ⁿ⁹

The CEO must also "promptly notify the NYSE in writing after any executive officer of the listed company becomes aware of any material violation" of the corporate governance listing standards, including this section.ⁿ¹⁰ This places a premium on the organization's systems for identifying and evaluating potential violations, and then notifying senior management about them.

[e] Waiver and Disclosure

The NYSE code of conduct standards, like Sarbanes-Oxley Section 406 and the related SEC rules, also address the issues of waiver and disclosure.

With regard to waiver, the code of business conduct and ethics must require that "any waiver of the code for executive officers and directors may be made only by the board or a board committee and must be promptly disclosed to shareholders."ⁿ¹¹ The expectation is that subjecting such waivers to public scrutiny will make them extremely rare and thus prevent the kind of questionable dealings, conflicts of interest and failure to consistently apply the provisions of the code of conduct that contributed to the collapse of Enron:

This disclosure requirement should inhibit casual and perhaps questionable waivers, and should help assure that, when warranted, a waiver is accompanied by appropriate controls designed to protect the company. It will also give shareholders the opportunity to evaluate the board's performance in granting waivers.ⁿ¹²

As for disclosure of the code itself, each listed company must post the code on its website. The company must also include information about this disclosure in its annual proxy statement or, if the company does not file an annual proxy statement, in its annual report on Form 10-K and also provide a printed copy of the code to any shareholder who requests it.ⁿ¹³

[f] Compliance Standards and Procedures

Each code of business conduct and ethics "must also contain compliance standards and procedures that will facilitate the effective operation of the code. These standards should ensure the prompt and consistent action against violations of the code."ⁿ¹⁴ Adoption of a comprehensive program based on the compliance standards and procedures that we have previously reviewed, such as the compliance program elements of the FSGO, will enable organizations to address these requirements.ⁿ¹⁵

[g] Enforcement

The NYSE can issue a public letter of reprimand to a company that has violated these, or any other listing, standards. "For companies that repeatedly or flagrantly violate NYSE listing standards, suspension and delisting remain the ultimate penalties."ⁿ¹⁶

[3] NASDAQ Code of Conduct Requirements

[a] NASDAQ Code of Conduct Standard

The NASDAQ adopted its own code of conduct requirement for its listed companies.ⁿ¹⁷ Each NASDAQ-listed company is required to adopt and to make publicly available a code of conduct applicable to all directors, officers, and employees. The code must comply with the definition of a "code of ethics" set out in Section 406(c) of the Sarbanes-Oxley Act and the regulations thereunder. In addition, it must provide for "an enforcement mechanism that ensures prompt and consistent enforcement of the code, protection for persons reporting questionable behavior, clear and objective standards for compliance, and a fair process by which to determine violations."ⁿ¹⁸

[b] Content of a NASDAQ-Listed Company's Code

For NASDAQ-listed companies, the code must include "such standards as are reasonably necessary to promote the ethical handling of conflicts of interest, full and fair disclosure and compliance with laws, rules and regulations."ⁿ¹⁹ The commentary notes that "investors are harmed when the real or perceived private interest of a director, officer or employee is in conflict with the interests of the Company, as when the individual receives improper personal benefits as a result of his or her position with the Company, or when the individual has other duties, responsibilities or obligations that run counter to his or her duty to the Company" and that "there can be no questions about the duty to make ... [disclosures to regulators and investors] fairly, accurately and timely."ⁿ²⁰

[c] Company Waivers a NASDAQ-Listed Company's Code

Each NASDAQ-listed company's code must required that any waivers of the code for executive officers or directors must be approved by the board of directors or a board committee and each such waiver must disclosed in a Form 8-K within four business days or, in the case of a foreign private issuer, either in a Form 6-K or its next Annual Report on Form 20-F or 40-F.ⁿ²¹

CHAPTER 13 COMPLIANCE AND THE CODE OF CONDUCT

2-13 Corporate Governance: Law and Practice § 13.07

AUTHOR: Jay M. Cohen

§ 13.07 Private Companies and Not-for-Profit Organizations

While many of these standards mandatorily apply only to public-companies, the code of conduct and corporate governance requirements adopted after Sarbanes-Oxley have become standards of "best practices" for private companies and not-for-profit organizations, as well. A 2005 PricewaterhouseCoopers survey of chief executive officers of fast-growing private companies found that a majority of these companies were improving internal controls, updating their corporate governance procedures and revising their codes of conduct.ⁿ¹ Almost 80 percent of the private companies that participated in a survey conducted by the law firm of Foley & Lardner have adopted one or more of the Sarbanes-Oxley reforms.ⁿ² In another survey, 78 percent of organizations not subject to Sarbanes-Oxley said they had a hotline or other anonymous reporting system for employees to ask questions or report concerns.ⁿ³ These organizers want to impress customers, vendors, employees, investors, potential buyers, insurance companies, banks and other lenders, and to gain the operational and financial advantages from having a strong control environment.

Non-profit organizations feel similar compulsion to address compliance issues. As one example, the University of California required every one of its 230,000 employees--from the President of the system on down--to complete an on-line training course about its ethics policy. Even the members of the Board of Regents, including California Governor Arnold Schwarzenegger, had to complete the training. The ethics policy covered such issues as compliance with university policies and encouraging employees to report misconduct. The system's President explained that "every decision we make and action we take needs to be grounded in these core values and standards."ⁿ⁴ In addition, a number of states have enacted--or are considering--new laws that mandate stronger corporate governance and compliance rules for private companies, especially not-for-profits. Any private company that is concerned about its reputation in the marketplace will be well-served by creating, implementing and enforcing the kind of comprehensive code of conduct detailed in this chapter.

In 2009, the Internal Revenue Service revised its Form 990, a public disclosure document that must be completed and filed by most non-profits including public charities, chambers of commerce, social clubs and labor unions. The IRS added a series of governance questions and disclosures to this form, because it "is convinced that good corporate governance is necessary to ensure that the organization lives up to its responsibilities as a tax-exempt organization."ⁿ⁵ Form 990 asks whether the organization has adopted policies and procedures to address such issues as conflicts of interest, record retention and destruction, and compensation. The form also asks if the organization has a written policy

to encourage and protect whistleblowers, even though there is no legal requirement for tax-exempt organizations to have such a policy. The organization must disclose how it makes these policies available to the public.

CHAPTER 13 COMPLIANCE AND THE CODE OF CONDUCT

2-13 Corporate Governance: Law and Practice § 13.08

AUTHOR: Jay M. Cohen

§ 13.08 Enforcement and Compliance After Sarbanes-Oxley

[1] Government Investigations

Settlements of government investigations since the passage of the Sarbanes-Oxley Act reinforce the importance of organizational compliance programs, including codes of conduct. These settlements continue to provide a window into the government's thinking about what it takes to be a good corporate citizen. Indeed, some factors are constant, regardless of the industry or regulatory issues involved, as demonstrated by the following examples.

In July 2004, the DOJ and the SEC reached a settlement with ABB Ltd., related to violations of the Foreign Corrupt Practices Act ("FCPA"). As part of this process, the DOJ issued an opinion letter,ⁿ¹ in which the Department favorably reviewed the company's proposed FCPA compliance plan. This plan included a "rigorous anti-corruption compliance code" supported by communications, training, a "helpline," disciplinary procedures and assignment of responsibility for overseeing compliance with the code to "one or more independent [company] officials."

In March 2005, the Office of Federal Housing Enterprise Oversight ("OFHEO") reached a settlement with the Board of Directors of Fannie Mae requiring that Fannie Mae establish "an Office of Compliance and Ethics to review internal complaints, whistleblower reports and other ethics matters." The Board of Fannie Mae was also required to "cause to be conducted a review and appropriate revision of bylaws and codes of conduct to assure that they support legal and regulatory compliance."ⁿ²

On May 23, 2006, Fannie Mae signed a Consent Order requiring its Board to create an annual compliance plan; provide annual training programs on "corporate culture and expectations"; establish a Compliance Committee "to monitor and coordinate legal and regulatory compliance"; and maintain an independent Compliance, Ethics, and Investigation function. Fannie Mae also agreed to pay \$400 million to settle the matter.ⁿ³

In April 2005, Coca-Cola settled an SEC enforcement action-without any fine or other sanctions-by agreeing to maintain remedial efforts it had initiated during the course of the investigation, including the establishment of "an Ethics & Compliance Office to administer its Code of Business Conduct and ensure, among other things, that [it] conducts its business in compliance with the Code of Business Conduct and with various laws."ⁿ⁴

Likewise, when Aon settled investigations by five state agencies in three states related to contingent commissions and other business practices of the insurance broker, the company agreed to implement "company-wide written standards of conduct" related to the practices in question and to provide "appropriate training of relevant employees, including but not limited to training in business ethics, professional obligations, conflicts of interest, antitrust and trade practices compliance and record keeping." Aon also agreed to create a Compliance Committee of its Board of Directors to monitor compliance with these standards of conduct and review all complaints from insurance companies related to them.⁵

On September 2, 2009, it was announced that the pharmaceutical company Pfizer had agreed to pay \$2.3 billion to settle civil and criminal charges that it had illegally marketed a pain-killer drug. This was reported to be the largest health-care fraud settlement in history. In addition to agreeing to pay this extraordinary sum, and to having a subsidiary plead guilty to a criminal charge of violating the U.S. Food, Drug and Cosmetic Act, Pfizer entered into a comprehensive agreement with the government obligating the company to:⁶

1. maintain a Compliance Committee of senior executives;
2. require business leaders to annually certify their compliance with applicable sales and marketing rules (an extension of the Sarbanes-Oxley certification practice to broader compliance issues);
3. enforce a Code of Conduct reflecting "Pfizer's commitment to full compliance with all Federal health care program requirement"; and
4. require employees and designated third parties to certify their compliance with the Code.

The agreement further specifies that the Chief Compliance Officer "shall not be, or be subordinate to, the General Counsel or Chief Financial Officer." The Office of Inspector General of the Department of Health and Human Services previously had expressed its skepticism about a compliance officer's being part of an organization's legal department because of the perceived "conflict of interest" between the role of in-house counsel to protect and defend the organization, and the independence demanded of an effective compliance officer. The government now appears intent on translating this concern into a mandate.

In 2004, the Justice Department argued that a company's "non-existent or insufficient" compliance programs can help demonstrate the recklessness needed to establish violations of the federal False Claims Act.⁷ Also, a federal district judge has used the defendants' failure to implement an adequate compliance program to support their lengthy sentences for fraud. The court compared the compliance program at the defendants' medical device company to the compliance program elements of the FSGO and concluded that it came up well short. Among other things, the defendants' chose the compliance officer knowing that they could "manipulate and dominate" him.⁸ In 2007, federal prosecutors raised the stakes even further for compliance programs and compliance officers. They filed a civil complaint against the former Deputy General Counsel and Corporate Integrity Program Director of Tenet Healthcare for violating the False Claims Act.⁹ The complaint alleged that she had filed false certifications that the company was in full compliance with its obligations under a Corporate Integrity Agreement, despite knowing that one of its hospitals was in violation of federal regulations.¹⁰

[2] Deferred Prosecution and Non-Prosecution Agreements

In the aftermath of the scandals, litigation and prosecutions involving Enron, Arthur Andersen and WorldCom, the federal government dramatically intensified its use of two weapons in the war on corporate crime—the deferred prosecution agreement and the non-prosecution agreement. Dozens of companies, in a wide range of industries, have entered into such agreements in just the last five years. The use of this process was actually encouraged by the

Thompson Memorandum,ⁿ¹¹ which gave prosecutors the authority and flexibility to forego formal prosecution of an organization when the company acknowledged responsibility for wrongdoing, cooperated with the government and agreed to strengthen internal controls and compliance.

Under a deferred prosecution agreement, the DOJ files charges against the organization but agrees to defer prosecution, often for a year or two. In return, the company admits wrongdoing, agrees to cooperate, makes a substantial financial payment and carries out a series of tasks or "undertakings" during this period. If the company complies with the terms of the agreement, generally as determined by an independent monitor, the charges are dismissed. If not, the DOJ can prosecute, armed now with the company's admission.

In a variation of this agreement--the non-prosecution agreement--the government does not file charges at all, in return for the company's similar acceptance of responsibility and willingness to implement the undertakings.

While the tasks in each agreement reflect the specific charges and issues in the case, the list of undertakings invariably includes more general corporate governance and compliance-related provisions such as codes of conduct. The government's insistence on these provisions--coupled with the company's acceptance of them as a means of preserving its future--may be the best evidence of all that compliance programs, including codes of conduct, will prevent organizational wrongdoing.

Several deferred prosecution agreements reflect this acceptance. In one illustrative case, Bristol-Myers Squibb entered into a Deferred Prosecution Agreement with the Office of the U.S. Attorney for the District of New Jersey. The government agreed to defer prosecution for securities fraud for two years, during which time Bristol-Myers Squibb would continue to undertake "extensive reforms and remedial actions." These actions included creating the position of Chief Compliance Officer and "providing an effective mechanism in the form of a confidential hotline and email address" for employees to report concerns. The company also agreed to "establish and maintain a training and education program, which shall be reviewed and approved by the Board of Directors, designed to advance and underscore the Company's commitment to exemplary corporate citizenship, to best practices of effective corporate governance and the highest principles of integrity and professionalism, and to fostering a culture of openness, accountability and compliance throughout the Company." Compliance with the terms of the agreement, as determined by an outside monitor, resulted in the dismissal of the charges on June 14, 2007. At the time, the monitor noted the following developments:ⁿ¹²

- "The reformation of the company's corporate culture into one that embraces and endorses a commitment to compliance, ethics, integrity and excellence"
- "The ongoing development of an outstanding global compliance program, whose policies, processes and procedures are designed to ensure a culture of integrity and ethics"

In a demonstration of the power afforded to monitors under these agreements, in the Bristol-Myers Squibb case the monitor forced the company to remove its CEO and general counsel during the pendency of the deferred prosecution agreement because of the monitor's view that the CEO had involved the company in an improper business relationship with another organization.

On August 29, 2005, the DOJ announced a striking, and much-anticipated, deferred prosecution agreement with KPMG. This is the same matter that resulted in the court decisions challenging the application of the Thompson Memorandum against individual defendants, noted above. In return for the deferral of prosecution, the accounting firm (i) admitted that it--and its employees--had engaged in fraud, (ii) accepted permanent restrictions on its business practices, (iii) agreed to install an independent monitor for three years, (iv) pledged its full and active cooperation to the government, and (v) agreed to pay \$456 million in fines and restitution. As part of its pledge of cooperation, KPMG agreed not to assert any claim of privilege "as to any document, records, information, or testimony."ⁿ¹³ Moreover, "in addition to the

remedial actions taken to date, KPMG shall implement and maintain an effective compliance and ethics program that fully comports with the criteria set forth in Section 8B2.1 of the United States Sentencing Guidelines."

In a twist to these agreements, the Justice Department announced a settlement with Prudential Financial in which the company's general counsel, instead of an outsider, was designated to serve as the "monitor" of compliance with the substantive terms of agreement. Prudential's General Counsel must "make periodic reports to the Prudential Board of Directors Audit Committee as to the appropriateness and effectiveness of the compliance plan" and must also "provide the reports to the United States Attorney in the District of Massachusetts, along with a certification that the reports include all material information bearing on the effectiveness of the compliance plan."¹⁴

In 2008, in response to criticism the lack of objective guidelines for the use of monitors in connection with deferred-prosecution and non-prosecution agreements, the Justice Department issued the Morford Memorandum (named after the then Acting Deputy Attorney General).¹⁵ It established nine principles to "control the selection and use of monitors." The principles address the qualifications, selection and duties of corporate monitors and require that each U.S. Attorney's Office create a committee of prosecutors to help manage this process.

The Morford Memorandum states that a monitor's primary responsibility is to assess an organization's compliance with the agreement "including, in most cases, evaluating (and where appropriate proposing) internal controls and corporate ethics and compliance programs." This is because one of the causes of corporate misconduct is "the failure of internal controls or ethics and compliance programs to prevent, detect and respond to ... misconduct."¹⁶

In 2009, the Government Accountability Office (GAO) reported preliminarily on a study to assess how federal prosecutors decide whether to drop an investigation, prosecute a case or enter into a deferred-prosecution agreements or non-prosecution agreement. The GAO concluded that the three most frequently-cited factors in this decision are the company's cooperation, the collateral consequences of a prosecution and any remedial measures the company has taken. The GAO found that 45 of the 57 agreements it reviewed included requirements that the company institute or improve an ethics or compliance program.¹⁷

Prosecutors continue to use deferred-prosecution and non-prosecution agreements, complete with compliance program requirements, as the government seeks to reform corporations suspected of wrongdoing without triggering the collateral consequences of full-scale indictment and prosecution. Organizations not subject to such an agreement may want to conduct "internal" monitoring of their ethics and compliance programs, much as an external monitor would, to determine how well their programs measure up against the government's expectations and against compliance best practices.

[3] The FAR Rules

The obligation to have a code of conduct, as part of a system of internal and compliance controls, was extended to a wide range of organizations by rules adopted in late 2008 by the Department of Defense, the General Services Administration and NASA. These agencies amended the Federal Acquisition Regulation (FAR) to require most government contractors to have written codes of business ethics and conduct and to make them to every employee involved in performing the contractors' duties under contracts with the government. In addition, contractors must "exercise due diligence to prevent and detect criminal conduct ... [and o]therwise promote an organizational culture that encourages ethical conduct and a commitment to compliance with the law."¹⁸ Contractors must make disclosures to the government whenever they have "credible evidence" that an employee, agent or subcontractor has committed "a violation of Federal criminal law involving fraud, conflict of interest, bribery or gratuity violations" or a violation of the False Claims Act.

All but the smallest government contractors and those involved in contracts for commercially available items must also implement a Business Ethics Awareness and Compliance Program and Internal Control System. This system must

include an internal reporting mechanism such as a confidential hotline, procedures to ensure timely discovery of improper conduct and policies providing for prompt corrective measures.

With the exception of the mandatory disclosure provisions, these rules are not likely to trouble the members of the Defense Industry Initiative and other large companies that, as noted above, have had qualifying compliance programs for many years. However, other companies--both public and private--have much work to do to meet these requirements. These simple but sweeping requirements will apply to any company--public or private, foreign or domestic, large or small--that falls within this category, and their biggest impact may be on the *thousands* of smaller companies that do business with the federal government but do not already have comprehensive compliance programs.

[4] Companies Act on Their Own

Actions taken by two of the largest companies in the world--Boeing and Siemens--illustrate the far-reaching consequences of companies' enforcement of their codes of conduct even absent a government investigation.

Following an internal investigation, in 2005, Boeing's Board of Directors asked for--and received--the resignation of its CEO Harry Stonecipher after finding that his actions during the course of an affair with a female executive at the company were "inconsistent with Boeing's Code of Conduct."¹⁹ The investigation initiated by the Board had concluded that the relationship was consensual, had no impact on the company's business and did not influence either the career or the compensation of the female executive. Nevertheless, the Board concluded that "the CEO must set the standard for unimpeachable professional and personal behavior." The circumstances surrounding the affair included the CEO's use of the company's computer system to send personal emails. This investigation was initiated by an anonymous complaint to the chair of the Board of Directors.

In 2006, a successor to Stonecipher, Boeing CEO Jim McNerny, publicly stated, in the face of the earlier scandal as well as regulatory and enforcement actions involving his company, that Boeing was taking significant steps to turn "ethics and compliance into a competitive advantage for us." On September 26, 2007, the Boeing chief financial officer told the Oklahoma Business Ethics Consortium that "we are integrating integrity and ethics in everything we do. They are every bit as important as our financial performance ... A leader who delivers results without reflecting Boeing's ethical values won't remain a Boeing leader for long. It's my expectation that Boeing employees will play hard and fair."²⁰

On October 4, 2007, Siemens, the German-based multinational, announced that German authorities had fined the company almost \$300 million to resolve an investigation into embezzlement, bribery and tax evasion. In 2009, the company entered into the first billion-dollar settlement of anti-bribery charges with the U.S. Department of Justice and the SEC. Siemens has done more than just write these huge checks to government agencies, In the wake of these problems, Siemens took a number of steps to strengthen its compliance and ethics program, including:

- constituting a new Compliance Committee of its Board;
- appointing an outside lawyer to act as the independent "ombudsman" for employees to contact to raise questions or report violations;
- reorganizing its office of corporate compliance;
- adopting a new policy on corruption;
- establishing a formal program of anti-corruption and other legal compliance training for management, group and regional compliance officers, and other employees'; and

- engaging an "independent compliance advisor" to recommend further improvements and make periodic reports to its board of directors.

There can no longer be any question that ethics and compliance programs must command the attention of the management of every company regardless of industry, size or regulatory environment. Taking the necessary steps before being forced to do so by a public scandal or a regulatory enforcement action can go a long way toward protecting a company from the catastrophic consequences that compliance failures can have for companies that have not dedicated the necessary resources to a compliance program anchored by a suitable code of conduct.

CHAPTER 13 COMPLIANCE AND THE CODE OF CONDUCT

2-13 Corporate Governance: Law and Practice § 13.09

AUTHOR: Jay M. Cohen

§ 13.09 Creating and Demonstrating a "Culture of Compliance"

Before turning to the task of drafting a new code of conduct or revising an existing one, corporate counsel and compliance officers should consider their organization's "culture of compliance." Increasingly, regulators are looking for evidence that an organization not only has the right process, but also that it has the right culture. As former SEC chairman William Donaldson stated, "[c]reating an ethical culture means instilling and maintaining a commitment to do the right thing, this time and every time--so much so that it becomes entwined in the essential DNA of the [organization.]" In a speech to the Bond Market Association in April 2005, he offered his views on what it takes to create and demonstrate this culture:

The [organization's] leadership must, of course, set the right tone at the top, but this culture can't be limited to senior management, the compliance department, and the aspirational wording of a corporate mission statement. The culture must be learned, reinforced and shared by each and every employee. The firm must develop in its employees the courage and commitment to question whether a particular course of ethical conduct is truly ethical, or is truly in the best interests of clients and customers--even in the absence of specific rules, and even when the competitor chooses a different course.¹

Two of Mr. Donaldson's former colleagues at the SEC add substance and specificity to what might otherwise be an element that is impossible to evidence or measure. The former Director of the SEC's Office of Compliance Inspections and Examinations listed these "concrete steps that firms might take to instill, in a meaningful and lasting way, a strong culture of compliance:"²

- Establish and communicate an ethical "tone at the top".
- Provide effective employee training.
- Emphasize compliance over profits.
- Establish strong policies and procedures to prevent and detect violations.

- Test for compliance.
- Deal with problems quickly and appropriately.
- Implement a superior compliance program that has the "resources, respect and access" it needs.
- Empower employees to question conduct.
- Report problems to senior management and the board.
- Self-assess honestly and periodically.
- Engage in long term thinking.
- Keep your regulator informed.

Stephen Cutler, the former Director of the SEC's Enforcement Division, offered his own ideas on the elements of a "culture of compliance" in a 2004 speech to the General Counsel Roundtable that every corporate counsel and compliance officer should read:³

- "From an employee's first day on the job, he should know that ethics and honesty are important to the company."
- "Whenever your CEO is delivering a state-of-the-company address or is offering remarks to company employees, she should be talking about the company's values as well as its profits."
- "Make clear that retaliating against or threatening whistleblowers will not be tolerated."
- "Make integrity, ethics and compliance part of the promotion, compensation and evaluation processes."
- "Make clear that you won't tolerate compliance risks-even if that means losing a lucrative piece of business."
- "Ethics and compliance should be part of your regular education and training efforts."

Another measure of a company's compliance culture, according to Mr. Cutler, is how it responds to violations:

- "Hold your managers accountable. That means disciplining or even firing them when they have failed to create a culture of compliance."
- "Let employees know that no one at the company is above the law; that no matter how important or how senior, someone who has violated an ethical standard will be punished."
- "And as much as possible (and consistent with privacy concerns), the punishment and the reason for it should be clear to the company's other employees."

Equally important as these expectations of regulators, research by the Ethics Resource Center indicates that creation and maintenance of the right compliance culture can have as much if not more favorable impact on an organization's compliance performance as the implementation of compliance processes and tools.⁴

These specific steps and important messages can and should be built into the code of conduct, which will then serve as both the foundation and the support for the compliance culture and processes in an organization. The discussion which follows, and the sample code in Appendix 13-C, will show you how to do this.

CHAPTER 13 COMPLIANCE AND THE CODE OF CONDUCT

2-13 Corporate Governance: Law and Practice § 13.10

AUTHOR: Jay M. Cohen

§ 13.10 Having the Right Code

[1] Creating or Reviewing Your Code

We have seen that regulators, prosecutors, courts and the public have all weighed in on the need for organizations to strengthen their efforts to promote ethics and integrity. Most have urged organizations to make a code of conduct the centerpiece of these efforts. Regulators have even provided settlements, mandates, or just good guidance to illustrate what should be in this code. A variety of other resources are readily available to inform this process and provide advice and examples regarding the structure and substance of the code.

Against this backdrop, every organization should be considering whether to adopt a new code of conduct, or to review and improve an existing one. If a company already has a code of conduct, it should be reviewed at least annually, to address changes in applicable laws and regulations and to keep up with changes in its business model and activities. If a company needs to create a code, there are a number of preliminary steps to take and questions to answer before the actual drafting of the code begins. Either way, the goals for the code must be kept in mind.

Organizational codes of conduct serve to set expectations and standards, provide information and guidance about those expectations and standards, and offer resources to help individuals understand and meet them. These goals will not be met simply by parroting the requirements from the relevant regulator, or borrowing a code from some other organization or expert. Instead, it will take careful consideration and appropriate answers to the questions below--answers that reflect a combination of regulatory mandates, industry issues, "best practices" and the unique culture and business of an organization.

[a] Who Will Draft or Review the Code?

The first issue is who will be responsible for drafting or reviewing the code. Organizations often use legal or compliance staff for this purpose. These personnel are usually the most well-informed about both the general legal and regulatory requirements for the code and about the specific issues that must be addressed based upon the organization's business and regulatory environment. They can then vet the code draft with management, communications experts and other staff (such as line employees) to help ensure that the code is comprehensive, understandable and adequately addresses the concerns of supervisors and employees.

Some organizations have established drafting committees with representatives from legal, compliance, human resources, internal audit, corporate communications, marketing and key business units. The committee approach can make it easier to identify compliance-related issues and concerns from around the organization and make the code-drafting project a more high profile and collaborative process, one that the business side of the organization has an investment in from the beginning. It can help ensure that the code is consistent in tone, style and substance with other corporate policies and communications.

[b] What Resources Can the Drafters Call Upon?

Organizations can reach out to a variety of outside experts for direct assistance in designing and implementing an effective code. There are many external resources to assist drafters of the code, including the ones we reviewed earlier in this chapter. For example, there are professional organizations devoted to ethics and compliance issues such as the Ethics & Compliance Officer Association ("ECO"),ⁿ¹ the Society for Corporate Compliance and Ethics ("SCCE")ⁿ² and the Ethics Resource Center ("ERC").ⁿ³ These organizations have experts on staff who have helped organizations draft codes of conduct, and they also provide other resources including how-to books and articles, conferences at which key compliance-related subjects are addressed and access to organizational compliance and ethics officers who are their members. One organization--the Ethisphere Council--rates codes of conduct using 43 elements to reflect eight "critical components"--public availability; tone at the top; readability and tone; non-retaliation; commitment to stakeholders; risk topics; learning aids such as questions and answers; and presentation and style. Each of these components is reflected in the sample code.ⁿ⁴

In addition, there are industry-specific organizations providing similar resources. These include the DII, the Health Care Compliance Association ("HCCA"),ⁿ⁵ the Compliance and Legal Division of the Securities Industry and Financial Markets Association ("SIFMA")ⁿ⁶ and the National Defense Industry Association ("NDIA").ⁿ⁷

There are many internal resources in any organization, so one key step in the process, before drafting starts, is to inventory existing company policies and procedures that may address the legal and compliance risks that the code is most likely to cover. Organizations are often surprised to find out that, even in the absence of a "code of conduct," they already have a great number of policies and procedures related to compliance issues. These may be found in employee handbooks, human resources manuals, business unit procedures, informal practices, free-standing policies and communications, and a wide variety of other places.

Finally, the sample code reproduced in Appendix 13-C to this chapter can help an organization identify key issues and develop an effective means of addressing them. This sample code meets the requirements of the NYSE listing standards, as well as Section 406 of the Sarbanes-Oxley act and related SEC rules. The sample code has been designated a "best practices" code by the Ethisphere Council, with an overall A rating, placing it in the top two percent of all codes reviewed by that organization. It is intended to apply to each employee in the organization, regardless of job responsibility, and thus its structure and provisions can be useful models for organizations in any industry. In the subsequent discussion of drafting and structuring a code of conduct, we will refer frequently to the sample code.

[c] What Kind of Code Should It Be?

An important consideration is whether the code will be a high-level statement about the organization's mission, values and principles, or whether it will also include references to, and even details about, more specific policies and procedures? Is this a "code of ethics," a "code of conduct," or some of both? There can be a difference.

Codes of ethics, at least until the Sarbanes-Oxley Act, were generally expected to be shorter, focusing on fundamental corporate values such as fairness, honesty and integrity, and offering some guidance on how these values impact the daily activities of the organization and its employees. According to the Ethics Resource Center:

A code of ethics serves as a central guide to support day-to-day decision making at work. It clarifies the cornerstones of your organization--its mission, values and principles--helping your managers, employees and stakeholders understand how these cornerstones translate into everyday decisions, behaviors and actions.⁸

Organizations with "ethics" codes often include links or references to other source material for more specific policies and procedures.

Codes of conduct tend to include these ethics concepts while at the same time adding additional, more factual information about specific policies, compliance issues and acceptable (or unacceptable) actions regarding these issues. These codes are not legalistic; they should not read like the criminal law or a manual from a regulator, but they should state expected behaviors in the areas that they cover.

Section 406 of the Sarbanes-Oxley Act and the related rule-making from the SEC and the stock exchanges contain elements of both types of codes, mixing references to "honest and ethical conduct" with sections related to particular issues like conflicts of interest and the integrity of financial disclosures.⁹ That is why a code combining ethics and values on the one hand with rules of conduct on the other may now make the most sense. After all, organizations choosing to have "aspirational" ethics codes will still have to find a way to address the more specific obligations under these rules.

The DII model reflects the merging of values and rules into one code. The sample code takes this same tack by including references to fundamental organizational values as well as more practical guidance on the kinds of issues that are most likely to arise in the organization and that are expected by the regulators to be addressed in the code. This approach takes advantage of the communications, training, and interest around the adoption of the code to give employees information and assistance that can be useful in their jobs day-to-day, and that will help them identify and understand some of the specific rules that they are obligated to comply with. It makes the code more than just a series of generalities, instead instructing employees with far greater clarity about what to do in key situations.

No code can, or should, contain all of the policies and procedures in the organization. In some instances, such as with employment-related issues, the code can set forth basic rules about workplace conduct and security, while an employee handbook or human resources manual contains more technical and specific rules and procedures. Also, different business units or administrative areas will still need their own policies and procedures.

For example, the code can set forth the obligation of all employees to maintain accurate books and records, while the finance and accounting departments have their own policies and procedures to meet this obligation. The code of conduct for a publicly-traded company should include the prohibition against insider trading and then refer to more detailed policies and procedures to help address this issue. The sample code is an example of how this is done. Likewise, the code of conduct for a financial services company should make clear the duty of all officers, employees, directors and agents to treat customers fairly. More specific manuals and codes in a financial services organization will detail how investment advisors, financial professionals and other specialized staff must achieve this objective.

In another example, the OIG recommends that organizations supplement their "standards of conduct" with "a comprehensive set of written policies addressing all applicable statutes, rules and program instructions that apply to each function or department." These procedures for relevant legal and business risk areas should "articulate specific procedures personnel should follow when performing their duties."¹⁰ In these cases, organizations often provide references or links in their general codes of conduct to the more specific and detailed policies.

[d] What Style Should Be Used?

As with all issues around the drafting of the code, it is critical that it reflect the organization's culture, management style

and operations. The code must fit right in with the way the organization is run, and not stand apart as overly legalistic in an organization where policies and directives are generally short and straightforward, or overly simplistic in an organization that otherwise likes to spell out expectations and responsibilities in great detail.

The sample code provides a structure and style that can be adapted for either type of organization. The substance of this code, while providing considerable information about compliance-related responsibilities and expectations, is written in concise and conversational language. The format is readable, with frequent breaks in the text as well as relevant questions-and-answers, and it is made even more user-friendly through the incorporation of color and other visual aides.

The key is to remember the purpose of the code and its audience: this is not a legal brief for courts or regulators but a means of communicating critical legal and compliance concepts to non-lawyers of varying levels of education and experience. It is also the primary means of "selling" compliance and its importance to everyone connected with the organization. That is why the corporate communications and marketing departments can be valuable partners in marketing the code, as members of a drafting committee or otherwise in helping to review, distribute and publicize the code. Some companies have turned to groups of employees and executives--either informally or through focus groups--to test the clarity of the concepts and the relevance of the examples in their codes.

[e] Who Will be Covered by the Code?

Another question that companies must answer, after deciding what kind of code they want, is who will it cover--officers, directors, employees, agents, contractors, suppliers, consultants, etc? Will there be different codes for different groups of people depending on their title, location, function or employment status? The answers to these questions will depend, in part, on industry norms and regulations. Nonetheless, to the extent that the values and rules in the code reflect the most important issues faced by the organization, the code can--and should--apply to the broadest range of individuals as possible. Both the NYSE and NASDAQ want the codes for their listed companies to apply at least to all directors, officers and employees. This has the advantages of consistency, clarity and a common set of expectations and norms, from the top of the organization on down.

Many companies go even further. For example, the Wal-Mart Statement of Ethics expressly applies to third parties:¹¹

Wal-Mart expects its suppliers, consultants, law firms, public relations firms, contractors and other service providers to act ethically and in a manner consistent with this Statement of Ethics. If you hire a service provider, you should take reasonable steps to ensure that the service provider is aware of our Statement of Ethics, has a reputation for integrity and acts in a responsible manner consistent with our standards.

In the Pfizer settlement discussed above, the government insisted that the company send its code to all "third-party personnel" working for other organizations who help Pfizer promote the products covered by the agreement. This is a critical issue for organizations and their compliance programs. A company can delegate functions to these third parties, but it cannot delegate the legal and regulatory responsibility for how those functions are carried out. In addition, these third parties have the company's reputation and brand in their hands. Companies need to know who they are doing business with, and how that business is being conducted on their behalf.

Of course, if organizations are going to apply their codes to groups of non-employees--such as suppliers and vendors--they better make sure that those third parties know what is expected of them. A survey conducted in 2004 by Deloitte and *Corporate Board Member* magazine found that 90 percent of the responding companies apply at least part of their codes to such outside groups, but only 52 percent of respondents actually distribute the code to such parties.¹²

Related to this issue is the question we raised in connection with the SEC rules for Section 406 of the Sarbanes-Oxley Act--one code or two? As noted above,¹³ because the SEC has made clear that the duty to disclose amendments to and

waivers of the code is limited to the subject-matter and officers covered by its rules, organizations can adopt one, comprehensive code without fear of having to make a public disclosure every time that they change something in it that is unrelated to these rules.

[2] Structure of the Code

A number of important subjects should be covered in any code of conduct, regardless which type and style are chosen in an organization. These include a leadership letter; purpose and goals; core mission and values; information about the compliance program and resources, including any reporting mechanisms; the protection of employees and agents against retaliation for reporting concerns; every individual's accountability for compliance; and the consequences of non-compliance. Each of these sections is included in the sample code in Appendix 13-C.

[a] Statement from Leadership

An introductory letter or statement from the Chief Executive Officer will explain the importance of ethics and compliance to the organization. This statement should articulate the personal, as well as institutional, commitment of senior management and the board of directors to ethical business practices and regulatory compliance. This sets the "tone at the top" and makes clear that ethics and compliance are part of the "culture" of the organization. The code, and the entire compliance program, will benefit from this emphasis. Not only is this stated commitment necessary for the rest of the employees to take these issues seriously, but regulators increasingly expect to see this kind of tangible demonstration by the leaders of the organization of their accountability and responsibility for compliance.¹⁴

The sample code includes a letter from the President and CEO explaining the importance of integrity and ethical business conduct to the business success and reputation of the organization, and summarizing the role of the code in promoting such conduct. He reminds employees of "the responsibility of each of us" to uphold the values and principles reflected in the code.

[b] Purpose and Goals

An introductory section should set forth the purpose and goals of the code of conduct and the overall compliance program, and also explain which populations within the organization are covered by the code. This section should emphasize the commitment of the organization--and the obligation of everyone connected with it--to comply with all applicable laws and regulations.

The sample code expresses this commitment in terms of the organization's stakeholders including its customers, employees, business partners, shareholders and the communities in which the organization operates.

[c] Mission and Values

The organization's mission and values should be described in clear language. This section could include "ethical" values such as integrity, respect and fairness, together with "business-related" principles like commitment to customers, quality and service excellence. It serves to put the code in the context of the organization's overriding principles and goals and helps explain how compliance with the code will contribute to these goals. This section might even include practical examples of how to put these principles and values to work in meeting customers' needs or dealing with fellow employees.

For example, the sample code includes a discussion of the organization's *Mission, Vision, Values and Ethical Standards*. Employees are told that "this Code of Ethics provides you with practical guidance to apply these values and ethical standards in your everyday activities, and with resources to call upon if you have questions or concerns."

The introduction to the sample code adds that "everything we say and do must reflect our values and ethical standards."

[d] The Compliance Program

This section should describe the compliance program, including the resources available to employees with questions or concerns about ethics and compliance issues, thereby demonstrating the organization's financial and staffing commitment to compliance and giving employees greater comfort about raising issues internally. The section typically includes references to the compliance officer and staff, any executive or board oversight committees, and available training or other communications and materials about the program.

The sample code contains a separate section, entitled *Asking Questions and Raising Concerns*, with a list of Compliance Resources and Reporting Tools, including the Compliance Helpline, and a separate means of directly contacting the Board of Directors. Instructions for using the Helpline are provided for people calling from outside the United States.

This section of the sample code also gives employees a set of questions to ask themselves "when faced with a difficult ethical decision or a situation that might be improper?" Employees are encouraged to seek guidance before acting if they have even the slightest doubts.

[e] Internal Reporting Mechanisms

As part of the description of the compliance program, employees should be told about the means for requesting guidance or reporting concerns. Codes may suggest that employees consult with supervisors and internal resources such as human resources and the legal or compliance staff. In addition, it is becoming increasingly common for organizations to maintain 1-800 numbers--called compliance "hotlines" or "helplines"--for employees to use if they are uncomfortable raising issues in these other ways, or if they are unsatisfied with the response they receive regarding their concerns. The phone lines, which may be answered by compliance staff or by external vendors, also serve as an anonymous reporting mechanism, giving organizations a means of complying with Section 301 of the Sarbanes-Oxley Act, regarding "confidential, anonymous" complaints to the audit committee about financial and accounting matters.¹⁵ Companies may also provide dedicated email addresses, web-based reporting tools or mail drops for these communications and make these mechanisms available to customers and other external stakeholders, in addition to employees. It is advisable to provide employees with multiple means of reaching the Compliance Officer--by hotline, dedicated email, letter, or phone call--to encourage as many employees as possible to come forward and ask for help or report concerns.

A number of companies have created an independent--but internal--ombuds office to serve as a neutral and impartial recipient of questions and complaints, as well in some instances as a mechanism to resolve disputes. These companies generally have a headquarters ombuds staff that is reinforced by part-time, local resources scattered throughout business units and geographic locations. The central staff typically operates outside the ordinary line management of the organization but has access to managers and employees at all levels. The goal is to provide resources across the organization to help interpret the code of conduct and other compliance policies, provide guidance on the application of these rules, refer employees to the right resources to handle their problems, and make sure that matters are promptly and effectively addressed.

Companies with operations in Europe must take into consideration actions by regulators in the European Union regarding compliance hotlines. In 2005, French data protection authorities rejected applications by two U.S. multi-national companies to operate such hotlines in France, concluding that data protection laws placed limits on the use of such hotlines for processing information about company employees and for accepting anonymous complaints. Since then, both the French authorities and the European Article 29 Working Party--the advisory group that includes representation from the 25 data protection authorities in the European Union--have issued guidance to help companies implement compliance hotlines in these countries.¹⁶ These documents and similar guidance from other EU member states place limits on the use of these hotlines, but they also provide roadmaps for companies to implement and communicate about them.¹⁷ In a related action, a labor court in Germany ruled that Wal-Mart's proposed hotline violated local labor laws and had to be negotiated with its employees.¹⁸

Organizations must record and track all communications through these vehicles, and establish procedures to investigate the matters and report the results of these investigations back to the individuals who initiated the communications. These reporting mechanisms are not only mandated by regulation, they are essential for an effective program. Research conducted by the Ethics Resource Center shows that employees are more likely to report misconduct--and thus help the organization respond quickly and prevent small problems from becoming large one--when all four of these compliance program elements are in place: written ethics and compliance standards, ethics training, a dedicated ethics office/advice line, and a means for employees and agents to report misconduct anonymously.¹⁹

The sample code in Appendix 13-C describes the available resources including the company's Compliance Helpline and its compliance team.

[f] Non-Retaliation

Every code of conduct must include a statement of the organization's policy protecting employees against retaliation or retribution for reports about compliance matters. This is critical to ensure that whistleblowers are protected in accordance with the Sarbanes-Oxley Act and other requirements. It is also in the organization's best interest to encourage employees to report these issues internally so that the organization has the first opportunity to evaluate and address them. Moreover, a decision by the United States Supreme Court has broadened the category of employment actions that can constitute prohibited retaliation--at least in the employment discrimination context--placing an additional premium on organizational efforts to prevent and identify any conduct that could be considered retaliatory.²⁰ Many companies now encourage, and some even require, employees to promptly report suspected misconduct. The internal reporting mechanisms described above²¹ can be used by employees for this purpose.

The section of the sample code entitled *Asking Questions and Reporting Concerns* describes the protection against retaliation, noting that "[w]e take claims of retaliation seriously... . We will not tolerate any retaliation against anyone who makes a report in 'good faith' (meaning that the person reporting has made a genuine effort to provide honest and accurate information even if the information later is proven to be mistaken.)"

[g] Personal Responsibility and Certification

The code provides an opportunity to make clear the personal responsibility of directors, officers, supervisors and employees for complying with the code and related standards of conduct. Organizations are increasingly including compliance factors--and ethics and integrity--in their performance evaluations, decisions on compensation and promotion and other employment-related decisions. If so, that should be mentioned in the code.

Companies now often insist that employees sign a certification or pledge, at the end of the code or as part of code-related training, indicating that they have read the code and intend to comply with it. This certification is generally done annually, although at some companies employees are required to complete this certification every three months, as part of a quarterly performance review process. A "typical certification" cited by the DII states:

I have read the [Code] and understand that it represents company policy. In addition, I understand that by signing my name below, I am certifying that I am familiar and will comply with the requirements and will report immediately any information concerning a violation or possible violation.²²

In some cases, this certification may also indicate that the employee has reported to the compliance office any known violations of the code of conduct or other relevant company policies.

The next-to-last section of the sample code, entitled *Our Personal Commitment*, advises that, "[o]nce a year, we will ask each employee, officer and director to record an individual commitment to compliance with this Code."

[h] Consequences of Non-Compliance

Together with personal responsibility, the code should explain the consequences of non-compliance. This discussion may include a summary of the organization's processes for investigating and disciplining compliance violations, and any other means by which everyone, throughout the organization, will be held accountable for compliance performance.

The sample code makes clear at the beginning that, "When you violate laws, regulations, ethical standards, or company policies, [we] will take disciplinary action, which could include termination of employment."

[3] Subjects in the Code

Organizations that choose to include business conduct issues in their codes, in addition to ethics and values, must next decide what subjects to cover, in addition to the sections we have just reviewed. This requires an analysis of more than just the regulations of the SEC and the stock exchanges; it also requires an assessment of each organization's specific legal and regulatory risks and issues. The assessment should reflect the nature and size of the business; industry regulations and concerns; the jurisdictions in which the organization does business, including any countries outside the United States; and any recent internal audits, investigations, regulatory actions or lawsuits. Code drafters need to consider what the organization hopes to accomplish--and needs to accomplish--by adopting this code: is it to comply with the relevant stock exchange listing standards or are there a number of other compliance issues to address and larger goals to achieve?

The sample code incorporates the requirements of the Sarbanes-Oxley Act and subsequent regulations from the SEC and the stock exchanges. It also covers a wide range of other subject areas that organizations of any size, in any industry, will likely have to address such as: treatment of employees, competition and antitrust, business gifts and entertainment, conflicts of interest, accurate books and records, use of company assets, insider trading, and protection of information about customers and employees. At the same time, while codes like the sample code and others from companies in the relevant industry will be very useful in the assessment of subject matter to cover, each code must reflect the organization's particular circumstances and goals. The committee approach described above can be helpful in making sure that all of the right issues and objectives are identified, by legal and business experts within the organization.

As demonstrated in the sample code, the various issues can be organized into broad categories so that the relevant policy for a particular subject is easy to find. The sample code groups these issues into three categories: *Fellow Employees*, *The Company and Its Resources*, and *The Marketplace*.

The Ethics Toolkit from the ERC has a comparable list of "common provisions found in organizational codes."²³ Similar subject areas are commonly covered in the codes of DII signatories.²⁴ These include: business courtesies (including gifts, services, meals, entertainment, hospitality, etc.); conflicts of interest; use of company resources; complete and accurate books and records; relationships with suppliers and agents; reporting misconduct within the company; inside information and insider trading; antitrust and restriction of trade; international business practices; workplace relationships and conduct; political contributions; corporate citizenship and community relations; quality of services and products; environmental compliance; and financial accounting and disclosure.

Within each category in the sample code are a number of policies on specific issues. These sections in the code generally include related policy statements, practical examples, sources of available guidance and, in a number of instances, questions and answers regarding likely compliance issues and representative situations to clarify those issues.

Other provisions need to be considered depending on the organization's business, industry, regulatory environment and location. For example, defense contractors generally include sections relating to government contracts, handling of classified information and the hiring of former government employees. Companies operating outside the United States

typically address foreign privacy and information policies, the Foreign Corrupt Practices Act and perhaps anti-boycott, trade, import and export laws. Financial services companies should be including anti-money laundering and privacy of customer information as subject areas in their codes of conduct. Manufacturing companies emphasize environmental compliance and health and safety policies, while pharmaceutical companies address compliance with regulations of the Food and Drug Administration.

CHAPTER 13 COMPLIANCE AND THE CODE OF CONDUCT

2-13 Corporate Governance: Law and Practice § 13.11

AUTHOR: Jay M. Cohen

§ 13.11 Successfully Implementing the Code

[1] The Overall Compliance Program

As we have seen throughout this chapter, the code of conduct must be placed in the context of the overall compliance program that organizations are increasingly expected to (and are now deciding to) implement. The code may well be the foundation of this program, but it will not achieve its objectives without the other elements to make it known, understood, used, monitored, enforced and improved when necessary. In each of the compliance-related recommendations and mandates that we have reviewed, the code of conduct is expected to be reinforced by mechanisms to take it off the shelf, and out of the computer, and make it work throughout the organization.

It is not our goal in the remainder of this chapter to review in depth these additional elements of an "effective" compliance program. But before closing we would like to briefly discuss some of the other elements that should be included in your organizations compliance program to ensure that the code will have the necessary infrastructure and support to achieve its objectives. These programs are an effective combination of process and substance: process to incorporate the elements of the FSGO and the tools needed to impact behavior; and substance to address the substantive legal and compliance issues that are most important to the organization.

[2] Status and Resources--The Tone From the Top

[a] The Tone From the Top

Nothing is more critical to the success of a compliance program--and more essential to the creation of a compliance culture--than active and constant support from the top. It takes time and resources to write an effective code of conduct for an organization, and far more time and resources to make the code come alive in that organization. Companies that are serious about compliance must be willing to commit the resources to make this happen. Organizations must also give their compliance programs sufficient status and stature to persuade officers and employees to take the program seriously. One way to accomplish both objectives, used by many companies, is for the board of directors to formally adopt the compliance program, including the code of conduct, thus signifying its importance to senior management and the rest of the organization. According to the Conference Board, "ethics and compliance practices are a crucial component of corporate governance programs and should take center stage on board agendas." In this regard, boards

"should undertake responsibility for overseeing the process adopted to draft, update, and enforce a corporate code of business conduct."¹

Another way is to set and communicate the right tone from the top, as demonstrated by the answers to the following questions.

[b] Who Owns Compliance?

One key to an effective compliance program is clarity regarding the ownership of compliance and about the right division of responsibility for compliance-related activities. The Compliance staff cannot be the sole owners of the organization's legal and regulatory obligations. Instead, the Compliance Department should be responsible for the "pre" and "post" of compliance:

"Pre"--This means helping supervisors and employees identify, understand and address the significant legal and regulatory requirements associated with their part of the business. The code of conduct is the central element in meeting this responsibility.

"Post"--Compliance should organize efforts to check, from time to time, on how well business units and employees are doing at meeting these requirements.

It is critical that business leaders and their employees are held responsible for what comes in-between-actual compliance with these requirements. Senior leadership must make this clear throughout the organization.

[c] Who is the Compliance Officer?

Organizations should have a compliance officer who can command attention throughout the organization and must give that compliance officer direct and regular access to senior management and the board of directors. As the SEC has explained, the compliance or ethics officer identified in an organization's code of conduct must have "sufficient status in the company to engender respect for the code and the authority to deal with persons subject to the code regardless of their status in the company."² The Ad Hoc Advisory Group believes that "the official charged with implementing an organization's compliance program [must have] the formal authority, access to senior management, and the respect needed to manage and oversee" the program, while the Sentencing Commission has called for such individual(s) to "be given adequate resources, appropriate authority, and direct access to the governing authority, or an appropriate subgroup of the governing authority."³ Likewise, an analysis by five ethics and compliance organizations has concluded that "an executive position of Chief Ethics and Compliance Officer (CECO) with broad authority, access to the Chief Executive and the Board, and sufficient financial and other resources is a central element in the successful development of an ethical culture in organizations."⁴

Compliance officers these days typically report directly to the CEO or to some other high-level executive such as the General Counsel. Some also have a "dotted line" or even a direct line to the Audit Committee of the Board of Directors, reflecting their ability to report directly to the board in the event of serious compliance violations or allegations of misconduct by senior executives. In these cases, according to the Ad Hoc Advisory Group, compliance officers must be able to report to the organization's governing authority "without the potential filtering or censoring influence of senior organization managers." The study by the ethics organizations concludes that "the decision as to where the CECO will report is perhaps the single biggest influence on the credibility and authority of the role." As a consequence, the CECO should report in at least some fashion to the "top of the organization"--meaning the CEO and/or the Board.⁵

The DOJ, in its testimony to the Ad Hoc Advisory Group, put the issue this way:

We believe it is critical that compliance officers have a direct reporting line to the CEO, the Board of Directors, the outside auditors, or some independent committee of the Board. This access is critical,

we believe, to uncovering and preventing criminal activity by high ranking corporate managers.n6

As noted above, health care companies must consider the views of the OIG that the CCO should not report to the General Counsel or the Chief Financial Officer.

In the aftermath of the Enron bankruptcy, the National Association of Corporate Directors recommended that boards "review the adequacy of their companies' compliance and reporting systems at least annually. In particular, boards should ensure that management pays strict attention to ethical behavior and compliance with laws and regulations, approved auditing and accounting principles, and with internal governing documents."n7 It should finally be noted in this regard that, as the "profession" of compliance officer has developed, various organizations have begun to create Standards of Conduct for the job and even to devise certification training and tests, much as other professions have been doing for years.n8

[d] What are the Resources for Compliance?

The compliance officer must also have the commitment of resources to effectively implement the code of conduct, regardless of where he or she sits on the organization chart. The Thompson Memorandum notes that one way the DOJ will evaluate compliance in an organization is to look "whether the corporation has provided for a staff sufficient to audit, document, analyze, and utilize the results of the corporation's compliance efforts."n9 The Ad Hoc Advisory Group adds that "the allocation of these sorts of resources is needed to ensure that a company's compliance program is not just a paper program, but rather a substantial management effort with the resources needed to succeed."n10

Senior management and boards of directors must ask themselves the kinds of questions about their compliance programs that regulators, prosecutors and employees will ask: have they provided the people and other resources--either within the compliance department or from other departments within the organization--to:

- conduct compliance training and otherwise communicate compliance standards and expectations; to analyze and respond to hotline calls;
- regularly track and evaluate new laws and regulations; to monitor and audit business unit compliance performance;
- report to directors and senior management on compliance performance; and
- respond firmly and effectively to issues, problems and violations.

These resources need not all be within a centralized compliance function. A growing number of organizations--especially those with large numbers of employees and locations around the world--have adopted a "hybrid" approach in which the corporate compliance staff is augmented by business resources "on-the-ground" in various business units and international markets. The localized resources can be full-time or part-time. They offer colleagues accessible, business-knowledgeable assistance and can be linked to the organizational compliance objectives through their compliance with standards set up the corporate compliance leaders, periodic reporting to headquarters and participation on a company-wide compliance committee.

[e] How is Senior Leadership Involved with the Compliance Program?

Many organizations have established internal compliance and ethics committees to help organize, strengthen and promote compliance efforts even after the code has been drafted and implemented. These committees may include senior-level representatives of internal audit, law, human resources, information technology, corporate security and line business units, in addition to compliance officers. Some even include the CEO and other leaders at the highest-levels of

the organization. These committees communicate the organization's commitment to compliance and the importance to the most senior executives of the practical, business application of ethics and integrity.

Besides sending the message about the importance of compliance, these compliance leadership teams may also:

- identify and track the organization's response to new legal and regulatory requirements;
- oversee the company's compliance risk assessment and match compliance resources and actions to those risks;
- develop and oversee the implementation of an annual compliance plan;
- set standards for compliance activities in the business units;
- develop tools for communicating, training, monitoring and reporting about compliance; and
- ensure the application of appropriate compliance controls to new business initiatives.

In order to exercise this leadership and oversight, senior executives must receive--and be obligated to react to--regular reports on the compliance performance of the organization. At one company, for example, a quarterly compliance report is made to all members of its Management Committee and then to the Audit Committee of its Board of Directors. This quarterly report has three parts: a written summary of the key compliance issues and activities for that quarter, including any compliance audits or investigations and the primary focus of the compliance team for the period; a report on compliance training throughout the company; and a summary of all the possible violations reported including the nature of the matter, how and when it was reported, by whom it was investigated, and the resolution.

[f] Enterprise Risk Management

One trend that has accelerated in recent years is to consider the compliance function as part of a consolidated Enterprise Risk Management (ERM) team. Under this approach, compliance is combined with Internal Audit, the Sarbanes-Oxley oversight staff and often a "strategic risk management" team under the leadership of a senior executive, more typically as part of finance rather than legal. The ERM approach accomplishes at least three objectives for organizational compliance. First, it gives the compliance team ready access to the internal audit resources and business process oversight needed to accomplish compliance objectives. Second, it places the compliance program squarely in the context of the organization's overall approach to risk, thus making more obvious the contributions that compliance is making to business objectives. Third, this ERM process is most often driven by the organization's CEO and Board.

Here is how one organization has coordinated compliance and ERM. The company conducts an annual assessment of enterprise risks including compliance, financial, business and strategic risks. This assessment reflects the insights of the risk management team, but its analysis is vetted by senior business leaders. The outcome is the identification of the most significant risks and the assignment of responsibility for addressing those risks to risk management, compliance, internal audit or business leaders, as appropriate. Thus, for example, the compliance team may be assigned one or more of the highest priority risks such as compliance with data privacy regulations or oversight of foreign business practices in "corruption-prone" areas. The annual compliance plan is informed by this process, and business leaders throughout the organization can see the direct link between their issues and concerns and the efforts of the compliance team.

This organization ensures coordination by having the chief compliance officer serve on its Enterprise Risk Management Committee, and by adding an ERM representative to its Compliance Committee. The importance of compliance and risk management to broader organizational goals is demonstrated by the inclusion of these issues in the yearly bonus calculations for senior business leaders and their managers.

[3] Communications and Training

The adoption of a new or revised code of conduct should be a significant event, one that is accompanied by a comprehensive communications and training program to emphasize the importance and value of the code, and raise its profile, within the organization. To drive the right behaviors throughout the business and workforce, an organization needs a comprehensive communications plan that makes compliance come alive. This plan should have three parts: (1) raising awareness about the importance of compliance issues; (2) engaging leaders and employees at all levels of the organization in conversations about compliance and ethics through meetings, town halls, focus groups and one-on-ones; and (3) driving behavior--using the results of these interactions to make the compliance program and tools more relevant and effective.

The awareness campaign can begin with the distribution of the code of conduct to all identified stakeholders in hard copy and electronically, in addition to the public disclosures mandated by the regulators, and this distribution can be accompanied by a wide variety of internal communications and compliance-related events to raise awareness and interest.

Organizations may distribute monthly compliance bulletins, newsletters, regular e-mails or special reports on the code and any new regulations or recent enforcement actions. Some have created in-house compliance videos or instituted compliance awards ceremonies to recognize employees and business units for their compliance performance and commitment. Others have special pens, note pads or other items with a compliance-related theme or slogan, or they may have posters, payroll inserts, wallet cards or telephone stickers with the compliance hotline number. Organizations may also have compliance sites on their internal websites for employees to read the code and related policies and procedures, access other resources, take on-line training courses and even ask questions.

Companies are increasingly providing annual training to all employees and others who are covered by their codes, and are also providing introductory compliance training to new employees. Organizational training plans often include both in-person training and on-line training with the subject matter falling into two categories: general compliance awareness and code of conduct training on the one hand, and training about more specific compliance risks related to particular jobs, on the other. This compliance communications and training program cannot be static and, if at all possible, it should not stay at headquarters. As cost-effective as on-line training can be, there is no substitute for live, in-person training at those business units and geographic areas where compliance risks are highest and the likelihood of mistakes or misunderstandings the greatest. Employees of a new joint venture in China or India, for example, can take an on-line training course about the U.S. Foreign Corrupt Practices Act, but only a personal visit from a compliance leader or other resource can make them fully appreciate the scope of the Act, its application to their jobs, the enormous individual and institutional risks, and the myriad ways they can be exposed to those risks.

Moreover, compliance training cannot be "once and done"--a one-time event that accompanies the launch of a new code or the settlement of a compliance matter, and then does not occur again until the next investigation. Compliance training must be part of the regular rhythms and activities of the organization. One best practice is for each business unit and geographic market to develop an annual compliance training plan reflecting the nature of the business and the applicable regulatory issues.

Organizations operating outside the United States need to consider translating the code and compliance training into other languages, and whether some of the provisions and examples in the code need to be modified to reflect local practices, issues and concerns. These organizations also need to provide access to any reporting mechanisms, such as hotlines, for employees and others outside the United States, consistent with the EU data privacy and labor law issues discussed earlier in this chapter.

Employment discrimination cases have held that a code of conduct alone, without communications and training, will not protect an employer from punitive damages. Instead, an employer can avoid such liability if it had implemented "a

well-publicized policy forbidding sexual harassment, gave training on sexual harassment to new employees, established a grievance procedure for sexual harassment complaints, and initiated an investigation of the plaintiffs' complaints."n11

[4] Monitoring and Auditing

It has been said that organizations manage what they measure. If compliance with the code of conduct is important to an organization, then the roll-out of the code should be accompanied by a comprehensive plan to measure and monitor the compliance performance of the business units and individuals subject to the code. This can include regular reporting of compliance performance indicators as well as periodic audits of particular issues, conducted by internal audit or compliance staff.

In this regard, organizations need to determine what these performance indicators will be and how they can be identified, measured and reported. To be most effective, these efforts should be consistent with how the business is managed in general. There should be two categories of indicators, one for the compliance staff and one for the business. This will reinforce the essential point that compliance is every business unit's--and every individual's--responsibility, not just the job of the compliance team.

The first set of indicators reflects the activities of the *compliance* department and staff such as: the number and types of training programs conducted; any communications released to staff; the number and results of compliance-related audits; the number, type and outcomes of calls to the compliance hotline; any regulatory examinations, investigations, audits or inquiries that were handled by compliance; and any Compliance related customer complaints.

The other category of indicators reflects the compliance-related performance of *business* units. These indicators will generally be industry-specific. In health-maintenance organizations, for example, they could include reports on the timeliness of claims processing, the handling of requests for service, and the licensing of sales staff. In financial services, compliance performance indicators could include measures of sales practices such as replacements of existing policies, suitability of sales, agent disciplinary actions, investigations or inquiries by regulators, agent and client retention, timeliness and frequency of customer transactions, monitoring of employee stock trades and field audit results. Each business unit should create a compliance plan that incorporates these key indicators, required remediation from internal audits, and other commitments to regulators and external stakeholders.

The key is to relate the indicators to the most important regulations impacting the organizations. Both categories of compliance performance indicators should be reported regularly to senior business management and to the board of directors.

The compliance program guidance from the OIG puts it this way:

An ongoing evaluation process is critical to a successful compliance program ... Compliance reports created by this ongoing monitoring, including reports of suspected noncompliance should be maintained by the compliance officer and shared with senior management.n12

The OIG adds that "one effective tool to promote and ensure compliance is the performance of regular, periodic compliance audits by internal or external auditors who have expertise in Federal and State health care program requirements."

The DII describes compliance audits as "systematic reviews of the policies, procedures, and practices at specific operations or divisions, and regular examinations of selected activities to ensure compliance. They serve to verify the existence and the efficacy of the company's internal procedures; to assess adherence to the company's code of conduct and compliance with federal procurement laws; to monitor risks; and to develop corrective action programs."n13

Regardless of the compliance performance indicators or monitoring and auditing techniques that are used, organizations must have a structured means of responding to identified issues and documenting these responses. Some organizations have developed special tracking reports--or use existing management and performance reports--to ensure that identified compliance-related deficiencies are eliminated.

[5] Logging, Investigating and Reporting

It also is imperative, in this intense regulatory and enforcement environment, for organizations to implement effective processes for investigating all of the compliance-related matters that are reported through the various tools we have described earlier. This enables companies to prevent problems in the first instance, keep small issues from becoming big problems, identify trends or other potential company-wide concerns and--in each instance--investigate and effectively address compliance concerns without outside intervention. One company has created the Compliance Incident and Investigations Protocol to achieve these objectives. First, the Protocol requires that business leaders and supervisors across the organization make prompt reports to the Compliance Team of all *possible* violations of the code of conduct or other compliance-related rules and policies. Second, the Protocol provides a single interface for the handling of all compliance issues, as the Compliance Team logs each report from any source into a centralized case management system. Third, business leaders, other interested parties (such as human resources where appropriate) and the Compliance Team then agree on the need for investigation, the process and resources for conducting investigations and the response to each matter. Finally, the Protocol is used to generate monthly reports to company leaders and quarterly reports to the Audit Committee of the Board of Directors. In this way, the organization has simplified compliance investigations and reports, involved the right people quickly and effectively, and achieved better outcomes for the organization and for the individuals involved in these matters.¹⁴

[6] Annual Compliance Plan

Organizations should have annual compliance plans, just as they have annual business plans. According to one regulator, the way to measure an organization's "culture of compliance" is to determine if it has provided the resources and leadership to:

- (1) develop a "strategic vision" for compliance that fits in with corporate goals;
- (2) identify specific compliance risks related to this vision;
- (3) establish control points for each risk;
- (4) manage and document the process of controlling each risk; and
- (5) make specific people accountable for managing each element of the compliance program.¹⁵

Central to this process is the development of a compliance plan and program that reflects the regulations applicable to the business of the organization, industry practices and issues, the size and structure of the organization and its compliance history. "Off-the-shelf" compliance programs will not be effective.

The level of effort and resources committed to the compliance planning process is a tangible reflection of the priority attached to the program by the leadership of the organization, and it will help determine whether the compliance staff has the ability to know what is going on throughout the business and can effectively influence organizational and individual behavior.

[7] Review and Modification

The compliance program must also have a built-in process for reviewing and modifying the code, and the other elements of the program, in response to changes in business conditions, new laws and regulations or problems that have been identified. Some companies do a structured "yearly review" of their compliance program. During this process, they review recent regulatory developments in their industry, examine the results of compliance audits and other performance indicators and determine if additional compliance resources, training, audits or other actions are needed in particular business units or with regard to specified subjects.

Former SEC Chairman William Donaldson, in discussing the Commission's requirement that all investment advisers have compliance programs, has said that:

The adequacy and effectiveness of these [compliance] policies and procedures must be reviewed at least once a year. The review should consider any compliance matters that arose during the previous year, any changes in the business activities of the adviser or its affiliates, and any changes in the Advisers Act or applicable regulations that might suggest a need to revise the policies or procedures.¹⁶

Other organizations have a formal process for identifying, communicating and tracking compliance with the laws and regulations. These organizations designate business and legal "issue owners" for the various categories of laws and regulations that apply to the business, and then assure that appropriate processes and resources are in place to identify and address changes in laws and regulations in these areas. This has the added advantage of helping integrate and embed compliance issues and concerns into business units throughout the organization. Another approach to this process is for the compliance and legal staffs to identify and evaluate each new law and regulation, send a description to each business unit that might be impacted and require the business units to explain how they will comply. The compliance department will then periodically check with the business units to determine if they are in full compliance. This allows the organization to adjust its compliance program based on any new regulatory mandates that are identified and to track and document its efforts. Another useful technique is to formally include compliance as an express part of each new business initiative. As one SEC official stated:

One of the most important lessons we have learned is that your compliance program cannot be static. It can't be 'done,' 'on the shelf,' or 'fixed.' An effective compliance program must continue to evolve and, to do so, the program must be able to identify, meet and incorporate changes in your business.¹⁷

Each of these ideas needs to be considered--and, if appropriate, built into the compliance program--before the code of conduct is adopted and communicated, so that the organization is ready to make the code succeed.

[8] Employee Surveys of the Company's Compliance Culture

In addition to using the compliance performance measures described above, some organizations are using employee surveys to assess employee attitudes about the compliance culture and program. These surveys can measure employee attitudes about the "tone at the top," awareness about the compliance program elements, willingness to ask for help and raise issues without fear of retaliation, and perceptions about their managers' commitment to doing the right thing. According to Patricia Harned, President of the Ethics Resource Center, "[a] critical element on the effectiveness of a program has to be: 'What do our employees think?'"¹⁸ Organizations that are willing to test and address these attitudes on the front lines will be better able to create, promote, maintain and demonstrate the kind of culture of ethics and compliance that is now being demanded by regulators, prosecutors and compliance experts.

(n14)Footnote 14. The process of investigating violations of the code of conduct is not without its perils, as witnessed by the controversy involving Hewlett-Packard. In that case, the company's former Board chairwoman *and its former senior counsel and director of ethics* were charged by California state authorities with several crimes, in connection with their investigation into possible leaks of confidential company information by members of the Board of Directors. The charges stemmed from the use by outside investigators working for the company of a technique called "pretexting" to obtain the home-phone and cell-phone records of targets of the investigation. While no convictions resulted, the investigation extracted an enormous personal and professional toll on the organization and the individuals involved. One lesson here is to engage the services of very experienced outside counsel to help plan, oversee and even conduct compliance investigations of any magnitude.

CHAPTER 13 COMPLIANCE AND THE CODE OF CONDUCT

2-13 Corporate Governance: Law and Practice § 13.12

AUTHOR: Jay M. Cohen

§ 13.12 Four Substantive Principles to Guide the Compliance Program

Here are four substantive principles to keep in mind in drafting and revising the code of conduct, and in reviewing and enhancing the organization's compliance program.

- (1) Good business equals good compliance. Business processes and tools-and relevant, understandable policies and procedures-that improve the effectiveness of business operations will also promote compliance and integrity.
- (2) There should be no gap between the size and complexity of the business and the scope of its code of conduct and overall compliance program. Compliance policies, controls and tools must reflect the specifics of-and changes in-the business, and must be built into and alongside new business initiatives and technologies.
- (3) Companies' compliance endeavors will be held to standards of "best practices" and compared to what other companies are doing in their own compliance programs. As we have seen throughout this chapter, regulators are becoming more sophisticated and demanding about what good compliance programs and cultures should look like, and they will judge companies' compliance programs according to increasingly high standards.
- (4) Keep in mind the two goals of organizational compliance: to prevent, detect and respond appropriately and aggressively to any violations of laws, regulations and company policies; and to limit organizational responsibility for the inevitable violations by individuals, because of everything the company did to meet the first goal before those violations occurred.

CHAPTER 13 COMPLIANCE AND THE CODE OF CONDUCT

2-13 Corporate Governance: Law and Practice § 13.13

AUTHOR: Jay M. Cohen

§ 13.13 Conclusion: The Importance of the Code of Conduct

Codes of conduct--and accompanying compliance and ethics programs--do make a difference, as judged by the actions of employees, government agencies and companies. According to the 2007 National Business Ethics Survey of more than 3,000 American workers, conducted by the Ethics Resource Center ("ERC"), employees are more likely to report misconduct--and less likely to feel pressure to compromise standards of business conduct--when their organization has both an "ethical culture" and compliance or ethics program including written standards of conduct.ⁿ¹

As the corporate monitor appointed by the federal court in the WorldCom case stated: "[A]n important part of the structure of any company should be the adoption and communication of a statement of values and principles ... A code of ethics is an opportunity for a company to express important values, and in this manner reflect both the norms of society generally, and the standards of behavior that the company wishes to set for itself."ⁿ²

Even when the latest round of corporate scandals fades from memory, compliance with legal and regulatory requirements and ethical standards will remain a constant responsibility of every organization. Each organization's compliance program should begin with--and be built around--a strong, comprehensive code of conduct.

[13-A] The Federal Sentencing Guidelines for Organizations (As amended, effective Nov. 1, 2004)

CHAPTER EIGHT - SENTENCING OF ORGANIZATIONS

Introductory Commentary

The guidelines and policy statements in this chapter apply when the convicted defendant is an organization. Organizations can act only through agents and, under federal criminal law, generally are vicariously liable for offenses committed by their agents. At the same time, individual agents are responsible for their own criminal conduct. Federal prosecutions of organizations therefore frequently involve individual and organizational co-defendants. Convicted individual agents of organizations are sentenced in accordance with the guidelines and policy statements in the preceding chapters. This chapter is designed so that the sanctions imposed upon organizations and their agents, taken together, will provide just punishment, adequate deterrence, and incentives for organizations to maintain internal mechanisms for preventing, detecting, and reporting criminal conduct.

This chapter reflects the following general principles:

First, the court must, whenever practicable, order the organization to remedy any harm caused by the offense. The resources expended to remedy the harm should not be viewed as punishment, but rather as a means of making victims whole for the harm caused.

Second, if the organization operated primarily for a criminal purpose or primarily by criminal means, the fine should be set sufficiently high to divest the organization of all its assets.

Third, the fine range for any other organization should be based on the seriousness of the offense and the culpability of the organization. The seriousness of the offense generally will be reflected by the greatest of the pecuniary gain, the pecuniary loss, or the amount in a guideline offense level fine table. Culpability generally will be determined by six factors that the sentencing court must consider. The four factors that increase the ultimate punishment of an organization are: (i) the involvement in or tolerance of criminal activity; (ii) the prior history of the organization; (iii) the violation of an order; and (iv) the obstruction of justice. The two factors that mitigate the ultimate punishment of an organization are: (i) the existence of an effective compliance and ethics program; and (ii) self-reporting, cooperation, or acceptance of responsibility.

Fourth, probation is an appropriate sentence for an organizational defendant when needed to ensure that another sanction will be fully implemented, or to ensure that steps will be taken within the organization to reduce the likelihood of future criminal conduct.

These guidelines offer incentives to organizations to reduce and ultimately eliminate criminal conduct by providing a structural foundation from which an organization may self-police its own conduct through an effective compliance and ethics program. The prevention and detection of criminal conduct, as facilitated by an effective compliance and ethics program, will assist an organization in encouraging ethical conduct and in complying fully with all applicable laws.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422). Amended effective November 1, 2004 (see Appendix C, amendment 673).

PART A - GENERAL APPLICATION PRINCIPLES

§ 8A1.1. Applicability of Chapter Eight

This chapter applies to the sentencing of all organizations for felony and Class A misdemeanor offenses.

Commentary

Application Notes:

1. "Organization" means "a person other than an individual." 18 U.S.C. § 18. The term includes corporations, partnerships, associations, joint-stock companies, unions, trusts, pension funds, unincorporated organizations, governments and political subdivisions thereof, and non-profit organizations.

2. The fine guidelines in §§ 8C2.2 through 8C2.9 apply only to specified types of offenses. The other provisions of this chapter apply to the sentencing of all organizations for all felony and Class A misdemeanor offenses. For example, the restitution and probation provisions in Parts B and D of this chapter apply to the sentencing of an organization, even if the fine guidelines in §§ 8C2.2 through 8C2.9 do not apply.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8A1.2. Application Instructions - Organizations

(a) Determine from Part B, Subpart 1 (Remedying Harm from Criminal Conduct) the sentencing requirements and options relating to restitution, remedial orders, community service, and notice to victims.

(b) Determine from Part C (Fines) the sentencing requirements and options relating to fines:

(1) If the organization operated primarily for a criminal purpose or primarily by criminal means, apply § 8C1.1 (Determining the Fine - Criminal Purpose Organizations).

(2) Otherwise, apply § 8C2.1 (Applicability of Fine Guidelines) to identify the counts for which the provisions of §§ 8C2.2 through 8C2.9 apply. For such counts:

(A) Refer to § 8C2.2 (Preliminary Determination of Inability to Pay Fine) to determine whether an abbreviated determination of the guideline fine range may be warranted.

(B) Apply § 8C2.3 (Offense Level) to determine the offense level from Chapter Two (Offense Conduct) and Chapter Three, Part D (Multiple Counts).

(C) Apply § 8C2.4 (Base Fine) to determine the base fine.

(D) Apply § 8C2.5 (Culpability Score) to determine the culpability score. To determine whether the organization had an effective compliance and ethics program for purposes of § 8C2.5(f), apply § 8B2.1 (Effective Compliance and Ethics Program).

(E) Apply § 8C2.6 (Minimum and Maximum Multipliers) to determine the minimum and maximum multipliers corresponding to the culpability score.

(F) Apply § 8C2.7 (Guideline Fine Range - Organizations) to determine the minimum and maximum of the guideline fine range.

(G) Refer to § 8C2.8 (Determining the Fine Within the Range) to determine the amount of the fine within the applicable guideline range.

(H) Apply § 8C2.9 (Disgorgement) to determine whether an increase to the fine is required.

For any count or counts not covered under § 8C2.1 (Applicability of Fine Guidelines), apply § 8C2.10 (Determining the Fine for Other Counts).

(3) Apply the provisions relating to the implementation of the sentence of a fine in Part C, Subpart 3 (Implementing the Sentence of a Fine).

(4) For grounds for departure from the applicable guideline fine range, refer to Part C, Subpart 4 (Departures from the Guideline Fine Range).

(c) Determine from Part D (Organizational Probation) the sentencing requirements and options relating to probation.

(d) Determine from Part E (Special Assessments, Forfeitures, and Costs) the sentencing requirements relating to special assessments, forfeitures, and costs.

Commentary

Application Notes:

1. Determinations under this chapter are to be based upon the facts and information specified in the applicable guideline. Determinations that reference other chapters are to be made under the standards applicable to determinations under those chapters.

2. The definitions in the Commentary to § 1B1.1 (Application Instructions) and the guidelines and commentary in §§ 1B1.2 through 1B1.8 apply to determinations under this chapter unless otherwise specified. The adjustments in Chapter Three, Parts A (Victim-Related Adjustments), B (Role in the Offense), C (Obstruction), and E (Acceptance of Responsibility) do not apply. The provisions of Chapter Six (Sentencing Procedures and Plea Agreements) apply to proceedings in which the defendant is an organization. Guidelines and policy statements not referenced in this chapter, directly or indirectly, do

not apply when the defendant is an organization; e.g., the policy statements in Chapter Seven (Violations of Probation and Supervised Release) do not apply to organizations.

3. *The following are definitions of terms used frequently in this chapter:*

(a) "Offense" means the offense of conviction and all relevant conduct under § 1B1.3 (Relevant Conduct) unless a different meaning is specified or is otherwise clear from the context. The term "instant" is used in connection with "offense," "federal offense," or "offense of conviction," as the case may be, to distinguish the violation for which the defendant is being sentenced from a prior or subsequent offense, or from an offense before another court (e.g., an offense before a state court involving the same underlying conduct).

(b) "High-level personnel of the organization" means individuals who have substantial control over the organization or who have a substantial role in the making of policy within the organization. The term includes: a director; an executive officer; an individual in charge of a major business or functional unit of the organization, such as sales, administration, or finance; and an individual with a substantial ownership interest. "High-level personnel of a unit of the organization" is defined in the Commentary to § 8C2.5 (Culpability Score).

(c) "Substantial authority personnel" means individuals who within the scope of their authority exercise a substantial measure of discretion in acting on behalf of an organization. The term includes high-level personnel of the organization, individuals who exercise substantial supervisory authority (e.g., a plant manager, a sales manager), and any other individuals who, although not a part of an organization's management, nevertheless exercise substantial discretion when acting within the scope of their authority (e.g., an individual with authority in an organization to negotiate or set price levels or an individual authorized to negotiate or approve significant contracts). Whether an individual falls within this category must be determined on a case-by-case basis.

(d) "Agent" means any individual, including a director, an officer, an employee, or an independent contractor, authorized to act on behalf of the organization.

(e) An individual "condoned" an offense if the individual knew of the offense and did not take reasonable steps to prevent or terminate the offense.

(f) "Similar misconduct" means prior conduct that is similar in nature to the conduct underlying the instant offense, without regard to whether or not such conduct violated the same statutory provision. For example, prior Medicare fraud would be misconduct similar to an instant offense involving another type of fraud.

(g) "Prior criminal adjudication" means conviction by trial, plea of guilty (including an Alford plea), or plea of nolo contendere.

(h) "Pecuniary gain" is derived from 18 U.S.C. § 3571(d) and means the additional before-tax profit to the defendant resulting from the relevant conduct of the offense. Gain can result from either additional revenue or cost savings. For example, an offense involving odometer tampering can produce additional revenue. In such a case, the pecuniary gain is the additional revenue received because the automobiles appeared to

have less mileage, i.e., the difference between the price received or expected for the automobiles with the apparent mileage and the fair market value of the automobiles with the actual mileage. An offense involving defense procurement fraud related to defective product testing can produce pecuniary gain resulting from cost savings. In such a case, the pecuniary gain is the amount saved because the product was not tested in the required manner.

(i) "Pecuniary loss" is derived from 18 U.S.C. § 3571(d) and is equivalent to the term "loss" as used in Chapter Two (Offense Conduct). See Commentary to § 2B1.1 (Theft, Property Destruction, and Fraud), and definitions of "tax loss" in Chapter Two, Part T (Offenses Involving Taxation).

(j) An individual was "willfully ignorant of the offense" if the individual did not investigate the possible occurrence of unlawful conduct despite knowledge of circumstances that would lead a reasonable person to investigate whether unlawful conduct had occurred.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422); November 1, 1997 (see Appendix C, amendment 546); November 1, 2001 (see Appendix C, amendment 617); November 1, 2004 (see Appendix C, amendment 673).

PART B - REMEDYING HARM FROM CRIMINAL CONDUCT, AND EFFECTIVE COMPLIANCE AND ETHICS PROGRAM

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422). Amended effective November 1, 2004 (see Appendix C, amendment 673).

1. REMEDYING HARM FROM CRIMINAL CONDUCT

Historical Note: Effective November 1, 2004 (see Appendix C, amendment 673).

Introductory Commentary

As a general principle, the court should require that the organization take all appropriate steps to provide compensation to victims and otherwise remedy the harm caused or threatened by the offense. A restitution order or an order of probation requiring restitution can be used to compensate identifiable victims of the offense. A remedial order or an order of probation requiring community service can be used to reduce or eliminate the harm threatened, or to repair the harm caused by the offense, when that harm or threatened harm would otherwise not be remedied. An order of notice to victims can be used to notify unidentified victims of the offense.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8B1.1. Restitution - Organizations

(a) In the case of an identifiable victim, the court shall --

(1) enter a restitution order for the full amount of the victim's loss, if such order is authorized under 18 U.S.C. § 2248, § 2259, § 2264, § 2327, § 3663, or § 3663A; or

(2) impose a term of probation or supervised release with a condition requiring restitution for the full amount of the victim's loss, if the offense is not an offense for which restitution is authorized under 18 U.S.C. § 3663(a)(1) but otherwise meets the criteria for an order of restitution under that section.

(b) Provided, that the provisions of subsection (a) do not apply --

(1) when full restitution has been made; or

(2) in the case of a restitution order under § 3663; a restitution order under *18 U.S.C. § 3663A* that pertains to an offense against property described in *18 U.S.C. § 3663A(c)(1)(A)(ii)*; or a condition of restitution imposed pursuant to subsection (a)(2) above, to the extent the court finds, from facts on the record, that (A) the number of identifiable victims is so large as to make restitution impracticable; or (B) determining complex issues of fact related to the cause or amount of the victim's losses would complicate or prolong the sentencing process to a degree that the need to provide restitution to any victim is outweighed by the burden on the sentencing process.

(c) If a defendant is ordered to make restitution to an identifiable victim and to pay a fine, the court shall order that any money paid by the defendant shall first be applied to satisfy the order of restitution.

(d) A restitution order may direct the defendant to make a single, lump sum payment, partial payments at specified intervals, in-kind payments, or a combination of payments at specified intervals and in-kind payments. See *18 U.S.C. § 3664(f)(3)(A)*. An in-kind payment may be in the form of (1) return of property; (2) replacement of property; or (3) if the victim agrees, services rendered to the victim or to a person or organization other than the victim. See *18 U.S.C. § 3664(f)(4)*.

(e) A restitution order may direct the defendant to make nominal periodic payments if the court finds from facts on the record that the economic circumstances of the defendant do not allow the payment of any amount of a restitution order, and do not allow for the payment of the full amount of a restitution order in the foreseeable future under any reasonable schedule of payments.

(f) Special Instruction

(1) This guideline applies only to a defendant convicted of an offense committed on or after November 1, 1997. Notwithstanding the provisions of § 1B1.11 (Use of Guidelines Manual in Effect on Date of Sentencing), use the former § 8B1.1 (set forth in Appendix C, amendment 571) in lieu of this guideline in any other case.

Commentary

Background: Section 3553(a)(7) of Title 18, United States Code, requires the court, "in determining the particular sentence to be imposed," to consider "the need to provide restitution to any victims of the offense." Orders of restitution are authorized under 18 U.S.C. §§ 2248, 2259, 2264, 2327, 3663, and 3663A. For offenses for which an order of restitution is not authorized, restitution may be imposed as a condition of probation.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422); November 1, 1997 (see Appendix C, amendment 571).

§ 8B1.2. Remedial Orders - Organizations (Policy Statement)

(a) To the extent not addressed under § 8B1.1 (Restitution - Organizations), a remedial order imposed as a condition of probation may require the organization to remedy the harm caused by the offense and to eliminate or reduce the risk that the instant offense will cause future harm.

(b) If the magnitude of expected future harm can be reasonably estimated, the court may require the organization to create a trust fund sufficient to address that expected harm.

Commentary

Background: The purposes of a remedial order are to remedy harm that has already occurred and to prevent future harm. A remedial order requiring corrective action by the organization may be necessary to prevent future injury from the instant offense, e.g., a product recall for a food and drug violation or a clean-up order for an environmental violation. In some cases in which a remedial order potentially may be appropriate, a governmental regulatory agency, e.g., the Environmental Protection Agency or the Food and Drug Administration, may have authority to order remedial measures. In such cases, a remedial order by the court may not be necessary. If a remedial order is entered, it should be coordinated with any administrative or civil actions taken by the appropriate governmental regulatory agency.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8B1.3. Community Service - Organizations (Policy Statement)

Community service may be ordered as a condition of probation where such community service is reasonably designed to repair the harm caused by the offense.

Commentary

Background: An organization can perform community service only by employing its resources or paying its employees or others to do so. Consequently, an order that an organization perform community service is essentially an indirect monetary sanction, and therefore generally less desirable than a direct monetary sanction. However, where the convicted organization possesses knowledge, facilities, or skills that uniquely qualify it to repair damage caused by the offense, community service directed at repairing damage may provide an efficient means of remedying harm caused.

In the past, some forms of community service imposed on organizations have not been related to the purposes of sentencing. Requiring a defendant to endow a chair at a university or to contribute to a local charity would not be consistent with this section unless such community service provided a means for preventive or corrective action directly related to the offense and therefore served one of the purposes of sentencing set forth in 18 U.S.C. § 3553(a).

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8B1.4. Order of Notice to Victims - Organizations

Apply § 5F1.4 (Order of Notice to Victims).

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

2. EFFECTIVE COMPLIANCE AND ETHICS PROGRAM

Historical Note: Effective November 1, 2004 (see Appendix C, amendment 673).

§ 8B2.1. Effective Compliance and Ethics Program

(a) To have an effective compliance and ethics program, for purposes of subsection (f) of § 8C2.5 (Culpability Score) and subsection (c)(1) of § 8D1.4 (Recommended Conditions of Probation - Organizations), an organization shall--

(1) exercise due diligence to prevent and detect criminal conduct; and

(2) otherwise promote an organizational culture that encourages ethical conduct and a

commitment to compliance with the law.

Such compliance and ethics program shall be reasonably designed, implemented, and enforced so that the program is generally effective in preventing and detecting criminal conduct. The failure to prevent or detect the instant offense does not necessarily mean that the program is not generally effective in preventing and detecting criminal conduct.

(b) Due diligence and the promotion of an organizational culture that encourages ethical conduct and a commitment to compliance with the law within the meaning of subsection (a) minimally require the following:

(1) The organization shall establish standards and procedures to prevent and detect criminal conduct.

(2)

(A) The organization's governing authority shall be knowledgeable about the content and operation of the compliance and ethics program and shall exercise reasonable oversight with respect to the implementation and effectiveness of the compliance and ethics program.

(B) High-level personnel of the organization shall ensure that the organization has an effective compliance and ethics program, as described in this guideline. Specific individual(s) within high-level personnel shall be assigned overall responsibility for the compliance and ethics program.

(C) Specific individual(s) within the organization shall be delegated day-to-day operational responsibility for the compliance and ethics program. Individual(s) with operational responsibility shall report periodically to high-level personnel and, as appropriate, to the governing authority, or an appropriate subgroup of the governing authority, on the effectiveness of the compliance and ethics program. To carry out such operational responsibility, such individual(s) shall be given adequate resources, appropriate authority, and direct access to the governing authority or an appropriate subgroup of the governing authority.

(3) The organization shall use reasonable efforts not to include within the substantial authority personnel of the organization any individual whom the organization knew, or should have known through the exercise of due diligence, has engaged in illegal activities or other conduct inconsistent with an effective compliance and ethics program.

(4)

(A) The organization shall take reasonable steps to communicate periodically and in a practical manner its standards and procedures, and other aspects of the compliance and ethics program, to the individuals referred to in subdivision (B) by conducting effective training programs and otherwise disseminating information appropriate to such individuals' respective roles and responsibilities.

(B) The individuals referred to in subdivision (A) are the members of the governing authority, high-level personnel, substantial authority personnel, the organization's employees, and, as appropriate, the organization's agents.

(5) The organization shall take reasonable steps --

(A) to ensure that the organization's compliance and ethics program is followed, including monitoring and auditing to detect criminal conduct;

(B) to evaluate periodically the effectiveness of the organization's compliance and ethics program; and

(C) to have and publicize a system, which may include mechanisms that allow for anonymity or confidentiality, whereby the organization's employees and agents may report or seek guidance regarding potential or actual criminal conduct without fear of retaliation.

(6) The organization's compliance and ethics program shall be promoted and enforced consistently throughout the organization through (A) appropriate incentives to perform in accordance with the compliance and ethics program; and (B) appropriate disciplinary measures for engaging in criminal conduct and for failing to take reasonable steps to prevent or detect criminal conduct.

(7) After criminal conduct has been detected, the organization shall take reasonable steps to respond appropriately to the criminal conduct and to prevent further similar criminal conduct, including making any necessary modifications to the organization's compliance and ethics program.

(c) In implementing subsection (b), the organization shall periodically assess the risk of criminal conduct and shall take appropriate steps to design, implement, or modify each requirement set forth in subsection (b) to reduce the risk of criminal conduct identified through this process.

Commentary

Application Notes:

1. *Definitions.--For purposes of this guideline:*

"Compliance and ethics program" means a program designed to prevent and detect criminal conduct.

"Governing authority" means the (A) the Board of Directors; or (B) if the organization does not have a Board of Directors, the highest-level governing body of the organization.

"High-level personnel of the organization" and "substantial authority personnel" have the meaning given those terms in the Commentary to § 8A1.2 (Application Instructions - Organizations).

"Standards and procedures" means standards of conduct and internal controls that are reasonably capable of reducing the likelihood of criminal conduct.

2. *Factors to Consider in Meeting Requirements of this Guideline.--*

(A) In General.--Each of the requirements set forth in this guideline shall be met by an organization; however, in determining what specific actions are necessary to meet those requirements, factors that shall be considered include: (i) applicable industry practice or the standards called for by any applicable governmental regulation; (ii) the size of the

organization; and (iii) similar misconduct.

(B) Applicable Governmental Regulation and Industry Practice.--An organization's failure to incorporate and follow applicable industry practice or the standards called for by any applicable governmental regulation weighs against a finding of an effective compliance and ethics program.

(C) The Size of the Organization.--

(i) In General.--The formality and scope of actions that an organization shall take to meet the requirements of this guideline, including the necessary features of the organization's standards and procedures, depend on the size of the organization.

(ii) Large Organizations.--A large organization generally shall devote more formal operations and greater resources in meeting the requirements of this guideline than shall a small organization. As appropriate, a large organization should encourage small organizations (especially those that have, or seek to have, a business relationship with the large organization) to implement effective compliance and ethics programs.

(iii) Small Organizations.--In meeting the requirements of this guideline, small organizations shall demonstrate the same degree of commitment to ethical conduct and compliance with the law as large organizations. However, a small organization may meet the requirements of this guideline with less formality and fewer resources than would be expected of large organizations. In appropriate circumstances, reliance on existing resources and simple systems can demonstrate a degree of commitment that, for a large organization, would only be demonstrated through more formally planned and implemented systems.

Examples of

the informality and use of fewer resources with which a small organization may meet the requirements of this guideline include the following: (I) the governing authority's discharge of its responsibility for oversight of the compliance and ethics program by directly managing the organization's compliance and ethics efforts; (II) training employees through informal staff meetings, and monitoring through regular "walk-arounds" or continuous observation while managing the organization; (III) using available personnel, rather than employing separate staff, to carry out the compliance and ethics program; and (IV) modeling its own compliance and ethics program on existing, well-regarded compliance and ethics programs and best practices of other similar organizations.

(D) Recurrence of Similar Misconduct. --Recurrence of similar misconduct creates doubt regarding whether the organization took reasonable steps to meet the requirements of this guideline. For purposes of this subdivision, "similar misconduct" has the meaning given that term in the Commentary to § 8A1.2 (Application Instructions - Organizations).

3. Application of Subsection (b)(2).--High-level personnel and substantial authority personnel of the organization shall be knowledgeable about the content and operation of the compliance and ethics program, shall perform their assigned duties consistent with the exercise of due diligence, and shall promote an organizational culture that encourages ethical conduct and a commitment to compliance with the law.

If the specific individual(s) assigned overall responsibility for the compliance and ethics program does not have day-to-day operational responsibility for the program, then the individual(s) with

day-to-day operational responsibility for the program typically should, no less than annually, give the governing authority or an appropriate subgroup thereof information on the implementation and effectiveness of the compliance and ethics program.

4. *Application of Subsection (b)(3). --*

(A) Consistency with Other Law. --Nothing in subsection (b)(3) is intended to require conduct inconsistent with any Federal, State, or local law, including any law governing employment or hiring practices.

(B) Implementation. --In implementing subsection (b)(3), the organization shall hire and promote individuals so as to ensure that all individuals within the high-level personnel and substantial authority personnel of the organization will perform their assigned duties in a manner consistent with the exercise of due diligence and the promotion of an organizational culture that encourages ethical conduct and a commitment to compliance with the law under subsection (a). With respect to the hiring or promotion of such individuals, an organization shall consider the relatedness of the individual's illegal activities and other misconduct (i.e., other conduct inconsistent with an effective compliance and ethics program) to the specific responsibilities the individual is anticipated to be assigned and other factors such as: (i) the recency of the individual's illegal activities and other misconduct; and (ii) whether the individual has engaged in other such illegal activities and other such misconduct.

5. *Application of Subsection (b)(6).--Adequate discipline of individuals responsible for an offense is a necessary component of enforcement; however, the form of discipline that will be appropriate will be case specific.*

6. *Application of Subsection (c). --To meet the requirements of subsection (c), an organization shall:*

(A) Assess periodically the risk that criminal conduct will occur, including assessing the following:

(i) The nature and seriousness of such criminal conduct.

(ii) The likelihood that certain criminal conduct may occur because of the nature of the organization's business. If, because of the nature of an organization's business, there is a substantial risk that certain types of criminal conduct may occur, the organization shall take reasonable steps to prevent and detect that type of criminal conduct. For example, an organization that, due to the nature of its business, employs sales personnel who have flexibility to set prices shall establish standards and procedures designed to prevent and detect price-fixing. An organization that, due to the nature of its business, employs sales personnel who have flexibility to represent the material characteristics of a product shall establish standards and procedures designed to prevent and detect fraud.

(iii) The prior history of the organization. The prior history of an organization may indicate types of criminal conduct that it shall take actions to prevent and detect.

(B) Prioritize periodically, as appropriate, the actions taken pursuant to any requirement set forth in subsection (b), in order to focus on preventing and detecting the criminal conduct identified under subdivision (A) of this note as most serious, and most likely, to occur.

(C) Modify, as appropriate, the actions taken pursuant to any requirement set forth in subsection (b) to reduce the risk of criminal conduct identified under subdivision (A) of this note as most serious, and most likely, to occur.

Background: This section sets forth the requirements for an effective compliance and ethics program. This section responds to section 805(a)(2)(5) of the Sarbanes-Oxley Act of 2002, Public Law 107--204, which directed the Commission to review and amend, as appropriate, the guidelines and related policy statements to ensure that the guidelines that apply to organizations in this chapter "are sufficient to deter and punish organizational criminal misconduct."

The requirements set forth in this guideline are intended to achieve reasonable prevention and detection of criminal conduct for which the organization would be vicariously liable. The prior diligence of an organization in seeking to prevent and detect criminal conduct has a direct bearing on the appropriate penalties and probation terms for the organization if it is convicted and sentenced for a criminal offense.

Historical Note: Effective November 1, 2004 (see Appendix C, amendment 673).

PART C - FINES

1. DETERMINING THE FINE - CRIMINAL PURPOSE ORGANIZATIONS

§ 8C1.1. Determining the Fine - Criminal Purpose Organizations

If, upon consideration of the nature and circumstances of the offense and the history and characteristics of the organization, the court determines that the organization operated primarily for a criminal purpose or primarily by criminal means, the fine shall be set at an amount (subject to the statutory maximum) sufficient to divest the organization of all its net assets. When this section applies, Subpart 2 (Determining the Fine - Other Organizations) and § 8C3.4 (Fines Paid by Owners of Closely Held Organizations) do not apply.

Commentary

Application Note:

1. "Net assets," as used in this section, means the assets remaining after payment of all legitimate claims against assets by known innocent bona fide creditors.

Background: This guideline addresses the case in which the court, based upon an examination of the nature and circumstances of the offense and the history and characteristics of the organization, determines that the organization was operated primarily for a criminal purpose (e.g., a front for a scheme that was designed to commit fraud; an organization established to participate in the illegal manufacture, importation, or distribution of a controlled substance) or operated primarily by criminal means (e.g., a hazardous waste disposal business that had no legitimate means of disposing of hazardous waste). In such a case, the fine shall be set at an amount sufficient to remove all of the organization's net assets. If the extent of the assets of the organization is unknown, the maximum fine authorized by statute should be imposed, absent innocent bona fide creditors.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

* * *

2. DETERMINING THE FINE - OTHER ORGANIZATIONS

§ 8C2.1. Applicability of Fine Guidelines

The provisions of §§ 8C2.2 through 8C2.9 apply to each count for which the applicable guideline offense level is

determined under:

(a) §§ 2B1.1, 2B1.4, 2B2.3, 2B4.1, 2B5.3, 2B6.1;

§ § 2C1.1, 2C1.2, 2C1.6, 2C1.7;

§ § 2D1.7, 2D3.1, 2D3.2;

§ § 2E3.1, 2E4.1, 2E5.1, 2E5.3;

§ 2G3.1;

§ § 2K1.1, 2K2.1;

§ 2L1.1;

§ 2N3.1;

§ 2R1.1;

§ § 2S1.1, 2S1.3;

§ § 2T1.1, 2T1.4, 2T1.6, 2T1.7, 2T1.8, 2T1.9, 2T2.1, 2T2.2, 2T3.1; or

(b) §§ 2E1.1, 2X1.1, 2X2.1, 2X3.1, 2X4.1, with respect to cases in which the offense level for the underlying offense is determined under one of the guideline sections listed in subsection (a) above.

Commentary

Application Notes:

1. If the Chapter Two offense guideline for a count is listed in subsection (a) or (b) above, and the applicable guideline results in the determination of the offense level by use of one of the listed guidelines, apply the provisions of §§ 8C2.2 through 8C2.9 to that count. For example, §§ 8C2.2 through 8C2.9 apply to an offense under § 2K2.1 (an offense guideline listed in subsection (a)), unless the cross reference in that guideline requires the offense level to be determined under an offense guideline section not listed in subsection (a).

2. If the Chapter Two offense guideline for a count is not listed in subsection (a) or (b) above, but the applicable guideline results in the determination of the offense level by use of a listed guideline, apply the provisions of §§ 8C2.2 through 8C2.9 to that count. For example, where the conduct set forth in a count of conviction ordinarily referenced to § 2N2.1 (an offense guideline not listed in subsection (a)) establishes § 2B1.1 (Theft, Property Destruction, and Fraud) as the applicable offense guideline (an offense guideline listed in subsection (a)), §§ 8C2.2 through 8C2.9 would apply because the actual offense level is determined under § 2B1.1 (Theft, Property Destruction, and Fraud).

Background: The fine guidelines of this subpart apply only to offenses covered by the guideline sections set forth in subsection (a) above. For example, the provisions of §§ 8C2.2 through 8C2.9 do not apply to counts for which the applicable guideline offense level is determined under Chapter Two, Part Q (Offenses Involving the Environment). For

such cases, § 8C2.10 (*Determining the Fine for Other Counts*) is applicable.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422). Amended effective November 1, 1992 (see Appendix C, amendment 453); November 1, 1993 (see Appendix C, amendment 496); November 1, 2001 (see Appendix C, amendments 617, 619, and 634).

§ 8C2.2. Preliminary Determination of Inability to Pay Fine

(a) Where it is readily ascertainable that the organization cannot and is not likely to become able (even on an installment schedule) to pay restitution required under § 8B1.1 (Restitution - Organizations), a determination of the guideline fine range is unnecessary because, pursuant to § 8C3.3(a), no fine would be imposed.

(b) Where it is readily ascertainable through a preliminary determination of the minimum of the guideline fine range (see §§ 8C2.3 through 8C2.7) that the organization cannot and is not likely to become able (even on an installment schedule) to pay such minimum guideline fine, a further determination of the guideline fine range is unnecessary. Instead, the court may use the preliminary determination and impose the fine that would result from the application of § 8C3.3 (Reduction of Fine Based on Inability to Pay).

Commentary

Application Notes:

1. *In a case of a determination under subsection (a), a statement that "the guideline fine range was not determined because it is readily ascertainable that the defendant cannot and is not likely to become able to pay restitution" is recommended.*

2. *In a case of a determination under subsection (b), a statement that "no precise determination of the guideline fine range is required because it is readily ascertainable that the defendant cannot and is not likely to become able to pay the minimum of the guideline fine range" is recommended.*

Background: Many organizational defendants lack the ability to pay restitution. In addition, many organizational defendants who may be able to pay restitution lack the ability to pay the minimum fine called for by § 8C2.7(a). In such cases, a complete determination of the guideline fine range may be a needless exercise. This section provides for an abbreviated determination of the guideline fine range that can be applied where it is readily ascertainable that the fine within the guideline fine range determined under § 8C2.7 (Guideline Fine Range - Organizations) would be reduced under § 8C3.3 (Reduction of Fine Based on Inability to Pay).

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C2.3. Offense Level

(a) For each count covered by § 8C2.1 (Applicability of Fine Guidelines), use the applicable Chapter Two guideline to determine the base offense level and apply, in the order listed, any appropriate adjustments contained in that guideline.

(b) Where there is more than one such count, apply Chapter Three, Part D (Multiple Counts) to determine the combined offense level.

Commentary

Application Notes:

1. In determining the offense level under this section, "defendant," as used in Chapter Two, includes any agent of the organization for whose conduct the organization is criminally responsible.

2. In determining the offense level under this section, apply the provisions of §§ 1B1.2 through 1B1.8. Do not apply the adjustments in Chapter Three, Parts A (Victim-Related Adjustments), B (Role in the Offense), C (Obstruction), and E (Acceptance of Responsibility).

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C2.4. Base Fine

(a) The base fine is the greatest of:

(1) the amount from the table in subsection (d) below corresponding to the offense level determined under § 8C2.3 (Offense Level); or

(2) the pecuniary gain to the organization from the offense; or

(3) the pecuniary loss from the offense caused by the organization, to the extent the loss was caused intentionally, knowingly, or recklessly.

(b) Provided, that if the applicable offense guideline in Chapter Two includes a special instruction for organizational fines, that special instruction shall be applied, as appropriate.

(c) Provided, further, that to the extent the calculation of either pecuniary gain or pecuniary loss would unduly complicate or prolong the sentencing process, that amount, i.e., gain or loss as appropriate, shall not be used for the determination of the base fine.

(d) Offense Level Fine Table

Offense Level	Amount
6 or less	\$5,000
7	\$7,500
8	\$10,000
9	\$15,000
10	\$20,000
11	\$30,000
12	\$40,000
13	\$60,000
14	\$85,000
15	\$125,000
16	\$175,000
17	\$250,000
18	\$350,000
19	\$500,000

20	\$650,000
21	\$910,000
22	\$1,200,000
23	\$1,600,000
24	\$2,100,000
25	\$2,800,000
26	\$3,700,000
27	\$4,800,000
28	\$6,300,000
29	\$8,100,000
30	\$10,500,000
31	\$13,500,000
32	\$17,500,000
33	\$22,000,000
34	\$28,500,000
35	\$36,000,000
36	\$45,500,000
37	\$57,500,000
38 or more	\$72,500,000.

Commentary

Application Notes:

1. "Pecuniary gain," "pecuniary loss," and "offense" are defined in the Commentary to § 8A1.2 (Application Instructions - Organizations). Note that subsections (a)(2) and (a)(3) contain certain limitations as to the use of pecuniary gain and pecuniary loss in determining the base fine. Under subsection (a)(2), the pecuniary gain used to determine the base fine is the pecuniary gain to the organization from the offense. Under subsection (a)(3), the pecuniary loss used to determine the base fine is the pecuniary loss from the offense caused by the organization, to the extent that such loss was caused intentionally, knowingly, or recklessly.

2. Under 18 U.S.C. § 3571(d), the court is not required to calculate pecuniary loss or pecuniary gain to the extent that determination of loss or gain would unduly complicate or prolong the sentencing process. Nevertheless, the court may need to approximate loss in order to calculate offense levels under Chapter Two. See Commentary to § 2B1.1 (Theft, Property Destruction, and Fraud). If loss is approximated for purposes of determining the applicable offense level, the court should use that approximation as the starting point for calculating pecuniary loss under this section.

3. In a case of an attempted offense or a conspiracy to commit an offense, pecuniary loss and pecuniary gain are to be determined in accordance with the principles stated in § 2X1.1 (Attempt, Solicitation, or Conspiracy).

4. In a case involving multiple participants (i.e., multiple organizations, or the organization and individual(s) unassociated with the organization), the applicable offense level is to be determined without regard to apportionment of the gain from or loss caused by the offense. See § 1B1.3 (Relevant Conduct). However, if the base fine is determined under subsections (a)(2) or (a)(3), the court may, as appropriate, apportion gain or loss considering the defendant's relative culpability and other pertinent factors. Note also that under § 2R1.1(d)(1), the volume of commerce, which is used in determining a proxy for loss under § 8C2.4(a)(3), is limited to the volume of commerce attributable to the defendant.

5. Special instructions regarding the determination of the base fine are contained in §§ 2B4.1 (Bribery in Procurement of Bank Loan and Other Commercial Bribery); 2C1.1 (Offering, Giving, Soliciting, or Receiving a Bribe; Extortion Under Color of Official Right; Fraud Involving the Deprivation of the Intangible Right to Honest Services of Public Officials; Conspiracy to Defraud by Interference with Governmental Functions); 2C1.2 (Offering, Giving, Soliciting, or Receiving a Gratuity); 2E5.1 (Offering, Accepting, or Soliciting a Bribe or Gratuity Affecting the Operation of an Employee Welfare or Pension Benefit Plan; Prohibited Payments or Lending of Money by Employer or Agent to Employees, Representatives, or Labor Organizations); and 2R1.1 (Bid-Rigging, Price-Fixing or Market-Allocation Agreements Among Competitors).

Background: Under this section, the base fine is determined in one of three ways: (1) by the amount, based on the offense level, from the table in subsection (d); (2) by the pecuniary gain to the organization from the offense; and (3) by the pecuniary loss caused by the organization, to the extent that such loss was caused intentionally, knowingly, or recklessly. In certain cases, special instructions for determining the loss or offense level amount apply. As a general rule, the base fine measures the seriousness of the offense. The determinants of the base fine are selected so that, in conjunction with the multipliers derived from the culpability score in § 8C2.5 (Culpability Score), they will result in guideline fine ranges appropriate to deter organizational criminal conduct and to provide incentives for organizations to maintain internal mechanisms for preventing, detecting, and reporting criminal conduct. In order to deter organizations from seeking to obtain financial reward through criminal conduct, this section provides that, when greatest, pecuniary gain to the organization is used to determine the base fine. In order to ensure that organizations will seek to prevent losses intentionally, knowingly, or recklessly caused by their agents, this section provides that, when greatest, pecuniary loss is used to determine the base fine in such circumstances. Chapter Two provides special instructions for fines that include specific rules for determining the base fine in connection with certain types of offenses in which the calculation of loss or gain is difficult, e.g., price-fixing. For these offenses, the special instructions tailor the base fine to circumstances that occur in connection with such offenses and that generally relate to the magnitude of loss or gain resulting from such offenses.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422). Amended effective November 1, 1993 (see Appendix C, amendment 496); November 1, 1995 (see Appendix C, amendment 534); November 1, 2001 (see Appendix C, amendment 634); November 1, 2004 (see Appendix C, amendments 666 and 673).

§ 8C2.5. Culpability Score

(a) Start with 5 points and apply subsections (b) through (g) below.

(b) Involvement in or Tolerance of Criminal Activity

If more than one applies, use the greatest:

(1) If --

(A) the organization had 5,000 or more employees and

(i) an individual within high-level personnel of the organization participated in, condoned, or was willfully ignorant of the offense; or

(ii) tolerance of the offense by substantial authority personnel was pervasive throughout the organization; or

(B) the unit of the organization within which the offense was committed had 5,000 or more employees and

(i) an individual within high-level personnel of the unit participated in, condoned, or was willfully ignorant of the offense; or

(ii) tolerance of the offense by substantial authority personnel was pervasive throughout such unit,

add **5** points; or

(2) If --

(A) the organization had 1,000 or more employees and

(i) an individual within high-level personnel of the organization participated in, condoned, or was willfully ignorant of the offense; or

(ii) tolerance of the offense by substantial authority personnel was pervasive throughout the organization; or

(B) the unit of the organization within which the offense was committed had 1,000 or more employees and

(i) an individual within high-level personnel of the unit participated in, condoned, or was willfully ignorant of the offense; or

(ii) tolerance of the offense by substantial authority personnel was pervasive throughout such unit,

add **4** points; or

(3) If --

(A) the organization had 200 or more employees and

(i) an individual within high-level personnel of the organization participated in, condoned, or was willfully ignorant of the offense; or

(ii) tolerance of the offense by substantial authority personnel was pervasive throughout the organization; or

(B) the unit of the organization within which the offense was committed had 200 or more employees and

(i) an individual within high-level personnel of the unit participated in, condoned, or

was willfully ignorant of the offense; or

(ii) tolerance of the offense by substantial authority personnel was pervasive throughout such unit,

add **3** points; or

(4) If the organization had 50 or more employees and an individual within substantial authority personnel participated in, condoned, or was willfully ignorant of the offense, add **2** points; or

(5) If the organization had 10 or more employees and an individual within substantial authority personnel participated in, condoned, or was willfully ignorant of the offense, add **1** point.

(c) Prior History

If more than one applies, use the greater:

(1) If the organization (or separately managed line of business) committed any part of the instant offense less than 10 years after (A) a criminal adjudication based on similar misconduct; or (B) civil or administrative adjudication(s) based on two or more separate instances of similar misconduct, add **1** point; or

(2) If the organization (or separately managed line of business) committed any part of the instant offense less than 5 years after (A) a criminal adjudication based on similar misconduct; or (B) civil or administrative adjudication(s) based on two or more separate instances of similar misconduct, add **2** points.

(d) Violation of an Order

If more than one applies, use the greater:

(1) (A) If the commission of the instant offense violated a judicial order or injunction, other than a violation of a condition of probation; or (B) if the organization (or separately managed line of business) violated a condition of probation by engaging in similar misconduct, i.e., misconduct similar to that for which it was placed on probation, add **2** points; or

(2) If the commission of the instant offense violated a condition of probation, add **1** point.

(e) Obstruction of Justice

If the organization willfully obstructed or impeded, attempted to obstruct or impede, or aided, abetted, or encouraged obstruction of justice during the investigation, prosecution, or sentencing of the instant offense, or, with knowledge thereof, failed to take reasonable steps to prevent such obstruction or impedance or attempted obstruction or impedance, add **3** points.

(f) Effective Compliance and Ethics Program

(1) If the offense occurred even though the organization had in place at the time of the offense an effective compliance and ethics program, as provided in § 8B2.1 (Effective Compliance and Ethics Program), subtract **3** points.

(2) Subsection (f)(1) shall not apply if, after becoming aware of an offense, the organization unreasonably delayed reporting the offense to appropriate governmental authorities.

(3)

(A) Except as provided in subdivision (B), subsection (f)(1) shall not apply if an individual within high-level personnel of the organization, a person within high-level personnel of the unit of the organization within which the offense was committed where the unit had 200 or more employees, or an individual described in § 8B2.1(b)(2)(B) or (C), participated in, condoned, or was willfully ignorant of the offense.

(B) There is a rebuttable presumption, for purposes of subsection (f)(1), that the organization did not have an effective compliance and ethics program if an individual--

(i) within high-level personnel of a small organization; or

(ii) within substantial authority personnel, but not within high-level personnel, of any organization, participated in, condoned, or was willfully ignorant of, the offense.

(g) Self-Reporting, Cooperation, and Acceptance of Responsibility

If more than one applies, use the greatest:

(1) If the organization (A) prior to an imminent threat of disclosure or government investigation; and (B) within a reasonably prompt time after becoming aware of the offense, reported the offense to appropriate governmental authorities, fully cooperated in the investigation, and clearly demonstrated recognition and affirmative acceptance of responsibility for its criminal conduct, subtract **5** points; or

(2) If the organization fully cooperated in the investigation and clearly demonstrated recognition and affirmative acceptance of responsibility for its criminal conduct, subtract **2** points; or

(3) If the organization clearly demonstrated recognition and affirmative acceptance of responsibility for its criminal conduct, subtract **1** point.

Commentary

Application Notes:

1. *Definitions.--For purposes of this guideline, "condoned", "prior criminal adjudication", "similar misconduct", "substantial authority personnel", and "willfully ignorant of the offense" have the meaning given those terms in Application Note 3 of the Commentary to § 8A1.2 (Application Instructions - Organizations).*

"Small Organization", for purposes of subsection (f)(3), means an organization that, at the time of the instant offense, had fewer than 200 employees.

2. *For purposes of subsection (b), "unit of the organization" means any reasonably distinct operational component of the organization. For example, a large organization may have several large units such as*

divisions or subsidiaries, as well as many smaller units such as specialized manufacturing, marketing, or accounting operations within these larger units. For purposes of this definition, all of these types of units are encompassed within the term "unit of the organization."

3. "High-level personnel of the organization" is defined in the Commentary to § 8A1.2 (Application Instructions - Organizations). With respect to a unit with 200 or more employees, "high-level personnel of a unit of the organization" means agents within the unit who set the policy for or control that unit. For example, if the managing agent of a unit with 200 employees participated in an offense, three points would be added under subsection (b)(3); if that organization had 1,000 employees and the managing agent of the unit with 200 employees were also within high-level personnel of the organization in its entirety, four points (rather than three) would be added under subsection (b)(2).

4. Pervasiveness under subsection (b) will be case specific and depend on the number, and degree of responsibility, of individuals within substantial authority personnel who participated in, condoned, or were willfully ignorant of the offense. Fewer individuals need to be involved for a finding of pervasiveness if those individuals exercised a relatively high degree of authority. Pervasiveness can occur either within an organization as a whole or within a unit of an organization. For example, if an offense were committed in an organization with 1,000 employees but the tolerance of the offense was pervasive only within a unit of the organization with 200 employees (and no high-level personnel of the organization participated in, condoned, or was willfully ignorant of the offense), three points would be added under subsection (b)(3). If, in the same organization, tolerance of the offense was pervasive throughout the organization as a whole, or an individual within high-level personnel of the organization participated in the offense, four points (rather than three) would be added under subsection (b)(2).

5. A "separately managed line of business," as used in subsections (c) and (d), is a subpart of a for-profit organization that has its own management, has a high degree of autonomy from higher managerial authority, and maintains its own separate books of account. Corporate subsidiaries and divisions frequently are separately managed lines of business. Under subsection (c), in determining the prior history of an organization with separately managed lines of business, only the prior conduct or criminal record of the separately managed line of business involved in the instant offense is to be used. Under subsection (d), in the context of an organization with separately managed lines of business, in making the determination whether a violation of a condition of probation involved engaging in similar misconduct, only the prior misconduct of the separately managed line of business involved in the instant offense is to be considered.

6. Under subsection (c), in determining the prior history of an organization or separately managed line of business, the conduct of the underlying economic entity shall be considered without regard to its legal structure or ownership. For example, if two companies merged and became separate divisions and separately managed lines of business within the merged company, each division would retain the prior history of its predecessor company. If a company reorganized and became a new legal entity, the new company would retain the prior history of the predecessor company. In contrast, if one company purchased the physical assets but not the ongoing business of another company, the prior history of the company selling the physical assets would not be transferred to the company purchasing the assets. However, if an organization is acquired by another organization in response to solicitations by appropriate federal government officials, the prior history of the acquired organization shall not be attributed to the acquiring organization.

7. Under subsections (c)(1)(B) and (c)(2)(B), the civil or administrative adjudication(s) must have occurred within the specified period (ten or five years) of the instant offense.

8. *Adjust the culpability score for the factors listed in subsection (e) whether or not the offense guideline incorporates that factor, or that factor is inherent in the offense.*

9. *Subsection (e) applies where the obstruction is committed on behalf of the organization; it does not apply where an individual or individuals have attempted to conceal their misconduct from the organization. The Commentary to § 3C1.1 (Obstructing or Impeding the Administration of Justice) provides guidance regarding the types of conduct that constitute obstruction.*

10. *Subsection (f)(2) contemplates that the organization will be allowed a reasonable period of time to conduct an internal investigation. In addition, no reporting is required by subsection (f)(2) if the organization reasonably concluded, based on the information then available, that no offense had been committed.*

11. *"Appropriate governmental authorities," as used in subsections (f) and (g)(1), means the federal or state law enforcement, regulatory, or program officials having jurisdiction over such matter. To qualify for a reduction under subsection (g)(1), the report to appropriate governmental authorities must be made under the direction of the organization.*

12. *To qualify for a reduction under subsection (g)(1) or (g)(2), cooperation must be both timely and thorough. To be timely, the cooperation must begin essentially at the same time as the organization is officially notified of a criminal investigation. To be thorough, the cooperation should include the disclosure of all pertinent information known by the organization. A prime test of whether the organization has disclosed all pertinent information is whether the information is sufficient for law enforcement personnel to identify the nature and extent of the offense and the individual(s) responsible for the criminal conduct. However, the cooperation to be measured is the cooperation of the organization itself, not the cooperation of individuals within the organization. If, because of the lack of cooperation of particular individual(s), neither the organization nor law enforcement personnel are able to identify the culpable individual(s) within the organization despite the organization's efforts to cooperate fully, the organization may still be given credit for full cooperation. Waiver of attorney-client privilege and of work product protections is not a prerequisite to a reduction in culpability score under subdivisions (1) and (2) of subsection (g) unless such waiver is necessary in order to provide timely and thorough disclosure of all pertinent information known to the organization.*

13. *Entry of a plea of guilty prior to the commencement of trial combined with truthful admission of involvement in the offense and related conduct ordinarily will constitute significant evidence of affirmative acceptance of responsibility under subsection (g), unless outweighed by conduct of the organization that is inconsistent with such acceptance of responsibility. This adjustment is not intended to apply to an organization that puts the government to its burden of proof at trial by denying the essential factual elements of guilt, is convicted, and only then admits guilt and expresses remorse. Conviction by trial, however, does not automatically preclude an organization from consideration for such a reduction. In rare situations, an organization may clearly demonstrate an acceptance of responsibility for its criminal conduct even though it exercises its constitutional right to a trial. This may occur, for example, where an organization goes to trial to assert and preserve issues that do not relate to factual guilt (e.g., to make a constitutional challenge to a statute or a challenge to the applicability of a statute to its conduct). In each such instance, however, a determination that an organization has accepted responsibility will be based primarily upon pretrial statements and conduct.*

14. *In making a determination with respect to subsection (g), the court may determine that the chief executive officer or highest ranking employee of an organization should appear at sentencing in order to signify that the organization has clearly demonstrated recognition and affirmative acceptance of*

responsibility.

Background: The increased culpability scores under subsection (b) are based on three interrelated principles. First, an organization is more culpable when individuals who manage the organization or who have substantial discretion in acting for the organization participate in, condone, or are willfully ignorant of criminal conduct. Second, as organizations become larger and their managements become more professional, participation in, condonation of, or willful ignorance of criminal conduct by such management is increasingly a breach of trust or abuse of position. Third, as organizations increase in size, the risk of criminal conduct beyond that reflected in the instant offense also increases whenever management's tolerance of that offense is pervasive. Because of the continuum of sizes of organizations and professionalization of management, subsection (b) gradually increases the culpability score based upon the size of the organization and the level and extent of the substantial authority personnel involvement.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422). Amended effective November 1, 2004 (see Appendix C, amendment 673).

§ 8C2.6. Minimum and Maximum Multipliers

Using the culpability score from § 8C2.5 (Culpability Score) and applying any applicable special instruction for fines in Chapter Two, determine the applicable minimum and maximum fine multipliers from the table below.

Culpability Score	Minimum Multiplier	Maximum Multiplier
10 or more	2.00	4.00
9	1.80	3.60
8	1.60	3.20
7	1.40	2.80
6	1.20	2.40
5	1.00	2.00
4	0.80	1.60
3	0.60	1.20
2	0.40	0.80
1	0.20	0.40
0 or less	0.05	0.20.

Commentary

Application Note:

1. A special instruction for fines in § 2R1.1 (Bid-Rigging, Price-Fixing or Market-Allocation Agreements Among Competitors) sets a floor for minimum and maximum multipliers in cases covered by that guideline.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C2.7. Guideline Fine Range - Organizations

(a) The minimum of the guideline fine range is determined by multiplying the base fine determined under § 8C2.4 (Base Fine) by the applicable minimum multiplier determined

under § 8C2.6 (Minimum and Maximum Multipliers).

(b) The maximum of the guideline fine range is determined by multiplying the base fine determined under § 8C2.4 (Base Fine) by the applicable maximum multiplier determined under § 8C2.6 (Minimum and Maximum Multipliers).

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C2.8. Determining the Fine Within the Range (Policy Statement)

(a) In determining the amount of the fine within the applicable guideline range, the court should consider:

(1) the need for the sentence to reflect the seriousness of the offense, promote respect for the law, provide just punishment, afford adequate deterrence, and protect the public from further crimes of the organization;

(2) the organization's role in the offense;

(3) any collateral consequences of conviction, including civil obligations arising from the organization's conduct;

(4) any nonpecuniary loss caused or threatened by the offense;

(5) whether the offense involved a vulnerable victim;

(6) any prior criminal record of an individual within high-level personnel of the organization or high-level personnel of a unit of the organization who participated in, condoned, or was willfully ignorant of the criminal conduct;

(7) any prior civil or criminal misconduct by the organization other than that counted under § 8C2.5(c);

(8) any culpability score under § 8C2.5 (Culpability Score) higher than 10 or lower than 0;

(9) partial but incomplete satisfaction of the conditions for one or more of the mitigating or aggravating factors set forth in § 8C2.5 (Culpability Score);

(10) any factor listed in *18 U.S.C. § 3572(a)*; and

(11) whether the organization failed to have, at the time of the instant offense, an effective compliance and ethics program within the meaning of § 8B2.1 (Effective Compliance and Ethics Program).

(b) In addition, the court may consider the relative importance of any factor used to determine the range, including the pecuniary loss caused by the offense, the pecuniary gain from the offense, any specific offense characteristic used to determine the offense level, and any aggravating or mitigating factor used to determine the culpability score.

Commentary**Application Notes:**

1. Subsection (a)(2) provides that the court, in setting the fine within the guideline fine range, should consider the organization's role in the offense. This consideration is particularly appropriate if the guideline fine range does not take the organization's role in the offense into account. For example, the guideline fine range in an antitrust case does not take into consideration whether the organization was an organizer or leader of the conspiracy. A higher fine within the guideline fine range ordinarily will be appropriate for an organization that takes a leading role in such an offense.

2. Subsection (a)(3) provides that the court, in setting the fine within the guideline fine range, should consider any collateral consequences of conviction, including civil obligations arising from the organization's conduct. As a general rule, collateral consequences that merely make victims whole provide no basis for reducing the fine within the guideline range. If criminal and civil sanctions are unlikely to make victims whole, this may provide a basis for a higher fine within the guideline fine range. If punitive collateral sanctions have been or will be imposed on the organization, this may provide a basis for a lower fine within the guideline fine range.

3. Subsection (a)(4) provides that the court, in setting the fine within the guideline fine range, should consider any nonpecuniary loss caused or threatened by the offense. To the extent that nonpecuniary loss caused or threatened (e.g., loss of or threat to human life; psychological injury; threat to national security) by the offense is not adequately considered in setting the guideline fine range, this factor provides a basis for a higher fine within the range. This factor is more likely to be applicable where the guideline fine range is determined by pecuniary loss or gain, rather than by offense level, because the Chapter Two offense levels frequently take actual or threatened nonpecuniary loss into account.

4. Subsection (a)(6) provides that the court, in setting the fine within the guideline fine range, should consider any prior criminal record of an individual within high-level personnel of the organization or within high-level personnel of a unit of the organization. Since an individual within high-level personnel either exercises substantial control over the organization or a unit of the organization or has a substantial role in the making of policy within the organization or a unit of the organization, any prior criminal misconduct of such an individual may be relevant to the determination of the appropriate fine for the organization.

5. Subsection (a)(7) provides that the court, in setting the fine within the guideline fine range, should consider any prior civil or criminal misconduct by the organization other than that counted under § 8C2.5(c). The civil and criminal misconduct counted under § 8C2.5(c) increases the guideline fine range. Civil or criminal misconduct other than that counted under § 8C2.5(c) may provide a basis for a higher fine within the range. In a case involving a pattern of illegality, an upward departure may be warranted.

6. Subsection (a)(8) provides that the court, in setting the fine within the guideline fine range, should consider any culpability score higher than ten or lower than zero. As the culpability score increases above ten, this may provide a basis for a higher fine within the range. Similarly, as the culpability score decreases below zero, this may provide a basis for a lower fine within the range.

7. Under subsection (b), the court, in determining the fine within the range, may consider any factor that it considered in determining the range. This allows for courts to differentiate between cases that have the same offense level but differ in seriousness (e.g., two fraud cases at offense level 12, one resulting in a

loss of \$21,000, the other \$40,000). Similarly, this allows for courts to differentiate between two cases that have the same aggravating factors, but in which those factors vary in their intensity (e.g., two cases with upward adjustments to the culpability score under § 8C2.5(c)(2) (prior criminal adjudications within 5 years of the commencement of the instant offense, one involving a single conviction, the other involving two or more convictions).

Background: Subsection (a) includes factors that the court is required to consider under 18 U.S.C. §§ 3553(a) and 3572(a) as well as additional factors that the Commission has determined may be relevant in a particular case. A number of factors required for consideration under 18 U.S.C. § 3572(a) (e.g., pecuniary loss, the size of the organization) are used under the fine guidelines in this subpart to determine the fine range, and therefore are not specifically set out again in subsection (a) of this guideline. In unusual cases, factors listed in this section may provide a basis for departure.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422). Amended effective November 1, 2004 (see Appendix C, amendment 673).

§ 8C2.9. Disgorgement

The court shall add to the fine determined under § 8C2.8 (Determining the Fine Within the Range) any gain to the organization from the offense that has not and will not be paid as restitution or by way of other remedial measures.

Commentary

Application Note:

1. This section is designed to ensure that the amount of any gain that has not and will not be taken from the organization for remedial purposes will be added to the fine. This section typically will apply in cases in which the organization has received gain from an offense but restitution or remedial efforts will not be required because the offense did not result in harm to identifiable victims, e.g., money laundering, obscenity, and regulatory reporting offenses. Money spent or to be spent to remedy the adverse effects of the offense, e.g., the cost to retrofit defective products, should be considered as disgorged gain. If the cost of remedial efforts made or to be made by the organization equals or exceeds the gain from the offense, this section will not apply.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C2.10. Determining the Fine for Other Counts

For any count or counts not covered under § 8C2.1 (Applicability of Fine Guidelines), the court should determine an appropriate fine by applying the provisions of 18 U.S.C. §§ 3553 and 3572. The court should determine the appropriate fine amount, if any, to be imposed in addition to any fine determined under § 8C2.8 (Determining the Fine Within the Range) and § 8C2.9 (Disgorgement).

Commentary

Background: The Commission has not promulgated guidelines governing the setting of fines for counts not covered by § 8C2.1 (Applicability of Fine Guidelines). For such counts, the court should determine the appropriate fine based on the general statutory provisions governing sentencing. In cases that have a count or counts not covered by the guidelines in addition to a count or counts covered by the guidelines, the court shall apply the fine guidelines for the count(s) covered by the guidelines, and add any additional amount to the fine, as appropriate, for the count(s) not covered by the guidelines.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

* * *

3. IMPLEMENTING THE SENTENCE OF A FINE

§ 8C3.1. Imposing a Fine

(a) Except to the extent restricted by the maximum fine authorized by statute or any minimum fine required by statute, the fine or fine range shall be that determined under § 8C1.1 (Determining the Fine - Criminal Purpose Organizations); § 8C2.7 (Guideline Fine Range - Organizations) and § 8C2.9 (Disgorgement); or § 8C2.10 (Determining the Fine for Other Counts), as appropriate.

(b) Where the minimum guideline fine is greater than the maximum fine authorized by statute, the maximum fine authorized by statute shall be the guideline fine.

(c) Where the maximum guideline fine is less than a minimum fine required by statute, the minimum fine required by statute shall be the guideline fine.

Commentary

Background: This section sets forth the interaction of the fines or fine ranges determined under this chapter with the maximum fine authorized by statute and any minimum fine required by statute for the count or counts of conviction. The general statutory provisions governing a sentence of a fine are set forth in 18 U.S.C. § 3571.

When the organization is convicted of multiple counts, the maximum fine authorized by statute may increase. For example, in the case of an organization convicted of three felony counts related to a \$200,000 fraud, the maximum fine authorized by statute will be \$500,000 on each count, for an aggregate maximum authorized fine of \$1,500,000.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C3.2. Payment of the Fine - Organizations

(a) If the defendant operated primarily for a criminal purpose or primarily by criminal means, immediate payment of the fine shall be required.

(b) In any other case, immediate payment of the fine shall be required unless the court finds that the organization is financially unable to make immediate payment or that such payment would pose an undue burden on the organization. If the court permits other than immediate payment, it shall require full payment at the earliest possible date, either by requiring payment on a date certain or by establishing an installment schedule.

Commentary

Application Note:

1. When the court permits other than immediate payment, the period provided for payment shall in no event exceed five years. 18 U.S.C. § 3572(d).

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C3.3. Reduction of Fine Based on Inability to Pay

(a) The court shall reduce the fine below that otherwise required by § 8C1.1 (Determining the Fine - Criminal Purpose Organizations), or § 8C2.7 (Guideline Fine Range - Organizations) and § 8C2.9 (Disgorgement), to the extent that imposition of such fine would impair its ability to make restitution to victims.

(b) The court may impose a fine below that otherwise required by § 8C2.7 (Guideline Fine Range - Organizations) and § 8C2.9 (Disgorgement) if the court finds that the organization is not able and, even with the use of a reasonable installment schedule, is not likely to become able to pay the minimum fine required by § 8C2.7 (Guideline Fine Range - Organizations) and § 8C2.9 (Disgorgement).

Provided, that the reduction under this subsection shall not be more than necessary to avoid substantially jeopardizing the continued viability of the organization.

Commentary

Application Note:

1. For purposes of this section, an organization is not able to pay the minimum fine if, even with an installment schedule under § 8C3.2 (Payment of the Fine - Organizations), the payment of that fine would substantially jeopardize the continued existence of the organization.

Background: Subsection (a) carries out the requirement in 18 U.S.C. § 3572(b) that the court impose a fine or other monetary penalty only to the extent that such fine or penalty will not impair the ability of the organization to make restitution for the offense; however, this section does not authorize a criminal purpose organization to remain in business in order to pay restitution.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C3.4. Fines Paid by Owners of Closely Held Organizations

The court may offset the fine imposed upon a closely held organization when one or more individuals, each of whom owns at least a 5 percent interest in the organization, has been fined in a federal criminal proceeding for the same offense conduct for which the organization is being sentenced. The amount of such offset shall not exceed the amount resulting from multiplying the total fines imposed on those individuals by those individuals' total percentage interest in the organization.

Commentary

Application Notes:

1. For purposes of this section, an organization is closely held, regardless of its size, when relatively few individuals own it. In order for an organization to be closely held, ownership and management need not completely overlap.

2. This section does not apply to a fine imposed upon an individual that arises out of offense conduct

different from that for which the organization is being sentenced.

Background: For practical purposes, most closely held organizations are the alter egos of their owner-managers. In the case of criminal conduct by a closely held corporation, the organization and the culpable individual(s) both may be convicted. As a general rule in such cases, appropriate punishment may be achieved by offsetting the fine imposed upon the organization by an amount that reflects the percentage ownership interest of the sentenced individuals and the magnitude of the fines imposed upon those individuals. For example, an organization is owned by five individuals, each of whom has a twenty percent interest; three of the individuals are convicted; and the combined fines imposed on those three equals \$100,000. In this example, the fine imposed upon the organization may be offset by up to 60 percent of their combined fine amounts, i.e., by \$60,000.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

* * *

4. DEPARTURES FROM THE GUIDELINE FINE RANGE

Introductory Commentary

The statutory provisions governing departures are set forth in 18 U.S.C. § 3553(b). Departure may be warranted if the court finds "that there exists an aggravating or mitigating circumstance of a kind, or to a degree, not adequately taken into consideration by the Sentencing Commission in formulating the guidelines that should result in a sentence different from that described." This subpart sets forth certain factors that, in connection with certain offenses, may not have been adequately taken into consideration by the guidelines. In deciding whether departure is warranted, the court should consider the extent to which that factor is adequately taken into consideration by the guidelines and the relative importance or substantiality of that factor in the particular case.

To the extent that any policy statement from Chapter Five, Part K (Departures) is relevant to the organization, a departure from the applicable guideline fine range may be warranted. Some factors listed in Chapter Five, Part K that are particularly applicable to organizations are listed in this subpart. Other factors listed in Chapter Five, Part K may be applicable in particular cases. While this subpart lists factors that the Commission believes may constitute grounds for departure, the list is not exhaustive.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C4.1. Substantial Assistance to Authorities - Organizations(Policy Statement)

(a) Upon motion of the government stating that the defendant has provided substantial assistance in the investigation or prosecution of another organization that has committed an offense, or in the investigation or prosecution of an individual not directly affiliated with the defendant who has committed an offense, the court may depart from the guidelines.

(b) The appropriate reduction shall be determined by the court for reasons stated on the record that may include, but are not limited to, consideration of the following:

(1) the court's evaluation of the significance and usefulness of the organization's assistance, taking into consideration the government's evaluation of the assistance rendered;

(2) the nature and extent of the organization's assistance; and

(3) the timeliness of the organization's assistance.

Commentary

Application Note:

1. Departure under this section is intended for cases in which substantial assistance is provided in the investigation or prosecution of crimes committed by individuals not directly affiliated with the organization or by other organizations. It is not intended for assistance in the investigation or prosecution of the agents of the organization responsible for the offense for which the organization is being sentenced.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C4.2. Risk of Death or Bodily Injury(Policy Statement)

If the offense resulted in death or bodily injury, or involved a foreseeable risk of death or bodily injury, an upward departure may be warranted. The extent of any such departure should depend, among other factors, on the nature of the harm and the extent to which the harm was intended or knowingly risked, and the extent to which such harm or risk is taken into account within the applicable guideline fine range.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C4.3. Threat to National Security (Policy Statement)

If the offense constituted a threat to national security, an upward departure may be warranted.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C4.4. Threat to the Environment (Policy Statement)

If the offense presented a threat to the environment, an upward departure may be warranted.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C4.5. Threat to a Market (Policy Statement)

If the offense presented a risk to the integrity or continued existence of a market, an upward departure may be warranted. This section is applicable to both private markets (e.g., a financial market, a commodities market, or a market for consumer goods) and public markets (e.g., government contracting).

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C4.6. Official Corruption(Policy Statement)

If the organization, in connection with the offense, bribed or unlawfully gave a gratuity to a public official, or attempted or conspired to bribe or unlawfully give a gratuity to a public official, an upward departure may be warranted.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C4.7. Public Entity (Policy Statement)

If the organization is a public entity, a downward departure may be warranted.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C4.8. Members or Beneficiaries of the Organization as Victims (Policy Statement)

If the members or beneficiaries, other than shareholders, of the organization are direct victims of the offense, a downward departure may be warranted. If the members or beneficiaries of an organization are direct victims of the offense, imposing a fine upon the organization may increase the burden upon the victims of the offense without achieving a deterrent effect. In such cases, a fine may not be appropriate. For example, departure may be appropriate if a labor union is convicted of embezzlement of pension funds.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C4.9. Remedial Costs that Greatly Exceed Gain (Policy Statement)

If the organization has paid or has agreed to pay remedial costs arising from the offense that greatly exceed the gain that the organization received from the offense, a downward departure may be warranted. In such a case, a substantial fine may not be necessary in order to achieve adequate punishment and deterrence. In deciding whether departure is appropriate, the court should consider the level and extent of substantial authority personnel involvement in the offense and the degree to which the loss exceeds the gain. If an individual within high-level personnel was involved in the offense, a departure would not be appropriate under this section. The lower the level and the more limited the extent of substantial authority personnel involvement in the offense, and the greater the degree to which remedial costs exceeded or will exceed gain, the less will be the need for a substantial fine to achieve adequate punishment and deterrence.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8C4.10. Mandatory Programs to Prevent and Detect Violations of Law (Policy Statement)

If the organization's culpability score is reduced under § 8C2.5(f) (Effective Compliance and Ethics Program) and the organization had implemented its program in response to a court order or administrative order specifically directed at the organization, an upward departure may be warranted to offset, in part or in whole, such reduction.

Similarly, if, at the time of the instant offense, the organization was required by law to have an effective compliance and ethics program, but the organization did not have such a program, an upward departure may be warranted.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422). Amended effective November 1, 2004 (see Appendix C, amendment 673).

§ 8C4.11. Exceptional Organizational Culpability (Policy Statement)

If the organization's culpability score is greater than 10, an upward departure may be appropriate.

If no individual within substantial authority personnel participated in, condoned, or was willfully ignorant of the offense; the organization at the time of the offense had an effective program to prevent and detect violations of law; and the base fine is determined under § 8C2.4(a)(1), § 8C2.4(a)(3), or a special instruction for fines in Chapter Two (Offense Conduct), a downward departure may be warranted. In a case meeting these criteria, the court may find that the organization had exceptionally low culpability and therefore a fine based on loss, offense level, or a special Chapter Two instruction results in a guideline fine range higher than necessary to achieve the purposes of sentencing. Nevertheless, such fine should not be lower than if determined under § 8C2.4(a)(2).

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

PART D - ORGANIZATIONAL PROBATION***Introductory Commentary***

Section 8D1.1 sets forth the circumstances under which a sentence to a term of probation is required. Sections 8D1.2 through 8D1.4, and 8F1.1, address the length of the probation term, conditions of probation, and violations of probation conditions.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422). Amended effective November 1, 2004 (see Appendix C, amendment 673).

§ 8D1.1. Imposition of Probation - Organizations

- (a) The court shall order a term of probation:
- (1) if such sentence is necessary to secure payment of restitution (§ 8B1.1), enforce a remedial order (§ 8B1.2), or ensure completion of community service (§ 8B1.3);
 - (2) if the organization is sentenced to pay a monetary penalty (e.g., restitution, fine, or special assessment), the penalty is not paid in full at the time of sentencing, and restrictions are necessary to safeguard the organization's ability to make payments;
 - (3) if, at the time of sentencing, (A) the organization (i) has 50 or more employees, or (ii) was otherwise required under law to have an effective compliance and ethics program; and (B) the organization does not have such a program;
 - (4) if the organization within five years prior to sentencing engaged in similar misconduct, as determined by a prior criminal adjudication, and any part of the misconduct underlying the instant offense occurred after that adjudication;
 - (5) if an individual within high-level personnel of the organization or the unit of the organization within which the instant offense was committed participated in the misconduct underlying the instant offense and that individual within five years prior to sentencing engaged in similar misconduct, as determined by a prior criminal adjudication, and any part of the misconduct underlying the instant offense occurred after that adjudication;
 - (6) if such sentence is necessary to ensure that changes are made within the organization to reduce the likelihood of future criminal conduct;
 - (7) if the sentence imposed upon the organization does not include a fine; or
 - (8) if necessary to accomplish one or more of the purposes of sentencing set forth in 18 U.S.C. § 3553(a)(2).

Commentary

Background: Under 18 U.S.C. § 3561(a), an organization may be sentenced to a term of probation. Under 18 U.S.C. § 3551(c), imposition of a term of probation is required if the sentence imposed upon the organization does not include a fine.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422). Amended effective November 1, 2004 (see Appendix C, amendment 673).

§ 8D1.2. Term of Probation - Organizations

(a) When a sentence of probation is imposed --

(1) In the case of a felony, the term of probation shall be at least one year but not more than five years.

(2) In any other case, the term of probation shall be not more than five years.

Commentary

Application Note:

1. Within the limits set by the guidelines, the term of probation should be sufficient, but not more than necessary, to accomplish the court's specific objectives in imposing the term of probation. The terms of probation set forth in this section are those provided in 18 U.S.C. § 3561(b).

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8D1.3. Conditions of Probation - Organizations

(a) Pursuant to 18 U.S.C. § 3563(a)(1), any sentence of probation shall include the condition that the organization not commit another federal, state, or local crime during the term of probation.

(b) Pursuant to 18 U.S.C. § 3563(a)(2), if a sentence of probation is imposed for a felony, the court shall impose as a condition of probation at least one of the following: (1) restitution, (2) notice to victims of the offense pursuant to 18 U.S.C. § 3555, or (3) an order requiring the organization to reside, or refrain from residing, in a specified place or area, unless the court finds on the record that extraordinary circumstances exist that would make such condition plainly unreasonable, in which event the court shall impose one or more other conditions set forth in 18 U.S.C. § 3563(b).

Note:

Section 3563(a)(2) of Title 18, United States Code, provides that, absent unusual circumstances, a defendant convicted of a felony shall abide by at least one of the conditions set forth in 18 U.S.C. § 3563(b)(2), (b)(3), and (b)(13). Before the enactment of the Antiterrorism and Effective Death Penalty Act of 1996, those conditions were a fine ((b)(2)), an order of restitution ((b)(3)), and community service ((b)(13)). Whether or not the change was intended, the Act deleted the fine condition and renumbered the restitution and community service conditions in 18 U.S.C. § 3563(b), but failed to make a corresponding change in the referenced paragraphs under 18 U.S.C. § 3563(a)(2). Accordingly, the conditions now referenced are restitution ((b)(2)), notice to victims pursuant to 18 U.S.C. § 3555 ((b)(3)), and an order that the defendant reside, or refrain from residing, in a specified place or area ((b)(13)).

(c) The court may impose other conditions that (1) are reasonably related to the nature and circumstances of the offense or the history and characteristics of the organization; and (2) involve only such deprivations of liberty or property as are necessary to effect the purposes of sentencing.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422). Amended effective November 1, 1997 (see Appendix C, amendment 569).

§ 8D1.4. Recommended Conditions of Probation - Organizations (Policy Statement)

(a) The court may order the organization, at its expense and in the format and media specified by the court, to publicize the nature of the offense committed, the fact of conviction, the nature of the punishment imposed, and the steps that will be taken to prevent the recurrence of similar offenses.

(b) If probation is imposed under § 8D1.1(a)(2), the following conditions may be appropriate to the extent they appear necessary to safeguard the organization's ability to pay any deferred portion of an order of restitution, fine, or assessment:

(1) The organization shall make periodic submissions to the court or probation officer, at intervals specified by the court, reporting on the organization's financial condition and results of business operations, and accounting for the disposition of all funds received.

(2) The organization shall submit to: (A) a reasonable number of regular or unannounced examinations of its books and records at appropriate business premises by the probation officer or experts engaged by the court; and (B) interrogation of knowledgeable individuals within the organization. Compensation to and costs of any experts engaged by the court shall be paid by the organization.

(3) The organization shall be required to notify the court or probation officer immediately upon learning of (A) any material adverse change in its business or financial condition or prospects, or (B) the commencement of any bankruptcy proceeding, major civil litigation, criminal prosecution, or administrative proceeding against the organization, or any investigation or formal inquiry by governmental authorities regarding the organization.

(4) The organization shall be required to make periodic payments, as specified by the court, in the following priority: (A) restitution; (B) fine; and (C) any other monetary sanction.

(c) If probation is ordered under § 8D1.1(a)(3), (4), (5), or (6), the following conditions may be appropriate:

(1) The organization shall develop and submit to the court an effective compliance and ethics program consistent with § 8B2.1 (Effective Compliance and Ethics Program). The organization shall include in its submission a schedule for implementation of the compliance and ethics program.

(2) Upon approval by the court of a program referred to in subdivision (1), the organization shall notify its employees and shareholders of its criminal behavior and its program referred to in subdivision (1). Such notice shall be in a form prescribed by the court.

(3) The organization shall make periodic reports to the court or probation officer, at intervals and in a form specified by the court, regarding the organization's progress in implementing the program referred to in subdivision (1). Among other things, such reports shall disclose any criminal prosecution, civil litigation, or administrative proceeding commenced against the organization, or any investigation or formal inquiry by

governmental authorities of which the organization learned since its last report.

(4) In order to monitor whether the organization is following the program referred to in subdivision (1), the organization shall submit to: (A) a reasonable number of regular or unannounced examinations of its books and records at appropriate business premises by the probation officer or experts engaged by the court; and (B) interrogation of knowledgeable individuals within the organization. Compensation to and costs of any experts engaged by the court shall be paid by the organization.

Commentary

Application Note:

1. In determining the conditions to be imposed when probation is ordered under § 8D1.1(a)(3) through (6), the court should consider the views of any governmental regulatory body that oversees conduct of the organization relating to the instant offense. To assess the efficacy of a compliance and ethics program submitted by the organization, the court may employ appropriate experts who shall be afforded access to all material possessed by the organization that is necessary for a comprehensive assessment of the proposed program. The court should approve any program that appears reasonably calculated to prevent and detect criminal conduct, as long as it is consistent with § 8B2.1 (Effective Compliance and Ethics Program), and any applicable statutory and regulatory requirements.

Periodic reports submitted in accordance with subsection (c)(3) should be provided to any governmental regulatory body that oversees conduct of the organization relating to the instant offense.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422). Amended effective November 1, 2004 (see Appendix C, amendment 673).

§ 8D1.5. [Deleted]

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422); was moved to § 8F1.1 effective November 1, 2004 (see Appendix C, amendment 673).

PART E - SPECIAL ASSESSMENTS, FORFEITURES, AND COSTS

§ 8E1.1. Special Assessments - Organizations

A special assessment must be imposed on an organization in the amount prescribed by statute.

Commentary

Application Notes:

1. This guideline applies if the defendant is an organization. It does not apply if the defendant is an individual. See § 5E1.3 for special assessments applicable to individuals.

2. The following special assessments are provided by statute (see 18 U.S.C. § 3013):

For Offenses Committed By Organizations On Or After April 24, 1996:

- (A) \$400, if convicted of a felony;
- (B) \$125, if convicted of a Class A misdemeanor;
- (C) \$50, if convicted of a Class B misdemeanor; or
- (D) \$25, if convicted of a Class C misdemeanor or an infraction.

For Offenses Committed By Organizations On Or After November 18, 1988 But Prior To April 24, 1996:

- (E) \$200, if convicted of a felony;
- (F) \$125, if convicted of a Class A misdemeanor;
- (G) \$50, if convicted of a Class B misdemeanor; or
- (H) \$25, if convicted of a Class C misdemeanor or an infraction.

For Offenses Committed By Organizations Prior To November 18, 1988:

- (I) \$200, if convicted of a felony;
- (J) \$100, if convicted of a misdemeanor.

3. A special assessment is required by statute for each count of conviction.

Background: Section 3013 of Title 18, United States Code, added by The Victims of Crimes Act of 1984, Pub. L. No. 98-473, Title II, Chap. XIV, requires courts to impose special assessments on convicted defendants for the purpose of funding the Crime Victims Fund established by the same legislation.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422); November 1, 1997 (see Appendix C, amendment 573).

§ 8E1.2. Forfeiture - Organizations

Apply § 5E1.4 (Forfeiture).

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

§ 8E1.3. Assessment of Costs - Organizations

As provided in 28 U.S.C. § 1918, the court may order the organization to pay the costs of prosecution. In addition, specific statutory provisions mandate assessment of costs.

Historical Note: Effective November 1, 1991 (see Appendix C, amendment 422).

PART F - VIOLATIONS OF PROBATION - ORGANIZATIONS

Historical Note: Effective November 1, 2004 (see Appendix C, amendment 673).

§ 8F1.1. Violations of Conditions of Probation - Organizations (Policy Statement)

Upon a finding of a violation of a condition of probation, the court may extend the term of probation, impose more restrictive conditions of probation, or revoke probation and resentence the organization.

Commentary

Application Notes:

- 1. Appointment of Master or Trustee. --In the event of repeated violations of conditions of probation, the appointment of a master or trustee may be appropriate to ensure compliance with court orders.*
- 2. Conditions of Probation.--Mandatory and recommended conditions of probation are specified in §§ 8D1.3 (Conditions of Probation - Organizations) and 8D1.4 (Recommended Conditions of Probation - Organizations).*

Historical Note: Effective November 1, 2004 (see Appendix C, amendment 673).

July 9, 2008

The Honorable Patrick J. Leahy
Chairman
Committee on the Judiciary
United States Senate
Washington, DC 20510

The Honorable Arlen Specter
Ranking Member
Committee on the Judiciary
United States Senate
Washington, DC 20510

Dear Chairman Leahy and Senator Specter:

At your request during my confirmation proceedings last year, I committed to review the Department of Justice's Principles of Federal Prosecution of Business Organizations ("Principles"), the internal policy that governs how all federal prosecutors investigate, charge, and prosecute corporate crimes. I write to update you on my review, and to provide you with a summary of certain changes to the Principles that the Department intends to make in the coming weeks to address issues you have raised and that were echoed during my review. I respectfully ask that you give us an opportunity to implement these changes and then review their operation after a reasonable amount of time before pursuing legislation in this area.

As you are aware, some have raised concerns about the effect of the Principles on the preservation of the attorney-client

privilege and work product protection. Specifically and most notably, some have argued that the Department has used the threat of criminal indictment and prosecution (or the threat of withholding cooperation credit) to coerce corporations to waive privilege or work product protection against their will and to provide information to the government that otherwise would be subject to these protections. Others have argued that the perceived widespread use of privilege waivers has inhibited candid communications between corporate employees and legal counsel whose advice has been sought. Additionally, some have expressed concern that the Principles improperly permit the government to limit or refuse cooperation credit to a corporation if the corporation has advanced attorneys' fees to its employees, failed to sanction or fire allegedly culpable employees, or entered into joint defense agreements.

In response to these and other concerns, senior attorneys in the Department and I met internally and with several organizations and former government officials who expressed an interest in this issue, including representatives of the corporate community, criminal defense attorneys, in-house counsel, and civil liberties advocates. During those meetings, we discussed the matters noted above, as well as the Department's belief that we have been judicious in our limited requests for waivers. We pointed out that in the eighteen months since the Principles were last amended, the Department has approved no requests by prosecutors to obtain from corporations core attorney-client communications or non-factual attorney work product.

Despite the obvious difference of opinion between the Department and these groups in some key areas, our meetings were extremely productive and we did find common ground, particularly in the areas of joint defense agreements, attorneys' fees, and employee sanctions. I also came away impressed by the need for the Department to address any lingering perceptions that our conduct in corporate criminal investigations is anything other than fair and respectful of the attorney-client privilege. To that end, I have carefully reviewed the Principles and expect that the Department will make the following revisions to them in the next few weeks:

- Cooperation will be measured by the extent to which a corporation discloses relevant facts and evidence, not its waiver of privileges. The government's key measure of cooperation will be the same for a corporation as for an individual: to what extent has the corporation timely disclosed the relevant facts about the misconduct? That will be the operative question--*not* whether the corporation waived attorney-client privilege or work product protection in making its disclosures.
- Federal prosecutors will not demand the disclosure of "Category II" information as a condition for cooperation credit. To be eligible for cooperation credit, a corporation need not disclose, and the government may not demand, what the McNulty Memo defines as "Category II information"--namely, non-factual attorney work product and core attorney-client privileged communications. (Of course, attorney-client communications that were made in furtherance of a crime or fraud, or that relate to an advice-of-counsel defense, are excluded from the protection of the privilege by well-settled case law and will therefore continue to fall outside these principles.)
- Federal prosecutors will not consider whether the corporation has advanced attorneys' fees to its employees in evaluating cooperation. The advancement of attorneys' fees or provision of counsel by a corporation to its employees will not be taken into account for the purpose of evaluating cooperation.
- Federal prosecutors will not consider whether the corporation has entered into a joint defense agreement in evaluating cooperation. The mere participation in a joint defense, common interest, or similar agreement by a corporation will not be taken into account for the purpose of evaluating cooperation. The government may, of course, request that a corporation refrain from disclosing to others sensitive information about the investigation that the government provides in confidence to the corporation, and may consider whether the corporation has abided by that request.
- Federal prosecutors will not consider whether the corporation has retained or sanctioned employees

in evaluating cooperation. How and whether a corporation disciplines culpable employees may bear on the quality of its remedial measures or its compliance program; it will not be taken into account for the purpose of evaluating cooperation.

During my tenure as Deputy Attorney General, I have appreciated the courtesy you have extended to me and to the Department, particularly your patience during my review of this important issue. I have come to the conclusion that the above changes to the Principles are preferable to any legislation, however well intentioned and diligently drafted, that would seek to address the same core set of issues. I think we all very much share an appreciation for the foundational role that the attorney-client privilege plays in our legal system, including our system of criminal justice. The interest that you both have shown in this matter, including your vigilance in protecting the attorney-client privilege, certainly has motivated the Department to pursue the changes I have outlined above.

I remain available to discuss this matter with you further at your convenience. Thank you again for considering our views.

Sincerely,
 Mark Filip
 Deputy Attorney General

9-28.000 Principles of Federal Prosecution of Business Organizations 1

9-28.100 Duties of Federal Prosecutors and Duties of Corporate Leaders

The prosecution of corporate crime is a high priority for the Department of Justice. By investigating allegations of wrongdoing and by bringing charges where appropriate for criminal misconduct, the Department promotes critical public interests. These interests include, to take just a few examples: (1) protecting the integrity of our free economic and capital markets; (2) protecting consumers, investors, and business entities that compete only through lawful means; and (3) protecting the American people from misconduct that would violate criminal laws safeguarding the environment.

In this regard, federal prosecutors and corporate leaders typically share common goals. For example, directors and officers owe a fiduciary duty to a corporation's shareholders, the corporation's true owners, and they owe duties of honest dealing to the investing public in connection with the corporation's regulatory filings and public statements. The faithful execution of these duties by corporate leadership serves the same values in promoting public trust and confidence that our criminal cases are designed to serve.

A prosecutor's duty to enforce the law requires the investigation and prosecution of criminal wrongdoing if it is discovered. In carrying out this mission with the diligence and resolve necessary to vindicate the important public interests discussed above, prosecutors should be mindful of the common cause we share with responsible corporate leaders. Prosecutors should also be mindful that confidence in the Department is affected both by the results we achieve and by the real and perceived ways in which we achieve them. Thus, the manner in which we do our job as prosecutors--including the professionalism we demonstrate, our willingness to secure the facts in a manner that encourages corporate compliance and self-regulation, and also our appreciation that corporate prosecutions can potentially harm blameless investors, employees, and others--affects public perception of our mission. Federal prosecutors recognize that they must maintain public confidence in the way in which they exercise their charging discretion. This endeavor requires the thoughtful analysis of all facts and circumstances presented in a given case. As always, professionalism and civility play an important part in the Department's discharge of its responsibilities in all areas, including the area of corporate investigations and prosecutions.

A. General Principle: Corporations should not be treated leniently because of their artificial nature nor should they be subject to harsher treatment. Vigorous enforcement of the criminal laws against corporate wrongdoers, where appropriate, results in great benefits for law enforcement and the public, particularly in the area of white collar crime. Indicting corporations for wrongdoing enables the government

to be a force for positive change of corporate culture, and a force to prevent, discover, and punish serious crimes.^B
 Comment: In all cases involving corporate wrongdoing, prosecutors should consider the factors discussed further below. In doing so, prosecutors should be aware of the public benefits that can flow from indicting a corporation in appropriate cases. For instance, corporations are likely to take immediate remedial steps when one is indicted for criminal misconduct that is pervasive throughout a particular industry, and thus an indictment can provide a unique opportunity for deterrence on a broad scale. In addition, a corporate indictment may result in specific deterrence by changing the culture of the indicted corporation and the behavior of its employees. Finally, certain crimes that carry with them a substantial risk of great public harm--e.g., environmental crimes or sweeping financial frauds--may be committed by a business entity, and there may therefore be a substantial federal interest in indicting a corporation under such circumstances.

In certain instances, it may be appropriate, upon consideration of the factors set forth herein, to resolve a corporate criminal case by means other than indictment. Non-prosecution and deferred prosecution agreements, for example, occupy an important middle ground between declining prosecution and obtaining the conviction of a corporation. These agreements are discussed further in Section X, *infra*. Likewise, civil and regulatory alternatives may be appropriate in certain cases, as discussed in Section XI, *infra*.

Where a decision is made to charge a corporation, it does not necessarily follow that individual directors, officers, employees, or shareholders should not also be charged. Prosecution of a corporation is not a substitute for the prosecution of criminally culpable individuals within or without the corporation. Because a corporation can act only through individuals, imposition of individual criminal liability may provide the strongest deterrent against future corporate wrongdoing. Only rarely should provable individual culpability not be pursued, particularly if it relates to high-level corporate officers, even in the face of an offer of a corporate guilty plea or some other disposition of the charges against the corporation.

Corporations are "legal persons," capable of suing and being sued, and capable of committing crimes. Under the doctrine of *respondeat superior*, a corporation may be held criminally liable for the illegal acts of its directors, officers, employees, and agents. To hold a corporation liable for these actions, the government must establish that the corporate agent's actions (i) were within the scope of his duties and (ii) were intended, at least in part, to benefit the corporation. In all cases involving wrongdoing by corporate agents, prosecutors should not limit their focus solely to individuals or the corporation, but should consider both as potential targets.

Agents may act for mixed reasons--both for self-aggrandizement (both direct and indirect) and for the benefit of the corporation, and a corporation may be held liable as long as one motivation of its agent is to benefit the corporation. *See United States v. Potter*, 463 F.3d 9, 25 (1st Cir. 2006) (stating that the test to determine whether an agent is acting within the scope of employment is "whether the agent is performing acts of the kind which he is authorized to perform, and those acts are motivated, at least in part, by an intent to benefit the corporation."). In *United States v. Automated Medical Laboratories, Inc.*, 770 F.2d 399 (4th Cir. 1985), for example, the Fourth Circuit affirmed a corporation's conviction for the actions of a subsidiary's employee despite the corporation's claim that the employee was acting for his own benefit, namely his "ambitious nature and his desire to ascend the corporate ladder." *Id.* at 407. The court stated, "Partucci was clearly acting in part to benefit AML since his advancement within the corporation depended on AML's well-being and its lack of difficulties with the FDA." *Id.*; *see also United States v. Cincotta*, 689 F.2d 238, 241-42 (1st Cir. 1982) (upholding a corporation's conviction, notwithstanding the substantial personal benefit reaped by its miscreant agents, because the fraudulent scheme required money to pass through the corporation's treasury and the fraudulently obtained goods were resold to the corporation's customers in the corporation's name).

Moreover, the corporation need not even necessarily profit from its agent's actions for it to be held liable. In *Automated Medical Laboratories*, the Fourth Circuit stated:

[B]enefit is not a "touchstone of criminal corporate liability; benefit at best is an evidential, not an

operative, fact." Thus, whether the agent's actions ultimately redounded to the benefit of the corporation is less significant than whether the agent acted with the intent to benefit the corporation. The basic purpose of requiring that an agent have acted with the intent to benefit the corporation, however, is to insulate the corporation from criminal liability for actions of its agents which may be *inimical* to the interests of the corporation or which may have been undertaken solely to advance the interests of that agent or of a party other than the corporation.

770 F.2d at 407 (internal citation omitted) (quoting *Old Monastery Co. v. United States*, 147 F.2d 905, 908 (4th Cir. 1945)). A. General Principle: Generally, prosecutors apply the same factors in determining whether to charge a corporation as they do with respect to individuals. See US AM § 9-27.220, *et seq.* Thus, the prosecutor must weigh all of the factors normally considered in the sound exercise of prosecutorial judgment: the sufficiency of the evidence; the likelihood of success at trial; the probable deterrent, rehabilitative, and other consequences of conviction; and the adequacy of noncriminal approaches. See *id.* However, due to the nature of the corporate "person," some additional factors are present. In conducting an investigation, determining whether to bring charges, and negotiating plea or other agreements, prosecutors should consider the following factors in reaching a decision as to the proper treatment of a corporate target:

1. the nature and seriousness of the offense, including the risk of harm to the public, and applicable policies and priorities, if any, governing the prosecution of corporations for particular categories of crime (*see infra* section IV);
2. the pervasiveness of wrongdoing within the corporation, including the complicity in, or the condoning of, the wrongdoing by corporate management (*see infra* section V);
3. the corporation's history of similar misconduct, including prior criminal, civil, and regulatory enforcement actions against it (*see infra* section VI);
4. the corporation's timely and voluntary disclosure of wrongdoing and its willingness to cooperate in the investigation of its agents (*see infra* section VII);
5. the existence and effectiveness of the corporation's pre-existing compliance program (*see infra* section VIII);
6. the corporation's remedial actions, including any efforts to implement an effective corporate compliance program or to improve an existing one, to replace responsible management, to discipline or terminate wrongdoers, to pay restitution, and to cooperate with the relevant government agencies (*see infra* section IX);
7. collateral consequences, including whether there is disproportionate harm to shareholders, pension holders, employees, and others not proven personally culpable, as well as impact on the public arising from the prosecution (*see infra* section X);
8. the adequacy of the prosecution of individuals responsible for the corporation's malfeasance; and
9. the adequacy of remedies such as civil or regulatory enforcement actions (*see infra* section XI).

B. Comment: The factors listed in this section are intended to be illustrative of those that should be evaluated and are not an exhaustive list of potentially relevant considerations. Some of these factors may not apply to specific cases, and in some cases one factor may override all others. For example, the nature and seriousness of the offense may be such as to warrant prosecution regardless of the other factors. In most cases, however, no single factor will be dispositive. In addition, national law enforcement policies in various enforcement areas may require that more or less weight be given

to certain of these factors than to others. Of course, prosecutors must exercise their thoughtful and pragmatic judgment in applying and balancing these factors, so as to achieve a fair and just outcome and promote respect for the law.

In making a decision to charge a corporation, the prosecutor generally has substantial latitude in determining when, whom, how, and even whether to prosecute for violations of federal criminal law. In exercising that discretion, prosecutors should consider the following statements of principles that summarize the considerations they should weigh and the practices they should follow in discharging their prosecutorial responsibilities. In doing so, prosecutors should ensure that the general purposes of the criminal law--assurance of warranted punishment, deterrence of further criminal conduct, protection of the public from dangerous and fraudulent conduct, rehabilitation of offenders, and restitution for victims and affected communities--are adequately met, taking into account the special nature of the corporate "person."

A. General Principle: The nature and seriousness of the crime, including the risk of harm to the public from the criminal misconduct, are obviously primary factors in determining whether to charge a corporation. In addition, corporate conduct, particularly that of national and multi-national corporations, necessarily intersects with federal economic, tax, and criminal law enforcement policies. In applying these Principles, prosecutors must consider the practices and policies of the appropriate Division of the Department, and must comply with those policies to the extent required by the facts presented.

B. Comment: In determining whether to charge a corporation, prosecutors should take into account federal law enforcement priorities as discussed above. *See* USAM § 9-27-230. In addition, however, prosecutors must be aware of the specific policy goals and incentive programs established by the respective Divisions and regulatory agencies. Thus, whereas natural persons may be given incremental degrees of credit (ranging from immunity to lesser charges to sentencing considerations) for turning themselves in, making statements against their penal interest, and cooperating in the government's investigation of their own and others' wrongdoing, the same approach may not be appropriate in all circumstances with respect to corporations. As an example, it is entirely proper in many investigations for a prosecutor to consider the corporation's pre-indictment conduct, *e.g.*, voluntary disclosure, cooperation, remediation or restitution, in determining whether to seek an indictment. However, this would not necessarily be appropriate in an antitrust investigation, in which antitrust violations, by definition, go to the heart of the corporation's business. With this in mind, the Antitrust Division has established a firm policy, understood in the business community, that credit should not be given at the charging stage for a compliance program and that amnesty is available only to the first corporation to make full disclosure to the government. As another example, the Tax Division has a strong preference for prosecuting responsible individuals, rather than entities, for corporate tax offenses. Thus, in determining whether or not to charge a corporation, prosecutors must consult with the Criminal, Antitrust, Tax, Environmental and Natural Resources, and National Security Divisions, as appropriate.

A. General Principle: A corporation can only act through natural persons, and it is therefore held responsible for the acts of such persons fairly attributable to it. Charging a corporation for even minor misconduct may be appropriate where the wrongdoing was pervasive and was undertaken by a large number of employees, or by all the employees in a particular role within the corporation, or was condoned by upper management. On the other hand, it may not be appropriate to impose liability upon a corporation, particularly one with a robust compliance program in place, under a strict *respondeat superior* theory for the single isolated act of a rogue employee. There is, of course, a wide spectrum between these two extremes, and a prosecutor should exercise sound discretion in evaluating the pervasiveness of wrongdoing within a corporation.

B. Comment: Of these factors, the most important is the role and conduct of management. Although acts of even low-level employees may result in criminal liability, a corporation is directed by its management and management is responsible for a corporate culture in which criminal conduct is either discouraged or tacitly encouraged. As stated in commentary to the Sentencing Guidelines:

Pervasiveness [is] case specific and [will] depend on the number, and degree of responsibility, of individuals [with] substantial authority ... who participated in, condoned, or were willfully ignorant of the offense. Fewer individuals need to be involved for a finding of pervasiveness if those individuals exercised a relatively high degree of authority. Pervasiveness can occur either within an organization as a whole or within a unit of an organization.

USSG § 8C2.5, cmt. (n. 4). **A. General Principle:** Prosecutors may consider a corporation's history of similar conduct,

including prior criminal, civil, and regulatory enforcement actions against it, in determining whether to bring criminal charges and how best to resolve cases. B. Comment: A corporation, like a natural person, is expected to learn from its mistakes. A history of similar misconduct may be probative of a corporate culture that encouraged, or at least condoned, such misdeeds, regardless of any compliance programs. Criminal prosecution of a corporation may be particularly appropriate where the corporation previously had been subject to non-criminal guidance, warnings, or sanctions, or previous criminal charges, and it either had not taken adequate action to prevent future unlawful conduct or had continued to engage in the misconduct in spite of the warnings or enforcement actions taken against it. The corporate structure itself (*e.g.*, the creation or existence of subsidiaries or operating divisions) is not dispositive in this analysis, and enforcement actions taken against the corporation or any of its divisions, subsidiaries, and affiliates may be considered, if germane. *See* USSG § 8C2.5(c), cmt. (n. 6). A. General Principle: In determining whether to charge a corporation and how to resolve corporate criminal cases, the corporation's timely and voluntary disclosure of wrongdoing and its cooperation with the government's investigation may be relevant factors. In gauging the extent of the corporation's cooperation, the prosecutor may consider, among other things, whether the corporation made a voluntary and timely disclosure, and the corporation's willingness to provide relevant information and evidence and identify relevant actors within and outside the corporation, including senior executives.

Cooperation is a potential mitigating factor, by which a corporation--just like any other subject of a criminal investigation--can gain credit in a case that otherwise is appropriate for indictment and prosecution. Of course, the decision not to cooperate by a corporation (or individual) is not itself evidence of misconduct, at least where the lack of cooperation does not involve criminal misconduct or demonstrate consciousness of guilt (*e.g.*, suborning perjury or false statements, or refusing to comply with lawful discovery requests). Thus, failure to cooperate, in and of itself, does not support or require the filing of charges with respect to a corporation any more than with respect to an individual. B. Comment: In investigating wrongdoing by or within a corporation, a prosecutor is likely to encounter several obstacles resulting from the nature of the corporation itself. It will often be difficult to determine which individual took which action on behalf of the corporation. Lines of authority and responsibility may be shared among operating divisions or departments, and records and personnel may be spread throughout the United States or even among several countries. Where the criminal conduct continued over an extended period of time, the culpable or knowledgeable personnel may have been promoted, transferred, or fired, or they may have quit or retired. Accordingly, a corporation's cooperation may be critical in identifying potentially relevant actors and locating relevant evidence, among other things, and in doing so expeditiously.

This dynamic--*i.e.*, the difficulty of determining what happened, where the evidence is, and which individuals took or promoted putatively illegal corporate actions--can have negative consequences for both the government and the corporation that is the subject or target of a government investigation. More specifically, because of corporate attribution principles concerning actions of corporate officers and employees (*see, e.g., supra* section II), uncertainty about exactly who authorized or directed apparent corporate misconduct can inure to the detriment of a corporation. For example, it may not matter under the law which of several possible executives or leaders in a chain of command approved of or authorized criminal conduct; however, that information if known might bear on the propriety of a particular disposition short of indictment of the corporation. It may not be in the interest of a corporation or the government for a charging decision to be made in the absence of such information, which might occur if, for example, a statute of limitations were relevant and authorization by any one of the officials were enough to justify a charge under the law. Moreover, and at a minimum, a protracted government investigation of such an issue could, as a collateral consequence, disrupt the corporation's business operations or even depress its stock price.

For these reasons and more, cooperation can be a favorable course for both the government and the corporation. Cooperation benefits the government--and ultimately shareholders, employees, and other often blameless victims--by allowing prosecutors and federal agents, for example, to avoid protracted delays, which compromise their ability to quickly uncover and address the full extent of widespread corporate crimes. With cooperation by the corporation, the government may be able to reduce tangible losses, limit damage to reputation, and preserve assets for restitution. At the same time, cooperation may benefit the corporation by enabling the government to focus its investigative resources in a

manner that will not unduly disrupt the corporation's legitimate business operations. In addition, and critically, cooperation may benefit the corporation by presenting it with the opportunity to earn credit for its efforts.^{9-28.710}Attorney-Client and Work Product Protections

The attorney-client privilege and the attorney work product protection serve an extremely important function in the American legal system. The attorney-client privilege is one of the oldest and most sacrosanct privileges under the law. *See Upjohn v. United States*, 449 U.S. 383, 389 (1981). As the Supreme Court has stated, "[i]ts purpose is to encourage full and frank communication between attorneys and their clients and thereby promote broader public interests in the observance of law and administration of justice." *Id.* The value of promoting a corporation's ability to seek frank and comprehensive legal advice is particularly important in the contemporary global business environment, where corporations often face complex and dynamic legal and regulatory obligations imposed by the federal government and also by states and foreign governments. The work product doctrine serves similarly important goals.

For these reasons, waiving the attorney-client and work product protections has never been a prerequisite under the Department's prosecution guidelines for a corporation to be viewed as cooperative. Nonetheless, a wide range of commentators and members of the American legal community and criminal justice system have asserted that the Department's policies have been used, either wittingly or unwittingly, to coerce business entities into waiving attorney-client privilege and work-product protection. Everyone agrees that a corporation may freely waive its own privileges if it chooses to do so; indeed, such waivers occur routinely when corporations are victimized by their employees or others, conduct an internal investigation, and then disclose the details of the investigation to law enforcement officials in an effort to seek prosecution of the offenders. However, the contention, from a broad array of voices, is that the Department's position on attorney-client privilege and work product protection waivers has promoted an environment in which those protections are being unfairly eroded to the detriment of all.

The Department understands that the attorney-client privilege and attorney work product protection are essential and long-recognized components of the American legal system. What the government seeks and needs to advance its legitimate (indeed, essential) law enforcement mission is not waiver of those protections, but rather the facts known to the corporation about the putative criminal misconduct under review. In addition, while a corporation remains free to convey non-factual or "core" attorney-client communications or work product--if and only if the corporation voluntarily chooses to do so--prosecutors should not ask for such waivers and are directed not to do so. The critical factor is whether the corporation has provided the facts about the events, as explained further herein.

Eligibility for cooperation credit is not predicated upon the waiver of attorney-client privilege or work product protection. Instead, the sort of cooperation that is most valuable to resolving allegations of misconduct by a corporation and its officers, directors, employees, or agents is disclosure of the relevant *facts* concerning such misconduct. In this regard, the analysis parallels that for a non-corporate defendant, where cooperation typically requires disclosure of relevant factual knowledge and not of discussions between an individual and his attorneys.

Thus, when the government investigates potential corporate wrongdoing, it seeks the relevant facts. For example, how and when did the alleged misconduct occur? Who promoted or approved it? Who was responsible for committing it? In this respect, the investigation of a corporation differs little from the investigation of an individual. In both cases, the government needs to know the facts to achieve a just and fair outcome. The party under investigation may choose to cooperate by disclosing the facts, and the government may give credit for the party's disclosures. If a corporation wishes to receive credit for such cooperation, which then can be considered with all other cooperative efforts and circumstances in evaluating how fairly to proceed, then the corporation, like any person, must disclose the relevant facts of which it has knowledge.ⁿ² (a)Disclosing the Relevant Facts--Facts Gathered Through Internal Investigation

Individuals and corporations often obtain knowledge of facts in different ways. An individual knows the facts of his or others' misconduct through his own experience and perceptions. A corporation is an artificial construct that cannot, by definition, have personal knowledge of the facts. Some of those facts may be reflected in documentary or electronic

media like emails, transaction or accounting documents, and other records. Often, the corporation gathers facts through an internal investigation. Exactly how and by whom the facts are gathered is for the corporation to decide. Many corporations choose to collect information about potential misconduct through lawyers, a process that may confer attorney-client privilege or attorney work product protection on at least some of the information collected. Other corporations may choose a method of fact-gathering that does not have that effect--for example, having employee or other witness statements collected after interviews by non-attorney personnel.

Whichever process the corporation selects, the government's key measure of cooperation must remain the same as it does for an individual: has the party timely disclosed the relevant facts about the putative misconduct? That is the operative question in assigning cooperation credit for the disclosure of information--*not* whether the corporation discloses attorney-client or work product materials. Accordingly, a corporation should receive the same credit for disclosing facts contained in materials that are not protected by the attorney-client privilege or attorney work product as it would for disclosing identical facts contained in materials that are so protected.³ On this point the Report of the House Judiciary Committee, submitted in connection with the attorney-client privilege bill passed by the House of Representatives (H.R. 3013), comports with the approach required here:

[A]n ... attorney of the United States may base cooperation credit on the facts that are disclosed, but is prohibited from basing cooperation credit upon whether or not the materials are protected by attorney-client privilege or attorney work product. As a result, an entity that voluntarily discloses should receive the same amount of cooperation credit for disclosing facts that happen to be contained in materials not protected by attorney-client privilege or attorney work product as it would receive for disclosing identical facts that are contained in materials protected by attorney-client privilege or attorney work product. There should be no differentials in an assessment of cooperation (*i.e.*, neither a credit nor a penalty) based upon whether or not the materials disclosed are protected by attorney-client privilege or attorney work product.

H.R. Rep. No. 110-445 at 4 (2007).

In short, so long as the corporation timely discloses relevant facts about the putative misconduct, the corporation may receive due credit for such cooperation, regardless of whether it chooses to waive privilege or work product protection in the process.⁴ Likewise, a corporation that does not disclose the relevant facts about the alleged misconduct--for whatever reason--typically should not be entitled to receive credit for cooperation.

Two final and related points bear noting about the disclosure of facts, although they should be obvious. First, the government cannot compel, and the corporation has no obligation to make, such disclosures (although the government can obviously compel the disclosure of certain records and witness testimony through subpoenas). Second, a corporation's failure to provide relevant information does not mean the corporation will be indicted. It simply means that the corporation will not be entitled to mitigating credit for that cooperation. Whether the corporation faces charges will turn, as it does in any case, on the sufficiency of the evidence, the likelihood of success at trial, and all of the other factors identified in Section III above. If there is insufficient evidence to warrant indictment, after appropriate investigation has been completed, or if the other factors weigh against indictment, then the corporation should not be indicted, irrespective of whether it has earned cooperation credit. The converse is also true: The government may charge even the most cooperative corporation pursuant to these Principles if, in weighing and balancing the factors described herein, the prosecutor determines that a charge is required in the interests of justice. Put differently, even the most sincere and thorough effort to cooperate cannot necessarily absolve a corporation that has, for example, engaged in an egregious, orchestrated, and widespread fraud. Cooperation is a relevant potential mitigating factor, but it alone is not dispositive.

Separate from (and usually preceding) the fact-gathering process in an internal investigation, a corporation, through its officers, employees, directors, or others, may have consulted with corporate counsel regarding or in a manner that

concerns the legal implications of the putative misconduct at issue. Communications of this sort, which are both independent of the fact-gathering component of an internal investigation and made for the purpose of seeking or dispensing legal advice, lie at the core of the attorney-client privilege. Such communications can naturally have a salutary effect on corporate behavior--facilitating, for example, a corporation's effort to comply with complex and evolving legal and regulatory regimes.⁵ Except as noted in subparagraphs (b)(i) and (b)(ii) below, a corporation need not disclose and prosecutors may not request the disclosure of such communications as a condition for the corporation's eligibility to receive cooperation credit.

Likewise, non-factual or core attorney work product--for example, an attorney's mental impressions or legal theories--lies at the core of the attorney work product doctrine. A corporation need not disclose, and prosecutors may not request, the disclosure of such attorney work product as a condition for the corporation's eligibility to receive cooperation credit.⁽ⁱ⁾Advice of Counsel Defense in the Instant Context

Occasionally a corporation or one of its employees may assert an advice-of-counsel defense, based upon communications with in-house or outside counsel that took place prior to or contemporaneously with the underlying conduct at issue. In such situations, the defendant must tender a legitimate factual basis to support the assertion of the advice-of-counsel defense. *See, e.g., Pitt v. Dist. of Columbia*, 491 F.3d 494, 504-05 (D.C. Cir. 2007) ; *United States v. Wenger*, 427 F.3d 840, 853-54 (10th Cir. 2005); *United States v. Cheek*, 3 F.3d 1057, 1061-62 (7th Cir. 1993) . The Department cannot fairly be asked to discharge its responsibility to the public to investigate alleged corporate crime, or to temper what would otherwise be the appropriate course of prosecutive action, by simply accepting on faith an otherwise unproven assertion that an attorney--perhaps even an unnamed attorney--approved potentially unlawful practices. Accordingly, where an advice-of-counsel defense has been asserted, prosecutors may ask for the disclosure of the communications allegedly supporting it.⁽ⁱⁱ⁾Communications in Furtherance of a Crime or Fraud

Communications between a corporation (through its officers, employees, directors, or agents) and corporate counsel that are made in furtherance of a crime or fraud are, under settled precedent, outside the scope and protection of the attorney-client privilege. *See United States v. Zolin*, 491 U.S. 554, 563 (1989) ; *United States v. BDO Seidman, LLP*, 492 F.3d 806, 818 (7th Cir. 2007) . As a result, the Department may properly request such communications if they in fact exist.^{9-28.730}Obstructing the Investigation

Another factor to be weighed by the prosecutor is whether the corporation has engaged in conduct intended to impede the investigation. Examples of such conduct could include: inappropriate directions to employees or their counsel, such as directions not to be truthful or to conceal relevant facts; making representations or submissions that contain misleading assertions or material omissions; and incomplete or delayed production of records.

In evaluating cooperation, however, prosecutors should not take into account whether a corporation is advancing or reimbursing attorneys' fees or providing counsel to employees, officers, or directors under investigation or indictment. Likewise, prosecutors may not request that a corporation refrain from taking such action. This prohibition is not meant to prevent a prosecutor from asking questions about an attorney's representation of a corporation or its employees, officers, or directors, where otherwise appropriate under the law.⁶ Neither is it intended to limit the otherwise applicable reach of criminal obstruction of justice statutes such as *18 U.S.C. § 1503*. If the payment of attorney fees were used in a manner that would otherwise constitute criminal obstruction of justice--for example, if fees were advanced on the condition that an employee adhere to a version of the facts that the corporation and the employee knew to be false--these Principles would not (and could not) render inapplicable such criminal prohibitions.

Similarly, the mere participation by a corporation in a joint defense agreement does not render the corporation ineligible to receive cooperation credit, and prosecutors may not request that a corporation refrain from entering into such agreements. Of course, the corporation may wish to avoid putting itself in the position of being disabled, by virtue of a particular joint defense or similar agreement, from providing some relevant facts to the government and thereby limiting its ability to seek such cooperation credit. Such might be the case if the corporation gathers facts from employees who

have entered into a joint defense agreement with the corporation, and who may later seek to prevent the corporation from disclosing the facts it has acquired. Corporations may wish to address this situation by crafting or participating in joint defense agreements, to the extent they choose to enter them, that provide such flexibility as they deem appropriate.

Finally, it may on occasion be appropriate for the government to consider whether the corporation has shared with others sensitive information about the investigation that the government provided to the corporation. In appropriate situations, as it does with individuals, the government may properly request that, if a corporation wishes to receive credit for cooperation, the information provided by the government to the corporation not be transmitted to others—for example, where the disclosure of such information could lead to flight by individual subjects, destruction of evidence, or dissipation or concealment of assets.^{9-28.740}Offering Cooperation: No Entitlement to Immunity

A corporation's offer of cooperation or cooperation itself does not automatically entitle it to immunity from prosecution or a favorable resolution of its case. A corporation should not be able to escape liability merely by offering up its directors, officers, employees, or agents. Thus, a corporation's willingness to cooperate is not determinative; that factor, while relevant, needs to be considered in conjunction with all other factors.^{9-28.750}Qualifying for Immunity, Amnesty, or Reduced Sanctions Through Voluntary Disclosures

In conjunction with regulatory agencies and other executive branch departments, the Department encourages corporations, as part of their compliance programs, to conduct internal investigations and to disclose the relevant facts to the appropriate authorities. Some agencies, such as the Securities and Exchange Commission and the Environmental Protection Agency, as well as the Department's Environmental and Natural Resources Division, have formal voluntary disclosure programs in which self-reporting, coupled with remediation and additional criteria, may qualify the corporation for amnesty or reduced sanctions. Even in the absence of a formal program, prosecutors may consider a corporation's timely and voluntary disclosure in evaluating the adequacy of the corporation's compliance program and its management's commitment to the compliance program. However, prosecution and economic policies specific to the industry or statute may require prosecution notwithstanding a corporation's willingness to cooperate. For example, the Antitrust Division has a policy of offering amnesty only to the first corporation to agree to cooperate. Moreover, amnesty, immunity, or reduced sanctions may not be appropriate where the corporation's business is permeated with fraud or other crimes.^{9-28.760}Oversight Concerning Demands for Waivers of Attorney-Client Privilege or Work Product Protection By Corporations Contrary to This Policy

The Department underscores its commitment to attorney practices that are consistent with Department policies like those set forth herein concerning cooperation credit and due respect for the attorney-client privilege and work product protection. Counsel for corporations who believe that prosecutors are violating such guidance are encouraged to raise their concerns with supervisors, including the appropriate United States Attorney or Assistant Attorney General. Like any other allegation of attorney misconduct, such allegations are subject to potential investigation through established mechanisms.

A. General Principle: Compliance programs are established by corporate management to prevent and detect misconduct and to ensure that corporate activities are conducted in accordance with applicable criminal and civil laws, regulations, and rules. The Department encourages such corporate self-policing, including voluntary disclosures to the government of any problems that a corporation discovers on its own. However, the existence of a compliance program is not sufficient, in and of itself, to justify not charging a corporation for criminal misconduct undertaken by its officers, directors, employees, or agents. In addition, the nature of some crimes, *e.g.*, antitrust violations, may be such that national law enforcement policies mandate prosecutions of corporations notwithstanding the existence of a compliance program.

B. Comment: The existence of a corporate compliance program, even one that specifically prohibited the very conduct in question, does not absolve the corporation from criminal liability under the doctrine of *respondeat superior*. See *United States v. Basic Constr. Co.*, 711 F.2d 570, 573 (4th Cir. 1983) ("[A] corporation may be held criminally responsible for antitrust violations committed by its employees if they were acting within the scope of their authority, or apparent authority, and for the benefit of the corporation, even if... such acts were against corporate policy or express instructions."). As explained in *United States v. Potter*, 463 F.3d 9 (1st Cir. 2006), a corporation cannot "avoid liability by adopting abstract rules" that forbid its agents from engaging in illegal acts, because "[e]ven a specific directive to an

agent or employee or honest efforts to police such rules do not automatically free the company for the wrongful acts of agents." *Id.* at 25-26. See also *United States v. Hilton Hotels Corp.*, 467 F.2d 1000, 1007 (9th Cir. 1972) (noting that a corporation "could not gain exculpation by issuing general instructions without undertaking to enforce those instructions by means commensurate with the obvious risks"); *United States v. Beusch*, 596 F.2d 871, 878 (9th Cir. 1979) ("[A] corporation may be liable for acts of its employees done contrary to express instructions and policies, but ... the existence of such instructions and policies may be considered in determining whether the employee in fact acted to benefit the corporation.").

While the Department recognizes that no compliance program can ever prevent all criminal activity by a corporation's employees, the critical factors in evaluating any program are whether the program is adequately designed for maximum effectiveness in preventing and detecting wrongdoing by employees and whether corporate management is enforcing the program or is tacitly encouraging or pressuring employees to engage in misconduct to achieve business objectives. The Department has no formulaic requirements regarding corporate compliance programs. The fundamental questions any prosecutor should ask are: Is the corporation's compliance program well designed? Is the program being applied earnestly and in good faith? Does the corporation's compliance program work? In answering these questions, the prosecutor should consider the comprehensiveness of the compliance program; the extent and pervasiveness of the criminal misconduct; the number and level of the corporate employees involved; the seriousness, duration, and frequency of the misconduct; and any remedial actions taken by the corporation, including, for example, disciplinary action against past violators uncovered by the prior compliance program, and revisions to corporate compliance programs in light of lessons learned.⁷ Prosecutors should also consider the promptness of any disclosure of wrongdoing to the government. In evaluating compliance programs, prosecutors may consider whether the corporation has established corporate governance mechanisms that can effectively detect and prevent misconduct. For example, do the corporation's directors exercise independent review over proposed corporate actions rather than unquestioningly ratifying officers' recommendations; are internal audit functions conducted at a level sufficient to ensure their independence and accuracy; and have the directors established an information and reporting system in the organization reasonably designed to provide management and directors with timely and accurate information sufficient to allow them to reach an informed decision regarding the organization's compliance with the law. See, e.g., *In re Caremark Int'l Inc. Derivative Litig.*, 698 A.2d 959, 968-70 (Del. Ch. 1996).

Prosecutors should therefore attempt to determine whether a corporation's compliance program is merely a "paper program" or whether it was designed, implemented, reviewed, and revised, as appropriate, in an effective manner. In addition, prosecutors should determine whether the corporation has provided for a staff sufficient to audit, document, analyze, and utilize the results of the corporation's compliance efforts. Prosecutors also should determine whether the corporation's employees are adequately informed about the compliance program and are convinced of the corporation's commitment to it. This will enable the prosecutor to make an informed decision as to whether the corporation has adopted and implemented a truly effective compliance program that, when consistent with other federal law enforcement policies, may result in a decision to charge only the corporation's employees and agents or to mitigate charges or sanctions against the corporation.

Compliance programs should be designed to detect the particular types of misconduct most likely to occur in a particular corporation's line of business. Many corporations operate in complex regulatory environments outside the normal experience of criminal prosecutors. Accordingly, prosecutors should consult with relevant federal and state agencies with the expertise to evaluate the adequacy of a program's design and implementation. For instance, state and federal banking, insurance, and medical boards, the Department of Defense, the Department of Health and Human Services, the Environmental Protection Agency, and the Securities and Exchange Commission have considerable experience with compliance programs and can be helpful to a prosecutor in evaluating such programs. In addition, the Fraud Section of the Criminal Division, the Commercial Litigation Branch of the Civil Division, and the Environmental Crimes Section of the Environment and Natural Resources Division can assist United States Attorneys' Offices in finding the appropriate agency office(s) for such consultation. A. General Principle: Although neither a corporation nor an individual target may avoid prosecution merely by paying a sum of money, a prosecutor may consider the

corporation's willingness to make restitution and steps already taken to do so. A prosecutor may also consider other remedial actions, such as improving an existing compliance program or disciplining wrongdoers, in determining whether to charge the corporation and how to resolve corporate criminal cases. B. Comment: In determining whether or not to prosecute a corporation, the government may consider whether the corporation has taken meaningful remedial measures. A corporation's response to misconduct says much about its willingness to ensure that such misconduct does not recur. Thus, corporations that fully recognize the seriousness of their misconduct and accept responsibility for it should be taking steps to implement the personnel, operational, and organizational changes necessary to establish an awareness among employees that criminal conduct will not be tolerated.

Among the factors prosecutors should consider and weigh are whether the corporation appropriately disciplined wrongdoers, once those employees are identified by the corporation as culpable for the misconduct. Employee discipline is a difficult task for many corporations because of the human element involved and sometimes because of the seniority of the employees concerned. Although corporations need to be fair to their employees, they must also be committed, at all levels of the corporation, to the highest standards of legal and ethical behavior. Effective internal discipline can be a powerful deterrent against improper behavior by a corporation's employees. Prosecutors should be satisfied that the corporation's focus is on the integrity and credibility of its remedial and disciplinary measures rather than on the protection of the wrongdoers.

In addition to employee discipline, two other factors used in evaluating a corporation's remedial efforts are restitution and reform. As with natural persons, the decision whether or not to prosecute should not depend upon the target's ability to pay restitution. A corporation's efforts to pay restitution even in advance of any court order is, however, evidence of its acceptance of responsibility and, consistent with the practices and policies of the appropriate Division of the Department entrusted with enforcing specific criminal laws, may be considered in determining whether to bring criminal charges. Similarly, although the inadequacy of a corporate compliance program is a factor to consider when deciding whether to charge a corporation, that corporation's quick recognition of the flaws in the program and its efforts to improve the program are also factors to consider as to appropriate disposition of a case. A. General Principle: Prosecutors may consider the collateral consequences of a corporate criminal conviction or indictment in determining whether to charge the corporation with a criminal offense and how to resolve corporate criminal cases. B. Comment: One of the factors in determining whether to charge a natural person or a corporation is whether the likely punishment is appropriate given the nature and seriousness of the crime. In the corporate context, prosecutors may take into account the possibly substantial consequences to a corporation's employees, investors, pensioners, and customers, many of whom may, depending on the size and nature of the corporation and their role in its operations, have played no role in the criminal conduct, have been unaware of it, or have been unable to prevent it. Prosecutors should also be aware of non-penal sanctions that may accompany a criminal charge, such as potential suspension or debarment from eligibility for government contracts or federally funded programs such as health care programs. Determining whether or not such non-penal sanctions are appropriate or required in a particular case is the responsibility of the relevant agency, and is a decision that will be made based on the applicable statutes, regulations, and policies.

Virtually every conviction of a corporation, like virtually every conviction of an individual, will have an impact on innocent third parties, and the mere existence of such an effect is not sufficient to preclude prosecution of the corporation. Therefore, in evaluating the relevance of collateral consequences, various factors already discussed, such as the pervasiveness of the criminal conduct and the adequacy of the corporation's compliance programs, should be considered in determining the weight to be given to this factor. For instance, the balance may tip in favor of prosecuting corporations in situations where the scope of the misconduct in a case is widespread and sustained within a corporate division (or spread throughout pockets of the corporate organization). In such cases, the possible unfairness of visiting punishment for the corporation's crimes upon shareholders may be of much less concern where those shareholders have substantially profited, even unknowingly, from widespread or pervasive criminal activity. Similarly, where the top layers of the corporation's management or the shareholders of a closely-held corporation were engaged in or aware of the wrongdoing, and the conduct at issue was accepted as a way of doing business for an extended period, debarment may be deemed not collateral, but a direct and entirely appropriate consequence of the corporation's wrongdoing.

On the other hand, where the collateral consequences of a corporate conviction for innocent third parties would be significant, it may be appropriate to consider a non-prosecution or deferred prosecution agreement with conditions designed, among other things, to promote compliance with applicable law and to prevent recidivism. Such agreements are a third option, besides a criminal indictment, on the one hand, and a declination, on the other. Declining prosecution may allow a corporate criminal to escape without consequences. Obtaining a conviction may produce a result that seriously harms innocent third parties who played no role in the criminal conduct. Under appropriate circumstances, a deferred prosecution or non-prosecution agreement can help restore the integrity of a company's operations and preserve the financial viability of a corporation that has engaged in criminal conduct, while preserving the government's ability to prosecute a recalcitrant corporation that materially breaches the agreement. Such agreements achieve other important objectives as well, like prompt restitution for victims.⁸ Ultimately, the appropriateness of a criminal charge against a corporation, or some lesser alternative, must be evaluated in a pragmatic and reasoned way that produces a fair outcome, taking into consideration, among other things, the Department's need to promote and ensure respect for the law.

A. General Principle: Non-criminal alternatives to prosecution often exist and prosecutors may consider whether such sanctions would adequately deter, punish, and rehabilitate a corporation that has engaged in wrongful conduct. In evaluating the adequacy of non-criminal alternatives to prosecution--e.g., civil or regulatory enforcement actions--the prosecutor may consider all relevant factors, including:

1. the sanctions available under the alternative means of disposition;
2. the likelihood that an effective sanction will be imposed; and
3. the effect of non-criminal disposition on federal law enforcement interests.

B. Comment: The primary goals of criminal law are deterrence, punishment, and rehabilitation. Non-criminal sanctions may not be an appropriate response to a serious violation, a pattern of wrongdoing, or prior non-criminal sanctions without proper remediation. In other cases, however, these goals may be satisfied through civil or regulatory actions. In determining whether a federal criminal resolution is appropriate, the prosecutor should consider the same factors (modified appropriately for the regulatory context) considered when determining whether to leave prosecution of a natural person to another jurisdiction or to seek non-criminal alternatives to prosecution. These factors include: the strength of the regulatory authority's interest; the regulatory authority's ability and willingness to take effective enforcement action; the probable sanction if the regulatory authority's enforcement action is upheld; and the effect of a non-criminal disposition on federal law enforcement interests. See USAM §§ 9-27.240, 9-27.250.

A. General Principle: Once a prosecutor has decided to charge a corporation, the prosecutor at least presumptively should charge, or should recommend that the grand jury charge, the most serious offense that is consistent with the nature of the defendant's misconduct and that is likely to result in a sustainable conviction.

B. Comment: Once the decision to charge is made, the same rules as govern charging natural persons apply. These rules require "a faithful and honest application of the Sentencing Guidelines" and an "individualized assessment of the extent to which particular charges fit the specific circumstances of the case, are consistent with the purposes of the Federal criminal code, and maximize the impact of Federal resources on crime." See USAM § 9-27.300. In making this determination, "it is appropriate that the attorney for the government consider, *inter alia*, such factors as the [advisory] sentencing guideline range yielded by the charge, whether the penalty yielded by such sentencing range ... is proportional to the seriousness of the defendant's conduct, and whether the charge achieves such purposes of the criminal law as punishment, protection of the public, specific and general deterrence, and rehabilitation." *Id.*

A. General Principle: In negotiating plea agreements with corporations, as with individuals, prosecutors should generally seek a plea to the most serious, readily provable offense charged. In addition, the terms of the plea agreement should contain appropriate provisions to ensure punishment, deterrence, rehabilitation, and compliance with the plea agreement in the corporate context. Although special circumstances may mandate a different conclusion, prosecutors generally should not agree to accept a corporate guilty plea in exchange for non-prosecution or dismissal of charges against individual officers and employees.

B. Comment: Prosecutors may enter into plea agreements with corporations for the same reasons and under the same constraints as apply to plea agreements with natural persons. See USAM §§ 9-27.400-530. This means, *inter alia*, that

the corporation should generally be required to plead guilty to the most serious, readily provable offense charged. In addition, any negotiated departures or recommended variances from the advisory Sentencing Guidelines must be justifiable under the Guidelines or 18 U.S.C. § 3553 and must be disclosed to the sentencing court. A corporation should be made to realize that pleading guilty to criminal charges constitutes an admission of guilt and not merely a resolution of an inconvenient distraction from its business. As with natural persons, pleas should be structured so that the corporation may not later "proclaim lack of culpability or even complete innocence." See USAM §§ 9-27.420(b)(4), 9-27.440, 9-27.500. Thus, for instance, there should be placed upon the record a sufficient factual basis for the plea to prevent later corporate assertions of innocence.

A corporate plea agreement should also contain provisions that recognize the nature of the corporate "person" and that ensure that the principles of punishment, deterrence, and rehabilitation are met. In the corporate context, punishment and deterrence are generally accomplished by substantial fines, mandatory restitution, and institution of appropriate compliance measures, including, if necessary, continued judicial oversight or the use of special masters or corporate monitors. See USSG §§ 8B1.1, 8C2.1, *et seq.* In addition, where the corporation is a government contractor, permanent or temporary debarment may be appropriate. Where the corporation was engaged in fraud against the government (*e.g.*, contracting fraud), a prosecutor may not negotiate away an agency's right to debar or delist the corporate defendant.

In negotiating a plea agreement, prosecutors should also consider the deterrent value of prosecutions of individuals within the corporation. Therefore, one factor that a prosecutor may consider in determining whether to enter into a plea agreement is whether the corporation is seeking immunity for its employees and officers or whether the corporation is willing to cooperate in the investigation of culpable individuals as outlined herein. Prosecutors should rarely negotiate away individual criminal liability in a corporate plea.

Rehabilitation, of course, requires that the corporation undertake to be law-abiding in the future. It is, therefore, appropriate to require the corporation, as a condition of probation, to implement a compliance program or to reform an existing one. As discussed above, prosecutors may consult with the appropriate state and federal agencies and components of the Justice Department to ensure that a proposed compliance program is adequate and meets industry standards and best practices. See *supra* section VIII.

In plea agreements in which the corporation agrees to cooperate, the prosecutor should ensure that the cooperation is entirely truthful. To do so, the prosecutor may request that the corporation make appropriate disclosures of relevant factual information and documents, make employees and agents available for debriefing, file appropriate certified financial statements, agree to governmental or third-party audits, and take whatever other steps are necessary to ensure that the full scope of the corporate wrongdoing is disclosed and that the responsible personnel are identified and, if appropriate, prosecuted. See *generally supra* section VII. In taking such steps, Department prosecutors should recognize that attorney-client communications are often essential to a corporation's efforts to comply with complex regulatory and legal regimes, and that, as discussed at length above, cooperation is not measured by the waiver of attorney-client privilege and work product protection, but rather is measured by the disclosure of facts and other considerations identified herein such as making witnesses available for interviews and assisting in the interpretation of complex documents or business records.

These Principles provide only internal Department of Justice guidance. They are not intended to, do not, and may not be relied upon to create any rights, substantive or procedural, enforceable at law by any party in any matter civil or criminal. Nor are any limitations hereby placed on otherwise lawful litigative prerogatives of the Department of Justice.

FOOTNOTES:

(n1)Footnote 1. While these guidelines refer to corporations, they apply to the consideration of the prosecution of all types of business organizations, including partnerships, sole proprietorships, government entities, and unincorporated associations.

(n5)Footnote 2. There are other dimensions of cooperation beyond the mere disclosure of facts, of course. These can include, for example, providing non-privileged documents and other evidence, making witnesses available for interviews, and assisting in the interpretation of complex business records. This section of the Principles focuses solely on the disclosure of facts and the privilege issues that may be implicated thereby.

(n6)Footnote 3. By way of example, corporate personnel are typically interviewed during an internal investigation. If the interviews are conducted by counsel for the corporation, certain notes and memoranda generated from the interviews may be subject, at least in part, to the protections of attorney-client privilege and/or attorney work product. To receive cooperation credit for providing factual information, the corporation need not produce, and prosecutors may not request, protected notes or memoranda generated by the lawyers' interviews. To earn such credit, however, the corporation does need to produce, and prosecutors may request, relevant factual information--including relevant factual information acquired through those interviews, unless the identical information has otherwise been provided--as well as relevant non-privileged evidence such as accounting and business records and emails between non-attorney employees or agents.

(n7)Footnote 4. In assessing the timeliness of a corporation's disclosures, prosecutors should apply a standard of reasonableness in light of the totality of circumstances.

(n8)Footnote 5. These privileged communications are not necessarily limited to those that occur contemporaneously with the underlying misconduct. They would include, for instance, legal advice provided by corporate counsel in an internal investigation report. Again, the key measure of cooperation is the disclosure of factual information known to the corporation, not the disclosure of legal advice or theories rendered in connection with the conduct at issue (subject to the two exceptions noted in Section VII(2)(b)(i-ii)).

(n9)Footnote 6. Routine questions regarding the representation status of a corporation and its employees, including how and by whom attorneys' fees are paid, sometimes arise in the course of an investigation under certain circumstances--to take one example, to assess conflict-of-interest issues. Such questions can be appropriate and this guidance is not intended to prohibit such limited inquiries.

(n11)Footnote 7. For a detailed review of these and other factors concerning corporate compliance programs, *see* USSG § 8B2.1.

(n13)Footnote 8. Prosecutors should note that in the case of national or multi-national corporations, multi-district or global agreements may be necessary. Such agreements may only be entered into with the approval of each affected district or the appropriate Department official. *See id.* § 9-27.641.

Asking Questions or Reporting Concerns

At Assurant, we want you to ask questions whenever you are in doubt about the right course of action, and to report any possible compliance violations or other concerns that you have.

You can seek guidance or raise concerns in several ways:

- Talk to your manager.
- Reach out to Human Resources or a member of the Legal Department.
- Call the Compliance team
- Send a report using the web reporting system at www.reportlineweb.com/assurant to report illegal or unethical activities in the work place. When you submit a report using the web reporting system, you will be asked to complete the screens of the web report form. You may remain anonymous if you wish.
- Call the Compliance Helpline at 888.427.2542.

When you call the Helpline, you may remain anonymous if you wish.

If you are calling the Helpline from outside the United States, dialing instructions are available at page 4 of the Code.

- Contact the Audit Committee of the Assurant Board of Directors if you wish to raise concerns about accounting, internal controls or auditing matters. You can do so by sending an email to: boardchair@assurant.com. If you wish to remain anonymous, please call the Compliance Helpline or use our web reporting system at www.reportlineweb.com/assurant.

- For employment-related concerns (including harassment or discrimination issues), follow the

reporting procedures for your business, as outlined in the Assurant Employee Handbook.

"The companies that survive longest are the ones that work out what they uniquely can give to the world--not just growth or money but their excellence, their respect for others, or their ability to make people happy. Some call those things a soul." -- *Charles Handy*

Dear Colleagues,

The soul of a company is the key to its longevity. This is especially true for Assurant--we offer products and services that touch people's lives in sickness and health, life and death, and disability and rehabilitation, and our business depends on the trust and confidence we earn from our employees, customers and shareholders. In everything we do, we should remember that people count on us.

Our reputation is based on a promise--to our customers, our shareholders, and ourselves--to act honestly, with integrity and according to the highest legal and ethical standards at all times. That is the most basic responsibility of all Assurant employees, executives, and directors.

It is the responsibility of each of us to uphold these values in everything we say and do in order to continue to cultivate a reputation of which we can be proud. This applies to every member of the Assurant community--including employees, management, members of the Board of Directors, agents, or others.

This Code of Ethics provides guidance regarding the legal and ethical standards that apply to each of us. Together, we will make Assurant stand out among its peers as a company dedicated to excellence in both performance and integrity.

Our reputation starts with you!

Sincerely,

Robert B. Pollock

President and Chief Executive Officer

What We Say and Do

At Assurant, everything we say and do must reflect our values and ethical standards. This Code of Ethics provides you with practical guidance to apply these values and ethical standards in your everyday activities, and with resources to call upon when you have questions or concerns.

Our Mission

To be the premier provider of targeted specialized insurance products and related services in North America and selected other markets.

Our Vision

To be a recognized leader in specialty insurance and financial services that provide peace of mind products to our customers. We deliver superior value through innovative and differentiated solutions that advance and secure the lives of our customers.

Our Values

Common Sense, Common Decency, Uncommon Thinking and Uncommon Results--help us accomplish this Mission and achieve our Vision. They extend to our relationships not only with our customers but with one another. Our products and services touch people's lives in sickness and health, life and death, disability and rehabilitation. In everything we do, we remember that people count on us.

Our Ethical Standards

Our ethical standards help ensure that all our decisions and actions are consistent with our values. In the process, we provide outstanding service to our customers, maintain our leadership position, improve employee satisfaction, and provide superior value to our shareholders. The highest standards of ethics and integrity are essential to our success as an organization and as individuals.

What are Assurant's ethical standards?

Our ethical standards require that we:

- Engage in and promote honest and ethical conduct, including the ethical handling of actual or potential conflicts of interest involving personal and professional relationships.

- Comply with applicable laws, rules, regulations and company policies, including the standards in this Code.
- Provide full, fair, accurate, timely and understandable information in reports and documents that we file with the government or issue to the public
- Promptly report any possible violations of ethical standards, using the tools described in this Code.

Wat are the consequences of violating these ethical standards?

Each of us is accountable for adhering to the values, standards and policies in this Code. Acting in any way that does not fit our culture of integrity, responsibility and ethics could damage your personal reputation, as well as the reputation of your team, department or business. When you violate laws, regulations, ethical standards, or company policies, Assurant will take disciplinary action, which could include termination of employment. In some cases, your actions could even result in civil liability or criminal prosecution.

This Code of Ethics is not a contract of employment and does not alter the at-will employment relationship between Assurant and employees of Assurant. This Code is not intended to cover all the specific legal requirements of each country in which Assurant does business. These guidelines apply throughout Assurant's businesses worldwide. Requirements may differ between jurisdictions and, in that regard, it is important that you read these guidelines in conjunction with your business's local policies, which deal more specifically with the legal requirements of the jurisdiction in which you work.

Commitment to Stakeholders

We have a long-standing commitment to operate according to our values, which extends to our customers, employees, business partners, shareholders and communities ("Stakeholders"). Each of these Stakeholders plays a vital role in our success.

Our Customers

We are committed to operating with the highest ethical standards and integrity, and dedicated to dealing honestly with our customers and providing them with quality products and services.

Our Employeeess

We are committed to open, honest communication with our employees. We are devoted to treating our employees fairly and maintaining employment practices based on equal opportunity for all.

Our employees must treat each other with dignity and respect regardless of age, sex, color, race, religion, national origin, marital status, sexual orientation, gender expression, gender identity, pregnancy, veteran status, disability or any other category protected by all applicable federal, state and local laws prohibiting discrimination.

Our Business Partners

We are committed to dealing with our business partners fairly while promoting fair competition. All of our business partners, while dealing with us, should act in accordance with standards and principles consistent with our Assurant Code of Ethics.

Our Shareholders

We are committed to providing long term value to our shareholders. This will be accomplished by observing the highest standards of business practices and ethical conduct in all of our business dealings.

We are distinguished by our leading positions in the specialty insurance business. Although each of our businesses is unique and diverse, they share three things in common: risk management expertise, strong distribution partnerships and complex administrative skills. Each of our businesses leverages these core capabilities to gain a competitive advantage in their selected markets.

Our Communities

We are committed to being responsible corporate citizens by taking an active leadership role in the communities where we do business. We encourage and promote employee volunteerism and corporate philanthropy. We act responsibly toward the environment. We minimize, reuse, and recycle waste at our facilities wherever possible, and dispose of remaining waste responsibly. We strive to improve energy efficiency in all facilities.

Asking Questions and Raising Concerns

If you are unsure of the right course of action, do not guess. Remember--if you have any doubt, reach out to the available resources and ask before you act.

If you become aware of a possible violation of this Code or of any applicable law, regulation or policy, you must report it.

Ask Before Acting

What should I do when faced with a difficult ethical decision or a situation that might be improper?

If you become aware of a possible violation of our ethical standards, or if you are concerned that a course of conduct may be unethical, ask yourself the following questions:

- Might the action in question conflict with any of the standards to which Assurant holds its employees, officers and directors?
- Am I compromising my own ethics in any way?
- How would I or the company feel if the action were reported on the front page of the newspaper?
- Would Assurant lose customers, employees or shareholders--if they knew that some of our employees did this?
- Does the action conflict with our values and commitments to our customers?
- Will my actions have the appearance of impropriety?

If you answer "yes" to any of these questions, or if you are not certain of the answer, you should seek guidance **BEFORE ACTING** by reaching out to your local management or using the reporting tools and reaching out to the resources described under "Asking Questions and Reporting Concerns".

Reporting Illegal or Unethical Behavior

What should I do if I see something or am asked to do something that may violate the law or Assurant's ethical standards?

It is up to each of us to ensure that Assurant operates according to our ethical standards at all times. In addition to making sure that your own actions live up to our ethical and legal commitments, it is your responsibility to report any possible violation of the law or our ethical standards.

Compliance Resources and Reporting Tools

This Code is more than just a description of our standards. It is the centerpiece of a company-wide compliance and ethics program supported by the Board of Directors and senior leaders. The program is led by Assurant's Chief Compliance Officer, Jay Cohen, who is assisted by dedicated compliance resources at the corporate level and in each of our businesses. The Compliance team and the Assurant Legal Department are available to advise and assist you in dealing with laws, regulations, company policies and other compliance issues that affect your work.

Assurant promotes open communication throughout our company to resolve problems, complaints or concerns. We want you to come forward so we have provided several ways for you to ask questions or report concerns:

- First, talk to your manager or another supervisor in your business.
- Reach out to Human Resources or a member of the Legal department.
- Call the Compliance team.
- Send a report using the web reporting system at www.reportlineweb.com/assurant.
- Call the Compliance Helpline.

If you are calling the Helpline from outside the United States or Canada, we have provided the following international toll-free access service, using AT&T direct. Here is how you can use this service:

Make sure you have an outside line (if using a public phone, make sure it can be used to make international calls).

STEP 1: Enter the AT&T direct access number for the country you are calling from (see list below).

STEP 2: When you hear the English-language voice prompt or series of tone prompts, enter the Compliance Helpline toll-free number (DO NOT press "1" or "0" before dialing the telephone number).

STEP 3: The call will be connected to a communication specialist at the Compliance Helpline.

If you do not speak English, or prefer to have an interpreter assist you in speaking with the Communication Specialist, immediately tell the Communication Specialist which language you speak. An interpreter will then join your conversation to assist you.

The Compliance Helpline and the web reporting system are staffed by an independent company and are available 24 hours a day, seven days a week. You can report anonymously if you prefer, although in some cases this may limit our ability to investigate your concerns.

If you want to contact the non-management members of the Board of Directors for any reason, including reporting a concern involving accounting, internal controls or an auditing matter, you may e-mail the Assurant Board of Directors at **boardchair@assurant.com**.

For employment-related concerns (including possible harassment and discrimination issues), follow the reporting procedures for your business, as outlined in your employee handbook.

No Retaliation

Assurant takes all reports of misconduct seriously, and we will promptly and fairly investigate reports made through any of our reporting tools. If you wish to remain anonymous, you may do so by reporting your concern on the Compliance Helpline on a no-name basis.

Even if you identify yourself or report your concern by email, you need not fear retaliation. We will not tolerate any retaliation against anyone who makes a report in "good faith" (meaning that the person reporting has made a genuine effort to provide honest and accurate information even if the information later is proven to be mistaken). Keep in mind that making malicious or purposely false reports violates our Code.

Anyone engaging in retaliation is subject to disciplinary action including possible termination of employment. If you believe that you have been the subject of retaliation, please contact the Assurant Compliance team or use one of the reporting tools.

Real life example

Q. Suppose I am asked by a colleague or supervisor to do something I think is wrong. What should I do?

A. Assurant relies on you to bring your best ethical judgment to bear on the actions you take for us. Therefore, before doing something that you believe is wrong, reach out and ask about the right course of action. The first stop may be to express your concerns to the supervisor or colleague, but you may also make use of the reporting tools and resources described in this section of the Code. Remember, we want you to ASK BEFORE ACTING if you have any concerns about the proper course of action.

Fellow Employees

Respect For Each Other

At Assurant, we are committed to maintaining a supportive work environment and to help employees thrive. Our policies reflect and reinforce our values, and help ensure that each one of us abides by all applicable federal, state and local laws prohibiting discrimination.

How does Assurant promote diversity?

At Assurant, we want to have a diverse workforce of capable employees. We make all employment and personnel decisions based on the basis of merit, competence and qualifications without regard to age, sex, color, race, religion, national origin, marital status, sexual orientation, gender expression, gender identity, pregnancy, veteran status, disability or any other category protected by all applicable federal, state and local laws prohibiting discrimination.

What measures does Assurant take to prevent harassment?

Assurant prohibits harassment of employees, in any form. Harassment is any form of inappropriate conduct toward another person that creates an intimidating, hostile or offensive work environment. Sexual harassment is a form of workplace harassment that involves unwelcome sexual advances, requests for sexual favors, unwelcome physical conduct, or other physical or verbal conduct of a sexual nature.

Harassment will not be tolerated at Assurant, regardless of whether it happens on company premises or at off-hours or off-site business-related functions such as holiday parties or business travel. For further information on this subject, please see the 'Anti-Harassment Policy' section of the Assurant Employee Handbook.

What should I do if someone associated with the company has harassed me?

If you believe that you have been harassed, you should report the matter immediately to your manager or to your business's Human Resources Department. You may also contact the head of Human Resources for Assurant in New York. Managers who receive these complaints must immediately report them to Human Resources. You can also use any of the reporting tools described in this Code.

In all cases, reports will be investigated promptly, in as confidential a manner as possible under the law. Retaliation against an employee for a harassment complaint made in good faith will not be tolerated.

Real life example

Q. I work with and occasionally entertain clients of Assurant. Recently, a client has been making comments about my appearance and making other unwanted advances. His comments make me feel uncomfortable. What can I do?

A. Report the situation to your supervisor or manager, Human Resources, the Compliance team, call the Compliance Helpline, or report your concern at www.reportlineweb.com/assurant. Even though the client is not an employee of Assurant, you should report the situation. Harassment can include actions, whether done by an employee or non-employee, which create a hostile, intimidating or uncomfortable work environment. Assurant takes all reports of harassment seriously and treats each report as discreetly and confidentially as possible.

Real life example

Q. You are uncomfortable with your boss' flirtations but do not want to say anything for fear of losing your job. What should you do?

A. You should speak to someone in your Human Resources department or reach out to the head of Human Resources. Investigations will be conducted as confidentially as possible, consistent with the need to conduct an adequate inquiry, and retaliation for a 'good faith' report will not be allowed.

Health and Safety

Assurant is committed to maintaining the highest level of safety and security for our employees and visitors who conduct business within our offices. You can support this commitment by observing all health and safety rules and laws that apply to your job. It is your responsibility to promptly report accidents, injuries, or occupational illnesses and unsafe practices or conditions to your manager.

Further information and guidance on this subject, can be found in the 'Safety and Security policy' section of the Assurant Employee Handbook.

Responsibilities of Managers

Managers, by virtue of their positions of authority and responsibility, must be ethical role models for other employees. Managers must set an example and demonstrate what it means to act with ethics and integrity. An important part of a manager's responsibility is to exhibit the highest standards of integrity in all dealings with fellow employees, customers, suppliers and the community at large. An equally important responsibility is to obtain team members' commitment--and develop their ability--to make sound ethical judgments. Managers should look for opportunities to routinely communicate and discuss ethical conduct, difficult decisions or other challenging situations with team members. Create an open working environment that encourages team members to come to you, without fear of retaliation, with any questions or reports. When they approach you, make sure you respond promptly. If you are unsure of the answer to a question, refer the question to your Human Resources Department, the Compliance team or utilize any of our reporting tools.

"Things work out best for those who make the best of the way things work out."

Assurant and Its Resources

Conflicts of Interest

Assurant expects all employees, officers and directors to do their best to advance the company's interests and to use objective, unbiased standards when making decisions that affect our company. Business decisions should be made on

the basis of quality, suitability, service, price, qualifications and other appropriate factors, without the influence of personal bias or conflicts of interest.

What is a conflict of interest?

A conflict of interest occurs when your personal or family interests interfere--or appear to interfere--with the interests of the company. Every employee and director must avoid any situation that creates even the appearance of a conflict.

Here are some examples of the types of activities that may create conflicts of interest:

- Outside business interests or employment
- Doing business with, hiring or supervising family members
- Taking personal advantage of corporate opportunities

Real life example

Q. A co-worker has asked you to hire his in-law for a large printing project. You have researched this printer and have found only negative reviews of his work. Should you hire the printer?

A. No. You should express your concerns to the co-worker and suggest alternative approaches. If he persists, you should consult the Compliance team for guidance.

Outside business interests or employment

Sometimes, taking outside employment can create a potential conflict of interest. You may not take another job--full-time or part-time--that interferes with your ability to do your job at Assurant, conduct outside business activities during your Assurant working hours, or use company property, equipment, information or other assets for non-Assurant activities.

If you are thinking about taking an outside job or business interest that could create a conflict of interest, or serving on the board of directors of a company, you must first get your manager's approval and the approval of a Compliance team representative, or call the Compliance Helpline. This rule does not apply to charitable, civic, religious, educational, public, political or social organizations whose activities do not conflict with the interests of Assurant and do not interfere with your ability to do your job at Assurant. If there is any question as to whether a conflict of interest exists, you should discuss it with your manager and the Compliance team.

Real life example

Q. In your free time, you are a member of a soccer team. You have been asked to print 500 fliers for an upcoming game. It would be easier to do this at work, since the office has all the supplies you need. Is this permissible?

A. No. This is a conflict of interest because you would be using company assets -- including supplies and your time at work -- to benefit an outside organization.

Doing business with, hiring or supervising family members

A conflict of interest can occur if someone who is closely related to an Assurant employee--such as a spouse, parent, sibling, child, domestic partner, grandparent, or in-law--has a personal stake in a company that is a supplier, competitor, business partner, customer, or potential customer or supplier of Assurant. If you are involved in or become aware of such a situation, you must notify your manager. You may not attempt to influence Assurant's business relationships for someone who is closely related to you.

A conflict of interest can also arise under certain circumstances if a closely related person is seeking employment at Assurant or is already working here. You must not be involved in any decisions regarding the hiring of a person who is closely related to you. In addition, no one should be placed in a position of direct decision-making authority over a closely related person, such as the direct power to reward, supervise, appoint, remove or discipline the other. The key is disclosure. You should disclose any such relationships to your manager. Your manager will consult with Human Resources or the Legal Department to decide the best course of action.

Remember--it is important to avoid even the appearance of a conflict. If any of these situations has occurred--or may arise--notify your manager immediately.

Taking personal advantage of corporate opportunities

In some cases, through your work and contacts at Assurant, you can become aware of business opportunities that our company may be interested in--such as purchases, investments, new markets, or the development of new products and services. You must notify the CEO or CFO of your business of this opportunity, and refrain from personally pursuing the matter until Assurant has had the chance to evaluate it. At no time can you use any company property, information or other assets for personal gain or to compete with Assurant.

Additional rules for directors, executive officers and other designated individuals

Assurant has additional rules that address loans to directors, executive officers and employees and any related-party transactions, which are certain business transactions between Assurant and designated individuals.

Reporting conflicts of interest

Each year, we ask all Assurant directors, officers, or employees with purchasing authority to complete a conflict of interest questionnaire.

Whether or not you complete this questionnaire, you must promptly report any relationship, transaction or other situation that creates--or has the potential to create--a conflict of interest to your manager or to the Assurant Compliance team using one of the compliance reporting tools.

Business Gifts and Entertainment

Business gifts and entertainment are designed to build good working relationships and goodwill in the marketplace. Under the right circumstances and within limits, these courtesies are an acceptable way to do business. We do not give or receive gifts that could improperly influence--or appear to improperly influence--a business decision.

General Principles and Requirements

In all matters related to gifts or entertainment, we at Assurant exercise good judgment. We understand that under no

circumstance may we or our family members:

- Offer, solicit or accept bribes
- Accept or offer gifts, meals or entertainment, travel or lodging as an improper business inducement or in return for a particular action
- Accept or offer gifts, meals or entertainment, travel or lodging for the purpose of inappropriately influencing good business judgment, impartiality, the fiduciary duties or loyalty of those being entertained in any business dealing or transactions involving Assurant, or any employee of Assurant
- Accept or offer gifts, meals or entertainment, travel or lodging of any value if doing so would reasonably present--or appear to present--a conflict of interest in light of customary industry practices
- Offer or accept travel or lodging of any value unless such offer or acceptance is in accordance with this Code, as outlined below

To assist in upholding these principles, we adhere to the following requirements with regard to any of the gifts or entertainment described in this section of the Code. A business gift or entertainment can only be offered to--or accepted from--any non-Assurant employees, officers and directors if it is:

- Consistent with good business practices and local law
- Has a business purpose
- Is not an improper business inducement
- Would not embarrass Assurant if disclosed publicly
- Is not in poor taste or involving a venue that would reflect poorly on Assurant
- Does not recur frequently enough to suggest an improper motive
- Is reasonable in value and not extravagant or excessive in light of customary and appropriate business practices

You must also adhere to the following additional requirements for these categories of business gifts and entertainment:

Gifts

As employees, officers and directors of Assurant, we may not seek, accept or offer the following gifts:

- Cash or cash equivalents, (except gift certificates or gifts cards of a nominal amount)
- Any items with a value in excess of \$250 (or the equivalent in local currency) in the aggregate during a calendar year given by, or to, any individual

NOTE:

Meals, entertainment, awards, promotional items, or recognition provided to Assurant employees

by Assurant are not considered gifts subject to these conflict of interest restrictions. However, meals or entertainment provided by a third-party, where Assurant employees, officers or directors are not accompanied by the third-party, are to be treated as gifts subject to this restriction.

In rare instances when refusal, reimbursement or return of gifts would cause offense or embarrassment to the giver or would otherwise adversely affect the relationship between Assurant and the giver, we may accept items worth more than \$250 or the equivalent in local currency on behalf of Assurant, and we acknowledge that the gift becomes the property of Assurant. We must advise the giver in an appropriate manner that the items were accepted on behalf of Assurant, and we must report these gifts to the Compliance team within 30 days. There may be limited exceptions where Assurant may give gifts totaling more than \$250 during a calendar year to an individual, **but these exceptions must be approved in advance by Senior Management and the Chief Compliance Officer.**

Real life example

Q. What types of gifts may an Assurant employee accept?

A. In most cases, it is not the type of gift that matters. It is the value of the gift which is at issue. An Assurant employee may not accept a gift worth more than \$250 without the approval of a member of Senior Management and the Chief Compliance Officer. These exceptions should rarely be approved.

Q. Is it unethical to accept money, a vacation, or anything of value, to improperly assist a vendor in securing a contract or other benefit from Assurant?

A. Yes. Any employee who receives bribes or kickbacks will be immediately terminated and reported, as warranted, to the appropriate law enforcement authorities. A kickback or bribe includes any item intended to improperly obtain favorable treatment whether or not the favorable treatment actually results. Under no circumstances may gifts be offered to potential clients or accepted during the bidding or contracting process, unless they are of nominal value.

Meals and Entertainment

As employees, officers and directors of Assurant, we may accept or offer meals and entertainment from business associates (i.e. non-Assurant employees, officers or directors) or prospective business associates as long as the business associates accompany us. We may accept meals or tickets to sporting events, the theater and other recreational events (e.g. golf outings), provided that the purpose is for us to discuss business matters with non-Assurant business associates, and provided that these events comply with the General Principles and Requirements described above.

Travel and Lodging

Any travel or lodging that is offered to or accepted from a third party must adhere to all of the General Principles and Requirements for business gifts and entertainment set forth in this Code.

In addition, it is a generally accepted practice within the industry to host, and attend, business conferences, special presentations or recreational events for the purpose of business discussions and brand-building. By their nature, such events may include the provision of lodging and/or transportation to attendees. If so, Assurant employees may offer or accept travel and lodging for these kinds of events provided that the travel and lodging are reasonable under the

circumstances, meet all of the General Principles and Requirements and also provided that they submit details to the business segment Chief Executive Officer and to the Assurant Compliance Officer in advance of the event for review and approval.

Government Officials

Gifts and entertainment may never be given or offered as a bribe or an incentive to improperly obtain business or referrals. In this regard, we do not make any payments or provide anything of value to government officials or employees to improperly obtain or retain business or improperly gain an advantage in the marketplace. Additional information about our policies and procedures for gifts and entertainment involving foreign government officials is in the section below titled "Anti-corruption Laws, Including the Foreign Corrupt Practices Act".

Charitable Contributions

We play a strong role in supporting the communities in which we do business. Charitable contributions must not be given as a condition of or in order to improperly influence a business decision, in return for a particular action or made for the benefit of any one individual. If a request for a charitable contribution may reasonably present--or appear to present--a conflict of interest in light of customary industry practices, or may be contrary to any of the General Principles and Requirements, such request must be reported to the appropriate senior business leader. Whenever there is any question concerning the appropriateness of a request for a charitable contribution due to the size, frequency or other factors--such as whether such contribution may create a conflict of interest or the appearance of such a conflict--the senior business leader shall review the request with the Chief Compliance Officer before making a contribution.

Use of Assurant's Assets

Assurant's assets must be protected. These include tangible assets such as computers and intangible assets like confidential business information. The following guidelines will assist you in meeting this responsibility:

- Our assets are to be used only by authorized employees, officers and directors.
- You may not take or use the assets of Assurant or of any customer for your own private purposes, or for an improper or illegal purpose. These assets include proprietary and confidential information as these terms are defined in the following section titled "Protecting Information About Assurant, Our Customers and Our Employees."
- You may not remove, destroy or dispose of anything belonging to Assurant without the consent of management.
- When your employment with Assurant ends, you must return all tangible and intangible assets--including electronic records, paper and electronic files, equipment, supplies, proprietary and confidential information, and other materials that belong to Assurant. You may take only your personal belongings.
- Assurant realizes that minor, incidental and infrequent personal use of company assets is sometimes inevitable. Personal use is not acceptable if it significantly depletes the value of a company asset, adds significant costs to the company, interferes with productivity of the employee or places the company at risk of liability. The use of Assurant's computers, the internet, and telephones for personal matters must be kept to a minimum.

"Keep true, never be ashamed of doing right, decide on what you think is right and stick to it." --
George Eliot

Real life example

Q. You spend considerable time each day surfing the web, planning your vacation and sending personal emails. Is this allowed?

A. No, this is not permitted since it involves the use of company assets and your paid work time for non-business purposes. This level of activity is beyond incidental or minor use--which is all that is permitted.

For further information on this subject, see the 'Use of Company Property' policy in the Assurant Employee Handbook.

Protecting Information About Assurant, Our Customers and Our Employees

Assurant employees, officers and directors must respect the confidentiality of all information concerning the company's finances, products, services, systems, business processes, employees, and customers.

In addition, Assurant employees must take particular care of all confidential financial, health and other information that our customers share with us. For further information, please refer to the Assurant Employee Handbook and the following policies: Employee Privacy Policy, Clean Desk Policy, Information Privacy Policy, Privacy of Employee Records Policy, and the Media Requests Policy.

What information is considered confidential and proprietary?

Proprietary information is confidential information about Assurant's products, processes and services. It helps us to differentiate ourselves in the marketplace and to develop and retain a competitive edge. Proprietary information must not be disclosed to anyone outside the company without prior authorization from a senior Assurant official. Such information is for business purposes only and should never be used for personal gain. All proprietary information is confidential, but there is also other confidential information (such as customer information) that may not be proprietary to Assurant. In either case, all proprietary and confidential information must be kept strictly confidential and treated with great care.

Even within Assurant and in the course of your employment responsibilities, all employees, officers and directors must safeguard such information.

Real life example

Q. While surfing the Internet, you came across a chat board that includes postings about our AIZ stock. You would like to post a comment in support of the company. May you do so?

A. No. It is never permissible to post a comment about the Company on a chat room or blog. As an employee, you may have--or be perceived to have--information that is not available to the general public. Also, you may be viewed as speaking on behalf of Assurant and only the Corporate Communications Department and designated officials can do so.

Q. You are attending a seminar and have been asked to make a presentation. In your talk, you are thinking about mentioning the possibility of a new vendor contract that has not yet been publicly announced. Is it permissible to share this information?

A. No. Although sharing information and best practices with other organizations is important and to be encouraged under the right circumstances, we cannot share information about Assurant's business practices, sales and activities if that information is not public.

If you have any questions or doubts about what you may or may not communicate, either within the company or to outsiders, be sure to consult with the appropriate privacy officer, the Legal Department, your manager, or your business's Communications Department.

For further information on this subject, see the Assurant Information Security Management Program, Policies and Procedures.

What are the consequences of the improper disclosure of proprietary or confidential information?

Unauthorized disclosure or misuse of confidential or proprietary information can severely damage our business. Your obligation to protect this information continues even when your employment with Assurant ends. You must never share confidential or proprietary information with any third party without the express permission of Assurant.

Insider Trading

Insider trading is the purchase or sale of a company's securities by someone who has important information that is not available to the public. Insider trading can occur if individuals with such information use it themselves or if they pass it along to others--such as family members or friends--who then purchase or sell the company's securities.

All Assurant employees, officers and directors must be aware of and comply with the rules against insider trading. Here is how these rules apply to you and your work at Assurant:

The laws against insider trading deal with "material" information that is not available to people outside Assurant. Information is "material" if it would influence someone to buy, sell or hold stock in the company to which the information relates. Any information that could reasonably be expected to cause a company's stock price to move up or down is material.

In general, it is illegal for any person with material, non-public information about a company to buy or sell securities (such as shares or stock options) of that company. You may not:

- Buy or sell Assurant stock (or stock options or bonds) if you have material, non-public information
- Provide material non-public information to anyone outside the company who might use it to decide to buy or sell Assurant stock, stock options or bonds
- Disclose material, non-public information to family members or friends

These rules apply to each of us at Assurant--not just executives, managers and directors--and can even apply to the purchase or sale of company stock in your 401 (k) plan and the Employee Stock Purchase Plan.

Real life example

Q. I have some information regarding Assurant's financial performance for the quarter because of my job responsibilities. I would like to make a change to my investment allocation in my retirement fund, but this fund includes stock in Assurant and would result in the purchase of more Assurant stock. Do I need pre-approval to make this change?

A. Yes. If you have material, non-public information about Assurant, U.S. securities laws prohibit you from buying or selling Assurant securities and from making certain elections and transactions under our plans. Directors, Executive Officers and Non-Executive Officers are also subject to additional restrictions on their ability to engage in transactions in Assurant securities. If you are in this situation, you should consult the Assurant Insider Trading Policy or contact Stephen Gauster or Raj Dave of the Assurant Legal Department.

Assurant's Insider Trading Policy provides you with additional guidance including:

- Examples of material information
- The blackout periods and other rules that apply to designated persons called "covered persons"
- The rules that apply to your trading in Assurant stock in a company plan

The Insider Trading Policy can be found on the Compliance intranet site and on your business' intranet site. Before engaging in any trading, please refer to the policy for additional instructions and details about the rules against insider trading.

Real life example

Q. You learned about Assurant's potential acquisition of another company. This information is not available to the public. You are thinking about recommending to your brother that he purchase stock in that other company in advance of the acquisition. Is this allowed?

A. No. This would involve illegal "tipping" of material non-public information to another, even though it involves the stock of a company besides Assurant.

Accurate Books, Records and Public Disclosures

We make business decisions each day based on information recorded by our employees at every level of the organization. Our recorded information is used to advise investors about our financial results, to make required legal filings and support new products and services. Incomplete or inaccurate information can lead to poor decisions and to serious problems for Assurant and the individuals involved. For example, improper recording or reporting of revenues and expenses can lead to misrepresentation of our business and finances, which can be illegal.

Every one of us, regardless of our position at Assurant, must make sure the information we report and record about our work here is accurate and complete. This includes information we submit on expense reports, sales data, production

data, contracts, monthly and quarterly reports and other corporate records. These rules apply no matter where we work, anywhere around the world, and in every unit of the company.

If you have questions or concerns about any aspect of our business records, financial reports or public disclosures, you should discuss them with your manager, our finance and accounting personnel, the Legal Department or the Compliance team. If you have reason to believe that information is being deliberately misreported or concealed, you should call the Compliance Helpline, talk to one of our compliance or Legal Department personnel, or email the Assurant Board of Directors at boardchair@assurant.com.

"The greater the loyalty of a group toward the group, the greater is the motivation among the members to achieve the goals of the group, and the greater the probability that the group will achieve its goals." -- *Rensis Likert*

Real life example

Q. It is the last week of the quarter. You and your manager want to make sure you meet your sales targets for the quarter, so you would like to record a sale that will not be finalized until next week. You are sure that this deal will close, so what is the harm in recording it now?

A. The harm is that our records for this quarter will not be accurate. Costs and revenues, including new sales, must be recorded in the period in which they are incurred or earned. This sale is not earned until it is finalized and may not be recorded until then.

Records and Information Management

Assurant is responsible for ensuring that its business records, in any medium, including hard copy and electronic records, are created, managed, and disposed of properly. An effective, efficient records and information management program allows Assurant to meet its business needs as well as comply with all legal and regulatory obligations. Assurant employees must familiarize themselves with and abide by the Assurant Records and Information Management Policy and procedures. For further information on this subject, see the Assurant Records and Information Management Policy intranet site.

Political Activity

Assurant encourages employees to be involved in civic affairs and the political process. This includes making personal contributions to civic organizations, political candidates and political parties.

However, employees are prohibited from contributing Assurant's funds, property, services or employee time to any political party, committee or candidate--for any office at any level of government--without prior approval by the Chief Compliance Officer. Prohibitions include:

- Use of company email or mailing lists to promote a candidate
- Use of company time to work or volunteer for a candidate
- Pressuring any colleague, supplier, customer, vendor or partner to make any political contribution or support any candidates

- Asking subordinates to purchase tickets to political fund-raisers or otherwise contribute to candidates or campaigns

To avoid even the appearance of a conflict of interest, no Assurant employee may hold an elected, appointed or advisory position in any federal, state or local government without prior approval by the Chief Compliance Officer.

The Marketplace

Ethical Business Practices

At Assurant, our mission is to "be the premier provider of targeted specialized insurance products and related services" in the markets in which we operate.

Behaving ethically is not only the right thing to do, it is fundamental for business success and essential for us to achieve our mission. Our reputation depends on the honest and ethical behavior of each of us in every transaction and business dealing, every day.

Here are some guidelines to apply this in practice:

- You should make decisions that serve the best interests of our customers.
- You should never deceive, defraud or misrepresent the company or its products and services.
- You should never mislead, manipulate or take unfair advantage of a customer, member, provider or supplier, or help anyone else do any of these things.
- You should never misrepresent facts, contractual terms or company policies to a customer, member, provider, supplier or regulator. If you do so, even inadvertently, you must correct the misrepresentation as soon as possible after consulting your manager and the Legal Department.
- You should not violate any law or regulations, including unfair trade or insurance practice laws.

Business and Trade Practices

Assurant conducts business in a highly regulated environment. Each business unit plays a role in assuring that we meet our legal and regulatory obligations as well as the commitments we make to our customers. You must make yourself aware of and abide by the rules that apply to your job responsibilities.

Business Agreements

Assurant prohibits employees from entering into any oral agreement or oral contract for a transaction or business relationship involving the exchange of money for goods or services between Assurant or any of its businesses and a third party. Additionally, any business agreement with an agent, broker, representative, consultant or contractor must be in writing and must clearly state the services to be performed, the basis for earning the commission or fee, and the rate or fee.

Real life example

Q. A reinsurer has suggested that we have a "handshake agreement" under which reinsurance capacity will

continue to be available to us as long as the reinsurer's experience on our account has been profitable. Is this ok?

A. No. All agreements must be in writing. This does not preclude authorized officers, employees or agents from making oral agreements in the normal course of negotiations if such agreements are promptly followed by preparation and execution of appropriate documentation.

"Moral principle is the foundation of law."

Doing Business with the Government

If you work in a business unit contracting with the U.S. or any state government or agency, you must comply with the applicable statutory, regulatory and program requirements related to the contract.

All Assurant employees working on government contracts have a responsibility to report any known or suspected violations of applicable statutory, regulatory or program requirements. There are strict rules about what may be offered to government employees, especially if the government employee is a contract officer for a contract we have or are seeking. In that case very little, if anything, can be offered to the person. In some cases, you may not even be able to offer beverages or food during a meeting.

If you are unsure of the requirements related to a government contract, ask your manager.

Sales and Marketing

One of Assurant's Ethical Standards is to provide outstanding customer service. We must treat customers with honesty, integrity, fairness and respect at all times. We must not create misleading impressions, omit important facts or make false claims about our competitor's offerings. Assurant is committed to complying with all "truth in advertising" laws.

Antitrust and Competition

We compete fairly, in accordance with our values, and in compliance with all applicable antitrust and competition laws in every jurisdiction in which we operate. These laws are very complex. They are intended to provide customers with a variety of products at competitive prices unrestricted by artificial constraints such as price fixing, illegal cartels, boycotts, and tie-ins. Violations of these laws can result in significant penalties for Assurant and the individuals involved, as well as loss of reputation and standing in the marketplace.

We have developed a comprehensive Antitrust Policy for all of our businesses, to help you ensure that the conduct of our organization is in full compliance with these laws at all times. You can find this policy on the Compliance intranet site.

The Antitrust Policy is a general guide to compliance with the antitrust and competition laws. The Legal Department should always be consulted before you engage in any business practice that could have antitrust implications. In general, these laws prohibit monopolies, price-fixing, bid-rigging and other practices that limit trade and fair competition.

It is illegal under these laws to enter into any agreement with a competitor that unreasonably restricts competition. Illegal agreements do not have to be formal or written; they can be as simple as an oral understanding among the parties.

Trade associations and other circumstances in which you come into contact with representatives of our competitors can pose particular concerns under the antitrust and competition laws. During such activities, including all informal and social activities, it is important that you refrain from discussing or exchanging any information with competitors regarding prices, discounts, products and services, markets, margins, terms of coverage, customers, providers, reimbursement levels and methodologies, or any similar information. Even casual remarks can raise significant concerns.

If you perceive that a possible antitrust violation is occurring--or is about to occur--you should immediately leave the meeting. All actual or potential violations must be immediately reported to the Legal Department.

Real life example

Q. At a trade association meeting, you meet with employees of competing companies for drinks after dinner. The conversation turned to the prices Assurant charges certain customers in some of our markets. This did not seem right to you, but you were not sure what to do and just remained there without speaking. Did you do the right thing?

A. No--employees must make clear to the others in the conversation that they cannot and will not participate or even be present for conversation about prices, products, markets or similar issues. If such talks continue, you must leave. You should then report the matter to the Legal Department as soon as possible.

Anti-corruption Laws, Including the Foreign Corrupt Practices Act

In all of the markets around the world in which we operate, Assurant will not offer or pay bribes to government officials, business partners or others to obtain or retain business, secure an advantage, or for any other reason.

The Foreign Corrupt Practices Act

Assurant employees working outside the United States--or supervising those who do--must be aware that payments of bribes or anything else of value to foreign government officials can violate the Foreign Corrupt Practices Act (FCPA), a U.S. federal criminal law. These actions may violate local criminal laws, as well.

The FCPA has two parts: 1) anti-bribery provisions and 2) books and records requirements. Each part has a broad application to our business practices.

The anti-bribery requirements of the law prohibit the payment of "anything of value" by company employees or agents to a foreign government official to improperly obtain or retain business, or gain an unfair advantage in the marketplace. "Anything of value" can include direct cash payments, political or charitable contributions, jobs or other benefits to family members and even lavish gifts, travel or entertainment. "Foreign government officials" include officials at all levels of government, political party officials and also private employees of government-owned or government-controlled business such as hospitals.

We are responsible for payments made by Assurant officers and employees--as well as anything of value provided to foreign government officials by those acting on our behalf including agents, contractors, consultants, brokers and business partners. This means that Assurant employees must exercise great care in hiring consultants, agents, brokers or other third parties that deal with foreign government officials on our behalf. Assurant employees must also exercise caution in entertaining or providing gifts to foreign government officials, and in arranging travel for these officials to

company business sites.

The books-and-records provisions of the FCPA require that we keep detailed and accurate records about ALL of our business transactions around the world, including contracts with third parties and payments to foreign government officials. Reports about every transaction and use of company assets--whether or not related to foreign government officials and even including all transactions taking place in the United States--must be accurate, complete and in "reasonable detail." Any payments to foreign agents or officials must be properly identified and accurately recorded.

To promote compliance with the FCPA, and similar anti-bribery laws, Assurant has an Anti-Corruption Policy. This policy provides additional information on the provisions of the FCPA; guidance on the hiring of third parties including "red flags" to look for in evaluating and selecting them; anti-corruption contract language to be included in contracts with these third parties; limits, required approvals and reporting requirements for gifts, travel and entertainment involving foreign government officials; and FCPA due diligence requirements for overseas mergers and acquisitions.

This policy and the accompanying guidance can be found on the Compliance intranet site. Officials and employees involved in the conduct and supervision of our overseas business activities must familiarize themselves with this policy and guidance, and should talk to the Legal Department or Compliance team about any questions or concerns.

Intellectual Property of Third-Parties

It is Assurant's policy not to infringe upon the intellectual property rights of others. Whether preparing advertising or promotional materials using the name or printed materials of another company, or operating a software program on an Assurant personal computer, you must ensure that the trademarks, copyrighted materials and other intellectual property of others are used properly and only with permission, and you can only copy documents and materials with permission or when those materials are not copyrighted. If you need guidance in this area, please contact the Legal Department.

Real life example

Q. You work overseas and have become friendly with some foreign government officials. As a thank you for being so hospitable, you want to give a watch to one of these officials. He has never promised to do anything in return. Can I do this?

A. You must follow the reporting and approval procedure for providing gifts to foreign government officials BEFORE making this gift. This will assure that we remain in compliance with the FCPA and any relevant local laws. This procedure can be found in the Anti-corruption Policy on the Compliance intranet site.

Audits and Investigations

From time to time, Assurant will be subject to audits, investigations and examinations by regulators. Also, audits are routinely conducted by Risk and Advisory Services and by our external auditors, and internal investigations can be conducted by the Legal, Compliance, Risk Advisory Services (RAS), or Human Resources Department. You must cooperate fully and honestly with these inquiries, and you may not do anything to mislead or improperly influence the review. If you receive a request for information or notice of an investigation from a government agency, you must immediately notify the Legal Department.

Waivers of the Code

Waivers or exceptions to the Code will be granted only under exceptional circumstances. All waivers or exceptions require prior, written approval by your manager and the Chief Compliance Officer.

Only the Assurant Board of Directors may grant waivers of compliance with the Code to the CEO, CFO, principal accounting officer, controller or persons performing similar functions. Any such waivers that are granted will be disclosed promptly and in accordance with all applicable laws and regulations, including those of the Securities and Exchange Commission and the New York Stock Exchange.

Supplemental Standards for Chief Executive Officers and other Senior Financial Officers of Assurant

In addition to complying with all policies included in the Assurant Code of Ethics, the chief executive officer, principal financial officer and controller or principal accounting officer, or persons performing similar functions (the "Financial Officers") of Assurant, Inc., Union Security Life Insurance Company of New York, Union Security Insurance Company, Assurant Employee Benefits, Assurant Solutions, Assurant Specialty Property, and Assurant Health must comply with the following supplemental ethical standards:

Integrity and Accuracy of Public Disclosures

The Financial Officers shall take all reasonable steps to provide full, fair, accurate, timely and understandable disclosures in the reports and documents that Assurant, Inc., Union Security Life Insurance Company of New York and Union Security Insurance Company file with or submit to the Securities and Exchange Commission and in other public communications made by these businesses. In the event that a Financial Officer learns that any such report, document or communication does not meet this standard and the deviation is material, then such officer shall review and investigate such deviation, advise the Board of Directors of Assurant, Inc. or the Audit Committee of the Board of Directors regarding the deviation and, where necessary, revise the relevant report, document or communication.

Our Personal Commitment

Once a year, we will ask each Assurant employee, officer and director to record an individual commitment to compliance with this Code. You will be asked to certify your understanding of and compliance with the Code.

As you work on behalf of Assurant throughout the year, we urge you to discuss any questions and concerns before you take an action that may be inconsistent with our values, ethical standards, this Code, and other Assurant policies and procedures. You are always free to discuss our values and ethical standards with management at all levels of the organization, and to contact the Compliance team at any time.

Your actions make a difference--it is due to the honesty and integrity of our employees that give Assurant its excellent reputation for having the highest ethical standards and business practices. We thank each of you for living the Assurant values and continuing our commitment to excellence.

A Final Thought

Our reputation starts with you. Strong company performance has its roots in the ethical behavior of every member of the Assurant community; it is up to each and every one of us to ensure that Assurant operates according to our ethical standards at all times. If you ever have any doubt about what the right decision is or are concerned that a possible violation is occurring, immediately ask for help. Asking for help is a leadership strength.

If you ever feel pressured to act in a way that conflicts with the Code, talk with your manager, Human Resources, the Compliance team or report your concern through any of our reporting tools. You need not fear retaliation. We will not tolerate any retaliation against anyone who makes a report in good faith.

Thank you for your personal commitment to maintain and build our reputation.

"Motivation is what gets you started. Habit is what keeps you going." -- *Jim Rohn*

CHAPTER 14 ROLES AND RESPONSIBILITIES OF NON-BOARD PARTICIPANTS IN CORPORATE GOVERNANCE

*2-14 Corporate Governance: Law and Practice § 14.01***AUTHOR:** John F. Olson Ari B. Lanin**§ 14.01 The CEO, the CFO and other Members of Senior Management****[1] The Role of Senior Management**

The state laws governing the organization and governance of corporations in the United States almost invariably provide that a corporation's business is to be managed by, or under the direction of, the company's board of directors.ⁿ¹ In practice, however, boards of directors do not manage their company's business and affairs on a day-to-day basis. Instead, day to day business operations are primarily run by the company's senior management team--a group that generally consists of the company's chief executive officer, chief financial officer and chief operating officer, among others.ⁿ² While public companies traditionally have vested responsibility in the CEO as leader of management rather than diffusing high-level responsibility among several individuals, with the passage of the Sarbanes-Oxley Act of 2002 and the continuing adoption of strengthened listing standards by self-regulatory organizations, these leadership responsibilities increasingly are shared among the CEO and the senior management team.ⁿ³ Though the board of directors reviews and approves general strategic objectives, it is this senior management team that is responsible for their development and implementation. Under the oversight and with the approval of the board, senior management, led by the CEO, also executes the company's plans, develops the budget and financial goals, assembles the management team, identifies and manages the risks inherent in operations and supervises the systems that allow for the production of financial statements that present the company's financial condition and give investors an understanding of the company's business, financial soundness and risks.ⁿ⁴ As such, it is the senior management team, led by the CEO and CFO, that drives the company's business performance. Given this centralized leadership structure, the senior management team should be vigilant in setting a strong, positive "tone at the top" that will establish and maintain a corporate culture of integrity, ethical behavior and legal compliance.ⁿ⁵

Because concentration of day-to-day control in senior management may, in certain situations, give rise to conflicts of interest and other problems, senior executives should endeavor to involve themselves personally in the promotion of ethical company values and responsible behavior, be faithful to the interests of investors and act with ability and integrity.ⁿ⁶ Senior executives should be committed to making long term shareholder value their top priority and remain cognizant of activities that could impair their company's reputational capital.ⁿ⁷ Senior management also has primary responsibility to put into place and review and evaluate periodically suitable codes of conduct and ethics applicable to

all employees, to respond swiftly to ethical violations with appropriate disciplinary action and to revise codes of conduct and ethics from time to time as appropriate to comply with new laws and to accommodate any changes in the company's structure.ⁿ⁸

To enhance corporate governance, senior executives should consider establishing a system that rewards employees for achieving articulated governance goals, while recognizing that good governance is far more than a "check the box" list of minimum board and management policies and duties.ⁿ⁹ A successful governance system involves principled goal setting, effective decision making and diligent monitoring of performance and compliance by the management team. Only through a "vibrant and responsive structure," can the senior management team effectively respond to changing circumstances within a framework of solid corporate values, so as to provide long-term value to shareholders.ⁿ¹⁰

In consultation with the board of directors and the audit committee, CEOs, CFOs and other senior management members must also be mindful of the high level of legal and investor scrutiny of controls and risk management. Thus, in addition to setting a strong ethical "tone at the top" and maintaining and enforcing effective codes of conduct, management teams must assess, establish and maintain carefully considered company programs in the following areas, among others:

- internal controls to cause assets to be adequately safeguarded and to help assure the collection and evaluation within the corporation and dissemination to shareholders and others of accurate financial information;
- disclosure controls and procedures designed to ensure accurate reporting up within the corporation and dissemination, as appropriate, to shareholders and others of material information; and
- company-wide integrated risk identification and management.ⁿ¹¹

CEOs, CFOs and other senior management members should also consider how to best work with their boards of directors and compensation committees to promote and effect sound compensation systems that reduce incentives toward excessive risk taking.ⁿ¹²

Effective operation of these programs will enable senior management, the board of directors and the audit committee to understand better the risks taken in the course of carrying out the business and the company's existing compliance and corporate governance issues.ⁿ¹³ It will also help to provide early warning of, and the opportunity to manage effectively, potential problems, and enable the CEO, CFO and the outside auditors to provide required certifications and disclosures.ⁿ¹⁴

[2] The Chief Executive Officer

Within the senior management team, public corporations in the United States "have traditionally vested responsibility in the chief executive officer as the leader of management, rather than diffusing high level responsibility among several individuals."ⁿ¹⁵ The selection, compensation and evaluation of a highly qualified and ethical CEO may thus be the single most important function of a company's board of directors.ⁿ¹⁶ The requirements for an effective CEO vary depending upon the nature, size and type of his or her business and industry. For example, in larger, public corporations, the CEO's responsibilities may focus primarily on setting the overall direction and policy of the company, while in smaller organizations, the CEO also acts as more of a day-to-day manager. Regardless of the type of entity, with the support of the senior management team, the CEO implements the company's strategy and business plan and identifies and enhances the company's management team. The CEO should also have an effective and ongoing relationship with the board of directors (and its chair or lead or presiding director) and a deep, working knowledge of the company's industry and managerial experience that suits the requirements of his or her organization, as well as a willingness to lead his or her company and adapt to the changing needs of the marketplace.

The CEO is also the most important figure in setting an appropriate "tone at the top." As former Federal Reserve Board Chairman Alan Greenspan said, "the state of corporate governance to a large extent reflects the character of the CEO."¹⁷ Because of the CEO's position of power and control, operating the company in an ethical and effective manner is a primary responsibility.¹⁸ He or she should take definitive steps to help all employees understand and abide by the corporation's rules of ethical conduct and make compliance with the law and the company's own standards an explicit part of each employee's annual review as "prevention is the best cure for malfeasance."¹⁹ And of course, the CEO should not place personal interests, whether financial or non-financial, before those of the company and its shareholders.²⁰

With respect to compliance and reporting obligations, the CEO should be committed to maintaining adequate controls to produce accurate financial reports and other material information effectively for the investing public, while complying with the array of applicable securities laws and regulations. This entails effective coordination with the company's board of directors and audit committee, general counsel, CFO, internal audit team and outside auditors.

As further discussed in § 14.02 below, the Sarbanes-Oxley Act, the rules thereunder adopted by the SEC and the related rules of self-regulatory organizations (SROs) have made these and other requirements of the CEO express. CEOs and CFOs are specifically obligated to:

- provide the certification required under Section 302 of the Sarbanes-Oxley Act and accordingly establish, maintain and evaluate the effectiveness of disclosure controls and procedures and internal control over financial reporting;²¹ and
- provide the certification required by Section 906 of the Sarbanes-Oxley Act.²²

Additionally, pursuant to the NYSE Listed Company Manual rules, CEOs of companies with securities listed on the NYSE must annually certify to the NYSE that they are not aware of any violation by their company of NYSE corporate governance listing standards.²³

[3] The Chief Financial Officer

With the aid of the other members of senior management, the internal audit team, the external auditor and the audit committee, the chief financial officer is responsible for the company's publicly filed financial statements and the creation, implementation and evaluation of company financial plans. It is the CFO's job to direct the production of high-quality financial reports that present objective, consistent and reasonably understandable statements of the company's financial results and condition and to oversee internal controls, record keeping, tax reporting and cash and investment management.²⁴ To this end, an effective CFO should have knowledge and experience in the implementation of internal controls, accounting rules, operating requirements, bookkeeping and budgeting.

The Sarbanes-Oxley Act and the SEC's related rules focused public and regulatory scrutiny on financial reporting and disclosure, substantially transforming the role and responsibilities of the CFO.²⁵ The CFO, like the CEO, now is legally obligated to participate in the establishment, maintenance and evaluation of his or her company's disclosure controls and procedures and internal control over financial reporting, to assess and report on the effectiveness of internal control over financial reporting, and to certify as to these controls and procedures and the information presented in the company's periodic reports.²⁶

(n4)Footnote 4. *See* Business Roundtable, Principles of Corporate Governance 10 (Nov. 2005).

(n5)Footnote 5. *See* Business Roundtable, Principles of Corporate Governance (Nov. 2005). In its Principles of Corporate Governance, a comprehensive discussion of recommended corporate governance practices, the Business Roundtable, an association of CEOs of leading corporations, continues to suggest that the "tone at the top" establishes and communicates a culture of integrity and legal compliance for personnel throughout the corporation. The United States General Accounting Office (GAO), in its Corporate Governance, Transparency and Accountability Forum took a similar position, explaining that the integrity and competency of top management, or the "tone at the top," is critical to an entity's ultimate success and to restoring public trust and confidence in the market that can be sustained over the long-term. *See* General Accounting Office, Highlights of GAO's Corporate Governance, Transparency and Accountability Forum, GAO-02-494SP (Mar. 2002); *see also* General Accounting Office, Challenges to Restore Public Confidence in U.S. Corporate Governance and Accountability Systems, GAO-03-419SP (Jan. 2003). In the days leading to the enactment of the Sarbanes-Oxley Act of 2002, President George W. Bush also expressed that "reform should begin with accountability, and reform should start at the top. The chief executive officer has a daily duty to oversee the entire enterprise, the entire firm, and therefore, bears a unique responsibility for serving shareholder interests." George W. Bush, *Remarks By the President at Malcom Baldrige National Quality Award Ceremony* (Mar. 11, 2002, Monday). *See also* Committee of Sponsoring Organizations of the Treadway Commission, Internal Control--Integrated Framework (1992).

(n19)Footnote 19. The Conference Board, *Commission on Public Trust and Private Enterprise, Findings and Recommendations* 24 (2003). Compliance and ethics programs are discussed in §14.06 below.

(n20)Footnote 20. One area of potential conflict that is not always recognized involves interlocking directorships. A CEO should consider whether sitting on the board of his or her director's company is in the best interest of the CEO's company. Such interlocking arrangements can, in some circumstances, give the appearance of cronyism, or worse, collusion--both of which may be damaging to the CEO's company. *See* Joe D. Goodwin, *10 Guidelines Board Members Should Follow To Be Effective In Their Duty To Shareholders*, Business Wire (June 19, 2002), at 1. Note also that

Section 8 of the Clayton Act prohibits an individual from simultaneously serving as an officer or director of competing corporations that each have combined capital, surplus, and undivided profits in excess of \$26,161,000. *See 15 U.S.C. § 19(a)(1)*; 71 Fed. Reg. 1688-01 (Jan. 13, 2009). CEOs should also limit their service on other boards to a number which does not conflict with applicable self-regulatory organization (SRO) listing standards. For example, the commentary to Section 303A.07 of the NYSE Listed Company Manual provides, "if an audit committee member simultaneously serves on the audit committee of more than three public companies, and the listed company does not limit the number of audit committees on which its audit committee members serve to three or less, then in each case, the board must determine that such simultaneous service would not impair the ability of such member to effectively serve on the listed company's audit committee and disclose such determination in the listed company's annual proxy statement or, if the company does not file an annual proxy statement, in the company's annual report on Form 10-K filed with the SEC." *See NYSE Listed Company Manual § 303A.07(a) Commentary.*

CHAPTER 14 ROLES AND RESPONSIBILITIES OF NON-BOARD PARTICIPANTS IN CORPORATE GOVERNANCE

2-14 Corporate Governance: Law and Practice § 14.02

AUTHOR: John F. Olson Ari B. Lanin

§ 14.02 CEO and CFO Certifications, Disclosure Controls and Procedures and Internal Control Over Financial Reporting

[1] Overview

Pursuant to Sections 302 and 906 of the Sarbanes-Oxley Act, chief executive officers and chief financial officers (or persons performing similar functions) of issuers are required to certify as to the accuracy of the periodic reports (including financial information) with which such certifications are filed, as to the CEO's and CFO's responsibilities relating to disclosure controls and procedures and internal control over financial reporting and as to whether fraud involving key employees has been communicated to the company's auditors and audit committee.ⁿ¹ By obligating CEOs and CFOs to review periodic reports, make these certifications and establish, maintain and evaluate their companies' disclosure controls and procedures and internal control over financial reporting,ⁿ² the SEC's rules under Sections 302 and 906 of the Sarbanes-Oxley Act in effect, require CEOs, CFOs and their companies to adhere to minimum corporate governance standards.ⁿ³

Specifically, Section 906, a criminal provision, requires CEOs and CFOs to certify that periodic reports filed with the SEC containing financial statements "fully compl[y] with the requirements of section 13(a) or 15(d) of the [1934 Act] and that information contained in [such] periodic report[s] fairly presents, in all material respects, the financial condition and results of operations of the issuer."ⁿ⁴ Section 302 and the related rules adopted by the SEC require each of the CEO and CFO to certify as to their review of the periodic report to which the certification is attached and as to the establishment, maintenance and evaluation of disclosure controls and procedures and internal control over financial reporting.

In addition to requiring CEOs and CFOs to make the statements required in the Section 302 certifications, and in order to enable CEOs and CFOs to make such statements, the SEC's rules require issuers to, with respect to disclosure controls and procedures:

- "maintain disclosure controls and procedures;"ⁿ⁵ and

- have management "evaluate, with the participation of [the CEO and CFO], the effectiveness ... of the issuer's disclosure controls and procedures, as of the end of each fiscal quarter."⁶

With respect to internal control over financial reporting, the SEC's rules require issuers to:

- "maintain ... internal control over financial reporting;"⁷ and
- have management "evaluate, with the participation of [the CEO and CFO], the effectiveness of the issuer's internal control over financial reporting ... [and] any change in the issuer's internal control over financial reporting, that occurred during each of the issuer's fiscal quarters ... that has materially affected, or is reasonably likely to affect materially the issuer's internal control over financial reporting."⁸

Further, issuers must include in each quarterly and annual report filed with the SEC, the following *complementary* disclosure relating to disclosure controls and procedures and internal control over financial reporting:⁹

- the CEO's and CFO's conclusions regarding the effectiveness of disclosure controls and procedures as of the end of the period covered by the report;¹⁰
- whether there have been any changes in internal control over financial reporting that occurred during the prior fiscal quarter that have materially affected, or are reasonably likely to affect materially internal control over financial reporting;¹¹

Additionally, pursuant to Sections 302 and 404 of the Sarbanes-Oxley Act and the rules adopted by the SEC thereunder, issuers must include in their annual reports a report of management and a related report of the outside auditor on internal control over financial reporting.¹²

These requirements have significantly increased management's (in particular, the CEO's and CFO's) responsibility for, and involvement with, the procedures through which companies implement controls and disclose information to the public. Although the CEO and CFO may rely on others involved in the disclosure process to provide backup certifications, collect and analyze the information required for SEC reports, and draft the reports that are filed with the SEC,¹³ they should be directly involved in monitoring the processes that generate the information and reports, and they must review and have a basis to certify before filing.¹⁴

[2] The Section 302 Certification, Disclosure Controls and Procedures, and Internal Control Over Financial Reporting

[a] The Section 302 Certification

The rules adopted by the SEC pursuant to Section 302 of the Sarbanes-Oxley Act require the CEO and CFO to certify to the following in each quarterly and annual report (including transition reports) filed or submitted to the SEC under Section 13(a) or 15(d) of the 1934 Act:¹⁵

- he or she has reviewed the report;
- based on his or her knowledge the report accompanying the certification "does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by [the] report";¹⁶
- based on his or her knowledge "the financial statements, and other financial information included in

[the] report, fairly present¹⁷ in all material respects the financial condition, results of operations and cash flows¹⁸ of the registrant as of, and for, the periods presented in [the] report";

- as to disclosure controls and procedures:

- the CEO and CFO "are responsible for establishing and maintaining disclosure controls and procedures";

- the CEO and CFO have "[d]esigned such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under [their] supervision, to ensure that material information ... is made known to [them] ... particularly during the period in which [the] report is being prepared";

- the CEO and CFO have "[e]valuated the effectiveness of the registrant's disclosure controls and procedures and presented in [the] report [their] conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by [the] report ...";

- as to internal control over financial reporting:

- the CEO and CFO "are responsible for establishing and maintaining ... internal control over financial reporting";

- the CEO and CFO have "[d]esigned such internal control over financial reporting, or caused such internal control over financial reporting to be designed under [their] supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with [GAAP]";¹⁹

- the CEO and CFO have "[d]isclosed in [the] report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting"; and

- the CEO and CFO have "disclosed, based on [their] most recent evaluation of internal control over financial reporting [which must be as of the end of each fiscal year], to the registrant's auditors and the audit committee:

- (a) [a]ll significant deficiencies and material weaknesses²⁰ in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

- (b) [a]ny fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting."

The Section 302 certifications are contained in Item 601(b)(31) of Regulation S-K and must be in the exact form set forth therein. No alteration may be made, "even if the change would appear to be inconsequential in nature."²¹ The certifications must be attached as an exhibit to the reports to which they relate.²² The Section 302 certification may not be signed pursuant to a power of attorney or other form of confirming authority.²³

[b] Penalties

The Section 302 certification adds to the potential liabilities CEOs and CFOs otherwise face as signatories to annual and quarterly reports.ⁿ²⁴ The certification exposes CEOs and CFOs to an increased likelihood of being *personally* targeted as defendants in shareholder suits under Section 10(b) of the 1934 Act, as well as derivative suits if matters turn out to be different than as certified.ⁿ²⁵ Additionally, certifying officers providing false certifications subject themselves and others to potential SEC action and even criminal liability for violating the 1934 Act and the rules thereunder.ⁿ²⁶

[c] Disclosure Controls and Procedures**[i] What Are Disclosure Controls and Procedures?**

The rules adopted pursuant to Section 302 of the Sarbanes-Oxley Act require issuers that file reports under Sections 13(a) or 15(d) of the 1934 Act to establish, maintain and evaluate the effectiveness of an overall system of "disclosure controls and procedures."ⁿ²⁷ Though related, these controls and procedures are different from the "internal control over financial reporting" that relates to an issuer's financial reporting and control of its assets.ⁿ²⁸ Disclosure controls and procedures are: (a) controls and procedures "designed to ensure that information required to be disclosed in [1934 Act reports] is recorded, processed, summarized and reported within the time periods specified in the [SEC's] rules and forms" and include (b) "controls and procedures designed to ensure that information required to be disclosed by an issuer in [its 1934 Act reports] is accumulated and communicated to the issuer's management [(including its CEO and CFO)] ... as appropriate to allow timely decisions regarding required disclosure."ⁿ²⁹

While disclosure controls and procedures overlap with internal control over financial reporting, there are "elements of disclosure controls and procedures that are not subsumed by internal control over financial reporting" and there are "elements of internal control that are not subsumed by the definition of disclosure controls and procedures."ⁿ³⁰ Disclosure controls and procedures should cause timely collection and evaluation of all information (including financial information) potentially subject to disclosure under the requirements of Regulation S-X or Regulation S-K and Forms 20-F and 40-F, as applicable.ⁿ³¹ They should capture information relevant to an assessment of the need to disclose developments and risks that pertain to the issuer's business, and information that must be evaluated in the context of the disclosure requirement of 1934 Act Rule 12b-20.ⁿ³²

[ii] Compliance With the Rules Regarding Disclosure Controls and Procedures

The SEC's rules regarding the establishment, maintenance and evaluation of and disclosure relating to disclosure controls and procedures are found in 1934 Act Rules 13a-15, 15d-15 and Items 307 and 601 of Regulation S-K. Taken as a whole, these rules require the following actions to be taken (in addition to the provision of the certification required under Section 302):

- the issuer must maintain disclosure controls and procedures;ⁿ³³
- the CEO and the CFO must be responsible for establishing and maintaining disclosure controls and procedures;ⁿ³⁴
- the CEO and the CFO must design disclosure controls and procedures (or cause them to be designed under their supervision) to ensure that material information is made known to them, particularly during the period in which the periodic report is being prepared;ⁿ³⁵
- management must evaluate (with the participation of the CEO and CFO) the effectiveness of the issuer's disclosure controls and procedures as of the end of each fiscal quarter;ⁿ³⁶ and

- the conclusions of the CEO and CFO regarding the effectiveness of the disclosure controls and procedures (based on the evaluation) must be disclosed in each periodic report.ⁿ³⁷

[iii] *Developing Disclosure Controls and Procedures*

As discussed above, an issuer's management (including the CEO and CFO) is required to evaluate the effectiveness of the design and operation of disclosure controls and procedures on a quarterly basis, as of the end of the period covered by the report accompanying the certification required by Section 302 of the Sarbanes-Oxley Act.ⁿ³⁸ The SEC has neither prescribed a specific way in which this evaluation should be undertaken nor discussed whether the scale of the review for annual reports should be different than the scale of the review for quarterly reports. The SEC, however, issued guidance that sets forth an approach by which management can conduct a top-down, risk-based evaluation of internal control over financial reporting which would, if the evaluation complied with the guidance, satisfy the evaluation requirements of Exchange Act Rules 13a-15(c) and 15d-15(c).ⁿ³⁹ It is important to note, however, that the guidance is permissive, not mandatory, and that the SEC stressed the importance of management applying a top-down, risk and principle based approach to performing the evaluation over a rote "check-the-box" mechanism. Additionally, although the certification requirements only apply to annual and quarterly reports, a properly designed disclosure controls and procedures system should address all SEC disclosures, including current reports on Form 8-K (which require reporting within four business days of the triggering event), proxy statements and press releases.

While no particular system of disclosure controls and procedures is required by Section 302 or the rules thereunder, the evaluation should at a minimum address the matters specified by the rules.ⁿ⁴⁰ As such, disclosure controls and procedures should allow material information to be presented to the CEO and CFO, particularly during the period in which the periodic report is being prepared. Outside of this, companies should consider developing and maintaining company specific processes that are consistent with their business and internal management and supervisory practices. Companies should consider taking the following steps:

- *Evaluate Current Disclosure Controls and Procedures.* Because the SEC has not mandated the implementation of a particular set of disclosure controls and procedures, CEOs and CFOs may employ those controls and procedures that best suit their company (though CEOs and CFOs should be mindful of the SEC guidance referenced above). The CEO, CFO and other members of senior management must evaluate current disclosure controls and procedures, and in turn, should decide whether those controls and procedures are effective. The circulation, reliability and timeliness of information produced should be considered. The level of involvement of various officers and committees should also be considered, as well as an analysis of the company's current and future business and financial goals.
- *Identify Responsible Parties.* The business units and individuals involved in the disclosure process should be identified and documented. The assessment of responsible parties should be based on a consideration of the organization of a company's business and the applicable disclosure requirements.
- *Establish a Disclosure Committee or Informal Disclosure Group.* The SEC recommends that issuers create committees to consider the materiality of information, determine disclosure obligations on a timely basis and report obligations and information to senior management.ⁿ⁴¹ While the establishment of a disclosure committee is not legally required, many companies have established such committees. Committees can assist companies with focusing, enhancing and monitoring the disclosure process. Though various structures can be effective, companies should consider having the general counsel (or other senior in-house attorneys that deal with disclosure issues), the controller (and assistant controller, as applicable) and others responsible for assembling information to be disclosed in public filings sit on the disclosure committee. It also may be beneficial for other individuals knowledgeable about the corporation's primary business units to serve on the committee.ⁿ⁴² Committees may interface with operating unit heads, as appropriate. Committee members should brief the CEO, the CFO and those other

members of the senior management team "who bear express responsibility for designing, establishing, maintaining, reviewing and evaluating the issuer's disclosure controls and procedures."ⁿ⁴³ In addition to specific disclosure items, disclosure committees can focus on the following issues:

- whether there exist any issues or known risks that may be considered important or material;
- whether anything has occurred during the quarter that causes concern for the head of operating units; and
- whether any accounting issues have been addressed by and discussed with the outside auditors.

Disclosure committees also can establish training programs to help applicable company employees gain an understanding of what types of information may need to be disclosed.ⁿ⁴⁴

■ *Recognize the Need for Real-Time Disclosure.* Public companies are now required to disclose on Form 8-K a variety of developments (some of which previously had been disclosed on Forms 10-Q and 10-K) within four business days of the triggering event. Companies should structure their disclosure controls in light of this four-day reporting requirement, and determine whether a small group or sub-committee should be formed to process information quickly so as to facilitate prompt and timely Form 8-K reporting.

■ *Document Responsibilities.* Establishing a time and responsibility chart for the disclosure process can be useful in developing effective disclosure controls and procedures. The chart should assign principal responsibility for both recording and collecting the information that forms the basis for public disclosures and drafting and circulating the various sections of documents filed with the SEC. The chart should also provide for the evaluation of the effectiveness of disclosure controls and procedures (which must involve supervision and participation by management, including the CEO and CFO) and a review by the CEO and CFO of the periodic reports themselves. Disclosure controls and procedures should also themselves be documented as a formal, documented disclosure procedure is likely to be more efficient than an informal or casual process. Issuers should also consider establishing procedures to collect and retain documentation supporting each of the reports to be certified.

■ *No Selective Disclosure.* Those responsible for disclosure decisions should approve the scope, context and format of disclosure and provide information to the marketplace that is reasonably consistent in tone and presentation (regardless of whether such information is included in SEC filings, press releases or analyst conferences). Inconsistent presentation could result in liability to the company and its officers and directors.ⁿ⁴⁵

■ *Use Backup Certifications.* Many companies have those who oversee operations critical to the company's disclosure procedures deliver signed certifications in support of the CEO's and CFO's mandatory certifications. The backup certifications should be similar in structure to the actual certifications required under the rules, but limited to each individual's area of responsibility. Backup certifications should be drafted carefully, and with an understanding of the responsibilities of their ultimate signatory. Those responsible for divisions or units of the company may not be able to assess accurately overall materiality given their perspective of company affairs.

■ *Design a Scalable System.* In developing disclosure controls and procedures, management should recognize that the procedures employed should be scalable and capable of growing with the company.

■ *Involve the Internal Auditors and Audit Committee.* Internal audit teams (or units performing a similar function) should report information pertaining to disclosure controls and procedures to the CEO and CFO.ⁿ⁴⁶ CEOs and CFOs also generally discuss the company's disclosure controls and procedures with the audit committee (in addition to any discussion with the audit committee regarding internal control over financial reporting).ⁿ⁴⁷

■ *Plan Ahead.* Issuers should consider a "top-down" approach whereby the CEO and CFO assemble those who are involved in the preparation of reports early in the process, especially with the prospect of accelerated reporting deadlines for periodic reports. The CEO and CFO might consider meeting each quarter to discuss what they believe are the important business results, uncertainties and critical accounting issues for that quarter. Employing this type of system can save time and result in improved disclosure.

[d] Internal Control Over Financial Reporting

[i] What Is Internal Control Over Financial Reporting?

The SEC rules adopted pursuant to Sections 302 and 404 of the Sarbanes-Oxley Act require issuers that file reports under Sections 13(a) or 15(d) of the 1934 Act to establish, maintain and evaluate internal control over financial reporting.ⁿ⁴⁸ The certification required by Section 302 enhances the interaction between management (including the certifying officers), the audit committee and outside auditor by requiring the CEO and CFO to disclose to the audit committee (i) all significant deficiencies and material weaknessesⁿ⁴⁹ in the design or operation of internal control over financial reporting and (ii) any fraud involving management or other employees who have a significant role in the company's internal control over financial reporting, and also identify for the outside auditor any material weaknesses in internal control over financial reporting.ⁿ⁵⁰ Insofar as the CEO and CFO are required to discuss and certify as to internal control over financial reporting, they should have a strong grasp of the procedures and information captured within the definition of that term. Together with the other members of senior management, they should gain an understanding of what it means to have effective internal control over financial reporting.

Internal control over financial reporting is defined in 1934 Act Rules 13a-15(f) and 15d-15(f) as:

a process designed by, or under the supervision of, the issuer's principal executive and principal financial officers ... and effected by the issuer's board of directors, management and other personnel, to provide reasonable assuranceⁿ⁵¹ regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with [GAAP] and includes those policies and procedures that:

- (1) Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the issuer;
- (2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with [GAAP], and that receipts and expenditures of the issuer are being made only in accordance with authorizations of management and the directors of the issuer; and
- (3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the issuer's assets that could have a material effect on the financial statements.ⁿ⁵²

The SEC definition of internal control over financial reporting encompasses a subset of the "internal controls" addressed by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).ⁿ⁵³

[ii] *Evaluating Internal Control Over Financial Reporting*

Since their adoption, Section 404 of the Sarbanes-Oxley Act and the SEC's related internal control over financial reporting rules have engendered considerable controversy and attention. Public companies have expressed concern over the significant time, costs and resources required to establish, maintain and review a system of internal control over financial reporting.ⁿ⁵⁴ Outside auditors have in no small part contributed to escalating costs as they have been required to expend numerous hours poring through their clients' control systems and documentation--in many cases for the first time. The significance of the undertaking was underscored by the inability of scores of issuers to file their annual reports on Form 10-K with the SEC on a timely basis during the first year of Section 404 compliance.ⁿ⁵⁵ Sensitive to the burden imposed by Section 404 compliance, the SEC has regularly solicited input from the business community on how best to satisfy the Sarbanes-Oxley mandates in an efficient and cost effective manner.ⁿ⁵⁶ The adoption in 2007 of Auditing Standard No. 5 by the PCAOB and the near-simultaneous issuance by the SEC of interpretive guidance designed to assist companies in completing top-down, risk-based evaluations of internal control over financial reporting represent the most recent attempt by the two regulatory to meet that goal, and augmented guidance provided in SEC policy statements in May of 2005.ⁿ⁵⁷

To help address Section 404 compliance issues and to help streamline the internal control evaluation process, in May 2005 the SEC and its Division of Corporation Finance issued policy statements regarding the implementation of internal control reporting requirements.ⁿ⁵⁸ These statements provide that to help increase the efficiency of the Section 404 process, senior management should consider the following concepts in establishing internal control over financial reporting.

- *Employ a "Top-Down", Risk-Based Approach.* The SEC has repeatedly directed management to employ a "top-down", risk-based approach in designing internal control over financial reporting. As such, the creation of internal control over financial reporting should begin with a focus on entity level controls (including the "tone at the top" and company wide programs such as codes of conduct and fraud prevention) and proceed through an analysis of significant processes to individual controls. This type of approach is likely to strengthen controls and communication where necessary, and discourage unnecessary expense with respect to lower risk areas.
- *Customize the Establishment of Controls.* Though there are common controls that must be implemented in all companies, the overall system of internal control over financial reporting, if it is to be effective, cannot amount to a "check the box" approach. In establishing a control environment, the structure and size of the company, the responsible personnel and the nature of the risks the company is exposed to, must all be taken into account.
- *Strengthen Disclosure Controls - Effective Communication is Key.* While internal control over financial reporting and disclosure controls and procedures are not completely subsumed within one another,ⁿ⁵⁹ strengthening disclosure controls and procedures will help disclosable financial information flow through the entity between senior financial officers, the audit committee (and a disclosure committee, if any) the board of directors and the CEO and CFO. An effective system of disclosure controls and procedures is likely to increase the reliability of financial information and help cause such information to be thoroughly and properly evaluated before its ultimate release. The SEC (and the PCAOB) has encouraged management, the audit committee and the outside auditor to communicate openly regarding financial reporting issues.ⁿ⁶⁰ According to the SEC, "[i]nvestors benefit when auditors and management engage in dialogue, including regarding new accounting standards and the appropriate

accounting treatment for complex or unusual transactions."⁶¹ Aside from explicitly required communications, "[b]oth common sense and sound policy dictate that communication must be ongoing and open in order to create the best environment for producing high quality financial reporting and auditing; communications must not be so restricted or formalized that their value is lost."

- *Involve the Audit Committee.* ⁶² The audit committee's participation in establishing and strengthening internal control over financial reporting procedures should include everything from selecting an outside auditor that suits the company, its industry and its control environment to discussing the financial statements and the existence and scope of significant deficiencies and material weaknesses in internal control over financial reporting (including the CEO and CFO). In particular, the SEC "encourage[d] frequent and frank dialogue among management, auditors and audit committees with the goal of improving internal controls and the financial reports upon which investors rely."⁶³

- *Document Controls.* Companies' management, including the CEO and the CFO, should focus their attention on documenting and assessing the effectiveness of their company's internal control structure and procedures for financial reporting. Outside auditors will not be able to gain an understanding of, or assess the effectiveness of and recommend improvements to, their audit clients' system of internal control over financial reporting until controls have adequately been documented by their clients.

In addition to the policy statements described above (regarding management's implementation of internal control over financial reporting), on June 20, 2007 the SEC released interpretive guidance for management to use in conducting its annual evaluation of internal control over financial reporting (required by the rules under Section 404 of the Sarbanes-Oxley Act).⁶⁴ The guidance does not provide a step-by-step roadmap for management to evaluate internal control over financial reporting, nor does it provide a checklist. Rather, the SEC's guidance is principles based and invokes a "top-down", risk-based focus, allowing management to scale its evaluation to fit the facts and circumstances of their companies. The SEC's guidance covers four key areas:

- *Identifying Risks.* The SEC's interpretive management guidance provides that in its evaluation process, management should focus on identifying areas of material risks to financial reporting and controls for addressing these risks. The management guidance urges management to use its judgment in identifying areas where there could be material misstatements and in evaluating related controls to see if the controls address these risks. The management guidance also emphasizes that management does not need to evaluate all controls in a process; rather, management should focus on identifying and evaluating those controls that in its judgment address the risk of material misstatements in financial statements. The SEC also closely aligned its management guidance with the PCAOB's Auditing Standard No. 5 with respect to evaluating whether controls adequately address financial reporting risks, the factors to consider when identifying financial reporting risks and the factors for assessing the risk associated with individual financial reporting elements and controls.

- *Identifying and Evaluating Operation of Controls.* The management guidance provides that once the relevant controls are identified, management should align its evaluation methods so that they are focused on analyzing those areas that present the highest risk to reliable financial reporting. The management guidance includes examples of ways that management can substantiate its evaluation; this aspect of the guidance is designed in part to limit the amount of testing that management is required to undertake. The guidance also includes an expanded discussion of entity-level controls and how these controls should be designed and evaluated.

- *Reporting the Results of Management's Evaluation.* The SEC's management guidance includes examples of what are strong indicators of a material weakness. These indicators have been aligned with those found in the PCAOB's Auditing Standard No. 5.

- *Documentation.* The SEC's management guidance indicates that management should take steps to evaluate whether reasonable documentation is maintained with respect to those controls that form the basis for management's evaluation. The guidance expresses that there is no prescribed form of documentation and that management should use its judgment as to the form and extent of documentation maintained.n65

Though the SEC has indicated that there are various different ways for management to conduct its evaluation, following the SEC's management guidance will provide companies with a "safe harbor" under the 1934 Act.n66

[iii] Compliance With the Rules Regarding Internal Control Over Financial Reporting

The SEC's rules regarding the establishment, maintenance, evaluation of and disclosure relating to internal control over financial reporting adopted pursuant to Sections 302 and 404 of the Sarbanes-Oxley Act are found in 1934 Act Rules 13a-15, 15d-15 and Items 308 and 601(b)(31) of Regulation S-K, and the PCAOB's rules relating to internal control over financial reporting are found in Auditing Standard No. 5.n67 Taken together, these rules require the following actions to be taken (in addition to the provision of the certification required by Section 302):

- the issuer must establish and maintain internal control over financial reporting;n68
- the CEO and the CFO must be responsible for establishing and maintaining internal control over financial reporting and design internal control over financial reporting (or cause it to be designed under their supervision) to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with GAAP;n69
- the CEO and the CFO must disclose, based on their most recent quarterly evaluation of internal control over financial reporting, to the company's auditors and audit committee:
 - all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting;n70
- management must evaluate (with the participation of the CEO and CFO) any change in the issuer's internal control over financial reporting that occurred during each of the issuer's fiscal quarters and materially affected, or is reasonably likely to materially affect, the issuer's internal control over financial reporting and any such changes must be disclosed in Forms 10-Q and 10-K;n71
- management must evaluate (with the participation of the CEO and CFO) the effectiveness of the issuer's internal control over financial reporting as of the end of each fiscal year and include a report on internal control over financial reporting in each annual report;n72 and
- the outside auditor's report on internal control over financial reporting must be included in each annual report.n73

[iv] Management's Report on Internal Control Over Financial Reporting

As mentioned above, in addition to the establishment and evaluation of internal control over financial reporting,

pursuant to the rules of the SEC adopted under Sections 302 and 404 of the Sarbanes-Oxley Act, an issuer must include in each Form 10-K filed with the SEC a report of management on internal control over financial reporting.ⁿ⁷⁴ Each such report must include the following:

- a statement of management's responsibility for establishing and maintaining adequate internal control over financial reporting;
- a statement identifying the framework used by management to conduct its assessment of the effectiveness of the registrant's internal control over financial reporting;ⁿ⁷⁵
- an assessment of the effectiveness of internal control over financial reporting as of the end of the most recent fiscal year, including an explicit statement as to whether internal control over financial reporting is effective;ⁿ⁷⁶ and
- a statement that the registered public accounting firm that audited the financial statements included in the annual report issued an attestation report on the registrant's internal control over financial reporting."ⁿ⁷⁷

Issuers must also include the auditor's opinion as to the effectiveness of internal control over financial reporting.ⁿ⁷⁸ The outside auditors' opinions relating to internal control over financial reporting is discussed in §14.08[5] below.ⁿ⁷⁹

[e] Disclosure Required by Items 307 and 308 of Regulation S-K

The rules under Sections 302 and 404 of the Sarbanes-Oxley Act and the certification requirement under Section 302 of the Sarbanes-Oxley Act place general requirements on companies to establish, maintain and evaluate disclosure controls and procedures and internal control over financial reporting.ⁿ⁸⁰ Items 307 and 308 of Regulation S-K complement these rules and the related certification requirements by requiring companies to disclose management's evaluation of these governance items and the outside auditor's report on internal control over financial reporting.ⁿ⁸¹ Item 307 of Regulation S-K requires disclosure of the conclusions reached by the CEO and CFO in evaluating the effectiveness of the registrant's disclosure controls and procedures (based on their required evaluation).ⁿ⁸² Item 308 of Regulation S-K requires disclosure of management's annual report on internal control over financial reporting, a related report of the company's outside auditor and a statement as to whether any changes in internal control over financial reporting have occurred.ⁿ⁸³ Because these disclosure requirements obligate companies to present evaluations of controls and procedures to their investors, companies should be even more cognizant of the effectiveness and efficiency of such controls and procedures.ⁿ⁸⁴

[3] The Section 906 Certification

Section 1350 of Chapter 63, Title 18 of the United States Code (as amended by Section 906 of the Sarbanes-Oxley Act) requires any periodic report containing financial statements and filed with the SEC pursuant to Section 13(a) or 15(d) of the 1934 Act to be accompaniedⁿ⁸⁵ by a certification by the CEO and CFO. This Section 906 certification must state that:

- the periodic report containing the financial statements fully complies with the requirements of Section 13(a) or 15(d) of the 1934 Act; and
- the information contained in the periodic report fairly presents, in all material respects, the financial condition and results of operations of the issuer.ⁿ⁸⁶

In order to avoid falsely certifying as to the information contained in a periodic report, CEOs and CFOs should be

vigilant in confirming that effective systems of disclosure controls and procedures and internal control over financial reporting are in place.

Because Section 1350 is a criminal provision, criminal penalties can be imposed on CEOs and CFOs who provide false certifications. If the CEO or CFO provides a certification "knowing" the report it accompanies does not comport with the requirements of Section 1350, he or she may be fined up to one million dollars, imprisoned for up to ten years, or both.ⁿ⁸⁷ If the CEO or CFO provides a certification "willfully knowing" that the periodic report does not comport with Section 1350, the maximum fine is increased to five million dollars, and the maximum prison term to twenty years.ⁿ⁸⁸ Although the penalties for a false certification require a "knowing" or "willful" failure to comport with the requirements of Section 1350, the express language of the certification does not refer to the knowledge of the CEO or CFO (unlike the language of the Section 302 certification). The Department of Justice has confirmed that the certifying officer may qualify the certification to his or her knowledge, as knowledge is a necessary element of a criminal act of miscertification. Several companies have added knowledge or best knowledge qualifiers to Section 906 certifications.ⁿ⁸⁹

[4] Self-Regulatory Organization Certifications

On November 4, 2003, the SEC approved the NYSE's final proposed amendments to its Listed Company Manual. Included in the rules, as they have been subsequently amended, is Section 303A.12(a), a requirement that the CEO of any NYSE listed company certify to the NYSE that, as of the date of the certification, he or she is not aware of any violation by the company of any of the NYSE corporate governance listing standards. The rules require the certification to be disclosed in the company's annual report to shareholders, or if the company does not prepare an annual report to shareholders, in its annual report on Form 10-K.ⁿ⁹⁰ Complementing the certification requirement is Section 303A.12(b) which requires listed company CEOs to notify the NYSE promptly when an executive officer of the company becomes aware of any material non-compliance with a NYSE corporate governance listing standard. In 2005, the NYSE proposed additional changes to its corporate governance listing standards. Among the proposed changes were: (1) a proposal to eliminate the requirement that listed companies disclose in their annual reports that they have filed the NYSE corporate governance certification and the SEC certifications; and (2) a proposal to have CEOs notify the NYSE in writing promptly after any executive officer of the listed company becomes aware of *any* non-compliance (as opposed to requiring notification only in the event of a *material* non-compliance). The proposed rule changes do not become effective until they are approved by the SEC.

Companies with their securities listed on the Nasdaq Stock Market are required to have a duly authorized officer certify that the company is in compliance with Nasdaq's audit committee composition, audit committee charter, nominating committee charter, executive session and code of conduct requirements. Listed companies were required to submit this certification by the earlier of (i) the company's first annual stockholder meeting after January 15, 2004 and (ii) October 31, 2004. Foreign private issuers and small business issuers were permitted to submit the certification by July 31, 2005.ⁿ⁹¹ After the initial certification, an updated form need only be provided to the Nasdaq Stock Market if a change in the company's status has occurred causing the prior form to no longer be accurate.

FOOTNOTES:

(n1)Footnote 1. *See* Sarbanes-Oxley Act §§ 302 and 906, 15 U.S.C. § 7241 and 18 U.S.C. § 1350 (2007). Section 302(a) of the Sarbanes-Oxley Act directed the SEC to adopt rules requiring certification. Prior to adopting formally the certification requirements which are set forth in the 1934 Act Rules and Regulation S-K, on June 27, 2002, the SEC issued a one time order requiring CEOs and CFOs of public companies with revenues over \$1.2 billion to file certifications individually with the SEC on August 14, 2002. The SEC's Rules pursuant to the Sarbanes-Oxley Act were then initially adopted by the SEC in SEC Release No. 33-8124 (Aug. 29, 2002). These rules were subsequently amended concurrently with the SEC's adoption of rules relating to Section 404 of the Sarbanes-Oxley Act in SEC Release No. 33-8238 (June 5, 2003). Section 906 of Sarbanes-Oxley is itself an amendment to the United States Criminal Code. The certification requirements were a response to events such as the Congressional testimony of former Enron CEO Jeffrey Skilling who claimed to be ignorant of Enron's accounting details. Sarbanes-Oxley Act §§ 302, 404 and 906, and related implementing rules, are reproduced in Appendix E to this treatise. The certification requirements apply equally to issuers *required* to make filings under the 1934 Act and to issuers voluntarily filing reports, pursuant to an indenture covenant or otherwise.

(n2)Footnote 2. The meaning of "disclosure controls and procedures" and "internal control over financial reporting" are discussed in § 14.02[2] *below*.

(n3)Footnote 3. The specific requirements of the Section 302 certification are discussed in § 14.02[2][a] *below*.

(n4)Footnote 4. *See* Sarbanes-Oxley Act § 906, 18 U.S.C. § 1350.

(n5)Footnote 5. 1934 Act Rules 13a-15 and 15d-15, 17 CFR §§ 240.13a-15, 240.15d-15 (2009). 1934 Act Rules 13a-15 and 15d-15 are reproduced in Appendix E to this treatise.

(n6)Footnote 6. 1934 Act Rules 13a-15 and 15d-15, 17 CFR §§ 240.13a-15, 240.15d-15 (2009).

(n7)Footnote 7. 1934 Act Rules 13a-15 and 15d-15, 17 CFR §§ 240.13a-15, 240.15d-15 (2009).

(n8)Footnote 8. 1934 Act Rules 13a-15 and 15d-15, 17 CFR §§ 240.13a-15, 240.15d-15 (2009).

(n9)Footnote 9. The rules requiring this disclosure were adopted in connection with the SEC's rule releases relating to Section 302 of the Sarbanes-Oxley Act, but the structure and mechanics of such rules were subsequently revised in connection with the SEC's rule release implementing Section 404 of the Sarbanes-Oxley Act. *See* SEC Release No. 33-8238 (June 5, 2003).

(n10)Footnote 10. *See* Regulation S-K Item 307, 17 CFR § 229.307 (2009). Regulation S-K Items 307 and 308 are reproduced in Appendix E to this treatise. The SEC has also adopted interpretive guidance to management on how to conduct its evaluation of internal control over financial reporting. This guidance is discussed in greater detail in § 14.02[2][d] *below*. Additionally, the Public Company Accounting Board's Auditing Standard No. 5, which became effective on July 27, 2007, provides standards and guidelines for independent auditors to attest to, and report on, management's assessment of the effectiveness of internal control over financial reporting. *See* PCAOB Auditing Standard No. 5 (July 27, 2007).

(n11)Footnote 11. *See* Regulation S-K Item 308(c), 17 CFR § 229.308(c) (2009).

(n12)Footnote 12. *See* Regulation S-K Item § 229.308, 17 CFR § 308 (2009) and PCAOB Auditing Standard No. 5 (July 27, 2007). Management's and the outside auditor's report on internal control over financial reporting are discussed further in § 14.02[2][d] and § 14.08[5] *below*, respectively.

(n13)Footnote 13. Backup certifications are discussed in § 14.02[2][c] *below*.

(n14)Footnote 14. Companies should also consider reviewing director and officer liability insurance coverage as

well as their charter and bylaws in order to enhance protections where possible. Indemnification of directors and officers is discussed further in Chapter 5 *above*.

(n15)Footnote 15. Regulation S-K Item 601(b)(31), *17 CFR § 229.601(b)(31) (2009)*. Item 601(b)(31) of Regulation S-K is reproduced in Appendix E to this treatise.

(n16)Footnote 16. This portion of the certification reflects the anti-fraud disclosure standard of 1934 Act Rule 12b-20. Note that this prong of the Section 302 certification expressly includes a materiality standard. The Section 906 certification, on the other hand, does not contain any materiality or knowledge qualifiers. *See § 14.02[3] below* for further discussion of the use of a knowledge qualification in the Section 906 certification.

(n17)Footnote 17. The term "fairly present" was intended by the SEC to be broader than mere conformity with GAAP. Rather, the certification must provide assurance of overall material accuracy and completeness including an assessment of whether the accounting principles selected are appropriate under the circumstances, whether the disclosure is informative and reasonably reflects the underlying transactions and events and whether any additional disclosure is necessary to provide investors with a materially accurate and complete picture of the company's fiscal condition, results of operations and cash flows. Note that the certification covers not only financial statements, but all financial information, including footnotes, selected financial data and management's discussion and analysis and parts of the certification cover the entire report. *See SEC Release No. 33-8124 (Aug. 29, 2002)*.

(n18)Footnote 18. The SEC deviated from the actual text of Section 302 by adding the term "cash flows" to the certification. The SEC explained that "it is consistent with Congressional intent to include both income or loss and cash flows within the concept of 'fair presentation' of an issuer's results of operations." *SEC Release No. 33-8124 (Aug. 29, 2002)*.

(n19)Footnote 19. In its adopting release to the rules under Section 404 of the Sarbanes-Oxley Act and subsequent releases extending the Section 404 compliance dates, the SEC stated that the portion of the certification relating to the design of internal control over financial reporting need not be included until management is required to provide its internal control report. *See § 14.02[2][d][ii]*.

(n20)Footnote 20. "Significant deficiency" and "material weaknesses" are defined terms under the rules and standards adopted by the SEC and PCAOB for implementation of Section 404 of the Sarbanes-Oxley Act. *See § 14.02[2][d][i]* for a discussion of these terms.

(n21)Footnote 21. *SEC Release No. 33-8124 (Aug. 29, 2002)*. Notwithstanding this requirement, certain changes to the certification have been permitted. For example, before the SEC's rules under Section 404 of the Sarbanes-Oxley Act become effective with respect to a company, that company's certifications do not have to include certain provisions that relate to internal control over financial reporting. *See § 14.02[2][d][iv] below*. Additionally, the text of the certification may change depending upon the type of report in which the certification is included and whether the CEO and CFO are different individuals.

(n22)Footnote 22. Note that although the Section 302 and Section 906 certifications must both be attached as exhibits to SEC filings, the Section 302 certification is "filed", but the Section 906 certification is "furnished" (and thus not subject to liability under Section 18 under the 1934 Act and not incorporated in registration statements under the 1933 Act unless the company specifically takes steps to include or incorporate the certificate in such registration statements). The basis for permitting the Section 906 certification to be deemed "furnished" rather than filed is the language in Section 906 of the Sarbanes-Oxley Act requiring each periodic report to "be accompanied by" the Section 906 certification. Section 302, on the other hand, requires the certifications to be included "in" the periodic report. The SEC adopted the rules requiring companies to "furnish" the Section 906 certification as an exhibit and to "file" the 302 certification as an exhibit in June 2003. *See SEC Release No. 33-8238 (June 5, 2003)*. Both certification requirements apply equally to issuers *required* to make filings under the 1934 Act and to issuers *voluntarily* filing reports, pursuant to

an indenture covenant or otherwise.

(n23)Footnote 23. Pursuant to Rule 302(b) of Regulation S-T, each signatory to an electronic filing must manually sign a signature page authenticating the signature that appears in the electronic filing at or before the time of filing. This manual signature must be retained by the issuer for a period of five years. *See* Regulation S-T Rule 302(b), *17 CFR* § 232.302(b) (2009). Rule 302(b) applies to both the Section 302 and the Section 906 certifications.

(n24)Footnote 24. CEOs and CFOs already face liability pursuant to Sections 13(a) and 18 of the 1934 Act.

(n25)Footnote 25. *See* HuberJack S. Levin, Laurence A. Urgenson *How CEOs, CFOs Can Avoid Criminal Exposure Under Sarbanes-Oxley Certification Process* (Oct. 2002) at <http://www.kirkland.com/sitecontent.cfm?contentID=223&itemId=2510>. Charles M. Nathan, *The Sarbanes-Oxley Act: A Spotlight On Individual Officers, Directors and Legal Counsel*, NCMA GLASS-CLE 319 (Aug. 2002).

(n26)Footnote 26. On March 19, 2003, the SEC filed accounting fraud charges in federal district court in the Northern District of Alabama against HealthSouth Corporation and its CEO and chairman, Richard M. Scrushy. In the first prosecution under the Sarbanes-Oxley Act, the SEC's complaint alleged (i) since 1999, at Scrushy's insistence, HealthSouth systematically overstated its earnings and (ii) when Scrushy certified the accuracy and completeness of HealthSouth's financial statements, he knew or was reckless in not knowing they were materially false and misleading, and in November 2003, Scrushy was indicted on charges of securities fraud and other violations. *See* SEC Lit. Release No. 18044 (Mar. 20, 2003). Though Scrushy ultimately was acquitted of all charges in his criminal case on June 28, 2005, the case highlighted the Department of Justice's ability and willingness to bring a criminal action based on the certification requirements of the Sarbanes-Oxley Act. The SEC moved forward in its civil case despite Scrushy's acquittal. *See* Commission's Response to Order to Show Cause, filed on July 7, 2005 in N.D. Ala. Civil Action No. CV-03-J-0615-S entitled SEC v. HealthSouth Corporation and Richard M. Scrushy. Scrushy ultimately settled the civil case with the SEC for \$81 million. *See* SEC Lit. Release No. 20084 (Apr. 23, 2007).

(n27)Footnote 27. *See* 1934 Act Rules 13a-15 and 15d-15, *17 CFR* §§ 240.13a-15, 240.15d-15 (2009). These rules are reproduced in Appendix E to this treatise.

(n28)Footnote 28. *See* 1934 Act Rules 13a-15(f) and 15d-15(f), *17 CFR* §§ 240.13a-15(f), 240.15d-15(f) (2009).

(n29)Footnote 29. *See* 1934 Act Rules 13a-15(e) and 15d-15(e), *17 CFR* §§ 240.13a-15(e), 240.15d-15(e) (2009).

(n30)Footnote 30. SEC Release No. 33-8238 (June 5, 2003). *See generally* SEC Release No. 33-8138 (Oct. 22, 2002). For example, disclosure controls and procedures do include the components of internal control over financial reporting that provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP. According to Alan Beller, who was Director of the SEC's Division of Corporation Finance at the time these rules were adopted, because the two sets of controls are not subsumed within one another, it is theoretically possible that an issuer can conclude that its disclosure controls and procedures are effective even though it has identified a material weakness in internal control over financial reporting. Mr. Beller noted, however, that the threshold for reaching that conclusion is a high one. *See* SEC "Hot Topics" Teleconference, SEC, PCAOB Internal Controls Over Financial Reporting: New Regulations, July 20, 2004. Internal control over financial reporting is described in more detail in § 14.04[2][d] below. The SEC also stated that portions of the broad COSO description of internal controls (such as the efficiency and effectiveness of a company's operations and the company's compliance with laws and regulations, generally) do not fall within the definition of internal control over financial reporting or disclosure controls and procedures. The overlap between the COSO definition of internal controls and the term internal control over financial reporting is described in more detail in § 14.02[2][d][i] below.

(n45)Footnote 45. In *SEC v. Siebel Systems, Inc., Kenneth A. Goldman and Mark D. Hanson*, the first SEC enforcement action charging a violation of 1934 Act Rule 13a-15 (requiring issuers to maintain effective disclosure controls and procedures), Siebel's CEO and former investor relations director provided disclosure to certain investors and industry professionals in a private meeting that the SEC contended was materially different from earlier public disclosures made by the company. The SEC asserted that the selective disclosure amounted to a Regulation FD violation and that the company should have promptly filed a Form 8-K disclosing any material non-public information revealed in the private meeting. The court ultimately dismissed both the Rule 13a-15 claim (on the basis that the SEC has not provided particular factual allegations to establish that material non-public information was disclosed selectively) and the Regulation FD claim. *See SEC v. Siebel Systems, Inc., Kenneth A. Goldman and Mark D. Hanson*, (S.D.N.Y. Aug. 31, 2007).

(n46)Footnote 46. Note that all companies with securities listed on the NYSE are required to maintain an internal audit function. *See* NYSE Listed Company Manual § 303A.07(d). *See § 14.03 below* for a discussion of the internal audit team and the internal audit function.

(n47)Footnote 47. The role of the audit committee is discussed in Chapter 9 *above*.

(n48)Footnote 48. In addition, since 1977, Section 13(b)(2)(B) of the 1934 Act, adopted as part of the Foreign Corrupt Practices Act of 1977, has required public companies to maintain a system of "internal accounting controls". *See 15 USCS § 78m*.

(n49)Footnote 49. The Sarbanes-Oxley Act did not define the terms "significant deficiency" or "material weakness" but these terms were defined by the Public Company Accounting Oversight Board in 2004 and revised by the PCAOB and by the SEC in rules adopted in June 2007 and August 2007, respectively. *See* SEC Release No.

33-8809 (June 20, 2007) and SEC Release No. 33-8829 (Aug. 3, 2007). The definitions of both terms are now contained in Rule 12b-2 under the 1934 Act. Rule 12b-2 under the 1934 Act defines a "material weakness" as a "deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of the registrant's annual or interim financial statements will not be prevented or detected on a timely basis" and defines a "significant deficiency" as a "deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the registrant's financial reporting." *See 17 CFR § 240.12b-2 (2009)*. The Public Company Accounting Oversight Board, in its Auditing Standard No. 5, "An Audit of Internal Control Over Financial Reporting that is Integrated with an Audit of Financial Statements", uses the same definitions for these terms. *See PCAOB Auditing Standard No. 5 PP A7 and A11 (July 27, 2007)*. The term "deficiency" is not defined in the SEC's rules, but is defined in Auditing Standard No. 5 to exist "when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis." *See PCAOB Auditing Standard No. 5 P A3 (July 27, 2007)*.

(n50)Footnote 50. *See Regulation S-K Item 601(b)(31), 17 CFR § 229.601(b)(31) (2009)*.

(n51)Footnote 51. The term "reasonable assurance" refers to the concept that "absolute assurance" is not attainable because of the nature of audit evidence and the characteristics of fraud. *See PCAOB Auditing Standard No. 5, P Introduction 3 (July 27, 2007)*. *See also SAS No. 1, "Due Professional Care in the Performance of Work," AU § 230*.

(n52)Footnote 52. 1934 Act Rules 13a-15(f) and 15d-15(f), *17 CFR §§ 240.13a-15(f), 240.15d-15(f) (2009)*. *See PCAOB Auditing Standard No. 5 P A5 (July 27, 2007)*.

(n53)Footnote 53. *See Committee of Sponsoring Organizations of the Treadway Commission, Internal Control--Integrated Framework 3-9 (1992)*. In 1992 COSO produced a report entitled "Internal Control--Integrated Framework". According to the COSO framework, internal controls relate to an issuer's financial reporting and control of assets. Specifically, "internal controls" refer to a process, effected by the company's management (including the CEO and CFO), board of directors and other personnel, designed to provide reasonable assurance regarding the achievement of objectives in three categories: (1) effectiveness and efficiency of operations; (2) reliability of financial reporting; and (3) compliance with applicable laws and regulations. Internal control over each of these objectives consists of the following five interrelated components: (1) the control environment; (2) risk assessment; (3) control activities; (4) information and communication; and (5) monitoring. The three objectives represent what the company wishes to achieve, while the five components represent the methodology required to achieve those goals. *See Committee of Sponsoring Organizations of the Treadway Commission, Internal Control--Integrated Framework 4 (1992)*. In 1995, the AICPA's Auditing Standards Board codified this definition of internal controls in Statement on Auditing Standards No. 78, "Consideration of Internal Control in a Financial Statement Audit: An Amendment to SAS No. 55" (1995). The Auditing Standards Board confirmed this definition in Statement on Auditing Standards No. 109, "Understanding the Entity and its Environment and Assessing the Risks of Material Mismanagement" (2006).

On June 5, 2003, the SEC adopted final rules defining and employing the term "internal control over financial reporting". This term is used in the SEC's rules and certification requirements under Sections 302 and 404 of the Sarbanes-Oxley Act. The SEC's term, "internal control over financial reporting" encompasses that portion of the "internal controls" addressed in the COSO framework that pertains to financial reporting objectives, but does not encompass that portion of "internal controls" that relates to effectiveness and efficiency of a company's operations and a company's compliance with applicable laws and regulations (with the exception of compliance with the applicable laws and regulations directly related to the preparation of financial statements, such as SEC financial reporting obligations). *See SEC Release No. 33-8238 (June 5, 2003)*. However, both the SEC's internal control over financial reporting rules, as well as the Public Company Accounting Oversight Board's (PCAOB) Auditing Standard No. 5 (discussed in § 14.08[5] below) state that the framework used to evaluate internal control over financial reporting must be based on "suitable, recognized control framework that is established by a body or group that has followed due-process procedures, including the broad distribution of the framework for public comment." *See 1934 Act Rules 13a-15(c) and*

15d-15(c), and PCAOB Auditing Standard No. 5, P Introduction 5 (July 27, 2007). The PCAOB references the COSO framework as such a standard, and bases the performance and reporting directions in Auditing Standard No. 5 on the COSO framework. In the release adopting these rules, the SEC explained that while the COSO framework satisfies these criteria, the rules do not mandate the use of a particular framework, such as that set forth in the COSO framework. *See* SEC Release No. 33-8238 (June 5, 2003). Given the criteria set forth by the SEC and the PCAOB, domestic companies may find the COSO framework to be the only viable option that satisfies the requirements of the rules. On July 11, 2006, COSO also published guidance on the use of the COSO framework to address the needs of smaller business in fulfilling the requirements of Section 404. *See* Committee of Sponsoring Organizations of the Treadway Commission, *Internal Control over Financial Reporting - Guidance for Small Public Companies* (2006). On February 4, 2009, COSO published additional guidance intended to clarify the monitoring component of internal control, suggesting ways in which organizations can effectively focus their efforts to evaluate monitoring and ensure proper follow-up of any identified deficiencies. *See* Committee of Sponsoring Organizations of the Treadway Commission, *Internal Control over Financial Reporting - Guidance on Monitoring Internal Control Systems* (2009).

(n54)Footnote 54. CFOs in particular have spent a much larger portion of their days focussing on compliance, especially relating to Section 404. An April 2005 study indicated that senior financial executives (CFOs and controllers) expected to spend as much as a quarter of their time on compliance with internal control rules in 2005 and a fifth of their time on it in 2006. *See Sarbanes-Oxley: What Happened, What's Next and How to Protect Your Company From the Biggest Emerging Risks*, CFO Executive Board, April 7, 2005, at 4. An April 2006 study by CRA International Inc. (which was commissioned by Deloitte & Touche LLP, Ernst & Young LLP, KPMG LLP, and PricewaterhouseCoopers LLP), however, revealed that total Section 404 compliance costs for companies with market capitalization over \$700 million averaged approximately \$8.5 million in 2004 and \$4.8 million in 2005. For smaller companies, those with market capitalization between \$75 million and \$700 million, average Section 404 costs were \$1.24 million in 2004 and \$860,000 in 2005. CRA INT'L, *SARBANES-OXLEY SECTION 404 COSTS AND IMPLEMENTATION ISSUES: SPRING 2006 SURVEY UPDATE* (Apr. 17, 2006), *available at* http://www.s-oxinternalcontrolinfo.com/pdfs/CRA_III.pdf. A similar study produced by Financial Executives International, an advocacy group for financial executives, indicated that on average, companies paid approximately \$3.8 million each in 2005 in Section 404 compliance costs, down 16% from 2004. *See* Financial Executives International, *FEI Survey: Sarbanes-Oxley Compliance Costs are Dropping; Average Compliance Costs are \$3.8 Million, Down 16% from Prior Year; Reductions About Half of What Were Anticipated* (April 6, 2006), *available at* fei.mediaroom.com/index.php?s=press_release&item=74. A 2004 case study showed that the internal hours spent on assessment were 12 times higher than the SEC's initial 2002 estimate and attestation fees (audit fees) increased by 50% in the first year of Section 404 compliance. *See* Lineke Sneller and Henk Langendijk, "Sarbanes Oxley Section 404 Costs of Compliance: A Case Study," 15 *Corp. Gov.: An Int'l Rev.* 101, 109 (March 2007).

Note, however, that research firms such as Glass Lewis & Co. point out that material weaknesses continue to abound. Glass Lewis & Co.'s research shows that while 10.0% of U.S. public companies disclosed material weaknesses in 2005, 8.8% of U.S. public companies also disclosed material weaknesses in 2006. *See* Grothe, Mark et. al., *The Materially Weak*, Glass Lewis & Co. 1 (Feb. 27, 2007). The SEC continues to monitor the costs of compliance. The Office of Economic Analysis led a study through the second half of 2008, open to all companies with experience complying with 404 rules, as part of an effort to improve "the efficiency and cost-effectiveness of the implementation of Section 404's requirements, particularly for smaller companies." SEC Press Release 2008-116 (June 20, 2008) *available at* <http://www.sec.gov/news/press/2008/2008-116.htm>. The survey is at <http://404survey.sec.gov>, and general information about the survey is at <http://www.sec.gov/spotlight/404survey.htm>.

(n55)Footnote 55. To address this issue, the SEC extended its Section 404 compliance date several times.

Most of the extensions have expired, except for the Section 404(b) compliance deadline for all non-accelerated filers, who are not be required to comply with Section 404(b) until the filer's annual report for the first fiscal year ending on or after December 15, 2009. *See* SEC Release No. 33-8934 (June 26, 2008). During the first year of compliance, filers that

include an annual report with management's assessment on internal control over financial reporting, but not the outside auditor's report, can "furnish" rather than "file" management's report. The SEC has indicated that newly public companies would not have to comply with the internal control related requirements under Section 404 until they file their second annual report as a public company. *See* SEC Release No. 33-8760. The SEC has suggested that there will be no further extensions of this deadline. *See As 404(b) Nears, Small Filers Hear Advice*, Compliance Week (Apr. 21, 2009).

(n56)Footnote 56. A recent example is the web-based study of the costs and benefits of Section 404 of the Sarbanes-Oxley Act publicized on the SEC web site through late 2008 and early 2009, which generated responses from more than 2,000 businesses.. Information on the study *available at* <http://www.sec.gov/spotlight/404survey.htm>.

(n57)Footnote 57. *See* SEC Release No. 33-8809 (June. 20, 2007). Accounting Standard No. 5 is discussed in § 14.08[5] below.

(n58)Footnote 58. *See* SEC Division of Corporation Finance, Office of the Chief Accountant, *Staff Statement on Management's Report on Internal Control Over Financial Reporting* (May 16, 2005); SEC, *Commission Statement on Implementation of Internal Control Reporting Requirements* (May 16, 2005).

(n59)Footnote 59. The interrelation between the two terms is discussed in *Section 14.02[2][c][i]*.

(n60)Footnote 60. According to the SEC and the PCAOB, management may ask the outside auditor accounting, auditing and financial reporting questions and provide the outside auditor with early drafts of the financial statements without impairing independence or triggering a control deficiency (as long as management makes the final determination regarding the accounting to be used and does not rely on the outside auditor to design or implement the controls). Further, in evaluating internal control over financial reporting, the PCAOB's Auditing Standard No. 5 encourages the outside auditor to use the work of other individuals.

(n61)Footnote 61. SEC Division of Corporation Finance, Office of the Chief Accountant, *Staff Statement on Management's Report on Internal Control Over Financial Reporting* (May 16, 2005).

(n62)Footnote 62. The audit committee is discussed in Chapter 9 above.

(n63)Footnote 63. SEC, *Commission Statement on Implementation of Internal Control Reporting Requirements* (May 16, 2005).

(n64)Footnote 64. *See* SEC Release No. 33-8810 (June 27, 2007).

(n65)Footnote 65. *See* SEC Release No. 33-8810 (June 27, 2007).

(n66)Footnote 66. *See* SEC Release No. 33-8809 (June 20, 2007).

(n67)Footnote 67. After the PCAOB voted to adopt Auditing Standard No. 5, it became effective when it was approved by the SEC pursuant to SEC Release No. 34-56152 on July 27, 2007. The PCAOB is discussed in § 08[4] below.

(n68)Footnote 68. *See* 1934 Act Rules 13a-15(a) and 15d-15(a), *17 CFR §§ 240.13a-15(a), 240.15d-15(a)* (2009). *See* Regulation S-K Item 601(b)(31), *17 CFR § 229.601(b)(31)* (2009).

(n69)Footnote 69. *See* Regulation S-K Item 601(b)(31), *17 CFR § 229.601(b)(31)* (2009).

(n70)Footnote 70. *See* Regulation S-K Item 601(b)(31), *17 CFR § 229.601(b)(31)* (2009).

(n71)Footnote 71. *See* 1934 Act Rules 13a-15(d) and 15d-15(d), *17 CFR §§ 240.13a-15(d), 240.15d-15(d)* (2005).

See Regulation S-K Items 308(c) and 601(b)(31), 17 CFR §§ 229.308(c), 229.601(b)(31) (2009).

(n72)Footnote 72. Note that the internal control report must be provided by "management" as opposed to just the issuer's chief executive officer and chief financial officer. The contents of management's report on internal control over financial reporting is discussed in § 14.02[2][d][iv] below. See Regulation S-K Item 308(a), 17 CFR § 229.308(a) (2009), 1934 Act Rules 13a-15(c) and 15d-15(c), 17 CFR §§ 240.13a-15(c), 240.15d-15(c) (2009). The SEC Staff noted that management's report included in the Form 10-K should be located in close proximity to the corresponding report of the outside auditor on internal control over financial reporting, and that both reports should be placed together near management's discussion and analysis or immediately preceding the financial statements. See SEC, Division of Corporation Finance, Staff Alert-Annual Report Reminders (Mar. 4, 2005).

(n73)Footnote 73. See Regulation S-K Item 308(b), 17 CFR § 229.308(b) (2009). The outside auditor's report on internal control over financial reporting is discussed in § 14.08[5] below.

(n74)Footnote 74. See Regulation S-K Item 308(a), 17 CFR § 229.308(a) (2009). See 1934 Act Rules 13a-15(c) and 15d-15(c), 17 CFR §§ 240.13a-15(c) and 240.15d-15(c) (2009).

(n75)Footnote 75. Appropriate frameworks for conducting the required evaluation are discussed in § 14.02[2][d][i] above.

(n76)Footnote 76. Management may not conclude that internal control over financial reporting is effective if a material weakness is identified. The meaning of material weakness is discussed in § 14.02[2][d][i]14.02[2][d][i] above.

(n77)Footnote 77. Regulation S-K Item 308(a)(4), 17 CFR § 229.308(a)(4) (2009). This attestation must be made in accordance with the PCAOB's Auditing Standard No. 5 discussed in § 14.08[5] below.

(n78)Footnote 78. See Regulation S-K Item 308(b), 17 CFR § 229.308(b) (2009). See PCAOB Auditing Standard No. 5 P71-74 (July 27, 2007).

(n79)Footnote 79. The SEC's rules requiring the inclusion of management's internal control report and the auditor's related opinions are described in footnote 51. Upon effectiveness of the internal control report rules with respect to an issuer, each of the following requirements become effective: (a) Items 308(a) and 308(b) of Regulation S-K (the internal control report and auditor's opinions); (b) 1934 Act Rules 13a-15(a) and 15d-15(a) (requiring issuers to maintain internal control over financial reporting); and (c) the requirements of 13a-15(c) and 15d-15(c) (requiring issuers' management to evaluate the effectiveness of internal control over financial reporting). See SEC Release No. 33-8238 (June 5, 2003) and SEC Release No. 33-8392 (Feb. 24, 2004). An issuer can omit certain portions of the Section 302 certification until it files its first Form 10-K containing an internal control report.

(n80)Footnote 80. 1934 Act Rules 13a-15 and 15d-15 call for the maintenance and evaluation of disclosure controls and procedures and internal control over financial reporting, and Item 601(b)(31) of Regulation S-K requires the CEO and CFO to certify as to the establishment, maintenance, design and evaluation of disclosure controls and procedures and internal control over financial reporting. These requirements are described in greater detail above.

(n81)Footnote 81. The Item 307 and 308 disclosure is required under Item 4 of Part I of Form 10-Q and Item 9A of Part II of Form 10-K. Note the Section 302 certification set forth in Item 601(b)(31) of Regulation S-K requires the certifying officer to state that he or she has "[d]esigned such disclosure controls and procedures ... to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to them by others within those entities" It is unclear exactly what language should be used in the Item 307 disclosure as the Section 302 certification itself contains a materiality qualification, whereas Rules 13a-15(a) and 15d-15(a) under the 1934 Act require issuers to maintain disclosure controls and procedures without regard to the materiality of the information disclosed. It seems a materiality qualification may be permissible in the Item 307 disclosure in order to conform the

disclosure to the language contained in the CEO's and CFO's certification, but the SEC has not clarified this point. The placement of the reports on internal control over financial reporting are described in greater detail in § 14.02[2][d][iv] above .

(n82)Footnote 82. Because disclosure controls and procedures are defined as a process designed to "ensure" that information required to be disclosed is processed, summarized and reported in a timely manner, some companies have indicated in their Item 307 disclosure that disclosure controls and procedures are designed only to provide "reasonable assurance" that the controls and procedures will meet their objectives. The SEC has stated it generally will not object to this type of disclosure so long as it is accompanied by the CEO's and CFO's conclusions that the disclosure controls and procedures are actually effective at the "reasonable assurance" level. *See* SEC Release No. 33-8238 (June 5, 2003). On the other hand, the concept of reasonable assurances is specifically built into the definition of "internal control over financial reporting".

(n83)Footnote 83. Management's reporting on internal control over financial report is discussed in § 14.02[d][iv] above and the outside auditor's related report is disclosed in § 14.08[5] below .

(n84)Footnote 84. Note that as the SEC has not provided any insight into the breadth of the required Item 307 disclosure, a variety of practices have developed. Some issuers have provided boilerplate type responses to Item 307. Other companies have provided detailed disclosure regarding the types of control mechanisms employed, the effectiveness and deficiencies of those controls and the scope of the control evaluation.

(n85)Footnote 85. Although Section 1350 only states that the report must be "accompanied" by the certification, Item 601(b)(32) of Regulation S-K provides that the Section 906 certification must be filed as an exhibit to periodic reports. The SEC has stated that this exhibit will be deemed "furnished" rather than "filed," thereby not subjecting the issuer to liability under Section 18 of the 1933 Act and causing the certification to not be incorporated in registration statements under the 1933 Act unless the company specifically takes steps to include or incorporate the certificate in such registration statements.

(n86)Footnote 86. *See* Sarbanes-Oxley Act § 906, 18 U.S.C. § 1350(b).

(n87)Footnote 87. *See* Sarbanes-Oxley Act § 906, 18 U.S.C. § 1350(c)(1).

(n88)Footnote 88. *See* Sarbanes-Oxley Act § 906, 18 U.S.C. § 1350(c)(2).

(n89)Footnote 89. In extremely rare occasions, certain other changes to the certification may be appropriate. For example, Alan Beller, former director of the Division of Corporation Finance informally noted that where an issuer filed its Form 10-K in a timely manner but could not complete its Section 404 evaluation on time (and thus the Form 10-K did not include management's assessment and the auditor's opinions on internal control over financial reporting), although the wording of the certification could not be changed, the SEC would not object to an additional statement noting that the Form 10-K is being filed without the assessment and auditor's report because the assessment could not be completed.

(n90)Footnote 90. *See* NYSE Listed Company Manual § 303A.12. The NYSE also requires listed companies to specify and disclose any qualification to the certification be specified and disclosed, to the extent necessary, submit an executed Written Affirmation annually relating to compliance with the corporate governance rules, and submit an Interim Written Affirmation any time there is any change to the board or the audit, compensation or nominating committee.

(n91)Footnote 91. *See* Nasdaq Stock Market Corporate Governance Certification Form at www.nasdaq.com/about/CG_Certification_Form.pdf. Companies are not required to provide the certification annually, but must update their certification if it becomes inaccurate. *See* Nasdaq Frequently Asked Questions at www.nasdaq.com/about/FAQsCorpGov.stm.

CHAPTER 14 ROLES AND RESPONSIBILITIES OF NON-BOARD PARTICIPANTS IN CORPORATE GOVERNANCE

2-14 Corporate Governance: Law and Practice § 14.03

AUTHOR: John F. Olson Ari B. Lanin

§ 14.03 The Internal Audit Function and Head of the Internal Audit

[1] Internal Auditors and the Internal Audit Function

[a] Overview and Responsibilities

The Institute of Internal Auditors defines the internal audit function as "an independent, objective assurance and consulting activity designed to add value and improve an organization's operations. It helps an organization accomplish its objectives by bringing a systematic, disciplined approach to evaluate and improve the effectiveness of risk management, control, and governance processes."¹ This function has grown to become an integral component of a system of sound corporate governance.

While the Sarbanes-Oxley Act does not itself require companies to maintain an internal audit function, it does require companies to maintain and evaluate a system of internal control over financial reporting.² The NYSE, however, has adopted a rule *requiring* each listed company to maintain an internal audit function so as to provide management and the audit committee with ongoing assessments of the company's risk management process and system of internal control.³ The NYSE rule does not require listed companies to dedicate a full time internal audit staff or create a separate internal audit department. Rather, listed companies may satisfy the requirement either by using in-house positions or by outsourcing the job to an accounting firm other than the company's outside auditor.⁴

The internal auditors oversee the company's internal audit function. Their primary role is to evaluate objectively and report on the effectiveness of the company's risk management, control and governance processes.⁵ In carrying out this role, the internal auditors often take on the following responsibilities:

- assisting the audit committee and management team in the development of a comprehensive approach to the implementation, management, and evaluation of internal controls and educating management as to its internal control responsibilities;⁶
- assisting the audit committee and management team with the evaluation of internal controls and providing the audit committee and management team with vital information about the weaknesses in

internal controls;ⁿ⁷

- assisting the CEO and CFO with the certifications required under Section 302 of the Sarbanes-Oxley Act;
- helping to ensure that information presented to the board of directors and the audit committee is factual and relevant;
- monitoring and reporting on the processes employed to ensure that significant risk exposures are understood and managed appropriately and assisting management with the development of an annual risk assessment;
- reviewing the financial statements for errors, misstatements and potential fraud;
- providing feedback to senior management and the board of directors regarding the effectiveness of the internal audit program;ⁿ⁸
- assisting management with its preparation of management's internal control report;ⁿ⁹ and
- monitoring the ethical climate and providing assurance that good governance principles are practiced.

However, in light of the emergence of numerous unanticipated risks exposed by the rapid economic downturn of 2008 and 2009, it has been suggested that a reexamination of the function of internal auditors may be in order. Since 2003, a significant portion of internal auditor responsibilities have been focused on financial reporting controls in response to Sarbanes-Oxley. While such heavy emphasis may have been appropriate in the immediate aftermath of its adoption, the dramatic declines in share value accompanying the economic downturn have revealed that rigorous compliance and monitoring in accordance with Sarbanes-Oxley may provide insufficient protection to shareholders. Sarbanes-Oxley risks are now thought to be generally well controlled, and thus a partial realignment of responsibilities is due. As a result, there has been movement away from the familiar activities of monitoring and compliance - increasing amounts of which can be handled by automated data-mining operations - toward forward-looking risk management activities that pose the greatest long-term risks to companies.ⁿ¹⁰

In shaping the internal audit function and choosing the appropriate internal auditors, companies should consider the following:

- *In-House Personnel May be Used.* Even though an in-house internal audit function is not required by the NYSE Listed Company Manual rules or the Sarbanes-Oxley Act or the rules adopted thereunder, many companies have a staff of in-house internal auditors, as in-house internal auditors may be more likely to have in-depth, sophisticated and current knowledge of the company's business and affairs. Other companies, particularly smaller enterprises, have outsourced the entire internal audit function.ⁿ¹¹ Although companies should maintain employees familiar with the execution of the internal audit function, no one structure is appropriate for all companies.

- *Meet With the Audit Committee and Management.* The head of internal audit should attend all regularly scheduled audit committee meetings and maintain a direct and ongoing line of communication with the audit committee and management. Meetings should take place both within and outside the presence of management. The audit committee should be responsible for the oversight of the internal audit function, and should exercise due care and see that the internal audit team is performing effectively, and is sufficiently staffed and adequately trained.ⁿ¹²

- *Use Management's Internal Control Over Financial Reporting Assessment.* Working closely with management in its self-assessment of internal control over financial reporting (required by Section 404 of the Sarbanes-Oxley Act and the rules thereunder) can help the internal auditors more efficiently implement and identify weaknesses in internal control over financial reporting.ⁿ¹³

- *Establish a Direct Line of Communication Between the Internal and Outside Auditors.* Establishing a direct line of communication between the internal and outside auditors can increase the efficiency of the audit performed by the outside auditor and help the outside auditor gather information with respect to its internal control report (required by Section 404 of the Sarbanes-Oxley Act and the rules thereunder as well as the PCAOB's Auditing Standard No. 2).

[b] The Internal Audit Team

Because the internal audit function requires a broad range of tasks and responsibilities, the internal audit team should consist of individuals who possess a broad range of skills, knowledge and disciplines. The internal audit team, as a whole, should have the following abilities and attributes:

- proficiency in applying accounting and internal auditing standards, procedures and techniques;
- knowledge of fundamental accounting, economics, commercial law, taxation, finance, quantitative methods, and information technology concepts;
- an understanding of management principles that allow for the evaluation of the materiality and significance of deviations from good business practice;
- knowledge of the company's industry and business practices;
- sufficient communication skills to clearly and effectively report on engagement objectives, evaluations, conclusions and recommendations; and
- integrity, professionalism and objectivism.ⁿ¹⁴

[2] Head of Internal Audit

The head of internal audit, or chief internal auditor, directs the company's internal audit function and coordinates the internal audit team. In addition to assisting and managing the internal audit services discussed in § 14.03[1] above, the head of internal audit's responsibilities may include:

- staffing the in-house internal audit team, if any;
- establishing policies and procedures for the internal audit team and assisting in the determination of the company's long-term audit plan;
- reviewing the company's business practices and procedures;
- auditing compliance with corporate policies, procedures and regulations;
- investigating allegations of code of conduct and ethics violations;

- assisting management and the audit committee with respect to compliance with the Sarbanes-Oxley Act and other applicable rules and regulations;
- evaluating the company's governance processes;
- testing for whether the company is working toward its strategic long term goals;
- advising and counseling the company on its efficiency and effectiveness in risk management;
- evaluating the company's internal controls and determining whether the company's documented internal control structure is, in practice, being followed; and
- assisting in the determination of whether the company's internal controls are adequate.¹⁵

In order to fulfill his or her duties and responsibilities effectively, the head of internal audit should, at a minimum, have a strong background in accounting, internal auditing standards and general auditing methodologies and practices. He or she should be capable of auditing financial, operational and information technology functions and should have a thorough understanding of internal controls.¹⁶ The head of internal audit should also be more than an accountant, but rather an executive who is capable of understanding the company's long term strategy and addressing internal and external organizational trends. Because the head of internal audit regularly interacts with the audit committee, outside auditor and management, he or she should also be an effective communicator with strong character and should have the ability to earn the respect of the audit committee and senior management. Effective communication with management can provide a forum for criticism and evaluation of internal control over financial reporting, accounting strategies and corporate strategies ultimately employed by senior management. And of course, the head of internal audit should have a reputation for integrity and a strong understanding of the company's business.

The audit committee should either appoint the head of internal audit or be heavily involved in and ratify his or her appointment. The audit committee should also play an important role with respect to the head of internal audit's compensation and scope of responsibilities and make the post an opportunity for advancement, rather than a dead-end position. Once appointed, the head of internal audit should report directly to the audit committee and the CEO or CFO and should have ongoing access to and dialogue with the audit committee.

CHAPTER 14 ROLES AND RESPONSIBILITIES OF NON-BOARD PARTICIPANTS IN CORPORATE GOVERNANCE

2-14 Corporate Governance: Law and Practice § 14.04

AUTHOR: John F. Olson Ari B. Lanin

§ 14.04 The Corporate Secretary

[1] Role, Responsibilities and Characteristics

In many companies a key coordinator of corporate governance functions is the corporate secretary. While in the past the position had been regarded as a "combination of scrivener and custodian,"ⁿ¹ the corporate secretary's role and responsibilities have evolved to include: (1) drafting and maintaining corporate records; (2) assuring a smooth information flow between management, the board of directors, the shareholders and regulatory agencies; and (3) monitoring the corporate governance process and assisting in the implementation of effective corporate governance, generally.ⁿ² Often assisted by an assistant corporate secretary and others, including the legal department, corporate secretaries provide the following functions, among others:ⁿ³

- *Assistance with Board and Committee Meetings.* The corporate secretary can play a considerable role in structuring the agenda for board meetings, alerting the CEO and/or chairman of the board as to topics that should be considered at meetings and drafting and distributing board minutes.ⁿ⁴ To this end, the corporate secretary should also prepare board books containing information, issues and documents to be discussed at board meetings. The corporate secretary can also help new directors become familiar with the company by offering informational orientation programs.ⁿ⁵

- *Assistance with Shareholder Meetings.* The corporate secretary is generally responsible for overseeing the preparation of the proxy statement and notice of meeting, which may involve coordinating the input of attorneys, personnel, financial groups, directors and senior management members. This task may also involve negotiations with shareholder groups over shareholder proposals and related discussions with the board of directors, management and the SEC. The corporate secretary should work closely with senior management in preparing the script and agenda for the annual meeting and should assist in ensuring an impartial tabulation of the shareholder vote.

- *Maintenance of Corporate Records.* Corporate secretaries are generally responsible for the maintenance of corporate records and assist with the filing, protection, indexing and updating of such

records.n6

- *Interaction with Exchanges.* The corporate secretary can act as the corporate liaison with the exchanges on which his or her company's shares are listed. In this respect, he or she is in a unique position to determine and improve compliance with listing requirements, including corporate governance listing standards.

- *Acting as Liaison Between Corporate Participants.* The corporate secretary often handles shareholder relations matters and acts as the liaison between management and the directors.

- *Assistance with Compliance Matters.* Depending on his or her background, the corporate secretary can also play a role in the drafting of disclosure documents, including current, quarterly and annual reports, registration statements, and insider trading reports. In many cases the corporate secretary acts as the monitor of the company's pre-clearance policy, putting him or her in a unique position to monitor compliance with SEC insider trading rules and company pre-clearance procedures.

Given the significance of the corporate secretary's role, choosing an effective corporate secretary is an important part of maintaining a sound system of corporate governance. The Society of Corporate Secretaries & Governance Professionals suggested that a successful corporate secretary have the following personal and professional attributes:

- a thorough understanding of the company's business;
- a basic knowledge of corporate and securities law;
- knowledge of the rules of the stock exchange on which the company's securities are listed;
- solid communication skills;
- sensitivity to the thoughts and sentiments of the CEO and board of directors;
- ability to read signals on the horizon and provide early warnings to management;
- ability to mediate and achieve consensus;
- knowledge of how to overcome bureaucratic thinking in the company;
- detail-oriented perspective;
- flexibility and creativity; and
- the ability to maintain a sense of humor and balance, regardless of the situation.n7

[2] Board Information

[a] Board Orientation Programs

In order to be effective, directors must understand their company, its business and the industry as a whole. The corporate secretary can increase director awareness, the company's level of compliance and help to make governance efforts more successful by providing new directors with orientation programs upon their election. Such orientation programs should involve both the provision of information and discussions with various company personnel. The

information provided should describe the requirements of the position, discuss pertinent company policies (including corporate governance policies) and legal requirements and explain applicable securities laws and regulations.ⁿ⁸ Copies of the company's recent SEC filings can also be included to give new board members a better understanding of the company's business and disclosure techniques. Biographies of the other board members can be distributed as well. The corporate secretary should also arrange for other orientation activities, as appropriate, including: (1) on-site visits with members of management and tours of company facilities; (2) discussions with management relating to company structure and goals; (3) question and answer sessions relating to structure, culture and dynamics of the industry in which the company operates; and (4) presentations on disclosure controls, procedures and responsibilities, internal controls and applicable accounting rules.ⁿ⁹ While all orientation programs should give new directors the opportunity to gain a practical understanding of how the company operates, they should not be conducted with a "one size fits all" mentality. Programs should be tailored to the company's business and industry and to each individual director's experience and needs.

[b] Director Education

Corporate secretaries play a critical role in assisting in the education of the directors on an ongoing basis.ⁿ¹⁰ In addition to initial orientation programs, opportunities should be offered for directors to refresh and update their skill set and knowledge base.ⁿ¹¹ Corporate secretaries can offer directors the opportunity to attend various programs relating to industry issues, accounting developments and the evolution of corporate governance best practices (such as issues relating to independence, the effectiveness and composition of committees, compliance and ethics programs, etc.). Director education programs relating to corporate governance are offered by myriad organizations, including proxy voting services and corporate governance ratings agencies.

[c] Information to the Board

As explained by the Conference Board in its Corporate Governance Best Practices report, "[t]he effectiveness of the board ultimately depends on the quality and timeliness of information disposal each director receives."ⁿ¹² As such, the corporate secretary can help to enhance the effectiveness of the directors by overseeing the preparation of the board book for each meeting of the board. These packages should contain all the materials directors need to review in preparing for a meeting, including the board's proposed agenda drafted by the chair, issues for discussion, proposed resolutions requiring board action and any documents (and ancillary materials) that directors should review during board meetings. Because directors should be given ample time to review and absorb relevant information, board books should be distributed several days before the date of the meeting. Only in those situations where materials are either unavailable or extremely confidential should directors be presented with information at the start of the meeting.ⁿ¹³

Additionally, board members can be updated between meetings with packages containing management information, analyst reports, articles and news clippings that discuss the company, relevant issues or industry news.ⁿ¹⁴ Boards can also be provided with industry information, including updates on competitors.

In assembling board information, corporate secretaries should be mindful of the volume of information provided to directors. While providing too little information can be dangerous, providing too much material can obscure the most relevant information.ⁿ¹⁵ To help directors avoid unintentionally overlooking important information provided in board packages, corporate secretaries may choose to classify documents into various categories that promote efficient processing.ⁿ¹⁶ Significant time and cost savings can result from the corporate secretary using email and fax to disseminate information and from using email alerts to advise directors of meeting agendas, reports and other materials.ⁿ¹⁷ Additionally, directors should be given the opportunity to meet with division managers and members of senior management on an ongoing basis so as to keep apprised of current issues faced by the company and the industry as a whole.

[3] Minutes

[a] Purpose of Minutes

Corporate minutes serve as a record of the discussions and deliberations of the board of directors and its committees.ⁿ¹⁸ Properly drafted, maintained and organized minutes can be an excellent source of board considerations and historical information as well as a company's first and best line of defense against litigation. The availability of the business judgment rule, for example, could hinge on the process observed by the directors as described in the structure and wording of the minutes.ⁿ¹⁹ Further, as the discovery process in a lawsuit may not begin until well after the precipitating event (and sometimes not until years after the beginning of litigation), corporate minutes can become the best source of available evidence in a lawsuit.ⁿ²⁰

The corporate secretary should consider the following principles when drafting corporate minutes: (1) minutes should be drafted with a focus on process so as to communicate the board's commitment to due care, loyalty, knowledge and thorough review; (2) minutes should not be used to express views or opinions; (3) writing style should be neutral; (4) word choice and consistent word use is critical;ⁿ²¹ and (5) minutes should be prepared soon after the applicable board or committee meeting. No one style is appropriate for every company. Further, because of their potential importance to the company's welfare, minutes should always be reviewed by the directors (or committee members, as applicable) as soon as possible after a meeting.ⁿ²²

[b] Style and Length of Minutes

There is little legal guidance as to what type of information corporations should include in minutes or what form they should take. Abbreviated style, or short form minutes, are concise and unambiguous, but may not present a completely clear picture of what occurred at a particular meeting. In many circumstances, the corporate secretary may find it desirable to detail the board's diligence in dealing with a particular issue. Long form minutes, while they provide evidence of the board's evaluation and a clearer picture of the total deliberation process, are more likely to provide an increased opportunity for misinterpretation.ⁿ²³

The corporate secretary needs to choose the appropriate drafting style based upon the subject matter being dealt with at a particular meeting. For example, deliberations relating to material acquisitions may require the provision of additional information while ordinary course meetings may be better suited to a more summary style.ⁿ²⁴ The corporate secretary should also be careful to indicate the length and breadth of discussion spent by the board on certain issues. Minutes should generally give more attention to those areas explored by the board in greater detail, and less attention to less material items. This may give the reader a better sense of time and process. Regardless of the detail presented, minutes are generally best drafted articulating the overall discussion, rather than the comments of individuals. It is important that minutes indicate not only subjects discussed, but key issues and questions raised and the degree of active director participation. For executive sessions, the presiding director should give the corporate secretary a short statement of the matters discussed and of any decisions made. After they are drafted, minutes should be circulated to all directors (or committee members, as applicable) for review and comment. Comments (but not necessarily approval) should be requested from directors within a week or two of the meeting, so directors can more easily confirm the accuracy of the description of discussions and the inclusion of all substantive matters.

When determining the detail and length of board minutes, boards of directors and their general counsel and corporate secretary should also consider whether and to what extent directors should take notes during meetings. Because notes taken by directors may be discoverable, directors often agree that corporate minutes, rather than personal notes, should act as the sole record of board and committee meetings.ⁿ²⁵

After minutes are approved, the corporate secretary should evaluate the most appropriate method in which they should be stored.ⁿ²⁶ While minutes have traditionally been kept in paper form and stored in binders, developments in technology have allowed many companies to save minutes and other corporate records electronically on hard drives using databases, document management systems, internet web portals and in many cases, even inexpensive off the shelf

word processing software. n27 Saving minutes electronically can provide many advantages, among them: (1) the ability to search for and retrieve information contained within corporate records; (2) a reduced need for physical storage space; (3) cost savings relating to reduced legal fees (in situations where minutes are stored by a company's law firm); and (4) the ability to duplicate or transmit entire sets of minutes quickly and inexpensively and, when necessary cut and paste from or redact out various types of information.n28

For further discussion, including perspectives on whether the corporate secretary and general counsel roles should be combined, see also *Are You Cut Out to Be a Corporate Secretary?*, ACC Docket, September 2008; *The Role of the Corporate Secretary in the New Post-Sarbanes/Oxley Arena*, The Metropolitan Corporate Counsel, April 2008; *The Society of Corporate Secretaries & Governance Professionals: Building on Achievements of the Past, Helping Its Members Discharge Their Role as the Conscience of the Corporation, and Drawing on the Expertise of Its Members to Provide Input to Key Regulatory and Policy Making Bodies*, The Metropolitan Corporate Counsel, April 2008; *Enlightened Corporate Governance: At the Center of the Discussion of the Corporate Secretary's Role*, The Metropolitan Corporate Counsel, April 2007; and *The Society of Corporate Secretaries & Governance Professionals: Charting a New Course*, The Metropolitan Corporate Counsel, April 2005.

(n8)Footnote 8. Such descriptions can include the mechanics of Rule 144, Form 144 and Forms 3, 4 and 5, required to be filed under Section 16(a) of the 1934 Act. A description of the company's insider trading policy and legally or company imposed trading restrictions should be included as well.

(n9)Footnote 9. *See generally* Deborah S. Rade, *Director Orientation and Continuing Education*, Practising Law Institute: Corporate Law and Practice Course Handbook Series, PLI Order No. 18176, March-June 2009; Dorothy K. Light and Richard W. Leblanc, *Integrating the New and Educating the Current Director*, 1 (July 1993).

(n10)Footnote 10. *See* Deborah S. Rade, *Director Orientation and Continuing Education*, Practising Law Institute: Corporate Law and Practice Course Handbook Series, PLI Order No. 18176, March-June 2009; *Corporate Secretary Perspective; American Society of Corporate Secretaries: Cutting Edge Resources for Corporate Governance in Today's Complex Business Environment*, The Metropolitan Corporate Counsel, April 2003.

(n11)Footnote 11. Various shareholder activist groups have criticized public companies for not disclosing whether their directors are offered the opportunity to participate in continuing education programs.

(n12)Footnote 12. *See* The Conference Board, *Corporate Governance Handbook* 18 (2005).

(n13)Footnote 13. *See generally* Broc Romanek (editor of GreatGovernance.com), *Board Materials*, at <http://www.thecorporatecounsel.net/GreatGovernance/member/FAQ/BoardMaterials.htm>.

(n14)Footnote 14. *See Corporate Secretary Perspective; A New Era in Corporate Governance: How Corporate Secretaries Are Coping with the Challenges*, The Metropolitan Corporate Counsel, April 2003. According to Stephen J. Paul, Assistant Corporate Secretary and Senior Counsel of Shell Oil Company, "assistance from the directors is needed to support and encourage management in making investments in technology which, properly employed, can make all aspects of the corporate secretary function, particularly interaction with the directors, more effective and efficient."

(n15)Footnote 15. *See generally* Marc Morgenstern, *Sarbanes-Oxley's Subtle Disclosure Costs*, Insights, January 2007 (explaining that when "[p]repared with foresight and care, the board package can minimize liability; inadequately prepared it can create liability" (*emphasis original*)).

(n16)Footnote 16. Romanek, suggests classifying information into types such as "regular", "exception" "lag" and "lead". "Regular" refers to information that is shared on a predetermined schedule. "Exception" refers to information reported only when it deviates from the normal. "Lag" refers to information about the company's performance. "Lead" refers to information about where the company or its industry may be heading. *See* Broc Romanek, *Board Materials* at www.thecorporatecounsel.net/GreatGovernance/member/FAQ/BoardMaterials.htm; *see also* Marc Morgenstern, *Sarbanes-Oxley's Subtle Disclosure Costs*, Insights, January 2007 (recommending, for example, including clear distinctions in board packages between forecasts (what management believes will occur) and hypothetical calculations (what may occur)).

(n17)Footnote 17. *See Corporate Secretaries and Corporate Governance Professionals: Helping Corporate Secretaries Ensure Top-Flight Operations*, The Metropolitan Corporate Counsel, April 2005. Additionally, other electronic tools such as virtual boardrooms, compliance calendars, and records centers can greatly enhance a corporate secretary's efficiency and accuracy. *See New Compliance Tools for the Corporate Secretary*, The Metropolitan Corporate Counsel (April 2007). With the advent of the internet, corporate secretaries have been able to provide their directors with board information in easy to access electronic forms. In addition to e-mail, various companies offer products that manage documents and communications relating to board meetings so that board members are automatically notified of meetings set by the corporate secretary and can access a secure site from anywhere to view the documents pertinent to the meeting. *See New Compliance Tools for the Corporate Secretary*, The Metropolitan Corporate Counsel (April 2007).

(n18)Footnote 18. The Delaware General Corporation Law provides that "[o]ne of the officers of [the corporation]

shall have the duty to record the proceedings of the meetings of the stockholders and directors in a book to be kept for that purpose." *Del. Code Ann. tit. 8, § 142(a)* (2007). The Model Business Corporation Act provides that "[a] corporation shall keep as permanent records minutes of all meetings of its shareholders and board of directors ... [and a] corporation shall maintain its records in written form or in another form capable of conversion into written form within a reasonable time." Model Bus. Corp. Act § 16.01 (2009).

(n19)Footnote 19. The "business judgment rule" provides that decisions of directors if challenged in court, will be upheld if they are rationally related to a legitimate business purpose.

(n20)Footnote 20. Connie R. Gale, *When Minutes Count: What A Corporate Secretary Should Keep In Mind*, Bus. Law Today, Jan./Feb. 1997, at 36.

(n21)Footnote 21. Connie R. Gale, *When Minutes Count: What A Corporate Secretary Should Keep In Mind*, Bus. Law Today, Jan./Feb. 1997, at 36. For example, use of the word "discussion" may be more appropriate than use of the word "argue." Further, as words can often take on unintended meanings, varying word choices throughout minutes should be avoided. Minutes should be drafted in as consistent a manner as possible.

(n22)Footnote 22. *In re Netsmart Techs. S'holders Litig.*, 924 A.2d 171 (Del. Ch. 2007), where the court granted shareholders' motion for a preliminary injunction against the consummation of a merger pending further disclosure, demonstrates the significance of this point. In that case, a special committee approved minutes of ten previous meetings dating back several months at one time (and only after litigation for this case commenced). Vice Chancellor Strine noted "[t]hat tardy, omnibus consideration of meeting minutes is, to state the obvious, not confidence-inspiring" *Id.* at 191. This analysis prompted a renewed surge of advisories on the importance of timely review. See, e.g., Cullen M. Godfrey, *In re the Walt Disney Company Derivative Litigation: A New Standard for Corporate Minutes*, 17-Aug Bus. L. Today 47, 49-50 (July/Aug. 2008).

(n23)Footnote 23. Society of Corporate Secretaries and Governance Professionals, *Corporate Minutes: A Monograph for the Corporate Secretary* 12 (2006). At a minimum, corporate minutes should include: (1) the meeting date and time and list of attendees; (2) the topics discussed; (3) the matters voted on and outcome of such vote; (4) whether anyone abstained from voting or certain discussions; (5) the material terms and rationale of any decision; (6) the individual who prepared the minutes; and (7) the time of adjournment. See American Bar Association Committee on Corporate Laws, *Corporate Director's Guidebook* 5th Ed. 45 (2008).

(n24)Footnote 24. The Delaware Chancery Court decision, *In re The Walt Disney Company Derivative Litig.*, handed down in May 2003, suggests that increased attention should be invested in the drafting of corporate minutes. See *In re The Walt Disney Company Derivative Litig.*, 825 A.2d 275 (2003). There, the company's board of directors approved the hiring of Disney's new president (a close personal friend of the CEO) after practically no review of the terms of his employment or the employment agreement itself. In concluding that plaintiffs' complaint sufficiently alleged a breach of the directors' obligation "to act honestly and in good faith in the corporation's best interests ... [such that the] directors' conduct fell outside the protection of the business judgment rule," the court noted that "[l]ess than one and one-half pages of the fifteen pages of ... minutes were devoted to discussions of [the] hiring[,] ... [n]o presentations were made to the [board] regarding the terms of the draft agreement[,] ... [n]o questions were raised, at least so far as the minutes reflect [and] ... no expert consultant was present to advise the compensation committee or the [board]." *Disney*, 825 A.2d at 287.

While the Delaware Supreme Court ultimately found that the board's actions were protected under the business judgment rule, the Chancery Court decision nonetheless evidences the willingness of courts to review corporate minutes closely in reviewing a board's deliberative process. *In re The Walt Disney Company Derivative Litig.*, 906 A.2d 27 (Del. Jun. 8, 2006).

(n25)Footnote 25. In a discovery hearing in *OmniCare v. NCS HealthCare, Inc.*, the court held that "notes taken at

meetings, whether taken by directors or taken by someone acting as secretary, are properly discoverable." Transcript and Teleconference on Plaintiff's Motion to Compel at 13, *Omnicare v. NCS Healthcare, Inc.*, C.A. 19800 (Del. Ch. Oct. 16, 2003). With respect to draft minutes, the court also held that it is "appropriate to limit the review of ... drafts to the final minutes as they are approved by the board, except of course in circumstances where there are no final minutes and the exigencies of litigation require that the latest draft that is available be produced subject to whatever caveat may be necessary to its final authenticity." Transcript and Teleconference on Plaintiff's Motion to Compel at 14, *Omnicare v. NCS Healthcare, Inc.*, C.A. 19800 (Del. Ch. Oct. 16, 2003). In light of this decision, once final minutes are approved describing the events of a meeting, corporate secretaries may choose not to retain any notes they have taken either.

(n26)Footnote 26. Stored minutes should contain all the information provided to the board, including memos and PowerPoint presentations, in order to facilitate demonstration of the fact that the board's decisions were based on an adequate deliberative process, and to assist with director recollection. *See American Bar Association Committee on Corporate Laws, Corporate Director's Guidebook* 5th Ed. 46 (2008); Jaclyn Jaeger, *Board Liability in a Down Economy*, Compliance Week (Oct. 28, 2008).

(n27)Footnote 27. *See Corporate Governance Records: Solving the Three-Ring Binder Problem*, The Metropolitan Corporate Counsel, April 2006, Northeast Edition, Volume 14, No. 4, at 55.

(n28)Footnote 28. Maintaining the minutes electronically creates a record of changes and may therefore also decrease the chances for minutes tampering. *See Brendan Sheehan, Minutes of Integrity*, Corporate Secretary, June 2007. Further, some encourage the implementation and documentation of safeguards against tampering with minutes. *See Broc Romanek, Implement and Document Safeguards Against Tampering of Minutes*, at <http://www.thecorporatecounsel.net/member/FAQ/Minutes/043-minutes.htm>.

§ 14.05 The Chief Governance Officer

Although the position of chief governance officer is still a relatively new one,ⁿ¹ corporate scandals, changes in SRO listing standards and the adoption of the Sarbanes-Oxley Act have resulted in an increase in the number of executives whose main duty is to manage the entity's corporate governance regime.ⁿ² The once rare position of chief governance officer, long encouraged by the Society of Corporate Secretaries & Governance Professionals,ⁿ³ has become more popular.

A vigilant chief governance officer can identify potentially damaging governance issues and mitigate or prevent resulting damage to the company. The chief governance officer is the company's "in-house watch dog, or chief whistleblower, vigilantly overseeing the operations of the organization and protecting the interests of the directors and investors."ⁿ⁴ He or she should maintain a company's corporate governance regime and "act as a liaison with the board and the investing community."ⁿ⁵ Specifically, an effective corporate governance officer can perform the following functions:

- receive, document, organize and respond to concerns voiced by major shareholders and report those concerns to the board of directors, applicable committees and senior management, as appropriate;ⁿ⁶
- inform the company's directors of recent corporate governance trends and issues;ⁿ⁷
- act as a liaison to corporate governance rating agencies to help ensure the company's corporate governance rating is accurate;ⁿ⁸
- communicate with the underwriters of the company's directors and officers insurance policy; and
- assist in the recruitment of independent directors by helping to assess director independence.ⁿ⁹

A chief governance officer can assume many of the corporate governance-related responsibilities of various members of senior management.ⁿ¹⁰ In fact, a number of companies have designated their corporate secretary or other officers as the

chief governance officer.ⁿ¹¹ Whether or not a company requires a dedicated chief governance officer, however, depends on many variables, including its size, structure, internal culture, industry and the effectiveness of its existing governance policies. In many companies, the general counsel or the corporate secretary might take on the responsibilities of the position.ⁿ¹²

The person who does accept the responsibilities of chief governance officer should have sufficient time and resources to establish, monitor and evaluate the effectiveness of the company's governance objectives. To this end, a successful chief governance officer should have the support of the company's senior management team and should also be able to report directly to the board on matters involving management misconduct or corporate governance disruptions.ⁿ¹³

2-14 Corporate Governance: Law and Practice § 14.06

AUTHOR: John F. Olson Ari B. Lanin

§ 14.06 Compliance and Ethics Programs, the Compliance Function and the Chief Compliance Officer

[1] Compliance and Ethics Programs

Both as a legal and a practical matter, company-wide compliance and ethics programs "designed to prevent and detect criminal conduct" should be established and maintained.ⁿ¹ First, as explained further below, maintaining an effective compliance and ethics program can help a company defend itself against civil litigation by providing an evidentiary basis for the argument that the misconduct in question may only have been an anomaly. That being the case, not having such a program can help a plaintiff argue just the opposite - that the corporation should be liable for additional and perhaps punitive damages for its disregard of prudent and established behavior. Second, the adoption of a compliance and ethics program can have similar effects in the criminal context as well. For example, the United States Department of Justice takes into account the existence and effectiveness of a company's compliance program in evaluating whether to initiate a prosecution. This was initially articulated in an internal Department of Justice memorandum known as "Principles of Federal Prosecution of Business Organizations" (informally referred to as the "Thompson Memo") and is now contained in Title IX, Chapter 9.28.000 of the United States Attorney's Manual (the "Manual").ⁿ² The Manual lists nine factors prosecutors should consider in determining whether to charge a corporation.ⁿ³ Most notably, among those factors are "the existence and adequacy of the corporation's compliance program" and "the corporation's remedial actions, including any efforts to implement an effective corporate compliance program or to improve an existing one ...".ⁿ⁴ The importance of this mandate cannot be overstated. According to Chris Wray, a former Assistant Attorney General in charge of the Department of Justice's Criminal Division, "[t]he Thompson Memo [was] designed to shape and guide prosecutor's decisions in terms of whether or not to charge a company in the first instance."ⁿ⁵ Thus, the existence of an adequate compliance program may help a company avoid prosecution altogether. In the event prosecution cannot be avoided, additional incentives for the establishment of a compliance and ethics program continue to exist. Notably, in 1991, pursuant to the Sentencing Reform Act of 1984, the United States Sentencing Commission adopted Organizational Sentencing Guidelines (the "Sentencing Guidelines").ⁿ⁶ The Sentencing Guidelines were substantially revised in 2004.ⁿ⁷ The Sentencing Guidelines set forth a uniform structure for companies to be sentenced for violations of federal criminal statutes. Though not binding on the courts, the Sentencing Guidelines also provide that the existence of an internal compliance and ethics program for the detection, prevention and reporting of criminal conduct in the workplace in accordance with seven requirements that should serve as the basis for a qualifying

compliance program can justify a substantial reduction in any applicable fine or penalty that may be assessed against the company.ⁿ⁸ In order to attain the leniency advised by the Sentencing Guidelines, a company must have a compliance and ethics program that includes, at a minimum, the following seven criteria:ⁿ⁹

1. *Standards and procedures must be established to prevent and detect criminal conduct.* These standards and procedures should be tailored to address a broad range of unacceptable conduct, including criminal conduct, and should be written and documented in employee handbooks, corporate policy manuals and internal auditing practices.

2. *The company's board of directors must be knowledgeable about the content and operation of the compliance and ethics program and must exercise "reasonable oversight" over the program and high level personnel (including directors and senior management) must be engaged to establish, implement and maintain the compliance and ethics program and must have "overall responsibility" for the program's effectiveness and "ensure" that the program is actually effective.* These individuals should focus on requiring compliance at all levels of the company, including the senior management team. The compliance program should also be subject to director oversight and periodic audit committee review and evaluation. Additionally, an individual should have operational responsibility for the program and report to the board on the program's "implementation and effectiveness".

3. *Candidates to whom substantial authority is delegated must be screened for past illegal or unethical conduct.* The company should also document its selection and screening procedures. These procedures can include background checks, interviews and employee questionnaires.

4. *Reasonable steps must be taken to train directors, officers, employees and agents with respect to compliance.* In enhancing the compliance-consciousness of its employees and directors, the compliance department must be careful to avoid a "here it is, read it, sign it, you're now responsible for complying with it" attitude.ⁿ¹⁰ Training should be vibrant and oriented toward helping employees and directors understand what the compliance program is, how it works and what is expected of them, and employees should be made to know the consequences of any misconduct as well as who to turn to with questions or evidence of misconduct.ⁿ¹¹ Directors should be trained using techniques that balance the requirements of the Sentencing Guidelines, the interests of the organization and directors' busy schedules. Possibilities include providing regular compliance briefings at board meetings and making employee ethics training classes available to directors.

5. *Reasonable steps must be taken so that the compliance and ethics program is followed, and to review the effectiveness of the program and to publicize a system whereby employees and agents may report or seek guidance regarding criminal conduct without fear of retaliation.* Monitoring and auditing systems can include periodic employee questionnaires, interviews and establishment of a reporting system whereby employees can report potential unlawful behavior to the compliance department (such as an anonymous telephone number or procedure for sending in tips). Note also, that pursuant to Section 301 of the Sarbanes-Oxley Act and the rules thereunder adopted by the SEC, audit committees are obligated to establish procedures for the receipt, retention and treatment of complaints and the anonymous submission by employees of concerns regarding questionable accounting or auditing matters.ⁿ¹²

6. *The compliance and ethics program must be promoted and enforced consistently through appropriate incentives and disciplinary measures.* In order for the compliance and ethics program to be effective, it must be applied uniformly to everyone, regardless of rank, seniority or position. The board and senior management team must also adhere to any compliance policy enforced by the compliance department, lest the employees may, as a whole, come to acknowledge the compliance policy as mere hypocrisy.ⁿ¹³ Formal, independent investigations of compliance breaches should be considered. In the event of a

violation, the compliance department can consider sanctions against the employee who engaged in the unlawful behavior, as well as the employees that should reasonably have known of such behavior.

7. *After criminal conduct is detected, reasonable steps must be taken to respond appropriately and to prevent further similar criminal conduct, including making necessary modifications to the program.*

According to the Sentencing Guidelines, in implementing a compliance and ethics program, the company must also "periodically assess the risk of criminal conduct and ... take appropriate steps to design, implement, or modify each requirement set forth [above] to reduce the risk of criminal conduct identified through this process" including assessing (i) the nature and seriousness of such criminal conduct, (ii) the likelihood that certain criminal conduct may occur in light of the company's business and (iii) the prior history of the company.ⁿ¹⁴

In addition to the potential sentencing leniency afforded by the Sentencing Reform Act and the Sentencing Guidelines themselves, in 1996 the Delaware Chancery Court provided a further incentive for companies to maintain compliance programs. In *In re Caremark International Inc. Derivative Litigation*, a patient health care provider pleaded guilty to paying referral fees to physicians in violation of federal law and was forced to pay two hundred fifty million dollars in fines.ⁿ¹⁵ Shareholders responded by filing a derivative suit, alleging that the directors had breached their duty of care by failing to supervise employees' conduct appropriately. The case ultimately settled.

In approving the settlement, the Delaware Chancery Court considered the scope of the board's responsibility "with respect to the organization and monitoring of the enterprise to assure that the corporation functions with the law to achieve its purposes."ⁿ¹⁶ The court noted that a board of directors has a duty to attempt in good faith to assure that a corporate information and reporting system (that the board concludes is adequate) exists, and further indicated that any rational director acting in good faith would take into account the opportunities for reduced penalties offered by the Sentencing Guidelines.ⁿ¹⁷ The Chancery Court's position should be heeded by boards of directors as plaintiffs may be quick to blame the board for violations which occur in the absence of an effective compliance and ethics program.

More recently, in *In re Abbott Laboratories Derivative Litigation*, plaintiff shareholders sued Abbott Laboratories' board of directors alleging they had breached their fiduciary duties by permitting safety violations of Food and Drug Administration rules.ⁿ¹⁸ Despite numerous warnings from the FDA, the directors of the company took no action, resulting in the largest civil fine imposed by the to that date FDA and the destruction and suspension of products worth two hundred fifty million dollars. Citing *Caremark*, the court stated that director liability may arise from the breach of the duty to exercise appropriate attention to potentially illegal corporate activities from "an unconsidered failure of the board to act in circumstances in which due attention would, arguably, have prevented the loss ... [A] sustained or systematic failure of the board to exercise oversight ... will establish the lack of good faith that is a necessary condition to [director] liability."ⁿ¹⁹

Companies should also take note of two additional cases, *United States v. Merck-Medco Managed Care, L.L.C.* and *Stone v. Ritter*. *United States v. Merck-Medco* indicates that failure to maintain an effective compliance and ethics program can lead to grave outcomes in litigation.ⁿ²⁰ Here, the Department of Justice brought a civil claim against Medco Health under the False Claims Act (FCA). Under the FCA, companies may be liable if they "knowingly" submit false claims paid with federal funds, or if they are found to have acted in "reckless disregard" or "deliberate ignorance" of the truth or falsity of the claims. Rather than attack Medco Health's knowledge of the false claims, the DOJ posited that Medco Health acted "with reckless disregard" of the truth or falsity of the information submitted to the United States because its board of directors and officers did not implement a proper compliance and ethics program. In enumerating the actions that Medco Health's board and officers failed to take, the DOJ largely tracked the seven criteria for an effective compliance and ethics program under the Sentencing Guidelines listed above. The court ultimately held that the failure to maintain an effective compliance program was sufficient to support the allegation that the company submitted false claims with "reckless disregard" under the FCA, despite the absence of any allegation that senior management knew the false claims were submitted.ⁿ²¹

In *Stone v. Ritter*, a case involving AmSouth Bancorporation, the company was subjected to \$50 million in fines and civil penalties for allegedly failing to fulfill its disclosure and reporting obligations under the Bank Secrecy Act and anti-money laundering rules with respect to activities of certain bank customers that were engaged in a "Ponzi" scheme that took place over the course of two years. The Delaware Supreme Court affirmed the Court of Chancery's decision to apply the so-called "*Caremark*" standard for assessing a director's personal liability for failing to act in good faith in discharging his or her oversight responsibilities. As the standard is described by the Supreme Court in this case, directors can be held liable based on alleged failures to satisfy their oversight responsibility only if:

(a) the directors utterly failed to implement any reporting or information systems or controls; or (b) having implemented such a system or controls, consciously failed to monitor or oversee its operations thus disabling themselves from being informed of risks or problems requiring their attention. In either case, imposition of liability requires a showing that the directors knew that they were not discharging their fiduciary obligations. n22

Before applying this standard to the facts, the Supreme Court noted that because most of the decisions a corporation makes (through its human agents) are not the subject of director attention, "a claim that directors are subject to personal liability for employee failures is possibly the most difficult theory in corporation law upon which a plaintiff might hope to win a judgment." n23 Because AmSouth had systems in place to deter and detect such suspicious activity, the Delaware Supreme Court declined plaintiffs' invitation "to equate a bad outcome with bad faith" and concluded that the Court of Chancery was correct in dismissing plaintiffs' claims. Directors should take some comfort in knowing that Delaware law imposes a heavy burden on plaintiffs seeking to impose personal liability on corporate directors in these types of circumstances.

In a 2007 decision, the Delaware Chancery Court similarly refused to equate the occurrence of illegal behavior with *per se* deficient internal controls and dismissed plaintiff's complaint for failing to plead relevant facts with particularity, again showing the heavy burden on plaintiffs seeking to impose personal liability on corporate directors.n24

In addition to the incentives offered by reducing the company's exposure to various legal actions, an effective compliance program also offers more direct financial benefits due to the growing number of organizations that offer various forms of ratings and rankings to assess a company's corporate governance.n25 For example, Standard and Poor's ("S&P") will, at a company's request, perform an extensive review of the company's corporate governance practices, which may result in a rating modification that can act as either a positive or negative sign to investors.n26 Buttressing the contention that good governance can provide a financial boost to a company, an S&P white paper found that greater corporate transparency and disclosure were correlated with lower market risk and higher stock valuation.n27 These ratings can also greatly impact day-to-day operations of a company, as a poor rating often mobilizes dissident shareholders to pool resources and enact shareholder proposals that otherwise could not have garnered sufficient support.n28

In light of the decisions described above taken as a whole, the Sentencing Guidelines, and Sarbanes-Oxley Act Sections 301 (relating to whistle blowing procedures), 406 (relating to codes of ethics) and 806 (relating to prohibitions against retaliations against whistle blowers), as well as self-regulatory organization rules that relate to codes of conduct and ethics and the audit committee's responsibility to oversee legal and regulatory requirements and discuss policies with respect to risk assessment and management and the increasing consideration of compliance programs afforded by ratings agencies, companies and their compliance officers should pay close attention to the effectiveness of their compliance and ethics programs and review and update these programs periodically.

[2] The Compliance Function and the Chief Compliance Officer

The task of monitoring and enforcing a company's compliance program and implementing legal and regulatory

compliance generally can either be centralized or dispersed throughout the company, and can involve various executives, employees, directors and resources. Many companies have opted to designate a single chief compliance officer, who may be the general counsel, the head of internal audit, the corporate secretary or, depending on the size and needs of the company, an officer whose job function is wholly dedicated to corporate compliance.ⁿ²⁹ Other actors can support the compliance officer in their implementation of the company's compliance function. For example, corporate controllers assist with regulatory compliance and SEC filing requirements and the internal auditors and the head of internal audit monitor the company's accounting policies and internal control over financial reporting.ⁿ³⁰ Once the compliance officer is designated, companies should consider to whom the compliance officer reports. While there is no one correct answer, compliance officers often report directly to a senior member of management, such as the CEO or the general counsel, or directly to the audit committee. In any event, the compliance officer should have open to it a direct channel of communication to the audit committee. Many companies have also established an internal management committee to oversee compliance. Depending upon the company's size, this committee may consist of the compliance officer (if there is such a designated officer), general counsel, CFO, head of human resources and the head of internal audit.

However the company ultimately establishes its compliance function, in order for those responsible for corporate compliance to deter wrongdoing effectively and enforce their company's compliance and ethics program, they must have adequate resources to draw from. Those involved in monitoring compliance should have appropriate training, and compliance teams should be staffed with motivated, qualified and career oriented employees. Companies should communicate to their employees the message that participation in the compliance function offers the chance not only to gain an understanding of the company and the industry, but for increased opportunities within the corporation.

Those implementing the compliance function should also have the authority and backing of their company's senior management team and be authorized to sanction, and even fire employees who engage in conduct that violates the company's compliance program or broader code of conduct.ⁿ³¹ A compliance function being carried out by those following a clear mandate set by senior management or the board of directors is more likely to be effective.

FOOTNOTES:

(n1)Footnote 1. *See* USSG § 8B2.1 Commentary Application Note 1. Compliance and ethics programs should be established as part of a broader risk management program. In September 2004, COSO released Enterprise Risk Management-Integrated Framework, which describes the components and principles of enterprise risk management for companies to identify and avoid risks. According to COSO, the underlying premise of enterprise risk management is that the purpose of entities is to provide value to shareholders-in so doing, management must determine what level of uncertainty the entity can accept. Enterprise Risk Management is defined as "a process, effected by an entity's board of directors, management and other personnel, applied in a strategy setting and across the enterprise, designed to identify potential events that may affect the entity, and manage risk to be within its risk appetite, to provide reasonable assurance regarding the achievement of entity objectives." Committee of Sponsoring Organizations of the Treadway Commission, Enterprise Risk Management-Integrated Framework, Executive Summary (Sep. 2004). Certain types of companies, such as brokerage firms, have long been required to have compliance programs. Section 15(b)(4)(E) of the 1934 Act authorizes disciplinary proceedings against brokerage firms (and associated individuals) for failing to

reasonably supervise those who commit 1934 Act violations. A defense is available, however, if the brokerage firm can show that a reasonable compliance program had been implemented. Additionally, in December 2003, the SEC adopted rules which require investment companies and investment advisers to adopt and implement compliance programs. *See* SEC Release IA-2204 (Dec. 17, 2003). Section 406 of the Sarbanes-Oxley Act and the SEC's related rules require companies to disclose whether they have adopted codes of ethics covering the CEO and senior financial officers. Further, Section 303A.10 of the NYSE Listed Company Manual requires companies with securities listed on the NYSE to adopt and disclose a code of business conduct and ethics for directors, officers and employees containing compliance standards and procedures. *See* NYSE Listed Company Manual § 303A.10. Compliance and codes of corporate conduct are discussed in Chapter 13 *above*. Nasdaq's Marketplace Rules contain a similar provision. *See* NASD Rule 5610.

(n2)Footnote 2. *See* U.S. Attorney's Manual ch. 9.28.000 (2008), at http://www.usdoj.gov/usao/eousa/foia_reading_room/usam/title9/28mcrm.htm; *Principles of Federal Prosecution of Business Organizations* (at www.usdoj.gov/dag/cftf/corporate_guidelines.htm).

(n3)Footnote 3. In summary, the factors listed in the Manual and the Thompson Memo are: (1) the nature and seriousness of the offense; (2) the pervasiveness of the wrongdoing; (3) the company's history of similar conduct; (4) the company's timely and voluntary disclosure of wrongdoing and willingness to cooperate in the investigation (including, under certain circumstances, the waiver of attorney-client privilege and work product protection); (5) the existence and adequacy of the company's pre-existing compliance program; (6) the remedial actions taken by the company, including any efforts to implement an effective corporate compliance program or to improve an existing one; (7) the collateral consequences arising from the prosecution; (8) the adequacy of the prosecution of individuals for the company's malfeasance; and (9) the adequacy of civil or regulatory enforcement. *See* U.S. Attorney's Manual ch. 9.28.000 (2008), at http://www.usdoj.gov/usao/eousa/foia_reading_room/usam/title9/28mcrm.htm; A memorandum from Deputy Attorney General Paul, J. McNulty also entitled "Principles of Federal Prosecution of Business Organizations" (informally referred to as the "McNulty Memo") and announced by the Department of Justice on December 12, 2006 superseded the Thompson Memo. Though the factors listed above remained in tact, the new policy made changes to the circumstances under which attorney-client communications should be sought. *See Principles of Federal Prosecution of Business Organizations* (available at www.usdoj.gov/dag/speeches/2006/mcnulty_memo.pdf). The McNulty memo was then superseded by Ch. 9.28.000 of the Manual on August 28, 2008, which further sought to clarify how issues regarding attorney-client privilege were addressed.

(n4)Footnote 4. *See* U.S. Attorney's Manual ch. 9.28.000 (2008), at http://www.usdoj.gov/usao/eousa/foia_reading_room/usam/title9/28mcrm.htm.

(n5)Footnote 5. *The Justice Department's Rational Approach to Deterring Corporate Crime*, The Metropolitan Corporate Counsel: Special Section: Project: Corporate Counsel Part I (Unintended Consequences) at 35 (July 2005). Similarly, the SEC has also noted that the state of an organization's compliance program will be a factor in deciding whether or not to bring an enforcement action, or may result in reduced penalties if an action is ultimately commenced. Among the factors listed by the SEC related to corporate compliance are: 1) What compliance procedures were in place to prevent the misconduct now uncovered?; 2) Why did those procedures fail to stop or inhibit the wrongful conduct?; and 3) How long after discovery of the misconduct did it take to implement an effective response? *See* Report of Investigation Pursuant to Section 21(a) of the Securities Exchange Act of 1934 and Commission Statement on the Relationship of Cooperation to Agency Enforcement Decisions, 1934 Act Release No. 44,969 (Oct. 23, 2001). [Project Corporate Counsel Part I (Unintended Consequences)* *The Justice Department's Rational Approach to Deterring Corporate Crime*, The Metropolitan Corporate Counsel, July 2005, Northeast Edition, Special Section, at 35.

(n6)Footnote 6. *See* USSG § 8B2.1.

(n7)Footnote 7. Pursuant to Section 805(a) of the Sarbanes-Oxley Act, on April 30, 2004, the United States Sentencing Commission delivered to Congress amendments to the Sentencing Guidelines, including revisions to the criteria a company must follow in order to have an effective compliance program. The amendments took effect on

November 1, 2004. The criteria, the amendments and the Sentencing Guidelines are discussed in further detail in § 13.02[2][b] above and the amended guidelines are reproduced in Appendix 13-A to Chapter 13 above.

(n8)Footnote 8. On June 24, 2004, the United States Supreme Court cast doubt on the constitutionality of the Sentencing Guidelines in holding that the state of Washington's sentencing guidelines were unconstitutional because they permitted a judge, and not a jury, to consider factors that could increase a defendant's criminal penalty. See *Blakely v. Washington*, 124 S. Ct. 2531 (2004). The decision did not address the constitutionality of the Federal Sentencing Guidelines. On January 12, 2005, however, the United States Supreme Court answered the constitutionality question posed in *Blakely*, and declared the Sentencing Guidelines to be in violation of the *Sixth Amendment* right to a jury trial. See *United States v. Booker* 543 U.S. 220, 125 S. Ct. 738, 160 L. Ed. 2d 621 (2005). By severing two key provisions of the Sentencing Guidelines, the Supreme Court, in effect, transformed the guidelines from a binding system to an advisory system. Federal courts may now *choose* to take the factors set forth in the Sentencing Guidelines into effect when sentencing criminals, but are not obligated to do so. In the majority opinion, Justice Breyer noted that the body of federal sentencing appellate law delivered by federal courts since the Sentencing Guidelines were adopted remains in effect to guide the courts. While the *Booker* and *Fanfan* decisions applied to individuals, it is likely that they will be applied to organizations as well in the future (though it remains unclear whether a corporation has a *Sixth Amendment* right to a jury trial). Notwithstanding, companies should continue to heed the definition of an effective compliance and ethics program, as courts are likely to continue to consider the guidelines when evaluating the effectiveness of corporate compliance and ethics programs and the SEC, Department of Justice and other government agencies are likely to consider them when determining whether action is warranted.

CHAPTER 14 ROLES AND RESPONSIBILITIES OF NON-BOARD PARTICIPANTS IN CORPORATE GOVERNANCE

2-14 Corporate Governance: Law and Practice § 14.07

AUTHOR: John F. Olson Ari B. Lanin

§ 14.07 The General Counsel

[1] The Role of Lawyers

As a general matter, the company's inside and outside counsel act as advisors to the board of directors and senior management and often participate in the structuring, negotiation and documentation of business transactions. In addition to carrying out these responsibilities, an effective corporate attorney also counsels the board of directors in carrying out its responsibilities. "[A] prudent corporate governance program should call upon lawyers-notably general counsel-to assist in the design and maintenance of the corporation's procedures for promoting legal compliance."¹

The attorney's role in establishing and maintaining a system of sound corporate governance differs from that of the outside auditor, the company's other retained professional. While the outside auditor expects that its audit report may be relied on by the users of the audited financial statements and must maintain its independence from the corporation and its management, lawyers are trained advocates that owe their loyalty to the corporation.² Corporate attorneys must remain cognizant of this obligation to the company despite the fact that their continued employment rests in the hands of senior management. As stated in the Report of the ABA Task Force on Corporate Responsibility:

[L]awyers for the public corporation must bear in mind that their responsibility is to the corporation, and not to the corporate directors, officers or other agents with whom they necessarily communicate in representing the corporation. [Attorneys should understand the business goals of the executive officers of their corporate clients, but] at the same time retain the professional detachment that allows them to recognize and point out issues of legal compliance, even at the risk of being perceived as unduly pessimistic or obstructive of the business plans sought by the corporation's executive officers. There are times, moreover, when the corporate lawyer must recognize that his or her own independence may be compromised by relationships with senior executive officers; at such times, the lawyer's responsibility may require him or her to assure that the corporate client retains other counsel who can exercise the requisite professional detachment.³

"Preventive lawyering," the concept that legal, regulatory and governance problems can be avoided through monitoring and early detection, has long encouraged corporations to establish counsel-structured compliance programs dedicated to

early detection.ⁿ⁴ In order for the company's general counsel to employ early detection safeguards effectively, CEOs and other members of the senior management team should implement procedures designed to help critical information flow through to the general counsel. The general counsel can also gain access to critical information by participating in the company's board and committee meetings and interacting with management on a real-time basis. Of course, in order to review and process the information collected as a result of these efforts appropriately, the general counsel must have adequate staff assistance.

Though inside counsel is not required to certify as to periodic reports, he or she should advise the CEO and CFO as to the purposes and effects of the certifications required by the Sarbanes-Oxley Act as well as the penalties for certifying falsely. Inside counsel should also participate in the establishment, maintenance and evaluation of internal control over financial reporting and disclosure controls and procedures. Ideally, the general counsel's (or other in-house attorney's) strong knowledge of SEC rules and regulations and exposure to critical information about the company will put him or her in a unique position to determine the materiality of information to be disclosed in public filings.

[2] The General Counsel's Role in Maintaining Good Corporate Governance

From a governance perspective, the general counsel is, in part, responsible for bringing legal compliance matters to the attention of appropriate authorities within the corporation. Among other things, the general counsel is responsible for overseeing the company's reporting obligations, assessing the company's adherence to applicable laws and regulations and evaluating employee conduct. In order for the general counsel to fulfill these responsibilities, he or she should closely monitor the flow of information within the corporation. As such, companies should consider the following:

- *The general counsel should communicate regularly with senior management.* Communicating regularly with senior management will expose the general counsel to business strategies, governance decisions and discussions regarding financial reporting, internal control over financial reporting and disclosure controls and procedures. Ongoing communication will also put the general counsel in a better position to offer suggestions as issues arise.
- *Independent directors should meet regularly with the general counsel.* Allowing the general counsel to meet regularly with the independent directors gives the general counsel an opportunity to update them on actions taken by senior management.ⁿ⁵ Ritualizing meetings and communications between the general counsel and the independent directors is also likely to improve compliance with the attorney conduct rules adopted pursuant to Section 307 of the Sarbanes-Oxley Act, described in § 14.07[3] below. Regular meetings facilitate fluid interaction by making such reports part of a program of ongoing communication. The mere fact that the general counsel is expected to make such routine reports could even dissuade senior executives from acting in a potentially violative manner to begin with.
- *The general counsel should have an ongoing relationship with outside counsel.* The general counsel should have a direct and ongoing relationship with the company's outside counsel and encourage these attorneys to advise him or her as to any existing or pending violations of law and legal developments. As discussed in § 14.07[3] below, the rules adopted pursuant to Section 307 of the Sarbanes-Oxley Act require certain in-house and outside attorneys to report evidence of material violations of law to an issuer's chief legal officer, chief executive officer and board of directors.ⁿ⁶ If outside counsel alerts the general counsel to an existing or potential violation, the general counsel should in turn take other appropriate remedial action or communicate the discovery to higher corporate authorities. As noted by the ABA Task Force, a regular line of communication will "make subsequent communications between outside counsel and general counsel less an insurrection and more of a routine practice, enhancing the likelihood that information concerning potential corporate misconduct will flow to persons (notably the general counsel) in a position to investigate and take action to prevent or rectify the problem."ⁿ⁷

■ *The company should understand the general counsel's role.* While the general counsel often acts as the trusted advisor to senior management and the CEO, an understanding should be established with key corporate officers that the general counsel's (like outside counsel's) ultimate duties lie with the corporation as represented by the board of directors, not with management or individual officers of the corporation.

[3] The SEC Attorney Conduct Rules

[a] Overview

The attorney's role in its client's or employer's corporate governance system generally has been governed by a combination of self-regulation and unrestrictive state law and ethical rules. For the most part, attorneys have been free to communicate with and within their clients as much or as little as required by their engagement and their client's needs.ⁿ⁸ To the extent that attorney conduct and communication has been subject to regulation, that regulation has generally been a product of state law and bar associations, rather than federal law and federal rule making. Of course, the SEC has, in the past, brought administrative proceedings against attorneys for "unethical conduct". These proceedings were brought on the theory that lawyers act as "gatekeepers" to the securities markets. For example, in the 1981 case, *Carter v. Johnson*, the SEC went so far as to interpret Rule 102(e) of its Rules of Practice as requiring lawyers who learn of "substantial and continuing" disclosure violations by their clients to "take prompt steps to end the client's noncompliance."ⁿ⁹ The following year, however, the SEC retreated from this interpretation, announcing that "[w]ith respect to attorneys, the Commission generally has not sought to develop or apply independent standards of professional conduct. The great majority of Rule 102(e) proceedings against attorneys involve allegations of violations of the law (not of professional standards); thus, the Commission, as a matter of policy, generally refrains from using its administrative forum to conduct *de novo* determinations of the professional obligations of attorneys."ⁿ¹⁰

Notwithstanding prior interpretations of Rule 102(e), with the enactment of Section 307 of the Sarbanes-Oxley Act, the SEC became officially responsible for developing rules governing professional conduct for lawyers "appearing and practicing" before the SEC. Section 307, entitled "Rules of Professional Responsibility for Attorneys," specifically directed the SEC to issue rules "setting forth minimum standards of professional conduct for attorneys appearing and practicing before the [SEC] in any way in the representation of issuers, including a rule ... requiring an attorney to report evidence of a material violation of securities law or breach of fiduciary duty or similar violation" by an issuer-client or its agent "up the ladder" within the client's ranks.ⁿ¹¹ By giving the SEC direct authority to promulgate standards of conduct for attorneys, Section 307 imposed federal regulation upon attorney conduct—an area that, for the most part, had been the domain of state courts and bar associations. As a result, lawyers who appear and practice before the SEC now may be subject to discipline both by the SEC *and* by the states, at least to the extent that state disciplinary proceedings are not inconsistent with Section 307 and related SEC rules (discussed below).ⁿ¹²

In January 2003 the SEC responded to Congress's mandate by adopting initial final rules implementing Section 307. The rules were published in a new Part 205 of Title 17, Chapter II of the Code of Federal Regulations. The standards contained in the rules were meant to supplement standards of the state in which an attorney is admitted or practices and are not intended to limit states from imposing additional obligations on attorneys that are not inconsistent with the rules adopted by the SEC.ⁿ¹³ The rules adopted by the SEC became effective on August 5, 2003.ⁿ¹⁴

The rules require attorneysⁿ¹⁵ "appearing and practicing"ⁿ¹⁶ before the SEC "in the representation of an issuer"ⁿ¹⁷ to report evidence of a material violationⁿ¹⁸ of securities law, breach of fiduciary dutyⁿ¹⁹ or similar material violation by the issuer or its agent "up the ladder" to the issuer's chief legal officer (CLO), who is usually the general counsel, or to both the CLO and the CEO. If the CLO or CEO does not appropriately respond to the evidence presented, the attorney must report the evidence to the issuer's audit committee, another committee composed solely of directors who are not employed by the issuer, or the full board of directors.ⁿ²⁰

[b] "Appearing and Practicing" Before the SEC

The SEC attorney conduct rules apply to attorneys "appearing and practicing" before the SEC in the representation of issuers. Part 205.2(a)(1) defines "appearing and practicing" as follows:ⁿ²¹

- transacting any business with the SEC, including communications in any form;
- representing an issuer in an SEC administrative proceeding or in connection with an SEC investigation, inquiry, information request or subpoena;
- providing advice with respect to the federal securities laws or the SEC's rules and regulations under such laws, regarding any document that the attorney has notice will be filed with or submitted to (or incorporated into any document that will be filed with or submitted to) the SEC; or
- advising an issuer as to whether information or a statement, opinion or other writing is required (under the federal securities laws or the SEC's rules or regulations thereunder) to be filed with or submitted to (or incorporated into any document that will be filed with or submitted to) the SEC.

Though the rules cover only those attorneys who "appear and practice" before the SEC in the representation of an issuer, it may in many cases be difficult to determine whether an attorney is "appearing and practicing" before the SEC. For example, the term could be read to include (among others) attorneys who work on contracts that subsequently are appended to SEC filings, attorneys who represent individual officers, directors or employees at the request of the company, attorneys who provide backup certifications to management and attorneys who respond to audit inquiries. Because the definition raises difficult interpretive questions, many companies have chosen to make their reporting policies applicable to all attorneys, with a supervisory attorney or the CLO deciding whether a particular reporting attorney is covered by the rules. Attorneys retained or directed by an issuer to investigate evidence of a material violation also are deemed to be "appearing and practicing" before the SEC under the rules.ⁿ²² As discussed in further detail below,ⁿ²³ however, special reporting rules apply to these attorneys.

The rules apply only where an attorney is providing legal services to an issuer within the context of an attorney-client relationship. This means, for example, that attorneys at public broker-dealers and other issuers who are licensed to practice law and who may transact business with the SEC, but who are not in the legal department and do not provide legal services within the context of an attorney-client relationship, are not covered by the rules. The rules also do not apply to non-appearing foreign attorneys.ⁿ²⁴ A non-appearing foreign attorney is defined as an attorney who: (1) is admitted to practice law in a jurisdiction outside the United States; (2) does not hold himself or herself out as practicing, and does not give legal advice regarding, United States federal or state securities or other laws; and (3) either conducts activities that would constitute appearing and practicing before the SEC only incidentally to, and in the ordinary course of, the practice of law in a jurisdiction outside the United States, or is appearing and practicing before the SEC only in consultation with U.S. counsel.ⁿ²⁵ The rules also provide that an attorney practicing outside the United States will not be required to comply with the rules to the extent compliance is prohibited by applicable foreign law.ⁿ²⁶

[c] Duty to Report Material Violations

An attorney's reporting obligations are triggered if he or she is appearing and practicing before the SEC in the representation of an issuer and becomes aware of evidence of a material violation by the issuer or by an officer, director, employee or agent of the issuer.ⁿ²⁷ If the attorney becomes aware of such evidence, he or she must report the evidence to the issuer's chief legal officer or to both the CLO and chief executive officer (or to officers with equivalent positions).ⁿ²⁸ If the attorney reasonably believes it would be futile to report to the CLO and CEO, the attorney may report the evidence to the issuer's audit committee, another board committee consisting solely of directors not employed by the issuer, or the full board of directors.ⁿ²⁹

The rules define a "material violation" as a material violation of an applicable United States federal or state securities law, a material breach of fiduciary duty arising under United States federal or state law, or a similar material violation of any United States federal or state law.ⁿ³⁰ The rules set forth an objective standard for what evidence will trigger an attorney's reporting obligations. A reporting obligation is only triggered if the attorney has credible evidence, based upon which it would be unreasonable under the circumstances for a prudent and competent attorney not to conclude it is reasonably likely that a material violation either has occurred, is ongoing or is about to occur.ⁿ³¹

The rules provide that attorneys are not obligated to report evidence of material violations in the following three situations:

- if (i) the attorney was retained or directed by the issuer's CLO to investigate evidence of a material violation, (ii) the attorney reports the results of the investigation to the CLO and (iii) the CLO reports the results of the investigation to the issuer's board of directors, a committee consisting solely of directors who are not employed by the issuer or a qualified legal compliance committee (QLCC);ⁿ³²
- if (i) the attorney was retained or directed by the CLO to assert a colorable defense on behalf of the issuer (or the issuer's agent, as applicable) in an investigation or judicial or administrative proceeding relating to such evidence and (ii) the CLO provides reasonable and timely reports on the progress of that proceeding to the issuer's board of directors, a committee consisting solely of directors who are not employed by the issuer, or a QLCC;ⁿ³³ or
- if the attorney was retained or directed by a QLCC either (i) to investigate evidence of a material violation or (ii) to assert a colorable defense on behalf of the issuer (or the issuer's agent) in any investigation or judicial or administrative proceeding relating to such evidence.ⁿ³⁴

[d] Chief Legal Officer

Upon receiving evidence of a material violation, the chief legal officer must cause an inquiry into the evidence as he or she reasonably believes is appropriate to determine whether the material violation described in the report has occurred, is ongoing or is about to occur.ⁿ³⁵ If the CLO determines that no material violation has occurred, is ongoing, or is about to occur, he or she must notify the reporting attorney and advise him or her of the basis for that determination.ⁿ³⁶ On the other hand, if the CLO cannot make this determination, he or she must "take all reasonable steps to cause the issuer to adopt an appropriate response" and advise the reporting attorney thereof.ⁿ³⁷ Alternatively, the CLO may refer the reported evidence to a QLCC if the QLCC was established prior to the report.ⁿ³⁸

[e] Appropriate Response

If the reporting attorney reasonably believes the CLO or CEO (if applicable) has provided an "appropriate response" to the reported evidence within a reasonable time, the attorney has no further reporting obligations under the rules. If the attorney does *not* believe that the CLO or CEO has provided an appropriate response, however, then the attorney must report the evidence to: (i) the issuer's audit committee; (ii) another board committee consisting solely of directors who are not employed by the issuer; or (iii) the issuer's board of directors (if the board does not have a committee consisting solely of directors who are not employed by the issuer).ⁿ³⁹ Under the rules, an "appropriate response" is a response that leads the reporting attorney to form a reasonable belief that:

- no material violation has occurred, is ongoing or is about to occur;
- the issuer has adopted appropriate remedial measures, including appropriate steps or sanctions to stop any material violations that are ongoing, to prevent any material violation that has yet to occur, and

to remedy or otherwise appropriately address any material violation that has already occurred and minimize the likelihood of its recurrence; or

- the issuer, with the consent of its board of directors, a committee of directors not employed by the issuer, or the QLCC, has retained or directed an attorney to review the reported evidence and has either (i) substantially implemented any remedial recommendations made by such attorney after a reasonable investigation and evaluation of the reported evidence, or (ii) been advised that such attorney may, consistent with that attorney's professional obligations, assert a colorable defense on behalf of the issuer (or the issuer's agent) in any investigation or judicial or administrative proceeding relating to the reported evidence.ⁿ⁴⁰

In determining whether he or she can reasonably believe that a response is appropriate, the reporting attorney may consider the amount and weight of evidence of a material violation, the severity of the apparent material violation, and the scope of the investigation into the report.ⁿ⁴¹

Again, if the reporting attorney does not reasonably believe the CLO or CEO has provided an appropriate response to evidence of a material violation within a reasonable time, the attorney is required to report the evidence to the issuer's audit committee, another board committee composed solely of directors who are not employed by the issuer or the board of directors. If, after reporting the evidence to the audit committee, other committee or the board, the attorney still does not reasonably believe that the issuer has provided an appropriate response within a reasonable time, the attorney must explain the reasons for this belief to the issuer's CLO, CEO and directors to whom the attorney reported the evidence.ⁿ⁴²

The rules set forth alternative reporting procedures for issuers that have established a QLCC.ⁿ⁴³ If an attorney becomes aware of evidence of a material violation by the issuer (or an officer, director, employee or agent of the issuer), the attorney may, as an alternative to the procedures listed above, report such evidence to a QLCC, if the issuer previously formed such a committee.ⁿ⁴⁴ An attorney who reports evidence of a material violation to a QLCC has satisfied his or her obligation to report such evidence and is not required to assess the issuer's response to the reported evidence.ⁿ⁴⁵ In addition, as noted above, the rules permit the CLO to refer a report of evidence of a material violation to a previously established QLCC, rather than causing an inquiry into the evidence, and inform the reporting attorney that the report has been referred to the QLCC.ⁿ⁴⁶ After such a referral, the QLCC becomes responsible for responding to the reported evidence.ⁿ⁴⁷

[f] Qualified Legal Compliance Committee

As mentioned above, the rules authorize, but do not require, an issuer to create a qualified legal compliance committee to provide an alternative procedure for reporting evidence of material violations.ⁿ⁴⁸ A QLCC is defined as a committee of an issuer (which also may be the issuer's audit or other committee) that:

- consists of at least one member of the issuer's audit committee (or an equivalent committee of independent directors if the issuer has no audit committee) and two or more members of the issuer's board of directors who are not employed, directly or indirectly, by the issuer (and who are not "interested persons"ⁿ⁴⁹ in the case of a registered investment company); and
- has adopted written procedures for the confidential receipt, retention and consideration of any report of evidence of a material violation.ⁿ⁵⁰

To meet the regulatory definition of a QLCC, such a committee must also have been established by the issuer's board of directors, with the authority and responsibility to:

- inform the issuer's CLO and CEO of any report of evidence of a material violation;ⁿ⁵¹
- determine whether an investigation is necessary regarding any report of evidence of a material violation by the issuer (or its officers, directors, employees or agents) and, if it determines an investigation is necessary or appropriate, to: (a) notify the audit committee or full board of directors; (b) initiate an investigation, which may be conducted either by the CLO or outside attorneys; and (c) retain such additional expert personnel as the committee deems necessary;ⁿ⁵²
- at the conclusion of any such investigation to: (a) recommend, by majority vote, that the issuer implement an appropriate response to evidence of a material violation; and (b) inform the CLO, CEO and board of directors of the results of any such investigation and the appropriate remedial measures to be adopted;ⁿ⁵³ and
- acting by majority vote, to take all other appropriate action, including the authority to notify the SEC in the event that the issuer fails in any material respect to implement an appropriate response that the QLCC has recommended the issuer to take.ⁿ⁵⁴

Although the QLCC must have the authority and responsibility to recommend that an issuer implement an appropriate response, the QLCC is not required to direct the board of directors to take such action.ⁿ⁵⁵

[g] Disclosure of Confidential Information

The rules adopted pursuant to Section 307 permit attorneys covered by the rules to disclose issuer confidences under specified circumstances. First, any report made by an attorney under the rules (and any response to such a report) may be used by the attorney in connection with any investigation, proceeding or litigation in which the attorney's compliance with the rules is in issue.ⁿ⁵⁶ Second, an attorney appearing and practicing before the SEC in the representation of an issuer may reveal to the SEC, without the issuer's consent, confidential information related to the representation to the extent the attorney reasonably believes necessary:

- to prevent the issuer from committing a material violation that is likely to cause substantial injury to the financial interest or property of the issuer or investors;
- to prevent the issuer, in an SEC investigation or administrative proceeding, from committing perjury or an act that is likely to perpetrate a fraud upon the SEC; or
- to rectify the consequences of a material violation by the issuer that caused, or may cause, substantial injury to the financial interest or property of the issuer or investors in the furtherance of which the attorney's services were used.ⁿ⁵⁷

Although disclosure of confidential information is permitted in these situations by the SEC rules, attorneys should recognize that such disclosure may violate state and local ethics standards. The SEC rules provide that an attorney who complies in good faith with the rules will not be subject to discipline or otherwise liable under inconsistent standards imposed by state or local jurisdictions in which the attorney is admitted or practices. The rules state explicitly that "[w]here the standards of a state or other United States jurisdiction where an attorney is admitted or practices conflict with this part, this part shall govern."ⁿ⁵⁸ . Notwithstanding this provision, however, some state bar associations have indicated that they do not believe the SEC has the authority to preempt their rules governing the attorney-client privilege and protection of client confidences. As a result, an attorney who reveals client confidences under the SEC rules runs the risk of discipline on the state or local level.ⁿ⁵⁹

[h] Supervisory and Subordinate Attorneys

Under the rules, a "supervisory attorney" is an attorney who supervises or directs another attorney who is appearing and practicing before the SEC in the representation of an issuer,ⁿ⁶⁰ and a "subordinate attorney" is an attorney who appears and practices before the SEC in the representation of an issuer on a matter under the supervision or direction of another attorney (other than under the direct supervision of the issuer's chief legal officer or equivalent).ⁿ⁶¹

The rules require a supervisory attorney to make reasonable efforts to ensure that any subordinate attorneys under his or her supervision or direction adhere to the rules.ⁿ⁶² In addition, a supervisory attorney is responsible for complying with the rules' reporting requirements when a subordinate attorney reports evidence of a material violation to him or her.ⁿ⁶³

Subordinate attorneys are required to comply with the rules notwithstanding the fact that they act at the direction or under the supervision of another person.ⁿ⁶⁴ However, a subordinate attorney is deemed to have complied with the reporting requirements if he or she reports evidence of a material violation to his or her supervising attorney.ⁿ⁶⁵

[i] Penalties

Any attorney who violates Part 205 (the rules adopted under Section 307) subjects himself or herself to all civil penalties and remedies for a violation of the federal securities laws available to the SEC.ⁿ⁶⁶ The attorney is also subject to the disciplinary authority of the SEC, regardless of whether the attorney might also be subject to discipline for the same conduct in a jurisdiction where he or she is admitted or practices.ⁿ⁶⁷ However, as noted above, the rules provide that attorneys who comply in good faith will not be subject to discipline or otherwise liable under inconsistent standards imposed by any jurisdiction where the attorney is admitted or practices.ⁿ⁶⁸

The rules also provide a safe harbor to protect attorneys, law firms and issuers from private liability for violations.ⁿ⁶⁹ In this regard, the rules state that: (1) the SEC has the exclusive authority to enforce compliance with Part 205, and (2) Part 205 does not create a private right of action against any attorney, law firm or issuer based upon compliance or non-compliance with its provisions.ⁿ⁷⁰ Notwithstanding this safe harbor, however, it is possible that the plaintiffs' bar could introduce compliance or non-compliance with the rules as evidence in actions against the issuer (for example, alleging that the issuer was informed by its attorneys of a securities law violation but failed to act). In addition, the rules do not expressly preclude plaintiffs from arguing that the rules establish a standard of care for attorneys, and that attorneys who fail to fulfill their reporting obligations are breaching a duty of care to their clients.

[j] Responding to the Up the Ladder Rules

The SEC rules adopted pursuant to Section 307 of the Sarbanes-Oxley Act place significant burdens on issuers and their officers and attorneys. Companies should consider taking the following steps to facilitate compliance with the rules:

- *Discuss the Rules with Management and the Board.* Management and the board of directors should have a general understanding of the obligations the rules place on lawyers and how those rules fit into their company's overall compliance structure.
- *Decide whether to maintain a QLCC.* A QLCC takes the burden off the CLO to investigate and respond to reports of potential material violations and relieves the reporting attorney of his or her obligation to assess the adequacy of the response. Nonetheless, a QLCC places an additional burden on the directors designated to serve on the committee. Many companies will be reluctant to further burden their directors further, and directors may not want to assume the responsibilities associated with serving on such a committee. In addition, permitting attorneys to report directly to a QLCC may prevent the CLO from "filtering out" frivolous or unfounded reports that need not be addressed at the board level.
- *Identify the attorneys who may be covered by the rules.* Companies should identify the in-house

attorneys who may be viewed as "appearing and practicing" before the SEC, and should be aware that this list may change over time. For example, environmental attorneys may become involved in preparing SEC disclosure material when an environmental problem develops, and thus may be viewed as appearing before the SEC in connection with that material. Companies should also coordinate with their outside counsel as to the procedures to be followed if a reporting obligation is triggered by an outside attorney becoming aware of what could amount to a material violation.

- *Develop written policies and appropriate training programs.* Companies should develop and maintain a written policy and appropriate training programs for in-house attorneys who may be covered by the SEC rules to explain key terms, define attorneys' roles and duties, and help them understand and comply with the rules, and should review these policies periodically to confirm that they are up to date and appropriately tailored to the company. Any such attorney conduct policy should address how the rules interact with the company's broader code of conduct and confidentiality policies and should inform the CEO, CLO and board of directors of their obligations under the rules as well. New in-house attorneys should be alerted to their reporting obligations under the rules and trained when they begin employment.

- *Adopt written procedures for the CLO and board of directors.* Companies that have not already done so may want to develop written procedures for the CLO, board of directors and, where relevant, the QLCC, to follow upon receiving a report of a material violation. These procedures might address, for example, the circumstances under which the CLO or the board would conduct an internal investigation and the circumstances under which the CLO or the board might consider hiring an outside attorney to review the report. As noted above, a QLCC must have written procedures for the confidential receipt, retention and consideration of reports under the rules. Guidelines for the reporting of evidence by subordinate attorneys to supervisory attorneys and policies relating the additional oversight and reporting obligations of supervisory attorneys should also be included.

[4] The ABA Model Rules of Professional Conduct

The ABA's Model Rules of Professional Conduct set forth recommendations as to the conduct and responsibilities of lawyers. The rules provide guidance relating to the scope of the attorney-client relationship, the appropriate method in which to respond to evidence of a violation of law and the manner in which attorneys should report such violations. The rules implicate corporate governance as they dictate, to some extent, what attorneys may and may not do when they become aware of legal and regulatory violations that occur within their corporate clients. Though the rules are not binding, state bar associations look to the model rules in establishing their own rules of professional conduct. Model Rules 1.2, 1.6 and 1.13 speak to the attorney's duties and responsibilities in the context of corporate representation.ⁿ⁷¹

Model Rule 1.13 provides, "[a] lawyer employed or retained by an organization represents the organization acting through its duly authorized constituents."ⁿ⁷² The attorney is obligated to the company itself, not its individual directors, officers or employees. If an officer, employee or other person associated with the company "is engaged in action, intends to act or refuses to act" so as to violate the law or a legal obligation to the organization, the lawyer must "proceed as is reasonably necessary in the best interest of the organization," if (1) the lawyer "knows" of the misconduct, (2) the matter "relate[s] to the representation [of the company]" and (3) the misconduct is "likely to result in substantial injury" to the company.ⁿ⁷³ Further, Model Rule 1.13(b) provides that "[u]nless the lawyer reasonably believes that it is not necessary in the best interest of the organization to do so, the lawyer shall refer the matter to higher authority in the organization, including ... the highest authority that can act on behalf of the organization" ⁿ⁷⁴ If this up the ladder reporting does not elicit an appropriate response, the lawyer may proceed to reveal information reasonably believed to be necessary to prevent substantial injury to the company, regardless of the duties of confidentiality imposed by Model Rule 1.6 (described below). Specifically, if (i) the company's highest authority insists upon the action or refuses to address it in a timely and appropriate manner, (ii) the action is "clearly a violation of law" and (iii) the lawyer reasonably believes that the violation is reasonably certain to result in substantial injury to the

organization," the lawyer may reveal information relating to the representation to the extent the lawyer reasonably believes necessary to prevent substantial injury to the organization.ⁿ⁷⁵

Model Rule 1.2 complements Model Rule 1.13 by prohibiting a lawyer from "counsel[ing] a client to engage, or assist[ing] a client, in conduct that the lawyer knows is criminal or fraudulent"n76 This prohibition, much like the requirements of Model Rule 1.13, is limited to situations in which the lawyer "knows" the conduct is criminal or fraudulent.n77

Model Rule 1.6 sets forth the attorney's obligation to preserve attorney-client confidentiality and speaks directly to the situation in which the attorney may disclose client confidences. According to Model Rule 1.6(a), "[a] lawyer shall not reveal information relating to the representation of a client unless the client gives informed consent, [or] the disclosure is impliedly authorized in order to carry out the representation"n78 Model Rule 1.6(b) contains several exceptions to the duty of confidentiality, as it permits, *but does not require*, the lawyer to depart from this duty to the extent the lawyer reasonably believes necessary:

- "to prevent reasonably certain death or bodily harm";
- "to prevent the client from committing a crime or fraud that is reasonably certain to result in substantial injury to the financial interests or property of another and in furtherance of which the client has used or is using the lawyer's services";
- "to prevent, mitigate or rectify substantial injury to the financial interests or property of another that is reasonably certain to result or has resulted from the client's commission of a crime or fraud in furtherance of which the client has used the lawyer's services";
- to secure legal advice about the lawyer's compliance with the Model Rules;
- to establish a claim or defense for himself or herself in a controversy between the lawyer and the client, to establish a defense to a criminal charge or civil claim against the lawyer based on conduct in which the client was involved, or to respond to allegations in a proceeding concerning the lawyer's representation of the client; or
- to comply with a court order.n79

(n4)Footnote 4. See Robert E. Bostrom, *Corporate Governance, Risk Management and Compliance After Sarbanes-Oxley: Some Thoughts On Best Practices and the Role of General Counsel*, The Metropolitan Corporate Counsel, Oct. 2002, at 1.

(n5)Footnote 5. The ABA Task Force on Corporate Responsibility notes that good corporate governance involves routine periodic meetings between the general counsel and a committee of independent directors (such as the audit committee or nominating/corporate governance committee). According to James H. Cheek III, who chaired the Task Force, "[b]y establishing such a routine channel of direct communication, contact between the general counsel and outside directors becomes more innocuous and less revolutionary, and most likely encourages other senior executives to themselves report potential violations of law or breaches of fiduciary duty to independent directors or to respect to a greater extent the advice of the general counsel." See James H. Cheek III and Derek S. Hughey, *Emerging Responsibilities and Liabilities of the Corporate Lawyer*, 1343 *PLI/Corp* 1141, 1160 (2002).

(n6)Footnote 6. The ABA Task Force pointed out that in many situations, various personnel will be perceived as retaining outside counsel. This may discourage outside counsel from fulfilling its professional obligations out of a concern for not being retained in the future. As such, the ABA Task Force on Corporate Responsibility recommended that the general counsel establish, at the beginning of any retention by the corporation of outside counsel, a commitment by outside counsel to communicate directly with the general counsel upon learning of possible material violations of law or breaches of fiduciary duty by officers, employees or agents of the corporation. See James H. Cheek III and Derek S. Hughey, *Emerging Responsibilities and Liabilities of the Corporate Lawyer*, 1343 *PLI/Corp* 1141, 1161 (2002).

(n7)Footnote 7. See James H. Cheek III and Derek S. Hughey, *Emerging Responsibilities and Liabilities of the Corporate Lawyer*, 1343 *PLI/Corp* 1141, 1161 (2002).

(n8)Footnote 8. As discussed in further detail in § 14.07[4] below, some states require a lawyer to disclose confidential client information in certain situations.

(n9)Footnote 9. *In the Matter of William R. Carter, Charles J. Johnson Jr.*, 22 S.E.C. Docket No. 292, 30 (1981).

(n10)Footnote 10. See James H. Cheek III, Derek S. Hughey, *Emerging Responsibilities and Liabilities of the Corporate Lawyer*, 1343 *PLI/Corp* 1141, 1173 (2002).

(n11)Footnote 11. Sarbanes-Oxley Act § 307, 15 *U.S.C.* § 7245 (2009).

(n12)Footnote 12. Congress gave no indication that Section 307 was intended to generally preempt state law. The SEC, however, explained that while the SEC attorney conduct rules do not preempt ethical rules in states that establish more rigorous obligations, the rules do prevail over any conflicting or inconsistent laws of a state in which an attorney is admitted or practices. It is unclear, however, whether the SEC has the authority to preempt state laws and ethical rules.

(n13)Footnote 13. See SEC Release No. 33-8185 (Jan. 29, 2003). Sarbanes-Oxley § 307 and the related implementing rules, 17 *CFR* §§ 205.1-205.7, are reproduced in Appendix G to this treatise.

(n14)Footnote 14. See SEC Release No. 33-8185 (Jan. 29, 2003).

(n15)Footnote 15. "Attorney" is defined as "any person who is admitted, licensed, or otherwise qualified to practice law in any jurisdiction, domestic or foreign, or who holds himself or herself out as admitted, licensed, or otherwise qualified to practice law." 17 *CFR* § 205.2(c) (2009).

(n16)Footnote 16. *See 17 CFR § 205.2(a) (2009)*. The meaning of the term "appearing and practicing" before the SEC is discussed in *Section14.07[3][b] below*.

(n17)Footnote 17. "In the representation of an issuer" means providing legal services as an attorney for an issuer, regardless of whether the attorney is employed or retained by the issuer. *See 17 CFR § 205.2(g) (2009)*.

(n18)Footnote 18. "Evidence of a material violation" means credible evidence, based upon which it would be unreasonable, under the circumstances, for a prudent and competent attorney not to conclude that it is reasonably likely that a material violation has occurred, is ongoing, or is about to occur. *See 17 CFR § 205.2(e) (2009)*.

(n19)Footnote 19. "Breach of fiduciary duty" refers to any breach of fiduciary or similar duty to the issuer recognized under an applicable Federal or State statute or at common law, including but not limited to misfeasance, nonfeasance, abdication of duty, abuse of trust, and approval of unlawful transactions. *See 17 CFR § 205.2(d) (2009)*.

(n20)Footnote 20. This rule draws upon the ethics rule now in effect in most states.

(n21)Footnote 21. *See 17 CFR § 205.2(a) (2009)*.

(n22)Footnote 22. *See 17 CFR § 205.3(b)(5) (2009)*.

(n23)Footnote 23. *See § 14.07[3][c] below*.

(n30)Footnote 30. *See 17 CFR § 205.2(i) (2009)*.

(n31)Footnote 31. *See 17 CFR § 205.2(e) (2009)*.

(n32)Footnote 32. *See 17 CFR § 205.3(b)(6)(i) (2009)*.

(n33)Footnote 33. *See 17 CFR § 205.3(b)(6)(ii) (2009)*.

(n34)Footnote 34. *See 17 CFR § 205.3(b)(7) (2009)*.

(n35)Footnote 35. *See 17 CFR § 205.3(b)(2) (2009)*.

(n36)Footnote 36. *See 17 CFR § 205.3(b)(2) (2009)*.

(n37)Footnote 37. *17 CFR § 205.3(b)(2) (2009)*.

(n38)Footnote 38. *See 17 CFR § 205.3(b)(2) (2009)*.

(n39)Footnote 39. *See 17 CFR § 205.3(a)(3) (2009)*.

(n40)Footnote 40. *See 17 CFR § 205.2(b) (2009)*.

(n41)Footnote 41. See SEC Release No. 33-8185 (Jan. 29, 2003).

(n42)Footnote 42. See 17 CFR § 205.3(b)(9) (2009).

(n43)Footnote 43. See 17 CFR § 205.3(c) (2009).

(n44)Footnote 44. See 17 CFR § 205.3(c)(1) (2009).

(n45)Footnote 45. See 17 CFR § 205.3(c)(1) (2009).

(n46)Footnote 46. See 17 CFR § 205.3(c)(2) (2009).

(n47)Footnote 47. See 17 CFR § 205.3(c)(2) (2009).

(n48)Footnote 48. The SEC has "encourage[d] the use of a QLCC as a practice of good corporate governance." See Kenneth R. McVay, Scott S. Strobridge and Amada W. Reed, *Sarbanes-Oxley and Venture Capital-Backed Companies*, 5374 PLI/Corp 793, 798 (2004) (citing Patrick J. Schultheis, *Section 307 of the Sarbanes-Oxley Act and Related SEC Rules* (June 2003)). Nevertheless, the establishment of a QLCC is not required, and not many companies have established such committees.

(n49)Footnote 49. As defined in the Investment Company Act of 1940 § 2(a)(19).

(n50)Footnote 50. See 17 CFR § 205.2(k)(1) and (2) (2009).

(n51)Footnote 51. See 17 CFR § 205.2(k)(3)(i) (2009).

(n52)Footnote 52. See 17 CFR § 205.2(k)(3)(ii) (2009).

(n53)Footnote 53. See 17 CFR § 205.2(k)(3)(iii) (2009).

(n54)Footnote 54. See 17 CFR § 205.2(k)(4) (2009).

(n55)Footnote 55. See SEC Release No. 33-8185 (Jan. 29, 2003). Since the adoption of the rules, the existence of QLCCs has increased. According to The Corporate Counsel, as of May 2003, eleven companies disclosed in their shareholder proxy statements that they have established QLCCs. See The Corporate Counsel, *Qualified Legal Compliance Committees*, at http://www.thecorporatecounsel.net/member/FAQ/Disclosure/Legal_Compliance.htm. And according to a 2005 study, between October 2002 and September 30, 2005, only 456 issuers formed QLCCs. Robert Eli Rosen, *Resistance to Reforming Corporate Governance: The Diffusion of QLCC's*, 74 *Fordham L. Rev.* 1251, 1252 (Dec. 2005).

(n56)Footnote 56. See 17 CFR § 205.3(d)(1) (2009).

(n57)Footnote 57. See 17 CFR § 205.3(d)(2) (2009).

(n58)Footnote 58. See 17 CFR § 205.1 (2009).

(n59)Footnote 59. ABA Model Rule 1.13(c) permits a lawyer to reveal confidential information relating to the representation of an company to prevent substantial injury to the company if the lawyer has already referred the matter to higher authority within the organization. Also, ABA Model Rule 1.6(b) permits a lawyer to reveal client confidences to prevent the client from committing a crime or fraud that is reasonably certain to result in substantial injury to the financial interests or property of another and in furtherance of which the client has used or is using the lawyer's services. See § 14.07[4] below for a discussion of the ABA Model Rules of Professional Conduct.

(n60)Footnote 60. See 17 CFR § 205.4(a) (2009).

(n61)Footnote 61. *See 17 CFR § 205.5(b) (2009).*

(n62)Footnote 62. *See 17 CFR § 205.4(b) (2009).*

(n63)Footnote 63. *See 17 CFR § 205.4(c) (2009).*

(n64)Footnote 64. *See 17 CFR § 205.5(b) (2009).*

(n65)Footnote 65. *See 17 CFR § 205.5(c) (2009).*

(n66)Footnote 66. *See 17 CFR § 205.6(a) (2009).*

(n67)Footnote 67. *See 17 CFR § 205.6(b) (2009).* In September 2004, the SEC entered a cease and desist order against John E. Isselmann, Jr., former general counsel of Electro Scientific Industries, Inc., in an enforcement action that, while technically not brought under the SEC attorney conduct rules (Isselmann's conduct occurred prior to the adoption of the rules), demonstrated the SEC's willingness to take action against attorneys for not appropriately responding to legal or regulatory violations. Here, the company's CFO represented to the audit committee that the elimination of a severance benefit for its Asian offices was approved by legal counsel. Isselmann ultimately learned of this representation as well as the subsequent opinion of the company's Japanese counsel that the benefits could not, in fact, be legally eliminated. Isselmann, however, took no action to correct the beliefs of the audit committee or the outside auditors. The SEC's complaint charged that Isselmann violated 1934 Act Rule 13b2-2 (regarding making false or materially misleading statements to accountants) and demonstrates the SEC's willingness to carefully review the actions taken (or not taken) of counsel in the face of violations of securities laws. More recently, on January 13, 2005, the SEC charged Google, Inc. for not adequately exempting from the registration provisions of Section 5 of the Securities Act the issuance of stock options to its employees. The SEC also charged Google's general counsel, David C. Drummond, for causing the violation. Google and Drummond ultimately agreed to cease and desist from the violations. The cease and desist order named no other Google officer other than Drummond. Though the Google action was not made under Part 205, it again evidences the SEC's strict stance with respect to attorneys. *See SEC Release 33-88523 (Jan. 13, 2005).*

(n68)Footnote 68. *See 17 CFR § 205.6(c) (2009).* As discussed *above*, some state bar associations have argued that the SEC does not have the authority to preempt state and local ethics standards in this way.

(n69)Footnote 69. *See 17 CFR § 205.7 (2009).*

(n70)Footnote 70. *See 17 CFR § 205.7 (2009).*

(n71)Footnote 71. In March 2002, Robert Hirshon, then the President of the ABA, appointed the ABA Task Force on Corporate Responsibility, charged with examining "systemic issues relating to corporate responsibility [and] ... examin[ing] the framework of laws and regulations and ethical principles governing the roles of lawyers, executive officers, directors, and other key participants." The Task Force included several general counsels, corporate and securities lawyers, a business court judge and a former SEC commissioner. One of its tentative missions was to adopt proposals to permit lawyers to disclose client fraud. The Task Force published recommendations relating to the role of lawyers in March 2003. Alfred P. Carlton, Jr., the President of the ABA who succeeded Mr. Hirshon, presented the report as "the latest word in corporate governance reform and the role and ethical responsibilities of corporate counsel in this post-Enron age." The Task Force proposed amendments to the Model Rules in order to address more specifically the lawyer's duty and ability to report violations that could result in financial injury to the corporation and others. First, it proposed to amend Model Rule 1.13 by imposing a more explicit duty on corporate lawyers to communicate with higher corporate authority where other efforts fail to prevent or rectify misconduct. The Task Force also proposed two additional exceptions to the duty of confidentiality imposed by Rule 1.6. Mr. Olson was a member of the ABA Task Force. *See James H. Cheek III, Derek S. Hughey, Emerging Responsibilities and Liabilities of the Corporate Lawyer*, 1343 *PLI/Corp* 1141, 1156 (2002). The amendments were substantially adopted in August 2003.

(n72)Footnote 72. Model Rules of Prof'l Conduct R. 1.13(a) (2003).

(n73)Footnote 73. Model Rules of Prof'l Conduct R. 1.13(b) (2003).

(n74)Footnote 74. *See* Model Rules of Prof'l Conduct R. 1.13(b) (2003).

(n75)Footnote 75. *See* Model Rules of Prof'l Conduct R. 1.13(c) (2003). The duty to report information that would otherwise be protected by the duty of confidentiality marks a shift from the ABA's previous Rule 1.13. The old Model Rule 1.13 did not permit lawyers to report wrongdoing outside the company.

(n76)Footnote 76. Model Rules of Prof'l Conduct R. 1.2(d) (2002).

(n77)Footnote 77. *See* Model Rules of Prof'l Conduct R. 1.2 (2002).

(n78)Footnote 78. Model Rules of Prof'l Conduct R. 1.6(a) (2003).

(n79)Footnote 79. Model Rules of Prof'l Conduct R. 1.6(b) (2003). The amendment to Rule 1.6, which permitted lawyers to reveal information that otherwise would be protected by attorney-client confidentiality, passed the ABA's policymaking House of Delegates by a vote of 218 to 201. Model Rule 1.6, as amended, recognizes the exceptions currently also found in 42 states which either permit or require a lawyer to disclose confidential client information to prevent the client from perpetrating a criminal fraud. Eighteen states permit or require such disclosure to prevent or rectify substantial financial loss resulting from such crime or fraud in which the client used the lawyer's services.

CHAPTER 14 ROLES AND RESPONSIBILITIES OF NON-BOARD PARTICIPANTS IN CORPORATE GOVERNANCE

2-14 Corporate Governance: Law and Practice § 14.08

AUTHOR: John F. Olson Ari B. Lanin

§ 14.08 The Independent Public Accountants

[1] Overview of Auditor Independence

Though ultimately the responsibility of the company, the production of financial statements that accurately present the issuer's financial condition requires an outside auditor that is dedicated to this goal.ⁿ¹ Regardless of how proactive and attentive they are, no auditor or audit committee can detect every fraudulent act or overly aggressive accounting practice. It is not their job to do so.

Auditors who do not maintain independence from their audit clients, however, are less likely to conduct the audit effectively, and may ignore problems that arise along the way.ⁿ² When the outside auditor's independence is compromised, effective corporate governance may also be compromised, as an interested auditor will have less incentive to critique a flawed component of the system. As such, breakdowns in the independence of outside auditors have been blamed by some as factors in the accounting scandals that led to the adoption of the Sarbanes-Oxley Act. Title II of the Sarbanes-Oxley Act and the SEC rules adopted thereunder were intended to increase the reliability of financial statements by enhancing auditor independence and by creating a new body to monitor the auditing profession, the Public Company Accounting Oversight Board ("PCAOB"). The SEC's independence rules focus on the following key areas of auditor independence:

- prohibiting the auditor from acting as management or as an employee of the audit client;
- prohibiting an auditor from auditing his or her own work;
- prohibiting an auditor from serving as an advocate for his or her client; and
- prohibiting an auditor from having mutual or conflicting interests with his or her client.

Title II of the Sarbanes-Oxley Act further developed and expanded upon the SEC's pre-existing independence standards by doing the following:ⁿ³

- enhancing conflict of interest standards;
- prohibiting outside auditors from providing specified non-audit services;ⁿ⁴
- requiring partner rotation and second partner review; and
- clarifying and enhancing the relationship between the outside auditor and the audit committee.

[2] Provision of Audit and Non-Audit Services

[a] Non-Audit Services

While in the past companies had turned to their outside auditor to perform a variety of non-audit services, the Sarbanes-Oxley Act, and the SEC's rules adopted thereunder, provide for enhanced auditor independence by restricting the extent to which auditors are permitted to provide non-audit services to their audit clients. Section 10A(g) of the 1934 Act (adopted pursuant to Section 201(a) of the Sarbanes-Oxley Act) provides that it is unlawful for a registered public accounting firm (and any associated person of that firm) that performs an audit for an issuer to provide certain non-audit services for that issuer contemporaneously with the audit.ⁿ⁵ The SEC interpreted and expanded upon Section 10A(g) in adopting Rule 2-01(c)(4) of Regulation S-X. Rule 2-01(c)(4) provides that an outside auditor is not independentⁿ⁶ if it provides any one of the following ten non-audit services to an audit client:

1. *Bookkeeping or other services related to the accounting records or financial statements of the audit client.* ⁿ⁷ Bookkeeping or other services focuses on the provision of services involving: (1) maintaining or preparing the audit client's accounting records; (2) preparing financial statements filed with the SEC or the information that forms the basis of such financial statements; and (3) preparing or originating source data underlying the audit client's financial statements.ⁿ⁸
2. *Financial information systems design and implementation.* ⁿ⁹ These services include: (1) directly or indirectly operating, or supervising the operation of, the audit client's information system or managing the audit client's local area network; or (2) designing or implementing a hardware or software system that aggregates source data underlying the financial statements or generates information significant to the audit client's financial statements or other financial information systems taken as a whole. The prohibition on financial information systems design and implementation services does not preclude outside auditors from evaluating the internal controls of a system as it is being designed, implemented or operated either as part of an audit or attest service and making recommendations to management or making recommendations on internal control matters to management or other service providers in conjunction with the design and installation of a system by another service provider.ⁿ¹⁰
3. *Appraisal or valuation services, fairness opinions, or contribution-in-kind reports.* ⁿ¹¹ The SEC has not prohibited the provision of these services for non-financial reporting such as transfer pricing studies, cost segregation studies and other tax-only valuations purposes. The rules also do not prohibit an accounting firm from utilizing its own valuation specialist to review the work performed by the audit client itself or an independent, third-party specialist employed by the audit client, provided the audit client or the client's specialist (and not the specialist used by the accounting firm) provides the technical expertise the client uses in determining the required amounts recorded in the client financial statements. In those instances the outside auditor will not be auditing his or her own work because a third party or the audit client is the source of the financial information subject to the audit.ⁿ¹²
4. *Actuarial services.* ⁿ¹³ Actuarial services include any actuarially-oriented advisory service involving

the determination of amounts recorded in the financial statements and related accounts for the audit client. The prohibition does not include assisting a client in understanding the methods, models, assumptions, and inputs used in computing an amount. The rules also do not prohibit the outside auditor from providing services for non-financial reporting purposes, such as transfer pricing studies, cost segregation studies and other tax-only valuations and do not prohibit the auditor from advising the audit client on the appropriate actuarial methods and assumptions that will be used in the actuarial valuations.ⁿ¹⁴

5. *Internal audit outsourcing services.* ⁿ¹⁵ Internal audit outsourcing services include any services that have been outsourced and that relate to the audit client's internal accounting controls, financial systems, or financial statements. The prohibition on "outsourcing" does not preclude engaging the outside auditor to perform nonrecurring evaluations of discrete items or other programs that are not, in substance, the outsourcing of the internal audit function. For example, the company may engage the outside auditor (subject to the audit committee pre-approval requirements, as discussed in § 14.08[2][b] below) to conduct "agreed-upon procedures" related to the company's internal control over financial reporting, since management takes responsibility for the scope and assertions in those engagements. The prohibition also does not preclude outside auditors from performing operational internal audits unrelated to the internal accounting controls, financial systems, or financial statements.ⁿ¹⁶

6. *Management functions.* ⁿ¹⁷ The prohibition on management functions refers to acting (temporarily or permanently) as a director, officer, or employee of an audit client, or performing any decision-making, supervisory, or ongoing monitoring function for the audit client. The SEC believes that "services in connection with the assessment of internal accounting and risk management controls, as well as providing recommendations for improvements, do not impair an outside auditor's independence."ⁿ¹⁸

7. *Human resources.* ⁿ¹⁹ The prohibition on the provision of human resources services covers: (1) "searching for or seeking out prospective candidates for managerial, executive, or director positions;" (2) "engaging in psychological testing, or other formal testing or evaluation programs;" (3) "undertaking reference checks of prospective candidates for an executive or director position;" (4) "acting as a negotiator on the audit client's behalf, such as determining position, status or title, compensation, fringe benefits, or other conditions of employment;" or (5) "recommending, or advising the audit client to hire, a specific candidate for a specific job (except that an accounting firm may, upon request by the audit client, interview candidates and advise the audit client on the candidate's competence for financial accounting, administrative or control positions)."

8. *Broker or dealer, investment adviser, or investment banking services.* ⁿ²⁰ These services include (1) acting as a broker-dealer (registered or unregistered), promoter, or underwriter on behalf of an audit client, (2) making investment decisions on behalf of an audit client or otherwise having discretionary authority over an audit client's investments, (3) executing a transaction to buy or sell an audit client's investment, and (4) having custody of assets of the audit client, such as taking temporary possession of securities purchased by an audit client.

9. *Legal services.* ⁿ²¹ Legal services include providing a service to an audit client that could be properly provided only by someone licensed, admitted, or otherwise qualified to practice law in the jurisdiction in which the service is provided.ⁿ²²

10. *Expert services unrelated to the audit.* ⁿ²³ Expert services unrelated to the audit include the provision of an expert opinion or other expert service for the purpose of advocating the audit client's interests in litigation or in a regulatory or administrative proceeding or investigation. An outside auditor may provide factual accounts, including testimony regarding work performed or an explanation of the

positions taken or conclusions reached during the performance of any permitted service provided by the outside auditor for the audit client. The rules also do not preclude an audit committee or, at its direction, its attorney, from engaging the outside auditor to perform internal investigations or fact finding engagements, nor do they prohibit an auditor from assisting the audit committee in fulfilling its responsibilities to conduct its own investigation of a potential accounting impropriety. For example, the company's audit committee may engage the auditor to conduct a thorough inspection and analysis of those accounts, the physical inventory at the subsidiary, and related matters, without impairing the auditor's independence.

According to Section 10A(g) of the 1934 Act, any non-audit service (including tax services) that is not one of the prohibited non-audit services can be provided by the auditor without impairing its independence, but only to the extent such services has been pre-approved by the issuer's audit committee.ⁿ²⁴ Preapproval of audit and permissible non-audit services is discussed further below. ⁿ²⁵

Questions whether tax services constitute a prohibited non-audit service have engendered significant debate. The SEC in its audit services adopting release specifically stated that an accounting firm can provide tax services to its audit clients without impairing its independence. The SEC's position on tax services is not unlimited, however. An outside auditor would impair its independence by representing an audit client before a tax court. The Conference Board Commission on Public Trust and Private Enterprise noted that tax strategies involving tax shelters, offshore partnerships and other novel and debatable structures should not be obtained from the independent auditors, as debatable strategies, if implemented, could then be blessed by the auditor as part of the audits. In the view of the Conference Board, the impartiality required to perform an effective audit is compromised by auditor's financial incentive to approve of the structure or technique it suggested.ⁿ²⁶ On March 25, 2003, PCAOB member Daniel Goelzer urged corporations to stay away from questionable tax shelter transactions that are marketed by their outside auditors. He said that while the PCAOB could opt to ban all tax activities by auditors, the simpler solution is for corporate boards to refuse to approve the corporation's use of any tax shelters from the accounting firm that audits their financial statements. "Auditors should not be in the position of marketing shelters to their audit clients. Novel products and tax services put the auditor on a slippery slope. First, the auditor becomes an advocate for the client if the IRS questions the tax treatment, and second, the auditor is in the position of auditing its own work."ⁿ²⁷

On July 26, 2005, the PCAOB formally joined the discussion of tax services, by adopting its own rules specifically relating to independence and tax services.ⁿ²⁸ Under the PCAOB's rules, an outside auditor would not be independent of an audit client if, among other things, (1) it entered into a contingent fee arrangement, (2) it provided services relating to marketing, planning or opining in favor of a tax treatment of a transaction that is a confidential transaction, (3) it provided services relating to marketing, planning or opining in favor of a tax treatment on a transaction that is based on an aggressive interpretation of a tax law or (4) it provided tax services to certain members of management who serve in financial reporting oversight roles to audit clients or to immediate family members of such persons. The PCAOB's rules also expand the responsibilities for which the outside auditor has to seek the pre-approval of the audit committee.ⁿ²⁹

[b] Audit Committee Approval of Audit Services and Permissible Non-Audit Services

Section 202 of the Sarbanes-Oxley Act and the related SEC auditor independence rules also obligate companies to strengthen corporate governance by requiring the audit engagement to be approved by the audit committee.ⁿ³⁰ The rules provide that an outside auditor is not independent unless either the engagement is approved by the company's audit committee before the commencement of the engagement or the engagement to render a service being provided is entered into pursuant to an acceptable pre-approval policy established by the company's audit committee.ⁿ³¹ Any pre-approval policy employed by an issuer's audit committee for either audit or non-audit services must be detailed as to the particular service and may not delegate audit committee responsibilities required under the 1934 Act to management.ⁿ³² Even if they are approved by the audit committee, non-audit services can only be provided if they do not impair the auditor's independence.ⁿ³³ The audit committee may delegate the authority to grant pre-approvals to one

or more of its members.ⁿ³⁴ In conjunction with the release of Auditing Standard No. 5, the PCAOB issued Rule 3525, Audit Committee Pre-approval of Non-audit Services Related to Internal Control over Financial Reporting, requiring accounting firms seeking pre-approval to first (1) describe the scope of the proposed non-audit service to the committee in writing, (2) discuss with the committee the potential effects of the service on the independence of the firm, and (3) document the substance of those discussions.ⁿ³⁵

[3] Communication with Audit Committees

The Sarbanes-Oxley Act greatly expanded the role of the audit committee.ⁿ³⁶ Section 204, which added a new Section 10A(k) to the 1934 Act, requires auditors to provide information to the audit committee, over and above that required by Generally Accepted Accounting Standards (GAAS) and the accounting literature.ⁿ³⁷ Pursuant to Section 204 of the Sarbanes-Oxley Act, accountants that audit issuer financial statements must report the following information to the audit committee of that issuer in a timely manner:

- all critical accounting polices and practices to be used;
- all alternative treatments of financial information within GAAP that have been discussed with management, the ramifications of the use of such alternative disclosures and treatments and the treatment preferred by the accounting firm; and
- other material written communications between the accounting firm and management, such as any management letter or schedule of unadjusted difference.ⁿ³⁸

The SEC adopted rules to clarify the scope and meaning of Section 204.ⁿ³⁹ Rule 2-07 of Regulation S-X provides that disclosure of "alternative treatments" of financial information" is only required to the extent they are for "policies and practices related to material terms" that have been discussed with management.ⁿ⁴⁰ Rule 2-07 also provides that the required information must be provided to the audit committee prior to filing the related audit report with the SEC.ⁿ⁴¹ Pursuant to PCAOB's Auditing Standard No.5 and related SEC and PCAOB guidance, outside auditors are also required to communicate with the audit committee as described in *§14.08[5] below*.

[4] The Public Company Accounting Oversight Board

[a] What is the Public Company Accounting Oversight Board?

The goal of the Public Company Accounting Oversight Board (PCAOB), established by Section 101 of the Sarbanes-Oxley Act, is to protect the public interest through regulation of the process by which accounting firms prepare independent audit reports.ⁿ⁴² It derives its funding primarily from fee assessments on issuers and registration fees paid by accounting firms that audit public companies and, pursuant to the Sarbanes-Oxley Act, will exist until it is specifically dissolved by an act of Congress. It consists of five members, all of whom, including its chair, are appointed by the SEC, and two of whom must be current or former certified public accountants.

[b] Duties and Authority of the Public Company Accounting Oversight Board

Because outside auditors review both the company's financial statements and the material adequacy of internal control over financial reporting, the outside auditor has an opportunity to review and provide input on significant parts of the company's overall governance structure. The PCAOB establishes standards for auditing, quality control, ethics and independence. Its major functions are to conduct inspections and investigations of public accounting firms and to impose sanctions when an investigation leads it to believe such sanctions are necessary. The PCAOB is also responsible for (1) registering public accounting firms, (2) establishing standards relating to the preparation of audit reports, and (3) enforcing compliance with the Sarbanes-Oxley Act, the rules established by the PCAOB, and the federal securities laws to the extent they apply to public accountants. All accounting firms that perform audits or participate in the production

of audit reports with respect to an issuer of publicly traded securities (including foreign issuers whose securities are traded in the United States) must register with the PCAOB, and each registered public accounting firm must, at least annually, submit a report to the PCAOB.ⁿ⁴³

The PCAOB is charged with issuing auditing standards requiring each registered public accounting firm to:

- maintain audit work papers for at least seven years (in sufficient detail to support the conclusions reached in the audit);
- provide a second partner review and approval of audit reports; and
- describe in each audit report the scope of the auditor's testing of the internal control structure of the issuer, as required by Section 404(b) of the Sarbanes-Oxley Act.ⁿ⁴⁴

The PCAOB is also required to issue quality control standards relating to (1) the monitoring of professional ethics and independence from audit clients, (2) internal consultation on accounting and auditing questions, (3) supervision of audit work, (4) hiring and development of personnel, (5) the acceptance and continuation of engagements (6) internal inspection, and (7) such other requirements as the PCAOB may prescribe.ⁿ⁴⁵ In order to enforce these quality control standards the PCAOB conducts inspections of auditors on an ongoing basis to assess their degree of compliance.ⁿ⁴⁶ Accounting firms that regularly provide audit reports for more than one hundred issuers are inspected annually and accounting firms that regularly provide audit reports to one hundred or fewer issuers are inspected every three years.ⁿ⁴⁷

Since its creation, the PCAOB has issued standards and rules relating to the outside auditor's audit of internal control over financial reporting, audit documentation, reporting on whether a previously reported material weakness continues to exist, audit committee approval of tax services and contingent fees, and many others issues.ⁿ⁴⁸

[c] Penalties

Section 105 of the Sarbanes-Oxley Act endows the PCAOB with the ability to conduct investigations of any public accounting firm (including any associated person of that firm) in relation to a potential violation by that firm (or associated person) of the Sarbanes-Oxley Act, the rules of the PCAOB, the securities laws relating to the preparation and issuance of audit reports and SEC rules adopted under the Sarbanes-Oxley Act.ⁿ⁴⁹ The PCAOB's rules may also require accounting firms to testify and produce audit papers and other information to the extent necessary to conduct an investigation. Additionally, the PCAOB is given the power to issue suspensions, revoke registrations and issue other sanctions to public accounting firms or associated persons that refuse to testify, produce documents or otherwise cooperate with the PCAOB in this regard.

If the PCAOB finds that a registered public accounting firm violated the Sarbanes-Oxley Act, the SEC's rules adopted pursuant to the Sarbanes-Oxley Act, the PCAOB's rules or any provision of the securities laws relating to the preparation and issuance of audit reports, the PCAOB may impose sanctions to the extent it deems appropriate.ⁿ⁵⁰ PCAOB sanctions can include temporary or permanent (1) revocation of registration, (2) suspension, and (3) limitation on activities and operations.ⁿ⁵¹ The PCAOB can also impose a civil penalty of up to \$100,000 for a natural person or \$2,000,000 for an entity, and in the case of intentional, knowing or reckless conduct, \$750,000 for a natural person and \$15,000,000 for an entity.ⁿ⁵²

[5] The Outside Auditor's Report on Internal Control Over Financial Reporting

The rules adopted by the SEC pursuant to Section 404(b) of the Sarbanes-Oxley Act require issuers to include in annual reports their outside auditor's attestation as to the effectiveness of the issuer's internal control over financial reporting.ⁿ⁵³ This attestation must be made in accordance with the standards for attestation engagements adopted by

the PCAOB.ⁿ⁵⁴ As directed by the Sarbanes-Oxley Act, in 2007 the PCAOB approved such a standard—the PCAOB's Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting That is Integrated with An Audit of Financial Statements*. Auditing Standard No. 5 addresses the requirements under Section 404 of the Sarbanes-Oxley Act that an issuer's auditor attest to and report on management's required assessment of internal control over financial reporting. Auditing Standard No. 5 refers to the attestation engagement as an audit of internal control over financial reporting.ⁿ⁵⁵

Under the standard, auditors are required a report containing an opinion on internal control over financial reporting (the company's financial statements), both of which must be included in the issuer's annual report on Form 10-K. The auditor's report can either be a combined report (*i.e.* one report containing the opinion on internal control over financial reporting and an opinion on the issuer's financial statements) or the auditor can issue separate reports for each of the issuer's internal control over financial reporting and the issuer's financial statements. The auditor's opinion on internal control over financial report must opine as to whether the issuer maintained, in all material respects, effective internal control over financial reporting as of the specified date, based on the relevant control criteria.ⁿ⁵⁶ In performing the auditor's internal control over financial reporting audit, Auditing Standard No. 5 establishes thresholds the auditor must apply in determining whether significant deficiencies or material weaknesses exist in the issuer's internal control over financial reporting.ⁿ⁵⁷

Auditing Standard No. 5 was intended to align the costs and benefits of the internal control over financial reporting audit better than its predecessor, Auditing Standard No. 2, by focusing auditors on the matters most important to internal control, further encouraging the use of the work of others, eliminating unnecessary procedures, scaling the audit for smaller companies and simplifying auditing requirements. In announcing the new standard, the PCAOB described Auditing Standard No. 5 as "principles-based" and "designed to increase the likelihood that material weaknesses in internal control will be found before they result in material misstatements of a company's financial statements."ⁿ⁵⁸ The PCAOB's goals included eliminating unnecessary procedures and tailoring the audit to individual issuers' facts and circumstances. To that end, Auditing Standard No. 5 emphasizes the use of scalable procedures, and the PCAOB followed Accounting Standard No. 5's release by issuing guidance for auditors of smaller public companies in January, 2009.ⁿ⁵⁹

Accounting Standard No. 5, as released:

- aligns key terms and concepts with terms used in SEC rules and guidance;ⁿ⁶⁰
- includes a discussion of fraud risk and anti-fraud controls at the beginning of the standard, to emphasize the importance of these matters in assessing risk;
- explains how different kinds of entity-level controls have different effects on the selection and testing of controls and how analysis at the entity level may reduce the need for testing of the underlying, process-level controls;
- focuses auditors on the objectives of a properly performed walkthrough rather than simply mandating performance of walkthroughs, which might lead to a checklist approach;
- emphasizes that auditors need not scope the audit to find deficiencies that, individually or when aggregated with other deficiencies, do not constitute material weaknesses;ⁿ⁶¹
- expressly permits auditors to use, in the internal control audit, testing and other internal control work of persons other than internal auditors; and
- allows auditors to tailor their top-down approach to the circumstances of individual companies by

removing the requirement to identify major classes of transactions and significant processes specifically before identifying relevant assertions.ⁿ⁶²

* * *

Auditing Standard No. 5 requires the outside auditor's report to include the following key components, among others:ⁿ⁶³

- a statement that management is responsible for maintaining effective internal control over financial reporting and for assessing the effectiveness of internal control over financial reporting;
- an identification of management's report on internal control;
- a statement that the auditor's responsibility is to express an opinion on the company's internal control over financial reporting based on the auditor's audit;
- a definition of internal control over financial reporting as stated in Auditing Standard No. 5;
- a statement that the audit was conducted in accordance with the standards of the PCAOB;
- a statement that the standards of the PCAOB require the auditor to plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects;
- a statement that an audit includes obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as the auditor considered necessary in the circumstances;
- a statement that the auditor believes the audit provides a reasonable basis for the auditor's opinion;
- a paragraph stating that, because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements and that projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate; and
- the auditor's opinion on whether the company maintained, in all material respects, effective internal control over financial reporting, as of the specified date, based on the control criteria.ⁿ⁶⁴

Auditing Standard No. 5 emphasizes the importance of the auditor's judgment and experience with prior audits of the issuer to planning and executing the audit, and calls on the auditor to utilize a top-down approach in planning an audit that reflects the risks presented by the particular issuer being audited, and is scaled accordingly.ⁿ⁶⁵ The standard stresses the importance of considering the likelihood of fraud in determining the entity-level and other controls to select for testing, guiding the auditor to contemplate controls over unusual transactions, period-end adjustments, related party transactions, and significant management estimates, as well as controls that could mitigate incentives and pressures that could cause management to falsify results.ⁿ⁶⁶

In addition to setting forth the substantive makeup of the outside auditor's internal control report and the procedures required for the auditor's audit of internal control over financial reporting, Auditing Standard No. 2 provides numerous instances in which the outside auditor is required to interface with various corporate constituencies throughout its

evaluation in order to arrive at the conclusions that will ultimately be included in the report. For example, Auditing Standard No. 5 notes that the auditor does not have the same level of familiarity of the company's controls that management has, and does not interact or observe these controls as frequently as management does, and thus acknowledges that the auditor cannot obtain sufficient evidence to support its internal control opinion without performing procedures such as "inquiry, observation and inspection of documents, or walkthroughs ..."n67 Auditing Standard No. 5 therefore allows the auditor to use the work of others in order to obtain evidence regarding the design and operating effectiveness of controls. The outside auditor may use the work performed by or receive direct assistance from the internal auditors, other company personnel and third parties working under the direction of management or the audit committee.n68

Auditing Standard No. 5 also requires the outside auditor to, as part of its audit, obtain a written representation from management (i) describing management's responsibilities and conclusions and whether certain changes in internal control over financial reporting have occurred, (ii) disclosing the effectiveness of internal control over financial reporting, and that management has disclosed to the outside auditor all deficiencies in the design or operation of internal control over financial reporting identified as part of management's evaluation and (iii) disclosing whether any material fraud or other fraud involving an employee with a significant role in internal control over financial reporting has been identified.n69

If the auditor discovers any material weaknesses during the course of its audit, the auditor must communicate those material weaknesses to management and the audit committee.n70 The auditor must also consider whether during the course of its audit it has identified any deficiencies or combinations of deficiencies that constitute significant deficiencies and communicate these significant deficiencies to the audit committee as well.n71 If the auditor discovers deficiencies that do not amount to a significant deficiency or material weakness, it must communicate those deficiencies to management, and inform the audit committee when such communication has been made.n72 Finally, if the auditor concludes that the oversight of the company's external financial reporting and internal control over financial reporting by the company's audit committee is ineffective, the auditor must communicate that conclusion in writing to the full board of directors.n73

If the outside auditor identifies significant deficiencies or material weaknesses during the course of its audit, management will need to take steps to remediate these issues, as set forth in Auditing Standard No. 4, Reporting on Whether a Previously Reported Material Weakness Continues to Exist.n74 Auditing Standard No. 4 relates to the engagement of the outside auditor to report on the elimination of a material weakness. The standard provides for a voluntary, stand-alone engagement of the auditor to express an opinion solely on whether the company has eliminated a previously reported material weakness. The report provided by the auditor would be based on a written report by management that the identified material weakness has been eliminated. This report provided by management would include (1) a statement of management's responsibility for establishing and maintaining effective internal control over financial reporting; (2) a statement identifying the control criteria used (*e.g.* the COSO Framework); (3) an identification of the material weakness identified during the annual assessment; (4) an identification of the controls that address the material weakness; and (5) a statement that the material weakness no longer exists as of a specified date because the specified controls are effective in addressing the material weakness. The outside auditor's evaluation would be similar to the annual evaluation of internal control over financial reporting, but would focus only on the controls specifically identified by management in addressing the material weakness.n75

FOOTNOTES:

(n1)Footnote 1. Accountants who audit financial statements are generally not permitted to act as advocates for their clients. *See generally* Regulation S-X Rule 2-01, *17 CFR § 210.2-01 (2009)*. Rather, the independent auditor's purpose is to increase investor confidence by auditing financial statements for reliability and accuracy. As articulated by Judge Friendly in the seminal case of *United States v. Simon*, the auditor's obligation to produce reliable and accurate financial statements requires more than simply confirming that the financial statements were prepared in accordance with GAAP. *See United States v. Simon*, *425 F.2d 796 (2d Cir. 1969)*. If compliance with GAAP results in financial statements that are materially misleading, accountants may still be held criminally liable. In March 2002, the General Accounting Office (GAO), in its Corporate Governance, Transparency and Accountability Forum reiterated this principal, stating that auditors should concern themselves with whether the financial statements "fairly present the financial condition" of the entity in all material respects-conformity with GAAP is not enough. General Accounting Office, Highlights of GAO's Corporate Governance, Transparency and Accountability Forum, GAO-02-494SP, 2 (Mar. 2002).

(n2)Footnote 2. According to former SEC chairman Roderick Hills (in testimony before the Senate Banking Committee), "[i]t is increasingly clear that the accounting profession is not able consistently to resist management pressures to permit incomplete or misleading financial statements, and the profession has serious problems in recruiting and keeping the highly qualified professionals that are needed." Roderick M. Hills, *Statement of the Honorable Roderick M. Hills Before the Committee on Financial Services, United States House of Representatives* (Mar. 13, 2002), at financialservices.house.gov/media/pdf/031302rh.pdf.

(n3)Footnote 3. Title II of the Sarbanes-Oxley Act added subsections (g) through (l) to Section 10A of the 1934 Act. In March 2003 the SEC first adopted rules related to Title II. Section 201 of the Sarbanes-Oxley Act added subsection (g) to 1934 Act § 10A, which specifies that certain non-audit services are prohibited. Section 201 also added subsection (h), which requires that both audit services and non-audit services not prohibited under the Sarbanes-Oxley Act and the SEC's rules be subject to pre-approval by the registrant's audit committee. Section 202 added subsection (i), which requires an audit committee to pre-approve permissible non-audit services and specifies certain exceptions to the pre-approval requirement. Section 203 added subsection (j), which establishes mandatory rotation of the lead partner and the concurring partner every five years. Section 204 added subsection (k) which requires the auditor to report certain information to the audit committee on a timely basis. Section 206 added subsection (l), regarding conflicts of interest.

(n4)Footnote 4. The provision of non-audit services is discussed in *Section 14.08[2][a] below*.

(n5)Footnote 5. *See* Section 10A(g) of the 1934 Act. As discussed further in *§ 14.08[2][b] below*, Regulation S-X Rule 2-01(c)(7) also requires the audit engagement to be approved by the audit committee before an accountant can render audit or non-audit services.

(n6)Footnote 6. 1934 Act Rule 10A-2 provides that it is unlawful for an auditor to not be independent.

(n7)Footnote 7. *See* Regulation S-X Rule 2-01(c)(4)(i), *17 CFR § 210.2-01(c)(4)(i) (2009)*.

(n8)Footnote 8. Before the adoption of the Sarbanes-Oxley Act, an auditor's independence was not considered to be impaired by providing bookkeeping services in limited circumstances, such as in an emergency or where the services were provided in a foreign jurisdiction and certain conditions were met. Regulation S-X Rule 2-01(c)(4)(i) eliminates these limited exceptions.

(n9)Footnote 9. *See* Regulation S-X Rule 2-01(c)(4)(ii), *17 CFR § 210.2-01(c)(4)(ii) (2009)*.

(n10)Footnote 10. *See* SEC Release No. 33-8183 (Jan. 28, 2003). The SEC has reiterated its position that while the auditor cannot audit its own work, it can discuss internal control and financial reporting issues with its client. *See* SEC

Division of Corporation Finance, Office of the Chief Accountant, *Staff Statement on Management's Report on Internal Control Over Financial Reporting* (May 16, 2005).

(n11)Footnote 11. *See* Regulation S-X Rule 2-01(c)(4)(iii), 17 CFR § 210.2-01(c)(4)(iii) (2009).

(n12)Footnote 12. *See* SEC Release No. 33-8183 (Jan. 28, 2003). Before the adoption of the Sarbanes-Oxley Act, the auditor independence rules contained several exemptions to this prohibition. These exemptions have been eliminated.

(n13)Footnote 13. *See* Regulation S-X Rule 2-01(c)(4)(iv), 17 CFR § 210.2-01(c)(4)(iv) (2009).

(n14)Footnote 14. *See* SEC Release No. 33-8183 (Jan. 28, 2003) *amended by* SEC Release No. 33-8183A (Mar. 31, 2003).

(n15)Footnote 15. *See* Regulation S-X Rule 2-01(c)(4)(v), 17 CFR § 210.2-01(c)(4)(v) (2009).

(n16)Footnote 16. Prior to the adoption of the Sarbanes-Oxley Act, the SEC's auditor independence rules permitted companies to outsource part of their internal audit function to the outside auditor, subject to certain exceptions.

(n17)Footnote 17. *See* Regulation S-X Rule 2-01(c)(4)(vi), 17 CFR § 210.2-01(c)(4)(vi) (2009).

(n18)Footnote 18. *See* SEC Release No. 33-8183 (Jan. 28, 2003) *amended by* SEC Release No. 33-8183A (Mar. 31, 2003).

(n19)Footnote 19. *See* Regulation S-X Rule 2-01(c)(4)(vii), 17 CFR § 210.2-01(c)(4)(vii) (2009).

(n20)Footnote 20. *See* Regulation S-X Rule 2-01(c)(4)(viii), 17 CFR § 210.2-01(c)(4)(viii) (2009).

(n21)Footnote 21. *See* Regulation S-X Rule 2-01(c)(4)(ix), 17 CFR § 210.2-01(c)(4)(ix) (2009).

(n22)Footnote 22. The provision of tax services is discussed below.

(n23)Footnote 23. *See* Regulation S-X Rule 2-01(c)(4)(x), 17 CFR § 210.2-01(c)(4)(x) (2009). The provision of tax services is discussed *below*.

(n24)Footnote 24. *See* 1934 Act § 10A(g). Note that the Office of the Chief Accountant stated that there is a rebuttable presumption that the prohibited services will be subject to audit procedures. *See* Office of the Chief Accountant, Application of the Commission's Rules on Auditor Independence Frequently Asked Questions - Prohibited and Non-Audit Services, Question 4.

(n25)Footnote 25. *See* § 14.08[2][b] *below*.

(n26)Footnote 26. *See* The Conference Board, Commission on Public Trust and Private Enterprise, Findings and Recommendations 41 (2003), http://www.conference-board.org/pdf_free/SR-03-04.pdf.

(n27)Footnote 27. *Auditor Independence--Goelzer Urges Corporations To Say No To Tax Shelters Promoted By Their Auditors*, Securities Regulation & Law Report (BNA) Vol. 35, No. 13 (Mar. 31, 2003), at <http://pubs.bna.com/ip/BNA/SRLR.NSF/85256269004a991e8525611300214487/e5e3db5800772dd385256cf70082525f?OpenDocument>.

(n28)Footnote 28. *See* PCAOB Release No. 2005-014, *Ethics and Independence Rules Concerning Independence, Tax Services, And Contingent Fees* (July 26, 2005). The PCAOB's rules were effective when approved by the SEC on April 16, 2006.

(n29)Footnote 29. The SEC's pre-approval rules are discussed in §14.08[2][b] below.

(n30)Footnote 30. The roles and responsibilities of audit committees are discussed in Chapter 9 above.

(n31)Footnote 31. See Regulation S-X Rule 2-01(c)(7), 17 CFR § 210.2-01(c)(7) (2009).

(n32)Footnote 32. The SEC's Office of Chief Accountant has stated that the audit committee's pre-approval policies and procedures cannot provide for broad, categorical approvals; rather, they must be detailed as to the particular services to be provided. The determination of the appropriate level of detail will differ depending on the specific facts and circumstances. See Office of Chief Accountant, Application of the Commission's Rules on Auditor Independence Frequently Asked Questions - Audit Committee Pre-Approval, Questions 4-5.

(n33)Footnote 33. The provision of nonaudit services must also be disclosed to investors in periodic reports, pursuant to Section 10A(i)(2) of the 1934 Act, regardless of whether they are approved by the audit committee. Note that Section 10A(i)(2) only requires this disclosure in periodic reports required by Section 13(a) of the 1934 Act. In addition issuers must disclose in proxy statements each of the audit fees, audit related fees, tax fees and all other fees billed by their outside auditor. See Item 9 and SEC Schedule 14A.

(n34)Footnote 34. See 1934 Act § 10A(i)(3). The rules contain a limited *de minimis* exception solely related to the provision of services other than audit, review or attest services. See Regulation S-X Rule 2-01(c)(7)(i)(C), 17 CFR § 210.2-01(c)(7)(i)(C) (2009). The audit committee's responsibility with respect to the appointment, compensation, retention and oversight of the outside auditor are discussed in Chapter 9 above.

(n35)Footnote 35. PCAOB, Release 2007-005A (July 27, 2007).

(n36)Footnote 36. See discussion of the audit committee in Chapter 9 above.

(n37)Footnote 37. GAAS requires that the outside auditor ensure the audit committee is informed about matters such as: (1) auditor's responsibility under GAAS; (2) significant accounting policies; (3) methods used to account for significant unusual transactions; (4) effects of significant accounting policies in controversial or emerging areas for which there is a lack of authoritative guidance or consensus; (5) process used by management in formulating particularly sensitive accounting estimates and the basis for the auditor's conclusions regarding the reasonableness of those estimates; (6) material audit adjustments proposed and immaterial adjustments not recorded by management; (7) auditor's judgments about the quality of the company's accounting principles; (8) auditor's responsibility for other information in documents containing audited financial statements; (9) auditor's views about significant matters that were the subject of consultation between management and other accountants; (10) major issues discussed with management prior to retention; (11) difficulties with management encountered in performing the audit; and (12) disagreements with management over the application of accounting principles, the basis for management's accounting estimates, and the disclosures in the financial statements. See SEC Release No. 33-8183 (Jan. 28, 2003).

(n38)Footnote 38. The SEC indicated that the following are material communications: the management representation letter; reports on observations and recommendations on internal controls; the schedule of material adjustments and reclassifications and reclassifications proposed, and a listing of adjustments and reclassifications not recorded, if any; the engagement letter, if any; and the independence letter. See Release No. 33-8154 (Dec. 2, 2002).

(n39)Footnote 39. In its adopting release, the SEC quoted Warren Buffet, who described the interaction between the auditor and the audit committee as follows: "Their function ... is to hold the auditor's feet to the fire. And, I suggest ... the audit committee ask [questions] of the auditors [including]: if the auditor were solely responsible for preparation of the company's financial statements, would they have been prepared in any way differently than the manner selected by management? They should inquire as to both material and non-material differences. If the auditor would have done anything differently than management, then explanations should be made of management's argument and the auditor's response." SEC Release No. 33-8185 (Jan. 29, 2003).

(n40)Footnote 40. *See* Regulation S-X Rule 2-07(a)(2), *17 CFR § 210.2-07(a)(2) (2009)*.

(n41)Footnote 41. *See* Regulation S-X Rule 2-07(a), *17 CFR § 210.2-07(a) (2009)*. In August 2003 the Office of the Chief Accountant released a set of frequently asked questions clarifying the SEC's rules adopted pursuant to Section 204 of the Sarbanes-Oxley Act. These interpretations specify with greater clarity under what circumstances communication with the audit committee is required. *See* Office of the Chief Accountant, Application of the January 2003 Rules on Auditor Independence Frequently Asked Questions, Questions 25-29.

(n42)Footnote 42. Section 101 of the Sarbanes-Oxley Act, establishing the PCAOB provides, "There is established the Public Company Accounting Oversight Board, to oversee the audit of public companies that are subject to the securities laws, and related matters, in order to protect the interests of investors and further the public interest in the preparation of informative, accurate, and independent audit reports for companies the securities of which are sold to, and held by and for, public investors." Sarbanes-Oxley Act § 101, *15 U.S.C. § 7211 (2005)*.

(n43)Footnote 43. *See* Sarbanes-Oxley Act §§ 102(a) and 102(d), *15 U.S.C. § 7212 (a), (d)*.

(n44)Footnote 44. *See* Sarbanes-Oxley Act § 103(a), *15 U.S.C. § 7213(a)*. The outside auditor's report on internal control over financial reporting is discussed in § 14.08[5] below.

(n45)Footnote 45. *See* Sarbanes-Oxley Act § 103(a), *15 U.S.C. § 7213(a)*.

(n46)Footnote 46. *See* Sarbanes-Oxley Act § 104(a), *15 U.S.C. § 7214(a)*.

(n47)Footnote 47. *See* Sarbanes-Oxley Act § 104(a), *15 U.S.C. § 7214(a)*.

(n48)Footnote 48. *See* PCAOB Auditing Standard No. 3 (June 9, 2004), PCAOB Auditing Standard No. 4 (Feb. 6, 2006), PCAOB Auditing Standard No. 5 (July 27, 2007), and PCAOB Rules 3520-3524 (April 19, 2006).

(n49)Footnote 49. *See* Sarbanes-Oxley Act § 105, *15 U.S.C. § 7215*.

(n50)Footnote 50. *See* Sarbanes-Oxley Act § 105(c)(4), *15 U.S.C. § 7215*.

(n51)Footnote 51. *See* Sarbanes-Oxley Act § 105(c)(4), *15 U.S.C. § 7215*.

(n52)Footnote 52. *See* Sarbanes-Oxley Act § 105(c)(5), *15 U.S.C. § 7215*. Determining how accounting firms can avoid the PCAOB's scrutiny encourages a review of Rule 102(e) of the SEC's Rules of Practice and the resulting case law. A survey of recent cases under Rule 102(e) exposes the fact that the SEC generally brought proceedings where the accountant had a stake in the outcome of the transaction and either (1) committed fraud for its own advantage or profit, (2) committed accounting fraud by consciously treating a transaction in a manner it knew or should have known to be in violation of GAAP and not supported by GAAS, or (3) committed malpractice by a gross departure from professional standards.

(n53)Footnote 53. *See* Sarbanes-Oxley Act § 404(b); Regulation S-K Item 308(b), *17 CFR § 229.308(b) (2009)*; Regulation S-X Rule 2-02, *17 CFR § 210.2-02 (2009)*. Management's report on internal control over financial reporting is discussed in §14.02[2][d][iv] above.

(n54)Footnote 54. *See* Sarbanes-Oxley Act §§ 103(a) and 404(b). The PCAOB's Auditing Standard No. 2 was approved by the SEC on June 17, 2004.

(n55)Footnote 55. According to Auditing Standard No. 2, an "audit of internal control over financial reporting" (the term that is used throughout Auditing Standard No. 2) refers to the "attestation" process required pursuant to Section 404 of the Sarbanes-Oxley Act. The PCAOB's Auditing Standard No. 2 requires an "audit" of internal control over financial reporting that must be integrated with the outside auditor's audit of the company's financial statements.

(n56)Footnote 56. *See* PCAOB Auditing Standard No. 5 PP 85-86 (July 27, 2007).

(n57)Footnote 57. The terms "significant deficiency" and "material weakness" are described in § 14.02[2][d][i].

(n58)Footnote 58. PCAOB, *Board Approves New Audit Standard For Internal Control Over Financial Reporting and, Separately, Recommendations on Inspection Frequency Rule*, (May 24, 2007).

(n59)Footnote 59. PCAOB, *Staff Views, An Audit of Internal Control Over Financial Reporting That Is Integrated With an Audit of Financial Statements: Guidance for Auditors of Smaller Public Companies*, (Jan. 23, 2009). In response to concerns over the impact of the implementation costs of Sarbanes-Oxley Section 404 compliance, the SEC repeatedly postponed the compliance deadline for non-accelerated filers. Only in 2009 were small filers required to comply with Section 404(a), management's assessment of internal controls. The deadline for compliance with Section 404(b)'s requirement of an attestation of internal control has been postponed to filings covering fiscal years ending on or after December 15, 2009. Industry opinion was that additional extensions of that deadline are now unlikely, given Chairman Schapiro's comments on the topic during her confirmation testimony: "It's time that we bring uniformity to the system."

(n60)Footnote 60. The SEC and the PCAOB worked to harmonize Accounting Standard No. 5 with the SEC's revised rules governing management's evaluation of effectiveness over internal controls issued at the same time. In particular, the definitions of "significant weakness" and "material weakness" were standardized. The SEC rules are described in §§ 14.02[2][d][ii] and 14.02[2][d][iii] above.

(n61)Footnote 61. Nevertheless, the standard requires the auditor to evaluate all deficiencies that are identified and communicate both material weaknesses and significant deficiencies, in writing, to the audit committee.

(n62)Footnote 62. PCAOB, *Board Approves New Audit Standard For Internal Control Over Financial Reporting and, Separately, Recommendations on Inspection Frequency Rule*, (May 24, 2007).

CHAPTER 15 EXECUTIVE COMPENSATION: THE PERSPECTIVE OF THE COMPENSATION CONSULTANT

2-15 Corporate Governance: Law and Practice § 15.01

AUTHOR: Yvonne Chen and Deborah Lifshy

§ 15.01 General Considerations Surrounding Executive Compensation as a Corporate Governance Issue

[1] Importance of Executive Compensation in Corporate Governance

The field of corporate governance is concerned with the balance of power among corporate executives, directors, shareholders, and other constituents. A central problem of corporate governance is the so-called agency problem--the "divergence of interest between ownership and control."¹

The agency problem finds stark expression in the area of executive compensation. A self-interested manager wants as much money as possible.² The shareholders' interest is not necessarily in minimizing the compensation paid to corporate executives but, rather, in *optimizing* the level of executive compensation (that is, in setting the executive compensation at a level that maximizes the net value to the corporation) and in arranging for the compensation to be paid on terms and conditions that maximize its positive effect on corporate performance and in particular on shareholder value.

[2] Increasing Focus on Executive Compensation Excesses--The 2008 Financial Crises and Collapse of Credit Markets

In the decade leading up to the financial crises that began in 2008, perceived abuses of executive compensation commanded the attention of the business press and the popular press alike and attracted vocal criticism from shareholder activists, institutional investors and policymakers. Among the more infamous of such abuses were payments to former Disney President Michael Ovitz;³ former Tyco CEO L. Dennis Kozlowski;⁴ former WorldCom CEO Bernie Ebbers;⁵ and former Enron executives Kenneth Lay and Jeffrey Skilling.⁶ While newsworthy, these abuses were largely muted by the general prosperity experienced by Wall Street as well as everyday investors in the markets.

The legal and regulatory reform⁷ movement predating the 2008 fiscal crises included, but was not limited to, the SEC's adoption of expanded proxy disclosure obligations and the passage of a new section of the Internal Revenue Code ("*IRC Section 409A*") with tax rules and penalties on deferred compensation not meeting certain requirements, as included in the American Jobs Creation Act of 2004, as well as increased involvement of institutional and other shareholders particularly in the form of shareholder proposals concerning executive compensation issues. Other pre-2008 financial

crises "reforms" included a growing sense of independent responsibility among board compensation committee members, with a concomitant increase in reliance on independent compensation consultants and legal counsel working directly with board compensation committees (rather than through executive management); and the publication by influential business groups of "white papers" on the subject of executive compensation as a corporate governance issue.⁸

The compensation landscape changed significantly in 2008 as regulators, lawmakers and activists acted in a myriad of ways to address the deepest economic crisis since the Great Depression. In search of the culprits in the global financial meltdown, bloated executive pay and the excessive risk-taking it fueled stood out as prime suspects. In one year, Congress, the SEC, the Treasury Department, the Federal Reserve, and other government agencies and influential shareholder advisory advisors have played unprecedented roles in shaping the confines of executive pay, director elections and other governance issues.

The different forms of executive compensation, as well as the pay mix under various circumstances, will be discussed in detail in this chapter, along with discussion of how the new regulatory environment has influenced pay mixes and decision-making. Appendix 15-B contains a glossary of most of the terms and forms of compensation discussed herein.⁹

[3] New Rules and Restraints--Overview of the Regulatory Evolution

While Chapter 10 will cover in more detail the technical aspects of the regulatory evolution that followed the financial crises, the following summarizes the most important aspects of either pending or adopted restrictions that have set the tone for many compensation decisions following the economic crises. This chapter elaborates on how many of these new constructs are shaping traditional compensation consulting and recommendations.

[a] SEC Issues Amendments to Disclosure Rules:

Prompted at least in part by the continuing economic crises, in the summer of 2009, the SEC voted to propose new rules that would require companies to disclose more information on compensation risks, other services performed by compensation consultants that may result in perceived conflicts, director qualifications and board leadership structures. The SEC initiatives also include a rule change on the disclosure of equity compensation. In the Summary Compensation Table, companies would be required to report the aggregate grant date value of equity compensation awarded during the year, rather than the current method of reporting the annual accounting expense accrual under FAS 123R. The grant date value would reflect the full number of shares or options that could vest, effectively resulting in inclusion of maximum grant date award values for performance-based equity awards.¹⁰

[b] Passage of EESA, TARP and ARRA:

The Troubled Asset Relief Program (TARP), was established pursuant to the Emergency Economic Stabilization Act of 2008 (EESA)¹¹ (later amended by the American Recovery and Reinvestment Act of 2009 (ARRA)¹²), to give the U.S. Department of the Treasury broad authority to purchase and insure mortgage assets and other financial instruments to promote financial market stability. Companies that received federal assistance under this program were obligated to comply with certain executive compensation restrictions and corporate governance standards, as follows:

- Incentive compensation must not encourage unnecessary and excessive risks that could threaten the value of the institution, and an extensive certification by the CEO and CFO as to review of risk in compensation plans is required.
- Bonus payments (except for limited restricted stock awards) are prohibited for anywhere from 1 to 25 highest paid executives (HCEs), depending on the amount of TARP funds received.

- "Clawbacks" are required for the named executive officers (referred to as CEOs) and next 20 (HCEs) where incentive compensation was based on statements later found to be materially inaccurate.
- Severance payments for the CEOs and next 5 HCEs are prohibited.
- Tax gross-ups for the CEOs and next 20 HCEs are prohibited.
- The section 162(m) deduction is limited to \$500,000, with no exceptions for performance-based pay.¹³
- Enhanced disclosure about perquisites and establishment of luxury expenditure policies are required.
- A "Say on Pay" non-binding advisory vote on executive compensation is required.

In addition, an Office of the Special Master for TARP Executive Compensation (also known as the "compensation czar") was established to oversee executive compensation for companies that have received or are receiving TARP assistance.

While these restrictions are required only of companies that have received TARP assistance, the standards have set the tone for a broader trend in executive compensation. Specifically, policies related to limiting (or clearly assessing) risk in compensation plans, clawbacks, and scaling back severance and tax gross-up payments and other perquisites are but a few of the TARP restrictions anticipated to spill over into policies of non-TARP companies, and likely to become viewed as best practices, at least until the economy recovers.

[c] H.R. 3269 (the Corporate and Financial Institution Fairness Act)

A major step toward mandatory Say on Pay and other significant regulatory reform was taken in the summer of 2009 when the House passed H.R. 3269 (the Corporate and Financial Institution Fairness Act). This bill would provide for:

- **Say on Pay: Annual Shareholder Approval of Executive Compensation:** All public companies must give their shareholders an annual, non-binding vote on executive compensation matters disclosed in the proxy statement for named executive officers, including the Compensation Committee Report, the CD&A, the compensation tables and any related materials.
- **Shareholder Approval of Golden Parachute Arrangements:** In the event of a change-in-control transaction (such as an acquisition, merger or substantial asset sale requiring shareholder approval), shareholders of public companies must be given a non-binding vote on any compensation agreements related to the transaction with named executive officers. This information must be provided in the proxy statement seeking shareholder approval of the transaction in a "clear and simple form."
- **Compensation Committee Independence**
 - **Stricter Standards of Independence for Members:** To be considered independent, committee members cannot accept any consulting, advisory, or other fees from the company other than pay received for their board service.
 - **Compensation Consultants:** Any compensation consultant retained by the committee must be independent under standards to be established by the SEC.

- Disclosure: Companies must disclose in their proxy materials whether the committee has retained a compensation consultant meeting SEC standards for independence.

- **Enhanced Reporting and Regulation of Compensation Incentives at Financial Entities:** The proposed legislation would give the federal regulators enhanced powers to regulate compensation of certain financial entities where it considers compensation to be tied to excessive risk-taking.

[4] Compensation Decisions in a Say on Pay Environment

With Say on Pay likely to be required for all public filers by 2011, it is important to understand both the action steps and rationale for such a process. Proponents of Say on Pay argue that an advisory vote will give shareholders an effective mechanism to express dissatisfaction with a company's executive compensation practices, similar to the voting mechanisms already in place in the UK. Critics respond that Say on Pay has significant shortcomings, among them, that holding an up/down referendum on highly complex executive compensation programs will give corporate boards little practical insight into shareholders' views on pay. They also are concerned that investors may lack the expertise or inside company information needed to appropriately evaluate pay decisions for individual executives.

It is important to take proactive steps in advance of the impending new requirement, including the following:¹⁴

Knowledge

- Make sure the committee is making pay decisions today in the context of the upcoming Say on Pay vote.
- Determine whether committee members are comfortable taking a position that differs from "best practices" recommendations if they believe such recommendations may not make sense for the company.
- Understand institutional shareholders' views on Say on Pay and whether they are likely to follow recommendations from proxy advisory firms like RiskMetrics Group (referred to herein as RMG, and formerly known as ISS).
- Stay abreast of the results of Say on Pay proposals at other companies.
- Partner internally with investor relations, legal and senior management on a multi-disciplined approach toward Say on Pay. Also draw upon the experience and expertise of external advisors across the various disciplines.

Disclosure

- Review the proxy CD&A and related tables to ensure executive compensation disclosure is clear, complete, and not open to misinterpretation. Consider whether the proxy disclosure is consistent with other public documents (such as the company's 10-K, annual report, press releases, etc.), especially with respect to key business goals, risks, and competitors.

Program Review

- Identify any perceived "problematic pay practices" in the company's executive compensation philosophy and program design.
- Review market benchmarking practices, particularly with respect to selection of appropriate peer

groups.

- Conduct an analysis to ensure there is a strong link between executive pay and performance over multiple long-term time horizons.
- Conduct a risk assessment to ensure that incentive programs do not motivate "unnecessary and excessive risk-taking." Consider additional checks and balances such as caps on bonus payouts and clawback provisions.
- Consider the use of stock ownership/retention guidelines to strengthen the long-term alignment between executives and shareholders.
- Establish a plan for any changes to the compensation program resulting from the program review, including what changes should be made, when changes will be implemented, how changes will be communicated to employees and any relevant external parties, etc.
- Articulate the company's rationale for any perceived "problematic pay practices" that the company has decided not to change and develop an approach for addressing investor questions, should concerns arise.

Shareholder Outreach

- Establish an effective shareholder communication strategy, including a process for gathering feedback on executive compensation programs. Consider how to differentiate the approach for the company's top 20 institutional shareholders.
- Establish a strategy for communicating with employee shareholders, including unions where applicable.
- Review the company's bylaws to determine how abstentions would count in a Say on Pay vote. Abstentions can be a determining factor in vote outcomes, but changing the bylaws on abstentions could negatively affect other types of shareholder votes.
- Despite the visibility of Say on Pay and the benefits of the proactive steps outlined above, common sense still suggests that sustained, superior performance can offset the concerns of most shareholders.

Process in Advance of SEC Rules

Either new federal legislation or SEC regulation will ultimately determine what form Say on Pay will take in the U.S. TARP companies are required to have an annual, non-binding Say on Pay vote that covers the compensation of the executives, as disclosed pursuant to the compensation disclosure rules of the SEC, including the compensation discussion and analysis ("CD&A"), the compensation tables and any related material disclosed in the proxy statement.

To date, non-TARP companies are not racing to put Say on Pay on the proxy ballot. Most companies are waiting for Say on Pay to become mandated, rather than implementing Say on Pay in a format that would ultimately be changed to conform to new regulations.

Non-TARP companies that have already voluntarily adopted Say on Pay have taken a variety of approaches. The areas where voluntary Say on Pay proposals differ include:

- (A) frequency of the Say on Pay vote,
- (B) whether it is a single "yes/no" vote,
- (C) what elements of pay are actually being put to a vote,
- (D) the nature and extent of management's statement about the vote, and
- (E) whether the company has made any statement concerning what action the it might take if there is a negative Say on Pay vote against management.

(A) Frequency of Vote

An annual, non-binding Say on Pay vote is supported by pending legislation (House of Representatives: Shareholder Empowerment Act and Senate: Shareholder *Bill of Rights* Act of 2009) as well as the June 10, 2009 White House proposals. However, some institutional investors and shareholders are concerned about the burden of analyzing and voting on the pay at thousands of public U.S. companies, most of which file their proxy statements within a two-month window. By contrast, there are considerably fewer public companies in each of the other countries where Say on Pay has already been mandated. The various approaches that have been adopted to date include:

- annual vote (AFLAC Inc.)
- biennial vote (every other year; Prudential Financial, Inc.)
- triennial vote (every third year; Microsoft Corporation; proposed by the United Brotherhood of Carpenters Pension Fund)
- shareholder survey, no vote (Schering-Plough Corporation, Lockheed Martin Corporation, Northrop Grumman Corporation, and TIAA-CREF)

(B) One vs. Multiple Votes

Most companies that have voluntarily adopted Say on Pay are offering a single "yes/no" vote that is unlikely to help the board understand what shareholders are objecting to if there is a negative vote. As of the date of this writing, only a few have companies instituted multiple votes that address specific parts of the compensation program and decisions.

RMG's three-part Say on Pay vote was noteworthy because of that organization's position of influence as a proxy advisory firm. RMG offered shareholders a non-binding advisory vote on three aspects of pay and also indicated that its board compensation committee "will take into account the outcome of the vote when considering future executive compensation arrangements." The three vote resolutions are generally:

- approval of the company's overall executive compensation philosophy, policies and procedures, as described in the CD[A]
- approval of the compensation decisions made by the board with regard to Named Executive Officer performance for the previous (completed) year, as described in the CD[A] and
- approval of the application of the company's compensation philosophy, policies and procedures to evaluate the current (in progress) year's performance of, and award compensation based on, certain key objectives, as described in the CD&A.

This format is unlikely to gain popularity among public companies, particularly since the third resolution is predicated on full disclosure of the payout opportunities and performance goals for the current year that is in progress. Although the SEC continues to push for full disclosure of incentive plan performance targets, companies are intensely concerned that competitive harm could result from such disclosures. In some cases, there is potential for harm even after the performance period has been completed and the payouts have been made, e.g., business unit financial or operating performance results/goals that are not otherwise transparent to shareholders through segment reporting.

It would be possible to put each pay element to a vote separately (philosophy, peer group, salary, bonus, equity awards, etc.) in order to gain more specific information about what shareholders may not like about the compensation program. However, this borders on asking shareholders to micromanage the compensation program, is potentially cumbersome, and has the risk of an extremely negative outcome if each of the separate votes is "lost."

(C) What Shareholders Are Voting On

Pending SEC regulation, non-TARP companies may decide what shareholders are being asked to vote on. For example, the Say on Pay vote could allow shareholders to vote on the compensation philosophy, the compensation policies and procedures, the past year's program design, the current or coming year's program design, the actual compensation amounts awarded to the proxy officers in the past year, the amount of compensation opportunity that is offered to the proxy officers, the CD&A, the Summary Compensation Table, and/or the related proxy tables. A few companies have tried to focus on the compensation philosophy, policies and procedures, while being careful to avoid a direct vote on the actual compensation amounts. A comparison of the Say on Pay language for Microsoft Corporation and AFLAC Inc. illustrates this point:

Microsoft Corporation

"Accordingly, the Board of Directors proposes that you indicate your support for the Company's compensation philosophy, policies, and procedures and their implementation in fiscal year 2009 as described in the Compensation Discussion and Analysis section of this Proxy Statement."

AFLAC Inc.

"Resolved, that the shareholders approve the overall executive pay-for-performance compensation policies and procedures employed by the Company, as described in the Compensation Discussion and Analysis and the tabular disclosure regarding named executive officer compensation (together with the accompanying narrative disclosure) in this Proxy Statement."

In several cases, the company initially received a shareholder proposal to adopt Say on Pay that was included in its proxy statement. Although management and the board opposed the shareholder proposal, it may have passed with a majority. If there is subsequently a management Say on Pay proposal, the company should consider the language of the shareholder proposal when developing the management proposal.

Despite the time spent on crafting the exact language of the Say on Pay vote, many shareholders, including institutional investors, are not making much distinction when casting their votes.

(D) Scope of Management's Statement

Management statements in the proxy filing that encourage shareholders to vote in favor of the management Say on Pay proposal range from a brief reference to the other relevant sections of the proxy to a substantive discussion of the compensation philosophy and the key reasons to support management's position (e.g., about 200 to 700 words in length). Unlike TARP companies, the non-TARP companies have had more time to consider the wording of management's statement and are typically highlighting key shareholder-friendly aspects of the compensation program

(which might otherwise be overlooked in a lengthy CD&A), without providing so much detail that it is either duplicative or seemingly apologetic.

(E) Reference to Action Following a Negative Vote

Only a few of the companies with Say on Pay votes provided any discussion of what actions, if any, would be taken if the non-binding vote were to be negative/against management. Examples of management statements about how the results of the Say on Pay vote will affect compensation include:

H&R Block, Inc.: "Because your vote is advisory, it will not be binding upon the Board. However, the Compensation Committee will take into account the outcome of the vote when considering future executive compensation arrangements."

Microsoft Corporation: "Although the vote is non-binding, Board and the Compensation Committee will review the voting results. To the extent there is any significant negative say-on-pay vote, we would consult directly with shareholders to better understand the concerns that influenced the vote. The Board and the Compensation Committee would consider constructive feedback obtained through this process in making future decisions about executive compensation programs."

Of course, Microsoft does not specify what percentage of negative votes would be considered "significant." There is some debate regarding what level of votes against management is a "call to action" that cannot be ignored even if the vote is non-binding. At a minimum, if there is a majority vote against management, institutional investors like CalPERS expect action by the compensation committee and the board. If a company takes no action and is considered to be "tone deaf," the likelihood of a withhold vote campaign against the members of the compensation committee is quite high.

Our first-year experience with TARP companies that were required to implement Say on Pay in 2009 showed that 100 percent of the management proposals passed. Moreover, the majority passed with 90 percent or higher votes for management. Only about 5 percent of the management proposals passed with under 70 percent of the votes. As institutional investors and proxy advisory firms study this information, companies should not assume that passing with 50.1 percent of the vote will be sufficient to avoid a withhold vote campaign against the members of the compensation committee. In the UK, where Say on Pay has been mandated since 2002, the voting results are more tightly grouped. Some UK advisors would even consider passing with 90 percent of the votes to be a problem. Companies should also be aware that the media, RMG and others may only be considering the "For" votes as a percentage of the votes cast ("For" plus "Against"). Thus, abstentions are not considered, regardless of how an "Abstain" is required to be counted in each company's bylaws.

Proxy Advisory Firms

There is concern among public companies that the advent of mandatory Say on Pay will result in an undue increase in the power and influence of proxy advisory firms, particularly RMG. Mid-tier institutional investors who may not have their own teams of compensation research analysts tend to rely heavily on RMG. In some cases, an investment analyst may not be allowed to diverge from the RMG vote recommendations without bringing the matter to their firm's investment committee. As such, it would be unlikely that an investment analyst will take a contrary position in favor of management. The larger investment firms have their own independent research, but most still subscribe to various reports from the proxy advisory firms.

An emerging theme is that a company will be targeted by the proxy advisory firms and/or institutional investors if it is an outlier with respect to pay-for-performance misalignment or based on the presence of "problematic pay practices." The RMG voting policy manual lists several problematic pay practices, including change-in-control excise tax gross-ups offered to new executives or in materially amended agreements for existing executives. Fidelity and other

institutional investors also disclose their voting policies, although they do not all contain specific lists of problematic pay practices, nor are they all focused on the same problematic pay practices.

For 2010, RMG describes a two-step voting method on compensation-related recommendations whereby a negative vote on the management Say on Pay proposal would generally be the first action taken and withhold votes on the compensation committee could follow in the subsequent year if issues raised in the first year are still ongoing. Of course, RMG may still immediately recommend votes against directors if egregious pay practices are identified and/or if there is no management Say on Pay proposal on the ballot. In rare cases, RMG has also recommended votes against the entire board based on egregious issues with a company's compensation practices (for example, pervasive and ongoing problematic pay practices). Institutional investors have also been considering a two-step approach for management Say on Pay votes and director withhold votes as they define their voting policies in preparation for mandatory Say on Pay in the U.S.

Changes in Proxy Disclosure

The proxy CD&A remains the primary method of communication with all shareholders about compensation matters. U.S. companies across industries are already beginning to prepare for mandatory Say on Pay by making changes to their proxy disclosures, regardless of whether they are making any changes in compensation program design. The length of an average proxy CD&A section runs over 5,400 words and the pending SEC disclosure rules are likely to result in additional text. As such, it may be difficult for shareholders to pick out the information needed to form an opinion on the Say on Pay proposal. Furthermore, despite company efforts to provide "plain English" disclosures, many proxy CD&As read more like a legal document than a news flash. With Say on Pay looming, companies are starting to redraft the proxy CD&A from a marketing perspective. An emerging trend is to provide an overview of key compensation decisions and changes, along with the committee's supporting rationale, at the beginning of the CD&A. Companies are also highlighting policies that are likely to garner points on a best practices checklist, for example, the committee's retention of an independent compensation consultant who does not perform work on behalf of management, stock ownership guidelines for executives and directors, recovery or claw back of incentives if an executive has engaged in misconduct, and elimination of perquisites and tax gross-up provisions. The more that can be done to clarify the company's pay-for-performance alignment, the better.

Shareholder Outreach

Although outreach to major institutional investors and advisory groups is a regular aspect of the Say on Pay process in the UK, it is not clear whether shareholder outreach will play as significant a role in the U.S. At a minimum, U.S. companies are subject to Regulation FD, which prohibits companies from making selective disclosures to some investors and not others.

Interestingly, a survey of 231 companies¹⁶ suggests that just 6 percent of respondents said their company is "very concerned" about the prospects for Say on Pay, with another 35 percent describing themselves as "somewhat" concerned. Particularly since none of the TARP companies failed their Say on Pay votes, many companies do not seem to have focused on increasing shareholder outreach on compensation issues. For example, 87 percent of the survey respondents from TARP companies said they are not reaching out to shareholders any more often about executive pay issues than before Say on Pay was mandated. Non-TARP companies were also quite confident about Say on Pay:

- 76 percent of non-TARP firms indicated they think shareholders would vote in favor of their executive compensation program if a Say on Pay vote took place currently.
- 46 percent said that, at present, they "never" seek shareholder input on executive pay matters and fewer than 7 percent conduct shareholder outreach more than once a year.

- However, 62 percent of non-TARP firms said they will increase their outreach efforts if Say on Pay becomes mandatory.

On the other side, institutional investors and advisory groups may not be prepared to handle increased shareholder outreach efforts by significant numbers of U.S. companies. Even logistically, their investment analysts and research staff are too busy to accommodate meetings or private conferences with thousands of public companies, particularly during the proxy voting "season." For example, institutional investors may only speak to "problem" companies and/or large companies where they have significant investments. Thus, when pursuing shareholder outreach, it is advisable to begin a dialogue on important compensation issues outside of proxy voting season.

Overall, regardless of whether Say on Pay is a useful tool or seriously flawed, it is likely to become mandatory for U.S. companies in the near future. While a company may not choose to become an early adopter of Say on Pay, it is prudent for the compensation committee to get prepared. The bottom line is that the committee's compensation decisions should be able to pass muster with shareholders, even if it is demonstrated through a single, yes/no Say on Pay advisory vote.

CHAPTER 15 EXECUTIVE COMPENSATION: THE PERSPECTIVE OF THE COMPENSATION CONSULTANT

2-15 Corporate Governance: Law and Practice § 15.02

AUTHOR: Yvonne Chen and Deborah Lifshy

§ 15.02 Determining the Overall Level of Executive Pay

[1] The Upper Limits of Executive Compensation

Allegations of excessive executive pay form the basis of shareholder derivative lawsuits as well as challenges by the Internal Revenue Service ("IRS") to tax deductibility of compensation. Historically, shareholders have not prevailed in such lawsuits,ⁿ¹ but in the post-Enron era, courts became more receptive to shareholder charges of excessive executive compensation.ⁿ² This receptivity is expected to continue in the years following the financial meltdown of 2008. Once a lawsuit is filed, a compensation consulting firm may be retained as an expert witness to provide a reasonableness opinion. The expert's opinion typically is based on an examination and evaluation of several factors:

- executive qualifications and earnings capacity;
- executive availability;
- characteristics of the enterprise (such as size, complexity and circumstances);
- difficulty of meeting business challenges;
- results achieved (such as growth in revenues or profits, total shareholder return or other appropriate measures); and
- competitive industry benchmarks.

The compensation committee's determination of the overall level of executive pay should also be based on these as well as additional factors, some of which are specific to the company. Consider, for example:

- If a company pays its executives at the industry median, is the pay always reasonable? What if the entire pay package is in the form of salary--fixed pay that has no link to performance? What if the company is the worst performer in the industry?

- If a company pays its executives at the industry 75th percentile, is the pay necessarily excessive? What if the company's compensation philosophy is to deliver superior results by hiring "the best and the brightest," rather than the average performer?
- If a company pays its executives more than any other company in the industry, is the pay always excessive? What if the company significantly outperforms the industry on a consistent basis?

Compensation programs not linked to performance for shareholders and those that generate compensation levels inconsistent with performance on a relative basis are likely to be considered unacceptable. The compensation committee also must monitor the reasonableness of the compensation programs over time and in the context of the company's compensation philosophy. For example, an annual bonus plan that smoothes payouts through a deferral or banking mechanism could be appropriate for a cyclical industry, but this design deliberately will pay "too much" in bad times and "too little" in good times, in order to dampen the impact of general market fluctuations beyond the executive's control.

The mix of pay elements, the demographics/characteristics of the executive population and the corporate culture are also important considerations in avoiding excessive compensation costs. Offering a high-risk, leveraged program (for example, potential bonus from zero to 300 percent of salary) to a risk-averse, long-tenured executive group could promote an entrepreneurial culture, but the overall compensation levels might need to be higher than if the company were to offer a pay mix more common in traditional, mature industries (for example, a potential bonus from zero to 100 percent of salary). In contrast, private companies that do not offer equity or phantom equity incentives might have to pay higher cash compensation to attract the young entrepreneur.

Shareholders have a direct say in determining the level of equity compensation when they are asked to approve equity-related compensation plans.ⁿ³ While there is some debate about whether there is an optimal dilution level by company, analysis of historical data suggests that dilution levels well in excess of or substantially below industry norms are correlated with poor returns to shareholders.ⁿ⁴ In fact, RiskMetrics Group (referred to herein as RMG and formerly known as ISS) establishes guidelines for determining how much dilution is too much.ⁿ⁵

The compensation committee should annually review the overall compensation program for senior executives to ensure that the level remains appropriate in view of changed circumstances, including the performance of the company and the difficulty of attracting and retaining appropriately qualified senior executives in the current market. The committee's annual review of overall compensation levels and making changes when changed circumstances warrant them will help avoid an entitlement mentality, excessive compensation expense and, hopefully, shareholder derivative suits based on excessive compensation allegations.

[2] The Lower Limits of Executive Compensation

When executive pay is too low, the consequences include turnover, raiding by competitors, inability to hire superior candidates and difficulty in growing the business and competing effectively, particularly in service industries. However, these corporate ailments may also result from underlying problems other than below-market compensation--such as lack of opportunities for promotion, poor business fundamentals or an insufferable top executive. For this reason, executive compensation should always be considered in a broader human resources context and never in a vacuum.

Companies sometimes deliberately set target pay opportunities for executives below those of their competitors on the rationale that they offer non-monetary or "psychic" rewards not available at other companies, such as nicer offices, a superior suburban location, moderate hours, less travel, a low stress environment, more job security, and an opportunity to work on cutting edge research, a superior company reputation or a more family-friendly culture. In these situations, even if there is little executive turnover, the compensation committee should be vigilant to avoid the more insidious

costs of low pay. These include a gradual deterioration in the quality of executive talent, lack of motivation or incentive to advance (especially if there is compression in top executive compensation levels), complacency, low morale, title inflation and various efforts to "game" an inadequate incentive plan, such as distortion of the budgeting process, attempts to shift income from a "below threshold" year to the next year, frequent year-end negotiations regarding adjustments to performance metrics based on "unusual" circumstances, or using individual performance factors to guarantee a minimum incentive award.

Executive pay opportunities may also be too low if Herculean performance is required to achieve market median compensation levels. Sometimes this occurs inadvertently when absolute performance targets are used and the entire industry experiences a market downturn. Although a target incentive award might not be appropriate in that case, executives could be unduly penalized with a zero award despite performance that exceeds the industry average. If adjustments to the incentive opportunity or the performance measures are contemplated, it is important to remember that a windfall in an up market may offset the penalty in a down market.

[3] The Escalating Influence of Institutional Shareholder Advisory Services

Over the past few years, and particularly following the financial crises, institutional shareholders and those advisory services upon which institutional shareholders rely for vote recommendations have had an exponential impact on compensation decision-making among public companies. Of particular significance is the growing influence of RMG.

RMG may issue vote recommendations against compensation committee members, the CEO, an entire board and/or adoption of new equity plans depending on its analysis of the company's pay practices, so complying with their guidelines is an increasing concern among public companies. These guidelines fall in two general categories--the "pay for performance" test and the "problematic pay practice" test.

Pay for Performance Policy

Under its current policy, RMG may recommend against an equity plan and/or to withhold votes from compensation committee members if there is a disconnect between CEO pay and company performance, which is defined as: (1) total shareholder return ("TSR") over the most recent one- and three-year periods that under performs (below median) vs. the peer companies in the company's four-digit Global Industry Classification System (GICS), and (2) an increase, flat or a marginal decrease in CEO total compensation, particularly for the most recent year-over-year. Under the updated 2010 policy, RMG will also consider the company's pay-for-performance alignment over a five-year time horizon. This policy is intended to identify the worst performing companies within an industry at a time when broad market declines have affected all industries.

Problematic Pay Practices

In its policy guidelines, RMG indicates that it will vote against management Say on Pay proposals and/or vote against or withhold from compensation committee members, the CEO, and potentially the entire board if the company engages in problematic pay practices, and may also issue a vote against equity plans if the plan is a vehicle for poor compensation practices.

The following practices, while not exhaustive, are examples of problematic compensation practices that carry the greatest weight and may warrant RMG's withhold vote recommendations on a stand-alone basis:

- egregious employment contracts, including contracts containing multi-year guarantees for salary increases, non-performance-based bonuses and equity compensation;
- excessive perquisites;

- tax reimbursements or gross-ups;
- reimbursement of income taxes on executive perquisites or other payments;
- perquisites for former executives, such as car allowances, personal use of corporate aircraft or other inappropriate arrangements;
- egregious pension/SERP (supplemental executive retirement plan) payouts, including:
 - inclusion of additional years of service not worked that result in significant payouts without sufficient justification;
 - inclusion of long-term equity awards in the pension calculation;
- excessive severance or change in control provisions, including:
 - excessive change in control or severance payments, especially those with a multiple in excess of 3X cash pay;
 - change in control payouts without loss of job or substantial diminution of job duties (single-triggered);
 - new or materially amended employment or severance agreements that provide for modified single triggers, under which an executive may voluntarily leave for any reason and still receive the change-in-control severance package;
 - new or materially amended employment or severance agreements that provide for an excise tax gross-up (with modified gross-ups being treated in the same manner as full gross-ups);
- dividends or dividend equivalents paid on unvested performance shares or units;
- executives' using company stock in hedging activities, such as "cashless" collars, forward sales, equity swaps or other similar arrangements; or
- repricing or replacing of underwater stock options/stock appreciation rights without prior shareholder approval (including cash buyouts and voluntary surrender/subsequent regrant of underwater options).

For the first time, in 2010, RMG is also instituting an assessment of company policies and practices related to compensation that could incentivize excessive risk-taking, as well as factors that potentially mitigate the impact of risky incentives such as rigorous clawback provisions and robust stock ownership/holding guidelines. Most of the practices identified as "risky" are consistent with RMG's existing problematic pay practices.ⁿ⁶

Glass Lewis as well as individual institutional investors likewise have their own set of compensation-related guidelines for proxy voting. However, RMG remains the dominant shareholder advisory service behind influencing and shaping policy decisions.

[4] Heightened Scrutiny of Peer Groups and Benchmarks

The process of benchmarking compensation is a powerful tool used by most public companies to make decisions regarding overall levels of pay. With the SEC's expanded disclosure rules requiring companies to disclose "peers" against which they benchmark compensation, there has been growing concern that many companies tend to "cherry pick" peer companies that will result in the most generous payouts. To ensure that appropriate and defensible peer groups are selected, the following guidelines are often considered best practices that should result in good governance practices:⁷

- Follow a rules-based approach. Picking a peer group can be highly subjective absent a well-considered, consistent process. An appropriate approach would include identifying the factors for selection of peer companies (e.g., revenue, product/service similarity) as well as establishing appropriate parameters and tolerances to evaluate the "similarity" of each factor (e.g., 1/2 to 2 times the company's revenues).

- Select similar-sized firms. Company size often serves as a proxy for comparing job complexity and scope between executives with the same title at two different firms. Ideally, the selected parameters of the company under study (such as revenues, assets, market capitalization or number of employees) should be around the median of the peer group. Revenue generally offers the strongest correlation with pay levels, although total assets often prove more relevant for financial services industries such as banking and asset management. While market capitalization may also be an important "size" factor, companies should be careful about using it as the primary factor because its high volatility may result in annual changes to the composition of the peer group.

- Pick firms with product/service similarity. Product/service similarity is a significant predictor of both pay levels and pay practices, due to underlying industry financials, life cycles, risk profiles, transferability of executive skills, etc. Alternatively, "like" industry firms can be used if companies are mindful of any differences with direct competitors in terms of size, financial performance, choice of pay vehicles, and actual pay levels.

- Revisit the peer group annually, but avoid major overhauls. Maximizing peer group consistency over time avoids drastic swings in the compensation data, better illuminates emerging compensation trends, and demonstrates that firms were not cherry-picked to produce favorable comparisons. If a major overhaul is necessitated by significant changes in size, merger and acquisition activity, or other factors, it should be based on the same rules-based approach used in the initial selection process. Leniency may be exercised for "borderline" companies that are just outside the group's revenue or market capitalization criteria.

- Be cautious about including non U.S.-based firms. Inclusion of foreign-based companies in the peer group may be warranted in some cases. There have been rapid changes in terms of disclosure and regulations outside the U.S., and executive portability is increasing. However, inclusion of foreign-based companies is complicated by multiple factors: data still is generally less available in most countries outside the U.S.; the labor market for top U.S. executives remains generally U.S.-based; and other countries' pay practices can vary dramatically because of local customs, regulations and requirements.

- Include 10-20 firms in the peer group. RMG has found that 57 percent of S&P 1,500 companies have between 10 and 20 companies in their peer group, which is generally sufficient to minimize the impact of outliers when analyzing market data. A much larger group is often less comparable in size and industry and results in significant additional expense for data collection, while a much smaller peer group may not provide adequate data to reach valid conclusions.

- Consider the peer group put together by RMG and other proxy advisory firms. For its annual Proxy

Research Reports, RMG creates a peer group for each company that is used as the basis for its compensation analysis and proxy voting recommendations. RMG's peer groups usually consist of 8 to 12 firms, based generally on revenue and the General Industry Classification Standard (GICS) code. RMG's methodology may not provide an appropriate group if a company lacks a sufficient number of similarly sized peers within its GICS code. However, given the advisory firm's voting influence, companies should at least be aware of RMG's peer company choices in putting together their own peer groups.

[5] The Growing Importance of Optics

In addition to ensuring that pay programs are competitive and effective, there is a new focus--particularly in times of economic crisis--on program "optics." The perspective of shareholders has never been more acute, given significant reductions in shareholder wealth, outrage over executive compensation at many financial services organizations receiving government bailouts, and growing support for giving shareholders a direct voice on compensation programs via a Say on Pay proxy vote. Employees' perceptions also become critical when organizations take such steps as reducing their workforce, eliminating salary increases, and reducing 401(k) benefits.

Compensation committees have been faced with the challenge to eliminate any design features that are not justifiable and to address elements that, while appropriate, are at risk of being criticized--all without sacrificing the compensation program's competitiveness or effectiveness. This is best accomplished by taking a holistic perspective and doing what is right for a particular business, rather than "following the herd." The following seven practices are being used by committees to enhance program optics:⁸

- **Minimization of perquisites.** Executive perquisites are a very small percentage of total compensation value, but a huge driver of shareholder and employee dissatisfaction. Many companies are eliminating executive perquisites that generally lack a legitimate business purpose and that other employees must cover on their own, such as personal use of a corporate aircraft; company cars and drivers; car allowances or company cars; club dues; and tax preparation services. In contrast, executive perquisites with a potentially legitimate business justification include business use of a corporate aircraft; a home security system; or a periodic physical exam.
- **Minimization of tax gross-ups.** Paying an executive's tax bill will never be viewed positively by shareholders or employees. Moreover, gross-up provisions incurred when change-in-control payments trigger excise taxes can entail significant added expense to the company. Going forward, it would be prudent for companies to avoid the use of gross-ups, with the possible exception of relatively new executives who stand to be significantly hurt by the excise tax "penalty" because their base amount, or five-year W-2 compensation with the company, is artificially low, while the value of their accelerated equity vesting may be artificially high, especially if they have received inducement equity awards at hire with limited time for exercise or vesting.
- **Rationalization of severance.** Executive-level severance is now the veritable poster child for egregious compensation. While severance has a legitimate purpose, companies always should carefully review eligibility, potential payouts, and the conditions under which severance would be provided. To ameliorate concerns about severance programs, more companies are excluding executives at later stages in their careers from eligibility for severance benefits, reducing benefit formulas and levels, and redefining contract terms such as "Cause," "Change-in-Control," and "Constructive Discharge." A challenging case that should be addressed is abysmal performance that falls short of the definition of "Cause."
- **Performance of "dynamic pay modeling."** The best way to avoid embarrassing compensation optics is to incorporate a forward-looking analysis in the program design process. Reviewing potential

outcomes under various performance scenarios at the time the program is being adopted helps avert "surprises" when compensation is earned, delivered, or disclosed.

- Embracing transparency. The litmus test for any compensation decision is whether it will withstand the light of day when reported in the proxy statement CD&A. By embracing full transparency and considering disclosure implications at the time decisions are made, optics issues can be minimized.

- Improving shareholder relations. Including shareholder outreach in the executive compensation process can help avert negative reaction to formal compensation disclosures. We recommend engaging in regular dialogues with large shareholders to increase their understanding of compensation programs, particularly in advance of a management request for authorization of additional shares for equity compensation plans or a Say on Pay shareholder vote. While mandated Say on Pay is likely in the near future, it is a blunt instrument and not a substitute for proactive communications with key shareholders on executive compensation issues.

- Retention of independent and experienced consultants. In a rapidly changing environment, a seasoned executive compensation consultant adds value and credibility to the compensation process. Given the perception that executives wield excessive influence over the process of determining pay, some consultants now advise that the compensation committee retain an independent consulting firm that has no other business relationships with the company.⁹ Eliminating the potential for a highly visible conflict within the overall governance process makes it less likely that decisions and programs will be questioned down the road.

(n5)Footnote 5. RiskMetrics Group (RMG) considers dilution levels above the average for those companies with top quartile performance within an industry to be unreasonable. RMG's dilution calculation is based on what it refers to as a Shareholder Value Transfer ("SVT") formula. RMG uses a binomial option pricing model to determine the amount of shareholder equity flowing out from a company to its equity plan participants as options are exercised and restrictions on stock awards lapse. The total SVT cost of a company's equity compensation program is then measured against an "allowable" cost. The company-specific allowable cost or "cap" is determined by RMG based on a company's GICS (Global Industry Classification Standard) and is driven by several factors; among these, market capitalization and performance are important components. RMG also compares each company's annual share utilization rate or "burn rate", on a three-year average basis with the annual share utilization rate assigned each year for that company's industry

group (also based on GICS). RMG applies a multiplier to the number of full-value awards granted over each of the prior three years; the multiplier is based on the company's annual stock price volatility. If the burn rate three-year average exceeds one standard deviation more than the industry average for that particular GICS (and is greater than 2 percent), RMG will state in its proxy analysis report that the company failed the burn rate test. RMG would then recommend a vote against an equity compensation plan proposal to add shares that the company had on its meeting agenda, regardless of SVT cost.

CHAPTER 15 EXECUTIVE COMPENSATION: THE PERSPECTIVE OF THE COMPENSATION CONSULTANT

2-15 Corporate Governance: Law and Practice § 15.03

AUTHOR: Yvonne Chen and Deborah Lifshy

§ 15.03 Alignment with Shareholder Interests

[1] Shifting Views of "Alignment"

Many compensation committees and shareholder activists espouse the virtues of aligning executive compensation incentives with shareholders' economic interests. There is no consistent general consensus about what forms of incentive compensation programs achieve such alignment; perspectives on how best to align executive and shareholder interests through incentive compensation programs seem to vary from industry to industry and from epoch to epoch.

The popular view of what types of incentive compensation programs lead to alignment or misalignment of executive incentives and shareholders' economic interests changes over time. In the immediate post-Enron era, media stories blaming market volatility and executive myopia on the overuse of stock options and praising the virtues of restricted stock grants reflected a 180-degree reversal from the prevailing view of previous years, when restricted stock with time-based vesting was commonly criticized as payment for mediocrity. Within a single company, an incentive plan that worked well a few years ago may no longer be effective due to changes in business strategy, corporate culture, management composition, competitive environment or even the fact that participants have grown too familiar with the plan to be sufficiently motivated by it.

Despite changes over time and differences in perspective about the incentive compensation programs that best align shareholders' and executives' financial interests, there is a single bottom-line measure of corporate performance for shareholders: total shareholder return ("TSR").¹ So why not use TSR as the performance measure in all incentive plans? Although a plan tied to TSR (for example, over a three-year cycle) can provide a strong link between executive pay and shareholders' economic interests, we submit that TSR, standing alone, is rarely a sufficient basis² for an incentive compensation plan for the following reasons:

- performance should be considered relative to an industry or market index, rather than solely on an absolute basis, to avoid unduly rewarding or penalizing executives for fluctuations in stock or financial performance unrelated to executive performance. Since "all ships rise with a rising tide," the compensation committee has a responsibility to evaluate TSR performance in the context of broader market and industry performance, particularly over the long run;

- TSR is not directional with respect to business strategy; it does not inform management as to what levers should be pulled to achieve the business strategy reviewed with and approved by the board of directors; strong TSR is simply the hoped for result, over the long run, of effective implementation of the company's business strategy;
- TSR is a global, company-wide measure. While the CEO certainly has responsibility for overall results, it is often more appropriate and effective for a business unit head to focus on creating shareholder value at the business unit level, where there is no public stock instrument and therefore, no publicly determined business unit TSR;
- the stock price on either end date of a TSR performance cycle (for example, three calendar years) could be strongly affected by unusual market forces. Thus, TSR measures are potentially sensitive to timing;
- under FAS 123R,ⁿ³ if TSR is used as a performance measure and the maximum condition is not satisfied, previously recognized compensation cost cannot be reversed or trued-up to match the actual performance outcome.

The key is to understand the company's business model and then find a balance between financial operating, and stock performance measures without having an overwhelming number of goals. Since the optimal risk/reward model shifts over a company's life cycle, the types of incentive vehicles a company offers should also shift over time.

[2] Linking Executive Pay to Performance

[a] Prevalent Incentive Compensation Vehicles

[i] *Annual Incentive Plans*

Annual incentive awards are based on performance over one year. They are typically paid in cash shortly after the end of the fiscal year,ⁿ⁴ but some companies pay a portion of the award in shares, restricted shares, deferred shares or deferred cash.ⁿ⁵ Annual incentives are usually not paid out in stock options. The mix of cash versus stock may be mandated by the company or at the election of the executive. Particularly if the mix is elective, the company may provide an extra incentive to executives electing restricted stock in lieu of cash, for example, a "kicker" of 15 to 20 percent of the restricted stock value. Most companies that offer non-qualified deferred compensation plans allow participants to elect deferral of annual incentive awards.

Relatively few companies provide quarterly or semi-annual incentives to top executives. Similarly, top corporate executives would not typically participate in a sales compensation plan, with the possible exception of the top sales executive. The rationale is that top executives are responsible for delivering overall company performance over a time horizon of at least one year. Although the terms "annual incentive" and "bonus" tend to be used interchangeably, annual incentive awards should be based on pre-determined performance goals that are communicated to the participant at or before the beginning of the year. The pre-determination of goals does not preclude discretionary evaluation of performance at the end of the year, but ensures that participants have an incentive to achieve pre-established goals. The proxy disclosure rules adopted by the SEC in 2006 emphasize the importance of distinguishing between incentive and non-incentive plans, and eliminate the distinction between annual and long-term incentives.

A bonus award is not tied to specific goals and could be discretionary, such as the traditional Christmas bonus. To draw a fine distinction, a profit sharing plan that provides executives with strong motivation to meet and exceed specific profit goals would be considered an annual incentive plan, but a company-wide profit sharing plan that automatically

provides a small award to all employees is closer to a bonus program.

Performance measures used in annual incentive plans are often financial, operating or business goals, such as sales growth, cash flow from operations, net income versus target, reduction in administrative costs, units sold net of returns, room occupancy rates, number of new subscribers, or customer satisfaction ratings. While strategic goals often take longer than one year to implement--for example, become first in market share--interim milestones can be used in an annual incentive plan. However, determining the amount of the awards may be an issue for strategic goals that are "all or nothing." While some companies use TSR in their annual incentive plans, one-year TSR can be extremely volatile and more reflective of general market factors than individual company performance.

[ii] Stock Options

From the early 1990s through the first few years of the new millennium, stock option grants grew in both prevalence and size. In 1992, stock options represented about 30 percent of the pay mix for the CEO of the top 200 public companies measured by revenues (the "PM&P Top 200").⁶ By 2002, stock options represented about 60 percent of the pay mix.⁷ Most of this growth came through reduced emphasis on base salary and annual incentives in the pay mix. By 2004, however, stock options only represented about 32 percent of the pay mix, largely due to loss of beneficial accounting treatment previously offered by APB 25.⁸ In 2008, stock option use continued to represent about 32 percent of the CEO pay mix.⁹

The pendulum continues to go back and forth between either annual incentives plus long-term cash incentives versus stock options. In addition to increasing shareholder dissatisfaction with high dilution levels, a number of other factors may push companies to reduce or eliminate their use of stock options:

- In a down stock market, such as the marketing following the 2008 financial crisis, executives may become more risk-averse and therefore more willing to trade the potential gains from stock options for downside protection provided through "full value" awards like restricted stock.
- In a volatile stock market, executives may also prefer incentives that are not affected by general market movements outside their control.
- With FAS 123R mandating that publicly traded and privately held companies recognize the "fair value" compensation cost for share-based payments in their financial statements, the bias toward stock options was removed and companies have reevaluated whether stock options are the most effective incentive vehicle when there is a "level playing field."
- If companies must record an expense when they grant stock options and yet executives perceive less value in option grants than the accounting treatment suggests, stock option grants will be inefficient incentives. In this regard, some executives may not intuitively understand the complex logic of option valuation models and therefore, if the Black-Scholes formula (for example) is used to value the expense of option grants on the company's financial statements, they may not feel that they are receiving the stated value.
- Since the adoption of new stock exchange listing requirements in 2003, companies have been required to obtain shareholder approval for equity-based compensation plans, with only a few narrow exceptions. This has made it more difficult for companies to have a sufficient number of shares authorized for stock option grants.
- The press and general public have become increasingly critical of companies with stock option plans that result in high levels of dilution and repricing of underwater options. News stories in the wake of

Enron, options backdating scandals and other notorious corporate governance debacles shortly after the turn of the millennium equated executive greed with the overuse and misuse of stock options. This public perception caused companies seeking to regain investor confidence to consider a shift away from stock options to other forms of compensation.

Companies that maintain their stock option programs in down economies consider customizing the terms of their option grants to minimize their potential expense and to provide a stronger link to executive performance. One way to do this is to grant options with terms shorter than the historical norm of ten years without an offsetting increase in the number of options granted. Since executives typically exercise their options well before expiration, the greater expense of a ten-year option may not be justified.

In addition, with longer vesting schedules, the expense of option grants may be spread out over a greater number of years. Companies may also add performance-based vesting criteria (with vesting tied to company-specific performance measures or to TSR relative to the industry or the overall market).¹⁰ Premium priced options designed to ensure a recovery in stock price to previous levels may make sense. Option profits may be subject to clawback if financials need to be restated¹¹ or if executives violate non-compete or other restrictive covenants.¹² Companies may seek to turn option holders into long-term investors by requiring executives who exercise options to hold the company stock they receive for a specified number of years.

Although disclosure and shareholder control over dilution have improved in the post-Enron era,¹³ the challenge for investors remains understanding the true value of stock option grants given the disparate presentation of information about stock options in annual reports and proxy statements, and the intuitive opaqueness of the logic of the complex Black-Scholes and binomial models for valuing options, particularly when many outstanding options are underwater. The valuation of stock options will become increasingly important as companies consider shifting value to other equity incentives or cash awards and attempt to duplicate the value previously provided by stock option grants.

In response to the option "backdating" scandals that broke in 2006, the SEC's new proxy disclosure rules require significantly greater disclosure regarding option grant practices. In addition, option values shown in the Summary Compensation Table currently must conform to FAS 123R values shown in the financial statements.¹⁴ However, the valuation of options will also be subject to heightened sensitivity following the SEC's disclosure rules changes that will require companies to report equity grants at full grant date value, rather than FAS 123R accounting values in the Summary Compensation Table.

The post-2008 financial crisis left its mark in the form of options so underwater as to be deemed useless by many executives. Moreover, as unexercisable options continue to be charged against earnings and inflate overhang, it becomes increasingly difficult for companies to garner investor support for new share requests. Following the financial crises of 2008, over 100 companies across industries submitted proposals to their shareholders or filed a tender offer for an option exchange. These programs were intended to restore some equity value to employees left holding underwater options in the wake of the economic downturn. While, for many companies, an option exchange seems a quick fix to the problem, companies should carefully consider whether an option exchange is the best and most effective approach for their own underwater option problem. Critical questions to ask include:¹⁵

- *Is the timing right?* If the company's share price drops after the exchange, the new options provided in the exchange could also end up underwater, leaving employees no better or even worse off, with little motivational or retentive impact.

- *Is there high turnover now, or potentially?* Many shareholders facing significant equity losses will question the fairness of allowing employees to recoup value by turning in underwater options. An option exchange should be considered only to address an imminent risk of significant turnover and lost motivation in the absence of drastic action, and after other alternatives have been explored.

- *Does the exchange address investor concerns?* Investor approval is more likely if the proposed exchange includes "shareholder friendly" features, such as excluding executives and board members from the program and prohibiting any surplus shares from being added to the plan for future grants.

- *Is it worth it?* Option exchanges entail significant time and administrative effort, from the preparation of employee communications and proxy proposal to the tender offer and CD&A proxy disclosure. Substantial expense also may be incurred by grants of new options, restricted stock, or cash awards, as well as additional fees for accounting, legal, valuation and compensation experts.

If the administrative burdens, costs, and potential negative shareholder reaction to an option exchange outweigh the advantages, alternative approaches could include:

- *Migrating to an annual award schedule, rather than limiting awards to new hires, promotions and "special events."* If option grants have been less frequent, annual grants essentially reload employees each year with at-the-money options, triggering a fresh vesting schedule that promotes retention.

- *Making a supplemental grant of new at-the-money options, with appreciation capped at the exercise price of the underwater options.* Like annual equity awards, this approach creates a motivational and retention "bridge" between the current share price and the exercise price of the underwater options.

- *Using more restricted stock or performance-based restricted stock grants, in lieu of options.* Because they are immediately in-the-money, full-value shares can be an effective way to boost morale and retention.

- *Offering a choice of equity vehicles, such as a menu of stock options, restricted stock, or performance based restricted stock.* Tradeoffs could be made in terms of the different equity value provided by each instrument.

- *Increasing target cash incentive opportunities and reducing or eliminating equity awards for nonexecutive populations.* Nevertheless, employee stock purchase programs may be a better approach if the goal is to foster employee ownership.

- *Accelerating "deep" underwater options.* Under FAS 123(R), accelerating the vesting of a deep out-of-the-money award is not a substantive modification and any unrecognized compensation cost associated with the award can be recognized over the remaining original vesting period. While such a strategy does not eliminate the underwater option problem, it may be viewed positively by employees and restore some of the retentive capability of the awards. Because FAS 123(R) does not provide guidance on determining when an award is deep out-of-the-money, we strongly recommend that companies consult their accounting advisers on this issue.

- *Accelerating or forfeiting underwater options in order to accelerate the expense.* A company may prefer to take actions that would accelerate the expense for "old" underwater options into the current accounting period, rather than continue to carry the higher expense forward. Again, consultation with accounting advisers is recommended.

[iii] Restricted Stock

Restricted shares are equity securities with restrictions on sale and transfer that lapse either over time assuming the executive continues to be employed by the company (so-called time-based vesting) or as a result of the achievement of

predetermined performance criteria (so-called performance-based vesting). Dividends on restricted shares may be paid to the executive as they are declared,ⁿ¹⁶ or they may be accrued until the vesting restrictions have lapsed. Unvested restricted shares are forfeited if the executive terminates employment prior to the vesting date, although some plans provide for pro rata or accelerated vesting in the event of death, disability, retirement or dismissal without Cause. A typical vesting schedule for restricted stock would be 100 percent vesting at the end of three years ("cliff vesting") or vesting of one-third of the restricted shares granted on each of the first three anniversaries of the grant ("step vesting"). The vesting schedule could be longer, particularly for large awards.

Unlike in the case of stock options, executives do not have to pay any exercise price to receive restricted shares. Thus, restricted shares are considered "full value" awards. Restricted shares are a strong retention device, since they have value even if the stock price declines. Restricted shares may be granted to executives to balance the "upside only" nature of stock options and to ensure retention of key executives while providing a link between executive rewards and share price appreciation.

Restricted stock typically bears an accounting charge equal to the value of the shares on the date of grant, spread over the vesting period. Due to the accounting expense, restricted share grants had historically been limited to senior executives. Since vesting of restricted stock has most often been based on continued service without regard to performance (unless an executive's employment is terminated for poor performance), critics have charged that restricted stock grants amount to pay for mediocrity. When it became clear, after the turn of the millennium, that the accounting rules would be changed to require expensing of stock options, companies began to consider broader use of restricted stock.ⁿ¹⁷ Restricted stock is an efficient incentive vehicle in that the value perceived by employees is typically close to the accounting expense. The perceived value falls below the accounting expense only if the stock price declines following the grant.

Career shares or deferred shares are special grants of restricted shares with a considerably longer vesting schedule, such as vesting upon retirement.ⁿ¹⁸ Career shares can also be designed as a purchase of restricted shares at book value, with the ability to convert into common shares at the market-to-book multiple upon acquisition of the company. Deferred shares are a common component of directors' compensation programs and, following the fiscal crisis of 2008, have been viewed by regulatory agencies and the media as the panacea in executive pay for preventing short-term risky behavior at the expense of long-term company success.

Performance-accelerated restricted stock ("PARS") vests on the basis of time, but vesting may be accelerated if certain performance goals are met. For example, a restricted stock grant vests 100 percent at the end of six years, but vesting will accelerate to the end of the third year if net income growth for the three-year period exceeds pre-established targets.

Performance-contingent restricted shares vest only if certain performance goals are met. There may also be a time-based vesting restriction. For example, vesting occurs when the market price of the company's stock has increased by 100 percent, but in no event earlier than three years from the date of grant. Historically, relatively few companies granted performance-contingent restricted shares because they were subject to variable accounting under APB 25. However, there has been an increase in the prevalence of performance-contingent restricted stock grants since the adoption of FAS 123R.ⁿ¹⁹

[iv] Long-Term Incentive Plans

Long-term incentive plans ("LTIPs") are similar to annual incentive plans, except that performance is measured over a multi-year period, typically three or four years. LTIP awards are granted before or early in the performance cycle and, to the extent that pre-established performance targets are met, they result in payments at or shortly after the end of the performance cycle in cash, shares or a mix of cash and shares. A new performance cycle may begin before the first cycle has ended (an overlapping cycle) or not until the end of the previous cycle (a non-overlapping cycle).

When a new performance cycle begins every year, payouts are made annually (assuming performance goals are met) after the initial ramp-up period. To avoid a ramp-up period, some companies implementing a new LTIP will simultaneously start "stub period" cycles. For example, a new LTIP has three-year performance cycles based on cumulative net income starting every year but, when the plan is first introduced, one-year and two-year stub period cycles are started at the same time as the first three-year cycle so that participants do not have to wait three years for the initial payout. As with annual incentives, compensation expense is accrued over the performance period (and possibly over a vesting period following the end of the performance cycle). The total expense for a cash LTIP equals the actual payout/value earned at the end of the performance cycle. Unlike stock options or restricted stock, the total expense for an LTIP cannot be fixed at the date of grant (at the start of the performance cycle).

LTIPs can be designed in many forms, including long-term cash incentive awards, performance units, performance shares, phantom shares, or dividend equivalents. LTIPs are often designed with target, maximum and threshold award levels for specific performance achievement levels. The upside opportunity need not mirror the upside in the company's annual incentive plan. The maximum LTIP award level is typically 150 percent of the target award, although some LTIPs provide for maximum payout of up to 200 percent of target (or more). There may be less upside in the LTIP than in the annual incentive plan, particularly if the business strategy is to deliver consistent long-term results. In contrast, if an LTIP is designed to mimic a stock vehicle, the upside value per phantom share can be unlimited, just like a real stock award.

Long-term cash incentives linked to long-term financial performance may be used to balance stock options or restricted stock. Financial measures included in such LTIPs are usually "bottom line" or profitability measures. However, total shareholder return relative to a peer group is also a common measure used to provide a link to stock performance in a cash LTIP.²⁰

Performance units often have a fixed dollar value per unit and the number of units earned varies according to performance. When the unit value is \$1, the performance unit plan design is equivalent to a cash LTIP. Alternatively, the dollar value per unit may vary based on performance, for example, the unit value equals earnings per share, but the number of units is fixed. Allowing both the unit value and the number of performance units earned to vary is possible, but atypical due to the additional and unnecessary complexity it introduces.

Performance shares are conditional grants of nominal shares earned on the basis of performance. They are nearly identical to performance-contingent restricted shares and to performance units where the unit value equals the underlying stock price. Dividend equivalents on performance shares are typically accrued until the end of the performance or vesting period.

Phantom shares are similar to performance units, where the unit value is linked to the value of a private company, subsidiary or business unit. Phantom share plans may be designed to mimic stock options, stock appreciation rights²¹ or restricted stock, but they are typically paid in cash since the underlying stock is not traded publicly and the company does not want minority shareholders. Unlike stock options in a public company, phantom shares are less likely to be granted annually, and participation in a phantom share plan is often limited to senior executives.

The most critical design feature of a phantom share plan for a private company (including a subsidiary of a public company) is often the valuation methodology for the shares. The value of phantom shares is usually based on a pre-set formula or determined by an independent third party. Examples of valuation formulas include multiple of subsidiary cash flow (based either on market multiples at the time of settlement or fixed at the start of the plan), multiple of earnings per phantom share and book value per phantom share. Since an independent third party valuation can be costly and the result may be a range of values that is not sufficiently narrow for a compensation plan, some companies rely on the internal finance area to provide a valuation model, such as a discounted cash flow analysis. If an internal valuation model is used, key inputs (or the specific methodology for determining them) must be agreed upon in advance, since valuation models are often quite sensitive to the underlying assumptions.

When designing a phantom equity plan for a subsidiary or business unit, it is necessary to determine whether any executives outside the unit will participate. For example, some regulated utilities developed phantom share plans for executives in their non-regulated business units of the holding company. Given the regulated environment, the CEO and other top officers of the regulated utility parent company often do not participate in the phantom share plan. From a corporate governance perspective, the CEO should be responsible for the financial performance of the entire enterprise, not simply one subsidiary. In addition, if finance officers are determining the value, they should not be participants in the plan.

Dividend equivalents are similar to performance units where the unit value equals the accumulated dividends on a specified number of shares. Payouts are typically made in cash. Dividend equivalents associated with restricted shares are usually subject to time-based vesting, if there is any vesting requirement at all.²² Performance-based dividend equivalents are attractive for companies with high dividend yield stocks, although RMG considers payment of dividends or dividend equivalents on unearned performance awards to be a problematic pay practice. Historically, regulated utilities adopted dividend equivalent plans instead of (or in support of) stock options.

[v] *Other Hybrid/Designer Incentive Vehicles*

Compensation professionals have developed variations on the "plain vanilla" annual and long-term incentive vehicles. Hybrid plans and designer incentive vehicles are not common, possibly because they tend to be more complex or because some of the designs resulted in variable accounting under old APB 25 treatment. However, many of these concepts were developed to provide a stronger link to performance or introduce a retention "hook". Adoption of FAS 123R eliminates the accounting bias in favor of the plain vanilla stock option, allowing greater flexibility to offer designer incentives like indexed stock options.

Hybrid incentive plans may be difficult to classify because they often have features of both annual and long-term incentives. Examples include plans that measure annual performance but pay out in a mix of cash and restricted stock; the bonus "banking" design;²³ plans that provide annual cash payouts with an extra "kicker" if annual performance targets are met in consecutive years, or long-term plans that specify a number of shares to be earned over a multi-year period, with earned shares being released to participants annually based on cumulative performance. If annual incentives cover a one-year time horizon and stock options are intended to motivate executives over a ten-year option term, hybrid plans fill the need for incentives tied to intermediate-term performance.

Although designer incentive vehicles are not prevalent overall, some of the more common types have been reviewed in prior sections. The nomenclature for designer incentive vehicles is not universal, but a partial listing is provided below.

- "Designer" stock options:

- Premium and premium step-up: exercise price is above fair market value.
- Discount: exercise price is below fair market value. Note, however, that such options will now be treated as deferred compensation and subject to the requirements set forth in *IRC Section 409A*.
- Escalating: exercise price increases on a pre-set basis, for example, cost of capital or interest rate.
- Index: exercise price is indexed to a peer group or market index.
- Reload: re-grant of options upon exercise. Reload option carries same remaining term

as underlying option and shares received upon exercise are sometimes subject to retention requirements. Appeal for this type of award has been diminished, however, with the adoption of FAS 123R, as each reload grant must now be accounted for as a separate award resulting in incremental compensation cost for each reload grant.

- Truncated: option term is truncated upon reaching pre-set stock price target.
- Performance-contingent: exercisability is triggered by reaching a stock price target or performance goal. Under FAS 123R, however, if the contingency is related to stock price or total shareholder return, previously recognized compensation cost cannot be reversed if the award is subsequently forfeited or reduced because the market condition had not been met.
- PARSOP: performance-accelerated stock option where exercisability is accelerated by reaching a performance goal.
- Phantom: option exercise price and value at exercise based on value of non-public company, subsidiary or business unit.
- Parallel: performance unit granted in parallel to fund option exercise cost and taxes.
- Exchange: options granted in exchange for other compensation that is forgone.
- Investment: specified multiple granted to match an executive's "at risk" purchase of company stock, such as three options granted for each share purchased.
- Deposit: option grant made in exchange for executive's deposit of owned shares.
- Equity: option carries short term. Executive exercises immediately and makes *IRC Section 83(b)* election.ⁿ²⁴
- Career: option is exercisable until retirement or termination and carries lengthy vesting restrictions.
- Horizon: option is exercisable for an extended period post-retirement.

■ "Designer" stock grants:

- Share retention premium: additional shares granted for holding shares beyond vesting or option exercise.
- Deferral premium: additional shares granted for elective or mandatory deferral of cash into restricted or deferred stock.
- Investment: restricted shares granted to match an executive's "at risk" purchase of company stock.
- Phantom: restricted stock-like instrument linked to value of non-public company, subsidiary or business unit.

[b] Choosing the Right Performance Measures

[i] *General Considerations*

The compensation committee²⁵ is responsible for the company's pay-for-performance relationship. While most compensation committees are watchful of high pay levels, pay levels are only one side of the equation. Choosing the right performance measures ensures that the other side of the equation was not rigged to deliver an unsound pay-for-performance relationship.

Performance measures selected for use in incentive plans should be linked to the business plan and financial goals of the company; easy for the participant to understand; related to something that the participant can reasonably influence; neither duplicative nor in conflict with other performance measures (in the same incentive plan or in other incentive plans used by the company); and measurable and able to be tracked over time. In the wake of the fiscal crisis of 2008, there is new emphasis on avoiding performance measures that incentivize unduly risky behavior. They should also be tied to a longer-term horizon, rather than encouraging only short-term gains.

Some common problems in the choice of performance measures are:

- too many goals, so there is little incentive tied to each goal and the participant is not motivated to achieve any one goal;
- too few goals, so there is too much incentive tied to a single goal and the participant is motivated to engage in risky behavior or paid twice for the same achievement (for example, when both annual and long-term incentives are linked with a single measure);
- too little "stretch" in the goals, resulting in awards being paid for ordinary or mediocre performance;
- too much "stretch" in the goal, discouraging participants from even trying to reach the target performance level;
- conflicting goals that pull in different directions (such as revenue growth and return on equity; acquisitions, for example, usually add revenues, but may lower near-term return on equity);
- overly complex performance measures so that, without extensive education and communication, participants may not understand how to improve performance and therefore, make no changes in behavior as a result of the "incentive" plan;
- performance measures that are too global and not related to aspects of performance reasonably within the participant's control;
- too little emphasis on global measures, resulting in unhelpful competitive behavior, rather than teamwork, among executives;
- performance measures that are too readily manipulated by adjustments for unusual or unexpected events, especially if an accounting adjustment has a large impact on incentive award payout and the decision to make the adjustment is largely subjective;
- misalignment with the business plan or economic cycle resulting from the use of the wrong measure, such as a measure linked to revenue growth when the company's priority is to cut costs;²⁶ and

- use of the performance measure for too long, so that (a) participants are inured to the plan and no longer sharply focused on the behaviors required to reach target results, (b) participants have figured out how to "game" the results (almost always a problem when targets are actual expenses or revenues as a percentage of plan, for example), or (c) the company has changed its business strategy without readjusting performance measures to promote behaviors that will support the new strategy.

In selecting performance measures, it is helpful to consider whether a particular measure is used by a number of peer companies within the industry, by a key competitor or by institutional investors and stock analysts. If so, the measure is more likely to relate to expected or relevant aspects of company performance. However, the compensation committee should consider whether other alternatives might be more suitable, since making the same choices as the rest of the industry is unlikely to result in superior performance. Conversely, if the selected measure is outside industry norms, the compensation committee should at least understand that it is atypical and the rationale for differentiation, such as a unique business strategy.

While there is no one right choice, it is possible to test whether a particular measure has shown strong or weak correlation with total shareholder returns, assuming a sufficient number of data points to make a statistically significant comparison. Compensation committees may find it helpful to examine a variety of performance measures over a series of three, five and ten year periods and see which have had a higher correlation with TSR over that period. This analysis can be performed for the company and for a group of comparator companies in the same industry. This industry analysis is also helpful in selecting a comparator group when performance is to be measured on a relative basis. There may be short-term timing differences as the market evaluates the success of a company's business strategy, but over the long run there should be a relationship between the performance measures used for incentive compensation purposes and shareholder value creation. But even a strong correlation between EPS growth, for example, and TSR may not necessarily answer the question of whether EPS growth caused an increase in stock price, or whether other market forces or economic conditions had a greater impact. Compensation committees should resist the temptation to throw up their hands and default to TSR as the annual incentive measure. It is unlikely that TSR, at least over the short term, accurately or fairly measures the performance of senior management in implementing the company's business strategy.ⁿ²⁷

[ii] *Stock, Financial, Operating or Strategic Performance Measures*

In deciding whether to use stock, financial, operating or strategic measures in annual and long-term incentive plans, the compensation committee should take note of some practical considerations:

- Financial performance measures are often the basis of annual incentive plans, but many companies prefer to rely on stock performance in their long-term incentives. This provides a balance between financial and stock performance.
- Revenue growth may be used in annual incentive plans but is less prevalent in long-term incentive plans. The company is in business to make a profit over the long term; revenue growth alone is typically not sufficient to ensure shareholder value creation.
- Total shareholder return is usually not included as an annual performance measure since it can be highly volatile from year to year and in any event now carries adverse accounting implications for equity based compensation under FAS 123R should the award subsequently be forfeited.
- Long-term incentives are predominantly equity-based so that there is a strong link to shareholders' economic interests over the long run.

- Vesting of equity-based incentives may be linked to achievement of stock price levels,

top quartile stock returns or specified levels of financial performance. Like the TSR measure, however, market conditions related to achievement of stock price may result in adverse accounting implications under FAS 123R should the award subsequently be forfeited or reduced.

- Some companies offer a long-term cash performance plan in addition to equity-based incentives. In this case, using a stock performance measure in the cash plan could be duplicative or place too much emphasis on global measures.

- Operating measures may be at the corporate, departmental or business unit level. However, operating measures are usually not the only measure for the most senior executives, who are ultimately responsible for the company's financial and stock performance. Operating measures can be particularly effective when department or business unit managers do not control the overall economic performance of the parent company. Executives in a start-up situation may also be linked to operating measures, such as developing and bringing a product to market on schedule, rather than earnings growth. In certain regulated industries, like electric utilities, operating measures related to power outages or safety may be used in addition to financial and stock performance measures to highlight the importance of the customers and employees as stakeholders.

- Strategic measures are often reserved for senior executives who set business strategy or are charged with carrying out the business plan. Strategic goals may include achievement of business "milestones" within a specified timeframe. One drawback of this approach is that the relationship between the amount of the award and the value of the achievement may be subjective, or the award may be "all or nothing." Examples of strategic measures include:

- find local country financial partner for joint venture expansion in Asia;
- gain regulatory approval for a particular acquisition within nine months of signing a letter of intent; and
- take company public by a specified date.

[iii] Corporate, Business Unit or Individual Performance Measures

Companies often use a mix of corporate, business unit and/or individual measures. CEO annual incentives are typically linked to overall corporate measures, since CEOs have ultimate responsibility for short- and long-term corporate results. Linking CEO annual incentives to business unit or product line measures is unusual, but has been done. For example: (a) the CEO of an asset management firm who is also the lead manager for a specific fund and receives an award component based on that fund's performance; or (b) the CEO of a holding company who receives an annual incentive award that is the weighted average of the business unit awards.

CEOs may also be rewarded for achievement of individual goals, but to the extent performance evaluation is subjective and not verifiable by a third party, the measure could not be used as the basis for qualifying compensation as performance-based under *IRC Section 162(m)*.ⁿ²⁸ Annual incentives for business unit executives are often linked to business unit performance, but they may also have an award component that is based on overall corporate performance to promote teamwork. A typical mix would be 25 percent weight on corporate performance and 75 percent weight on business unit performance (or 50/50 for a business unit head who also is a member of the corporate executive council). Some companies tie annual incentives for top business unit executives entirely to business unit performance but, in that case, long-term incentives should be heavily weighted toward corporate results (financial or stock performance).

While the importance and prevalence of business unit and individual goals are greater for non-executive positions, which are not the compensation committee's focus, the committee should still have confidence that the executive compensation program they have approved is not misaligned with the rest of the company's compensation programs and performance objectives.

[iv] *Absolute Versus Relative Performance Measures*

Absolute performance measures are those that compare actual results with a fixed, absolute standard, such as actual EPS versus target EPS. Relative measures are those that compare company performance with that of the market or the industry, such as company TSR versus the TSR of the S&P 500 companies or versus TSR for a group of industry peer companies.ⁿ²⁹ While absolute and relative measures can be found in annual or long-term incentive plans, relative measures, especially relative TSR measures, are more common in long-term incentive plans. Each company is focused on its own "absolute" performance in the short term, but must compete with peer companies in the long term to attract capital and executive talent. Advantages and disadvantages of absolute and relative measures are discussed below.

Absolute measures have several advantages. First, participants know at the beginning of the performance period exactly what performance level is required to achieve a target award; the target performance level does not change over time. Second, with absolute measures, there is no need to select peer companies and monitor their performance. This may be particularly difficult if a company's key competitors are privately held or have a business mix that makes it difficult or impossible to find the most pertinent detailed performance data in their segment reporting, or if the company has a unique business mix. Third, absolute measures have appeal to the participants because they can directly affect their own company's results and are not impacted by the results of other companies over which they have no control.

Absolute measures also have some distinct disadvantages. First, absolute goals may turn out to have been too easy or too hard, since results for the industry or market as a whole may be buoyed or depressed by extraneous factors over which the executive has no control or influence. Second, with absolute goals, the longer the performance period, the more difficult it is to predict the appropriate degree of "stretch" required for target payouts. Since absolute goals do not change over the performance period, they cannot reflect changes in market conditions. As such, an absolute goal may become obsolete or unduly difficult to achieve, especially over a longer (for example, three-year) performance period. Participants may be discouraged if it becomes apparent early in the performance period that the absolute goal is unattainable. Conversely, participants may receive windfall awards if the absolute goal turns out to be too easy to achieve because, for example, market forces benefit the entire industry.ⁿ³⁰ Finally, absolute financial goals may turn out to be poorly linked to or "out of synch" with stock performance. From a corporate governance perspective, an undesirable outcome would be superior performance versus an absolute goal that yields maximum awards, but poor relative TSR performance (disclosed in the same proxy statement).

Relative measures also have advantages and disadvantages. The major advantage of a relative measure is the assurance that superior rewards will be paid only when the company's performance beats the market or a peer group. It is, of course, relative performance that makes an investment in a company attractive or unattractive (since the investor has the whole market to choose from). In addition, using relative measures avoids windfall payouts or undeserved penalties as a result of exogenous factors over which executives have no influence or control. Relative measures avoid the need to predict the absolute level of performance required for target payouts. They also eliminate the effect of changes in market conditions so participants can earn awards for exceeding peer group or market performance even when the entire industry or the entire stock market is down.

One major disadvantage of using relative measures is the fact that the performance level needed to "win" is not known until the end of the performance period. While it is typical for companies to provide participants with interim calculations of relative performance, the calculation may be complex and unreliable, and participants may not be able to track performance against the ultimate goal on a daily or monthly basis. This aspect gives the use of relative measures something of the character of a horse race, where the winner is not known until the end and a late surge in performance

by a competitor could change the relative outcome of the company's performance over the measurement period. Also, it is possible to be the winner in the horse race but still not produce any absolute value for shareholders. In a down economy, investors are wary of outsized rewards for "best of the worst" performance.

In addition, with relative measures, selection of a sufficient number of peer companies may be difficult if competitors are private or conglomerates (with insufficient detail in segment reporting to be useful for benchmark purposes) or if a company has a unique business mix. In general, it is preferable to consider a peer group of at least eight to ten companies of similar size. Still, many executives perceive their peer groups as imperfect, if not seriously flawed, due to unique business factors. Other peer group issues include:

- Industry consolidation may result in the loss of one or more peer companies during the performance period.
- Peer company results may be skewed by extraordinary revenues or expenses (including, for example, those arising from acquisitions, divestitures or judgments or settlements from litigation), the identification and effect of which are difficult to isolate from publicly available information.
- Peer companies with exceptional (for example, 75th percentile) relative performance may include "recovering dogs" that have the advantage of starting from a low base.
- Since counter-cyclical diversification smoothes business performance, a company with more diversified businesses than its peers is less likely to achieve superior results relative to less-diversified competitors, but very few peer group comparisons are sufficiently sophisticated to look at results on a risk-adjusted basis (by factoring in standard deviation of returns).
- Timing may be an issue, particularly with relative financial performance, if peer company results are not available when the company wishes to pay its annual or long-term incentive awards.
- Awards are directly impacted by market factors or results at other companies that participants cannot control. However, it may well be appropriate for senior executives to be held accountable for anticipating and responding quickly to shifts in market and competitive pressures.

[v] Pay Programs in a Down Economy

Challenging economies, such as the post-2007 U.S. economy, put pressure on expense control and cash management, even as companies must incentivize high performers and minimize retention risks. Compensation committees are expected to reflect poor/reduced performance in their compensation determinations, and institutional investors take a skeptical view of retention risk as the rationale for pay decisions in an economy that has experienced significant job losses and limited new hiring.

A good initial approach to executive salaries is to focus on more moderate increases, targeted to managers whose current pay is below-market. If the economy worsens, salary freezes are the next course of action, with salary cuts or furloughs reserved for extreme circumstances.

For annual and long-term incentive programs that are generally working well, tweaks in down economies may include:

- *Widening the gap between threshold and maximum performance.* Goal-setting is more difficult when business results are less predictable. A greater differential can help ensure the company does not underpay executives when the economy takes a turn for the worse or overpay when it recovers.

- *Targeting a performance range, rather than one specific level.* When business results are less predictable, a range of acceptable performance may be more relevant than a precise target. Similarly, exact interpolation of performance results and payouts could be replaced with performance ranges or "buckets" that would result in threshold, target or maximum payouts.

- *Changing incentive plan metrics.* Wholesale changes should be considered only if business and economic conditions fundamentally change, given the importance of the interaction of annual and long-term incentive plan metrics. For example, cash management can be adopted as a metric if such an approach would help satisfy bank covenants.

- *Providing more long-term incentives in time-vested restricted shares.* If sufficient option shares cannot be granted to match the previous year's long-term incentive value, restricted shares can help bridge the gap. They are generally perceived as more valuable and provide more of a retention hook.

Top-performing executives and those considered high retention risks may need special attention in a down market. Although it is generally not good practice to institute *ad hoc* or additional salary increases, these program tweaks may be appropriate:

- *Set aside money (for example, 20 percent of the target pool) for awards to high performers and retention risks.* This might be necessary even if threshold performance levels are not met under the annual incentive plan.

- *Grant additional shares to higher performers and retention risks following a poor performance year.* Even a thoughtful and well-designed plan to communicate the payout results may not satisfy executives who receive a reduced or zero incentive award. Coupling additional long-term equity grants with zero annual incentive awards may soften the blow, but institutional investors may object if the pay-for-performance relationship becomes misaligned as a result.

[vi] *Selecting Measures and Setting Goals in a Down Economy*

In troubled economies, some general trends typically emerge with respect to selecting performance measures:ⁿ³²

- *More robust analysis of "value drivers."* Company-specific, peer-group and industry analyses can help identify specific measures of performance that correlate most closely with creating meaningful, long-term shareholder value.

- *More focus on cash flow measures.* As companies enter "survival mode," targets related to working capital management, debt coverage, and operating cash flow replace traditional profitability and return measures.

- *More consideration of non-financial or non-GAAP customized measures.* When financial results are expected to be poor, but not so much that the company is in "survival mode," companies tend to incorporate non-financial, operating or strategic measures, as well as individual performance goals. To the extent that financial measures are included, companies may move beyond pure GAAP definitions to adjust for factors that are beyond management's control, at least in the short term. These "adjusted" definitions often exclude non-operating or non-recurring items that are not necessarily appropriate variables for determining incentive awards, for example, restructuring charges, asset impairments and losses from discontinued operations. Making these adjustments at the *beginning* of the performance period ensures objectivity and limits the need for subjective changes at the *end* of the performance

period.

- *More consideration of purely "discretionary" short-term incentive plans.* Formula-based programs face the challenges of poor visibility, and companies using such measures face continued SEC pressure to disclose forward-looking performance goals. While taking a totally discretionary approach to executive incentives might work for some companies, it is generally not a broadly viable strategy, given the push for greater transparency and the potentially greater pressure on the compensation committee to apply its discretion for each award.

Recommendations for setting performance goals in poor economies generally include:

- *Consider shareholder expectations of forecasted growth in evaluating short-term and long-term business plans and goals.* This is especially important because share prices often move in response to how performance compares with expectations. This perspective is especially important for long-term incentive plans, which are intended to reward only sustainable increases in shareholder value.

- *Incorporate a relative measurement framework.* With limited visibility into future outcomes, some incentive programs use an appropriate peer group or index for comparison purposes. However, key stakeholders may not view being "best of the worst" as an appropriate performance target.

- *Establish "enduring standards" as opposed to annual budgets.* Maintaining performance standards year-over-year can address concerns about the annual budgeting process and separate incentive targets from annual budget expectations. An example would be a fixed targeted earnings growth rate, or return on capital, that represents an enduring standard for shareholder value creation in the industry. This approach eliminates any incentive to "sand bag" the budget, but may render performance expectations unrealistic over time. The best approach in a rapidly changing global economy may be a hybrid: an "enduring standard" that is reviewed every few years.

- *Set "self-adjusting" multi-year targets.* When long-term goal-setting is difficult, companies can choose to automatically adjust performance targets annually. The objective is a multi-year measurement period, in which each year's results affect future year requirements so that pre-determined goals do not go stale. For example, actual versus target performance in Year 1 would automatically adjust the initial Year 2 target up or down accordingly. so that, if the company achieved 105 percent of the Year 1 goal, for instance, the Year 2 goal would automatically increase by 5 percent. Alternatively, a constant growth rate could be applied to each year's actual performance result.

Because measure selection, measure definition and goal-setting are the building blocks of the risk/reward profile of the executive compensation program, the end of the planning process should include an overall risk assessment. The senior risk officers and the audit committee may also need to be involved to help ensure that measures and goals are not construed as promoting "excessive risk-taking" by executives.

Overall, in a down economy, the emphasis is on selecting measures and setting goals that motivate incentive plan participants to make the difficult choices that are needed to ensure sustained, long-term shareholder value, while controlling the tendency to distort the incentive plan goal-setting process for retention purposes.

[3] Compensation Risk: The New Risk Assessment Process and Plan Design Considerations

The near collapse of the financial markets and the ensuing global economic downturn have caused politicians, the media and individual citizens to point an accusatory finger at excessive risk-taking and the outsized compensation programs that fueled Wall Street. While many policy-makers have embraced proposals intended to control risk in compensation

programs, as of the date of this writing no authority has specifically defined "risk" or provided a construct for how to evaluate it.

The SEC's proposed rule changes require disclosure about "how the company's overall compensation policies for employees create incentives that can affect the company's risk and management of that risk." analysis required would not be confined to the named executive officers whose compensation is disclosed in Summary Compensation Table of the proxy statement if risks arising from compensation plans and policies for employees "may have a material effect on the company." The proposed rule changes would also require discussion of the board's "involvement in the risk management process," in order to provide "important information to investors about how a company perceives the role of its board and the relationship between the board and senior management in managing the material risks facing the company."

TARP recipients are required to evaluate and address compensation risks, including certification by the compensation committee. While this is not currently required for non-TARP companies, all public companies, their board members and their advisors should develop an early understanding of whether and how the companies' compensation plans may be encourage or mitigate excessive risk-taking.

[a] Oversight and Responsibility

There is no clear authority that points to who is responsible for managing business risks, including risks arising from compensation plans. The risk-monitoring and management process typically involves management, the board, the audit committee and, to a lesser degree, the compensation committee. Often, the senior risk officer (or another executive responsible for risk management) makes a presentation about general business risks to the board or the audit committee at least annually. Separate board risk committees are still a rarity among public companies--only 3 percent of Top 200n33 companies have separate risk committees, and the prevalence decreases in the smaller company size categories.

The compensation committee typically considers and approves compensation plan designs and payouts for executives. Most compensation committees regularly consider design elements such as the degree to which executive pay is "at risk" or performance-based, selection of performance measures, the mix of short- versus long-term incentives, and stock ownership guidelines. While inappropriate choices may result in a compensation plan that encourages excessive risk-taking, most compensation committees have not directly engaged in a formal, comprehensive compensation risk assessment.

[b] Conducting a Risk Assessment³⁴

Details of a compensation risk assessment vary by company, but the overall nature and scope of the assessment are likely to become more consistent across companies as disclosure becomes mandatory. The main components of a compensation risk assessment may be grouped into four broad categories:

I. Compensation Program Design

II. Per- for man ce Met- rics & Goa l Set- ting

- Comparison with external market peers

Degree of "stretch" tested versus external market

- Protections: clawbacks, bonus deferral, caps, etc.

- Funding mechanisms ensure payouts are affordable

III. Administrative Procedures

IV. Communication & Disclosure

- Approval of goals at start of performance cycle

- Communication materials are clear and timely

- Established definition for each metric

risk

The compensation risk assessment should consider overall compensation risk, as well as risk stemming from specific incentive plan features. Examples of design features that could encourage inappropriate risk-taking include:

- Pay philosophy that targets market 75th percentile pay for 75th percentile performance along with a steep downside
- Heavy emphasis on short-term, cash incentives
- Large variations in pay for small variations in performance
- Lopsided payout opportunity, *e.g.*, uncapped upside and low threshold performance goal
- Over-reliance on a single performance measure
- "All or nothing" incentive award for exceptional performance
- Reliance on fixed/guaranteed pay, such that executives bear no cost or penalty for taking excessive risk

- Frequent application of "exceptions to the rule" to exclude factors beyond management's control

While any one of these features may be appropriate as part of a balanced compensation program, an accumulation of such features may signal trouble. The compensation risk assessment helps identify misalignments or weaknesses, but there are other warning signs. Unintended consequences like undesirable employee behavioral changes (sometimes a problem with sales incentives) or widely divergent employee satisfaction scores across business units could also be evidence of an imbalance in compensation risk.

It is also important to understand how compensation risk may be interrelated with non-compensation policies. For example, risk-taking may be controlled through the capital budgeting/investment process. Some business risks are rarely linked with compensation because they are unlikely or may be addressed with insurance. Conversely, a corporate culture that emphasizes "winning at all costs" could predispose executives toward riskier decisions.

The most appropriate level of compensation risk for a specific business strategy is not always obvious. Companies pursuing a high-risk business strategy may deliberately compound the business risk with a highly leveraged compensation program, for example, a start-up with heavy reliance on stock options. Mature companies with a moderate business strategy may increase compensation risk as multiple incentive plans are layered. Even when the compensation committee reviews a tally sheet that totals all pay elements for each executive, it may be difficult to evaluate the cumulative upside potential of complex incentive plans, especially equity-based plans.

Recently, more companies are applying an in-depth analytical tool called "dynamic pay modeling." This model allows evaluation of the pay-for-performance relationship over time by projecting future award payouts under the full range of performance scenarios.

Despite media attention on excessive compensation risk and the likelihood of enhanced disclosure, companies should not be dissuaded from adopting compensation programs that encourage appropriate risk-taking. Furthermore, a compensation program with insufficient upside may cause retention issues as executives seek more competitive opportunities for wealth creation. The key is to ensure that the level of rewards and the business risk-taking being rewarded are in the long-term interests of shareholders. In the end, a well-designed, balanced compensation program remains a highly effective means of driving corporate performance by encouraging innovation and appropriate levels of risk-taking.

FOOTNOTES:

(n1)Footnote 1. Total Shareholder Return ("TSR") = stock price appreciation plus reinvested dividends (same calculation as required for the proxy performance graph).

(n2)Footnote 2. We note that other observers have cautioned against using stock price as the sole performance measure in incentive compensation programs. *See, e.g.*, Business Roundtable, Executive Compensation: Principles and Commentary at 6 (Jan 2007) (reproduced in full as Appendix 15-A to this chapter); Report of the NACD Blue Ribbon Commission on Executive Compensation and the Role of the Compensation Committee at 7 (2007) ("Performance objectives should be based on multiple factors--quantitative and qualitative--as opposed to stock price alone");

RiskMetrics Group's 2010 policy manual (November 19, 2009) (citing use of a single performance metric for short- and long-term plans as a practice that could contribute to excessive risk-taking).

(n3)Footnote 3. Financial Accounting Standards Board (FASB) Statement No. 123 (revised 2004), Share-Based Payment (Statement 123R) repealed the "intrinsic value" method of accounting for equity compensation prescribed by APB Opinion 25 and replaced the original Statement 123 with a mandate that generally all equity awards granted to employees be accounted for at "fair value". FAS 123R generally became effective for public companies for fiscal years commencing after June 15, 2005, and for private companies for fiscal years commencing after December 15, 2005.

(n4)Footnote 4. Annual incentive awards must be paid within 75 days following the end of the fiscal year to be deductible for the fiscal year in which they were earned. *See* Prop. Treas. Reg. § 1.404(b)-1T, Q&A: A-2(c). In addition, compensation must likewise be paid within such a time period if the company desires to have the payment fall within the "short-term deferral" exception under Section 409A. Companies generally accrue expense during the year at the target award level (if there is a target) but are required to change the accrual rate if it becomes likely that actual payouts will be much below or above target. By the end of the year, the total annual accrual should equal the actual payout to be made. In the proxy statement summary compensation table, annual incentive awards are reported in the year in which they are earned, not the year that they are paid out.

(n5)Footnote 5. To the extent deferred awards are subject to performance goals in subsequent years, the incentive plan is a hybrid plan because it has features of both annual and long-term incentives. An example would be a plan where awards are earned based on annual performance, but a portion of the award is "banked" for payout in two years, where the "bank account" balance could vary up or down based on performance in each of the following two years.

(n6)Footnote 6. Pearl Meyer & Partners report prepared for The Conference Board's 2005 Executive Compensation Seminar.

(n7)Footnote 7. Pearl Meyer & Partners report prepared for The Conference Board's 2005 Executive Compensation Seminar.

(n8)Footnote 8. Pearl Meyer & Partners report prepared for The Conference Board's 2005 Executive Compensation Seminar.

(n9)Footnote 9. Equilar 2009 CEO Pay Strategies: Compensation at S&P 500 Companies.

(n10)Footnote 10. Note that under FAS 123R, if the vesting condition requires the performance of future services only, the initial estimate of the service period for recognizing compensation cost is presumed to be the vesting period. If, however, the service condition vesting may be accelerated by a performance condition that is probable of attainment, the initial estimate of the requisite service period for recognizing compensation cost is based on the shorter performance period.

(n11)Footnote 11. *See* Sarbanes-Oxley Act § 304, 15 U.S.C. § 7243.

(n12)Footnote 12. *See* § 15.05[2][c] below.

(n13)Footnote 13. On December 21, 2001, the SEC adopted rules that require new disclosure for all equity compensation programs of domestic public companies with respect to fiscal years ending on or after March 15, 2002. *See* SEC Release Nos. 33-8048, 34-45189; File No. S7-04-01. The new disclosure requirements include a table with separate disclosure for arrangements approved by stockholders and arrangements not approved by stockholders, as well as written descriptions of plans not approved by stockholders and a new requirement to file copies of these plans with the SEC. Companies must include the new disclosure in annual reports filed with the SEC and in proxy or information statements in years when a company submits a plan to stockholders for approval. As of November 2009, revised SEC disclosure rules are pending.

(n14)Footnote 14. *See § 8.03 above.*

(n15)Footnote 15. *See PM&P Trends and Issues Report: Top 10 Executive Compensation Issues in the New Economy (April 2009).*

(n16)Footnote 16. However, note that paying dividends as declared on unvested performance-based shares is considered a serious "problematic pay practice" by RiskMetrics.

(n17)Footnote 17. For example, in 2003 Progressive Corporation and Microsoft, among others, replaced stock option grants with restricted stock for a broad employee population.

(n18)Footnote 18. Exxon Mobil, for example, has made grants of career shares to its named executive officers (whose compensation is reported in the proxy statement).

(n19)Footnote 19. Unlike APB 25, FAS 123R generally does not require variable mark-to-market accounting for performance contingent stock awards. Instead, the expense is calculated based on the grant date value and accrued over the vesting period. The expense is "trued-up" for the actual number of shares that vest, but the expense attributable to such shares is nevertheless based on the grant date value. This "true-up" or expense reversal concept, however, does not apply for stock awards contingent upon a market condition (e.g., achievement of a stock price level or TSR).

(n20)Footnote 20. Under FAS 123R, however, for awards tied to market conditions (such as total shareholder return), those conditions will be considered when estimating the fair value of such an award, and previously recognized compensation cost for such an award cannot be reversed even if the market condition is not satisfied.

(n21)Footnote 21. A stock appreciation right, or SAR, is structured like a stock option, with an exercise price, a term of years, and vesting. Historically, SARs were very often paid in cash, not stock, and the transaction mirrors a cashless exercise, where the holder of the SAR receives cash equal to the appreciation without remitting the exercise price to the company.

(n22)Footnote 22. Under FAS 123R, dividend equivalents on shares must be expensed as compensation if they are paid regardless of the vesting of the underlying shares and if the underlying shares do not vest.

(n23)Footnote 23. Described in § 15.03[2][a][i] above.

(n24)Footnote 24. Under *IRC Section 83(b)*, an employee may elect to be taxed in the year of transfer rather than waiting until the property restrictions lapse. If the election is made, the employee is treated as recognizing ordinary income to the extent of the difference, if any, between the fair market value of the property without regard to any lapse restriction and the amount, if any, the recipient paid for the property. The election must be filed not later than 30 days after the date the property is transferred.

(n25)Footnote 25. *See Chapter 10, The Compensation Committee, above.*

(n26)Footnote 26. Misalignment can also occur if the measurement period is too long or too short, such as the use of new product development in an annual incentive plan when the research and development cycle is closer to five years.

(n27)Footnote 27. Moreover, under FAS 123R, any condition relating to attainment of a specified stock price or TSR will prohibit a company from reversing previously recognized compensation cost if the award is subsequently forfeited or reduced because such condition was never satisfied.

(n28)Footnote 28. *See § 15.05[1] below.*

(n29)Footnote 29. Comparison of total shareholder return relative to market and an industry or peer group index

was previously required disclosure in proxy statements (the "stock performance graph"), is no longer required under the revised proxy rules, and must now be included in the Annual Report on Form 10-K.

(n30)Footnote 30. This is readily apparent, for example, in the case of absolute stock price targets, which were easy to hit for many companies during the technology boom when a rising tide lifted all boats, even though a company's relative TSR performance may have been unexceptional.

CHAPTER 15 EXECUTIVE COMPENSATION: THE PERSPECTIVE OF THE COMPENSATION CONSULTANT

*2-15 Corporate Governance: Law and Practice § 15.04***AUTHOR:** Yvonne Chen and Deborah Lifshy**§ 15.04 The Cost of Recruitment****[1] Costs of Recruiting Senior Executives**

While excesses in executive compensation have commanded prominent attention in the press, from a corporate governance point of view it is equally important to bear in mind that there are upward pressures on executive compensation that boards and compensation committees ignore at the peril of shareholders. For example, one of the most difficult challenges for a board of directors is hiring a new CEO or key executive. The obvious costs of recruitment typically include an increase over the prior CEO's pay package, relocation expenses, business inefficiencies during the transition period to the new CEO, and executive search fees. Less obvious costs include one-time recruitment inducements like sign-on awards (cash, restricted stock or stock options), make-whole payments for forfeited compensation from a prior employer, and enhanced retirement benefits for mid-career hires. Such payments may be particularly costly because they are often linked to continued service, rather than performance. Yet, it is frequently difficult or impossible to recruit qualified CEOs and other senior executives of large public companies without incurring these costs. Boards and compensation committees may therefore quite properly authorize significant payments and expenses in connection with the recruitment of senior executives in the best interest of the companies and shareholders they serve. Nevertheless, it is significant to note that, in recent years, RMG has made recruitment of new talent even more difficult with its policy that regards overly generous new CEO pay packages (for example, excessive "make-whole" provisions) to be a "problematic pay practice."

Nevertheless, costs of recruitment can become excessive when the board "falls in love" with one candidate and the compensation negotiation becomes one-sided. Clearly, every board wants a highly qualified leader at the top. However, directors sometimes risk ending up with a Rolls Royce when they walked into the showroom looking for--and probably could do as well with--a compact. Ratcheting up compensation for the CEO job makes sense only if the company is "trading up" with the expectation that the new leader will take it to the next level. Even so, most companies cannot afford to pay above-market rates for the entire executive team.

[2] Standard Company Executive Plans Plus Make-Whole for Amounts Forfeited

When a seasoned executive is being recruited away from another corporation, there are a number of factors the new company should consider before making the offer. The company will need to understand the executive's current total

compensation package and whether the executive will be forfeiting a bonus, long-term compensation plan benefits or unvested equity (restricted stock or options). Often, the most expensive item for mid-career hires is a make-whole arrangement for lost pension entitlements--an arrangement which RMG views as a "problematic pay practice." In many cases, the new executive will also want to negotiate a total package that is bigger and better than the outgoing executive's package.

[3] Additional Recruitment Inducements

[a] Contracts With Guarantees

Often senior executives expect inducements in addition to the agreed-upon salary and the company's standard benefits package (perhaps enhanced by a make-whole provision to compensate the executive for pension benefits left behind at the old company), especially if the new position is a lateral move. CEOs and other very senior officers often negotiate for employment contracts.

When the contract is negotiated in the recruitment process (as opposed to being given to an executive for the first time upon promotion to a more senior position in the company), the executive may expect a guarantee of a minimum annual salary for a certain number of years (typically three). Often, these contracts guarantee that the executive's annual salary will be reviewed by the board annually for increases, but may not be reduced during the guaranty period. Similarly, some contracts guarantee a minimum bonus payout for a certain number of years during the term of the agreement. However, RMG considers any contract with a multi-year guarantee for salary increases, bonuses and equity compensation to be examples of an "egregious employment contract" and considers such to be a "problematic pay practice."

[b] Mega Grants of Restricted Stock or Stock Options

Upon initial hire, many companies will offer an executive a large one-time grant of restricted stock or stock options to give the executive an immediate equity stake. This is arguably a poor practice from a corporate governance perspective, since executives in even average and poor performing companies can still do quite well and, if the initial grant includes restricted stock (without performance vesting), the reward the executive receives will be mostly unrelated to performance. In addition, a mega grant of options enables executives to realize significant gains from even small increases in share price, based purely on the number of shares they hold,ⁿ¹ not to mention windfalls that may result in the event of a change in controlⁿ² or dismissal of an underperforming CEO.ⁿ³ On the other hand, equity awards with vesting conditions may be a better alternative than an immediate cash hiring bonus. It should be noted, however, that if the disclosure rules are amended to show grant date values in the summary compensation table of the proxy statement, awarding a mega-grant to an executive could have a profound impact on the executive's "Total Compensation" number and influence who are the named executive officers (other than the CEO or CFO) for any given year.

[c] Termination Protections under Golden Parachutes

In addition to offering generous pre-change in control severance benefits, recruiting companies are generally expected to provide incoming executives at very senior levels with severance benefits (usually including, at a minimum, a lump-sum severance payment that is a multiple of the executive's annual base salary or salary plus annual bonus) in the event their employment is terminated following a change in control (often referred to as "golden parachute" or change-in-control agreements).ⁿ⁴

In the 1980's, a period of intense corporate takeover activity, Congress became alarmed about excessive golden parachutes to top executives and other key personnel in connection with such takeovers. Many believed that golden parachute contracts did little but assist an entrenched management team to remain in control, and may have provided corporate funds to subsidize officers or other highly compensated individuals. In an effort to thwart the adverse corporate governance impact of such parachutes, Congress enacted a penalty for such excesses through *IRC sections*

280G and 4999. These sections provided that no deduction is allowed for any "excess parachute payment," and the executive must pay (and the corporation must withhold) a nondeductible 20 percent excise tax on any excess parachute payment.ⁿ⁵ Ironically, the impact of this regulation seemed to cause a boomerang effect in that companies that had not provided for high multiples of severance payouts following a change in control amended their executive agreements to provide protection up to the maximum amount payable under the regulations without triggering the excise tax, and many of those with high multiples elected to "gross-up" for the excise tax.

Many argue that golden parachutes are actually advantageous from a corporate governance standpoint, as they can benefit the corporation and its shareholders by reducing the conflict of interest between shareholders and managers at the time of the takeover and can make it more likely that the efficiency gains from the takeover are realized. They are also arguably an efficient device for attracting and retaining executives, providing desirable insurance against termination especially in firms where a future merger is probable. "But at the same time, a golden parachute could be used to restrict takeovers and entrench management at the expense of shareholders" by making the takeover so expensive that the golden parachute functions as a deterrent to a deal that would benefit shareholders.ⁿ⁶

With RMG's adoption of a new policy characterizing the making of employment agreements (or modifications to employment agreements) that contain gross-up provisions as a "problematic pay practice," the prevalence of the gross-up--at least for new contracts--may be on the decline. In the 2009 proxy season, RMG appeared to strictly took a strict line, consistently recommending votes against directors or equity plans of companies that had entered into or materially amended contracts with gross-up provisions. In fact, the most common reason for withhold votes for compensation committee members in 2009 was the inclusion of a tax gross-up in a new or modified employment contract.

[d] Retirement Benefits for Mid-Career Hires

Defined benefit pension plans typically calculate an executive's pension benefit by multiplying the executive's final average pay near the end of his career by an annual percentage for each year of service with the employer. A mid-career hire with escalating pay year-over-year can suffer a significant reduction in pension benefits if his years of service with the former employer are ignored when it comes time to calculate pension benefits based on final average pay with the new employer. Even if pension benefits with the former employer are vested, it is highly unlikely that the sum of the standard pension benefits at the former and new employer will equal (or perhaps even approach) the pension benefits the executive could have earned by continuous employment with one employer. Accordingly, a new employer seeking to recruit a top executive in the middle of his career may have to offer enhanced retirement benefits.

A new employer may agree by contract to credit the newly hired executive with additional age and service credits under its existing or supplemental executive retirement plans. For example, if a plan requires that the company employ an executive for five years before his retirement benefits vest, the company will give the executive extra service credit for this purpose. If the plan contains a formula whereby the executive's benefits are based on final average pay and years of service with the company, tacking on additional credit will result in higher benefit payouts, as well. Nevertheless, the National Association of Corporate Directors' ("NACD") Blue Ribbon Commission on Executive Compensation and the Role of the Compensation Committee, recommends against adding years onto an executive's years of employment to increase the executive's retirement package.ⁿ⁷ Likewise, RMG considers such crediting to be a "problematic pay practice".ⁿ⁸ The proxy disclosure rules adopted by the SEC in 2006 require companies to identify instances where extra years of service are provided to named executive officers and to quantify the resulting benefit augmentation.

Pension benefits lost in a mid-career move can be substantial and will invariably become a part of the negotiation between the executive and the new employer. A blanket admonition against adding years of service ignores market realities. In the end, it is a matter of money. The issue can be solved by adding years of service or paying more for something else instead. Either way, from a corporate governance perspective, the compensation committee should be made aware of the recruitment costs associated with the restoration of retirement benefits for a mid-career hire.

[4] Drawing the Line on the Cost of Recruitment

If a company is in dire need of a capable CEO and the preferred candidate is adamant about receiving a certain level of compensation to come on board, the company may feel powerless to say no. From a corporate governance point of view, it is critical that, at every stage of the negotiations, the compensation committee understands the cost of the bid and the ask.

From a practical perspective, it is not in the company's best interest to be left with only one viable candidate for the CEO position. While it may be necessary to pay more than the predecessor CEO if the objective is to "trade up," the compensation committee should keep an eye on the total cost of the package demanded at every stage of the negotiations and should be aware of how it compares with the cost of the incumbent's package and with market norms. If the cost of the package demanded significantly exceeds the cost of the predecessor package or exceeds the market competitive 75th percentile, the compensation committee should take a step back and reconsider whether there is not another qualified candidate without inflated compensation demands.

CHAPTER 15 EXECUTIVE COMPENSATION: THE PERSPECTIVE OF THE COMPENSATION CONSULTANT

*2-15 Corporate Governance: Law and Practice § 15.05***AUTHOR:** Yvonne Chen and Deborah Lifshey**§ 15.05 The Cost of Retention****[1] Costs of Retaining Senior Executives**

When *Section 162(m) of the Internal Revenue Code ("IRC 162(m)")* was adopted in 1993, lawmakers expected that the growth of executive pay would slow due to the \$1 million cap on the deductibility of non-performance-based pay.ⁿ¹ While many companies did limit executive salaries to \$1 million or less, other performance-based elements like annual incentives, stock options and long-term performance incentive plans have accelerated to the point where, in 2008, salaries often represented as little as 11 percent of the pay mix for CEOs.ⁿ² The unintended consequence is that salary alone may no longer provide sufficient retention value, especially given the shortened time horizon of some executives and the trend away from defined benefit retirement programs.

In a slow-growth economic cycle, when corporate profits are weak, equity-based incentives (stock options and restricted stock) produce less significant wealth for senior executives than they do in an up cycle. In this circumstance, in which companies still have a tax incentive to cap base salary at \$1 million, there is often pressure to jigger incentive plans to keep senior executives' total compensation at historical levels despite declines in corporate performance. The rationale is often that executives should not be penalized for the negative impact of market forces beyond their control and that only superior executive talent can deliver meager results in a challenging business environment. However, lowering performance thresholds to promote retention in a difficult market environment is in direct conflict with a pay-for-performance philosophy. In addition, the implicit assumption of this approach seems to be that it is necessary for retention purposes to keep executive compensation up in bad times as well as good. This assumption ignores the fact that, in a weak economy, executives' opportunities to make more money by changing employers is limited, since all companies (or all companies in a sector) are operating with the same market constraints.

Even when performance is good and incentive plans designed to provide a retention hook are working, companies may succumb to retention pressure. For example, a few executives have been able to negotiate special awards upon re-signing or renegotiating employment contracts. As with the price of recruitment, the price of retention can become excessive if the compensation committee is unable to negotiate with the executive from a position of strength.

[2] Salary

As a result of *IRC Section 162(m)*,ⁿ³ many public companies now informally limit base salary to a maximum of \$1 million, with remaining compensation included in "performance-based" incentive compensation. Some major companies have exceeded this limit for chief executive officers to varying degrees, with the company accepting the loss of the deduction in exchange for providing the desired guaranteed compensation level for its CEO. At other companies, the Section 162(m) limit may be avoided by automatically deferring payment of the extra compensation until after the executive's employment is terminated.

Due to rising levels of incentive pay over the past 10 years and the common practice of limiting each named executive officer's salary to \$1 million, CEO salaries have now fallen to about 11 percent of the overall pay mix.ⁿ⁴ At such a small percentage of overall compensation, salary alone cannot provide sufficient retention value for a capable top executive. For better or worse, some companies with depressed performance and little or no annual incentive award value have increased the size of annual restricted stock or stock option grants as a way of addressing the retention issue, while others have been forced to change the annual incentive plan payout formula.ⁿ⁵

[3] Handcuffs

There are a variety of compensation tools that may be used to induce an executive to stay with a company. Equity-based incentive awards are typically subject to vesting restrictions that span three to five years. However, the most effective retention factors are often non-compensatory, such as strong company performance and clear career advancement prospects.

In consideration of large retention awards, executives may be required to sign agreements not to compete or not to solicit employees or customers for a period of time after leaving the employ of the company (and, in the case of non-compete agreements, within a defined universe of competitors or a stipulated geographic area). Such contracts often have "clawback" provisions, under which the company has a right to recover some or all of the award if the executive breaches the covenant not to compete or not to solicit employees.ⁿ⁶ In some states, employee non-compete or non-solicitation agreements may not be enforceable unless the executive attempts to compete by using trade secrets or proprietary information of the company or has furnished services of a unique or extraordinary character.ⁿ⁷ In addition, even when the underlying non-compete or non-solicitation clause is enforceable, the "clawback" provision may be attacked as an unenforceable liquidated damages clause.ⁿ⁸

One drawback of significant retention awards is that they represent an investment in the future on the basis of an assumption about who the key contributors will be. Companies are not always prescient about who will be the key contributors, and so retention awards carry an element of risk that retrospective pay-for-performance programs do not.

Retention programs are designed to keep the most critical strategic contributors who are also "at risk" of recruitment by competitors. The purpose is not to provide incremental compensation for all executives at a certain level. In the selection process, the company must make difficult judgments (not only about who are the key contributors but also about who is most at risk of being recruited away) that may not be perceived as fair by ostensibly similarly situated executives who do not receive retention awards. (Confidentiality agreements are helpful but not necessarily airtight in the executive suite.)

Whenever a company makes retention awards, it should consider whether there is a risk that another "one-time" retention program will be needed to keep executives when the initial awards vest. Finally on this subject, although some long-term incentive awards carry prorated or accelerated vesting upon retirement, an executive who retires before the special retention award is fully vested has not delivered the required length of service and generally should not be permitted to vest.

[a] Restricted Stock or Career Stock Grants

Restricted stock grants can be an effective retention vehicle as part of the regular compensation program. For example, several of the major investment banks pay a portion of what was historically an annual cash bonus in the form of restricted or deferred shares. The percentage of compensation that is paid in shares increases as compensation levels increase. The plan serves as a retention handcuff since shares are forfeited if the executive voluntarily terminates employment before full vesting; each year a new "layer" of shares is added to continue the retention effect.

Companies may also choose to make restricted stock or career stock grants with lengthy vesting schedules (10 years or more) to retain executives for a longer tenure. Career stock grants generally vest upon retirement.⁹ Since the stock is a "full value" instrument (unlike a stock option where value depends on appreciation over the exercise price), such awards have high retention value.

With the intense focus of policy makers, government officials and shareholder activists on ensuring that executive compensation is tied to long-term value creation and aligning payouts with risk horizons, there will be increased pressure on companies to award career stock grants and stock that does not vest until retirement, as well as to adopt stock holding requirements until or even beyond retirement. There will also be pressure to require executives to defer bonuses (whether in the form of stock or cash) over several years (known as "bonus banking").

[b] Stock Ownership or Retention Guidelines

Stock ownership or retention guidelines may be used to align executive compensation with the long-term interests of stockholders. A stock ownership guideline typically requires senior management (and often directors) to acquire and retain a meaningful amount of the corporation's stock. Ownership guidelines are typically stated as a multiple of salary (in which case it is necessary to specify as of what date the stock price is measured--date of purchase or later date such as year-end, when compliance with stock ownership guidelines is tested). For more volatile stocks, the ownership guideline may be stated as a number of shares. In fact, following the economic turndown of 2008, many companies were forced to consider restating their guidelines in terms of shares, as executives failed to meet the stock ownership guidelines based on percentages of annual base salary because of depressed share prices. Stock retention guidelines typically require the executive to hold all or a portion of stock acquired from the company's compensation program for a certain period of time.¹⁰ If a retention guideline is established, executives may decide to exercise options early in order to "start the clock" on the retention or restriction period. In establishing these guidelines, the compensation committee should ensure that the financial investment and risk entailed in complying with these guidelines is not so substantial as to diminish the competitiveness of the total compensation package. The existence of stock ownership guidelines probably does not impair a company's ability to recruit or retain executives, since many companies have ownership guidelines in place. About 78 percent of large companies disclose formal share ownership guidelines.¹¹

Other considerations surrounding stock ownership and retention guidelines include whether there are penalties ("sticks") for non-compliance, such as reduction or loss of eligibility for future long-term incentive grants, or payment of annual incentives in shares rather than cash until guidelines are met; and whether the company assists the executive in accumulating shares and offers special rewards ("carrots") for executives who achieve and maintain specified ownership levels, such as grants of additional shares if the executive elects to receive annual incentive in the form of restricted shares.

[c] "Clawback" Provisions

Executives may be required to sign an agreement providing for the forfeiture of their interest in incentive plans, equity plans, non-qualified retirement plans and deferred compensation arrangements if they violate a restrictive covenant. For example, a company may terminate a former executive's right to exercise stock options if he or she leaves the company and then engages in competition with the former employer. As equity has become a dominant part of executive pay packages, companies have also used the "clawback," which generally requires an executive who violates a restrictive covenant to pay back to the company any profit on the exercise of options or vesting of restricted stock. The look-back

period typically runs from six months to one year from the date of exercise of the option or vesting of the restricted stock. This type of provision may also be referred to as a "bad boy" clause. Clawbacks may be attacked in litigation as unenforceable liquidated damages clauses.ⁿ¹²

[4] Less Obvious Costs of Retention

[a] Contract Renewal Bonuses/Awards

In consideration for signing a new agreement (or renewing an expiring agreement) to continue employment with a current employer, an executive may request a renewal bonus or other retention award. Such awards should be reviewed to ensure that their purpose and size is reasonable in relation to the extended tenure. If possible, compensation committees should avoid authorizing contract renewal awards. In most cases, there are already meaningful retention inducements for an incumbent executive, such as forfeiture of unvested equity awards.

[b] Low Performance Thresholds

Due to the \$1 million cap on deductible compensation for named executive officers under *IRC Section 162(m)*, some companies try to increase the amounts payable under incentive compensation plans (which are exempt from the cap if they meet the requirements for qualified performance-based compensation plans). To maintain the deduction under the "performance-based" exception in *IRC Section 162(m)*, some companies set very low performance thresholds so that payouts under these plans are likely to be made.

[c] Extra or Increased Stock-Based Awards to Compensate for Reduced Cash Awards When Performance is Poor

If a company is not paying cash bonuses necessary to ensure an executive's retention, it may also turn to larger or more frequent equity-based awards. A low or no bonus year may be softened with a restricted stock or option grant. The compensation committee should understand that the objective for such awards is retention, as opposed to a pay-for-performance philosophy.

[5] Drawing the Line on the Cost of Retention

All retention incentives assume of course that the executive is likely to accept another job if the incentives are not paid. Compensation committees should be skeptical of self-serving positions taken by executives who claim to be highly marketable or who claim they are being recruited by prospective employers. Especially when annual and long-term incentives are not paying as well as previously because the economy is in the doldrums, the ultimatums of these "grass-is-greener" executives should often be regarded with suspicion. In addition, the ability to pay retention bonuses in the context of a bankruptcy filing has now been severely curtailed with the enactment of the Bankruptcy Abuse Prevention and Consumer Protection Act of 2005.ⁿ¹³

On the other hand, compensation committees should not wait to actually lose critical talent before concluding that retention incentives are appropriate. It may be in the best interests of the company and its shareholders to be proactive rather than reactive in these circumstances, especially where the compensation committee concludes that the executives in question are critical to the company's success and not easily replaced.

(n1)Footnote 1. *See § 10.06[3] above* for discussion of *IRC Section 162(m)*.

(n2)Footnote 2. Equilar 2009 CEO Pay Strategies: Compensation at S&P 500 Companies.

(n3)Footnote 3. *IRC Section 162(m)* provides that there is no corporate income tax deduction for compensation over \$1 million paid to the CEO and the other four most highly compensated executive officers, with certain significant exceptions. *See §§ 10.01, 10.05[1][a], 10.06[3], above.*

(n4)Footnote 4. Equilar 2009 CEO Pay Strategies: Compensation at S&P 500 Companies.

(n5)Footnote 5. *See § 15.05[3] below.*

(n6)Footnote 6. Used in this context, "clawbacks" refer to techniques to enforce post-employment covenants, rather than requirements to repay compensation paid based on inaccurate financial statements, as per TARP and Sarbanes-Oxley regulations.

(n7)Footnote 7. *See, e.g., TMP Worldwide v. Franzino, 703 N.Y.S.2d 183 (N.Y. App. Div., 1st Dep't 2000)* (refusing to enforce a covenant not to compete because "there is no indication that the individual defendant had access to, much less misappropriated, customer lists, trade secrets, business plans or other confidential information, or that his services at plaintiff's company were of a unique or extraordinary character.") *but see Battenkill Veterinary Equine P.C. v. Cangelosi, 768 N.Y.S.2d 504, 506 (N.Y. App. Div., 3d Dep't 2003)* (enforcing a veterinarian's three-year agreement not to compete within 35 miles of employer's clinic because the covenant was "reasonably limited in time, geographic area and scope, ... necessary to protect the employer's interests, not harmful to the public and not unreasonably burdensome.").

(n8)Footnote 8. *See, e.g., Fingerlakes Chiropractic, P.C. v Maggio, 703 N.Y.S.2d 632 (N.Y. App. Div., 4th Dep't 2000)* (holding that non-compete clause was enforceable but liquidated damages clause for breach of non-compete was unenforceable).

(n9)Footnote 9. For example, Whirlpool Corporation has a "Career Stock Program (the 'Career Stock Program')". The Career Stock Program was established to provide one-time grants of phantom stock to select key executives as a means of retaining those executives and encouraging long-term employment. Recipients and award sizes are based on subjective determinations relating to a broad range of factors. The shares do not represent an equity interest in Whirlpool, and no voting rights attach to the shares until and unless they are distributed to the participant. Grants are made under one or more of Whirlpool's Omnibus Stock and Incentive Plans. The value of a share of Career Stock on any given date is equal to the fair market value of a share of common stock on that date. Recipients of Career Stock will receive one share of common stock for each share of phantom stock on a one-for-one basis upon retirement after attaining the age of 60 or upon termination of employment, based on individual vesting schedules and subject to certain non-competition provisions. Phantom Career Stock dividends are invested in additional phantom shares to be awarded in the same manner as the original awards." Whirlpool Corporation Proxy Statement dated March 11, 2003.

(n10)Footnote 10. For example, Citigroup expected its "directors and senior management, approximately 120 individuals in all, [to] have entered into a *stock ownership commitment*, which provides that each of such individuals will hold at least 75 percent of all Citigroup common stock owned by him or her on the date he or she becomes subject to the commitment and awarded to him or her in the future, subject to certain minimum ownership guidelines, as long as he or she remains a director or member of senior management." In 2005, it expanded its ownership commitment guidelines to include a "25% holding requirement that applies prospectively and generally covers those employees who report directly to a member of the Citigroup management committee and those employees one level below them." After this guideline becomes in effective in 2006, approximately 3,000 employees around the world will be subject to the

Citigroup's stock ownership commitment. Citigroup Inc. Proxy Statement dated March 15, 2005.

CHAPTER 15 EXECUTIVE COMPENSATION: THE PERSPECTIVE OF THE COMPENSATION CONSULTANT

2-15 Corporate Governance: Law and Practice § 15.06

AUTHOR: Yvonne Chen and Deborah Lifshy

§ 15.06 The Cost of Termination and Smooth Transition

[1] Costs of Senior Executive Turnover

Turnover in key executive positions makes headlines partly because it is often viewed as a sign of trouble. Companies can protect against some of the negative impacts of key executive turnover by imposing restrictive covenants such as non-competition, non-solicitation, non-disclosure and non-disparagement clauses, and by demanding "clawback" of compensation when the executive engages in restricted activities. However, these provisions may be difficult or costly to enforce and the parties may end up in court.

Other costs of turnover that are more difficult to offset include executive search fees, business inefficiencies during the vacancy, missteps during the new hire's learning curve, loss of corporate memory and poor morale. Even when turnover is desirable to make room for new managers in the succession plan or to remove poor performers, the compensation committee will be called upon to make decisions regarding the departing executive's exit package.

"Big ticket" items in exit packages include severance payments, accelerated vesting of equity-based incentive awards or additional credit in determining pension benefits. These items may be quite costly, particularly in the context of an executive whose employment is terminated for poor performance.ⁿ¹ While employment agreements often restrict or eliminate payments/benefits if an executive is terminated for "Cause" (a carefully defined term in the executive's employment agreement), poor performance is rarely included in the definition of Cause. In the extreme, a company may pay more for failure than for good performance when the executive being dismissed receives compensation and benefits beyond that paid to continuing employees.ⁿ²

Companies and their compensation committees may also be called upon to negotiate and approve "golden sunset" packages for retiring executives. These post-termination arrangements, which are not prevalent and are tailored to the specific situation, represent an incremental cost to the company, since they are almost always in addition to what the executive is entitled to receive under the company's existing compensation programs. Examples of special retirement benefits may include sweetheart consulting arrangements, accelerated vesting of equity-based incentive awards, extended post-termination exercisability of stock options, enhanced retirement and other benefits, continued access to company perquisitesⁿ³ or other types of recognition, such as charitable donations and endowments, scholarships, etc.

With the enactment of *IRC Section 409A*, however, changes to features relating to acceleration or other substantive terms and conditions of a plan providing for "deferred compensation" within the meaning of the statute may result in substantial penalties. Likewise, RMG considers excessive severance or change-in-control arrangements to be "problematic pay practices" by RMG. Although the rationale for these deals is questionable, legitimate consulting arrangements may withstand scrutiny. In some instances, the compensation committee may simply be giving the retiring executive a significant "pat on the back" for a job well done, not unlike the proverbial gold watch awarded at the retirement dinner party-but in this instance of a potentially much greater value.

[2] Employment Contracts, Severance Agreements and Golden Parachute Agreements

The most significant issue addressed in a typical employment agreement is unemployment--that is, what happens if the employment relationship is terminated because of breach, disability, death, involuntary termination by the company without Cause, or voluntary termination by the Executive with "Good Reason." A good executive employment agreement deals with these various categories of employment termination, the provisions relating to each of which are often subject to extensive negotiations when a company brings in a new senior executive.

The NACD Blue Ribbon Commission on Executive Compensation recommends that, in hiring a new CEO from the outside, the compensation committee should hire special counsel to prepare any employment agreement on behalf of the committee.ⁿ⁴ The NACD Report also suggests that, before agreeing to an employment agreement, the committee review company costs under a "worst case" severance benefit.ⁿ⁵

The use of employment agreements has been fueled by the increased mobility of top executives and the proliferation of tax, securities, accounting and transaction-related issues.ⁿ⁶ The increased use of employment contracts also reflects high levels of involuntary termination of senior executives' employment.ⁿ⁷ Shareholder intolerance for under-performance has resulted in a very short "proving" period for newly appointed CEOs and other leaders. As a result, severance protection has become a form of insurance for executives to protect against the prospect of a career-ending dismissal.

The term "employment agreement" is often used interchangeably with the terms "severance agreement," "change in control agreement," and "golden parachute agreement." All three types of agreements (employment; severance; and change in control or "golden parachute") may contain similar provisions. However, an employment agreement typically is a more general document with provisions addressing basic employment issues such as the term of employment, salary and benefits. It may set out the employer's responsibilities if the executive's employment is terminated or there is a change in control of the employer, although termination of employment following a change in control is often addressed in a separate change in control or "golden parachute" agreement.

A severance agreement, in contrast, is characterized by its focus on the employer's obligations in the event an executive's employment is terminated and is sometimes negotiated, drafted and signed after a decision has been made to terminate the executive's employment. A change in control agreement deals with payments and benefits the employer is obligated to provide following a change in control or in the event of termination of employment following a change in control (also referred to as "golden parachute payments").

[3] Corporate Governance Perspective

There are several excellent treatises discussing the common provisions and drafting tips to consider when preparing employment contracts, severance agreements and golden parachute agreements.ⁿ⁸ Others have researched the market prevalence of different severance triggers, severance multiples, golden parachute "gross-ups" and other features sometimes found in such agreements.ⁿ⁹

From a corporate governance perspective, compensation committees should consider whether such agreements are in

the best interests of the company and its shareholders and how RMG and significant institutional shareholders will view such arrangements. As previously discussed, employment contracts or golden parachute agreements may be needed to recruit or retain key executives.ⁿ¹⁰ All too often, however, it appears that compensation committees approved agreements that seem decidedly one-sided in favor of executives. "A major frustration for shareholders and boards alike is CEOs who leave the organization, either by choice or at the request of the board, after short and/or unsuccessful tenures, and walk away with significant financial rewards."ⁿ¹¹

Payment for failure should not exceed payment for performance. The Business Roundtable cautions that "[p]articular attention should be paid to severance arrangements and to all benefits provided to senior management in connection with termination of employment. Corporations should not offer excessive severance packages that reward executives who have not met performance goals and objectives during the term of their employment."ⁿ¹²

The NACD has published a list of "best practice" guidelines for compensation committees to consider when reviewing proposed employment contracts or golden parachute agreements.ⁿ¹³ Among the more significant recommended practices are the following:

- in hiring a new CEO from the outside, employing special counsel to prepare any employment agreement on behalf of the committee;
- not treating non-renewal of a contract as an automatic trigger for severance pay;
- not extending severance benefits beyond the executive's age 65 or the company's normal retirement date;
- before agreeing to an employment agreement, reviewing company costs under a "worst case" severance benefit;
- expanding the definition of "for cause" termination to include violations of the company's code of business conduct and ethics, as well as violations of its insider-trading policies; and
- conditioning severance payments on the executive's agreement to standard "no compete, no raid, no sue, no tell" provisions.

In golden parachute agreements or change-in-control provisions, the NACD suggests that accelerated vesting of stock options or equity grants should not occur automatically, except in the event of a cash buyout where there is no equity conversion for shareholders, or upon involuntary termination of employment without cause (and presumably voluntary termination with good reason) following a change in control. The NACD also suggests refraining from "single trigger" severance benefits and urges companies to periodically review total company costs, and compare such costs to the company's total equity market capitalization.ⁿ¹⁴

CHAPTER 15 EXECUTIVE COMPENSATION: THE PERSPECTIVE OF THE COMPENSATION CONSULTANT

2-15 Corporate Governance: Law and Practice § 15.07

AUTHOR: Yvonne Chen and Deborah Lifshy

§ 15.07 The Consultative Process--Lifting the Veil

As part of the SEC disclosure requirements, the name of each compensation consulting firm used by the compensation committee is now public information, along with a discussion of its role in the compensation committee's executive compensation decision process. Advice that was once provided "behind closed doors" has garnered particular attention as shareholders, investor advisory groups, the media and other external parties have looked to hold accountable all those responsible for egregious pay practices. As a corollary, the compensation committee is increasingly influenced, rightly or wrongly, by how its pay decisions will "play in the public eye." Furthermore, the anticipation of a mandatory "Say-on-Pay" regime in the United States has resulted in more direct exchanges between the compensation committee and institutional investors. For example, Pfizer held a face-to-face meeting between its largest shareholders and its directors to discuss its compensation and governance policies. This section is intended to "lift the veil" on the current state of the consultative process and discuss possible directions for the future.

[1] Engaging the Compensation Consultant

Under NYSE listing requirements,¹ compensation committees of companies listed on the NYSE must now have sole responsibility for interviewing, selecting, engaging, directing, evaluating and terminating the engagement of the compensation consulting firm that advises the compensation committee. The compensation committee may ask management and the company's top human resources executive for input on specific consultants to consider and for assistance with the selection process. Although compensation committees may not hire the consulting firm that management favors, they generally would not hire a consulting firm that management opposes.

Ad hoc assignments are possible, but the compensation consultant is typically engaged to advise the compensation committee throughout the year, including in the annual review process for executive compensation. Thus, the scope of the consulting engagement may include:

- selection of the market benchmarking peer group and/or review of an existing peer group;
- collection and analysis of competitive market data (or review of data prepared by company human resources and/or finance staff) on:

- peer group compensation levels for similar executive positions;
 - relevant compensation survey data;
 - peer group program design practices, including the mix of pay elements, performance measures and the prevalence of key incentive plan design features;
 - peer group financial and stock performance data;
 - peer group shareholder dilution and annual share utilization levels;
 - review of existing incentive plan designs in the context of the company's business strategy;
- development of new or modified incentive plan designs;
 - assistance with the compensation risk assessment to ensure that the program does not encourage unnecessary or excessive risk-taking;
 - development of specific recommendations for individual executive compensation levels and annual adjustments to program structure, e.g., base salary merit increase budget and salary grade ranges, annual incentive target award levels and guidelines for long-term incentive and equity awards; and
 - assistance in the preparation of or review of the proxy disclosure materials, including the Compensation Discussion and Analysis section of the proxy statement; and other research projects, at the direction of the compensation committee.

Pursuant to its charter, the compensation committee may also have responsibility for making recommendations to the board regarding the non-employee director compensation program. If it does, the compensation consultant may also be requested to conduct competitive market/peer group evaluations on a periodic basis and assist in the design of the compensation program for non-employee directors. Alternatively, responsibility for the non-employee director compensation program may reside with the nominating and corporate governance committee and that committee may engage the same or a different compensation consultant.

The compensation consultant is normally expected to attend or be available for most compensation committee meetings and to have direct interaction with the committee chairperson between meetings. The compensation consultant would also typically have contact with the company's top management and human resources department as a necessary part of the engagement.

[2] Consultant Independence

As critics of excessive executive compensation become more sophisticated, they increasingly focused on the issue of consultant independence. Arguably, if the professional fees that a consultant receives for providing advice to management exceed the professional fees received for providing advice to the compensation committee, the consultant's independence from management could be called into question. For example, consider a consulting firm that is receiving millions of dollars in professional fees for assisting the company with outsourcing its benefits administration. If the same firm also advises the compensation committee on executive compensation (an assignment typically generates considerably less than \$1 million in professional fees), it is possible that the executive compensation consultant could be pressured into recommending excessive executive pay in order to avoid antagonizing the management team responsible

for awarding the larger outsourcing engagement.

Current SEC rules require companies to disclose, in their annual proxy statements, the name of the compensation consulting firm, as well as the scope of the engagement, the role of the consultant and the direction provided by the compensation committee. The proposed amendments to the SEC rules would additionally require, where non-executive compensation services are provided, that the following be disclosed:

- the nature and extent of any and all other services provided by the compensation consultant;
- the consultant's aggregate fees related to advising on executive and director compensation;
- the consultant's aggregate fees related to other services;
- whether management directly engaged, or otherwise participated in, the decision to engage the consultant for other services; and
- whether the board or compensation committee approved the other services.

Notably, the SEC does not prohibit consulting firms from advising both management and the compensation committee, although arguably the proposed disclosure may inhibit such practices. Relatively few companies currently voluntarily disclose information on professional fees paid to the compensation consultant,ⁿ² although a number of companies identify the compensation consultant as independent or address the degree to which the consultant provides services to management and the committee's approval process for such engagements.

Congress also took up the issue of consultant independence. In May 2007, Congressman Henry Waxman sent letters to six major compensation consulting firms requesting five years of historical information "regarding the executive compensation and other services" provided to each of the largest 250 U.S. companies. The letter requested confidential information on the total revenues charged to each of these companies and the breakout of revenues among executive compensation consulting services and "other services." Congressman Waxman's letter cited employee benefit plan and pension plan consulting as examples of "other services." All six targeted firms responded and Towers Perrin received a subpoenaⁿ³ for additional information as of June 2007.

In December, 2007, Congressional hearings were held with respect to the letters and the topic of conflicts of interests among compensation consultants. At the hearing, Congressman Waxman recommended that proxy statement disclosure include the full scope of compensation consultant relationships when the consultant is recommending executive pay.

At the same time period, a report was released by the Majority Staff of the Committee on Oversight and Government Reform,ⁿ⁴ which was based on the nonpublic information provided to the Committee in response to the inquiry letters sent to the six leading compensation consulting firms mentioned above. The report indicated that:

- over 100 large publicly traded companies hired compensation consultants with "substantial conflicts of interest" in 2006;
 - in 2006, at least 113 of the Fortune 250 companies received executive pay advice from consultants that were providing other services to the company;
 - some compensation consultants received over \$10 million in 2006 to provide other services;
 - over two-thirds of the Fortune 250 companies that hired compensation consultants with

conflicts of interest did not disclose the conflicts in their proxy statements (even though there is no such disclosure requirement);

- in 30 instances, a compensation consultant was identified as independent while being paid to provide other services to the company;

- consultants were paid nearly eleven times more for providing other services than they were paid for providing solely executive compensation services;

- there "appears to be" a correlation between the extent of a consultant's conflict of interest and the level of CEO compensation; in 2006, the median CEO salary of the Fortune 250 companies that hired compensation consultants with the largest conflicts of interest was 67 percent higher than the median CEO salary of the companies that did not sue conflicted consultants.

Most recently, H.R. 3269 has taken on the issue of consultant independence, requiring the SEC to issue standards for independence.

Increased attention to the independence issue may eventually result in the application or adoption of an "audit standard" for the compensation consulting industry. In addition to amended disclosure requirements, possible changes for the future may include:

- review and pre-approval by the compensation committee of any "other services" provided to the company by the committee's compensation consultants;
- standards of professional conduct relating to consultant independence;⁵
- annual certification of the consultant's independence;
- withhold votes for compensation committee members by investor advisory firms if the compensation consultant is not independent;⁶
- annual evaluation of the consultant's performance and review of professional fees by the compensation committee;
- periodic rotation of the consulting partner responsible for a specific client or periodic rotation of the consulting firm chosen as the compensation committee's advisor;
- increased prevalence of "dueling consultants" where the compensation committee and management each retain its own compensation consulting firm, with an increase in the combined cost of compensation consulting services; greater prominence of independent consulting firms that distinguish themselves by only serving compensation committees;
- a corresponding increase in the number of firms that focus on serving management (for example, when dealing with top executive contract negotiations, the compensation consulting industry is already bifurcated into smaller boutique firms that represent individual executives and firms that only represent employers;
- movement in the consulting industry away from a full service business model that combines executive compensation consulting with a wide variety of other services toward a business model that is

focused exclusively on providing services to the compensation committee or the board; and

- minimum fee requirements or special retainers for client companies where the compensation consultant is barred from providing any services other than those requested by the compensation committee.ⁿ⁷

While many of these ideas may help preclude the use of compensation consulting firms with compromised independence (real or perceived) and thereby reduce the risk of excessive executive pay, there are drawbacks with taking these ideas to an extreme. In the field of executive compensation, there are no uniform standards (such as Consultants' advice to the compensation committee involves professional experience and subjective judgment. Typically, there is no one right answer. Two independent consultants faced with the same set of issues could arrive at two completely different compensation programs, both of which may be reasonable and appropriate.

Nevertheless, some of the sorts of professional standards that now apply to the auditors may eventually be applied to compensation consultants. To impose limits on "other services" not related to the compensation committee that an independent consultant may undertake, policy makers would need to determine the appropriate balance. It will also be necessary to define "other services." Since most compensation committee charters do not limit the committee's purview to executive compensation alone, a consultant could remain free of conflict while providing services to the board that are not limited to executive or non-employee director compensation. If the audit standard were to serve as a model, then an independent consultant could provide "other services," as long as sufficient information were disclosed about the services provided and the cost in the preceding year of such services and of advice by the same firm to the compensation committee. RMG typically votes against the ratification of the appointment of an outside auditor whose fees for "other services" equal or exceed its fees for "audit and audit-related services." However, RMG has not yet addressed whether application of a similar "majority rule" for "other services" would be reasonable for an independent consultant advising the compensation committee. In practice, "majority rule" could be too lenient a standard and a limit on "other services" closer to 25 percent of total consulting fees might ultimately emerge. Most likely, RMG and others will develop policies regarding consultant independence once the SEC has released its final new regulations on consultant independence and related disclosures.

The costs of engaging "dueling consultants" may be prohibitive and unnecessary. In addition to the monetary cost of partly duplicative consulting engagements, companies with "dueling consultants" run the risk of creating an adversarial relationship between management and the compensation committee, or at least reducing the level of mutual trust. While reliance on multiple consulting firms for compensation survey data is commonplace and helpful, the use of "dueling consultants" could suggest that management and the compensation committee may have contradictory views about the company's compensation objectives, a situation that is generally not sustainable long term. Looking again to the "audit standard," although a company might engage two outside auditors under special circumstances (*e.g.*, merger and acquisition, initial public offering, bankruptcy, etc.), companies rarely hire one auditor for management and a different auditor for the audit committee

Other than resigning the client relationship, compensation consultants do not currently have much recourse if a company's compensation committee and management decide to act against the advice given. Furthermore, current regulations do not stipulate a process for the compensation consultant to approve or dispute what the company is disclosing in its proxy statement regarding the nature of the consulting relationship and the advice given. If the industry were to migrate toward an "audit standard," there could be an annual process for compensation consultants to review "exceptions" with the compensation committee and the company would need to make changes or be faced with a qualified opinion letter that would be included in the proxy statement.

Even without mandatory public disclosure of the compensation consultant's professional fees, it is quickly becoming "best practice" for the compensation committee to review the professional fees at the end of the year, evaluate the compensation consultant's contributions and provide direct feedback to the compensation consultant regarding any areas

of concern, including independence. This year-end review should be coupled with a meeting between the compensation consultant and the chairperson of the compensation committee at the beginning of each year to establish the work plan and key objectives for the year. This process would also help the compensation committee understand the budgetary constraints related to the use of outside advisors and prioritize their requests for compensation consulting services.

[3] Pitfalls in the Consultative Process

Notwithstanding the growing complexity of disclosure, changes in accounting for compensation and an ever-changing external landscape, much of good governance in executive compensation is rooted in good common sense. Unfortunately, sometimes things go wrong in the consultative process despite of the best intentions of all parties, even for the most experienced and talented compensation professionals. The rest of this chapter highlights potential pitfalls in the consultative process from three perspectives:

What issues do compensation consultants identify at the compensation committee level?

What specific practices are "warning signs" that there may be a problem developing?

What reasons do compensation committees and companies give when they decide to replace their compensation consultants?

[a] Issues at the Compensation Committee Level

As more and more public companies find it necessary to engage a compensation consultant, not all compensation committees understand the roles and responsibilities that consultants should be expected to accept. Although the compensation consultant is now typically interviewed by and selected by the compensation committee, the selection process is also a time when the consultant will conduct some basic due diligence before accepting the engagement. As the engagement proceeds, the compensation consultant may find that there are additional risk factors that may undermine the success of the consulting relationship. While most compensation committees work well, some warning signs at the compensation committee level that compensation consultants watch out for before accepting an engagement include the following:

The Passive Committee:

- The balance between management and the compensation committee appears heavily skewed toward management and management acts as a "gatekeeper" to the committee (less common post-Enron environment).
- The top executives are well paid and aggressive about demanding ever more pay while the compensation committee seeks to avoid conflict by conceding to management demands. In this case, the compensation committee may be hiring the consultant to play the "bad cop."

The Dysfunctional Committee:

- The committee chairperson is either too strong or too weak. Alternatively, another committee member may dominate the deliberations.
- The committee chairperson and the CEO have either too strong a personal relationship or too little shared vision and mutual trust. More than one compensation consultant has lived to tell the story of a meeting that dissolved into a shouting match between the compensation committee and management. The compensation consultant can be put into an awkward position or get sidelined by the politics. It

helps to know up front if the compensation consultant's role will be facilitator, arbitrator or referee.

- The compensation committee is "hands on" to the point of micromanagement.
- The compensation committee is so "hands off" that it even complex matters are only reviewed and determined on the basis of a one-page summary (a problem that can also occur when the committee members have too little time and/or short attention spans).
- The compensation committee adopts a "disclosure mentality" and becomes less willing to consider creative solutions that may serve the company's business needs, seeking instead program designs that most resemble those of the greatest number of peer companies. A review of "best practices" and market median pay levels should be included as part of the context for compensation decisions, but companies should avoid the growing tendency to "huddle at the median."

The Committee in Need of Insurance:

- Compensation consultants are sometimes engaged to provide a "reasonableness" opinion on specific compensation arrangements, especially as part of "expert witness" testimony in a lawsuit. These opinions are generally not sought unless the compensation levels or practices are above market (a circumstance that does not automatically mean that they are inappropriate). In this situation, the compensation consultant is clearly being retained to provide an insurance policy.

- Under more normal circumstances, compensation committees are also looking to the compensation consultant to provide a degree of comfort that the decisions they have made are appropriate. However, the compensation committee may rely too heavily on the compensation consultant. The compensation consultant is generally not in a position to evaluate an individual executive's performance and may not participate in the business planning process to the same degree as the board of directors. The compensation committee should understand that they have the ultimate responsibility for making compensation decisions. Regardless, compensation consultants are increasingly at risk for loss of reputation and even monetary penalties⁸ for "poor" compensation actions. In this regard, it has become common practice for compensation consultants to request some degree of indemnification from their clients as part of the engagement letter. In particular, the compensation consultant is at risk when its advice is contravened and it may need to document the inconsistencies between the course of action the company chooses to take and the recommendations it has made, or even resign the client engagement at the extreme.

The Neophyte Committee:

- Sometimes, a compensation committee's inexperience can become an issue in the relationship with the compensation consultant. Although the same issues may arise with experienced compensation committees, some practical day-to-day examples include:

- The compensation committee sends out a "blanket" request for proposals and interviews a multitude of consulting firms (sometimes as many as six or seven). This can be a significant waste of time and it suggests that the committee and management (a) do not know the kind of consulting relationship they want and (b) do not understand the industry.

- The compensation committee (or the company) has undervalued executive compensation expertise, with the result that the committee members and the internal human resources staff are inexperienced in these matters. The compensation consultant

will usually spend additional time on education, which may also increase the cost of the annual consulting relationship. Alternatively, the compensation committee may retain a low-cost, small compensation consulting firm for a "bare bones" assignment, which may be appropriate, as long as the potential tradeoffs compared with a "brand name" firm are understood.

- The compensation committee asks for "out-of-scope" work to be completed in a short time frame without recognizing that there will be additional costs associated with such work. The compensation consultant also has a responsibility to highlight "extra" fees.

- The compensation committee assumes that the compensation consultant will be available for all its meetings. The senior-most executive compensation consultants have become much more in demand and it is increasingly necessary to develop the committee's meeting schedule with the consultant up to a year in advance.

While the compensation consulting relationship is usually conducted with a high level of professionalism, compensation committees that suffer from one or more of these issues should understand that "it's a small world" and many senior consultants know each other.

[b] "Warning Signs"

The following list provides examples of specific compensation practices that can serve as "warning signs" to the compensation committee that there may be a problem developing. In each case, the compensation consultant should highlight the questionable practice for the compensation committee.

- The compensation peer group is considerably larger in size than or different in business mix from the company today--an "aspirational peer group." Since compensation values are typically correlated with company size, referencing a much larger peer group generally inflates the market compensation values. Frequent adjustments to the peer group may also signal a developing problem, especially when they are not related to acquisitions of existing peer companies or to changes in the company's size and business mix.
- The business plans call for significant growth, but each year the company falls short and the compensation committee is asked to consider "factors beyond management's control" and make discretionary awards. Alternatively, the compensation committee may be asked to revise the goals during the year on the basis of management's re-forecast. These may be warning signs of poor performance, an inadequate goal-setting process, miscalibration of threshold awards at levels that are inconsistent with the volatility of the performance metric, or other problems.
- The annual incentive plan has paid out at target consistently, but the long-term incentive plan has not (or vice versa). This may occur when short-term goals are adjusted to allow for significant capital investments, but the projected long-term results never materialize.
- Incentive plans based on financial targets consistently pay at or above target, but the company's stock price significantly under performs its peers. This may be a signal that the incentive plan measures are not those most closely aligned with the creation of shareholder value.
- Management proposes "special" retention awards on a regular basis. This may suggest a need to revisit the compensation program's balance between pay-for-performance and retention value.

- Similarly, when compensation programs are changed, the compensation committee may need to be wary of special awards that are needed to "make up" the difference in compensation resulting from the design changes, particularly if the "shortfall" is revisited year after year.
- Although multiple compensation survey sources are typically required to develop good marketplace consensus compensation values, the practice of hiring multiple consulting firms to answer the same data question could also indicate "data shopping"--looking for the highest set of market values.
- Frequent "compensation emergencies" that require special committee meetings (not related to unusual business circumstances like mergers and acquisitions) are generally indicative of poor planning. Similarly, the compensation committee should have ample time to review any significant changes in compensation program design or pay levels. The preference is to review proposed changes at one committee meeting and vote on the changes at the next meeting.

While this list is certainly not exhaustive, the compensation committee should expect the compensation consultant to highlight such issues, which can derail the consultative process. Depending on the relationships, it may be preferable for the compensation consultant to raise these issues in executive session, without management present. In general, it is preferable to have a short executive session at the end of each compensation committee meeting so that the compensation consultant is not put in the position of calling for a special executive session. Also, it helps if the committee chairperson is accessible to the compensation consultant in between committee meetings so that there are no surprises during meetings.

[c] Issues with the Compensation Consultant

When being considered for a new client engagement, the compensation consultant often asks the committee chairperson or management why the previous consultant is being replaced. Although few companies ever charge their former consultant with providing "bad" advice, the reasons that companies articulate can provide insights into pitfalls in the consultative process. However, it is often nothing more precise than "lack of chemistry." Here are some examples:

- It was time to get some new ideas.
- We need a more creative approach.
- The consultant recommended a new incentive plan, but it never paid out. The consultant had some great ideas, but they were not really practical for our business.
- The compensation committee selected the consultant, but the consultant and the CEO did not work well together.
- The consultant was perceived as being too close to management.
- The consultant has an independence conflict.
- The consultant was not able to guide the committee and never gave his opinion ("it depends" consulting).
- The consultant has a big personality and strong ideas that overshadowed the committee deliberations.
- The lead consultant was too busy and the project manager assigned to our case was not senior enough for our needs ("bait and switch").

- The lead consultant showed up only for committee meetings, but was otherwise difficult to reach.
- The consultant was expensive for the value we received.
- The consultant charged us for work that we did not request or authorize (in such cases, the consultant may have made a determination that the work was necessary but failed to communicate adequately with the company).
- The consultant was not strategic enough.
- The consultant made errors in data.
- Our business needs have become more sophisticated and we need a consultant who has a better handle on current trends, as well as the technical depth to support our streamlined human resources staff.
- We need a consultant who has more expertise in our industry.

Since there are at least two sides to every story, any compensation consultant who has ever been replaced could give a reason, as well. Compensation consultants often say, that if you have never been fired, you probably have not said "no" to management frequently enough. Compensation consultants may also "fire" a client, typically for non-payment, but consultants are increasingly aware of the risks of being associated with or "named" as the advisor to a company that is perceived to have excessive executive compensation. The authors of this chapter hope that, as the compensation consulting industry matures, compensation consultants and their clients will be able to improve the quality of the consultative process and avoid the many possible pitfalls discussed in this chapter.

FOOTNOTES:

(n1)Footnote 1. NYSE Listed Company Manual; 303A.00 Corporate Governance Standards; 303A.05 ("Additionally, if a compensation consultant is to assist in the evaluation of director, CEO or executive officer compensation, the compensation committee charter should give that committee sole authority to retain and terminate the consulting firm, including sole authority to approve the firm's fees and other retention terms.").

(n2)Footnote 2. *See, e.g.*, The Time Warner Inc.'s 2007 proxy statement, showing fees paid to Towers Perrin for executive compensation consulting services versus total fees paid to Towers Perrin for consulting and actuarial services for retirement plans, consulting services on health and welfare programs provided to employees, and consulting advice on human resources systems and organizations. Some filings (*e.g.*, Conoco Phillips 2007 proxy statement) specifically noted that the companies' compensation consultants were independent and that the committees had adopted specific guidelines for the independence of compensation consultants retained to advise the committee. In addition, some companies disclosed that they have replaced their compensation consultant to ensure independence.

(n3)Footnote 3. *See* "Subpoena for Advisors on Salaries," New York Times (June 30, 2007).

(n4)Footnote 4. Executive Pay: Conflicts of Interest Among Compensation Consultants; Prepared for Chairman Henry A. Waxman by the United States House of Representatives Committee on Oversight and Government Reform Majority Staff (December 2007).

(n5)Footnote 5. For example, even if the compensation consultant provides only services to the compensation committee, the consultant's independence could be called into question if the consulting firm were to provide committee advisory services to two companies A and B, where the chairperson of the compensation committee at Company A is the chief executive officer at Company B.

(n6)Footnote 6. At the date of this writing, RMG does not have a policy regarding the independence of the compensation consultant, but this issue may well be considered by its policy group in the future.

(n7)Footnote 7. This type of fee arrangement may be negotiated in the atypical circumstance that a client company requires the compensation consultant to refrain from providing services to any industry competitors (similar to the retained executive search industry).

(n8)Footnote 8. Take, for example, the case of *The People of the State of New York against Richard A. Grasso, Kenneth G. Langone and The New York Stock Exchange Inc.*, in which Attorney General Elliot Spitzer charged that Grasso and Langone, former NYSE director and board compensation committee chair, violated their responsibilities to run the exchange in the best interests of its constituents, with respect to Grasso's compensation. As part of this lawsuit, it was alleged that Mercer, who had been the compensation consultant at the time Grasso's \$187 million compensation package was approved, provided inaccurate advice regarding the value of Grasso's SERP. As a result of these accusations, Mercer agreed to a settlement whereby it refunded \$440,275 in fees charged to the NYSE during the first eight months of 2003.

BUSINESS ROUNDTABLE AN ASSOCIATION OF CHIEF EXECUTIVE OFFICERS COMMITTED TO IMPROVING PUBLIC POLICY

PRINCIPLES OF EXECUTIVE COMPENSATION

1. Executive compensation should be closely aligned with the long-term interests of stockholders and with corporate goals and strategies. It should include significant performance-based criteria related to long-term stockholder value and should reflect upside potential and downside risk.
2. Compensation of the CEO and other top executives should be determined by a compensation committee composed entirely of independent directors, either as a committee or together with the other independent directors based on the committee's recommendations.
3. The compensation committee should understand all aspects of the compensation package and should review the maximum pay-out under that package, including all benefits. The compensation committee should understand the maximum pay-out under multiple scenarios, including retirement, termination with or without cause, and severance in connection with business combinations or sale of the business.
4. Compensation committees should require executives to build and maintain significant continuing equity investment in the corporation.
5. The compensation committee should have independent, experienced expertise available to provide advice on new executive compensation packages or significant changes in existing packages.
6. Corporations should provide complete, accurate, understandable, and timely disclosure to stockholders concerning all significant elements of executive compensation and executive compensation practices.

EXECUTIVE COMPENSATION: COMMENTARY

FOREWORD AND INTRODUCTION

The Business Roundtable is recognized as an authoritative voice on matters affecting American business corporations and, as such, has a keen interest in improving corporate governance practices. The Roundtable is an association of chief executive officers of leading corporations with a combined workforce of more than 10 million employees in the United States and \$3.7 trillion in annual revenues. The chief executives are committed to advocating public policies that foster vigorous economic growth, a dynamic global economy, and a well-trained and productive U.S. workforce essential for future competitiveness.

Compensation plays a significant role in attracting, retaining and motivating management and employees at all levels. In March 1992, when the Business Roundtable released *Executive Compensation/Share Ownership*, we noted the intense interest in compensation paid to corporate executives. The stock market boom of the late 1990's and the corporate failures of the last few years have heightened the focus on executive compensation. There has been a growing concern among investors and the public, which we share, that performance has not always been commensurate with pay, and a perception that some executives have reaped substantial financial rewards in the face of declining stock prices and staggering losses to employees and stockholders.

Compensation should serve the objectives of a corporation's business. Accordingly, the structure and components of an appropriate executive compensation program will vary widely among corporations due to such factors as a corporation's size, industry, competitive challenges, and culture. Nevertheless, the executive compensation program of every publicly owned corporation should adhere to two fundamental characteristics:

- First, it should reflect the core principle of pay for performance. While this concept is not new, it means that a corporation's executive compensation program not only rewards success, but also incorporates a meaningful element of risk.
- Second, the executive compensation program of every publicly owned corporation should be established and overseen by a committee comprised solely of independent directors. Although this often will be a compensation committee, what is important is that key executive compensation issues be addressed effectively by the independent members of the board of directors. Thus, references to the compensation committee are not intended to preclude corporations from allocating responsibility for executive compensation matters to a different committee or to the independent directors as a group.

Building on these characteristics as a foundation, the Business Roundtable has developed six interrelated principles, which are discussed in more detail in the commentary that follows, to serve as best practices for the design, implementation, and oversight of executive compensation programs at publicly held corporations.

COMMENTARY ON PRINCIPLES

1. Executive compensation should be closely aligned with the long-term interests of stockholders and with corporate goals and strategies. It should include significant performance-based criteria related to long-term stockholder value and should reflect upside potential and downside risk.

■ Compensation is a primary tool for attracting and retaining the highly qualified individuals necessary for a corporation to succeed in a competitive world economy. The board of directors is responsible for adopting and overseeing the implementation of compensation policies that support the corporation's ability to compete successfully in the marketplace.

■ Executive compensation should directly link the interests of senior management, both individually and as a team, to the long-term interests of stockholders. Equity-based compensation can be effective in accomplishing this objective.

Establishing a meaningful link between senior management and stockholder interests requires careful consideration of the incentives created by different forms of compensation.

- Compensation committees and boards of directors should establish meaningful goals for performance-based compensation; payment should be tied to the achievement of those goals. A failure to meet performance goals should eliminate or reduce payments under the award, while additional compensation should be considered where goals are substantially exceeded.
- Once performance goals are established, corporations should adhere to them. A corporation should not adjust previously established targets, or reprice options, prior to the end of a performance measurement period, or the options' term, simply because it appears that results for that period or term may fall short of the goals.
- In setting performance goals, corporations should look beyond short-term market value changes. Compensation plans should further both near-term objectives and the long-term strategic plan. They should be consistent with the culture of the corporation and the overall goal of enhancing enduring stockholder value.
- In setting performance measures, consideration should be given to a variety of performance metrics, both qualitative and quantitative. These metrics should not be tied solely to the corporation's stock price. Examples of quantitative metrics that may be used include such items as revenue and profit growth, net income, cash flow and cash management, return on equity, economic value added, cost of capital, return on invested operating capital, margins, debt reduction, cost containment, and market share. Qualitative metrics include such items as leadership, succession planning, customer satisfaction, product quality, legal compliance, ethics and the promotion of a culture of integrity at all levels of the corporation, workforce diversity and turnover, employee development, and community relations. In addition, performance relative to peer groups, as well as absolute performance, may be an appropriate measure.
- Performance-based incentives should reflect both business and individual accomplishments. Incentives should be tied not only to the corporation's operating results, but also to senior management's ability to manage the corporation effectively and create long-term value for stockholders. In this regard, performance metrics should take account of external factors, such as the impact of economic and industry trends on the corporation's business.
- A meaningful portion of executive compensation should be performance-based, thereby incorporating a greater element of downside risk into compensation arrangements. This can be accomplished, for example, by linking the granting or vesting of equity compensation to the achievement of meaningful performance targets and including a meaningful vesting period. Performance-vested stock options, performance share units, or stock appreciation rights that are payable in the corporation's stock or cash if targets are met put equity-based compensation "at risk" and link pay to performance.
- Restricted stock can be an alternative or supplement to stock options and other equity-based compensation. Although restricted stock can be an effective retention device, it is more effective as a long-term incentive if it vests based on the achievement of specified performance targets.
- Performance-based incentives will often measure accomplishments over several years. For example, in a year when the corporation experiences declining financial results, the CEO may receive performance-based compensation keyed to a previously established multi-year target. Similarly, gains realized from option exercises and stock sales in a given year may be the result of options granted over many years and several years' appreciation in the underlying stock. Corporations should take steps to enhance investor understanding of the relationship between pay and performance by providing meaningful disclosure about this relationship.

2. Compensation of the CEO and other top executives should be determined by a compensation committee composed entirely of independent directors, either as a committee or together with the other independent directors based on the

committee's recommendations.

- Directors who sit on a compensation committee should be independent in both fact and appearance. Committee members should have, and be perceived to have, the ability to exercise independent judgment free from any relationship or influence that could appear to compromise their ability to approach compensation issues decisively and independently.

- In recommending directors to serve on the compensation committee, the corporate governance/nominating committee should consider the following:

- A diversity of professional backgrounds is important to the effective functioning of a compensation committee.

- Periodic rotation of compensation committee members and the committee chair can bring fresh perspectives to the committee.

- All committee members should have sufficient knowledge of executive compensation and related issues to perform their responsibilities effectively.

- The compensation committee should assist the board of directors in carrying out its responsibilities with respect to the corporation's compensation programs. The particular duties and responsibilities that the board delegates to the compensation committee will depend on the corporation and should be set forth in a written charter.

- At a minimum, the duties and responsibilities of the compensation committee should include overseeing the corporation's overall compensation structure, policies, and programs, identifying and assessing progress with respect to performance goals and objectives relevant to the compensation of the CEO and other members of senior management, and establishing or recommending to the board all compensation for the CEO. To the extent that senior executive compensation is determined at the board level, only independent directors should participate in the approval process.

3. The compensation committee should understand all aspects of the compensation package and should review the maximum pay-out under that package, including all benefits. The compensation committee should understand the maximum pay-out under multiple scenarios, including retirement, termination with or without cause, and severance in connection with business combinations or sale of the business.

- Prior to adopting or recommending an executive compensation package to the board, the compensation committee should fully understand all the benefits to the executive and the costs to the corporation of the compensation arrangement under various circumstances, including under a range of economic results and severance scenarios. The committee should know how the various elements of a compensation package, including benefits, deferred compensation arrangements, and supplemental retirement benefits, work together. Executive compensation packages should not be unduly complex.

- In structuring a compensation arrangement, consideration should be given to whether the amount and mix of compensation is reasonable, appropriate and fair in light of the roles, responsibilities and performance of the individual, the corporation's circumstances, and the need to attract and retain high quality senior executives.

- The committee should consider building into senior management compensation agreements the right to review and consider changes at appropriate time intervals. Where a compensation package is modified, the committee should assess and understand how the change will impact the overall arrangement.

- Particular attention should be paid to severance arrangements and to all benefits provided to senior management in connection with termination of employment. Corporations should not offer excessive severance packages that reward

executives who have not met performance goals and objectives during the term of their employment. Employment contracts, if any, should clearly articulate the consequences of termination and the circumstances in which an executive can be terminated for cause.

- Perquisites offered to executives in connection with retirement or termination of employment should be kept to a minimum, and the corporation should not bear the cost of personal expenses.

- Benefits to senior management should not be safeguarded to a greater extent than regular employee benefits.

4. Compensation committees should require executives to build and maintain significant continuing equity investment in the corporation.

- Stock ownership guidelines are increasingly being used by compensation committees to align executive compensation with the long-term interests of stockholders. The compensation committee should establish requirements that senior management, and members of the board of directors, acquire and hold a meaningful amount of the corporation's stock.

- Stock retention requirements can foster a long-term stake in the corporation among senior management. The compensation committee should consider whether to require that members of senior management hold a specified amount of the stock that they have earned through incentive-based awards for a period of time.

- To minimize questions about the propriety of particular stock trades, executives should be encouraged to consider adopting pre-arranged trading plans to the extent they determine to sell some portion of their stockholdings. Corporations may wish to make public disclosure about such trading plans when executives enter into them.

5. The compensation committee should have independent, experienced expertise available to provide advice on new executive compensation packages or significant changes in existing packages.

- The compensation committee should have the authority to retain compensation consultants, and counsel expert in compensation matters, to provide the committee with independent advice in performing its responsibilities. The committee should have the authority to select any such advisors and to approve the terms of their retention and their fees.

- The compensation committee should use information from a variety of sources in determining compensation levels. The committee should resist an over reliance on surveys and other statistical analyses in determining compensation levels. While such information can be used as a tool, company-specific factors should be given significant weight in determining executive compensation.

6. Corporations should provide complete, accurate, understandable, and timely disclosure to stockholders concerning all significant elements of executive compensation and executive compensation practices.

- Disclosure about executive compensation should be transparent and understandable to stockholders. Corporations should disclose the terms of senior executive employment arrangements each time they are entered into or materially changed. Disclosure about a corporation's executive compensation arrangements as a whole should address not only the form and amount of executive compensation (including projections of future benefits), but also the economic impact of the compensation (such as any dilution resulting from stock options) on the corporation and its stockholders, and the relationship of executive compensation packages to corporate goals and strategy.

- Corporations should use the compensation committee report included in the corporation's annual proxy statement to provide stockholders with meaningful and understandable disclosure about their executive compensation practices, the

factors that the compensation committee and the board consider in making compensation decisions, and the relationship between executive compensation and corporate performance. In fashioning this disclosure, compensation committees should furnish understandable information about the performance metrics the corporation employs.

2-15-B Corporate Governance: Law and Practice [15-B]

[15-B] NACD Annotated Glossary of Executive Compensation Terms *

This glossary defines and discusses commonly used executive compensation terms.

Accrued compensation expense. Expense that is incurred and charged, but not yet paid (reflected on the balance sheet).

Affiliated person. An individual in a position to influence corporate policies. Includes directors, officers, 10% or more owners and families, and close associates of these groups. Also known as a "control person."

Alternative minimum tax (AMT). Federal tax on taxable income, adjusted for tax preference items. Under the Tax Reform Act of 1986 (and still in effect), paper gains in certain incentive stock options (ISOs) must be included in a separate "alternative minimum" tax calculation in the year the ISO is exercised, and the individual exercising the option must pay the greater of "regular" or "alternative minimum" tax calculated.

Annual incentive. Usually a lump-sum payment (cash, stock, etc.) made in addition to base salary for a fiscal year, based on meeting a targeted performance objective.

Attestation. An affidavit or declaration of share ownership by which an optionee exercising a stock option by a "stock swap" can avoid surrendering the actual stock certificate for the shares used to exercise the option.

Beneficial owner. Under the federal securities laws, a beneficial owner of stock is any person or entity with sole or shared power to vote or dispose of the stock. This can also include a holder who enjoys the economic benefits of ownership although the shares may be held in another name. In completing the annual director's questionnaire, directors need to disclose their beneficial ownership in any entity, including a foundation or other 501c(3) entity or trust where the director shares voting power.

Beta. A quantitative measure of the volatility of a given stock, mutual fund, or portfolio, relative to the overall market. See *volatility*.

Blackout period. A period of time prior to the release of annual or quarterly financial information by a publicly held company during which the "insiders" are restricted relative to trading the company's stock.

Black-Scholes model. One of a series of models for stock option valuation, based on an original model developed by Fisher Black and Myron Scholes in the early 1970s. In general, these models determine an up-front theoretical value of a stock option based upon its term to maturity, strike price, stock price at grant, stock volatility, dividend yield, and a risk-free interest rate appropriate for the term of the option. The valuation models differ from each other in certain assumptions, e.g., whether dividends are paid and whether the option can be exercised before its expiration date.

Bonus. An award in stock or cash made over and above base salary and incentives. Typically these are awarded annually under an annual bonus plan. Bonuses are not the same as incentives. Sometimes the terms bonus and incentives are used interchangeably to describe extra pay, but they are different. An incentive award looks forward (if you do this, we will pay this) whereas a bonus looks backward (because you did this, we are paying you this). Neither incentives nor bonuses should be guaranteed independent of performance; each must be earned.

Book-value equity incentive plan. An incentive plan that awards actual or phantom stock (either restricted or unrestricted) on the basis of its book value rather than its market value. Book value of equity is calculated as the total shareholders' equity in the company divided by the number of shares outstanding.

"Burn" rate. Stock options granted in a given year divided by the total shares outstanding, net of cancellations.

Call options. The rights to buy the corresponding stock at a fixed price until the expiration date. See also *put options*.

Capital gain (loss). Profit (or loss) from the sale of a capital asset. Capital gains may be short-term (held twelve months or less) or long-term (held more than twelve months). Capital losses are used to offset capital gains to establish a net position for tax purposes.

Carried interest. Total shares in which the owner or optionee of stock has an interest or financial stake.

Cash flow. Total funds that corporations generate internally for investment and working capital. Cash flow is often calculated as operating profits (i.e., profits before interest, taxes, depreciation, and amortization).

Cashless exercise/same day sale. A transaction in which an employee exercises a stock option and simultaneously sells some or all of the shares, with a portion of the sale proceeds delivered to the company by the broker to pay the exercise price.

Change of control (COC) provision. A contractual agreement that specifies certain guarantees to the covered employee when ownership of the company changes; typically defined to include the acquisition of a controlling percentage of the company's voting stock.

Cliff vesting. See *vesting*.

Common stock. Units of corporate ownership. Common stockholders typically vote to select the board of directors. "Preferred stock" may have more favorable dividend and liquidation rights, although more limited voting rights than common stock.

Constructive receipt. Refers to when employee compensation is taxable. The recipient has control over and access to the funds.

Deferred compensation plan. A plan that gives an individual the right to defer receipt of a payment until some stated time in the future. During the deferral period, the deferred amount may be treated as company stock, with reinvested dividends, or as cash with an interest or other carried-investment credit.

Deferred stock plan. A plan in which each participant is promised a specified amount of shares, granted at no cost if the participant remains employed with the company for a specified period of time. The participant does not have voting rights and does not receive dividends on the shares until the deferred award is actually made. Typically, the dividends accumulate during the vesting period.

Defined-benefit pension plan. A pension plan that specifies the level of benefits (or the method of determining benefits), but not the amount of company contributions. Contributions are determined actuarially on the basis of the benefits expected to become payable. In the past decade, these plans have become a minority practice, replaced by *defined-contribution pension plans*.

Defined-contribution pension plan. A pension plan that specifies the amount of company contributions, but not the level of benefits. The size of the pension is determined by how much is in the account at the time the pension becomes payable. In the past decade, these plans have become a majority practice, replacing *defined-benefit pension plans*.

Dilution. A decrease in the equity value position of company stock due to the issuance of more shares; i.e., stock options.

Discounted stock option grants. Grants with exercise prices set below the fair market value of the stock on the date of grant.

Discretionary bonus. An informal incentive award not based on a performance-related formula or specific measurable criteria.

Dividend equivalents. Rights to receive the cash dividends paid with respect to a specified number of common shares. Dividend equivalents may be paid currently, deferred, or converted into additional stock units. Dividend equivalents frequently are granted in tandem with other awards, such as performance shares or even stock options.

Employee stock ownership plan (ESOP). An employee benefit program where the company contributes a portion of its stock to an employee trust, usually as a form of profit sharing. In a matching ESOP, the employee-participant matches a contribution made by the company. Variants of such plans include the stock bonus plan and the leveraged stock bonus plan.

Employee stock purchase plan (ESPP). A broad-based employee stock plan that permits payroll deductions to acquire stock, generally at a discount. Such plans are governed under the *Internal Revenue Code Section 423*.

Employment Retirement Income Security Act of 1974 (ERISA). The law that introduced complex restrictions on pension plans. The act covers eligibility for participation, reporting and disclosure requirements, and fiduciary standards for management of retirement funds.

ERISA excess plan. A type of pension plan for key management, specifically devised to restore benefits that were reduced by the enactment of ERISA. The company makes up the difference between what an executive accrues under the company pension plan and the amount he or she is allowed to receive under ERISA restrictions.

EVA. Economic value-added, a measure of a company's return on investment that exceeds what is predicted by the capital asset pricing model.

Evergreen contract. A contract that does not expire, will be renewed, or will continue indefinitely unless one of the parties gives notice to terminate it (generally on a prospective date). These provisions are commonly incorporated in executive employment contracts. Directors should be alert to such clauses because of their long-term implications.

Evergreen stock plan. An employee stock plan in which the number of shares in the plan is increased without the need for shareholder approval, usually every year in an amount equal to a percentage of shares outstanding. Directors should make sure that such plans are in accordance with new (2002) SEC rules requiring shareholder approval of all plans that include equity.

Excess plan. A nonqualified executive pension plan designed to replace amounts generated by the underlying formulas in the general employee pension plan but capped by Internal Revenue Code provisions. Sometimes called "ERISA excess plan." See also *supplementary executive retirement plan (SERP)* .

Exercise. To buy or purchase stock options.

Exercise period. The date or dates specific stock options are available for purchase.

Exercise price. The price at which an option may be exercised. Also known as "*strike price*."

Fair value. n* The amount at which an asset could be bought or sold in a current transaction between willing parties, that is, other than in a forced or liquidation sale. In terms of stock options, it usually means the stock price on the date of grant (in terms of a stock option grant made at fair market value). Quoted market prices in active markets are the best evidence of fair value and are to be used as the basis for measurement, if available. If quoted market prices are not available, the estimate of fair value is based on the best information available in the circumstances. The estimate of fair value considers prices for similar assets and the results of valuation techniques to the extent available in the circumstances. Examples of valuation techniques include the present value of estimated expected future cash flows using a discount rate commensurate with the risks involved, option-pricing models, matrix pricing, option-adjusted spread models, and fundamental analysis. The Financial Accounting Standards Board requires that companies report in a footnote the fair value of options. The most recent statement on this subject is Financial Accounting Statement 148, Accounting for Stock-Based Compensation-Transition and Disclosure (from December 2002)-an amendment of FASB Statement No. 123.

Financial Accounting Standards Board (FASB). An accounting authority designated by the U.S. Securities and Exchange Commission to establish standards of financial accounting and reporting by publicly held companies.

FAS 123. Financial Accounting Standard No. 123 (FAS 123). An accounting rule that requires companies to estimate the dollar value of their stock-based compensation and either disclose the value in a financial statement footnote or, at the company's option, recognize that value as compensation expense. This rule was updated with the issuance of FAS 148.

FAS 148. Financial Accounting Standard No. 148. An accounting rule that clarifies how to apply the requirements set forth in FAS 123.

Fixed award.* An award of stock-based employee compensation for which vesting is based solely on an employee's continuing to render service to the employer for a specified period of time, that is, an award that does not specify a performance condition for vesting. Contrasts with *performance-based award*.

Flexible benefits plan. A plan under which employees can choose among a number of elective benefits (within a certain dollar amount) after subscribing to the core package of health, disability, retirement, and death benefits. Commonly referred to as "cafeteria plan."

Form 3. The initial form filed with the SEC, the issuer, and the issuer's stock exchange pursuant to Section 16(a) of the Securities Exchange Act of 1934 by all directors, officers, and holders of 10% or more of any class of equity securities

of the issuer. Form 3 details the direct and indirect holdings of the issuer's stock as well as the number of options, warrants, rights, and convertible stock or bonds. Form 3 must be filed within 10 calendar days after a person becomes a Section 16 insider, whether or not the insider owns any shares.

Form 4. Periodic form filed with the SEC, the issuer, and the issuer's stock exchange when there has been a non-exempt change in an insider's ownership of company stock such as a purchase, sale, or option exercise. Form 4 must be filed by the insider within two business days after the date the transaction took place.

Form 5. Year-end form filed with the SEC, the issuer, and the issuer's stock exchange to report certain transactions exempt from Form 4 reporting and any changes not previously reported by the insider on Form 3 or Form 4. Form 5, if required, must be filed within 45 days after the end of the issuer's fiscal year.

Form 8-K. A report required to be filed with the SEC to publicly disclose certain material corporate events such as a change in control, a significant acquisition, a bankruptcy, or a change in the company ownership.

Form 10-K. An annual report required to be filed with the SEC within 90 days after the end of the fiscal year. The 10-K includes a description of the company's business and properties, the audited financial statements, and management's discussion and analysis of the financials. The 10-K must be signed by a majority of the board of directors.

Form 10-Q. A quarterly report required to be filed with the SEC within 45 days after the end of each of the first three fiscal quarters. Form 10-Q is less comprehensive than the Form 10-K annual report and does not require that financial statements be audited. It covers the specific quarter and the year to date.

Form S-1. A "Registration Statement" (primary registration form) under the Securities Act of 1933 that a company files with the SEC to register its stock for sale. Form S-1 is generally the form used by a private company that is "going public." This is the basic, full disclosure Registration Statement. It contains the "Prospectus," along with a number of exhibits and other information about the company. The SEC staff reviews the Form S-1 and provides comments that must be resolved with the staff before the public offering can go forward. Smaller companies can use SB-1 or SB-2 in lieu of the S-1.

Form S-3. A shorter form of Registration Statement than the Form S-1 that can be used by certain already-public companies to sell additional shares. It is also the form most often used to cover resales of "restricted securities" by selling stockholders. This form permits reliance on other forms filed. It is, consequently, the easiest form to file.

Form S-4. A form of Registration Statement used when a company is issuing its shares in connection with a merger or acquisition.

Form S-8. A very brief form of Registration Statement filed with the SEC to register shares to be issued under a stock plan. This form can be used for employee plans. Does not require filing of the Prospectus.

Founders' stock. A form of stock sometimes offered to employees of new companies such as startup companies.

Golden handcuffs. An executive pay package value that could be lost upon termination.

Golden parachute. A contract between a company and one of its executives, offering the executive certain payments or guarantees of future benefits in the event of takeover. Such arrangements vary widely as to amounts and triggers. The first trigger is a change of control or hostile takeover as defined in the particular contract; a common second trigger is the termination, demotion or constructive termination of the executive. Payments in excess of certain calculated amounts can be nondeductible to the company and result in excise taxes on the recipient, as set forth in *Section 280G of*

the Internal Revenue Code.

Grant. The award of stock or an option to buy stock.

Grant date. The date on which a stock option or other similar award is effected. Awards made under a plan that is subject to shareholder approval are not deemed to be granted until that approval is obtained, unless approval is essentially a formality.

Grant price. The price an optionee must pay to exercise a market-based stock option.

Incentive stock options (ISOs). Options offered in grants that meet the requirements established by *Section 422 of the Internal Revenue Code*. For such option grants to qualify as ISOs, the optionee must be an employee, the stock option plan must be approved by shareholders, the option term cannot exceed 10 years, and the option price must be equal to or greater than 100% of fair market value at grant date. Such grants are not taxed until the stock is sold, and are not deductible as compensation expense by the corporation. ISOs are also referred to as "qualified stock options."

Indexed option plan. An option plan in which the exercise price of an at-market grant adjusts upward or downward for each period, typically a quarter, based on an external measure such as the average performance of an industry peer group. Under these plans, participants are rewarded only for above-average stock price performance.

Insider. An officer, director, or principal shareholder of a publicly owned company and members of his or her immediate family, or anyone else who possesses information that is not publicly known about the company, but which is important in valuing its stock. The most commonly recognized definition of insider in the U.S. is found in Rule 16b of the Securities and Exchange Act of 1934 (restricting the purchase and sale of stock by insiders).

Insider trading. Trading in a company's securities by company insiders or others with access to non-public information about the company. Also refers to stock tips given by or received from insiders. Insider trading is illegal under certain conditions.

Installment exercise. A stock option that can be exercised at certain times and within certain limits during its term.

Intrinsic value. n* The amount by which the market price of the underlying stock exceeds the exercise price of an option. For example, an option with an exercise price of \$20 on a stock whose current market price is \$25, has an intrinsic value of \$5.

Irrevocable trust. Money held for employees that cannot be recalled by the company. One common type of irrevocable trust is called the "rabbi trust."

Long-term incentive (LTI) plan. A program providing for a payout of incentive awards based on a performance period of more than one year. Long-term incentive plans include but are not limited to stock options, stock appreciation rights, phantom stock, performance unit/share/cash plans, and restricted stock.

Measurement date.* The date at which the stock price that enters into measurement of the fair value of an award of employee stock-based compensation is fixed. It is the first date on which both the number of shares and the option or purchase price are known.

Median. The central point at which half of the data falls above and half falls below.

Mega-grants. Very large grants of stock options or restricted stock given to key executives. The purposes and conditions of these grants vary. For example, stock options may be granted at an above-market strike price, or a grant

may offset low base salary in a company with limited present ability to pay high salaries but substantial potential for improved performance and consequently higher stock price.

Milestone awards. The use of rewards for significant achievements as they occur rather than on a predetermined schedule. Rewards are given immediately after achievements and are random in that their distribution is not predictable in advance.

Named executive officers (NEOs). The five highest paid executive officers, whose prior fiscal year compensation is reflected in the summary compensation table in a public company's annual proxy statement, pursuant to SEC disclosure requirements.

Nonqualified stock options (NQSOs). Stock option grants that do not qualify for tax-favored status. The option exercise price of such awards can be set above or below 100% of fair market value at grant date and the term of such awards can be variable. Such grants are taxable to the recipient in the year the options are exercised. The option spread is deductible by companies for tax purposes, allowing the company to take the tax deduction at the time the recipient receives the option income. These options are also called "nonstatutory stock options."

Non-qualified deferred compensation plan (NQDCP). Used to postpone tax on earned income. The company's tax deduction is also postponed.

Omnibus plan. A long-term incentive plan that provides the flexibility to use a number of incentive techniques, such as stock options, stock appreciation rights, performance shares and/or units, and restricted stock.

Options. Opportunities to buy or sell under stated conditions. In executive compensation, the term options refers to stock options. Call options are opportunities to buy stock, while put options are opportunities to sell it. The following are types of stock options:

- **Accelerated ownership options (also called "incremental ownership," "reload options," and "restoration" options).** A compensation scheme in which a new option is granted for each exercise of a plan participant's stock options.
- **Exercise-hold option.** Restricted stock that is granted in proportion to shares covered or acquired by option exercise, with the lapse of restrictions contingent on retention of the shares acquired by the option exercise.
- **Restricted stock option.** An option that cannot be exercised until the end (or a period near the end) of a stated term.

Option spread. The amount by which the value of an option grant, at the time of exercise, exceeds its value at the time it was awarded; determined by multiplying the number of shares exercised by the amount by which the market price per share on the date of exercise exceeds the option's strike price per share.

Out-of-the-money. The current market price is below the stock option exercise price. When an option is out-of-the-money, it would cost more than the underlying stock is worth to exercise the option. Such options are also described as being "underwater."

Percentile. A segment of data equaling a particular percent of results. If percentiles are organized by *quartiles*, the lowest percentile shows the lowest 25%, the highest shows the highest 25%.

Performance-accelerated restricted stock award plan (PARSAP). A restricted stock award that vests eventually in

any event based on continued employment, but vesting can occur on an accelerated basis, if preset and stated objectives or performance levels are reached.

Performance-based award. n* An award based on performance, typically stock-based employee compensation for which vesting depends on both (a) an employee's rendering service to the employer for a specified period of time and (b) the achievement of a specified performance target, for example, attaining a specified growth rate in return on assets or a specified percentage increase in market share for a specified product. A performance condition might pertain either to the performance of the enterprise as a whole or to some part of the enterprise, such as a division.

Performance share plan. A long-term incentive plan offering awards contingent upon the achievement of specified performance goals and changes in the company stock price, usually over a multi-year time period. Performance (however defined) usually determines the number of units earned; the company's ending stock price usually determines each unit's value at payout. Awards are typically settled in stock, but are sometimes payable in cash. The amount of award typically varies with performance.

Performance unit plan. A long-term incentive plan offering awards contingent upon the achievement of specified performance goals, usually over a multi-year time period. Awards are usually settled in cash, but are sometimes payable in stock. The amount of award typically varies with performance.

Perquisites. Entitlements given to selected employees, including club memberships, automobile leases, financial planning/consulting, airline club memberships, and use of company planes and automobiles. Perquisites, nicknamed "perks," can be cost-effective motivators, but they can create morale problems if they are awarded only to senior executives, especially if they are lavish. Perks are rarely if ever based on performance standards or taken away once awarded.

Phantom stock. Shares, analogous to company stock, often used by private companies or divisions of publicly traded companies. The value of phantom shares may be determined by a formula, market price, or valuation.

Premium-priced options. Options with an exercise price above the market price at the time of grant.

Put options. The right to sell the corresponding stock at a fixed price until the expiration date. See also *call options*.

Qualified stock options. See *incentive stock options*.

Quartile. A common statistical technique for displaying competitive pay data. Shows range of pay data for the 25th, 50th, and 75th percentiles, as well as the average.

Rabbi trust. A non-qualified fund for holding deferred compensation tax-free until either the company gives up the right to recall the money, the beneficiary collects, or the funds are made available to the general creditors of the company in the event of bankruptcy. Many companies have "grandfathered" certain senior executives in these types of plans, so it is important for new directors and executives not party to these arrangements to understand the meaning and implications of such instruments. See also *irrevocable trust*.

Regression. A statistical approach used to plot relations between or among data, either in a single set of factors (simple regression) or in many sets of factors (multiple regression).

Reloading options. A compensation scheme in which a new option is granted for each exercise of a plan participant's stock options. These types of awards assure that early exercise of options does not result in the termination of the total amount of options granted, since each exercised option is replaced with a new option. This form of compensation in effect eliminates the risk that the participant will not have captured the highest stock price. Every time an option is

exercised, another option replaces the exercised option, enabling the plan participant to continue to realize all the upside potential inherent in the original option grant. Reload options are also called "accelerated ownership," "incremental ownership," and "restoration" options.

Repricing options. The practice of calling in outstanding stock options that are "underwater" and reissuing a comparable or lesser number of stock options at the then-prevailing market price.

Restricted stock. A grant of stock that carries certain restrictions affecting transferability. The restrictions usually lapse over a period of three to five years, during which time the recipient cannot sell his or her shares. The recipient typically is entitled to vote the stock and receive dividends on the shares.

Return on equity. The ratio of a company's financial return to the book value of total shareholders equity. Also called "return on shareholders' equity."

Revocable trust. Money, held for a beneficiary, that a company retains the right to recall. See also *irrevocable trust*.

Rule 10b-5. An SEC rule that prohibits trading by company insiders on non-public, material information. This is also the rule under which a corporation may be sued by shareholders for false or misleading disclosure.

Section 16(a). Provision of the Securities Exchange Act of 1934 that requires company insiders to file periodic reports disclosing their holdings and changes in beneficial ownership of the company's equity securities.

Section 16b-3 Rule. A section of the Securities Exchange Act of 1934 dealing with stock transactions by corporate officers and directors ("insiders") and establishing criteria for the exemption of insider stock transactions from being considered sales/purchases for purposes of the short-swing profit recovery provision.

Section 83(b) election. A personal tax filing within thirty days of a stock grant that allows executives granted restricted stock to pay taxes on the grant date instead of on the date restrictions lapse. If an executive files the election, taxes are based on the fair market value on the grant date, with any future appreciation taxed more favorably as a capital gain. If the executive does not file an election, taxes are based on the fair market value on the date the restrictions lapse, which will be higher.

Section 162(m). The section of the Internal Revenue Code establishing tax regulations related to the \$1 million cap on deductible business expense for "non-performance-based" compensation to a publicly held corporation's named executive officers.

Section 423. The Internal Revenue Code section that regulates broad-based, all-employee stock purchase plans.

Secular trust. A fund for holding deferred compensation. Differs from a rabbi trust in that contributions are taxable to the recipient as they accumulate. Beneficiary collects when he or she retires. The assets contained within the trust are not subject to the claims of the company's general creditors in bankruptcy.

Supplementary executive retirement plan (SERP). A non-qualified method of raising pension benefits for a person who does not spend his or her entire career with a single company, either by giving credit for extra years' service or guaranteeing a specified level of pension benefits after a minimum period of service.

Short-swing trading. Trading a security within a short period of time. Section 16(b) of the securities Exchange Act of 1934 prohibits insiders from profiting by buying and selling company stock within six months or less.

Short-term incentive plan. An incentive plan under which payments are made for performance periods of one year or

less.

Spread. The difference between one value and another, as in the spread between the stock's market price and exercise price of an option. Stock options commonly are referred to as "underwater" or "in the money" depending upon the relationship between the strike price and the current market price.

Stock appreciation right (SAR). A long-term incentive technique usually used in tandem with stock options. Payouts are made in cash. SARs allow company officers to collect on the gain in option grants without regard to the six-month restriction period that normally applies under Section 16(b) of the Securities Exchange Act of 1934.

Stock options. Financial instruments, currently offered at most public companies, that give holders the right to purchase stock at a fixed price for a specified period of time. The spread, or difference between the exercise price and the market price, constitutes the reward to the option holder. Option holders usually receive no company dividends, only the difference between the exercise price and the market price. Some companies, however, adjust the exercise price for dividends or accrue dividends until the option is exercised. See also *nonqualified stock options* and *incentive stock options*.

Stock swap. Also known as a "stock-for-stock" exercise. A paper transaction form of cashless exercise transaction in which shares of company stock already owned are delivered, either physically or by "attestation," in lieu of cash to pay for the exercise of stock options.

Strike price. The price at which a stock option may be exercised. Also known as "*exercise price*."

Supplementary executive retirement plan (SERP). A nonqualified method of providing pension benefits to executives. Purposes may include the provision of one or more of the following: pension coverage of bonus amounts where the qualified plan considers only base salary, restoration of amounts which would have been payable under the qualified plan formulas except for the presence of caps (see also *excess plan*), attractive pension opportunities to an executive joining the company late in his/her career, minimum executive pensions to facilitate early retirements of executives when that is considered desirable, and/or "top hat" pension benefits due to a richer formula than that under the qualified plan.

Tandem stock appreciation rights. Rights that allow the award holder to receive a cash payment equal to the spread on a tandem stock option, in lieu of exercising the stock option. The exercise of the tandem SAR cancels the stock option.

Threshold. The part of an incentive plan formula that defines the level of performance required before payouts can occur.

Transferable stock options. Options that provide by their terms that they may be transferred by the optionee, generally only to a family member or to a trust, limited partnership, or other entity for the benefit of family members, or to a charity.

Underwater. See *spread*.

Vesting. The time when a participant's right to accrued benefits or awards (or some portion of them) becomes nonforfeitable or, in the case of stock options or stock appreciation rights, when options or rights become exercisable. Cliff vesting is the one-time accrual of all benefits once a specified amount of time has elapsed.

Volatility. A factor used in stock pricing models. Volatility measures or predicts the dispersion of stock prices over a period of time. In the Black-Scholes models, a higher volatility leads to a higher stock option value. Volatility as used in

pricing individual options considers total risk as well as systemic beta. See also *beta* and *Black-Scholes model*.

CHAPTER 16 EXECUTIVE COMPENSATION: LEGAL AND REGULATORY CONSIDERATIONS; "BEST PRACTICES" GUIDELINES

2-16 Corporate Governance: Law and Practice § 16.01

AUTHOR: Bart Schwartz Amy Goodman Sean Feller

§ 16.01 Evolution of Law on Executive Compensation

In its earliest stage of development, the law of executive compensation as a corporate governance issue was entirely judge-made. Some of the older cases recognized a cause of action for excessive compensation (which might be thought of, and survives, as a species of a claim for corporate waste but which, during an earlier era, seemed to take on a life of its own as a legal theory). In the last part of the twentieth century, however, the business judgment rule reigned supreme in connection with challenges to executive compensation as in other areas; courts routinely rejected "excess compensation" claims when disinterested board majorities had approved the challenged payments on adequate information and after due deliberation. More recently, in the post-Enron era, some courts, while not tampering with the fundamental elements of the business judgment rule, have given increased scrutiny to executive compensation decisions. In all events, interested-director transactions remain subject to attack as a waste of corporate assets, in some cases even where there has been shareholder ratification.

In addition, at various times, concerns over excessive executive compensation were addressed through SEC disclosure rules, tax legislation and rules, and self-regulatory organization ("SRO") rules and listing requirements.ⁿ¹ Under the current state of the law, therefore, board counselors must consider case law on executive compensation, tax rules, SEC disclosure requirements, and SRO corporate governance listing requirements. Except for the SEC disclosure requirements (which are beyond the scope of this treatise²), these are discussed, in turn, below. In addition, increasingly vocal shareholder activists and other corporate watchdogs have, in some cases, adopted executive compensation guidelines and, with increasing frequency, have made shareholder proposals on issues of executive compensation. Boards and board compensation committees need to take these trends and considerations into account, as well, in making decisions on executive compensation.

As of the date of this writing, concerns over excess executive compensation have reached a new level. Substantive legal restrictions concerning executive compensation--as opposed to disclosure requirements and tax rules on deductibility of such compensation--for the most part are a creature of state law, but recently there have been efforts to reign in excessive executive compensation through other means, including federal legislation.ⁿ³

[1] Older Cases on Reasonableness of Executive Compensation

Some older cases recognized a cause of action for "excessive compensation" or similarly styled claims under state corporate law. In some of these cases, the court simply substituted its own judgment for that of the board of directors or even stockholders in deciding that challenged compensation was "excessive" or disproportionate to the value conferred on the corporation.

For example, in *Winkelman v. General Motors Corp.*,ⁿ⁴ the plaintiffs alleged that "the defendants, beginning in 1918 and continuing to date, have been participants in a fraudulent scheme or conspiracy to loot General Motors Corporation of its assets through the payment of illegal bonuses and extra compensation."ⁿ⁵ Disinterested directors (who never received any bonuses or "extra compensation" under the plans in question, but who had approved the challenged payments) moved for summary judgment.ⁿ⁶

Despite the fact that the moving directors were independent (and were not recipients of the challenged bonus awards), and giving nodding recognition to the business judgment rule, the court nonetheless held that whether the awards the defendants had approved were reasonable and proportional to the value of the services that the recipients provided to the corporation could not be determined as a matter of law:

The main cause of complaint, for which there is some basis, is that the bonuses allotted to certain of the executives, who were also members of the Board of Directors, when added to their salaries as such executives, resulted in excessive compensation in certain years. The record contains nothing specific as to the extent and nature of their services, but it may be assumed that the duties incident to the important offices they held were such as required all the time of men of great ability.

The directors undoubtedly possessed a certain discretion in apportioning the bonus among the executives. The establishment of the various bonus plans, with the approval of the stockholders, assumed that the officers and directors charged with the duty of administering the plans would exercise a proper discretion The Finance Committee of the Board of Directors, of which the three moving defendants were at times members, considered and reported on such bonus allotments as were recommended for executives who were also members of the Board of Directors

The three moving defendants stress the fact that they did not themselves receive any part of the bonus in any year. There is no presumption of actual or constructive fraud that arises solely from the amount of compensation paid to an officer of a corporation. However, the compensation may be so large under the circumstances involved in a particular case as to constitute spoliation or waste of corporate property, in which instance an investigation in equity is warranted However, if the bonus these directors approved for any executive was so large as to constitute a waste of the corporate assets it seems to me that they are civilly liable, in a representative action by a stockholder, to the extent that the bonus was a waste--in fact a gift of corporate assets. As Judge Swan wrote in the *Rogers v. Hill* case, when it was before the Circuit Court of Appeals for this Second Circuit (*60 F.2d 109, 113*): 'If a bonus payment has no relation to the value of services for which it is given, it is in reality a gift in part, and the majority stockholders have no power to give away corporate property against the protest of the minority'. The same would seem to apply to directors, a fortiori.

I have not overlooked the rule that the exercise of business judgment by directors will not be disturbed by the courts in matters of internal management 'except where the directors are guilty of misconduct equivalent to a breach of trust, or where they stand in a dual relation which prevents an unprejudiced exercise of judgment' But if after an examination of all the facts at a trial it is shown 'that there were breaches of duty and the compensation voted in such breaches bore no relation to the services rendered,' the directors responsible for voting the compensation may be held personally liable.

... .

Although I believe in liberal compensation for the heads of large industries, I have just as firm an opinion that in bonuses and extra compensation a limit can be reached and the courts must stand ready to inquire, in the interest of the corporation, if its own executives cannot see when their bonuses have passed beyond reasonable limits.ⁿ⁷

Similarly, in *Holthusen v. Edward G. Budd Manufacturing Co.*,ⁿ⁸ a stockholder brought suit to enjoin the defendant corporation from granting stock options to executive officers and other employees. The grant was to be made pursuant to a provision of the company's by-laws, which had been adopted by a vote of the shareholders at a special meeting, authorizing the company to grant five-year options to executive officers and administrative employees, as determined by the board of directors, to purchase not more than 300,000 shares of the company's common stock at a price equal to 125 percent of the market price of the shares on the date of the grant (that is, the by-law provision authorized the board to grant only "out-of-the-money" options).ⁿ⁹

The plaintiff argued that the by-law was "illegal" and, after unsuccessfully moving for an injunction prohibiting the shareholders from voting on it, and after the shareholders adopted it by a vote of 67 percent of the outstanding shares, the plaintiff moved for an injunction to prevent the board from granting to 160 specified officers and employees options to purchase the 300,000 authorized shares. The court described the key issue as "whether the granting of these options is not a gift of the assets of the corporation or is not so out of proportion to the value of any considerations received therefore as to amount to waste of corporate property."ⁿ¹⁰

The court acknowledged the defendant's position "that the granting of the options acts as an incentive to the optionee to continue in defendant's employ, and intensifies his interest and zeal in its success" ⁿ¹¹ While recognizing that "the board of directors of the corporation should have wide discretion in determining the amount of bonuses to be granted to its employees and the terms and condition upon which they may be granted," the court nevertheless went on to state that "the amount of a bonus and the terms and conditions on which it is to be computed must have some reasonable relation to the services to be rendered" and concluded that, "[i]n the instant case, the bonuses granted have little or no relation to the services to be rendered."ⁿ¹²

The court pointed out that the recipients of the grants "undertake no obligation to continue in defendant's employ for any specified period of time ... [and that] the option, or the extent to which it may be exercised, is in no way dependent upon the actual length of future employment of the optionee." Presaging a more modern criticism of unindexed stock options, the court observed that "[i]t is the action of the stock market rather than the extent of the services rendered to the defendant which is the factor which will control the exercise of the option."ⁿ¹³ The court further stated that "[t]he argument that the services of the optionees will tend to increase the earnings of the company, and in turn the market value of the stock, ignores the numerous and extraneous factors which experience has shown motivate fluctuation of prices on the stock market" ⁿ¹⁴ The court concluded:

The grant of these options, therefore, without consideration other than the hope of retaining the donees in the employ of the defendant, is squarely within the language of Judge Swan quoted with approval by the Supreme Court in *Rogers v. Hill* ⁿ¹⁵...: 'If a bonus payment has no relation to the value of services for which it is given, it is in reality a gift in part, and the majority shareholders have no power to give away corporate property against the wishes of the minority.'ⁿ¹⁶

The court therefore permanently enjoined the granting of the options in question. Measured against the standards of the modern business judgment rule (under which courts decline to second-guess decisions made by disinterested directors upon adequate information and after due deliberation), the court's analysis in *Holthusen* (where the court simply substituted its own judgment for that of the company's board as to the value to the corporation of the challenged option grants) seems antiquated. By the late nineteen fifties, the precursor of the modern business judgment rule had already begun to feature in decisions on challenges to allegedly excessive compensation, with courts giving greater deference to executive-compensation-related decisions of disinterested directors and doing less second-guessing about the

"proportionality" or "reasonableness" of executive compensation.¹⁷

[2] Cases Involving Stock Option Grant Manipulation

In the early part of the new millennium, Erik Lie, an associate professor at the University of Iowa, conducted a large-scale study of stock option awards to CEOs. The data led him to conclude that it was highly improbable that the frequent extraordinary returns he observed from such option grants could be the result of chance alone, strongly suggesting that many CEO stock options had been backdated so that, in effect, they were in the money at the time of the actual grant¹⁸ (despite the misleading earlier, nominal date of the grant). In 2005, he published a paper on his study.¹⁹ Its publication created a scandal that received significant press attention and led to SEC investigations, financial statement restatements, criminal prosecutions, guilty pleas, SEC sanctions, and a wave of civil litigation.

Stock-option backdating is not illegal in itself, at least when option grants are made according to a plan that does not require options to be priced at or above the fair market value of the stock on the date of the grant. However, legal issues arise when companies conceal, fail to disclose, or misrepresent such practices. Such misrepresentations and omissions can take a variety of forms, including in connection with companies' taking advantage of accounting and tax treatments of stock options that are (or, at the time they were granted, were) legitimately available only for at-the-money or out-of-the-money options. In the wake of the Lie study and the publicity that it attracted, a raft of civil litigation over option-granting practices followed.

[a] Stock Option Claims Under the Federal Securities Laws

In *In re iBasis, Inc. Derivative Litigation*,²⁰ shareholders brought a derivative action against officers and directors in the name of a corporation that had allegedly manipulated stock option grants. The lawsuit followed an internal investigation that resulted in the company's public admission that "the appropriate measurement dates for determining the accounting treatment of certain stock option grants differ from the measurement dates used by the Company in preparing its financial statements" and a consequent restatement of previously published financial statements.²¹ The complaint alleged that options had been both backdated and "spring-loaded" (that is, issued when the company was in possession of material positive inside information). It asserted federal and state law claims for securities fraud, breach of fiduciary duties, and waste of corporate assets, among other counts. In addition, the complaint sought disgorgement of bonuses and profits under Section 304 of the Sarbanes-Oxley Act.²²

The district court dismissed the Sarbanes-Oxley claim, finding that there is no private right of action under Section 304.²³ The court dismissed the other federal claims on various grounds, including lack of causation and the expiration of the applicable limitations period, and, having done so, declined to exercise supplemental jurisdiction over the state law claims.

In *In re Openwave Systems Securities Litigation*,²⁴ the district court dismissed claims under the Securities Act of 1933 but declined to dismiss certain claims under the Securities Exchange Act of 1934 for omissions and misrepresentations in connection with defendant's backdating of stock options. Among other things, the court held that the plaintiff had adequately pleaded scienter in its claims against certain executive officers who had received backdated stock options and board compensation committee members who had granted stock options by unanimous written consent.²⁵ The court observed that the compensation committee had a duty to monitor the grant dates of options, under plans providing that options not have an exercise price less than the fair market value of the stock on the date of the grant. The compensation committee's alleged breach of that duty, the court reasoned, was sufficient to give rise to an inference of scienter, thus allowing the Exchange Act claims to survive a motion to dismiss.²⁶

In *Stoneridge Investment Partners LLC v. Scientific-Atlanta, Inc.*,²⁷ the U.S. Supreme Court held that liability under Section 10(b) of the Securities Exchange Act of 1934 requires specific false or misleading statements or omissions attributable to each defendant. Accordingly, allegations that certain directors participated in the options backdating

scheme were not sufficient in themselves to plead liability.

[b] Stock Option Claims Under State Law

[i] Backdating Cases

In *Ryan v. Gifford*,ⁿ²⁸ a shareholder of Maxim Integrated Products, Inc. brought a derivative action against compensation committee members and other directors, alleging that they had approved option grants that were backdated to dates preceding sharp increases in the company's share price, under a plan providing that options would be granted at an exercise price at least equal to the fair market value of the company's stock on the date of the grant. Chancellor Chandler rejected the defendants' argument that the derivative suit should be dismissed for lack of a proper demand on the board, concluding that the members of the compensation committee, and the other directors to which their conduct could be imputed, faced a substantial risk of liability (and, beyond that, of further civil and even criminal liability as a result of the facts that might come out in the litigation) and, therefore, that demand would be excused under Delaware law.ⁿ²⁹

Next, the chancellor rejected the defendants' argument that the complaint failed to state a claim upon which relief could be granted because it failed to rebut the presumption under the business judgment rule that the directors were disinterested and independent:

I am convinced that the intentional violation of a shareholder approved stock option plan, coupled with fraudulent disclosures regarding the directors' purported compliance with that plan, constitute conduct that is disloyal to the corporation and is therefore an act in bad faith. Plaintiffs allege the following conduct: Maxim's directors affirmatively represented to Maxim's shareholders that the exercise price of any option grant would be no less than 100% of the fair value of the shares, measured by the market price of the shares on the date the option is granted. Maxim shareholders, possessing an absolute right to rely on those assurances when determining whether to approve the plans, in fact relied upon those representations and approved the plans. Thereafter, Maxim's directors are alleged to have deliberately attempted to circumvent their duty to price the shares at no less than market value on the option grant dates by surreptitiously changing the dates on which the options were granted. To make matters worse, the directors allegedly failed to disclose this conduct to their shareholders, instead making false representations regarding the option dates in many of their public disclosures. I am unable to fathom a situation where the deliberate violation of a shareholder approved stock option plan and false disclosures, obviously intended to mislead shareholders into thinking that the directors complied honestly with the shareholder-approved option plan, is anything but an act of bad faith. It certainly cannot be said to amount to faithful and devoted conduct of a loyal fiduciary. Well-pleaded allegations of such conduct are sufficient, in my opinion, to rebut the business judgment rule and to survive a motion to dismiss.ⁿ³⁰

In contrast, in *Desimone v. Barrows*,ⁿ³¹ Vice Chancellor Strine dismissed backdating claims in a shareholder derivative suit for, among other reasons, failure to make a demand or to allege sufficient facts to excuse demand and, as to grants made to outside directors, for failure to state a claim upon which relief could be granted. The issuer, Sycamore Networks, Inc., had "essentially admitted" in public filings that options had been backdated, and "the options were represented to the public as having been issued at fair market value, when in fact they were issued at a price lower than the fair market value that prevailed as of the dates of the Grants. In other words, the backdating was hidden."ⁿ³²

Nevertheless, noting that the "stockholder-approved option plans contemplated delegation of the option-granting function to non-director executive officers, and the complaint itself alleges that much of Sycamore's backdating operation was carried out by a single executive officer and was actively concealed from the board and from Sycamore's auditors," as to grants made to non-officer employees, Vice Chancellor Strine found that the "complaint is devoid of any

factual allegations on the key issues of who approved the Employee Grants and whether any of the directors knew that options were being backdated." Regarding those grants, the court concluded that "[t]here is simply no basis to conclude that the Sycamore board faces a substantial threat of liability" so as to excuse the plaintiff's failure to make a demand.ⁿ³³

Regarding a second category of grants, made to executive officers, the complaint alleged backdating, spring-loading and "bullet dodging" (granting options made shortly after the release of material unfavorable information). While the vice chancellor noted that, as to the officer grants, the decisions about the amounts and the recipients of the awards were less likely to have been delegated to non-director executive officers, he found no allegations in the complaint supporting an inference that "the board or even the Compensation Committee was likely to have driven details like the precise date of issuance of the Grants."ⁿ³⁴ The court acknowledged that, in a case containing allegations "creating a rational inference that the directors knowingly approved backdated grants of options, realizing that the corporation would deceptively account for them to investors and regulatory authorities as having been made at fair market value on the date of issuance, demand would be excused, consistent with the *Ryan* decision." Nevertheless, because the plaintiff had acknowledged "that he cannot even allege in good faith that the two members of the Sycamore board who served on the Compensation Committee knowingly approved improperly-backdated options, much less that the other four directors did so," Vice Chancellor Strine found that the allegations of the complaint had "failed to demonstrate that a majority of the Sycamore board faces a sufficient threat of liability over the alleged backdating of the Officer Grants to excuse demand."ⁿ³⁵

Vice Chancellor Strine also pointed out that, in contrast with the facts in *Ryan*, the stockholder-approved plan under which the Officer and Employee Grants had been made did not require that grants be made at a price equal to or in excess of the fair market price on the date of the grant; rather, it explicitly permitted the issuance of in-the-money stock options.ⁿ³⁶

As to bullet-dodging, Vice Chancellor Strine opined that such allegations are unlikely ever to support a claim for relief, other than, in extreme circumstances, a claim for corporate waste (if approved by independent and disinterested directors) or self-dealing (if approved by interested or controlled directors):

I harbor serious doubt whether any claim, other than a claim for waste, can be lodged against an issuance of options, in conformity with the terms of a stockholder-approved option plan, at a fair market value reflecting negative information previously disclosed to the public markets. In that circumstance, the only viable question would seem to be whether the grant of options was somehow inequitable, in the sense that it involved the wasteful enrichment of a recipient at the corporation's expense (when the board or committee awarding the options was independent of the recipient) or unfair self-dealing (when the awarding board or committee was controlled by those receiving the options). Although stockholders might quibble with the decision whether to give large slugs of options to officers after a disappointing quarter, no deception on the stockholders, the market, or regulatory authorities is involved and the officers have the intended incentive to perform well in order to help the corporation's stock price improve from its level on the date of issuance, a level that reflects the negative information released.ⁿ³⁷

A third category of option grants was made to Sycamore outside directors. As to the claims relating to grants to interested directors, Vice Chancellor Strine noted that demand was excused and the pivotal issue was whether the complaint stated a claim upon which relief could be granted.ⁿ³⁸ Those grants had been made under a shareholder-approved plan setting the amounts and dates of option grants to directors over a multiyear period. Because the allegations of the complaint raised no inference of manipulation or impropriety, the vice chancellor dismissed the claims relating to the Outside Director Grants for failure to plead facts upon which relief could be granted.ⁿ³⁹

Vice Chancellor Strine's opinion in *Desimone v. Barrows* contains a series of expository dicta in which the vice chancellor expounds on his views of whether directors could be held liable under Delaware law for backdating and

spring-loading, with respect to a series of hypothetical situations. It is well worth reading for those who wish to delve deeper into the nuances of developing Delaware law in this area.

[ii] Spring-Loading Cases

In *In re Tyson Foods, Inc. Consolidated Shareholder Litigation (Tyson I)*,ⁿ⁴⁰ a companion case to *Ryan* decided four months earlier than *Desimone*,ⁿ⁴¹ Chancellor Chandler had also declined to dismiss claims against board compensation committee members relating to alleged option spring-loading (the granting of options when the corporation was in possession of material undisclosed positive information). The complaint alleged that, on several occasions, the compensation committee had awarded options shortly before the corporation issued press releases containing favorable information, foreseeably leading to increases in the price of the company's stock. In discussing the spring-loading claims, the court first noted the stringent test that a plaintiff must meet to overcome the business-judgment rule in asserting claims against directors who were not financially interested in the transaction in question: "[W]here a director is independent and disinterested, there can be no liability for corporate loss, unless the facts are such that no person could possibly authorize such a transaction if he or she were attempting in *good faith* to meet their duty."ⁿ⁴²

The court went on to distinguish the "more subtle deception" involved in spring-loading from the "fundamental, incontrovertible lie" involved in backdating:

Whether a board of directors may in good faith grant spring-loaded options is a somewhat more difficult question than that posed by options backdating, a practice that has attracted much journalistic, prosecutorial, and judicial thinking of late. At their heart, all backdated options involve a fundamental, incontrovertible lie: directors who approve an option dissemble as to the date on which the grant was actually made. Allegations of spring-loading implicate a much more subtle deception.ⁿ⁴³

In a footnote, the court drove home its observation that backdating options is inevitably improper vis-a-vis the corporation's shareholders: "Although similar to spring-loading, the backdating of options always involves a factual misrepresentation to shareholders. Issuance of options in conjunction with such deception, and against the background of a shareholder-approved stock-incentive program, amounts to a disloyal act taken in bad faith."ⁿ⁴⁴

The court observed that in spring-loading cases, the impropriety is not simply in granting an option that is, in practical effect, immediately in the money (an action that, in some circumstances, could be a legitimate exercise of business judgment) but, rather, in the accompanying deception of shareholders:

The touchstone of disloyalty or bad faith in a spring-loaded option remains deception, not simply the fact that they are (in every real sense) "in the money" at the time of issue. A board of directors might, in an exercise of good faith business judgment, determine that in the money options are an appropriate form of executive compensation. Recipients of options are generally unable to benefit financially from them until a vesting period has elapsed, and thus an option's value to an executive or employee is of less immediate value than an equivalent grant of cash. A company with a volatile share price, or one that expects that its most explosive growth is behind it, might wish to issue options with an exercise price below the current market value in order to encourage a manager to work hard in the future while at the same time providing compensation with a greater present market value. One can imagine circumstances in which such a decision, were it made honestly and disclosed in good faith, would be within the rational exercise of business judgment.ⁿ⁴⁵

The deception in a spring-loading case, the court explained, lies in taking an action that implicitly contradicts the terms of a shareholder-approved plan:

Granting spring-loaded options, without explicit authorization from shareholders, clearly involves an indirect deception. A director's duty of loyalty includes the duty to deal fairly and honestly with the

shareholders for whom he is a fiduciary. It is inconsistent with such a duty for a board of directors to ask for shareholder approval of an incentive stock option plan and then later to distribute shares to managers in such a way as to undermine the very objectives approved by shareholders. This remains true even if the board complies with the strict letter of a shareholder-approved plan as it relates to strike prices or issue dates.

The question before the Court is not, as plaintiffs suggest, whether spring-loading constitutes a form of insider trading as it would be understood under federal securities law. The relevant issue is whether a director acts in bad faith by authorizing options with a market-value strike price, as he is required to do by a shareholder-approved incentive option plan, at a time when he *knows* those shares are actually worth more than the exercise price. A director who intentionally uses inside knowledge not available to shareholders in order to enrich employees while avoiding shareholder-imposed requirements cannot, in my opinion, be said to be acting loyally and in good faith as a fiduciary.ⁿ⁴⁶

The court concluded that the grant of spring-loaded options may, under certain limited circumstances, constitute a breach of fiduciary duty. Such a grant is beyond the protection of the business judgment rule if the awards are made pursuant to a shareholder-approved plan and if the directors who approved the allegedly spring-loaded grants (a) possessed material information soon to be released that would affect the company's share price and (b) issued the options intending to circumvent shareholder-approved restrictions on their exercise price.ⁿ⁴⁷

In disposing of the spring-loading allegations in *Desimone v. Barrows*,ⁿ⁴⁸ Vice Chancellor Strine distinguished *Tyson Foods I* by focusing on the differences in the directors' knowledge of and involvement in the timing of the option grants in the two cases:

The more troubling allegation, under this court's recent decision in *Tyson*, is of course that the Officers received options before a positive announcement some sixteen days later. Per *Tyson*, Desimone tries to contend that the Officers therefore received a concealed guaranteed bonus (because the granting authorities knew the market value of the corporation's shares did not reflect the positive, non-public information the corporation would soon release) rather than an award of options the value of which was dependent on the corporation's stock price increasing from a market price reflecting all material information. By sharp contrast with *Tyson*, however, Desimone does not plead facts that suggest that members of the Sycamore board approved the April 9, 2001 Officer Grants with knowledge of corporate information that, if made public on the date of the Grants, would have increased the fair market value of the corporation's stock, turning the Grants into a bonus for past performance, rather than simply an incentive for future performance. Whereas in *Tyson* the plaintiffs pled a multi-year pattern of large grants occurring at random times of year that preceded large, market-moving announcements, here all Desimone pleads is that the corporation made the April 9, 2001 Officer Grants sixteen days in advance of a non-seismic positive announcement that hardly seemed likely to send Sycamore's stock price soaring to historic heights. Nor does the complaint allege facts supporting a rational inference that the announcement of the information in fact had that effect. As important, Desimone's insinuation that the April 9, 2001 Grants were intended as a hidden bonus is undercut by the reality that the Grants were subject to a three-year vesting schedule with sharp restrictions on pledging the options received. Put simply, it is not rational to infer from the pled facts that the board harbored any illicit intent to enrich the recipients at the expense of the Sycamore stockholders or to subvert the purposes of Sycamore's stockholder-approved options plan through clever timing of these Grants. In reaching that conclusion, the fact that the two officers who sit on the board--Sycamore's CEO and its Chairman--own a combined 32% of the company and did not receive any of the disputed options tends to powerfully undercut any inference that the board itself had a motive to make its executive officers fat at the expense of the stockholders.ⁿ⁴⁹

Two months later, ruling on a subsequent motion in the *Tyson Foods* litigation, Chancellor Chandler sharpened the distinction his colleague had drawn in *Desimone*. The decision, issued August 15, 2007, denied the motion by outside director defendants for summary judgment and delivered a stinging rebuke to Tyson's board for "display[ing] and uncanny parsimony with the truth." *In re Tyson Foods, Inc. Consolidated Shareholder Derivative Litigation (Tyson II)*.ⁿ⁵⁰ Chancellor Chandler's opinion reexamines the court's earlier refusal to dismiss the claim,ⁿ⁵¹ in the clarifying light of the "more clearly delineated" allegations with respect to the current motion,ⁿ⁵² and consequently alters--and arguably broadens--the basis for allowing plaintiffs' claim to proceed.

In their motion for judgment on the pleadings, the defendants argued that the allegedly spring-loaded options were in fact "nonqualified stock options," which Tyson's Compensation Committee could make exercisable at any price, as authorized under the company's shareholder-approved stock option plan. The court accepted this assertion, finding it confirmed by a review of the stock option plan and Tyson's proxy statements, which contradicted plaintiffs' allegation that the plan required that the exercise price be no lower than the fair market value of the company's stock on the day of the grant.

This conclusion also appeared to invalidate the premise on which the court's earlier refusal to dismiss plaintiffs' allegations had been based: "that the challenged stock options may have been issued 'with the intent to circumvent otherwise valid shareholder-approved restrictions upon the exercise price of the options.'" ⁿ⁵³ Rather than compel the granting of defendants' motion, however, the absence of such restrictions shifted the analysis to broader ground. The question facing the court in its earlier decision was the relatively narrow one of "whether a grant of spring-loaded options could be within the bounds of the Compensation Committee's business judgment in the face of a shareholder-approved agreement explicitly requiring a market value strike price."ⁿ⁵⁴

In light of the "more clearly delineated" allegations now before the court, however, Chancellor Chandler indicated that the test he had fashioned in *Tyson I* for determining whether spring-loading is beyond the protection of the business judgment rule may have been "couched in too limited a manner."ⁿ⁵⁵ Based on "the additional information now presented by the parties," the chancellor wrote, he was "not convinced that allegations of an implicit violation of a shareholder-approved stock incentive plan are absolutely necessary for the Court to infer that the decision to spring-load options lies beyond the bounds of business judgment." Rather, it was sufficient for the court to "reasonably infer that a board of directors later concealed the true nature of a grant of stock options" in order to "conclude that those options were not granted consistent with a fiduciary's duty of utmost loyalty."ⁿ⁵⁶

Thus *Tyson II* foregrounds the adequacy of company disclosures about the award of spring-loaded options in determining whether their authorization constituted a breach of board members' fiduciary duty to investors. In the instant case, Chancellor Chandler found, the defendants' disclosures regarding the challenged options "did nothing to rebut the pleading stage inference that the defendants intended to conceal a pattern of unfairly stocking up insiders' larders with option grants shortly before the announcement of events likely to increase the Company's stock price. In fact, the magnitude and timing of the grants, in the absence of "disclosure of the reasons motivating the grants, is suggestive ... of a purposeful subterfuge."ⁿ⁵⁷

The chancellor also insisted that the *Tyson* defendants' persistent failure to disclose the motivations for the stock option grants made the case distinguishable from *Desimone*, and his conclusions were not "inconsistent" with two of the hypothetical scenarios proffered there by Vice Chancellor Strine. Both those hypotheticals

assume that the board of directors has revealed their strategy to shareholders in complete and utter candor. In the absence of a shareholder-approved plan, the board clearly discloses in the merger proxy that these grants are rewards for exemplary service. Where the board operates under the restrictions of a shareholder-approved plan, it is explicitly assumed that "stockholders were told that the reason for [the requirement to grant stock options at market price] was singular and predicated solely on the desirability of having all grants qualify for favorable tax and accounting treatment" It is fair to say that, based

upon the actual allegations before the Court in this case, defendants' disclosures are too sparse to fit into either hypothetical analyzed by Vice Chancellor Strine in *Desimone*.n58

[3] Challenges to Stock Options Absent Manipulation of Grant Timing

In the last four decades of the 20th century, many states adopted statutes dealing with stock options, and modern cases attacking stock option plans and stock option awards often involve such statutes. For example, Delaware General Corporation Law Section 157 provides, in pertinent part:

(a) Subject to any provisions in the certificate of information, every corporation may create and issue ... rights or options entitling the holders thereof to purchase from the corporation any shares of its capital stock of any class or classes, such rights or options to be evidenced by or in such ... instruments as shall be approved by the board of directors.

(b) The terms upon which, including the time or times, which may be limited or unlimited in duration, at or within which, and the price or prices at which any such shares may be purchased from the corporation upon the exercise of any such right or option, shall be such as shall be stated in the certificate of incorporation, or in a resolution adopted by the board of directors providing for the creation and issue of such rights or options, and, in every case, shall be set forth or incorporated by reference in the instrument or instruments evidencing such rights or options. *In the absence of actual fraud in the transaction, the judgment of the directors as to the consideration for the issuance of such rights or options and the sufficiency thereof shall be conclusive*.n59

In Delaware, the first reported decision citing this section of the law was *Michelson v. Duncan*.n60 In *Michelson*, the board of directors of Household Finance Corporation ("HFC") had, in 1966, established a stock option plan providing for stock option awards to certain key employees, including a number of the directors. Thus, this was an interested-director case in which the business judgment rule would not apply in any event. The plan was submitted to a vote of the shareholders and was overwhelmingly approved at HFC's annual meeting.

The plan that the board and the shareholders approved provided for, among other things, grants of "in-the-money" stock optionsn61 with an exercise price equal to 90 percent of the market price at the time of the grant. Initially, grants were limited to 5,000 options per year per participant, but (in an action that the plaintiff did not contest) the board later raised the limit to 15,000 options per year per participant. The options were exercisable on a defined schedule, commencing on the second anniversary of the grant, with the final 30 percent of the options exercisable on the ninth anniversary of the grant.

In 1971 and again in 1973, without a new vote of the shareholders, the board adopted a new, accelerated exercise schedule under which participants would be allowed to exercise one-third of the options on each of the second, third and fourth anniversaries of a grant, this reducing the minimum time required to exercise all options under a single grant from nine years to four years. Then, in 1974, after the market price of HFC's stock declined dramatically, the HFC board effectively repriced the original "underwater" options by allowing participants to exchange them for new options with an exercise price that was substantially below the original exercise price. At the same time, the board also issued new options at the lower exercise price.

The plaintiff brought a derivative action to challenge the changes that the board had made to the stock option plan and stock option grants between 1971 and 1974. After the litigation began, HFC asked its shareholders, at the 1977 annual meeting, to ratify the actions complained of in the derivative lawsuit. The shareholders voted to ratify the various changes to the stock option plan and stock option grants that the plaintiff had challenged, but the vote was not unanimous.

In the trial court, the vice chancellor granted defendants' motion for summary judgment on a number of grounds and denied plaintiff's cross-motion for summary judgment. On appeal, the Delaware Supreme Court held that, notwithstanding the shareholders' non-unanimous ratification of the changes the board had made in 1971 through 1974, the vice chancellor had erred in dismissing the plaintiff's claims. The plaintiff had alleged that the changes in 1974, especially the exchange of "underwater" options for "in the money" options, was wholly without consideration. The Delaware Supreme Court held that an alleged waste or gift of corporate assets with no consideration to the corporation may be ratified only by a unanimous vote of the shareholders and, under the circumstances of this case, the plaintiff's claims should not have been dismissed on a motion for summary judgment.ⁿ⁶²

As an additional argument in their defense, the defendants quoted the sentence of Delaware General Corporation Law Section 157 providing that, "In the absence of actual fraud in the transaction, the judgment of the directors as to the consideration for the issuance of such rights or options and the sufficiency thereof shall be conclusive."ⁿ⁶³ The Delaware Supreme Court nevertheless rejected the defendants' attempted use of Section 157 in their defense, observing that the section presupposes the existence of *some* consideration, and noting that, in the case at bar, the plaintiff had alleged that the 1974 exchange of in-the-money options for "underwater" options was without any consideration to the corporation whatsoever.ⁿ⁶⁴

The Delaware stock-option statute came up again in *Byrne v. Lord*.ⁿ⁶⁵ In that case, shareholders of Pace American Group, Inc. ("Pace") challenged, among other things, in-the-money stock options that the Pace board had issued, claiming that the grant of such options constituted a waste of corporate assets. This case, too, involved an interested-director transaction, since the directors had granted the challenged options to themselves, and therefore the board was not entitled to the protection of the business judgment rule.ⁿ⁶⁶

In this context, the court set out the two requirements, under Delaware law, for the validity of a stock option plan (and awards thereunder):

First, the plan must involve an identifiable benefit to the corporation. To that end, the plan must contain conditions, or the circumstances must be such that, the corporation can reasonably expect to obtain the benefit (the 'Benefit Prong'). Second, the value of the options must bear a reasonable relationship to the value of the benefit passing to the corporation (the 'Value Prong').ⁿ⁶⁷

The court went on to observe that, under Section 157 of the Delaware General Corporation Law, if the corporation has received *some* consideration for the options, the court may presume that the consideration was adequate (and thus the 'value prong' would be satisfied), at least in a case not involving interested directors:

Delaware General Corporation Law provides some assistance to corporations in withstanding challenges under the Value Prong of the test. Section 157 states, 'in the absence of actual fraud in the transaction, the judgment of the directors as to the consideration for the issuance of such rights or options and the sufficiency thereof shall be conclusive' Thus, if the corporation has received some consideration in exchange for the options, then the Court may presume that the exchange is a reasonable exchange of value. However, § 157 presumes that the corporation issued the options for some consideration; its presumption would not operate if the case involved a complete lack of consideration.....One issue currently unresolved in Delaware is whether courts may give the benefit of this presumption to interested directors as well as to disinterested directors.ⁿ⁶⁸

Nevertheless, the court went on to hold that, because the board in the case before it was interested in the challenged transaction, which was not ratified by a vote of disinterested stockholders, the defendant directors had the burden of demonstrating the reasonableness of the consideration (that is, of satisfying both prongs of the test, without regard to the deference that would otherwise be accorded to their judgment under Section 157):

In a situation, as in this case, where the board of directors is interested, then the analysis turns upon whether the independent shareholders have ratified the plan. Generally, if the independent shareholders have not ratified the plan, then the interested directors have the burden of demonstrating that the plan meets the two-prong test Alternatively, if the shareholders ratify the option plan, then the challengers must show that the option plan did not represent a fair exchange of valuen69

To satisfy the benefit prong, the court explained, there must be structural features in the challenged arrangement to assure that *some* consideration will flow to the corporation:

As to the Benefit Prong, Delaware law does not require the Court to engage in a 'quid pro quo' analysis. Instead, the law recognizes that the benefits to the corporation may be intangible and may not be subject to valuation. For example, corporations may issue options for the purpose of inducing key personnel to either continue their employment with the firm or to expend greater efforts on behalf of the firm Thus, as long as the corporation expects to receive some benefit from the bargain, the key factor for the Court to consider in determining the validity of the option plan is not whether the corporation can quantify the benefit, but whether the plan itself contains safeguards or circumstances to ensure that the corporation receives the benefit for which it bargained For example, if by granting the options the corporation expects that it will retain key personnel, then the plan must provide terms, or circumstances, that ensure that the personnel are employed by the corporation when they exercise the options

... .

... Plaintiffs suggest that the plan is problematic because its terms do not require that the directors remain in office in order to exercise the options. With this allegation, Plaintiffs challenge the validity of the option plan under the Benefit Prong of the two-prong test More specifically, since the plan's stated purpose is to retain the valuable services of the directors, the Court must determine if the plan is valid because either the plan's terms or the surrounding circumstances are reasonably calculated to obtain that benefitn70

Running through the court's analysis was an undercurrent of criticism of the closed process by which the board adopted the challenged plan:

Further, I find that other facts, while not fatal to Defendants, demonstrate that the circumstances here fail to provide safeguards ensuring that Pace would receive the benefit of its bargain [I]n the current case, the shareholders did not ratify the option plan. And although shareholder ratification is not required for a court to uphold a plan, it does tip the balance in favor of upholding a plan by shifting the burden to the plan's challengers. Additionally, in this case, the board not only failed to offer the plan to the shareholders for ratification, but the board also chose not to provide any information or notification to the shareholders of the plan. Finally, the negotiations between the Pace directors who implemented the plan appear to be somewhat suspect. The board did not select an independent committee to evaluate the plan. While such an independent committee is not necessary, it would have been appropriate and helpful for the board to make some analysis as to whether the plan was adequate to achieving the benefit desired. Instead, it appears that Madero and Lord were the only directors involved in developing the plan Further, the directors never met and discussed the plan: rather, the plan was ratified by written consent by a group of directors who were beneficiaries of the plan. Thus, instead of hindsight validating the plan, the circumstances are permeated by the board's self-interest.n71

The court concluded that the plan was invalid because the director defendants had failed to meet their burden of satisfying the benefit prong of the two-prong test by demonstrating that the plan or the surrounding circumstances provided "reasonable safeguards to ensure" that the company would receive the benefit of its bargain:

... I conclude on the undisputed facts that the Defendants failed to meet the Benefit Prong of the two-prong test because neither the option plan, nor the circumstances, provided reasonable safeguards to ensure Pace would receive the benefit of its bargain Thus, the option plan is invalid as a matter of lawn72

In contrast, two years later, in *Zupnick v. Goizueta*, n73 the court dismissed a shareholder's derivative suit attacking, as corporate waste, option grants that had been approved, as a reward for past services, by the disinterested directors and by the company's shareholders. The plaintiff argued that the very fact that the options had been granted solely as compensation for past services meant that the corporation received no consideration for the option grant, which therefore constituted a waste of corporate assets. In this context (of an independent director-approved, shareholder-approved option grant), the court cited Delaware General Corporation Law Section 157 for the rule that "the judgment of the directors as to the consideration for the issuance of such ... options and the sufficiency thereof shall be conclusive."n74 In this regard, the court accepted the defendants' argument that "a disinterested board of directors may, in a good faith exercise of its business judgment, award additional retroactive compensation, i.e., a 'bonus,' to a corporate executive for extraordinary services that substantially benefited the corporation" because, among other reasons, doing so can induce "other key employees to remain in the corporation's service and to perform at a high level, motivated by the prospect that at a future time they too might be similarly rewarded."n75

[4] Application of Business Judgment Rule in Executive Compensation Cases

As early as the late nineteen-fifties, courts began giving greater deference to the executive compensation decisions of disinterested directors, rather than substituting their own judgment for the judgment of such directors on the "reasonableness" or "proportionality" of challenged compensation awards. For example, in *Lieberman v. Becker*,n76 the plaintiff sought a judicial declaration partially invalidating a so-called Deferred Compensation Unit Plan for corporate executives and employees after the plan had been approved by a vote of the shareholders of Koppers Company and a committee of disinterested directors (each of whom was ineligible to participate in the plan) had been created to award units under the plan. The plan was akin to a "phantom share" plan.n77 Units awarded were credited with an amount equal to dividends paid on Koppers' common stock during the period from the award through the termination of each participant's employment with Koppers. In addition, the units were credited with an amount equal to the market appreciation of Koppers' common stock during the same period (subject to a participant's ability to elect to fix the "ending" market price as of the date of termination of employment or as of any date within three years after termination of employment, provided that, in no case, could the ending market price exceed the highest market price of Koppers' common stock between the date of the grant and the date of termination of employment).

To be eligible (or for his or her beneficiary to be eligible) for the cash payout, the participant's employment with Koppers must have terminated by reason of death, retirement or disability. The total of the dividend credit plus the market-appreciation credit would then be paid out, in quarterly installments, to the participant (or beneficiary) over a ten-year period following the participant's termination of employment. In exchange for becoming eligible to participate in the Deferred Compensation Unit Plan, a participant would be required to agree to remain in Koppers' employment for a period of five years, or until retirement; to be available as a consultant for 10 years after retirement; and not to compete with Koppers or become an employee of any competitor of Koppers.n78

In the trial court, the vice chancellor granted summary judgment to the defendants, "ruling that the Deferred Compensation Unit Plan is reasonably designed to achieve a legitimate business purpose--that of retaining qualified executive personnel in the employ of Koppers."n79 On appeal, the Delaware Supreme Court initially noted and applied "two fundamental rules of law as to which there can be no argument":

The first rule is that a plan for additional compensation of executives and employees is to be held valid only if consideration passes to the corporation at the time the plan is put into effect.....

The second rule is that there must be a reasonable relations [sic] between the value of the benefit conferred by the plan upon the employee and the value to the corporation of the employee's service to it ... n80

The court noted that there could be "no doubt" that the first rule (consideration to the corporation) was satisfied by the requirement that the participant make certain promises, for the benefit of the corporation, at the time of the award. The court then proceeded to consider what it characterized as "the main thrust of the plaintiffs argument[:] ... that there is no reasonable relationship between the value of the benefits conferred upon the employee by the plan and the value of his services to the company."n81

The court characterized the plaintiff's attack as being that "the market value of the common stock is too speculative an element to form a reasonable basis for determining executive compensation," citing the plaintiffs' own argument that "the market appreciation factor of the Koppers' phantom stock plan ... is tied to the vagaries of the stock market" and "[t]here is therefore no reasonable relationship between compensation so computed and the value of the services thus compensated, unless by chance."n82 The court then mentioned a "variety of factors" that the plaintiff had cited as determining the market price of common stock, "including interest rate on money, corporate earnings, the business cycle, commodity prices, the psychology of the buying public, labor relationship, and others," leading the plaintiff to conclude that, thus, "the employee's services do not necessarily have any direct relation to the fixation of the market price of the securities of the corporation for which he works."n83

In resolving this element of the dispute, the court foreshadowed the modern business judgment rule by giving substantial deference to the committee of disinterested directors charged with the responsibility of awarding units under the plan:

We must assume that the committee of directors charged with the administration of this plan will do so in the good faith exercise of their considered business judgment. Indeed, there is no charge that they have done otherwise. Certainly, therefore, assignments of units will be made on the basis of the committee's judgment of the worth of the employee's services to the company, his length of service and contribution in the past and to be expected in the future to the company's prosperity, and numerous other factors, not the least of which should be their best guess of the future prospects of the company's stock on the open market. A decision by responsible businessmen reached after careful consideration of these factors, without bad faith or fraud, is entitled to weighty consideration by the courts.n84

The court concluded that, "whether or not a corporation should embark upon such a method of compensating its employees is to be decided by the board of directors by the exercise of their business judgment. When a corporate decision is made in the light of the best business judgment of its management, absent fraud or bad faith, the courts do not interfere."n85

Beard v. Elster n86 was a Delaware Supreme Court decision on the validity of a stock option plan. While the decision was handed down before the adoption of Section 157 of the Delaware General Corporation Law,n87 it is instructive in that it emphasizes the importance of deferring to the judgment of disinterested directors in matters of executive compensation. The case was a stockholders' derivative action challenging grants of stock options under a plan adopted by American Airlines, Inc. after the approval of (a) the company's board of directors consisting of 14 disinterested directors and two other directors who ultimately received option grants under the plan, and (b) the company's shareholders. In reversing a decision of the Court of Chancery denying the defendants' motion for summary judgment, the court distinguished earlier Delaware cases, in which option plans had not been approved by a disinterested board, and emphasized the significance of the approval of the challenged plan by a disinterested board in the case before it:

The option plan now before us was adopted initially by an admittedly independent and disinterested Board of Directors.

... .

Of prima [sic] importance is the fact that the adoption of the plan by the Directors was an exercise of independent business judgment that the plan would be of benefit to the corporation and would result in the retention of the services of valued employees

... .

We think the fact that a disinterested Board of Directors reached this decision by the exercise of its business judgment is entitled to the utmost consideration by the courts in passing upon the results of that decision

We have before us a plan which, in the judgment of a disinterested Board, is adequately designed to further the corporate purpose of securing the retention of key employees' services. It is theoretically possible, we suppose, that some businessmen could be found who would hold the opinion that options exercisable at once were improvidently granted, but, on the other hand, there are businessmen who would hold a favorable view, as this Board of independent businessmen in fact did. At most, therefore, we find ourselves in the twilight zone where reasonable businessmen, fully informed, might differ. We think, therefore, we are precluded from substituting our uninformed opinion for that of experienced business managers of a corporation who have no personal interest in the outcome, and whose sole interest is the furtherance of the corporate enterprise.ⁿ⁸⁸

The business judgment rule has also been applied to insulate stock option repricing from second-guessing by shareholder plaintiffs and the courts. *Cohen v. Ayers* ⁿ⁸⁹ was a shareholder's derivative action attacking several actions of the board of directors of Sears, Roebuck & Co. in connection with the company's stock option plan. The plan at issue was originally recommended by the company's board of directors and approved by the company's shareholders in 1967. The plan was to be administered by a committee of non-employee, disinterested directors. The exercise price of options under the plan was to be set at the fair market value on the date of the grant.

In 1973 and 1974, the price of the company's stock declined and options previously granted under the plan became exercisable at a price in excess of the price at which the shares were then trading (*i.e.*, the options were "underwater"). In response to this situation, in early 1974, the Committee resolved that outstanding options would be canceled and that an equivalent number of new options would be granted with exercises prices set at the then-fair-market value of the company's stock. As the company's stock continued to decline in price, the Committee repeated the process (of canceling old, "underwater" options and issuing new at-the-money options in their place) later that year.

The plaintiff brought a shareholder's derivative action challenging the cancellation and reissuance of options (essentially amounting to a repricing of outstanding options) on several grounds, including the ground that the board's actions amounted to a waste of corporate assets. After the suit was brought, the board called a special meeting of shareholders and distributed proxy materials recommending that the shareholders ratify the challenged actions of the board (in canceling and re-granting options). The shareholders passed the resolution in 1976 by an overwhelming majority.

The defendants moved for summary judgment, which the district court granted, and the plaintiff appealed. The Court of Appeals affirmed the judgment below. The court rejected the plaintiff's waste argument, finding that the challenged actions were protected by the business judgment rule, in this case because of the shareholder ratification, but also noting that the business judgment rule would apply in cases where the challenged actions were taken or approved by a majority of disinterested directors:

The plaintiff also charges that the option reissues constituted waste and a gift of corporate assets. The following general principles of law are applicable in deciding issues of waste or corporate gifts. Ordinarily, employee compensation and other corporate payments are not a waste or gift of assets as long

as fair consideration is returned to the corporation. The question of the adequacy of consideration is committed to the sound business judgment of the corporation's directors However, where the directors have a personal interest in the application of the corporate payments, such as where they are fixing their own compensation, the business judgment rule no longer applies and the burden shifts to the directors to demonstrate affirmatively that the transactions were engaged in with good faith and were fair, i.e., that adequate consideration had been supplied. This alternation in the burden and quantum of proof may only be avoided in two circumstances: after full disclosure the payments must have been ratified either by action of disinterested directors or by vote of the shareholders. If the payments are thus ratified, then the business judgment rule is again applicable and the plaintiff can succeed only by meeting the burden applicable to challenges of any corporate transaction.ⁿ⁹⁰

While *Cohen* is still good law, as a matter of best practice recommendations and in accordance with the positions taken by influential institutional investors and proxy advisory services, options repricing today is widely frowned upon; it is unlikely that companies will want to adopt plans that permit repricing of underwater stock options.

The business judgment rule also has been applied to protect directors' decision to award certain benefits shortly before the commencement of negotiations leading to a change in control.ⁿ⁹¹ *National Insurance Co. v. Johns* ⁿ⁹² involved claims for payment under a directors' and officers' liability policy following the settlement of a shareholder's derivative suit. One of the claims in the underlying case was that the directors of Southwest Bank had wasted the corporation's assets and had exceeded their authority and breached their fiduciary duties by, among other things, adopting a Performance Incentive Plan under which units could be awarded by the chairman of the board of directors upon the recommendation of a committee of three directors, except in the case of awards to the chairman himself, which could be made only by the committee. The holders of the units would be paid \$10 per unit upon the earlier of (a) the fifth anniversary of the award, or (b) a change in control of the company.

At the time the board adopted the plan, there was no agreement that would result in a change of control of Southwest, although management knew at that time that the company "had become an attractive takeover target and that someone could acquire a controlling block of Southwest's stock by an unfriendly tender offer."ⁿ⁹³ Units were awarded to a number of senior executives, including the company's chairman and two other directors (a total of three inside directors out of 15 directors in total) who had voted to adopt the plan.

Several months later, the board of Southwest approved a merger that would result in a change in control, thus triggering payments under the plan in question. A Southwest shareholder filed a derivative action attacking the awards under the plan--as well as the company's agreement to pay its chairman under a five-year consulting agreement that the board had approved concurrently with its approval of the merger--as a waste of corporate assets.

After the case was settled, the D&O insurer resisted reimbursement under the policy on the ground, among others, that the insurer's had no obligation under the circumstances because of a coverage exclusion for:

any payment for loss in connection with any claim made against the Insureds ... for the return by the Insureds of any remuneration paid to the Insureds without the previous approval of the stockholders of the Company which payment without such previous approval shall be held by the courts to have been illegal.ⁿ⁹⁴

The court began its analysis of this issue (the legality of the payments) by observing that "Florida corporations are expressly granted the power, through the acts of their boards of directors, to fix compensation for their directors and officers, including the adoption of incentive and other compensation plans."ⁿ⁹⁵ Because, in addition, the company's by-laws and charter did not require shareholder approval for the adoption of such plans or the determination of the compensation of directors and officers, the court found that the directors (a majority of whom were disinterested) had properly adopted the challenged plan.ⁿ⁹⁶

The court then proceeded to analyze the insurer's argument that it was not required to pay the claim under the policy because of another exclusion, providing that:

[the] insurer is not liable to make any payment in connection with any claim made against the Insured based upon or attributable to their gaining in fact any personal profit or advantage to which they were not legally entitled.ⁿ⁹⁷

To determine the applicability of this exclusion, the court turned to the plaintiff's argument that the challenged plan and agreement constituted a waste of corporate assets (and therefore, at least as to those directors who profited from the plan and the agreement, a source of "personal profit or advantage to which they were not legally entitled").ⁿ⁹⁸ Addressing what it referred to as a "case of first impression," the court restated the issue as "whether the implementation of a 'golden parachute' agreement by a disinterested board of directors may be found to be a breach of their fiduciary duty to the corporation; or whether the adoption of the Plan and Agreement are protected from judicial interference by the business judgment rule" and concluded that "the conduct of the Defendants fell within the proper scope of their authority and responsibility ...".ⁿ⁹⁹ The court held that the plaintiff had failed to establish "that the amount in controversy represents an unreasonable compensation for the services of these Defendants, such that we should not defer to the business judgment of Southwest's Board."ⁿ¹⁰⁰

In 2006, the Delaware Supreme Court sounded a resounding note for the continuing vitality of the business judgment rule in cases involving challenges to executive compensation. *In re Walt Disney Derivative Litigation* was a shareholders' derivative action against the directors of The Walt Disney Company for breach of fiduciary duties, waste of corporate assets and other claims challenging the board's decisions (1) to approve the hiring of Michael Ovitz as president of the company under a contract providing severance terms that turned out to be extremely lucrative (as well as other terms and conditions that the plaintiffs criticized as being inimical to the company's best interests), and (2) later (after the board was reconstituted) to authorize a "no-fault" termination of Ovitz's employment, triggering total severance payments amounting to over \$140 million (including gains on stock options). The substantive decisions of the Delaware Chancery Court and Delaware Supreme Court in the Disney case are discussed at length in section 10.03 of Chapter 10 of this treatise. In its final decision in the case (referred to in this treatise as Disney IV), the Delaware Supreme Court upheld the decision of the Chancery Court that the challenged actions were protected by the Delaware business judgment rule, even though the processes of the Disney board and its compensation committee fell short of recognized "best practices" for approval of executive compensation.ⁿ¹⁰¹

Thus, the business judgment rule has been successfully used to defend a variety of executive compensation actions taken by disinterested directors on adequate information and after due deliberation. In cases where the board is approving compensation plans or actions for executives only, and not for the directors themselves, the board's advisors can go a long way toward protecting the board's actions from attack by ensuring that the directors follow a careful, thorough process so that there can be no legitimate question that they have discharged their duties of care and loyalty and that their decision is therefore entitled to the protection of the business judgment rule. The process should include:

- the provision to the board of adequate information, sufficiently in advance of each meeting to allow the directors to read and fully digest any materials relating to the issues under consideration;
- the retention, when appropriate, directly by the board or board committee of independent outside experts (including independent counsel when necessary);
- the allowance of ample time and an adequate number of meetings to permit the directors to explore and understand fully all aspects of the compensation plan or action under consideration, including its potential total cost to the corporation and the value of the total payments and benefits payable to each executive;

- the avoidance of undue influence on the work of the committee or the board by any company executive, including the CEO or those (such as the director of human resources or company-retained counsel or consultants) who report to the company's executives; and
- a vigorous open debate and discussion on the part of independent directors before they make a decision on the approval of the proposed plan or compensation action before them.

[5] Board's Business Judgment Not Entitled to Deference When Directors Are Not Independent

Nevertheless, even under the traditional Delaware business judgment rule, when a defendant cannot satisfy the prerequisites of establishing that an independent and disinterested board acted in good faith and with due care in connection with a compensation decision, the court will not defer to the decision of the directors but, instead, will review the challenged action *ab initio* under the entire fairness doctrine. In *In re Viacom Inc. Shareholders' Litigation* n102, the court considered a motion to dismiss a shareholders' derivative action seeking, among other things, to recover compensation allegedly wrongfully paid to senior executive officers of Viacom Inc. (including \$159,996,504 paid in one year to Viacom's COOs and CEO). Plaintiffs claimed that the compensation paid was excessive and was awarded at a time when Viacom was experiencing significant losses. Defendants moved to dismiss the complaint on the basis of the business judgment rule, arguing that the actions in question had been taken by independent and disinterested directors on adequate information and after due deliberation.

To rebut the business-judgment-rule defense, plaintiffs argued that the directors in question were not independent. Because the defendants had acknowledged the lack of independence of several of the directors, to rebut the application of the business judgment rule the plaintiffs had only to persuade the court that one additional director was not independent. To do so, they argued, and the court accepted, that one of the directors, Alan Greenberg, lacked independence because of his long-standing business and personal ties to Viacom's CEO, Sumner Redstone. Among other things, Greenberg had been Redstone's investment banker and, in that capacity, had advised Redstone in his 1993 acquisition of Paramount Communications and his 1994 acquisition of Blockbuster Inc. Greenberg, as well as his employer, Bear Stearns, had also advised Redstone in connection with the 1994 unwinding of the Blockbuster acquisition and had allegedly continued to provide other broker and advisory services to Redstone. On these facts, the court found that there was "a reasonable doubt as to his ability to evaluate plaintiffs' demand [that Viacom pursue recovery of amounts allegedly wrongfully paid to Redstone and other senior executives] without a taint of interest, 'extraneous considerations' or influences."n103

Accordingly, the court held that the plaintiffs' claim that the directors had breached their fiduciary duties in approving the challenged compensation would not be dismissed on motion, and that it would apply the "entire fairness" test in assessing whether to uphold the Board's decision to award the challenged compensation.n104

Similarly, in *California Public Employees' Retirement System v. Coulter*,n105 plaintiff shareholder California Employees' Retirement System ("CALPERS") brought a putative class action and shareholders' derivative suit against Lone Star Steakhouse & Saloon, Inc. ("Lone Star") and several of its officers and directors, attacking repricing of options, certain related transactions and severance contracts for key executives. Lone Star moved to dismiss for the plaintiff's failure to make a pre-suit demand or to plead facts sufficient to show that such a demand should be excused for the derivative claims.

The complaint included particularized allegations that, on their face, painted a credible picture of manager and director entrenchment. After CALPERS had already made known its dissatisfaction with Lone Star's management and had successfully submitted a proposal to Lone Star's shareholders to amend the company's by-laws to require that the Lone Star board consist of a majority of independent directors, and after the Council of Institutional Investors had proposed a board resolution to the same effect and to declassify the Lone Star board, the Lone Star board adopted change-in-control

agreements for several senior executives.

CALPERS alleged that, as originally adopted, the agreements would have triggered payments to departing executives upon a change in control in an amount that could have exceeded one-third of the company's market capitalization (on certain assumptions). Later "clarification of how the agreements would operate reduced that amount to approximately one-eighth of Lone Star's market capitalization - still a significant portion of the company's value."ⁿ¹⁰⁶ As is standard in change-in-control agreements, a change of control was defined to include a turnover in a majority of the sitting directors without their approval.

In these circumstances, in ruling on the necessity of pre-suit demand, the court found that the provision in the change-of-control agreements concerning the failure to re-elect a majority of the board--when the board had allegedly approved those contracts in the face of a perceived threat to the incumbent directors' positions and with the intention of entrenching those directors in office--raised a presumption that they were "interested" in the change of control contracts (despite the fact that they would not benefit directly from the change of control payments) and, thus, raised a reasonable doubt about their ability to consider a demand to initiate litigation on a disinterested basis.ⁿ¹⁰⁷ In addition, in finding that one director could not be presumed to be disinterested, the court noted his "lifelong friendship" with the company's CEO and the fact that the director's son was employed by a company subsidiary, among other factors.ⁿ¹⁰⁸ Under these circumstances, the court found that the challenged transactions had not been approved by a disinterested board whose decisions were entitled to the protection to the business judgment rule and, therefore, that pre-suit demand was excused.ⁿ¹⁰⁹ In addition, in reviewing whether the directors had discharged their duty of care in approving the challenged transactions, that court found that an allegation that "the only document in Lone Star's corporate records related to ... [one of the challenged option repricing] transaction[s] is the signed resolution of the Stock Option Committee implementing the repricing ... could indicate that the Stock Option Committee failed to exercise business judgment when repricing employee options"n110

Although *Coulter* was largely an entrenchment case, and one that involved seemingly egregious facts, it does represent a post-Enron court's refusal to apply the business judgment rule because of, among other things, factors that courts had often previously deemed to be insufficient to overcome the presumption of director independence. Such factors included as personal friendships, employment of a family member, and the inclusion of a rather standard provision in a change-of-control contract that could, in the circumstances of that case, have had an entrenching effect and which may have been adopted with the purpose of director entrenchment.n111

[6] Continuing Viability of the Doctrine of Corporate Waste in Interested Director Cases, Even Where There Has Been Shareholder Ratification

Even in the 1980s and 1990s, as courts gave more deference to the business judgment of independent and disinterested directors, they continued to allow challenges to compensation decisions as wastes of corporate assets even, in some cases, in the face of shareholder ratification. The business judgment rule does not protect directors from challenges to interested-director transactions where there has been no shareholder ratification. Furthermore, even when there has been shareholder ratification, the corporate waste theory remains viable when the directors have authorized an expenditure of corporate funds that no reasonable person could find to have a legitimate corporate purpose.

*Stein v. Orloff*ⁿ¹¹² was a shareholder's derivative action challenging a number of transactions involving Evans Products Company and senior executives of Sharon Steel Corporation, a company that acquired Evans Products, including Victor Posner (who was chairman of the board, president or CEO of Sharon Steel and a number of related corporations and later became CEO of Evans Products) and Monford Orloff (the Chairman of the Board of Evans Products at the time of the allegedly wrongful acts).

Among other things, six directors of Evans Products were granted five-year employment contracts and another director's existing employment contract was amended, in each case providing for severance payments in the event of a merger or

other specified transactions, including a reduction of the then-current board membership to less than 60 percent of the total sitting directors. Two days later, Evans Products entered into an agreement in principle to merge into Sharon Steel. The complaint alleged that the employment agreements were designed so that the benefits would automatically be triggered upon the occurrence of the allegedly then-foreseeable merger.¹¹³ On April 20, 1983, after the merger failed (for a reason not explained in the opinion), the Evans Products board met and took several actions, which the complaint portrayed as an orchestrated series of events designed to enrich the senior executives Victor Posner, his son Stephen Posner, and Mr. Orloff:

The Board of Directors expanded its number from 14 to 16. Three members of the Board resigned and two days later a fourth resigned, while four new members were elected (including Mr. Posner and his son, Stephen Posner). Mr. Orloff then resigned as Chairman of the Board in favor of Mr. Posner, and Stephen Posner was appointed Vice Chairman. Mr. Orloff, Mr. Posner and Stephen Posner were then appointed as the three members of the Evans Products Company's Executive Committee. A Board composed of 16 directors was elected at a shareholders' meeting on June 8, 1983. The Complaint alleged that Mr. Posner designated eight of the members and that Mr. Orloff designated the other eight members. The Complaint alleges that as an inducement to Mr. Orloff to allow the changes on Evans Products Company's Board, he was elected to the Boards of both Sharon and NVF [another Posner-controlled company] and as President, Chief Executive Officer and member of the board of DWG [yet another Posner-controlled company]. He was given a five-year employment contract with DWG for \$360,000 per year. This contract is alleged to be a sham and allegedly intended as 'payment for the sale of offices and directorships which are assets belonging exclusively to Evans Products Company.'¹¹⁴

In an analysis that contrasts sharply with the approach of later Delaware cases,¹¹⁵ the Vice Chancellor concluded that allegations of extensive business relationships between the various directors and Mr. Posner were "insufficient to demonstrate a reasonable doubt that the directors were independent or disinterested" for purposes of impartially entertaining a pre-suit demand in the sound exercise of their business judgment.¹¹⁶ The court also found that "no facts are alleged in the Complaint which would give rise to a reasonable doubt that the Board members had acted in such a grossly negligent manner in approving the challenged transactions as to deny themselves the protection of the business judgment rule."¹¹⁷

Nevertheless, the court held that the complaint set forth sufficient allegations of corporate waste to withstand a motion to dismiss the waste claims. The waste claims involved downward repricing of "underwater" stock options in January of 1983. Although not explicitly pointed out in the opinion, it can be deduced from the facts stated that, at the time of the repricing, seven of the 14 then-sitting directors held more than three-quarters of the options that were the subject of the repricing.¹¹⁸ The court held that the allegations of the complaint concerning the repricing were sufficient to support the claim for waste of corporate assets:

It is alleged that the reduction in option price was given without consideration and constituted a waste of corporate assets

The test for finding a waste of corporate assets is whether the consideration received by the corporation was so inadequate that no person of ordinary, sound business judgment would deem it worth that which the corporation paid The Complaint alleges pre-existing options on which the option price was reduced without any consideration being received for the reduction. This is a sufficient allegation of facts to state a claim for waste and therefore to create a reasonable doubt that the transaction was the result of a valid exercise of business judgment.¹¹⁹

The *Orloff* decision shows just how far the Delaware Chancery Court had gone by the mid 1980s in upholding allegedly abusive executive contracts and compensation practices (a trend that has decidedly reversed itself in more recent years¹²⁰). Nevertheless, at least in the case of an interested-director transaction that enriched directors with no

consideration flowing to the corporation and no shareholder ratification, it also showed that, even at that time, Delaware courts continued to recognize a cause of action for waste of corporate assets.

By the middle of the 1990s, in a thorough and scholarly analysis of the state of the Delaware law on the waste doctrine, Chancellor Allen held that, even when there has been subsequent shareholder ratification, allegations of directors' self-dealing may be sufficient to state a cause of action for waste of corporate assets that will survive a motion to dismiss. In *Lewis v. Vogelstein*,ⁿ¹²¹ a shareholder of Mattel, Inc. challenged a stock option compensation plan for directors, which had been approved by the company's shareholders at its 1996 annual meeting. The plaintiff argued, among other things, that the grant of options made under the 1996 plan "did not offer reasonable assurance to the corporation that it would receive adequate value in exchange for such grants, and that such grants represent excessively large compensation for the directors in relation to the value of their service to Mattel Plaintiff maintains that because the Plan constitutes a self-interested transaction by incumbent directors, all of whom qualify for grants under the 1996 Plan, they must justify it as entirely fair in order to avoid liability for breach of loyalty, which it is said they cannot do."ⁿ¹²²

After rejecting challenges to the adequacy of the company's disclosures to the shareholders in connection with the ratification of the 1996 Plan, Chancellor Allen turned to the allegation that the adoption of the 1996 Plan or the making of grants thereunder constituted a breach of the directors' fiduciary duty of loyalty. In this vein, the court began with the observation that, "[a]s the Plan contemplates grants to the directors that approved the Plan and who recommended it to the shareholders ... it constitutes self-dealing that would ordinarily require that the directors prove that the grants involved were, in the circumstances, entirely fair to the corporation."ⁿ¹²³ Further, because he had rejected the plaintiff's claims concerning the adequacy of the corporation's disclosures to the shareholders in seeking ratification of the 1996 plan, Chancellor Allen said that, for purposes of the analysis of the claims for breach of fiduciary duty, he would assume that the ratification was effective, raising the question of the effect of informed shareholder ratification on "a transaction of this type (*i.e.*, officer or director pay)."ⁿ¹²⁴

After going through a comprehensive discussion of the Delaware law concerning shareholder ratification, Chancellor Allen concluded "that, in addition to a claim that ratification was defective because of incomplete information or coercion, shareholder ratification is subject to a claim by a member of the class (of shareholders) that the ratification is ineffectual ... because the transaction that is ratified constituted a corporate waste."ⁿ¹²⁵

Having come to the conclusion that self-interested director transactions could be attacked, even after informed shareholder ratification, on the ground of waste, Chancellor Allen then reviewed the stringent standard under Delaware law for determining what constitutes a waste of corporate assets:

Roughly, a waste entails an exchange of corporate assets for consideration so disproportionately small as to lie beyond the range at which any reasonable person might be willing to trade ... Most often the claim is associated with a transfer of corporate assets that serves no corporate purpose; or for which no consideration at all is received. Such a transfer is in effect a gift. If, however, there is *any substantial* consideration received by the corporation, and if there is a *good faith judgment* that in the circumstances the transaction is worthwhile, there should be no finding of waste, even if the fact finder would conclude *ex post* that the transaction was unreasonably risky.ⁿ¹²⁶

Chancellor Allen then reviewed the early Delaware cases on this point, coming to the conclusion that--because of the Delaware courts' "skeptical or suspicious stance toward the innovation of stock option compensation as it developed in a major way following World War II," a stance he described as a "fairly natural consequence of the common law of director compensation and of the experience that corporate law judges had over the decades with schemes to water stock or to divert investors [sic] funds into the hands of promoters or management"ⁿ¹²⁷-- while nominally invoking the "waste" doctrine, "the waste standard used by the courts [in the early cases] in fact was not a waste standard at all, but was a form of 'reasonableness' or proportionality review."ⁿ¹²⁸ Chancellor Allen expanded on this point:

This (1) weighing of the reasonableness of the relationship between the value of the consideration flowing both ways and (2) evaluating the sufficiency of the circumstances to insure receipt of the benefit sought, seem rather distant from the substance of a waste standard of judicial review. Indeed these tests seem to be a form of heightened scrutiny that is now sometimes referred to as an intermediate or proportionality review.ⁿ¹²⁹

Chancellor Allen went on to discuss the influence of the Delaware Supreme Court's 1960 decision in *Beard v. Elster*ⁿ¹³⁰ on how the Delaware courts treated challenges to self-dealing transactions on the part of corporate officers and directors:

After *Beard*, judicial review of officer and director option grants sensibly focused in practice less on attempting independently to assess whether the corporation in fact would receive proportionate value, and more on the procedures used to authorize and ratify such grants. But *Beard* addressed only a situation in which an independent committee of the board functioned on the question.ⁿ¹³¹

Chancellor Allen then turned to the open question, under Delaware law, of "whether in practice the waste standard that is utilized where informed shareholders ratify a grant of options adopted and recommended by a self-interested board is the classical waste test (*i.e.*, no consideration; gift; no person of ordinary prudence could possibly agree, etc.) or whether, in fact, it is a *species of intermediate review* in which the court assesses reasonableness in relationship to perceived benefits."ⁿ¹³² Chancellor Allen concluded that, while the "Supreme Court has not expressly deviated from the 'proportionality' approach to waste of its earlier decision," in fact the more recent cases more consistently seem to apply the bright-line test--absence of *any* consideration.ⁿ¹³³

Thus, Chancellor Allen applied what he had described as the "classical waste test" in denying the motion to dismiss the waste claim before him (despite shareholder ratification):

Giving the pleader the presumptions to which he is entitled on this motion, I cannot conclude that no set of facts could be shown that would permit the court to conclude that the grant of these options ... constituted an exchange to which no reasonable person not acting under compulsion and in good faith could agree. In so concluding, I do not mean to suggest a view that these grants are suspect, only that one time option grants to directors of this size seem at this point sufficiently unusual to require the court to refer to evidence before making an adjudication of their validity and consistency with fiduciary duty.ⁿ¹³⁴

The distinction between (a) compensation decisions made by a disinterested board of directors, which are protected under the business judgment rule, and (b) alleged waste of corporate assets, which is not, is well illustrated in *Kaufman v. Beal*.ⁿ¹³⁵ *Kaufman* was a shareholders' derivative lawsuit challenging allegedly excessive and wasteful compensation paid to directors and officers of Englehard Minerals and Chemicals Corporation ("EMC"). Part of the challenged payments were to be made in connection with the planned spinoff of EMC's mining, refining and manufacturing operations. EMC had proposed to distribute to company employees about \$16 million, about \$6.3 million of which would go to company officers (some of whom were also directors), "in recognition of the lost opportunity of these employees to participate in the future success of the mining, refining and manufacturing activities to be conducted by the ... [company whose shares were being spun off to EMC's shareholders]."ⁿ¹³⁶ The other challenged payments resulted from increases in compensation and benefits that the EMC board had approved between 1979 and 1981 for EMC inside directors.

In ruling on a motion to dismiss the derivative complaint for the plaintiffs' failure to make a pre-suit demand on the board of directors, the court held that EMC's board of directors was entitled to the protection of the business judgment rule with respect to the pay increases, which had been approved by a majority of disinterested directors, and therefore that the plaintiffs would not be excused from making a pre-suit demand on the board of directors.ⁿ¹³⁷ In contrast, the

court held that pre-suit demand was excused in connection with the alleged \$16 million payments made to compensate directors and employees for the "loss of opportunity" in connection with spin-off of certain of EMC's operations:

The claims concerning the alleged waste of assets due to the 16 million dollar payments made to compensate officers and employees for lost opportunities due to the spin off ... will not be dismissed, however [T]he payments to be made were for the lost opportunity of certain key employees ... to continue to participate in the mining, refining and manufacturing activities to be conducted in the future by the ... [spun-off corporation], with which they would not be affiliated. The amended complaints more specifically charge that these payments are wasteful and allege that no benefit accrued to EMC-Phibro from these payments.

Although the payments for lost opportunity ... are, therefore, alleged to be a total waste of assets for which no consideration was received, there is no allegation that a majority of the directors were to receive any of this largess or that any of the directors acted improperly in reviewing the transaction.

Nevertheless, it is possible, in the unusual circumstances present here, to infer that the directors' actions were not protected by the business judgment rule because it can be inferred that the transaction was totally unrelated to a corporate purpose ... or is one in which the consideration received by the corporation was 'so inadequate that no person of ordinary sound judgment would deem it worth what the corporation paid.' ... In such case, there would not be any protection afforded by the business judgment rule because, although directors are ordinarily not subject to personal liability, if they perform their duties properly, they are personally liable if they allow corporate assets to be wasted through gross negligence (or perhaps ordinary negligence)

If the complaint, therefore, alleges facts which, if true, show that the underlying transaction is totally unconnected to a valid corporate purpose, demand can be excused because the very nature of the transaction, as approved by the Board, calls the business judgment of the Board into question and mandates further judicial scrutiny.ⁿ¹³⁸

The court went on further to distinguish between a board's ordinary compensation decisions and transactions that, on their face, lack any cognizable corporate purpose:

Although compensation levels are normally the domain of the Board of Directors, the alleged substantial payments for lost opportunity to share in future benefits are in a different category. These payments were not apparently for services rendered The individuals are allegedly being paid for a lost opportunity which was not theirs to begin with but which belonged to the corporation and its stockholders because the opportunity to work for and share in the company's success is itself an asset of the company which it gives, along with financial compensation, in exchange for service Unless these individuals are being reimbursed for loss of contractual rights or there is some benefit to the corporation arising from the payments, it is possible that the employees' loss should not be compensated at all. Based on the limited record here, I find that the plaintiffs have, at least, successfully alleged that payment completely unrelated to a corporate purpose has occurred.ⁿ¹³⁹

In *Disney IV*, discussed above, having rejected the arguments that the Disney board's approval of a contract with Michael Ovitz (under which, eventually, \$140 million was paid out upon Ovitz's termination of employment) constituted a breach of the directors' fiduciary duties, the Delaware Supreme Court also rejected the claim that the challenged payments constituted corporate waste.ⁿ¹⁴⁰ Observing that the facts alleged do "not come close to satisfying the high hurdle required to establish waste",ⁿ¹⁴¹ and "[b]ecause the appellants have failed to show that the approval of the N[o] F[ault] [T]ermination terms of the O[vitz] E[m]ployment A[g]reement was not a rational business decision," the court concluded that the "waste claim must fail."ⁿ¹⁴²

These cases show that, despite the vitality of the business judgment rule and its applicability to executive compensation decisions made by disinterested boards of directors on adequate information and after due deliberation, the business judgment rule will not insulate a board of directors from claims of corporate waste where the board authorizes the expenditure of funds for which no reasonable person could conclude that there is a valid corporate purpose (compensatory or otherwise). Such expenditures are especially vulnerable to claims of corporate waste when interested directors have approved the challenged transaction--the context in which most successful claims of corporate waste have been litigated under Delaware law in recent years. Nevertheless, in theory, even expenditures of funds authorized by non-interested, independent directors can be attacked as a waste of corporate assets where no reasonable person could conclude that they have a legitimate corporate purpose; in practice, of course, it is much more difficult to persuade a court that a transaction could not reasonably be found to have a legitimate corporate purpose when it has been approved by a disinterested and informed board, on adequate information and after due deliberation (that is, by directors who are presumed to have acted reasonably).

[7] Cases on Change-in-Control Contracts

In general, at common law, change-in-control contracts (so-called "golden parachutes") follow the same analysis under the business judgment rule (if they are adopted and approved by disinterested directors acting on adequate information, in good faith and after due deliberation) as challenges under state law to other forms of executive compensation. Nevertheless, a handful of cases have dealt specifically with change-in-control contracts, including the policy arguments in support of and against such contracts. These are discussed below.

*Gaillard v. Natomas Co.*¹⁴³ was shareholder derivative litigation arising from the merger of Natomas Company into Diamond Shamrock Corporation. Shareholders of Diamond Shamrock brought the lawsuit to challenge "golden parachute" payments and other benefits provided to five Natomas inside directors in connection with the merger.

In 1983, Natomas was a publicly held company. The directors of Natomas were five executive officers and 12 outside directors (all of whom were later named as defendants in the lawsuit). In May of that year, Diamond Shamrock launched a hostile tender offer to acquire 51 percent of Natomas's outstanding common stock, with the stated intention of acquiring the remaining shares in a back-end merger. After considering several alternatives, representatives of Natomas agreed to meet with representatives of Diamond Shamrock on May 29, 1983.

After scheduling, but before holding, the May 29 meeting with representatives of Diamond Shamrock, Natomas's CEO and board chairman, Dorman Commons, directed the Natomas compensation committee to meet on May 30, the day after the scheduled meeting with Diamond Shamrock, to review proposed amendments to executive employment agreements of key executives. At the time, two of the senior executives (Commons and the Vice Chairman of Natomas, Kenneth Reed) already had contracts under which, if the employment of Commons were terminated for any reason other than for cause, he would be entitled to continuation of his \$450,000 annual salary for three years and, in the event of a merger or takeover, Reed would be entitled to payment of his annual base salary for the remainder of the three-year term of his agreement.

At the May 29 meeting, Commons led a team that included Joseph Flom, Natomas's outside counsel. The Diamond Shamrock team was led by William Bricker, the company's chairman and CEO. After the group meeting, Commons and Bricker met alone and agreed on the terms of a friendly merger in lieu of the continuation of the Diamond Shamrock tender offer.

Commons then met with the Natomas team, including Flom, to discuss the executive employment agreements. Commons suggested that he propose to Bricker severance agreements for all employees and the amendment of employment agreements for 17 key executives to include golden parachute provisions comparable to those in effect for Diamond Shamrock executives. Thereafter, Commons met with Bricker to present these proposals. Bricker consented to the proposed agreements shortly thereafter.

Commons returned to the Natomas group and directed Flom to prepare agreements with the new golden parachute provisions for Commons to review before the meeting of the compensation committee the following morning. The next morning, May 30, Flom reviewed with Commons the drafts he had prepared.

The amended agreements provided that Commons and Reed could terminate their employment within six months following the merger for Good Reason (a defined term) or thereafter for any reason and, having done so, that they would be entitled to receive a lump-sum payment equal to five times their total annual compensation (subject to downward adjustment to the extent that they remained in the employ of Natomas after the six-month period). The draft golden parachute agreements for the other inside directors provided for lesser, but nevertheless enhanced, severance payments if they left the employ of Natomas after the merger under similar circumstances.

The compensation committee and board of directors met that day, May 30, starting at 10:00 a.m. The compensation committee members were five of the 12 outside directors. Commons and Flom (among other non-committee members) attended the meeting, as well. At the outset, Commons announced that Natomas had reached a tentative merger agreement with Diamond Shamrock and explained the general terms of the agreement. He then said that Flom would address employee compensation matters and he left the meeting. Flom addressed several details of the proposed arrangements, including the major terms of the proposed employment agreements, of which the compensation committee members were also given a written summary. Flom advised the directors of the importance of having "management clearly in place" upon the consummation of the merger. He said that the proposed agreement would ensure continuity in management. He also reported that the proposed agreements were acceptable to Diamond Shamrock.

The committee concluded the meeting by agreeing to the recommended employment agreements with the golden parachute provisions. The committee chair stated that, in approving the proposed agreements, the committee relied heavily on Flom. The committee adjourned at 11:55, less than two hours after the meeting began.

The full board then met. The directors and their advisors discussed the terms of the proposed merger. Following that discussion, the members of management who had been present up to that point left the meeting and Flom discussed the proposed changes in the employment agreements. At the conclusion of the meeting, the directors approved the terms of the proposed merger and the proposed amendments to the employment agreements. At the end of June, there was a further meeting of the compensation committee and of the board of directors. The compensation committee approved the final forms of the proposed employment agreements. The board then met and, with the five inside directors abstaining, accepted the recommendation of the compensation committee and approved the amended employment agreements.

Shortly after the closing of the merger, all four key executives who were the beneficiaries of the agreements terminated their employment with Natomas. A Diamond Shamrock shareholder brought the derivative action, alleging that the Natomas directors had breached their fiduciary duties and had committed waste and mismanagement, negligence and conversion in approving and implementing the new golden parachute agreements in the midst of the merger negotiations. The trial court granted the defendants' motion for summary judgment, a decision from which the plaintiff took an appeal.

The appellate court began its analysis of the claims with a discussion of the California business judgment rule, including its limits:

Notwithstanding the deference to a director's business judgment, the rule does not immunize a director from liability in the case of his or her abdication of corporate responsibilities. ' ... When courts say that they will not interfere in matters of business judgment, it is presupposed that judgment--reasonable diligence--has in fact been exercised. A director cannot close his eyes to what is

going on about him in the conduct of the business of the corporation and have it said that he is exercising business judgment¹⁴⁴

The court then reviewed the California statutory codification of the business judgment rule, which the court characterized as "incorporat[ing] the concept of a director's immunity from liability for an honest mistake of business judgment with the concept of a director's obligation of reasonable diligence in the performance of his or her duties"¹⁴⁵

The court took note of the policy arguments in favor of golden parachutes:

Corporate takeovers often threaten the financial and professional security of the managers of target companies. The theoretical purpose of golden parachutes is to shelter senior executives from such a threat. To this end, the two principal recognized functions of golden parachutes are (1) to foster executive objectivity toward merger and tender offers; and (2) to attract top executives to companies and industries where the odds of takeover are high As to the first function, a threatened takeover gives rise to the potential for conflict between executives' personal interests and the interests of shareholders. Golden parachutes align the interests of management more closely with those of shareholder by insuring executives against the possible pecuniary or nonpecuniary losses that may result from a change in control

As to the second function, golden parachutes provide long-term incentives for top quality management executives to enter industries and corporations in which the potential for takeover is above average

Most commentators agree that, in view of these two functions of golden parachutes, a golden parachute should be negotiated as part of an executive's overall compensation package, and that parachutes enacted in the midst of takeover negotiations should be discouraged. A parachute conferred following a tender offer will likely have little value in creating executive objectivity because the executives generally already will have taken an initial position on the takeover before the golden parachutes are adopted and may not be able to credibly take a different stance at a later time. Further, during a takeover battle, the target corporation has no need for the parachute's executive-recruiting functions. For these reasons, parachutes that are adopted in response to actual takeover overtures have been viewed as last minute appropriations of corporate assets or, alternatively, attempts to discourage potential acquirors.¹⁴⁶

Against this background of the California business-judgment rule and the theoretical justifications for and limits on the use of golden parachutes, the court proceeded to analyze the sufficiency of the causes of action in the derivative complaint. Interestingly, the court held that the five inside directors, who had abstained from voting on the golden parachute contracts, were not entitled to the protection of the California business judgment rule because "they were not performing the duties of a director in seeking approval of the agreements or accepting the benefits thereunder."¹⁴⁷ At least if the case had been analyzed under the law of other states, one might concurrently conclude that, since they had abstained from participating in the challenged vote and therefore could not have violated their fiduciary duties as directors in connection with the granting of the contracts, the claims against them had been properly dismissed by the court below. Nevertheless, the *Natomas* court concluded that "[t]he record discloses issues of fact on appellants' claims of, *inter alia*, breach of fiduciary duty and waste as to the five inside directors, which cannot be resolved as matter of law on the basis of the record before us Summary judgment as to all five inside directors therefore must be reversed."¹⁴⁸

As to the outside directors, the court first noted that "[t]he record does not disclose any personal interest in the benefits, and does not show any conflict of interest or evidence of bad faith on their part in approving the benefits."¹⁴⁹ The

court nevertheless concluded that there were controverted issues of fact bearing on whether the outside directors acted with due care, after reasonable inquiry, so as to be entitled to the protection of the California business judgment rule.¹⁵⁰ In analyzing this issue, the court noted that the compensation committee approved amended employment agreements for 17 key executives after only an initial two-hour meeting. The court questioned whether the members of the committee could reasonably have relied on Flom's justification for the contracts--that they would serve the essential purpose of promoting management continuity--without inquiring further into the circumstances and the basis for Flom's advice.

The court went on to observe that, because the golden parachute amendments were conceived of and entered into only after the terms of the merger had been negotiated and agreed upon, "the function of executive objectivity would not be served ... [and,] because they were provided to existing executives, the function of attracting top-level management obviously was not served." The court further questioned the reasonableness of the directors' accepting Flom's rationale about the utility of these contracts in the cases of Commons and Reed, who already had contracts with golden parachute features:

Significantly, the existing agreements for Commons and Reed, of which the committee members should have been aware, already provided golden parachutes which served the desirable functions of these forms of compensation. The record provides no explanation why these executives needed to make their benefits more 'golden.'¹⁵¹

Further, the court questioned the reasonableness of the directors' accepting Flom's rationale that the golden parachute features would ensure continuity of management:

The very terms of the amended agreements, however, indicate that the opposite purpose would be served, and that they in fact would encourage the executives to leave Natomas within the six-month period following the merger or shortly thereafter.¹⁵²

In addition, the court noted that "the compensation committee members should have been aware that Commons had proposed the amendment of the employment agreements and that Flom had been acting in accordance with Commons's instructions in preparing drafts of the employment agreement. Evidence of this close connection between Commons, a beneficiary of a golden parachute agreement, and Flom in formulating the terms of the agreements, would support the inference of self-dealing which should have been investigated further by the compensation committee."¹⁵³

For these reasons, the court found that there were questions of fact, which could not be resolved on a motion for summary judgment, about whether the outside directors had properly exercised the degree of diligence and due care, including the duty of inquiry, necessary to entitle them to the protection of the business judgment rule. Several aspects of the *Natomas* decision (a 1989 case)--including the court's reluctance to give any weight to directors' unquestioning reliance on the opinion of an outside expert and the court's refusal to credit directors' actions with the presumption of due care when the logical consequences of those actions did not square with their purported rationale--seem to presage more recent developments in the case law.

In the context of a board's approval of change-in-control agreements, the *Natomas* case exemplifies the difficulty of defending a change-in-control arrangement adopted in the midst of negotiations leading to a change in control. It also illustrates the importance, when boards consider and approve change-in-control arrangements, of avoiding undue influence on the part of executive officers, such as CEOs, who will benefit economically from those arrangements.

Aside from *Natomas*, most of the (admittedly few) cases explicitly dealing with change-in-control agreements adopted or approved by independent directors have upheld them under the business judgment rule. In *International Insurance Co. v. Johns*,¹⁵⁴ the court confronted what it characterized as a "case of first impression" namely, "whether the implementation of a 'golden parachute' agreement [approved] by a disinterested board of directors may be found to be a

breach of their fiduciary duty to the corporation; or whether the adoption of the Plan and Agreement [providing change-in-control benefits to senior executives] are protected from judicial interference by the business judgment rule."n155 The court held that the actions of the directors were protected by the business judgment rule, despite the argument that the change-in-control payments were made without adequate consideration, served no corporate purpose and amounted to a gift and waste of corporate assets.n156

In *In re Pennaco Energy, Inc. Shareholders Litigation*,n157 on a motion for a preliminary injunction, the Delaware Chancery Court ruled that the plaintiffs had failed to establish a likelihood that they would succeed on the merits of their claims attacking change-in-control arrangements adopted shortly before the company entered into a merger agreement, despite the fact that the challenged decisions had been made by interested directors. In that case, Pennaco shareholders sued for an injunction to block a tender offer for Pennaco, alleging, among other things, that the Pennaco directors had breached their fiduciary duties by putting their interests ahead of their duty to the shareholders in negotiating and approving lucrative change-in-control contracts for inside directors and other executives in contemplation of the sale of the company.

The Pennaco board and its compensation committee had held a series of meetings in late July through mid-November 2000. These meetings resulted in the company's (1) granting options, to directors and others, that would vest and become immediately exercisable upon a change in control; (2) entering into change-in-control contracts with several executives; and (3) making changes in existing change-in-control contracts that would increase their value to inside directors and other executives. At meetings on November 15, 2000, the board of directors discussed and its compensation committee approved proposed contract changes that made the change-in-control payouts more lucrative for the executives (but which, the court later found, also conferred certain benefits, including tax benefits, on the corporation). The same day, Pennaco signed a confidentiality agreement with Marathon Oil Company, allowing Marathon to commence due diligence on Pennaco the next day. Marathon had contacted Pennaco initially on September 8 and again on November 8 to explore the possibility of a business combination.

In the case of Pennaco's two most senior executives, who were also on the company's board of directors, the changes that the board approved on November 15 substantially increased the severance payments they would receive upon a change in control. In exchange for these changes, they entered into non-compete agreements, which conferred tax benefits on the company. The contracts of three of Pennaco's five directors were "materially affected" by the changes the board approved on November 15 and, at the same meeting, certain change-of-control-related benefits were approved for the two outside directors, as well.

On December 22, 2000, the Pennaco board approved a transaction under which Marathon would acquire Pennaco for \$19 per Pennaco share in a tender offer (presumably to be followed by a back-end merger, although the opinion is not explicit on this point). Marathon commenced its tender offer on January 8, 2001. The next day, shareholders sued claiming, among other things, that "Pennaco's two top-ranking officers, who are on the Pennaco board, loaded themselves up with severance benefits and options in contemplation of a sale. These officers, plaintiffs contend, were motivated to secure less than the best price and diverted an unfair portion of the sale price to themselves."n158

Though not without expressing some skepticism, the court rejected the claim that the board's approval of the change-in-control benefits was improperly motivated by the directors' self-interest. Stressing that, despite the timing, he did not find that the changes in the change-in-control payments were made in contemplation of an imminent change in control, and finding that there were valid business reasons from the corporation's point of view for the changes in the employment contracts, Vice Chancellor Strine ruled that the plaintiffs had not demonstrated likelihood of success on the merits of their attack on the golden parachute arrangements:

The plaintiffs also note that the process by which the Pennaco board set executive compensation was not one that would be applauded by commentators who believe that independent, non-management directors should take the lead on such matters. Although Pennaco had a compensation committee, that

committee appears to have met only at brief intervals in the middle of board meetings. It was content to let management take the laboring oar on proposing compensation arrangements. Indeed, it was Rady and Warren [Pennaco's two most senior executives, who were also directors] who worked with Arthur Andersen, not the compensation committee. Although the plaintiffs' arguments have obvious color, the plaintiffs have not convinced me that they are likely to succeed in proving that the options and new employment agreements granted to board members in the year 2000 were the product of a breach of fiduciary duty. Historically, Delaware courts have been quite reluctant to second-guess compensation decisions made by boards, even though those decisions always can be seen as clubby, or even as blatantly self-interested. Candidly, the defendant-directors' adamant insistence that the timing of the amendments to Rady's and Warren's employment agreements had nothing to do with Marathon's interest and a possible imminent sale of the company strikes me as implausible. Perhaps I am overly cynical, but this Mayberry R.F.D.n159 view of the business world is hard to accept. Here, plaintiffs also have the advantage of attacking a board that failed to use procedural protections to diminish the possibility that self-interest would taint its compensation decisions. For example, the November 15 changes to Rady's and Warren's agreements were recommended by Warren himself, and were voted on by a board majority comprised of Rady, Warren, and director Gibson, who himself was the beneficiary of similar changes.

Even so, other facts lead me to conclude that the plaintiffs have not met their burden. For starters, the record supports the inference that the board was examining changes in compensation policy long before Marathon came along. The changes made to executive compensation at the July 28, 2000 meeting were consistent with the changes later made to Rady's and Warren's packages

As important, there appears to have been a non-pretextual business rationale for the changes that were made. The plaintiffs have not disputed that the tax ramifications of the existing Change in Control Severance packages were severe, both to the executives who possessed those packages and any acquiror. Given the strong performance of the company, it was hardly outrageous to think that the board would reward its management with gross-up protection and increased Change in Control Severance in exchange for a non-compete, especially when the cost of the increased Severance would be at least partially offset by the tax protections gained thereby.

Similarly, the board's grant of options to itself on July 28, 2000 was consistent with a policy of aligning the board's interests with those of the stockholders. This is a permissible purpose

Moreover, although I incline towards the view that the November 15 changes were made *when* they were because of the serious possibility of a change in control, I am unconvinced that the Pennaco board believed such a transaction was imminentn160

In *Campbell v. Potash Corp. of Saskatchewan, Inc.*,n161 executives sued an acquiror ("PCS") of their former employer ("Arcadian") for golden parachute payments that the acquiror (under an assumption agreement) was obligated to make upon the change in control following by the termination of the executives' employment. On appeal from a decision of the lower court granting summary judgment in favor of the executives, the Court of Appeals rejected the argument that golden parachute agreements (which had been approved by a disinterested board) violate public policy. Rather, the court held, the target company board's decision to approve the contracts in question was protected by the business judgment rule:

PCS next argues that the golden parachutes violate public policy, and therefore that the assumption agreement promising them is void At most this court has frowned on golden parachutes in past dicta, but we have never held that such severance packages are *per se* unlawful

PCS further argues that these golden parachutes violate public policy because they were approved after the merger had been approved, and therefore served no legitimate corporate purpose. Though

adopted after the merger was approved, these golden parachutes were authorized later in the same meeting at which the approval occurred. Thus, PCS's argument that their adoption violated public policy because it came after approval of the merger is somewhat misleading. Moreover, the timing of the adoption of the golden parachute provision fits with the rationale given for their adoption in deposition testimony by Arcadian's then-directors. With a merger pending, the company feared that its top personnel might seek lucrative offers elsewhere. Not only would the company then be deprived of the services of key employees in the interim (and potentially receive less value from a merger if the firm suffered from poor management just prior to closing), but it also risked no longer having the managers who had brought so much profit to Arcadian in the event that the merger was never consummated. To ensure that neither of those situations occurred, Arcadian used golden parachutes to entice nine of its top executives to remain with the company until and unless there was both a change of corporate control and a decline in those executives' respective positions in the company

Mixed with its argument about public policy, PCS argues against application of the business judgment rule to this case PCS repeatedly refers to the *Gaillard* case as similar, but a California appeals court case applying California law is not binding precedent for this circuit's application of Delaware law And while the *Gaillard* case is factually similar in some respects, we do not find its reasoning persuasive. The district court in this case found no gross negligence on the part of the Arcadian board, and our court is less willing than California courts to question a corporate board's business judgment

Even if we ourselves did not perceive a good rationale for these parachutes, courts should be loath to condemn a business practice simply because they do not perceive a good rationale for a given practice. Condemning poorly understood practices simply for lack of a clear rationale would substitute the court's business judgment for the corporation's In short, evaluating the costs and benefits of golden parachutes is quintessentially a job for corporate boards, and not for federal courts.

In Delaware, whose law the parties agreed would govern disputes under this contract, a plaintiff must show that the majority of the board acted in a manner that 'rises to the level of gross negligence' before a court may second guess its business judgment [In this case, b]oard members had a reasonable amount of accurate information about the severance packages before them when they acted. The lack of a completely accurate total outlay estimate before approval does not rise to the level of gross negligence

The Arcadian board therefore exhibited nothing like the lack of knowledge and the swiftness of deliberation condemned in the *Van Gorkom* or *Hanson* cases. See *Smith v. Van Gorkom*, 488 A.2d 858 (Del. 1985) ; *Hanson Trust PLC*, 781 F.2d 264 (2d Cir. 1986) Nor do the severance agreements at issue here approach the possibly wasteful use of corporate assets entailed in the Walt Disney Company's non-fault termination of Michael Ovitz recently adjudicated by the Delaware Supreme Court. See *Brehm v. Eisner*, 746 A.2d 244, 253 (Del. 2000) (dismissing the action without prejudice on procedural grounds, but observing that "the sheer size of the payout to Ovitz [\$ 140 million for less than 15 months of work] ... pushes the envelope of judicial respect for the business judgment of directors in making compensation decisions"). If the Ovitz severance payment, which included \$ 39 million in cash, only pushes the envelope under Delaware law, then the smaller sum here spread across three executives with longer tenure at their company is well within the confines respected by the business judgment rule.n162

Despite the cases cited above (other than *Natomas*) holding that disinterested boards' decisions to authorize golden parachute contracts were protected under the business judgment rule, in the post-Enron context, such arrangements are likely to come under increasing attack in the courts (as they have in the press , in shareholder proposals submitted at annual meetings of companies, and in federal legislation such as the Emergency Economic Stabilization Act of 2008 and the American Recovery and Reinvestment Act of 2009), and some courts may take a more jaundiced view of these

arrangements. Change-in-control arrangements are most likely to withstand legal challenge if they are designed, evaluated and approved in accordance with these principles:

1. A board's decision to approve change-in-control arrangements is more defensible when it is made before the commencement of negotiations leading to the very change in control that triggers the challenged payments.
2. The negotiation and review of change-in-control contracts should be undertaken by a vigorously independent committee (such as the compensation committee or another committee consisting entirely of disinterested outside directors) without undue influence on the part of any executive (such as the CEO) who will benefit from the change in control payments.
3. Legal counsel and consultants advising the board in connection with change-in-control contracts should be retained by, and should be accountable solely to, the independent directors, rather than to executive management.
4. Boards or committees should have ample time to fully understand the legal, financial and business aspects of, and rationales for, the change-in-control arrangements under consideration, when necessary with the assistance of their own independent legal and executive compensation advisors.
5. Before approving any change-in-control arrangement, the directors should be able to articulate a clear and logical rationale for the benefits that will flow to the corporation and its shareholders.
6. In evaluating proposed change-in-control arrangements, boards or the disinterested directors charged with the task should be sure that they have a clear and precise understanding of the potential total cost of the payments and other benefits that may be triggered under these arrangements, both in absolute dollar terms and as a percentage of the company's total market capitalization.
7. Change-in-control contracts should normally be "double trigger"--meaning that the payments and benefits payable under them should be due only in the event of (a) a change in control, followed by (b) involuntary termination by the company of the executive's employment without cause or voluntary termination of employment by the executive for good reason (carefully defined to ensure that there has been a diminution in the executive's compensation, benefits, responsibilities, position within the company, or other unfavorable change in the terms and conditions of the executive's employment, such as a relocation requirement, before an executive may voluntarily terminate employment and trigger change-in-control payments).

(n55)Footnote 55. 2007 Del. Ch. LEXIS 120 at *14 . As reprised by the court, the test enunciated in *Tyson I* comprised two "premises":

[The conclusion that spring-loading may not be an exercise of a good faith fiduciary] rests upon at least two premises, each of which should ... be alleged by a plaintiff in order to show that a spring-loaded option issued by a disinterested and independent board is nevertheless beyond the bounds of business judgment. First, a plaintiff must allege that options were issued according to a shareholder-approved employee compensation plan. Second, a plaintiff must allege that the directors that approved spring-loaded (or bullet-dodging) options (a) possessed material non-public information soon to be released that would impact the company's share price, and (b) issued those options with the intent to circumvent otherwise valid shareholder-approved restrictions upon the exercise price of the options.

(n90)Footnote 90. *Cohen*, 596 F.2d 733 at 739-740 (7th Cir. 1979) . The court also analyzed the issue under New York statutory law, which it found to be "in accord with these general principles":

Under section 713 of the New York Business Corporation Law, an unratified contract in which a director has an interest is voidable unless the interested directors 'shall establish affirmatively that the contract or transaction was fair and reasonable as to the corporation' However, if the transaction is approved by the shareholders or the disinterested directors after the disclosure of all 'material facts,' the transaction is not voidable for 'substantial financial interest alone.' Although the statute is not explicit, we interpret these provisions, in accord with the general rule, as shifting the burden of proving the unfairness of the transaction to the challenging shareholder or director, one effective ratification occurs.

Cohen, 596 F.2d at 740 .

(n91)Footnote 91. *But see Gaillard v. Natomas Co.*, 256 Cal. Rptr. 702 (Cal. Ct. App. 1989) , discussed in § 16.01[5] below.

(n111)Footnote 111. *But cf. Valeant Pharms. Int'l v. Jerney*, 921 A.2d 732, 736 (Del. Ch. 2007) appeal dismissed,

Jerney v. Valeant Pharms. Int'l, (Del. Ch., May 30, 2007), in which a former officer and director of ICN Pharmaceuticals was held personally liable, based on breach of fiduciary duty and unjust enrichment theories, for the board of directors' unanimous approval of large cash bonuses to themselves and certain other ICN executives, in connection with a pending corporate spin-off. The Court of Chancery held that the compensation package should be reviewed under the entire-fairness standard, putting the burden on defendants to prove that the bonuses were fair, with respect to both the deliberative process in authorizing the compensation arrangement and its pricing terms. The ICN board's decision invited a high level of judicial scrutiny because of the evident self-dealing it reflected, as evidenced by the interested directors, conflicted members of the compensation committee, and the latter's retention, as its advisor, of the consulting company that had already given advice to management on the bonus proposal. Whether this case presages greater judicial scrutiny of compensation contracts approved under less egregious circumstances remains to be seen.

LEXIS 134 at *14 (Sept. 29, 2000) (in dismissing corporate waste claims, citing *Vogelstein*, 699 A.2d 327 (1997) , for the "functional equivalent to a gift" and "essentially no consideration" standards for corporate waste in a case where the challenged transaction had been approved by disinterested directors). For an unequivocal, clear-cut case of breach of fiduciary duty and waste of corporate assets involving executive compensation under Delaware law, see *Delta Star, Inc. v. Patton*, 76 F. Supp. 2d 617 (W.D. Pa. 1999) . In that case, without any board process whatsoever (let alone shareholder ratification), the CEO unilaterally granted to himself and other corporate executives lavish salary increases, bonuses, benefits and perquisites. Clearly, the business judgment rule could not be used as a defense in this case. In considering the waste claims, the court invoked both the "no reasonable relationship" and the "no person of ordinary, sound business judgment" tests. *Delta Star*, 76 F. Supp. 2d at 635-636 .

CHAPTER 16 EXECUTIVE COMPENSATION: LEGAL AND REGULATORY CONSIDERATIONS; "BEST PRACTICES" GUIDELINES

2-16 Corporate Governance: Law and Practice § 16.02

AUTHOR: Bart Schwartz Amy Goodman Sean Feller

§ 16.02 Tax Laws Designed to Restrain "Excessive" Executive Compensation

In connection with two major executive compensation issues (the absolute level of executive compensation and change-in-control agreements), Congress has enacted tax laws to discourage perceived abuses in executive compensation. Thus, the Internal Revenue Code and the rules and regulations thereunder play a role in corporate governance in the area of executive compensation.

[1] Section 162(m) of the Internal Revenue Code

In 1993, Congress enacted *Section 162(m) of the Internal Revenue Code* ("IRC"), to eliminate the federal corporate income tax deductibility of compensation in excess of \$1 million for each "covered employee" (the CEO and the other three most highly compensated executive officers other than the CFO), with certain exceptions. The express purpose of Section 162(m) was to contain the level of executive compensation, which had become a subject of "scrutiny and criticism."¹

Since the effective date of Section 162(m), most major public companies have continued to pay their CEOs and other senior executives total compensation in excess of \$1 million. In some instances, companies forgo the tax deductibility of such compensation in excess of that amount. More commonly, however, companies have structured their compensation programs for named executive officers so as to qualify some or all of their compensation in excess of \$1 million for federal corporate income tax deductibility under the "qualified performance-based compensation exception" to Section 162(m)'s general rule of non-deductibility of compensation over \$1 million for each named executive officer. Because the regulations under Section 162(m) are highly procedural in nature, and because the required procedures must be administered by a committee of independent directors (typically, the board compensation committee), this subject is treated in detail in § 11.06[3] above.

This "qualified performance-based compensation exception" has come under attack in recent years as both the Internal Revenue Service and Congress have limited the scope of this exception. In order to qualify for the performance-based compensation exception, among other requirements, the compensation must be payable only upon the attainment of pre-established performance goals. The Treasury Regulations provide for a limited exception to this general rule for

payments made upon certain termination events (including death, disability and upon a change of control) without regard to whether the performance goals are attained. In March 2008, the IRS reversed its long-standing position and made clear that certain other termination events (including termination without cause, termination for good reason, and retirement) are not included within this exception, meaning payment made upon these events must be based on the attainment of pre-established performance goals in order to qualify as "performance-based compensation."ⁿ²

In October 2008, Congress enacted the Emergency Economic Stabilization Act ("EESA"), pursuant to which certain financial institutions receive federal assistance under the Troubled Assets Relief Program ("TARP"). Under EESA, TARP recipients are subject to executive compensation restrictions. Among other things, Congress amended *IRC Section 162(m)* to reduce the deductibility limit from \$1 million to \$500,000 for compensation paid by companies receiving TARP funds to the companies' senior executive officers (generally the top five highest paid officers). Significantly, for TARP recipients there is no longer an exception to this limit for "qualified performance-based" compensation.ⁿ³

[2] Golden Parachute Tax Laws (IRC §§ 280G, 4999)

In 1984, Congress enacted two provisions of the IRC designed to create corporate and individual tax penalties for excessive golden parachute payments made to certain corporate executives. *IRC Section 280G* penalizes the corporation by denying corporate tax deductions for such payments and *IRC Section 4999* penalizes the recipient by imposing a 20 percent excise tax on such payments.ⁿ⁴ The Treasury Regulations governing the application of the golden parachute tax rules are extensive and detailed, and they include many detailed examples of how they should be applied. These regulations are set forth in full in Appendix 16-A to this chapter. The following material summarizes the major provisions of the statute and regulations governing the application of the golden parachute tax rules.

Sections 280G and 4999 both apply to "excess parachute payments" made to "disqualified individuals." A "disqualified individual" is any individual who, during the "determination period," is (a) any employee or independent contractor of the corporation and is (b) a shareholder, officer or highly compensated individual.ⁿ⁵ The "determination period" is the 12-month period ending on the date of the change in ownership or control of the corporation.ⁿ⁶

For the purposes of the golden parachute tax rules, only individuals who own stock with a fair market value exceeding one percent of the fair market value of the outstanding shares of all classes of the company's stock are "disqualified individuals" by virtue of their stock ownership.ⁿ⁷ Stock underlying vested stock options as well as certain stock considered constructively owned under *IRC Section 318(a)* must be considered in determining an individual's percentage ownership.ⁿ⁸

Whether a person is an officer for purposes of the golden parachute tax rules "is determined on the basis of all the facts and circumstances of the particular case (such as the source of the individual's authority, the term for which the individual is elected or appointed, and the nature and extent of the individual's duties)."ⁿ⁹ Nevertheless, "[n]o more than 50 employees (or, if less, the greater of 3 employees, or 10 percent of the employees (rounded up to the nearest integer))" of a corporation may be considered officers of that corporation for purposes of the golden parachute tax rules.ⁿ¹⁰

A highly compensated individual, for purposes of those rules, is (or would be, if he or she were an employee) in the group consisting of the lesser of (a) the most highly paid one percent of the corporation's employees (rounded up to the nearest integer) or (b) the most highly paid 250 employees of the corporation, when ranked on the basis of compensation.ⁿ¹¹

A "parachute payment" (1) is one that is

- (a) in the nature of compensation,

(b) made to a disqualified individual, and

(c) contingent on a change in the (I) ownership or effective control of the corporation, or (II) ownership of a substantial portion of the assets of the corporation;

if

(2) the aggregate present value of "the payments in the nature of compensation to (or for the benefit of) such individual which are contingent on such change equals or exceeds an amount equal to three times the base amount."¹²

Parachute payments also include "any payment in the nature of compensation to (or for the benefit of) a disqualified individual that is pursuant to an agreement that violates a generally enforced securities law or regulation (a "Securities Violation Parachute Payment")."¹³

The "base amount," for these purposes is the individual's "annualized includible compensation for the base period," meaning the average annual compensation includible in the individual's gross income for the most recent five taxable years ending before the date on which the change in ownership or control occurs.¹⁴

The "excess parachute payment"--which is not deductible on the corporation's federal income tax return and to which the 20-percent non-deductible excise tax applies to the recipient--is the portion of the parachute payment that exceeds the *base amount* (not three times the base amount).¹⁵

Nevertheless, as always with tax laws, these apparently simple rules are subject to many complications and exceptions. Among the most important exceptions, from the taxpayer's point of view, is the exclusion from the "parachute payment" of any amount that the taxpayer establishes by clear and convincing evidence is reasonable compensation either for (a) personal services to be rendered on or after the date of the change in control, or (b) for personal services actually rendered before that date.¹⁶ Such amounts paid for personal services may include "reasonable compensation for holding oneself out as available to perform services and refraining from performing services (such as under a covenant not to compete)."¹⁷

Pursuant to a controversial rule adopted in the 2004 Treasury Regulations under Section 280G, transfers of statutory and nonstatutory stock options--including the vesting of such options--as a result of change in control are required to be valued taking into account specified factors and under "any method prescribed by the Commissioner in published guidance of general applicability under § 601.601(d)(2) of this Chapter."¹⁸

In connection with the issuance of those regulations, the Treasury Department also adopted a revenue procedure, restating and modifying two previously issued revenue procedures on the valuation of stock options for purposes of *IRC Sections 280G* and *4999*.¹⁹ In general, that revenue procedure allows a taxpayer to value a stock "using any valuation method that (i) is consistent with generally accepted accounting principles (such as FAS 123 or a successor standard) and (ii) takes into account the factors provided in § 1.280G-1, Q/A 13."²⁰ The Revenue Procedure goes on to provide that "the value of a stock option will not be considered properly determined if the option is valued solely by reference to the spread between the exercise price of the option and the value of the stock at the time of the change in ownership or control."²¹ Thus, even under-water stock options will often be ascribed some value for purposes of the golden parachute tax rules. The revenue procedure includes a safe-harbor method for valuing options for purposes of the golden parachute tax rules, based on the Black-Scholes model but allowing for the use of some simplified assumptions, for valuing stock options.²²

The Emergency Economic Stabilization Act of 2008 expanded the scope of *IRC Section 280G*, as applicable to

recipients of TARP funds, to apply the above-described golden parachute tax provisions to payments made to covered executives (the CEO, CFO and the top three highest paid officers other than the CEO and CFO) on account of any involuntary termination of employment (as opposed to only payments contingent upon a change of control).ⁿ²³

In addition, EESA prohibits TARP recipients from making any golden parachute payments to a senior executive officer during the period when TARP funds remain outstanding.ⁿ²⁴ The American Recovery and Reinvestment Act of 2009 ("ARRA") amended EESA to expand the scope of this prohibition, as discussed in *Section 16.06* of this chapter.

CHAPTER 16 EXECUTIVE COMPENSATION: LEGAL AND REGULATORY CONSIDERATIONS; "BEST PRACTICES" GUIDELINES

2-16 Corporate Governance: Law and Practice § 16.03

AUTHOR: Bart Schwartz Amy Goodman Sean Feller

§ 16.03 Shareholder Approval Requirements for Equity Compensation Plans

[1] NYSE Approval Requirements for Equity Compensation Plans

[a] NYSE General Requirement of Shareholder Approval for Equity Compensation Plans

In 2003, the SEC approved new SRO rules requiring shareholder approval of equity compensation plans.ⁿ¹ For NYSE-listed companies, "the Exchange requires that all equity-compensation plans, and any material revisions to the terms of such plans, be subject to shareholder approval, with ... limited exemptions"n2

The NYSE rules define an "equity-compensation plan" as "a plan or other arrangement that provides for the delivery of equity securities (either newly issued or treasury shares) of the listed company to any employee, director or other service provider as compensation for service ... [including] a compensatory grant of options or other equity securities that is not made under a plan"n3

[b] Categories of Plans Not Considered Equity Compensation Plans Under the NYSE Rule

Two categories of plan are excepted from the definition of "equity-compensation plans" even if the brokerage and other costs of the plan are paid for by the listed company:n4

- plans made available to shareholders generally, such as a typical dividend reinvestment plan; and
- plans that merely allow employees, directors or other service providers to elect to buy shares on the open market or from the listed company for their current fair market value, regardless of whether:
 - the shares are delivered immediately or on a deferred basis; or
 - the payments for the shares are made directly or by giving up compensation that is otherwise due (for example, through payroll deductions).

[c] Material Revisions of Equity Compensation Plans Under the NYSE Rule

A "material revision" of an equity compensation plan is defined to include (but is not limited to), "a material increase in the number of shares available under the plan (other than an increase solely to reflect a reorganization, stock split, merger, spinoff or similar transaction)."⁵

If a plan contains a formula for automatic increases in the shares available or for automatic grants pursuant to a formula (a "Formula Plan"), each such increase or grant requires shareholder approval *unless* the plan has a term of not more than ten years.⁶ A shareholder-approved Formula Plan may be used if it is amended to provide for a term of not more than 10 years from its original adoption date or, if later, the date of its most recent shareholder approval. An amendment so limiting the term of the plan is not, in and of itself, a "material revision" requiring shareholder approval. In addition, a Formula Plan may continue to be used, without shareholder approval, if the grants made after June 30, 2003 are made *only* from the shares available immediately before the effective date--that is, are available due to formulaic increases that occurred before that date.

If a plan does not expressly limit the *number of shares available* (even if it limits the source of such shares, such as a provision that only treasury shares or repurchased shares are available for grant) and is not a Formula Plan (a "Discretionary Plan"), then each grant under the plan requires separate shareholder approval regardless of the term of the plan (that is, even if the term is less than 10 years).

Other material revisions requiring shareholder approval include:⁷

- an expansion of the types of awards available under the plan;
- a material expansion of the class of employees, directors or other service providers eligible to participate in the plan;
- a material extension of the term of the plan;
- a material change to the method of determining the strike price of options under the plan;
- the elimination or limitation of any provision prohibiting repricing of options.

An amendment also will be considered a "material revision" if it would increase the potential for shareholder dilution over the lifetime of the plan in question or would have an effect similar to the material revisions listed above. An amendment will not be considered a "material revision" if it curtails rather than expands the scope of the plan in question. In addition, an amendment that makes changes to the vesting schedule of awards under the plan will not be considered a "material revision."

[d] Options Repricings Under the NYSE Rule

The NYSE construes a plan that does not expressly permit repricing of options as prohibiting repricings.⁸ Therefore, any actual repricing of options under such a plan is considered a material revision of a plan even if the plan itself is not revised.

"Repricing" is defined broadly to mean any of the following or any other action that has the same effect:

- Reducing the strike price of an option after it is granted;
- any other action that is treated as a repricing under generally accepted accounting principles;

- canceling an "underwater" option (whose exercise price exceeds the fair market value of the underlying stock at the time the action is taken), in exchange for the issuance of another option, restricted stock, or other equity, unless the cancellation and exchange occurs in connection with a merger, acquisition, spin-off or other similar corporate transaction.

[e] Exemptions from NYSE Shareholder Approval Requirement

[i] *General Rule Regarding Exemptions*

The NYSE recognizes three broad exemptions from the shareholder approval requirement, for:⁹

- employment inducement awards,
- certain grants, plans and amendments in the context of mergers and acquisitions, and
- grants under qualified plans, certain excess plans and IRS Section 423 plans.

Nevertheless, such awards, plans, grants and amendments are exempt from the shareholder approval requirements only if they are made with the approval of the company's independent compensation committee or the approval of a majority of the company's independent directors. NYSE-listed companies are also required to notify the Exchange in writing when they rely on one of these exemptions.¹⁰

[ii] *Employment Inducement Awards*

A grant of options or other equity-based compensation as a material inducement to someone being recruited for employment by the listed company or any of its subsidiaries (or "being rehired following a bona fide period of interruption of employment") is an employee inducement award that is exempt from the NYSE shareholder approval requirement.¹¹ This includes grants to new employees in connection with a merger or acquisition. Promptly after the making of any inducement award in reliance on this exemption, a NYSE-listed company is required to issue a press release, disclosing the material terms of the award, including the recipients of the award and the number of shares involved.¹²

[iii] *Mergers and Acquisitions*

In the context of mergers and acquisitions:

- shareholder approval is not required to convert, replace or adjust outstanding options or other equity-compensation awards to reflect the transaction; and
- without shareholder approval, companies may use shares of the listed entity to replace shares previously available under plans of acquired companies for grants to employees of the (no longer publicly listed) acquired company if that company otherwise had shares available for grant under pre-existing plans that were previously approved by shareholders, if
 - the number of shares available for grants is appropriately adjusted to reflect the transaction;
 - the time during which those shares are available is not extended beyond the period when they would otherwise have been available (absent the transaction) under the pre-existing plan; and

- the options and other awards are not granted to individuals who were employed, immediately before the transaction, by the post-transaction listed company or entities that were its subsidiaries immediately before the transaction.

The NYSE will count any shares reserved for listing in connection with a transaction pursuant to either of these exemptions in determining whether the transaction (or a series of transactions of which it is a part) involved the issuance of 20 percent or more of the company's outstanding common stock (on a fully-diluted basis) before such issuance (either in voting power or in number of shares), thus requiring shareholder approval separately under NYSE Listed Company Manual Section 312.03(c).n13

[iv] *Qualified Plans, Parallel Excess Plans and Section 423 Plans*

Equity grants under certain types of employee plans entitled to special tax treatment under the IRC and excess plans designed to mirror such plans (and material revisions to any such plans) are exempt from the shareholder-approval requirements:n14

- plans intended to meet the requirements of *Section 401(a) of the IRC* (for example, qualifying Employee Stock Ownership Plans);
- plans intended to meet the requirements of *Section 423 of the IRC* (under which an employee may purchase no more than \$25,000 worth of stock annually at a discount of no more than 15 percent); and
- "parallel excess plans," meaning "Pension Plans" within the meaning of the Employee Retirement Income Security Act ("ERISA") that are designed to work in parallel with a plan intended to be qualified under *IRC Section 401(a)* to provide benefits that exceed the limits set forth in *IRC Section 402(g)* (the section that limits an employee's annual pre-tax contributions to a 401(k) plan), *IRC Section 401(a)(17)* (the section that limits the amount of an employee's compensation that can be taken into account for plan purposes), *IRC Section 415* (the section that limits the contributions and benefits under qualified plans) or any later-enacted successor or similar limitations, and
 - that covers all or substantially all employees of an employer who are participants in the related qualified plan whose annual compensation is in excess of the limit of *IRC Section 401(a)(17)* (or any successor or similar limits that may hereafter be enacted);
 - has terms that are substantially the same as the qualified plan that it parallels except for the elimination of the limits referred to above and the limitation set forth immediately below; and
 - under which no participant receives employer equity contributions in excess of 25 percent of the participant's cash compensation.

An equity compensation plan providing non-U.S. employees with substantially the same benefits as a comparable *IRC Section 401(a)* plan, *IRC Section 423* plan or parallel excess plan that the listed company provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law, is also exempt from the shareholder approval requirements for NYSE-listed companies.

[2] NASDAQ Approval Requirements for Equity Compensation Plans

[a] NASDAQ General Requirement of Shareholder Approval for Equity Compensation Plans

NASDAQ-listed companies must require shareholder approval "when a stock option or purchase plan is to be established or materially amended or other equity compensation arrangement made or materially amended, pursuant to which stock may be acquired by officers, directors, employees, or consultants"n15

[b] Exceptions to the NASDAQ Shareholder Approval Requirement

Under the NASD rules, there are four exceptions to shareholder approval requirement, for:n16

(i) warrants or rights issued generally to all security holders of the company or stock purchase plans available on equal terms to all security holders of the company (such as a typical dividend reinvestment plan);

(ii) tax qualified, non-discriminatory employee benefit plans (such plans that meet the requirements of *Section 401(a) or 423 of the IRC*) or parallel nonqualified plans, provided such plans are approved by the issuer's independent compensation committee or a majority of the issuer's independent directors; or plans that merely provide a convenient way to purchase shares on the open market or from the issuer at fair market value; or

(iii) plans or arrangements relating to acquisitions or mergers in two situations:

- the conversion, replacement or adjustment of outstanding options or other equity compensation awards to reflect the transaction, or

- the use, for post-transaction grants, of shares available for grant under pre-existing plans of the (acquired) company (which is no longer listed after the transaction), by converting those shares into the dollar-equivalent number of shares of the (still listed) acquiror, provided that:n17

- the time during which those shares are available for grant is not extended beyond the period when they would otherwise have been available for grant, absent the transaction; and

- such options or other awards are not granted to persons employed by the (still listed) acquiror or its subsidiaries at the time immediately preceding the closing of the merger or acquisition (as opposed to officers or employees of the acquired company, which is no longer listed after the transaction); and

(iv) inducement awards, meaning options or stock issued to recruit new employees or directors, or to attract a former employee or director to return to the company after a bona fide period of non-employment, provided that such awards are approved by either the issuer's independent compensation committee or a majority of the issuer's independent directors. Promptly after making any inducement award in reliance on this exception, a company must disclose in a press release the material terms of the grant, including the recipients of the grant and the number of shares involved.

[3] Practical Implications of Shareholder Approval Requirements

The major practical implication of the 2003 SRO shareholder approval requirements for equity-based compensation plans should be to cause companies to adopt omnibus equity-based plans that are as broad and flexible as possible. Because, in general, the adoption or material amendment of equity compensation plans for listed companies now requires shareholder approval, as a matter of convenience companies will want to adopt plans that give them wide leeway, once approved by shareholders, to vary the terms of grants from year to year, as competitive conditions and

other business considerations may require, without having to go back to the shareholders for approval each time. Companies will be well-advised to go to the limits of flexibility and inclusiveness in equity-based compensation plans submitted to shareholders, constrained only by "best practices" principles and guidelines of major institutional shareholders.ⁿ¹⁸

Companies also should consider the effect that the positions of proxy advisory firms (such as RiskMetrics Group (formerly Institutional Shareholder Services) and Glass Lewis) and institutional shareholders (such as Fidelity and CalPERS) may have on shareholder approval of equity-based compensation plans. If the terms of the proposed plan do not fall within their voting guidelines, they may vote against or recommend voting against the proposed plan. *See Section 16.05* of this chapter for a discussion of RiskMetrics Group's voting policies with respect to equity-based compensation plans.

CHAPTER 16 EXECUTIVE COMPENSATION: LEGAL AND REGULATORY CONSIDERATIONS; "BEST PRACTICES" GUIDELINES

2-16 Corporate Governance: Law and Practice § 16.04

AUTHOR: Bart Schwartz Amy Goodman Sean Feller

§ 16.04 Recoupment of Incentive Compensation

[1] Sarbanes-Oxley Section 304 (Forfeiture of Certain Bonuses)

Under Sarbanes-Oxley Section 304n1

If an issuer is required to prepare an accounting restatement due to the material noncompliance of the issuer, as a result of misconduct, with any financial reporting requirement under the securities laws, the chief executive officer and chief financial officer of the issuer shall reimburse the issuer for--

- (1) any bonus or other incentive-based or equity-based compensation received by that person from the issuer during the 12-month period following the first public issuance or filing with the Commission (whichever first occurs) of the financial document embodying such financial reporting requirement; and
- (2) any profits realized from the sale of securities of the issuer during that 12-month period.

Not every restatement results in the obligation for the CEO and CFO to reimburse the company for bonuses and profits. It must be a restatement "due to material noncompliance of the issuer, as a result of misconduct, with any financial reporting requirements under the securities laws" The law does not specify what level of misconduct or whose misconduct is required to trigger the reimbursement obligation.n2

Nevertheless, it is clear from the wording of the statute that when material noncompliance as a result of misconduct leads to a restatement, the obligation to reimburse the bonuses and profits received during the specified period (the 12-month period following the first public issuance or filing with the SEC of the financial statement that was later restated) is absolute. The law does not require any showing of causation (that the initial inclusion of information that was later restated actually resulted in the payment of the bonus or the realization of the profits for which the CEO and CFO are required to reimburse the company).

[2] Best Practices

Following the Enron- and WorldCom-era corporate scandals and enactment of Sarbanes-Oxley Section 304, there has been increased attention on the extent to which companies have the ability to recoup--or "clawback"--incentive compensation awarded to senior executives if it is later determined that their activities significantly contributed to a financial statement restatement, which resulted in a determination that the executives had received unearned incentive compensation as a direct result of their own misconduct.

Clawback provisions have been a focus of shareholder proposals in recent years. Between January 2004 and June 2008, shareholders submitted a total of 32 proposals requesting that companies adopt clawback provisions, including six proposals submitted for the 2008 proxy season. The 32 shareholder proposals were submitted to 22 different companies, with some companies receiving the proposal in more than one year. Of these 22 companies, nine previously had restated their financial results in the one to five years before receiving the proposal. The popularity of clawback shareholder proposals peaked in 2006 and 2007, when shareholders submitted ten and 11 proposals, respectively.

Some companies have taken steps to address clawbacks in response to a shareholder proposal, and some have done so as a general governance reform or following a high-profile restatement of financial results. A survey of approximately 2,100 companies released in June 2008 by The Corporate Library found that 300 companies had clawback provisions, compared to only 14 companies that had disclosed the existence of these provisions four years ago. As of March 2008, 28 of the Dow 30 companies had implemented clawback provisions, including 23 companies that had adopted formal clawback policies aimed at recouping the incentive compensation paid or granted to executive officers and certain other employees. These policies most often provide for recoupment in the event of a restatement or a significant/material restatement of financial results due to misconduct on the part of the executive officer or other employee. The remaining five companies had incentive compensation plans that contain clawback provisions.

Companies should consider several issues when addressing clawbacks. The primary question for companies to consider is whether to address clawbacks in the first place. Doing so sends a message to shareholders that the board is committed to sound executive compensation practices and effective corporate governance, and voluntary implementation of clawback provisions will reduce the likelihood that a company will receive a shareholder proposal. On the other hand, companies need to consider whether the adoption of a clawback will adversely affect their ability to attract and retain executives. Once a company decides to adopt a clawback provision, the following issues should be addressed in formulating the provision:

- To whom should the clawback provisions apply? Clawback provisions can cover the CEO and CFO, or they can apply more broadly to all executive officers or even all employees. Covering the CEO and CFO is consistent with the approach taken in Sarbanes-Oxley Section 304. However, a clawback provision that is limited in this respect does not reach other executive officers whose compensation may be performance-based or whose job functions may affect a company's financial reporting. Proxy voting advisors RiskMetrics Group and Glass Lewis generally favor clawback shareholder proposals covering executive officers and recommend that shareholders vote "for" proposals seeking recoupment from both senior executives and employees who are potentially responsible for accounting improprieties.
- To which awards should clawback provisions apply? Base salary is not generally linked to specific performance targets and, therefore, is not typically covered by clawback provisions. With respect to performance-based awards, the single most popular approach that companies have taken is to adopt clawback provisions that include all performance-based awards, both short-term (*i.e.*, with a performance period of one year or less) and long-term (*i.e.*, with a performance period of more than one year, and typically two to four years).
- What circumstances should trigger clawback provisions? Companies with clawback provisions take a variety of approaches to the standards for determining the circumstances that trigger these provisions. Clawback provisions can apply in the event of a "significant" or "material" restatement, in the event of

all restatements (other than those due to changes in accounting policy) or in the event that financial data turns out to be incorrect. Many companies have limited the application of their clawback provisions to "significant" or "material" restatements.

- To what type of conduct should the clawback provisions apply? Alternatives include requiring recoupment in the event of misconduct by the executive officer from whom recoupment is sought, in the event of misconduct by any employee, or in the event of any conduct that results in incorrect financial data. Limiting clawback provisions to misconduct by the individual executive officers from whom a company seeks recoupment is the most common alternative and provides a targeted approach that incorporates a deterrent effect. Broader provisions that rely on misconduct by any employee could be viewed as consistent with the oversight function performed by senior executives. Finally, a "no-fault" clawback provision would not require any misconduct; instead, it would mandate recoupment simply upon a restatement of financial statements or the discovery of incorrect financial data.

- Should the clawback provisions grant discretion to the board? Clawback provisions may grant discretion to the board of directors to determine whether misconduct occurred and whether to recoup compensation. Provisions that grant discretion to the board offer the advantage of flexibility because the board can decide whether, and to what extent, recoupment is appropriate based on the specific facts and circumstances involved. However, if the board has too much discretion, RiskMetrics Group may recommend a vote in favor of a clawback shareholder proposal where a company's clawback provisions grant what RiskMetrics Group views as too much discretion to the board.

- To what extent should the clawback provisions modify employment agreements, compensation plans and award agreements? The adoption of a clawback policy, without more, may raise questions as to the policy's enforceability and could lead to criticism for failing to implement the provisions fully. Accordingly, companies should consider the additional step of amending existing employment agreements, compensation plans and/or award agreements to include specific reference to clawback provisions, either by adding language that provides for recoupment in specified circumstances or by incorporating an external clawback policy by reference.

- How far back should the clawback provisions reach? Consistent with Sarbanes-Oxley Section 304, some companies have adopted clawback provisions that reach back 12 months prior to the filing of restated financial results. However, more companies have adopted provisions that reach back for longer periods. In some cases, the relevant period covers 36 months, representing the period of time for which companies must include financial statements in their SEC filings, while other companies' provisions reach back for longer periods, such as five years, or correspond to the length of performance cycles (often three years) under compensation plans.

[3] Emergency Economic Stabilization Act of 2008

The recently enacted Emergency Economic Stabilization Act of 2008 contains a clawback provision among other executive compensation requirements. Senior executive officers of TARP recipients must pay back any bonus or incentive compensation paid to them that was based on materially inaccurate financial statements or any other materially inaccurate performance metric criteria.³ For companies subject to EESA, this provision is broader than Sarbanes-Oxley Section 304 in that it applies to the top five highest paid officers (as opposed to just the CEO and CFO), is triggered by any materially inaccurate financial statement or performance metric (as opposed to an accounting restatement), does not require misconduct, and is not limited to a 12-month look-back period. ARRA amended EESA to expand the scope of this prohibition, as discussed in *Section 16.06* of this chapter.

FOOTNOTES:

(n1)Footnote 1. *15 U.S.C. § 7243*.

(n2)Footnote 2. For example, it seems unlikely that simple negligence would rise to the level of "misconduct" required to trigger this obligation. Would gross negligence or recklessness--for example, in certifying periodic financial statements under the Sarbanes-Oxley Section 302 without having undertaken proper due diligence to ensure that accuracy of the certification--trigger the reimbursement obligation, or is some higher level of scienter, akin to intention to defraud, required? No case, regulation or administrative decision has addressed this issue as of the time of this writing.

CHAPTER 16 EXECUTIVE COMPENSATION: LEGAL AND REGULATORY CONSIDERATIONS; "BEST PRACTICES" GUIDELINES

2-16 Corporate Governance: Law and Practice § 16.05

AUTHOR: Bart Schwartz Amy Goodman Sean Feller

§ 16.05 Corporate Governance "Best Practice Guidelines" on Executive Compensation

[1] Proliferation and Importance of Executive Compensation Best Practices

Many of the corporate governance scandals of the late 1990s and early 21st century (such as ENRON, WorldCom, and Tyco) involved not only accounting irregularities and fraud but excessive executive compensation. In many of these cases, investigators found that the motivation for improperly inflating reported earnings was to enrich senior corporate executives, most often the CEO. In other cases (most notably, the \$188 million pay package of Richard Grasso, former chairman of the New York Stock Exchange), exorbitant executive compensation, in and of itself, has become a cause celebre, even when there was no suggestion of underlying fraud or accounting irregularities.

Largely as a result of these scandals, and the public attention they drew, and also because executive compensation is perhaps the most basic corporate governance issue (in that it involves a direct conflict between the personal financial interests of the company's senior executives, who influence compensation decisions, including their own, on the one hand; and the interests of the company and its shareholders, on the other hand), influential shareholder advocacy groups, institutional investors, and other organizations with an interest in corporate governance have published new or updated "best practices" guidelines for executive compensation. While such guidelines often take note of the competitive market for senior executive talent and the importance for maximizing overall shareholder value of attracting and retaining such talent, by and large they aim to restrain what their authors perceived as excesses and abuses in executive compensation.

Among the most influential "best practices" guidelines for executive compensation that have been published by broad-based business groups are the November 2003 Business Roundtable report, "Executive Compensation: Principles and Commentary," which is reproduced as Appendix 15-A to the preceding chapter of this work, and the 2003 report of the Blue Ribbon Commission of the National Association of Corporate Directors (the "NACD"). The Executive Summary of the "Report of the NACD Blue Ribbon Commission on Executive Compensation and the Role of the Compensation Committee" is reproduced as Appendix 16-B to this chapter, and a section from that report providing guidance on executive employment contracts (including change-of-control contracts) is reproduced as Appendix 16-C to this chapter. Among the most comprehensive executive compensation guidelines published by institutional shareholders is the TIAA-CREF Policy Statement on Corporate Governance--Executive Compensation and Appendix. This

document is reproduced in full as Appendix 16-D to this chapter.

Among the recommendations common to most such best-practices guidelines are principles relating to the functioning and independence of board compensation committees.ⁿ¹ In general, these recommendations emphasize:

- rigorous committee independence;
- ongoing training of compensation committee members in executive compensation issues;
- an annual assessment of the performance of the compensation committee;
- the compensation committee's direct retention and control of its own experts, including legal counsel and compensation consultants, as appropriate;
- the importance of the compensation committee's taking the time and receiving the information to comprehend, both generally and in detail, the amounts payable, especially to senior executive officers, under all compensation programs in effect, and the cost to the company of such programs; and
- complete transparency and full disclosure to the board as a whole and to the company's shareholders of both the details and the overall expense of such compensation programs.

The following discussion will focus on substantive "best practice" recommendations relating to certain executive compensation issues.

[2] Specific Best Practice Recommendations

[a] Pay-for-Performance

A consistent theme of the compensation best-practices recommendations that emerged early in the 21st century was an increased emphasis on pay-for-performance for the CEO and other senior executives. For example, the NYSE corporate governance listing standards expressly require the independent compensation committee to have a written charter requiring the committee to "review and approve corporate goals and objectives relevant to CEO compensation, evaluate the CEO's performance in light of those goals and objectives, and, either as a committee or together with the other independent directors (as directed by the board), determine and approve the CEO's compensation level *based on this evaluation*."ⁿ² While the commentary to that section makes it clear that the compensation committee may also consider market factors ("the value of similar incentive awards to CEOs at comparable companies"), the emphasis of the required charter provision is clearly on performance-based compensation for the CEO. Virtually all other major best-practices recommendations on executive compensation stress the importance of performance-based compensation, as well.ⁿ³

In addition, the recent financial crisis has heightened public scrutiny of compensation that is not tied to company performance. For example, in response to the \$165 million in retention bonuses paid to AIG executives after the federal government bailed out the company, lawmakers introduced legislation to curb these practices. House Resolution 1586, passed in the U.S. House of Representatives on March 19, 2009, imposes a 90-percent tax on the lesser of the amounts of bonuses and the amounts by which an employee's annual adjusted gross income exceeds \$250,000 (or \$125,000 if married and filing jointly) at TARP recipients that receive in excess of \$5 billion in government funds. Senate Bill 652, introduced on March 19, 2009, imposes a 70% tax on any bonus exceeding \$50,000 at TARP recipients that receive in excess of \$100 million.

In line with this trend, in early 2004 RiskMetrics Group (formerly Institutional Shareholder Services ("ISS") ("RMG")), the proxy advisory organization, added a "pay-for-performance" overlay to its proprietary quantitative model for

determining whether to recommend that its clients vote for or against proposed equity-based compensation plans. Its quantitative model calculates a maximum allowable cap for equity-based compensation plans, taking a number of factors into account. If the potential cost (including shareholder value transfer) of the proposed plan, when combined with existing plans, exceeds the cap, or if the proposed plan violates RMG repricing guidelines (expressly allowing repricing of underwater stock options or stock appreciation rights without shareholder approval), RMG will recommend a vote against the adoption of the proposed plan. Even if these tests are met, as of 2009, RMG will recommend a vote against a proposed equity-based compensation plan if:

- the CEO is a participant in the proposed plan and there is a disconnect between CEO pay and the company's performance, meaning there is an increase in the CEO's total compensation (defined as the sum of base salary, bonus, non-equity incentives, grant date full value of stock awards and options, target value of performance shares/units, change in pension value and nonqualified deferred compensation earnings, and all other compensation) from the prior year while the company's one-year and three-year total shareholder returns are in the bottom half of its industry group, and 50% of such increase in compensation is attributed to equity awards;
- the company's three-year burn rate exceeds the greater of 2% and the mean plus one standard deviation of its industry group;
- the plan provides for the acceleration of vesting of equity awards even though an actual change in control may not occur (*e.g.*, upon shareholder approval of a transaction or the announcement of a tender offer); or
- the plan is a vehicle for poor pay practices.ⁿ⁴

There are two major policy rationales for the increased emphasis on pay-for-performance. The first is the obvious goal of solving the so-called agency problem--the divergence of interest between professional managers who control corporate resources and the owners of modern corporations (shareholders with no day-to-day involvement in the business) who do not. The second policy rationale is to provide an anchor to restrain continuous increases in executive compensation, against a background of criticism that compensation committees had increased executive (especially CEO) compensation beyond reasonable bounds in part by reason of their over-reliance on surveys, combined with a policy of paying CEOs above (sometimes significantly above) the mid-point, leading to a continual increase in the mid-point shown in each successive year's survey and unrestrained inflation in CEO compensation.ⁿ⁵

In addition, a "disconnect" between performance and CEO pay will "generally" warrant a "withhold" or an "against" vote for compensation committee members, under RMG's 2004 guidelines.ⁿ⁶ As of 2009, RMG also will recommend "withhold" or "against" votes for compensation committee members, the CEO and potentially the entire board if the company has "poor compensation practices," including, but not limited to:

- egregious employment contracts, meaning contracts providing for multi-year guarantees of salary increases, bonuses and equity compensation;
- excessive perquisites, including personal use of corporate aircraft, personal security systems and car allowances, tax reimbursements, including reimbursement of income taxes on executive perquisites or other payments, or perquisites for former executives;
- abnormally large bonus payouts, including changing, canceling or replacing performance metrics during the applicable performance period, without linking such payouts to performance or properly disclosing such payouts;

- egregious pension or supplemental executive retirement plan payouts, including taking into account years of service not worked and incorporating performance-based equity awards into the pension calculation;
- overly generous new hire packages for a CEO;
- excessive severance or change in control provisions, including severance or change in control payments with a multiple in excess of 3x cash compensation, payments upon termination due to a performance failure, single-trigger change in control payouts, and new or materially amended employment or severance agreements that provide for modified single triggers (meaning an executive may resign for any reason and still receive the change in control or severance package) or an excise tax gross-up, and a liberal change in control definition;
- dividends or dividend equivalents paid on unvested performance shares/units;
- poor disclosure practices, including not clearly explaining how the CEO is involved in setting pay, not discussing retrospective performance targets or methodology, and not discussing the methodology for benchmarking or explaining the peer group;
- internal pay disparity, including an excessive differential between the total compensation of the CEO and the next highest paid named executive officer;
- options backdating.

In light of increased shareholder activism and the increased number of companies that have adopted majority voting for director elections in recent years, RMG voting recommendations continue to have a greater impact on the ability of directors to be re-elected.

Under the 2007 revisions, which have not changed, of its voting policy guidelines, RMG generally recommends that its clients vote for shareholder proposals advocating the use of performance-based awards (such as contingent options or restricted stock, indexed options or premium priced options) unless (a) they are overly restrictive or (b) the company demonstrates that a substantial proportion (50 percent or more) of shares awarded to top executives (the five most highly compensated) for the most recent fiscal year are already performance-based. RMG does not consider standard at-the-money stock options or performance-accelerated restricted stock awards to be performance-based and, for premium options to be considered performance-based, RMG requires at least a 25-percent premium. In addition, where the shareholder proposal requests that a significant amount of future long-term incentive compensation awarded to senior executives be performance-based and that the board adopt and disclose to shareholders challenging performance-based metrics, RMG assesses the rigor of the company's performance-based equity program and, if (a) it determines that the company has set the bar too low (in view of the company's history or peer-group comparison), (b) target performance results in an above-target payout, or (c) the company does not disclose the performance metric of the performance-based equity program, RMG will generally support the shareholder proposal.ⁿ⁷

[b] Stock Ownership Guidelines

Many companies have adopted, and many corporate watchdog groups and other commentators have recommended, stock ownership guidelines requiring or encouraging directors and senior corporate officers to own certain levels of company stock, typically increasing over time to a minimum level (expressed as a multiple of the individual executive's salary or the director's annual fees) that he or she should hold.ⁿ⁸ For example, General Electric Company, a leader in corporate governance, has established the following ownership guidelines (with the "multiple" being a multiple of base salary) for senior executives:ⁿ⁹

Position	Multiple	Time to Attain
CEO	6X	3 years
Vice Chair	5X	4 years
Senior VPs	4X	5 years

The establishment and publication of such stock ownership guidelines raise the question of enforcement. For the most part, companies seem to rely on "moral suasion" in the form of a periodic review (by the compensation committee, the corporate governance and nominating committee, the chairman or the chief executive officer) of where covered executives' stock ownership stands as against established guidelines and the publication in the annual proxy statement (and, sometimes, on the company's web site) of the stock ownership guidelines and a statement as to whether all covered executives and directors are in compliance with those guidelines.

The NACD Blue Ribbon Commission on Executive Compensation and the Role of the Compensation Committee recommends that the compensation committee "[r]equire executives to purchase at least some stock on their own, rather than receiving all their stock awards as pay over and above their base salary."¹⁰ Nevertheless, any requirement that executives purchase company stock with their own funds has not become a standard practice as of the time of this writing.

[c] Equity-Based Compensation

[i] *Use of Stock Options and Restricted Stock, Generally*

As discussed at length in Chapter 15 *above*, opinion of shareholder watchdog groups and other commentators has varied, from time to time, about the appropriateness and utility of stock options and other forms of equity-based compensation (such as restricted stock and phantom stock options or stock appreciation rights) as a means of tying managers' financial incentives to stockholder interests.¹¹ Even in the wake of perceived abuses and excesses in some corporate stock option programs, few corporate governance advocacy groups have come out against the use of stock options, subject to appropriate guidelines, as one form of equity-based compensation that can help to align manager's financial interests with those of shareholders. Nevertheless, TIAA-CREF, a major pension fund and annuity investor and a significant voice in matters of corporate governance, has amended its Policy Statement on Corporate Governance to state that "equity-based plans should emphasize restricted stock awards ... [because r]estricted stock more closely aligns the interests of executives with shareholders (as opposed to option grants)" and that "[e]quity-based plans should make judicious use of stock option grants."¹² The Council of Institutional Investors has adopted guidelines that suggest that companies should utilize a multitude of "long-term incentive vehicles to achieve a variety of long-term objectives, including performance-based restricted stock/units, phantom shares, stock units and stock options."¹³

[ii] *Specific Guidelines for Equity-Based Compensation*

[A] "Mega-grants"

Corporate governance guidelines have cautioned against grants of stock options or restricted stock in amounts grossly disproportionate to base pay or otherwise so large in amount that they are difficult to explain sensibly to the investing public (popularly known as "mega-grants").¹⁴

[B] Repricing and Discount Options

Repricing or replacement of underwater stock options without shareholder approval was a practice that some companies employed in the nineteen nineties and early part of the 21st century, particularly after the technology stock price "bubble" burst. Today, not only do corporate governance best-practices guidelines dealing with executive compensation

admonish companies not to reprice or replace out-of-the-money stock options without shareholder approval¹⁵; SRO corporate governance listing requirements specifically provide that shareholder-approved equity-compensation plans that do not specifically permit repricing are construed to prohibit repricing, and therefore any actual repricing is considered a material revision of such a plan, requiring shareholder approval.¹⁶ In addition, RMG will recommend that its clients vote against any proposed plan that permits repricing without shareholder approval.

[C] Performance Vesting

Corporate governance best-practices guidelines encourage performance vesting for restricted stock and even for stock options.¹⁷ While the intrinsic value of at-the-money or premium stock options is inherently tied to corporate performance (in that they have no cash value unless the value of the underlying stock appreciates to a point in excess of the exercise price), stock options without features tying vesting or exercisability to company performance as against an appropriate industry or peer-group index ("Indexed Options") have been criticized for their potential to confer windfall benefits on their recipients.¹⁸ Nevertheless, some compensation experts have criticized Indexed Options as well, as being inefficient or otherwise inappropriate for a variety of reasons, and have therefore predicted that they are unlikely to come into common use.¹⁹ More companies seem to be granting restricted shares whose vesting or exercisability is tied to objective measures of corporate performance.²⁰

[D] Holding Periods and Retention Requirements

Modern corporate governance guidelines on best practices in the area of executive compensation often recommend that executives be required to hold stock purchased on exercise of stock options (or awarded as restricted stock) for specified periods of time.²¹ Such requirements may take one of two forms--specifying either (a) the minimum period (often one year) beyond the time of exercise of stock options that senior executives should hold the stock they acquired (often with the exception of stock sold to pay taxes or to pay the cost of exercising stock options); or (b) the minimum percentage of stock (such as 50 percent, for senior executives) acquired through stock option exercises and restricted stock awards that such officers should hold during their continued tenure with the company. These requirements have garnered increased attention in the wake of the financial crisis and increased investor focus on the relationship between risk and compensation policies. During the 2009 proxy season, shareholders submitted a new proposal calling for companies that received TARP assistance as well as other companies to require their executives to hold stock acquired through equity awards for two years past retirement, and some companies announced their intention to adopt these kinds of policies. In a speech on June 10, 2009, Treasury Secretary Tim Geithner outlined principles to guide executive compensation reform, which included, among other things, aligning compensation with the time horizon of risks by requiring executives to hold stock for longer periods of time.²²

[E] Timing and Dating of Option Grants

In the wake of the executive stock option scandal that erupted in 2006²³, public companies came under pressure to adopt and disclose policies regarding the timing and dating of executive stock options.²⁴ Commentators and law firms have suggested model policies in this area, and many public companies have adopted and disclosed such policies.

A common denominator of most such policies is that executive options are priced on the date on which they are granted, often at the closing price on that day on the principal stock exchange on which the company's shares are traded. In addition, many commentators have recommended - and many companies have adopted - policies providing for annual grants of executive stock options to be made on the same day (or at the time of the same annual event, such as, for example, on the date in April of the meeting of the company's board of directors) each year. While some commentators have suggested that stock option grants not be made at a time when the company has material inside information, others have pointed out that, if the grant date is pre-determined, it should not be necessary to preclude grants at a time when the company is in possession of such information (and, moreover, a company's flexibility to change the grant date on that basis would risk signaling to the market that such information exists, since annual option grants are often made to a

large number of employee and, therefore, the normal and expected grant date is virtually public knowledge in large companies).

Some commentators have suggested that companies require all grants to be approved by the compensation committee of the board of directors. Nevertheless, to preserve flexibility, many companies have adopted policies allowing off-cycle grants (used, for example, as inducement awards for new recruits or as in settlements with employees whose employment is terminated without cause) to be made by a senior officer (such as the CEO) and to be granted and priced on a specified date following the event (for example, at the closing price on the first Monday of the month following the new employee's first date of employment).

[3] Employment and Change-in-Control Contracts

Some corporate governance best practices guidelines deal with employment agreements and change-in-control provisions. In connection with executive employment agreements generally, for example, the NACD Blue Ribbon Commission on Executive Compensation and the Role of the Compensation Committee recommends, among other things:²⁵

- Not treating non-renewal of a contract as an automatic trigger for severance pay.
- Not extending severance benefits beyond the executive's age 65 or the company's normal retirement date.
- Not adding years to an executive's years of employment in order to increase the executive's retirement package.
- Not continuing to pay active-employment benefits to executives who elect retirement during a severance period in order to start drawing a pension.
- Before agreeing to an employment agreement, reviewing company costs under a "worst case" severance benefit.
- In the definition of "for cause" termination including violations of the company's code of business conduct and ethics, as well as violations of its insider-trading policies.²⁶
- Conditioning severance payments on the executive's agreement to standard "no compete, no raid, no sue, no tell" provisions.
- Not extending special retirement benefits to CEOs of short tenure and undistinguished performance; and making any extension of special benefits to a long-serving and honored CEO relatively short in duration.

In connection with change-in-control agreements, many corporate governance groups advocate against the use of "single trigger" severance provisions (that is, provisions under which payments are triggered merely by a change in control of the employing company, regardless of whether the company then terminates the executive's employment or reduces the executive's compensation, benefits or scope of responsibilities).²⁷ Also, in connection with change-in-control provisions, the NACD Blue Ribbon Commission on Executive Compensation and the Role of the Compensation Committee recommends, among other things:²⁸

- Not automatically accelerating vesting of stock options or equity grants (but, rather, doing so only upon a change of control in cases of cash buyouts, where there is no equity conversion for shareholders,

or upon an involuntary termination of employment (not for cause) following a change of control).

- Periodically reviewing total company costs for severance benefits in case of a change of control, and comparing such costs to the company's total equity market capitalization.

Some institutional shareholders generally support shareholder proposals to require shareholder approval for golden parachute severance arrangements that exceed IRS guidelines and consider, on a case-by-case basis, all shareholder proposals to require approval of golden parachute arrangements.ⁿ²⁹

Moskow as saying, "Because these options were not indexed to the market, this led to enormous--and let me say quite unexpected--increases in the wealth of some executives. And many of them reaped these windfalls even though the price of their firms' stock had underperformed those of their peers ...").

(n19)Footnote 19. *See, e.g.*, R. Grams, *Consequences of Executive Stock Options Ownership*, 12 *WorldAtWork J.* 55 (July 1, 2003) ("Premium stock options or indexed stock options should be used rarely, if at all. Some respected practitioners recommend using premium options (exercise price higher than the market value at the time of grant) or indexed options (exercise price based on comparison group stock price changes) to enhance the connection between performance and pay and to avoid compensation windfalls.

Such options would encourage a level of risk taking even greater than the case for normal stock options. Moreover,

they would be very inefficient in terms of perceived value to the executive as compared to the opportunity cost for the business. Lastly, the low value inefficiency combined with relatively low Black-Scholes values means that premium and indexed options would require much larger grant sizes than normal options to achieve the same psychological value. As a result, they are unlikely to become common."); F. Snyder, *More Pieces of the CEO Compensation Puzzle*, 28 *Del. J. Corp. L.* 129 at 171-172 (2003); see also L. Bebchuck, J. Fried & D. Walker, *Managerial Power and Rent Extraction in the Design of Executive Compensation*, 69 *U. Chi. L. Rev.* 751 at 801-802 (2002) (noting the rarity of indexed options).

CHAPTER 16 EXECUTIVE COMPENSATION: LEGAL AND REGULATORY CONSIDERATIONS; "BEST PRACTICES" GUIDELINES

2-16 Corporate Governance: Law and Practice § 16.06

AUTHOR: Bart Schwartz Amy Goodman Sean Feller

§ 16.06 Financial Crisis Legislation

In the wake of the financial crisis, public anger and Congressional attention have become focused on compensation issues. As a result, there have been several pieces of legislation that contain executive compensation restrictions. As discussed in *Section 16.02* of this chapter, in October 2008, Congress enacted the Emergency Economic Stabilization Act ("EESA"), pursuant to which certain financial institutions receive federal assistance under the Troubled Assets Relief Program. Under EESA, recipients of TARP funds are subject to various executive compensation restrictions. Since EESA's enactment, there have been increasingly enhanced compensation restrictions imposed on TARP recipients, including those contained in the American Recovery and Reinvestment Act ("ARRA"), enacted in February 2009. Following ARRA's enactment, there was confusion as to the application of the executive compensation and corporate governance standards applicable to TARP recipients.ⁿ¹ However, on June 10, 2009, the Treasury Department issued an Interim Final Rule (the "Treasury Regulations") to provide guidance on the executive compensation and corporate governance provisions of EESA, as modified by ARRA.ⁿ² The Treasury Regulations consolidate all of the executive compensation-related provisions applicable to TARP recipients and supersede prior rules and guidance.

ARRA prescribes enhanced executive compensation standards for any entity that has received or will receive TARP funds under EESA, applicable during the period in which TARP funds remain outstanding. In addition to the limitation on compensation to exclude incentives for senior executive officers to take unnecessary and excessive risks (which limitation was contained in EESA Section 111(b)(2)(A)), Section 7001 of ARRA does the following:

- Extends the clawback provision of EESA from the top five to the 25 most highly compensated employees. The Treasury Regulations clarify that a TARP recipient must exercise the clawback right unless it can demonstrate that it is unreasonable to do so (e.g., if the cost to enforce the clawback would exceed the amount recovered).
- Extends the prohibition on golden parachute payments in EESA from the top five to the 10 most highly compensated employees, and defines "golden parachute payment" as any payment (as opposed to only payments exceeding three times the officer's average annual taxable income) due to any termination from employment excluding death or disability (as opposed to solely an involuntary termination of

employment). The Treasury Regulations clarify that the following payments are excepted from this prohibition: (1) payments received for services rendered or benefits accrued, including payments under a deferred compensation plan provided that, among other requirements, the plan has been in place for over a year prior to the employee's departure and the employee has a vested right at the time of departure; (2) payments under a qualified pension or retirement plan; and (3) payments required by state or foreign law.

- Prohibits paying or accruing any bonus, retention award or incentive compensation (other than long-term restricted stock in an amount up to 1/3 of the total annual compensation of the recipient and which does not vest while TARP funds remain outstanding) to certain employees (varying between the highest paid employee and the top 25 highest paid employees, depending upon the amount of TARP assistance received by the company). The Treasury Regulations clarify that there is no cap on total annual compensation and provide guidance on what types of payments constitute a bonus, retention award or incentive compensation (e.g., sales commissions are excluded from these definitions, provided that the commission structure is consistent with the TARP recipient's practice prior to the enactment of ARRA).

- Requires annual CEO/CFO certification of compliance with these executive compensation standards.

- Prohibits compensation plans that would encourage manipulation of earnings to enhance the compensation of any employee.

- Requires that the compensation committee be comprised solely of independent directors.

- Requires that the compensation committee meet at least semiannually with senior risk officers of the company to discuss and evaluate employee compensation plans and to conduct risk assessment to determine that these plans do not pose unnecessary risks to the company. The Treasury Regulations make clear that the compensation committee must certify annually that it has completed its requisite reviews and provide a narrative description on its risk evaluation, including how the compensation plans "do not encourage behavior focused on short-term results rather than long-term value creation," and how the committee and senior risk officers have limited risk inherent in compensation plans.

- Requires that the company adopt a company-wide excessive or luxury expenditure policy covering at least the following: entertainment or events; office and facility renovations; aviation and other transportation and other activities or events that are "reasonable" or "ordinary course." The Treasury Regulations further provide that each TARP recipient must adopt the policy within a certain time period and provide a copy of the policy to its primary regulatory authority and to the Treasury Department and also post the policy on its website. Any material modifications to the policy similarly must be disclosed.

- Requires that the company hold an annual non-binding shareholder vote to approve the compensation of executives, as disclosed pursuant to SEC disclosure rules ("Say on Pay").

- Authorizes the review of all prior payments of bonuses, retention awards and other compensation to determine whether the payments were inconsistent with TARP or otherwise contrary to public interest and to negotiate reimbursement of these payments. The Treasury Regulations establish the Office of the Special Master for TARP Executive Compensation (the "Special Master") and require the Special Master to, among other things, review prior bonuses, retention awards and other compensation paid before February 17, 2009 to any employee of a TARP recipient to "determine whether any such payments were inconsistent with the purposes of ... TARP, or otherwise contrary to public interest."

ARRA granted the Treasury Department authority to issue additional compensation and corporate governance

standards. Accordingly, the Treasury Regulations contain the following additional standards:

- TARP recipients must provide enhanced disclosure of any perquisite or other personal benefit exceeding \$25,000 annually that is provided to the top 25 highest paid employees. The disclosure must include a discussion of the amount and nature of the perquisite or other personal benefit and a justification for its provision.
- TARP recipients must provide an annual narrative description of whether the TARP recipient or its board of directors or compensation committee has engaged a compensation consultant and all types of services, including non-compensation related services, the consultant or any of its affiliates has provided to the TARP recipient or its governing bodies for the past three years.
- TARP recipients are prohibited from paying tax gross-ups to the top 25 highest paid employees, including promises to pay future tax gross-ups beyond the period the institution participate in TARP. The Treasury Regulations exclude tax equalization arrangements for employees subject to higher taxes in connection with overseas assignments.

These standards (other than Say on Pay, which became effective on February 17, 2009) became effective upon the publication of the Treasury Regulations in the Federal Register on June 15, 2009. As the Treasury Regulations remained open for public comment until August 14, 2009, some of the provisions may change from those originally enacted.

On July 31, 2009, the House of Representatives passed the Corporate and Financial Institution Compensation Fairness Act of 2009, H.R. 3269.³ The bill would require public companies to provide for an annual non-binding shareholder vote on executive compensation, as disclosed pursuant to SEC disclosure rules. It also would require companies to hold a separate non-binding vote on "golden parachute" payments for named executive officers in connection with shareholder votes on mergers and other corporate transactions "unless ... [the] agreements or arrangements [pursuant to which such payments are to be made] have been subject to a shareholder vote" under the provision requiring an annual advisory vote on the executive compensation of the named executive officers. The bill also includes requirements that (a) "covered financial institutions" (defined to include banks, bank holding companies, broker-dealers, credit unions and investment advisors, as well as any other financial institution subsequently identified by rule adopted jointly by several named federal agencies) disclose all compensation structures that include incentive-based elements, and (b) federal regulators proscribe inappropriate or imprudently risky compensation practices at such covered financial institutions. In addition, the bill includes a requirement that compensation committee members of public companies meet independence standards similar to those required for audit committee members and that compensation consultants satisfy certain independence criteria established by the SEC, each as discussed in Chapter 10 of this treatise. As of the date that this revision goes to press, the bill is pending in the Senate.

DEPARTMENT OF THE TREASURY**

Internal Revenue Service

§ 1.280G-1 Golden parachute payments.

The following questions and answers relate to the treatment of golden parachute payments under *section 280G of the Internal Revenue Code of 1986*, as added by section 67 of the Tax Reform Act of 1984 (Pub. L. No. 98-369; 98 Stat. 585) and amended by section 1804(j) of the Tax Reform Act of 1986 (Pub. L. No. 99-514; 100 Stat. 2807), section 1018(d)(6)-(8) of the Technical and Miscellaneous Revenue Act of 1988 (Pub. L. No. 100-647; 102 Stat. 3581), and section 1421 of the Small Business Job Protection Act of 1996 (Pub. L. No. 104-188; 110 Stat. 1755). The following is a table of subjects covered in this section:

Overview

Effect of section 280G--Q/A-1

Meaning of "parachute payment"--Q/A-2

Meaning of "excess parachute payment"--Q/A-3

Effective date of section 280G--Q/A-4

Exempt Payments

Exempt payments generally--Q/A-5

Exempt payments with respect to certain corporations--Q/A-6

Shareholder approval requirements--Q/A-7

Exempt payments under a qualified plan--Q/A-8

Exempt payments of reasonable compensation--Q/A-9

Payor of Parachute Payments--Q/A-10

Payments in the Nature of Compensation

The nature of compensation--Q/A-11

Property transfers--Q/A-12

Stock options--Q/A-13

Reduction of amount of payment by consideration paid--Q/A-14

Disqualified Individuals

Meaning of "disqualified individual"--Q/A-15

Personal service corporation treated as individual--Q/A-16

Meaning of "shareholder"--Q/A-17

Meaning of "officer"--Q/A-18

Meaning of "highly-compensated individual"--Q/A-19

Meaning of "disqualified individual determination period"--Q/A-20

Meaning of "compensation"--Q/A-21

Contingent on Change in Ownership or Control

General rules for determining payments contingent on change--Q/A-22

Payments under agreement entered into after change--Q/A-23

Amount of payment contingent on change--Q/A-24

Presumption that payment is contingent on change--Q/A-25, 26

Change in ownership or control--Q/A-27, 28, 29

Three-Times-Base-Amount Test for Parachute Payments

Three-times-base-amount test--Q/A-30

Determination of present value--Q/A-31, 32, 33

Meaning of "base amount"--Q/A-34

Meaning of "base period"--Q/A-35

Special rule for determining base amount--Q/A-36

Securities Violation Parachute Payments--Q/A-37

Computation and Reduction of Excess Parachute Payments

Computation of excess parachute payments--Q/A-38

Reduction by reasonable compensation--Q/A-39

Determination of Reasonable Compensation

General criteria for determining reasonable compensation--Q/A-40

Types of payments generally considered reasonable compensation--Q/A-41, 42, 43

Treatment of affiliated group as one corporation--Q/A-46

Effective Date

General effective date of section 280G--Q/A-47

Effective date of regulations--Q/A-48

Overview

Q-1: What is the effect of *Internal Revenue Code section 280G* ?

A-1: (a) Section 280G disallows a deduction for any excess parachute payment paid or accrued. For rules relating to the imposition of a nondeductible 20-percent excise tax on the recipient of any excess parachute payment, *see Internal Revenue Code sections 4999, 275(a)(6), and 3121(v)(2)(A)* .

(b)

The disallowance of a deduction under section 280G is not contingent on the imposition of the excise tax under section 4999. The imposition of the excise tax under section 4999 is not contingent on the disallowance of a deduction under section 280G. Thus, for example, because the imposition of the excise tax under section 4999 is not contingent on the disallowance of a deduction under section 280G, a payee may be subject to the 20-percent excise tax under section 4999 even though the disallowance of the deduction for the excess parachute payment may not directly affect the federal taxable income of the payor.

Q-2: What is a parachute payment for purposes of section 280G?

A-2: (a) The term parachute payment means any payment (other than an exempt payment described in Q/A-5) that--

- (1) Is in the nature of compensation;
- (2) Is made or is to be made to (or for the benefit of) a disqualified individual;
- (3) Is contingent on a change--

- (i) In the ownership of a corporation;

- (ii)

- In the effective control of a corporation; or

- (iii)

- In the ownership of a substantial portion of the assets of a corporation; and

- (4)

Has (together with other payments described in paragraphs (a)(1), (2), and (3) of this A-2 with respect to the same disqualified individual) an aggregate present value of at least 3 times the individual's base amount.

- (b)

Hereinafter, a change referred to in paragraph (a)(3) of this A-2 is generally referred to as a change in ownership or control. For a discussion of the application of paragraph (a)(1), *see* Q/A-11 through Q/A-14; paragraph (a)(2), Q/A-15 through Q/A-21; paragraph (a)(3), Q/A-22 through Q/A-29; and paragraph (a)(4), Q/A-30 through Q/A-36.

- (c)

The term parachute payment also includes any payment in the nature of compensation to (or for the benefit of) a disqualified individual that is pursuant to an agreement that violates a generally enforced securities law or regulation. This type of parachute payment is referred to in this section as a securities violation parachute payment. *See* Q/A-37 for the definition and treatment of securities violation parachute payments.

Q-3: What is an excess parachute payment for purposes of section 280G?

A-3: The term excess parachute payment means an amount equal to the excess of any parachute payment over the portion of the base amount allocated to such payment. Subject to certain exceptions and limitations, an excess parachute payment is reduced by any portion of the payment which the taxpayer establishes by clear and convincing evidence is reasonable compensation for personal services actually rendered by the disqualified individual before the date of the change in ownership or control. For a discussion of the nonreduction of a securities violation parachute payment by reasonable compensation, *see* Q/A-37. For a discussion of the computation of excess parachute payments and their reduction by reasonable compensation, *see* Q/A-38 through Q/A-44.

Q-4: What is the effective date of section 280G and this section?

A-4: In general, section 280G applies to payments under agreements entered into or renewed after June 14, 1984. Section 280G also applies to certain payments under agreements entered into on or before June 14, 1984, and amended or supplemented in significant relevant respect after that date. This section applies to any payment that is contingent on a change in ownership or control and the change in ownership or control occurs on or after January 1, 2004. For a discussion of the application of the effective date, *see* Q/A-47 and Q/A-48.

Exempt Payments

Q-5: Are some types of payments exempt from the definition of the term parachute payment?

A-5: (a) Yes, the following five types of payments are exempt from the definition of parachute payment--

(1)

Payments with respect to a small business corporation (described in Q/A-6 of this section);

(2)

Certain payments with respect to a corporation no stock in which is readily tradeable on an established securities market (or otherwise) (described in Q/A-6 of this section);

(3)

Payments to or from a qualified plan (described in Q/A-8 of this section);

(4)

Certain payments made by a corporation undergoing a change in ownership or control that is described in any of the following sections of the *Internal Revenue Code*: *section 501(c)* (but only if such organization is subject to an express statutory prohibition against inurement of net earnings to the benefit of any private shareholder or individual, or if the organization is described in section 501(c)(1) or section 501(c)(21)), section 501(d), or section 529, collectively referred to as tax-exempt organizations (described in Q/A-6 of this section); and

(5)

Certain payments of reasonable compensation for services to be rendered on or after the change in ownership or control (described in Q/A-9 of this section).

(b)

Deductions for payments exempt from the definition of parachute payment are not disallowed by section 280G, and such exempt payments are not subject to the 20-percent excise tax of section 4999. In addition, such exempt payments are not taken into account in applying the 3-times-base-amount test of Q/A-30 of this section.

Q-6: Which payments with respect to a corporation referred to in paragraph (a)(1), (a)(2), or (a)(4) of Q/A-5 of this section are exempt from the definition of parachute payment?

A-6: (a) The term parachute payment does not include--

(1)

Any payment to a disqualified individual with respect to a corporation which (immediately before the change in ownership or control) would qualify as a small business corporation (as defined in section 1361(b) but without regard to section 1361(b)(1)(C) thereof), without regard to whether the corporation had an election to be treated as a corporation under section 1361 in effect on the date of the change in ownership or control;

(2)

Any payment to a disqualified individual with respect to a corporation (other than a small business corporation described in paragraph (a)(1) of this A-6) if--

(i)

Immediately before the change in ownership or control, no stock in such corporation was readily tradeable on an established securities market or otherwise; and

(ii)

The shareholder approval requirements described in Q/A-7 of this section are met with respect to such payment; or

(3)

Any payment to a disqualified individual made by a corporation which is a tax-exempt organization (as defined in paragraph (a)(4) of Q/A-5 of this section), but only if the corporation meets the definition of a tax-exempt organization both immediately before and immediately after the change in ownership or control.

(b)

For purposes of paragraph (a)(1) of this A-6, the members of an affiliated group are not treated as one corporation.

(c)

The requirements of paragraph (a)(2)(i) of this A-6 are not met with respect to a corporation if a substantial portion of the assets of any entity consists (directly or indirectly) of stock in such corporation and any ownership interest in such entity is readily tradeable on an established securities market or otherwise. For this purpose, such stock constitutes a substantial portion of the assets of an entity if the total fair market value of the stock is equal to or exceeds one third of the total gross fair market value of all of the assets of the entity. For this purpose, gross fair market value means the value of the assets of the entity, determined without regard to any liabilities associated with such assets. If a corporation is a member of an affiliated group (which group is treated as one corporation under A-46 of this section), the requirements of paragraph (a)(2)(i) of this A-6 are not met if any stock in any member of such group is readily tradeable on an established securities market or otherwise.

(d)

For purposes of paragraph (a)(2)(i) of this A-6, the term stock does not include stock described in section 1504(a)(4) if the payment does not adversely affect the redemption and liquidation rights of any shareholder owning such stock.

(e)

For purposes of paragraph (a)(2)(i) of this A-6, stock is treated as readily tradeable if it is regularly quoted by brokers or dealers making a market in such stock.

(f)

For purposes of paragraph (a)(2)(i) of this A-6, the term established securities market means an established securities market as defined in § 1.897- 1(m).

(g)

The following examples illustrate the application of this exemption:

Example 1.

A small business corporation (within the meaning of paragraph (a)(1) of this A-6) operates two businesses. The corporation sells the assets of one of its businesses, and these assets represent a substantial portion of the assets of the corporation. Because of the sale, the corporation terminates its employment relationship with persons employed in the business the assets of which are sold. Several of these employees are highly-compensated individuals to whom the owners of the corporation make severance payments in excess of 3 times each employee's base amount. Since the corporation is a small business corporation immediately before the change in ownership or control, the payments are not parachute payments.

Example 2.

Assume the same facts as in Example 1, except that the corporation is not a small business corporation within the meaning of paragraph (a)(1) of this A-6. If no stock in the corporation is readily tradeable on an established securities market (or otherwise) immediately before the change in ownership or control and the shareholder approval requirements described in Q/A-7 of this section are met, the payments are not parachute payments.

Example 3.

Stock of Corporation S is owned by Corporation P, stock in which is readily tradeable on an established securities market. The Corporation S stock equals or exceeds one third of the total gross fair market value of the assets of Corporation P, and thus, represents a substantial portion of the assets of Corporation P. Corporation S makes severance payments to several of its highly-compensated individuals that are parachute payments under section 280G and Q/A-2 of this section. Because stock in Corporation P is readily tradeable on an established securities market, the payments are not exempt from the definition of parachute payments under this A-6.

Example 4.

A is a corporation described in section 501(c)(3), and accordingly, its net earnings are prohibited from inuring to the benefit of any private shareholder or individual. A transfers substantially all of its assets to another corporation resulting in a change in ownership or control. Contingent on the change in ownership or control, A makes a payment that, but for the potential application of the exemption described in A-5(a)(4), would constitute a parachute payment. However, one or more aspects of the transaction that constitutes the change in ownership or control causes A to fail to be described in section 501(c)(3). Accordingly, A fails to meet the definition of a tax-exempt organization both immediately before and immediately after the change in ownership or control, as required by this A-6. As a result, the payment made by A that was contingent on the change in ownership or control is not exempt from the definition of parachute payment under this A-6.

Example 5.

B is a corporation described in section 501(c)(15). B does not meet the definition of a tax-exempt organization because section 501(c)(15) does not expressly prohibit inurement of B's net earnings to the benefit of any private shareholder or individual. Accordingly, if B has a change in ownership or control and makes a payment that would otherwise meet the definition of a parachute payment, such payment is not exempt from the definition of the term parachute payment for purposes of this A-6.

Q-7: How are the shareholder approval requirements referred to in paragraph (a)(2)(ii) of Q/A-6 of this section met?

A-7: (a) General rule. The shareholder approval requirements referred to in paragraph (a)(2)(ii) of Q/A-6 of this section are met with respect to any payment if--

(1)

Such payment is approved by more than 75 percent of the voting power of all outstanding stock of the corporation entitled to vote (as described in this A-7) immediately before the change in ownership or control; and

(2)

Before the vote, there was adequate disclosure to all persons entitled to vote (as described in this A-7) of all material facts concerning all material payments which (but for Q/A-6 of this section) would be parachute payments with respect to a disqualified individual.

(b)

Voting requirements--(1) General rule. The vote described in paragraph (a)(1) of this A-7 must determine the right of the disqualified individual to receive the payment, or, in the case of a payment made before the vote, the right of the disqualified individual to retain the payment. Except as otherwise provided in this A-7, the normal voting rules of the corporation are applicable. Thus, for example, an optionholder is generally not permitted to vote for purposes of this A-7. For purposes of this A-7, the vote can be on less than the full amount of the payment(s) to be made. Shareholder approval can be a single vote on all payments to any one disqualified individual, or on all payments to more than one disqualified individual. The total payment(s) submitted for shareholder approval, however, must be separately approved by the shareholders. The requirements of this paragraph (b)(1) are not satisfied if approval of the change in ownership or control is contingent, or otherwise conditioned, on the approval of any payment to a disqualified individual that would be a parachute payment but for Q/A-6 of this section.

(2)

Special rule. A vote to approve the payment does not fail to be a vote of the outstanding stock of the corporation entitled to vote immediately before the change in ownership or control merely because the determination of the shareholders entitled to vote on the payment is based on the shareholders of record as of any day within the six-month period immediately prior to and ending on date of the change in ownership or control, provided the disclosure requirements described in paragraph (c) of this A-7 are met.

(3)

Entity shareholder. (i) Approval of a payment by any shareholder that is not an individual (an entity shareholder) generally must be made by the person authorized by the entity shareholder to approve the payment. *See* paragraph (b)(4) of this A-7 if the person so authorized by the entity shareholder is a disqualified individual who would receive a parachute payment if the shareholder approval requirements of this A-7 are not met.

(ii)

However, if a substantial portion of the assets of an entity shareholder consists (directly or indirectly) of stock in the corporation undergoing the change in ownership or control, approval of the payment by that entity shareholder must be made by a separate vote of the persons who hold, immediately before the change in ownership or control, more than 75 percent of the voting power of the entity shareholder entitled to vote. The preceding sentence does not apply if the value of the stock of the corporation owned, directly or indirectly, by or for the entity shareholder does not exceed 1 percent of the total value of the outstanding stock of the corporation undergoing a change in ownership or control. Where approval of a payment by an entity shareholder must be made by a separate vote of the owners of the entity shareholder, the normal voting rights of the entity shareholder determine which owners shall vote. For purposes of this (b)(3)(ii), stock represents a substantial portion of the assets of an entity shareholder if the total fair market value of the stock held by the entity shareholder in the corporation undergoing the change in ownership or control is equal to or exceeds one third of the total gross fair market value of all of the assets of the entity shareholder. For this purpose, gross fair market value means the value of the assets of the entity, determined without regard to any liabilities associated with such assets.

(4)

Disqualified individuals and attribution of stock ownership. In determining the persons entitled to vote referred to in paragraph (a)(1) or (b)(3) of this A-7, stock that would otherwise be entitled to vote is not counted as outstanding stock and is not considered in determining whether the more than 75 percent vote has been obtained under this A-7 if the stock is actually owned or constructively owned under section 318(a) by or for a disqualified individual who receives (or is to receive) payments that would be parachute payments if the shareholder approval requirements described in paragraph (a) of this A-7 are not met. Likewise, stock is not counted as outstanding stock if the owner is considered under section 318(a) to own any part of the stock owned directly or indirectly by or for a disqualified individual described in the preceding sentence. In addition, if the person authorized to vote the stock of an entity shareholder is a disqualified individual who would receive a parachute payment if the shareholder approval requirements described in this A-7 are not met, such person is not permitted to vote such shares, but the entity shareholder is permitted to appoint an equity interest holder in the entity shareholder, or in the case of a trust another person eligible to vote on behalf of the trust, to vote the otherwise eligible shares. However, if all persons who hold voting power in the corporation undergoing the change in ownership or control are disqualified individuals or related persons described in this paragraph (b)(4), then such stock is counted as outstanding stock and votes by such persons are considered in determining whether the more than 75 percent vote has been obtained.

(c)

Adequate disclosure. To be adequate disclosure for purposes of paragraph (a)(2) of this A-7, disclosure must be full and truthful disclosure of the material facts and such additional information as is necessary to make the disclosure not materially misleading at the time the disclosure is made. Disclosure of such information must be made to every shareholder of the corporation entitled to vote under this A-7. For each disqualified individual, material facts that must be disclosed include, but are not limited to, the event triggering the payment or payments, the total amount of the payments that would be parachute payments if the shareholder approval requirements described in paragraph (a) of this A-7 are not met, and a brief description of each payment (e.g., accelerated vesting of options, bonus, or salary). An omitted fact is considered a material fact if there is a substantial likelihood that a reasonable shareholder would consider it important.

(d)

Corporation without shareholders. If a corporation does not have shareholders, the exemption described in Q/A-6(a)(2) of this section and the shareholder approval requirements described in this A-7 do not apply. Solely for purposes of this paragraph (d), a shareholder does not include a member in an association, joint stock company, or insurance company.

(e)

Examples. The following examples illustrate the application of this A-7:

Example 1.

Corporation S has two shareholders--Corporation P, which owns 76 percent of the stock of Corporation S, and A, a disqualified individual who would receive a parachute payment if the shareholder approval requirements of this A-7 are not met. No stock of Corporation P or S is readily tradeable on an established securities market (or otherwise). The value of the stock of Corporation S equals or exceeds one third of the gross fair market value of the assets of Corporation P, and thus, represents a substantial portion of the assets of Corporation P. All of the stock of Corporation S is sold to Corporation M. Contingent on the change in ownership of Corporation S, severance payments are made to certain officers of Corporation S in excess of 3 times each officer's base amount. If the payments are approved by a separate vote of the persons who hold, immediately before the sale, more than 75 percent of the voting power of the outstanding stock entitled to vote of Corporation P and the disclosure rules of paragraph (a)(2) of this A-7 are complied with, the shareholder approval requirements of this A-7 are met, and the payments are exempt from the definition of parachute payment pursuant to A-6 of this section.

Example 2.

(i) Stock of Corporation X, none of which is traded on an established market, is acquired by Corporation Y. In the voting ballot concerning the sale, the Corporation X shareholders are asked to vote either "yes" on the sale and "yes" to paying parachute payments to A, a disqualified individual with respect to Corporation A, or "no" on the sale and "no" to paying parachute payments to A.

(ii)

Because the approval of the change in ownership or control is conditioned on the approval of the payments to A, the shareholder approval requirements of this A-7 are not satisfied. If the payments are made to A, the payments are not exempt from the definition of parachute payment pursuant to Q/A-6 of this section.

(iii)

Assume the same facts as in paragraph (i) of this Example 2, except that the acquisition agreement between Corporation X and Corporation Y states that the acquisition is approved only if there are no parachute payments made to A. If the shareholder approval and the disclosure requirements described in this A-7 are met, the payments will not be parachute payments. Alternatively, if the shareholders do not approve the payments, the payments cannot be made (or retained). Thus, the transaction is not conditioned on the approval of the parachute payments. If the payments are made and the requirements of this A-7 are met, the payments are exempt from the definition of parachute payment pursuant to Q/A-6 of this section.

Example 3.

Corporation M is wholly owned by Partnership P. No interest in either M or P is readily tradeable on an established securities market (or otherwise). The value of the stock of Corporation M equals or exceeds one third of the gross fair market value of the assets of Partnership P, and thus, represents a substantial portion of the assets of Partnership P. Corporation M undergoes a change in ownership or control. Partnership P has one general partner and 200 limited partners. The general partner is not a disqualified individual. None of the limited partners are entitled to vote on issues involving the management of the partnership investments. If the payments that would be parachute payments if the shareholder approval requirements of this A-7 are not met are approved by the general partner and the disclosure rules of paragraph (a)(2) of this A-7 are complied with, the shareholder approval requirements of this A-7 are met, and the payments are exempt from the definition of parachute payment pursuant to A-6 of this section.

Example 4.

Corporation A has several shareholders including X and Y, who are disqualified individuals with respect to Corporation A and would receive parachute payments if the shareholder approval requirements of this A-7 are not met. No stock of Corporation A is readily tradeable on an established securities market (or otherwise). Corporation A undergoes a change in ownership or control. Contingent on the change in ownership or control, severance payments are payable to X and Y that are in excess of 3 times each individual's base amount. To determine whether the shareholder approval requirements of paragraph (a)(1) of this A-7 are satisfied regarding the payments to X and Y, the stock of X and Y is not considered outstanding, and X and Y are not entitled to vote.

Example 5.

Assume the same facts as in Example 4, except that after adequate disclosure of all material facts (within the meaning of paragraph (a)(2) of this A-7) to all shareholders entitled to vote, 60 percent of the shareholders who are entitled to vote approve the payments to X and Y. Because more than 75 percent of the shareholders holding outstanding stock who were entitled to vote did not approve the payments to X and Y, the payments cannot be made.

Example 6.

Assume the same facts as in Example 4 except that disclosure of all the material facts (within the meaning of paragraph (a)(2) of this A-7) regarding the payments to X and Y is made to two of Corporation A's shareholders, who collectively own 80 percent of Corporation A's stock entitled to vote and approve the payment. Both shareholders approve the payments. Assume further that no adequate disclosure of the material facts regarding the payments to X and Y is made to other Corporation A shareholders who are entitled to vote within the meaning of this A-7. Notwithstanding that 80 percent of the shareholders entitled to vote approve the payments, because disclosure regarding the payments to X and Y is not made to all of Corporation A's shareholders who were entitled to vote, the disclosure requirements of paragraph (a)(2) of this A-7 are not met, and the payments are not exempt from the definition of parachute payment pursuant to Q/A-6.

Example 7.

Corporation C has three shareholders--Partnership, which owns 20 percent of the stock of Corporation C; A, an individual who owns 60 percent of the stock of Corporation C; and B, an individual who owns 20 percent of Corporation C. Stock of Corporation C does not represent a substantial portion of the assets of Partnership. No interest in either Partnership or Corporation C is readily tradeable on an established securities market (or otherwise). P, a one-third partner in Partnership, is a disqualified individual with respect to Corporation C. Corporation C undergoes a change in ownership or control. Contingent on the change, a severance payment is payable to P in excess of 3 times P's base amount. To determine the persons who are entitled to vote referred to in paragraph (a)(1) of this A-7, one-third of the stock held by

Partnership is not considered outstanding stock. If P is the person authorized by Partnership to approve the payment, none of the shares of Partnership are considered outstanding stock. However, Partnership is permitted to appoint an equity interest holder in Partnership (who is not a disqualified individual who would receive a parachute payment if the requirements of this A-7 are not met), to vote the two-thirds of the shares held by Partnership that are otherwise entitled to be voted.

Example 8.

X, Y, and Z are all employees and disqualified individuals with respect to Corporation E. No stock in Corporation E is readily tradeable on an established securities market (or otherwise). Each individual has a base amount of \$100,000. Corporation E undergoes a change in ownership or control. Contingent on the change, a severance payment of \$400,000 is payable to X; \$600,000 is payable to Y; and \$1,000,000 is payable to Z. Corporation E provides each Corporation E shareholder entitled to vote (as determined under this A-7) with a ballot listing and describing the payments of \$400,000 to X; \$600,000 to Y; and \$1,000,000 to Z and the triggering event that generated the payments. Next to each name and corresponding amount on the ballot, Corporation E requests approval (with a "yes" and "no" box) of each total payment to be made to each individual and states that if the payment is not approved the payment will not be made. Adequate disclosure, within the meaning of this A-7 is made to each shareholder entitled to vote under this A-7. More than 75 percent of the Corporation E shareholders who are entitled to vote under paragraph (a)(1) of this A-7 approve each payment to each individual. The shareholder approval requirements of this A-7 are met, and the payments are exempt from the definition of parachute payment pursuant to A-6 of this section.

Example 9.

Assume the same facts as in Example 8 except that the ballot does not request approval of each total payment to each individual separately. Instead, the ballot states that \$2,000,000 in payments will be made to X, Y, and Z and requests approval of the \$2,000,000 payments. Assuming the triggering event and amount of the payments to X, Y, and Z are separately described to the shareholders entitled to vote under this A-7, the shareholder approval requirements of paragraph (a)(1) of this A-7 are met, and the payments are exempt from the definition of parachute payment pursuant to A-6 of this section.

Example 10.

B, an employee of Corporation X, is a disqualified individual with respect to Corporation X. Stock of Corporation X is not readily tradeable on an established securities market (or otherwise). Corporation X undergoes a change in ownership or control. B's base amount is \$205,000. Under B's employment agreement with Corporation X, in the event of a change in ownership or control, B's stock options will vest and B will receive severance and bonus payments. Contingent on the change in ownership or control, B's stock options with a fair market value of \$500,000 immediately vest, \$200,000 of which is contingent on the change, and B will receive a \$200,000 bonus payment and a \$400,000 severance payment. Corporation X distributes a ballot to every shareholder of Corporation X who immediately before the change is entitled to vote as described in this A-7. The ballot contains adequate disclosure of all material facts and lists the following payments to be made to B: The contingent payment of \$200,000 attributable to options, a \$200,000 bonus payment, and a \$400,000 severance payment. The ballot requests shareholder approval of the \$200,000 bonus payment to B and states that whether or not the \$200,000 bonus payment is approved, B will receive \$200,000 attributable to options and a \$400,000 severance payment. More than 75 percent of the shareholders entitled to vote as described by this A-7 approve the \$200,000 bonus payment to B. The shareholder approval requirements of this A-7 are met, and the \$200,000 payment is exempt from the definition of parachute payment pursuant to A-6 of this section.

Q-8: Which payments under a qualified plan are exempt from the definition of parachute payment?

A-8: The term parachute payment does not include any payment to or from--

(a)

A plan described in section 401(a) which includes a trust exempt from tax under section 501(a);

(b)

An annuity plan described in section 403(a);

(c)

A simplified employee pension (as defined in section 408(k)); or

(d)

A simple retirement account (as defined in section 408(p)).

Q-9: Which payments of reasonable compensation are exempt from the definition of parachute payment?

A-9: Except in the case of securities violation parachute payments, the term parachute payment does not include any payment (or portion thereof) which the taxpayer establishes by clear and convincing evidence is reasonable compensation for personal services to be rendered by the disqualified individual on or after the date of the change in ownership or control. *See* Q/A- 37 of this section for the definition and treatment of securities violation parachute payments. *See* Q/A-40 through Q/A-44 of this section for rules on determining amounts of reasonable compensation.

Payor of Parachute Payments

Q-10: Who may be the payor of parachute payments?

A-10: Parachute payments within the meaning of Q/A-2 of this section may be paid, directly or indirectly, by--

(i)

The corporation referred to in paragraph (a)(3) of Q/A-2 of this section;

(ii)

A person acquiring ownership or effective control of that corporation or ownership of a substantial portion of that corporation's assets; or

(iii)

Any person whose relationship to such corporation or other person is such as to require attribution of stock ownership between the parties under section 318(a).

Payments in the Nature of Compensation

Q-11: What types of payments are in the nature of compensation?

A-11: (a) General rule. For purposes of this section, all payments--in whatever form--are payments in the nature of compensation if they arise out of an employment relationship or are associated with the performance of services. For this purpose, the performance of services includes holding oneself out as available to perform services and refraining from performing services (such as under a covenant not to compete or similar arrangement). Payments in the nature of compensation include (but are not limited to) wages and salary, bonuses, severance pay, fringe benefits, life insurance, pension benefits, and other deferred compensation (including any amount characterized by the parties as interest thereon). A payment in the nature of compensation also includes cash when paid, the value of the right to receive cash, or a transfer of property. However, payments in the nature of compensation do not include attorney's fees or court costs paid or incurred in connection with the payment of any amount described in paragraphs (a)(1), (2), and (3) of Q/A-2 of this section or a reasonable rate of interest accrued on any amount during the period the parties contest whether a payment will be made.

(b)

When payment is considered to be made. Except as otherwise provided in A-11 through Q/A-13 of this section, a payment in the nature of compensation is considered made (and is subject to the excise tax under section 4999) in the taxable year in which it is includible in the disqualified individual's gross income or, in the case of fringe benefits and other benefits excludible from income, in the taxable year the benefits are received.

(c)

Prepayment rule. Notwithstanding the general rule described in paragraph (b) of this A-11, a disqualified individual may, in the year of the change in ownership or control, or any later year, prepay the excise tax under section 4999, provided that the payor and disqualified individual treat the payment of the excise tax consistently and the payor satisfies its obligations under section 4999(c) in the year of prepayment. The prepayment of the excise tax for purposes of section 4999 must be based on the present value of the excise tax that would be due in the year the excess parachute payment would actually be paid (calculated using the discount rate equal to 120 percent of the applicable Federal rate (determined under section 1274(d) and regulations thereunder; *see* Q/A-32)). For purposes of projecting the future value of a payment that provides for interest to be credited at a variable interest rate, it is permissible to make a reasonable assumption regarding this variable rate. A disqualified individual is not required to adjust the excise tax paid under this paragraph (c) merely because the interest rates in the future are not the same as the rate used for purposes of projecting the future value of the payment. However, a disqualified individual may not apply this paragraph (c) of this A-11 to a payment to be made in cash if the present value of the payment would be considered not reasonably ascertainable under section 3121(v) and § 31.3121(v)(2)-1(e)(4) of this Chapter or to a payment related to health benefits or coverage. The Commissioner may provide additional guidance regarding the applicability of this paragraph (c) to certain payments in published guidance of general applicability under § 601.601(d)(2) of this Chapter.

(d)

Transfers of property. Transfers of property are treated as payments for purposes of this A-11. *See* Q/A-12 of this section for rules on determining when such payments are considered made and the amount of such payments. *See* Q/A-13 of this section for special rules on transfers of stock options.

(e)

The following example illustrates the principles of this A-11:

Example. D is a disqualified individual with respect to Corporation X. D has a base amount of \$100,000 and is entitled to receive two parachute payments, one of \$200,000 and the other of \$400,000. A change in ownership or control of Corporation X occurs on May 1, 2005, and the \$200,000 payment is made to D at the time of the change in ownership or control. The \$400,000 payment is to be made on October 1, 2010. Corporation X and D agree that D will prepay the excise tax and X will satisfy its obligations under section 4999(c) with respect to the \$400,000 payment. Using discount rate determined under Q/A-32, Corporation X and D determine that the present value of the \$400,000 payment is \$300,000 on the date of the change in ownership or control. The portions of the base amount allocated to these payments are \$40,000 ($(\$200,000/\$500,000) \times \$100,000$) and \$60,000 ($(\$300,000/\$500,000) \times \$100,000$), respectively. Thus, the amount of the first excess parachute payment is \$160,000 ($\$200,000 - \$40,000$) and that of the second excess parachute payment is \$340,000 ($\$400,000 - \$60,000$). The excise tax on the \$400,000 payment is \$68,000 ($\$340,000 \times 20$ percent). Assume the present value (calculated in accordance with paragraph (c) of this A-11) of \$68,000 is \$50,000. To prepay the excise tax due on the \$400,000 payment, Corporation X must satisfy its obligations under section 4999 with respect to the \$50,000, in addition to the \$32,000 withholding required with respect to the \$200,000 payment.

Q-12: If a property transfer to a disqualified individual is a payment in the nature of compensation, when is the payment considered made (or to be made), and how is the amount of the payment determined?

A-12: (a) Except as provided in this A-12 and Q/A-13 of this section, a transfer of property is considered a payment made (or to be made) in the taxable year in which the property transferred is includible in the gross income of the disqualified individual under section 83 and the regulations thereunder. Thus, in general, such a payment is considered made (or to be made) when the property is transferred (as defined in § 1.83-3(a)) to the disqualified individual and becomes substantially vested (as defined in § 1.83-3(b) and (j)) in such individual. The amount of the payment is determined under section 83 and the regulations thereunder. Thus, in general, the amount of the payment is equal to the excess of the fair market value of the transferred property (determined without regard to any lapse restriction, as defined in § 1.83-3(i)) at the time that the property becomes substantially vested, over the amount (if any) paid for the property.

(b)

An election made by a disqualified individual under section 83(b) with respect to transferred property will not apply for purposes of this A-12. Thus, even if such an election is made with respect to a property transfer that is a payment in the nature of compensation, for purposes of this section, the payment is generally considered made (or to be made) when the property is transferred to and becomes substantially vested in such individual.

(c)

See Q/A-13 of this section for rules on applying this A-12 to transfers of stock options.

(d)

The following example illustrates the principles of this A-12:

Example. On January 1, 2006, Corporation M gives to A, a disqualified individual, a bonus of 100 shares of Corporation M stock in connection with the performance of services to Corporation M. Under the terms of the bonus arrangement A is obligated to return the Corporation M stock to Corporation M unless the earnings of Corporation M double by January 1, 2009, or there is a change in ownership or control of Corporation M before that date. A's rights in the stock are treated as substantially nonvested (within the meaning of § 1.83-3(b)) during that period because A's rights in the stock are subject to a substantial risk of forfeiture (within the meaning of § 1.83-3(c)) and are nontransferable (within the meaning of § 1.83-3(d)). On January 1, 2008, a change in ownership or control of Corporation M occurs. On that day, the fair market value of the Corporation M stock is \$250 per share. Because A's rights in the Corporation M stock become substantially vested (within the meaning of § 1.83-3(b)) on that day, the payment is considered made on that day, and the amount of the payment for purposes of this section is equal to \$25,000 (100 x \$250). See Q/A-38 through 41 for rules relating to the reduction of the excess parachute payment by the portion of the payment which is established to be reasonable compensation for personal services actually rendered before the date of a change in ownership or control.

Q-13: How are transfers of statutory and nonstatutory stock options treated?

A-13: (a) For purposes of this section, an option (including an option to which section 421 applies) is treated as property that is transferred when the option becomes vested (regardless of whether the option has a readily ascertainable fair market value as defined in § 1.83-7(b)). For purposes of this A-13, vested means substantially vested within the meaning of § 1.83-3(b) and (j) or the right to the payment is not otherwise subject to a substantial risk of forfeiture within the meaning of section 83(c). Thus, for purposes of this section, the vesting of such an option is treated as a payment in the nature of compensation. The value of an option at the time the option vests is determined under all the facts and circumstances in the particular case. Factors relevant to such a determination include, but are not limited to: The difference between the option's exercise price and the value of the property subject to the option at the time of vesting; the probability of the value of such property increasing or decreasing; and the length of the period during which the option can be exercised. Thus, an option is treated as a payment in the nature of compensation on the date of grant or vesting, as applicable, without regard to whether such option has an ascertainable fair market value. For purposes of this A-13, valuation may be determined by any method prescribed by the Commissioner in published guidance of general applicability under § 601.601(d)(2) of this Chapter.

(b)

Any money or other property transferred to the disqualified individual on the exercise, or as consideration on the sale or other disposition, of an option described in paragraph (a) of this A-13 after the time such option vests is not treated as a payment in the nature of compensation to the disqualified individual under Q/A-11 of this section. Nonetheless, the amount of the otherwise allowable deduction under section 162 or 212 with respect to such transfer is reduced by the amount of the payment described in paragraph (a) of this A-13 treated as an excess parachute payment.

Q-14: Are payments in the nature of compensation reduced by consideration paid by the disqualified individual?

A-14: Yes, to the extent not otherwise taken into account under Q/A-12 and Q/A-13 of this section, the amount of any payment in the nature of compensation is reduced by the amount of any money or the fair market value of any property (owned by the disqualified individual without restriction) that is (or will be) transferred by the disqualified individual in exchange for the payment. For purposes of the preceding sentence, the fair market value of property is determined as of the date the property is transferred by the disqualified individual.

Disqualified Individuals

Q-15: Who is a disqualified individual?

A-15: (a) For purposes of this section, an individual is a disqualified individual with respect to a corporation if, at any time during the disqualified individual determination period (as defined in Q/A-20 of this section), the individual is an employee or independent contractor of the corporation and is, with respect to the corporation --

(1)

A shareholder (but *see* Q/A-17 of this section);

(2)

An officer (*see* Q/A-18 of this section); or

(3)

A highly-compensated individual (*see* Q/A-19 of this section).

(b)

For purposes of this A-15, a director is a disqualified individual with respect to a corporation if, at any time during the disqualified individual determination period, the director is, with respect to the corporation, a shareholder (*see* Q/A-17 of this section), an officer (*see* Q/A-18 of this section), or a highly-compensated individual (*see* Q/A-19 of this section).

(c)

For purposes of this A-15, an individual who is an employee or independent contractor of a corporation other than the corporation undergoing a change in ownership or control is disregarded for purposes of determining who is a disqualified individual if such individual is employed by the corporation undergoing the change in ownership or control only on the last day of the disqualified individual determination period. Thus, for example, assume that E is an employee of Corporation X, that Y is acquired by Corporation X, and that Y undergoes a change in ownership or control. If E becomes an employee of Y on the date of the acquisition, in determining the disqualified individuals with respect to Y, E is disregarded under this paragraph (c).

Q-16: Is a personal service corporation treated as an individual?

A-16: (a) Yes. For purposes of this section, a personal service corporation (as defined in section 269A(b)(1)), or a noncorporate entity that would be a personal service corporation if it were a corporation, is treated as an individual.

(b)

The following example illustrates the principles of this A-16:

Example. Corporation N, a personal service corporation (as defined in section 269A(b)(1)), has a single individual as its sole shareholder and employee. Corporation N performs personal services for Corporation M. The compensation paid to Corporation N by Corporation M puts Corporation N within the group of highly-compensated individuals of Corporation M as determined under A-19 of this section. Thus, Corporation N is treated as a highly-compensated individual with respect to Corporation M.

Q-17: Are all shareholders of a corporation considered shareholders for purposes of paragraphs (a)(1) and (b) of Q/A-15 of this section?

A-17: (a) No. Only an individual who owns stock of a corporation with a fair market value that exceeds 1 percent of the fair market value of the outstanding shares of all classes of the corporation's stock is treated as a disqualified individual with respect to the corporation by reason of stock ownership. An individual who owns a lesser amount of stock may, however, be a disqualified individual with respect to the corporation if such individual is an officer (*see* Q/A-18) or highly-compensated individual (*see* Q/A-19) with respect to the corporation.

(b)

For purposes of determining the amount of stock owned by an individual for purposes of paragraph (a) of this A-17, the constructive ownership rules of section 318(a) apply. Stock underlying a vested option is considered owned by an individual who holds the vested option (and the stock underlying an unvested option is not considered owned by an individual who holds the unvested option). For purposes of the preceding sentence, however, if the option is exercisable for stock that is not substantially vested (as defined by §§ 1.83-3(b) and (j)), the stock underlying the option is not treated as owned by the individual who holds the option. Solely for purposes of determining the amount of stock owned by an individual for purposes of this A-17, mutual and cooperative corporations are treated as having stock.

(c)

The following examples illustrates the principles of this A-17:

Example 1.

E, an employee of Corporation A, received options under Corporation A's Stock Option Plan. E's stock options vest three years after the date of grant. E is not an officer or highly compensated individual during the disqualified individual determination period. E does not own, and is not considered to own under section 318, any other Corporation A stock. Two years after the options are granted to E, all of Corporation A's stock is acquired by Corporation B. Under Corporation A's Stock Option Plan, E's options are converted to Corporation B options and the vesting schedule remains the same. Under paragraph (b) of this A-17, the stock underlying the unvested options held by E on the date of the change

in ownership or control is not considered owned by E. Because E is not considered to own Corporation A stock with a fair market value exceeding 1 percent of the total fair market value of all of the outstanding shares of all classes of Corporation A and E is not an officer or highly-compensated individual during the disqualified individual determination period, E is not a disqualified individual within the meaning of Q&A-15 of this section with respect to Corporation A.

Example 2.

Assume the same facts as in Example 1, except that Corporation A's Stock Option Plan provides that all unvested options will vest immediately on a change in ownership or control. Under paragraph (b) of this A-17, the stock underlying the options that vest on the change in ownership or control is considered owned by E. If the stock considered owned by E exceeds 1 percent of the total fair market value of all of the outstanding shares of all classes of Corporation A stock (including for this purpose, all stock owned or constructively owned by all shareholders, provided that no share of stock is counted more than once), E is a disqualified individual within the meaning of Q/A-15 of this section with respect to Corporation A.

Example 3.

Assume the same facts as in Example 1 except that E received nonstatutory stock options that are exercisable for stock subject to a substantial risk of forfeiture under section 83. Assume further that under Corporation A's Stock Option Plan, the nonstatutory options will vest on a change in ownership or control. Under paragraph (b) of this A-17, E is not considered to own the stock underlying the options that vest on the change in ownership or control because the options are exercisable for stock subject to a substantial risk of forfeiture within the meaning of section 83. Because E is not considered to own Corporation A stock with a fair market value exceeding 1 percent of the total fair market value of all of the outstanding shares of all classes of Corporation A stock and E is not an officer or highly compensated individual during the disqualified individual determination period, E is not a disqualified individual within the meaning of Q/A-15 of this section with respect to Corporation A.

Q-18: Who is an officer?

A-18: (a) For purposes of this section, whether an individual is an officer with respect to a corporation is determined on the basis of all the facts and circumstances in the particular case (such as the source of the individual's authority, the term for which the individual is elected or appointed, and the nature and extent of the individual's duties). Any individual who has the title of officer is presumed to be an officer unless the facts and circumstances demonstrate that the individual does not have the authority of an officer. However, an individual who does not have the title of officer may nevertheless be considered an officer if the facts and circumstances demonstrate that the individual has the authority of an officer. Generally, the term officer means an administrative executive who is in regular and continued service. The term officer implies continuity of service and excludes those employed for a special and single transaction.

(b)

An individual who is an officer with respect to any member of an affiliated group that is treated as one corporation pursuant to Q/A-46 of this section is treated as an officer of such one corporation.

(c)

No more than 50 employees (or, if less, the greater of 3 employees, or 10 percent of the employees (rounded up to the nearest integer)) of the corporation (in the case of an affiliated group treated as one corporation, each member of

the affiliated group) are treated as disqualified individuals with respect to a corporation by reason of being an officer of the corporation. For purposes of the preceding sentence, the number of employees of the corporation is the greatest number of employees the corporation has during the disqualified individual determination period (as defined in Q/A-20 of this section). If the number of officers of the corporation exceeds the number of employees who may be treated as officers under the first sentence of this paragraph (c), then the employees who are treated as officers for purposes of this section are the highest paid 50 employees (or, if less, the greater of 3 employees, or 10 percent of the employees (rounded up to the nearest integer)) of the corporation when ranked on the basis of compensation (as determined under Q/A-21 of this section) paid during the disqualified individual determination period.

(d)

In determining the total number of employees of a corporation for purposes of this A-18, employees are not counted if they normally work less than 17 1/2 hours per week (as defined in section 414(q)(5)(B) and the regulations thereunder) or if they normally work during not more than 6 months during any year (as defined in section 414(q)(5)(C) and the regulations thereunder). However, an employee who is not counted for purposes of the preceding sentence may still be an officer.

Q-19: Who is a highly-compensated individual?

A-19: (a) For purposes of this section, a highly-compensated individual with respect to a corporation is any individual who is, or would be if the individual were an employee, a member of the group consisting of the lesser of the highest paid 1 percent of the employees of the corporation (rounded up to the nearest integer), or the highest paid 250 employees of the corporation, when ranked on the basis of compensation (as determined under Q/A-21 of this section) earned during the disqualified individual determination period (as defined in Q/A-20 of this section). For purposes of the preceding sentence, the number of employees of the corporation is the greatest number of employees the corporation has during the disqualified individual determination period (as defined in Q/A-20 of this section). However, no individual whose annualized compensation during the disqualified individual determination period is less than the amount described in section 414(q)(1)(B)(i) for the year in which the change in ownership or control occurs will be treated as a highly-compensated individual.

(b)

An individual who is not an employee of the corporation is not treated as a highly-compensated individual with respect to the corporation on account of compensation received for performing services (such as brokerage, legal, or investment banking services) in connection with a change in ownership or control of the corporation, if the services are performed in the ordinary course of the individual's trade or business and the individual performs similar services for a significant number of clients unrelated to the corporation.

(c)

The total number of employees of a corporation for purposes of this A-19 is determined in accordance with Q/A-18(d) of this section. However, an employee who is not counted for purposes of the preceding sentence may still be a highly-compensated individual.

Q-20: What is the disqualified individual determination period?

A-20: The disqualified individual determination period is the twelve-month period prior to and ending on the date of the change in ownership or control of the corporation.

Q-21: How is compensation defined for purposes of determining who is a disqualified individual?

A-21: (a) For purposes of determining who is a disqualified individual, the term compensation means the compensation which was earned by the individual for services performed for the corporation with respect to which the change in ownership or control occurs (changed corporation), for a predecessor entity, or for a related entity. Such compensation is determined without regard to sections 125, 132(f)(4), 402(e)(3), and 402(h)(1)(B). Thus, for example, compensation includes elective or salary reduction contributions to a cafeteria plan, cash or deferred arrangement or tax-sheltered annuity, and amounts credited under a nonqualified deferred compensation plan.

(b)

For purposes of this A-21, a predecessor entity is any entity which, as a result of a merger, consolidation, purchase or acquisition of property or stock, corporate separation, or other similar business transaction transfers some or all of its employees to the changed corporation or to a related entity or to a predecessor entity of the changed corporation. The term related entity includes--

(1)

All members of a controlled group of corporations (as defined in section 414(b)) that includes the changed corporation or a predecessor entity;

(2)

All trades or businesses (whether or not incorporated) that are under common control (as defined in section 414(c)) if such group includes the changed corporation or a predecessor entity;

(3)

All members of an affiliated service group (as defined in section 414(m)) that includes the changed corporation or a predecessor entity; and

(4)

Any other entities required to be aggregated with the changed corporation or a predecessor entity pursuant to section 414(o) and the regulations thereunder (except leasing organizations as defined in section 414(n)).

(c)

For purposes of Q/A-18 and Q/A-19 of this section, compensation that was contingent on the change in ownership or control and that was payable in the year of the change is not treated as compensation.

Contingent on Change in Ownership or Control

Q-22: When is a payment contingent on a change in ownership or control?

A-22: (a) In general, a payment is treated as contingent on a change in ownership or control if the payment would not, in fact, have been made had no change in ownership or control occurred, even if the payment is also conditioned on the occurrence of another event. A payment generally is treated as one which would not, in fact, have been made in the absence of a change in ownership or control unless it is substantially certain, at the time of the change, that the payment would have been made whether or not the change occurred. (*But see* Q/A-23 of this section regarding payments under agreements entered into after a change in ownership or control.) A payment that becomes vested as a result of a change in ownership or control is not treated as a payment which was substantially certain to have been made whether or not the change occurred. For purposes of this A-22, vested means the payment is substantially vested within the meaning of § 1.83-3(b) and (j) or the right to the payment is not otherwise subject to a substantial risk of forfeiture as defined by section 83(c).

(b)

(1)

For purposes of paragraph (a), a payment is treated as contingent on a change in ownership or control if--

(i)

The payment is contingent on an event that is closely associated with a change in ownership or control;

(ii)

A change in ownership or control actually occurs; and

(iii)

The event is materially related to the change in ownership or control.

(2)

For purposes of paragraph (b)(1)(i) of this A-22, a payment is treated as contingent on an event that is closely associated with a change in ownership or control unless it is substantially certain, at the time of the event, that the payment would have been made whether or not the event occurred. An event is considered closely associated with a change in ownership or control if the event is of a type often preliminary or subsequent to, or otherwise closely

associated with, a change in ownership or control. For example, the following events are considered closely associated with a change in the ownership or control of a corporation: The onset of a tender offer with respect to the corporation; a substantial increase in the market price of the corporation's stock that occurs within a short period (but only if such increase occurs prior to a change in ownership or control); the cessation of the listing of the corporation's stock on an established securities market; the acquisition of more than 5 percent of the corporation's stock by a person (or more than one person acting as a group) not in control of the corporation; the voluntary or involuntary termination of the disqualified individual's employment; a significant reduction in the disqualified individual's job responsibilities; and a change in ownership or control as defined in the disqualified individual's employment agreement (or elsewhere) that does not meet the definition of a change in ownership or control described in Q/A-27, 28, or 29 of this section. Whether other events are treated as closely associated with a change in ownership or control is based on all the facts and circumstances of the particular case.

(3)

For purposes of determining whether an event (as described in paragraph (b)(2) of this A-22) is materially related to a change in ownership or control, the event is presumed to be materially related to a change in ownership or control if such event occurs within the period beginning one year before and ending one year after the date of the change in ownership or control. If such event occurs outside of the period beginning one year before and ending one year after the date of change in ownership or control, the event is presumed not materially related to the change in ownership or control. A payment does not fail to be contingent on a change in ownership or control merely because it is also contingent on the occurrence of a second event (without regard to whether the second event is closely associated with or materially related to a change in ownership or control). Similarly, a payment that is treated as contingent on a change in ownership or control because it is contingent on a closely associated event does not fail to be treated as contingent on a change in ownership or control merely because it is also contingent on the occurrence of a second event (without regard to whether the second event is closely associated with or materially related to a change in ownership or control).

(c)

A payment that would in fact have been made had no change in ownership or control occurred is treated as contingent on a change in ownership or control if the change in ownership or control (or the occurrence of an event that is closely associated with and materially related to a change in ownership or control within the meaning of paragraph (b)(1) of this A-22), accelerates the time at which the payment is made. Thus, for example, if a change in ownership or control accelerates the time of payment of deferred compensation that is vested without regard to the change in ownership or control, the payment may be treated as contingent on the change. *See* Q/A-24 of this section regarding the portion of a payment that is so treated. *See also* Q/A-8 of this section regarding the exemption for certain payments under qualified plans and Q/A-40 of this section regarding the treatment of a payment as reasonable compensation.

(d)

A payment is treated as contingent on a change in ownership or control even if the employment or independent contractor relationship of the disqualified individual is not terminated (voluntarily or involuntarily) as a result of the change.

(e)

The following examples illustrate the principles of this A-22:

Example 1.

A corporation grants a stock appreciation right to a disqualified individual, A, more than one year before a change in ownership or control. After the stock appreciation right vests and becomes exercisable, a change in ownership or control of the corporation occurs, and A exercises the right. Assuming neither the granting nor the vesting of the stock appreciation right is contingent on a change in ownership or control, the payment made on exercise is not contingent on the change in ownership or control.

Example 2.

A contract between a corporation and B, a disqualified individual, provides that a payment will be made to B if the corporation undergoes a change in ownership or control and B's employment with the corporation is terminated at any time over the succeeding 5 years. Eighteen months later, a change in the ownership of the corporation occurs. Two years after the change in ownership, B's employment is terminated and the payment is made to B. Because it was not substantially certain that the corporation would have made the payment to B on B's termination of employment if there had not been a change in ownership, the payment is treated as contingent on the change in ownership under paragraph (a) of this A-22. This is true even though B's termination of employment is presumed not to be, and in fact may not be, materially related to the change in ownership or control.

Example 3.

A contract between a corporation and C, a disqualified individual, provides that a payment will be made to C if C's employment is terminated at any time over the succeeding 3 years (without regard to whether or not there is a change in ownership or control). Eighteen months after the contract is entered into, a change in the ownership or control of the corporation occurs. Six months after the change in ownership or control, C's employment is terminated and the payment is made to C. Termination of employment is considered an event closely associated with a change in ownership or control. Because the termination occurred within one year after the date of the change in ownership or control, the termination of C's employment is presumed to be materially related to the change in ownership or control under paragraph (b)(3) of this A-22. If this presumption is not successfully rebutted, the payment will be treated as contingent on the change in ownership or control under paragraph (b) of this A-22.

Example 4.

A contract between a corporation and a disqualified individual, D, provides that a payment will be made to D upon the onset of a tender offer for shares of the corporation's stock. A tender offer is made on December 1, 2008, and the payment is made to D. Although the tender offer is unsuccessful, it leads to a negotiated merger with another entity on June 1, 2009, which results in a change in the ownership or control of the corporation. It was not substantially certain, at the time of the onset of the tender offer, that the payment would have been made had no tender offer taken place. The onset of a tender offer is considered closely associated with a change in ownership or control. Because the tender offer occurred within one year before the date of the change in ownership or control of the corporation, the onset of the tender offer is presumed to be materially related to the change in ownership or control. If this presumption is not rebutted, the payment will be treated as contingent on the change in ownership or control. If no change in ownership or control had occurred, the payment would not be treated as contingent on a change in ownership or control; however, the payment still could be a parachute payment under Q/A-37 of this section if the contract violated a generally enforced securities law or regulation.

Example 5.

A contract between a corporation and a disqualified individual, E, provides that a payment will be made to E if the corporation's level of product sales or profits reaches a specified level. At the time the contract was entered into, the parties had no reason to believe that such an increase in the corporation's level of product sales or profits would be preliminary or subsequent to, or otherwise closely associated with, a change in ownership or control of the corporation. Eighteen months later, a change in the ownership or control of the corporation occurs and within one year after the date of the change of ownership or control, the corporation's level of product sales or profits reaches the specified level. Under these facts and circumstances (and in the absence of contradictory evidence), the increase in product sales or profits of the corporation is not an event closely associated with the change in ownership or control of the corporation. Accordingly, even if the increase is materially related to the change in ownership or control, the payment will not be treated as contingent on a change in ownership or control.

Q-23: May a payment be treated as contingent on a change in ownership or control if the payment is made under an agreement entered into after the change?

A-23: (a) No. Payments are not treated as contingent on a change in ownership or control if they are made (or are to be made) pursuant to an agreement entered into after the change (a post-change agreement). For this purpose, an agreement that is executed after a change in ownership or control pursuant to a legally enforceable agreement that was entered into before the change is considered to have been entered into before the change. (*See* Q/A-9 of this section regarding the exemption for reasonable compensation for services rendered on or after a change in ownership or control.) If an individual has a right to receive a payment that would be a parachute payment if made under an agreement entered into prior to a change in ownership or control (pre-change agreement) and gives up that right as bargained-for consideration for benefits under a post-change agreement, the agreement is treated as a post-change agreement only to the extent the value of the payments under the agreement exceed the value of the payments under the pre-change agreement. To the extent payments under the agreement have the same value as the payments under the pre-change agreement, such payments retain their character as parachute payments subject to this section.

(b)

The following examples illustrate the principles of this A-23:

Example 1.

Assume that a disqualified individual is an employee of a corporation. A change in ownership or control of the corporation occurs, and thereafter the individual enters into an employment agreement with the acquiring company. Because the agreement is entered into after the change in ownership or control occurs, payments to be made under the agreement are not treated as contingent on the change.

Example 2.

Assume the same facts as in Example 1, except that the agreement between the disqualified individual and the acquiring company is executed after the change in ownership or control, pursuant to a legally enforceable agreement entered into before the change. Payments to be made under the agreement may be treated as contingent on the change in ownership or control pursuant to Q/A-22 of this section. However, *see* Q/A-9 of this section regarding the exemption from the definition of parachute payment for certain amounts of reasonable compensation.

Example 3.

Assume the same facts as in Example 1, except that prior to the change in ownership or control, the individual and corporation enter into an agreement under which the individual will receive parachute payments in the event of a change in ownership or control of the corporation. After the change, the

individual agrees to give up the right to payments under the pre-change agreement that would be parachute payments if made, in exchange for compensation under a new agreement with the acquiring corporation. Because the individual gave up the right to parachute payments under the pre-change agreement in exchange for other payments under the post-change agreement, payments in an amount equal to the parachute payments under the pre-change agreement are treated as contingent on the change in ownership or control under this A-23. Because the post-change agreement was entered into after the change, payments in excess of this amount are not treated as parachute payments.

Q-24: If a payment is treated as contingent on a change in ownership or control, is the full amount of the payment so treated?

A-24: (a)(1) General rule. Yes. If the payment is a transfer of property, the amount of the payment is determined under Q/A-12 or Q/A-13 of this section. For all other payments, the amount of the payment is determined under Q/A-11 of this section. However, in certain circumstances, described in paragraphs (b) and (c) of this A-24, only a portion of the payment is treated as contingent on the change. Paragraph (b) of this A-24 applies to a payment that is vested, without regard to the change in ownership or control, and is treated as contingent on the change in ownership or control because the change accelerates the time at which the payment is made. Paragraph (c) of this A-24 applies to a payment that becomes vested as a result of the change in ownership or control if, without regard to the change in ownership or control, the payment was contingent only on the continued performance of services for the corporation for a specified period of time and if the payment is attributable, at least in part, to services performed before the date the payment becomes vested. Paragraph (b) or (c) does not apply to any payment (or portion thereof) if the payment is treated as contingent on the change in ownership or control pursuant to Q/A-25 of this section. For purposes of this A-24, vested has the same meaning as provided in Q/A-22(a).

(2)

Reduction by reasonable compensation. The amount of a payment under paragraph (a)(1) of this A-24 is reduced by any portion of such payment that the taxpayer establishes by clear and convincing evidence is reasonable compensation for personal services rendered by the disqualified individual on or after the date of the change of control. *See* Q/A-9 and Q/A-38 through 44 of this section for rules concerning reasonable compensation. The portion of an amount treated as contingent under paragraph (b) or (c) of this A-24 may not be reduced by reasonable compensation.

(b)

Vested payments. This paragraph (b) applies if a payment is vested, without regard to the change in ownership or control, and is treated as contingent on the change in ownership or control because the change accelerates the time at which the payment is made. In such a case, the portion of the payment, if any, that is treated as contingent on the change in ownership or control is the amount by which the amount of the accelerated payment exceeds the present value of the payment absent the acceleration. If the value of such a payment absent the acceleration is not reasonably ascertainable, and the acceleration of the payment does not significantly increase the present value of the payment absent the acceleration, the present value of the payment absent the acceleration is treated as equal to the amount of the accelerated payment. If the value of the payment absent the acceleration is not reasonably ascertainable, but the acceleration significantly increases the present value of the payment, the future value of such payment is treated as equal to the amount of the accelerated payment. For rules on determining present value, *see* paragraph (e) of this A-24, Q/A-32, and Q/A-33 of this section.

(c)

(1)

Nonvested payments. This paragraph (c) applies to a payment that becomes vested as a result of the change in ownership or control to the extent that--

(i)

Without regard to the change in ownership or control, the payment was contingent only on the continued performance of services for the corporation for a specified period of time; and

(ii)

The payment is attributable, at least in part, to the performance of services before the date the payment is made or becomes certain to be made.

(2)

The portion of the payment subject to paragraph (c) of this A-24 that is treated as contingent on the change in ownership or control is the amount described in paragraph (b) of this A-24, plus an amount, as determined in paragraph (c)(4) of this A-24, to reflect the lapse of the obligation to continue to perform services. In no event can the portion of the payment treated as contingent on the change in ownership or control under this paragraph (c) exceed the amount of the accelerated payment, or, if the payment is not accelerated, the present value of the payment.

(3)

For purposes of this paragraph (c) of this A-24, the acceleration of the vesting of a stock option or the lapse of a restriction on restricted stock is considered to significantly increase the value of a payment.

(4)

The amount reflecting the lapse of the obligation to continue to perform services (described in paragraph (c)(2) of this A-24) is 1 percent of the amount of the accelerated payment multiplied by the number of full months between the date that the individual's right to receive the payment is vested and the date that, absent the acceleration, the payment would have been vested. This paragraph (c)(4) applies to the accelerated vesting of a payment in the nature of compensation even if the time at which the payment is made is not accelerated. In such a case, the amount reflecting the lapse of the obligation to continue to perform services is 1 percent of the present value of the future payment multiplied by the number of full months between the date that the individual's right to receive the payment is vested and the date that, absent the acceleration, the payment would have been vested.

(d)

Application of this A-24 to certain payments.-- (1) Benefits under a nonqualified deferred compensation plan. In the case of a payment of benefits under a nonqualified deferred compensation plan, paragraph (b) of this A-24 applies to the extent benefits under the plan are vested without regard to the change in ownership or control. Paragraph (c) of this A-24 applies to the extent benefits under the plan become vested as a result of the change in ownership or control and are attributable, at least in part, to the performance of services prior to vesting. Any other payment of benefits under a nonqualified deferred compensation plan is a payment in the nature of compensation subject to the general rule of paragraph (a) of this A-24 and the rules in Q/A-11 of this section.

(2)

Employment agreements. The general rule of paragraph (a) of this A-24 (and not the rules in paragraphs (b) or (c)) applies to the payment of amounts due under an employment agreement on a termination of employment or a change in ownership or control that otherwise would be attributable to the performance of services (or refraining from the performance of services) during any period that begins after the date of termination of employment or change in ownership or control, as applicable. For purposes of this paragraph (d)(2) of this A-24, an employment agreement means an agreement between an employee or independent contractor and employer or service recipient which describes, among other things, the amount of compensation or remuneration payable to the employee or independent contractor. *See* Q/A-42(b) and 44 of this section for the treatment of the remaining amounts of salary under an employment agreement.

(3)

Vesting due to an event other than services. Neither paragraph (b) nor (c) of this A-24 applies to a payment if (without regard to the change in ownership or control) vesting of the payment depends on an event other than the performance of services, such as the attainment of a performance goal, and the event does not occur prior to the change in ownership or control. In such circumstances, the full amount of the accelerated payment is treated as contingent on the change in ownership or control under paragraph (a) of this A- 24. However, *see* Q/A-39 of this section for rules relating to the reduction of the excess parachute payment by the portion of the payment which is established to be reasonable compensation for personal services actually rendered before the date of a change in ownership or control.

(e)

Present value. For purposes of this A-24, the present value of a payment is determined as of the date on which the accelerated payment is made.

(f)

Examples. The following examples illustrate the principles of this A-24:

(i)

Example 1. Corporation maintains a qualified plan and a nonqualified supplemental retirement plan (SERP) for its executives. Benefits under the SERP are not paid to participants until retirement. E, a disqualified individual with respect to Corporation, has a vested account balance of \$500,000 under the SERP. A change in ownership or control of Corporation occurs. The SERP provides that in the event of a change in ownership or control, all vested accounts will be paid to SERP participants.

(ii)

Because E was vested in \$500,000 of benefits under the SERP prior to the change in ownership or control and the change merely accelerated the time at which the payment was made to E, only a portion of the payment, as determined under paragraph (b) of this A-24, is treated as contingent on the change. Thus, the portion of the payment that is treated as contingent on the change is the amount by which the amount of the accelerated payment (\$500,000) exceeds the present value of the payment absent the acceleration.

(iii)

Assume the same facts as in paragraph (i) of this Example 1, except that E's account balance of \$500,000 is not vested. Instead, assume that E will vest in E's account balance of \$500,000 in 2 years if E continues to perform services for the next 2 years. Assume further that the SERP provides that all unvested SERP benefits vest immediately on a change in ownership or control and are paid to the participants. Because the vesting of the SERP payment, without regard to the change, depends only on the performance of services for a specified period of time and the payment is attributable, in part, to the performance of services before the change in ownership or control, only a portion of the \$500,000 payment, as determined under paragraph (c) of this A-24, is treated as contingent on the change. The portion of the payment that is treated as contingent on the change is the lesser of the amount of the accelerated payment or the amount by which the accelerated payment exceeds the present value of the payment absent the acceleration, plus an amount to reflect the lapse of the obligation to continue to perform services.

(iv)

Assume the same facts as in paragraph (i) of this Example 1, except that in addition to the pay out of the vested account balance of \$500,000 on the change in ownership or control, an additional \$70,000 will be credited to E's account and included in the payment to E. Because the \$500,000 was vested without regard to the change in ownership or control, paragraph (b) of this A-24 applies to the \$500,000 payment. Because the \$70,000 is not vested, without regard to the change, and is not attributable to the performance of services prior to the change, the entire \$70,000 payment is contingent on the change in ownership or control under paragraph (a) of this A-24.

(v)

Assume the same facts as in paragraph (i) of this Example 1, except that the benefit under the SERP is calculated using a percentage of final average compensation multiplied by years of service. If, contingent on the change in ownership or control, E is credited with additional years of service, an adjustment to final average compensation, or

an increase in the applicable percentage, any increase in the benefit payable under the SERP is not attributable to the performance of services prior to the change, and the entire increase in the benefit is contingent on the change in ownership or control under paragraph (a) of this A-24.

Example 2.

As a result of a change in the effective control of a corporation D, a disqualified individual with respect to the corporation, receives accelerated payment of D's vested account balance in a nonqualified deferred compensation account plan. Actual interest and other earnings on the plan assets are credited to each account as earned before distribution. Investment of the plan assets is not restricted in such a manner as would prevent the earning of a market rate of return on the plan assets. The date on which D would have received D's vested account balance absent the change in ownership or control is uncertain, and the rate of earnings on the plan assets is not fixed. Thus, the amount of the payment absent the acceleration is not reasonably ascertainable. Under these facts, acceleration of the payment does not significantly increase the present value of the payment absent the acceleration, and the present value of the payment absent the acceleration is treated as equal to the amount of the accelerated payment. Accordingly, no portion of the payment is treated as contingent on the change.

(i)

Example 3. On January 15, 2006, a corporation and a disqualified individual, F, enter into a contract providing for a retention bonus of \$500,000 to be paid to F on January 15, 2011. The payment of the bonus will be forfeited by F if F does not remain employed by the corporation for the entire 5-year period. However, the contract provides that the full amount of the payment will be made immediately on a change in ownership or control of the corporation during the 5-year period. On January 15, 2009, a change in ownership or control of the corporation occurs and the full amount of the payment (\$500,000) is made on that date to F. Under these facts, the payment of \$500,000 was contingent only on F's performance of services for a specified period and is attributable, in part, to the performance of services before the change in ownership or control. Therefore, only a portion of the payment, as determined under paragraph (c) of this A-24 is treated as contingent on the change. The portion of the payment that is treated as contingent on the change is the amount by which the amount of the accelerated payment (i.e., \$500,000, the amount paid to the individual because of the change in ownership) exceeds the present value of the payment that was expected to have been made absent the acceleration (i.e., \$406,838, the present value on January 15, 2009, of a \$500,000 payment on January 15, 2011), plus \$115,000 (1 percent x 23 months x \$500,000) which is the amount reflecting the lapse of the obligation to continue to perform services. Accordingly, the amount of the payment treated as contingent on the change in ownership or control is \$208,162, the sum of \$93,162 (\$500,000-\$406,838) + \$115,000). This result does not change if F actually remains employed until the end of the 5-year period.

(ii)

Assume the same facts as in paragraph (i) of this Example 3, except that the retention bonus will vest on the change in ownership or control, but will not be paid until January 15, 2011 (the original date in the contract). Because the payment of \$500,000 was contingent only on F's performance of services for a specified period and is attributable, in part, to the performance of services before the change in ownership or control, only a portion of the \$500,000 payment is treated as contingent on the change in ownership or control as determined under paragraph (c) of this A-24. Because there is accelerated vesting of the bonus, the portion of the payment treated as contingent on the change is the amount described in paragraph (b) of this A-27, which is \$0 under these facts, plus an amount reflecting the lapse of the obligation to continue to perform services which is \$93,573 (1 percent x 23 months x \$406,838 (the present value of a \$500,000 payment)).

(i)

Example 4. On January 15, 2006, a corporation gives to a disqualified individual, in connection with her performance of services to the corporation, a bonus of 1,000 shares of the corporation's stock. Under the terms of the bonus arrangement, the individual is obligated to return the stock to the corporation if she terminates her employment for any reason prior to January 15, 2011. However, if there is a change in the ownership or effective control of the corporation prior to January 15, 2011, she ceases to be obligated to return the stock. The individual's rights in the stock are treated as substantially nonvested (within the meaning of § 1.83-3(b) and (j)) during that period. On January 15, 2009, a change in the ownership of the corporation occurs. On that day, the fair market value of the stock is \$500,000.

(ii)

Under these facts, the payment was contingent only on performance of services for a specified period and is attributable, in part, to the performance of services before the change in ownership or control. Thus, only a portion of the payment, as determined under paragraph (c) of this A-24, is treated as contingent on the change in ownership or control. The portion of the payment that is treated as contingent on the change is the amount by which the present value of the accelerated payment on January 15, 2009 (\$500,000), exceeds the present value of the payment that was expected to have been made on January 15, 2011, plus an amount reflecting the lapse of the obligation to continue to perform services. At the time of the change, it cannot be reasonably ascertained what the value of the stock would have been on January 15, 2011. The acceleration of the lapse of a restriction on stock is treated as significantly increasing the value of the payment. Therefore, the value of such stock on January 15, 2011, is deemed to be \$500,000, the amount of the accelerated payment. The present value on January 15, 2009, of a \$500,000 payment to be made on January 15, 2011, is \$406,838. Thus, the portion of the payment treated as contingent on the change is \$208,162, the sum of \$93,162 (\$500,000-\$406,838), plus \$115,000 (1 percent x 23 months x \$500,000), the amount reflecting the lapse of the obligation to continue to perform services.

(i)

Example 5. On January 15, 2006, a corporation grants to a disqualified individual nonqualified stock options to purchase 30,000 shares of the corporation's stock. The options will be forfeited by the individual if he fails to perform personal services for the corporation until January 15, 2009. The options will, however, vest in the individual at an earlier date if there is a change in ownership or control of the corporation. On January 16, 2008, a change in the ownership or control of the corporation occurs and the options become vested in the individual. The value of the options on January 16, 2008, determined in accordance with Q/A-13, is \$600,000.

(ii)

The payment of the options to purchase 30,000 shares was contingent only on performance of services for the corporation until January 15, 2009, and is attributable, in part, to the performance of services before the change in ownership or control. Therefore, only a portion of the payment is treated as contingent on the change. The portion of the payment that is treated as contingent on the change is the amount by which the accelerated payment on January 16, 2008 (\$600,000) exceeds the present value on January 16, 2008, of the payment that was expected to have been made on January 15, 2009, absent the acceleration, plus an amount reflecting the lapse of the obligation to continue to

perform services. At the time of the change, it cannot be reasonably ascertained what the value of the options would have been on January 15, 2009. The acceleration of vesting in the options is treated as significantly increasing the value of the payment. Therefore, the value of such options on January 15, 2009, is deemed to be \$600,000, the amount of the accelerated payment. The present value on January 16, 2008, of a \$600,000 payment to be made on January 15, 2009, is \$549,964. Thus, the portion of the payment treated as contingent on the change is \$116,036, the sum of \$50,036 (\$600,000- \$549,964), plus an amount reflecting the lapse of the obligation to continue to perform services which is \$66,000 (1 percent x 11 months x \$600,000).

(i)

Example 6. Assume the same facts as in Example 5, except that the options become vested periodically (absent a change in ownership or control), with one- third of the options vesting on January 15, 2007, 2008, and 2009, respectively. Thus, options to purchase 20,000 shares vest independently of the January 16, 2008, change in ownership or control and the options to purchase the remaining 10,000 shares vest as a result of the change in ownership or control.

(ii)

The payment of the options to purchase 10,000 shares was contingent only on performance of services for the corporation until January 15, 2009, and is attributable, in part, to the performance of services before the change in ownership or control. Therefore, only a portion of the payment as determined under paragraph (c) of this A-24 is treated as contingent on the change in ownership or control. The portion of the payment that is treated as contingent on the change in ownership or control is the amount by which the accelerated payment on January 16, 2008 (\$200,000) exceeds the present value on January 16, 2008, of the payment that was expected to have been made on January 15, 2009, absent the acceleration, plus an amount reflecting the lapse of the obligation to perform services. At the time of the change in ownership or control, it cannot be reasonably ascertained what the value of the options would have been on January 15, 2009. The acceleration of vesting in the options is treated as significantly increasing the value of the payment. Therefore, the value of such options on January 15, 2009, is deemed to be \$200,000, the amount of the accelerated payment. The present value on January 16, 2008, of a \$200,000 payment to be made on January 15, 2009, is \$183,328.38. Thus, the portion of the payment treated as contingent on the change is \$38,671.62, the sum of \$16,671.62 (\$200,000-\$183,328.38), plus an amount reflecting the lapse of the obligation to continue to perform services which is \$22,000 (1 percent x 11 months x \$200,000).

Example 7.

Assume the same facts as in Example 5, except that the option agreement provides that the options will vest either on the corporation's level of profits reaching a specified level, or if earlier, on the date on which there is a change in ownership or control of the corporation. The corporation's level of profits do not reach the specified level prior to January 16, 2008. In such case, the full amount of the payment, \$600,000, is treated as contingent on the change in ownership or control under paragraph (a) of this A-24. Because the payment was not contingent only on the performance of services for the corporation for a specified period, the rules of paragraph (b) and (c) of this A-24 do not apply. *See* Q/A-39 of this section for rules relating to the reduction of the excess parachute payment by the portion of the payment which is established to be reasonable compensation for personal services actually rendered before the date of a change in ownership or control.

Example 8.

On January 1, 2005, E, a disqualified individual with respect to Corporation X, enters into an

employment agreement with Corporation X under which E will be paid wages of \$200,000 each year during the 5-year employment agreement. The employment agreement provides that if a change in ownership or control of Corporation X occurs, E will be paid the present value of the remaining salary under the employment agreement. On January 1, 2006, a change in ownership or control of Corporation X occurs, E is terminated, and E receives a payment of the present value of \$200,000 for each of the 4 years remaining under the employment agreement. Because the payment represents future salary under an employment agreement (i.e., amounts otherwise attributable to the performance of services for periods that begin after the termination of employment), the general rule of paragraph (a) of this A-24 applies to the payment and not the rules of paragraphs (b) and (c) of this A-24. *See* Q/A-42(c) and 44 of this section for the treatment of the remaining payments under an employment agreement.

Presumption That Payment Is Contingent on Change

Q-25: Is there a presumption that certain payments are contingent on a change in ownership or control?

A-25: Yes, for purposes of this section, any payment is presumed to be contingent on such a change unless the contrary is established by clear and convincing evidence if the payment is made pursuant to--

(a)

An agreement entered into within one year before the date of a change in ownership or control; or

(b)

An amendment that modifies a previous agreement in any significant respect, if the amendment is made within one year before the date of a change in ownership or control. In the case of an amendment described in paragraph (b) of this A-25, only the portion of any payment that exceeds the amount of such payment that would have been made in the absence of the amendment is presumed, by reason of the amendment, to be contingent on the change in ownership or control.

Q-26: How may the presumption described in Q/A-25 of this section be rebutted?

A-26: (a) To rebut the presumption described in Q/A-25 of this section, the taxpayer must establish by clear and convincing evidence that the payment is not contingent on the change in ownership or control. Whether the payment is contingent on such change is determined on the basis of all the facts and circumstances of the particular case. Factors relevant to such a determination include, but are not limited to, the content of the agreement or amendment and the circumstances surrounding the execution of the agreement or amendment, such as whether it was entered into at a time when a takeover attempt had commenced and the degree of likelihood that a change in ownership or control would actually occur. However, even if the presumption is rebutted with respect to an agreement, some or all of the payments under the agreement may still be contingent on the change in ownership or control pursuant to Q/A-22 of this section.

(b)

In the case of an agreement described in Q/A-25 of this section, clear and convincing evidence that the agreement is one of the three following types will generally rebut the presumption that payments under the agreement are contingent on the change in ownership or control--

(1)

A nondiscriminatory employee plan or program as defined in paragraph (c) of this A-26;

(2)

A contract between a corporation and an individual that replaces a prior contract entered into by the same parties more than one year before the change in ownership or control, if the new contract does not provide for increased payments (apart from normal increases attributable to increased responsibilities or cost of living adjustments), accelerate the payment of amounts due at a future time, or modify (to the individual's benefit) the terms or conditions under which payments will be made; or

(3)

A contract between a corporation and an individual who did not perform services for the corporation prior to the one year period before the change in ownership or control occurs, if the contract does not provide for payments that are significantly different in amount, timing, terms, or conditions from those provided under contracts entered into by the corporation (other than contracts that themselves were entered into within one year before the change in ownership or control and in contemplation of the change) with individuals performing comparable services.

(c)

For purposes of this section, the term nondiscriminatory employee plan or program means: a group term life insurance plan that meets the requirements of section 79(d); a self insured medical reimbursement plan that meets the requirements of section 105(h); a cafeteria plan (within the meaning of section 125); an educational assistance program (within the meaning of section 127); a dependent care assistance program (within the meaning of section 129); a no-additional-cost service (within the meaning of section 132(b)) or qualified employee discount (within the meaning of section 132(c)); a qualified retirement planning services program under section 132(m); an adoption assistance program (within the meaning of section 137); and such other items as provided by the Commissioner in published guidance of general applicability under § 601.601(d)(2). Payments under certain other plans are exempt from the definition of parachute payment under Q/A-8 of this section.

(d)

The following examples illustrate the application of the presumption:

Example 1.

A corporation and a disqualified individual who is an employee of the corporation enter into an employment contract. The contract replaces a prior contract entered into by the same parties more than one year before the change in ownership or control and the new contract does not provide for any increased payments other than a cost of living adjustment, does not accelerate the payment of amounts due at a future time, and does not modify (to the individual's benefit) the terms or conditions under which

payments will be made. Clear and convincing evidence of these facts rebuts the presumption described in A-25 of this section. However, payments under the contract still may be contingent on the change in ownership or control pursuant to Q/A-22 of this section.

Example 2.

Assume the same facts as in Example 1, except that the contract is entered into after a tender offer for the corporation's stock had commenced and it was likely that a change in ownership or control would occur and the contract provides for a substantial bonus payment to the individual upon his signing the contract. The individual has performed services for the corporation for many years, but previous employment contracts between the corporation and the individual did not provide for a similar signing bonus. One month after the contract is entered into, a change in the ownership or control of the corporation occurs. All payments under the contract are presumed to be contingent on the change in ownership or control even though the bonus payment would have been legally required even if no change had occurred. Clear and convincing evidence of these facts rebuts the presumption described in A-25 of this section with respect to all of the payments under the contract with the exception of the bonus payment (which is treated as contingent on the change). However, payments other than the bonus under the contract still may be contingent on the change in ownership or control pursuant to Q/A-22 of this section.

Example 3.

A corporation and a disqualified individual, who is an employee of the corporation, enter into an employment contract within one year of a change in ownership or control of the corporation. Under the contract, in the event of a change in ownership or control and subsequent termination of employment, certain payments will be made to the individual. A change in ownership or control occurs, but the individual is not terminated until 2 years after the change in ownership or control. If clear and convincing evidence does not rebut the presumption described in A-25 of this section, because the payment is made pursuant to an agreement entered into within one year of the date of the change in ownership or control, the payment is presumed contingent on the change under A-25 of this section. This is true even though A's termination of employment is presumed not to be materially related to the change in ownership or control under Q/A-22 of this section.

Change in Ownership or Control

Q-27: When does a change in the ownership of a corporation occur?

A-27: (a) For purposes of this section, a change in the ownership of a corporation occurs on the date that any one person, or more than one person acting as a group (as defined in paragraph (b) of this A-27), acquires ownership of stock of the corporation that, together with stock held by such person or group, has more than 50 percent of the total fair market value or total voting power of the stock of such corporation. However, if any one person, or more than one person acting as a group, is considered to own more than 50 percent of the total fair market value or total voting power of the stock of a corporation, the acquisition of additional stock by the same person or persons is not considered to cause a change in the ownership of the corporation (or to cause a change in the effective control of the corporation (within the meaning of Q/A-28 of this section)). An increase in the percentage of stock owned by any one person, or persons acting as a group, as a result of a transaction in which the corporation acquires its stock in exchange for property will be treated as an acquisition of stock for purposes of this section. This A-27 applies only when there is a transfer of stock of a corporation (or issuance of stock of a corporation) and stock in such corporation remains outstanding after the transaction. (See Q/A-29 for rules regarding the transfer of assets of a corporation).

(b)

For purposes of paragraph (a) of this A-27, persons will not be considered to be acting as a group merely because they happen to purchase or own stock of the same corporation at the same time, or as a result of the same public offering. However, persons will be considered to be acting as a group if they are owners of a corporation that enters into a merger, consolidation, purchase or acquisition of stock, or similar business transaction with the corporation. If a person, including an entity shareholder, owns stock in both corporations that enter into a merger, consolidation, purchase or acquisition of stock, or similar transaction, such shareholder is considered to be acting as a group with other shareholders in a corporation only with respect to the ownership in that corporation prior to the transaction giving rise to the change and not with respect to the ownership interest in the other corporation.

(c)

For purposes of this A-27 (and Q/A-28 and 29), section 318(a) applies to determine stock ownership. Stock underlying a vested option is considered owned by the individual who holds the vested option (and the stock underlying an unvested option is not considered owned by the individual who holds the unvested option). For purposes of the preceding sentence, however, if the option is exercisable for stock that is not substantially vested (as defined by sections 1.83-3(b) and (j)), the stock underlying the option is not treated as owned by the individual who holds the option. In addition, mutual and cooperative corporations are treated as having stock for purposes of this A-27.

(d)

The following examples illustrate the principles of this A-27:

Example 1.

Corporation M has owned stock with a fair market value equal to 19 percent of the value of the stock of Corporation N (an otherwise unrelated corporation) for many years prior to 2006. Corporation M acquires additional stock with a fair market value equal to 15 percent of the value of the stock of Corporation N on January 1, 2006, and an additional 18 percent on February 21, 2007. As of February 21, 2007, Corporation M has acquired stock with a fair market value greater than 50 percent of the value of the stock of Corporation N. Thus, a change in the ownership of Corporation N is considered to occur on February 21, 2007 (assuming that Corporation M did not have effective control of Corporation N immediately prior to the acquisition on that date).

Example 2.

All of the corporation's stock is owned by the founders of the corporation. The board of directors of the corporation decides to offer shares of the corporation to the public. After the public offering, the founders of the corporation own a total of 40 percent of the corporation's stock, and members of the public own 60 percent. If no one person (or more than one person acting as a group) owns more than 50 percent of the corporation's stock (by value or voting power) after the public offering, there is no change in the ownership of the corporation.

Example 3.

Corporation P merges into Corporation O (a previously unrelated corporation). In the merger, the shareholders of Corporation P receive Corporation O stock in exchange for their Corporation P stock. Immediately after the merger, the former shareholders of Corporation P own stock with a fair market value equal to 60 percent of the value of the stock of Corporation O, and the former shareholders of Corporation O own stock with a fair market value equal to 40 percent of the value of the stock of Corporation O. The former shareholders of Corporation P will be treated as acting as a group in their

acquisition of Corporation O stock. Thus, a change in the ownership of Corporation O occurs on the date of the merger. *See* Q/A-29, Example 3, regarding whether there is a change in ownership or control of P.

Example 4.

Assume the same facts as in Example 3, except that immediately after the change, the former shareholders of Corporation P own stock with a fair market value of 51 percent of the value of Corporation O stock and the former shareholders of Corporation O own stock with a fair market value equal to 49 percent of the value of Corporation O stock. Assume further that prior to the merger several Corporation O shareholders also owned Corporation P stock (overlapping shareholders). In the merger, those O shareholders received additional O stock by virtue of their ownership of P stock with a fair market value of 5 percent of the value of Corporation O stock. Including the O stock attributable to the P shares, the O shareholders hold 54 percent of O after the transaction. However, those overlapping shareholders that owned both Corporation O stock and Corporation P stock prior to the merger are treated as acting as a group with the Corporation O shareholders only with respect to their ownership interest in Corporation O prior to the transaction. Therefore, because the Corporation O shareholders owned 49 percent of the value of Corporation O stock, a change in the ownership of Corporation O occurs on the date of the merger. *See* Q/A-29, Example 3, regarding whether there is a change in ownership or control of P.

Example 5.

A, an individual, owns stock with a fair market value equal to 20 percent of the value of the stock of Corporation Q. On January 1, 2007, Corporation Q acquires in a redemption for cash all of the stock held by shareholders other than A. Thus, A is left as the sole shareholder of Corporation O. A change in ownership of Corporation O is considered to occur on January 1, 2007 (assuming that A did not have effective control of Corporation Q immediately prior to the redemption).

Example 6.

Assume the same facts as in Example 5, except that A owns stock with a fair market value equal to 51 percent of the value of all the stock of Corporation Q immediately prior to the redemption. There is no change in the ownership of Corporation Q as a result of the redemption.

Q-28: When does a change in the effective control of a corporation occur?

A-28: (a) Notwithstanding that a corporation has not undergone a change in ownership under Q/A-27, for purposes of this section, a change in the effective control of a corporation is presumed to occur on the date that either--

(1)

Any one person, or more than one person acting as a group (as determined under paragraph (e) of this A-28), acquires (or has acquired during the 12- month period ending on the date of the most recent acquisition by such person or persons) ownership of stock of the corporation possessing 20 percent or more of the total voting power of the stock of such corporation; or

(2)

A majority of members of the corporation's board of directors is replaced during any 12-month period by directors whose appointment or election is not endorsed by a majority of the members of the corporation's board of directors prior to the date of the appointment or election.

(b)

The presumption of paragraph (a) of this A-28 may be rebutted by establishing that such acquisition or acquisitions of the corporation's stock, or such replacement of the majority of the members of the corporation's board of directors, does not transfer the power to control (directly or indirectly) the management and policies of the corporation from any one person (or more than one person acting as a group) to another person (or group). For purposes of this section, in the absence of an event described in paragraph (a)(1) or (2) of this A-28, a change in the effective control of a corporation is presumed not to have occurred.

(c)

In no event does a change in effective control under this A-28 occur in any transaction in which either of the two corporations involved in the transaction has a change in ownership or control under Q/A-27 or 29 of this section. Thus, for example, assume Corporation P transfers more than one-third of the total gross fair market value of its assets to Corporation O in exchange for 20 percent of O's stock. Because P has undergone a change in ownership of a substantial portion of its assets under Q/A-29 of this section, O does not have a change in effective control under Q/A-28.

(d)

If any one person, or more than one person acting as a group, is considered to effectively control a corporation (within the meaning of this A- 28), the acquisition of additional control of the corporation by the same person or persons is not considered to cause a change in the effective control of the corporation (or to cause a change in the ownership of the corporation within the meaning of Q/A-27 of this section).

(e)

For purposes of this A-28, persons will not be considered to be acting as a group merely because they happen to purchase or own stock of the same corporation at the same time, or as a result of the same public offering. However, persons will be considered to be acting as a group if they are owners of a corporation that enters into a merger, consolidation, purchase or acquisition of stock, or similar business transaction with the corporation. If a person, including an entity shareholder, owns stock in both corporations that enter into a merger, consolidation, purchase or acquisition of stock, or similar transaction, such shareholder is considered to be acting as a group with other shareholders in a corporation only with respect to the ownership in that corporation prior to the transaction giving rise to the change and not with respect to the ownership interest in the other corporation.

(f)

For purposes of determining stock ownership, *see* Q/A-27(c).

(g)

The following examples illustrate the principles of this A-28:

Example 1.

Shareholder A acquired the following percentages of the voting stock of Corporation M (an otherwise unrelated corporation) on the following dates: 16 percent on January 1, 2005; 10 percent on January 10, 2006; 8 percent on February 10, 2006; 11 percent on March 1, 2007; and 8 percent on March 10, 2007. Thus, on March 10, 2007, A owns a total of 53 percent of M's voting stock. Because A did not acquire 20 percent or more of M's voting stock during any 12-month period, there is no presumption of a change in effective control pursuant to paragraph (a)(1) of this A-28. In addition, under these facts there is a presumption that no change in the effective control of Corporation M occurred. If this presumption is not rebutted (and thus no change in effective control of Corporation M is treated as occurring prior to March 10, 2007), a change in the ownership of Corporation M is treated as having occurred on March 10, 2007 (pursuant to Q/A-27 of this section) because A had acquired more than 50 percent of Corporation M's voting stock as of that date.

Example 2.

A minority group of shareholders of a corporation opposes the practices and policies of the corporation's current board of directors. A proxy contest ensues. The minority group presents its own slate of candidates for the board at the next annual meeting of the corporation's shareholders, and candidates of the minority group are elected to replace a majority of the current members of the board. A change in the effective control of the corporation is presumed to have occurred on the date the election of the new board of directors becomes effective.

Q-29: When does a change in the ownership of a substantial portion of a corporation's assets occur?

A-29: (a) For purposes of this section, a change in the ownership of a substantial portion of a corporation's assets occurs on the date that any one person, or more than one person acting as a group (as determined in paragraph (c) of this A-29), acquires (or has acquired during the 12-month period ending on the date of the most recent acquisition by such person or persons) assets from the corporation that have a total gross fair market value equal to or more than one-third of the total gross fair market value of all of the assets of the corporation immediately prior to such acquisition or acquisitions. For this purpose, gross fair market value means the value of the assets of the corporation, or the value of the assets being disposed of, determined without regard to any liabilities associated with such assets. This A-29 applies in any situation other than one involving the transfer of stock (or issuance of stock) in a parent corporation and stock in such corporation remains outstanding after the transaction. Thus, this A-29 applies to the sale of stock in a subsidiary (when that subsidiary is treated as a single corporation with the parent pursuant to Q/A-46) and to mergers involving the creation of a new corporation or with respect to the corporation that is not surviving entity.

(b)

(1) There is no change in ownership or control under this A-29 when there is a transfer to an entity that is controlled by the shareholders of the transferring corporation immediately after the transfer, as provided in this paragraph (b). A transfer of assets by a corporation is not treated as a change in the ownership of such assets if the assets are transferred to--

(i)

A shareholder of the corporation (immediately before the asset transfer) in exchange for or with respect to its

stock;

(ii)

An entity, 50 percent or more of the total value or voting power of which is owned, directly or indirectly, by the corporation;

(iii)

A person, or more than one person acting as a group, that owns, directly or indirectly, 50 percent or more of the total value or voting power of all the outstanding stock of the corporation; or

(iv)

An entity, at least 50 percent of the total value or voting power is owned, directly or indirectly, by a person described in paragraph (b)(1)(iii) of this A-29.

(2)

For purposes of paragraph (b) and except as otherwise provided, a person's status is determined immediately after the transfer of the assets. For example, a transfer to a corporation in which the transferor corporation has no ownership interest in before the transaction, but which is a majority-owned subsidiary of the transferor corporation after the transaction is not treated as a change in the ownership of the assets of the transferor corporation.

(c)

For purposes of this A-29, persons will not be considered to be acting as a group merely because they happen to purchase assets of the same corporation at the same time, or as a result of the same public offering. However, persons will be considered to be acting as a group if they are owners of a corporation that enters into a merger, consolidation, purchase or acquisition of assets, or similar business transaction with the corporation. If a person, including an entity shareholder, owns stock in both corporations that enter into a merger, consolidation, purchase or acquisition of stock, or similar transaction, such shareholder is considered to be acting as a group with other shareholders in a corporation only to the extent of the ownership in that corporation prior to the transaction giving rise to the change and not with respect to the ownership interest in the other corporation.

(d)

For purposes of determining stock ownership, *see* Q/A-27(c).

(e)

The following examples illustrate the principles of this A-29:

Example 1.

Corporation M acquires assets having a gross fair market value of \$500,000 from Corporation N (an unrelated corporation) on January 1, 2006. The total gross fair market value of Corporation N's assets immediately prior to the acquisition was \$3 million. Since the value of the assets acquired by Corporation M is less than one-third of the total gross fair market value of Corporation N's total assets immediately prior to the acquisition, the acquisition does not represent a change in the ownership of a substantial portion of Corporation N's assets.

Example 2.

Assume the same facts as in Example 1. Also assume that on November 1, 2006, Corporation M acquires from Corporation N additional assets having a fair market value of \$700,000. Thus, Corporation M has acquired from Corporation N assets worth a total of \$1.2 million during the 12-month period ending on November 1, 2006. Since \$1.2 million is more than one-third of the total gross fair market value of all of Corporation N's assets immediately prior to the earlier of these acquisitions (\$3 million), a change in the ownership of a substantial portion of Corporation N's assets is considered to have occurred on November 1, 2006.

(i)

Example 3. All of the assets of Corporation P are transferred to Corporation O (an unrelated corporation). In exchange, the shareholders of Corporation P receive Corporation O stock. Immediately after the transfer, the former shareholders of Corporation P own 60 percent of the fair market value of the outstanding stock of Corporation O and the former shareholders of Corporation O own 40 percent of the fair market value of the outstanding stock of Corporation O. Because Corporation O is an entity more than 50 percent of the fair market value of the outstanding stock of which is owned by the former shareholders of Corporation P (based on ownership of Corporation P prior the change), the transfer of assets is not treated as a change in ownership of a substantial portion of the assets of Corporation P. However, a change in the ownership (within the meaning of Q/A-27) of Corporation O occurs.

(ii)

The result in paragraph (i) would be the same if immediately after the change, the former shareholders of Corporation P own stock with a fair market value of 51 percent of the value of Corporation O stock because Corporation O is an entity more than 50 percent of the fair market value of the outstanding stock of which is owned by the former shareholders of Corporation P. *See* Q/A- 27, Example 4, regarding whether there is a change in ownership or control of O.

Example 4.

Corporation P sells all of the stock of its wholly-owned subsidiary, S, to Corporation Y. The fair market value of the affiliated group, determined without regard to its liabilities, is \$210 million. The fair market value of S, determined without regard to its liabilities, is \$80 million. Because there is a change in more than one-third of the gross fair market value of the total assets of the affiliated group, there is a change in the ownership of a substantial portion of the assets of the affiliated group.

Three-Times-Base-Amount Test for Parachute Payments

Q-30: Are all payments that are in the nature of compensation, are made to a disqualified individual, and are contingent on a change in ownership or control, parachute payments?

A-30: (a) No. To determine whether such payments are parachute payments, they must be tested against the individual's base amount (as defined in Q/A-34 of this section). To do this, the aggregate present value of all payments in the nature of compensation that are made or to be made to (or for the benefit of) the same disqualified individual and are contingent on the change in ownership or control must be determined. If this aggregate present value equals or exceeds the amount equal to 3 times the individual's base amount, the payments are parachute payments. If this aggregate present value is less than the amount equal to 3 times the individual's base amount, no portion of the payment is a parachute payment. *See* Q/A-31, Q/A-32, and Q/A-33 of this section for rules on determining present value. Parachute payments that are securities violation parachute payments are not included in the foregoing computation if they are not contingent on a change in ownership or control. *See* Q/A-37 of this section for the definition and treatment of securities violation parachute payments.

(b)

The following examples illustrate the principles of this A-30:

Example 1.

A is a disqualified individual with respect to Corporation M. A's base amount is \$100,000. Payments in the nature of compensation that are contingent on a change in the ownership or control of Corporation M totaling \$400,000 are made to A on the date of the change in ownership or control. The payments are parachute payments because they have an aggregate present value at least equal to 3 times A's base amount of \$100,000 ($3 \times \$100,000 = \$300,000$).

Example 2.

Assume the same facts as in Example 1, except that the payments contingent on the change in the ownership or control of Corporation M total \$290,000. Because the payments do not have an aggregate present value at least equal to 3 times A's base amount, no portion of the payments is a parachute payment.

Q-31: As of what date is the present value of a payment determined?

A-31: (a) Except as provided in this section, the present value of a payment is determined as of the date on which the change in ownership or control occurs, or, if a payment is made prior to such date, the date on which the payment is made.

(b)

(1)

For purposes of determining whether a payment is a parachute payment, if a payment in the nature of compensation is the right to receive payments in a year (or years) subsequent to the year of the change in ownership or control, the value of the payment is the present value of such payment (or payments) calculated in accordance with Q/A-32 of this section and based on reasonable actuarial assumptions.

(2)

If the payment in the nature of compensation is an obligation to provide health care, then for purposes of this A-31 and for applying the 3-times-base- amount test under Q/A-30 of this section, the present value of such obligation should be calculated in accordance with generally accepted accounting principles. For purposes of Q/A-30 and this A-31, the obligation to provide health care is permitted to be measured by projecting the cost of premiums for purchased health care insurance, even if no health care insurance is actually purchased. If the obligation to provide health care is made in coordination with a health care plan that the corporation makes available to a group, then the premiums used for this purpose may be group premiums.

Q-32: What discount rate is to be used to determine present value?

A-32: For purposes of this section, present value generally is determined by using a discount rate equal to 120 percent of the applicable Federal rate (determined under section 1274(d) and the regulations thereunder) compounded semiannually. The applicable Federal rate to be used for this purpose is the Federal rate that is in effect on the date as of which the present value is determined, using the period until the payment would have been made without regard to the change in ownership or control as the term of the debt instrument under section 1274(d). *See* Q/A-24 and 31 of this section. However, for any payment, the corporation and the disqualified individual may elect to use the applicable Federal rate that is in effect on the date that the contract which provides for the payment is entered into, if such election is made in the contract.

Q-33: If the present value of a payment to be made in the future is contingent on an uncertain future event or condition, how is the present value of the payment determined?

A-33: (a) In certain cases, it may be necessary to apply the 3-times-base- amount test of Q/A-30 of this section, or to allocate a portion of the base amount to a payment described in paragraphs (a)(1), (2), and (3) of Q/A-2 of this section, at a time when the aggregate present value of all such payments cannot be determined with certainty because the time, amount, or right to receive one or more such payments is contingent on the occurrence of an uncertain future event or condition. For example, a disqualified individual's right to receive a payment may be contingent on the involuntary termination of such individual's employment with the corporation. In such a case, it must be reasonably estimated whether the payment will be made. If it is reasonably estimated that there is a 50-percent or greater probability that the payment will be made, the full amount of the payment is considered for purposes of the 3-times-base-amount test and the allocation of the base amount. Conversely, if it is reasonably estimated that there is a less than 50-percent probability that the payment will be made, the payment is not considered for either purpose.

(b)

If the estimate made under paragraph (a) of this A-33 is later determined to be incorrect, the 3-times-base-amount test described in Q/A-30 of this section must be reapplied (and the portion of the base amount allocated to previous payments must be reallocated (if necessary) to such payments) to reflect the actual time and amount of the payment. Whenever the 3-times-base- amount test is applied (or whenever the base amount is allocated), the aggregate present value of the payments received or to be received by the disqualified individual is redetermined as of the date described in A-31 of this section, using the discount rate described in A-32 of this section. This redetermination may affect the amount of any excess parachute payment for a prior taxable year. Alternatively, if, based on the application of the 3-times- base-amount test without regard to the payment described in paragraph (a) of this A-33, a disqualified individual is determined to have an excess parachute payment or payments, then the 3-times-base-amount test does not have to be reapplied when a payment described in paragraph (a) of this A-33 is made

(or becomes certain to be made) if no base amount is allocated to such payment.

(c)

To the extent provided in published guidance of general applicability under § 601.601(d)(2) of this Chapter, an initial estimate of the value of an option subject to Q/A-13 of this section is permitted to be made, with the valuation subsequently re-determined, and the 3-times-base-amount test reapplied.

(d)

The following examples illustrate the principles of this A-33:

Example 1.

A, a disqualified individual with respect to Corporation M, has a base amount of \$100,000. Under A's employment agreement with Corporation M, A is entitled to receive a payment in the nature of compensation in the amount of \$250,000 contingent on a change in ownership or control of Corporation M. In addition, the agreement provides that if A's employment is terminated within 1 year after the change in ownership or control, A will receive an additional payment in the nature of compensation in the amount of \$150,000, payable 1 year after the date of the change in ownership or control. A change in ownership or control of Corporation M occurs and A receives the first payment of \$250,000. Corporation M reasonably estimates that there is a 50-percent probability that, as a result of the change, A's employment will be terminated within 1 year of the date of the change. For purposes of applying the 3-times-base-amount test (and if the first payment is determined to be a parachute payment, for purposes of allocating a portion of A's base amount to that payment), because M reasonably estimates that there is a 50-percent or greater probability that, as a result of the change, A's employment will be terminated within 1 year of the date of the change, Corporation M must assume that the \$150,000 payment will be made to A as a result of the change in ownership or control. The present value of the additional payment is determined under Q/A-31 and Q/A-32 of this section.

Example 2.

Assume the same facts as in Example 1, except that Corporation M reasonably estimates that there is a less than 50-percent probability that, as a result of the change, A's employment will be terminated within 1 year of the date of the change. For purposes of applying the 3-times-base-amount test, because Corporation M reasonably estimates that there is a less than 50-percent probability that, as a result of the change, A's employment will be terminated within 1 year of the date of the change, Corporation M must assume that the \$150,000 payment will not be made to A as a result of the change in ownership or control.

Example 3.

B, a disqualified individual with respect to Corporation P, has a base amount of \$200,000. Under B's employment agreement with Corporation P, if there is a change in ownership or control of Corporation P, B will receive a severance payment of \$600,000 and a bonus payment of \$400,000. In addition, the agreement provides that if B's employment is terminated within 1 year after the change, B will receive an additional payment in the nature of compensation of \$500,000. A change in ownership or control of Corporation P occurs, and B receives the \$600,000 and \$400,000 payments. At the time of the change in ownership or control, Corporation P reasonably estimates that there is a less than 50-percent probability that B's employment will be terminated within 1 year of the change. For purposes of applying the

3-times-base-amount test, because Corporation P reasonably estimates that there is a less than 50-percent probability that B's employment will be terminated within 1 year of the date of the change, Corporation P assumes that the \$500,000 payment will not be made to B. Eleven months after the change in ownership or control, B's employment is terminated, and the \$500,000 payment is made to B. Because B was determined to have excess parachute payments without regard to the \$500,000 payment, the 3-times-base-amount test is not reapplied and the base amount is not reallocated to include the \$500,000 payment. The entire \$500,000 payment is treated as an excess parachute payment.

Q-34: What is the base amount?

A-34: (a) The base amount of a disqualified individual is the average annual compensation for services performed for the corporation with respect to which the change in ownership or control occurs (or for a predecessor entity or a related entity as defined in Q/A-21 of this section) which was includible in the gross income of such individual for taxable years in the base period (including amounts that were excluded under section 911), or which would have been includible in such gross income if such person had been a United States citizen or resident. *See* Q/A-35 of this section for the definition of base period and for examples of base amount computations.

(b)

If the base period of a disqualified individual includes a short taxable year or less than all of a taxable year, compensation for such short or incomplete taxable year must be annualized before determining the average annual compensation for the base period. In annualizing compensation, the frequency with which payments are expected to be made over an annual period must be taken into account. Thus, any amount of compensation for such a short or incomplete taxable year that represents a payment that will not be made more often than once per year is not annualized.

(c)

Because the base amount includes only compensation that is includible in gross income, the base amount does not include certain items that constitute parachute payments. For example, payments in the form of excludible fringe benefits are not included in the base amount but may be treated as parachute payments.

(d)

The base amount includes the amount of compensation included in income under section 83(b) during the base period. *See* Q/A-35 for the definition of base period.

(e)

The following example illustrates the principles of this A-34:

Example. A disqualified individual, D, receives an annual salary of \$500,000 per year during the 5-year base period. D defers \$100,000 of D's salary each year under the corporation's nonqualified deferred compensation plan. D's base amount is \$400,000 ($\$400,000 \times (5/5)$).

Q-35: What is the base period?

A-35: (a) The base period of a disqualified individual is the most recent 5 taxable years of the individual ending before the date of the change in ownership or control. For this purpose, the date of the change in ownership or control is the date the corporation experiences one of the events described in Q/A-27, Q/A-28, or Q/A-29 of this section. However, if the disqualified individual was not an employee or independent contractor of the corporation with respect to which the change in ownership or control occurs (or a predecessor entity or a related entity as defined in Q/A-21 of this section) for this entire 5-year period, the individual's base period is the portion of such 5-year period during which the individual performed personal services for the corporation or predecessor entity or related entity.

(b)

The following examples illustrate the principles of Q/A-34 of this section and this Q/A-35:

Example 1.

A disqualified individual, D, was employed by a corporation for 2 years and 4 months preceding the taxable year in which a change in ownership or control of the corporation occurs. D's includible compensation income from the corporation was \$30,000 for the 4-month period, \$120,000 for the first full year, and \$150,000 for the second full year. D's base amount is \$120,000, $((3 \times \$30,000) + \$120,000 + \$150,000)/3$.

Example 2.

Assume the same facts as in Example 1, except that D also received a \$60,000 signing bonus when D's employment with the corporation commenced at the beginning of the 4-month period. D's base amount is \$140,000, $((\$60,000 + (3 \times \$30,000)) + \$120,000 + \$150,000) / 3$. Since the bonus will not be paid more often than once per year, the amount of the bonus is not increased in annualizing D's compensation for the 4-month period.

Example 3.

E is a disqualified individual with respect to Corporation X who was not an employee or independent contractor for the full 5-year base period. In 2004 and 2005, E is a director of X and receives \$30,000 per year for E's services. In 2006, E becomes an officer of X. E's includible compensation from Corporation X is \$250,000 for 2006 and 2007, and \$300,000 for 2008. In 2008, X undergoes a change in ownership or control. E's base amount is \$140,000 $((2 \times \$250,000) + (2 \times \$30,000)/4)$.

Q-36: How is the base amount determined in the case of a disqualified individual who did not perform services for the corporation (or a predecessor entity or a related entity as defined in Q/A-21 of this section), prior to the individual's taxable year in which the change in ownership or control occurs?

A-36: (a) In such a case, the individual's base amount is the annualized compensation for services performed for the corporation (or a predecessor entity or related entity) which--

(1)

Was includible in the individual's gross income for that portion, prior to such change, of the individual's taxable year in which the change occurred (including amounts that were excluded under section 911), or would have been includible in such gross income if such person had been a United States citizen or resident;

(2)

Was not contingent on the change in ownership or control; and

(3)

Was not a securities violation parachute payment.

(b)

The following examples illustrate the principles of this A-36:

Example 1.

On January 1, 2006, A, an individual whose taxable year is the calendar year, enters into a 4-year employment contract with Corporation M as an officer of the corporation. A has not previously performed services for Corporation M (or any predecessor entity or related entity as defined in Q/A-21 of this section). Under the employment contract, A is to receive an annual salary of \$120,000 for each of the 4 years that he remains employed by Corporation M with any remaining unpaid balance to be paid immediately in the event that A's employment is terminated without cause. On July 1, 2006, after A has received compensation of \$60,000, a change in the ownership or control of Corporation M occurs. Because of the change, A's employment is terminated without cause, and he receives a payment of \$420,000. It is established by clear and convincing evidence that the \$60,000 in compensation is not contingent on the change in ownership or control, but the presumption that the \$420,000 payment is contingent on the change is not rebutted. Thus, the payment of \$420,000 is treated as contingent on the change in ownership or control of Corporation M. In this case, A's base amount is \$120,000 (2 x \$60,000). Since the present value of the payment which is contingent on the change in ownership of Corporation M (\$420,000) is more than 3 times A's base amount of \$120,000 (3 x \$120,000 = \$360,000), the payment is a parachute payment.

Example 2.

Assume the same facts as in Example 1, except that A also receives a signing bonus of \$50,000 from Corporation M on January 1, 2006. It is established by clear and convincing evidence that the bonus is not contingent on the change in ownership or control. When the change in ownership or control occurs on July 1, 2006, A has received compensation of \$110,000 (the \$50,000 bonus plus \$60,000 in salary). In this case, A's base amount is \$170,000 (\$50,000 + (2 x \$60,000)). Because the \$50,000 bonus will not be paid more than once per year, the amount of the bonus is not increased in annualizing A's compensation. The present value of the potential parachute payment (\$420,000) is less than 3 times A's base amount of \$170,000 (3 x \$170,000 = \$510,000), and therefore no portion of the payment is a parachute payment.

Securities Violation Parachute Payments

Q-37: Must a payment be contingent on a change in ownership or control in order to be a parachute payment?

A-37: (a) No, the term parachute payment also includes any payment (other than a payment exempted under Q/A-6 or Q/A-8 of this section) that is in the nature of compensation and is to (or for the benefit of) a disqualified individual, if such payment is a securities violation payment. A securities violation payment is a payment made or to be

made--

(1)

Pursuant to an agreement that violates any generally enforced Federal or state securities laws or regulations;
and

(2)

In connection with a potential or actual change in ownership or control.

(b)

A violation is not taken into account under paragraph (a)(1) of this A-37 if it is merely technical in character or is not materially prejudicial to shareholders or potential shareholders. Moreover, a violation will be presumed not to exist unless the existence of the violation has been determined or admitted in a civil or criminal action (or an administrative action by a regulatory body charged with enforcing the particular securities law or regulation) which has been resolved by adjudication or consent. Parachute payments described in this A-37 are referred to in this section as securities violation payments.

(c)

Securities violation parachute payments that are not contingent on a change in ownership or control within the meaning of Q/A-22 of this section are not taken into account in applying the 3-times-base-amount test of Q/A-30 of this section. Such payments are considered parachute payments regardless of whether such test is met with respect to the disqualified individual (and are included in allocating base amount under Q/A-38 of this section). Moreover, the amount of a securities violation parachute payment treated as an excess parachute payment shall not be reduced by the portion of such payment that is reasonable compensation for personal services actually rendered before the date of a change in ownership or control if such payment is not contingent on such change. Likewise, the amount of a securities violation parachute payment includes the portion of such payment that is reasonable compensation for personal services to be rendered on or after the date of a change in ownership or control if such payment is not contingent on such change.

(d)

The rules in paragraph (b) of this A-37 also apply to securities violation parachute payments that are contingent on a change in ownership or control if the application of these rules results in greater total excess parachute payments with respect to the disqualified individual than would result if the payments were treated simply as payments contingent on a change in ownership or control (and hence were taken into account in applying the 3-times-base-amount test and were reduced by, or did not include, any applicable amount of reasonable compensation).

(e)

The following examples illustrate the principles of this A-37:

Example 1.

A, a disqualified individual with respect to Corporation M, receives two payments in the nature of compensation that are contingent on a change in the ownership or control of Corporation M. The present value of the first payment is equal to A's base amount and is not a securities violation parachute payment. The present value of the second payment is equal to 1.5 times A's base amount and is a securities violation parachute payment. Neither payment includes any reasonable compensation. If the second payment is treated simply as a payment contingent on a change in ownership or control, the amount of A's total excess parachute payments is zero because the aggregate present value of the payments does not equal or exceed 3 times A's base amount. If the second payment is treated as a securities violation parachute payment subject to the rules of paragraph (b) of this A-37, the amount of A's total excess parachute payments is 0.5 times A's base amount. Thus, the second payment is treated as a securities violation parachute payment.

Example 2.

Assume the same facts as in Example 1, except that the present value of the first payment is equal to 2 times A's base amount. If the second payment is treated simply as a payment contingent on a change in ownership or control, the total present value of the payments is 3.5 times A's base amount, and the amount of A's total excess parachute payments is 2.5 times A's base amount. If the second payment is treated as a securities violation parachute payment, the amount of A's total excess parachute payments is 0.5 times A's base amount. Thus, the second payment is treated simply as a payment contingent on a change in ownership or control.

Example 3.

B, a disqualified individual with respect to Corporation N, receives two payments in the nature of compensation that are contingent on a change in the control of Corporation N. The present value of the first payment is equal to 4 times B's base amount and is a securities violation parachute payment. The present value of the second payment is equal to 2 times B's base amount and is not a securities violation parachute payment. B establishes by clear and convincing evidence that the entire amount of the first payment is reasonable compensation for personal services to be rendered after the change in ownership or control. If the first payment is treated simply as a payment contingent on a change in ownership or control, it is exempt from the definition of parachute payment pursuant to Q/A-9 of this section. Thus, the amount of B's total excess parachute payment is zero because the present value of the second payment does not equal or exceed 3 times B's base amount. However, if the first payment is treated as a securities violation parachute payment, the amount of B's total excess parachute payments is 3 times B's base amount. Thus, the first payment is treated as a securities violation parachute payment.

Example 4.

Assume the same facts as in Example 3, except that B does not receive the second payment and B establishes by clear and convincing evidence that the first payment is reasonable compensation for services actually rendered before the change in the control of Corporation N. If the payment is treated simply as a payment contingent on a change in ownership or control, the amount of B's excess parachute payment is zero because the amount treated as an excess parachute payment is reduced by the amount that B establishes as reasonable compensation. However, if the payment is treated as a securities violation parachute payment, the amount of B's excess parachute payment is 3 times B's base amount. Thus, the payment is treated as a securities violation parachute payment.

Computation and Reduction of Excess Parachute Payments

Q-38: How is the amount of an excess parachute payment computed?

A-38: (a) The amount of an excess parachute payment is the excess of the amount of any parachute payment over the portion of the disqualified individual's base amount that is allocated to such payment. For this purpose, the portion of the base amount allocated to any parachute payment is the amount that bears the same ratio to the base amount as the present value of such parachute payment bears to the aggregate present value of all parachute payments made or to be made to (or for the benefit of) the same disqualified individual. Thus, the portion of the base amount allocated to any parachute payment is determined by multiplying the base amount by a fraction, the numerator of which is the present value of such parachute payment and the denominator of which is the aggregate present value of all such payments. *See* Q/A-31, Q/A-32, and Q/A-33 of this section for rules on determining present value and Q/A-34 of this section for the definition of base amount.

(b)

The following example illustrates the principles of this A-38:

Example. An individual with a base amount of \$100,000 is entitled to receive two parachute payments, one of \$200,000 and the other of \$400,000. The \$200,000 payment is made at the time of the change in ownership or control, and the \$400,000 payment is to be made at a future date. The present value of the \$400,000 payment is \$300,000 on the date of the change in ownership or control. The portions of the base amount allocated to these payments are \$40,000 ($(\$200,000/\$500,000) \times \$100,000$) and \$60,000 ($(\$300,000/\$500,000) \times \$100,000$), respectively. Thus, the amount of the first excess parachute payment is \$160,000 ($\$200,000 - \$40,000$) and that of the second is \$340,000 ($\$400,000 - \$60,000$).

Q-39: May the amount of an excess parachute payment be reduced by reasonable compensation for personal services actually rendered before the change in ownership or control?

A-39: (a) Generally, yes. Except in the case of payments treated as securities violation parachute payments or when the portion of a payment that is treated as contingent on the change in ownership or control is determined under paragraph (b) or (c) of Q/A-24 of this section, the amount of an excess parachute payment is reduced by any portion of the payment that the taxpayer establishes by clear and convincing evidence is reasonable compensation for personal services actually rendered by the disqualified individual before the date of the change in ownership or control. Services reasonably compensated for by payments that are not parachute payments (for example, because the payments are not contingent on a change in ownership or control and are not securities violation parachute payments, or because the payments are exempt from the definition of parachute payment under Q/A-6 through Q/A-9 of this section) are not taken into account for this purpose. The portion of any parachute payment that is established as reasonable compensation is first reduced by the portion of the disqualified individual's base amount that is allocated to such parachute payment; any remaining portion of the parachute payment established as reasonable compensation then reduces the excess parachute payment.

(b)

The following examples illustrate the principles of this A-39:

Example 1.

Assume that a parachute payment of \$600,000 is made to a disqualified individual, and the portion of the individual's base amount that is allocated to the parachute payment is \$100,000. Also assume that \$300,000 of the \$600,000 parachute payment is established as reasonable compensation for personal

services actually rendered by the disqualified individual before the date of the change in ownership or control. Before the reasonable compensation is taken into account, the amount of the excess parachute payment is \$500,000 (\$600,000--\$100,000). In reducing the excess parachute payment by reasonable compensation, the portion of the parachute payment that is established as reasonable compensation (\$300,000) is first reduced by the portion of the disqualified individual's base amount that is allocated to the parachute payment (\$100,000), and the remainder (\$200,000) then reduces the excess parachute payment. Thus, in this case, the excess parachute payment of \$500,000 is reduced by \$200,000 of reasonable compensation.

Example 2.

Assume the same facts as in Example 1, except that the full amount of the \$600,000 parachute payment is established as reasonable compensation. In this case, the excess parachute payment of \$500,000 is reduced to zero by \$500,000 of reasonable compensation. As a result, no portion of any deduction for the payment is disallowed by section 280G, and no portion of the payment is subject to the 20-percent excise tax of section 4999.

Determination of Reasonable Compensation

Q-40: How is it determined whether payments are reasonable compensation?

A-40: (a) In general, whether payments are reasonable compensation for personal services actually rendered, or to be rendered, by the disqualified individual is determined on the basis of all the facts and circumstances of the particular case. Factors relevant to such a determination include, but are not limited to, the following--

(1)

The nature of the services rendered or to be rendered;

(2)

The individual's historic compensation for performing such services; and

(3)

The compensation of individuals performing comparable services in situations where the compensation is not contingent on a change in ownership or control.

(b)

For purposes of section 280G, reasonable compensation for personal services includes reasonable compensation for holding oneself out as available to perform services and refraining from performing services (such as under a covenant not to compete).

Q-41: Is any particular type of evidence generally considered clear and convincing evidence of reasonable

compensation for personal services?

A-41: Yes. A showing that payments are made under a nondiscriminatory employee plan or program (as defined in Q/A-26 of this section) generally is considered to be clear and convincing evidence that the payments are reasonable compensation. This is true whether the personal services for which the payments are made are actually rendered before, or are to be rendered on or after, the date of the change in ownership or control. Q/A-46 of this section (relating to the treatment of an affiliated group as one corporation) does not apply for purposes of this A-41. No determination of reasonable compensation is needed for payments under qualified plans to be exempt from the definition of parachute payment under Q/A-8 of this section.

Q-42: Is any particular type of evidence generally considered clear and convincing evidence of reasonable compensation for personal services to be rendered on or after the date of a change in ownership or control?

A-42: (a) Yes, if payments are made or to be made to (or on behalf of) a disqualified individual for personal services to be rendered on or after the date of a change in ownership or control, a showing of the following generally is considered to be clear and convincing evidence that the payments are reasonable compensation for services to be rendered on or after the date of the change in ownership or control--

(1)

The payments were made or are to be made only for the period the individual actually performs such personal services; and

(2)

If the individual's duties and responsibilities are substantially the same after the change in ownership or control, the individual's annual compensation for such services is not significantly greater than such individual's annual compensation prior to the change in ownership or control, apart from normal increases attributable to increased responsibilities or cost of living adjustments. If the scope of the individual's duties and responsibilities are not substantially the same, the annual compensation after the change is not significantly greater than the annual compensation customarily paid by the employer or by comparable employers to persons performing comparable services. However, except as provided in paragraph (b) and (c) of this A-42, such clear and convincing evidence will not exist if the individual does not, in fact, perform the services contemplated in exchange for the compensation.

(b)

Generally, an agreement under which the disqualified individual must refrain from performing services (e.g., a covenant not to compete) is an agreement for the performance of personal services for purposes of this A-42 to the extent that it is demonstrated by clear and convincing evidence that the agreement substantially constrains the individual's ability to perform services and there is a reasonable likelihood that the agreement will be enforced against the individual. In the absence of clear and convincing evidence, payments under the agreement are treated as severance payments under Q/A-44 of this section.

(c)

If the employment of a disqualified individual is involuntarily terminated before the end of a contract term and the individual is paid damages for breach of contract, a showing of the following factors generally is considered clear and convincing evidence that the payment is reasonable compensation for personal services to be rendered on or after the date of change in ownership or control--

(1)

The contract was not entered into, amended, or renewed in contemplation of the change in ownership or control;

(2)

The compensation the individual would have received under the contract would have qualified as reasonable compensation under section 162;

(3)

The damages do not exceed the present value (determined as of the date of receipt) of the compensation the individual would have received under the contract if the individual had continued to perform services for the employer until the end of the contract term;

(4)

The damages are received because an offer to provide personal services was made by the disqualified individual but was rejected by the employer (including involuntary termination or constructive discharge); and

(5)

The damages are reduced by mitigation. Mitigation will be treated as occurring when such damages are reduced (or any payment of such damages is returned) to the extent of the disqualified individual's earned income (within the meaning of section 911(d)(2)(A)) during the remainder of the period in which the contract would have been in effect. *See* Q/A-44 of this section for rules regarding damages for a failure to make severance payments.

(d)

The following examples illustrate the principles of this A-42:

Example 1.

A, a disqualified individual, has a three-year employment contract with Corporation M, a publicly traded corporation. Under this contract, A is to receive a salary for \$100,000 for the first year of the contract

and, for each succeeding year, an annual salary that is 10 percent higher than the prior year's salary. During the third year of the contract, Corporation N acquires all the stock of Corporation M. Prior to the change in ownership, Corporation N arranges to retain A's services by entering into an employment contract with A that is essentially the same as A's contract with Corporation M. Under the new contract, Corporation N is to fulfill Corporation M's obligations for the third year of the old contract, and, for each of the succeeding years, pay A an annual salary that is 10 percent higher than A's prior year's salary. Amounts are payable under the new contract only for the portion of the contract term during which A remains employed by Corporation N. A showing of the facts described above (and in the absence of contradictory evidence) is regarded as clear and convincing evidence that all payments under the new contract are reasonable compensation for personal services to be rendered on or after the date of the change in ownership. Therefore, the payments under this agreement are exempt from the definition of parachute payment pursuant to Q/A-9 of this section.

Example 2.

Assume the same facts as in Example 1, except that A does not perform the services described in the new contract, but receives payment under the new contract. Because services were not rendered after the change, the payments under this contract are not exempt from the definition of parachute payment pursuant to Q/A-9 of this section.

Example 3.

Assume the same facts as in Example 1, except that under the new contract A agrees to perform consulting services to Corporation N, when and if Corporation N requires A's services. Assume further that when Corporation N does not require A's services, the contract provides that A must not perform services for any other competing company. Corporation N previously enforced similar contracts against former employees of Corporation N. Because A is substantially constrained under this contract and Corporation N is reasonably likely to enforce the contract against A, the agreement is an agreement for the performance of services under paragraph (b) of this A-42. Assuming the requirements of paragraph (a) of this A-42 are met and there is clear and convincing evidence that all payments under the new contract are reasonable compensation for personal services to be rendered on or after the date of the change in ownership, the payments under this contract are exempt from the definition of parachute payment pursuant to Q/A-9 of this section.

Example 4.

Assume the same facts as in Example 1, except that instead of agreeing not to compete with Corporation N, under the new agreement A agrees not to disparage either Corporation M or Corporation N. Because the nondisparagement agreement does not substantially constrain A's ability to perform services, no amount of the payments under this contract are reasonable compensation for the nondisparagement agreement.

Example 5.

Assume the same facts as in Example 1, except that the employment contract with Corporation N does not provide that amounts are payable under the contract only for the portion of the term for which A remains employed by Corporation N. Shortly after the change in ownership, and despite A's request to remain employed by Corporation N, A's employment with Corporation N is involuntarily terminated. Shortly thereafter, A obtains employment with Corporation O. A commences a civil action against Corporation N, alleging breach of the employment contract. In settlement of the litigation, A receives an amount equal to the present value of the compensation A would have received under the contract with Corporation N, reduced by the amount of compensation A otherwise receives from Corporation O during the period that the contract would have been in effect. A showing of the facts described above (and in the absence of contradictory evidence) is regarded as clear and convincing evidence that the amount A receives as damages is reasonable compensation for personal services to be rendered on or after the date

of the change in ownership. Therefore, the amount received by A is exempt from the definition of parachute payment pursuant to Q/A-9 of this section.

Q-43: Is any particular type of payment generally considered reasonable compensation for personal services actually rendered before the date of a change in ownership or control?

A-43: Yes, payments of compensation earned before the date of a change in ownership or control generally are considered reasonable compensation for personal services actually rendered before the date of a change in ownership or control if they qualify as reasonable compensation under section 162.

Q-44: May severance payments be treated as reasonable compensation?

A-44: (a) No, severance payments are not treated as reasonable compensation for personal services actually rendered before, or to be rendered on or after, the date of a change in ownership or control. Moreover, any damages paid for a failure to make severance payments are not treated as reasonable compensation for personal services actually rendered before, or to be rendered on or after, the date of such change. For purposes of this section, the term severance payment means any payment that is made to (or for the benefit of) a disqualified individual on account of the termination of such individual's employment prior to the end of a contract term, but does not include any payment that otherwise would be made to (or for the benefit of) such individual on the termination of such individual's employment, whenever occurring.

(b)

The following example illustrates the principles of this A-44:

Example. A, a disqualified individual, has a three-year employment contract with Corporation X. Under the contract, A will receive a salary of \$200,000 for the first year of the contract, and for each succeeding year, an annual salary that is \$100,000 higher than the previous year. In the event of A's termination of employment following a change in ownership or control, the contract provides that A will receive the remaining salary due under the employment contract. At the beginning of the second year of the contract, Corporation Y acquires all of the stock of Corporation X, A's employment is terminated, and A receives \$700,000 (\$300,000 for the second year of the contract plus \$400,000 for the third year of the contract) representing the remaining salary due under the employment contract. Because the \$700,000 payment is treated as a severance payment, it is not reasonable compensation for personal services on or after the date of the change in ownership or control. Thus, the full amount of the \$700,000 is a parachute payment.

Miscellaneous Rules

Q-45: How is the term corporation defined?

A-45: For purposes of this section, the term corporation has the meaning prescribed by section 7701(a)(3) and § 301.7701-2(b) of this Chapter. For example, a corporation, for purposes of this section, includes a publicly traded partnership treated as a corporation under section 7704(a); an entity described in § 301.7701-3(c)(1)(v)(A) of this Chapter; a real estate investment trust under section 856(a); a corporation that has mutual or cooperative (rather than stock) ownership, such as a mutual insurance company, a mutual savings bank, or a cooperative bank (as defined in section 7701(a)(32)), and a foreign corporation as defined under section 7701(a)(5).

Q-46: How is an affiliated group treated?

A-46: For purposes of this section, and except as otherwise provided in this section, all members of the same affiliated group (as defined in section 1504, determined without regard to section 1504(b)) are treated as one

corporation. Rules affected by this treatment of an affiliated group include (but are not limited to) rules relating to exempt payments of certain corporations (Q/A-6, Q/A-7 of this section (except as provided therein)), payor of parachute payments (Q/A-10 of this section), disqualified individuals (Q/A-15 through Q/A-21 of this section (except as provided therein)), rebuttal of the presumption that payments are contingent on a change (Q/A-26 of this section (except as provided therein)), change in ownership or control (Q/A-27, 28, and 29 of this section), and reasonable compensation (Q/A-42, 43, and 44 of this section).

Effective Date

Q-47: What is the general effective date of section 280G?

A-47: (a) Generally, section 280G applies to payments under agreements entered into or renewed after June 14, 1984. Any agreement that is entered into before June 15, 1984, and is renewed after June 14, 1984, is treated as a new contract entered into on the day the renewal takes effect.

(b)

For purposes of paragraph (a) of this A-47, a contract that is terminable or cancellable unconditionally at will by either party to the contract without the consent of the other, or by both parties to the contract, is treated as a new contract entered into on the date any such termination or cancellation, if made, would be effective. However, a contract is not treated as so terminable or cancellable if it can be terminated or cancelled only by terminating the employment relationship or independent contractor relationship of the disqualified individual.

(c)

Section 280G applies to payments under a contract entered into on or before June 14, 1984, if the contract is amended or supplemented after June 14, 1984, in significant relevant respect. For this purpose, a supplement to a contract is defined as a new contract entered into after June 14, 1984, that affects the trigger, amount, or time of receipt of a payment under an existing contract.

(d)

(1)

Except as otherwise provided in paragraph (e) of this A-47, a contract is considered to be amended or supplemented in significant relevant respect if provisions for payments contingent on a change in ownership or control (parachute provisions), or provisions in the nature of parachute provisions, are added to the contract, or are amended or supplemented to provide significant additional benefits to the disqualified individual. Thus, for example, a contract generally is treated as amended or supplemented in significant relevant respect if it is amended or supplemented--

(i)

To add or modify, to the disqualified individual's benefit, a change in ownership or control trigger;

(ii)

To increase amounts payable that are contingent on a change in ownership or control (or, where payment is to be made under a formula, to modify the formula to the disqualified individual's advantage); or

(iii)

To accelerate, in the event of a change in ownership or control, the payment of amounts otherwise payable at a later date.

(2)

For purposes of paragraph (a) of this A-47, a payment is not treated as being accelerated in the event of a change in ownership or control if the acceleration does not increase the present value of the payment.

(e)

A contract entered into on or before June 14, 1984, is not treated as amended or supplemented in significant relevant respect merely by reason of normal adjustments in the terms of employment relationship or independent contractor relationship of the disqualified individual. Whether an adjustment in the terms of such a relationship is considered normal for this purpose depends on all of the facts and circumstances of the particular case. Relevant factors include, but are not limited to, the following--

(1)

The length of time between the adjustment and the change in ownership or control;

(2)

The extent to which the corporation, at the time of the adjustment, viewed itself as a likely takeover candidate;

(3)

A comparison of the adjustment with historical practices of the corporation;

(4)

The extent of overlap between the group receiving the benefits of the adjustment and those members of that group who are the beneficiaries of pre- June 15, 1984, parachute contracts; and

(5)

The size of the adjustment, both in absolute terms and in comparison with the benefits provided to other members of the group receiving the benefits of the adjustment.

Q-48: What is the effective date of this section?

A-48: This section applies to any payments that are contingent on a change in ownership or control if the change in ownership or control occurs on or after January 1, 2004.

Par 3. In § 602.101, paragraph (b) is amended by adding an entry in numerical order to the table to read as follows:

[16-B] Report of the NACD Blue Ribbon Commission on Executive Compensation and the Role of the Compensation Committee -- Executive Summary *

In the past decade, the level of CEO and executive compensation has risen rapidly. Large pay packages continue to draw considerable criticism from shareholders, the media, regulators, and the general public--especially when these packages are awarded to failed and/or fired executives. For this reason, NACD has convened a Blue Ribbon Commission --following one convened a decade ago-- to make recommendations to boards and compensation committees regarding the appropriate way to compensate executives. The topic is not only timely; it is perennial. Perhaps the most important responsibility of a corporate board of directors is to ensure that the company's management is of the appropriate competence, depth, and integrity to develop and execute a winning long-term strategy for the enterprise. Management leadership, ability, and effort are critical factors in the long-run success of a business, and compensation is a critical component in attracting, motivating, and retaining strong management. This Commission recommends that boards consider several underlying concepts in this regard:

- Reward systems for managerial positions should help attract, motivate, and retain the talent necessary for the long-term success of the corporation.
- Aligning the interests of management (and all employees) with those of investors is at the core of the long-term performance of the corporation.
- Incentive compensation, properly structured, can make a significant difference in how people behave and can help maximize efforts to achieve targeted objectives.
- Compensation plans should balance value to employees throughout the organization with costs to shareholders.

PHILOSOPHY

To start, the compensation committee and the board should work jointly to adopt a compensation philosophy and a set of principles to guide their actions. Clear articulation of an underlying philosophy greatly enhances directors' ability to make rational decisions on behalf of all of the corporation's constituents. This Commission recommends a compensation philosophy and related practices that reflect the principles of independence, fairness, long-term shareholder value, link

to performance, and transparency.

Independence

Independence must be the bedrock value for both the board and its compensation committee. The board needs to ensure that all the members of the compensation committee are independent, knowledgeable, and diligent in the discharge of their duties. Each member of the compensation committee should have the capacity for objective judgment, and the courage and integrity to ask probing questions, to speak honestly, to set and adhere to appropriate limits, and to be an advocate for change when current practice results in negative outcomes. Compensation committees and boards of directors should consider engaging an independent compensation consultant, as needed, to assist in the development of both a compensation philosophy and specific pay packages. The consultant should be hired by and report directly to the committee (or the board, if there is no committee), and should not be retained by the company in any other capacity. However, he or she should have full access to management, their compensation consultants, in-house counsel, and human resources staff.

Fairness

Compensation committees and boards should strive for pay packages that will be perceived as fair, both internally and externally. Internally, fairness means that all members of an organization benefit when the company does well and share in sacrifices when necessary. Fairness also means that there will not be wide gaps between the CEO's pay and the pay of other senior managers--or between executives and other employees--unless these are justified and explained. Externally, pay should relate to performance measured against true peer companies selected by the compensation committee.

Long-Term Shareholder Value

Compensation committees and boards need to design pay packages that encourage longterm commitment to the organization's wellbeing. While executives do need to meet shortterm targets and should be rewarded for doing so, companies should award additional variable compensation based on achieving key metrics over an extended period of time, using company performance measures, rather than stock price, as criteria. Tying bonuses, stock grants, or other compensation to such measures can help align management's personal financial interests with those of shareholders and employees.

Link to Performance

Pay must motivate and reward performance. Compensation committees and boards should never approve generous rewards for executives who have failed to perform or are being terminated. To be effective, pay plans should give managers a long-term stake in the company through ownership requirements and stringent holding periods for that ownership. Compensation packages should include incentives to own stock and disincentives to sell it. Through well-designed compensation, among other things, boards can play a role in building a new cadre of leaders so that corporate leadership is self-sustaining. Whether or not the compensation committee is involved in succession planning, the company's compensation philosophy and framework should support the identification and development of internal candidates for executive positions.

Compensation committee members need to understand the intricacies of compensation-- the various elements that can be used, their appropriate use and purpose, and both the immediate and long-term costs of each. Furthermore, they need to understand how compensation relates to the financial circumstances and business objectives of the corporation. Compensation committees and boards need to set clear performance objectives for senior executives and measure performance against those objectives. Performance objectives should be based on multiple factors--quantitative and qualitative--as opposed to stock price. This activity should not be delegated to the compensation committee, but should occur with full engagement and approval of the board. Pay should be linked to performance as reported. That is,

companies need to honor agreed-upon performance metrics and not change those metrics after the fact in order to provide additional compensation despite failure to achieve stated objectives.

Transparency

Overall, compensation committees and boards need to design plans that are as simple as possible and spell them out in a brief summary that describes company goals, executive performance objectives, and potential payouts under various scenarios. One page should be sufficient in most cases. Simplicity of design and communication will ensure that executives, compensation committees, boards, and investors all understand the compensation package. Full disclosure is vital. Boards should ensure that every element of compensation is fully and clearly disclosed, even if such disclosure is not required. Having such a policy will help to ensure that compensation packages conform to the principles set forth here.

A CRITICAL DIFFERENCE

By following these suggested practices, and by using the practical tools provided throughout this report, compensation committees and boards can make a critical difference in the future of individual companies and in the future of corporate governance in general. Courage is the key, and the time to exercise it is now.

2-16-C Corporate Governance: Law and Practice [16-C]

[16-C] Report of the NACD Blue Ribbon Commission on Executive Compensation and the Role of the Compensation Committee -- Appendix E: Guidance Pertaining to Executive Employment Contracts *

Senior executives often sign employment contracts when accepting a position with a company. These contracts can be beneficial, and in some cases may be necessary and prudent. They can, however, lead to problems. A number of the seemingly excessive executive compensation payments in recent years resulted from the fulfillment of contracts. Had no contracts existed, the payments would have been more reasonable.

In light of the problems surrounding executive contracts, some boards have stopped using them for their senior executives, and some corporate CEOs have eschewed them.^{n**}

For boards that use executive employment contracts at senior levels, here are some recommended practices.

- In hiring a new CEO from outside, employ special counsel to prepare any employment agreement on behalf of the committee.
- If existing employment agreements are "evergreen," with automatic extensions on certain dates unless notice is given, do not allow such renewal dates go by without periodic review and affirmative action to extend them.
- Do not treat non-renewal of a contract as an automatic trigger for severance pay.
- Do not extend severance benefits beyond the executive's age 65 or the company's normal retirement date.
- Do not "add years" on to an executive's years of employment in order to increase the executive's retirement package.
- Do not continue to pay active-employment benefits to executives who elect retirement during a severance period in order to start drawing a pension. A decision to retire should trigger retirement benefits, and active benefits should cease.
- Before agreeing to an employment agreement, review company costs under a "worst case" severance benefit.

- Expand the definition of "for cause" termination to include violations of the company's code of business conduct and ethics, as well as violations of its insider-trading policies.
- Condition severance payments on the executive's agreement to standard "no compete, no raid, no sue, no tell" provisions.
- Do not extend special retirement benefits to CEOs of short tenure and undistinguished performance; make any extension of special benefits to a long-serving and honored CEO relatively short in duration.

In any change-of-control provision:

- Do not automatically accelerate vesting of stock options or equity grants. This should occur only at the change of control in cases of cash buyouts, where there is no equity conversion for shareholders, or at an involuntary termination of employment (not for cause) following a change of control.
- Also, refrain from issuing "single trigger" severance benefits for executives following a change of control. A "single trigger" benefit is one that will automatically be awarded if a certain defined event or "trigger" occurs. The board should have the flexibility to select its own triggers for awarding such benefits.
- Finally, periodically review total company costs for severance benefits in case of a change of control, and compare such costs to the company's total equity market capitalization.

2-16-D Corporate Governance: Law and Practice [16-D]

[16-D] TIAA-CREF Policy Statement on Corporate Governance--Executive Compensation (and Appendix thereto on Guidelines for Assessing Compensation Plans) *

As described earlier, the board is responsible for ensuring that a compensation program is in place which will attract, retain and motivate strong management and which complies with the board's equity policy. TIAA-CREF believes that aligning the rewards of employees with those of shareholders will enhance the long-term performance of the corporation, and compensation programs that are based on performance can play the critical role in this alignment. Thus, TIAA-CREF encourages the board to work with consultants who are independent of management to develop carefully designed cash pay, stock-based compensation and fringe benefit programs that are clearly understood by management and shareholders, and based on the following principles:

1. Compensation plans should be reasonable and fair by prevailing industry standards and able to withstand the critical scrutiny of investors, employees and the public at large.
2. Compensation plans should be understandable and appropriate to the corporation's size, complexity and performance.
3. Disclosure to shareholders about executive compensation should be full and complete and should be adequate to enable a reasonably sophisticated investor to evaluate and assess the total compensation package as well as particular elements.
4. In setting compensation levels and incentive opportunities, the board should consider the individual's experience, expertise, responsibilities and goals and objectives, in addition to overall corporate performance. The board should also consider comparative industry pay levels. However, surveys should be considered cautiously. Surveys that appear to call for stock option use inconsistent with the board's equity policy or clearly in excess of levels that can be explained to shareholders should be disregarded.
5. Compensation plans should encourage employees to achieve performance objectives and in so doing, create long-term shareholder value subject to appropriate consideration of the firm's reputation, integrity and ethical standards.
6. Compensation plans should be objectively linked to appropriate parameters of company performance, such as earnings, return on capital or other relevant financial or operational measures that are within the control of the

executives who will receive the pay. Compensation plans should be based on a performance measurement cycle that is consistent with the business cycle of the corporation.

A. Equity-based Compensation

Shareholder interests are greatly affected by equity-based compensation plans. Equity-based compensation can be a critical element of compensation and can provide the greatest opportunity for the creation of wealth for managers whose efforts contribute to the creation of value for shareholders. Thus, equity-based compensation plans can offer the greatest incentives. At the same time, they can offer significant incentives for abuse. There is a need for regulatory organizations to require realistic accounting of the cost of equity-based plans to the company so as to eliminate the excesses that have diminished the usefulness of these plans to shareholders. As a matter of public policy, TIAA-CREF strongly advocates comprehensive disclosure and realistic accounting of equity-based plans, with the cost charged to the income statement. Further, we urge companies to consider the following principles when developing equity-based compensation plans:

1. The use of equity in compensation programs should be limited by the equity policy developed by the board of directors.
2. Equity-based plans should fully disclose the size of grants, potential value to recipients, cost to the company, and plan provisions that could have a material impact on the number and value of shares distributed. Disclosure should also include information about the extent to which individual managers have hedged or otherwise reduced their exposure to changes in the company's stock price.
3. All plans that provide for the distribution of stock or stock options to employees and/or directors should be submitted to shareholders for approval.
4. Equity-based plans should emphasize restricted stock awards. Restricted stock more closely aligns the interests of executives with shareholders (as opposed to option grants), and the value to the recipient and cost to the corporation can be determined easily and tracked continuously.
5. Equity-based plans should make judicious use of stock option grants. When used in excess, option grants can provide management with incentives to promote the company's stock price without necessarily improving its performance or long-term value.

When stock options are awarded, a company should develop plans for performance-based options, which set performance hurdles to achieve vesting; premium options, with vesting dependent on attainment of a pre-determined appreciation of stock; and/or indexed options, with a strike price tied to an index. Accounting rules should provide a "level playing field" for consideration of these alternatives; fixed-price options should not receive more favorable accounting treatment. Companies should also require that stock obtained through exercise of options be held for substantial periods of time, apart from sales permitted to meet tax liabilities produced by such exercise.

6. Equity-based plans should specifically prohibit or severely restrict "mega grants," which are grants of stock options of a value, at the time of grant, greater than a reasonable and explainable multiple of the recipient's total cash compensation.
7. Equity-based plans should prohibit the issuance of stock or stock options that are timed to take advantage of non-public information with significant short-term implications for the stock price.

B. Fringe Benefits and Severance Agreements

Fringe benefits are an important component of the compensation plan and can have a significant impact on

shareholders. They can be extremely complex, with high potential for unintended and unearned value transfer to management, and with unanticipated cost to the company. When developing fringe benefit plans, the board should be guided by the same principles of disclosure, reasonableness and fairness that guide development of other compensation plan components.

More specifically, pension plans and executive contracts provide opportunities for earnings transfer and corporate liabilities that must be carefully controlled. Executive pension plans should provide for retirement income formulas that are comparable (as a percentage of final average pay) to that of employees throughout the organization. Supplemental executive retirement plans (SERPs) may be used to supplement "qualified" pension entitlement to allow this total to be achieved; however, SERPs should not be used to enhance retirement benefits beyond that which is reasonable. The following principles should guide the development of SERPs:

1. The eligibility requirements and terms of all SERPs should be fully disclosed.
2. The value of the supplemental payment to which each eligible proxy-level executive is entitled should be estimated and disclosed.
3. "Constructive credit" should be used to replicate full service credit not exceed it.
4. Lump-sum distributions of the SERPs should be allowed; the discount rate used to calculate the lump-sum value of the pension entitlement should approximate the reinvestment rate available at retirement and should be disclosed.
5. The total cost of all supplemental plan obligations should be estimated and disclosed.

Executive contracts and their costs also should be disclosed. Although they can be of substantial value to the corporation and its shareholders, they generally include severance arrangements that may produce substantial continuing obligations that go beyond reasonable parameters. Companies should not provide excessive perquisites during employment or in the post-retirement period. Severance arrangements should not provide contractual payments to executives who are terminated for misconduct, gross mismanagement or other reasons constituting a "for cause" termination. As in other areas, reasonableness, competitive practice, and full disclosure are requirements, and such contracts should protect the interests of the company as well as the executive.

Appendix

Guidelines for Assessing Compensation Plans

Equity-Based Award Compensation

When voting on equity-based compensation plans, TIAA-CREF will consider the following elements of the plan:

Potential Dilution from Stock-Based Plans

Red Flag: Total potential dilution from existing and proposed compensation plans exceeds 15% over duration of plan(s) or 2% in any one year.

Override: Increase threshold to 25% for plans proposed by companies in human-capital-intensive industries in which coverage extends through at least middle management levels. Increase threshold to 20% for firms at the lower range of market equity capitalization.

Comment:

The override conditions are each designed to address a specific consideration. The first addresses the needs of human-capital-intensive industries where generous stock-based grants may be necessary to attract and retain personnel and where significant contributions are made by individuals outside the ranks of senior management. The second override addresses the need to provide compensation with sufficient value at lower capitalization firms, since a given level of dilution has a lower economic value in a firm with lower market capitalization.

Excessive Run Rate from Actual Grants

Red Flag: In the most recent three years, potential dilution from stock and stock option grants averaged in excess of 2% per year.

Override: Increase threshold to 3% for plans proposed by companies in human-capital-intensive industries.

Comment: The "potential dilution" test described above is a snapshot at a given point in time. That test can miss excessive transfer of stock ownership over time, through stock plans, to executives and employees at companies that repeatedly return to the well for more options. This red flag for excessive run rates is based on actual grants at companies requesting shareholder approval for additional share authorizations for employee stock plans.

Reload Options

Red Flag: Proposal provides for granting reload options.

Override: None.

Comment:

Reload options are automatically reloaded after exercise at the then-current market price. They enable the individual receiving them to reap the maximum potential benefit from option awards by allowing him or her to lock in increases in stock price that occur over the duration of the option with no attendant risk.

This creates an additional divergence of interests between the shareholders and the option recipient, and an open-ended force for the dilution of shareholders' equity.

Evergreen Option Plans

Red Flag: Plan contains an evergreen feature that has no termination date and reserves a specified percentage of the outstanding shares for award each year.

Override: None.

Option Mega Grants

Red Flag: Option grants that are excessive in relation to other forms of compensation, are out of proportion to compensation of other employees of the corporation, and/or represent excessive earnings transfer opportunities compared to the scale and/or success of the corporation.

Option Pricing

Red Flag: Unspecified exercise price or exercise price below 100% of fair market value on the date of the grant.

Override: None.

Restricted Stock

Red Flag: A plan limited to restricted stock exceeds 3% dilution, or, for an omnibus plan that potentially would allow award of restricted stock exceeding this level, the company has made grants of restricted stock exceeding 1% of outstanding shares over the last three years.

Override: Arguments for higher dilution from restricted stock may be considered on a case-by-case basis for small-cap companies, or as part of a program to reduce dilution related to prior use of stock options.

Coverage

Red Flag: Plan is limited to a small number of senior employees.

Override: Permits awards to a small number of employees at firms at the lower range of market equity capitalization.

Repricing Options

Red Flag: An option plan gives the company the ability to lower the exercise price of options already awarded where the market price of the stock has declined below the original exercise price ("underwater options").

Override: The company has not repriced options in the past or has excluded senior executives and board members from any repricing and has tied any repricing to a significant reduction in the total number of outstanding options.

Comment: Repricing options after a decline in the stock price undermines the rationale for establishing an option plan in the first place. Repricing gives management a benefit unavailable to shareholders and thereby reduces the alignment of interests between shareholders and management.

Excess Discretion

Red Flag: Significant terms of awards -- such as coverage, option price, or type of award provided for the proposed plan -- are not specified in the proposal.

Override: None.

Bundling

Red Flag: Vote on executive compensation plan is coupled with vote on one or more unrelated proposals.

Override: None.

Fringe Benefits

- Support proposals that require shareholder approval of "golden parachute" severance agreements that exceed IRS guidelines.
- Consider on a case-by-case basis proposals for prior shareholder ratification of all "golden parachute" severance agreements. Voting decisions will depend on the corporate governance profile and prior actions of the company.
- Support proposals to limit additions to supplemental executive retirement plans at the time of executives' retirement.

Principles of Corporate Governance
2005

A White Paper by Business Roundtable, November 2005 Business Roundtable

Foreword and Introduction

Business Roundtable is recognized as an authoritative voice on matters affecting American business corporations and, as such, has a keen interest in corporate governance. Business Roundtable is an association of chief executive officers of leading corporations with a combined workforce of more than 10 million employees and \$4 trillion in annual revenues. The chief executives are committed to advocating public policies that foster vigorous economic growth, a dynamic global economy, and the well-trained and productive U.S. workforce essential for future competitiveness.

Since May 2002, when Business Roundtable issued its *Principles of Corporate Governance*, U.S. public corporations have witnessed fundamental and accelerated changes in the area of corporate governance, beginning with the passage of the Sarbanes-Oxley Act of 2002 and continuing with the adoption of strengthened listing standards by the securities markets. We note that many of the best practices recommended in the principles are now embedded in the Sarbanes-Oxley Act and in securities market listing standards.

Following the publication of *Principles of Corporate Governance* (May 2002), Business Roundtable issued *Executive Compensation: Principles and Commentary* (November 2003), *The Nominating Process and Corporate Governance Committees: Principles and Commentary* (April 2004), and *Guidelines for Shareholder-Director Communications* (May 2005). Other publications from Business Roundtable that have addressed corporate governance include *Statement on Corporate Governance* (September 1997), *Executive Compensation/Share Ownership* (March 1992), *Corporate*

2-A Corporate Governance: Law and Practice

Governance and American Competitiveness (March 1990), *Statement on Corporate Responsibility* (October 1981), and *The Role and Composition of the Board of Directors of the Large Publicly Owned Corporation* (January 1978).

Business Roundtable continues to believe, as we noted in *Principles of Corporate Governance* (2002), that the United States has the best corporate governance, financial reporting and securities markets systems in the world. These systems work because of the adoption of best practices by public companies within a framework of laws and regulations.

Given the fundamental nature of the changes that have occurred during the past several years in the framework of laws and regulations related to corporate governance, as well as in best practices, Business Roundtable believes it is appropriate, once again, to restate our guiding principles of corporate governance. Although applicable legal requirements and securities market listing standards establish minimum requirements, these principles, we believe, should help guide the ongoing advancement of corporate governance practices and, thus, advance the ability of public corporations to compete, create jobs and generate economic growth.

Business Roundtable supports the following guiding principles:

First, the paramount duty of the board of directors of a public corporation is to select a chief executive officer and to oversee the CEO and senior management in the competent and ethical operation of the corporation on a day-to-day basis.

Second, it is the responsibility of management to operate the corporation in an effective and ethical manner to produce value for shareholders. Senior management is expected to know how the corporation earns its income and what risks the corporation is undertaking in the course of carrying out its business. The CEO and board of directors should set a "tone at the top" that establishes a culture of legal compliance and integrity. Management and directors should never put personal interests ahead of or in conflict with the interests of the corporation.

Third, it is the responsibility of management, under the oversight of the audit committee and the board, to produce financial statements that fairly present the financial condition and results of operations of the corporation and to make the timely disclosures investors need to assess the financial and business soundness and risks of the corporation.

Fourth, it is the responsibility of the board, through its audit committee, to engage an independent accounting firm to audit the financial statements prepared by management, issue an opinion that those statements are fairly stated in accordance with Generally Accepted Accounting Principles and oversee the corporation's relationship with the outside auditor.

Fifth, it is the responsibility of the board, through its corporate governance committee, to play a leadership role in shaping the corporate governance of the corporation. The corporate governance committee also should select and recommend to the board qualified director candidates for election by the corporation's shareholders.

Sixth, it is the responsibility of the board, through its compensation committee, to adopt and oversee the implementation of compensation policies, establish goals for performance-based compensation, and determine the compensation of the CEO and senior management.

Seventh, it is the responsibility of the board to respond appropriately to shareholders' concerns.

Eighth, it is the responsibility of the corporation to deal with its employees, customers, suppliers and other constituencies in a fair and equitable manner.

These responsibilities and others are critical to the functioning of the modern public corporation and the integrity of the public markets. No law or regulation alone can be a substitute for the voluntary adherence to these principles by

corporate directors and management.

Business Roundtable continues to believe that corporate governance should be enhanced through conscientious and forward-looking action by a business community that focuses on generating long-term shareholder value with the highest degree of integrity.

The principles discussed here are intended to assist corporate management and boards of directors in their individual efforts to implement best practices of corporate governance, as well as to serve as guideposts for the public dialogue on evolving governance standards.

I. Key Corporate Actors

Effective corporate governance requires a clear understanding of the respective roles of the board and senior management and of their relationships with others in the corporate structure. The relationships of the board and management with shareholders should be characterized by candor; their relationships with employees should be characterized by fairness; their relationships with the communities in which they operate should be characterized by good citizenship; and their relationships with government should be characterized by a commitment to compliance.

The board of directors has the important role of overseeing management performance on behalf of shareholders. Its primary duties are to select and oversee a well-qualified and ethical chief executive officer who, with senior management, runs the corporation on a daily basis and to monitor management's performance and adherence to corporate and ethical standards. Effective corporate directors are diligent monitors, but not managers, of business operations.

Senior management, led by the CEO, is responsible for running the day-to-day operations of the corporation and properly informing the board of the status of these operations. Management's responsibilities include strategic planning, risk management and financial reporting.

Shareholders are not involved in the day-to-day management of corporate operations but have the right to elect representatives (directors) to look out for their interests and to receive the information they need to make investment and voting decisions. The board should be responsive to communications from shareholders and should address issues of concern to shareholders.

Effective corporate governance requires a proactive, focused state of mind on the part of directors, the CEO and senior management, all of whom must be committed to business success through the maintenance of the highest standards of responsibility and ethics. Although there are a number of legal and regulatory requirements that must be met, good governance is far more than a "check-the box" list of minimum board and management policies and duties. Even the most thoughtful and well-drafted policies and procedures are destined to fail if directors and management are not committed to enforcing them in practice. A good corporate governance structure is a working system for principled goal setting, effective decision making, and appropriate monitoring of compliance and performance. Through this vibrant and responsive structure, the CEO, the senior management team and the board of directors can interact effectively and respond quickly and appropriately to changing circumstances, within a framework of solid corporate values, to provide enduring value to the shareholders who invest in the enterprise.

II. The Roles of the Board of Directors and Management

An effective system of corporate governance provides the framework within which the board and management address their respective responsibilities.

The Board of Directors

2-A Corporate Governance: Law and Practice

- The business of a corporation is managed under the direction of the corporation's board. The board delegates to the CEO -- and through the CEO to other senior management -- the authority and responsibility for managing the everyday affairs of the corporation. Directors monitor management on behalf of the corporation's shareholders.
- Making decisions regarding the selection, compensation and evaluation of a well-qualified and ethical CEO is the single most important function of the board. The board also appoints or approves other members of the senior management team.
- Directors bring to the corporation a range of experience, knowledge and judgment. Directors should not represent the interests of particular constituencies.
- Effective directors maintain an attitude of constructive skepticism; they ask incisive, probing questions and require accurate, honest answers; they act with integrity and diligence; and they demonstrate a commitment to the corporation, its business plans and long-term shareholder value.
- In performing its oversight function, the board is entitled to rely on the advice, reports and opinions of management, counsel, auditors and expert advisers. The board should assess the qualifications of those it relies on and hold managers and advisers accountable. The board should ask questions and obtain answers about the processes used by managers and the corporation's advisers to reach their decisions and recommendations, as well as about the substance of the advice and reports received by the board. When appropriate, the board and its committees should seek independent advice.
- Given the board's oversight role, shareholders and other constituencies can reasonably expect that directors will exercise vigorous and diligent oversight of a corporation's affairs. However, they should not expect the board to micromanage the corporation's business by performing or duplicating the tasks of the CEO and senior management team.
- The board's oversight function carries with it a number of specific responsibilities in addition to that of selecting and overseeing the CEO. These responsibilities include:
 - Planning for management development and succession.* The board should oversee the corporation's plans for developing senior management personnel and plan for CEO and senior management succession. When appropriate, the board should replace the CEO or other members of senior management.
 - Understanding, reviewing and monitoring the implementation of the corporation's strategic plans.* The board has responsibility for overseeing and understanding the corporation's strategic plans from their inception through their development and execution by management. Once the board reviews a strategic plan, it should regularly monitor implementation of the plan to determine whether it is being implemented effectively and whether changes are needed. The board also should ensure that the corporation's incentive compensation program is aligned with the corporation's strategic plan.
 - Understanding and approving annual operating plans and budgets.* The board is responsible for understanding, approving and overseeing the corporation's annual operating plans and for reviewing the annual budgets presented by management. The

2-A Corporate Governance: Law and Practice

board should monitor implementation of the annual plans to assess whether they are being implemented effectively and within the limits of approved budgets.

Focusing on the integrity and clarity of the corporation's financial statements and financial reporting. The board, assisted by its audit committee, should be satisfied that the financial statements and other disclosures prepared by management accurately present the corporation's financial condition and results of operations to shareholders and that they do so in an understandable manner. To achieve accuracy and clarity, the board, through its audit committee, should have an understanding of the corporation's financial statements, including why the accounting principles critical to the corporation's business were chosen, what key judgments and estimates were made by management, and how the choice of principles and the making of these judgments and estimates affect the reported financial results of the corporation.

Advising management on significant issues facing the corporation. Directors can offer management a wealth of experience and a wide range of perspectives. They provide advice and counsel to management in formal board and committee meetings, and they are available for informal consultation with the CEO and senior management.

Reviewing and approving significant corporate actions. As required by state corporate law, the board reviews and approves specific corporate actions, such as the election of executive officers, the declaration of dividends and (as appropriate) the implementation of major transactions. The board and senior management should have a clear understanding of what level or types of decisions require specific board approval.

Reviewing management's plans for business resiliency. As part of its oversight function, the board should designate senior management who will be responsible for business resiliency. The board should periodically review management's plans to address this issue. Business resiliency can include such items as business risk assessment and management, business continuity, physical and cyber security, and emergency communications.

Nominating directors and committee members and overseeing effective corporate governance. It is the responsibility of the board, through its corporate governance committee, to nominate directors and committee members and oversee the composition, independence, structure, practices and evaluation of the board and its committees.

Overseeing legal and ethical compliance. The board should set a "tone at the top" that establishes the corporation's commitment to integrity and legal compliance. The board should oversee the corporation's compliance program relating to legal and ethical conduct. In this regard, the board should be knowledgeable about the corporation's compliance program and should be satisfied that the program is effective in preventing and deterring violations. The board should pay particular attention to conflicts of interest, including related party transactions.

The CEO and Management

2-A Corporate Governance: Law and Practice

■ It is the responsibility of the CEO and senior management, under the CEO's direction, to operate the corporation in an effective and ethical manner. As part of its operational responsibility, senior management is charged with:

Operating the corporation. The CEO and senior management run the corporation's day-to-day business operations. With a thorough understanding of how the corporation operates and earns its income, they carry out the corporation's strategic objectives within the annual operating plans and budgets, which are reviewed and approved by the board. In making decisions about the corporation's business operations, the CEO considers the long-term interests of the corporation and its shareholders and necessarily relies on the input and advice of others, including senior management and outside advisers. The CEO keeps the board apprised of significant developments regarding the corporation's business operations.

Strategic planning. The CEO and senior management generally take the lead in strategic planning. They identify and develop strategic plans for the corporation; present those plans to the board; implement the plans once board review is completed; and recommend and carry out changes to the plans as necessary.

Annual operating plans and budgets. With the corporation's overall strategic plans in mind, senior management develops annual operating plans and budgets for the corporation and presents the plans and budgets to the board. Once the board has reviewed and approved the plans and budgets, the management team implements the annual operating plans and budgets.

Selecting qualified management, and establishing an effective organizational structure. Senior management is responsible for selecting qualified management and implementing an organizational structure that is efficient and appropriate for the corporation's particular circumstances.

Identifying and managing risks. Senior management identifies and manages the risks that the corporation undertakes in the course of carrying out its business. It also manages the corporation's overall risk profile.

Accurate and transparent financial reporting and disclosures. Senior management is responsible for the integrity of the corporation's financial reporting system and the accurate and timely preparation of the corporation's financial statements and related disclosures in accordance with Generally Accepted Accounting Principles and in compliance with applicable laws and regulations. It is senior management's responsibility -- under the direction of the CEO and the corporation's principal financial officer -- to establish, maintain and periodically evaluate the corporation's internal controls over financial reporting and the corporation's disclosure controls and procedures. In accordance with applicable law and regulations, the CEO and the corporation's principal financial officer also are responsible for certifying the accuracy and completeness of the corporation's financial statements and the effectiveness of the corporation's internal and

disclosure controls.

■ The CEO and senior management are responsible for operating the corporation in an ethical manner. They should never put individual, personal interests before those of the corporation or its shareholders. Business Roundtable believes that when carrying out this function, corporations should have:

A CEO of integrity. The CEO should be a person of integrity who takes responsibility for the corporation adhering to the highest ethical standards.

A strong, ethical "tone at the top." The CEO and senior management should set a "tone at the top" that establishes a culture of legal compliance and integrity communicated to personnel at all levels of the corporation.

An effective compliance program. Senior management should take responsibility for implementing and managing an effective compliance program relating to legal and ethical conduct. As part of its compliance program, a corporation should have a code of conduct with effective reporting and enforcement mechanisms. Employees should have a means of seeking guidance and alerting management and the board about potential or actual misconduct without fear of retribution, and violations of the code should be addressed promptly and effectively.

III. How the Board Performs Its Oversight Function

Publicly owned corporations employ diverse approaches to board structure and operations within the parameters of applicable legal requirements and securities market listing standards. Although no one structure is right for every corporation, Business Roundtable believes that the corporate governance "best practices" set forth in the following sections provide an effective approach for corporations to follow.

Board Composition and Leadership

■ Boards of directors of large, publicly owned corporations vary in size from industry to industry and from corporation to corporation. In determining board size, directors should consider the nature, size and complexity of the corporation as well as its stage of development. The experiences of many Business Roundtable members suggest that smaller boards often are more cohesive and work more effectively than larger boards.

■ Business Roundtable believes that having directors with relevant business and industry experience is beneficial to the board as a whole. Directors with this experience can provide a useful perspective on significant risks and competitive advantages and an understanding of the challenges facing the business. A diversity of backgrounds and experience, consistent with the corporation's needs, also is important to the overall composition of the board. Because the corporation's need for particular backgrounds and experience may change over time, the board should monitor the mix of skills and experience that directors bring to the board against established board membership criteria to assess, at each stage in the life of the corporation, whether the board has the necessary tools to perform its oversight function effectively.

■ The board of a publicly owned corporation should have a substantial degree of independence from management. Board independence depends not only on directors' individual relationships but also on the

2-A Corporate Governance: Law and Practice

board's overall attitude toward management. Providing objective independent judgment is at the core of the board's oversight function, and the board's composition should reflect this principle.

- A substantial majority of directors of the board of a publicly owned corporation should be independent, both in fact and appearance, as determined by the board. In accordance with the listing standards of the major securities markets, the board should make an affirmative determination as to the independence of each director annually and should have a process in place for making these determinations.

- Definition of "independence."* An independent director should not have any relationships with the corporation or its management -- whether business, employment, charitable or personal -- that may impair, or appear to impair, the director's ability to exercise independent judgment. The listing standards of the major securities markets define "independence" and enumerate specific relationships (such as employment with the corporation or its outside auditor) that preclude a director from being considered independent.

- Assessing independence.* The board should approve standards for determining directors' independence, taking into account the requirements of the federal securities laws, securities market listing standards, and the views of institutional investors and other relevant groups. These standards should be set forth in the corporation's corporate governance principles. When considering whether a director is independent, the board should consider not only whether the director has any of the relationships covered by the board's independence standards but also whether the director has any other relationships, either directly or indirectly, with the corporation, senior management or other board members that could affect the director's actual or perceived independence.

- Relationships with not-for-profit organizations.* The board's director independence standards should include standards for assessing directors' relationships with not-for-profit organizations that receive support from the corporation. In applying these standards, the board should take into account the size of the corporation's contributions and the nature of directors' relationships to the recipient organizations. Independence issues are most likely to arise when a director is an employee of the not-for-profit organization and when a substantial portion of the organization's funding comes from the corporation. It also may be appropriate to consider contributions from a corporation's foundation to organizations with which a director is affiliated.

- Most American corporations have been well served by a structure in which the CEO also serves as chairman of the board. The CEO serves as a bridge between management and the board, ensuring that both act with a common purpose. The decision concerning whether the CEO also should serve as chairman of the board often is part of the succession planning process, and the board should make that decision in light of the corporation's facts and circumstances.

- Although no one structure is right for every corporation, it is critical that the board has independent leadership. Some boards have found it useful to separate the roles of CEO and chairman of the board. Alternatively, there is a growing trend for boards to appoint a "lead" or "presiding" director. A lead director generally advises on board meeting schedules and agendas, chairs executive sessions of the board, oversees the flow of information to the board, and serves as a liaison between the independent

directors and the CEO. The lead director also may play a key role in overseeing performance evaluations of the CEO and the board, be available for communication with shareholders, and lead the board in crisis situations.

- Still other boards have designated an independent director to preside over the executive sessions of a board's independent or nonmanagement directors that are required by securities market listing standards. Depending on the corporation, the so-called presiding director also may perform some or all of the other functions performed by the lead director.

Board Organization

- Virtually all boards of directors of large, publicly owned corporations operate using committees to assist them. A committee structure permits the board to address key areas in more depth than may be possible in a full board meeting.

- Decisions about committee membership and chairs should be made by the full board based on recommendations from the corporate governance committee. Consideration should be given to whether periodic rotation of committee memberships and chairs would provide fresh perspectives and enhance directors' familiarity with different aspects of the corporation's business, consistent with applicable listing standards.

- Committees should apprise the full board of their activities on a regular basis. Processes should be developed and monitored for keeping the board informed through oral or written reports. For example, some corporations provide minutes of committee meetings to all members of the board.

- Business Roundtable believes that the functions generally performed by the audit, compensation and corporate governance committees are central to effective corporate governance. The listing standards of the major securities markets require corporations to have an audit committee that performs specific functions, and many corporations also are required to have committees that oversee executive compensation, director nominations and corporate governance matters. Business Roundtable does not believe that a particular committee structure is essential for all corporations. What is important is that key issues are addressed effectively by the independent members of the board. Thus, the references below to the functions performed by particular committees are not intended to preclude corporations from allocating these functions differently, consistent with applicable listing standards.

- Additional committees, such as finance or risk management committees, also may be used. Some corporations find it useful to establish committees to examine special problems or opportunities in greater depth than would otherwise be feasible.

- The responsibilities of each committee and the qualifications required for committee membership should be clearly defined and set out in a written charter that is approved by the board and publicly available. Each committee should review its charter annually and recommend changes to the board as appropriate.

- A more detailed discussion of particular committee functions appears in Business Roundtable's *Executive Compensation: Principles and Commentary* (November 2003) and *The Nominating Process and Corporate Governance Committees: Principles and Commentary* (April 2004).

Audit Committee

2-A Corporate Governance: Law and Practice

- Every publicly owned corporation should have an audit committee of at least three members, who should all be independent directors.

- Audit committees typically consist of three to five members. The listing standards of the major securities markets require that all members of the audit committee qualify as independent directors under applicable listing standards, subject to limited exceptions, and that they meet additional, heightened independence criteria.

- Audit committee members should meet minimum financial literacy standards, as required by the listing standards of the major securities markets, and at least one member of the audit committee should be an audit committee financial expert, as determined by the board in accordance with regulations of the Securities and Exchange Commission. Just as important is the ability of audit committee members, as with all directors, to understand the corporation's business and risk profile and to apply their business experience and judgment with an independent and critical eye to the issues for which the committee is responsible.

- With the significant responsibilities imposed on audit committees under applicable law, regulations and listing standards, consideration should be given to whether it is appropriate to limit the number of public company audit committees on which a corporation's audit committee members may serve. Some boards have adopted policies that audit committee members may not serve on the audit committees of more than three public corporations, in accordance with applicable securities market listing standards. Policies may permit exceptions to this limit when the corporation's board determines that the simultaneous service would not affect an individual's ability to serve effectively on the corporation's audit committee.

- The audit committee is responsible for supervising the corporation's relationship with its outside auditor. In performing this responsibility, the primary functions of the audit committee include:
 - Retaining the auditor and approving in advance the terms of the annual audit engagement.* The selection of the outside auditor should involve an annual due diligence process in which the audit committee reviews the qualifications, work product, independence and reputation of the outside auditor and the performance of key members of the audit team. The committee should be mindful of the schedule, mandated by applicable law and regulations, for rotating the engagement and concurring partners and should begin the process of reviewing new partners sufficiently in advance of required rotations. The audit committee also should consider periodically whether it is appropriate for the corporation to change its outside auditor. The audit committee should base its decisions about selecting and possibly changing the outside auditor on its assessment of what is likely to lead to more effective audits. In retaining the auditor, the audit committee should oversee the process of negotiating the annual audit engagement letter and should scrutinize the terms of the engagement carefully.

 - Overseeing the independence of the outside auditor.* The audit committee should maintain an ongoing, open dialogue with the outside auditor about independence issues. The committee should consider its overall approach to using the outside auditor as a service provider and identify those services, beyond the annual audit engagement, that the outside auditor can provide to the corporation consistent with applicable law and regulations and with maintaining independence. In pre-approving all non-audit services to be provided by the outside auditor, as required by applicable law and regulations, the

2-A Corporate Governance: Law and Practice

audit committee should decide whether to adopt a pre-approval policy or approve services on an engagement-by-engagement basis.

- The audit committee also is responsible for overseeing the corporation's financial reporting process. The audit committee should review and discuss the corporation's annual financial statements with management and the outside auditor and should review the corporation's quarterly financial statements and related earnings press releases prior to issuance. As part of its reviews, the audit committee should review and discuss with management and the outside auditor the corporation's critical accounting policies, the quality of accounting judgments and estimates made by management, and any material written communications between the outside auditor and management.

- The audit committee should understand and be familiar with the corporation's system of internal controls over financial reporting and its disclosure controls and procedures, including the processes for producing the certifications required of the CEO and principal financial officer, and the audit committee should be comfortable that the corporation has appropriate controls in place. On a periodic basis, the committee should review with both the internal and outside auditors, as well as with management, the corporation's procedures for maintaining and evaluating the effectiveness of these systems. The committee should be promptly notified of any significant deficiencies or material weaknesses in internal controls and kept informed about the steps and timetable for correcting them.

- Unless the full board or another committee does so, the audit committee should oversee the corporation's program that addresses compliance with ethical and legal standards and important corporate policies, including the corporation's code of conduct and the mechanisms it has in place for employees to report compliance issues. In accordance with applicable legal requirements, the audit committee should establish procedures for receiving and handling complaints and concerns related to accounting, internal accounting controls and auditing issues, and the committee should evaluate these procedures periodically and revise them as appropriate. The audit committee should be briefed regularly on the status of outstanding compliance issues, including concerns submitted through the committee's procedures for handling accounting and related concerns, and it should receive prompt notification of any significant compliance issues.

- The audit committee should understand the corporation's risk profile and oversee its risk assessment and risk management practices.

- The audit committee should oversee the corporation's internal audit function, including reviewing the scope of the internal audit plan, reports submitted by the internal audit staff and management's response, and the appointment and replacement of the senior internal auditing executive.

- The audit committee should implement a policy covering the hiring of personnel who previously worked for the corporation's outside auditor. At a minimum, this policy should incorporate the "cooling off" period mandated by applicable law and regulations.

- Audit committee meetings should be held frequently enough to allow the committee to monitor the corporation's financial reporting appropriately. Meetings should be scheduled with enough time to permit and encourage active discussions with management and the internal and outside auditors. The audit committee should meet privately with each of the internal and outside auditors and management on a regular basis, and in any event at least quarterly, and communicate with them between meetings as necessary. The audit committee also should hold private sessions with the corporation's chief legal officer on a regular basis to facilitate the communication of concerns regarding legal compliance matters and significant legal contingencies. The audit committee also may determine that it is appropriate to hold

private sessions with other parties, such as outside counsel, from time to time.

Corporate Governance Committee

- Every publicly owned corporation should have a committee composed solely of independent directors that addresses director nominations and corporate governance matters.
- The corporate governance committee (often combined with or referred to as a nominating committee) should have at least three members and should be composed solely of independent directors.
- The corporate governance committee recommends director nominees to the full board and the corporation's shareholders; oversees the composition, structure, operation and evaluation of the board and its committees; and plays a leadership role in shaping the corporate governance of the corporation. Depending on how the board has allocated responsibilities among its committees, the corporate governance committee also may oversee the compensation of the board if the compensation committee does not do so, or the two committees may share oversight responsibility for this area.
- In performing the core function of recommending nominees to the board, the corporate governance committee should establish criteria for board and committee membership and recommend these criteria to the board for approval. Based on these criteria, the committee should identify director candidates, review their qualifications and any potential conflicts with the corporation's interests, and recommend candidates to the board. The committee also should assess the contributions of current directors in connection with their renomination.
- In identifying director candidates, the corporate governance committee should take a proactive approach by soliciting ideas for potential candidates from a variety of sources. The committee should have the authority to retain search firms as appropriate to assist it in identifying candidates and should develop a process for considering shareholder recommendations for board nominees. Although it is appropriate for the CEO to meet with board candidates, the final responsibility for selecting director nominees should rest with the corporate governance committee and the board.
- The corporate governance committee should monitor and safeguard the independence of the board. An important function of a corporate governance committee, related to its core function of recommending nominees to the board, is to see that a substantial majority of the directors on the board meet appropriate standards of independence that are consistent with securities market listing standards and to see that these directors are independent in both fact and appearance. The corporate governance committee should develop and recommend standards of independence to the board, assess the independence of directors in light of these standards, and make recommendations to the board regarding determinations of director independence. In addition, the committee should be notified promptly of any change in a director's circumstances that may affect the director's independence.
- The corporate governance committee also recommends directors for appointment to committees of the board. The committee should periodically review the board's committee structure and annually recommend candidates for membership on the board's committees. The committee should see that the key board committees, including the audit, compensation and corporation governance committees, are composed of directors who meet applicable independence and qualification standards.
- The corporate governance committee should oversee the effective functioning of the board. The committee should review the board's policies relating to meeting schedules and agendas and the corporation's processes for providing information to the board. The corporate governance committee

should assess the reporting channels through which the board receives information and see that the board obtains appropriately detailed information in a timely fashion.

- The corporate governance committee should develop and recommend to the board a set of corporate governance principles, review them annually, and recommend changes to the board as appropriate. The corporation's corporate governance principles should be publicly available and should address, at a minimum, board leadership, qualifications for directors (including independence standards), director responsibilities, the structure and functioning of board committees, board access to management and advisers, director compensation, director orientation and continuing education, board evaluations, and management succession.

- The corporate governance committee should oversee the evaluation of the board and its committees. Specifics concerning the evaluation process are discussed under "Board and Committee Evaluation."

Compensation Committee

- Every publicly owned corporation should have a committee composed solely of independent directors that addresses compensation issues.

- The compensation committee should have at least three members and should be composed solely of independent directors. All committee members should have sufficient knowledge of executive compensation and related issues to perform their duties effectively.

- The compensation committee's responsibilities include overseeing the corporation's overall compensation structure, policies and programs; establishing or recommending to the board performance goals and objectives for the CEO and other members of senior management; and establishing or recommending to the independent directors compensation for the CEO and senior management. The compensation committee should see that the corporation's compensation policies reflect the core principle of pay for performance and should establish meaningful goals for performance-based compensation.

- The compensation committee should have the authority to retain compensation consultants, counsel and other advisers to provide the committee with independent advice.

- The compensation committee should understand all aspects of an executive's compensation package and should review and understand the maximum pay-out due under multiple scenarios (such as retirement, termination with or without cause, and severance in connection with business combinations or the sale of a business).

- The compensation committee should require senior management to build and maintain significant continuing equity investment in the corporation. The committee should establish requirements that senior management acquire and hold a meaningful amount of the corporation's stock. The committee also should consider whether to require senior management to hold for a period of time a specified amount of stock earned through incentive-based awards.

- In addition to reviewing and setting compensation for senior management, the compensation committee should look more broadly at the overall compensation structure of the enterprise to determine that it establishes appropriate incentives for management and employees at all levels. The committee should consider carefully and understand the incentives created by different forms of compensation. Incentives should further the corporation's long-term strategic plan and be consistent with the culture of

the corporation and the overall goal of enhancing enduring shareholder value.

- Executive compensation should directly link the interests of senior management, both individually and as a team, to the long-term interests of shareholders. It should include significant performance-based criteria related to long-term shareholder value and should reflect upside potential and downside risk.
- The compensation committee should consider whether the benefits and perquisites provided to senior management are proportional to the contributions made by management.
- The compensation committee should oversee the corporation's disclosures with respect to executive compensation. In particular, the committee should use the compensation committee report included in the corporation's annual proxy statement to provide shareholders with meaningful and understandable information about the corporation's executive compensation practices.

Board Operations

- Serving on a board requires significant time and attention on the part of directors. Directors must participate in board meetings, review relevant materials, serve on board committees, and prepare for meetings and discussions with management. They must spend the time needed and meet as frequently as necessary to properly discharge their responsibilities. The appropriate number of hours to be spent by a director on his or her duties and the frequency and length of board meetings depend largely on the complexity of the corporation and its operations. Longer meetings may permit directors to explore key issues in depth, whereas shorter but more frequent meetings may help directors stay up-to-date on emerging corporate trends and business and regulatory developments. When arranging a meeting schedule for the board, each corporation should consider the nature and complexity of its operations and transactions, as well as its business and regulatory environment.
- Directors should receive incentives to focus on long-term shareholder value. Including equity as part of directors' compensation helps align the interests of directors with those of the corporation's shareholders. Accordingly, a meaningful portion of a director's compensation should be in the form of long-term equity. In this regard, corporations increasingly are providing the long-term equity component of directors' compensation in the form of restricted stock, rather than stock options, to better align directors' interests with those of shareholders. Corporations should establish a requirement that directors acquire a meaningful amount of the corporation's stock and hold that stock for as long as they remain on the board.
- Business Roundtable does not endorse a specific limitation on the number of directorships an individual may hold. However, service on too many boards can interfere with an individual's ability to satisfy his or her responsibilities, either as a member of senior management or as a director. Before accepting an additional board position, a director should consider whether the acceptance of a new directorship will compromise the ability to perform present responsibilities. It also is good practice for directors to notify the chair of the corporate governance committee for each board on which they serve before accepting a seat on the board of another corporation. Some corporations require the prior approval of the corporate governance committee. Similarly, the corporation should establish a process to review senior management service on other boards prior to acceptance.
- The board's independent or nonmanagement directors should have the opportunity to meet regularly in executive session, outside the presence of the CEO and any other management directors, in accordance with applicable listing standards.

2-A Corporate Governance: Law and Practice

Time for an executive session should be placed on the agenda for every regularly scheduled board meeting.

To maximize the effectiveness of executive sessions, there should be follow-up with the CEO and other appropriate members of senior management.

■ Many board responsibilities may be delegated to committees to permit directors to address key areas in more depth. Regardless of whether the board grants plenary power to its committees with respect to particular issues or prefers to take recommendations from its committees, committees should keep the full board informed of their activities. Corporations benefit greatly from the collective wisdom of the entire board acting as a deliberative body, and the interaction between committees and the full board should reflect this principle.

■ The board's agenda must be carefully planned yet flexible enough to accommodate emergencies and unexpected developments. The chairman of the board should work with the lead director (when the corporation has one) in setting the agenda and should be responsive to individual directors' requests to add items to the agenda and open to suggestions for improving the agenda. It is important that the agenda and meeting schedule permit adequate time for discussion and a healthy give-and-take between board members and management.

■ Board agendas should be structured to allow time for open discussion. Board members should have full access to senior management.

■ The board must have accurate, complete information to do its job; the quality of information received by the board directly affects its ability to perform its oversight function effectively. Directors should receive and review information from a variety of sources, including management, board committees, outside experts, auditor presentations, and analyst and media reports. The board should be provided with information before board and committee meetings, with sufficient time to review and reflect on key issues and to request supplemental information as necessary.

■ Corporations should have an orientation process for new directors that is designed to familiarize them with the corporation's business, industry and corporate governance practices. Common practices include briefings from senior management, on-site visits to the corporation's facilities, informal meetings with other directors and written materials. Corporations also should encourage directors to take advantage of educational opportunities on an ongoing basis to enable them to better perform their duties and to keep informed about developments in areas such as the corporation's industry, corporate governance and director responsibilities.

■ Where appropriate, boards and board committees should seek advice from outside advisers independent of management with respect to matters within their responsibility. For example, there may be technical aspects of the corporation's business -- such as risk assessment and risk management -- or conflict of interest situations for which the board or a committee determines that additional expert advice would be useful. Similarly, many compensation committees engage their own compensation consultants. The board and its committees should have the authority to select and retain advisers and approve the terms of their retention and fees.

Management Development and Succession

■ Long-term planning for CEO and senior management development and succession is one of the

board's most important functions. The board, its corporate governance committee or another committee of independent directors should identify and regularly update the qualities and characteristics necessary for an effective CEO. With these principles in mind, the board or committee should periodically monitor and review the development and progression of potential internal candidates against these standards.

- Emergency succession planning also is critical. Working with the CEO, the board or committee should see that plans are in place for contingencies such as the departure, death or disability of the CEO or other members of senior management to facilitate the transition to both interim and longer term leadership in the event of an untimely vacancy.

- Under the oversight of an independent committee or the lead director, the board should annually review the performance of the CEO and participate with the CEO in the evaluation of members of senior management. All nonmanagement members of the board should participate with the CEO in senior management evaluations. The results of the CEO's evaluation should be promptly communicated to the CEO in executive session by representatives of the independent directors and used by the compensation committee or board in determining the CEO's compensation.

Board and Committee Evaluation

- The board should have an effective mechanism for evaluating performance on a continuing basis. Meaningful board evaluation requires an assessment of the effectiveness of the full board, the operations of board committees and the contributions of individual directors.

- For some companies, securities market listing standards now require that the board and its audit, compensation and corporate governance committees conduct annual evaluations. Regardless of whether an evaluation is required, the performance of the full board should be evaluated annually, as should the performance of its committees. The board should use the annual self-evaluation to assess whether it is following the procedures necessary to function effectively. Each board committee should conduct an annual self-evaluation to assess its effectiveness, and the results of this evaluation should be reported to the full board.

- The board should have a process for evaluating whether the individuals sitting on the board bring the skills and expertise appropriate for the corporation and how they work as a group. Board positions should not be regarded as permanent. Directors should serve only so long as they add value to the board, and a director's ability to continue to contribute to the board should be examined by the corporate governance committee each time the director is considered for renomination.

- Planning for the departure of directors and the designation of new board members is essential. The board should plan ahead for changes in membership, and it should have written criteria for director candidates that should be re-evaluated periodically. The board also should establish procedures for the retirement or replacement of board members. These procedures may, for example, include a mandatory retirement age, a term limit and/or a requirement that directors who change their primary employment tender a board resignation, providing an opportunity for the governance committee to consider the desirability of their continued service on the board.

IV. Relationships with Shareholders and Other Constituencies

Corporations are often said to have obligations to shareholders and other constituencies, including employees, the communities in which they do business and government, but these obligations are best viewed as part of the paramount duty to optimize long-term shareholder value. Business Roundtable believes that shareholder value is enhanced when a corporation treats its employees well, serves its customers well, fosters good relationships with suppliers, maintains an effective compliance program and strong corporate governance practices, and has a reputation for civic responsibility.

Shareholders and Investors

- Corporations have a responsibility to communicate effectively and candidly with shareholders. The goal of shareholder communications should be to help shareholders understand the business, risk profile, financial condition and operating performance of the corporation and the board's corporate governance practices.

- Corporations communicate with investors and other constituencies not only in proxy statements, annual and other reports, and formal shareholder meetings, but in many other ways as well. All of these communications should provide consistency, clarity and candor.

- Corporations should have effective procedures for shareholders to communicate with the board and for directors to respond to shareholder concerns. The board, or an independent committee such as the corporate governance committee, should establish, oversee and regularly review and update these procedures as appropriate.

- The board should respond in a timely manner to substantive communications from shareholders, and when appropriate, directors should meet with shareholders regarding issues of concern.

- A corporation's procedures for shareholder communications and its governance practices should be readily available to shareholders. Information about the board's structure and operations, committee composition and responsibilities, corporate governance principles, and codes of ethics should be widely disseminated to shareholders.

- The board should be notified of shareholder proposals, and the board or its corporate governance committee should oversee the corporation's response to these proposals.

- Directors should attend the corporation's annual meeting of shareholders, and the corporation should have a policy requiring attendance absent unusual circumstances. Time at the annual meeting should be set aside for shareholders to submit questions and for management or directors to respond to those questions.

- The board should seriously consider issues raised by shareholder proposals that receive substantial support and should communicate its response to proposals to the shareholder-proponents and to all shareholders.

- The board should respond appropriately when a director nominee receives a significant "withhold" or "against" vote with respect to his or her election to the board. The corporate governance committee should assess the reasons for the vote and recommend to the board the action to be taken with respect to the vote, which should be communicated to the corporation's shareholders.

- In planning communications with shareholders and investors, corporations should consider:

2-A Corporate Governance: Law and Practice

Candor. Directors and management should never mislead or misinform shareholders about the corporation's operations or financial condition.

Need for timely disclosure. In an age of instant communication, corporations increasingly are disclosing significant information closer to the time when it arises and becomes available. Business Roundtable supports prompt disclosure of significant developments.

Use of technology. Technology makes communicating quicker, easier and less expensive. Corporations should take advantage of technological advances to enhance the dissemination of information to shareholders and employees.

Ultimate goal of shareholder communications. Whatever the substance of the communication, the corporation's ultimate goal should be to furnish information that is honest, intelligible, meaningful, timely and broadly disseminated and that gives investors a realistic picture of the corporation's financial condition and results of operations through the eyes of management.

Employees

- It is in a corporation's best interest to treat employees fairly and equitably.
- Corporations should have in place policies and practices that provide employees with compensation, including benefits, that is appropriate given the nature of the corporation's business and employees' job responsibilities and geographic locations.
- When corporations offer retirement, health care, insurance and other benefit plans, employees should be fully informed of the terms of those plans.
- Corporations should have in place and publicize mechanisms for employees to seek guidance and to alert management and the board about potential or actual misconduct without fear of retribution.
- Corporations should communicate honestly with their employees about corporate operations and financial performance.

Communities

- Corporations have obligations to be good citizens of the local, national and international communities in which they do business. Failure to meet these obligations can result in damage to the corporation, both in immediate economic terms and in longer-term reputational value.
- A corporation should be a good citizen and contribute to the communities in which it operates by making charitable contributions and encouraging its directors, managers and employees to form relationships with those communities. A corporation also should be active in promoting awareness of health, safety and environmental issues, including any issues that relate to the specific types of business in which the corporation is engaged.

Government

- Corporations, like all citizens, must act within the law. The penalties for serious violations of law can be extremely severe, even life-threatening, for corporations. Compliance is not only appropriate -- it is essential. Management should take reasonable steps to develop, implement and maintain an effective legal compliance program, and the board should be knowledgeable about and oversee the program, including periodically reviewing the program to gain reasonable assurance that it is effective in deterring and preventing misconduct.

- Corporations have an important perspective to contribute to the public policy dialogue and should be actively involved in discussions about the development, enactment and revision of the laws and regulations that affect their businesses and the communities in which they operate and their employees reside.

Appendix B NYSE CORPORATE GOVERNANCE STANDARDS, NYSE LISTED COMPANY MANUAL § 303A

2-B Corporate Governance: Law and Practice § 303A.00

Introduction

General Application

Companies listed on the Exchange must comply with certain standards regarding corporate governance as codified in this Section 303A. Consistent with the NYSE's traditional approach, as well as the requirements of the Sarbanes-Oxley Act of 2002, certain provisions of Section 303A are applicable to some listed companies but not to others.

Equity Listings

Section 303A applies in full to all companies listing common equity securities, with the following exceptions:

Controlled Companies

A listed company of which more than 50% of the voting power is held by an individual, a group or another company need not comply with the requirements of Sections 303A.01, 303A.04 or 303A.05. A controlled company that chooses to take advantage of any or all of these exemptions must disclose that choice, that it is a controlled company and the basis for the determination in its annual proxy statement or, if the company does not file an annual proxy statement, in the company's annual report on Form 10-K filed with the SEC. Controlled companies must comply with the remaining provisions of Section 303A.

Limited Partnerships and Companies in Bankruptcy

Due to their unique attributes, limited partnerships and companies in bankruptcy proceedings need not comply with the requirements of Sections 303A.01, 303A.04 or 303A.05. However, all limited partnerships (at the general partner level) and companies in bankruptcy proceedings must comply with the remaining provisions of Section 303A.

Closed-End and Open-End Funds

The Exchange considers the significantly expanded standards and requirements provided for in Section 303A to be unnecessary for closed-end and open-end management investment companies that are registered under the Investment Company Act of 1940, given the pervasive federal regulation applicable to them. However, closed-end funds must

comply with the requirements of Sections 303A.06, 303A.07(a) and 303A.07(c), and 303A.12. Note, however, that in view of the common practice to utilize the same directors for boards in the same fund complex, closed-end funds will not be required to comply with the disclosure requirement in the second paragraph of the Commentary to 303A.07(a), which calls for disclosure of a board's determination with respect to simultaneous service on more than three public company audit committees. However, the other provisions of that paragraph will apply.

Business development companies, which are a type of closed-end management investment company defined in Section 2(a)(48) of the Investment Company Act of 1940 that are not registered under that Act, are required to comply with all of the provisions of Section 303A applicable to domestic issuers other than Sections 303A.02 and 303A.07(b). For purposes of Sections 303A.01, 303A.03, 303A.04, 303A.05, and 303A.09, a director of a business development company shall be considered to be independent if he or she is not an "interested person" of the company, as defined in Section 2(a)(19) of the Investment Company Act of 1940.

As required by Rule 10A-3 under the Exchange Act, open-end funds (which can be listed as Investment Company Units, more commonly known as Exchange Traded Funds or ETFs) are required to comply with the requirements of Sections 303A.06 and 303A.12(b) and (c).

Rule 10A-3(b)(3)(ii) under the Exchange Act requires that each audit committee must establish procedures for the confidential, anonymous submission by employees of the listed issuer of concerns regarding questionable accounting or auditing matters. In view of the external management structure often employed by closed-end and open-end funds, the Exchange also requires the audit committees of such companies to establish such procedures for the confidential, anonymous submission by employees of the investment adviser, administrator, principal underwriter, or any other provider of accounting related services for the management company, as well as employees of the management company. This responsibility must be addressed in the audit committee charter.

Other Entities

Except as otherwise required by Rule 10A-3 under the Exchange Act (for example, with respect to open-end funds), Section 303A does not apply to passive business organizations in the form of trusts (such as royalty trusts) or to derivatives and special purpose securities (such as those described in Sections 703.16, 703.19, 703.20 and 703.21). To the extent that Rule 10A-3 applies to a passive business organization, listed derivative or special purpose security, such entities are required to comply with Sections 303A.06 and 303A.12(b).

Foreign Private Issuers

Listed companies that are foreign private issuers (as such term is defined in Rule 3b-4 under the Exchange Act) are permitted to follow home country practice in lieu of the provisions of this Section 303A, except that such companies are required to comply with the requirements of Sections 303A.06, 303A.11 and 303A.12(b) and (c).

Preferred and Debt Listings

Section 303A does not generally apply to companies listing only preferred or debt securities on the Exchange. To the extent required by Rule 10A-3 under the Exchange Act, all companies listing only preferred or debt securities on the NYSE are required to comply with the requirements of Sections 303A.06 and 303A.12(b) and (c).

Effective Dates/Transition Periods

Except for Section 303A.08, which became effective June 30, 2003, listed companies will have until the earlier of their first annual meeting after January 15, 2004, or October 31, 2004, to comply with the new standards contained in Section 303A, although if a listed company with a classified board would be required (other than by virtue of a requirement

under Section 303A.06) to change a director who would not normally stand for election in such annual meeting, the listed company may continue such director in office until the second annual meeting after such date, but no later than December 31, 2005. In addition, foreign private issuers will have until July 31, 2005 to comply with the new audit committee standards set out in Section 303A.06, and will not be required to provide the written affirmations required by Section 303A.12(c) until after that date. As a general matter, the existing audit committee requirements provided for in Section 303 continue to apply to listed companies pending the transition to the new rules. On November 3, 2004, the SEC approved a change to the Section 303A.02(b)(iii) bright line test for director independence relating to audit firms. Companies will have until their first annual meeting after June 30, 2005, to replace a director who was independent under the prior test but who is not independent under the current test.

Companies listing in conjunction with their initial public offering will be permitted to phase in their independent nomination and compensation committees on the same schedule as is permitted pursuant to Rule 10A-3 under the Exchange Act for audit committees, that is, one independent member at the time of listing, a majority of independent members within 90 days of listing and fully independent committees within one year. Such companies will be required to meet the majority independent board requirement within 12 months of listing. For purposes of Section 303A other than Sections 303A.06 and 303A.12(b), a company will be considered to be listing in conjunction with an initial public offering if, immediately prior to listing, it does not have a class of common stock registered under the Exchange Act. The Exchange will also permit companies that are emerging from bankruptcy or have ceased to be controlled companies within the meaning of Section 303A to phase in independent nomination and compensation committees and majority independent boards on the same schedule as companies listing in conjunction with an initial public offering. However, for purposes of Sections 303A.06 and 303A.12(b), a company will be considered to be listing in conjunction with an initial public offering only if it meets the conditions of Rule 10A-3(b)(1)(iv)(A) under the Exchange Act, namely, that the company was not, immediately prior to the effective date of a registration statement, required to file reports with the SEC pursuant to Section 13(a) or 15(d) of the Exchange Act.

Companies listing upon transfer from another market have 12 months from the date of transfer in which to comply with any requirement to the extent the market on which they were listed did not have the same requirement. To the extent the other market has a substantially similar requirement but also had a transition period from the effective date of that market's rule, which period had not yet expired, the company will have the same transition period as would have been available to it on the other market. This transition period for companies transferring from another market will not apply to the requirements of Section 303A.06 unless a transition period is available pursuant to Rule 10A-3 under the Exchange Act.

References to Form 10-K

There are provisions in this Section 303A that call for disclosure in a listed company's Form 10-K under certain circumstances. If a listed company subject to such a provision is not a company required to file a Form 10-K, then the provision shall be interpreted to mean the annual periodic disclosure form that the listed company does file with the SEC. For example, for a closed-end management company, the appropriate form would be the annual Form N-CSR. If a listed company is not required to file either an annual proxy statement or an annual periodic report with the SEC, the disclosure shall be made in the annual report required under Section 203.01 of the NYSE Listed Company Manual.

2-B Corporate Governance: Law and Practice § 303A.01

Independent Directors

Listed companies must have a majority of independent directors.

Commentary: Effective boards of directors exercise independent judgment in carrying out their responsibilities. Requiring a majority of independent directors will increase the quality of board oversight and lessen the possibility of damaging conflicts of interest.

Appendix B NYSE CORPORATE GOVERNANCE STANDARDS, NYSE LISTED COMPANY MANUAL § 303A

2-B Corporate Governance: Law and Practice § 303A.02

Independence Tests

In order to tighten the definition of "independent director" for purposes of these standards:

(a) No director qualifies as "independent" unless the board of directors affirmatively determines that the director has no material relationship with the listed company (either directly or as a partner, shareholder or officer of an organization that has a relationship with the company). Companies must identify which directors are independent and disclose the basis for that determination.

Commentary: It is not possible to anticipate, or explicitly to provide for, all circumstances that might signal potential conflicts of interest, or that might bear on the materiality of a director's relationship to a listed company (references to "company" would include any parent or subsidiary in a consolidated group with the company). Accordingly, it is best that boards making "independence" determinations broadly consider all relevant facts and circumstances. In particular, when assessing the materiality of a director's relationship with the listed company, the board should consider the issue not merely from the standpoint of the director, but also from that of persons or organizations with which the director has an affiliation. Material relationships can include commercial, industrial, banking, consulting, legal, accounting, charitable and familial relationships, among others. However, as the concern is independence from management, the Exchange does not view ownership of even a significant amount of stock, by itself, as a bar to an independence finding.

The identity of the independent directors and the basis for a board determination that a relationship is not material must be disclosed in the listed company's annual proxy statement or, if the company does not file an annual proxy statement, in the company's annual report on Form 10-K filed with the SEC. In this regard, a board may adopt and disclose categorical standards to assist it in making determinations of independence and may make a general disclosure if a director meets these standards. Any determination of independence for a director who does not meet these standards must be specifically explained. A company must disclose any standard it adopts. It may then make the general statement that the independent directors meet the standards set by the board without detailing particular aspects of the immaterial relationships between individual directors and the company. In the event that a director with a business or other relationship that does not fit within the disclosed standards is determined to be independent, a board must disclose the basis for its determination in the manner described above. This approach provides investors with an adequate means of assessing the quality of a board's independence and its independence determinations while avoiding excessive disclosure of immaterial relationships.

(b) In addition, a director is not independent if:

(i) The director is, or has been within the last three years, an employee of the listed company, or an immediate family member is, or has been within the last three years, an executive officer,ⁿ¹ of the listed company.

Commentary: Employment as an interim Chairman or CEO or other executive officer shall not disqualify a director from being considered independent following that employment.

(ii) The director has received, or has an immediate family member who has received, during any twelve-month period within the last three years, more than \$100,000 in direct compensation from the listed company, other than director and committee fees and pension or other forms of deferred compensation for prior service (provided such compensation is not contingent in any way on continued service).

Commentary: Compensation received by a director for former service as an interim Chairman or CEO or other executive officer need not be considered in determining independence under this test. Compensation received by an immediate family member for service as an employee of the listed company (other than an executive officer) need not be considered in determining independence under this test.

(iii) (A) The director or an immediate family member is a current partner of a firm that is the company's internal or external auditor; (B) the director is a current employee of such a firm; (C) the director has an immediate family member who is a current employee of such a firm and who participates in the firm's audit, assurance or tax compliance (but not tax planning) practice; or (D) the director or an immediate family member was within the last three years (but is no longer) a partner or employee of such a firm and personally worked on the listed company's audit within that time.

(iv) The director or an immediate family member is, or has been within the last three years, employed as an executive officer of another company where any of the listed company's present executive officers at the same time serves or served on that company's compensation committee.

(v) The director is a current employee, or an immediate family member is a current executive officer, of a company that has made payments to, or received payments from, the listed company for property or services in an amount which, in any of the last three fiscal years, exceeds the greater of \$1 million, or 2% of such other company's consolidated gross revenues.

Commentary: In applying the test in Section 303A.02(b)(v), both the payments and the consolidated gross revenues to be measured shall be those reported in the last completed fiscal year. The look-back provision for this test applies solely to the financial relationship between the listed company and the director or immediate family member's current employer; a listed company need not consider former employment of the director or immediate family member.

Contributions to tax exempt organizations shall not be considered "payments" for purposes of Section 303A.02(b)(v), provided however that a listed company shall disclose in its annual proxy statement, or if the listed company does not file an annual proxy statement, in the company's annual report on Form 10-K filed with the SEC, any such contributions made by the listed company to any tax exempt organization in which any independent director serves as an executive officer if, within the preceding three years, contributions in any single fiscal year from the listed company to the organization exceeded the greater of \$1 million, or 2% of such tax exempt organization's consolidated gross revenues. Listed company boards are reminded of their obligations to consider the materiality of any such relationship in accordance with Section 303A.02(a) above.

General Commentary to Section 303A.02(b): An "immediate family member" includes a person's spouse, parents, children, siblings, mothers and fathers-in-law, sons and daughters-in-law, brothers and sisters-in-law, and anyone (other

than domestic employees) who shares such person's home. When applying the look-back provisions in Section 303A.02(b), listed companies need not consider individuals who are no longer immediate family members as a result of legal separation or divorce, or those who have died or become incapacitated. In addition, references to the "company" would include any parent or subsidiary in a consolidated group with the company.

Transition Rule. Each of the above standards contains a three-year "look-back" provision. In order to facilitate a smooth transition to the new independence standards, the Exchange will phase in the "look-back" provisions by applying only a one-year look-back for the first year after adoption of these new standards. The three-year look-backs provided for in Section 303A.02(b) will begin to apply only from and after November 4, 2004.

As an example, until November 3, 2004, a company need look back only one year when testing compensation under Section 303A.02(b)(ii). Beginning November 4, 2004, however, the company would need to look back the full three years provided in Section 303A.02(b)(ii).

FOOTNOTES:

(n3)Footnote 1. For purposes of Section 303A, the term "executive officer" has the same meaning specified for the term "officer" in Rule 16-1(f) under the Securities Exchange Act of 1934.

Appendix B NYSE CORPORATE GOVERNANCE STANDARDS, NYSE LISTED COMPANY MANUAL § 303A

2-B Corporate Governance: Law and Practice § 303A.03

Executive Sessions

To empower non-management directors to serve as a more effective check on management, the non-management directors of each listed company must meet at regularly scheduled executive sessions without management.

Commentary: To promote open discussion among the non-management directors, companies must schedule regular executive sessions in which those directors meet without management participation. "Non-management" directors are all those who are not executive officers, and includes such directors who are not independent by virtue of a material relationship, former status or family membership, or for any other reason.

Regular scheduling of such meetings is important not only to foster better communication among non-management directors, but also to prevent any negative inference from attaching to the calling of executive sessions. A non-management director must preside over each executive session of the non-management directors, although the same director is not required to preside at all executive sessions of the non-management directors. If one director is chosen to preside at all of these meetings, his or her name must be disclosed in the listed company's annual proxy statement or, if the company does not file an annual proxy statement, in the company's annual report on Form 10-K filed with the SEC. Alternatively, if the same individual is not the presiding director at every meeting, a listed company must disclose the procedure by which a presiding director is selected for each executive session. For example, a listed company may wish to rotate the presiding position among the chairs of board committees.

In order that interested parties may be able to make their concerns known to the non-management directors, a listed company must disclose a method for such parties to communicate directly with the presiding director or with the non-management directors as a group. Such disclosure must be made in the listed company's annual proxy statement or, if the company does not file an annual proxy statement, in the company's annual report on Form 10-K filed with the SEC. Companies may, if they wish, utilize for this purpose the same procedures they have established to comply with the requirement of Rule 10A-3 (b)(3) under the Exchange Act, as applied to listed companies through Section 303A.06.

While this Section 303A.03 refers to meetings of non-management directors, if that group includes directors who are not independent under this Section 303A, listed companies should at least once a year schedule an executive session including only independent directors.

Appendix B NYSE CORPORATE GOVERNANCE STANDARDS, NYSE LISTED COMPANY MANUAL § 303A

2-B Corporate Governance: Law and Practice § 303A.04

Nominating/Corporate Governance Committee

(a) Listed companies must have a nominating/corporate governance committee composed entirely of independent directors.

(b) The nominating/corporate governance committee must have a written charter that addresses:

(i) the committee's purpose and responsibilities - which, at minimum, must be to: identify individuals qualified to become board members, consistent with criteria approved by the board, and to select, or to recommend that the board select, the director nominees for the next annual meeting of shareholders; develop and recommend to the board a set of corporate governance guidelines applicable to the corporation; and oversee the evaluation of the board and management; and

(ii) an annual performance evaluation of the committee.

Commentary: A nominating/corporate governance committee is central to the effective functioning of the board. New director and board committee nominations are among a board's most important functions. Placing this responsibility in the hands of an independent nominating/corporate governance committee can enhance the independence and quality of nominees. The committee is also responsible for taking a leadership role in shaping the corporate governance of a corporation.

If a listed company is legally required by contract or otherwise to provide third parties with the ability to nominate directors (for example, preferred stock rights to elect directors upon a dividend default, shareholder agreements, and management agreements), the selection and nomination of such directors need not be subject to the nominating committee process.

The nominating/corporate governance committee charter should also address the following items: committee member qualifications; committee member appointment and removal; committee structure and operations (including authority to delegate to subcommittees); and committee reporting to the board. In addition, the charter should give the nominating/corporate governance committee sole authority to retain and terminate any search firm to be used to identify director candidates, including sole authority to approve the search firm's fees and other retention terms.

Boards may allocate the responsibilities of the nominating/corporate governance committee to committees of their own denomination, provided that the committees are composed entirely of independent directors. Any such committee must have a published committee charter.

Appendix B NYSE CORPORATE GOVERNANCE STANDARDS, NYSE LISTED COMPANY MANUAL § 303A

2-B Corporate Governance: Law and Practice § 303A.05

Compensation Committee

(a) Listed companies must have a compensation committee composed entirely of independent directors.

(b) The compensation committee must have a written charter that addresses:

(i) the committee's purpose and responsibilities - which, at minimum, must be to have direct responsibility to:

(A) review and approve corporate goals and objectives relevant to CEO compensation, evaluate the CEO's performance in light of those goals and objectives, and, either as a committee or together with the other independent directors (as directed by the board), determine and approve the CEO's compensation level based on this evaluation; and

(B) make recommendations to the board with respect to non-CEO executive officer compensation, and incentive-compensation and equity-based plans that are subject to board approval; and

(C) produce a compensation committee report on executive officer compensation as required by the SEC to be included in the listed company's annual proxy statement or annual report on Form 10-K filed with the SEC;

(ii) an annual performance evaluation of the compensation committee.

Commentary: In determining the long-term incentive component of CEO compensation, the committee should consider the listed company's performance and relative shareholder return, the value of similar incentive awards to CEOs at comparable companies, and the awards given to the listed company's CEO in past years. To avoid confusion, note that the compensation committee is not precluded from approving awards (with or without ratification of the board) as may be required to comply with applicable tax laws (i.e., Rule 162(m)). Note also that nothing in Section 303A.05(b)(i)(B) is intended to preclude the board from delegating its authority over such matters to the compensation committee.

The compensation committee charter should also address the following items: committee member qualifications; committee member appointment and removal; committee structure and operations (including authority to delegate to subcommittees); and committee reporting to the board.

Additionally, if a compensation consultant is to assist in the evaluation of director, CEO or executive officer compensation, the compensation committee charter should give that committee sole authority to retain and terminate the consulting firm, including sole authority to approve the firm's fees and other retention terms.

Boards may allocate the responsibilities of the compensation committee to committees of their own denomination, provided that the committees are composed entirely of independent directors. Any such committee must have a published committee charter.

Nothing in this provision should be construed as precluding discussion of CEO compensation with the board generally, as it is not the intent of this standard to impair communication among members of the board.

2-B Corporate Governance: Law and Practice § 303A.06

Audit Committee

Listed companies must have an audit committee that satisfies the requirements of Rule 10A-3 under the Exchange Act.

Commentary: The Exchange will apply the requirements of Rule 10A-3 in a manner consistent with the guidance provided by the Securities and Exchange Commission in SEC Release No. 34-47654 (April 1, 2003). Without limiting the generality of the foregoing, the Exchange will provide companies the opportunity to cure defects provided in Rule 10A-3(a)(3) under the Exchange Act.

Appendix B NYSE CORPORATE GOVERNANCE STANDARDS, NYSE LISTED COMPANY MANUAL § 303A

2-B Corporate Governance: Law and Practice § 303A.07

Audit Committee Additional Requirements

(a) The audit committee must have a minimum of three members.

Commentary: Each member of the audit committee must be financially literate, as such qualification is interpreted by the listed company's board in its business judgment, or must become financially literate within a reasonable period of time after his or her appointment to the audit committee. In addition, at least one member of the audit committee must have accounting or related financial management expertise, as the listed company's board interprets such qualification in its business judgment. While the Exchange does not require that a listed company's audit committee include a person who satisfies the definition of audit committee financial expert set out in Item 401(h) of Regulation S-K, a board may presume that such a person has accounting or related financial management expertise.

Because of the audit committee's demanding role and responsibilities, and the time commitment attendant to committee membership, each prospective audit committee member should evaluate carefully the existing demands on his or her time before accepting this important assignment. Additionally, if an audit committee member simultaneously serves on the audit committees of more than three public companies, and the listed company does not limit the number of audit committees on which its audit committee members serve to three or less, then in each case, the board must determine that such simultaneous service would not impair the ability of such member to effectively serve on the listed company's audit committee and disclose such determination in the listed company's annual proxy statement or, if the company does not file an annual proxy statement, in the company's annual report on Form 10-K filed with the SEC.

(b) In addition to any requirement of Rule 10A-3(b)(1), all audit committee members must satisfy the requirements for independence set out in Section 303A.02.

(c) The audit committee must have a written charter that addresses:

(i) the committee's purpose - which, at minimum, must be to:

(A) assist board oversight of (1) the integrity of the listed company's financial statements, (2) the listed company's compliance with legal and regulatory requirements, (3) the independent auditor's qualifications and independence, and (4) the performance of the listed company's internal audit function and independent auditors; and

(B) prepare an audit committee report as required by the SEC to be included in the listed company's annual proxy statement;

(ii) an annual performance evaluation of the audit committee; and

(iii) the duties and responsibilities of the audit committee - which, at a minimum, must include those set out in Rule 10A-3(b)(2), (3), (4) and (5) of the Exchange Act, as well as to:

(A) at least annually, obtain and review a report by the independent auditor describing: the firm's internal quality-control procedures; any material issues raised by the most recent internal quality-control review, or peer review, of the firm, or by any inquiry or investigation by governmental or professional authorities, within the preceding five years, respecting one or more independent audits carried out by the firm, and any steps taken to deal with any such issues; and (to assess the auditor's independence) all relationships between the independent auditor and the listed company;

Commentary: After reviewing the foregoing report and the independent auditor's work throughout the year, the audit committee will be in a position to evaluate the auditor's qualifications, performance and independence. This evaluation should include the review and evaluation of the lead partner of the independent auditor. In making its evaluation, the audit committee should take into account the opinions of management and the listed company's internal auditors (or other personnel responsible for the internal audit function). In addition to assuring the regular rotation of the lead audit partner as required by law, the audit committee should further consider whether, in order to assure continuing auditor independence, there should be regular rotation of the audit firm itself. The audit committee should present its conclusions with respect to the independent auditor to the full board.

(B) meet to review and discuss the listed company's annual audited financial statements and quarterly financial statements with management and the independent auditor, including reviewing the company's specific disclosures under "Management's Discussion and Analysis of Financial Condition and Results of Operations";

(C) discuss the listed company's earnings press releases, as well as financial information and earnings guidance provided to analysts and rating agencies;

Commentary: The audit committee's responsibility to discuss earnings releases, as well as financial information and earnings guidance, may be done generally (i.e., discussion of the types of information to be disclosed and the type of presentation to be made). The audit committee need not discuss in advance each earnings release or each instance in which a listed company may provide earnings guidance.

(D) discuss policies with respect to risk assessment and risk management;

Commentary: While it is the job of the CEO and senior management to assess and manage the listed company's exposure to risk, the audit committee must discuss guidelines and policies to govern the process by which this is handled. The audit committee should discuss the listed company's major financial risk exposures and the steps management has taken to monitor and control such exposures. The audit committee is not required to be the sole body responsible for risk assessment and management, but, as stated above, the committee must discuss guidelines and policies to govern the process by which risk assessment and management is undertaken. Many companies, particularly financial companies, manage and assess their risk through mechanisms other than the audit committee. The processes these companies have in place should be reviewed in a general manner by the audit committee, but they need not be replaced by the audit committee.

(E) meet separately, periodically, with management, with internal auditors (or other personnel responsible for

the internal audit function) and with independent auditors;

Commentary: To perform its oversight functions most effectively, the audit committee must have the benefit of separate sessions with management, the independent auditors and those responsible for the internal audit function. As noted herein, all listed companies must have an internal audit function. These separate sessions may be more productive than joint sessions in surfacing issues warranting committee attention.

(F) review with the independent auditor any audit problems or difficulties and management's response;

Commentary: The audit committee must regularly review with the independent auditor any difficulties the auditor encountered in the course of the audit work, including any restrictions on the scope of the independent auditor's activities or on access to requested information, and any significant disagreements with management. Among the items the audit committee may want to review with the auditor are: any accounting adjustments that were noted or proposed by the auditor but were "passed" (as immaterial or otherwise); any communications between the audit team and the audit firm's national office respecting auditing or accounting issues presented by the engagement; and any "management" or "internal control" letter issued, or proposed to be issued, by the audit firm to the listed company. The review should also include discussion of the responsibilities, budget and staffing of the listed company's internal audit function.

(G) set clear hiring policies for employees or former employees of the independent auditors; and

Commentary: Employees or former employees of the independent auditor are often valuable additions to corporate management. Such individuals' familiarity with the business, and personal rapport with the employees, may be attractive qualities when filling a key opening. However, the audit committee should set hiring policies taking into account the pressures that may exist for auditors consciously or subconsciously seeking a job with the company they audit.

(H) report regularly to the board of directors.

Commentary: The audit committee should review with the full board any issues that arise with respect to the quality or integrity of the listed company's financial statements, the company's compliance with legal or regulatory requirements, the performance and independence of the company's independent auditors, or the performance of the internal audit function.

General Commentary to Section 303A.07(c): While the fundamental responsibility for the listed company's financial statements and disclosures rests with management and the independent auditor, the audit committee must review: (A) major issues regarding accounting principles and financial statement presentations, including any significant changes in the company's selection or application of accounting principles, and major issues as to the adequacy of the company's internal controls and any special audit steps adopted in light of material control deficiencies; (B) analyses prepared by management and/or the independent auditor setting forth significant financial reporting issues and judgments made in connection with the preparation of the financial statements, including analyses of the effects of alternative GAAP methods on the financial statements; (C) the effect of regulatory and accounting initiatives, as well as off-balance sheet structures, on the financial statements of the listed company; and (D) the type and presentation of information to be included in earnings press releases (paying particular attention to any use of "pro forma" or "adjusted" non-GAAP, information), as well as review any financial information and earnings guidance provided to analysts and rating agencies.

(d) Each listed company must have an internal audit function.

Commentary: Listed companies must maintain an internal audit function to provide management and the audit committee with ongoing assessments of the company's risk management processes and system of internal control. A

listed company may choose to outsource this function to a third party service provider other than its independent auditor.

General Commentary to Section 303A.07: To avoid any confusion, note that the audit committee functions specified in Section 303A.07 are the sole responsibility of the audit committee and may not be allocated to a different committee.

Appendix B NYSE CORPORATE GOVERNANCE STANDARDS, NYSE LISTED COMPANY MANUAL § 303A

2-B Corporate Governance: Law and Practice § 303A.08

Shareholder Approval of Equity Compensation Plans

Shareholders must be given the opportunity to vote on all equity-compensation plans and material revisions thereto, with limited exemptions explained below.

Equity-compensation plans can help align shareholder and management interests, and equity-based awards are often very important components of employee compensation. To provide checks and balances on the potential dilution resulting from the process of earmarking shares to be used for equity-based awards, the Exchange requires that all equity-compensation plans, and any material revisions to the terms of such plans, be subject to shareholder approval, with the limited exemptions explained below.

Definition of Equity-Compensation Plan

An "equity-compensation plan" is a plan or other arrangement that provides for the delivery of equity securities (either newly issued or treasury shares) of the listed company to any employee, director or other service provider as compensation for services. Even a compensatory grant of options or other equity securities that is not made under a plan is, nonetheless, an "equity-compensation plan" for these purposes. However, the following are not "equity-compensation plans" even if the brokerage and other costs of the plan are paid for by the listed company:

- Plans that are made available to shareholders generally, such as a typical dividend reinvestment plan.
- Plans that merely allow employees, directors or other service providers to elect to buy shares on the open market or from the listed company for their current fair market value, regardless of whether:
 - the shares are delivered immediately or on a deferred basis; or
 - the payments for the shares are made directly or by giving up compensation that is otherwise due (for example, through payroll deductions).

Material Revisions

A "material revision" of an equity-compensation plan includes (but is not limited to), the

following:

- A material increase in the number of shares available under the plan (other than an increase solely to reflect a reorganization, stock split, merger, spinoff or similar transaction).

-- If a plan contains a formula for automatic increases in the shares available (sometimes called an "evergreen formula") or for automatic grants pursuant to a formula, each such increase or grant will be considered a revision requiring shareholder approval unless the plan has a term of not more than ten years.

This type of plan (regardless of its term) is referred to below as a "formula plan." Examples of automatic grants pursuant to a formula are (1) annual grants to directors of restricted stock having a certain dollar value, and (2) "matching contributions," whereby stock is credited to a participant's account based upon the amount of compensation the participant elects to defer.

-- If a plan contains no limit on the number of shares available and is not a formula plan, then each grant under the plan will require separate shareholder approval regardless of whether the plan has a term of not more than ten years.

This type of plan is referred to below as a "discretionary plan." A requirement that grants be made out of treasury shares or repurchased shares will not, in itself, be considered a limit or pre-established formula so as to prevent a plan from being considered a discretionary plan.

- An expansion of the types of awards available under the plan.
- A material expansion of the class of employees, directors or other service providers eligible to participate in the plan.
- A material extension of the term of the plan.
- A material change to the method of determining the strike price of options under the plan.

-- A change in the method of determining "fair market value" from the closing price on the date of grant to the average of the high and low price on the date of grant is an example of a change that the Exchange would not view as material.

- The deletion or limitation of any provision prohibiting repricing of options. See the next section for details.

Note that an amendment will not be considered a "material revision" if it curtails rather than expands the scope of the plan in question.

Repricings

A plan that does not contain a provision that specifically permits repricing of options will be considered for purposes of this listing standard as prohibiting repricing. Accordingly any actual repricing of options will be considered a material revision of a plan even if the plan itself is not revised. This consideration will not apply to a repricing through an exchange offer that commenced before the date this listing standard became effective.

"Repricing" means any of the following or any other action that has the same effect:

- Lowering the strike price of an option after it is granted.
- Any other action that is treated as a repricing under generally accepted accounting principles.
- Canceling an option at a time when its strike price exceeds the fair market value of the underlying stock, in exchange for another option, restricted stock, or other equity, unless the cancellation and exchange occurs in connection with a merger, acquisition, spin-off or other similar corporate transaction.

Exemptions

This listing standard does not require shareholder approval of employment inducement awards, certain grants, plans and amendments in the context of mergers and acquisitions, and certain specific types of plans, all as described below. However, these exempt grants, plans and amendments may be made only with the approval of the company's independent compensation committee or the approval of a majority of the company's independent directors. Companies must also notify the Exchange in writing when they use one of these exemptions.

Employment Inducement Awards

An employment inducement award is a grant of options or other equity-based compensation as a material inducement to a person or persons being hired by the listed company or any of its subsidiaries, or being rehired following a bona fide period of interruption of employment. Inducement awards include grants to new employees in connection with a merger or acquisition. Promptly following a grant of any inducement award in reliance on this exemption, the listed company must disclose in a press release the material terms of the award, including the recipient(s) of the award and the number of shares involved.

Mergers and Acquisitions

Two exemptions apply in the context of corporate acquisitions and mergers.

First, shareholder approval will not be required to convert, replace or adjust outstanding options or other equity-compensation awards to reflect the transaction.

Second, shares available under certain plans acquired in corporate acquisitions and mergers may be used for certain post-transaction grants without further shareholder approval. This exemption applies to situations where a party that is not a listed company following the transaction has shares available for grant under pre-existing plans that were previously approved by shareholders. A plan adopted in contemplation of the merger or acquisition transaction would not be considered "pre-existing" for purposes of this exemption.

Shares available under such a pre-existing plan may be used for post-transaction grants of options and other awards with respect to equity of the entity that is the listed company after the transaction, either under the pre-existing plan or another plan, without further shareholder approval, so long as:

- the number of shares available for grants is appropriately adjusted to reflect the transaction;
- the time during which those shares are available is not extended beyond the period when they would have been available under the pre-existing plan, absent the transaction; and
- the options and other awards are not granted to individuals who were employed, immediately before

the transaction, by the post-transaction listed company or entities that were its subsidiaries immediately before the transaction.

Any shares reserved for listing in connection with a transaction pursuant to either of these exemptions would be counted by the Exchange in determining whether the transaction involved the issuance of 20% or more of the company's outstanding common stock and thus required shareholder approval under Listed Company Manual Section 312.03(c).

These merger-related exemptions will not result in any increase in the aggregate potential dilution of the combined enterprise. Further, mergers or acquisitions are not routine occurrences, and are not likely to be abused. Therefore, the Exchange considers both of these exemptions to be consistent with the fundamental policy involved in this standard.

Qualified Plans, Parallel Excess Plans and Section 423 Plans

The following types of plans (and material revisions thereto) are exempt from the shareholder approval requirement:

- plans intended to meet the requirements of *Section 401(a) of the Internal Revenue Code* (e.g., ESOPs);
- plans intended to meet the requirements of *Section 423 of the Internal Revenue Code*; and
- "parallel excess plans" as defined below.

Section 401(a) plans and Section 423 plans are already regulated under the Internal Revenue Code and Treasury regulations. Section 423 plans, which are stock purchase plans under which an employee can purchase no more than \$25,000 worth of stock per year at a plan-specified discount capped at 15%, are also required by the Internal Revenue Code to receive shareholder approval. While Section 401(a) plans and parallel excess plans are not required to be approved by shareholders, U.S. GAAP requires that the shares issued under these plans be "expensed" (i.e., treated as a compensation expense on the income statement) by the company issuing the shares.

An equity-compensation plan that provides non-U.S. employees with substantially the same benefits as a comparable Section 401(a) plan, Section 423 plan or parallel excess plan that the listed company provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law, are also exempt from shareholder approval under this section.

The term "parallel excess plan" means a plan that is a "pension plan" within the meaning of the Employee Retirement Income Security Act ("ERISA") that is designed to work in parallel with a plan intended to be qualified under *Internal Revenue Code Section 401(a)* to provide benefits that exceed the limits set forth in *Internal Revenue Code Section 402(g)* (the section that limits an employee's annual pre-tax contributions to a 401(k) plan), *Internal Revenue Code Section 401(a)(17)* (the section that limits the amount of an employee's compensation that can be taken into account for plan purposes) and/or *Internal Revenue Code Section 415* (the section that limits the contributions and benefits under qualified plans) and/or any successor or similar limitations that may hereafter be enacted. A plan will not be considered a parallel excess plan unless (1) it covers all or substantially all employees of an employer who are participants in the related qualified plan whose annual compensation is in excess of the limit of Code Section 401(a)(17) (or any successor or similar limits that may hereafter be enacted); (2) its terms are substantially the same as the qualified plan that it parallels except for the elimination of the limits described in the preceding sentence and the limitation described in clause (3); and (3) no participant receives employer equity contributions under the plan in excess of 25% of the participant's cash compensation.

Transition Rules

Except as provided below, a plan that was adopted before the date of the Securities and Exchange Commission order approving this listing standard will not be subject to shareholder approval under this listing standard unless and until it is materially revised.

In the case of a discretionary plan (as defined in "Material Revisions" above), whether or not previously approved by shareholders, additional grants may be made after the effective date of this listing standard without further shareholder approval only for a limited transition period, defined below, and then only in a manner consistent with past practice. See also "Material Revisions" above. In applying this rule, if a plan can be separated into a discretionary plan portion and a portion that is not discretionary, the non-discretionary portion of the plan can continue to be used separately, under the appropriate transition rule. For example, if a shareholder-approved plan permits both grants pursuant to a provision that makes available a specific number of shares, and grants pursuant to a provision authorizing the use of treasury shares without regard to the specific share limit, the former provision (but not the latter) may continue to be used after the transition period, under the general rule above.

Similarly, in the case of a formula plan (as defined in "Material Revisions" above) that either (1) has not previously been approved by shareholders or (2) does not have a term of ten years or less, additional grants may be made after the effective date of this listing standard without further shareholder approval only for a limited transition period, defined below.

The limited transition period described in the preceding two paragraphs will end upon the first to occur of:

- the listed company's next annual meeting at which directors are elected that occurs more than 180 days after the effective date of this listing standard;
- the first anniversary of the effective date of this listing standard; and
- the expiration of the plan.

A shareholder-approved formula plan may continue to be used after the end of this transition period if it is amended to provide for a term of ten years or less from the date of its original adoption or, if later, the date of its most recent shareholder approval. Such an amendment may be made before or after the effective date of this listing standard, and would not itself be considered a "material revision" requiring shareholder approval.

In addition, a formula plan may continue to be used, without shareholder approval, if the grants after the effective date of this listing standard are made only from the shares available immediately before the effective date, in other words, based on formulaic increases that occurred prior to such effective date.

Appendix B NYSE CORPORATE GOVERNANCE STANDARDS, NYSE LISTED COMPANY MANUAL § 303A

2-B Corporate Governance: Law and Practice § 303A.09

Corporate Governance Guidelines

Listed companies must adopt and disclose corporate governance guidelines.

Commentary: No single set of guidelines would be appropriate for every listed company, but certain key areas of universal importance include director qualifications and responsibilities, responsibilities of key board committees, and director compensation. Given the importance of corporate governance, each listed company's website must include its corporate governance guidelines and the charters of its most important committees (including at least the audit, and if applicable, compensation and nominating committees). The listed company must state in its annual proxy statement or, if the company does not file an annual proxy statement, in the company's annual report on Form 10-K filed with the SEC that the foregoing information is available on its website, and that the information is available in print to any shareholder who requests it. Making this information publicly available should promote better investor understanding of the listed company's policies and procedures, as well as more conscientious adherence to them by directors and management.

The following subjects must be addressed in the corporate governance guidelines:

- **Director qualification standards.** These standards should, at minimum, reflect the independence requirements set forth in Sections 303A.01 and 303A.02. Companies may also address other substantive qualification requirements, including policies limiting the number of boards on which a director may sit, and director tenure, retirement and succession.
- **Director responsibilities.** These responsibilities should clearly articulate what is expected from a director, including basic duties and responsibilities with respect to attendance at board meetings and advance review of meeting materials.
- **Director access to management and, as necessary and appropriate, independent advisors.**
- **Director compensation.** Director compensation guidelines should include general principles for determining the form and amount of director compensation (and for reviewing those principles, as appropriate). The board should be aware that questions as to directors' independence may be raised when directors' fees and emoluments exceed what is customary. Similar concerns may be raised when the

listed company makes substantial charitable contributions to organizations in which a director is affiliated, or enters into consulting contracts with (or provides other indirect forms of compensation to) a director. The board should critically evaluate each of these matters when determining the form and amount of director compensation, and the independence of a director.

- **Director orientation and continuing education.**

- **Management succession.** Succession planning should include policies and principles for CEO selection and performance review, as well as policies regarding succession in the event of an emergency or the retirement of the CEO.

- **Annual performance evaluation of the board.** The board should conduct a self-evaluation at least annually to determine whether it and its committees are functioning effectively.

Appendix B NYSE CORPORATE GOVERNANCE STANDARDS, NYSE LISTED COMPANY MANUAL § 303A

2-B Corporate Governance: Law and Practice § 303A.10

Code of Business Conduct and Ethics

Listed companies must adopt and disclose a code of business conduct and ethics for directors, officers and employees, and promptly disclose any waivers of the code for directors or executive officers.

Commentary: No code of business conduct and ethics can replace the thoughtful behavior of an ethical director, officer or employee. However, such a code can focus the board and management on areas of ethical risk, provide guidance to personnel to help them recognize and deal with ethical issues, provide mechanisms to report unethical conduct, and help to foster a culture of honesty and accountability.

Each code of business conduct and ethics must require that any waiver of the code for executive officers or directors may be made only by the board or a board committee and must be promptly disclosed to shareholders. This disclosure requirement should inhibit casual and perhaps questionable waivers, and should help assure that, when warranted, a waiver is accompanied by appropriate controls designed to protect the listed company. It will also give shareholders the opportunity to evaluate the board's performance in granting waivers.

Each code of business conduct and ethics must also contain compliance standards and procedures that will facilitate the effective operation of the code. These standards should ensure the prompt and consistent action against violations of the code. Each listed company's website must include its code of business conduct and ethics. The listed company must state in its annual proxy statement or, if the company does not file an annual proxy statement, in the company's annual report on Form 10-K filed with the SEC, that the foregoing information is available on its website and that the information is available in print to any shareholder who requests it.

Each listed company may determine its own policies, but all listed companies should address the most important topics, including the following:

- **Conflicts of interest.** A "conflict of interest" occurs when an individual's private interest interferes in any way - or even appears to interfere - with the interests of the corporation as a whole. A conflict situation can arise when an employee, officer or director takes actions or has interests that may make it difficult to perform his or her company work objectively and effectively. Conflicts of interest also arise when an employee, officer or director, or a member of his or her family, receives improper personal benefits as a result of his or her position in the company. Loans to, or guarantees of obligations of, such

persons are of special concern. The listed company should have a policy prohibiting such conflicts of interest, and providing a means for employees, officers and directors to communicate potential conflicts to the listed company.

■ **Corporate opportunities.** Employees, officers and directors should be prohibited from (a) taking for themselves personally opportunities that are discovered through the use of corporate property, information or position; (b) using corporate property, information, or position for personal gain; and (c) competing with the company. Employees, officers and directors owe a duty to the company to advance its legitimate interests when the opportunity to do so arises.

■ **Confidentiality.** Employees, officers and directors should maintain the confidentiality of information entrusted to them by the listed company or its customers, except when disclosure is authorized or legally mandated. Confidential information includes all non-public information that might be of use to competitors, or harmful to the company or its customers, if disclosed.

■ **Fair dealing.** Each employee, officer and director should endeavor to deal fairly with the company's customers, suppliers, competitors and employees. None should take unfair advantage of anyone through manipulation, concealment, abuse of privileged information, misrepresentation of material facts, or any other unfair-dealing practice. Listed companies may write their codes in a manner that does not alter existing legal rights and obligations of companies and their employees, such as "at will" employment arrangements.

■ **Protection and proper use of company assets.** All employees, officers and directors should protect the company's assets and ensure their efficient use. Theft, carelessness and waste have a direct impact on the listed company's profitability. All company assets should be used for legitimate business purposes.

■ **Compliance with laws, rules and regulations (including insider trading laws).** The listed company should proactively promote compliance with laws, rules and regulations, including insider trading laws. Insider trading is both unethical and illegal, and should be dealt with decisively.

■ **Encouraging the reporting of any illegal or unethical behavior.** The listed company should proactively promote ethical behavior. The company should encourage employees to talk to supervisors, managers or other appropriate personnel when in doubt about the best course of action in a particular situation. Additionally, employees should report violations of laws, rules, regulations or the code of business conduct to appropriate personnel. To encourage employees to report such violations, the listed company must ensure that employees know that the company will not allow retaliation for reports made in good faith.

Foreign Private Issuer Disclosure

Listed foreign private issuers must disclose any significant ways in which their corporate governance practices differ from those followed by domestic companies under NYSE listing standards.

Commentary: Foreign private issuers must make their U.S. investors aware of the significant ways in which their corporate governance practices differ from those required of domestic companies under NYSE listing standards. However, foreign private issuers are not required to present a detailed, item-by-item analysis of these differences. Such a disclosure would be long and unnecessarily complicated. Moreover, this requirement is not intended to suggest that one country's corporate governance practices are better or more effective than another. The Exchange believes that U.S. shareholders should be aware of the significant ways that the governance of a listed foreign private issuer differs from that of a U.S. listed company. The Exchange underscores that what is required is a brief, general summary of the significant differences, not a cumbersome analysis.

Listed foreign private issuers may provide this disclosure either on their web site (provided it is in the English language and accessible from the United States) and/or in their annual report as distributed to shareholders in the United States in accordance with Sections 103.00 and 203.01 of the Listed Company Manual (again, in the English language). If the disclosure is only made available on the web site, the annual report shall so state and provide the web address at which the information may be obtained.

2-B Corporate Governance: Law and Practice § 303A.12

Certification Requirements

(a) Each listed company CEO must certify to the NYSE each year that he or she is not aware of any violation by the company of NYSE corporate governance listing standards, qualifying the certification to the extent necessary.

Commentary: The CEO's annual certification regarding the NYSE's corporate governance listing standards will focus the CEO and senior management on the listed company's compliance with the listing standards. Both this certification to the NYSE, including any qualifications to that certification, and any CEO/CFO certifications required to be filed with the SEC regarding the quality of the listed company's public disclosure, must be disclosed in the company's annual report to shareholders or, if the company does not prepare an annual report to shareholders, in the company's annual report on Form 10-K filed with the SEC.

(b) Each listed company CEO must promptly notify the NYSE in writing after any executive officer of the listed company becomes aware of any material non-compliance with any applicable provisions of this Section 303A.

(c) Each listed company must submit an executed Written Affirmation annually to the NYSE. In addition, each listed company must submit an interim Written Affirmation each time a change occurs to the board or any of the committees subject to Section 303A. The annual and interim Written Affirmations must be in the form specified by the NYSE.

Appendix B NYSE CORPORATE GOVERNANCE STANDARDS, NYSE LISTED COMPANY MANUAL § 303A

2-B Corporate Governance: Law and Practice § 303A.13

Public Reprimand Letter

The NYSE may issue a public reprimand letter to any listed company that violates a NYSE listing standard.

Commentary: Suspending trading in or delisting a listed company can be harmful to the very shareholders that the NYSE listing standards seek to protect; the NYSE must therefore use these measures sparingly and judiciously. For this reason it is appropriate for the NYSE to have the ability to apply a lesser sanction to deter companies from violating its corporate governance (or other) listing standards. Accordingly, the NYSE may issue a public reprimand letter to any listed company, regardless of type of security listed or country of incorporation, that it determines has violated a NYSE listing standard. For companies that repeatedly or flagrantly violate NYSE listing standards, suspension and delisting remain the ultimate penalties. For clarification, this lesser sanction is not intended for use in the case of companies that fall below the financial and other continued listing standards provided in Chapter 8 of the Listed Company Manual or that fail to comply with the audit committee standards set out in Section 303A.06. The processes and procedures provided for in Chapter 8 govern the treatment of companies falling below those standards.

Website Requirement

Listed companies must have and maintain a publicly accessible website.

Commentary: To the extent that a listed company is subject to the requirements of Sections 303A.04, .05, .07(c), .09 or .10, each listed company's website must include a printable version of the applicable charters of its compensation, nominating and audit committees, as well as its corporate governance guidelines and code of business conduct and ethics. In addition, a listed company that is a foreign private issuer is required to include the disclosure required by Section 303A.11 on its website in the English language and such website must be accessible from the United States.

In the case of a listed company that is a closed-end fund, if the company does not maintain its own website, the company may utilize a website that the company is allowed to use to satisfy the website posting requirement in Exchange Act Rule 16a-3(k).

2-C Corporate Governance: Law and Practice

NASDAQ Rule 4200. DEFINITIONS

(a) For purposes of the Rule 4000 Series, unless the context requires otherwise:

...

(15) "Independent director" means a person other than an executive officer or employee of the company or any other individual having a relationship which, in the opinion of the issuer's board of directors, would interfere with the exercise of independent judgement in carrying out the responsibilities of a director. The following persons shall not be considered independent:

(A) a director who is, or at any time during the past three years was, employed by the company;

(B) a director who accepted or who has a Family Member who accepted any compensation from the company in excess of \$100,000 during any period of twelve consecutive months within the three years preceding the determination of independence, other than the following:

(i) compensation for board or board committee service;

(ii) benefits under a tax-qualified retirement plan, or non-discretionary compensation

(iii) benefits under a tax-qualified retirement plan, or non-discretionary compensation.

Provided, however, that in addition to the requirements contained in this paragraph (B), audit committee members are also subject to additional, more stringent requirements under Rule 4350(d).

(C) a director who is a Family Member of an individual who is, or at any time during the past three years was, employed by the company as an executive officer;

(D) a director who is, or has a Family Member who is, a partner in, or a controlling shareholder or an executive officer of, any organization to which the company made, or from which the company received, payments for property or

services in the current or any of the past three fiscal years that exceed 5% of the recipient's consolidated gross revenues for that year, or \$200,000, whichever is more, other than the following:

- (i) payments arising solely from investments in the company's securities; or
- (ii) payments under non-discretionary charitable contribution matching programs.

(E) a director of the issuer who is, or has a Family Member who is, employed as an executive officer of another entity where at any time during the past three years any of the executive officers of the issuer serve on the compensation committee of such other entity; or

(F) a director who is, or has a Family Member who is, a current partner of the company's outside auditor, or was a partner or employee of the company's outside auditor who worked on the company's audit at any time during any of the past three years.

(G) in the case of an investment company, in lieu of paragraphs (A)-(F), a director who is an "interested person" of the company as defined in Section 2(a)(19) of the Investment Company Act of 1940, other than in his or her capacity as a member of the board of directors or any board committee.

IM-4200. DEFINITION OF INDEPENDENCE--RULE 4200(A)(15)

It is important for investors to have confidence that individuals serving as independent directors do not have a relationship with the listed company that would impair their independence. The board has a responsibility to make an affirmative determination that no such relationships exist through the application of Rule 4200. Rule 4200 also provides a list of certain relationships that preclude a board finding of independence. These objective measures provide transparency to investors and companies, facilitate uniform application of the rules, and ease administration. Because Nasdaq does not believe that ownership of company stock by itself would preclude a board finding of independence, it is not included in the aforementioned objective factors. It should be noted that there are additional, more stringent requirements that apply to directors serving on audit committees, as specified in Rule 4350.

The Rule's reference to the "company" includes any parent or subsidiary of the company. The term "parent or subsidiary" is intended to cover entities the issuer controls and consolidates with the issuer's financial statements as filed with the Commission (but not if the issuer reflects such entity solely as an investment in its financial statements). The reference to executive officer means those officers covered in SEC Rule 16a-1(f) under the Act. In the context of the definition of Family Member under Rule 4200(a)(14), the reference to marriage is intended to capture relationships specified in the Rule (parents, children and siblings) that arise as a result of marriage, such as "in-law" relationships.

The three year look-back periods referenced in paragraphs (A), (C), (E) and (F) of the Rule commence on the date the relationship ceases. For example, a director employed by the company is not independent until three years after such employment terminates.

For purposes of paragraph (A) of the Rule, employment by a director as an executive officer on an interim basis shall not disqualify that director from being considered independent following such employment, provided the interim employment did not last longer than one year. A director would not be considered independent while serving as an interim officer. Similarly, for purposes of paragraph (B) of the Rule, compensation received by a director for former service as an interim executive officer need not be considered as compensation in determining independence after such

service, provided such interim employment did not last longer than one year. Nonetheless, the issuer's board of directors still must consider whether such former employment and any compensation received would interfere with the director's exercise of independent judgment in carrying out the responsibilities of a director. In addition, if the director participated in the preparation of the company's financial statements while serving as an interim executive officer, Rule 4350(d)(2)(A)(iii) would preclude service on the audit committee for three years.

Paragraph (B) of the Rule is generally intended to capture situations where a compensation is made directly to (or for the benefit of) the director or a Family Member of the director. For example, consulting or personal service contracts with a director or Family Member of the director would be analyzed under paragraph (B) of the Rule. In addition, political contributions to the campaign of a director or a Family Member of the director would be considered indirect compensation under paragraph (B). Non-preferential payments made in the ordinary course of providing business services (such as payments of interest or proceeds related to banking services or loans by an issuer that is a financial institution or payment of claims on a policy by an issuer that is an insurance company), payments arising solely from investments in the company's securities and loans permitted under Section 13(k) of the Act will not preclude a finding of director independence as long as the payments are non-compensatory in nature. Depending on the circumstances, a loan or payment could be compensatory if, for example, it is not on terms generally available to the public.

Paragraph (D) of the Rule is generally intended to capture payments to an entity with which the director or Family Member of the director is affiliated by serving as a partner, controlling shareholder or executive officer of such entity. Under exceptional circumstances, such as where a director has direct, significant business holdings, it may be appropriate to apply the corporate measurements in paragraph (D), rather than the individual measurements of paragraph (B). Issuers should contact Nasdaq if they wish to apply the Rule in this manner. The reference to a partner in paragraph (D) is not intended to include limited partners. It should be noted that the independence requirements of paragraph (D) of the Rule are broader than SEC Rule 10A-3(e)(8) under the Act.

Under paragraph (D), a director who is, or who has a Family Member who is, an executive officer of a charitable organization may not be considered independent if the company makes payments to the charity in excess of the greater of 5% of the charity's revenues or \$200,000. However, Nasdaq encourages companies to consider other situations where a director or their Family Member and the company each have a relationship with the same charity when assessing director independence.

For purposes of determining whether a lawyer is eligible to serve on an audit committee, SEC Rule 10A-3 under the Act generally provides that any partner in a law firm that receives payments from the issuer is ineligible to serve on that issuer's audit committee. In determining whether a director may be considered independent for purposes other than the audit committee, payments to a law firm would generally be considered under Rule 4200(a)(15)(D), which looks to whether the payment exceeds the greater of 5% of the recipient's gross revenues or \$200,000; however, if the firm is a sole proprietorship, Rule 4200(a)(15)(B), which looks to whether the payment exceeds \$100,000, applies.

Paragraph (G) of the Rule provides a different measurement for independence for investment companies in order to harmonize with the Investment Company Act of 1940. In particular, in lieu of paragraphs (A)-(F), a director who is an "interested person" of the company as defined in Section 2(a)(19) of the Investment Company Act of 1940, other than in his or her capacity as a member of the board of directors or any board committee, shall not be considered independent.

NASDAQ Rule 4350. Qualitative Listing Requirements for Nasdaq National Market and Nasdaq SmallCap Market Issuers Except for Limited Partnerships

(a) Applicability

(1) **Foreign Private Issuers.** A foreign private issuer may follow its home country practice in lieu of the requirements of Rule 4350, provided, however, that such an issuer shall: comply with Rules 4350(b)(1)(B), 4350(j) and 4350(m), have an audit committee that satisfies Rule 4350(d)(3), and ensure that such audit committee's members meet the independence requirement in Rule 4350(d)(2)(A)(ii). A foreign private issuer that follows a home country practice in lieu of one or more provisions of Rule 4350 shall disclose in its annual reports filed with the Commission or on its website each requirement of Rule 4350 that it does not follow and describe the home country practice followed by the issuer in lieu of such requirements. In addition, a foreign private issuer making its initial public offering or first U.S. listing on Nasdaq shall make the same disclosures in its registration statement or on its website.

(2) **Management Investment Companies.** Management investment companies (including business development companies) are subject to all the requirements of Rule 4350, except that management investment companies registered under the Investment Company Act of 1940 are exempt from the requirements of Rule 4350(c) and (n).

(3) **Asset-backed Issuers and Other Passive Issuers.** The following are exempt from the requirements of Rule 4350(c), (d) and (n): (a) asset-backed issuers; and (b) issuers, such as unit investment trusts, that are organized as trusts or other unincorporated associations that do not have a board of directors or persons acting in a similar capacity and whose activities are limited to passively owning or holding (as well as administering and distributing amounts in respect of) securities, rights, collateral or other assets on behalf of or for the benefit of the holders of the listed securities.

(4) **Cooperatives.** Cooperative entities, such as agricultural cooperatives, that are structured to comply with relevant state law and federal tax law and that do not have a publicly traded class of common stock are exempt from Rule 4350(c). However, such entities must comply with all federal securities laws, including without limitation those rules required by Section 10A(m) of the Act and Rule 10A-3 thereunder.

(5) **Phase-In Periods.** Compliance with the independent committee requirements set forth in Rule 4350(c) on the same schedule as it is permitted to phase in its compliance with the independent audit committee requirement pursuant to SEC Rule 10A-3(b)(1)(iv)(A). Accordingly, a company listing in connection with its initial public offering shall be permitted to phase in its compliance with the independent committee requirements set forth in Rule 4350(c) as follows: (1) one independent member at the time of listing; (2) a majority of independent members within 90 days of listing; and (3) all independent members within one year of listing. Furthermore, a company listing in connection with its initial public offering shall have twelve months from the date of listing to comply with the majority independent board requirement in Rule 4350(c). It should be noted, however, that pursuant to SEC Rule 10A-3(b)(1)(iii) investment companies are not afforded the exemptions under SEC Rule 10A-3(b)(1)(iv). Issuers may choose not to adopt a compensation or nomination committee and may instead rely upon a majority of the independent directors to discharge responsibilities under Rule 4350(c). For purposes of Rule 4350 other than Rule 4350(d)(2)(A)(ii) and Rule 4350(m), a company shall be considered to be listing in conjunction with an initial public offering if, immediately prior to listing, it does not have a class of common stock registered under the Act. For purposes of Rule 4350(d)(2)(A)(ii) and Rule 4350(m), a company shall be considered to be listing in conjunction with an initial public offering only if it meets the conditions in SEC Rule 10A-3(b)(1)(iv)(A) under the Act, namely, that the company was not, immediately prior to the effective date of a registration statement, required to file reports with the Commission pursuant to Section 13(a) or 15(d) of the Act.

Companies that are emerging from bankruptcy or have ceased to be Controlled Companies within the meaning of Rule 4350(c)(5) shall be permitted to phase-in independent nomination and compensation committees and majority independent boards on the same schedule as companies listing in conjunction with their initial public offering. It should be noted, however, that a company that has ceased to be a Controlled Company within the meaning of Rule 4350(c)(5) must comply with the audit committee requirements of Rule 4350(d) as of the date it ceased to be a Controlled

Company. Furthermore, the executive sessions requirement of Rule 4350(c)(2) applies to Controlled Companies as of the date of listing and continues to apply after it ceases to be controlled.

Companies transferring from other markets with a substantially similar requirement shall be afforded the balance of any grace period afforded by the other market. Companies transferring from other listed markets that do not have a substantially similar requirement shall be afforded one year from the date of listing on Nasdaq. This transition period is not intended to supplant any applicable requirements of Rule 10A-3 under the Act.

(b) Distribution of Annual and Interim Reports

(1)(A) Each issuer shall make available to shareholders of such securities an annual report containing audited financial statements of the company and its subsidiaries, which, for example, may be on Form 10-K, 20-F, 40-F or N-CSR. An issuer may comply with this requirement either: (i) by mailing the report to shareholders, or (ii) by posting the annual report to shareholders on or through the company's website (or, in the case of an issuer that is an investment company that does not maintain its own website, on a website that the issuer is allowed to use to satisfy the website posting requirement in Exchange Act Rule 16a-3(k)), along with a prominent undertaking in the English language to provide shareholders, upon request, a hard copy of the company's annual report free of charge. An issuer that chooses to satisfy this requirement via a website posting must, simultaneous with this posting, issue a press release stating that its annual report has been filed with the Commission (or other appropriate regulatory authority). This press release must also state that the annual report is available on the company's website and include the website address and that shareholders may receive a hard copy free of charge upon request. An issuer must provide such hard copies within a reasonable period of time following the request.

(B) An issuer that receives an audit opinion that expresses doubt about the ability of the company to continue as a going concern for a reasonable period of time must make a public announcement through the news media disclosing the receipt of such opinion. Prior to the release of the public announcement, the issuer must provide the text of the public announcement to the StockWatch section of Nasdaq's MarketWatch Department ("Nasdaq StockWatch"). The public announcement shall be provided to Nasdaq StockWatch and released to the media not later than seven calendar days following the filing of such audit opinion in a public filing with the Securities and Exchange Commission.

(2) Each issuer which is subject to SEC Rule 13a-13 shall make available copies of quarterly reports including statements of operating results to shareholders either prior to or as soon as practicable following the company's filing of its Form 10-Q with the Commission. If the form of such quarterly report differs from the Form 10-Q, the issuer shall file one copy of the report with Nasdaq in addition to filing its Form 10-Q pursuant to Rule 4310(c)(14). The statement of operations contained in quarterly reports shall disclose, as a minimum, any substantial items of an unusual or nonrecurrent nature and net income before and after estimated federal income taxes or net income and the amount of estimated federal taxes.

(3) Each issuer which is not subject to SEC Rule 13a-13 and which is required to file with the Commission, or another federal or state regulatory authority, interim reports relating primarily to operations and financial position, shall make available to shareholders reports which reflect the information contained in those interim reports. Such reports shall be made available to shareholders either before or as soon as practicable following filing with the appropriate regulatory authority. If the form of the interim report provided to shareholders differs from that filed with the regulatory authority, the issuer shall file one copy of the report to shareholders with Nasdaq in addition to the report to the regulatory authority that is filed with Nasdaq pursuant to Rule 4310(c)(14).

(4) Each foreign private issuer shall publish, in a press release, which would also be submitted on a Form 6-K, an interim balance sheet and income statement as of the end of its second quarter. This information, which must be presented in English but does not have to be reconciled to U.S. GAAP, must be provided not later than six months following the end of the issuer's second quarter.

(c) Independent Directors

(1) A majority of the board of directors must be comprised of independent directors as defined in Rule 4200. The company must disclose in its annual proxy (or, if the issuer does not file a proxy, in its Form 10-K or 20-F) those directors that the board of directors has determined to be independent under Rule 4200. If an issuer fails to comply with this requirement due to one vacancy, or one director ceases to be independent due to circumstances beyond their reasonable control, the issuer shall regain compliance with the requirement by the earlier of its next annual shareholders meeting or one year from the occurrence of the event that caused the failure to comply with this requirement; provided, however, that if the annual shareholders meeting occurs no later than 180 days following the event that caused the failure to comply with this requirement, the issuer shall instead have 180 days from such event to regain compliance. An issuer relying on this provision shall provide notice to Nasdaq immediately upon learning of the event or circumstance that caused the non-compliance.

(2) Independent directors must have regularly scheduled meetings at which only independent directors are present ("executive sessions").

(3) Compensation of Officers

(A) Compensation of the chief executive officer of the company must be determined, or recommended to the Board for determination, either by:

- (i) a majority of the independent directors, or
- (ii) a compensation committee comprised solely of independent directors.

The Chief executive officer may not be present during voting or deliberations.

(B) Compensation of all other executive officers must be determined, or recommended to the Board for determination, either by:

- (i) a majority of the independent directors, or
- (ii) a compensation committee comprised solely of independent directors.

(C) Notwithstanding paragraphs (3)(A)(ii) and (3)(B)(ii) above, if the compensation committee is comprised of at least three members, one director who is not independent as defined in Rule 4200 and is not a current officer or employee or a Family Member of an officer or employee, may be appointed to the compensation committee if the board, under exceptional and limited circumstances, determines that such individual's membership on the committee is required by the best interests of the company and its shareholders, and the board discloses, in the proxy statement for the next annual meeting subsequent to such determination (or, if the issuer does not file a proxy, in its Form 10-K or 20-F), the nature of the relationship and the reasons for the determination. A member appointed under this exception may not serve longer than two years.

(4) Nomination of Directors

(A) Director nominees must either be selected, or recommended for the Board's selection, either by:

- (i) a majority of the independent directors, or

(ii) a nominations committee comprised solely of independent directors.

(B) Each issuer must certify that it has adopted a formal written charter or board resolution, as applicable, addressing the nominations process and such related matters as may be required under the federal securities laws.

(C) Notwithstanding paragraph (4)(A)(ii) above, if the nominations committee is comprised of at least three members, one director, who is not independent as defined in Rule 4200 and is not a current officer or employee or a Family Member of an officer or employee, may be appointed to the nominations committee if the board, under exceptional and limited circumstances, determines that such individual's membership on the committee is required by the best interests of the company and its shareholders, and the board discloses, in the proxy statement for next annual meeting subsequent to such determination (or, if the issuer does not file a proxy, in its Form 10-K or 20-F), the nature of the relationship and the reasons for the determination. A member appointed under this exception may not serve longer than two years.

(D) Independent director oversight of director nominations shall not apply in cases where the right to nominate a director legally belongs to a third party. However, this does not relieve a company's obligation to comply with the committee composition requirements under Rule 4350(c) and (d).

(E) This Rule 4350(c)(4) is not applicable to a company if the company is subject to a binding obligation that requires a director nomination structure inconsistent with this rule and such obligation pre-dates the approval date of this rule.

(5) A Controlled Company is exempt from the requirements of this Rule 4350(c), except for the requirements of subsection (c)(2) which pertain to executive sessions of independent directors. A Controlled Company is a company of which more than 50% of the voting power is held by an individual, a group or another company. A Controlled Company relying upon this exemption must disclose in its annual meeting proxy statement (or, if the issuer does not file a proxy, in its Form 10-K or 20-F) that it is a Controlled Company and the basis for that determination.

(d) Audit Committee

(1) Audit Committee Charter

Each Issuer must certify that it has adopted a formal written audit committee charter and that the audit committee has reviewed and reassessed the adequacy of the formal written charter on an annual basis. The charter must specify:

(A) the scope of the audit committee's responsibilities, and how it carries out those responsibilities, including structure, processes, and membership requirements;

(B) the audit committee's responsibility for ensuring its receipt from the outside auditors of a formal written statement delineating all relationships between the auditor and the company, consistent with Independence Standards Board Standard 1, and the audit committee's responsibility for actively engaging in a dialogue with the auditor with respect to any disclosed relationships or services that may impact the objectivity and independence of the auditor and for taking, or recommending that the full board take, appropriate action to oversee the independence of the outside auditor; and

(C) the committee's purpose of overseeing the accounting and financial reporting processes of the issuer and the audits of the financial statements of the issuer;

(D) the specific audit committee responsibilities and authority set forth in Rule 4350(d)(3).

(2) Audit Committee Composition

(A)(i) Each issuer must have, and certify that it has and will continue to have, an audit committee of at least three

members, each of whom must be independent as defined under Rule 4200(c)(15); (ii) meet the criteria for independence set forth in Rule 10A-3(b)(1) under the Act (subject to the exemptions provided in Rule 10A-3(c)); (iii) not have participated in the preparation of the financial statements of the company or any current subsidiary of the company at any time during the past three years; and (iv) be able to read and understand fundamental financial statements, including a company's balance sheet, income statement, and cash flow statement. Additionally, each issuer must certify that it has, and will continue to have, at least one member of the audit committee who has past employment experience in finance or accounting, requisite professional certification in accounting, or any other comparable experience or background which results in the individual's financial sophistication, including being or having been a chief executive officer, chief financial officer or other senior officer with financial oversight responsibilities.

(B)(i) Notwithstanding paragraph (2)(A)(i), one director who is not independent as defined in Rule 4200; (ii) meets the criteria set forth in Section 10A(m)(3) under the Act and the rules thereunder; and (iii) is not a current officer or employee or a family member of such officer or employee, may be appointed to the audit committee, if the board, under exceptional and limited circumstances, determines that membership on the committee by the individual is required by the best interests of the company and its shareholders, and the board discloses, in the next annual proxy statement subsequent to such determination (or, if the issuer does not file a proxy, in its Form 10-K or 20-F), the nature of the relationship and the reasons for that determination. A member appointed under this exception may not serve longer than two years and may not chair the audit committee.

(3) Audit Committee Responsibilities and Authority

The audit committee must have the specific audit committee responsibilities and authority necessary to comply with Rule 10A-3(b)(2), (3), (4) and (5) under the Act (subject to the exemptions provided in Rule 10A-3(c)), concerning responsibilities relating to: (i) registered public accounting firms, (ii) complaints relating to accounting, internal accounting controls or auditing matters, (iii) authority to engage advisors, and (iv) funding as determined by the audit committee. Audit committees for investment companies must also establish procedures for the confidential, anonymous submission of concerns regarding questionable accounting or auditing matters by employees of the investment adviser, administrator, principal underwriter, or any other provider of accounting related services for the investment company, as well as employees of the investment company.

(4) Cure Periods

(A) If an issuer fails to comply with the audit committee composition requirement under Rule 10A-3(b)(1) under the Act and Rule 4350(d)(2) because an audit committee member ceases to be independent for reasons outside the member's reasonable control, the audit committee member may remain on the audit committee until the earlier of its next annual shareholders meeting or one year from the occurrence of the event that caused the failure to comply with this requirement. An issuer relying on this provision must provide notice to Nasdaq immediately upon learning of the event or circumstance that caused the non-compliance.

(B) If an issuer fails to comply with the audit committee composition requirement under Rule 4350(d)(2)(A) due to one vacancy on the audit committee, and the cure period in paragraph (A) is not otherwise being relied upon for another member, the issuer will have until the earlier of the next annual shareholders meeting or one year from the occurrence of the event that caused the failure to comply with this requirement; provided, however, that if the annual shareholders meeting occurs no later than 180 days following the event that caused the vacancy, the issuer shall instead have 180 days from such event to regain compliance. An issuer relying on this provision must provide notice to Nasdaq immediately upon learning of the event or circumstance that caused the non-compliance.

(5) Exception

At any time when an issuer has a class of common equity securities (or similar securities') that is listed on another

national securities exchange or national securities association subject to the requirements of SEC Rule 10A-3 under the Act, the listing of classes of securities of a direct or indirect consolidated subsidiary or an at least 50% beneficially owned subsidiary of the issuer (except classes of equity securities, other than non-convertible, non-participating preferred securities, of such subsidiary) shall not be subject to the requirements of this paragraph (d).

Cross Reference IM-4200, Definition of Independence - Rule 4200(a)(15)

Cross Reference IM-4350-4, Board Independence and Independent Committees

(e) Shareholder Meetings

Each issuer listing common stock or voting preferred stock, and their equivalents, shall hold an annual meeting of shareholders no later than one year after the end of the issuer's fiscal year-end.

(f) Quorum

Each issuer shall provide for a quorum as specified in its by-laws for any meeting of the holders of common stock; provided, however, that in no case shall such quorum be less than 33 1/3 % of the outstanding shares of the company's common voting stock.

(g) Solicitation of Proxies

Each issuer shall solicit proxies and provide proxy statements for all meetings of shareholders and shall provide copies of such proxy solicitation to Nasdaq.

(h) Conflicts of Interest

Each issuer shall conduct an appropriate review of all related party transactions for potential conflict of interest situations on an ongoing basis and all such transactions shall be approved by the company's audit committee or another independent body of the board of directors. For purposes of this rule, the term "related party transaction" shall refer to transactions required to be disclosed pursuant to SEC Regulation S-K, Item 404. However, in the case of small business issuers (as that term is defined in SEC Rule 12b-2), the term "related party transactions" shall refer to transactions required to be disclosed pursuant to SEC Regulation S-B, Item 404, and in the case of non-U.S. issuers, the term "related party transactions" shall refer to transactions required to be disclosed pursuant to Form 20-F, Item 7.B.

(i) Shareholder Approval

(1) Each issuer shall require shareholder approval prior to the issuance of designated securities under subparagraph (A), (B), (C), or (D) below:

(A) when a stock option or purchase plan is to be established or materially amended or other equity compensation arrangement made or materially amended, pursuant to which options or stock may be acquired by officers, directors, employees, or consultants, except for:

(i) warrants or rights issued generally to all security holders of the company or stock purchase plans available on equal terms to all security holders of the company (such as a typical dividend reinvestment plan); or

(ii) tax qualified, non-discriminatory employee benefit plans (e.g., plans that meet the requirements of *Section 401(a)* or *423 of the Internal Revenue Code*) or parallel nonqualified plans, provided such plans are approved by the issuer's independent compensation committee or a majority of the issuer's independent directors; or plans that merely provide a

convenient way to purchase shares on the open market or from the issuer at fair market value; or

(iii) plans or arrangements relating to an acquisition of merger as permitted under IM-4350-5; or

(iv) issuances to a person not previously an employee or director of the company, or following a bonafide period of non-employment, as an inducement material to the individual's entering into employment with the company, provided such issuances are approved by either the issuer's independent compensation committee or a majority of the issuer's independent directors. Promptly following an issuance of any employment inducement grant in reliance on this exception, a company must disclose in a press release the material terms of the grant, including the recipient(s) of the grant and the number of shares involved.

(B) when the issuance or potential issuance will result in a change of control of the issuer;

(C) in connection with the acquisition of the stock or assets of another company if:

(i) any director, officer or substantial shareholder of the issuer has a 5% or greater interest (or such persons collectively have a 10% or greater interest), directly or indirectly, in the company or assets to be acquired or in the consideration to be paid in the transaction or series of related transactions and the present or potential issuance of common stock, or securities convertible into or exercisable for common stock, could result in an increase in outstanding common shares or voting power of 5% or more; or

(ii) where, due to the present or potential issuance of common stock, or securities convertible into or exercisable for common stock, other than a public offering for cash:

a. the common stock has or will have upon issuance voting power equal to or in excess of 20% of the voting power outstanding before the issuance of stock or securities convertible into or exercisable for common stock; or

b. the number of shares of common stock to be issued is or will be equal to or in excess of 20% of the number of shares or common stock outstanding before the issuance of the stock or securities; or

(D) in connection with a transaction other than a public offering involving:

(i) the sale, issuance or potential issuance by the issuer of common stock (or securities convertible into or exercisable for common stock) at a price less than the greater of book or market value which together with sales by officers, directors or substantial shareholders of the company equals 20% or more of common stock or 20% or more of the voting power outstanding before the issuance; or

(ii) the sale, issuance or potential issuance by the company of common stock (or securities convertible into or exercisable common stock) equal to 20% or more of the common stock or 20% or more of the voting power outstanding before the issuance for less than the greater of book or market value of the stock.

(2) An exception applicable to a specified issuance of securities may be made upon prior written application to Nasdaq's Listing Qualifications Department when: (A) the delay in securing stockholder approval would seriously jeopardize the financial viability of the enterprise; and (B) reliance by the company on this exception is expressly approved by the audit committee or a comparable body of the board of directors comprised solely of independent, disinterested directors. The Listing Qualifications Department shall respond to each application for such an exception in writing.

A company that receives such an exception must mail to all shareholders not later than ten days before issuance of the securities a letter alerting them to its omission to seek the shareholder approval that would otherwise be required. Such notification shall disclose the terms of the transaction (including the number of shares of common stock that could be

issued and the consideration received), the fact that the issuer is relying on a financial viability exception to the shareholder approval rules, and that the audit committee or a comparable body of the board of directors comprised solely of independent, disinterested directors has expressly approved reliance on the exception. The issuer shall also make a public announcement through the news media disclosing the same information as promptly as possible, but no later than ten days before the issuance of the securities.

(3) Only shares actually issued and outstanding (excluding treasury shares or shares held by a subsidiary) are to be used in making any calculation provided for in this paragraph (i). Unissued shares reserved for issuance upon conversion of securities or upon exercise of options or warrants will not be regarded as outstanding.

(4) Voting power outstanding as used in this Rule refers to the aggregate number of votes which may be cast by holders of those securities outstanding which entitle the holders thereof to vote generally on all matters submitted to the company's security holders for a vote.

(5) An interest consisting of less than either 5% of the number of shares of common stock or 5% of the voting power outstanding of an issuer or party shall not be considered a substantial interest or cause the holder of such an interest to be regarded as a substantial security holder.

(6) Where shareholder approval is required, the minimum vote which will constitute shareholder approval shall be a majority of the total votes cast on the proposal. These votes may be cast in person, by proxy at a meeting of shareholders or by written consent in lieu of a special meeting to the extent permitted by applicable state and federal law and rules (including interpretations thereof), including, without limitation, SEC Regulations 14A and 14C. Nothing contained in this Rule 4350(i)(6) shall affect an issuer's obligation to hold an annual meeting of shareholders as required by Rule 4350(e).

(7) Shareholder approval shall not be required for any share issuance if such issuance is part of a court-approved reorganization under the federal bankruptcy laws or comparable foreign laws.

Cross Reference IM-4350-5, Shareholder Approval for Stock Option Plans or Other Equity Compensation Arrangements

(j) Listing Agreement

Each issuer shall execute a Listing Agreement in the form designated by Nasdaq.

(k) Auditor Registration

Each Listed issuer must be audited by an independent public accountant that is registered as a public accounting firm with the Public Company Accounting Oversight Board, as provided for in Section 102 of the Sarbanes-Oxley Act of 2002 [15 U.S.C. 7212].

(l) Direct Registration Program

If an issuer establishes or maintains a Direct Registration Program for its shareholders, the issuer shall, directly or

through its transfer agent, participate in an electronic link with a securities depository registered under Section 17A of the Exchange Act to facilitate the electronic transfer of securities held pursuant to such program

(1) All securities initially listing on Nasdaq on or after January 1, 2007 must be eligible for a Direct Registration Program operated by a clearing agency registered under Section 17A of the Exchange Act. This provision does not extend to: (i) additional classes of securities of companies which already have securities listed on Nasdaq; (ii) companies which immediately prior to such listing had securities listed on another registered securities exchange in the U.S.; or, (iii) non-equity securities which are book-entry only.

(2) On and after March 31, 2008 all securities listed on Nasdaq (except non-equity securities which are book-entry only) must be eligible for a Direct Registration Program operated by a clearing agency registered under Section 17A of the Exchange Act.

(3) If an issuer establishes or maintains a Direct Registration Program for its shareholders, the issuer shall, directly or through its transfer agent, participate in an electronic link with a clearing agency registered under Section 17A of the Act to facilitate the electronic transfer of securities held pursuant to such program.

(m) Notification of Material Noncompliance

An issuer must provide Nasdaq with prompt notification after an executive officer of the issuer becomes aware of any material noncompliance by the issuer with the requirements of this Rule 4350.

(n) Code of Conduct

Each Issuer shall adopt a code of conduct applicable to all directors, officers and employees, which shall be publicly available. A code of conduct satisfying this rule must comply with the definition of a "code of ethics" set out in Section 406(c) of the Sarbanes--Oxley Act of 2002 ("the Sarbanes-Oxley Act") and any regulations promulgated thereunder by the Commission. See *17 C.F.R. 228.406* and *17 C.F.R. 229.406*. In addition, the code must provide for an enforcement mechanism. Any waivers of the code for directors or executive officers must be approved by the Board. Issuers, other than **foreign private issuers**, shall disclose such waivers in a Form 8-K within four business days. **Foreign private issuers** shall disclose such waivers either in a Form 6-K or in the next Form 20-F or 40-F.

IM-4350-4. Board Independence and Independent Committees

Independent Directors and Independent Committees--Rule 4350(c)

Majority Independent Board. Independent directors (as defined in Rule 4200(a)(15)) play an important role in assuring investor confidence. Through the exercise of independent judgment, they act on behalf of investors to maximize shareholder value in the companies they oversee and guard against conflicts of interest. Requiring that the board be comprised of a majority of independent directors empowers such directors to carry out more effectively these

responsibilities.

Executive Sessions of Independent Directors. Regularly scheduled executive sessions encourage and enhance communication among independent directors. It is contemplated that executive sessions will occur at least twice a year, and perhaps more frequently, in conjunction with regularly scheduled board meetings.

Independent Director Oversight of Executive Compensation. Independent director oversight of executive officer compensation helps assure that appropriate incentives are in place, consistent with the board's responsibility to maximize shareholder value. The rule is intended to provide flexibility for an issuer to choose an appropriate board structure and to reduce resource burdens, while ensuring independent director control of compensation decisions.

Independent Director Oversight of Director Nominations. Independent director oversight of nominations enhances investor confidence in the selection of well-qualified director nominees, as well as independent nominees as required by the rules. This rule is also intended to provide flexibility for a company to choose an appropriate board structure and reduce resource burdens, while ensuring that independent directors approve all nominations.

This rule does not apply in cases where the right to nominate a director legally belongs to a third party. For example, investors may negotiate the right to nominate directors in connection with an investment in the company, holders of preferred stock may be permitted to nominate or appoint directors upon certain defaults, or the company may be a party to a shareholder's agreement that allocates the right to nominate some directors. Because the right to nominate directors in these cases does not reside with the company, independent director approval would not be required. This rule is not applicable if the company is subject to a binding obligation that requires a director nomination structure inconsistent with the rule and such obligation pre-dates the approval date of this rule.

Controlled Company Exemption. This exemption recognizes that majority shareholders, including parent companies, have the right to select directors and control certain key decisions, such as executive officer compensation, by virtue of their ownership rights. In order for a group to exist for purposes of this rule, the shareholders must have publicly filed a notice that they are acting as a group (e.g., a Schedule 13D). A Controlled Company not relying upon this exemption need not provide any special disclosures about its controlled status. It should be emphasized that this controlled company exemption does not extend to the audit committee requirements under Rule 4350(d) or the requirement for executive sessions of independent directors under Rule 4350(c)(2).

Audit Committees--Rule 4350(d)

Audit Committee Charter. Each issuer is required to adopt a formal written charter that specifies the scope of its responsibilities and the means by which it carries out those responsibilities; the outside auditor's accountability to the audit committee; and the audit committee's responsibility to ensure the independence of the outside auditor. Consistent with this, the charter must specify all audit committee responsibilities set forth in Rule 10A-3(b)(2), (3), (4) and (5) under the Act. Rule 10A-3(b)(3)(ii) requires that each audit committee must establish procedures for the confidential, anonymous submission by employees of the listed issuer of concerns regarding questionable accounting or auditing matters. The rights and responsibilities as articulated in the audit committee charter empower the audit committee and enhance its effectiveness in carrying out its responsibilities.

Rule 4350(d)(3) imposes additional requirements for investment company audit committees that must also be set forth in audit committee charters for these issuers.

Audit Committee Composition. Audit committees are required to have a minimum of three members and be comprised only of independent directors. In addition to satisfying the independent director requirements under Rule 4200, audit committee members must meet the criteria for independence set forth in Rule 10A-3(b)(1) under the Act (subject to the exemptions provided in Rule 10A-3(c)): they must not accept any consulting, advisory, or other

compensatory fee from the company other than for board service, and they must not be an affiliated person of the company. It is recommended that an issuer disclose in its annual proxy (or, if the issuer does not file a proxy, in its Form 10-K or 20-F) if any director is deemed independent but falls outside the safe harbor provisions of Rule 10A-3(e)(1)(ii) under the Act. A director who qualifies as an audit committee financial expert under Item 401(h) of Regulation S-K or Item 401(e) of Regulation S-B is presumed to qualify as a financially sophisticated audit committee member under Rule 4350(d)(2)(A).

The Audit Committee Responsibilities and Authority. Audit committees must have the specific audit committee responsibilities and authority necessary to comply with Rule 10A-3(b)(2), (3), (4) and (5) under the Act (subject to the exemptions provided in Rule 10A-3(c)), concerning responsibilities relating to registered public accounting firms; complaints relating to accounting; internal accounting controls or auditing matters; authority to engage advisors; and funding. Audit committees for investment companies must also establish procedures for the confidential, anonymous submission of concerns regarding questionable accounting or auditing matters by employees of the investment adviser, administrator, principal underwriter, or any other provider of accounting related services for the investment company, as well as employees of the investment company.

Executive Officers. References to executive officers in Rule 4350 mean those officers covered in Rule 16a-1(f) under the Act.

[Adopted by SEC Release 34-53128 (Jan. 13, 2006).]

IM-4350-5. Shareholder Approval for Stock Option Plans or Other Equity Compensation Arrangements

Employee ownership of company stock can be an effective tool to align employee interests with those of other shareholders. Stock option plans or other equity compensation arrangements can also assist in the recruitment and retention of employees, which is especially critical to young, growing companies, or companies with insufficient cash resources to attract and retain highly qualified employees. However, these plans can potentially dilute shareholder interests. As such, Rule 4350(i)(1)(A) ensures that shareholders have a voice in these situations, given this potential for dilution.

Rule 4350(i)(1)(A) requires shareholder approval when a plan or other equity compensation arrangement is established or materially amended. For these purposes, a material amendment would include, but not be limited to, the following:

- (1) any material increase in the number of shares to be issued under the plan (other than to reflect a reorganization, stock split, merger, spinoff or similar transaction);
- (2) any material increase in benefits to participants, including any material change to: (i) permit a repricing (or decrease in exercise price) of outstanding options, (ii) reduce the price at which shares or options to purchase shares may be offered, or (iii) extend the duration of a plan;
- (3) any material expansion of the class of participants eligible to participate in the plan; and
- (4) any expansion in the types of options or awards provided under the plan.

While general authority to amend a plan would not obviate the need for shareholder approval, if a plan permits a specific action without further shareholder approval, then no such approval would generally be required. However, if a plan contains a formula for automatic increases in the shares available (sometimes called an "evergreen formula"), or for automatic grants pursuant to a dollar-based formula (such as annual grants based on a certain dollar value, or matching contributions based upon the amount of compensation the participant elects to defer), such plans cannot have a term in excess of ten years unless shareholder approval is obtained every ten years. However, plans that do not contain

a formula and do not impose a limit on the number of shares available for grant would require shareholder approval of each grant under the plan. A requirement that grants be made out of treasury shares or repurchased shares will not alleviate these additional shareholder approval requirements.

As a general matter, when preparing plans and presenting them for shareholder approval, issuers should strive to make plan terms easy to understand. In that regard, it is recommended that plans meant to permit repricing use explicit terminology to make this clear.

Rule 4350(i)(1)(A) provides an exception to the requirement for shareholder approval for warrants or rights offered generally to all shareholders. In addition, an exception is provided for tax qualified, non-discriminatory employee benefit plans as well as parallel nonqualified plans as these plans are regulated under the Internal Revenue Code and Treasury Department regulations. An equity compensation plan that provides non-U.S. employees with substantially the same benefits as a comparable tax qualified, non-discriminatory employee benefit plan or parallel nonqualified plan that the issuer provides to its U.S. employees, but for features necessary to comply with applicable foreign tax law, are also exempt from shareholder approval under this section.

Further, there is an exception for inducement grants to new employees because in these cases a company has an arm's length relationship with the new employees. Inducement grants for these purposes include grants of options or stock to new employees in connection with a merger or acquisition. The rule requires that such issuances must be approved by the issuer's independent compensation committee or a majority of the issuer's independent directors. The rule further requires that promptly following an issuance of any employment inducement grant in reliance on this exception, a company must disclose in a press release the material terms of the grant, including the recipient(s) of the grant and the number of shares involved.

In addition, plans or arrangements involving a merger or acquisition do not require shareholder approval in two situations. First, shareholder approval will not be required to convert, replace or adjust outstanding options or other equity compensation awards to reflect the transaction. Second, shares available under certain plans acquired in acquisitions and mergers may be used for certain post-transaction grants without further shareholder approval. This exception applies to situations where the party which is not a listed company following the transaction has shares available for grant under pre-existing plans that meet the requirements of this Rule 4350(i)(1)(A). These shares may be used for post-transaction grants of options and other equity awards by the listed company (after appropriate adjustment of the number of shares to reflect the transaction), either under the pre-existing plan or arrangement or another plan or arrangement, without further shareholder approval, provided: (1) the time during which those shares are available for grants is not extended beyond the period when they would have been available under the pre-existing plan, absent the transaction, and (2) such options and other awards are not granted to individuals who were employed by the granting company or its subsidiaries at the time the merger or acquisition was consummated. Nasdaq would view a plan or arrangement adopted in contemplation of the merger or acquisition transaction as not pre-existing for purposes of this exception. This exception is appropriate because it will not result in any increase in the aggregate potential dilution of the combined enterprise. In this regard, any additional shares available for issuance under a plan or arrangement acquired in a connection with a merger or acquisition would be counted by Nasdaq in determining whether the transaction involved the issuance of 20% or more of the company's outstanding common stock, thus triggering the shareholder approval requirements under Rule 4350(i)(1)(C).

Inducement grants, tax qualified non-discriminatory benefit plans, and parallel nonqualified plans are subject to approval by either the issuer's independent compensation committee or a majority of the issuer's independent directors. It should also be noted that a company would not be permitted to use repurchased shares to fund option plans or grants without prior shareholder approval.

For purposes of Rule 4350(i)(1)(A) and IM-4350-5, the term "parallel nonqualified plan" means a plan that is a "pension plan" within the meaning of the Employee Retirement Income Security Act ("ERISA"), 29 U.S.C. § 1002

(1999), that is designed to work in parallel with a plan intended to be qualified under *Internal Revenue Code Section 401(a)*, to provide benefits that exceed the limits set forth in *Internal Revenue Code Section 402(g)* (the section that limits an employee's annual pre-tax contributions to a 401(k) plan), *Internal Revenue Code Section 401(a)(17)* (the section that limits the amount of an employee's compensation that can be taken into account for plan purposes) and/or *Internal Revenue Code Section 415* (the section that limits the contributions and benefits under qualified plans) and/or any successor or similar limitations that may thereafter be enacted. However, a plan will not be considered a parallel nonqualified plan unless: (i) it covers all or substantially all employees of an employer who are participants in the related qualified plan whose annual compensation is in excess of the limit of Code Section 401(a)(17) (or any successor or similar limitation that may hereafter be enacted); (ii) its terms are substantially the same as the qualified plan that it parallels except for the elimination of the limitations described in the preceding sentence; and, (iii) no participant receives employer equity contributions under the plan in excess of 25% of the participant's cash compensation.

[Adopted by SEC Release 34-53128 (Jan. 13, 2006).]

IM-4350-7. Code of Conduct

Ethical behavior is required and expected of every corporate director, officer and employee whether or not a formal code of conduct exists. The requirement of a publicly available code of conduct applicable to all directors, officers and employees of an issuer is intended to demonstrate to investors that the board and management of Nasdaq issuers have carefully considered the requirement of ethical dealing and have put in place a system to ensure that they become aware of and take prompt action against any questionable behavior. For company personnel, a code of conduct with enforcement provisions provides assurance that reporting of questionable behavior is protected and encouraged, and fosters an atmosphere of self-awareness and prudent conduct.

Rule 4350(n) requires issuers to adopt a **code of conduct** complying with the definition of a "code of ethics" under Section 406(c) of the Sarbanes-Oxley Act of 2002 ("the Sarbanes-Oxley Act") and any regulations promulgated thereunder by the Commission. See *17 C.F.R. 228.406* and *17 C.F.R. 229.406*. Thus, the code must include such standards as are reasonably necessary to promote the ethical handling of conflicts of interest, full and fair disclosure, and compliance with laws, rules and regulations, as specified by the Sarbanes-Oxley Act. However, the **code of conduct** required by Rule 4350(n) must apply to all directors, officers, and employees. Issuers can satisfy this obligation by adopting one or more **codes of conduct**, such that all directors, officers and employees are subject to a code that satisfies the definition of a "code of ethics."

As the Sarbanes-Oxley Act recognizes, investors are harmed when the real or perceived private interest of a director, officer or employee is in conflict with the interests of the company, as when the individual receives improper personal benefits as a result of his or her position with the company, or when the individual has other duties, responsibilities or obligations that run counter to his or her duty to the company. Also, the disclosures an issuer makes to the Commission are the essential source of information about the company for regulators and investors--there can be no question about the duty to make them fairly, accurately and timely. Finally, illegal action must be dealt with swiftly and the violators reported to the appropriate authorities. Each **code of conduct** must require that any waiver of the code for executive officers or directors may be made only by the board and must be disclosed to shareholders, along with the reasons for the waiver. All issuers, other than foreign private issuers, must disclose such waivers in a Form 8-K within four business days. Foreign private issuers must disclose such waivers either in a Form 6-K or in the next Form 20-F or 40-F. This disclosure requirement provides investors the comfort that waivers are not granted so as to protect the company and its shareholders to the greatest extent possible.

Each **code of conduct** must also contain an enforcement mechanism that ensures prompt and consistent enforcement of the code, protection for persons reporting questionable behavior, clear and objective standards for compliance, and a fair process by which to determine violations.

2-D Corporate Governance: Law and Practice Sarbanes-Oxley § 201

§ Oxley201 Services Outside the Scope of Practice of Auditors [adding Section 10A(g) and (h) to the Exchange Act]

(a) Prohibited Activities.-- Section 10A of the Securities Exchange Act of 1934 (*15 U.S.C. 78j-1*) is amended by adding at the end the following:

(g) Prohibited Activities.--Except as provided in subsection (h), it shall be unlawful for a registered public accounting firm (and any associated person of that firm, to the extent determined appropriate by the Commission) that performs for any issuer any audit required by this title or the rules of the Commission under this title or, beginning 180 days after the date of commencement of the operations of the Public Company Accounting Oversight Board established under section 101 of the Sarbanes-Oxley Act of 2002 (in this section referred to as the 'Board'), the rules of the Board, to provide to that issuer, contemporaneously with the audit, any non-audit service, including--

- (1) bookkeeping or other services related to the accounting records or financial statements of the audit client;
- (2) financial information systems design and implementation;
- (3) appraisal or valuation services, fairness opinions, or contribution-in-kind reports;
- (4) actuarial services;
- (5) internal audit outsourcing services;
- (6) management functions or human resources;
- (7) broker or dealer, investment adviser, or investment banking services;
- (8) legal services and expert services unrelated to the audit; and
- (9) any other service that the Board determines, by regulation, is impermissible.

(h) Preapproval Required for Non-Audit Services.--A registered public accounting firm may engage in any non-audit service, including tax services, that is not described in any of paragraphs (1) through (9) of subsection (g) for

an audit client, only if the activity is approved in advance by the audit committee of the issuer, in accordance with subsection (i).

(b) (15 USC 7231) *Exemption Authority*.-- The Board may, on a case by case basis, exempt any person, issuer, public accounting firm, or transaction from the prohibition on the provision of services under section 10A(g) of the Securities Exchange Act of 1934 (as added by this section), to the extent that such exemption is necessary or appropriate in the public interest and is consistent with the protection of investors, and subject to review by the Commission in the same manner as for rules of the Board under section 107.

Appendix D FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO PUBLIC COMPANY
OUTSIDE AUDITORS AND BOARD AUDIT COMMITTEES

2-D Corporate Governance: Law and Practice 17 CFR § 210.2-01

§ 01 Qualifications of accountants.

Preliminary Note to § 210.2-01

1. Section 210.2-01 is designed to ensure that auditors are qualified and independent of their audit clients both in fact and in appearance. Accordingly, the rule sets forth restrictions on financial, employment, and business relationships between an accountant and an audit client and restrictions on an accountant providing certain non-audit services to an audit client.

2. Section 210.2-01(b) sets forth the general standard of auditor independence. Paragraphs (c)(1) to (c)(5) reflect the application of the general standard to particular circumstances. The rule does not purport to, and the Commission could not, consider all circumstances that raise independence concerns, and these are subject to the general standard in § 210.2-01(b). In considering this standard, the Commission looks in the first instance to whether a relationship or the provision of a service: creates a mutual or conflicting interest between the accountant and the audit client; places the accountant in the position of auditing his or her own work; results in the accountant acting as management or an employee of the audit client; or places the accountant in a position of being an advocate for the audit client.

3. These factors are general guidance only and their application may depend on particular facts and circumstances. For that reason, § 210.2-01 provides that, in determining whether an accountant is independent, the Commission will consider all relevant facts and circumstances. For the same reason, registrants and accountants are encouraged to consult with the Commission's Office of the Chief Accountant before entering into relationships, including relationships involving the provision of services, that are not explicitly described in the rule.

(a) The Commission will not recognize any person as a certified public accountant who is not duly registered and in

good standing as such under the laws of the place of his residence or principal office. The Commission will not recognize any person as a public accountant who is not in good standing and entitled to practice as such under the laws of the place of his residence or principal office.

(b) The Commission will not recognize an accountant as independent, with respect to an audit client, if the accountant is not, or a reasonable investor with knowledge of all relevant facts and circumstances would conclude that the accountant is not, capable of exercising objective and impartial judgment on all issues encompassed within the accountant's engagement. In determining whether an accountant is independent, the Commission will consider all relevant circumstances, including all relationships between the accountant and the audit client, and not just those relating to reports filed with the Commission.

(c) This paragraph sets forth a non-exclusive specification of circumstances inconsistent with paragraph (b) of this section.

(1) Financial relationships. An accountant is not independent if, at any point during the audit and professional engagement period, the accountant has a direct financial interest or a material indirect financial interest in the accountant's audit client, such as:

(i) Investments in audit clients. An accountant is not independent when:

(A) The accounting firm, any covered person in the firm, or any of his or her immediate family members, has any direct investment in an audit client, such as stocks, bonds, notes, options, or other securities. The term direct investment includes an investment in an audit client through an intermediary if:

(1) The accounting firm, covered person, or immediate family member, alone or together with other persons, supervises or participates in the intermediary's investment decisions or has control over the intermediary; or

(2) The intermediary is not a diversified management investment company, as defined by section 5(b)(1) of the Investment Company Act of 1940, *15 U.S.C. 80a-5(b)(1)*, and has an investment in the audit client that amounts to 20% or more of the value of the intermediary's total investments.

(B) Any partner, principal, shareholder, or professional employee of the accounting firm, any of his or her immediate family members, any close family member of a covered person in the firm, or any group of the above persons has filed a Schedule 13D or 13G (*17 CFR 240.13d-101* or *240.13d-102*) with the Commission indicating beneficial ownership of more than five percent of an audit client's equity securities or controls an audit client, or a close

family member of a partner, principal, or shareholder of the accounting firm controls an audit client.

(C) The accounting firm, any covered person in the firm, or any of his or her immediate family members, serves as voting trustee of a trust, or executor of an estate, containing the securities of an audit client, unless the accounting firm, covered person in the firm, or immediate family member has no authority to make investment decisions for the trust or estate.

(D) The accounting firm, any covered person in the firm, any of his or her immediate family members, or any group of the above persons has any material indirect investment in an audit client. For purposes of this paragraph, the term material indirect investment does not include ownership by any covered person in the firm, any of his or her immediate family members, or any group of the above persons of 5% or less of the outstanding shares of a diversified management investment company, as defined by section 5(b)(1) of the Investment Company Act of 1940, *15 U.S.C. 80a-5(b)(1)*, that invests in an audit client.

(E) The accounting firm, any covered person in the firm, or any of his or her immediate family members:

(1) Has any direct or material indirect investment in an entity where:

(i) An audit client has an investment in that entity that is material to the audit client and has the ability to exercise significant influence over that entity; or

(ii) The entity has an investment in an audit client that is material to that entity and has the ability to exercise significant influence over that audit client;

(2) Has any material investment in an entity over which an audit client has the ability to exercise significant influence; or

(3) Has the ability to exercise significant influence over an entity that has the ability to exercise significant influence over an audit client.

(ii) Other financial interests in audit client. An accountant is not independent when the accounting firm, any covered person in the firm, or any of his or her immediate family members has:

(A) Loans/debtor-creditor relationship. Any loan (including any margin loan) to or from an audit client, or an audit client's officers, directors, or record or beneficial owners of more than ten percent of the audit client's equity securities, except for the following loans obtained from a financial institution under its normal lending procedures, terms, and requirements:

(1) Automobile loans and leases collateralized by the automobile;

(2) Loans fully collateralized by the cash surrender value of an insurance policy;

(3) Loans fully collateralized by cash deposits at the same financial institution; and

(4) A mortgage loan collateralized by the borrower's primary residence provided the loan was not obtained while the covered person in the firm was a covered person.

(B) Savings and checking accounts. Any savings, checking, or similar account at a bank, savings and loan, or similar institution that is an audit client, if the account has a balance that exceeds the amount insured by the Federal Deposit Insurance Corporation or any similar insurer, except that an accounting firm account may have an uninsured balance provided that the likelihood of the bank, savings and loan, or similar institution experiencing financial difficulties is remote.

(C) Broker-dealer accounts. Brokerage or similar accounts maintained with a broker-dealer that is an audit client, if:

(1) Any such account includes any asset other than cash or securities (within the meaning of "security" provided in the Securities Investor Protection Act of 1970 ("SIPA") (*15 U.S.C. 78aaa et seq.*));

(2) The value of assets in the accounts exceeds the amount that is subject to a Securities Investor Protection Corporation advance, for those accounts, under Section 9 of SIPA (*15 U.S.C. 78fff-3*); or

(3) With respect to non-U.S. accounts not subject to SIPA protection, the value of assets in the accounts exceeds the amount insured or protected by a program similar to SIPA.

(D) Futures commission merchant accounts. Any futures, commodity, or similar account maintained with a futures commission merchant that is an audit client.

(E) Credit cards. Any aggregate outstanding credit card balance owed to a lender that is an audit client that is not reduced to \$10,000 or less on a current basis taking into consideration the payment due date and any available grace period.

(F) Insurance products. Any individual policy issued by an insurer that is an audit client unless:

(1) The policy was obtained at a time when the covered person in the firm was not a covered person in the firm; and

(2) The likelihood of the insurer becoming insolvent is remote.

(G) Investment companies. Any financial interest in an entity that is part of an investment company complex that includes an audit client.

(iii) Exceptions. Notwithstanding paragraphs (c)(1)(i) and (c)(1)(ii) of this section, an accountant will not be deemed not independent if:

(A) Inheritance and gift. Any person acquires an unsolicited financial interest, such as through an unsolicited gift or inheritance, that would cause an accountant to be not independent under paragraph (c)(1)(i) or (c)(1)(ii) of this section, and the financial interest is disposed of as soon as practicable, but no later than 30 days after the person has knowledge of and the right to dispose of the financial interest.

(B) New audit engagement. Any person has a financial interest that would cause an accountant to be not independent under paragraph (c)(1)(i) or (c)(1)(ii) of this section, and:

(1) The accountant did not audit the client's financial statements for the immediately preceding fiscal year; and

(2) The accountant is independent under paragraph (c)(1)(i) and (c)(1)(ii) of this section before the earlier of:

(i) Signing an initial engagement letter or other agreement to provide audit, review, or attest services to the audit client; or

(ii) Commencing any audit, review, or attest procedures (including planning the audit of the client's financial statements).

(C) Employee compensation and benefit plans. An immediate family member of a person who is a covered person in the firm only by virtue of paragraphs (f)(11)(iii) or (f)(11)(iv) of this section has a financial interest that would cause an accountant to be not independent under paragraph (c)(1)(i) or (c)(1)(ii) of this section, and the acquisition of the financial interest was an unavoidable consequence of participation in his or her employer's employee compensation or benefits program, provided that the financial interest, other than unexercised employee stock options, is disposed of as soon as practicable, but no later than 30 days after the person has the right to dispose of the financial interest.

(iv) Audit clients' financial relationships. An accountant is not independent when:

(A) Investments by the audit client in the accounting firm. An audit client has, or has agreed to acquire, any direct investment in the accounting firm, such as stocks, bonds, notes, options, or other securities, or the audit client's officers or directors are record or beneficial owners of more than 5% of the equity securities of the accounting firm.

(B) Underwriting. An accounting firm engages an audit client to act as an underwriter, broker-dealer, market-maker, promoter, or analyst with respect to securities issued by the accounting firm.

(2) Employment relationships. An accountant is not independent if, at any point during the audit and professional engagement period, the accountant has an employment relationship with an audit client, such as:

(i) Employment at audit client of accountant. A current partner, principal, shareholder, or professional employee of the accounting firm is employed by the audit client or serves as a member of the board of directors or similar management or governing body of the audit client.

(ii) Employment at audit client of certain relatives of accountant. A close family member of a covered person in the firm is in an accounting role or financial reporting oversight role at an audit client, or was in such a role during any period covered by an audit for which the covered person in the firm is a covered person.

(iii) Employment at audit client of former employee of accounting firm.

(A) A former partner, principal, shareholder, or professional employee of an accounting firm is in an accounting role or financial reporting oversight role at an audit client, unless the individual:

(1) Does not influence the accounting firm's operations or financial policies;

(2) Has no capital balances in the accounting firm; and

(3) Has no financial arrangement with the accounting firm other than one providing for regular payment of a fixed dollar amount (which is not dependent on the revenues, profits, or earnings of the accounting firm):

(i) Pursuant to a fully funded retirement plan, rabbi trust, or, in jurisdictions in which a rabbi trust does not exist, a similar vehicle; or

(ii) In the case of a former professional employee who was not a partner, principal, or shareholder of the accounting firm and who has been disassociated from the accounting firm for more than five years, that is immaterial to the former professional employee; and

(B) A former partner, principal, shareholder, or professional employee of an accounting firm is in a financial reporting oversight role at an issuer (as defined in section 10A(f) of the Securities Exchange Act of 1934 (*15 U.S.C. 78j-1(f)*)), except an issuer that is an investment company registered under section 8 of the Investment Company Act of 1940 (*15 U.S.C. 80a-8*), unless the individual:

(1) Employed by the issuer was not a member of the audit engagement team of the issuer during the one year period preceding the date that audit procedures commenced for the fiscal period that included the date of initial employment of the audit engagement team member by the issuer;

(2) For purposes of paragraph (c)(2)(iii)(B)(1) of this section, the following individuals are not considered to be members of the audit engagement team:

(i) Persons, other than the lead partner and the concurring partner, who provided ten or fewer hours of audit, review, or attest services during the period covered by paragraph (c)(2)(iii)(B)(1) of this section;

(ii) Individuals employed by the issuer as a result of a business combination between an issuer that is an audit client and the employing entity, provided employment was not in contemplation of the business combination and the audit committee of the successor issuer is aware of the prior employment relationship; and

(iii) Individuals that are employed by the issuer due to an emergency or other unusual situation provided that the audit committee determines that the relationship is in the interest of investors;

(3) For purposes of paragraph (c)(2)(iii)(B)(1) of this section, audit procedures are deemed to have commenced for a fiscal period the day following the filing of the issuer's periodic annual report with the Commission covering the previous fiscal period; or

(C) A former partner, principal, shareholder, or professional employee of an accounting firm is in a financial reporting oversight role with respect to an investment company registered under section 8 of the Investment Company Act of 1940 (*15 U.S.C. 80a-8*), if:

(1) The former partner, principal, shareholder, or professional employee of an accounting firm is employed in a financial reporting oversight role related to the operations and financial reporting of the registered investment company at an entity in the investment company complex, as defined in (f)(14) of this section, that includes the registered investment company; and

(2) The former partner, principal, shareholder, or professional employee of an accounting firm employed by the registered investment company or any entity in the investment company complex was a member of the audit engagement team of the registered investment company or any other registered investment company in the investment company complex during the one year period preceding the date that audit procedures commenced that included the date of initial employment of the audit engagement team member by the registered investment company or any entity in the investment company complex.

(3) For purposes of paragraph (c)(2)(iii)(C)(2) of this section, the following individuals are not considered to be members of the audit engagement team:

(i) Persons, other than the lead partner and concurring partner, who provided ten or fewer hours of audit, review or attest

services during the period covered by paragraph (c)(2)(iii)(C)(2) of this section;

(ii) Individuals employed by the registered investment company or any entity in the investment company complex as a result of a business combination between a registered investment company or any entity in the investment company complex that is an audit client and the employing entity, provided employment was not in contemplation of the business combination and the audit committee of the registered investment company is aware of the prior employment relationship; and

(iii) Individuals that are employed by the registered investment company or any entity in the investment company complex due to an emergency or other unusual situation provided that the audit committee determines that the relationship is in the interest of investors.

(4) For purposes of paragraph (c)(2)(iii)(C)(2) of this section, audit procedures are deemed to have commenced the day following the filing of the registered investment company's periodic annual report with the Commission.

(iv) Employment at accounting firm of former employee of audit client. A former officer, director, or employee of an audit client becomes a partner, principal, shareholder, or professional employee of the accounting firm, unless the individual does not participate in, and is not in a position to influence, the audit of the financial statements of the audit client covering any period during which he or she was employed by or associated with that audit client.

(3) Business relationships. An accountant is not independent if, at any point during the audit and professional engagement period, the accounting firm or any covered person in the firm has any direct or material indirect business relationship with an audit client, or with persons associated with the audit client in a decision-making capacity, such as an audit client's officers, directors, or substantial stockholders. The relationships described in this paragraph do not include a relationship in which the accounting firm or covered person in the firm provides professional services to an audit client or is a consumer in the ordinary course of business.

(4) Non-audit services. An accountant is not independent if, at any point during the audit and professional engagement period, the accountant provides the following non-audit services to an audit client:

(i) Bookkeeping or other services related to the accounting records or financial statements of the audit client. Any service, unless it is reasonable to conclude that the results of these services will not be subject to audit procedures during an audit of the audit client's financial statements, including:

(A) Maintaining or preparing the audit client's accounting records;

(B) Preparing the audit client's financial statements that are filed with the Commission or that form the basis of financial statements filed with the Commission; or

(C) Preparing or originating source data underlying the audit client's financial statements.

(ii) Financial information systems design and implementation. Any service, unless it is reasonable to conclude that the results of these services will not be subject to audit procedures during an audit of the audit client's financial statements, including:

(A) Directly or indirectly operating, or supervising the operation of, the audit client's information system or managing the audit client's local area network; or

(B) Designing or implementing a hardware or software system that aggregates source data underlying the financial statements or generates information that is significant to the audit client's financial statements or other financial information systems taken as a whole.

(iii) Appraisal or valuation services, fairness opinions, or contribution-in-kind reports. Any appraisal service, valuation service, or any service involving a fairness opinion or contribution-in-kind report for an audit client, unless it is reasonable to conclude that the results of these services will not be subject to audit procedures during an audit of the audit client's financial statements.

(iv) Actuarial services. Any actuarially-oriented advisory service involving the determination of amounts recorded in the financial statements and related accounts for the audit client other than assisting a client in understanding the methods, models, assumptions, and inputs used in computing an amount, unless it is reasonable to conclude that the results of these services will not be subject to audit procedures during an audit of the audit client's financial statements.

(v) Internal audit outsourcing services. Any internal audit service that has been outsourced by the audit client that relates to the audit client's internal accounting controls, financial systems, or financial statements, for an audit client unless it is reasonable to conclude that the results of these services will not be subject to audit procedures during an audit of the audit client's financial statements.

(vi) Management functions. Acting, temporarily or permanently, as a director, officer, or employee of an audit

client, or performing any decision-making, supervisory, or ongoing monitoring function for the audit client.

(vii) Human resources.

(A) Searching for or seeking out prospective candidates for managerial, executive, or director positions;

(B) Engaging in psychological testing, or other formal testing or evaluation programs;

(C) Undertaking reference checks of prospective candidates for an executive or director position;

(D) Acting as a negotiator on the audit client's behalf, such as determining position, status or title, compensation, fringe benefits, or other conditions of employment; or

(E) Recommending, or advising the audit client to hire, a specific candidate for a specific job (except that an accounting firm may, upon request by the audit client, interview candidates and advise the audit client on the candidate's competence for financial accounting, administrative, or control positions).

(viii) Broker-dealer, investment adviser, or investment banking services. Acting as a broker-dealer (registered or unregistered), promoter, or underwriter, on behalf of an audit client, making investment decisions on behalf of the audit client or otherwise having discretionary authority over an audit client's investments, executing a transaction to buy or sell an audit client's investment, or having custody of assets of the audit client, such as taking temporary possession of securities purchased by the audit client.

(ix) Legal services. Providing any service to an audit client that, under circumstances in which the service is provided, could be provided only by someone licensed, admitted, or otherwise qualified to practice law in the jurisdiction in which the service is provided.

(x) Expert services unrelated to the audit. Providing an expert opinion or other expert service for an audit client, or an audit client's legal representative, for the purpose of advocating an audit client's interests in litigation or in a regulatory or administrative proceeding or investigation. In any litigation or regulatory or administrative proceeding or investigation, an accountant's independence shall not be deemed to be impaired if the accountant provides factual accounts, including in testimony, of work performed or explains the positions taken or conclusions reached during the performance of any service provided by the accountant for the audit client.

(5) Contingent fees. An accountant is not independent if, at any point during the audit and professional engagement period, the accountant provides any service or product to an audit client for a contingent fee or a commission, or receives a contingent fee or commission from an audit client.

(6) Partner rotation.

(i) Except as provided in paragraph (c)(6)(ii) of this section, an accountant is not independent of an audit client when:

(A) Any audit partner as defined in paragraph (f)(7)(ii) of this section performs:

(1) The services of a lead partner, as defined in paragraph (f)(7)(ii)(A) of this section, or concurring partner, as defined in paragraph (f)(7)(ii)(B) of this section, for more than five consecutive years; or

(2) One or more of the services defined in paragraphs (f)(7)(ii)(C) and (D) of this section for more than seven consecutive years;

(B) Any audit partner:

(1) Within the five consecutive year period following the performance of services for the maximum period permitted under paragraph (c)(6)(i)(A)(1) of this section, performs for that audit client the services of a lead partner, as defined in paragraph (f)(7)(ii)(A) of this section, or concurring partner, as defined in paragraph (f)(7)(ii)(B) of this section, or a combination of those services, or

(2) Within the two consecutive year period following the performance of services for the maximum period permitted under paragraph (c)(6)(i)(A)(2) of this section, performs one or more of the services defined in paragraph (f)(7)(ii) of this section.

(ii) Any accounting firm with less than five audit clients that are issuers (as defined in section 10A(f) of the Securities Exchange Act of 1934 (*15 U.S.C. 78j-1(f)*)) and less than ten partners shall be exempt from paragraph (c)(6)(i) of this section provided the Public Company Accounting Oversight Board conducts a review at least once every three years of each of the audit client engagements that would result in a lack of auditor independence under this

paragraph.

(iii) For purposes of paragraph (c)(6)(i) of this section, an audit client that is an investment company registered under section 8 of the Investment Company Act of 1940 (*15 U.S.C. 80a-8*), does not include an affiliate of the audit client that is an entity in the same investment company complex, as defined in paragraph (f)(14) of this section, except for another registered investment company in the same investment company complex. For purposes of calculating consecutive years of service under paragraph (c)(6)(i) of this section with respect to investment companies in an investment company complex, audits of registered investment companies with different fiscal year-ends that are performed in a continuous 12-month period count as a single consecutive year.

(7) Audit committee administration of the engagement. An accountant is not independent of an issuer (as defined in section 10A(f) of the Securities Exchange Act of 1934 (*15 U.S.C. 78j-1(f)*)), other than an issuer that is an Asset-Backed Issuer as defined in § 229.1101 of this chapter, or an investment company registered under section 8 of the Investment Company Act of 1940 (*15 U.S.C. 80a-8*), other than a unit investment trust as defined by section 4(2) of the Investment Company Act of 1940 (*15 U.S.C. 80a-4(2)*), unless:

(i) In accordance with Section 10A(i) of the Securities Exchange Act of 1934 (*15 U.S.C. 78j-1(i)*) either:

(A) Before the accountant is engaged by the issuer or its subsidiaries, or the registered investment company or its subsidiaries, to render audit or non-audit services, the engagement is approved by the issuer's or registered investment company's audit committee; or

(B) The engagement to render the service is entered into pursuant to pre-approval policies and procedures established by the audit committee of the issuer or registered investment company, provided the policies and procedures are detailed as to the particular service and the audit committee is informed of each service and such policies and procedures do not include delegation of the audit committees responsibilities under the Securities Exchange Act of 1934 to management; or

(C) With respect to the provision of services other than audit, review or attest services the pre-approval requirement is waived if:

(1) The aggregate amount of all such services provided constitutes no more than five percent of the total amount of revenues paid by the audit client to its accountant during the fiscal year in which the services are provided;

(2) Such services were not recognized by the issuer or registered investment company at the time of the engagement to

be non-audit services; and

(3) Such services are promptly brought to the attention of the audit committee of the issuer or registered investment company and approved prior to the completion of the audit by the audit committee or by one or more members of the audit committee who are members of the board of directors to whom authority to grant such approvals has been delegated by the audit committee.

(ii) A registered investment company's audit committee also must pre-approve its accountant's engagements for non-audit services with the registered investment company's investment adviser (not including a sub-adviser whose role is primarily portfolio management and is sub-contracted or overseen by another investment adviser) and any entity controlling, controlled by, or under common control with the investment adviser that provides ongoing services to the registered investment company in accordance with paragraph (c)(7)(i) of this section, if the engagement relates directly to the operations and financial reporting of the registered investment company, except that with respect to the waiver of the pre-approval requirement under paragraph (c)(7)(i)(C) of this section, the aggregate amount of all services provided constitutes no more than five percent of the total amount of revenues paid to the registered investment company's accountant by the registered investment company, its investment adviser and any entity controlling, controlled by, or under common control with the investment adviser that provides ongoing services to the registered investment company during the fiscal year in which the services are provided that would have to be pre-approved by the registered investment company's audit committee pursuant to this section.

(8) Compensation. An accountant is not independent of an audit client if, at any point during the audit and professional engagement period, any audit partner earns or receives compensation based on the audit partner procuring engagements with that audit client to provide any products or services other than audit, review or attest services. Any accounting firm with fewer than ten partners and fewer than five audit clients that are issuers (as defined in section 10A(f) of the Securities Exchange Act of 1934 (*15 U.S.C. 78j-1(f)*)) shall be exempt from the requirement stated in the previous sentence.

(d) Quality controls. An accounting firm's independence will not be impaired solely because a covered person in the firm is not independent of an audit client provided:

(1) The covered person did not know of the circumstances giving rise to the lack of independence;

(2) The covered person's lack of independence was corrected as promptly as possible under the relevant circumstances after the covered person or accounting firm became aware of it; and

(3) The accounting firm has a quality control system in place that provides reasonable assurance, taking into account the size and nature of the accounting firm's practice, that the accounting firm and its employees do not lack

independence, and that covers at least all employees and associated entities of the accounting firm participating in the engagement, including employees and associated entities located outside of the United States.

(4) For an accounting firm that annually provides audit, review, or attest services to more than 500 companies with a class of securities registered with the Commission under section 12 of the Securities Exchange Act of 1934 (*15 U.S.C. 78l*), a quality control system will not provide such reasonable assurance unless it has at least the following features:

- (i) Written independence policies and procedures;
- (ii) With respect to partners and managerial employees, an automated system to identify their investments in securities that might impair the accountant's independence;
- (iii) With respect to all professionals, a system that provides timely information about entities from which the accountant is required to maintain independence;
- (iv) An annual or on-going firm-wide training program about auditor independence;
- (v) An annual internal inspection and testing program to monitor adherence to independence requirements;
- (vi) Notification to all accounting firm members, officers, directors, and employees of the name and title of the member of senior management responsible for compliance with auditor independence requirements;
- (vii) Written policies and procedures requiring all partners and covered persons to report promptly to the accounting firm when they are engaged in employment negotiations with an audit client, and requiring the firm to remove immediately any such professional from that audit client's engagement and to review promptly all work the professional performed related to that audit client's engagement; and
- (viii) A disciplinary mechanism to ensure compliance with this section.

(e)

(1) Transition and grandfathering. Provided the following relationships did not impair the accountant's independence under pre-existing requirements of the Commission, the Independence Standards Board, or the accounting profession in the United States, the existence of the relationship on May 6, 2003 will not be deemed to impair an accountant's independence:

(i) Employment relationships that commenced at the issuer prior to May 6, 2003 as described in paragraph (c)(2)(iii)(B) of this section.

(ii) Compensation earned or received, as described in paragraph (c)(8) of this section during the fiscal year of the accounting firm that includes the effective date of this section.

(iii) Until May 6, 2004, the provision of services described in paragraph (c)(4) of this section provided those services are pursuant to contracts in existence on May 6, 2003.

(iv) The provision of services by the accountant under contracts in existence on May 6, 2003 that have not been pre-approved by the audit committee as described in paragraph (c)(7) of this section.

(v) Until the first day of the issuer's fiscal year beginning after May 6, 2003 by a "lead" partner and other audit partner (other than the "concurring" partner) providing services in excess of those permitted under paragraph (c)(6) of this section. An accountant's independence will not be deemed to be impaired until the first day of the issuer's fiscal year beginning after May 6, 2004 by a "concurring" partner providing services in excess of those permitted under paragraph (c)(6) of this section. For the purposes of calculating periods of service under paragraph (c)(6) of this section:

(A) For the "lead" and "concurring" partner, the period of service includes time served as the "lead" or "concurring" partner prior to May 6, 2003; and

(B) For audit partners other than the "lead" partner or "concurring" partner, and for audit partners in foreign firms, the period of service does not include time served on the audit engagement team prior to the first day of issuer's fiscal year beginning on or after May 6, 2003.

(2) Settling financial arrangements with former professionals. To the extent not required by pre-existing requirements of the Commission, the Independence Standards Board, or the accounting profession in the United States, the requirement in paragraph (c)(2)(iii) of this section to settle financial arrangements with former professionals applies to situations that arise after the effective date of this section.

(f) Definitions of terms. For purposes of this section:

(1) Accountant, as used in paragraphs (b) through (e) of this section, means a registered public accounting firm, certified public accountant or public accountant performing services in connection with an engagement for which independence is required. References to the accountant include any accounting firm with which the certified public accountant or public accountant is affiliated.

(2) Accounting firm means an organization (whether it is a sole proprietorship, incorporated association, partnership, corporation, limited liability company, limited liability partnership, or other legal entity) that is engaged in the practice of public accounting and furnishes reports or other documents filed with the Commission or otherwise prepared under the securities laws, and all of the organization's departments, divisions, parents, subsidiaries, and associated entities, including those located outside of the United States. Accounting firm also includes the organization's pension, retirement, investment, or similar plans.

(3)

(i) Accounting role means a role in which a person is in a position to or does exercise more than minimal influence over the contents of the accounting records or anyone who prepares them.

(ii) Financial reporting oversight role means a role in which a person is in a position to or does exercise influence over the contents of the financial statements or anyone who prepares them, such as when the person is a member of the board of directors or similar management or governing body, chief executive officer, president, chief financial officer, chief operating officer, general counsel, chief accounting officer, controller, director of internal audit, director of financial reporting, treasurer, or any equivalent position.

(4) Affiliate of the audit client means:

(i) An entity that has control over the audit client, or over which the audit client has control, or which is under common control with the audit client, including the audit client's parents and subsidiaries;

(ii) An entity over which the audit client has significant influence, unless the entity is not material to the audit client;

(iii) An entity that has significant influence over the audit client, unless the audit client is not material to the

entity; and

(iv) Each entity in the investment company complex when the audit client is an entity that is part of an investment company complex.

(5) Audit and professional engagement period includes both:

(i) The period covered by any financial statements being audited or reviewed (the "audit period"); and

(ii) The period of the engagement to audit or review the audit client's financial statements or to prepare a report filed with the Commission (the "professional engagement period"):

(A) The professional engagement period begins when the accountant either signs an initial engagement letter (or other agreement to review or audit a client's financial statements) or begins audit, review, or attest procedures, whichever is earlier; and

(B) The professional engagement period ends when the audit client or the accountant notifies the Commission that the client is no longer that accountant's audit client.

(iii) For audits of the financial statements of foreign private issuers, the "audit and professional engagement period" does not include periods ended prior to the first day of the last fiscal year before the foreign private issuer first filed, or was required to file, a registration statement or report with the Commission, provided there has been full compliance with home country independence standards in all prior periods covered by any registration statement or report filed with the Commission.

(6) Audit client means the entity whose financial statements or other information is being audited, reviewed, or attested and any affiliates of the audit client, other than, for purposes of paragraph (c)(1)(i) of this section, entities that are affiliates of the audit client only by virtue of paragraph (f)(4)(ii) or (f)(4)(iii) of this section.

(7)

(i) Audit engagement team means all partners, principals, shareholders and professional employees participating in an audit, review, or attestation engagement of an audit client, including audit partners and all persons who consult with others on the audit engagement team during the audit, review, or attestation engagement regarding

technical or industry-specific issues, transactions, or events.

(ii) Audit partner means a partner or persons in an equivalent position, other than a partner who consults with others on the audit engagement team during the audit, review, or attestation engagement regarding technical or industry-specific issues, transactions, or events, who is a member of the audit engagement team who has responsibility for decision-making on significant auditing, accounting, and reporting matters that affect the financial statements, or who maintains regular contact with management and the audit committee and includes the following:

(A) The lead or coordinating audit partner having primary responsibility for the audit or review (the "lead partner");

(B) The partner performing a second level of review to provide additional assurance that the financial statements subject to the audit or review are in conformity with generally accepted accounting principles and the audit or review and any associated report are in accordance with generally accepted auditing standards and rules promulgated by the Commission or the Public Company Accounting Oversight Board (the "concurring or reviewing partner");

(C) Other audit engagement team partners who provide more than ten hours of audit, review, or attest services in connection with the annual or interim consolidated financial statements of the issuer or an investment company registered under section 8 of the Investment Company Act of 1940 (*15 U.S.C. 80a-8*); and

(D) Other audit engagement team partners who serve as the "lead partner" in connection with any audit or review related to the annual or interim financial statements of a subsidiary of the issuer whose assets or revenues constitute 20% or more of the assets or revenues of the issuer's respective consolidated assets or revenues.

(8) Chain of command means all persons who:

(i) Supervise or have direct management responsibility for the audit, including at all successively senior levels through the accounting firm's chief executive;

(ii) Evaluate the performance or recommend the compensation of the audit engagement partner; or

(iii) Provide quality control or other oversight of the audit.

(9) Close family members means a person's spouse, spousal equivalent, parent, dependent, nondependent child, and sibling.

(10) Contingent fee means, except as stated in the next sentence, any fee established for the sale of a product or the performance of any service pursuant to an arrangement in which no fee will be charged unless a specified finding or result is attained, or in which the amount of the fee is otherwise dependent upon the finding or result of such product or service. Solely for the purposes of this section, a fee is not a "contingent fee" if it is fixed by courts or other public authorities, or, in tax matters, if determined based on the results of judicial proceedings or the findings of governmental agencies. Fees may vary depending, for example, on the complexity of services rendered.

(11) Covered persons in the firm means the following partners, principals, shareholders, and employees of an accounting firm:

(i) The "audit engagement team";

(ii) The "chain of command";

(iii) Any other partner, principal, shareholder, or managerial employee of the accounting firm who has provided ten or more hours of non-audit services to the audit client for the period beginning on the date such services are provided and ending on the date the accounting firm signs the report on the financial statements for the fiscal year during which those services are provided, or who expects to provide ten or more hours of non-audit services to the audit client on a recurring basis; and

(iv) Any other partner, principal, or shareholder from an "office" of the accounting firm in which the lead audit engagement partner primarily practices in connection with the audit.

(12) Group means two or more persons who act together for the purposes of acquiring, holding, voting, or disposing of securities of a registrant.

(13) Immediate family members means a person's spouse, spousal equivalent, and dependents.

(14) Investment company complex.

(i) "Investment company complex" includes:

(A) An investment company and its investment adviser or sponsor;

(B) Any entity controlled by or controlling an investment adviser or sponsor in paragraph (f)(14)(i)(A) of this section, or any entity under common control with an investment adviser or sponsor in paragraph (f)(14)(i)(A) of this section if the entity:

(1) Is an investment adviser or sponsor; or

(2) Is engaged in the business of providing administrative, custodian, underwriting, or transfer agent services to any investment company, investment adviser, or sponsor; and

(C) Any investment company or entity that would be an investment company but for the exclusions provided by section 3(c) of the Investment Company Act of 1940 (*15 U.S.C. 80a-3(c)*) that has an investment adviser or sponsor included in this definition by either paragraph (f)(14)(i)(A) or (f)(14)(i)(B) of this section.

(ii) An investment adviser, for purposes of this definition, does not include a sub-adviser whose role is primarily portfolio management and is subcontracted with or overseen by another investment adviser.

(iii) Sponsor, for purposes of this definition, is an entity that establishes a unit investment trust.

(15) Office means a distinct sub-group within an accounting firm, whether distinguished along geographic or practice lines.

(16) Rabbi trust means an irrevocable trust whose assets are not accessible to the accounting firm until all benefit obligations have been met, but are subject to the claims of creditors in bankruptcy or insolvency.

(17) Audit committee means a committee (or equivalent body) as defined in section 3(a)(58) of the Securities Exchange Act of 1934 (*15 U.S.C. 78c(a)(58)*).

Appendix D FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO PUBLIC COMPANY
OUTSIDE AUDITORS AND BOARD AUDIT COMMITTEES

2-D Corporate Governance: Law and Practice 17 CFR § 210.2-07

§ 07 Communication with audit committees.

(a) Each registered public accounting firm that performs for an audit client that is an issuer (as defined in section 10A(f) of the Securities Exchange Act of 1934 (*15 U.S.C. 78j-1(f)*)), other than an issuer that is an Asset-Backed Issuer as defined in § 229.1101 of this chapter, or an investment company registered under section 8 of the Investment Company Act of 1940 (*15 U.S.C. 80a-8*), other than a unit investment trust as defined by section 4(2) of the Investment Company Act of 1940 (*15 U.S.C. 80a-4(2)*), any audit required under the securities laws shall report, prior to the filing of such audit report with the Commission (or in the case of a registered investment company, annually, and if the annual communication is not within 90 days prior to the filing, provide an update, in the 90 day period prior to the filing, of any changes to the previously reported information), to the audit committee of the issuer or registered investment company:

(1) All critical accounting policies and practices to be used;

(2) All alternative treatments within Generally Accepted Accounting Principles for policies and practices related to material items that have been discussed with management of the issuer or registered investment company, including:

(i) Ramifications of the use of such alternative disclosures and treatments; and

(ii) The treatment preferred by the registered public accounting firm;

(3) Other material written communications between the registered public accounting firm and the management of the issuer or registered investment company, such as any management letter or schedule of unadjusted differences;

(4) If the audit client is an investment company, all non-audit services provided to any entity in an investment company complex, as defined in § 210.2-01 (f)(14), that were not pre-approved by the registered investment company's audit committee pursuant to § 210.2-01 (c)(7).

(b) [Reserved.]

Section 240.3b-9 also issued under secs. 2, 3 and 15, 89 Stat. 97, as amended, 89 Stat. 121, as amended (15 U.S.C. 78b, 78c, 78o). Section 240.9b-1 is also issued under sec. 2, 7, 10, 19(a), 48 Stat. 74, 78, 81, 85; secs. 201, 205, 209, 120, 48 Stat. 905, 906, 908; secs. 1-4, 8, 68 Stat. 683, 685; sec. 12(a), 73 Stat. 143; sec. 7(a), 74 Stat. 412; sec. 27(a), 84 Stat. 1433; sec. 308(a)(2), 90 Stat. 57; sec. 505, 94 Stat. 2292; secs. 9, 15, 23(a), 48 Stat. 889, 895, 901; sec. 230(a), 49 Stat. 704; secs. 3, 8, 49 Stat. 1377, 1379; sec. 2, 52 Stat. 1075; secs. 6, 10, 78 Stat. 570-574, 580; sec. 11(d), 84 Stat. 121; sec. 18, 89 Stat. 155; sec. 204, 91 Stat. 1500; 15 U.S.C. 77b, 77g, 77j, 77s(a), 78i, 78o, 78w(a). Section 240.10b-10 is also issued under secs. 2, 3, 9, 10, 11, 11A, 15, 17, 23, 48 Stat. 891, 89 Stat. 97, 121, 137, 156, (15 U.S.C. 78b, 78c, 78i, 78j, 78k, 78k-1, 78o, 78q). Section 240.12a-7 also issued under 15 U.S.C. 78a *et seq.*, particularly secs. 3(a)(12), 15 U.S.C. 78c(a)(12), 6, 15 U.S.C. 78(f), 11A, 15 U.S.C. 78k, 12, 15 U.S.C. 78(l), and 23(a)(1), 15 U.S.C. 78(w)(a)(1). Sections 240.12b-1 to 240.12b-36 also issued under secs. 3, 12, 13, 15, 48 Stat. 892, as amended, 894, 895, as amended; 15 U.S.C. 78c, 78l, 78m, 78o. Section 240.12b-15 is also issued under secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745. Section 240.12b-25 is also issued under 15 U.S.C. 80a-8, 80a-24(a), 80a-29, and 80a-37. Section 240.12g-3 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.12g3-2 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a).

Section 240.13a-10 is also issued under secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745. Section 240.13a-11 is also issued under secs. 3 (a) and 306(a), Pub L. 107-204, 116 Stat. 745. Section 240.13a-14 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.13a-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Sections 240.13e-4, 240.14d-7, 240.14d-10 and 240.14e-1 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(d) and 14(e), 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(d) and 78n(e) and sec. 23(c) of the Investment Company Act of 1940, 15 U.S.C. 80a-23(c). Sections 240.13e-4 to 240.13e-101 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(e), 15(c)(1), 48 Stat. 882, 889, 891, 894, 895, 901, sec. 8, 49 Stat. 1379, sec. 5, 78 Stat. 569, 570, secs. 2, 3, 82 Stat. 454, 455, secs. 1, 2, 3-5, 84 Stat. 1497, secs. 3, 18, 89 Stat. 97, 155; 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(e), 78o(c); sec. 23(c) of the Investment Company Act of 1940; 54 Stat. 825; 15 U.S.C. 80a-23(c). Section 240.13f-2(T) also issued under sec. 13(f)(1) (15 U.S.C. 78m(f)(1)). Sections 240.14a-1, 240.14a-3, 240.14a-13, 240.14b-1, 240.14b-2, 240.14c-1, and 240.14c-7 also issued under secs. 12, 15 U.S.C. 781, and 14, Pub. L. 99-222, 99 Stat. 1737, 15 U.S.C. 78n. Sections 240.14a-3, 240.14a-13, 240.14b-1 and 240.14c-7 also issued under secs. 12, 14 and 17, 15 U.S.C. 781, 78n and 78g. Sections 240.14c-1 to 240.14c-101 also issued under sec. 14, 48 Stat. 895; 15 U.S.C. 78n. Section 240.14d-1 is also issued under 15 U.S.C. 77g, 77j, 77s(a), 77ttt(a), 79t, 80a-37. Section 240.14e-2 is also issued under 15 U.S.C. 77g, 77h, 77s(a), 77sss, 79t, 80a-37(a). Section 240.14e-4 also issued under the Exchange Act, 15 U.S.C. 78a *et seq.*, and particularly sections 3(b), 10(a), 10(b), 14(e), 15(c), and 23(a) of the Exchange Act (15 U.S.C. 78c(b), 78j(a), 78j(b), 78n(e), 78o(c), and 78w(a)). Section 240.15a-6, also issued under secs. 3, 10, 15, and 17, 15 U.S.C. 78c, 78j, 78o, and 78q. Sections 240.15b1-3 and 240.15b2-1 also issued under 15 U.S.C. 78o, 78q. Section 240.15b2-2 also issued under secs. 3, 15; 15 U.S.C. 78c, 78o. Sections 240.15b10-1 to 240.15b10-9 also issued under secs. 15, 17, 48 Stat. 895, 897, sec. 203, 49 Stat. 704, secs. 4, 8, 49 Stat. 1379, sec. 5, 52 Stat. 1076, sec. 6, 78 Stat. 570; 15 U.S.C. 78o, 78q, 12 U.S.C. 241 nt. Section 240.15c2-6, also issued under secs. 3, 10, and 15, 15 U.S.C. 78c, 78j, and 78o. Section 240.15c2-11 also issued under 15 U.S.C. 78j(b), 78o(c), 78q(a), and 78w(a). Section 240.15c2-12 also issued under 15 U.S.C. 78b, 78c, 78j, 78o, 78o-4 and 78q. Section 240.15c3-1 is also issued under secs. 15(c)(3), 15 U.S.C. 78o(c)(3). Section 240.15d-5 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.15d-10 is also issued under 15 U.S.C. 80a-20(a) and 80a-37(a), and secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.15d-11 is also issued under secs. 3 (a) and 306(a), Pub L. 107-204, 116 Stat. 745. Section 240.15d-14 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.15d-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Sections 240.15Ca1-1, 240.15Ca2-1, 240.15Ca2-2, 240.15Ca2-3, 240.15Ca2-4, 240.15Ca2-5, 240.15Cc1-1 also issued under secs. 3, 15C; 15 U.S.C. 78c, 78o-5. Section 240.17a-3 also issued under secs. 2, 17, 23a, 48 Stat. 897, as amended; 15 U.S.C. 78d-1, 78d-2, 78q; secs. 12, 14, 17, 23(a), 48 Stat. 892, 895, 897, 901; secs. 1, 4, 8, 49 Stat. 1375, 1379; sec. 203(a), 49 Stat. 704; sec. 5, 52 Stat. 1076; sec. 202, 68 Stat. 686; secs. 3, 5, 10, 78 Stat. 565-568, 569, 570, 580; secs. 1, 3, 82 Stat. 454, 455; secs. 28(c), 3-5, 84 Stat. 1435, 1497; sec. 105(b), 88 Stat. 1503; secs. 8, 9, 14, 18, 89 Stat. 117, 118, 137, 155; 15 U.S.C. 781, 78n, 78q, 78w(a). Section 240.17a-4 also issued under secs. 2, 17, 23(a), 48 Stat. 897, as amended; 15 U.S.C. 78a, 78d-1, 78d-2; sec. 14, Pub. L. 94-29, 89 Stat. 137 (15 U.S.C. 78a); sec. 18, Pub. L. 94-29, 89 Stat. 155 (15 U.S.C. 78w). Section 240.17a-23 also issued under 15 U.S.C. 78b, 78c, 78q, and 78w(a). Section 240.17f-1 is also authorized under sections 2, 17 and 17A, 48 Stat. 891, 89 Stat. 137, 141 (15 U.S.C. 78b, 78q, 78q-1). Section 240.17h-1T also issued under 15 U.S.C. 78q. Sections 240.17Ac2-1(c) and 240.17Ac2-2 also issued under secs. 17, 17A and 23(a); 48 Stat. 897, as amended, 89 Stat. 137, 141 and 48 Stat. 901 (15 U.S.C. 78q, 78q-1, 78w(a)). Section 240.17Ad-1 is also issued under secs. 2, 17, 17A and 23(a); 48 Stat. 841 as amended, 48 Stat. 897, as amended, 89 Stat. 137, 141, and 48 Stat. 901 (15 U.S.C. 78b, 78q, 78q-1, 78w). Sections 240.17Ad-5 and 240.17Ad-10 are also issued under secs. 3 and 17A; 48 Stat. 882, as amended, and 89 Stat. (15 U.S.C. 78c and 78q-1). Section 240.17Ad-7 also issued under 15 U.S.C. 78b, 78q, and 78q-1. Sections 240.19c-4 also issued under secs. 6, 11A, 14, 15A, 19 and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78o-3, and 78s). Section 240.19c-5 also issued under Sections 6, 11A, and 19 of the Securities Exchange Act of 1934, 48 Stat. 885, as amended, 89 Stat. 111, as amended, and 48 Stat. 898, as amended, 15 U.S.C. 78f, 78k-1, and 78s. Section 240.31-1 is also issued under sec. 31, 48 Stat. 904, as amended (15 U.S.C. 78ee).

Appendix D FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO PUBLIC COMPANY
OUTSIDE AUDITORS AND BOARD AUDIT COMMITTEES

2-D Corporate Governance: Law and Practice 17 CFR § 240.10A-3

§ 3 Listing standards relating to audit committees.

(a) Pursuant to section 10A(m) of the Act (*15 U.S.C. 78j-1(m)*) and section 3 of the Sarbanes-Oxley Act of 2002 (*15 U.S.C. 7202*):

(1) National securities exchanges. The rules of each national securities exchange registered pursuant to section 6 of the Act (*15 U.S.C. 78f*) must, in accordance with the provisions of this section, prohibit the initial or continued listing of any security of an issuer that is not in compliance with the requirements of any portion of paragraph (b) or (c) of this section.

(2) National securities associations. The rules of each national securities association registered pursuant to section 15A of the Act (*15 U.S.C. 78o-3*) must, in accordance with the provisions of this section, prohibit the initial or continued listing in an automated inter-dealer quotation system of any security of an issuer that is not in compliance with the requirements of any portion of paragraph (b) or (c) of this section.

(3) Opportunity to cure defects. The rules required by paragraphs (a)(1) and (a)(2) of this section must provide for appropriate procedures for a listed issuer to have an opportunity to cure any defects that would be the basis for a prohibition under paragraph (a) of this section, before the imposition of such prohibition. Such rules also may provide that if a member of an audit committee ceases to be independent in accordance with the requirements of this section for reasons outside the member's reasonable control, that person, with notice by the issuer to the applicable national securities exchange or national securities association, may remain an audit committee member of the listed issuer until the earlier of the next annual shareholders meeting of the listed issuer or one year from the occurrence of the event that caused the member to be no longer independent.

(4) Notification of noncompliance. The rules required by paragraphs (a)(1) and (a)(2) of this section must include a requirement that a listed issuer must notify the applicable national securities exchange or national securities association promptly after an executive officer of the listed issuer becomes aware of any material noncompliance by the listed issuer with the requirements of this section.

(5) Implementation.

(i) The rules of each national securities exchange or national securities association meeting the requirements of this section must be operative, and listed issuers must be in compliance with those rules, by the following dates:

(A) July 31, 2005 for foreign private issuers and smaller reporting companies (as defined in § 240.12b-2); and

(B) For all other listed issuers, the earlier of the listed issuer's first annual shareholders meeting after January 15, 2004, or October 31, 2004.

(ii) Each national securities exchange and national securities association must provide to the Commission, no later than July 15, 2003, proposed rules or rule amendments that comply with this section.

(iii) Each national securities exchange and national securities association must have final rules or rule amendments that comply with this section approved by the Commission no later than December 1, 2003.

(b) Required standards--

(1) Independence.

(i) Each member of the audit committee must be a member of the board of directors of the listed issuer, and must otherwise be independent; provided that, where a listed issuer is one of two dual holding companies, those companies may designate one audit committee for both companies so long as each member of the audit committee is a member of the board of directors of at least one of such dual holding companies.

(ii) Independence requirements for non-investment company issuers. In order to be considered to be independent for purposes of this paragraph (b)(1), a member of an audit committee of a listed issuer that is not an investment company may not, other than in his or her capacity as a member of the audit committee, the board of directors, or any other board committee:

(A) Accept directly or indirectly any consulting, advisory, or other compensatory fee from the issuer or any subsidiary thereof, provided that, unless the rules of the national securities exchange or national securities association provide otherwise, compensatory fees do not include the receipt of fixed amounts of compensation under a retirement plan (including deferred compensation) for prior service with the listed issuer (provided that such compensation is not contingent in any way on continued service); or

(B) Be an affiliated person of the issuer or any subsidiary thereof.

(iii) Independence requirements for investment company issuers. In order to be considered to be independent for purposes of this paragraph (b)(1), a member of an audit committee of a listed issuer that is an investment company may not, other than in his or her capacity as a member of the audit committee, the board of directors, or any other board committee:

(A) Accept directly or indirectly any consulting, advisory, or other compensatory fee from the issuer or any subsidiary thereof, provided that, unless the rules of the national securities exchange or national securities association provide otherwise, compensatory fees do not include the receipt of fixed amounts of compensation under a retirement plan (including deferred compensation) for prior service with the listed issuer (provided that such compensation is not contingent in any way on continued service); or

(B) Be an "interested person" of the issuer as defined in section 2(a)(19) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(19)*).

(iv) Exemptions from the independence requirements.

(A) For an issuer listing securities pursuant to a registration statement under section 12 of the Act (*15 U.S.C. 78l*), or for an issuer that has a registration statement under the Securities Act of 1933 (*15 U.S.C. 77a et seq.*) covering an initial public offering of securities to be listed by the issuer, where in each case the listed issuer was not, immediately prior to the effective date of such registration statement, required to file reports with the Commission pursuant to section 13(a) or 15(d) of the Act (*15 U.S.C. 78m(a) or 78o(d)*):

(1) All but one of the members of the listed issuer's audit committee may be exempt from the independence requirements of paragraph (b)(1)(ii) of this section for 90 days from the date of effectiveness of such registration statement; and

(2) A minority of the members of the listed issuer's audit committee may be exempt from the independence requirements of paragraph (b)(1)(ii) of this section for one year from the date of effectiveness of such registration statement.

(B) An audit committee member that sits on the board of directors of a listed issuer and an affiliate of the listed issuer is exempt from the requirements of paragraph (b)(1)(ii)(B) of this section if the member, except for being a director on each such board of directors, otherwise meets the independence requirements of paragraph (b)(1)(ii) of this section for each such entity, including the receipt of only ordinary-course compensation for serving as a member of the board of directors, audit committee or any other board committee of each such entity.

(C) An employee of a foreign private issuer who is not an executive officer of the foreign private issuer is exempt from the requirements of paragraph (b)(1)(ii) of this section if the employee is elected or named to the board of directors or audit committee of the foreign private issuer pursuant to the issuer's governing law or documents, an employee collective bargaining or similar agreement or other home country legal or listing requirements.

(D) An audit committee member of a foreign private issuer may be exempt from the requirements of paragraph (b)(1)(ii)(B) of this section if that member meets the following requirements:

(1) The member is an affiliate of the foreign private issuer or a representative of such an affiliate;

(2) The member has only observer status on, and is not a voting member or the chair of, the audit committee;
and

(3) Neither the member nor the affiliate is an executive officer of the foreign private issuer.

(E) An audit committee member of a foreign private issuer may be exempt from the requirements of paragraph (b)(1)(ii)(B) of this section if that member meets the following requirements:

(1) The member is a representative or designee of a foreign government or foreign governmental entity that is an affiliate of the foreign private issuer; and

(2) The member is not an executive officer of the foreign private issuer.

(F) In addition to paragraphs (b)(1)(iv)(A) through (E) of this section, the Commission may exempt from the requirements of paragraphs (b)(1)(ii) or (b)(1)(iii) of this section a particular relationship with respect to audit committee members, as the Commission determines appropriate in light of the circumstances.

(2) Responsibilities relating to registered public accounting firms. The audit committee of each listed issuer, in its capacity as a committee of the board of directors, must be directly responsible for the appointment, compensation, retention and oversight of the work of any registered public accounting firm engaged (including resolution of disagreements between management and the auditor regarding financial reporting) for the purpose of preparing or issuing an audit report or performing other audit, review or attest services for the listed issuer, and each such registered public accounting firm must report directly to the audit committee.

(3) Complaints. Each audit committee must establish procedures for:

(i) The receipt, retention, and treatment of complaints received by the listed issuer regarding accounting, internal accounting controls, or auditing matters; and

(ii) The confidential, anonymous submission by employees of the listed issuer of concerns regarding questionable accounting or auditing matters.

(4) Authority to engage advisers. Each audit committee must have the authority to engage independent counsel and other advisers, as it determines necessary to carry out its duties.

(5) Funding. Each listed issuer must provide for appropriate funding, as determined by the audit committee, in its capacity as a committee of the board of directors, for payment of:

(i) Compensation to any registered public accounting firm engaged for the purpose of preparing or issuing an audit report or performing other audit, review or attest services for the listed issuer;

(ii) Compensation to any advisers employed by the audit committee under paragraph (b)(4) of this section; and

(iii) Ordinary administrative expenses of the audit committee that are necessary or appropriate in carrying out its duties.

(c) General exemptions.

(1) At any time when an issuer has a class of securities that is listed on a national securities exchange or national securities association subject to the requirements of this section, the listing of other classes of securities of the listed issuer on a national securities exchange or national securities association is not subject to the requirements of this section.

(2) At any time when an issuer has a class of common equity securities (or similar securities) that is listed on a national securities exchange or national securities association subject to the requirements of this section, the listing of classes of securities of a direct or indirect consolidated subsidiary or an at least 50% beneficially owned subsidiary of the issuer (except classes of equity securities, other than non-convertible, non-participating preferred securities, of such subsidiary) is not subject to the requirements of this section.

(3) The listing of securities of a foreign private issuer is not subject to the requirements of paragraphs (b)(1) through (b)(5) of this section if the foreign private issuer meets the following requirements:

(i) The foreign private issuer has a board of auditors (or similar body), or has statutory auditors, established and selected pursuant to home country legal or listing provisions expressly requiring or permitting such a board or similar body;

(ii) The board or body, or statutory auditors is required under home country legal or listing requirements to be either:

(A) Separate from the board of directors; or

(B) Composed of one or more members of the board of directors and one or more members that are not also members of the board of directors;

(iii) The board or body, or statutory auditors, are not elected by management of such issuer and no executive

officer of the foreign private issuer is a member of such board or body, or statutory auditors;

(iv) Home country legal or listing provisions set forth or provide for standards for the independence of such board or body, or statutory auditors, from the foreign private issuer or the management of such issuer;

(v) Such board or body, or statutory auditors, in accordance with any applicable home country legal or listing requirements or the issuer's governing documents, are responsible, to the extent permitted by law, for the appointment, retention and oversight of the work of any registered public accounting firm engaged (including, to the extent permitted by law, the resolution of disagreements between management and the auditor regarding financial reporting) for the purpose of preparing or issuing an audit report or performing other audit, review or attest services for the issuer; and

(vi) The audit committee requirements of paragraphs (b)(3), (b)(4) and (b)(5) of this section apply to such board or body, or statutory auditors, to the extent permitted by law.

(4) The listing of a security futures product cleared by a clearing agency that is registered pursuant to section 17A of the Act (*15 U.S.C. 78q-1*) or that is exempt from the registration requirements of section 17A pursuant to paragraph (b)(7)(A) of such section is not subject to the requirements of this section.

(5) The listing of a standardized option, as defined in § 240.9b-1(a)(4), issued by a clearing agency that is registered pursuant to section 17A of the Act (*15 U.S.C. 78q-1*) is not subject to the requirements of this section.

(6) The listing of securities of the following listed issuers are not subject to the requirements of this section:

(i) Asset-Backed Issuers (as defined in § 229.1101 of this chapter);

(ii) Unit investment trusts (as defined in *15 U.S.C. 80a-4(2)*); and

(iii) Foreign governments (as defined in § 240.3b-4(a)).

(7) The listing of securities of a listed issuer is not subject to the requirements of this section if:

(i) The listed issuer, as reflected in the applicable listing application, is organized as a trust or other unincorporated association that does not have a board of directors or persons acting in a similar capacity; and

(ii) The activities of the listed issuer that is described in paragraph (c)(7)(i) of this section are limited to passively owning or holding (as well as administering and distributing amounts in respect of) securities, rights, collateral or other assets on behalf of or for the benefit of the holders of the listed securities.

(d) Disclosure. Any listed issuer availing itself of an exemption from the independence standards contained in paragraph (b)(1)(iv) of this section (except paragraph (b)(1)(iv)(B) of this section), the general exemption contained in paragraph (c)(3) of this section or the last sentence of paragraph (a)(3) of this section, must:

(1) Disclose its reliance on the exemption and its assessment of whether, and if so, how, such reliance would materially adversely affect the ability of the audit committee to act independently and to satisfy the other requirements of this section in any proxy or information statement for a meeting of shareholders at which directors are elected that is filed with the Commission pursuant to the requirements of section 14 of the Act (*15 U.S.C. 78n*); and

(2) Disclose the information specified in paragraph (d)(1) of this section in, or incorporate such information by reference from such proxy or information statement filed with the Commission into, its annual report filed with the Commission pursuant to the requirements of section 13(a) or 15(d) of the Act (*15 U.S.C. 78m(a) or 78o(d)*).

(e) Definitions. Unless the context otherwise requires, all terms used in this section have the same meaning as in the Act. In addition, unless the context otherwise requires, the following definitions apply for purposes of this section:

(1)

(i) The term affiliate of, or a person affiliated with, a specified person, means a person that directly, or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with, the person specified.

(ii)

(A) A person will be deemed not to be in control of a specified person for purposes of this section if the person:

(1) Is not the beneficial owner, directly or indirectly, of more than 10% of any class of voting equity securities of the specified person; and

(2) Is not an executive officer of the specified person.

(B) Paragraph (e)(1)(ii)(A) of this section only creates a safe harbor position that a person does not control a specified person. The existence of the safe harbor does not create a presumption in any way that a person exceeding the ownership requirement in paragraph (e)(1)(ii)(A)(1) of this section controls or is otherwise an affiliate of a specified person.

(iii) The following will be deemed to be affiliates:

(A) An executive officer of an affiliate;

(B) A director who also is an employee of an affiliate;

(C) A general partner of an affiliate; and

(D) A managing member of an affiliate.

(iv) For purposes of paragraph (e)(1)(i) of this section, dual holding companies will not be deemed to be affiliates of or persons affiliated with each other by virtue of their dual holding company arrangements with each other, including where directors of one dual holding company are also directors of the other dual holding company, or where directors of one or both dual holding companies are also directors of the businesses jointly controlled, directly or indirectly, by the dual holding companies (and, in each case, receive only ordinary-course compensation for serving as a member of the board of directors, audit committee or any other board committee of the dual holding companies or any entity that is jointly controlled, directly or indirectly, by the dual holding companies).

(2) In the case of foreign private issuers with a two-tier board system, the term board of directors means the supervisory or non-management board.

(3) In the case of a listed issuer that is a limited partnership or limited liability company where such entity does not have a board of directors or equivalent body, the term board of directors means the board of directors of the managing general partner, managing member or equivalent body.

(4) The term control (including the terms controlling, controlled by and under common control with) means the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a person, whether through the ownership of voting securities, by contract, or otherwise.

(5) The term dual holding companies means two foreign private issuers that:

(i) Are organized in different national jurisdictions;

(ii) Collectively own and supervise the management of one or more businesses which are conducted as a single economic enterprise; and

(iii) Do not conduct any business other than collectively owning and supervising such businesses and activities reasonably incidental thereto.

(6) The term executive officer has the meaning set forth in § 240.3b-7.

(7) The term foreign private issuer has the meaning set forth in § 240.3b-4(c).

(8) The term indirect acceptance by a member of an audit committee of any consulting, advisory or other compensatory fee includes acceptance of such a fee by a spouse, a minor child or stepchild or a child or stepchild sharing a home with the member or by an entity in which such member is a partner, member, an officer such as a managing director occupying a comparable position or executive officer, or occupies a similar position (except limited partners, non-managing members and those occupying similar positions who, in each case, have no active role in providing services to the entity) and which provides accounting, consulting, legal, investment banking or financial advisory services to the issuer or any subsidiary of the issuer.

(9) The terms listed and listing refer to securities listed on a national securities exchange or listed in an automated inter-dealer quotation system of a national securities association or to issuers of such securities.

Instructions to § 240.10A-3.

1. The requirements in paragraphs (b)(2) through (b)(5), (c)(3)(v) and (c)(3)(vi) of this section do not conflict with,

and do not affect the application of, any requirement or ability under a listed issuer's governing law or documents or other home country legal or listing provisions that requires or permits shareholders to ultimately vote on, approve or ratify such requirements. The requirements instead relate to the assignment of responsibility as between the audit committee and management. In such an instance, however, if the listed issuer provides a recommendation or nomination regarding such responsibilities to shareholders, the audit committee of the listed issuer, or body performing similar functions, must be responsible for making the recommendation or nomination.

2. The requirements in paragraphs (b)(2) through (b)(5), (c)(3)(v), (c)(3)(vi) and Instruction 1 of this section do not conflict with any legal or listing requirement in a listed issuer's home jurisdiction that prohibits the full board of directors from delegating such responsibilities to the listed issuer's audit committee or limits the degree of such delegation. In that case, the audit committee, or body performing similar functions, must be granted such responsibilities, which can include advisory powers, with respect to such matters to the extent permitted by law, including submitting nominations or recommendations to the full board.

3. The requirements in paragraphs (b)(2) through (b)(5), (c)(3)(v) and (c)(3)(vi) of this section do not conflict with any legal or listing requirement in a listed issuer's home jurisdiction that vests such responsibilities with a government entity or tribunal. In that case, the audit committee, or body performing similar functions, must be granted such responsibilities, which can include advisory powers, with respect to such matters to the extent permitted by law.

4. For purposes of this section, the determination of a person's beneficial ownership must be made in accordance with § 240.13d-3.

Sections 240.3a43-1 and 240.3a44-1 also issued under sec. 3; 15 U.S.C. 78c Section 240.3b-6 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.3b-9 also issued under secs. 2, 3 and 15, 89 Stat. 97, as amended, 89 Stat. 121, as amended (15 U.S.C. 78b, 78c, 78o). Section 240.9b-1 is also issued under sec. 2, 7, 10, 19(a), 48 Stat. 74, 78, 81, 85; secs. 201, 205, 209, 120, 48 Stat. 905, 906, 908; secs. 1-4, 8, 68 Stat. 683, 685; sec. 12(a), 73 Stat. 143; sec. 7(a), 74 Stat. 412; sec. 27(a), 84 Stat. 1433; sec. 308(a)(2), 90 Stat. 57; sec. 505, 94 Stat. 2292; secs. 9, 15, 23(a), 48 Stat. 889, 895, 901; sec. 230(a), 49 Stat. 704; secs. 3, 8, 49 Stat. 1377, 1379; sec. 2, 52 Stat. 1075; secs. 6, 10, 78 Stat. 570-574, 580; sec. 11(d), 84 Stat. 121; sec. 18, 89 Stat. 155; sec. 204, 91 Stat. 1500; 15 U.S.C. 77b, 77g, 77j, 77s(a), 78i, 78o, 78w(a). Section 240.10b-10 is also issued under secs. 2, 3, 9, 10, 11, 11A, 15, 17, 23, 48 Stat. 891, 89 Stat. 97, 121, 137, 156, (15 U.S.C. 78b, 78c, 78i, 78j, 78k, 78k-1, 78o, 78q). Section 240.12a-7 also issued under 15 U.S.C. 78a *et seq.*, particularly secs. 3(a)(12), 15 U.S.C. 78c(a)(12), 6, 15 U.S.C. 78(f), 11A, 15 U.S.C. 78k, 12, 15 U.S.C. 78(l), and 23(a)(1), 15 U.S.C. 78(w)(a)(1). Sections

240.12b-1 to 240.12b-36 also issued under secs. 3, 12, 13, 15, 48 Stat. 892, as amended 894, 895, as amended; 15 U.S.C. 78c, 78l, 78m, 78o. Section 240.12b-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.12b-25 is also issued under 15 U.S.C. 80a-8, 80a-24(a), 80a-29, and 80a-37. Section 240.12g-3 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.12g3-2 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.13a-10 is also issued under secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745. Section 240.13a-11 is also issued under secs. 3(a) and 306(a), Pub.L. 107-204, 116 Stat. 745. Section 240.13a-14 is also issued under secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745. Section 240.13a-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Sections 240.13e-4, 240.14d-7, 240.14d-10 and 240.14e-1 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(d) and 14(e), 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(d) and 78n(e) and sec. 23(c) of the Investment Company Act of 1940, 15 U.S.C. 80a-23(c). Sections 240.13e-4 to 240.13e-101 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(e), 15(c)(1), 48 Stat. 882, 889, 891, 894, 895, 901, sec. 8, 49 Stat. 1379, sec. 5, 78 Stat. 569, 570, secs. 2, 3, 82 Stat. 454, 455, secs. 1, 2, 3-5, 84 Stat. 1497, secs. 3, 18, 89 Stat. 97, 155; 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(e), 78o(c); sec. 23(c) of the Investment Company Act of 1940; 54 Stat. 825; 15 U.S.C. 80a-23(c). Section 240.13f-2(T) also issued under sec. 13(f)(1) (15 U.S.C. 78m(f)(1)). Sections 240.14a-1, 240.14a-3, 240.14a-13, 240.14b-1, 240.14b-2, 240.14c-1, and 240.14c-7 also issued under secs. 12, 15 U.S.C. 781, and 14, Pub.L. 99-222, 99 Stat. 1737, 15 U.S.C. 78n. Sections 240.14a-3, 240.14a-13, 240.14b-1 and 240.14c-7 also issued under secs. 12, 14 and 17, 15 U.S.C. 781, 78n and 78g. Sections 240.14c-1 to 240.14c-101 also issued under sec. 14, 48 Stat. 895; 15 U.S.C. 78n. Section 240.14d-1 is also issued under 15 U.S.C. 77g, 77j, 77s(a), 77ttt(a), 79t, 80a-37.; Section 240.14e-2 is also issued under 15 U.S.C. 77g, 77h, 77s(a), 77sss, 79t, 80a-37(a). Section 240.14e-4 also issued under the Exchange Act, 15 U.S.C. 78a *et seq.*, and particularly sections 3(b), 10(a), 10(b), 14(e), 15(c), and 23(a) of the Exchange Act (15 U.S.C. 78c(b), 78j(a), 78j(b), 78n(e), 78o(c), and 78w(a)). Section 240.15a-6, also issued under secs. 3, 10, 15, and 17, 15 U.S.C. 78c, 78j, 78o, and 78q. Section 240.15b1-3 also issued under sec. 15, 17; 15 U.S.C. 78o 78q. Sections 240.15b1-3 and 240.15b2-1 also issued under 15 U.S.C. 78o, 78q. Section 240.15b2-2 also issued under secs. 3, 15; 15 U.S.C. 78c, 78o. Sections 240.15b10-1 to 240.15b10-9 also issued under secs. 15, 17, 48 Stat. 895, 897, sec. 203, 49 Stat. 704, secs. 4, 8, 49 Stat. 1379, sec. 5, 52 Stat. 1076, sec. 6, 78 Stat. 570; 15 U.S.C. 78o, 78q, 12 U.S.C. 241 nt. Section 240.15c2-6, also issued under secs. 3, 10, and 15, 15 U.S.C. 78c, 78j, and 78o. Section 240.15c2-11 also issued under 15 U.S.C. 78j(b), 78o(c), 78q(a), and 78w(a). Section 240.15c2-12 also issued under 15 U.S.C. 78b, 78c, 78j, 78o, 78o-4 and 78q. Section 240.15c3-1 is also issued under secs. 15(c)(3), 15 U.S.C. 78o(c)(3). Section 240.15c3-3 is also issued under 15 U.S.C. 78o(c)(2), 78(c)(3), 78q(a), 78w(a); sec. 6(c), 84 Stat. 1652; 15 U.S.C. 78fff. Section 240.15c3-3(o) is also issued under Pub.L. 106-554, 114 Stat. 2763, section 203. Section 240.15d-5 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.15d-10 is also issued under 15 U.S.C. 80a-20(a) and 80a-37(a), and secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745. Section 240.15d-11 is also issued under secs. 3(a) and 306(a), Pub.L. 107-204, 116 Stat. 745. Section 240.15d-14 is also issued under secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745.

AUTHORITY: Section 240.15d-15 is also issued under secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745. Sections 240.15Ca1-1, 240.15Ca2-1, 240.15Ca2-2, 240.15Ca2-3, 240.15Ca2-4, 240.15Ca2-5, 240.15Cc1-1 also issued under secs. 3, 15C; 15 U.S.C. 78c, 78o-5. Section 240.17a-4 also issued under secs. 2, 17, 23(a), 48 Stat. 897, as amended; 15 U.S.C. 78a, 78d-1, 78d-2; sec. 14, Pub.L. 94-29, 89 Stat. 137 (15 U.S.C. 78a); sec. 18, Pub.L. 94-29, 89 Stat. 155 (15 U.S.C. 78w). Section 240.17a-23 also issued under 15 U.S.C. 78b, 78c, 78o, 78q, and 78w(a). Section 240.17f-1 is also authorized under sections 2, 17 and 17A, 48 Stat. 891, 89 Stat. 137, 141 (15 U.S.C. 78b, 78q, 78q-1).Section 240.17h-1T also issued under 15 U.S.C. 78q. Sections 240.17Ac2-1(c) and 240.17Ac2-2 also issued under secs. 17, 17A and 23(a); 48 Stat. 897, as amended, 89 Stat. 137, 141 and 48 Stat. 901 (15 U.S.C. 78q, 78q-1, 78w(a)). Section 240.17Ad-1 is also issued under secs. 2, 17, 17A and 23(a); 48 Stat. 841 as amended, 48 Stat. 897, as amended, 89 Stat. 137, 141, and 48 Stat. 901 (15 U.S.C. 78b, 78q, 78q-1, 78w). Sections 240.17Ad-5 and 240.17Ad-10 are also issued under secs. 3 and 17A; 48 Stat. 882, as amended, and 89 Stat. (15 U.S.C. 78c and 78q-1). Section 240.17Ad-7 also issued under 15 U.S.C. 78b, 78q, and 78q-1. Sections 240.19c-4 also issued under secs. 6, 11A, 14, 15A, 19 and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78o-3, and 78s). Section 240.19c-5 also issued under Sections 6, 11A, and 19 of the Securities Exchange Act of 1934, 48 Stat. 885, as amended, 89 Stat. 111, as amended, and 48 Stat. 898, as amended, 15 U.S.C. 78f, 78k-1, and 78s. Section 240.31-1 is also issued under sec. 31, 48 Stat. 904,

as amended (15 U.S.C. 78ee).

2-D Corporate Governance: Law and Practice Sarbanes-Oxley § 202

§ Oxley 202 Preapproval Requirements [for auditing and non-auditing services adding Section 10A(I) to the Exchange Act]

Section 10A of the Securities Exchange Act of 1934 (*15 U.S.C. 78j-1*), as amended by this Act, is amended by adding at the end the following:

"(i) Preapproval Requirements.--

"(1) In general.....

"(A) Audit committee action.--All auditing services (which may entail providing comfort letters in connection with securities underwritings or statutory audits required for insurance companies for purposes of State law) and non-audit services, other than as provided in subparagraph (B), provided to an issuer by the auditor of the issuer shall be preapproved by the audit committee of the issuer.

"(B) De minimus exception.--The preapproval requirement under subparagraph (A) is waived with respect to the provision of non-audit services for an issuer, if--

"(i) the aggregate amount of all such non-audit services provided to the issuer constitutes not more than 5 percent of the total amount of revenues paid by the issuer to its auditor during the fiscal year in which the nonaudit services are provided;

"(ii) such services were not recognized by the issuer at the time of the engagement to be non-audit services; and

"(iii) such services are promptly brought to the attention of the audit committee of the issuer and approved prior to the completion of the audit by the audit committee or by 1 or more members of the audit committee who are members of the board of directors to whom authority to grant such approvals has been delegated by the audit committee.

"(2) Disclosure to investors.--Approval by an audit committee of an issuer under this subsection of a non-audit service to be performed by the auditor of the issuer shall be disclosed to investors in periodic reports required by section 13(a).

"(3) Delegation authority.--The audit committee of an issuer may delegate to 1 or more designated members of the audit committee who are independent directors of the board of directors, the authority to grant preapprovals required by this subsection. The decisions of any member to whom authority is delegated under this paragraph to preapprove an activity under this subsection shall be presented to the full audit committee at each of its scheduled meetings.

"(4) Approval of audit services for other purposes.--In carrying out its duties under subsection (m)(2), if the audit committee of an issuer approves an audit service within the scope of the engagement of the auditor, such audit service shall be deemed to have been preapproved for purposes of this subsection.

2-D Corporate Governance: Law and Practice Sarbanes-Oxley § 204

§ Oxley 204 Auditor Reports to Audit Committees [adding Section 10A(k) to the Exchange Act]

Section 10A of the Securities Exchange Act of 1934 (*15 U.S.C. 78j-1*), as amended by this Act, is amended by adding at the end the following:

(k) Reports to Audit Committees.--Each registered public accounting firm that performs for any issuer any audit required by this title shall timely report to the audit committee of the issuer--

(1) all critical accounting policies and practices to be used;

(2) all alternative treatments of financial information within generally accepted accounting principles that have been discussed with management officials of the issuer, ramifications of the use of such alternative disclosures and treatments, and the treatment preferred by the registered public accounting firm; and

(3) other material written communications between the registered public accounting firm and the management of the issuer, such as any management letter or schedule of unadjusted differences.

2-D Corporate Governance: Law and Practice Sarbanes-Oxley § 301

§ Oxley 301 Public Company Audit Committees [adding Section 10A(m) to the Exchange Act]

Section 10A of the Securities Exchange Act of 1934 (*15 U.S.C. 78f*) (*15 USC 78j-1*) is amended by adding at the end the following:

(m) Standards Relating to Audit Committees.--

(1) Commission rules.....

(A) In general.--Effective not later than 270 days after the date of enactment of this subsection, the Commission shall, by rule, direct the national securities exchanges and national securities associations to prohibit the listing of any security of an issuer that is not in compliance with the requirements of any portion of paragraphs (2) through (6).

(B) Opportunity to cure defects.--The rules of the Commission under subparagraph (A) shall provide for appropriate procedures for an issuer to have an opportunity to cure any defects that would be the basis for a prohibition under subparagraph (A), before the imposition of such prohibition.

(2) Responsibilities relating to registered public accounting firms.--The audit committee of each issuer, in its capacity as a committee of the board of directors, shall be directly responsible for the appointment, compensation, and oversight of the work of any registered public accounting firm employed by that issuer (including resolution of disagreements between management and the auditor regarding financial reporting) for the purpose of preparing or issuing an audit report or related work, and each such registered public accounting firm shall report directly to the audit committee.

(3) Independence..... "(A) In general.--Each member of the audit committee of the issuer shall be a member of the board of directors of the issuer, and shall otherwise be independent.

(B) Criteria.--In order to be considered to be independent for purposes of this paragraph, a member of an audit committee of an issuer may not, other than in his or her capacity as a member of the audit committee, the board of directors, or any other board committee--

(i) accept any consulting, advisory, or other compensatory fee from the issuer; or

(ii) be an affiliated person of the issuer or any subsidiary thereof.

(C) Exemption authority.--The Commission may exempt from the requirements of subparagraph (B) a particular relationship with respect to audit committee members, as the Commission determines appropriate in light of the circumstances.

(4) Complaints.--Each audit committee shall establish procedures for--

(A) the receipt, retention, and treatment of complaints received by the issuer regarding accounting, internal accounting controls, or auditing matters; and

(B) the confidential, anonymous submission by employees of the issuer of concerns regarding questionable accounting or auditing matters.

(5) Authority to engage advisers.--Each audit committee shall have the authority to engage independent counsel and other advisers, as it determines necessary to carry out its duties.

(6) Funding.--Each issuer shall provide for appropriate funding, as determined by the audit committee, in its capacity as a committee of the board of directors, for payment of compensation--

(A) to the registered public accounting firm employed by the issuer for the purpose of rendering or issuing an audit report; and

(B) to any advisers employed by the audit committee under paragraph (5).

Appendix D FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO PUBLIC COMPANY
OUTSIDE AUDITORS AND BOARD AUDIT COMMITTEES

2-D Corporate Governance: Law and Practice Sarbanes-Oxley § 303

§ Oxley 303 Improper Influence on Conduct of Audits

(a) Rules To Prohibit.-- It shall be unlawful, in contravention of such rules or regulations as the Commission shall prescribe as necessary and appropriate in the public interest or for the protection of investors, for any officer or director of an issuer, or any other person acting under the direction thereof, to take any action to fraudulently influence, coerce, manipulate, or mislead any independent public or certified accountant engaged in the performance of an audit of the financial statements of that issuer for the purpose of rendering such financial statements materially misleading.

(b) Enforcement.-- In any civil proceeding, the Commission shall have exclusive authority to enforce this section and any rule or regulation issued under this section.

(c) No Preemption of Other Law.-- The provisions of subsection (a) shall be in addition to, and shall not supersede or preempt, any other provision of law or any rule or regulation issued thereunder.

(d) Deadline for Rulemaking.-- The Commission shall--

(1) propose the rules or regulations required by this section, not later than 90 days after the date of enactment of this Act; and

(2) issue final rules or regulations required by this section, not later than 270 days after that date of enactment.

OUTSIDE AUDITORS AND BOARD AUDIT COMMITTEES

2-D Corporate Governance: Law and Practice 17 CFR § 240.13b2-2

§ 2 Representations and conduct in connection with the preparation of required reports and documents.

(a) No director or officer of an issuer shall, directly or indirectly:

(1) Make or cause to be made a materially false or misleading statement to an accountant in connection with; or

(2) Omit to state, or cause another person to omit to state, any material fact necessary in order to make statements made, in light of the circumstances under which such statements were made, not misleading, to an accountant in connection with:

(i) Any audit, review or examination of the financial statements of the issuer required to be made pursuant to this subpart; or

(ii) The preparation or filing of any document or report required to be filed with the Commission pursuant to this subpart or otherwise.

(b)(1) No officer or director of an issuer, or any other person acting under the direction thereof, shall directly or indirectly take any action to coerce, manipulate, mislead, or fraudulently influence any independent public or certified public accountant engaged in the performance of an audit or review of the financial statements of that issuer that are required to be filed with the Commission pursuant to this subpart or otherwise if that person knew or should have

known that such action, if successful, could result in rendering the issuer's financial statements materially misleading.

(2) For purposes of paragraphs (b)(1) and (c)(2) of this section, actions that, "if successful, could result in rendering the issuer's financial statements materially misleading" include, but are not limited to, actions taken at any time with respect to the professional engagement period to coerce, manipulate, mislead, or fraudulently influence an auditor:

(i) To issue or reissue a report on an issuer's financial statements that is not warranted in the circumstances (due to material violations of generally accepted accounting principles, generally accepted auditing standards, or other professional or regulatory standards);

(ii) Not to perform audit, review or other procedures required by generally accepted auditing standards or other professional standards;

(iii) Not to withdraw an issued report; or

(iv) Not to communicate matters to an issuer's audit committee.

(c) In addition, in the case of an investment company registered under section 8 of the Investment Company Act of 1940 (*15 U.S.C. 80a-8*), or a business development company as defined in section 2(a)(48) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(48)*), no officer or director of the company's investment adviser, sponsor, depositor, trustee, or administrator (or, in the case of paragraph (c)(2) of this section, any other person acting under the direction thereof) shall, directly or indirectly:

(1)

(i) Make or cause to be made a materially false or misleading statement to an accountant in connection with; or

(ii) Omit to state, or cause another person to omit to state, any material fact necessary in order to make statements made, in light of the circumstances under which such statements were made, not misleading to an accountant in connection with:

(A) Any audit, review, or examination of the financial statements of the investment company required to be made pursuant to this subpart; or

(B) The preparation or filing of any document or report required to be filed with the Commission pursuant to this subpart or otherwise; or

(2) Take any action to coerce, manipulate, mislead, or fraudulently influence any independent public or certified public accountant engaged in the performance of an audit or review of the financial statements of that investment company that are required to be filed with the Commission pursuant to this subpart or otherwise if that person knew or should have known that such action, if successful, could result in rendering the investment company's financial statements materially misleading.

Sections 240.13e-4 to 240.13e-101 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(e), 15(c)(1), 48 Stat. 882, 889, 891, 894, 895, 901, sec. 8, 49 Stat. 1379, sec. 5, 78 Stat. 569, 570, secs. 2, 3, 82 Stat. 454, 455, secs. 1, 2, 3-5, 84 Stat. 1497, secs. 3, 18, 89 Stat. 97, 155; 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(e), 78o(c); sec. 23(c) of the Investment Company Act of 1940; 54 Stat. 825; 15 U.S.C. 80a-23(c). Section 240.13f-2(T) also issued under sec. 13(f)(1) (15 U.S.C. 78m(f)(1)). Sections 240.14a-1, 240.14a-3,

240.14a-13, 240.14b-1, 240.14b-2, 240.14c-1, and 240.14c-7 also issued under secs. 12, 15 U.S.C. 781, and 14, Pub. L. 99-222, 99 Stat. 1737, 15 U.S.C. 78n. Sections 240.14a-3, 240.14a-13, 240.14b-1 and 240.14c-7 also issued under secs. 12, 14 and 17, 15 U.S.C. 781, 78n and 78g. Sections 240.14c-1 to 240.14c-101 also issued under sec. 14, 48 Stat. 895; 15 U.S.C. 78n. Section 240.14d-1 is also issued under 15 U.S.C. 77g, 77j, 77s(a), 77ttt(a), 79t, 80a-37. Section 240.14e-2 is also issued under 15 U.S.C. 77g, 77h, 77s(a), 77sss, 79t, 80a-37(a). Section 240.14e-4 also issued under the Exchange Act, 15 U.S.C. 78a *et seq.*, and particularly sections 3(b), 10(a), 10(b), 14(e), 15(c), and 23(a) of the Exchange Act (15 U.S.C. 78c(b), 78j(a), 78j(b), 78n(e), 78o(c), and 78w(a)). Section 240.15a-6, also issued under secs. 3, 10, 15, and 17, 15 U.S.C. 78c, 78j, 78o, and 78q. Sections 240.15b1-3 and 240.15b2-1 also issued under 15 U.S.C. 78o, 78q. Section 240.15b2-2 also issued under secs. 3, 15; 15 U.S.C. 78c, 78o. Sections 240.15b10-1 to 240.15b10-9 also issued under secs. 15, 17, 48 Stat. 895, 897, sec. 203, 49 Stat. 704, secs. 4, 8, 49 Stat. 1379, sec. 5, 52 Stat. 1076, sec. 6, 78 Stat. 570; 15 U.S.C. 78o, 78q, 12 U.S.C. 241 nt. Section 240.15c2-6, also issued under secs. 3, 10, and 15, 15 U.S.C. 78c, 78j, and 78o. Section 240.15c2-11 also issued under 15 U.S.C. 78j(b), 78o(c), 78q(a), and 78w(a). Section 240.15c2-12 also issued under 15 U.S.C. 78b, 78c, 78j, 78o, 78o-4 and 78q. Section 240.15c3-1 is also issued under secs. 15(c)(3), 15 U.S.C. 78o(c)(3). Section 240.15d-5 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.15d-10 is also issued under 15 U.S.C. 80a-20(a) and 80a-37(a), and secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.15d-11 is also issued under secs. 3 (a) and 306(a), Pub L. 107-204, 116 Stat. 745. Section 240.15d-14 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.15d-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Sections 240.15Ca1-1, 240.15Ca2-1, 240.15Ca2-2, 240.15Ca2-3, 240.15Ca2-4, 240.15Ca2-5, 240.15Cc1-1 also issued under secs. 3, 15C; 15 U.S.C. 78c, 78o-5. Section 240.17a-3 also issued under secs. 2, 17, 23a, 48 Stat. 897, as amended; 15 U.S.C. 78d-1, 78d-2, 78q; secs. 12, 14, 17, 23(a), 48 Stat. 892, 895, 897, 901; secs. 1, 4, 8, 49 Stat. 1375, 1379; sec. 203(a), 49 Stat. 704; sec. 5, 52 Stat. 1076; sec. 202, 68 Stat. 686; secs. 3, 5, 10, 78 Stat. 565-568, 569, 570, 580; secs. 1, 3, 82 Stat. 454, 455; secs. 28(c), 3-5, 84 Stat. 1435, 1497; sec. 105(b), 88 Stat. 1503; secs. 8, 9, 14, 18, 89 Stat. 117, 118, 137, 155; 15 U.S.C. 78l, 78n, 78q, 78w(a). Section 240.17a-4 also issued under secs. 2, 17, 23(a), 48 Stat. 897, as amended; 15 U.S.C. 78a, 78d-1, 78d-2; sec. 14, Pub. L. 94-29, 89 Stat. 137 (15 U.S.C. 78a); sec. 18, Pub. L. 94-29, 89 Stat. 155 (15 U.S.C. 78w). Section 240.17a-23 also issued under 15 U.S.C. 78b, 78c, 78q, and 78w(a). Section 240.17f-1 is also authorized under sections 2, 17 and 17A, 48 Stat. 891, 89 Stat. 137, 141 (15 U.S.C. 78b, 78q, 78q-1). Section 240.17h-1T also issued under 15 U.S.C. 78q. Sections 240.17Ac2-1(c) and 240.17Ac2-2 also issued under secs. 17, 17A and 23(a); 48 Stat. 897, as amended, 89 Stat. 137, 141 and 48 Stat. 901 (15 U.S.C. 78q, 78q-1, 78w(a)). Section 240.17Ad-1 is also issued under secs. 2, 17, 17A and 23(a); 48 Stat. 841 as amended, 48 Stat. 897, as amended, 89 Stat. 137, 141, and 48 Stat. 901 (15 U.S.C. 78b, 78q, 78q-1, 78w). Sections 240.17Ad-5 and 240.17Ad-10 are also issued under secs. 3 and 17A; 48 Stat. 882, as amended, and 89 Stat. (15 U.S.C. 78c and 78q-1). Section 240.17Ad-7 also issued under 15 U.S.C. 78b, 78q, and 78q-1. Sections 240.19c-4 also issued under secs. 6, 11A, 14, 15A, 19 and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78o-3, and 78s). Section 240.19c-5 also issued under Sections 6, 11A, and 19 of the Securities Exchange Act of 1934, 48 Stat. 885, as amended, 89 Stat. 111, as amended, and 48 Stat. 898, as amended, 15 U.S.C. 78f, 78k-1, and 78s. Section 240.31-1 is also issued under sec. 31, 48 Stat. 904, as amended (15 U.S.C. 78ee).

2-D Corporate Governance: Law and Practice Sarbanes-Oxley § 407

§ Oxley 407 Disclosure of Audit Committee Financial Expert

(a) Rules Defining "Financial Expert".-- The Commission shall issue rules, as necessary or appropriate in the public interest and consistent with the protection of investors, to require each issuer, together with periodic reports required pursuant to sections 13(a) and 15(d) of the Securities Exchange Act of 1934, to disclose whether or not, and if not, the reasons therefor, the audit committee of that issuer is comprised of at least 1 member who is a financial expert, as such term is defined by the Commission.

(b) Considerations.-- In defining the term "financial expert" for purposes of subsection (a), the Commission shall consider whether a person has, through education and experience as a public accountant or auditor or a principal financial officer, comptroller, or principal accounting officer of an issuer, or from a position involving the performance of similar functions--

(1) an understanding of generally accepted accounting principles and financial statements;

(2) experience in--

(A) the preparation or auditing of financial statements of generally comparable issuers; and

(B) the application of such principles in connection with the accounting for estimates, accruals, and reserves;

(3) experience with internal accounting controls; and

(4) an understanding of audit committee functions.

(c) Deadline for Rulemaking.-- The Commission shall--

(1) propose rules to implement this section, not later than 90 days after the date of enactment of this Act; and

(2) issue final rules to implement this section, not later than 180 days after that date of enactment.

2-D Corporate Governance: Law and Practice 17 CFR § 229.407(d)(5)

**§ 401(h) Instructions [Implementing Sarbanes-Oxley § 407 Concerning Disclosures on Audit Committee
Financial Experts]**

(Item 407) Corporate Governance.

* * * * *

(d) Audit Committee.

* * * * *

(5) Audit committee financial expert.

(i)

(A) Disclose that the registrant's board of directors has determined that the registrant either:

(1) Has at least one audit committee financial expert serving on its audit committee; or

(2) Does not have an audit committee financial expert serving on its audit committee.

(B) If the registrant provides the disclosure required by paragraph (d)(5)(i)(A)(1) of this Item, it must disclose the name of the audit committee financial expert and whether that person is independent, as independence for audit committee members is defined in the listing standards applicable to the listed issuer.

(C) If the registrant provides the disclosure required by paragraph (d)(5)(i)(A)(2) of this Item, it must explain why it does not have an audit committee financial expert.

Instruction to Item 407(d)(5)(i).

If the registrant's board of directors has determined that the registrant has more than one audit committee financial expert serving on its audit committee, the registrant may, but is not required to, disclose the names of those additional persons. A registrant choosing to identify such persons must indicate whether they are independent pursuant to paragraph (d)(5)(i)(B) of this Item.

(ii) For purposes of this Item, an audit committee financial expert means a person who has the following attributes:

(A) An understanding of generally accepted accounting principles and financial statements;

(B) The ability to assess the general application of such principles in connection with the accounting for estimates, accruals and reserves;

(C) Experience preparing, auditing, analyzing or evaluating financial statements that present a breadth and level of complexity of accounting issues that are generally comparable to the breadth and complexity of issues that can reasonably be expected to be raised by the registrant's financial statements, or experience actively supervising one or more persons engaged in such activities;

(D) An understanding of internal control over financial reporting; and

(E) An understanding of audit committee functions.

(iii) A person shall have acquired such attributes through:

(A) Education and experience as a principal financial officer, principal accounting officer, controller, public accountant or auditor or experience in one or more positions that involve the performance of similar functions;

(B) Experience actively supervising a principal financial officer, principal accounting officer, controller, public accountant, auditor or person performing similar functions;

(C) Experience overseeing or assessing the performance of companies or public accountants with respect to the preparation, auditing or evaluation of financial statements; or

(D) Other relevant experience.

(iv) Safe Harbor.

(A) A person who is determined to be an audit committee financial expert will not be deemed an expert for any purpose, including without limitation for purposes of section 11 of the Securities Act of 1933 (*15 U.S.C. 77k*), as a result of being designated or identified as an audit committee financial expert pursuant to this Item 407.

(B) The designation or identification of a person as an audit committee financial expert pursuant to this Item 407 does not impose on such person any duties, obligations or liability that are greater than the duties, obligations and liability imposed on such person as a member of the audit committee and board of directors in the absence of such designation or identification.

(C) The designation or identification of a person as an audit committee financial expert pursuant to this Item 401 does not affect the duties, obligations or liability of any other member of the audit committee or board of directors.

Instructions to Item 407(d)(5).

1. The disclosure under paragraph (d)(5) of this Item is required only in a registrant's annual report. The registrant need not provide the disclosure required by paragraph (d)(5) of this Item in a proxy or information statement unless that registrant is electing to incorporate this information by reference from the proxy or information statement into its annual report pursuant to General Instruction G(3) to Form 10-K (17 CFR 249.310).

2. If a person qualifies as an audit committee financial expert by means of having held a position described in paragraph (d)(5)(iii)(D) of this Item, the registrant shall provide a brief listing of that person's relevant experience. Such disclosure may be made by reference to disclosures required under Item 401(e) (§ 229.401(e)).

3. In the case of a foreign private issuer with a two-tier board of directors, for purposes of paragraph (d)(5) of this Item, the term board of directors means the supervisory or non-management board. In the case of a foreign private issuer meeting the requirements of § 240.10A-3(c)(3) of this chapter, for purposes of paragraph (d)(5) of this Item, the term board of directors means the issuer's board of auditors (or similar body) or statutory auditors, as applicable. Also, in the case of a foreign private issuer, the term generally accepted accounting principles in paragraph (d)(5)(ii)(A) of this Item means the body of generally accepted accounting principles used by that issuer in its primary financial statements filed with the Commission.

4. A registrant that is an Asset-Backed Issuer (as defined in § 229.1101) is not required to disclose the information required by paragraph (d)(5) of this Item.

2-D Corporate Governance: Law and Practice 17 CFR § 240.14a-101

§ 101 Schedule 14A. Information required in proxy statement.

Schedule 14A Information

Proxy Statement Pursuant to Section 14(a) of the Securities Exchange Act of 1934

(Amendment No. _____)

Filed by the Registrant

Filed by a party other than the Registrant

Check the appropriate box:

Preliminary Proxy Statement

Confidential, for Use of the Commission Only (as permitted by Rule 14a-6(e)(2))

Definitive Proxy Statement

Definitive Additional Materials

Soliciting Material under § 240.14a-12

(Name of Registrant as Specified In Its Charter)

(Name of Person(s) Filing Proxy Statement, if other than the Registrant)

Payment of Filing Fee (Check the appropriate box):

No fee required

Fee computed on table below per Exchange Act Rules 14a-6(i)(1) and 0-11

(1) Title of each class of securities to which transaction applies:

(2) Aggregate number of securities to which transaction applies:

(3) Per unit price or other underlying value of transaction computed pursuant to Exchange Act Rule 0-11 (set forth the amount on which the filing fee is calculated and state how it was determined):

(4) Proposed maximum aggregate value of transaction:

(5) Total fee paid:

Fee paid previously with preliminary materials.

Check box if any part of the fee is offset as provided by Exchange Act Rule 0-11(a)(2) and identify the filing for which the offsetting fee was paid previously. Identify the previous filing by registration statement number, or the Form or Schedule and the date of its filing.

(1) Amount Previously Paid:

(2) Form, Schedule or Registration Statement No.:

(3) Filing Party:

(4) Date Filed:

Notes: A. Where any item calls for information with respect to any matter to be acted upon and such matter involves other matters with respect to which information is called for by other items of this schedule, the information called for by such other items also shall be given. For example, where a solicitation of security holders is for the purpose of approving the authorization of additional securities which are to be used to acquire another specified company, and the registrants' security holders will not have a separate opportunity to vote upon the transaction, the solicitation to authorize the securities is also a solicitation with respect to the acquisition. Under those facts, information required by Items 11, 13 and 14 shall be furnished.

B. Where any item calls for information with respect to any matter to be acted upon at the meeting, such item need be answered in the registrant's soliciting material only with respect to proposals to be made by or on behalf of the registrant.

C. Except as otherwise specifically provided, where any item calls for information for a specified period with regard to directors, executive officers, officers or other persons holding specified positions or relationships, the information shall be given with regard to any person who held any of the specified positions or relationship at any time during the period. Information, other than information required by Item 404 of Regulation S-K (§ 229.404 of this chapter), need not be included for any portion of the period during which such person did not hold any such position or relationship, provided a statement to that effect is made.

D. Information may be incorporated by reference only in the manner and to the extent specifically permitted in the items of this schedule. Where incorporation by reference is used, the following shall apply:

1. Any incorporation by reference of information pursuant to the provisions of this schedule shall be subject to the

provisions of § 229.10(d) of this chapter restricting incorporation by reference of documents that incorporate by reference other information. A registrant incorporating any documents, or portions of documents, shall include a statement on the last page(s) of the proxy statement as to which documents, or portions of documents, are incorporated by reference. Information shall not be incorporated by reference in any case where such incorporation would render the statement incomplete, unclear or confusing.

2. If a document is incorporated by reference but not delivered to security holders, include an undertaking to provide, without charge, to each person to whom a proxy statement is delivered, upon written or oral request of such person and by first class mail or other equally prompt means within one business day of receipt of such request, a copy of any and all of the information that has been incorporated by reference in the proxy statement (not including exhibits to the information that is incorporated by reference unless such exhibits are specifically incorporated by reference into the information that the proxy statement incorporates), and the address (including title or department) and telephone numbers to which such a request is to be directed. This includes information contained in documents filed subsequent to the date on which definitive copies of the proxy statement are sent or given to security holders, up to the date of responding to the request.

3. If a document or portion of a document other than an annual report sent to security holders pursuant to the requirements of Rule 14a-3 (§ 240.14a-3 of this chapter) with respect to the same meeting or solicitation of consents or authorizations as that to which the proxy statement relates is incorporated by reference in the manner permitted by Item 13(b) or 14(e)(1) of this schedule, the proxy statement must be sent to security holders no later than 20 business days prior to the date on which the meeting of such security holders is held or, if no meeting is held, at least 20 business days prior to the date the votes, consents or authorizations may be used to effect the corporate action.

4. Electronic filings. If any of the information required by Items 13 or 14 of this Schedule is incorporated by reference from an annual or quarterly report to security holders, such report, or any portion thereof incorporated by reference, shall be filed in electronic format with the proxy statement. This provision shall not apply to registered investment companies.

E. In Item 13 of this Schedule, the reference to "meets the requirement of Form S-3" shall refer to a registrant who meets the following requirements:

(1) The registrant meets the requirements of General Instruction I.A. of Form S-3 (§ 239.13 of this chapter); and

(2) One of the following is met:

(i) The registrant meets the aggregate market value requirement of General Instruction I.B.1 of Form S-3; or

(ii) Action is to be taken as described in Items 11, 12 and 14 of this schedule which concerns non-convertible debt or preferred securities which are "investment grade securities" as defined in General Instruction I.B.2 of Form S-3, except that the time by which the rating must be assigned shall be the date on which definitive copies of the proxy statement are first sent or given to security holders; or

(iii) The registrant is a majority-owned subsidiary and one of the conditions of General Instruction I.C. of Form S-3 is met.

Item 1. Date, time and place information.

(a) State the date, time and place of the meeting of security holders, and the complete mailing address, including ZIP Code, of the principal executive offices of the registrant, unless such information is otherwise disclosed in material furnished to security holders with or preceding the proxy statement. If action is to be taken by written consent, state the date by which consents are to be submitted if state law requires that such a date be specified or if the person soliciting intends to set a date.

(b) On the first page of the proxy statement, as delivered to security holders, state the approximate date on which the proxy statement and form of proxy are first sent or given to security holders.

(c) Furnish the information required to be in the proxy statement by Rule 14a-5(e) (§ 240.14a-5(e) of this chapter).

Item 2. Revocability of proxy. State whether or not the person giving the proxy has the power to revoke it. If the right of revocation before the proxy is exercised is limited or is subject to compliance with any formal procedure, briefly describe such limitation or procedure.

Item 3. Dissenters' right of appraisal. Outline briefly the rights of appraisal or similar rights of dissenters with respect to any matter to be acted upon and indicate any statutory procedure required to be followed by dissenting security holders in order to perfect such rights. Where such rights may be exercised only within a limited time after the date of adoption of a proposal, the filing of a charter amendment or other similar act, state whether the persons solicited will be notified of such date.

Instructions.

1. Indicate whether a security holder's failure to vote against a proposal will constitute a waiver of his appraisal or similar rights and whether a vote against a proposal will be deemed to satisfy any notice requirements under State law with respect to appraisal rights. If the State law is unclear, state what position will be taken in regard to these matters.

2. Open-end investment companies registered under the Investment Company Act of 1940 are not required to respond to this item.

Item 4. Persons Making the Solicitation--

(a) Solicitations not subject to Rule 14a-12(c) (§ 240.14a-12(c)).

(1) If the solicitation is made by the registrant, so state. Give the name of any director of the registrant who has informed the registrant in writing that he intends to oppose any action intended to be taken by the registrant and indicate the action which he intends to oppose.

(2) If the solicitation is made otherwise than by the registrant, so state and give the names of the participants in the solicitation, as defined in paragraphs (a)(iii), (iv), (v) and (vi) of Instruction 3 to this Item.

(3) If the solicitation is to be made otherwise than by the use of the mails, describe the methods to be employed. If the solicitation is to be made by specially engaged employees or paid solicitors, state (i) the material features of any contract or arrangement for such solicitation and identify the parties, and (ii) the cost or anticipated cost thereof.

(4) State the names of the persons by whom the cost of solicitation has been or will be borne, directly or indirectly.

(b) Solicitations subject to Rule 14a-12(c) (§ 240.14a-12(c)).

(1) State by whom the solicitation is made and describe the methods employed and to be employed to solicit security holders.

(2) If regular employees of the registrant or any other participant in a solicitation have been or are to be employed to solicit security holders, describe the class or classes of employees to be so employed, and the manner and nature of their employment for such purpose.

(3) If specially engaged employees, representatives or other persons have been or are to be employed to solicit security holders, state (i) the material features of any contract or arrangement for such solicitation and the identity of the parties, (ii) the cost or anticipated cost thereof and (iii) the approximate number of such employees or any

other person (naming such other person) who will solicit security holders).

(4) State the total amount estimated to be spent and the total expenditures to date for, in furtherance of, or in connection with the solicitation of security holders.

(5) State by whom the cost of the solicitation will be borne. If such cost is to be borne initially by any person other than the registrant, state whether reimbursement will be sought from the registrant, and, if so, whether the question of such reimbursement will be submitted to a vote of security holders.

(6) If any such solicitation is terminated pursuant to a settlement between the registrant and any other participant in such solicitation, describe the terms of such settlement, including the cost or anticipated cost thereof to the registrant.

Instructions.

1. With respect to solicitations subject to Rule 14a-12(c) (§ 240.14a-12(c)), costs and expenditures within the meaning of this Item 4 shall include fees for attorneys, accountants, public relations or financial advisers, solicitors, advertising, printing, transportation, litigation and other costs incidental to the solicitation, except that the registrant may exclude the amount of such costs represented by the amount normally expended for a solicitation for an election of directors in the absence of a contest, and costs represented by salaries and wages of regular employees and officers, provided a statement to that effect is included in the proxy statement.

2. The information required pursuant to paragraph (b)(6) of this Item should be included in any amended or revised proxy statement or other soliciting materials relating to the same meeting or subject matter furnished to security holders by the registrant subsequent to the date of settlement.

3. For purposes of this Item 4 and Item 5 of this Schedule 14A:

(a) The terms "participant" and "participant in a solicitation" include the following:

(i) The registrant;

(ii) Any director of the registrant, and any nominee for whose election as a director proxies are solicited;

(iii) Any committee or group which solicits proxies, any member of such committee or group, and any person whether or not named as a member who, acting alone or with one or more other persons, directly or indirectly takes the initiative, or engages, in organizing, directing, or arranging for the financing of any such committee or group;

(iv) Any person who finances or joins with another to finance the solicitation of proxies, except persons who contribute not more than \$500 and who are not otherwise participants;

(v) Any person who lends money or furnishes credit or enters into any other arrangements, pursuant to any contract or understanding with a participant, for the purpose of financing or otherwise inducing the purchase, sale, holding or voting of securities of the registrant by any participant or other persons, in support of or in opposition to a participant; except that such terms do not include a bank, broker or dealer who, in the ordinary course of business, lends money or executes orders for the purchase or sale of securities and who is not otherwise a participant; and

(vi) Any person who solicits proxies.

(b) The terms "participant" and "participant in a solicitation" do not include:

(i) Any person or organization retained or employed by a participant to solicit security holders and whose activities are limited to the duties required to be performed in the course of such employment;

(ii) Any person who merely transmits proxy soliciting material or performs other ministerial or clerical duties;

(iii) Any person employed by a participant in the capacity of attorney, accountant, or advertising, public relations or financial adviser, and whose activities are limited to the duties required to be performed in the course of such employment;

(iv) Any person regularly employed as an officer or employee of the registrant or any of its subsidiaries who is not otherwise a participant; or

(v) Any officer or director of, or any person regularly employed by, any other participant, if such officer, director or employee is not otherwise a participant.

Item 5. Interest of certain Persons in Matters To Be Acted Upon--

(a) Solicitations not subject to Rule 14a-12(c) (§ 240.14a-12(c)). Describe briefly any substantial interest, direct or

indirect, by security holdings or otherwise, of each of the following persons in any matter to be acted upon, other than elections to office:

(1) If the solicitation is made on behalf of the registrant, each person who has been a director or executive officer of the registrant at any time since the beginning of the last fiscal year.

(2) If the solicitation is made otherwise than on behalf of the registrant, each participant in the solicitation, as defined in paragraphs (a)(iii), (iv), (v), and (vi) of Instruction 3 to Item 4 of this Schedule 14A.

(3) Each nominee for election as a director of the registrant.

(4) Each associate of any of the foregoing persons.

Instruction.

Except in the case of a solicitation subject to this regulation made in opposition to another solicitation subject to this regulation, this sub-item (a) shall not apply to any interest arising from the ownership of securities of the registrant where the security holder receives no extra or special benefit not shared on a pro rata basis by all other holders of the same class.

(b) Solicitation subject to Rule 14a-12(c) (§ 240.14a-12(c)). With respect to any solicitation subject to Rule 14a-12(c) (§ 240.14a-12(c)):

(1) Describe briefly any substantial interest, direct or indirect, by security holdings or otherwise, of each participant as defined in paragraphs (a)(ii), (iii), (iv), (v) and (vi) of Instruction 3 to Item 4 of this Schedule 14A, in any matter to be acted upon at the meeting, and include with respect to each participant the following information, or a fair and accurate summary thereof:

(i) Name and business address of the participant.

(ii) The participant's present principal occupation or employment and the name, principal business and address of any corporation or other organization in which such employment is carried on.

(iii) State whether or not, during the past ten years, the participant has been convicted in a criminal proceeding

(excluding traffic violations or similar misdemeanors) and, if so, give dates, nature of conviction, name and location of court, and penalty imposed or other disposition of the case. A negative answer need not be included in the proxy statement or other soliciting material.

(iv) State the amount of each class of securities of the registrant which the participant owns beneficially, directly or indirectly.

(v) State the amount of each class of securities of the registrant which the participant owns of record but not beneficially.

(vi) State with respect to all securities of the registrant purchased or sold within the past two years, the dates on which they were purchased or sold and the amount purchased or sold on each such date.

(vii) If any part of the purchase price or market value of any of the shares specified in paragraph (b)(1)(vi) of this Item is represented by funds borrowed or otherwise obtained for the purpose of acquiring or holding such securities, so state and indicate the amount of the indebtedness as of the latest practicable date. If such funds were borrowed or obtained otherwise than pursuant to a margin account or bank loan in the regular course of business of a bank, broker or dealer, briefly describe the transaction, and state the names of the parties.

(viii) State whether or not the participant is, or was within the past year, a party to any contract, arrangements or understandings with any person with respect to any securities of the registrant, including, but not limited to joint ventures, loan or option arrangements, puts or calls, guarantees against loss or guarantees of profit, division of losses or profits, or the giving or withholding of proxies. If so, name the parties to such contracts, arrangements or understandings and give the details thereof.

(ix) State the amount of securities of the registrant owned beneficially, directly or indirectly, by each of the participant's associates and the name and address of each such associate.

(x) State the amount of each class of securities of any parent or subsidiary of the registrant which the participant owns beneficially, directly or indirectly.

(xi) Furnish for the participant and associates of the participant the information required by Item 404(a) of Regulation S-K (§ 229.404(a) of this chapter).

(xii) State whether or not the participant or any associates of the participant have any arrangement or understanding with any person--

(A) with respect to any future employment by the registrant or its affiliates; or

(B) with respect to any future transactions to which the registrant or any of its affiliates will or may be a party.

If so, describe such arrangement or understanding and state the names of the parties thereto.

(2) With respect to any person, other than a director or executive officer of the registrant acting solely in that capacity, who is a party to an arrangement or understanding pursuant to which a nominee for election as director is proposed to be elected, describe any substantial interest, direct or indirect, by security holdings or otherwise, that such person has in any matter to be acted upon at the meeting, and furnish the information called for by paragraphs (b)(1)(xi) and (xii) of this Item.

Instruction:

For purposes of this Item 5, beneficial ownership shall be determined in accordance with Rule 13d-3 under the Act (Section 240.13d-3 of this chapter).

Item 6. Voting securities and principal holders thereof,

(a) As to each class of voting securities of the registrant entitled to be voted at the meeting (or by written consents or authorizations if no meeting is held), state the number of shares outstanding and the number of votes to which each class is entitled.

(b) State the record date, if any, with respect to this solicitation. If the right to vote or give consent is not to be determined, in whole or in part, by reference to a record date, indicate the criteria for the determination of security holders entitled to vote or give consent.

(c) If action is to be taken with respect to the election of directors and if the persons solicited have cumulative voting rights: (1) Make a statement that they have such rights, (2) briefly describe such rights, (3) state briefly the conditions precedent to the exercise thereof, and (4) if discretionary authority to cumulate votes is solicited, so indicate.

(d) Furnish the information required by Item 403 of Regulation S-K (§ 229.403 of this chapter) to the extent known by the persons on whose behalf the solicitation is made.

(e) If, to the knowledge of the persons on whose behalf the solicitation is made, a change in control of the registrant

has occurred since the beginning of its last fiscal year, state the name of the person(s) who acquired such control, the amount and the source of the consideration used by such person or persons; the basis of the control, the date and a description of the transaction(s) which resulted in the change of control and the percentage of voting securities of the registrant now beneficially owned directly or indirectly by the person(s) who acquired control; and the identity of the person(s) from whom control was assumed. If the source of all or any part of the consideration used is a loan made in the ordinary course of business by a bank as defined by section 3(a)(6) of the Act, the identity of such bank shall be omitted provided a request for confidentiality has been made pursuant to section 13(d)(1)(B) of the Act by the person(s) who acquired control. In lieu thereof, the material shall indicate that the identity of the bank has been so omitted and filed separately with the Commission.

Instruction.

1. State the terms of any loans or pledges obtained by the new control group for the purpose of acquiring control, and the names of the lenders or pledgees.

2. Any arrangements or understandings among members of both the former and new control groups and their associates with respect to election of directors or other matters should be described.

Item 7. Directors and executive officers. If action is to be taken with respect to the election of directors, furnish the following information in tabular form to the extent practicable. If, however, the solicitation is made on behalf of persons other than the registrant, the information required need be furnished only as to nominees of the persons making the solicitation.

(a) The information required by instruction 4 to Item 103 of Regulation S-K (§ 229.103 of this chapter) with respect to directors and executive officers.

(b) The information required by Items 401, 404(a) and (b), 405 and 407(d)(4) and (d)(5) of Regulation S-K (§ 229.401, § 229.404(a) and (b), § 229.405 and § 229.407(d)(4) and (d)(5) of this chapter).

(c) The information required by Item 407(a) of Regulation S-K (§ 229.407 of this chapter).

(d) The information required by Item 407(b), (c)(1), (c)(2), (d)(1), (d)(2), (d)(3), (e)(1), (e)(2), (e)(3) and (f) of Regulation S-K (§ 229.407(b), (c)(1), (c)(2), (d)(1), (d)(2), (d)(3), (e)(1), (e)(2), (e)(3) and (f) of this chapter).

(e) In lieu of the information required by this Item 7, investment companies registered under the Investment Company Act of 1940 (15 U.S.C. 80a) must furnish the information required by Item 22(b) of this Schedule 14A.

Item 8. Compensation of directors and executive officers.

Furnish the information required by Item 402 of Regulation S-K (§ 229.402 of this chapter) and paragraphs (e)(4) and (e)(5) of Item 407 of Regulation S-K (§ 229.407(e)(4) and (e)(5) of this chapter) if action is to be taken with regard to:

(a) The election of directors;

(b) Any bonus, profit sharing or other compensation plan, contract or arrangement in which any director, nominee for election as a director, or executive officer of the registrant will participate;

(c) Any pension or retirement plan in which any such person will participate; or

(d) The granting or extension to any such person of any options, warrants or rights to purchase any securities, other than warrants or rights issued to security holders as such, on a pro rata basis.

However, if the solicitation is made on behalf of persons other than the registrant, the information required need be furnished only as to nominees of the persons making the solicitation and associates of such nominees. In the case of investment companies registered under the Investment Company Act of 1940 (15 U.S.C. 80a), furnish the information required by Item 22(b)(13) of this Schedule 14A.

Instruction. If an otherwise reportable compensation plan became subject to such requirements because of an acquisition or merger and, within one year of the acquisition or merger, such plan was terminated for purposes of prospective eligibility, the registrant may furnish a description of its obligation to the designated individuals pursuant to the compensation plan. Such description may be furnished in lieu of a description of the compensation plan in the proxy statement.

Item 9. Independent public accountants. If the solicitation is made on behalf of the registrant and relates to: (1) The annual (or special meeting in lieu of annual) meeting of security holders at which directors are to be elected, or a solicitation of consents or authorizations in lieu of such meeting or (2) the election, approval or ratification of the registrant's accountant, furnish the following information describing the registrant's relationship with its independent public accountant:

(a) The name of the principal accountant selected or being recommended to security holders for election, approval or ratification for the current year. If no accountant has been selected or recommended, so state and briefly describe the reasons therefor.

(b) The name of the principal accountant for the fiscal year most recently completed if different from the accountant selected or recommended for the current year or if no accountant has yet been selected or recommended for the current year.

(c) The proxy statement shall indicate: (1) Whether or not representatives of the principal accountant for the current year and for the most recently completed fiscal year are expected to be present at the security holders' meeting, (2) whether or not they will have the opportunity to make a statement if they desire to do so, and (3) whether or not such representatives are expected to be available to respond to appropriate questions.

(d) If during the registrant's two most recent fiscal years or any subsequent interim period, (1) an independent accountant who was previously engaged as the principal accountant to audit the registrant's financial statements, or an independent accountant on whom the principal accountant expressed reliance in its report regarding a significant subsidiary, has resigned (or indicated it has declined to stand for re-election after the completion of the current audit) or was dismissed, or (2) a new independent accountant has been engaged as either the principal accountant to audit the registrant's financial statements or as an independent accountant on whom the principal accountant has expressed or is expected to express reliance in its report regarding a significant subsidiary, then, notwithstanding any previous disclosure, provide the information required by Item 304(a) of Regulation S-K (§ 229.304 of this chapter).

(e)

(1) Disclose, under the caption Audit Fees, the aggregate fees billed for each of the last two fiscal years for professional services rendered by the principal accountant for the audit of the registrant's annual financial statements and review of financial statements included in the registrant's Form 10-Q (*17 CFR 249.308a*) or services that are normally provided by the accountant in connection with statutory and regulatory filings or engagements for those fiscal years.

(2) Disclose, under the caption Audit-Related Fees, the aggregate fees billed in each of the last two fiscal years for assurance and related services by the principal accountant that are reasonably related to the performance of the audit or review of the registrant's financial statements and are not reported under paragraph (e)(1) of this section. Registrants shall describe the nature of the services comprising the fees disclosed under this category.

(3) Disclose, under the caption Tax Fees, the aggregate fees billed in each of the last two fiscal years for professional services rendered by the principal accountant for tax compliance, tax advice, and tax planning. Registrants shall describe the nature of the services comprising the fees disclosed under this category.

(4) Disclose, under the caption All Other Fees, the aggregate fees billed in each of the last two fiscal years for products and services provided by the principal accountant, other than the services reported in paragraphs (e)(1) through (e)(3) of this section. Registrants shall describe the nature of the services comprising the fees disclosed under this category.

(5)

(i) Disclose the audit committee's pre-approval policies and procedures described in *17 CFR 210.2-01(c)(7)(i)*.

(ii) Disclose the percentage of services described in each of paragraphs (e)(2) through (e)(4) of this section that were approved by the audit committee pursuant to *17 CFR 210.2-01(c)(7)(i)(C)*.

(6) If greater than 50 percent, disclose the percentage of hours expended on the principal accountant's engagement to audit the registrant's financial statements for the most recent fiscal year that were attributed to work performed by persons other than the principal accountant's full-time, permanent employees.

(7) If the registrant is an investment company, disclose the aggregate non-audit fees billed by the registrant's accountant for services rendered to the registrant, and to the registrant's investment adviser (not including any subadviser whose role is primarily portfolio management and is subcontracted with or overseen by another investment adviser), and any entity controlling, controlled by, or under common control with the adviser that provides ongoing services to the registrant for each of the last two fiscal years of the registrant.

(8) If the registrant is an investment company, disclose whether the audit committee of the board of directors has considered whether the provision of non-audit services that were rendered to the registrant's investment adviser (not including any subadviser whose role is primarily portfolio management and is subcontracted with or overseen by another investment adviser), and any entity controlling, controlled by, or under common control with the investment adviser that provides ongoing services to the registrant that were not pre-approved pursuant to *17 CFR 210.2-01(c)(7)(ii)* is compatible with maintaining the principal accountant's independence.

Instruction to Item 9(e).

For purposes of Item 9(e)(2), (3), and (4), registrants that are investment companies must disclose fees billed for services rendered to the registrant and separately, disclose fees required to be approved by the investment company registrant's audit committee pursuant to *17 CFR 210.2-01(c)(7)(ii)*. Registered investment companies must also disclose the fee percentages as required by item 9(e)(5)(ii) for the registrant and separately, disclose the fee percentages as required by item 9(e)(5)(ii) for the fees required to be approved by the investment company registrant's audit committee pursuant to *17 CFR 210.2-01(c)(7)(ii)*.

Item 10. Compensation Plans. If action is to be taken with respect to any plan pursuant to which cash or noncash compensation may be paid or distributed, furnish the following information:

(a) Plans subject to security holder action.

(1) Describe briefly the material features of the plan being acted upon, identify each class of persons who will be

eligible to participate therein, indicate the approximate number of persons in each such class, and state the basis of such participation.

(2)

(i) In the tabular format specified below, disclose the benefits or amounts that will be received by or allocated to each of the following under the plan being acted upon, if such benefits or amounts are determinable:

New Plan Benefits

Plan name _____

Name and position	Dollar value (]	Number of units
-------------------	-----------------	-----------------

CEO.

A.

B.

C.

D.

Executive Group.

Non-Executive Director Group.

Non-Executive Officer Employee Group.

(ii) The table required by paragraph (a)(2)(i) of this Item shall provide information as to the following persons:

(A) Each person (stating name and position) specified in paragraph (a)(3) of Item 402 of Regulation S-K (§ 229.402(a)(3) of this chapter);

Instruction: In the case of investment companies registered under the Investment Company Act of 1940, furnish the information for Compensated Persons as defined in Item 22(b)(13) of this Schedule in lieu of the persons specified in paragraph (a)(3) of Item 402 of Regulation S-K (§ 229.402(a)(3) of this chapter).

(B) All current executive officers as a group;

(C) All current directors who are not executive officers as a group; and

(D) All employees, including all current officers who are not executive officers, as a group.

Instruction to New Plan Benefits Table

Additional columns should be added for each plan with respect to which security holder action is to be taken.

(iii) If the benefits or amounts specified in paragraph (a)(2)(i) of this item are not determinable, state the benefits or amounts which would have been received by or allocated to each of the following for the last completed fiscal year if the plan had been in effect, if such benefits or amounts may be determined, in the table specified in paragraph (a)(2)(i) of this Item:

(A) Each person (stating name and position) specified in paragraph (a)(3) of Item 402 of Regulation S-K (§ 229.402(a)(3) of this chapter);

(B) All current executive officers as a group;

(C) All current directors who are not executive officers as a group; and

(D) All employees, including all current officers who are not executive officers, as a group.

(3) If the plan to be acted upon can be amended, otherwise than by a vote of security holders, to increase the cost thereof to the registrant or to alter the allocation of the benefits as between the persons and groups specified in paragraph (a)(2) of this item, state the nature of the amendments which can be so made.

(b)

(1) Additional information regarding specified plans subject to security holder action. With respect to any pension or retirement plan submitted for security holder action, state:

(i) The approximate total amount necessary to fund the plan with respect to past services, the period over which such amount is to be paid and the estimated annual payments necessary to pay the total amount over such period; and

(ii) The estimated annual payment to be made with respect to current services. In the case of a pension or retirement plan, information called for by paragraph (a)(2) of this Item may be furnished in the format specified by

paragraph (h)(2) of Item 402 of Regulation S-K (§ 229.402(h)(2) of this chapter).

Instruction to paragraph (b)(1)(ii).

In the case of investment companies registered under the Investment Company Act of 1940 (15 U.S.C. 80a), refer to Instruction 4 in Item 22(b)(13)(i) of this Schedule in lieu of paragraph (h)(2) of Item 402 of Regulation S-K (§ 229.402(h)(2) of this chapter).

(2)

(i) With respect to any specific grant of or any plan containing options, warrants or rights submitted for security holder action, state:

(A) The title and amount of securities underlying such options, warrants or rights;

(B) The prices, expiration dates and other material conditions upon which the options, warrants or rights may be exercised;

(C) The consideration received or to be received by the registrant or subsidiary for the granting or extension of the options, warrants or rights;

(D) The market value of the securities underlying the options, warrants, or rights as of the latest practicable date; and

(E) In the case of options, the federal income tax consequences of the issuance and exercise of such options to the recipient and the registrant; and

(ii) State separately the amount of such options received or to be received by the following persons if such benefits or amounts are determinable:

(A) Each person (stating name and position) specified in paragraph (a)(3) of Item 402 of Regulation S-K (§ 229.402(a)(3) of this chapter);

(B) All current executive officers as a group;

- (C) All current directors who are not executive officers as a group;
- (D) Each nominee for election as a director;
- (E) Each associate of any of such directors, executive officers or nominees;
- (F) Each other person who received or is to receive 5 percent of such options, warrants or rights; and
- (G) All employees, including all current officers who are not executive officers, as a group.

(c) Information regarding plans and other arrangements not subject to security holder action. Furnish the information required by Item 201(d) of Regulation S-K (§ 229.201(d) of this chapter).

Instructions to paragraph (c).

1. If action is to be taken as described in paragraph (a) of this Item with respect to the approval of a new compensation plan under which equity securities of the registrant are authorized for issuance, information about the plan shall be disclosed as required under paragraphs (a) and (b) of this Item and shall not be included in the disclosure required by Item 201(d) of Regulation S-K (§ 229.201(d) of this chapter). If action is to be taken as described in paragraph (a) of this Item with respect to the amendment or modification of an existing plan under which equity securities of the registrant are authorized for issuance, the registrant shall include information about securities previously authorized for issuance under the plan (including any outstanding options, warrants and rights previously granted pursuant to the plan and any securities remaining available for future issuance under the plan) in the disclosure required by Item 201(d) of Regulation S-K (§ 229.201(d) of this chapter). Any additional securities that are the subject of the amendments or modification of the existing plan shall be disclosed as required under paragraphs (a) and (b) of this Item and shall not be included in the Item 201(d) disclosure.

Instructions

1. The term plan as used in this Item means any plan as defined in paragraph (a)(6)(ii) of Item 402 of Regulation S-K (§ 229.402(a)(6)(ii) of this chapter).

2. If action is to be taken with respect to a material amendment or modification of an existing plan, the item shall be answered with respect to the plan as proposed to be amended or modified and shall indicate any material differences from the existing plan.

3. If the plan to be acted upon is set forth in a written document, three copies thereof shall be filed with the Commission at the time copies of the proxy statement and form of proxy are first filed pursuant to paragraph (a) or (b) of § 240.14a-6. Electronic filers shall file with the Commission a copy of such written plan document in electronic format as an appendix to the proxy statement. It need not be provided to security holders unless it is a part of the proxy

statement.

4. Paragraph (b)(2)(ii) does not apply to warrants or rights to be issued to security holders as such on a pro rata basis.

5. The Commission shall be informed, as supplemental information, when the proxy statement is first filed, as to when the options, warrants or rights and the shares called for thereby will be registered under the Securities Act or, if such registration is not contemplated, the section of the Securities Act or rule of the Commission under which exemption from such registration is claimed and the facts relied upon to make the exemption available.

Item 11. Authorization or issuance of securities otherwise than for exchange. If action is to be taken with respect to the authorization or issuance of any securities otherwise than for exchange for outstanding securities of the registrant, furnish the following information:

(a) State the title and amount of securities to be authorized or issued.

(b) Furnish the information required by Item 202 of Regulation S-K (§ 229.202 of this chapter). If the terms of the securities cannot be stated or estimated with respect to any or all of the securities to be authorized, because no offering thereof is contemplated in the proximate future, and if no further authorization by security holders for the issuance thereof is to be obtained, it should be stated that the terms of the securities to be authorized, including dividend or interest rates, conversion prices, voting rights, redemption prices, maturity dates, and similar matters will be determined by the board of directors. If the securities are additional shares of common stock of a class outstanding, the description may be omitted except for a statement of the preemptive rights, if any. Where the statutory provisions with respect to preemptive rights are so indefinite or complex that they cannot be stated in summarized form, it will suffice to make a statement in the form of an opinion of counsel as to the existence and extent of such rights.

(c) Describe briefly the transaction in which the securities are to be issued including a statement as to (1) the nature and approximate amount of consideration received or to be received by the registrant and (2) the approximate amount devoted to each purpose so far as determinable for which the net proceeds have been or are to be used. If it is impracticable to describe the transaction in which the securities are to be issued, state the reason, indicate the purpose of the authorization of the securities, and state whether further authorization for the issuance of the securities by a vote of security holders will be solicited prior to such issuance.

(d) If the securities are to be issued otherwise than in a public offering for cash, state the reasons for the proposed authorization or issuance and the general effect thereof upon the rights of existing security holders.

(e) Furnish the information required by Item 13(a) of this schedule.

Item 12. Modification or exchange of securities. If action is to be taken with respect to the modification of any class of securities of the registrant, or the issuance or authorization for issuance of securities of the registrant in exchange for outstanding securities of the registrant furnish the following information:

(a) If outstanding securities are to be modified, state the title and amount thereof. If securities are to be issued in exchange for outstanding securities, state the title and amount of securities to be so issued, the title and amount of outstanding securities to be exchanged therefor and the basis of the exchange.

(b) Describe any material differences between the outstanding securities and the modified or new securities in respect of any of the matters concerning which information would be required in the description of the securities in Item 202 of Regulation S-K (§ 229.202 of this chapter).

(c) State the reasons for the proposed modification or exchange and the general effect thereof upon the rights of existing security holders.

(d) Furnish a brief statement as to arrears in dividends or as to defaults in principal or interest in respect to the outstanding securities which are to be modified or exchanged and such other information as may be appropriate in the particular case to disclose adequately the nature and effect of the proposed action.

(e) Outline briefly any other material features of the proposed modification or exchange. If the plan of proposed action is set forth in a written document, file copies thereof with the Commission in accordance with § 240.14a-6.

(f) Furnish the information required by Item 13(a) of this Schedule.

Instruction. If the existing security is presently listed and registered on a national securities exchange, state whether the registrant intends to apply for listing and registration of the new or reclassified security on such exchange or any other exchange. If the registrant does not intend to make such application, state the effect of the termination of such listing and registration.

Item 13. Financial and other information. (See Notes D and E at the beginning of this Schedule.)

(a) Information required. If action is to be taken with respect to any matter specified in Item 11 or 12, furnish the following information:

(1) Financial statements meeting the requirements of Regulation S-X, including financial information required by Rule 3-05 and Article 11 of Regulation S-X with respect to transactions other than pursuant to which action is to be taken as described in this proxy statement (A smaller reporting company may provide the information in Rules 8-04 and 8-05 of Regulation S-X (§ 210.8-04 and § 210.8-05 of this chapter) in lieu of the financial information required by Rule 3-05 and Article 11 of Regulation S-X);

(2) Item 302 of Regulation S-K, supplementary financial information;

(3) Item 303 of Regulation S-K, management's discussion and analysis of financial condition and results of operations;

(4) Item 304 of Regulation S-K, changes in and disagreements with accountants on accounting and financial disclosure;

(5) Item 305 of Regulation S-K, quantitative and qualitative disclosures about market risk; and

(6) A statement as to whether or not representatives of the principal accountants for the current year and for the most recently completed fiscal year:

(i) Are expected to be present at the security holders' meeting;

(ii) Will have the opportunity to make a statement if they desire to do so; and

(iii) Are expected to be available to respond to appropriate questions.

(b) Incorporation by reference. The information required pursuant to paragraph (a) of this Item may be incorporated by reference into the proxy statement as follows:

(1) S-3 registrants. If the registrant meets the requirements of Form S-3 (see Note E to this Schedule), it may incorporate by reference to previously-filed documents any of the information required by paragraph (a) of this Item, provided that the requirements of paragraph (c) are met. Where the registrant meets the requirements of Form S-3 and has elected to furnish the required information by incorporation by reference, the registrant may elect to update the

information so incorporated by reference to information in subsequently-filed documents.

(2) All registrants. The registrant may incorporate by reference any of the information required by paragraph (a) of this Item, provided that the information is contained in an annual report to security holders or a previously-filed statement or report, such report or statement is delivered to security holders with the proxy statement and the requirements of paragraph (c) are met.

(c) Certain conditions applicable to incorporation by reference. Registrants eligible to incorporate by reference into the proxy statement the information required by paragraph (a) of this Item in the manner specified by paragraphs (b)(1) and (b)(2) may do so only if:

(1) The information is not required to be included in the proxy statement pursuant to the requirement of another Item;

(2) The proxy statement identifies on the last page(s) the information incorporated by reference; and

(3) The material incorporated by reference substantially meets the requirements of this Item or the appropriate portions of this Item.

Instructions to Item 13.

1. Notwithstanding the provisions of this Item, any or all of the information required by paragraph (a) of this Item not material for the exercise of prudent judgment in regard to the matter to be acted upon may be omitted. In the usual case the information is deemed material to the exercise of prudent judgment where the matter to be acted upon is the authorization or issuance of a material amount of senior securities, but the information is not deemed material where the matter to be acted upon is the authorization or issuance of common stock, otherwise than in an exchange, merger, consolidation, acquisition or similar transaction, the authorization of preferred stock without present intent to issue or the authorization of preferred stock for issuance for cash in an amount constituting fair value.

2. In order to facilitate compliance with Rule 2-02(a) of Regulation S-X, one copy of the definitive proxy statement filed with the Commission shall include a manually signed copy of the accountant's report. If the financial statements are incorporated by reference, a manually signed copy of the accountant's report shall be filed with the definitive proxy statement.

3. Notwithstanding the provisions of Regulation S-X, no schedules other than those prepared in accordance with Rules 12-15, 12-28 and 12-29 (or, for management investment companies, Rules 12-12 through 12-14) of that regulation need be furnished in the proxy statement.

4. Unless registered on a national securities exchange or otherwise required to furnish such information, registered investment companies need not furnish the information required by paragraph (a)(2) or (3) of this Item.

5. If the registrant submits preliminary proxy material incorporating by reference financial statements required by

this Item, the registrant should furnish a draft of the financial statements if the document from which they are incorporated has not been filed with or furnished to the Commission.

6. A registered investment company need not comply with items (a)(2), (a)(3), and (a)(5) of this Item 13.

Item 14. Mergers, consolidations, acquisitions and similar matters. (See Notes A and D at the beginning of this Schedule.)

Instructions to Item 14.

1. In transactions in which the consideration offered to security holders consists wholly or in part of securities registered under the Securities Act of 1933, furnish the information required by Form S-4 (§ 239.25 of this chapter), Form F-4 (§ 239.34 of this chapter), or Form N-14 (§ 239.23 of this chapter), as applicable, instead of this Item. Only a Form S-4, Form F-4, or Form N-14 must be filed in accordance with § 240.14a-6(j).

2. (a) In transactions in which the consideration offered to security holders consists wholly of cash, the information required by paragraph (c)(1) of this Item for the acquiring company need not be provided unless the information is material to an informed voting decision (e.g., the security holders of the target company are voting and financing is not assured).

(b) Additionally, if only the security holders of the target company are voting:

i. The financial information in paragraphs (b)(8)-(11) of this Item for the acquiring company and the target need not be provided; and

ii. The information in paragraph (c)(2) of this Item for the target company need not be provided.

If, however, the transaction is a going-private transaction (as defined by § 240.13e-3), then the information required by paragraph (c)(2) of this Item must be provided and to the extent that the going-private rules require the information specified in paragraph (b)(8)-(b)(11) of this Item, that information must be provided as well.

3. In transactions in which the consideration offered to security holders consists wholly of securities exempt from registration under the Securities Act of 1933 or a combination of exempt securities and cash, information about the acquiring company required by paragraph (c)(1) of this Item need not be provided if only the security holders of the acquiring company are voting, unless the information is material to an informed voting decision. If only the security holders of the target company are voting, information about the target company in paragraph (c)(2) of this Item need not be provided. However, the information required by paragraph (c)(2) of this Item must be provided if the transaction is a going-private (as defined by § 240.13e-3) or roll-up (as described by Item 901 of Regulation S-K (§ 229.901 of this chapter)) transaction.

4. The information required by paragraphs (b)(8)-(11) and (c) need not be provided if the plan being voted on involves only the acquiring company and one or more of its totally held subsidiaries and does not involve a liquidation or a spin-off.

5. To facilitate compliance with Rule 2-02(a) of Regulation S-X (§ 210.2-02(a) of this chapter) (technical requirements relating to accountants' reports), one copy of the definitive proxy statement filed with the Commission must include a signed copy of the accountant's report. If the financial statements are incorporated by reference, a signed copy of the accountant's report must be filed with the definitive proxy statement. Signatures may be typed if the document is filed electronically on EDGAR. See Rule 302 of Regulation S-T (§ 232.302 of this chapter).

6. Notwithstanding the provisions of Regulation S-X, no schedules other than those prepared in accordance with § 210.12-15, § 210.12-28 and § 210.12-29 of this chapter (or, for management investment companies, § § 210.12-12 through 210.12-14 of this chapter) of that regulation need be furnished in the proxy statement.

7. If the preliminary proxy material incorporates by reference financial statements required by this Item, a draft of the financial statements must be furnished to the Commission staff upon request if the document from which they are incorporated has not been filed with or furnished to the Commission.

(a) Applicability. If action is to be taken with respect to any of the following transactions, provide the information required by this Item:

(1) Summary term sheet. The information required by Item 1001 of Regulation M-A (§ 229.1001 of this chapter).

(2) Contact information. The name, complete mailing address and telephone number of the principal executive offices.

(3) Business conducted. A brief description of the general nature of the business conducted.

(4) Terms of the transaction. The information required by Item 1004(a)(2) of Regulation M-A (§ 229.1004 of this chapter).

(5) Regulatory approvals. A statement as to whether any federal or state regulatory requirements must be complied with or approval must be obtained in connection with the transaction and, if so, the status of the compliance or approval.

(6) Reports, opinions, appraisals. If a report, opinion or appraisal materially relating to the transaction has been received from an outside party, and is referred to in the proxy statement, furnish the information required by Item 1015(b) of Regulation M-A (§ 229.1015 of this chapter).

(7) Past contacts, transactions or negotiations. The information required by Items 1005(b) and 1011(a)(1) of Regulation M-A (§ 229.1005 of this chapter and § 229.1011 of this chapter), for the parties to the transaction and their affiliates during the periods for which financial statements are presented or incorporated by reference under this Item.

(8) Selected financial data. The selected financial data required by Item 301 of Regulation S-K (§ 229.301 of this chapter).

(9) Pro forma selected financial data. If material, the information required by Item 301 of Regulation S-K (§ 229.301 of this chapter) for the acquiring company, showing the pro forma effect of the transaction.

(10) Pro forma information. In a table designed to facilitate comparison, historical and pro forma per share data of the acquiring company and historical and equivalent pro forma per share data of the target company for the following Items:

(i) Book value per share as of the date financial data is presented pursuant to Item 301 of Regulation S-K (§ 229.301 of this chapter);

(ii) Cash dividends declared per share for the periods for which financial data is presented pursuant to Item 301 of Regulation S-K (§ 229.301 of this chapter); and

(iii) Income (loss) per share from continuing operations for the periods for which financial data is presented pursuant to Item 301 of Regulation S-K (§ 229.301 of this chapter).

Instructions to paragraphs (b)(8), (b)(9) and (b)(10):

1. For a business combination accounted for as a purchase, present the financial information required by paragraphs (b)(9) and (b)(10) only for the most recent fiscal year and interim period. For a business combination accounted for as a pooling, present the financial information required by paragraphs (b)(9) and (b)(10) (except for information with regard to book value) for the most recent three fiscal years and interim period. For purposes of these paragraphs, book value information need only be provided for the most recent balance sheet date.

2. Calculate the equivalent pro forma per share amounts for one share of the company being acquired by multiplying the exchange ratio times each of:

(i) The pro forma income (loss) per share before non-recurring charges or credits directly attributable to the transaction;

(ii) The pro forma book value per share; and

(iii) The pro forma dividends per share of the acquiring company.

3. Unless registered on a national securities exchange or otherwise required to furnish such information, registered investment companies need not furnish the information required by paragraphs (b)(8) and (b)(9) of this Item.

(11) Financial information. If material, financial information required by Article 11 of Regulation S-X (§ § 210.10-01 through 229.11-03 of this chapter) with respect to this transaction.

Instructions to paragraph (b)(11):

1. Present any Article 11 information required with respect to transactions other than those being voted upon (where not incorporated by reference) together with the pro forma information relating to the transaction being voted upon. In presenting this information, you must clearly distinguish between the transaction being voted upon and any other transaction.

2. If current pro forma financial information with respect to all other transactions is incorporated by reference, you need only present the pro forma effect of this transaction.

(c) Information about the parties to the transaction.

(1) Acquiring company. Furnish the information required by Part B (Registrant Information) of Form S-4 (§ 239.25 of this chapter) or Form F-4 (§ 239.34 of this chapter), as applicable, for the acquiring company. However, financial statements need only be presented for the latest two fiscal years and interim periods.

(2) Acquired company. Furnish the information required by Part C (Information with Respect to the Company Being Acquired) of Form S-4 (§ 239.25 of this chapter) or Form F-4 (§ 239.34 of this chapter), as applicable.

(d) Information about parties to the transaction: registered investment companies and business development companies. If the acquiring company or the acquired company is an investment company registered under the Investment Company Act of 1940 or a business development company as defined by Section 2(a)(48) of the Investment Company Act of 1940, provide the following information for that company instead of the information specified by paragraph (c) of this Item:

(1) Information required by Item 101 of Regulation S-K (§ 229.101 of this chapter), description of business;

(2) Information required by Item 102 of Regulation S-K (§ 229.102 of this chapter), description of property;

(3) Information required by Item 103 of Regulation S-K (§ 229.103 of this chapter), legal proceedings;

(4) Information required by Item 201(a), (b) and (c) of Regulation S-K (§ 229.201(a), (b) and (c) of this chapter), market price of and dividends on the registrant's common equity and related stockholder matters;

(5) Financial statements meeting the requirements of Regulation S-X, including financial information required by Rule 3-05 and Article 11 of Regulation S-X (§ 210.3-05 and § 210.11-01 through § 210.11-03 of this chapter) with respect to transactions other than that as to which action is to be taken as described in this proxy statement;

(6) Information required by Item 301 of Regulation S-K (§ 229.301 of this chapter), selected financial data;

(7) Information required by Item 302 of Regulation S-K (§ 229.302 of this chapter), supplementary financial information;

(8) Information required by Item 303 of Regulation S-K (§ 229.303 of this chapter), management's discussion and analysis of financial condition and results of operations; and

(9) Information required by Item 304 of Regulation S-K (§ 229.304 of this chapter), changes in and disagreements with accountants on accounting and financial disclosure.

Instruction to paragraph (d) of Item 14: Unless registered on a national securities exchange or otherwise required to furnish such information, registered investment companies need not furnish the information required by paragraphs (d)(6), (d)(7) and (d)(8) of this Item.

(e) Incorporation by reference.

(1) The information required by paragraph (c) of this section may be incorporated by reference into the proxy statement to the same extent as would be permitted by Form S-4 (§ 239.25 of this chapter) or Form F-4 (§ 239.34 of this chapter), as applicable.

(2) Alternatively, the registrant may incorporate by reference into the proxy statement the information required by paragraph (c) of this Item if it is contained in an annual report sent to security holders in accordance with § 240.14a-3 of this chapter with respect to the same meeting or solicitation of consents or authorizations that the proxy statement relates to and the information substantially meets the disclosure requirements of Item 14 or Item 17 of Form S-4 (§ 239.25 of this chapter) or Form F-4 (§ 239.34 of this chapter), as applicable.

Item 15. Acquisition or disposition of property. If action is to be taken with respect to the acquisition or disposition of any property, furnish the following information:

(a) Describe briefly the general character and location of the property.

(b) State the nature and amount of consideration to be paid or received by the registrant or any subsidiary. To the extent practicable, outline briefly the facts bearing upon the question of the fairness of the consideration.

(c) State the name and address of the transferor or transferee, as the case may be and the nature of any material relationship of such person to the registrant or any affiliate of the registrant.

(d) Outline briefly any other material features of the contract or transaction.

Item 16. Restatement of accounts. If action is to be taken with respect to the restatement of any asset, capital, or surplus account of the registrant furnish the following information:

(a) State the nature of the restatement and the date as of which it is to be effective.

(b) Outline briefly the reasons for the restatement and for the selection of the particular effective date.

(c) State the name and amount of each account (including any reserve accounts) affected by the restatement and the effect of the restatement thereon. Tabular presentation of the amounts shall be made when appropriate, particularly in the case of recapitalizations.

(d) To the extent practicable, state whether and the extent, if any, to which, the restatement will, as of the date thereof, alter the amount available for distribution to the holders of equity securities.

Item 17. Action with respect to reports. If action is to be taken with respect to any report of the registrant or of its directors, officers or committees or any minutes of a meeting of its security holders, furnish the following information:

(a) State whether or not such action is to constitute approval or disapproval of any of the matters referred to in such reports or minutes.

(b) Identify each of such matters which it is intended will be approved or disapproved, and furnish the information required by the appropriate item or items of this schedule with respect to each such matter.

Item 18. Matters not required to be submitted. If action is to be taken with respect to any matter which is not required to be submitted to a vote of security holders, state the nature of such matter, the reasons for submitting it to a vote of security holders and what action is intended to be taken by the registrant in the event of a negative vote on the matter by the security holders.

Item 19. Amendment of character, bylaws or other documents. If action is to be taken with respect to any amendment of the registrant's charter, bylaws or other documents as to which information is not required above, state briefly the reasons for and the general effect of such amendment.

Instructions.

1. Where the matter to be acted upon is the classification of directors, state whether vacancies which occur during the year may be filled by the board of directors to serve only until the next annual meeting or may be so filled for the remainder of the full term.

2. Attention is directed to the discussion of disclosure regarding anti-takeover and similar proposals in Release No. 34-15230 (October 13, 1978).

Item 20. Other proposed action. If action is to be taken on any matter not specifically referred to in this Schedule 14A, describe briefly the substance of each such matter in substantially the same degree of detail as is required by Items 5 to 19, inclusive, of this Schedule, and, with respect to investment companies registered under the Investment Company Act of 1940, Item 22 of this Schedule.

Item 21. Voting Procedures. As to each matter which is to be submitted to a vote of security holders, furnish the following information:

(a) State the vote required for approval or election, other than for the approval of auditors.

(b) Disclose the method by which votes will be counted, including the treatment and effect of abstentions and broker non-votes under applicable state law as well as registrant charter and by-law provisions.

Item 22. Information required in investment company proxy statement.

(a) General.

(1) Definitions. Unless the context otherwise requires, terms used in this Item that are defined in § 240.14a-1 (with respect to proxy soliciting material), in § 240.14c-1 (with respect to information statements), and in the Investment Company Act of 1940 shall have the same meanings provided therein and the following terms shall also apply:

(i) Administrator. The term "Administrator" shall mean any person who provides significant administrative or business affairs management services to a Fund.

(ii) Affiliated broker. The term "Affiliated Broker" shall mean any broker:

(A) That is an affiliated person of the Fund;

(B) That is an affiliated person of such person; or

(C) An affiliated person of which is an affiliated person of the Fund, its investment adviser, principal underwriter, or Administrator.

(iii) Distribution plan. The term "Distribution Plan" shall mean a plan adopted pursuant to Rule 12b-1 under the Investment Company Act of 1940 (§ 270.12b-1 of this chapter).

(iv) Family of Investment Companies. The term "Family of Investment Companies" shall mean any two or more registered investment companies that:

(A) Share the same investment adviser or principal underwriter; and

(B) Hold themselves out to investors as related companies for purposes of investment and investor services.

(v) Fund. The term "Fund" shall mean a Registrant or, where the Registrant is a series company, a separate portfolio of the Registrant.

(vi) Fund complex. The term "Fund Complex" shall mean two or more Funds that:

(A) Hold themselves out to investors as related companies for purposes of investment and investor services; or

(B) Have a common investment adviser or have an investment adviser that is an affiliated person of the investment adviser of any of the other Funds.

(vii) Immediate Family Member. The term "Immediate Family Member" shall mean a person's spouse; child residing in the person's household (including step and adoptive children); and any dependent of the person, as defined in *section 152 of the Internal Revenue Code (26 U.S.C. 152)*.

(viii) Officer. The term "Officer" shall mean the president, vice-president, secretary, treasurer, controller, or any other officer who performs policy-making functions.

(ix) Parent. The term "Parent" shall mean the affiliated person of a specified person who controls the specified person directly or indirectly through one or more intermediaries.

(x) Registrant. The term "Registrant" shall mean an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a) or a business development company as defined by section 2(a)(48) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(48)*).

(xi) Sponsoring Insurance Company. The term "Sponsoring Insurance Company" of a Fund that is a separate account shall mean the insurance company that establishes and maintains the separate account and that owns the assets of the separate account.

(xii) Subsidiary. The term "Subsidiary" shall mean an affiliated person of a specified person who is controlled by the specified person directly, or indirectly through one or more intermediaries.

(2) [Reserved.]

(3) General disclosure. Furnish the following information in the proxy statement of a Fund or Funds:

(i) State the name and address of the Fund's investment adviser, principal underwriter, and Administrator.

(ii) When a Fund proxy statement solicits a vote on proposals affecting more than one Fund or class of securities of a Fund (unless the proposal or proposals are the same and affect all Fund or class shareholders), present a summary of all of the proposals in tabular form on one of the first three pages of the proxy statement and indicate which Fund or class shareholders are solicited with respect to each proposal.

(iii) Unless the proxy statement is accompanied by a copy of the Fund's most recent annual report, state prominently in the proxy statement that the Fund will furnish, without charge, a copy of the annual report and the most recent semi-annual report succeeding the annual report, if any, to a shareholder upon request, providing the name, address, and toll-free telephone number of the person to whom such request shall be directed (or, if no toll-free telephone number is provided, a self-addressed postage paid card for requesting the annual report). The Fund should provide a copy of the annual report and the most recent semi-annual report succeeding the annual report, if any, to the requesting shareholder by first class mail, or other means designed to assure prompt delivery, within three business days of the request.

(iv) If the action to be taken would, directly or indirectly, establish a new fee or expense or increase any existing fee or expense to be paid by the Fund or its shareholders, provide a table showing the current and pro forma fees (with the required examples) using the format prescribed in the appropriate registration statement form under the Investment Company Act of 1940 (for open-end management investment companies, Item 3 of Form N-1A (§ 239.15A); for closed-end management investment companies, Item 3 of Form N-2 (§ 239.14); and for separate accounts that offer variable annuity contracts, Item 3 of Form N-3 (§ 239.17a)).

Instructions. 1. Where approval is sought only for a change in asset breakpoints for a pre-existing fee that would not have increased the fee for the previous year (or have the effect of increasing fees or expenses, but for any other reason would not be reflected in a pro forma fee table), describe the likely effect of the change in lieu of providing pro forma fee information.

2. An action would indirectly establish or increase a fee or expense where, for example, the approval of a new investment advisory contract would result in higher custodial or transfer agency fees.

3. The tables should be prepared in a manner designed to facilitate understanding of the impact of any change in fees or expenses.

4. A Fund that offers its shares exclusively to one or more separate accounts and thus is not required to include a fee table in its prospectus (see Item 3 of Form N-1A (§ 239.15A)) should nonetheless prepare a table showing current and pro forma expenses and disclose that the table does not reflect separate account expenses, including sales load.

(v) If action is to be taken with respect to the election of directors or the approval of an advisory contract, describe any purchases or sales of securities of the investment adviser or its Parents, or Subsidiaries of either, since the beginning of the most recently completed fiscal year by any director or any nominee for election as a director of the Fund.

Instructions.

1. Identify the parties, state the consideration, the terms of payment and describe any arrangement or understanding with respect to the composition of the board of directors of the Fund or of the investment adviser, or with respect to the selection of appointment of any person to any office with either such company.

2. Transactions involving securities in an amount not exceeding one percent of the outstanding securities of any class of the investment adviser or any of its Parents or Subsidiaries may be omitted.

(b) Election of Directors. If action is to be taken with respect to the election of directors of a Fund, furnish the following information in the proxy statement in addition to, in the case of business development companies, the information (and in the format) required by Item 7 and Item 8 of this Schedule 14A.

Instructions to introductory text of paragraph (b).

1. Furnish information with respect to a prospective investment adviser to the extent applicable.

2. If the solicitation is made by or on behalf of a person other than the Fund or an investment adviser of the Fund, provide information only as to nominees of the person making the solicitation.

3. When providing information about directors and nominees for election as directors in response to this Item 22(b), furnish information for directors or nominees who are or would be "interested persons" of the Fund within the meaning of section 2(a)(19) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(19)*) separately from the information for directors or nominees who are not or would not be interested persons of the Fund. For example, when furnishing information in a table, you should provide separate tables (or separate sections of a single table) for directors and nominees who are or would be interested persons and for directors or nominees who are not or would not be interested persons. When furnishing information in narrative form, indicate by heading or otherwise the directors or nominees who are or would be interested persons and the directors or nominees who are not or would not be interested persons.

4. No information need be given about any director whose term of office as a director will not continue after the meeting to which the proxy statement relates.

(1) Provide the information required by the following table for each director, nominee for election as director, Officer of the Fund, person chosen to become an Officer of the Fund, and, if the Fund has an advisory board, member of the board. Explain in a footnote to the table any family relationship between the persons listed.

(1)	(2)	(3)	(4)	(5)	(6)
Name, Address, and Age	Position(s) Held with Fund	Term of Office and Length of Time Served	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Director or Nominee Director	Other Directorships Held by Director or Nominee for Director

Instructions to paragraph (b)(1).

1. For purposes of this paragraph, the term "family relationship" means any relationship by blood, marriage, or adoption, not more remote than first cousin.

2. No nominee or person chosen to become a director or Officer who has not consented to act as such may be named in response to this Item. In this regard, see Rule 14a-4(d) under the Exchange Act (§ 240.14a-4(d)).

3. If fewer nominees are named than the number fixed by or pursuant to the governing instruments, state the reasons for this procedure and that the proxies cannot be voted for a greater number of persons than the number of nominees named.

4. For each director or nominee for election as director who is or would be an "interested person" of the Fund within the meaning of section 2(a)(19) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(19)*), describe, in a footnote or otherwise, the relationship, events, or transactions by reason of which the director or nominee is or would be an interested person.

5. State the principal business of any company listed under column (4) unless the principal business is implicit in its name.

6. Include in column (5) the total number of separate portfolios that a nominee for election as director would oversee if he were elected.

7. Indicate in column (6) directorships not included in column (5) that are held by a director or nominee for election as director in any company with a class of securities registered pursuant to section 12 of the Exchange Act (*15 U.S.C. 78l*), or subject to the requirements of section 15(d) of the Exchange Act (*15 U.S.C. 78o(d)*), or any company registered as an investment company under the Investment Company Act of 1940, (*15 U.S.C. 80a*), as amended, and name the companies in which the directorships are held. Where the other directorships include directorships overseeing two or more portfolios in the same Fund Complex, identify the Fund Complex and provide the number of portfolios overseen as a director in the Fund Complex rather than listing each portfolio separately.

(2) For each individual listed in column (1) of the table required by paragraph (b)(1) of this Item, except for any director or nominee for election as director who is not or would not be an "interested person" of the Fund within the meaning of section 2(a)(19) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(19)*), describe any positions, including as an officer, employee, director, or general partner, held with affiliated persons or principal underwriters of the Fund.

Instruction to paragraph (b)(2). When an individual holds the same position(s) with two or more registered investment companies that are part of the same Fund Complex, identify the Fund Complex and provide the number of registered investment companies for which the position(s) are held rather than listing each registered investment company separately.

(3) Describe briefly any arrangement or understanding between any director, nominee for election as director, Officer, or person chosen to become an Officer, and any other person(s) (naming the person(s)) pursuant to which he was or is to be selected as a director, nominee, or Officer.

Instruction to paragraph (b)(3). Do not include arrangements or understandings with directors or Officers acting solely in their capacities as such.

(4) Unless disclosed in the table required by paragraph (b)(1) of this Item, describe any positions, including as an officer, employee, director, or general partner, held by any director or nominee for election as director, who is not or would not be an "interested person" of the Fund within the meaning of section 2(a)(19) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(19)*), or Immediate Family Member of the director or nominee, during the past five years, with:

(i) The Fund;

(ii) An investment company, or a person that would be an investment company but for the exclusions provided by sections 3(c)(1) and 3(c)(7) of the Investment Company Act of 1940 (*15 U.S.C. 80a-3(c)(1)* and *(c)(7)*), having the same investment adviser, principal underwriter, or Sponsoring Insurance Company as the Fund or having an investment adviser, principal underwriter, or Sponsoring Insurance Company that directly or indirectly controls, is controlled by, or is under common control with an investment adviser, principal underwriter, or Sponsoring Insurance Company of the Fund;

(iii) An investment adviser, principal underwriter, Sponsoring Insurance Company, or affiliated person of the Fund; or

(iv) Any person directly or indirectly controlling, controlled by, or under common control with an investment adviser, principal underwriter, or Sponsoring Insurance Company of the Fund.

Instruction to paragraph (b)(4). When an individual holds the same position(s) with two or more portfolios that are part of the same Fund Complex, identify the Fund Complex and provide the number of portfolios for which the position(s) are held rather than listing each portfolio separately.

(5) For each director or nominee for election as director, state the dollar range of equity securities beneficially owned by the director or nominee as required by the following table:

(i) In the Fund; and

(ii) On an aggregate basis, in any registered investment companies overseen or to be overseen by the director or nominee within the same Family of Investment Companies as the Fund.

(1)	(2)	(3)
Name of Director or Nominee	Dollar Range of Equity Securities in the Fund	Aggregate Dollar Range of Equity Securities in All Funds Overseen or to be Overseen by Direct-

or or Nominee in Family of Investment Companies

Instructions to paragraph (b)(5).

1. Information should be provided as of the most recent practicable date. Specify the valuation date by footnote or otherwise.

2. Determine "beneficial ownership" in accordance with rule 16a-1(a)(2) under the Exchange Act (§ 240.16a-1(a)(2)).

3. If action is to be taken with respect to more than one Fund, disclose in column (2) the dollar range of equity securities beneficially owned by a director or nominee in each such Fund overseen or to be overseen by the director or nominee.

4. In disclosing the dollar range of equity securities beneficially owned by a director or nominee in columns (2) and (3), use the following ranges: none, \$1-\$10,000, \$10,001-\$50,000, \$50,001-\$100,000, or over \$100,000.

(6) For each director or nominee for election as director who is not or would not be an "interested person" of the Fund within the meaning of section 2(a)(19) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(19)*), and his Immediate Family Members, furnish the information required by the following table as to each class of securities owned beneficially or of record in:

(i) An investment adviser, principal underwriter, or Sponsoring Insurance Company of the Fund; or

(ii) A person (other than a registered investment company) directly or indirectly controlling, controlled by, or under common control with an investment adviser, principal underwriter, or Sponsoring Insurance Company of the Fund:

(1)	(2)	(3)	(4)	(5)	(6)
Name of Director or Nominee	Name of Owners and Relationships to Director or Nominee	Company	Title of Class	Value of Securities	Percent of Class

Instructions to paragraph (b)(6).

1. Information should be provided as of the most recent practicable date. Specify the valuation date by footnote or otherwise.

2. An individual is a "beneficial owner" of a security if he is a "beneficial owner" under either rule 13d-3 or rule 16a-1(a)(2) under the Exchange Act (§ § 240.13d-3 or 240.16a-1(a)(2)).

3. Identify the company in which the director, nominee, or Immediate Family Member of the director or nominee owns securities in column (3). When the company is a person directly or indirectly controlling, controlled by, or under

common control with an investment adviser, principal underwriter, or Sponsoring Insurance Company, describe the company's relationship with the investment adviser, principal underwriter, or Sponsoring Insurance Company.

4. Provide the information required by columns (5) and (6) on an aggregate basis for each director (or nominee) and his Immediate Family Members.

(7) Unless disclosed in response to paragraph (b)(6) of this Item, describe any direct or indirect interest, the value of which exceeds \$120,000, of each director or nominee for election as director who is not or would not be an "interested person" of the Fund within the meaning of section 2(a)(19) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(19)*), or Immediate Family Member of the director or nominee, during the past five years, in:

(i) An investment adviser, principal underwriter, or Sponsoring Insurance Company of the Fund; or

(ii) A person (other than a registered investment company) directly or indirectly controlling, controlled by, or under common control with an investment adviser, principal underwriter, or Sponsoring Insurance Company of the Fund.

Instructions to paragraph (b)(7).

1. A director, nominee, or Immediate Family Member has an interest in a company if he is a party to a contract, arrangement, or understanding with respect to any securities of, or interest in, the company.

2. The interest of the director (or nominee) and the interests of his Immediate Family Members should be aggregated in determining whether the value exceeds \$120,000.

(8) Describe briefly any material interest, direct or indirect, of any director or nominee for election as director who is not or would not be an "interested person" of the Fund within the meaning of section 2(a)(19) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(19)*), or Immediate Family Member of the director or nominee, in any transaction, or series of similar transactions, since the beginning of the last two completed fiscal years of the Fund, or in any currently proposed transaction, or series of similar transactions, in which the amount involved exceeds \$120,000 and to which any of the following persons was or is to be a party:

(i) The Fund;

(ii) An Officer of the Fund;

(iii) An investment company, or a person that would be an investment company but for the exclusions provided by sections 3(c)(1) and 3(c)(7) of the Investment Company Act of 1940 (*15 U.S.C. 80a-3(c)(1)* and *(c)(7)*), having the

same investment adviser, principal underwriter, or Sponsoring Insurance Company as the Fund or having an investment adviser, principal underwriter, or Sponsoring Insurance Company that directly or indirectly controls, is controlled by, or is under common control with an investment adviser, principal underwriter, or Sponsoring Insurance Company of the Fund; An Officer of an investment company, or a person that would be an investment company but for the exclusions provided by sections 3(c)(1) and 3(c)(7) of the Investment Company Act of 1940 (*15 U.S.C. 80a-3(c)(1) and (c)(7)*), having the same investment adviser, principal underwriter, or Sponsoring Insurance Company as the Fund or having an investment adviser, principal underwriter, or Sponsoring Insurance Company that directly or indirectly controls, is controlled by, or is under common control with an investment adviser, principal underwriter, or Sponsoring Insurance Company of the Fund;

(v) An investment adviser, principal underwriter, or Sponsoring Insurance Company of the Fund;

(vi) An Officer of an investment adviser, principal underwriter, or Sponsoring Insurance Company of the Fund;

(vii) A person directly or indirectly controlling, controlled by, or under common control with an investment adviser, principal underwriter, or Sponsoring Insurance Company of the Fund; or

(viii) An Officer of a person directly or indirectly controlling, controlled by, or under common control with an investment adviser, principal underwriter, or Sponsoring Insurance Company of the Fund.

Instructions to paragraph (b)(8). 1. Include the name of each director, nominee, or Immediate Family Member whose interest in any transaction or series of similar transactions is described and the nature of the circumstances by reason of which the interest is required to be described.

2. State the nature of the interest, the approximate dollar amount involved in the transaction, and, where practicable, the approximate dollar amount of the interest.

3. In computing the amount involved in the transaction or series of similar transactions, include all periodic payments in the case of any lease or other agreement providing for periodic payments.

4. Compute the amount of the interest of any director, nominee, or Immediate Family Member of the director or nominee without regard to the amount of profit or loss involved in the transaction(s).

5. As to any transaction involving the purchase or sale of assets, state the cost of the assets to the purchaser and, if acquired by the seller within two years prior to the transaction, the cost to the seller. Describe the method used in determining the purchase or sale price and the name of the person making the determination.

6. If the proxy statement relates to multiple portfolios of a series Fund with different fiscal years, then, in determining the date that is the beginning of the last two completed fiscal years of the Fund, use the earliest date of any series covered by the proxy statement.

7. Disclose indirect, as well as direct, material interests in transactions. A person who has a position or relationship with, or interest in, a company that engages in a transaction with one of the persons listed in paragraphs (b)(8)(i) through (b)(8)(viii) of this Item may have an indirect interest in the transaction by reason of the position, relationship, or

interest. The interest in the transaction, however, will not be deemed "material" within the meaning of paragraph (b)(8) of this Item where the interest of the director, nominee, or Immediate Family Member arises solely from the holding of an equity interest (including a limited partnership interest, but excluding a general partnership interest) or a creditor interest in a company that is a party to the transaction with one of the persons specified in paragraphs (b)(8)(i) through (b)(8)(viii) of this Item, and the transaction is not material to the company.

8. The materiality of any interest is to be determined on the basis of the significance of the information to investors in light of all the circumstances of the particular case. The importance of the interest to the person having the interest, the relationship of the parties to the transaction with each other, and the amount involved in the transaction are among the factors to be considered in determining the significance of the information to investors.

9. No information need be given as to any transaction where the interest of the director, nominee, or Immediate Family Member arises solely from the ownership of securities of a person specified in paragraphs (b)(8)(i) through (b)(8)(viii) of this Item and the director, nominee, or Immediate Family Member receives no extra or special benefit not shared on a pro rata basis by all holders of the class of securities.

10. Transactions include loans, lines of credit, and other indebtedness. For indebtedness, indicate the largest aggregate amount of indebtedness outstanding at any time during the period, the nature of the indebtedness and the transaction in which it was incurred, the amount outstanding as of the latest practicable date, and the rate of interest paid or charged.

11. No information need be given as to any routine, retail transaction. For example, the Fund need not disclose that a director has a credit card, bank or brokerage account, residential mortgage, or insurance policy with a person specified in paragraphs (b)(8)(i) through (b)(8)(viii) of this Item unless the director is accorded special treatment.

(9) Describe briefly any direct or indirect relationship, in which the amount involved exceeds \$120,000, of any director or nominee for election as director who is not or would not be an "interested person" of the Fund within the meaning of section 2(a)(19) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(19)*), or Immediate Family Member of the director or nominee, that exists, or has existed at any time since the beginning of the last two completed fiscal years of the Fund, or is currently proposed, with any of the persons specified in paragraphs (b)(8)(i) through (b)(8)(viii) of this Item. Relationships include:

(i) Payments for property or services to or from any person specified in paragraphs (b)(8)(i) through (b)(8)(viii) of this Item;

(ii) Provision of legal services to any person specified in paragraphs (b)(8)(i) through (b)(8)(viii) of this Item;

(iii) Provision of investment banking services to any person specified in paragraphs (b)(8)(i) through (b)(8)(viii) of this Item, other than as a participating underwriter in a syndicate; and

(iv) Any consulting or other relationship that is substantially similar in nature and scope to the relationships listed in paragraphs (b)(9)(i) through (b)(9)(iii) of this Item.

Instructions to paragraph (b)(9). 1. Include the name of each director, nominee, or Immediate Family Member whose relationship is described and the nature of the circumstances by reason of which the relationship is required to be described.

2. State the nature of the relationship and the amount of business conducted between the director, nominee, or Immediate Family Member and the person specified in paragraphs (b)(8)(i) through (b)(8)(viii) of this Item as a result of the relationship since the beginning of the last two completed fiscal years of the Fund or proposed to be done during the Fund's current fiscal year.

3. In computing the amount involved in a relationship, include all periodic payments in the case of any agreement providing for periodic payments.

4. If the proxy statement relates to multiple portfolios of a series Fund with different fiscal years, then, in determining the date that is the beginning of the last two completed fiscal years of the Fund, use the earliest date of any series covered by the proxy statement.

5. Disclose indirect, as well as direct, relationships. A person who has a position or relationship with, or interest in, a company that has a relationship with one of the persons listed in paragraphs (b)(8)(i) through (b)(8)(viii) of this Item may have an indirect relationship by reason of the position, relationship, or interest.

6. In determining whether the amount involved in a relationship exceeds \$120,000, amounts involved in a relationship of the director (or nominee) should be aggregated with those of his Immediate Family Members.

7. In the case of an indirect interest, identify the company with which a person specified in paragraphs (b)(8)(i) through (b)(8)(viii) of this Item has a relationship; the name of the director, nominee, or Immediate Family Member affiliated with the company and the nature of the affiliation; and the amount of business conducted between the company and the person specified in paragraphs (b)(8)(i) through (b)(8)(viii) of this Item since the beginning of the last two completed fiscal years of the Fund or proposed to be done during the Fund's current fiscal year.

8. In calculating payments for property and services for purposes of paragraph (b)(9)(i) of this Item, the following may be excluded:

A. Payments where the transaction involves the rendering of services as a common contract carrier, or public utility, at rates or charges fixed in conformity with law or governmental authority; or

B. Payments that arise solely from the ownership of securities of a person specified in paragraphs (b)(8)(i) through (b)(8)(viii) of this Item and no extra or special benefit not shared on a pro rata basis by all holders of the class of securities is received.

9. No information need be given as to any routine, retail relationship. For example, the Fund need not disclose that a director has a credit card, bank or brokerage account, residential mortgage, or insurance policy with a person specified in paragraphs (b)(8)(i) through (b)(8)(viii) of this Item unless the director is accorded special treatment.

(10) If an Officer of an investment adviser, principal underwriter, or Sponsoring Insurance Company of the Fund, or an Officer of a person directly or indirectly controlling, controlled by, or under common control with an investment adviser, principal underwriter, or Sponsoring Insurance Company of the Fund, serves, or has served since the beginning of the last two completed fiscal years of the Fund, on the board of directors of a company where a director of the Fund or nominee for election as director who is not or would not be an "interested person" of the Fund within the meaning of section 2(a)(19) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(19)*), or Immediate Family Member of the director or nominee, is, or was since the beginning of the last two completed fiscal years of the Fund, an Officer,

identify:

(i) The company;

(ii) The individual who serves or has served as a director of the company and the period of service as director;

(iii) The investment adviser, principal underwriter, or Sponsoring Insurance Company or person controlling, controlled by, or under common control with the investment adviser, principal underwriter, or Sponsoring Insurance Company where the individual named in paragraph (b)(10)(ii) of this Item holds or held office and the office held; and

(iv) The director of the Fund, nominee for election as director, or Immediate Family Member who is or was an Officer of the company; the office held; and the period of holding the office.

Instruction to paragraph (b)(10). If the proxy statement relates to multiple portfolios of a series Fund with different fiscal years, then, in determining the date that is the beginning of the last two completed fiscal years of the Fund, use the earliest date of any series covered by the proxy statement.

(11) Provide in tabular form, to the extent practicable, the information required by Items 401(f) and (g), 404(a), and 405 of Regulation S-K (§ § 229.401(f) and (g), 229.404(a), and 229.405 of this chapter).

Instruction to paragraph (b)(11).

Information provided under paragraph (b)(8) of this Item 22 is deemed to satisfy the requirements of Item 404(a) of Regulation S-K for information about directors, nominees for election as directors, and Immediate Family Members of directors and nominees, and need not be provided under this paragraph (b)(11).

(12) Describe briefly any material pending legal proceedings, other than ordinary routine litigation incidental to the Fund's business, to which any director or nominee for director or affiliated person of such director or nominee is a party adverse to the Fund or any of its affiliated persons or has a material interest adverse to the Fund or any of its affiliated persons. Include the name of the court where the case is pending, the date instituted, the principal parties, a description of the factual basis alleged to underlie the proceeding, and the relief sought.

(13) In the case of a Fund that is an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a), for all directors, and for each of the three highest-paid Officers that have aggregate compensation from the Fund for the most recently completed fiscal year in excess of \$60,000 ("Compensated Persons"):

(i) Furnish the information required by the following table for the last fiscal year:

Compensation Table				
(1)	(2)	(3)	(4)	(5)
Name of Person, Position	Aggregate Compensation From Fund	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation From Fund and Complex Paid to Directors

Instructions to paragraph (b)(13)(i). 1. For column (1), indicate, if necessary, the capacity in which the remuneration is received. For Compensated Persons that are directors of the Fund, compensation is amounts received for service as a director.

2. If the Fund has not completed its first full year since its organization, furnish the information for the current fiscal year, estimating future payments that would be made pursuant to an existing agreement or understanding. Disclose in a footnote to the Compensation Table the period for which the information is furnished.

3. Include in column (2) amounts deferred at the election of the Compensated Person, whether pursuant to a plan established under *Section 401(k) of the Internal Revenue Code (26 U.S.C. 401(k))* or otherwise, for the fiscal year in which earned. Disclose in a footnote to the Compensation Table the total amount of deferred compensation (including interest) payable to or accrued for any Compensated Person.

4. Include in columns (3) and (4) all pension or retirement benefits proposed to be paid under any existing plan in the event of retirement at normal retirement date, directly or indirectly, by the Fund or any of its Subsidiaries, or by other companies in the Fund Complex. Omit column (4) where retirement benefits are not determinable.

5. For any defined benefit or actuarial plan under which benefits are determined primarily by final compensation (or average final compensation) and years of service, provide the information required in column (4) in a separate table showing estimated annual benefits payable upon retirement (including amounts attributable to any defined benefit supplementary or excess pension award plans) in specified compensation and years of service classifications. Also provide the estimated credited years of service for each Compensated Person.

6. Include in column (5) only aggregate compensation paid to a director for service on the board and other boards of investment companies in a Fund Complex specifying the number of such other investment companies.

(ii) Describe briefly the material provisions of any pension, retirement, or other plan or any arrangement other than fee arrangements disclosed in paragraph (b)(13)(i) of this Item pursuant to which Compensated Persons are or may be compensated for any services provided, including amounts paid, if any, to the Compensated Person under any such arrangements during the most recently completed fiscal year. Specifically include the criteria used to determine amounts payable under any plan, the length of service or vesting period required by the plan, the retirement age or other event that gives rise to payments under the plan, and whether the payment of benefits is secured or funded by the Fund.

(14) State whether or not the Fund has a separately designated audit committee established in accordance with section 3(a)(58)(A) of the Act (*15 U.S.C. 78c(a)(58)(A)*). If the entire board of directors is acting as the Fund's audit committee as specified in section 3(a)(58)(B) of the Act (*15 U.S.C. 78c(a)(58)(B)*), so state. If applicable, provide the

disclosure required by § 240.10A-3(d) regarding an exemption from the listing standards for audit committees. Identify the other standing committees of the Fund's board of directors, and provide the following information about each committee, including any separately designated audit committee and any nominating committee:

(i) A concise statement of the functions of the committee;

(ii) The members of the committee and, in the case of a nominating committee, whether or not the members of the committee are "interested persons" of the Fund as defined in section 2(a)(19) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(19)*); and

(iii) The number of committee meetings held during the last fiscal year.

Instruction to paragraph (b)(14): For purposes of Item 22(b)(14), the term "nominating committee" refers not only to nominating committees and committees performing similar functions, but also to groups of directors fulfilling the role of a nominating committee, including the entire board of directors.

(15)

(i) Provide the information (and in the format) required by Items 407(b)(1), (b)(2) and (f) of Regulation S-K (§ 229.407(b)(1), (b)(2) and (f) of this chapter); and

(ii) Provide the following regarding the requirements for the director nomination process:

(A) The information (and in the format) required by Items 407(c)(1) and (c)(2) of Regulation S-K (§ 229.407(c)(1) and (c)(2) of this chapter); and

(B) If the Fund is a listed issuer (as defined in § 240.10A-3 of this chapter) whose securities are listed on a national securities exchange registered pursuant to section 6(a) of the Act (*15 U.S.C. 78f(a)*) or in an automated inter-dealer quotation system of a national securities association registered pursuant to section 15A of the Act (*15 U.S.C. 78o-3(a)*) that has independence requirements for nominating committee members, identify each director that is a member of the nominating committee that is not independent under the independence standards described in this paragraph. In determining whether the nominating committee members are independent, use the Fund's definition of independence that it uses for determining if the members of the nominating committee are independent in compliance with the independence standards applicable for the members of the nominating committee in the listing standards applicable to the Fund. If the Fund does not have independence standards for the nominating committee, use the independence standards for the nominating committee in the listing standards applicable to the Fund.

Instruction to paragraph (b)(15)(ii)(B).

If the national securities exchange or inter-dealer quotation system on which the Fund's securities are listed has exemptions to the independence requirements for nominating committee members upon which the Fund relied, disclose the exemption relied upon and explain the basis for the Fund's conclusion that such exemption is applicable.

(16) In the case of a Fund that is a closed-end investment company:

(i) Provide the information (and in the format) required by Item 407(d)(1), (d)(2) and (d)(3) of Regulation S-K (§ 229.407(d)(1), (d)(2) and (d)(3) of this chapter); and

(ii) Identify each director that is a member of the Fund's audit committee that is not independent under the independence standards described in this paragraph. If the Fund does not have a separately designated audit committee, or committee performing similar functions, the Fund must provide the disclosure with respect to all members of its board of directors.

(A) If the Fund is a listed issuer (as defined in § 240.10A-3 of this chapter) whose securities are listed on a national securities exchange registered pursuant to section 6(a) of the Act (*15 U.S.C. 78f(a)*) or in an automated inter-dealer quotation system of a national securities association registered pursuant to section 15A of the Act (*15 U.S.C. 78o-3(a)*) that has independence requirements for audit committee members, in determining whether the audit committee members are independent, use the Fund's definition of independence that it uses for determining if the members of the audit committee are independent in compliance with the independence standards applicable for the members of the audit committee in the listing standards applicable to the Fund. If the Fund does not have independence standards for the audit committee, use the independence standards for the audit committee in the listing standards applicable to the Fund.

(B) If the Fund is not a listed issuer whose securities are listed on a national securities exchange registered pursuant to section 6(a) of the Act (*15 U.S.C. 78f(a)*) or in an automated inter-dealer quotation system of a national securities association registered pursuant to section 15A of the Act (*15 U.S.C. 78o-3(a)*), in determining whether the audit committee members are independent, use a definition of independence of a national securities exchange registered pursuant to section 6(a) of the Act (*15 U.S.C. 78f(a)*) or an automated inter-dealer quotation system of a national securities association registered pursuant to section 15A of the Act (*15 U.S.C. 78o-3(a)*) which has requirements that a majority of the board of directors be independent and that has been approved by the Commission, and state which definition is used. Whatever such definition the Fund chooses, it must use the same definition with respect to all directors and nominees for director. If the national securities exchange or national securities association whose standards are used has independence standards for the members of the audit committee, use those specific standards.

Instruction to paragraph (b)(16)(ii).

If the national securities exchange or inter-dealer quotation system on which the Fund's securities are listed has exemptions to the independence requirements for nominating committee members upon which the Fund relied, disclose the exemption relied upon and explain the basis for the Fund's conclusion that such exemption is applicable. The same disclosure should be provided if the Fund is not a listed issuer and the national securities exchange or inter-dealer

quotation system selected by the Fund has exemptions that are applicable to the Fund.

(17) In the case of a Fund that is an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a), if a director has resigned or declined to stand for re-election to the board of directors since the date of the last annual meeting of security holders because of a disagreement with the registrant on any matter relating to the registrant's operations, policies or practices, and if the director has furnished the registrant with a letter describing such disagreement and requesting that the matter be disclosed, the registrant shall state the date of resignation or declination to stand for re-election and summarize the director's description of the disagreement. If the registrant believes that the description provided by the director is incorrect or incomplete, it may include a brief statement presenting its view of the disagreement.

(c) Approval of investment advisory contract. If action is to be taken with respect to an investment advisory contract, include the following information in the proxy statement.

Instruction. Furnish information with respect to a prospective investment adviser to the extent applicable (including the name and address of the prospective investment adviser).

(1) With respect to the existing investment advisory contract:

(i) State the date of the contract and the date on which it was last submitted to a vote of security holders of the Fund, including the purpose of such submission;

(ii) Briefly describe the terms of the contract, including the rate of compensation of the investment adviser;

(iii) State the aggregate amount of the investment adviser's fee and the amount and purpose of any other material payments by the Fund to the investment adviser, or any affiliated person of the investment adviser, during the last fiscal year of the Fund;

(iv) If any person is acting as an investment adviser of the Fund other than pursuant to a written contract that has been approved by the security holders of the company, identify the person and describe the nature of the services and arrangements;

(v) Describe any action taken with respect to the investment advisory contract since the beginning of the Fund's last fiscal year by the board of directors of the Fund (unless described in response to paragraph (c)(1)(vi)) of this Item 22); and

(vi) If an investment advisory contract was terminated or not renewed for any reason, state the date of such termination or non-renewal, identify the parties involved, and describe the circumstances of such termination or non-renewal.

(2) State the name, address and principal occupation of the principal executive officer and each director or general partner of the investment adviser.

(i) The general partners with the five largest economic interests in the partnership, and, if different, those general partners comprising the management or executive committee of the partnership or exercising similar authority;

(ii) The general partners with significant management responsibilities relating to the fund.

(3) State the names and addresses of all Parents of the investment adviser and show the basis of control of the investment adviser and each Parent by its immediate Parent.

Instructions.

1. If any person named is a corporation, include the percentage of its voting securities owned by its immediate Parent.

2. If any person named is a partnership, name the general partners having the three largest partnership interests (computed by whatever method is appropriate in the particular case).

(4) If the investment adviser is a corporation and if, to the knowledge of the persons making the solicitation or the persons on whose behalf the solicitation is made, any person not named in answer to paragraph (c)(3) of this Item 22 owns, of record or beneficially, ten percent or more of the outstanding voting securities of the investment adviser, indicate that fact and state the name and address of each such person.

(5) Name each officer or director of the Fund who is an officer, employee, director, general partner or shareholder of the investment adviser. As to any officer or director who is not a director or general partner of the investment adviser and who owns securities or has any other material direct or indirect interest in the investment adviser or any other person controlling, controlled by or under common control with the investment adviser, describe the nature of such interest.

(6) Describe briefly and state the approximate amount of, where practicable, any material interest, direct or indirect, of any director of the Fund in any material transactions since the beginning of the most recently completed fiscal year,

or in any material proposed transactions, to which the investment adviser of the Fund, any Parent or Subsidiary of the investment adviser (other than another Fund), or any Subsidiary of the Parent of such entities was or is to be a party.

Instruction. If the investment adviser is a partnership with more than ten general partners, name:

Instructions.

1. Include the name of each person whose interest in any transaction is described and the nature of the relationship by reason of which such interest is required to be described. Where it is not practicable to state the approximate amount of the interest, indicate the approximate amount involved in the transaction.

2. As to any transaction involving the purchase or sale of assets by or to the investment adviser, state the cost of the assets to the purchaser and the cost thereof to the seller if acquired by the seller within two years prior to the transaction.

3. If the interest of any person arises from the position of the person as a partner in a partnership, the proportionate interest of such person in transactions to which the partnership is a party need not be set forth, but state the amount involved in the transaction with the partnership.

4. No information need be given in response to this paragraph (c)(6) of Item 22 with respect to any transaction that is not related to the business or operations of the Fund and to which neither the Fund nor any of its Parents or Subsidiaries is a party.

(7) Disclose any financial condition of the investment adviser that is reasonably likely to impair the financial ability of the adviser to fulfil its commitment to the fund under the proposed investment advisory contract.

(8) Describe the nature of the action to be taken on the investment advisory contract and the reasons therefor, the terms of the contract to be acted upon, and, if the action is an amendment to, or a replacement of, an investment advisory contract, the material differences between the current and proposed contract.

(9) If a change in the investment advisory fee is sought, state:

(i) The aggregate amount of the investment adviser's fee during the last year;

(ii) The amount that the adviser would have received had the proposed fee been in effect; and

(iii) The difference between the aggregate amounts stated in response to paragraphs (i) and (ii) of this item (c)(9) as a percentage of the amount stated in response to paragraph (i) of this item (c)(9).

(10) If the investment adviser acts as such with respect to any other Fund having a similar investment objective, identify and state the size of such other Fund and the rate of the investment adviser's compensation. Also indicate for any Fund identified whether the investment adviser has waived, reduced, or otherwise agreed to reduce its compensation under any applicable contract.

Instruction. Furnish the information in response to this paragraph (c)(10) of Item 22 in tabular form.

(11) Discuss in reasonable detail the material factors and the conclusions with respect thereto that form the basis for the recommendation of the board of directors that the shareholders approve an investment advisory contract. Include the following in the discussion:

(i) Factors relating to both the board's selection of the investment adviser and approval of the advisory fee and any other amounts to be paid by the Fund under the contract. This would include, but not be limited to, a discussion of the nature, extent, and quality of the services to be provided by the investment adviser; the investment performance of the Fund and the investment adviser; the costs of the services to be provided and profits to be realized by the investment adviser and its affiliates from the relationship with the Fund; the extent to which economies of scale would be realized as the Fund grows; and whether fee levels reflect these economies of scale for the benefit of Fund investors. Also indicate in the discussion whether the board relied upon comparisons of the services to be rendered and the amounts to be paid under the contract with those under other investment advisory contracts, such as contracts of the same and other investment advisers with other registered investment companies or other types of clients (e.g., pension funds and other institutional investors). If the board relied upon such comparisons, describe the comparisons that were relied on and how they assisted the board in determining to recommend that the shareholders approve the advisory contract; and

(ii) If applicable, any benefits derived or to be derived by the investment adviser from the relationship with the Fund such as soft dollar arrangements by which brokers provide research to the Fund or its investment adviser in return for allocating Fund brokerage.

Instructions.

1. Conclusory statements or a list of factors will not be considered sufficient disclosure. Relate the factors to the specific circumstances of the Fund and the investment advisory contract for which approval is sought and state how the board evaluated each factor. For example, it is not sufficient to state that the board considered the amount of the investment advisory fee without stating what the board concluded about the amount of the fee and how that affected its determination to recommend approval of the contract.

2. If any factor enumerated in paragraph (c)(11)(i) of this Item 22 is not relevant to the board's evaluation of the investment advisory contract for which approval is sought, note this and explain the reasons why that factor is not relevant.

(12) Describe any arrangement or understanding made in connection with the proposed investment advisory contract with respect to the composition of the board of directors of the Fund or the investment adviser or with respect to the selection or appointment of any person to any office with either such company.

(13) For the most recently completed fiscal year, state:

(i) The aggregate amount of commissions paid to any Affiliated Broker; and

(ii) The percentage of the Fund's aggregate brokerage commissions paid to any such Affiliated Broker.

Instruction. Identify each Affiliated Broker and the relationships that cause the broker to be an Affiliated Broker.

(14) Disclose the amount of any fees paid by the Fund to the investment adviser, its affiliated persons or any affiliated person of such person during the most recent fiscal year for services provided to the Fund (other than under the investment advisory contract or for brokerage commissions). State whether these services will continue to be provided after the investment advisory contract is approved.

(d) Approval of distribution plan. If action is to be taken with respect to a Distribution Plan, include the following information in the proxy statement.

Instruction. Furnish information on a prospective basis to the extent applicable.

(1) Describe the nature of the action to be taken on the Distribution Plan and the reason therefor, the terms of the Distribution Plan to be acted upon, and, if the action is an amendment to, or a replacement of, a Distribution Plan, the material differences between the current and proposed Distribution Plan.

(2) If the Fund has a Distribution Plan in effect:

(i) Provide the date that the Distribution Plan was adopted and the date of the last amendment, if any;

(ii) Disclose the persons to whom payments may be made under the Distribution Plan, the rate of the distribution fee and the purposes for which such fee may be used;

(iii) Disclose the amount of distribution fees paid by the Fund pursuant to the plan during its most recent fiscal year, both in the aggregate and as a percentage of the Fund's average net assets during the period;

(iv) Disclose the name of, and the amount of any payments made under the Distribution Plan by the Fund during its most recent fiscal year to, any person who is an affiliated person of the Fund, its investment adviser, principal underwriter, or Administrator, an affiliated person of such person, or a person that during the most recent fiscal year received 10% or more of the aggregate amount paid under the Distribution Plan by the Fund;

(v) Describe any action taken with respect to the Distribution Plan since the beginning of the Fund's most recent fiscal year by the board of directors of the Fund; and

(vi) If a Distribution Plan was or is to be terminated or not renewed for any reason, state the date or prospective date of such termination or non-renewal, identify the parties involved, and describe the circumstances of such termination or non-renewal.

(3) Describe briefly and state the approximate amount of, where practicable, any material interest, direct or indirect, of any director or nominee for election as a director of the Fund in any material transactions since the beginning of the most recently completed fiscal year, or in any material proposed transactions, to which any person identified in response to Item 22(d)(2)(iv) was or is to be a party.

Instructions.

1. Include the name of each person whose interest in any transaction is described and the nature of the relationship by reason of which such interest is required to be described. Where it is not practicable to state the approximate amount of the interest, indicate the approximate amount involved in the transaction.

2. As to any transaction involving the purchase or sale of assets, state the cost of the assets to the purchaser and the cost thereof to the seller if acquired by the seller within two years prior to the transaction.

3. If the interest of any person arises from the position of the person as a partner in a partnership, the proportionate interest of such person in transactions to which the partnership is a party need not be set forth but state the amount involved in the transaction with the partnership.

4. No information need be given in response to this paragraph (d)(3) of Item 22 with respect to any transaction that is not related to the business or operations of the Fund and to which neither the Fund nor any of its Parents or Subsidiaries is a party.

(4) Discuss in reasonable detail the material factors and the conclusions with respect thereto which form the basis for the conclusion of the board of directors that there is a reasonable likelihood that the proposed Distribution Plan (or amendment thereto) will benefit the Fund and its shareholders.

Instruction. Conclusory statements or a list of factors will not be considered sufficient disclosure.

Item 23. Delivery of documents to security holders sharing an address.

If one annual report to security holders, proxy statement, or Notice of Internet Availability of Proxy Materials is being delivered to two or more security holders who share an address in accordance with § 240.14a-3(e)(1), furnish the following information:

(c) Provide the phone number and mailing address to which a security holder can direct a notification to the registrant that the security holder wishes to receive a separate annual report to security holders, proxy statement, or Notice of Internet Availability of Proxy Materials, as applicable, in the future; and

(d) Provide instructions how security holders sharing an address can request delivery of a single copy of annual reports to security holders, proxy statements, or Notices of Internet Availability of Proxy Materials if they are receiving multiple copies of annual reports to security holders, proxy statements, or Notices of Internet Availability of Proxy Materials.

Section 240.13a-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Sections 240.13e-4, 240.14d-7, 240.14d-10 and 240.14e-1 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(d) and 14(e), 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(d) and 78n(e) and sec. 23(c) of the Investment Company Act of 1940, 15 U.S.C. 80a-23(c). Sections 240.13e-4 to 240.13e-101 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(e), 15(c)(1), 48 Stat. 882, 889, 891, 894, 895, 901, sec. 8, 49 Stat. 1379, sec. 5, 78 Stat. 569, 570, secs. 2, 3, 82 Stat. 454, 455, secs. 1, 2, 3-5, 84 Stat. 1497, secs. 3, 18, 89 Stat. 97, 155; 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(e), 78o(c); sec. 23(c) of the Investment Company Act of 1940; 54 Stat. 825; 15 U.S.C. 80a-23(c). Section 240.13f-2(T) also issued under sec. 13(f)(1) (15 U.S.C. 78m(f)(1)). Sections 240.14a-1, 240.14a-3, 240.14a-13, 240.14b-1, 240.14b-2, 240.14c-1, and 240.14c-7 also issued under secs. 12, 15 U.S.C. 78l, and 14, Pub. L. 99-222, 99 Stat. 1737, 15 U.S.C. 78n. Sections 240.14a-3, 240.14a-13, 240.14b-1 and 240.14c-7 also issued under secs. 12, 14 and 17, 15 U.S.C. 78l, 78n and 78g; Sections 240.14c-1 to 240.14c-101 also issued under sec. 14, 48 Stat. 895; 15 U.S.C. 78n. Section 240.14d-1 is also issued under 15 U.S.C. 77g, 77j, 77s(a), 77ttt(a), 79t, 80a-37. Section 240.14e-4 also issued under the Exchange Act, 15 U.S.C. 78a *et seq.*, and particularly sections 3(b), 10(a), 10(b), 14(e), 15(c), and 23(a) of the Exchange Act (15 U.S.C. 78c(b), 78j(a), 78j(b), 78n(e), 78o(c), and 78w(a)). Section 240.15a-6, also issued under secs. 3, 10, 15, and 17, 15 U.S.C. 78c, 78j, 78o, and 78q. Sections 240.15b1-3 and 240.15b2-1 also issued under 15 U.S.C. 78o, 78q. Section 240.15b2-2 also issued under secs. 3, 15; 15 U.S.C. 78c, 78o. Sections 240.15b10-1 to 240.15b10-9 also issued under secs. 15, 17, 48 Stat. 895, 897, sec. 203, 49 Stat. 704, secs. 4, 8, 49 Stat. 1379, sec. 5, 52 Stat. 1076, sec. 6, 78 Stat. 570; 15 U.S.C. 78o, 78q, 12 U.S.C. 241 nt. Section 240.15c2-6, also issued under secs. 3, 10, and 15, 15 U.S.C. 78c, 78j, and 78o. Section 240.15c2-11 also issued under 15 U.S.C. 78j(b), 78o(c), 78q(a), and 78w(a). Section 240.15c2-12 also issued under 15 U.S.C. 78b, 78c, 78j, 78o, 78o-4 and 78q. Section 240.15c3-1 is also issued under secs. 15(c)(3), 15 U.S.C. 78o(c)(3). Section 240.15d-5 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.15d-10 is also issued under 15 U.S.C. 80a-20(a) and 80a-37(a), and secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.15d-11 is also issued under secs. 3 (a) and 306(a), Pub L. 107-204, 116 Stat. 745. Section 240.15d-14 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.15d-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Sections 240.15Ca1-1, 240.15Ca2-1, 240.15Ca2-2, 240.15Ca2-3, 240.15Ca2-4, 240.15Ca2-5, 240.15Cc1-1 also issued under secs. 3, 15C; 15 U.S.C. 78c, 78o-5. Section 240.17a-3 also issued under secs. 2, 17, 23a, 48 Stat. 897, as amended; 15 U.S.C. 78d-1, 78d-2, 78q; secs. 12, 14, 17, 23(a), 48 Stat. 892, 895, 897, 901; secs. 1, 4, 8, 49 Stat. 1375, 1379; sec. 203(a), 49 Stat. 704; sec. 5, 52 Stat. 1076; sec. 202, 68 Stat. 686; secs. 3, 5, 10, 78 Stat. 565-568, 569, 570, 580; secs. 1, 3, 82 Stat. 454, 455; secs. 28(c), 3-5, 84 Stat. 1435, 1497; sec. 105(b), 88 Stat. 1503; secs. 8, 9, 14, 18, 89 Stat. 117, 118, 137, 155; 15 U.S.C. 78l, 78n, 78q, 78w(a). Section 240.17a-4 also issued under secs. 2, 17, 23(a), 48 Stat. 897, as amended; 15 U.S.C. 78a, 78d-1, 78d-2; sec. 14, Pub. L. 94-29, 89 Stat. 137 (15 U.S.C. 78a); sec. 18, Pub. L. 94-29, 89 Stat. 155 (15 U.S.C. 78w). Section 240.17a-23 also issued under 15 U.S.C. 78b, 78c, 78q, and 78w(a). Section 240.17f-1 is also authorized under sections 2, 17 and 17A, 48 Stat. 891, 89 Stat. 137, 141 (15 U.S.C. 78b, 78q, 78q-1). Section 240.17Ad-7 also issued under 15 U.S.C. 78b, 78q, and 78q-1. Sections 240.19c-4 also issued under secs. 6, 11A, 14, 15A, 19 and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78o-3, and 78s). Section 240.19c-5 also issued under Sections 6, 11A, and 19 of the Securities Exchange Act of 1934, 48 Stat. 885, as amended, 89 Stat. 111, as amended, and 48 Stat. 898, as amended, 15 U.S.C. 78f, 78k-1, and 78s. Section 240.31-1 is also issued under sec. 31, 48 Stat. 904, as amended (15 U.S.C. 78ee).

Appendix E FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO CERTIFICATION OF PERIODIC REPORTS AND MANAGEMENT ASSESSMENT OF INTERNAL CONTROLS

2-E Corporate Governance: Law and Practice Sarbanes-Oxley § 302

§ Oxley 302 Corporate Responsibility for Financial Reports [Including Requirements for CEO and CFO Certification in Annual and Quarterly Reports]

(a) Regulations Required.-- The Commission shall, by rule, require, for each company filing periodic reports under section 13(a) or 15(d) of the Securities Exchange Act of 1934 (*15 U.S.C. 78m, 78o(d)*), that the principal executive officer or officers and the principal financial officer or officers, or persons performing similar functions, certify in each annual or quarterly report filed or submitted under either such section of such Act that--

(1) the signing officer has reviewed the report;

(2) based on the officer's knowledge, the report does not contain any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements made, in light of the circumstances under which such statements were made, not misleading;

(3) based on such officer's knowledge, the financial statements, and other financial information included in the report, fairly present in all material respects the financial condition and results of operations of the issuer as of, and for, the periods presented in the report;

(4) the signing officers--

(A) are responsible for establishing and maintaining internal controls;

(B) have designed such internal controls to ensure that material information relating to the issuer and its consolidated subsidiaries is made known to such officers by others within those entities, particularly during the period in which the periodic reports are being prepared;

(C) have evaluated the effectiveness of the issuer's internal controls as of a date within 90 days prior to the report; and

(D) have presented in the report their conclusions about the effectiveness of their internal controls based on their evaluation as of that date;

(5) the signing officers have disclosed to the issuer's auditors and the audit committee of the board of directors (or persons fulfilling the equivalent function)--

(A) all significant deficiencies in the design or operation of internal controls which could adversely affect the issuer's ability to record, process, summarize, and report financial data and have identified for the issuer's auditors any material weaknesses in internal controls; and

(B) any fraud, whether or not material, that involves management or other employees who have a significant role in the issuer's internal controls; and

(6) the signing officers have indicated in the report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of their evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.

(b) Foreign Reincorporations Have No Effect.-- Nothing in this section 302 shall be interpreted or applied in any way to allow any issuer to lessen the legal force of the statement required under this section 302, by an issuer having reincorporated or having engaged in any other transaction that resulted in the transfer of the corporate domicile or offices of the issuer from inside the United States to outside of the United States.

(c) Deadline.-- The rules required by subsection (a) shall be effective not later than 30 days after the date of enactment of this Act.

Appendix E FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO CERTIFICATION OF PERIODIC REPORTS AND MANAGEMENT ASSESSMENT OF INTERNAL CONTROLS

2-E Corporate Governance: Law and Practice Sarbanes-Oxley § 906

§ Oxley 906 Corporate Responsibility for Financial Reports [Including Requirements for, and Criminal Sanctions Relating to, CEO and CFO Certifications in Periodic Reports]

(a) In General.-- Chapter 63 of title 18, United States Code, is amended by inserting after section 1349, as created by this Act, the following:

Sec. 1350. Failure of corporate officers to certify financial reports

(a) Certification of Periodic Financial Reports.--Each periodic report containing financial statements filed by an issuer with the Securities Exchange Commission pursuant to section 13(a) or 15(d) of the Securities Exchange Act of 1934 (*15 U.S.C. 78m(a) or 78o(d)*) shall be accompanied by a written statement by the chief executive officer and chief financial officer (or equivalent thereof) of the issuer.

(b) Content.--The statement required under subsection (a) shall certify that the periodic report containing the financial statements fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934 (*15 U.S.C. 78m or 78o(d)*) and that information contained in the periodic report fairly presents, in all material respects, the financial condition and results of operations of the issuer.

(c) Criminal Penalties.--Whoever--

(1) certifies any statement as set forth in subsections (a) and (b) of this section knowing that the periodic report accompanying the statement does not comport with all the requirements set forth in this section shall be fined not more than \$1,000,000 or imprisoned not more than 10 years, or both; or

(2) willfully certifies any statement as set forth in subsections (a) and (b) of this section knowing that the periodic report accompanying the statement does not comport with all the requirements set forth in this section shall be fined not more than \$5,000,000, or imprisoned not more than 20 years, or both".

(b) Clerical Amendment.-- The table of sections at the beginning of chapter 63 of title 18, United States Code, is

amended by adding at the end the following: "1350. Failure of corporate officers to certify financial reports".

§ 601(b)(31) [Implementing Sarbanes-Oxley § 302]

(b) Description of exhibits. Set forth below is a description of each document listed in the exhibit tables.

(31)

(i) Rule 13a-14(a)/15d-14(a) Certifications. The certifications required by Rule 13a-14(a) (*17 CFR 240.13a-14(a)*) or Rule 15d-14(a) (*17 CFR 240.15d-14(a)*) exactly as set forth below:

Certificationsn*

I, [identify the certifying individual], certify that:

1. I have reviewed this [specify report] of [identify registrant];

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

[Title]

(ii) Rule 13a-14(d)/15d-14(d) Certifications. If an asset-backed issuer (as defined in § 229.1101), the certifications required by Rule 13a-14(d) (*17 CFR 240.13a-14(d)*) or Rule 15d-14(d) (*17 CFR 240.15d-14(d)*) exactly as set forth below:

Certifications¹

I, [identify the certifying individual], certify that:

1. I have reviewed this report on Form 10-K and all reports on Form 10-D required to be filed in respect of the period covered by this report on Form 10-K of [identify the issuing entity] (the "Exchange Act periodic reports");

2. Based on my knowledge, the Exchange Act periodic reports, taken as a whole, do not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, all of the distribution, servicing and other information required to be provided under Form 10-D for the period covered by this report is included in the Exchange Act periodic reports;

4. [I am responsible for reviewing the activities performed by the servicer(s) and based on my knowledge and the compliance review(s) conducted in preparing the servicer compliance statement(s) required in this report under Item 1123 of Regulation AB, and except as disclosed in the Exchange Act periodic reports, the servicer(s) [has/have] fulfilled [its/their] obligations under the servicing agreement(s); and]

[Based on my knowledge and the servicer compliance statement(s) required in this report under Item 1123 of Regulation AB, and except as disclosed in the Exchange Act periodic reports, the servicer(s) [has/have] fulfilled [its/their] obligations under the servicing agreement(s); and]²

5. All of the reports on assessment of compliance with servicing criteria for asset-backed securities and their related attestation reports on assessment of compliance with servicing criteria for asset-backed securities required to be included in this report in accordance with Item 1122 of Regulation AB and Exchange Act Rules 13a-18 and 15d-18 have been included as an exhibit to this report, except as otherwise disclosed in this report. Any material instances of noncompliance described in such reports have been disclosed in this report on Form 10-K.ⁿ³

[In giving the certifications above, I have reasonably relied on information provided to me by the following unaffiliated parties [name of servicer, sub-servicer, co-servicer, depositor or trustee].]ⁿ⁴

Date: _____

[Signature]

[Title]

FOOTNOTES:

(n4)Footnote *. Provide a separate certification for each principal executive officer and principal financial officer of the registrant. See Rules 13a-14(a) and 15d-14(a).

(n5)Footnote 1. With respect to asset-backed issuers, the certification must be signed by either: (1) The senior officer in charge of securitization of the depositor if the depositor is signing the report on Form 10-K; or (2) The senior officer in charge of the servicing function of the servicer if the servicer is signing the report on Form 10-K on behalf of the issuing entity. See Rules 13a-14(e) and 15d-14(e) (§ 240.13a-14(e) and 240.15d-14(e)). If multiple servicers are involved in servicing the pool assets, the senior officer in charge of the servicing function of the master servicer (or entity performing the equivalent function) must sign if a representative of the servicer is to sign the certification. If there is a master servicer and one or more underlying servicers, the references in the certification relate to the master servicer. A natural person must sign the certification in his or her individual capacity, although the title of that person in the organization of which he or she is an officer may be included under the signature.

(n6)Footnote 2. The first version of paragraph 4 is to be used when the servicer is signing the report on behalf of the issuing entity. The second version of paragraph 4 is to be used when the depositor is signing the report.

(n7)Footnote 3. The certification refers to the reports prepared by parties participating in the servicing function that are required to be included as an exhibit to the Form 10-K. See Item 1122 of Regulation AB (§ 229.1122) and Rules 13a-18 and 15d-18 (§ 240.13a-18 and 240.15d-18 of this chapter). If a report that is otherwise required to be included is not attached, disclosure that the report is not included and an associated explanation must be provided in the Form 10-K report.

(n8)Footnote 4. Because the signer of the certification must rely in certain circumstances on information provided by unaffiliated parties outside of the signer's control, this paragraph must be included if the signer is reasonably relying on information that unaffiliated trustees, depositors, servicers, sub-servicers or co-servicers have provided.

Appendix E FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO CERTIFICATION OF PERIODIC REPORTS AND MANAGEMENT ASSESSMENT OF INTERNAL CONTROLS

2-E Corporate Governance: Law and Practice 17 CFR § 229.601

§ 601 (Item 601) Exhibits.

(a) Exhibits and index required.

(1) Subject to Rule 411(c) (§ 230.411(c) of this chapter) under the Securities Act and Rule 12b-32 (§ 240.12b-32 of this chapter) under the Exchange Act regarding incorporation of exhibits by reference, the exhibits required in the exhibit table shall be filed as indicated, as part of the registration statement or report.

(2) Each registration statement or report shall contain an exhibit index, which shall precede immediately the exhibits filed with such registration statement. For convenient reference, each exhibit shall be listed in the exhibit index according to the number assigned to it in the exhibit table. The exhibit index shall indicate, by handwritten, typed, printed, or other legible form of notation in the manually signed original registration statement or report, the page number in the sequential numbering system where such exhibit can be found. Where exhibits are incorporated by reference, this fact shall be noted in the exhibit index referred to in the preceding sentence. Further, the first page of the manually signed registration statement shall list the page in the filing where the exhibit index is located. For a description of each of the exhibits included in the exhibit table, see paragraph (b) of this section.

(3) This Item applies only to the forms specified in the exhibit table. With regard to forms not listed in that table, reference shall be made to the appropriate form for the specific exhibit filing requirements applicable thereto.

(4) If a material contract or plan of acquisition, reorganization, arrangement, liquidation or succession is executed or becomes effective during the reporting period reflected by a Form 10-Q or Form 10-K, it shall be filed as an exhibit to

the Form 10-Q or Form 10-K filed for the corresponding period. Any amendment or modification to a previously filed exhibit to a Form 10, 10-K or 10-Q document shall be filed as an exhibit to a Form 10-Q and Form 10-K. Such amendment or modification need not be filed where such previously filed exhibit would not be currently required.

Instructions to Item 601:

1. If an exhibit to a registration statement (other than an opinion or consent), filed in preliminary form, has been changed only (A) to insert information as to interest, dividend or conversion rates, redemption or conversion prices, purchase or offering prices, underwriters' or dealers' commissions, names, addresses or participation of underwriters or similar matters, which information appears elsewhere in an amendment to the registration statement or a prospectus filed pursuant to Rule 424(b) under the Securities Act [§ 230.424(b) of this chapter], or (B) to correct typographical errors, insert signatures or make other similar immaterial changes, then, notwithstanding any contrary requirement of any rule or form, the registrant need not refile such exhibit as so amended. Any such incomplete exhibit may not, however, be incorporated by reference in any subsequent filing under any Act administered by the Commission.

2. In any case where two or more indentures, contracts, franchises, or other documents required to be filed as exhibits are substantially identical in all material respects except as to the parties thereto, the dates of execution, or other details, the registrant need file a copy of only one of such documents, with a schedule identifying the other documents omitted and setting forth the material details in which such documents differ from the document a copy of which is filed. The Commission may at any time in its discretion require filing of copies of any documents so omitted.

3. Only copies, rather than originals, need be filed of each exhibit required except as otherwise specifically noted.

4. Electronic filings. Whenever an exhibit is filed in paper pursuant to a hardship exemption (§ § 232.201 and 232.202 of this chapter), the letter "P" (paper) shall be placed next to the exhibit in the list of exhibits required by Item 601(a)(2) of this Rule. Whenever an electronic confirming copy of an exhibit is filed pursuant to a hardship exemption (§ 232.201 or § 232.202(d) of this chapter), the exhibit index should specify where the confirming electronic copy can be located; in addition, the designation "CE" (confirming electronic) should be placed next to the listed exhibit in the exhibit index.

Exhibit Table

Instructions to the Exhibit Table

1. The exhibit table indicates those documents that must be filed as exhibits to the respective forms listed.

2. The "X" designation indicates the documents which are required to be filed with each form even if filed previously with another document, Provided, However, that such previously filed documents may be incorporated by reference to satisfy the filing requirements.

3. The number used in the far left column of the table refers to the appropriate subsection in paragraph (b) where a description of the exhibit can be found. Whenever necessary, alphabetical or numerical subparts may be used.

(b) Description of exhibits.

Set forth below is a description of each document listed in the exhibit tables.

(1) Underwriting agreement. Each underwriting contract or agreement with a principal underwriter pursuant to

which the securities being registered are to be distributed; if the terms of such documents have not been determined, the proposed forms thereof. Such agreement may be filed as an exhibit to a report on Form 8-K (§ 249.308 of this chapter) which is incorporated by reference into a registration statement subsequent to its effectiveness.

(2) Plan of acquisition, reorganization, arrangement, liquidation or succession. Any material plan of acquisition, disposition, reorganization, readjustment, succession, liquidation or arrangement and any amendments thereto described in the statement or report. Schedules (or similar attachments) to these exhibits shall not be filed unless such schedules contain information which is material to an investment decision and which is not otherwise disclosed in the agreement or the disclosure document. The plan filed shall contain a list briefly identifying the contents of all omitted schedules, together with an agreement to furnish supplementally a copy of any omitted schedule to the Commission upon request.

(3)

(i) Articles of incorporation.

The articles of incorporation of the registrant or instruments corresponding thereto as currently in effect and any amendments thereto. Whenever the registrant files an amendment to its articles of incorporation, it must file a complete copy of the articles as amended. However, if such amendment is being reported on Form 8-K (§ 249.308 of this chapter), the registrant is required to file only the text of the amendment as a Form 8-K exhibit. In such case, a complete copy of the articles of incorporation as amended must be filed as an exhibit to the next Securities Act registration statement or periodic report filed by the registrant to which this exhibit requirement applies. Where it is impracticable for the registrant to file a charter amendment authorizing new securities with the appropriate state authority prior to the effective date of the registration statement registering such securities, the registrant may file as an exhibit to the registration statement the form of amendment to be filed with the state authority. In such a case, if material changes are made after the copy is filed, the registrant must also file the changed copy.

(ii) Bylaws.

The bylaws of the registrant or instruments corresponding thereto as currently in effect and any amendments thereto. Whenever the registrant files an amendment to the bylaws, it must file a complete copy of the amended bylaws. However, if such amendment is being reported on Form 8-K (§ 249.308 of this chapter), the registrant is required to file only the text of the amendment as a Form 8-K exhibit. In such case, a complete copy of the bylaws as amended must be filed as an exhibit to the next Securities Act registration statement or periodic report filed by the registrant to which this exhibit requirement applies.

(4) Instruments defining the rights of security holders, including indentures.

(i) All instruments defining the rights of holders of the equity or debt securities being registered including, where applicable, the relevant portion of the articles of incorporation or by-laws of the registrant.

(ii) Except as set forth in paragraph (b)(4)(iii) of this Item for filings on Forms S-1, S-4, S-11, N-14, and F-4 under the Securities Act (§ 239.11, 239.25, 239.18, 239.23 and 239.34 of this chapter) and Forms 10 and 10-K under the Exchange Act (§§ 249.210 and 249.310 of this chapter) all instruments defining the rights of holders of long-term debt of the registrant and its consolidated subsidiaries and for any of its unconsolidated subsidiaries for which financial statements are required to be filed.

(iii) Where the instrument defines the rights of holders of long-term debt of the registrant and its consolidated subsidiaries and for any of its unconsolidated subsidiaries for which financial statements are required to be filed, there need not be filed:

(A) Any instrument with respect to long-term debt not being registered if the total amount of securities authorized thereunder does not exceed 10 percent of the total assets of the registrant and its subsidiaries on a consolidated basis and if there is filed an agreement to furnish a copy of such agreement to the Commission upon request;

(B) Any instrument with respect to any class of securities if appropriate steps to assure the redemption or retirement of such class will be taken prior to or upon delivery by the registrant of the securities being registered; or

(C) Copies of instruments evidencing scrip certificates for fractions of shares.

(iv) If any of the securities being registered are, or will be, issued under an indenture to be qualified under the Trust Indenture Act, the copy of such indenture which is filed as an exhibit shall include or be accompanied by:

(A) A reasonably itemized and informative table of contents; and

(B) A cross-reference sheet showing the location in the indenture of the provisions inserted pursuant to sections 310 through 318(a) inclusive of the Trust Indenture Act of 1939.

(v) With respect to Forms 8-K and 10-Q under the Exchange Act that are filed and that disclose, in the text of the Form 10-Q, the interim financial statements, or the footnotes thereto the creation of a new class of securities or indebtedness or the modification of existing rights of security holders, file all instruments defining the rights of holders of these securities or indebtedness defining the rights of holders of these securities or indebtedness. However, there need not be filed any instrument with respect to long-term debt not being registered which meets the exclusion set forth in paragraph (b)(4)(iii)(A) of this Item.

Instruction 1 to paragraph (b)(4): There need not be filed any instrument which defines the rights of participants (not as security holders) pursuant to an employee benefit plan.

Instruction 2 to paragraph (b)(4) (for electronic filings): If the instrument defining the rights of security holders is in the form of a certificate, the text appearing on the certificate shall be reproduced in an electronic filing together with a description of any other graphic and image material appearing on the certificate, as provided in Rule 304 of Regulation S-T (§ 232.304 of this chapter).

(5) Opinion re legality.

(i) An opinion of counsel as to the legality of the securities being registered, indicating whether they will, when sold, be legally issued, fully paid and non-assessable, and, if debt securities, whether they will be binding obligations of the registrant.

(ii) If the securities being registered are issued under a plan and the plan is subject to the requirements of ERISA furnish either:

(A) An opinion of counsel which confirms compliance of the provisions of the written documents constituting the plan with the requirements of ERISA pertaining to such provisions; or

(B) A copy of the Internal Revenue Service determination letter that the plan is qualified under *section 401 of the Internal Revenue Code*; or

(iii) If the securities being registered are issued under a plan which is subject to the requirements of ERISA and the plan has been amended subsequent to the filing of paragraph (b)(5)(ii)(A) or (B) above, furnish either:

(A) An opinion of counsel which confirms compliance of the amended provisions of the plan with the requirements of ERISA pertaining to such provisions; or

(B) A copy of the Internal Revenue Service determination letter that the amended plan is qualified under *section 401 of the Internal Revenue Code*.

Note: Attention is directed to Item 8 of Form S-8 for exemptions to this exhibit requirement applicable to that Form.

(6) [Reserved.]

(7) Correspondence from an independent accountant regarding non-reliance on a previously issued audit report or completed interim review. Any written notice from the registrant's current or previously engaged independent accountant that the independent accountant is withdrawing a previously issued audit report or that a previously issued audit report or completed interim review, covering one or more years or interim periods for which the registrant is required to provide financial statements under Regulation S-X (part 210 of this chapter), should no longer be relied upon. In addition, any letter, pursuant to Item 4.02(c) of Form 8-K (§ 249.308 of this chapter), from the independent accountant to the Commission stating whether the independent accountant agrees with the statements made by the registrant describing the events giving rise to the notice.

(8) Opinion re tax matters.

For filings on Form S-11 under the Securities Act (§ 239.18) or those to which Securities Act Industry Guide 5 applies, an opinion of counsel or of an independent public or certified public accountant or, in lieu thereof, a revenue ruling from the Internal Revenue Service, supporting the tax matters and consequences to the shareholders as described in the filing when such tax matters are material to the transaction for which the registration statement is being filed. This exhibit otherwise need only be filed with the other applicable registration forms where the tax consequences are material to an investor and a representation as to tax consequences is set forth in the filing. If a tax opinion is set forth in full in the filing, an indication that such is the case may be made in lieu of filing the otherwise required exhibit. Such tax opinions may be conditioned or may be qualified, so long as such conditions and qualifications are adequately described in the filing.

(9) Voting trust agreement.

Any voting trust agreements and amendments thereto.

(10) Material contracts.

(i) Every contract not made in the ordinary course of business which is material to the registrant and is to be performed in whole or in part at or after the filing of the registration statement or report or was entered into not more than two years before such filing. Only contracts need be filed as to which the registrant or subsidiary of the registrant is a party or has succeeded to a party by assumption or assignment or in which the registrant or such subsidiary has a beneficial interest.

(ii) If the contract is such as ordinarily accompanies the kind of business conducted by the registrant and its subsidiaries, it will be deemed to have been made in the ordinary course of business and need not be filed unless it falls within one or more of the following categories, in which case it shall be filed except where immaterial in amount or

significance:

(A) Any contract to which directors, officers, promoters, voting trustees, security holders named in the registration statement or report, or underwriters are parties other than contracts involving only the purchase or sale of current assets having a determinable market price, at such market price;

(B) Any contract upon which the registrant's business is substantially dependent, as in the case of continuing contracts to sell the major part of registrant's products or services or to purchase the major part of registrant's requirements of goods, services or raw materials or any franchise or license or other agreement to use a patent, formula, trade secret, process or trade name upon which registrant's business depends to a material extent;

(C) Any contract calling for the acquisition or sale of any property, plant or equipment for a consideration exceeding 15 percent of such fixed assets of the registrant on a consolidated basis; or

(D) Any material lease under which a part of the property described in the registration statement or report is held by the registrant.

(iii)

(A) Any management contract or any compensatory plan, contract or arrangement, including but not limited to plans relating to options, warrants or rights, pension, retirement or deferred compensation or bonus, incentive or profit sharing (or if not set forth in any formal document, a written description thereof) in which any director or any of the named executive officers of the registrant, as defined by Item 402(a)(3) (§ 229.402(a)(3)), participates shall be deemed material and shall be filed; and any other management contract or any other compensatory plan, contract, or arrangement in which any other executive officer of the registrant participates shall be filed unless immaterial in amount or significance.

(B) Any compensatory plan, contract or arrangement adopted without the approval of security holders pursuant to which equity may be awarded, including, but not limited to, options, warrants or rights (or if not set forth in any formal document, a written description thereof), in which any employee (whether or not an executive officer of the registrant) participates shall be filed unless immaterial in amount or significance. A compensation plan assumed by a registrant in connection with a merger, consolidation or other acquisition transaction pursuant to which the registrant may make further grants or awards of its equity securities shall be considered a compensation plan of the registrant for purposes of the preceding sentence.

(C) Notwithstanding paragraph (b)(10)(iii)(A) above, the following management contracts or compensatory plans, contracts or arrangements need not be filed:

(1) Ordinary purchase and sales agency agreements.

(2) Agreements with managers of stores in a chain organization or similar organization.

(3) Contracts providing for labor or salesmen's bonuses or payments to a class of security holders, as such.

(4) Any compensatory plan, contract or arrangement which pursuant to its terms is available to employees, officers or directors generally and which in operation provides for the same method of allocation of benefits between management and nonmanagement participants.

(5) Any compensatory plan, contract or arrangement if the registrant is a foreign private issuer that furnishes compensatory information under Item 402(a)(1) (§ 229.402(a)(1)) and the public filing of the plan, contract or arrangement, or portion thereof, is not required in the registrant's home country and is not otherwise publicly disclosed by the registrant.

(6) Any compensatory plan, contract, or arrangement if the registrant is a wholly owned subsidiary of a company that has a class of securities registered pursuant to section 12 or files reports pursuant to section 15(d) of the Exchange Act and is filing a report on Form 10-K or registering debt instruments or preferred stock that are not voting securities on Form S-1.

Instruction 1 to paragraph (b)(10): With the exception of management contracts, in order to comply with paragraph (iii) above, registrants need only file copies of the various compensatory plans and need not file each individual director's or executive officer's personal agreement under the plans unless there are particular provisions in such personal agreements whose disclosure in an exhibit is necessary to an investor's understanding of that individual's compensation under the plan.

Instruction 2 to paragraph (b)(10): If a material contract is executed or becomes effective during the reporting period reflected by a Form 10-Q or Form 10-K, it shall be filed as an exhibit to the Form 10-Q or Form 10-K filed for the corresponding period. See paragraph (a)(4) of this Item. With respect to quarterly reports on Form 10-Q, only those contracts executed or becoming effective during the most recent period reflected in the report shall be filed.

(11) Statement re computation of per share earnings.

A statement setting forth in reasonable detail the computation of per share earnings, unless the computation can be clearly determined from the material contained in the registration statement or report. The information with respect to the computation of per share earnings on both primary and fully diluted basis, presented by exhibit or otherwise, must be furnished even though the amounts of per share earnings on the fully diluted bases are not required to be presented in the income statement under the provisions of Accounting Principles Board Opinion No. 15. That Opinion provides that

any reduction of less than 3% need not be considered as dilution (see footnote to paragraph 14 of the Opinion) and that a computation on the fully diluted basis which results in improvement of earnings per share not be taken into account (see paragraph 40 of the Opinion).

(12) Statements re computation of ratios.

A statement setting forth in reasonable detail the computation of any ratio of earnings to fixed charges, any ratio of earnings to combined fixed charges and preferred stock dividends or any other ratios which appear in the registration statement or report. See Item 503(d) of Regulation S-K (§ 229.503(d)).

(13) Annual report to security holders, Form 10-Q or quarterly report to security holders.

(i) The registrant's annual report to security holders for its last fiscal year, its Form 10-Q (if specifically incorporated by reference in the prospectus) or its quarterly report to security holders, if all or a portion thereof is incorporated by reference in the filing. Such report, except for those portions thereof that are expressly incorporated by reference in the filing, is to be furnished for the information of the Commission and is not to be deemed "filed" as part of the filing. If the financial statements in the report have been incorporated by reference in the filing, the accountant's certificate shall be manually signed in one copy. (*See* Rule 411(b) (§ 230.411(b) of this chapter).

(ii) Electronic filings. If all, or any portion, of the annual or quarterly report to security holders is incorporated by reference into any electronic filing, all, or such portion of the annual or quarterly report to security holders so incorporated, shall be filed in electronic format as an exhibit to the filing.

(14) Code of ethics.

Any code of ethics, or amendment thereto, that is the subject of the disclosure required by Item 406 of Regulation S-K (§ 229.406) or Item 10 of Form 8-K (§ 249.308 of this chapter), to the extent that the registrant intends to satisfy the Item 406 or Item 10 requirements through filing of an exhibit.

(15) Letter re unaudited interim financial information.

A letter, where applicable, from the independent accountant that acknowledges awareness of the use in a registration statement of a report on unaudited interim financial information that pursuant to Rule 436(c) under the Securities Act (§ 230.436(c) of this chapter) is not considered a part of a registration statement prepared or certified by an accountant or a report prepared or certified by an accountant within the meaning of sections 7 and 11 of that Act. Such letter may be filed with the registration statement, an amendment thereto, or a report on Form 10-Q which is incorporated by reference into the registration statement.

(16) Letter re change in certifying accountant.

A letter from the registrant's former independent accountant regarding its concurrence or disagreement with the statements made by the registrant in the current report concerning the resignation or dismissal as the registrant's principal accountant.

(17) Correspondence on departure of director.

Any written correspondence from a former director concerning the circumstances surrounding the former director's retirement, resignation, refusal to stand for re-election or removal, including any letter from the former director to the registrant stating whether the former director agrees with statements made by the registrant describing the former director's departure.

(18) Letter re change in accounting principles.

Unless previously filed, a letter from the registrant's independent accountant indicating whether any change in accounting principles or practices followed by the registrant, or any change in the method of applying any such accounting principles or practices, which affected the financial statements being filed with the Commission in the report or which is reasonably certain to affect the financial statements of future fiscal years is to an alternative principle which in his judgment is preferable under the circumstances. No such letter need be filed when such change is made in response to a standard adopted by the Financial Accounting Standards Board that creates a new accounting principle, that expresses a preference for an accounting principle, or that rejects a specific accounting principle.

(19) Report furnished to security holders.

If the registrant makes available to its security holders or otherwise publishes, within the period prescribed for filing the report, a document or statement containing information meeting some or all of the requirements of Part I of Form 10-Q, the information called for may be incorporated by reference to such published document or statement, provided copies thereof are included as an exhibit to the registration statement or to Part I of the Form 10-Q report.

(20) Other documents or statements to security holders.

If the registrant makes available to its stockholders or otherwise publishes, within the period prescribed for filing the report, a document or statement containing information meeting some or all of the requirements of this form the information called for may be incorporated by reference to such published document or statement provided copies thereof are filed as an exhibit to the report on this form.

(21) Subsidiaries of the registrant.

- (i) List all subsidiaries of the registrant, the state or other jurisdiction of incorporation or organization of each, and

the names under which such subsidiaries do business. This list may be incorporated by reference from a document which includes a complete and accurate list.

(ii) The names of particular subsidiaries may be omitted if the unnamed subsidiaries, considered in the aggregate as a single subsidiary, would not constitute a significant subsidiary as of the end of the year covered by this report. (See the definition of "significant subsidiary" in Rule 1-02(w) (*17 CFR 210.1-02(w)*) of Regulation S-X.) The names of consolidated wholly-owned multiple subsidiaries carrying on the same line of business, such as chain stores or small loan companies, may be omitted, provided the name of the immediate parent, the line of business, the number of omitted subsidiaries operating in the United States and the number operating in foreign countries are given. This instruction shall not apply, however, to banks, insurance companies, savings and loan associations or to any subsidiary subject to regulation by another Federal agency.

(22) Published report regarding matters submitted to vote of security holders. Published reports containing all of the information called for by Item 4 of Part II of Form 10-Q or Item 4 of Part I of Form 10-K that is referred to therein in lieu of providing disclosure in Form 10-Q or 10-K, that are required to be filed as exhibits by Rule 12b-23(a)(3) under the Exchange Act (§ 240.12b-23(a)(3) of this chapter).

(23) Consents of experts and counsel--

(i) Securities Act filings. All written consents required to be filed shall be dated and manually signed. Where the consent of an expert or counsel is contained in his report or opinion or elsewhere in the registration statement or document filed therewith, a reference shall be made in the index to the report, the part of the registration statement or document or opinion, containing the consent.

(ii) Exchange Act reports. Where the filing of a written consent is required with respect to material incorporated by reference in a previously filed registration statement under the Securities Act, such consent may be filed as exhibit to the material incorporated by reference. Such consents shall be dated and manually signed.

(24) Power of attorney.

If any name is signed to the registration statement or report pursuant to a power of attorney, manually signed copies of such power of attorney shall be filed. Where the power of attorney is contained elsewhere in the registration statement or documents filed therewith a reference shall be made in the index to the part of the registration statement or document containing such power of attorney. In addition, if the name of any officer signing on behalf of the registrant is signed pursuant to a power of attorney, certified copies of a resolution of the registrant's board of directors authorizing such signature shall also be filed. A power of attorney that is filed with the Commission shall relate to a specific filing or an amendment thereto, provided, however, that a power of attorney relating to a registration statement under the Securities Act or an amendment thereto also may relate to any registration statement for the same offering that is to be effective upon filing pursuant to Rule 462(b) under the Securities Act (§ 230.462(b) of this chapter). A power of

attorney that confers general authority shall not be filed with the Commission.

(25) Statement of eligibility of trustee.

(i) A statement of eligibility and qualification of each person designated to act as trustee under an indenture to be qualified under the Trust Indenture Act of 1939. Such statement of eligibility shall be bound separately from the other exhibits.

(ii) Electronic filings. The requirement to bind separately the statement of eligibility and qualification of each person designated to act as a trustee under the Trust Indenture Act of 1939 from other exhibits shall not apply to statements submitted in electronic format. Rather, such statements must be submitted as exhibits in the same electronic submission as the registration statement to which they relate, or in an amendment thereto, except that electronic filers that rely on Trust Indenture Act Section 305(b)(2) for determining the eligibility of the trustee under indentures for securities to be issued, offered or sold on a delayed basis by or on behalf of the registrant shall file such statements separately in the manner prescribed by § 260.5b-1 through § 260.5b-3 of this chapter and by the EDGAR Filer Manual.

(26) Invitations for competitive bids.

If the registration statement covers securities to be offered at competitive bidding, any form of communication which is an invitation for competitive bid which will be sent or given to any person shall be filed.

(27) to (30) [Reserved.]

(31)

(i) Rule 13a-14(a)/15d-14(a) Certifications. The certifications required by Rule 13a-14(a) (*17 CFR 240.13a-14(a)*) or Rule 15d-14(a) (*17 CFR 240.15d-14(a)*) exactly as set forth below:

Certifications*

I, [identify the certifying individual], certify that:

1. I have reviewed this [specify report] of [identify registrant];
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were

made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize

and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

[Title]

*Provide a separate certification for each principal executive officer and principal financial officer of the registrant. See Rules 13a-14(a) and 15d-14(a).

(ii) Rule 13a-14(d)/15d-14(d) Certifications. If an asset-backed issuer (as defined in 229.1101), the certifications required by Rule 13a-14(d) (*17 CFR 240.13a-14(d)*) or Rule 15d-14(d) (*17 CFR 240.15d-14(d)*) exactly as set forth below:

Certifications¹

I, [identify the certifying individual], certify that:

1. I have reviewed this report on Form 10-K and all reports on Form 10-D required to be filed in respect of the period covered by this report on Form 10-K of [identify the issuing entity] (the "Exchange Act periodic reports");

2. Based on my knowledge, the Exchange Act periodic reports, taken as a whole, do not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, all of the distribution, servicing and other information required to be provided under Form 10-D for the period covered by this report is included in the Exchange Act periodic reports;

4. [I am responsible for reviewing the activities performed by the servicer(s) and based on my knowledge and the compliance review(s) conducted in preparing the servicer compliance statement(s) required in this report under Item 1123 of Regulation AB, and except as disclosed in the Exchange Act periodic reports, the servicer(s) [has/have] fulfilled

[its/their] obligations under the servicing agreement(s) in all material respects; and]

[Based on my knowledge and the servicer compliance statement(s) required in this report under Item 1123 of Regulation AB, and except as disclosed in the Exchange Act periodic reports, the servicer(s) [has/have] fulfilled [its/their] obligations under the servicing agreement(s) in all material respects; and]n2

5. All of the reports on assessment of compliance with servicing criteria for asset-backed securities and their related attestation reports on assessment of compliance with servicing criteria for asset-backed securities required to be included in this report in accordance with Item 1122 of Regulation AB and Exchange Act Rules 13a-18 and 15d-18 have been included as an exhibit to this report, except as otherwise disclosed in this report. Any material instances of noncompliance described in such reports have been disclosed in this report on Form 10-K. n3

[In giving the certifications above, I have reasonably relied on information provided to me by the following unaffiliated parties [name of servicer, sub-servicer, co-servicer, depositor or trustee].]n4

[Title]

(32) Section 1350 Certifications.

(i) The certifications required by Rule 13a-14(b) (*17 CFR 240.13a-14(b)*) or Rule 15d-14(b) (*17 CFR 240.15d-14(b)*) and Section 1350 of Chapter 63 of Title 18 of the United States Code (*18 U.S.C. 1350*).

(ii) A certification furnished pursuant to this item will not be deemed "filed" for purposes of Section 18 of the Exchange Act (*15 U.S.C. 78r*), or otherwise subject to the liability of that section. Such certification will not be deemed to be incorporated by reference into any filing under the Securities Act or the Exchange Act, except to the extent that the registrant specifically incorporates it by reference.

(33) Report on assessment of compliance with servicing criteria for asset-backed securities. Each report on assessment of compliance with servicing criteria required by § 229.1122(a).

(34) Attestation report on assessment of compliance with servicing criteria for asset-backed securities. Each

attestation report on assessment of compliance with servicing criteria for asset-backed securities required by § 229.1122(b).

(35) Servicer compliance statement. Each servicer compliance statement required by § 229.1123.

(36) to (98) [Reserved.]

(99) Additional exhibits.

(i) Any additional exhibits which the registrant may wish to file shall be so marked as to indicate clearly the subject matters to which they refer.

(ii) Any document (except for an exhibit) or part thereof which is incorporated by reference in the filing and is not otherwise required to be filed by this Item or is not a Commission filed document incorporated by reference in a Securities Act registration statement.

(iii) If pursuant to Section 11(a) of the Securities Act (*15 U.S.C. 77k(a)*) an issuer makes generally available to its security holders an earnings statement covering a period of at least 12 months beginning after the effective date of the registration statement, and if such earnings statement is made available by "other methods" than those specified in paragraphs (a) or (b) of § 230.158 of this chapter, it must be filed as an exhibit to the Form 10-Q or the Form 10-K, as appropriate, covering the period in which the earnings statement was released.

(100) XBRL-Related Documents. An electronic filer that participates in the voluntary XBRL (eXtensible Business Reporting Language) program may submit XBRL-Related Documents (§ 232.11 of this chapter) in electronic format as an exhibit to: the filing to which they relate; an amendment to such filing; or a Form 8-K (§ 249.308 of this chapter) that references such filing, if the Form 8-K is submitted no earlier than date of that filing.

(c) Smaller reporting companies. A smaller reporting company need not provide the disclosure required in paragraph (b)(12) of this Item, Statements re computation of ratios.

FOOTNOTES:

(n9)Footnote 1. With respect to asset-backed issuers, the certification must be signed by either: (1) The senior officer in charge of securitization of the depositor if the depositor is signing the report on Form 10-K; or (2) The senior officer in charge of the servicing function of the servicer if the servicer is signing the report on Form 10-K on behalf of the issuing entity. See Rules 13a-14(e) and 15d-14(e) (240.13a-14(e) and 240.15d-14(e)). If multiple servicers are involved in servicing the pool assets, the senior officer in charge of the servicing function of the master servicer (or entity performing the equivalent function) must sign if a representative of the servicer is to sign the certification. If there is a master servicer and one or more underlying servicers, the references in the certification relate to the master servicer. A natural person must sign the certification in his or her individual capacity, although the title of that person in the organization of which he or she is an officer may be included under the signature.

(n10)Footnote 2. The first version of paragraph 4 is to be used when the servicer is signing the report on behalf of the issuing entity. The second version of paragraph 4 is to be used when the depositor is signing the report.

(n11)Footnote 3. The certification refers to the reports prepared by parties participating in the servicing function that are required to be included as an exhibit to the Form 10-K. See Item 1122 of Regulation AB (229.1122) and Rules 13a-18 and 15d-18 (240.13a-18 and 240.15d-18 of this chapter). If a report that is otherwise required to be included is not attached, disclosure that the report is not included and an associated explanation must be provided in the Form 10-K report.

(n12)Footnote 4. Because the signer of the certification must rely in certain circumstances on information provided by unaffiliated parties outside of the signer's control, this paragraph must be included if the signer is reasonably relying on information that unaffiliated trustees, depositors, servicers, sub-servicers or co-servicers have provided.

Appendix E FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO CERTIFICATION OF PERIODIC REPORTS AND MANAGEMENT ASSESSMENT OF INTERNAL CONTROLS

2-E Corporate Governance: Law and Practice 17 CFR § 240.13a-14

§ 14 Certification of Disclosure in Annual and Quarterly Reports [Implementing Sarbanes-Oxley § 302].

(a) Each report, including transition reports, filed on Form 10-Q, Form 10-K, Form 20-F or Form 40-F (§§ 249.308a, 249.310, 249.220f or 249.240f of this chapter) under Section 13(a) of the Act (*15 U.S.C. 78m(a)*) other than a report filed by an Asset-Backed Issuer (as defined in § 229.1101 of this chapter) or a report on Form 20-F filed under § 240.13a-19, must include certifications in the form specified in the applicable exhibit filing requirements of such report and such certifications must be filed as an exhibit to such report. Each principal executive and principal financial officer of the issuer, or persons performing similar functions, at the time of filing of the report must sign a certification. The principal executive and principal financial officers of an issuer may omit the portion of the introductory language in paragraph 4 as well as language in paragraph 4(b) of the certification that refers to the certifying officers' responsibility for designing, establishing and maintaining internal control over financial reporting for the issuer until the issuer becomes subject to the internal control over financial reporting requirements in § 240.13a-15 or 240.15d-15).

(b) Each periodic report containing financial statements filed by an issuer pursuant to section 13(a) of the Act (*15 U.S.C. 78m(a)*) must be accompanied by the certifications required by Section 1350 of Chapter 63 of Title 18 of the United States Code (*18 U.S.C. 1350*) and such certifications must be furnished as an exhibit to such report as specified in the applicable exhibit requirements for such report. Each principal executive and principal financial officer of the issuer (or equivalent thereof) must sign a certification. This requirement may be satisfied by a single certification signed by an issuer's principal executive and principal financial officers.

(c) A person required to provide a certification specified in paragraph (a), (b) or (d) of this section may not have the certification signed on his or her behalf pursuant to a power of attorney or other form of confirming authority.

(d) Each annual report and transition report filed on Form 10-K (§ 249.310 of this chapter) by an asset-backed issuer under section 13(a) of the Act (*15 U.S.C. 78m(a)*) must include a certification in the form specified in the applicable exhibit filing requirements of such report and such certification must be filed as an exhibit to such report. Terms used in

paragraphs (d) and (e) of this section have the same meaning as in Item 1101 of Regulation AB (§ 229.1101 of this chapter).

(e) With respect to asset-backed issuers, the certification required by paragraph (d) of this section must be signed by either:

(1) The senior officer in charge of securitization of the depositor if the depositor is signing the report; or

(2) The senior officer in charge of the servicing function of the servicer if the servicer is signing the report on behalf of the issuing entity. If multiple servicers are involved in servicing the pool assets, the senior officer in charge of the servicing function of the master servicer (or entity performing the equivalent function) must sign if a representative of the servicer is to sign the report on behalf of the issuing entity.

(f) The certification requirements of this section do not apply to XBRL-Related Documents, as defined in § 232.11 of this chapter.

Sections 240.3a43-1 and 240.3a44-1 also issued under sec. 3; 15 U.S.C. 78c. Section 240.3b-9 also issued under secs. 2, 3 and 15, 89 Stat. 97, as amended, 89 Stat. 121, as amended (15 U.S.C. 78b, 78c, 78o). Section 240.9b-1 is also issued under sec. 2, 7, 10, 19(a), 48 Stat. 74, 78, 81, 85; secs. 201, 205, 209, 120, 48 Stat. 905, 906, 908; secs. 1-4, 8, 68 Stat. 683, 685; sec. 12(a), 73 Stat. 143; sec. 7(a), 74 Stat. 412; sec. 27(a), 84 Stat. 1433; sec. 308(a)(2), 90 Stat. 57; sec. 505, 94 Stat. 2292; secs. 9, 15, 23(a), 48 Stat. 889, 895, 901; sec. 230(a), 49 Stat. 704; secs. 3, 8, 49 Stat. 1377, 1379; sec. 2, 52 Stat. 1075; secs. 6, 10, 78 Stat. 570-574, 580; sec. 11(d), 84 Stat. 121; sec. 18, 89 Stat. 155; sec. 204, 91 Stat. 1500; 15 U.S.C. 77b, 77g, 77j, 77s(a), 78i, 78o, 78w(a). Section 240.10b-10 is also issued under secs. 2, 3, 9, 10, 11, 11A, 15, 17, 23, 48 Stat. 891, 89 Stat. 97, 121, 137, 156, (15 U.S.C. 78b, 78c, 78i, 78j, 78k, 78k-1, 78o, 78q). Section 240.12a-7 also issued under 15 U.S.C. 78a *et seq.*, particularly secs. 3(a)(12), 15 U.S.C. 78c(a)(12), 6, 15 U.S.C. 78(f), 11A, 15 U.S.C. 78k, 12, 15 U.S.C. 78(l), and 23(a)(1), 15 U.S.C. 78(w)(a)(1). Sections 240.12b-1 to 240.12b-36 also issued under secs. 3, 12, 13, 15, 48 Stat. 892, as amended, 894, 895, as amended; 15 U.S.C. 78c, 78l, 78m, 78o. Section 240.12b-15 is also issued under secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745. Section

240.12b-25 is also issued under 15 U.S.C. 80a-8, 80a-24(a), 80a-29, and 80a-37. Section 240.12g-3 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.12g3-2 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.13a-10 is also issued under secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745. Section 240.13a-11 is also issued under secs. 3 (a) and 306(a), Pub L. 107-204, 116 Stat. 745. Section 240.13a-14 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.13a-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Sections 240.13e-4, 240.14d-7, 240.14d-10 and 240.14e-1 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(d) and 14(e), 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(d) and 78n(e) and sec. 23(c) of the Investment Company Act of 1940, 15 U.S.C. 80a-23(c). Sections 240.13e-4 to 240.13e-101 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(e), 15(c)(1), 48 Stat. 882, 889, 891, 894, 895, 901, sec. 8, 49 Stat. 1379, sec. 5, 78 Stat. 569, 570, secs. 2, 3, 82 Stat. 454, 455, secs. 1, 2, 3-5, 84 Stat. 1497, secs. 3, 18, 89 Stat. 97, 155; 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(e), 78o(c); sec. 23(c) of the Investment Company Act of 1940; 54 Stat. 825; 15 U.S.C. 80a-23(c). Section 240.13f-2(T) also issued under sec. 13(f)(1) (15 U.S.C. 78m(f)(1)). Sections 240.14a-1, 240.14a-3, 240.14a-13, 240.14b-1, 240.14b-2, 240.14c-1, and 240.14c-7 also issued under secs. 12, 15 U.S.C. 781, and 14, Pub. L. 99-222, 99 Stat. 1737, 15 U.S.C. 78n. Sections 240.14a-3, 240.14a-13, 240.14b-1 and 240.14c-7 also issued under secs. 12, 14 and 17, 15 U.S.C. 781, 78n and 78g. Sections 240.14c-1 to 240.14c-101 also issued under sec. 14, 48 Stat. 895; 15 U.S.C. 78n. Section 240.14d-1 is also issued under 15 U.S.C. 77g, 77j, 77s(a), 77ttt(a), 79t, 80a-37. Section 240.14e-2 is also issued under 15 U.S.C. 77g, 77h, 77s(a), 77sss, 79t, 80a-37(a). Section 240.14e-4 also issued under the Exchange Act, 15 U.S.C. 78a *et seq.*, and particularly sections 3(b), 10(a), 10(b), 14(e), 15(c), and 23(a) of the Exchange Act (15 U.S.C. 78c(b), 78j(a), 78j(b), 78n(e), 78o(c), and 78w(a)). Section 240.15a-6, also issued under secs. 3, 10, 15, and 17, 15 U.S.C. 78c, 78j, 78o, and 78q. Sections 240.15b1-3 and 240.15b2-1 also issued under 15 U.S.C. 78o, 78q. Section 240.15b2-2 also issued under secs. 3, 15; 15 U.S.C. 78c, 78o. Sections 240.15b10-1 to 240.15b10-9 also issued under secs. 15, 17, 48 Stat. 895, 897, sec. 203, 49 Stat. 704, secs. 4, 8, 49 Stat. 1379, sec. 5, 52 Stat. 1076, sec. 6, 78 Stat. 570; 15 U.S.C. 78o, 78q, 12 U.S.C. 241 nt. Section 240.15c2-6, also issued under secs. 3, 10, and 15, 15 U.S.C. 78c, 78j, and 78o. Section 240.15c2-11 also issued under 15 U.S.C. 78j(b), 78o(c), 78q(a), and 78w(a). Section 240.15c2-12 also issued under 15 U.S.C. 78b, 78c, 78j, 78o, 78o-4 and 78q. Section 240.15c3-1 is also issued under secs. 15(c)(3), 15 U.S.C. 78o(c)(3). Section 240.15d-5 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.15d-10 is also issued under 15 U.S.C. 80a-20(a) and 80a-37(a), and secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.15d-11 is also issued under secs. 3 (a) and 306(a), Pub L. 107-204, 116 Stat. 745. Section 240.15d-14 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.15d-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Sections 240.15Ca1-1, 240.15Ca2-1, 240.15Ca2-2, 240.15Ca2-3, 240.15Ca2-4, 240.15Ca2-5, 240.15Cc1-1 also issued under secs. 3, 15C; 15 U.S.C. 78c, 78o-5. Section 240.17a-3 also issued under secs. 2, 17, 23a, 48 Stat. 897, as amended; 15 U.S.C. 78d-1, 78d-2, 78q; secs. 12, 14, 17, 23(a), 48 Stat. 892, 895, 897, 901; secs. 1, 4, 8, 49 Stat. 1375, 1379; sec. 203(a), 49 Stat. 704; sec. 5, 52 Stat. 1076; sec. 202, 68 Stat. 686; secs. 3, 5, 10, 78 Stat. 565-568, 569, 570, 580; secs. 1, 3, 82 Stat. 454, 455; secs. 28(c), 3-5, 84 Stat. 1435, 1497; sec. 105(b), 88 Stat. 1503; secs. 8, 9, 14, 18, 89 Stat. 117, 118, 137, 155; 15 U.S.C. 78l, 78n, 78q, 78w(a). Section 240.17a-4 also issued under secs. 2, 17, 23(a), 48 Stat. 897, as amended; 15 U.S.C. 78a, 78d-1, 78d-2; sec. 14, Pub. L. 94-29, 89 Stat. 137 (15 U.S.C. 78a); sec. 18, Pub. L. 94-29, 89 Stat. 155 (15 U.S.C. 78w). Section 240.17a-23 also issued under 15 U.S.C. 78b, 78c, 78q, and 78w(a). Section 240.17f-1 is also authorized under sections 2, 17 and 17A, 48 Stat. 891, 89 Stat. 137, 141 (15 U.S.C. 78b, 78q, 78q-1). Section 240.17h-1T also issued under 15 U.S.C. 78q. Sections 240.17Ac2-1(c) and 240.17Ac2-2 also issued under secs. 17, 17A and 23(a); 48 Stat. 897, as amended, 89 Stat. 137, 141 and 48 Stat. 901 (15 U.S.C. 78q, 78q-1, 78w(a)). Section 240.17Ad-1 is also issued under secs. 2, 17, 17A and 23(a); 48 Stat. 841 as amended, 48 Stat. 897, as amended, 89 Stat. 137, 141, and 48 Stat. 901 (15 U.S.C. 78b, 78q, 78q-1, 78w). Sections 240.17Ad-5 and 240.17Ad-10 are also issued under secs. 3 and 17A; 48 Stat. 882, as amended, and 89 Stat. (15 U.S.C. 78c and 78q-1). Section 240.17Ad-7 also issued under 15 U.S.C. 78b, 78q, and 78q-1. Sections 240.19c-4 also issued under secs. 6, 11A, 14, 15A, 19 and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78o-3, and 78s). Section 240.19c-5 also issued under Sections 6, 11A, and 19 of the Securities Exchange Act of 1934, 48 Stat. 885, as amended, 89 Stat. 111, as amended, and 48 Stat. 898, as amended, 15 U.S.C. 78f, 78k-1, and 78s. Section 240.31-1 is also issued under sec. 31, 48 Stat. 904, as amended (15 U.S.C. 78ee).

NOTES: [EFFECTIVE DATE NOTE: 71 FR 76580, 76596, Dec. 21, 2006, amended paragraph (a), effective Feb.

20, 2007. For compliance date information, see 71 FR 76580, 76581, Dec. 21, 2006; 73 FR 934, 976, Jan. 4, 2008, amended this section, effective Feb. 4, 2008. For compliance date information, see 73 FR 934, Jan. 4, 2008].

Appendix E FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO CERTIFICATION OF PERIODIC REPORTS AND MANAGEMENT ASSESSMENT OF INTERNAL CONTROLS

2-E Corporate Governance: Law and Practice 17 CFR § 240.15d-14

§ 14 Certification of disclosure in Annual and Quarterly Reports [Implementing Sarbanes-Oxley § 302].

(a) Each report, including transition reports, filed on Form 10-Q, Form 10-K, Form 20-F or Form 40-F (§ 249.308a, 249.310, 249.220f or 249.240f of this chapter) under section 15(d) of the Act (*15 U.S.C. 78o(d)*), other than a report filed by an Asset-Backed Issuer (as defined in § 229.1101 of this chapter) or a report on Form 20-F filed under § 240.15d-19, must include certifications in the form specified in the applicable exhibit filing requirements of such report, and such certifications must be filed as an exhibit to such report. Each principal executive and principal financial officer of the issuer, or persons performing similar functions, at the time of filing of the report must sign a certification. The principal executive and principal financial officers of an issuer may omit the portion of the introductory language in paragraph 4 as well as language in paragraph 4(b) of the certification that refers to the certifying officers' responsibility for designing, establishing and maintaining internal control over financial reporting for the issuer until the issuer becomes subject to the internal control over financial reporting requirements in § 240.13a-15 or 240.15d-15).

(b) Each periodic report containing financial statements filed by an issuer pursuant to section 15(d) of the Act (*15 U.S.C. 78o(d)*) must be accompanied by the certifications required by Section 1350 of Chapter 63 of Title 18 of the United States Code (*18 U.S.C. 1350*) and such certifications must be furnished as an exhibit to such report as specified in the applicable exhibit requirements for such report. Each principal executive and principal financial officer of the issuer (or equivalent thereof) must sign a certification. This requirement may be satisfied by a single certification signed by an issuer's principal executive and principal financial officers.

(c) A person required to provide a certification specified in paragraph (a), (b) or (d) of this section may not have the certification signed on his or her behalf pursuant to a power of attorney or other form of confirming authority.

(d) Each annual report and transition report filed on Form 10-K (§ 249.310 of this chapter) by an asset-backed issuer under section 15(d) of the Act (*15 U.S.C. 78o(d)*) must include a certification in the form specified in the applicable exhibit filing requirements of such report and such certification must be filed as an exhibit to such report. Terms used in

paragraphs (d) and (e) of this section have the same meaning as in Item 1101 of Regulation AB (§ 229.1101 of this chapter).

(e) With respect to asset-backed issuers, the certification required by paragraph (d) of this section must be signed by either:

(1) The senior officer in charge of securitization of the depositor if the depositor is signing the report; or

(2) The senior officer in charge of the servicing function of the servicer if the servicer is signing the report on behalf of the issuing entity. If multiple servicers are involved in servicing the pool assets, the senior officer in charge of the servicing function of the master servicer (or entity performing the equivalent function) must sign if a representative of the servicer is to sign the report on behalf of the issuing entity.

(f) The certification requirements of this section do not apply to XBRL-Related Documents, as defined in § 232.11 of this chapter.

Section 240.3a12-9 also issued under secs. 3(a)(12), 7(c), 11(d)(1), 15 U.S.C. 78c(a)(12), 78g(c), 78k(d)(1). Section 240.3a12-10 also issued under 15 U.S.C. 78b and c. Sections 240.3a43-1 and 240.3a44-1 also issued under sec. 3; 15 U.S.C. 78c. Section 240.3b-9 also issued under secs. 2, 3 and 15, 89 Stat. 97, as amended, 89 Stat. 121, as amended (15 U.S.C. 78b, 78c, 78o). Section 240.9b-1 is also issued under sec. 2, 7, 10, 19(a), 48 Stat. 74, 78, 81, 85; secs. 201, 205, 209, 120, 48 Stat. 905, 906, 908; secs. 1-4, 8, 68 Stat. 683, 685; sec. 12(a), 73 Stat. 143; sec. 7(a), 74 Stat. 412; sec. 27(a), 84 Stat. 1433; sec. 308(a)(2), 90 Stat. 57; sec. 505, 94 Stat. 2292; secs. 9, 15, 23(a), 48 Stat. 889, 895, 901; sec. 230(a), 49 Stat. 704; secs. 3, 8, 49 Stat. 1377, 1379; sec. 2, 52 Stat. 1075; secs. 6, 10, 78 Stat. 570-574, 580; sec. 11(d), 84 Stat. 121; sec. 18, 89 Stat. 155; sec. 204, 91 Stat. 1500; 15 U.S.C. 77b, 77g, 77j, 77s(a), 78i, 78o, 78w(a). Section 240.10b-10 is also issued under secs. 2, 3, 9, 10, 11, 11A, 15, 17, 23, 48 Stat. 891, 89 Stat. 97, 121, 137, 156, (15 U.S.C. 78b, 78c, 78i, 78j, 78k, 78k-1, 78o, 78q). Section 240.12a-7 also issued under 15 U.S.C. 78a *et seq.*, particularly secs. 3(a)(12), 15 U.S.C. 78c(a)(12), 6, 15 U.S.C. 78(f), 11A, 15 U.S.C. 78k, 12, 15 U.S.C. 78(l), and 23(a)(1), 15 U.S.C. 78(w)(a)(1). Sections 240.12b-1 to 240.12b-36 also issued under secs. 3, 12, 13, 15, 48 Stat. 892, as amended, 894, 895, as amended; 15 U.S.C. 78c, 78l, 78m, 78o. Section 240.12b-15 is also issued under secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745. Section

240.12b-25 is also issued under 15 U.S.C. 80a-8, 80a-24(a), 80a-29, and 80a-37. Section 240.12g-3 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.12g3-2 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.13a-10 is also issued under secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745. Section 240.13a-11 is also issued under secs. 3 (a) and 306(a), Pub L. 107-204, 116 Stat. 745. Section 240.13a-14 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.13a-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Sections 240.13e-4, 240.14d-7, 240.14d-10 and 240.14e-1 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(d) and 14(e), 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(d) and 78n(e) and sec. 23(c) of the Investment Company Act of 1940, 15 U.S.C. 80a-23(c). Sections 240.13e-4 to 240.13e-101 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(e), 15(c)(1), 48 Stat. 882, 889, 891, 894, 895, 901, sec. 8, 49 Stat. 1379, sec. 5, 78 Stat. 569, 570, secs. 2, 3, 82 Stat. 454, 455, secs. 1, 2, 3-5, 84 Stat. 1497, secs. 3, 18, 89 Stat. 97, 155; 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(e), 78o(c); sec. 23(c) of the Investment Company Act of 1940; 54 Stat. 825; 15 U.S.C. 80a-23(c). Section 240.13f-2(T) also issued under sec. 13(f)(1) (15 U.S.C. 78m(f)(1)). Sections 240.14a-1, 240.14a-3, 240.14a-13, 240.14b-1, 240.14b-2, 240.14c-1, and 240.14c-7 also issued under secs. 12, 15 U.S.C. 781, and 14, Pub. L. 99-222, 99 Stat. 1737, 15 U.S.C. 78n. Sections 240.14a-3, 240.14a-13, 240.14b-1 and 240.14c-7 also issued under secs. 12, 14 and 17, 15 U.S.C. 781, 78n and 78g. Sections 240.14c-1 to 240.14c-101 also issued under sec. 14, 48 Stat. 895; 15 U.S.C. 78n. Section 240.14d-1 is also issued under 15 U.S.C. 77g, 77j, 77s(a), 77ttt(a), 79t, 80a-37. Section 240.14e-2 is also issued under 15 U.S.C. 77g, 77h, 77s(a), 77sss, 79t, 80a-37(a). Section 240.14e-4 also issued under the Exchange Act, 15 U.S.C. 78a *et seq.*, and particularly sections 3(b), 10(a), 10(b), 14(e), 15(c), and 23(a) of the Exchange Act (15 U.S.C. 78c(b), 78j(a), 78j(b), 78n(e), 78o(c), and 78w(a)). Section 240.15a-6, also issued under secs. 3, 10, 15, and 17, 15 U.S.C. 78c, 78j, 78o, and 78q. Sections 240.15b1-3 and 240.15b2-1 also issued under 15 U.S.C. 78o, 78q. Section 240.15b2-2 also issued under secs. 3, 15; 15 U.S.C. 78c, 78o. Sections 240.15b10-1 to 240.15b10-9 also issued under secs. 15, 17, 48 Stat. 895, 897, sec. 203, 49 Stat. 704, secs. 4, 8, 49 Stat. 1379, sec. 5, 52 Stat. 1076, sec. 6, 78 Stat. 570; 15 U.S.C. 78o, 78q, 12 U.S.C. 241 nt. Section 240.15c2-6, also issued under secs. 3, 10, and 15, 15 U.S.C. 78c, 78j, and 78o. Section 240.15c2-11 also issued under 15 U.S.C. 78j(b), 78o(c), 78q(a), and 78w(a). Section 240.15c2-12 also issued under 15 U.S.C. 78b, 78c, 78j, 78o, 78o-4 and 78q. Section 240.15c3-1 is also issued under secs. 15(c)(3), 15 U.S.C. 78o(c)(3). Section 240.15d-5 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.15d-10 is also issued under 15 U.S.C. 80a-20(a) and 80a-37(a), and secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.15d-11 is also issued under secs. 3 (a) and 306(a), Pub L. 107-204, 116 Stat. 745. Section 240.15d-14 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.15d-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Sections 240.15Ca1-1, 240.15Ca2-1, 240.15Ca2-2, 240.15Ca2-3, 240.15Ca2-4, 240.15Ca2-5, 240.15Cc1-1 also issued under secs. 3, 15C; 15 U.S.C. 78c, 78o-5. Section 240.17a-3 also issued under secs. 2, 17, 23a, 48 Stat. 897, as amended; 15 U.S.C. 78d-1, 78d-2, 78q; secs. 12, 14, 17, 23(a), 48 Stat. 892, 895, 897, 901; secs. 1, 4, 8, 49 Stat. 1375, 1379; sec. 203(a), 49 Stat. 704; sec. 5, 52 Stat. 1076; sec. 202, 68 Stat. 686; secs. 3, 5, 10, 78 Stat. 565-568, 569, 570, 580; secs. 1, 3, 82 Stat. 454, 455; secs. 28(c), 3-5, 84 Stat. 1435, 1497; sec. 105(b), 88 Stat. 1503; secs. 8, 9, 14, 18, 89 Stat. 117, 118, 137, 155; 15 U.S.C. 78l, 78n, 78q, 78w(a). Section 240.17a-4 also issued under secs. 2, 17, 23(a), 48 Stat. 897, as amended; 15 U.S.C. 78a, 78d-1, 78d-2; sec. 14, Pub. L. 94-29, 89 Stat. 137 (15 U.S.C. 78a); sec. 18, Pub. L. 94-29, 89 Stat. 155 (15 U.S.C. 78w). Section 240.17a-23 also issued under 15 U.S.C. 78b, 78c, 78q, and 78w(a). Section 240.17f-1 is also authorized under sections 2, 17 and 17A, 48 Stat. 891, 89 Stat. 137, 141 (15 U.S.C. 78b, 78q, 78q-1). Section 240.17h-1T also issued under 15 U.S.C. 78q. Sections 240.17Ac2-1(c) and 240.17Ac2-2 also issued under secs. 17, 17A and 23(a); 48 Stat. 897, as amended, 89 Stat. 137, 141 and 48 Stat. 901 (15 U.S.C. 78q, 78q-1, 78w(a)). Section 240.17Ad-1 is also issued under secs. 2, 17, 17A and 23(a); 48 Stat. 841 as amended, 48 Stat. 897, as amended, 89 Stat. 137, 141, and 48 Stat. 901 (15 U.S.C. 78b, 78q, 78q-1, 78w). Sections 240.17Ad-5 and 240.17Ad-10 are also issued under secs. 3 and 17A; 48 Stat. 882, as amended, and 89 Stat. (15 U.S.C. 78c and 78q-1). Section 240.17Ad-7 also issued under 15 U.S.C. 78b, 78q, and 78q-1. Sections 240.19c-4 also issued under secs. 6, 11A, 14, 15A, 19 and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78o-3, and 78s). Section 240.19c-5 also issued under Sections 6, 11A, and 19 of the Securities Exchange Act of 1934, 48 Stat. 885, as amended, 89 Stat. 111, as amended, and 48 Stat. 898, as amended, 15 U.S.C. 78f, 78k-1, and 78s. Section 240.31-1 is also issued under sec. 31, 48 Stat. 904, as amended (15 U.S.C. 78ee).

Appendix E FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO CERTIFICATION OF PERIODIC REPORTS AND MANAGEMENT ASSESSMENT OF INTERNAL CONTROLS

2-E Corporate Governance: Law and Practice 17 CFR § 240.13a-15

§ 15 Controls and Procedures [Implementing Sarbanes- Oxley §§ 302, 906].

(c) The management of each such issuer, that either had been required to file an annual report pursuant to section 13(a) or 15(d) of the Act (*15 U.S.C. 78m(a) or 78o(d)*) for the prior fiscal year or previously had filed an annual report with the Commission for the prior fiscal year, other than an investment company registered under section 8 of the Investment Company Act of 1940 (*15 U.S.C. 80a-8*), must evaluate, with the participation of the issuer's principal executive and principal financial officers, or persons performing similar functions, the effectiveness, as of the end of each fiscal year, of the issuer's internal control over financial reporting. The framework on which management's evaluation of the issuer's internal control over financial reporting is based must be a suitable, recognized control framework that is established by a body or group that has followed due-process procedures, including the broad distribution of the framework for public comment. Although there are many different ways to conduct an evaluation of the effectiveness of internal control over financial reporting to meet the requirements of this paragraph, an evaluation that is conducted in accordance with the interpretive guidance issued by the Commission in Release No. 34-55929 will satisfy the evaluation required by this paragraph.

(d) The management of each such issuer that either had been required to file an annual report pursuant to section 13(a) or 15(d) of the Act (*15 U.S.C. 78m(a) or 78o(d)*) for the prior fiscal year or had filed an annual report with the Commission for the prior fiscal year, other than an investment company registered under section 8 of the Investment Company Act of 1940 (*15 U.S.C. 80a-8*), must evaluate, with the participation of the issuer's principal executive and principal financial officers, or persons performing similar functions, any change in the issuer's internal control over financial reporting, that occurred during each of the issuer's fiscal quarters, or fiscal year in the case of a foreign private issuer, that has materially affected, or is reasonably likely to materially affect, the issuer's internal control over financial reporting.

(e) For purposes of this section, the term disclosure controls and procedures means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Act (*15 U.S.C. 78a et seq.*) is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls

and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

(f) The term internal control over financial reporting is defined as a process designed by, or under the supervision of, the issuer's principal executive and principal financial officers, or persons performing similar functions, and effected by the issuer's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

(1) Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the issuer;

(2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the issuer are being made only in accordance with authorizations of management and directors of the issuer; and

(3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the issuer's assets that could have a material effect on the financial statements.

Sections 240.3a43-1 and 240.3a44-1 also issued under sec. 3; 15 U.S.C. 78c. Section 240.3b-9 also issued under secs. 2, 3 and 15, 89 Stat. 97, as amended, 89 Stat. 121, as amended (15 U.S.C. 78b, 78c, 78o). Section 240.9b-1 is also issued under sec. 2, 7, 10, 19(a), 48 Stat. 74, 78, 81, 85; secs. 201, 205, 209, 120, 48 Stat. 905, 906, 908; secs. 1-4, 8, 68 Stat. 683, 685; sec. 12(a), 73 Stat. 143; sec. 7(a), 74 Stat. 412; sec. 27(a), 84 Stat. 1433; sec. 308(a)(2), 90 Stat. 57; sec. 505, 94 Stat. 2292; secs. 9, 15, 23(a), 48 Stat. 889, 895, 901; sec. 230(a), 49 Stat. 704; secs. 3, 8, 49 Stat. 1377, 1379; sec. 2, 52 Stat. 1075; secs. 6, 10, 78 Stat. 570-574, 580; sec. 11(d), 84 Stat. 121; sec. 18, 89 Stat. 155; sec. 204, 91 Stat. 1500; 15 U.S.C. 77b, 77g, 77j, 77s(a), 78i, 78o, 78w(a). Section 240.10b-10 is also issued under secs. 2, 3,

9, 10, 11, 11A, 15, 17, 23, 48 Stat. 891, 89 Stat. 97, 121, 137, 156, (15 U.S.C. 78b, 78c, 78i, 78j, 78k, 78k-1, 78o, 78q). Section 240.12a-7 also issued under 15 U.S.C. 78a *et seq.*, particularly secs. 3(a)(12), 15 U.S.C. 78c(a)(12), 6, 15 U.S.C. 78(f), 11A, 15 U.S.C. 78k, 12, 15 U.S.C. 78(l), and 23(a)(1), 15 U.S.C. 78(w)(a)(1). Sections 240.12b-1 to 240.12b-36 also issued under secs. 3, 12, 13, 15, 48 Stat. 892, as amended, 894, 895, as amended; 15 U.S.C. 78c, 78l, 78m, 78o. Section 240.12b-15 is also issued under secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745. Section 240.12b-25 is also issued under 15 U.S.C. 80a-8, 80a-24(a), 80a-29, and 80a-37. Section 240.12g-3 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.12g3-2 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.13a-10 is also issued under secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745. Section 240.13a-11 is also issued under secs. 3 (a) and 306(a), Pub L. 107-204, 116 Stat. 745. Section 240.13a-14 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.13a-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Sections 240.13e-4, 240.14d-7, 240.14d-10 and 240.14e-1 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(d) and 14(e), 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(d) and 78n(e) and sec. 23(c) of the Investment Company Act of 1940, 15 U.S.C. 80a-23(c). Sections 240.13e-4 to 240.13e-101 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(e), 15(c)(1), 48 Stat. 882, 889, 891, 894, 895, 901, sec. 8, 49 Stat. 1379, sec. 5, 78 Stat. 569, 570, secs. 2, 3, 82 Stat. 454, 455, secs. 1, 2, 3-5, 84 Stat. 1497, secs. 3, 18, 89 Stat. 97, 155; 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(e), 78o(c); sec. 23(c) of the Investment Company Act of 1940; 54 Stat. 825; 15 U.S.C. 80a-23(c). Section 240.13f-2(T) also issued under sec. 13(f)(1) (15 U.S.C. 78m(f)(1)). Sections 240.14a-1, 240.14a-3, 240.14a-13, 240.14b-1, 240.14b-2, 240.14c-1, and 240.14c-7 also issued under secs. 12, 15 U.S.C. 78l, and 14, Pub. L. 99-222, 99 Stat. 1737, 15 U.S.C. 78n. Sections 240.14a-3, 240.14a-13, 240.14b-1 and 240.14c-7 also issued under secs. 12, 14 and 17, 15 U.S.C. 78l, 78n and 78g. Sections 240.14c-1 to 240.14c-101 also issued under sec. 14, 48 Stat. 895; 15 U.S.C. 78n. Section 240.14d-1 is also issued under 15 U.S.C. 77g, 77j, 77s(a), 77ttt(a), 79t, 80a-37. Section 240.14e-2 is also issued under 15 U.S.C. 77g, 77h, 77s(a), 77sss, 79t, 80a-37(a). Section 240.14e-4 also issued under the Exchange Act, 15 U.S.C. 78a *et seq.*, and particularly sections 3(b), 10(a), 10(b), 14(e), 15(c), and 23(a) of the Exchange Act (15 U.S.C. 78c(b), 78j(a), 78j(b), 78n(e), 78o(c), and 78w(a)). Section 240.15a-6, also issued under secs. 3, 10, 15, and 17, 15 U.S.C. 78c, 78j, 78o, and 78q. Sections 240.15b1-3 and 240.15b2-1 also issued under 15 U.S.C. 78o, 78q. Section 240.15b2-2 also issued under secs. 3, 15; 15 U.S.C. 78c, 78o. Sections 240.15b10-1 to 240.15b10-9 also issued under secs. 15, 17, 48 Stat. 895, 897, sec. 203, 49 Stat. 704, secs. 4, 8, 49 Stat. 1379, sec. 5, 52 Stat. 1076, sec. 6, 78 Stat. 570; 15 U.S.C. 78o, 78q, 12 U.S.C. 241 nt. Section 240.15c2-6, also issued under secs. 3, 10, and 15, 15 U.S.C. 78c, 78j, and 78o. Section 240.15c2-11 also issued under 15 U.S.C. 78j(b), 78o(c), 78q(a), and 78w(a). Section 240.15c2-12 also issued under 15 U.S.C. 78b, 78c, 78j, 78o, 78o-4 and 78q. Section 240.15c3-1 is also issued under secs. 15(c)(3), 15 U.S.C. 78o(c)(3). Section 240.15d-5 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.15d-10 is also issued under 15 U.S.C. 80a-20(a) and 80a-37(a), and secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.15d-11 is also issued under secs. 3 (a) and 306(a), Pub L. 107-204, 116 Stat. 745. Section 240.15d-14 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.15d-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Sections 240.15Ca1-1, 240.15Ca2-1, 240.15Ca2-2, 240.15Ca2-3, 240.15Ca2-4, 240.15Ca2-5, 240.15Cc1-1 also issued under secs. 3, 15C; 15 U.S.C. 78c, 78o-5. Section 240.17a-3 also issued under secs. 2, 17, 23a, 48 Stat. 897, as amended; 15 U.S.C. 78d-1, 78d-2, 78q; secs. 12, 14, 17, 23(a), 48 Stat. 892, 895, 897, 901; secs. 1, 4, 8, 49 Stat. 1375, 1379; sec. 203(a), 49 Stat. 704; sec. 5, 52 Stat. 1076; sec. 202, 68 Stat. 686; secs. 3, 5, 10, 78 Stat. 565-568, 569, 570, 580; secs. 1, 3, 82 Stat. 454, 455; secs. 28(c), 3-5, 84 Stat. 1435, 1497; sec. 105(b), 88 Stat. 1503; secs. 8, 9, 14, 18, 89 Stat. 117, 118, 137, 155; 15 U.S.C. 78l, 78n, 78q, 78w(a). Section 240.17a-4 also issued under secs. 2, 17, 23(a), 48 Stat. 897, as amended; 15 U.S.C. 78a, 78d-1, 78d-2; sec. 14, Pub. L. 94-29, 89 Stat. 137 (15 U.S.C. 78a); sec. 18, Pub. L. 94-29, 89 Stat. 155 (15 U.S.C. 78w). Section 240.17a-23 also issued under 15 U.S.C. 78b, 78c, 78q, and 78w(a). Section 240.17f-1 is also authorized under sections 2, 17 and 17A, 48 Stat. 891, 89 Stat. 137, 141 (15 U.S.C. 78b, 78q, 78q-1). Section 240.17h-1T also issued under 15 U.S.C. 78q. Sections 240.17Ac2-1(c) and 240.17Ac2-2 also issued under secs. 17, 17A and 23(a); 48 Stat. 897, as amended, 89 Stat. 137, 141 and 48 Stat. 901 (15 U.S.C. 78q, 78q-1, 78w(a)). Section 240.17Ad-1 is also issued under secs. 2, 17, 17A and 23(a); 48 Stat. 841 as amended, 48 Stat. 897, as amended, 89 Stat. 137, 141, and 48 Stat. 901 (15 U.S.C. 78b, 78q, 78q-1, 78w). Sections 240.17Ad-5 and 240.17Ad-10 are also issued under secs. 3 and 17A; 48 Stat. 882, as amended, and 89 Stat. (15 U.S.C. 78c and 78q-1). Section 240.17Ad-7 also issued under 15 U.S.C. 78b, 78q, and 78q-1. Sections 240.19c-4 also issued under secs. 6, 11A, 14, 15A, 19 and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78o-3,

and 78s). Section 240.19c-5 also issued under Sections 6, 11A, and 19 of the Securities Exchange Act of 1934, 48 Stat. 885, as amended, 89 Stat. 111, as amended, and 48 Stat. 898, as amended, 15 U.S.C. 78f, 78k-1, and 78s. Section 240.31-1 is also issued under sec. 31, 48 Stat. 904, as amended (15 U.S.C. 78ee).

Appendix E FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO CERTIFICATION OF PERIODIC REPORTS AND MANAGEMENT ASSESSMENT OF INTERNAL CONTROLS

2-E Corporate Governance: Law and Practice 17 CFR § 240.15d-15

§ 15 Controls and Procedures [Implementing Sarbanes- Oxley §§ 302, 906].

(a) Every issuer that files reports under section 15(d) of the Act (*15 U.S.C. 78o(d)*), other than an Asset Backed Issuer (as defined in § 229.1101 of this chapter), a small business investment company registered on Form N-5 (§ § 239.24 and 274.5 of this chapter), or a unit investment trust as defined in section 4(2) of the Investment Company Act of 1940 (*15 U.S.C. 80a-4(2)*), must maintain disclosure controls and procedures (as defined in paragraph (e) of this section) and, if the issuer either had been required to file an annual report pursuant to section 13(a) or 15(d) of the Act (*15 U.S.C. 78m(a) or 78o(d)*) for the prior fiscal year or had filed an annual report with the Commission for the prior fiscal year, internal control over financial reporting (as defined in paragraph (f) of this section).

(b) Each such issuer's management must evaluate, with the participation of the issuer's principal executive and principal financial officers, or persons performing similar functions, the effectiveness of the issuer's disclosure controls and procedures, as of the end of each fiscal quarter, except that management must perform this evaluation:

(1) In the case of a foreign private issuer (as defined in § 240.3b-4) as of the end of each fiscal year; and

(2) In the case of an investment company registered under section 8 of the Investment Company Act of 1940 (*15 U.S.C. 80a-8*), within the 90-day period prior to the filing date of each report requiring certification under § 270.30a-2 of this chapter.

(c) The management of each such issuer, that either had been required to file an annual report pursuant to section 13(a) or 15(d) of the Act (*15 U.S.C. 78m(a) or 78o(d)*) for the prior fiscal year or previously had filed an annual report with the Commission for the prior fiscal year, other than an investment company registered under section 8 of the Investment Company Act of 1940, (*15 U.S.C. 80a-8*) must evaluate, with the participation of the issuer's principal executive and

principal financial officers, or persons performing similar functions, the effectiveness, as of the end of each fiscal year, of the issuer's internal control over financial reporting. The framework on which management's evaluation of the issuer's internal control over financial reporting is based must be a suitable, recognized control framework that is established by a body or group that has followed due-process procedures, including the broad distribution of the framework for public comment. Although there are many different ways to conduct an evaluation of the effectiveness of internal control over financial reporting to meet the requirements of this paragraph, an evaluation that is conducted in accordance with the interpretive guidance issued by the Commission in Release No. 34-55929 will satisfy the evaluation required by this paragraph.

(d) The management of each such issuer that previously either had been required to file an annual report pursuant to section 13(a) or 15(d) of the Act (*15 U.S.C. 78m(a) or 78o(d)*) for the prior fiscal year or previously had filed an annual report with the Commission for the prior fiscal year, other than an investment company registered under section 8 of the Investment Company Act of 1940 (*15 U.S.C. 80a-8*), must evaluate, with the participation of the issuer's principal executive and principal financial officers, or persons performing similar functions, any change in the issuer's internal control over financial reporting, that occurred during each of the issuer's fiscal quarters, or fiscal year in the case of a foreign private issuer, that has materially affected, or is reasonably likely to materially affect, the issuer's internal control over financial reporting.

(e) For purposes of this section, the term disclosure controls and procedures means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Act (*15 U.S.C. 78a et seq.*) is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

(f) The term internal control over financial reporting is defined as a process designed by, or under the supervision of, the issuer's principal executive and principal financial officers, or persons performing similar functions, and effected by the issuer's board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

(1) Pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the issuer;

(2) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the issuer are being made only in accordance with authorizations of management and directors of the issuer; and

(3) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the issuer's assets that could have a material effect on the financial statements.

Section 240.12a-7 also issued under 15 U.S.C. 78a *et seq.*, particularly secs. 3(a)(12), 15 U.S.C. 78c(a)(12), 6, 15 U.S.C. 78(f), 11A, 15 U.S.C. 78k, 12, 15 U.S.C. 78(l), and 23(a)(1), 15 U.S.C. 78(w)(a)(1). Sections 240.12b-1 to 240.12b-36 also issued under secs. 3, 12, 13, 15, 48 Stat. 892, as amended, 894, 895, as amended; 15 U.S.C. 78c, 78l, 78m, 78o. Section 240.12b-15 is also issued under secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745. Section 240.12b-25 is also issued under 15 U.S.C. 80a-8, 80a-24(a), 80a-29, and 80a-37. Section 240.12g-3 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.12g3-2 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.13a-10 is also issued under secs. 3(a) and 302, Pub.L. No. 107-204, 116 Stat. 745. Section 240.13a-11 is also issued under secs. 3 (a) and 306(a), Pub L. 107-204, 116 Stat. 745. Section 240.13a-14 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.13a-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Sections 240.13e-4, 240.14d-7, 240.14d-10 and 240.14e-1 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(d) and 14(e), 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(d) and 78n(e) and sec. 23(c) of the Investment Company Act of 1940, 15 U.S.C. 80a-23(c). Sections 240.13e-4 to 240.13e-101 also issued under secs. 3(b), 9(a)(6), 10(b), 13(e), 14(e), 15(c)(1), 48 Stat. 882, 889, 891, 894, 895, 901, sec. 8, 49 Stat. 1379, sec. 5, 78 Stat. 569, 570, secs. 2, 3, 82 Stat. 454, 455, secs. 1, 2, 3-5, 84 Stat. 1497, secs. 3, 18, 89 Stat. 97, 155; 15 U.S.C. 78c(b), 78i(a)(6), 78j(b), 78m(e), 78n(e), 78o(c); sec. 23(c) of the Investment Company Act of 1940; 54 Stat. 825; 15 U.S.C. 80a-23(c). Section 240.13f-2(T) also issued under sec. 13(f)(1) (15 U.S.C. 78m(f)(1)). Sections 240.14a-1, 240.14a-3, 240.14a-13, 240.14b-1, 240.14b-2, 240.14c-1, and 240.14c-7 also issued under secs. 12, 15 U.S.C. 78l, and 14, Pub. L. 99-222, 99 Stat. 1737, 15 U.S.C. 78n. Sections 240.14a-3, 240.14a-13, 240.14b-1 and 240.14c-7 also issued under secs. 12, 14 and 17, 15 U.S.C. 78l, 78n and 78g; Sections 240.14c-1 to 240.14c-101 also issued under sec. 14, 48 Stat. 895; 15 U.S.C. 78n. Section 240.14d-1 is also issued under 15 U.S.C. 77g, 77j, 77s(a), 77ttt(a), 79t, 80a-37. Section 240.14e-4 also issued under the Exchange Act, 15 U.S.C. 78a *et seq.*, and particularly sections 3(b), 10(a), 10(b), 14(e), 15(c), and 23(a) of the Exchange Act (15 U.S.C. 78c(b), 78j(a), 78j(b), 78n(e), 78o(c), and 78w(a)). Section 240.15a-6, also issued under secs. 3, 10, 15, and 17, 15 U.S.C. 78c, 78j, 78o, and 78q. Sections 240.15b1-3 and 240.15b2-1 also

issued under 15 U.S.C. 78o, 78q. Section 240.15b2-2 also issued under secs. 3, 15; 15 U.S.C. 78c, 78o. Sections 240.15b10-1 to 240.15b10-9 also issued under secs. 15, 17, 48 Stat. 895, 897, sec. 203, 49 Stat. 704, secs. 4, 8, 49 Stat. 1379, sec. 5, 52 Stat. 1076, sec. 6, 78 Stat. 570; 15 U.S.C. 78o, 78q, 12 U.S.C. 241 nt. Section 240.15c2-6, also issued under secs. 3, 10, and 15, 15 U.S.C. 78c, 78j, and 78o. Section 240.15c2-11 also issued under 15 U.S.C. 78j(b), 78o(c), 78q(a), and 78w(a). Section 240.15c2-12 also issued under 15 U.S.C. 78b, 78c, 78j, 78o, 78o-4 and 78q. Section 240.15c3-1 is also issued under secs. 15(c)(3), 15 U.S.C. 78o(c)(3). Section 240.15d-5 is also issued under 15 U.S.C. 77f, 77g, 77h, 77j, 77s(a). Section 240.15d-10 is also issued under 15 U.S.C. 80a-20(a) and 80a-37(a), and secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.15d-11 is also issued under secs. 3 (a) and 306(a), Pub. L. 107-204, 116 Stat. 745. Section 240.15d-14 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Section 240.15d-15 is also issued under secs. 3(a) and 302, Pub. L. No. 107-204, 116 Stat. 745. Sections 240.15Ca1-1, 240.15Ca2-1, 240.15Ca2-2, 240.15Ca2-3, 240.15Ca2-4, 240.15Ca2-5, 240.15Cc1-1 also issued under secs. 3, 15C; 15 U.S.C. 78c, 78o-5. Section 240.17a-3 also issued under secs. 2, 17, 23a, 48 Stat. 897, as amended; 15 U.S.C. 78d-1, 78d-2, 78q; secs. 12, 14, 17, 23(a), 48 Stat. 892, 895, 897, 901; secs. 1, 4, 8, 49 Stat. 1375, 1379; sec. 203(a), 49 Stat. 704; sec. 5, 52 Stat. 1076; sec. 202, 68 Stat. 686; secs. 3, 5, 10, 78 Stat. 565-568, 569, 570, 580; secs. 1, 3, 82 Stat. 454, 455; secs. 28(c), 3-5, 84 Stat. 1435, 1497; sec. 105(b), 88 Stat. 1503; secs. 8, 9, 14, 18, 89 Stat. 117, 118, 137, 155; 15 U.S.C. 78l, 78n, 78q, 78w(a). Section 240.17a-4 also issued under secs. 2, 17, 23(a), 48 Stat. 897, as amended; 15 U.S.C. 78a, 78d-1, 78d-2; sec. 14, Pub. L. 94-29, 89 Stat. 137 (15 U.S.C. 78a); sec. 18, Pub. L. 94-29, 89 Stat. 155 (15 U.S.C. 78w). Section 240.17a-23 also issued under 15 U.S.C. 78b, 78c, 78q, and 78w(a). Section 240.17f-1 is also authorized under sections 2, 17 and 17A, 48 Stat. 891, 89 Stat. 137, 141 (15 U.S.C. 78b, 78q, 78q-1). Section 240.17Ad-7 also issued under 15 U.S.C. 78b, 78q, and 78q-1. Sections 240.19c-4 also issued under secs. 6, 11A, 14, 15A, 19 and 23 of the Securities Exchange Act of 1934 (15 U.S.C. 78o-3, and 78s). Section 240.19c-5 also issued under Sections 6, 11A, and 19 of the Securities Exchange Act of 1934, 48 Stat. 885, as amended, 89 Stat. 111, as amended, and 48 Stat. 898, as amended, 15 U.S.C. 78f, 78k-1, and 78s. Section 240.31-1 is also issued under sec. 31, 48 Stat. 904, as amended (15 U.S.C. 78ee).

Appendix E FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO CERTIFICATION OF PERIODIC REPORTS AND MANAGEMENT ASSESSMENT OF INTERNAL CONTROLS

2-E Corporate Governance: Law and Practice Sarbanes-Oxley § 404

§ Oxley 404 Management Assessment of Internal Controls (15 USC 7262)

(a) Rules Required.-- The Commission shall prescribe rules requiring each annual report required by section 13(a) or 15(d) of the Securities Exchange Act of 1934 (*15 U.S.C. 78m or 78o(d)*) to contain an internal control report, which shall--

(1) state the responsibility of management for establishing and maintaining an adequate internal control structure and procedures for financial reporting; and

(2) contain an assessment, as of the end of the most recent fiscal year of the issuer, of the effectiveness of the internal control structure and procedures of the issuer for financial reporting.

(b) Internal Control Evaluation and Reporting.-- With respect to the internal control assessment required by subsection (a), each registered public accounting firm that prepares or issues the audit report for the issuer shall attest to, and report on, the assessment made by the management of the issuer. An attestation made under this subsection shall be made in accordance with standards for attestation engagements issued or adopted by the Board. Any such attestation shall not be the subject of a separate engagement.

Appendix E FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO CERTIFICATION OF PERIODIC REPORTS AND MANAGEMENT ASSESSMENT OF INTERNAL CONTROLS

2-E Corporate Governance: Law and Practice 17 CFR §§ 210.1-02

§ 02 Definitions of Terms used in Regulation S-X.

Unless the context otherwise requires, terms defined in the general rules and regulations or in the instructions to the applicable form, when used in Regulation S-X (this part 210), shall have the respective meanings given in such instructions or rules. In addition, the following terms shall have the meanings indicated in this section unless the context otherwise requires.

(a)

(1) Accountant's report.

The term accountant's report, when used in regard to financial statements, means a document in which an independent public or certified public accountant indicates the scope of the audit (or examination) which he has made and sets forth his opinion regarding the financial statements taken as a whole, or an assertion to the effect that an overall opinion cannot be expressed. When an overall opinion cannot be expressed, the reasons therefor shall be stated.

(2) Attestation report on internal control over financial reporting. The term attestation report on internal control over financial reporting means a report in which a registered public accounting firm expresses an opinion, either unqualified or adverse, as to whether the registrant maintained, in all material respects, effective internal control over financial reporting (as defined in § 240.13a-15(f) or 240.15d-15(f) of this chapter), except in the rare circumstance of a scope limitation that cannot be overcome by the registrant or the registered public accounting firm which would result in the accounting firm disclaiming an opinion.

(3) Attestation report on assessment of compliance with servicing criteria for asset-backed securities. The term attestation report on assessment of compliance with servicing criteria for asset-backed securities means a report in which a registered public accounting firm, as required by § 240.13a-18(c) or 240.15d-18(c) of this chapter, expresses an

opinion, or states that an opinion cannot be expressed, concerning an asserting party's assessment of compliance with servicing criteria, as required by § 240.13a-18(b) or 240.15d-18(b) of this chapter, in accordance with standards on attestation engagements. When an overall opinion cannot be expressed, the registered public accounting firm must state why it is unable to express such an opinion.

(4) Definitions of terms related to internal control over financial reporting. Material weakness means a deficiency, or a combination of deficiencies, in internal control over financial reporting (as defined in § 240.13a-15(f) or 240.15d-15(f) of this chapter) such that there is a reasonable possibility that a material misstatement of the registrant's annual or interim financial statements will not be prevented or detected on a timely basis. Significant deficiency means a deficiency, or a combination of deficiencies, in internal control over financial reporting that is less severe than a material weakness, yet important enough to merit attention by those responsible for oversight of the registrant's financial reporting.

(b) Affiliate.

An affiliate of, or a person affiliated with, a specific person is a person that directly, or indirectly through one or more intermediaries, controls, or is controlled by, or is under common control with, the person specified.

(c) Amount.

The term amount, when used in regard to securities, means the principal amount if relating to evidences of indebtedness, the number of shares if relating to shares, and the number of units if relating to any other kind of security.

(d) Audit (or examination).

Audit (or examination). The term audit (or examination), when used in regard to financial statements, means an examination of the financial statements by an independent accountant in accordance with generally accepted auditing standards, as may be modified or supplemented by the Commission, for the purpose of expressing an opinion thereon.

(e) Bank holding company.

The term bank holding company means a person which is engaged, either directly or indirectly, primarily in the business of owning securities of one or more banks for the purpose, and with the effect, of exercising control.

(f) Certified.

The term certified, when used in regard to financial statements, means examined and reported upon with an opinion expressed by an independent public or certified public accountant.

(g) Control.

The term control (including the terms controlling, controlled by and under common control with) means the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a person, whether through the ownership of voting shares, by contract, or otherwise.

(h) Development stage company.

A company shall be considered to be in the development stage if it is devoting substantially all of its efforts to establishing a new business and either of the following conditions exists: (1) Planned principal operations have not commenced. (2) Planned principal operations have commenced, but there has been no significant revenue therefrom.

(i) Equity security.

The term equity security means any stock or similar security; or any security convertible, with or without consideration, into such a security, or carrying any warrant or right to subscribe to or purchase such a security; or any such warrant or right.

(j) Fifty-percent-owned person.

The term 50-percent-owned person, in relation to a specified person, means a person approximately 50 percent of whose outstanding voting shares is owned by the specified person either directly, or indirectly through one or more intermediaries.

(k) Fiscal year.

The term fiscal year means the annual accounting period or, if no closing date has been adopted, the calendar year ending on December 31.

(l) Foreign business.

A business that is majority owned by persons who are not citizens or residents of the United States and is not organized under the laws of the United States or any state thereof, and either:

(1) More than 50 percent of its assets are located outside the United States; or

(2) The majority of its executive officers and directors are not United States citizens or residents.

(m) Insurance holding company.

The term insurance holding company means a person which is engaged, either directly or indirectly, primarily in the business of owning securities of one or more insurance companies for the purpose, and with the effect, of exercising control.

(n) Majority-owned subsidiary.

The term majority-owned subsidiary means a subsidiary more than 50 percent of whose outstanding voting shares is owned by its parent and/or the parent's other majority-owned subsidiaries.

(o) Material.

The term material, when used to qualify a requirement for the furnishing of information as to any subject, limits the information required to those matters about which an average prudent investor ought reasonably to be informed.

(p) Parent.

A parent of a specified person is an affiliate controlling such person directly, or indirectly through one or more intermediaries.

(q) Person.

The term person means an individual, a corporation, a partnership, an association, a joint-stock company, a business trust, or an unincorporated organization.

(r) Principal holder of equity securities.

The term principal holder of equity securities, used in respect of a registrant or other person named in a particular statement or report, means a holder of record or a known beneficial owner of more than 10 percent of any class of equity securities of the registrant or other person, respectively, as of the date of the related balance sheet filed.

(s) Promoter.

The term promoter includes:

- (1) Any person who, acting alone or in conjunction with one or more other persons, directly or indirectly takes

initiative in founding and organizing the business or enterprise of an issuer;

(2) A Any person who, in connection with the founding and organizing of the business or enterprise of an issuer, directly or indirectly receives in consideration of services or property, or both services and property, 10 percent or more of any class of securities of the issuer or 10 percent or more of the proceeds from the sale of any class of securities. However, a person who receives such securities or proceeds either solely as underwriting commissions or solely in consideration of property shall not be deemed a promoter within the meaning of this paragraph if such person does not otherwise take part in founding and organizing the enterprise.

(t) Registrant.

The term registrant means the issuer of the securities for which an application, a registration statement, or a report is filed.

(u) Related parties.

The term related parties is used as that term is defined in the Glossary to Statement of Financial Accounting Standards No. 57, "Related Party Disclosures."

(v) Share.

The term share means a share of stock in a corporation or unit of interest in an unincorporated person.

(w) Significant subsidiary.

The term significant subsidiary means a subsidiary, including its subsidiaries, which meets any of the following conditions:

(1) The registrant's and its other subsidiaries' investments in and advances to the subsidiary exceed 10 percent of the total assets of the registrant and its subsidiaries consolidated as of the end of the most recently completed fiscal year (for a proposed business combination to be accounted for as a pooling of interests, this condition is also met when the number of common shares exchanged or to be exchanged by the registrant exceeds 10 percent of its total common shares outstanding at the date the combination is initiated); or

(2) The registrant's and its other subsidiaries' proportionate share of the total assets (after intercompany eliminations) of the subsidiary exceeds 10 percent of the total assets of the registrants and its subsidiaries consolidated as of the end of the most recently completed fiscal year; or

(3) The registrant's and its other subsidiaries' equity in the income from continuing operations before income taxes, extraordinary items and cumulative effect of a change in accounting principle of the subsidiary exceeds 10 percent of such income of the registrant and its subsidiaries consolidated for the most recently completed fiscal year.

Note to paragraph (w): A registrant that files its financial statements in accordance with or provides a reconciliation to U.S. Generally Accepted Accounting Principles shall make the prescribed tests using amounts determined under U.S. Generally Accepted Accounting Principles. A foreign private issuer that files its financial statements in accordance with IFRS as issued by the IASB shall make the prescribed tests using amounts determined under IFRS as issued by the IASB.

Computational note: For purposes of making the prescribed income test the following guidance should be applied:

1. When a loss has been incurred by either the parent and its subsidiaries consolidated or the tested subsidiary, but not both, the equity in the income or loss of the tested subsidiary should be excluded from the income of the registrant and its subsidiaries consolidated for purposes of the computation.

2. If income of the registrant and its subsidiaries consolidated for the most recent fiscal year is at least 10 percent lower than the average of the income for the last five fiscal years, such average income should be substituted for purposes of the computation. Any loss years should be omitted for purposes of computing average income.

3. Where the test involves combined entities, as in the case of determining whether summarized financial data should be presented, entities reporting losses shall not be aggregated with entities reporting income.

(x) Subsidiary.

A subsidiary of a specified person is an affiliate controlled by such person directly, or indirectly through one or more intermediaries.

(y) Totally held subsidiary.

The term totally held subsidiary means a subsidiary (1) substantially all of whose outstanding equity securities are owned by its parent and/or the parent's other totally held subsidiaries, and (2) which is not indebted to any person other than its parent and/or the parent's other totally held subsidiaries, in an amount which is material in relation to the particular subsidiary, excepting indebtedness incurred in the ordinary course of business which is not overdue and which matures within 1 year from the date of its creation, whether evidenced by securities or not. Indebtedness of a subsidiary which is secured by its parent by guarantee, pledge, assignment, or otherwise is to be excluded for purposes of paragraph (x)(2) of this section.

(z) Voting shares.

The term voting shares means the sum of all rights, other than as affected by events of default, to vote for election of directors and/or the sum of all interests in an unincorporated person.

(aa) Wholly owned subsidiary.

The term wholly owned subsidiary means a subsidiary substantially all of whose outstanding voting shares are owned by its parent and/or the parent's other wholly owned subsidiaries.

(bb) Summarized financial information.

(1) Except as provided in paragraph (aa)(2), summarized financial information referred to in this regulation shall mean the presentation of summarized information as to the assets, liabilities and results of operations of the entity for which the information is required. Summarized financial information shall include the following disclosures:

(i) Current assets, noncurrent assets, current liabilities, noncurrent liabilities, and, when applicable, redeemable preferred stocks (*see* § 210.5-02.28) and minority interests (for specialized industries in which classified balance sheets are normally not presented, information shall be provided as to the nature and amount of the major components of assets and liabilities);

(ii) Net sales or gross revenues, gross profit (or, alternatively, costs and expenses applicable to net sales or gross revenues), income or loss from continuing operations before extraordinary items and cumulative effect of a change in accounting principle, and net income or loss (for specialized industries, other information may be substituted for sales and related costs and expenses if necessary for a more meaningful presentation); and

(2) Summarized financial information for unconsolidated subsidiaries and 50 percent or less owned persons referred to in and required by § 210.10-01(b) for interim periods shall include the information required by paragraph (aa)(1)(ii) of this section.

Appendix E FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO CERTIFICATION OF PERIODIC REPORTS AND MANAGEMENT ASSESSMENT OF INTERNAL CONTROLS

2-E Corporate Governance: Law and Practice 17 CFR § 229.308

§ 308 (Item 308) Internal Control Over Financial Reporting.

(a) Management's annual report on internal control over financial reporting. Provide a report of management on the registrant's internal control over financial reporting (as defined in § 240.13a-15(f) or 240.15d-15(f) of this chapter) that contains:

(1) A statement of management's responsibility for establishing and maintaining adequate internal control over financial reporting for the registrant;

(2) A statement identifying the framework used by management to evaluate the effectiveness of the registrant's internal control over financial reporting as required by paragraph (c) of § 240.13a-15 or 240.15d-15 of this chapter;

(3) Management's assessment of the effectiveness of the registrant's internal control over financial reporting as of the end of the registrant's most recent fiscal year, including a statement as to whether or not internal control over financial reporting is effective. This discussion must include disclosure of any material weakness in the registrant's internal control over financial reporting identified by management. Management is not permitted to conclude that the registrant's internal control over financial reporting is effective if there are one or more material weaknesses in the registrant's internal control over financial reporting; and

(4) A statement that the registered public accounting firm that audited the financial statements included in the annual report containing the disclosure required by this Item has issued an attestation report on the registrant's internal control over financial reporting.

(b) Attestation report of the registered public accounting firm. Provide the registered public accounting firm's attestation report on the registrant's internal control over financial reporting in the registrant's annual report containing the disclosure required by this Item.

(c) Changes in internal control over financial reporting. Disclose any change in the registrant's internal control over financial reporting identified in connection with the evaluation required by paragraph (d) of § 240.13a-15 or 240.15d-15 of this chapter that occurred during the registrant's last fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

Instructions to Item 308.

1. A registrant need not comply with paragraphs (a) and (b) of this Item until it either had been required to file an annual report pursuant to section 13(a) or 15(d) of the Exchange Act (*15 U.S.C. 78m or 78o(d)*) for the prior fiscal year or had filed an annual report with the Commission for the prior fiscal year. A registrant that does not comply shall include a statement in the first annual report that it files in substantially the following form: "This annual report does not include a report of management's assessment regarding internal control over financial reporting or an attestation report of the company's registered public accounting firm due to a transition period established by rules of the Securities and Exchange Commission for newly public companies."

2. The registrant must maintain evidential matter, including documentation, to provide reasonable support for management's assessment of the effectiveness of the registrant's internal control over financial reporting.

§ Oxley 304 Forfeiture of Certain Bonuses and Profits (15 USC 7243)

(a) Additional Compensation Prior to Noncompliance With Commission Financial Reporting Requirements.-- If an issuer is required to prepare an accounting restatement due to the material noncompliance of the issuer, as a result of misconduct, with any financial reporting requirement under the securities laws, the chief executive officer and chief financial officer of the issuer shall reimburse the issuer for--

(1) any bonus or other incentive-based or equity-based compensation received by that person from the issuer during the 12-month period following the first public issuance or filing with the Commission (whichever first occurs) of the financial document embodying such financial reporting requirement; and

(2) any profits realized from the sale of securities of the issuer during that 12-month period.

(b) Commission Exemption Authority.-- The Commission may exempt any person from the application of subsection (a), as it deems necessary and appropriate.

Appendix F FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO EXECUTIVE
COMPENSATION, LOANS TO EXECUTIVES AND INSIDER TRADING DURING PENSION FUND
BLACKOUT PERIODS

2-F Corporate Governance: Law and Practice Sarbanes-Oxley § 306

§ Oxley 306 Insider Trading During Pension Fund Blackout Periods (15 USC 7244)

(a) Prohibition of Insider Trading During Pension Fund Blackout Periods.--

(1) In general.--Except to the extent otherwise provided by rule of the Commission pursuant to paragraph (3), it shall be unlawful for any director or executive officer of an issuer of any equity security (other than an exempted security), directly or indirectly, to purchase, sell, or otherwise acquire or transfer any equity security of the issuer (other than an exempted security) during any blackout period with respect to such equity security if such director or officer acquires such equity security in connection with his or her service or employment as a director or executive officer.

(2) Remedy.--

(A) In general.--Any profit realized by a director or executive officer referred to in paragraph (1) from any purchase, sale, or other acquisition or transfer in violation of this subsection shall inure to and be recoverable by the issuer, irrespective of any intention on the part of such director or executive officer in entering into the transaction.

(B) Actions to recover profits.--An action to recover profits in accordance with this subsection may be instituted at law or in equity in any court of competent jurisdiction by the issuer, or by the owner of any security of the issuer in the name and in behalf of the issuer if the issuer fails or refuses to bring such action within 60 days after the date of request, or fails diligently to prosecute the action thereafter, except that no such suit shall be brought more than 2 years after the date on which such profit was realized.

(3) Rulemaking Authorized.--The Commission shall, in consultation with the Secretary of Labor, issue rules to clarify the application of this subsection and to prevent evasion thereof. Such rules shall provide for the application of the requirements of paragraph (1) with respect to entities treated as a single employer with respect to an issuer under *section 414(b), (c), (m), or (o) of the Internal Revenue Code of 1986* to the extent necessary to clarify the application of such requirements and to prevent evasion thereof. Such rules may also provide for appropriate exceptions from the requirements of this subsection, including exceptions for purchases pursuant to an automatic dividend reinvestment program or purchases or sales made pursuant to an advance election.

(4) Blackout period.--For purposes of this subsection, the term "blackout period," with respect to the equity securities of any issuer--

(A) means any period of more than 3 consecutive business days during which the ability of not fewer than 50 percent of the participants or beneficiaries under all individual account plans maintained by the issuer to purchase, sell, or otherwise acquire or transfer an interest in any equity of such issuer held in such an individual account plan is temporarily suspended by the issuer or by a fiduciary of the plan; and

(B) does not include, under regulations which shall be prescribed by the Commission--

(i) a regularly scheduled period in which the participants and beneficiaries may not purchase, sell, or otherwise acquire or transfer an interest in any equity of such issuer, if such period is--

(I) incorporated into the individual account plan; and

(II) timely disclosed to employees before becoming participants under the individual account plan or as a subsequent amendment to the plan; or

(ii) any suspension described in subparagraph (A) that is imposed solely in connection with persons becoming participants or beneficiaries, or ceasing to be participants or beneficiaries, in an individual account plan by reason of a corporate merger, acquisition, divestiture, or similar transaction involving the plan or plan sponsor.

(5) Individual account plan.--For purposes of this subsection, the term "individual account plan" has the meaning provided in section 3(34) of the Employee Retirement Income Security Act of 1974 (*29 U.S.C. 1002(34)*), except that such term shall not include a one-participant retirement plan (within the meaning of section 101(i)(8)(B) of such Act (*29 U.S.C. 1021(i)(8)(B)*)).

(6) Notice to directors, executive officers, and the commission.--In any case in which a director or executive officer is subject to the requirements of this subsection in connection with a blackout period (as defined in paragraph (4)) with respect to any equity securities, the issuer of such equity securities shall timely notify such director or officer and the Securities and Exchange Commission of such blackout period.

(b) Notice Requirements to Participants and Beneficiaries under ERISA.--

(1) In general.--Section 101 of the Employee Retirement Income Security Act of 1974 (*29 U.S.C. 1021*) is amended by redesignating the second subsection (h) as subsection (j), and by inserting after the first subsection (h) the following new subsection:

"(i) Notice of Blackout Periods to Participant or Beneficiary Under Individual Account Plan.--

"(1) Duties of plan administrator.--In advance of the commencement of any blackout period with respect to an individual account plan, the plan administrator shall notify the plan participants and beneficiaries who are affected by such action in accordance with this subsection.

"(2) Notice requirements.--

"(A) In general.--The notices described in paragraph (1) shall be written in a manner calculated to be understood by the average plan participant and shall include--

"(i) the reasons for the blackout period,

"(ii) an identification of the investments and other rights affected,

"(iii) the expected beginning date and length of the blackout period,

"(iv) in the case of investments affected, a statement that the participant or beneficiary should evaluate the appropriateness of their current investment decisions in light of their inability to direct or diversify assets credited to their accounts during the blackout period, and

"(v) such other matters as the Secretary may require by regulation.

"(B) Notice to participants and beneficiaries.--Except as otherwise provided in this subsection, notices described in paragraph (1) shall be furnished to all participants and beneficiaries under the plan to whom the blackout period applies at least 30 days in advance of the blackout period.

"(C) Exception to 30-day notice requirement.--In any case in which--

"(i) a deferral of the blackout period would violate the requirements of subparagraph (A) or (B) of section 404(a)(1), and a fiduciary of the plan reasonably so determines in writing, or

"(ii) the inability to provide the 30-day advance notice is due to events that were unforeseeable or circumstances beyond the reasonable control of the plan administrator, and a fiduciary of the plan reasonably so determines in writing,

subparagraph (B) shall not apply, and the notice shall be furnished to all participants and beneficiaries under the

plan to whom the blackout period applies as soon as reasonably possible under the circumstances unless such a notice in advance of the termination of the blackout period is impracticable.

"(D) Written notice.--The notice required to be provided under this subsection shall be in writing, except that such notice may be in electronic or other form to the extent that such form is reasonably accessible to the recipient.

"(E) Notice to issuers of employer securities subject to blackout period.--In the case of any blackout period in connection with an individual account plan, the plan administrator shall provide timely notice of such blackout period to the issuer of any employer securities subject to such blackout period.

"(3) Exception for blackout periods with limited applicability.--In any case in which the blackout period applies only to 1 or more participants or beneficiaries in connection with a merger, acquisition, divestiture, or similar transaction involving the plan or plan sponsor and occurs solely in connection with becoming or ceasing to be a participant or beneficiary under the plan by reason of such merger, acquisition, divestiture, or transaction, the requirement of this subsection that the notice be provided to all participants and beneficiaries shall be treated as met if the notice required under paragraph (1) is provided to such participants or beneficiaries to whom the blackout period applies as soon as reasonably practicable.

"(4) Changes in length of blackout period.--If, following the furnishing of the notice pursuant to this subsection, there is a change in the beginning date or length of the blackout period (specified in such notice pursuant to paragraph (2)(A)(iii)), the administrator shall provide affected participants and beneficiaries notice of the change as soon as reasonably practicable. In relation to the extended blackout period, such notice shall meet the requirements of paragraph (2)(D) and shall specify any material change in the matters referred to in clauses (i) through (v) of paragraph (2)(A).

"(5) Regulatory exceptions.--The Secretary may provide by regulation for additional exceptions to the requirements of this subsection which the Secretary determines are in the interests of participants and beneficiaries.

"(6) Guidance and model notices.--The Secretary shall issue guidance and model notices which meet the requirements of this subsection.

"(7) Blackout period.--For purposes of this subsection--

"(A) In general.--The term 'blackout period' means, in connection with an individual account plan, any period for which any ability of participants or beneficiaries under the plan, which is otherwise available under the terms of such plan, to direct or diversify assets credited to their accounts, to obtain loans from the plan, or to obtain distributions from the plan is temporarily suspended, limited, or restricted, if such suspension, limitation, or restriction is for any period of more than 3 consecutive business days.

"(B) Exclusions.--The term 'blackout period' does not include a suspension, limitation, or restriction--

"(i) which occurs by reason of the application of the securities laws (as defined in section 3(a)(47) of the Securities Exchange Act of 1934),

"(ii) which is a change to the plan which provides for a regularly scheduled suspension, limitation, or restriction which is disclosed to participants or beneficiaries through any summary of material modifications, any materials describing specific investment alternatives under the plan, or any changes thereto, or

"(iii) which applies only to 1 or more individuals, each of whom is the participant, an alternate payee (as defined in section 206(d)(3)(K)), or any other beneficiary pursuant to a qualified domestic relations order (as defined in section 206(d)(3)(B)(i)).

"(8) Individual account plan.--"(A) In general.--For purposes of this subsection, the term 'individual account plan'

shall have the meaning provided such term in section 3(34), except that such term shall not include a one-participant retirement plan.

"(B) One-participant retirement plan.--For purposes of subparagraph (A), the term 'one-participant retirement plan' means a retirement plan that--

"(i) on the first day of the plan year--

"(I) covered only the employer (and the employer's spouse) and the employer owned the entire business (whether or not incorporated), or

"(II) covered only one or more partners (and their spouses) in a business partnership (including partners in an S or C corporation (as defined in *section 1361(a) of the Internal Revenue Code of 1986*)),

"(ii) meets the minimum coverage requirements of *section 410(b) of the Internal Revenue Code of 1986* (as in effect on the date of the enactment of this paragraph) without being combined with any other plan of the business that covers the employees of the business,

"(iii) does not provide benefits to anyone except the employer (and the employer's spouse) or the partners (and their spouses),

"(iv) does not cover a business that is a member of an affiliated service group, a controlled group of corporations, or a group of businesses under common control, and

"(v) does not cover a business that leases employees."

(2) Issuance of initial guidance and model notice.--The Secretary of Labor shall issue initial guidance and a model notice pursuant to section 101(i)(6) of the Employee Retirement Income Security Act of 1974 (as added by this subsection) not later than January 1, 2003. Not later than 75 days after the date of the enactment of this Act, the Secretary shall promulgate interim final rules necessary to carry out the amendments made by this subsection.

(3) Civil penalties for failure to provide notice.--Section 502 of such Act (*29 U.S.C. 1132*) is amended--

(A) in subsection (a)(6), by striking "(5), or (6)" and inserting "(5), (6), or (7)";

(B) by redesignating paragraph (7) of subsection (c) as paragraph (8); and

(C) by inserting after paragraph (6) of subsection (c) the following new paragraph:

"(7) The Secretary may assess a civil penalty against a plan administrator of up to \$ 100 a day from the date of the plan administrator's failure or refusal to provide notice to participants and beneficiaries in accordance with section 101(i). For purposes of this paragraph, each violation with respect to any single participant or beneficiary shall be treated as a separate violation."

(3) Plan amendments.--If any amendment made by this subsection requires an amendment to any plan, such plan amendment shall not be required to be made before the first plan year beginning on or after the effective date of this section, if--

(A) during the period after such amendment made by this subsection takes effect and before such first plan year, the plan is operated in good faith compliance with the requirements of such amendment made by this subsection, and

(B) such plan amendment applies retroactively to the period after such amendment made by this subsection takes effect and before such first plan year.

(c) Effective Date.-- The provisions of this section (including the amendments made thereby) shall take effect 180 days after the date of the enactment of this Act. Good faith compliance with the requirements of such provisions in advance of the issuance of applicable regulations thereunder shall be treated as compliance with such provisions.

COMPENSATION, LOANS TO EXECUTIVES AND INSIDER TRADING DURING PENSION FUND
BLACKOUT PERIODS

2-F Corporate Governance: Law and Practice 17 CFR §§ 245.100-245.104

**§ 245.100-245.104 ["Regulation BTR --Blackout Trading Restriction" & Implementing Prohibition of
Sarbanes-Oxley § 306 Against Insider Trades During Pension Fund Blackout Periods]**

17 CFR § 245.100 Definitions. As used in Regulation BTR (§§ 245.100 through 245.104), unless the context otherwise requires:

(a) The term acquired in connection with service or employment as a director or executive officer, when applied to a director or executive officer, means that he or she acquired, directly or indirectly, an equity security:

(1) At a time when he or she was a director or executive officer, under a compensatory plan, contract, authorization or arrangement, including, but not limited to, an option, warrants or rights plan, a pension, retirement or deferred compensation plan or a bonus, incentive or profit-sharing plan (whether or not set forth in any formal plan document), including a compensatory plan, contract, authorization or arrangement with a parent, subsidiary or affiliate;

(2) At a time when he or she was a director or executive officer, as a result of any transaction or business relationship described in paragraph (a) of Item 404 of Regulation S-K (§ 229.404 of this chapter) or, in the case of a foreign private issuer, Item 7.B of Form 20-F (§ 249.220f of this chapter) (but without application of the disclosure thresholds of such provisions), to the extent that he or she has a pecuniary interest (as defined in paragraph (1) of this section) in the equity securities;

(3) At a time when he or she was a director or executive officer, as directors' qualifying shares or other securities that he or she must hold to satisfy minimum ownership requirements or guidelines for directors or executive officers;

(4) Prior to becoming, or while, a director or executive officer where the equity security was acquired as a direct or indirect inducement to service or employment as a director or executive officer; or

(5) Prior to becoming, or while, a director or executive officer where the equity security was received as a result of a business combination in respect of an equity security of an entity involved in the business combination that he or she had acquired in connection with service or employment as a director or executive officer of such entity.

(b) Except as provided in § 245.102, the term blackout period:

(1) With respect to the equity securities of any issuer (other than a foreign private issuer), means any period of more than three consecutive business days during which the ability to purchase, sell or otherwise acquire or transfer an interest in any equity security of such issuer held in an individual account plan is temporarily suspended by the issuer or by a fiduciary of the plan with respect to not fewer than 50% of the participants or beneficiaries located in the United States and its territories and possessions under all individual account plans (as defined in paragraph (j) of this section) maintained by the issuer that permit participants or beneficiaries to acquire or hold equity securities of the issuer;

(2) With respect to the equity securities of any foreign private issuer (as defined in § 240.3b-4(c) of this chapter), means any period of more than three consecutive business days during which both:

(i) The conditions of paragraph (b)(1) of this section are met; and

(ii)

(A) The number of participants and beneficiaries located in the United States and its territories and possessions subject to the temporary suspension exceeds 15% of the total number of employees of the issuer and its consolidated subsidiaries; or

(B) More than 50,000 participants and beneficiaries located in the United States and its territories and possessions are subject to the temporary suspension.

(3) In determining the individual account plans (as defined in paragraph (j) of this section) maintained by an issuer for purposes of this paragraph (b):

(i) The rules under *section 414(b), (c), (m) and (o) of the Internal Revenue Code (26 U.S.C. 414(b), (c), (m) and (o))* are to be applied; and

(ii) An individual account plan that is maintained outside of the United States primarily for the benefit of persons substantially all of whom are nonresident aliens (within the meaning of section 104(b)(4) of the Employee Retirement Income Security Act of 1974 (*29 U.S.C. 1003(b)(4)*)) is not to be considered.

(4) In determining the number of participants and beneficiaries in an individual account plan (as defined in paragraph (j) of this section) maintained by an issuer:

(i) The determination may be made as of any date within the 12-month period preceding the beginning date of the temporary suspension in question; provided that if there has been a significant change in the number of participants or beneficiaries in an individual account plan since the date selected, the determination for such plan must be made as of the most recent practicable date that reflects such change; and

(ii) The determination may be made without regard to overlapping plan participation.

(c)

(1) The term director has, except as provided in paragraph (c)(2) of this section, the meaning set forth in section 3(a)(7) of the Exchange Act (*15 U.S.C. 78c(a)(7)*).

(2) In the case of a foreign private issuer (as defined in § 240.3b-4(c) of this chapter), the term director means an individual within the definition set forth in section 3(a)(7) of the Exchange Act who is a management employee of the issuer.

(d) The term derivative security has the meaning set forth in § 240.16a-1(c) of this chapter.

(e) The term equity security has the meaning set forth in section 3(a)(11) of the Exchange Act (*15 U.S.C. 78c(a)(11)*) and § 240.3a11-1 of this chapter.

(f) The term equity security of the issuer means any equity security or derivative security relating to an issuer, whether or not issued by that issuer.

(g) The term Exchange Act means the Securities Exchange Act of 1934 (*15 U.S.C. 78a et seq.*).

(h)

(1) The term executive officer has, except as provided in paragraph (h)(2) of this section, the meaning set forth in § 240.16a-1(f) of this chapter.

(2) In the case of a foreign private issuer (as defined in § 240.3b-4(c) of this chapter), the term executive officer means the principal executive officer or officers, the principal financial officer or officers and the principal accounting officer or officers of the issuer.

(i) The term exempt security has the meaning set forth in section 3(a)(12) of the Exchange Act (*15 U.S.C. 78c(a)(12)*).

(j) The term individual account plan means a pension plan which provides for an individual account for each participant and for benefits based solely upon the amount contributed to the participant's account, and any income, expenses, gains and losses, and any forfeitures of accounts of other participants which may be allocated to such participant's account, except that such term does not include a one-participant retirement plan (within the meaning of section 101(i)(8)(B) of the Employee Retirement Income Security Act of 1974 (*29 U.S.C. 1021(i)(8)(B)*)), nor does it include a pension plan in which participation is limited to directors of the issuer.

(k) The term issuer means an issuer (as defined in section 3(a)(8) of the Exchange Act (*15 U.S.C. 78c(a)(8)*)), the securities of which are registered under section 12 of the Exchange Act (*15 U.S.C. 78l*) or that is required to file reports under section 15(d) of the Exchange Act (*15 U.S.C. 78o(d)*) or that files or has filed a registration statement that has not yet become effective under the Securities Act of 1933 (*15 U.S.C. 77a et seq.*) and that it has not withdrawn.

(l) The term pecuniary interest has the meaning set forth in § 240.16a-1(a)(2)(i) of this chapter and the term indirect pecuniary interest has the meaning set forth in § 240.16a-1(a)(2)(ii) of this chapter. Section 240.16a-1(a)(2)(iii) of this chapter also shall apply to determine pecuniary interest for purposes of this regulation.

HISTORY: [68 FR 4338, 4355, Jan. 28, 2003; 71 FR 53158, 53263, Sept. 8, 2006.]

AUTHORITY: 15 U.S.C. 78w(a). Sections 245.100-245.104 are also issued under secs. 3 (a) and 306(a), Pub. L. 107-204, 116 Stat. 745.

NOTES: [EFFECTIVE DATE NOTE: 71 FR 53158, 53263, Sept. 8, 2006, amended paragraph (a)(2), effective Nov. 7, 2006. For compliance date information, *see* 71 FR 53158, Sept. 8, 2006.]

17 CFR § 245.101 Prohibition of insider trading during pension fund blackout periods.

(a) Except to the extent otherwise provided in paragraph (c) of this section, it is unlawful under section 306(a)(1) of the Sarbanes-Oxley Act of 2002 (*15 U.S.C. 7244(a)(1)*) for any director or executive officer of an issuer of any equity security (other than an exempt security), directly or indirectly, to purchase, sell or otherwise acquire or transfer any equity security of the issuer (other than an exempt security) during any blackout period with respect to such equity security, if such director or executive officer acquires or previously acquired such equity security in connection with his or her service or employment as a director or executive officer.

(b) For purposes of section 306(a)(1) of the Sarbanes-Oxley Act of 2002, any sale or other transfer of an equity security of the issuer during a blackout period will be treated as a transaction involving an equity security "acquired in connection with service or employment as a director or executive officer" (as defined in § 245.100(a)) to the extent that the director or executive officer has a pecuniary interest (as defined in § 245.100(l)) in such equity security, unless the director or executive officer establishes by specific identification of securities that the transaction did not involve an equity security "acquired in connection with service or employment as a director or executive officer." To establish that the equity security was not so acquired, a director or executive officer must identify the source of the equity securities and demonstrate that he or she has utilized the same specific identification for any purpose related to the transaction (such as tax reporting and any applicable disclosure and reporting requirements).

(c) The following transactions are exempt from section 306(a)(1) of the Sarbanes-Oxley Act of 2002:

(1) Any acquisition of equity securities resulting from the reinvestment of dividends in, or interest on, equity securities of the same issuer if the acquisition is made pursuant to a plan providing for the regular reinvestment of dividends or interest and the plan provides for broad-based participation, does not discriminate in favor of employees of the issuer and operates on substantially the same terms for all plan participants;

(2) Any purchase or sale of equity securities of the issuer pursuant to a contract, instruction or written plan entered into by the director or executive officer that satisfies the affirmative defense conditions of § 240.10b5-1(c) of this chapter; provided that the director or executive officer did not enter into or modify the contract, instruction or written plan during the blackout period (as defined in § 245.100(b)) in question, or while aware of the actual or approximate beginning or ending dates of that blackout period (whether or not the director or executive officer received notice of the blackout period as required by Section 306(a)(6) of the Sarbanes-Oxley Act of 2002 (*15 U.S.C. 7244(a)(6)*)).

(3) Any purchase or sale of equity securities, other than a Discretionary Transaction (as defined in § 240.16b-3(b)(1) of this chapter), pursuant to a Qualified Plan (as defined in § 240.16b-3(b)(4) of this chapter), an Excess Benefit Plan (as defined in § 240.16b-3(b)(2) of this chapter) or a Stock Purchase Plan (as defined in § 240.16b-3(b)(5) of this chapter) (or, in the case of a foreign private issuer, pursuant to an employee benefit plan that either (i) has been

approved by the taxing authority of a foreign jurisdiction, or (ii) is eligible for preferential treatment under the tax laws of a foreign jurisdiction because the plan provides for broad-based employee participation); provided that a Discretionary Transaction that meets the conditions of paragraph (c)(2) of this section also shall be exempt;

(4) Any grant or award of an option, stock appreciation right or other equity compensation pursuant to a plan that, by its terms:

(i) Permits directors or executive officers to receive grants or awards; and

(ii) Either:

(A) States the amount and price of securities to be awarded to designated directors and executive officers or categories of directors and executive officers (though not necessarily to others who may participate in the plan) and specifies the timing of awards to directors and executive officers; or

(B) Sets forth a formula that determines the amount, price and timing, using objective criteria (such as earnings of the issuer, value of the securities, years of service, job classification, and compensation levels);

(5) Any exercise, conversion or termination of a derivative security that the director or executive officer did not write or acquire during the blackout period (as defined in § 245.100(b)) in question, or while aware of the actual or approximate beginning or ending dates of that blackout period (whether or not the director or executive officer received notice of the blackout period as required by Section 306(a)(6) of the Sarbanes-Oxley Act of 2002); and either:

(i) The derivative security, by its terms, may be exercised, converted or terminated only on a fixed date, with no discretionary provision for earlier exercise, conversion or termination; or

(ii) The derivative security is exercised, converted or terminated by a counterparty and the director or executive officer does not exercise any influence on the counterparty with respect to whether or when to exercise, convert or terminate the derivative security;

(6) Any acquisition or disposition of equity securities involving a bona fide gift or a transfer by will or the laws of descent and distribution;

(7) Any acquisition or disposition of equity securities pursuant to a domestic relations order, as defined in the Internal Revenue Code or Title I of the Employment Retirement Income Security Act of 1974, or the rules thereunder;

(8) Any sale or other disposition of equity securities compelled by the laws or other requirements of an applicable jurisdiction;

(9) Any acquisition or disposition of equity securities in connection with a merger, acquisition, divestiture or similar transaction occurring by operation of law;

(10) The increase or decrease in the number of equity securities held as a result of a stock split or stock dividend applying equally to all securities of that class, including a stock dividend in which equity securities of a different issuer are distributed; and the acquisition of rights, such as shareholder or pre-emptive rights, pursuant to a pro rata grant to all holders of the same class of equity securities; and

(11) Any acquisition or disposition of an asset-backed security, as defined in § 229.1101 of this chapter.

HISTORY: [68 FR 4338, 4356, Jan. 28, 2003; 70 FR 1506, 1623, Jan. 7, 2005.]

AUTHORITY: 15 U.S.C. 78w(a). Sections 245.100-245.104 are also issued under secs. 3 (a) and 306(a), Pub. L. 107-204, 116 Stat. 745.

17 CFR § 245.102 Exceptions to definition of blackout period. The term "blackout period," as defined in § 245.100(b), does not include:

(a) A regularly scheduled period in which participants and beneficiaries may not purchase, sell or otherwise acquire or transfer an interest in any equity security of an issuer, if a description of such period, including its frequency and duration and the plan transactions to be suspended or otherwise affected, is:

(1) Incorporated into the individual account plan or included in the documents or instruments under which the plan operates; and

(2) Disclosed to an employee before he or she formally enrolls, or within 30 days following formal enrollment, as a

participant under the individual account plan or within 30 days after the adoption of an amendment to the plan. For purposes of this paragraph (a)(2), the disclosure may be provided in any graphic form that is reasonably accessible to the employee; or

(b) Any trading suspension described in § 245.100(b) that is imposed in connection with a corporate merger, acquisition, divestiture or similar transaction involving the plan or plan sponsor, the principal purpose of which is to permit persons affiliated with the acquired or divested entity to become participants or beneficiaries, or to cease to be participants or beneficiaries, in an individual account plan; provided that the persons who become participants or beneficiaries in an individual account plan are not able to participate in the same class of equity securities after the merger, acquisition, divestiture or similar transaction as before the transaction.

HISTORY: [68 FR 4338, 4357, Jan. 28, 2003.]

AUTHORITY: 15 U.S.C. 78w(a). Sections 245.100-245.104 are also issued under secs. 3 (a) and 306(a), Pub. L. 107-204, 116 Stat. 745.

NOTES: [EFFECTIVE DATE NOTE: 68 FR 4338, 4357, Jan. 28, 2003, added Part 245, effective Jan. 26, 2003.]

17 CFR § 245.103 Issuer right of recovery; right of action by equity security owner.

(a) Recovery of profits. Section 306(a)(2) of the Sarbanes-Oxley Act of 2002 (*15 U.S.C. 7244(a)(2)*) provides that any profit realized by a director or executive officer from any purchase, sale or other acquisition or transfer of any equity security of an issuer in violation of section 306(a)(1) of that Act (*15 U.S.C. 7244(a)(1)*) will inure to and be recoverable by the issuer, regardless of any intention on the part of the director or executive officer in entering into the transaction.

(b) Actions to recover profit. Section 306(a)(2) of the Sarbanes-Oxley Act of 2002 provides that an action to recover profit may be instituted at law or in equity in any court of competent jurisdiction by the issuer, or by the owner of any equity security of the issuer in the name and on behalf of the issuer if the issuer fails or refuses to bring such action within 60 days after the date of request, or fails diligently to prosecute the action thereafter, except that no such suit may be brought more than two years after the date on which such profit was realized.

(c) Measurement of profit.

(1) In determining the profit recoverable in an action undertaken pursuant to section 306(a)(2) of the Sarbanes-Oxley Act of 2002 from a transaction that involves a purchase, sale or other acquisition or transfer (other than a grant, exercise, conversion or termination of a derivative security) in violation of section 306(a)(1) of that Act of an equity security of an issuer that is registered pursuant to section 12(b) or 12(g) of the Exchange Act (*15 U.S.C. 78l(b)* or (*g*)) and listed on a national securities exchange or listed in an automated inter-dealer quotation system of a national securities association, profit (including any loss avoided) may be measured by comparing the difference between the amount paid or received for the equity security on the date of the transaction during the blackout period and the average

market price of the equity security calculated over the first three trading days after the ending date of the blackout period.

(2) In determining the profit recoverable in an action undertaken pursuant to section 306(a)(2) of the Sarbanes-Oxley Act of 2002 from a transaction that is not described in paragraph (c)(1) of this section, profit (including any loss avoided) may be measured in a manner that is consistent with the objective of identifying the amount of any gain realized or loss avoided by a director or executive officer as a result of a transaction taking place in violation of section 306(a)(1) of that Act during the blackout period as opposed to taking place outside of such blackout period.

(3) The terms of this section do not limit in any respect the authority of the Commission to seek or determine remedies as the result of a transaction taking place in violation of section 306(a)(1) of the Sarbanes-Oxley Act.

HISTORY: [68 FR 4338, 4357, Jan. 28, 2003.]

AUTHORITY: 15 U.S.C. 78w(a). Sections 245.100-245.104 are also issued under secs. 3 (a) and 306(a), Pub. L. 107-204, 116 Stat. 745.

NOTES: [EFFECTIVE DATE NOTE: 68 FR 4338, 4357, Jan. 28, 2003, added Part 245, effective Jan. 26, 2003.]

17 CFR § 245.104 Notice.

(a) In any case in which a director or executive officer is subject to section 306(a)(1) of the Sarbanes-Oxley Act of 2002 (*15 U.S.C. 7244(a)(1)*) in connection with a blackout period (as defined in § 245.100(b)) with respect to any equity security, the issuer of the equity security must timely notify each director or officer and the Commission of the blackout period.

(b) For purposes of this section:

(1) The notice must include:

(i) The reason or reasons for the blackout period;

(ii) A description of the plan transactions to be suspended during, or otherwise affected by, the blackout period;

(iii) A description of the class of equity securities subject to the blackout period;

(iv) The length of the blackout period by reference to:

(A) The actual or expected beginning date and ending date of the blackout period; or

(B) The calendar week during which the blackout period is expected to begin and the calendar week during which the blackout period is expected to end, provided that the notice to directors and executive officers describes how, during such week or weeks, a director or executive officer may obtain, without charge, information as to whether the blackout period has begun or ended; and provided further that the notice to the Commission describes how, during the blackout period and for a period of two years after the ending date of the blackout period, a security holder or other interested person may obtain, without charge, the actual beginning and ending dates of the blackout period.

(C) For purposes of this paragraph (b)(1)(iv), a calendar week means a seven-day period beginning on Sunday and ending on Saturday; and

(v) The name, address and telephone number of the person designated by the issuer to respond to inquiries about the blackout period, or, in the absence of such a designation, the issuer's human resources director or person performing equivalent functions.

(2)

(i) Notice to an affected director or executive officer will be considered timely if the notice described in paragraph (b)(1) of this section is provided (in graphic form that is reasonably accessible to the recipient):

(A) No later than five business days after the issuer receives the notice required by section 101(i)(2)(E) of the Employment Retirement Income Security Act of 1974 (29 U.S.C. 1021(i)(2)(E)); or

(B) If no such notice is received by the issuer, a date that is at least 15 calendar days before the actual or expected beginning date of the blackout period.

(ii) Notwithstanding paragraph (b)(2)(i) of this section, the requirement to give advance notice will not apply in any case in which the inability to provide advance notice of the blackout period is due to events that were unforeseeable to, or circumstances that were beyond the reasonable control of, the issuer, and the issuer reasonably so determines in

writing. Determinations described in the preceding sentence must be dated and signed by an authorized representative of the issuer. In any case in which this exception to the advance notice requirement applies, the issuer must provide the notice described in paragraph (b)(1) of this section, as well as a copy of the written determination, to all affected directors and executive officers as soon as reasonably practicable.

(iii) If there is a subsequent change in the beginning or ending dates of the blackout period as provided in the notice to directors and executive officers under paragraph (b)(2)(i) of this section, an issuer must provide directors and executive officers with an updated notice explaining the reasons for the change in the date or dates and identifying all material changes in the information contained in the prior notice. The updated notice is required to be provided as soon as reasonably practicable, unless such notice in advance of the termination of a blackout period is impracticable.

(3) Notice to the Commission will be considered timely if:

(i) The issuer, except as provided in paragraph (b)(3)(ii) of this section, files a current report on Form 8-K (§ 249.308 of this chapter) within the time prescribed for filing the report under the instructions for the form; or

(ii) In the case of a foreign private issuer (as defined in § 240.3b-4(c) of this chapter), the issuer includes the information set forth in paragraph (b)(1) of this section in the first annual report on Form 20-F (§ 249.220f of this chapter) or 40-F (§ 249.240f of this chapter) required to be filed after the receipt of the notice of a blackout period required by 29 *CFR* 2520.101-3(c) within the time prescribed for filing the report under the instructions for the form or in an earlier filed report on Form 6-K (§ 249.306).

(iii) If there is a subsequent change in the beginning or ending dates of the blackout period as provided in the notice to the Commission under paragraph (b)(3)(i) of this section, an issuer must file a current report on Form 8-K containing the updated beginning or ending dates of the blackout period, explaining the reasons for the change in the date or dates and identifying all material changes in the information contained in the prior report. The updated notice is required to be provided as soon as reasonably practicable.

Appendix F FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO EXECUTIVE
COMPENSATION, LOANS TO EXECUTIVES AND INSIDER TRADING DURING PENSION FUND
BLACKOUT PERIODS

2-F Corporate Governance: Law and Practice Sarbanes-Oxley § 402

§ Oxley 402 Enhanced Conflict of Interest Provisions [Including Prohibitions on Personal Loans to Directors and Executive Officers]

(a) Prohibition on Personal Loans to Executives.-- Section 13 of the Securities Exchange Act of 1934 (*15 U.S.C. 78m*), as amended by this Act, is amended by adding at the end the following:

"(k) Prohibition on Personal Loans to Executives.--

"(1) In general.--In general. It shall be unlawful for any issuer (as defined in section 2 of the Sarbanes-Oxley Act of 2002 [15 USCS § 7201]), directly or indirectly, including through any subsidiary, to extend or maintain credit, to arrange for the extension of credit, or to renew an extension of credit, in the form of a personal loan to or for any director or executive officer (or equivalent thereof) of that issuer. An extension of credit maintained by the issuer on the date of enactment of this subsection [enacted July 30, 2002] shall not be subject to the provisions of this subsection, provided that there is no material modification to any term of any such extension of credit or any renewal of any such extension of credit on or after that date of enactment.

"(2) Limitation.--Paragraph (1) does not preclude any home improvement and manufactured home loans (as that term is defined in section 5 of the Home Owners' Loan Act (*12 U.S.C. 1464*)), consumer credit (as defined in section 103 of the Truth in Lending Act (*15 U.S.C. 1602*)), or any extension of credit under an open end credit plan (as defined in section 103 of the Truth in Lending Act (*15 U.S.C. 1602*)), or a charge card (as defined in section 127(c)(4)(e) of the Truth in Lending Act (*15 U.S.C. 1637(c)(4)(e)*)), or any extension of credit by a broker or dealer registered under section 15 of this title [15 USCS § 78o] to an employee of that broker or dealer to buy, trade, or carry securities, that is permitted under rules or regulations of the Board of Governors of the Federal Reserve System pursuant to section 7 of this title (other than an extension of credit that would be used to purchase the stock of that issuer), that is--

"(A) made or provided in the ordinary course of the consumer credit business of such issuer;

"(B) of a type that is generally made available by such issuer to the public; and

"(C) made by such issuer on market terms, or terms that are no more favorable than those offered by the issuer to the general public for such extensions of credit.

"(3) Rule of construction for certain loans.--Paragraph (1) does not apply to any loan made or maintained by an insured depository institution (as defined in section 3 of the Federal Deposit Insurance Act (*12 U.S.C. 1813*)), if the loan is subject to the insider lending restrictions of section 22(h) of the Federal Reserve Act (*12 U.S.C. 375b*)."

§ 307 Rules of Professional Responsibility for Attorneys (15 USC 7245)

Not later than 180 days after the date of enactment of this Act, the Commission shall issue rules, in the public interest and for the protection of investors, setting forth minimum standards of professional conduct for attorneys appearing and practicing before the Commission in any way in the representation of issuers, including a rule--

(1) requiring an attorney to report evidence of a material violation of securities law or breach of fiduciary duty or similar violation by the company or any agent thereof, to the chief legal counsel or the chief executive officer of the company (or the equivalent thereof); and

(2) if the counsel or officer does not appropriately respond to the evidence (adopting, as necessary, appropriate remedial measures or sanctions with respect to the violation), requiring the attorney to report the evidence to the audit committee of the board of directors of the issuer or to another committee of the board of directors comprised solely of directors not employed directly or indirectly by the issuer, or to the board of directors.

§ 1 Purpose and scope.

This part sets forth minimum standards of professional conduct for attorneys appearing and practicing before the Commission in the representation of an issuer. These standards supplement applicable standards of any jurisdiction where an attorney is admitted or practices and are not intended to limit the ability of any jurisdiction to impose additional obligations on an attorney not inconsistent with the application of this part. Where the standards of a state or other United States jurisdiction where an attorney is admitted or practices conflict with this part, this part shall govern.

Appendix G FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO RULES OF PROFESSIONAL RESPONSIBILITY FOR ATTORNEYS

2-G Corporate Governance: Law and Practice 17 CFR § 205.2

§ 2 Definitions.

For purposes of this part, the following definitions apply:

(a) Appearing and practicing before the Commission:

(1) Means:

(i) Transacting any business with the Commission, including communications in any form;

(ii) Representing an issuer in a Commission administrative proceeding or in connection with any Commission investigation, inquiry, information request, or subpoena;

(iii) Providing advice in respect of the United States securities laws or the Commission's rules or regulations thereunder regarding any document that the attorney has notice will be filed with or submitted to, or incorporated into any document that will be filed with or submitted to, the Commission, including the provision of such advice in the context of preparing, or participating in the preparation of, any such document; or

(iv) Advising an issuer as to whether information or a statement, opinion, or other writing is required under the United States securities laws or the Commission's rules or regulations thereunder to be filed with or submitted to, or

incorporated into any document that will be filed with or submitted to, the Commission; but

(2) Does not include an attorney who:

(i) Conducts the activities in paragraphs (a)(1)(i) through (a)(1)(iv) of this section other than in the context of providing legal services to an issuer with whom the attorney has an attorney-client relationship; or

(ii) Is a non-appearing foreign attorney.

(b) Appropriate response means a response to an attorney regarding reported evidence of a material violation as a result of which the attorney reasonably believes:

(1) That no material violation, as defined in paragraph (i) of this section, has occurred, is ongoing, or is about to occur;

(2) That the issuer has, as necessary, adopted appropriate remedial measures, including appropriate steps or sanctions to stop any material violations that are ongoing, to prevent any material violation that has yet to occur, and to remedy or otherwise appropriately address any material violation that has already occurred and to minimize the likelihood of its recurrence; or

(3) That the issuer, with the consent of the issuer's board of directors, a committee thereof to whom a report could be made pursuant to § 205.3(b)(3), or a qualified legal compliance committee, has retained or directed an attorney to review the reported evidence of a material violation and either:

(i) Has substantially implemented any remedial recommendations made by such attorney after a reasonable investigation and evaluation of the reported evidence; or

(ii) Has been advised that such attorney may, consistent with his or her professional obligations, assert a colorable defense on behalf of the issuer (or the issuer's officer, director, employee, or agent, as the case may be) in any investigation or judicial or administrative proceeding relating to the reported evidence of a material violation.

(c) Attorney means any person who is admitted, licensed, or otherwise qualified to practice law in any jurisdiction,

domestic or foreign, or who holds himself or herself out as admitted, licensed, or otherwise qualified to practice law.

(d) Breach of fiduciary duty refers to any breach of fiduciary or similar duty to the issuer recognized under an applicable Federal or State statute or at common law, including but not limited to misfeasance, nonfeasance, abdication of duty, abuse of trust, and approval of unlawful transactions.

(e) Evidence of a material violation means credible evidence, based upon which it would be unreasonable, under the circumstances, for a prudent and competent attorney not to conclude that it is reasonably likely that a material violation has occurred, is ongoing, or is about to occur.

(f) Foreign government issuer means a foreign issuer as defined in *17 CFR 230.405* eligible to register securities on Schedule B of the Securities Act of 1933 (*15 U.S.C. 77a et seq.*, Schedule B).

(g) In the representation of an issuer means providing legal services as an attorney for an issuer, regardless of whether the attorney is employed or retained by the issuer.

(h) Issuer means an issuer (as defined in section 3 of the Securities Exchange Act of 1934 (*15 U.S.C. 78c*)), the securities of which are registered under section 12 of that Act (*15 U.S.C. 78l*), or that is required to file reports under section 15(d) of that Act (*15 U.S.C. 78o(d)*), or that files or has filed a registration statement that has not yet become effective under the Securities Act of 1933 (*15 U.S.C. 77a et seq.*), and that it has not withdrawn, but does not include a foreign government issuer. For purposes of paragraphs (a) and (g) of this section, the term "issuer" includes any person controlled by an issuer, where an attorney provides legal services to such person on behalf of, or at the behest, or for the benefit of the issuer, regardless of whether the attorney is employed or retained by the issuer.

(i) Material violation means a material violation of an applicable United States federal or state securities law, a material breach of fiduciary duty arising under United States federal or state law, or a similar material violation of any United States federal or state law.

(j) Non-appearing foreign attorney means an attorney:

(1) Who is admitted to practice law in a jurisdiction outside the United States;

(2) Who does not hold himself or herself out as practicing, and does not give legal advice regarding, United States federal or state securities or other laws (except as provided in paragraph (j)(3)(ii) of this section); and

(3) Who:

(i) Conducts activities that would constitute appearing and practicing before the Commission only incidentally to, and in the ordinary course of, the practice of law in a jurisdiction outside the United States; or

(ii) Is appearing and practicing before the Commission only in consultation with counsel, other than a non-appearing foreign attorney, admitted or licensed to practice in a state or other United States jurisdiction.

(k) Qualified legal compliance committee means a committee of an issuer (which also may be an audit or other committee of the issuer) that:

(1) Consists of at least one member of the issuer's audit committee (or, if the issuer has no audit committee, one member from an equivalent committee of independent directors) and two or more members of the issuer's board of directors who are not employed, directly or indirectly, by the issuer and who are not, in the case of a registered investment company, "interested persons" as defined in section 2(a)(19) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(19)*);

(2) Has adopted written procedures for the confidential receipt, retention, and consideration of any report of evidence of a material violation under § 205.3;

(3) Has been duly established by the issuer's board of directors, with the authority and responsibility:

(i) To inform the issuer's chief legal officer and chief executive officer (or the equivalents thereof) of any report of evidence of a material violation (except in the circumstances described in § 205.3(b)(4));

(ii) To determine whether an investigation is necessary regarding any report of evidence of a material violation by the issuer, its officers, directors, employees or agents and, if it determines an investigation is necessary or appropriate, to:

(A) Notify the audit committee or the full board of directors;

(B) Initiate an investigation, which may be conducted either by the chief legal officer (or the equivalent thereof) or by outside attorneys; and

(C) Retain such additional expert personnel as the committee deems necessary; and

(iii) At the conclusion of any such investigation, to:

(A) Recommend, by majority vote, that the issuer implement an appropriate response to evidence of a material violation; and

(B) Inform the chief legal officer and the chief executive officer (or the equivalents thereof) and the board of directors of the results of any such investigation under this section and the appropriate remedial measures to be adopted; and

(4) Has the authority and responsibility, acting by majority vote, to take all other appropriate action, including the authority to notify the Commission in the event that the issuer fails in any material respect to implement an appropriate response that the qualified legal compliance committee has recommended the issuer to take.

(l) Reasonable or reasonably denotes, with respect to the actions of an attorney, conduct that would not be unreasonable for a prudent and competent attorney.

(m) Reasonably believes means that an attorney believes the matter in question and that the circumstances are such that the belief is not unreasonable.

(n) Report means to make known to directly, either in person, by telephone, by e-mail, electronically, or in writing.

Appendix G FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO RULES OF
PROFESSIONAL RESPONSIBILITY FOR ATTORNEYS

2-G Corporate Governance: Law and Practice 17 CFR § 205.3

§ 3 Issuer as client.

(a) Representing an issuer. An attorney appearing and practicing before the Commission in the representation of an issuer owes his or her professional and ethical duties to the issuer as an organization. That the attorney may work with and advise the issuer's officers, directors, or employees in the course of representing the issuer does not make such individuals the attorney's clients.

(b) Duty to report evidence of a material violation.

(1) If an attorney, appearing and practicing before the Commission in the representation of an issuer, becomes aware of evidence of a material violation by the issuer or by any officer, director, employee, or agent of the issuer, the attorney shall report such evidence to the issuer's chief legal officer (or the equivalent thereof) or to both the issuer's chief legal officer and its chief executive officer (or the equivalents thereof) forthwith. By communicating such information to the issuer's officers or directors, an attorney does not reveal client confidences or secrets or privileged or otherwise protected information related to the attorney's representation of an issuer.

(2) The chief legal officer (or the equivalent thereof) shall cause such inquiry into the evidence of a material violation as he or she reasonably believes is appropriate to determine whether the material violation described in the report has occurred, is ongoing, or is about to occur. If the chief legal officer (or the equivalent thereof) determines no material violation has occurred, is ongoing, or is about to occur, he or she shall notify the reporting attorney and advise the reporting attorney of the basis for such determination. Unless the chief legal officer (or the equivalent thereof) reasonably believes that no material violation has occurred, is ongoing, or is about to occur, he or she shall take all reasonable steps to cause the issuer to adopt an appropriate response, and shall advise the reporting attorney thereof. In lieu of causing an inquiry under this paragraph (b), a chief legal officer (or the equivalent thereof) may refer a report of evidence of a material violation to a qualified legal compliance committee under paragraph (c)(2) of this section if the issuer has duly established a qualified legal compliance committee prior to the report of evidence of a material

violation.

(3) Unless an attorney who has made a report under paragraph (b)(1) of this section reasonably believes that the chief legal officer or the chief executive officer of the issuer (or the equivalent thereof) has provided an appropriate response within a reasonable time, the attorney shall report the evidence of a material violation to:

(i) The audit committee of the issuer's board of directors;

(ii) Another committee of the issuer's board of directors consisting solely of directors who are not employed, directly or indirectly, by the issuer and are not, in the case of a registered investment company, "interested persons" as defined in section 2(a)(19) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(19)*) (if the issuer's board of directors has no audit committee); or

(iii) The issuer's board of directors (if the issuer's board of directors has no committee consisting solely of directors who are not employed, directly or indirectly, by the issuer and are not, in the case of a registered investment company, "interested persons" as defined in section 2(a)(19) of the Investment Company Act of 1940 (*15 U.S.C. 80a-2(a)(19)*)).

(4) If an attorney reasonably believes that it would be futile to report evidence of a material violation to the issuer's chief legal officer and chief executive officer (or the equivalents thereof) under paragraph (b)(1) of this section, the attorney may report such evidence as provided under paragraph (b)(3) of this section.

(5) An attorney retained or directed by an issuer to investigate evidence of a material violation reported under paragraph (b)(1), (b)(3), or (b)(4) of this section shall be deemed to be appearing and practicing before the Commission. Directing or retaining an attorney to investigate reported evidence of a material violation does not relieve an officer or director of the issuer to whom such evidence has been reported under paragraph (b)(1), (b)(3), or (b)(4) of this section from a duty to respond to the reporting attorney.

(6) An attorney shall not have any obligation to report evidence of a material violation under this paragraph (b) if:

(i) The attorney was retained or directed by the issuer's chief legal officer (or the equivalent thereof) to investigate such evidence of a material violation and:

(A) The attorney reports the results of such investigation to the chief legal officer (or the equivalent thereof); and

(B) Except where the attorney and the chief legal officer (or the equivalent thereof) each reasonably believes that no material violation has occurred, is ongoing, or is about to occur, the chief legal officer (or the equivalent thereof) reports the results of the investigation to the issuer's board of directors, a committee thereof to whom a report could be made pursuant to paragraph (b)(3) of this section, or a qualified legal compliance committee; or

(ii) The attorney was retained or directed by the chief legal officer (or the equivalent thereof) to assert, consistent with his or her professional obligations, a colorable defense on behalf of the issuer (or the issuer's officer, director, employee, or agent, as the case may be) in any investigation or judicial or administrative proceeding relating to such evidence of a material violation, and the chief legal officer (or the equivalent thereof) provides reasonable and timely reports on the progress and outcome of such proceeding to the issuer's board of directors, a committee thereof to whom a report could be made pursuant to paragraph (b)(3) of this section, or a qualified legal compliance committee.

(7) An attorney shall not have any obligation to report evidence of a material violation under this paragraph (b) if such attorney was retained or directed by a qualified legal compliance committee:

(i) To investigate such evidence of a material violation; or

(ii) To assert, consistent with his or her professional obligations, a colorable defense on behalf of the issuer (or the issuer's officer, director, employee, or agent, as the case may be) in any investigation or judicial or administrative proceeding relating to such evidence of a material violation.

(8) An attorney who receives what he or she reasonably believes is an appropriate and timely response to a report he or she has made pursuant to paragraph (b)(1), (b)(3), or (b)(4) of this section need do nothing more under this section with respect to his or her report.

(9) An attorney who does not reasonably believe that the issuer has made an appropriate response within a reasonable time to the report or reports made pursuant to paragraph (b)(1), (b)(3), or (b)(4) of this section shall explain his or her reasons therefor to the chief legal officer (or the equivalent thereof), the chief executive officer (or the equivalent thereof), and directors to whom the attorney reported the evidence of a material violation pursuant to paragraph (b)(1), (b)(3), or (b)(4) of this section.

(10) An attorney formerly employed or retained by an issuer who has reported evidence of a material violation under this part and reasonably believes that he or she has been discharged for so doing may notify the issuer's board of directors or any committee thereof that he or she believes that he or she has been discharged for reporting evidence of a material violation under this section.

(c) Alternative reporting procedures for attorneys retained or employed by an issuer that has established a qualified legal compliance committee.

(1) If an attorney, appearing and practicing before the Commission in the representation of an issuer, becomes aware of evidence of a material violation by the issuer or by any officer, director, employee, or agent of the issuer, the attorney may, as an alternative to the reporting requirements of paragraph (b) of this section, report such evidence to a qualified legal compliance committee, if the issuer has previously formed such a committee. An attorney who reports evidence of a material violation to such a qualified legal compliance committee has satisfied his or her obligation to report such evidence and is not required to assess the issuer's response to the reported evidence of a material violation.

(2) A chief legal officer (or the equivalent thereof) may refer a report of evidence of a material violation to a previously established qualified legal compliance committee in lieu of causing an inquiry to be conducted under paragraph (b)(2) of this section. The chief legal officer (or the equivalent thereof) shall inform the reporting attorney that the report has been referred to a qualified legal compliance committee. Thereafter, pursuant to the requirements under § 205.2(k), the qualified legal compliance committee shall be responsible for responding to the evidence of a material violation reported to it under this paragraph (c).

(d) Issuer confidences.

(1) Any report under this section (or the contemporaneous record thereof) or any response thereto (or the contemporaneous record thereof) may be used by an attorney in connection with any investigation, proceeding, or litigation in which the attorney's compliance with this part is in issue.

(2) An attorney appearing and practicing before the Commission in the representation of an issuer may reveal to the Commission, without the issuer's consent, confidential information related to the representation to the extent the attorney reasonably believes necessary:

(i) To prevent the issuer from committing a material violation that is likely to cause substantial injury to the financial interest or property of the issuer or investors;

(ii) To prevent the issuer, in a Commission investigation or administrative proceeding from committing perjury, proscribed in *18 U.S.C. 1621*; suborning perjury, proscribed in *18 U.S.C. 1622*; or committing any act proscribed in *18 U.S.C. 1001* that is likely to perpetrate a fraud upon the Commission; or

(iii) To rectify the consequences of a material violation by the issuer that caused, or may cause, substantial injury to the financial interest or property of the issuer or investors in the furtherance of which the attorney's services were used.

§ 4 Responsibilities of supervisory attorneys.

(a) An attorney supervising or directing another attorney who is appearing and practicing before the Commission in the representation of an issuer is a supervisory attorney. An issuer's chief legal officer (or the equivalent thereof) is a supervisory attorney under this section.

(b) A supervisory attorney shall make reasonable efforts to ensure that a subordinate attorney, as defined in § 205.5(a), that he or she supervises or directs conforms to this part. To the extent a subordinate attorney appears and practices before the Commission in the representation of an issuer, that subordinate attorney's supervisory attorneys also appear and practice before the Commission.

(c) A supervisory attorney is responsible for complying with the reporting requirements in § 205.3 when a subordinate attorney has reported to the supervisory attorney evidence of a material violation.

(d) A supervisory attorney who has received a report of evidence of a material violation from a subordinate attorney under § 205.3 may report such evidence to the issuer's qualified legal compliance committee if the issuer has duly formed such a committee.

§ 5 Responsibilities of a subordinate attorney.

(a) An attorney who appears and practices before the Commission in the representation of an issuer on a matter under the supervision or direction of another attorney (other than under the direct supervision or direction of the issuer's chief legal officer (or the equivalent thereof)) is a subordinate attorney.

(b) A subordinate attorney shall comply with this part notwithstanding that the subordinate attorney acted at the direction of or under the supervision of another person.

(c) A subordinate attorney complies with § 205.3 if the subordinate attorney reports to his or her supervising attorney under § 205.3(b) evidence of a material violation of which the subordinate attorney has become aware in appearing and practicing before the Commission.

(d) A subordinate attorney may take the steps permitted or required by § 205.3(b) or (c) if the subordinate attorney reasonably believes that a supervisory attorney to whom he or she has reported evidence of a material violation under § 205.3(b) has failed to comply with § 205.3.

§ 6 Sanctions and discipline.

(a) A violation of this part by any attorney appearing and practicing before the Commission in the representation of an issuer shall subject such attorney to the civil penalties and remedies for a violation of the federal securities laws available to the Commission in an action brought by the Commission thereunder.

(b) An attorney appearing and practicing before the Commission who violates any provision of this part is subject to the disciplinary authority of the Commission, regardless of whether the attorney may also be subject to discipline for the same conduct in a jurisdiction where the attorney is admitted or practices. An administrative disciplinary proceeding initiated by the Commission for violation of this part may result in an attorney being censured, or being temporarily or permanently denied the privilege of appearing or practicing before the Commission.

(c) An attorney who complies in good faith with the provisions of this part shall not be subject to discipline or otherwise liable under inconsistent standards imposed by any state or other United States jurisdiction where the attorney is admitted or practices.

(d) An attorney practicing outside the United States shall not be required to comply with the requirements of this part to the extent that such compliance is prohibited by applicable foreign law.

FOR SENIOR FINANCIAL OFFICERS

2-H Corporate Governance: Law and Practice Sarbanes-Oxley § 406

§ Oxley 406 Code of Ethics for Senior Financial Officers (15 USC 7264)

(a) Code of Ethics Disclosure.-- The Commission shall issue rules to require each issuer, together with periodic reports required pursuant to section 13(a) or 15(d) of the Securities Exchange Act of 1934, to disclose whether or not, and if not, the reason therefor, such issuer has adopted a code of ethics for senior financial officers, applicable to its principal financial officer and comptroller or principal accounting officer, or persons performing similar functions.

(b) Changes in Codes of Ethics.-- The Commission shall revise its regulations concerning matters requiring prompt disclosure on Form 8-K (or any successor thereto) to require the immediate disclosure, by means of the filing of such form, dissemination by the Internet or by other electronic means, by any issuer of any change in or waiver of the code of ethics for senior financial officers.

(c) Definition.-- In this section, the term "code of ethics" means such standards as are reasonably necessary to promote--

(1) honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships;

(2) full, fair, accurate, timely, and understandable disclosure in the periodic reports required to be filed by the issuer;
and

(3) compliance with applicable governmental rules and regulations.

(d) Deadline for Rulemaking.-- The Commission shall--

(1) propose rules to implement this section, not later than 90 days after the date of enactment of this Act; and

(2) issue final rules to implement this section, not later than 180 days after that date of enactment.

Appendix H FEDERAL SECURITIES STATUTES AND REGULATIONS RELATING TO CODES OF ETHICS
FOR SENIOR FINANCIAL OFFICERS

2-H Corporate Governance: Law and Practice 17 CFR § 229.406

**§ 406 [Regulation S-K Item 406] Code of Ethics (and Instructions) [Implementing Sarbanes-Oxley § 406
Concerning Disclosures for Senior Financial Officers]**

(a) Disclose whether the registrant has adopted a code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. If the registrant has not adopted such a code of ethics, explain why it has not done so.

(b) For purposes of this Item 406, the term code of ethics means written standards that are reasonably designed to deter wrongdoing and to promote:

(1) Honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships;

(2) Full, fair, accurate, timely, and understandable disclosure in reports and documents that a registrant files with, or submits to, the Commission and in other public communications made by the registrant;

(3) Compliance with applicable governmental laws, rules and regulations;

(4) The prompt internal reporting of violations of the code to an appropriate person or persons identified in the code; and

(5) Accountability for adherence to the code.

(c) The registrant must:

(1) File with the Commission a copy of its code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, as an exhibit to its annual report;

(2) Post the text of such code of ethics on its Internet website and disclose, in its annual report, its Internet address and the fact that it has posted such code of ethics on its Internet Web site; or

(3) Undertake in its annual report filed with the Commission to provide to any person without charge, upon request, a copy of such code of ethics and explain the manner in which such request may be made.

(d) If the registrant intends to satisfy the disclosure requirement under Item 10 of Form 8-K regarding an amendment to, or a waiver from, a provision of its code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions and that relates to any element of the code of ethics definition enumerated in paragraph (b) of this Item by posting such information on its Internet website, disclose the registrant's Internet address and such intention.

Instructions to Item 406.

1. A registrant may have separate codes of ethics for different types of officers. Furthermore, a code of ethics within the meaning of paragraph (b) of this Item may be a portion of a broader document that addresses additional topics or that applies to more persons than those specified in paragraph (a). In satisfying the requirements of paragraph (c), a registrant need only file, post or provide the portions of a broader document that constitutes a code of ethics as defined in paragraph (b) and that apply to the persons specified in paragraph (a).

2. If a registrant elects to satisfy paragraph (c) of this Item by posting its code of ethics on its website pursuant to paragraph (c)(2), the code of ethics must remain accessible on its Web site for as long as the registrant remains subject to the requirements of this Item and chooses to comply with this Item by posting its code on its Web site pursuant to paragraph (c)(2).

NOTES: [EFFECTIVE DATE NOTE: 70 FR 1506, 1594, Jan. 7, 2005, removed instruction 3, effective Mar. 8, 2005. For compliance date information, *see* 70 FR 1506, Jan. 7, 2005.] FORM 8-K Information to be Included in the Report, Item 5.05 [Regarding Amendments to or Waivers of a Provision of Code of Ethics]

Item 5.05 Amendments to the Registrant's Code of Ethics, or Waiver of a Provision of the Code of Ethics.

(a) Briefly describe the date and nature of any amendment to a provision of the registrant's code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller or persons performing similar functions and that relates to any element of the code of ethics definition enumerated in Item 406(b) of Regulation S-K (*17 CFR 229.406(b)*).

(b) If the registrant has granted a waiver, including an implicit waiver, from a provision of the code of ethics to an officer or person described in paragraph (a) of this Item 5.05, and the waiver relates to one or more of the elements of the code of ethics definition referred to in paragraph (a) of this Item 5.05, briefly describe the nature of the waiver, the name of the person to whom the waiver was granted, and the date of the waiver.

(c) The registrant does not need to provide any information pursuant to this Item 5.05 if it discloses the required information on its Internet website within four business days following the date of the amendment or waiver and the registrant has disclosed in its most recently filed annual report its Internet address and intention to provide disclosure in this manner. If the registrant elects to disclose the information required by this Item 5.05 through its website, such information must remain available on the website for at least a 12-month period. Following the 12-month period, the registrant must retain the information for a period of not less than five years. Upon request, the registrant must furnish to the Commission or its staff a copy of any or all information retained pursuant to this requirement.

Instructions.

1. The registrant does not need to disclose technical, administrative or other non-substantive amendments to its code of ethics.

2. For purposes of this Item 5.05:

(i) The term *waiver* means the approval by the registrant of a material departure from a provision of the code of ethics; and

(ii) The term *implicit waiver* means the registrant's failure to take action within a reasonable period of time regarding a material departure from a provision of the code of ethics that has been made known to an executive officer, as defined in Rule 3b-7 (*17 CFR 240.3b-7*) of the registrant.

§ 101, Item 7 [Proxy Statement Disclosure Regarding Directors and Executive Officers]

* * * * *

Item 7. Directors and executive officers. If action is to be taken with respect to the election of directors, furnish the following information in tabular form to the extent practicable. If, however, the solicitation is made on behalf of persons other than the registrant, the information required need be furnished only as to nominees of the persons making the solicitation.

(a) The information required by instruction 4 to Item 103 of Regulation S-K (§ 229.103 of this chapter) with respect to directors and executive officers.

(b) The information required by Items 401, 404(a) and (b), 405 and 407(d)(4) and (d)(5) of Regulation S-K (§ 229.401, § 229.404(a) and (b), § 229.405 and § 229.407(d)(4) and (d)(5) of this chapter).

(c) The information required by Item 407(a) of Regulation S-K (§ 229.407 of this chapter).

(d) The information required by Item 407(b), (c)(1), (c)(2), (d)(1), (d)(2), (d)(3), (e)(1), (e)(2), (e)(3) and (f) of Regulation S-K (§ 229.407(b), (c)(1), (c)(2), (d)(1), (d)(2), (d)(3), (e)(1), (e)(2), (e)(3) and (f) of this chapter).

(e) In lieu of the information required by this Item 7, investment companies registered under the Investment

Company Act of 1940 (15 U.S.C. 80a) must furnish the information required by Item 22(b) of this Schedule 14A.

For compliance date information, *see* 72 FR 42222, Aug. 1, 2007; 73 FR 934, 977, Jan. 4, 2008, amended this section, effective Feb. 4, 2008. For compliance date information, *see* 73 FR 934, Jan. 4, 2008.] Form 8-K Item 5.02 and Instructions thereto [Disclosure on Form 8-K, and Related Procedures, Regarding Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers]

* * * * *

Item 5.02 Departure of Directors or Certain Officers; Election of Directors; Appointment of Certain Officers; Compensatory Arrangements of Certain Officers

(a)(1) If a director has resigned or refuses to stand for re-election to the board of directors since the date of the last

annual meeting of shareholders because of a disagreement with the registrant, known to an executive officer of the registrant, as defined in *17 CFR 240.3b-7*, on any matter relating to the registrant's operations, policies or practices, or if a director has been removed for cause from the board of directors, disclose the following information:

- (i) the date of such resignation, refusal to stand for re-election or removal;
- (ii) any positions held by the director on any committee of the board of directors at the time of the director's resignation, refusal to stand for re-election or removal; and
- (iii) a brief description of the circumstances representing the disagreement that the registrant believes caused, in whole or in part, the director's resignation, refusal to stand for re-election or removal.

(2) If the director has furnished the registrant with any written correspondence concerning the circumstances surrounding his or her resignation, refusal or removal, the registrant shall file a copy of the document as an exhibit to the report on Form 8-K.

(3) The registrant also must:

(i) provide the director with a copy of the disclosures it is making in response to this Item 5.02 no later than the day the registrant file the disclosures with the Commission;

(ii) provide the director with the opportunity to furnish the registrant as promptly as possible with a letter addressed to the registrant stating whether he or she agrees with the statements made by the registrant in response to this Item 5.02 and, if not, stating the respects in which he or she does not agree; and

(iii) file any letter received by the registrant from the director with the Commission as an exhibit by an amendment to the previously filed Form 8-K within two business days after receipt by the registrant.

(b) If the registrant's principal executive officer, president, principal financial officer, principal accounting officer, principal operating officer, or any person performing similar functions, or any named executive officer, retires, resigns or is terminated from that position, or if a director retires, resigns, is removed, or refuses to stand for re-election (except in circumstances described in paragraph (a) of this Item 5.02), disclose the fact that the event has occurred and the date of the event.

(c) If the registrant appoints a new principal executive officer, president, principal financial officer, principal accounting officer, principal operating officer, or person performing similar functions, disclose the following information with respect to the newly appointed officer:

(1) the name and position of the newly appointed officer and the date of the appointment;

(2) the information required by Items 401(b), *17 CFR 229.401(b), (d), (e)* and Item 404(a) of Regulation S-K (*17 CFR 229.401(b), (d), (e)* and *229.404(a)*), or, in the case of a small business issuer, Items 401(a)(4), (a)(5), (c), and Item 404(a) of Regulation S-B (*17 CFR 228.401(a)(4), (a)(5), (c), and 228.404(a)*), respectively); and

(3) a brief description of any material plan, contract or arrangement (whether or not written) to which a covered officer is a party or in which he or she participates that is entered into or material amendment in connection with the triggering event or any grant or award to any such covered person or modification thereto, under any such plan, contract or arrangement in connection with any such event.

Instruction to paragraph (c).

If the registrant intends to make a public announcement of the appointment other than by means of a report on Form 8-K, the registrant may delay filing the Form 8-K containing the disclosures required by this Item 5.02(c) until the day on which the registrant otherwise makes public announcement of the appointment of such officer.

(d) If the registrant elects a new director, except by a vote of security holders at an annual meeting or special meeting convened for such purpose, disclose the following information:

(1) the name of the newly elected director and the date of election;

(2) a brief description of any arrangement or understanding between the new director and any other persons, naming such persons, pursuant to which such director was selected as a director;

(3) the committees of the board of directors to which the new director has been, or at the time of this disclosure is expected to be, named; and

(4) the information required by Item 404(a) of Regulation S-K (17 CFR 229.404(a)) *17 CFR 229.404(a)*.

(5) a brief description of any material plan, contract or arrangement (whether or not written) to which the director is a party or in which he or she participates that is entered into or material amendment in connection with the triggering event or any grant or award to any such covered person or modification thereto, under any such plan, contract or arrangement in connection with any such event.

(e) If the registrant enters into, adopts, or otherwise commences a material compensatory plan, contract or arrangement (whether or not written), as to which the registrant's principal executive officer, principal financial officer, or a named executive officer participates or is a party, or such compensatory plan, contract or arrangement is materially amended or modified, or a material grant or award under any such plan, contract or arrangement to any such person is made or materially modified, then the registrant shall provide a brief description of the terms and conditions of the plan, contract or arrangement and the amounts payable to the officer thereunder.

Instructions to paragraph (e).

1. Disclosure under this Item 5.02(e) shall be required whether or not the specified event is in connection with events otherwise triggering disclosure pursuant to this Item 5.02.

2. Grants or awards (or modifications thereto) made pursuant to a plan, contract or arrangement (whether involving cash or equity), that are materially consistent with the previously disclosed terms of such plan, contract or arrangement, need not be disclosed under this Item 5.02(e), provided the registrant has previously disclosed such terms and the grant, award or modification is disclosed when Item 402 of Regulation S-K (17 CFR 229.402) requires such disclosure.

(f) If the salary or bonus of a named executive officer cannot be calculated as of the most recent practicable date and is omitted from the Summary Compensation Table as specified in Instruction 1 to Item 402(c)(2)(iii) and (iv) of Regulation S-K, disclose the appropriate information under this Item 5.02(f) when there is a payment, grant, award, decision or other occurrence as a result of which such amounts become calculable in whole or in part. Disclosure under this Item 5.02(f) shall include a new total compensation figure for the named executive officer, using the new salary or bonus information to recalculate the information that was previously provided with respect to the named executive officer in the registrant's Summary Compensation Table for which the salary and bonus information was omitted in reliance on Instruction 1 to Item 402(c)(2)(iii) and (iv) of Regulation S-K (17 CFR 229.402(c)(2)(iii) and (iv)).

Instructions to Item 5.02.

1. The disclosure requirements of this Item 5.02 do not apply to a registrant that is a wholly-owned subsidiary of an issuer with a class of securities registered under Section 12 of the Exchange Act (*15 U.S.C. 78l*), or that is required to file reports under Section 15(d) of the Exchange Act (*15 U.S.C. 78o(d)*).
2. To the extent that any information called for in Item 5.02(c)(3) or Item 5.02(d)(3) or Item 5.02(d)(4) is not determined or is unavailable at the time of the required filing, the registrant shall include a statement this effect in the filing and then must file an amendment to its Form 8-K filing under this Item 5.02 containing such information within four business days after the information is determined or becomes available.
3. The registrant need not provide information with respect to plans, contracts, and arrangements to the extent they do not discriminate in scope, terms or operation, in favor of executive officers or directors of the registrant and that are available generally to all salaried employees.
4. For purposes of this Item, the term "named executive officer" shall refer to those executive officers for whom disclosure was required in the registrant's most recent filing with the Commission under the Securities Act (15 U.S.C. 77a *et seq.*) or Exchange Act (15 U.S.C. 78a *et seq.*) that required disclosure pursuant to Item 402(c) of Regulation S-K (17 CFR 229.402(c)).
