1 Corporate Governance: Law and Practice Statement on Fair Use

Statement on Fair Use

RELEASE NO. 7A, MAY 2010

LexisNexis Matthew Bender recognizes the balance that must be achieved between the operation of the fair use doctrine, whose basis is to avoid the rigid application of the copyright statute, and the protection of the creative rights and economic interests of authors, publishers and other copyright holders.

We are also aware of the countervailing forces that exist between the ever greater technological advances for making both print and electronic copies and the reduction in the value of copyrighted works that must result from a consistent and pervasive reliance on these new copying technologies. It is LexisNexis Matthew Bender's position that if the "progress of science and useful arts" is promoted by granting copyright protection to authors, such progress may well be impeded if copyright protection is diminished in the name of fair use. (*See Nimmer on Copyright* § 13.05[E][1].) This holds true whether the parameters of the fair use doctrine are considered in either the print or the electronic environment as it is the integrity of the copyright that is at issue, not the media under which the protected work may become available. Therefore, the fair use guidelines we propose apply equally to our print and electronic information, and apply, within §§ 107 and 108 of the Copyright Act, regardless of the professional status of the user.

Our draft guidelines would allow for the copying of limited materials, which would include synopses and tables of contents, primary source and government materials that may have a minimal amount of editorial enhancements, individual forms to aid in the drafting of applications and pleadings, and miscellaneous pages from any of our newsletters, treatises and practice guides. This copying would be permitted provided it is performed for internal use and solely for the purpose of facilitating individual research or for creating documents produced in the course of the user's professional practice, and the original from which the copy is made has been purchased or licensed as part of the user's existing in-house collection.

LexisNexis Matthew Bender fully supports educational awareness programs designed to increase the public's recognition of its fair use rights. We also support the operation of collective licensing organizations with regard to our print and electronic information.

No copyright is claimed in the text of statutes, regulation, and excerpts from court opinions quoted within this work.

1 Corporate Governance: Law and Practice About the General Editors

About the General Editors

Bart Schwartz

Bart Schwartz is Executive Vice President, Chief Legal Officer, and Secretary of Assurant, Inc. Previously, he served as Chief Corporate Governance Officer and Secretary of The Bank of New York Mellon Corporation. He was previously Deputy General Counsel and Corporate Secretary of Marsh & McLennan Companies, Inc., General Counsel and Senior Vice President of The MONY Group Inc., and Senior Vice President, General Counsel and Secretary of Willis Corroon Corporation. Mr. Schwartz began his legal career in 1978 with Debevoise & Plimpton in New York and later joined the Los Angeles office of Skadden, Arps, Slate, Meagher & Flom. He holds a J.D. from the University of Southern California School of Law and an MBA from the Owen School of Management at Vanderbilt University. Mr. Schwartz is a frequent writer and speaker on corporate governance, securities law, mergers and acquisitions and other corporate law topics. In addition to serving as a General Editor of this treatise, Mr. Schwartz is the author of Chapters 9, 10 and 16.

Amy L. Goodman

Amy L. Goodman is a Partner at Gibson, Dunn & Crutcher LLP in Washington, D.C. She is Co-chair of the firm's Securities Regulation and Corporate Transactions group. She advises clients with respect to securities law disclosure and regulatory issues and corporate governance matters. Ms. Goodman joined the firm after serving as a free-lance editor and author of books and newsletters on securities and corporate law topics, including Editor-in-Chief of *Insights: The Corporate and Securities Law Advisor*, *The Investment Lawyer*, and *The Corporate Governance Advisor*. She also is co-editor of *A Practical Guide to SEC Proxy and Compensation Rules*.

Ms. Goodman previously was with the Securities and Exchange Commission for 11 years, holding several positions with the SEC's Division of Corporation Finance, including Associate Director (EDGAR), Deputy Associate Director, Assistant Chief of the Office of Disclosure Policy, and Chief of the Task Force on Corporate Accountability. She also served as Legal Assistant and Special Counsel to SEC Chairman Harold Williams and as an attorney in the SEC's

Division of Investment Management. In 1985, Ms. Goodman received the SEC's Distinguished Service Award, and, in 1986, she received the Presidential Meritorious Executive Award.

Ms. Goodman received her Juris Doctorate degree *cum laude* from the Boston University Law School and an LL.M. with emphasis in securities law, from the Georgetown University Law Center. She earned a Bachelor of Arts degree in political science from Boston University. Ms. Goodman is admitted to practice in the District of Columbia and Massachusetts. She is Chair of the Director and Officer Liability Committee of the American Bar Association's Business Law Section, Chair of the Shareholder and Investor Relations Subcommittee of the Corporate Governance Committee, and a member of the Federal Regulation of Securities Committee of the Business Law Section and the Securities Law Committee of the American Society of Corporate Secretaries. Ms. Goodman is also a frequent speaker at continuing legal education programs and other professional events.

In addition to serving as General Editor of this treatise, Ms. Goodman is the author of Chapter 1.

1 Corporate Governance: Law and Practice About the Contributing Authors

About the Contributing Authors

Meredith M. Brown

Meredith M. Brown is Of Counsel with Debevoise & Plimpton LLP, where he served as Co-Chair of the Corporate Department and of the Mergers & Acquisitions Group. Mr. Brown's practice was primarily in the areas of mergers and acquisitions and securities law.

Mr. Brown is a frequent speaker on mergers and acquisitions and securities topics. He has also written extensively in the fields of mergers and acquisitions, securities law and corporate law. He is the co-author (with Debevoise partners Ralph C. Ferrara, Paul S. Bird, Gary W. Kubek and William D. Regner) of *Takeovers: A Strategic Guide to Mergers & Acquisitions* (Aspen Law & Business 2d ed. 2004) and the editor of *International Mergers & Acquisitions* (Kluwer 1999) and *Mechanics of Global Offerings* (Kluwer 1995).

Mr. Brown has served as Co-Chairman of the Capital Markets Forum of the International Bar Association's Section on Business Law (1998-2002), Co-Chairman of the Section's Committee on Issues and Trading in Securities (1996-1998) and adjunct faculty member at Columbia Law School. He has also chaired the Committee on Professional Responsibility and the Committee on Professional and Judicial Ethics of the Association of the Bar of the City of New York.

Mr. Brown joined Debevoise as an associate in 1966 and became a partner in 1973. He received his A.B., *summa cum laude*, from Harvard College in 1961 and his J.D., *magna cum laude*, from Harvard Law School in 1965, where he was an Editor of the Harvard Law Review. Prior to joining Debevoise, Mr. Brown served as a law clerk to Hon. Leonard P. Moore, United States Court of Appeals for the Second Circuit.

Yvonne Chen

Yvonne Chen, Managing Director in the New York office of the compensation consulting firm, Pearl Meyer & Partners,

joined the Firm in 1998. With more than 20 years of business experience, Ms. Chen consults with companies, subsidiaries and joint ventures in the development of compensation objectives, value-based performance measurement and incentive plan design. She has worked extensively with clients in the telecommunications, asset management, non-regulated energy and manufacturing sectors. Ms. Chen previously was a Principal in the executive compensation practice group at William M. Mercer, Incorporated and held positions at SCA Consulting, KeySpan Corporation and Aetna Life & Casualty Corporation.

Ms. Chen is a graduate of the Massachusetts Institute of Technology and holds an M.B.A. in Finance from the University of Chicago Graduate School of Business.

Jay M. Cohen

Jay Cohen is Senior Vice President and Chief Compliance Officer of Assurant, Inc. He was previously Chief Compliance Officer of Dunn & Bradstreet and Vice President and Chief Corporate Compliance Officer of The MONY Group.

Before joining The MONY Group, Mr. Cohen was Senior Counsel with Compliance Systems Legal Group, a law firm focused exclusively on helping companies design and implement state-of-the-art compliance programs. He also served as Vice President, Compliance for Oxford Health Plans and for Prudential Insurance Company of America. Earlier in his career, Mr. Cohen held a number of positions in city and state government including ten years as a prosecutor in Brooklyn, New York.

Mr. Cohen is a 1973 graduate of George Washington University and a 1976 graduate of Yale Law School. He is a member of the Ethics Officer Association and is also a published author on compliance and legal topics.

Sean Feller

Sean Feller is a partner in Gibson, Dunn & Crutcher's Los Angeles office. He is a member of the firm's Executive Compensation and Employee Benefits Practice Group. His practice focuses on all aspects executive compensation and employee benefits. His practice encompasses tax, ERISA, accounting, corporate governance, and securities law aspects of equity and other incentive compensation plans; qualified and nonqualified retirement and deferred compensation plans and executive employment and severance arrangements.

Mr. Feller received his law degree from Columbia Law School in 2000. He earned a bachelor of science from Cornell University in 1997. He is admitted to practice in the States of New York and California.

Holly J. Gregory

Holly J. Gregory, a partner in the Corporate Governance Group of Weil, Gotshal & Manges LLP, counsels corporate directors, trustees, managers and institutional investors on a range of governance issues, including director and trustee responsibilities, conflicts of interest, board and committee structure, audit committee investigations, board audits and self-evaluation processes, institutional investor initiatives, international governance "best practice," and compliance with Sarbanes-Oxley and listing rule requirements. In the public policy arena, Ms. Gregory has worked on various corporate governance projects for the OECD, the European Commission, the World Bank, and the U.S. Securities and Exchange Commission.

In addition to her legal practice and policy efforts, Ms. Gregory has lectured on corporate governance topics at

programs sponsored by the OECD, the World Bank, the SEC, the US State Department (in Japan and Turkey), the Conference Board, the National Association of Corporate Directors, the American Corporate Counsel Association, the American Society of Corporate Secretaries, the National Association of Public Pension Attorneys, and Institutional Shareholder Services, among others. She has helped organize corporate governance programs for the OECD, the World Bank, the Global Corporate Governance Forum, Yale's International Institute for Corporate Governance, Transparency International, the SEC, and Columbia University School of Law's Institutional Investor Project. She served as Counsel to the Egon Zehnder International Institutional Investors Advisory Group, and served on the Secretariat of the OECD Business Sector Advisory Group on Corporate Governance. She has served as co-chair of the Subcommittee on International Developments of the Corporate Governance Committee of the Business Law Section of the American Bar Association, and has also served as a member of both the Nominating and Bylaw Committees of the International Corporate Governance Network. She was named by her peers to the first International Who's Who of Corporate Governance Lawyers in 2002 and in the subsequent 2004 and 2006 editions, and in 2005, was named in a Legal Media Group survey of lawyers as among the world's top ten corporate governance lawyers.

A frequent lecturer, Ms. Gregory has authored and co-authored a number of publications on corporate governance, including as a featured columnist in Dow Jones' *Corporate Governance* publication. Recent writings include: "Corporate Governance Roundtable--International Corporate Governance," *Financier Worldwide* (June 2005); "The Ripple Effect," *Internal Auditor* (Feb. 2005); "Global Overview" in *Corporate Governance--in 22 Jurisdictions Worldwide* (Law Business Research 'Getting the Deal Through' Series, 2004 & 2003), and United States Chapter (co-authored with David Murgio and Jane Pollack) (also Contributing Editor); "The U.S. Corporate Governance Crisis in Context," in *Corporate Governance: A Guide to Corporate Accountability* (Henry A. Davis, ed., Institutional Investor, Fall 2003); "Corporate Governance Reform: Learning from Our Mistakes," in *Corporate Governance & Capital Flows in a Global Economy* (Oxford University Press, 2003) (co-authored with Ira M. Millstein); "The Role of the Audit Committee in Corporate Governance," in *In Search of Good Directors, A Guide to Building Corporate Governance in the 21st Century* (Center for International Private Enterprise, 2003) (co-authored with Jason R. Lilien); "Comparative Study of Corporate Governance Codes Relevant to the European Union and its Member States," on behalf of the European Commission, Internal Market Directorate General (January 2002); and "The Globalization of Corporate Governance," *Global Counsel* (Part I, September 2000; Part II, October 2000).

Ms. Gregory received her J.D. *summa cum laude* from New York Law School in 1986, where she was Executive Editor of the New York Law School Law Review. Upon graduation, she served as a law clerk to the Honorable Roger J. Miner, United States Court of Appeals for the Second Circuit, until her association with Weil, Gotshal & Manges LLP in 1987. She is a founding member of the Board of Legal Advisors of the NOW Legal Defense & Education Fund.

S. Mark Hurd

S. Mark Hurd is a partner in the Wilmington, Delaware law firm of Morris, Nichols, Arsht & Tunnell, where he is a member of the Corporate and Business Litigation Group. Mr. Hurd's litigation practice focuses on corporate mergers and acquisitions, defense of stockholder class and derivative actions, litigation relating to advancement and indemnification obligations, and statutory actions relating to the governance and valuation of Delaware corporations. He also advises boards of directors and special committees in conflict of interest transactions and derivative litigation.

Recent publications authored or co-authored by Mr. Hurd include: "Special Negotiating Committees," *The Review of Commodities & Securities Litigation*, Vol. 30, No. 8; *Special Committees of Independent Directors*, a publication of the Bureau of National Affairs, Inc.; and "Indemnification of Directors and Officers Under Delaware Law," *The Review of Commodities & Securities Regulation*, Vol. 35, No. 21. Mr. Hurd has been a speaker at legal seminars for the Practising Law Institute and the American Bar Association regarding matters of Delaware corporate law and governance.

Mr. Hurd graduated *magna cum laude* with a Bachelor of Science in Foreign Service from Georgetown University and

cum laude from Georgetown University Law Center. He is a member of the Delaware State Bar Association's Corporation Law Section, a member of the American Bar Association's Sections of Business Law and Litigation, and is admitted to practice in New York and Delaware.

Andrew M. Johnston

Andrew M. Johnston is a partner of Morris, Nichols, Arsht & Tunnell, where he is a member of the Corporate Counseling Group. His practice includes advising corporations, directors, stockholders and their counsel on a wide variety of Delaware corporate law issues including those relating to the fiduciary duties of directors, officers and stockholders, financing transactions, conflict of interest transactions, corporate governance, indemnification and director and officer liability. He has worked closely with boards of directors, special committees of directors, and managements of public and private corporations in conflict transactions, proxy contests, sale of control and business combination transactions and hostile takeovers.

Mr. Johnston has been a speaker at many legal seminars and is the author or co-author of numerous publications including: a co-author of "Indemnification, Directors and Officers Liability Insurance and Limitations of Director Liability Pursuant to Statutory Authorization: The Legal Framework Under Delaware Law," which has been published in materials for several seminars; the co-author of *Special Committees of Independent Directors*, a publication of The Bureau of National Affairs, Inc.; co-author of "The Ins and Outs in Handling Difficult Board Meetings--Practical Tips for Legal Advisors," which was prepared for the 22nd Annual Conference on Securities Regulation and Business Law Problems sponsored by The University of Texas Law School and held on February 17 and 18, 2000; and "Repurchases of Shares--State of State Law," a chapter in *Securities Law Techniques* published by LexisNexis Matthew Bender.

Mr. Johnston is an active member of several committees of the Business Law Section of the American Bar Association, including the Editorial Subcommittee of the Corporate Practice Committee, which is preparing corporate forms and commentary for publication by the ABA, of which he is the Chair. He is a 1982 graduate of Northwestern University School of Law (J.D., *cum laude*) and a 1979 graduate of Kenyon College, Gambier, Ohio (A.B., *summa cum laude* with high honors in Economics).

Claude E. Johnston

Claude Johnston is a Managing Director in the New York office of Frederic W. Cook & Co., Inc. Mr. Johnston has more than 25 years of experience advising Boards and managements across a broad range of industries in the development and implementation of compensation programs. As a recognized authority on the tax and legal aspects of executive and Board remuneration, Mr. Johnston also has extensive experience with employment contracts, special situations and unique transactions, including IPOs, LBOs, restructurings, recapitalizations, joint ventures and mergers and acquisitions. Prior to joining the Firm he was a Managing Director of Pearl Meyer & Partners and a Partner and Chairman of the Executive Compensation Practice Group at Hughes Hubbard & Reed.

Mr. Johnston holds an A.B. from Colgate University, a J.D. from Tulane Law School, where he was Editor-in-Chief of the Law Review, and an LL.M. in Taxation from New York University.

Robert B. Lamm

Robert B. Lamm is Assistant General Counsel and Assistant Secretary at Pfizer Inc., where his responsibilities include securities compliance and corporate governance matters. He joined Pfizer in 2008.

From 2005 to 2008, Mr. Lamm was Managing Director, Associate General Counsel and Corporate Secretary of FGIC Corporation and Financial Guaranty Insurance Company, where he was responsible for a variety of corporate legal matters, including securities compliance and corporate governance. From 2002 to 2005, he served as Senior Vice President - Corporate Governance and Secretary of CA, Inc., where he was responsible for the development and implementation of corporate governance programs and policies and improving relationships with institutional investors and other constituencies on governance-related topics. Previously, Mr. Lamm was a shareholder of Gunster, Yoakley & Stewart, P.A., in West Palm Beach, Florida, where he served as Chair of the Firm's Securities and Corporate Governance Practice Group. Before joining Gunster Yoakley, he was Senior Vice President, General Counsel and Secretary of Hvide Marine Incorporated, and he previously served as Vice President and Secretary of W. R. Grace & Co.

Mr. Lamm is an active member of the Society of Corporate Secretaries and Governance Professionals; he serves on the Society's Securities Law Committee and its 2010 National Conference Committee and has served on its Corporate Practices and Finance Committees, as a director of the Society, and as Chair of its National Conference Committee. Mr. Lamm was the 2009 recipient of the Society's Bracebridge H. Young Distinguished Service Award. He is also a member of the New York State Bar Association, The Florida Bar, the American Bar Association (including its Business Law Section and Committees on Corporate Governance and Federal Regulation of Securities), and the Association of Corporate Counsel (including its Corporate and Securities Law Committee). Mr. Lamm is a frequent speaker on securities law, corporate governance and related topics and a contributor to a wide variety of legal and business publications. He currently serves on the Board of Editors of *The Corporate Counselor*.

Mr. Lamm received a Bachelor of Arts from Brandeis University and a Juris Doctor from the University of Pennsylvania School of Law.

Ari B. Lanin

Ari B. Lanin is a partner in Gibson, Dunn & Crutcher's Century City Office. Mr. Lanin is a member of the firm's Mergers and Acquisitions, Capital Markets and Securities and Corporate Governance practice groups. He advises companies across a wide range of industries, and also frequently works with private equity firms, investment banks and venture capital firms. Mr. Lanin focuses on public and private merger transactions, stock and asset sales, joint ventures and strategic partnerships, contests for corporate control and public and private (including Rule 144A) capital raising transactions. Mr. Lanin also advises public companies with respect to securities regulation and corporate governance matters, including periodic reporting and disclosure matters, Section 16, Rule 144, insider trading and the implementation of Rule 10b5-1(c) plans.

Mr. Lanin received his law degree in 2000 from the University of Southern California Law School, where he was elected to Order of the Coif and served as a member of the Southern California Law Review. He earned a Bachelor of Arts degree in history, *magna cum laude* and Phi Beta Kappa from Brandeis University in 1997.

J. Travis Laster

Travis Laster was sworn in as Vice Chancellor of the Delaware Court of Chancery. Mr. Laster is a founding Partner of Abrams & Laster LLP in Delaware, where he specializes in corporate and commercial litigation and advising corporations and business organizations. Prior to founding Abrams & Laster, Mr. Laster was a Director of Richards, Layton & Finger P.A. Mr. Laster is the author of numerous articles including: "A New Rule from Delaware," *Insights* (May 2003); "Omnicare Casts Doubt on a Controlling Stockholder Lock-Up When Combined With A Force-the-Vote Provision," *Insights* (Jan. 2003); "Decision by DE Supreme Court Suggests That It May Be Time to carefully Review Indemnification Provisions," *Corporate Counsel Weekly* (July 2002); "Diluting a Controlling Shareholder," *Insights*

(May 2002); "Exposing a False Dichotomy: The Implication of the No-Talk Case for the Time/Revlon Double Standard," 2 Del. L. Rev. 179 (2000); "Exorcising the Omnipresent Specter: The Impact of Substantial Equity Ownership on Unocal Analysis," 55 Bus. Law 109 (2000); "Liability of Directors of Acquiring Companies," *Insights* (Nov. 2000); "Can a Board Dilute a Majority Stockholder?," *Corporate Counsel* (Nov., 2000); "The Changing Rules of Takeover Defense," *The Corporate Board* (July/Aug., 2000); "An Appraiser By Any Other Name," *Insights* (May 1999); "The Line Item Veto and Unocal: Can a Bidder Qua Bidder Pursue Unocal Claims Against a Target Corporation's Board of Directors?," 53 Bus. Law 767 (1998).

Mr. Laster is a *summa cum laude* graduate of Princeton University and received a Juris Doctorate from the University of Virginia School of Law (Order of the Coif). He is a member of the Delaware State Bar and the Virginia and American Bar Associations.

Deborah Lifshy

Deborah Lifshy, a Vice President at Pearl Meyer & Partners, joined the firm's New York office in 2001. Prior to joining the firm, Ms. Lifshy was an associate at Holland and Knight specializing in employment litigation matters, and most recently at Fried, Frank, Harris, Shriver & Jacobson specializing in executive compensation, ERISA matters and corporate transactions.

Ms. Lifshy is a graduate of the Industrial and Labor Relations School at Cornell University, and holds a J.D. from the University of Florida College of Law. Before commencing her legal career, she was a federal clerk for the Honorable Judge Susan H. Black on the Eleventh Circuit Court of Appeals.

Gillian McPhee

Gillian McPhee is of counsel in Gibson, Dunn & Crutcher's Washington, D.C. office. She is a member of the firm's Securities Regulation and Corporate Governance Practice Group, as well as the firm's Corporate Transactions Practice Group. Ms. McPhee focuses her practice on governance matters and securities regulatory issues. Ms. McPhee has advised corporate clients with respect to a wide array of matters, including the Sarbanes-Oxley Act of 2002, director independence, audit committee practices, duties and liabilities of directors and officers, indemnification and D&O insurance, and securities law disclosure issues. Ms. McPhee also has considerable experience advising nonprofit organizations on governance matters.

Ms. McPhee has authored or co-authored a variety of articles and other publications on securities law and corporate governance issues, including a chapter on "Liability of Officers and Directors; Statutory Limitations, Indemnification and D&O Insurance," in *Corporate Governance: Law and Practice*, LexisNexis/Matthew Bender; *Management's Discussion and Analysis*, a portfolio in the BNA Accounting Policy & Practice Portfolio Series; "'Clawbacks' of Executive Compensation," *Insights*, August 2008; "Director Compensation in Turbulent Times," *The Corporate Governance Advisor*, July/August 2008; "Delaware Case Raises Questions about the Scope of Advance Notice Bylaws," *Insights*, March 2008; "Watch Your Watcher: Audit Committees Are Facing Stricter Mandates to Oversee Outside Auditor," *Legal Times*, November 2004; The Business Roundtable's 2002 Principles of Corporate Governance," *The Corporate Governance Advisor*, September/October 2002; "Guidelines on the Use of Electronic Media," in *Securities in the Electronic Age: A Practical Guide to the Law and Regulation*, Glasser LegalWorks; "SEC Adopts New Insider Trading Rules and Protection for Pre-arranged Trades," *The Journal of Investment Compliance*, Winter 2000; and "New Insider Trading Rules Present Opportunities," *Insights*, October 2000.

Ms. McPhee received her J.D., with Honors, from the University of Texas in 1997. She received her Bachelor of Arts *magna cum laude* from Yale University in 1993.

Ms. McPhee is admitted to practice in the State of Maryland and the District of Columbia.

Nell Minow

Nell Minow is Editor of thecorporatelibrary.com, an Internet site that compiles research, study and critical thinking about the nature of the modern global corporation, with a special emphasis on boards of directors and executive compensation. It publishes a weekly newsletter and special reports and studies, including reports on CEO employment contracts, related transactions, corporate loans to executives, and "golden handshakes."

Ms. Minow was formerly a Principal of LENS, a \$100 million investment firm that bought stock in underperforming companies and used shareholder activism to increase their value. She was dubbed "the CEO Killer" by Fortune magazine for her record of ousting non-performing CEOs at companies like Sears, American Express, Kodak, and Waste Management and was listed as one of the 30 smartest people in investing in the December 2002 issue of Smart Money magazine. Before LENS, she served as general counsel and then president of Institutional Shareholder Services, Inc., a firm that advises institutional investors on issues of corporate governance, and as an attorney at the Environmental Protection Agency, the Office of Management and Budget, and the Department of Justice. Ms. Minow is a graduate of Sarah Lawrence College and the University of Chicago Law School.

Ms. Minow frequently comments on the financial markets in the press and on television, including on network news broadcasts. She has written more than 200 articles as well as chapters in treatises on executive compensation, annual shareholder meetings, and in the books *Law Stories*, *The Dance of Change*, and *The Financial Services Revolution*. She is co-author with Robert A. G. Monks of three books, *Power and Accountability*, (HarperBusiness 1991), the textbook *Corporate Governance* (Blackwell 1995, 2001, and 2003), and *Watching the Watchers: Corporate Governance for the 21st Century* (Blackwell 1996).

John F. Olson

John F. Olson, a 1964 honors graduate of the Harvard Law School, is a founding partner in Gibson, Dunn & Crutcher's Washington, D.C. office. Mr. Olson has extensive experience in general representation of business organizations as to corporate governance, corporate securities, corporate finance and merger and acquisition matters. He has acted as special counsel for boards of directors and board committees on governance issues and in assessing shareholder litigation, responding to business combination proposals and conducting internal investigations. He also has represented corporations, broker-dealer firms and individuals in defense of Securities and Exchange Commission and other governmental investigations.

In the American Bar Association (ABA), Mr. Olson has just completed a five year term as Chairman of the Business Law Section's Committee on Corporate Governance, as well as a member of the Presidential Task Force on Corporate Responsibility appointed by the President of the ABA. Previously, he was Chairman of the ABA's Committee on Federal Regulation of Securities (1991-1995). He is a member of the Executive Council of the Securities Committee of the Federal Bar Association.

For the ABA, Mr. Olson has also chaired the Task Force on Regulation of Insider Trading, which produced a comprehensive analysis of and report on U.S. insider trading law and he chairs the Task Force which has produced the third (2001) and fourth (2004) editions of *The Corporate Director's Guidebook*. He served for nine years on the Legal Advisory Committee of the New York Stock Exchange and was a member of the Legal Advisory Board of the National Association of Securities Dealers. He was a Founding Trustee of the American College of Investment Counsel. In 1987, he served on a select committee of leading securities lawyers, appointed by the chairman of the Senate Banking

Committee, which drafted definitive insider trading legislation introduced in the United States Congress.

In 2004, Mr. Olson was identified by *Legal Times* as one of the "10 Leading Securities Attorneys" in the Washington, D.C. area. In 2005, he was named one of the 500 leading lawyers in America by *Lawdragon* and one of the leading corporate governance practitioners in the world by *Legal Media Group*. A frequent lecturer at legal and business seminars, Mr. Olson co-chairs various seminars on an annual basis. He is on the executive committee for the San Diego Securities Regulation Institute and the advisory committee for the Practising Law Institute's Annual Securities Regulation Institute. He is the author of more than 100 articles and a member of the editorial advisory boards for a variety of securities and corporate law publications. Mr. Olson is the co-author of *Director and Officer Liability: Indemnification and Insurance*, published by West Publishing (revised 2002) and has edited several other books on securities law issues. Mr. Olson was the Distinguished Visiting Practitioner in Residence at Cornell Law School in Spring 2003 and is currently an adjunct professor of law at Northwestern University School of Law.

William D. Regner

William D. Regner is a corporate partner with Debevoise & Plimpton LLP and a member of the firm's Mergers & Acquisitions Group. He focuses primarily on mergers and acquisitions, including public company and cross-border transactions, and investment management, corporate and securities law matters.

Mr. Regner is the co-author of *Takeovers: A Strategic Guide to Mergers & Acquisitions* (Aspen Law & Business 2004). He has written numerous articles on mergers and acquisitions and corporate law matters, including "What Buy-Side Directors Need to Know," *International Financial Law Review Guide to Mergers & Acquisitions* (2005); "Looking at Lock-ups: Orman & Omnicare," *The M&A Lawyer* (2005); "Combustion Hazard" and "Let's Be Fair," *The Daily Deal* (2004); "What's Happening to the Business Judgment Rule?," *Insights* (2003); "Delaware to Directors: Don't Do Done Deals," *The M&A Lawyer* (2003); "Hot Line," "Booby Traps," "Nerve Tonic," and "Putting it Together," *The Daily Deal* (2003); and "Going Private the Pure Way in Delaware," *Insights* (2002).

Mr. Regner joined Debevoise as an associate in 1994 and became a partner in 2002. He received his A.B. from Colgate University in 1988 and his J.D., *summa cum laude*, from the Benjamin N. Cardozo School of Law in 1994, where he was Articles Editor of the *Cardozo Law Review*.

Dmitriy A. Tartakovskiy

Dmitriy Tartakovskiy is an associate at the New York office of Debevoise & Plimpton, LLP. He is a member of the firm's Corporate Department whose practice focuses on mergers and acquisitions.

Ashley Wright

Ashley Wright is director of corporate governance and compliance at NeuStar, Inc., a New York Stock Exchange listed company. Prior to joining NeuStar, Ms. Wright was an associate in the Washington, D.C. office of Gibson, Dunn & Crutcher, where her practice involved the representation of public and private companies with respect to mergers and acquisitions, public and private offerings, securities regulation and disclosure issues, and corporate governance. Prior to joining Gibson, Dunn & Crutcher, Ms. Wright worked as an appropriations associate and legislative assistant in the U.S. House of Representatives.

Ms. Wright is the author or co-author of several publications on corporate and securities law issues, including "SEC Issues Guidance on Form 8-K Amendments," *Insights* (Dec. 2004); and "Inside the SEC: Sarbanes-Oxley Rulemaking

Scorecard," *Insights* (Feb. 2003).

Ms. Wright received her law degree from Georgetown University Law Center in 2002 and her bachelor's degree from Georgetown University in 1998. She is admitted to practice in Virginia and the District of Columbia and is a member of the Business Law Section of the American Bar Association.

1 Corporate Governance: Law and Practice Foreword

Foreword

Foreword

As the sixth update of *Corporate Governance: Law and Practice* goes to press, the field of corporate governance is very much in flux. In the wake of the financial crisis of 2008-2009, proposals now pending in Congress and before the SEC, if they come into effect, would create new requirements for corporate boards, new rights for shareholders, and new disclosure requirements for public companies in the areas of corporate governance and executive compensation. More than ever before, they would also federalize the law of corporate governance. Further, along with recent rule changes (such as the amendment of New York Stock Exchange Rule 452 to eliminate broker discretionary voting of uninstructed shares in director elections), they would fundamentally alter the dynamics of the relations between shareholders, boards of directors, and corporate management - the boundaries of that relationship being the central issue in the field of corporate governance.

An excellent report released on August 1, 2009 by the Task Force of the ABA Section of Business Law Corporate Governance Committee on Delineation of Governance Roles and Responsibilities thoughtfully examines the roles of the players in the corporate governance arena. Among other important points, it highlights that, contrary to some current rhetoric, stockholders are not the "owners" of the corporation in the sense that a person might own real or tangible property. They are the owners of shares of stock, which, by their terms and under state law, provide specific, carefully delineated rights. By the same token, the buzzword "shareholder democracy" is misleading in its implication that there is a useful analogy between governments that are organized as democracies and the rules and policies governing the relationship between shareholders, boards and managers. As the field of corporate governance evolves, it is important to engage in the kind of painstaking policy analysis that the ABA Report does, and not to fall prey to shibboleths that call for radical transformation of the relationships between state and federal law, private ordering and uniform rules, and the actors in corporate governance, without careful consideration of the policy implications for the efficient and effective functioning of corporations, which should be the ultimate touchstone.

1 Corporate Governance: Law and Practice Scope

Scope

HIGHLIGHTS

Release 7A May 2010

Special Release of Chapter 5

Just recently, the author of one of the chapters of our Corporate Governance: Law and Practice publication alerted me to some errors/mistakes that unfortunately made its way into Release 6 of this publication. We are issuing this release, which contains the corrected version of Chapter 5. Apologies for any inconvenience caused and our sincere thanks for your continued patronage.

This special release of Chapter 5 discusses the overall issue of the liability of corporate officers and directors. However, particular attention is placed on this issue in light of the current economic and financial conditions. The author also explores more closely the topic of officer/director indemnification through a number of recent cases such as *In re Citigroup* (Del. Chancery, 2009). "In *Citigroup*, the court dismissed claims against current and former Citigroup directors alleging that they failed adequately to oversee and manage the risks that the company faced from exposure to the problems in the subprime mortgage market in 2007 and 2008, even in the face of alleged "red flags." *In re Citigroup* placed a much higher burden of proof upon plaintiffs to prove director/officer liability. ... However, "the foregoing case(s) also illustrate that, under Delaware law, directors who engage in conduct that amounts to an intentional dereliction of duty or conscious disregard for their responsibilities will not be entitled to exculpation under Section 102(b)(7)."

Additionally, the author provides a more in-depth analysis on the related topic to indemnification--the advancement of legal fees by the corporation to the officer or director. The author uses a number of leading cases, such as *Sun Times Media v. Conrad Black, et al or Bergonzi v. Rite Aid Corp.*, to dissect the rather thorny issue of advancement of legal fees and indemnification."

CHAPTER 1 HISTORY AND SOURCES OF CORPORATE GOVERNANCE

1-1 Corporate Governance: Law and Practice § 1.01

AUTHOR: Amy L. Goodman

§ 1.01 The Agency Problem

Corporations are a key component to a capitalist society as they provide a vehicle to assemble human and financial capital. Their limited liability and perpetual existence are essential to our economy. However, from almost the start of the modern corporation in the 19[th] century, there has been concern about the division between ownership by shareholders and control by management.ⁿ¹ As expressed most eloquently by Columbia Professors Adolph A. Berle and Gardiner C. Means: "the organization under the system of private enterprise has rested upon the self-interest of the property owner".ⁿ² However, if the property owner is no longer involved in the day-to-day management of the enterprise, but, instead, the owners are a widely dispersed group of shareholders, who is to hold the managers accountable? Throughout this century, efforts have been made, through legislation, regulation and otherwise, to address this "agency problem". Today, the agency problem and the respective roles of the board of directors, management, and shareholders are at the heart of the debate concerning corporate governance.

CHAPTER 1 HISTORY AND SOURCES OF CORPORATE GOVERNANCE

1-1 Corporate Governance: Law and Practice § 1.02

AUTHOR: Amy L. Goodman

§ 1.02 The History of Corporate Governance

[1] State Chartering of Corporations

States originally provided for chartering of corporations by individual grants, or charters, but by the late 19[th] century most states had shifted to a policy of incorporation by general enabling act under which corporate status could be achieved by following general standards set out in a statute. Over time, limitations on a corporation's capital or its ability to trade and invest in the stock of other corporations also disappeared. It was during this period, as Maine, New York, New Jersey, and finally, Delaware vied for the most flexible statute, that state corporation laws came to be perceived as instruments of competition.ⁿ¹ Over time, these statutes continued to offer widening latitude with respect to corporate activities, capital structure, and internal controls.

This trend was exacerbated during the takeover boom of the 1980s as state legislatures enacted a variety of anti-takeover statutes and Delaware courts issued a number of opinions favorable to management.ⁿ² Beginning in the mid 1980s, however, Delaware courts began issuing opinions limiting the actions of corporate managers and directors when faced with hostile bids.ⁿ³ Later, in the wake of the corporate scandals beginning in 2001, and the enactment of the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"),ⁿ⁴ Delaware courts issued a number of opinions signaling that they would be looking more closely and more critically at questions of director independence, good faith and due care.ⁿ⁵ One of the most notable cases, in this regard, involved the compensation, particularly the severance, paid to an executive of The Walt Disney Co. In the first lower court decision, Chancellor Chandler noted that courts rarely impose liability on directors for conduct that is merely negligent or even grossly negligent, but suggested that, in this case, the directors had "failed to exercise *any* business judgment and failed to make *any* good faith attempt to fulfill their fiduciary duties to Disney and its stockholders".ⁿ⁶ Subsequently, both the Delaware Chancery Courtⁿ⁷ and the Delaware Supreme Courtⁿ⁸ found that none of the directors had breached his fiduciary duties.ⁿ⁹ Similarly, in a 2006 decision, the Delaware Supreme Court affirmed the so-called *Caremark* ⁿ¹⁰ standard and held that directors can be held liable based on alleged failures to satisfy their oversight responsibility only if: (1) the directors fail to implement any reporting or information system or controls;ⁿ¹¹ or (2) having implemented such system or controls, consciously failed to monitor or oversee its operations thus disabling them themselves from being fully informed of risks or problems requiring their attention.ⁿ¹² More recently, in a February 2009 opinion, the Delaware Chancery Court reaffirmed that the business judgment rule is the guiding standard by which to analyze board actions and that Delaware

courts will provide deference to decisions made in good faith, even if those decisions appear "wrong" in hindsight.ⁿ¹³ On the other hand, some Delaware judges have spoken out about the importance of directors' fulfilling their responsibilities to the companies they serve and their shareholders.ⁿ¹⁴

In the past decade, state corporation statutes continued to evolve as shareholder activism increased. For example, in response to a growing shareholder interest in shifting from a plurality to a majority voting standard in director elections, several states amended their corporation laws to facilitate the adoption of a majority voting standard for the election of directors. In addition, as the debate surrounding shareholder access to proxy materials heightened in 2009, Delaware amended its corporation statute to expressly allow a corporation to adopt bylaws permitting shareholder access. In North Dakota, the state legislature went even further and enacted the nation's most shareholder-friendly corporation statute. That statute is optional for companies incorporated in North Dakota and provides for, among other things, majority voting in director elections, advisory shareholder votes on executive compensation, proxy access, and the separation of the roles of chairman of the board and chief executive officer.

[2] The Stock Market Crash and the Federal Securities Laws

The 1929 stock market crash exposed egregious examples of market manipulation, insider trading, and corporate wrongdoing. One of President Franklin Roosevelt's first acts in March 1933 was to send a message urging the enactment of a law on the issuance of securities.ⁿ¹⁵ This was followed by the commencement of the Pecora investigation,ⁿ¹⁶ which ultimately led to the passage of the Securities Act of 1933 ("1933 Act")ⁿ¹⁷ and the Securities Exchange Act of 1934 ("1934 Act").ⁿ¹⁸ Significantly, Congress opted for a disclosure approach as the foundation of the federal securities laws.ⁿ¹⁹ Over the years, as discussed below, the Securities and Exchange Commission ("SEC") has shown varied levels of interest in corporate governance matters. It has used its public voiceⁿ²⁰ and its enforcement authority to, among other things, demand changes in corporate boards, including the formation of audit committees,ⁿ²¹ and has commenced investigations and issued reports describing failures of corporate governance.ⁿ²² It also used its rulemaking authority to require greater disclosure concerning boards of directors, their committees and their processes.ⁿ²³

[3] The Questionable Payments Era

The corporate governance movement took on new impetus in response to revelations of questionable payments--both illegal corporate campaign contributions and overseas bribery--that certain U.S. corporations had made during the 1970s and the SEC's investigation of such practices.ⁿ²⁴ In its report to Congress on such practices in 1976, the SEC noted that "[t]he almost universal characteristic of the cases ... has been the apparent frustration of our system of corporate accountability...".ⁿ²⁵ The report went on to point out that, with only a single exception, such payments occurred at companies without audit committees, with an audit committee that had only been operational for part of the period in which the misconduct occurred, or with an audit committee that was not wholly independent of management. Many of the SEC's settlements with companies involved in questionable payments cases required companies to establish a committee of independent directors to look into these practices.ⁿ²⁶

Congress responded to these revelations with the enactment of the Foreign Corrupt Practices Act of 1977 ("FCPA").ⁿ²⁷ While much attention has focused on the anti-bribery portion of the FCPA, it also includes an important provision relating to corporate governance--Section 13(b)(2) to the 1934 Act, which generally requires every SEC-reporting company to keep accurate books and records and to devise and maintain an adequate system of internal accounting controls. The Sarbanes-Oxley Act enhanced these requirements.ⁿ²⁸

It was also during this period that Congress focused attention on federal chartering of corporations. Ralph Nader and others called for federal chartering of corporations.ⁿ²⁹ Professor William Cary of Columbia Law School called for federal minimum standards for multi-state and multinational corporations, which he believed should be regulated at the national level.ⁿ³⁰ Both the House of Representativesⁿ³¹ and the Senate held hearings,ⁿ³² but there was little

Congressional interest in legislation in this area.ⁿ³³

Responding to these developments and others, in 1977 the SEC initiated a broad re-examination of its rules relating to shareholder communications, shareholder participation in the corporate electoral process, and corporate governance generally.ⁿ³⁴ After holding hearings throughout the country, the SEC adopted several amendments to its proxy rules requiring, among other things, (1) enhanced disclosure concerning the structure and functioning of boards of directors and their committees,ⁿ³⁵ and (2) a new form of proxy card, which permitted shareholders to vote on director nominees.ⁿ³⁶ In September 1980, the Commission also authorized issuance of a Staff Report on Corporate Accountability ("1980 Staff Report"), which addressed the roles of shareholders, boards of directors and others in the corporate accountability process and evaluated the efficacy of these accountability mechanisms.ⁿ³⁷ The 1980 Staff Report also included a further agenda for Commission action, as well as recommendations for reforms in the private sector.ⁿ³⁸ Nevertheless, the election of Ronald Reagan in November 1980 and the resulting deregulatory environment in Washington, D.C. caused the abandonment of most of the follow-on recommendations of the 1980 Staff Report.

[4] Increasing Shareholder Activism

A number of corporate failures in the late 1980s and early 1990s, combined with institutional investor frustration left over from the takeover boom of the 1980s, sparked shareholder activism in the early 1990s. By then, many institutional investors had "begun to look to boards of directors to provide a more independent review of corporate performance, direction and strategy."ⁿ³⁹ It was during this period that the boards of directors of some very large companies, including General Motors and IBM, responded to shareholder concerns and replaced incumbent management with new managers. So, too, in 1992, the SEC substantially revised its proxy rules to give shareholders substantial freedom to communicate privately among themselves, as well as to express their views publicly, on corporate governance matters.ⁿ⁴⁰

Throughout the 1990s, institutional investors continued to press for greater influence over the companies in which they invested. Shareholder proposals were put forth in increasing numbersⁿ⁴¹ and "just vote no" campaigns, in which institutional investors urged the withholding of votes from all or particular directors,ⁿ⁴² intensified. The California Public Employees Retirement System ("CalPERS") and Teachers Insurance and Annuity Association/College Retirement Equities Fund ("TIAA-CREF") enhanced their role as activist shareholders, devoting significant attention to the impact of corporate governance practices on the companies in which they invested.ⁿ⁴³

In April 2003, the SEC undertook a review of the process for the nomination and election of corporate directors.ⁿ⁴⁴ On at least two previous occasions, the SEC had considered giving shareholders greater access, but had abandoned the idea.ⁿ⁴⁵ Its proposed rule would give major, long-term shareholders access to company proxy materials to nominate directors where "objective criteria" indicate that shareholders' views were not adequately being taken into account.ⁿ⁴⁶ The proposals generated great support in the institutional investor community and a firestorm of protestⁿ⁴⁷ from many in the business and legal communities who asserted that the proposed rule would improperly intrude on matters traditionally reserved for regulation by the states.ⁿ⁴⁸ Further action on the rule appeared unlikely and the institutional investor community shifted its focus to state law changes in the voting standards in director elections.ⁿ⁴⁹ However, in September 2006, the U.S. Court of Appeals for the Second Circuit in a decision involving the SEC's shareholder proposal rule, Rule 14a-8, reignited the debate over shareholder access.ⁿ⁵⁰ The court rejected the SEC's long-standing interpretation of a provision of Rule 14a-8 that permitted companies to exclude from their proxy materials shareholder access proposals as shareholder proposals that "relate to an election".

The SEC subsequently adopted a proposal reaffirming the SEC's historical position that such shareholder access proposals may be excluded from company proxy statements under Rule 14a-8. That proposal, adopted on December 6, 2007, amended Rule 14a-8 to clarify that a shareholder proposal may be excluded if it relates to procedures that would result in a contested election of directors either in the year in which the proposal is submitted or in a subsequent year.ⁿ⁵¹

As a result of the 2007 amendment, the shareholder access debate again shifted to state law. In April 2009, Delaware amended its corporation statute to expressly allow a corporation to adopt bylaws permitting shareholder access to company proxy materials. The new statute allows a company's bylaws to include conditions on such access, including minimum stock ownership and duration of ownership by the nominating shareholder, a limit on the number or proportion of directors that may be nominated, and the preclusion of nominations by persons who have acquired a certain percentage of stock ownership. At the same time, Delaware also amended its corporation statute to permit a corporation's bylaws to provide for the reimbursement of expenses incurred by a shareholder that solicits proxies in connection with director elections. The state law changes regarding shareholder access are likely to spread beyond Delaware. In fact, the American Bar Association is actively considering amending the Model Business Corporation Act (the "MBCA"), which has been adopted in more than 30 states, to address this issue.

The shareholder access issue also has been revitalized at the federal level. In May 2009, the SEC approved the publication of proposed amendments to the SEC's proxy rules to permit shareholder access to nominate directors in a company's proxy materials. The proposals include: (1) a federal proxy access right that would preempt state law and a company's charter and bylaws; and (2) an amendment to Rule 14a-8 to permit proxy access shareholder proposals.

In addition to their focus on shareholder access, shareholder activists have turned their attention to executive compensation, which they view as a mirror into the boardroom. They have submitted an increasing number of shareholder proposals on executive compensation topics, including pay for performance, compensation consultant independence and an advisory vote on compensation. The latter subject--a shareholder advisory vote on compensation--has been the subject of numerous shareholder proposals. During 2008, a total of 74 shareholder proposals seeking annual advisory votes averaged 41.5 percent of the votes cast.ⁿ⁵² Of these proposals, 11 received a majority vote of the shareholders. In the following proxy season, as of November 2009, 75 such proposals went to shareholder vote, receiving an average of 45.9 percent support, with more than 20 receiving a majority vote.ⁿ⁵³ In addition, as of November 2009, at least 23 companies had voluntarily agreed to provide shareholders with an annual advisory vote on compensation, including six companies that held an advisory vote in 2008.

In April and May 2009, the United Brotherhood of Carpenters Pension Fund introduced a new shareholder proposal to the executive compensation debate when it sent a triennial executive pay vote proposal to 20 public companies. The proposal seeks shareholder advisory votes on executive pay as a whole as well as three aspects of such pay every three years, as opposed to the annual votes sought by previous proposals. In addition, the proposal requests a forum for the compensation committee to engage with shareholders. In this regard, Pfizer Inc. and Prudential Financial, Inc. have agreed to hold advisory votes every two years while Microsoft Corp. is doing so every three years.ⁿ⁵⁴

The subject of shareholder advisory voting on compensation also has received Congressional attention. On February 17, 2009, the American Recovery and Reinvestment Act of 2009 ("ARRA"), commonly referred to as the stimulus bill, was enacted. ARRA imposes certain executive compensation requirements on companies receiving assistance under the U.S. Treasury Department's Troubled Assets Relief Program ("TARP"). In particular, all institutions that receive or have received government assistance under TARP are required to permit their shareholders to vote on executive compensation. In addition, Congress has attempted to legislate more broadly. As of November 2009, Congress was considering several pieces of legislation that would require all public companies to hold an annual advisory vote on executive compensation.ⁿ⁵⁵ In particular, on November 10, 2009, U.S. Senator Christopher Dodd introduced a discussion draft of the "Restoring American Financial Stability Act of 2009" that would mandate separate annual non-binding shareholder votes to approve the compensation of named executive officers.

[5] The Corporate Scandals and the Sarbanes-Oxley Act of 2002

The corporate implosions of 2001 and 2002--Enron, WorldCom and Adelphia, to name only a few--created a perceived corporate governance crisis and, in July 2002, resulted in the speedy passage of the Sarbanes-Oxley Act. The haste with

which Congress enacted the Sarbanes-Oxley Act left little time for Congressional consideration of its implications for the state and federal roles in the regulation of corporate governance. The Sarbanes-Oxley Act made significant revisions to the federal securities laws and enhanced the role of the SEC in certain corporate governance matters. It marked a shift to more regimented federal regulation of corporate governance (as distinguished from the more flexible approach of state corporate law).ⁿ⁵⁶ The corporate scandals also caused the stock exchanges and NASDAQⁿ⁵⁷ to undertake a broad re-examination of their listing standards.ⁿ⁵⁸ The listing standards that resulted have given these self regulatory organizations a broader role in corporate governance matters.ⁿ⁵⁹

[6] The Financial Crisis

The historic financial crisis that the United States entered into in late 2007 is likely to have a lasting impact on corporate governance due to the perception that corporate governance failures contributed in part to the problems experienced by a number of financial institutions. In particular, there has been an increased focus on risk management. In addition, the current financial crisis has put the spotlight on executive pay. The Emergency Economic Stabilization Act of 2008 ("EESA"), which was enacted on October 3, 2008 in response to the financial crisis, and was modified on February 17, 2009 by the ARRA, contains several executive compensation provisions. These provisions limit certain incentive compensation arrangements for senior executives, restrict tax deductions for executive compensation and "golden parachute" payments, and provide for the recovery (or "clawback") of executive compensation paid on the basis of financial information that is later proven to be materially inaccurate.

While, EESA and ARRA apply only to participating financial institutions, Congress has indicated a willingness to regulate corporate governance beyond the financial sector. In June 2009, U.S. Representative Gary Peters introduced the "Shareholder Empowerment Act of 2009." More recently, Senator Dodd introduced the discussion draft discussed above. Among other things, both proposed bills would require annual pay votes, independent board chairs, declassified boards, and majority voting in director elections.ⁿ⁶⁰

CHAPTER 1 HISTORY AND SOURCES OF CORPORATE GOVERNANCE

1-1 Corporate Governance: Law and Practice § 1.03

AUTHOR: Amy L. Goodman

§ 1.03 The Sources of Corporate Governance

[1] State Corporation Law

Corporations are established under state corporation statutes, which generally prescribe the legal duties and responsibilities of their boards of directors,ⁿ¹ enumerate rights of stockholders,ⁿ² and include provisions relating to mergers, acquisitions and asset sales,ⁿ³ among other matters. Because corporate law has historically been a creature of state law, state judges (especially in Delaware) have also played an important role in defining the legal duties and responsibilities of directors. For example, the "business judgment rule" (a judge-made doctrine) pursuant to which courts afford substantial deference to the business decisions, made in good faith and after due diligence and deliberation, of disinterested and independent directors, has contributed significantly to the development of modern corporate governance.ⁿ⁴ In 2005, with the failure of the SEC to adopt its shareholder access rule, state corporation law began to assume new importance to institutional investors.ⁿ⁵ So too, recent Delaware court decisions in *Disney*,ⁿ⁶ *Oracle* ⁿ⁷ and *Integrated Health* ⁿ⁸ have focused greater attention on state corporation law.

State legislators also have responded to the debate surrounding majority voting in director elections. Historically, most U.S. public companies have utilized a plurality voting standard in director elections. However, in 2004, several labor unions and other shareholder groups began to broadly advocate that companies adopt a majority vote standard in uncontested director elections, in order to demonstrate directors' accountability to shareholders. As this debate grew in the 2000s, several states responded by amending their corporation statutes to facilitate majority voting in board elections.ⁿ⁹

In addition, state corporate law and its relationship to the federal proxy rules was the subject of extensive discussion at the roundtables on the proxy process the SEC held in May 2007.ⁿ¹⁰ The resulting proxy access proposals,ⁿ¹¹ and the rule amendment that subsequently was adoptedⁿ¹² also draw heavily on state law. Most recently, in April 2009, Delaware addressed proxy access by amending its corporation statute to expressly allow a corporation to adopt bylaws providing for shareholder access and reimbursement of shareholder costs in proxy contests.ⁿ¹³

[2] Federal Securities Laws

[a] The Statutes

The primary federal securities laws concerning public companies, the 1933 Act and the 1934 Act, are principally disclosure-based statutes.ⁿ¹⁴ They give the SEC authority to require publicly traded companies to include specified information in public filings and otherwise to disclose certain information to investors and shareholders, all with the purpose of permitting shareholders to make investment and voting decisions with accurate and complete information. Nevertheless, since its creation in 1934, the SEC has played a role in the corporate governance of publicly traded companies beyond just mandating disclosure requirements. In an area particularly relevant to corporate governance, Congress gave the SEC authority to regulate the disclosures and processes that public companies follow when they solicit proxies.ⁿ¹⁵ Nevertheless, there is a distinction between imposing disclosure and procedural requirements and engaging in substantive regulation of corporation governance.ⁿ¹⁶ In 1990, the U.S. Circuit Court of Appeals addressed this distinction in *Business Roundtable v. SEC*.ⁿ¹⁷ The court explained that "state corporate law ... regulates the distribution of powers among the various players in the process of corporate governance."ⁿ¹⁸ This distinction also was the subject of intense focus in the SEC's director election rulemaking in 2003, 2004, and 2007, as described above, and has been raised as an issue in connection with SEC rulemaking in 2009.ⁿ¹⁹ However, as noted above, pending legislation would address this issue by giving the SEC express authority to regulate proxy access.

The Sarbanes-Oxley Act generally continues the traditional disclosure pattern of the federal securities laws, but it also gives the SEC a somewhat enhanced role in the substantive regulation of corporations. Nevertheless, this enhanced role should not be overstated. While the Sarbanes-Oxley Act has focused attention on corporate governance issues, its provisions primarily relate to accounting and disclosure matters. It does prohibit loans to executive officers and directors,ⁿ²⁰ requires certifications by CEOs and CFOs of their responsibility for financial reports,ⁿ²¹ requires managements to assess and report on internal controls,ⁿ²² and contains requirements concerning audit committees.ⁿ²³ The audit committee provisions, however, are implemented, for the most part, through rules of the self-regulatory organizations.

[b] SEC Rulemaking

The SEC has long required disclosure of information about the management and boards of directors of public companies so that investors and shareholders can make informed investment and voting decisions.ⁿ²⁴ Since the 1970s, it also has required increased disclosure about the composition and functioning of boards of directors and their committees. These requirements, in combination with the self-regulatory organization listing standards and best practice guidance, have had an important impact on the structure and functioning of boards of directors.

As part of the broad re-examination of its rules relating to corporate governance in the late 1970s,ⁿ²⁵ the SEC required companies to disclose whether their boards of directors have standing nominating, audit, and compensation committees, or committees performing similar functions.ⁿ²⁶ These rules also require companies to identify the members of each such committee, the number of meetings held by the committee, and the functions that each such committee performs.ⁿ²⁷ The SEC had proposed to require identification of each director as "management," "affiliated non-management" or "independent"ⁿ²⁸ but, in light of commentators' concerns about such labeling, the Commission did not adopt this requirement. It was not until 2003, when the self-regulatory organizations adopted new corporate governance listing standards, that companies were required to make disclosures concerning the "independence" of their directors.ⁿ²⁹ And, in 2006, the SEC adopted new rules requiring greater disclosure about the relationships that the board of directors considers in determining whether a director is independent.ⁿ³⁰

Other SEC rules also have contributed to the establishment of board committees other than audit committees. For example, the rules under Section 16(b) of the 1934 Act permit a committee of two or more "non-employee directors" to approve certain non-discretionary equity grants from a company to its officers and directors, and thus to exempt such transactions from the short-swing trading prohibitions of Section 16(b) of the 1934 Act; that committee often is the compensation committee.ⁿ³¹ Similarly, in 1992, the SEC began requiring companies' annual proxy statements to include a compensation committee report.ⁿ³² In addition, SEC rules adopted in 2003 have encouraged the

establishment of, and required more extensive disclosure regarding, nominating committees and the processes they follow with respect to the nomination of directors.ⁿ³³

SEC rules implementing provisions of the Sarbanes-Oxley Act also have significant corporate governance implications. For example, several new rules affect the relationship between a company's management, outside auditors, and the audit committee,ⁿ³⁴ while others have an impact on the composition of audit committees.ⁿ³⁵ Still other rules affect the relationship between companies' management and boards of directors and their inside and outside counsel.ⁿ³⁶ Moreover, rules of the Public Company Accounting Oversight Board ("PCAOB"), which was created to oversee the accounting professions as part of the Sarbanes-Oxley Act, further influence the functioning of audit committees.ⁿ³⁷

[c] SEC Enforcement

The SEC has often used its enforcement authority under the federal securities laws to effectuate corporate governance changes through the issuance of reports of investigations,ⁿ³⁸ settled enforcement actions, and otherwise. As early as 1940, following its investigation of the McKesson and Robbins Drug Company scandal, the SEC recommended the establishment of board audit committees as a means of improving financial disclosure.ⁿ³⁹ In the early 1970s, following the bankruptcy of Penn Central, the SEC issued a report critical of the role of the directors, noting that they had not received or requested budget or cash flow information needed to understand the financial condition of the company.ⁿ⁴⁰ It concluded that the directors had permitted management to operate without any effective review or control. In subsequent reports, including one involving W.R. Grace & Co., the SEC has emphasized the important role of boards of directors in ensuring that shareholders receive accurate and complete disclosure.ⁿ⁴¹

So too, in settling enforcement actions, companies have agreed to implement substantive corporate governance changes. For example, as early as the 1970s, Mattel agreed to appoint and maintain a board of directors composed of a majority of unaffiliated directors,ⁿ⁴² and Ormand Industries and Potter Instruments each agreed to establish audit committees.ⁿ⁴³ In settling an enforcement case in 2004, Parmalat Finanziaria S.p.A. agreed to amend its bylaws to provide, among other things, that a majority of its board be composed of independent directors and that the positions of chairman and managing director not be held by the same person.ⁿ⁴⁴ The SEC also has indicated that it will look to a company's "tone at the top" and its compliance procedures in determining whether to take enforcement action.ⁿ⁴⁵

[d] SEC "Jawboning"

Historically, many chairmen, commissioners and staff members of the SEC have used their positions to speak out about corporate governance practices. During the questionable payments era of the 1970s, then-SEC Chairman Roderick Hills voiced his concern that "too many boards are dominated by insider directors" and that "[w]hat is missing on too many boards ... is a truly independent character that has the practical capacity to monitor and change management."ⁿ⁴⁶ His successor, Harold Williams, gave a series of corporate governance speeches outlining a proposal for an ideal board of directors on which the CEO would be the only member of management and would not serve as chairman.ⁿ⁴⁷ In the wake of the corporate scandals of 2001-2002, former SEC Chairman William Donaldson and other SEC commissioners spoke out on the important role of corporate directors in good corporate governance.ⁿ⁴⁸ Chairman Donaldson, for example, criticized the "Imperial CEO model of the 1990s" and advanced the need for greater responsibility and authority for directors.ⁿ⁴⁹ In several speeches in 2005 and 2006, SEC Commissioners and senior staff members talked about the important role of directors and other "gatekeepers."ⁿ⁵⁰ The swearing in of Chairman Mary Shapiro in 2009, combined with an unprecedented global financial crisis and the Madoff scandal, resulted in the SEC reenergizing its focus on enforcement. In this regard, Chairman Shapiro echoed former chairmen, asserting that "[i]t is precisely during times like these that we need the SEC as the 'investor's advocate.'"ⁿ⁵¹ In addition, Chairman Shapiro announced an ambitious rulemaking agenda that touches on a number of corporate governance issues, including proxy access for shareholders to nominate directors as well as enhanced disclosure with respect to board oversight, director qualifications, board leadership, compensation and risk management.ⁿ⁵² More recently, the SEC proposed proxy access rules and rules regarding enhanced disclosure in these areas.ⁿ⁵³

[3] Federal Law Enforcement

[a] Federal Sentencing Guidelines for Organizations

In the 1980s, Congress created the U.S. Sentencing Commission ("Sentencing Commission"),ⁿ⁵⁴ which subsequently issued guidelines for punishing business entities, including corporations, that have committed federal crimes.ⁿ⁵⁵ In enacting the Organizational Sentencing Guidelines, the Sentencing Commission codified compliance programs as the primary method by which corporations could mitigate potential criminal punishment after an indictment. Following the direction of Congress in the Sarbanes-Oxley Act,ⁿ⁵⁶ the Sentencing Commission reconsidered its guidelines and voted to strengthen the requirements for an effective compliance program.ⁿ⁵⁷ The revised guidelines are particularly relevant to corporate governance because, under the new standards for an effective compliance program, accountability must rest with the board of directors itself, which must assign a "high level" individual to oversee the company's compliance program.ⁿ⁵⁸

[b] Holder/Thompson/McNulty/Filip Memoranda

Effective compliance programs also are relevant to decisions by government agencies as to whether to prosecute corporations. In memoranda named after their respective signatories, the U.S. Department of Justice directed federal prosecutors to consider several factors in deciding whether to pursue criminal charges against a corporation.ⁿ⁵⁹ The more detailed Thompson memorandum directs prosecutors to place greater emphasis on compliance programs and stresses that management is "responsible for a corporate culture in which criminal conduct is either discouraged or tacitly encouraged."ⁿ⁶⁰ Moreover, as the Sentencing Guidelines emphasize, that responsibility ultimately rests with the board of directors. The Holder and Thompson memoranda were replaced by the McCulty memorandum in December 2006, and subsequently the Filip memorandum in August 2008, but neither changed the emphasis on a company's pre-existing compliance program as a factor to consider in determining whether to charge a corporation.ⁿ⁶¹ Rather, they address controversial aspects of the previous memoranda related to attorney-client privilege and company reimbursement of employee legal fees.

[4] Self-Regulatory Organizations

Other important contributors to corporate governance practices are the self-regulatory organizations--the securities exchanges and NASDAQ. Prior to the enactment of the federal securities laws in the 1930s, the stock exchanges, primarily the NYSE, had requirements for listing that had developed over the years.ⁿ⁶²

From time to time since enactment of the federal securities laws, the SEC has required the self-regulatory organizations to use their listing standards to improve the corporate governance of listed companies. The history of the self-regulatory organizations' requirements for audit committees is instructive in this regard.

As noted above, in 1939, after the SEC's investigation of McKesson and Robbins resulted in a recommendation that public companies have board audit committees, the NYSE endorsed the SEC's recommendation but stopped short of mandating audit committees.ⁿ⁶³ In the mid-1970s, after the revelations of questionable corporate payments had re-focused regulators' attention on the important role that well-functioning board audit committees can play,ⁿ⁶⁴ then-SEC Chairman Hills wrote a letter requesting the NYSE to review its listing standards with a view to requiring listed companies to have audit committees composed of outside directors. In 1977, the NYSE did so.ⁿ⁶⁵ The letter also addressed other corporate governance issues, including board composition and whether lawyers who advise companies should sit on their boards. The NYSE subsequently adopted a listing standard requiring listed companies to have audit committees whose members are independent of any relationship that would interfere with their exercise of independent judgment.ⁿ⁶⁶

In 1998, another SEC Chairman, Arthur Levitt, called upon the NYSE and NASD to further address audit committee

issues, which they did with the establishment in 1999 of a Blue Ribbon Committee on Improving the Effectiveness of Audit Committees.ⁿ⁶⁷ That committee issued recommendations, which were subsequently implemented by SEC, NYSE and NASD rules.ⁿ⁶⁸ SEC Chairman Levitt later stated that "the blue ribbon committee did more to change the culture of corporate governance than almost anything we did at the SEC."ⁿ⁶⁹

In December 2002, in the wake of the revelations of accounting and other corporate frauds in 2001-2002, then-SEC Chairman Harvey Pitt asked the NYSE and NASD to review their listing standards and consider additional corporate governance measures. They subsequently proposed and adopted far-reaching changes in their listing standards governing the composition and functioning of their listed companies' boards of directors (including changes mandated by the Sarbanes-Oxley Act, whose passage overtook the self-regulatory organizations' efforts already underway in this area).ⁿ⁷⁰ Independent directors, under tightened definitions of independence,ⁿ⁷¹ must now constitute a majority of the board of directors of listed companies,ⁿ⁷² and such boards must have audit, compensation and nominating/corporate governance committeesⁿ⁷³ (or committees performing the same functions under other namesⁿ⁷⁴ or, in the case of NASDAQ companies, independent directors performing the functions of the compensation and nominating committeesⁿ⁷⁵).

These 2003 corporate governance listing standards gave the self-regulatory organizations a much greater role in the corporate governance of their listed companies than they had in the past. In this regard, the self-regulatory organizations are being called upon to interpret their corporate governance listing requirements in ways that involve them in questions of board deliberations and operations.ⁿ⁷⁶ Moreover, the NYSE requires annual affirmations and certifications from its listed companies with respect to compliance with the corporate governance listing standardsⁿ⁷⁷ and both the NYSE and NASDAQ require notification if a company's executive officer becomes aware of any material non-compliance with the listing standards.ⁿ⁷⁸

The NYSE also prescribes rules governing the ability of brokers to vote the securities of their customers whose securities are held in "street name"--*i.e.* in the name of the broker-dealer. Under these rules, brokers who are members of the NYSE have "discretionary" authority to vote such shares if the subject matter is deemed "routine" by the NYSE and the broker has not received voting instructions from the beneficial owner by the tenth day before the meeting date.ⁿ⁷⁹ Historically, the election of directors was considered a "routine" matter in the absence of a proxy contest. Institutional investors have expressed concern about this, because brokers generally supported the company's candidates. In April 2007, the NYSE formed a Proxy Working Group to examine this issue and in June 2006, the Group recommended that all director elections be "non-routine" so that brokers would not be able to vote on a discretionary basis with respect to uncontested director elections. In October 2006, the NYSE filed with the SEC a proposed amendment of NYSE Rule 452ⁿ⁸⁰ that would have implemented this recommendation for shareholder meetings held on or after

January 1, 2008.ⁿ⁸¹ On February 26, 2009, the NYSE filed an updated proposal to amend Rule 452 with the SEC.ⁿ⁸² The SEC subsequently approved the proposed changes to NYSE Rule 452, thus eliminating broker discretionary voting in uncontested director elections beginning at shareholder meetings held after January 1, 2010.ⁿ⁸³

[5] Best Practices

Because corporate governance is much more than a matter of law, many of the sources of guidance on corporate governance practices are not captured in rules and regulations but, rather, are set forth in statements, principles and white papers issued by bar associations, institutional investors, business groups and proxy voting advisory services, among others. These have come to be collectively referred to as recommended "best practices." While companies are not required to follow these so-called best practices, they may be penalized by their shareholders or potential investors if they fail to do so.

[a] American Law Institute

In 1982, the American Law Institute ("ALI"), an organization of legal professionals that creates restatements and model codes and undertakes other projects intended to clarify or spur reform in various areas of the law, published the first draft of its "Principles of Corporate Governance: Analysis and Recommendations" ("ALI Principles of Corporate Governance"). The ALI published the ALI Principles of Corporate Governance in 1994, after 12 years of debate and revision. A basic purpose of the project was to clarify the duties and obligations of corporate directors and officers and to provide guidelines for discharging those responsibilities in an efficient manner, with minimum risks of personal liability.ⁿ⁸⁴ In contrast to many other ALI publications, the ALI Principles of Corporate Governance is not a restatement of the law, as some of its material is in the nature of recommendations. Nevertheless, courts and practitioners have looked to the ALI Principles of Corporate Governance for guidance on the structure, functions, and powers of corporate boards, and the duties of officers and directors.ⁿ⁸⁵

[b] American Bar Association

The Committee on Corporate Laws of the American Bar Association ("ABA") has long played a role in the development of corporation law in the United States. It developed the Model Business Corporation Act ("Model Act"), first issued in 1950, which has been adopted substantially in its entirety in more than 30 states.ⁿ⁸⁶ Moreover, since 1978, it has issued five editions of the "Corporate Director's Guidebook" to provide guidance to corporate directors in meeting their responsibilities. The fifth edition, published in 2007, focuses on the "increasingly vital role that directors play in protecting investors' interests and in directing and overseeing corporate strategy and its execution by senior officers."ⁿ⁸⁷ Designed to be read by directors, it lays out the duties, responsibilities, and rights of a corporate director, sets forth guidance on operations and effective board and committee structures and suggests other oversight activities for the board of directors. It provides specific guidance on such issues as board leadership, size, meetings, quality of information and time commitment.

In the wake of the corporate failures in 2001-2002, the ABA appointed a Task Force on Corporate Responsibility to "examine systematic issues relating to corporate responsibility arising out of the unexpected and traumatic bankruptcy of Enron and other Enron-related situations that have shaken confidence in the effectiveness of the governance and disclosure systems applicable to public companies in the United States."ⁿ⁸⁸ In March 2003, the Task Force issued a report recommending reforms relating to the composition, conduct and responsibilities of public company boards of directors and their committees and the professional conduct of lawyers.ⁿ⁸⁹ The recommendations are similar to those of other groups concerning the composition and structure of the board and board committees, but they go further than previous best practice documents in some respects. For example, they call for the general counsel and independent directors to meet more frequently (without other members of management).ⁿ⁹⁰ The report of the ABA Task Force also called for boards to consider policies relating to the setting of agendas and distribution of information, time commitments of directors, rotation of the chair, membership of committees, and the appointment of a lead director.ⁿ⁹¹ The report took the position that lawyers have a professional responsibility to disclose information, sometimes even to third parties, concerning criminal or fraudulent conduct of their corporate clients. The ABA Task Force recommendations were adopted as ABA policy by vote of the ABA House of Delegates in August 2003.ⁿ⁹²

In April 2005, the American Bar Association Committee on Corporate Law created a Task Force on Director Elections to address issues relating to shareholder voting in uncontested elections at public companies and to consider whether to recommend changes to the Model Act. After several solicitations of comments, in 2006, the Task Force recommended changes in the Model Act that provide corporations greater flexibility in their director election process, including modification of the "holdover" director rule and a "modified plurality approach." These changes to the Model Act were adopted in 2006. Subsequently, at least eleven states have amended their corporation statutes to facilitate the adoption of a majority voting for the election of directors.ⁿ⁹³ For further discussion of this approach, *see* § 6.02[6] *below*.

The Committee on Corporate Laws also has addressed the issue of proxy access. On June 29, 2009, the Committee approved proposed amendments to the Model Act that expressly permit shareholder access to corporate proxy materials to nominate directors as well as permit the reimbursement of shareholders soliciting proxies for the election of

directors.ⁿ⁹⁴ In August 2009, the Committee published these proposed amendments for public comment. Following the comment period, the committee is expected to consider the proposed amendments for adoption.

[c] Business Roundtable

The Business Roundtable, an association of chief executive officers of leading U.S. corporations, has long been active in corporate governance matters. In 1978, it published "The Role and Composition of the Board of Directors of the Large Publicly Owned Corporation," which it updated in 1997 with its "Statement on Corporate Governance," and again in May 2002 with its "Principles of Corporate Governance" ("Business Roundtable Principles").ⁿ⁹⁵ The Business Roundtable Principles were issued in the midst of the revelations of corporate misconduct in 2001-2002--after Enron, but before WorldCom. They call on companies to: (1) ensure that a substantial majority of the board of directors comprises directors who are independent both in fact and in appearance; (2) require that only independent directors sit on the board committees that oversee the three functions central to effective corporate governance--audit, corporate governance and compensation; and (3) create and publish corporate governance principles so that everyone, from employees to potential investors, understands the governance rules under which the company operates; among other recommendations. The Business Roundtable Principles were issued shortly before the NYSE Corporate Accountability and Listing Standards Committee issued its recommendations for corporate governance enhancements to the NYSE listing standards in June 2002.ⁿ⁹⁶ These recommendations, with minor changes, formed the basis for the corporate governance listing standards that the NYSE filed with the SEC in August 2002, which were ultimately approved by the SEC in November 2003.ⁿ⁹⁷ Subsequently, in November 2005, the Business Roundtable updated its Principles to reflect the enactment of the Sarbanes-Oxley Act, the adoption of the securities markets corporate governance listing standards and further developments in corporate governance best practices.

The Business Roundtable also has issued several other corporate governance best practices documents. In November 2003, it issued "Executive Compensation: Principles and Commentary," which calls for the executive compensation program of every publicly held company to adhere to two fundamental characteristics: pay for performance and oversight by a compensation committee composed solely of independent directors.ⁿ⁹⁸ These Principles were updated in January 2007.ⁿ⁹⁹ In April 2004, the Business Roundtable issued "The Nominating Process and Corporate Governance Committees: Principles and Commentary," setting forth seven best practices for the nominating process and corporate governance committees,ⁿ¹⁰⁰ and, in May 2005, the Business Roundtable issued "Guidelines for Shareholder-Director Communications."ⁿ¹⁰¹

[d] Institutional Investors

As discussed above, corporate governance issues, particularly the composition, structure and practices of boards of directors, have been of interest to institutional investors at least since the 1970s.ⁿ¹⁰² Several institutional investors and groups of such investors have issued their own corporate governance guidelines expressing their expectations about how boards of directors should operate.ⁿ¹⁰³ Institutions often use these guidelines in making voting decisions with respect to the election of directors and other matters at companies' annual meetings.ⁿ¹⁰⁴ Institutions also take policy positions through organizations such as the Council of Institutional Investors ("CII")ⁿ¹⁰⁵ and the International Corporate Governance Network.ⁿ¹⁰⁶ For example, in Spring 2005, CII sent letters to 1500 U.S. companies urging them to adopt a majority voting requirement for director elections. And, in October 2006, a group of 13 institutional investors sent a joint letter to the 25 largest companies in the Standard & Poor's 500-stock index seeking information on the any business ties that the compensation consultant used by their Compensation Committee has with the company.ⁿ¹⁰⁷

Many institutional investors rely on proxy voting advisory services, such as RiskMetrics Group, Inc. ("RiskMetrics") (which acquired Institutional Shareholder Services, Inc. in January 2007), Glass Lewis & Co., and Proxy Governance Inc. to make voting recommendations or actually vote the institution's shares in connection with the election of directors and other matters at companies' annual and special meetings.ⁿ¹⁰⁸ RiskMetrics has adopted positions on various corporate governance matters and bases its voting recommendations on these positions.ⁿ¹⁰⁹ For example, RiskMetrics

has adopted a tighter definition of director independence than that of the self-regulatory organizations¹¹⁰ and recommends that its clients withhold authority from, or vote against, directors who do not meet the RiskMetrics definition of independence and serve on the audit, nominating or compensation committees. Accordingly, companies increasingly consider RiskMetrics and Glass Lewis positions in addressing corporate governance issues.

[e] Post-Enron Scandal Reports

The reports issued by Congressional committees,¹¹¹ bankruptcy examiners,¹¹² corporate monitors¹¹³ and private sector groups¹¹⁴ in the wake of the corporate scandals in 2001-2002 recite a litany of failures on the part of boards of directors and set forth a panoply of recommendations for corporate governance changes. The Report of the Senate Permanent Committee on Investigations on Enron, for example, pointed to "a dozen red flags that should have caused the Enron Board to ask hard questions, examine Enron policies, and consider changing course."¹¹⁵ Further, it stated that "the Enron Board failed to provide the prudent oversight and checks and balances that its fiduciary obligations required and a company like Enron needed."¹¹⁶ The Thornburgh Report on WorldCom observed that the company's management provided "the Directors with extremely limited information regarding many acquisition transactions," that there was "virtually no meaningful Board oversight" of the company's debt obligations and that "the Compensation Committee failed to perform appropriate due diligence."¹¹⁷

The report issued by Richard Breeden, former Chairman of the SEC and corporate monitor of WorldCom/MCI, goes well beyond criticism of board behavior and calls itself a "blueprint for action."¹¹⁸ It contains 78 specific corporate governance recommendations.¹¹⁹ Significantly, many of these recommendations were included in MCI's articles of incorporation when it emerged from bankruptcy and can only be changed with the approval of MCI's board and shareholders.¹²⁰ Among the more unusual recommendations: (1) independent MCI directors should serve on no more than two other boards;¹²¹ (2) each director should be required to possess at least one of seven listed skills;¹²² (3) all executive compensation must be linked to "serious corporate performance measures";¹²³ (4) the governance committee should maintain a website that offers stockholders a "town meeting" forum, (5) shareholders owning at least 1 percent of MCI's voting power should be able to place resolutions on the website for consideration by all stockholders.¹²⁴

Other private sector groups also have issued reports recommending changes in corporate governance practices. For example, the Conference Board has issued reports on corporate governance issues over the years.¹²⁵ In 2002, that organization established a Commission on Public Trust and Private Enterprise, which issued a three-part report dealing with executive compensation, accounting and corporate governance issues.¹²⁶ In addition, the National Association of Corporate Directors ("NACD") has established several "Blue Ribbon" commissions on corporate governance issues that have issued "best practices" reports.¹²⁷

[f] Post-Financial Crisis Reports

In response to the global financial crisis of 2008-2009, several organizations issued reports and other publications related to corporate governance issues. For example, in 2009, the Conference Board issued a series of reports providing guidance to boards of directors in times of crisis.¹²⁸ Also in 2009, NACD and the Business Roundtable published a list of key agreed governance principles intended to provide a blueprint for strengthening corporate governance. The agreed principles highlight several key concepts, such as the importance of transparency and accountability in corporate governance, while stressing the notion that there is no "one size fits all" approach to corporate governance.¹²⁹

The global financial crisis also may bring about a pronounced shift in the role the federal government with respect to corporate governance. Pending legislation would bring traditional state law issues, such as board classification and majority voting, within the sphere of federal regulation. Similarly, such legislation would empower the SEC to regulate areas traditionally governed by state law. Thus, it is expected that federal law will become increasingly important as a source of corporate governance law.

(n5)Footnote 5. On June 15, 2005, the Council of Institutional Investors sent a letter to the Chairman of the Corporation Law Section of the Delaware State Bar Association urging that the Section consider recommending that the Delaware legislature amend Section 216 of the Delaware General Corporation Law "to make majority voting for director elections the presumptive choice for Delaware corporations." While the Delaware legislature retained the plurality voting standard default for director elections, in 2006, it amended the Delaware General Corporation Law: (1) to provide that shareholder bylaws specifying the vote required for the election of directors may only be amended by the shareholders; and (2) to permit a director resignation conditioned on the director not receiving a specified vote for reelection. 2006 amendments to Sections 216 and 141(b) of the Delaware General Corporation Law.

CHAPTER 2 THE FUTURE OF THE CORPORATE GOVERNANCE MOVEMENT

1-2 Corporate Governance: Law and Practice § 2.01

AUTHOR: Nell Minow John F. Olson

§ 2.01 Aspects of the Market Response to Corporate Scandals and the Financial Crisis

The well-publicized corporate scandals at the turn of the last century strained the trust between investors and companies. In some cases, causing drops in equity valuations and provoked multiple responses from financial regulators and policy-makers. Investors began to consider corporate governance as a factor in investment decisions,ⁿ¹ spurring market demand for information about the quality of corporate governance on a company-by-company level. This increasing investor focus on governance resulted in the development of published rating metrics or systems that evaluate, rank and compare the corporate governance practices of public companies.ⁿ² Moreover, the belief that corporate governance failures were at least partly responsible for the financial crisis that began in 2008 has led to renewed scrutiny of corporate governance practices.ⁿ³

[1] Emergence of Corporate Governance Rating Systems

Organizations such as RiskMetrics Group Institutional Shareholder Services ("RMG"), GovernanceMetrics International ("GMI"), the Corporate Library, Moody's Investors Service ("Moody's") and Morningstar developed corporate governance ratings.ⁿ⁴ In 2001, RMG began developing a metric for analyzing and comparing the corporate governance structures of public companies, and it launched its Corporate Governance Quotient ("CGQ") as a subscription service in 2002.ⁿ⁵ The Corporate Library introduced a proprietary "Board Analyst" system to evaluate the effectiveness of directors and assess litigation, liability, and investment risk.ⁿ⁶ Additionally, analysts have also begun to take more interest in corporate governance. In late November 2002, Smith Barney started using RMG's governance ratings as part of its research, listing the governance scores of individual companies on research reports.ⁿ⁷ According to the CEO of GMI, Gavin Anderson, "[t]he demand [for corporate governance scoring systems] is reflective of the times."ⁿ⁸ Corporate governance ratings also are available to retail investors. For example, companies tout high scores in their SEC filings, and Yahoo! Finance now includes CGQ scores in the "Company Profile" of covered companies.ⁿ⁹

This trend suggests at least some corporate managers believe that a company's commitment to effective corporate governance will affect not only its stock price, but also its cost of raising capital in the market. Because analysts and investors are making the perceived quality of corporate governance a part of the risk assessment of investments, the market may well increase "the cost of capital for any company that does not demonstrate a commitment to transparency and to effective and independent oversight."ⁿ¹⁰

[2] Burgeoning Numbers of Governance-Related Shareholder Proposals

Another market response to the focus on corporate governance issues has been a record number of shareholder proposals and an unusually high number of majority votes on such proposals. According to the RiskMetrics Group's 2008 Postseason Report, 267 non-compensation governance-related shareholder proposals appeared on corporate ballots for 2008.ⁿ¹¹ This number was down slightly from 281 in 2007, likely because a number of activist shareholders shifted their focus to compensation-related proposals, and a large number of governance-related proposals filed by retail shareholders were omitted pursuant to the SEC's no-action letter process.ⁿ¹² Governance-related shareholder proposals fared well in 2008, receiving average support of approximately 42% of votes cast. The number and level of support for governance-related shareholder proposals represents increasing investor pressure on companies to adopt good corporate governance practices.

A recent trend in shareholder proposals has been to request that companies eliminate their classified board structure and elect directors annually. In 2008, such declassification proposals were voted on at 76 companies, and received average support of approximately 67% of votes cast.ⁿ¹³ Another trend has been to request that boards eliminate all supermajority voting requirements, which are considered a form of anti-takeover protection. In 2008, these shareholder proposals were voted on at twelve companies and received average support of approximately 59% of votes cast.ⁿ¹⁴

In the future, it is likely that there will be an increased number of shareholder proposals related to corporate governance, and it is increasingly likely that even when such proposals are not approved by a majority of shareholders, companies that disregard these expressions of investor sentiment may face adverse consequences. Though proposals that pass may be non-binding, boards that value positive investor relations will want to give them substantial consideration. This is evidenced by the RMG policy of recommending that votes be withheld or voted against members of boards that do not implement shareholder proposals receiving a majority of votes cast two years in a row or the majority of votes outstanding in any single year.

[3] Director and Officer Liability Insurance

The Sarbanes-Oxley Act's increased corporate responsibilities and corporate scandals have added to the challenges for companies and their directors' and officers' (D&O) liability insurers. Even before the new regulations were adopted, both the frequency and severity of D&O claims had risen sharply.ⁿ¹⁵

According to the Towers Perrin 2007 Directors & Officers Liability Survey, however, the D&O insurance market has been softening since 2004.ⁿ¹⁶ The frequency of claims decreased in both 2006 and 2007 after a substantial increase in 2005.ⁿ¹⁷ However, the average size of claims increased significantly from \$4.26 million in 2006 to \$12.23 million in 2007.ⁿ¹⁸ This increase in the size of claims in 2007 is counter to a trend of successive decreases over several years, excepting 2005, in which, for example, the average indemnity for shareholder claims dropped to \$11.44 million in 2004 compared with \$14.20 million in 2003 and \$23.35 million in 2002.ⁿ¹⁹ Premiums decreased for the fourth consecutive year in 2007.ⁿ²⁰ Premiums paid by for profit companies stood at an average of approximately \$805,000 in 2007, almost a 35 percent decrease from the 2003 high of approximately \$1,237,000.ⁿ²¹ However, the financial crisis and difficulties experienced by some insurers have led to higher premiums for companies in the financial services sector, and some tightening of the market for a broader range of companies is expected.ⁿ²²

It has become clear in the past few years that D&O insurers consider governance practices in both underwriting and pricing decisions. Companies that do not practice good governance to current standards can expect the imposition of more stringent policy limits and higher premiums.ⁿ²³

D&O underwriters, like rating agencies, stock analysts and others, increasingly are inquiring as to whether companies have an adequate system in place to monitor and manage risk. One commenter observed "If companies have the opportunity to execute on the best practices of [the Sarbanes-Oxley Act] and corporate governance, but do not because

of the cost, the likely result will be rising loss costs for the D&O industry in the near future."²⁴ It is likely that the D&O insurance industry will continue to maintain tougher standards for underwriting, even for companies that are actually considered good risks. Against this background, boards and especially audit committees with underqualified or indifferent members will warrant higher D&O premiums,²⁵ as they will be viewed as less reliable monitors of corporate compliance.²⁶ D&O premiums will also reflect the greater risks presented by directors with histories of securities law violations. As insurers grow increasingly selective as to which risks qualify for full coverage, corporations with less rigorous governance practices may find it difficult to secure the D&O insurance they desire.²⁷ Conversely, companies evidencing a commitment to effective and independent oversight may benefit from a "good student discount" of sorts in the D&O insurance arena.

Because the enactment of the Sarbanes-Oxley Act generated additional responsibilities and the possibility of new liabilities for corporate officials, directors are likely to consider the availability of comprehensive D&O insurance with adequate limits as a significant factor in deciding whether to join or remain on a board. According to the Towers Perrin survey, in 2007, approximately 66 percent of public and 65 percent of private companies surveyed received inquiries from potential directors about D&O insurance.²⁸ As a result, in the past few years, companies have increasingly begun purchasing multiple layers of coverage with a view toward affording directors extra protection. This type of supplemental D&O insurance generally provides a certain amount of excess insurance coverage and can be structured so that it is non-rescindable. Some types of supplemental coverage "drop down" to provide coverage in specified circumstances where the underlying insurance is unable or unwilling to pay.²⁹ In the future, we are likely to continue seeing heightened demand for comprehensive insurance coverage, including the use of supplemental insurance policies, to help protect directors who are increasingly concerned about exposing themselves to untenable personal liability as a result of their service on a board.³⁰

[4] Debate over the Methods for Electing Corporate Directors

Another reflection of the temper of the times is efforts by shareholders seeking greater input in the governance of public companies, which is most evident in proposals to alter the ways in which corporate directors are elected. First, on October 14, 2003, the Securities and Exchange Commission (the "SEC" or the "Commission") published proposed amendments to its proxy rules that would have granted large shareholders or shareholder groups access to companies' annual proxy statements to nominate up to three directors in opposition to management nominees.³¹

Though the Commission has considered adoption of similar rules on at least three previous occasions dating back to the 1940s, this is the first time that the Commission actually proposed rules allowing direct shareholder access to the corporate proxy statement. However, the Commission never acted on the proposed rules, and even former Chairman Donaldson has acknowledged, "Probably, the proposal we put forward was too convoluted, too complicated."³²

The possibility of shareholder proxy access was revived in 2006 by the U.S. Court of Appeals for the Second Circuit in *American Federation of State, County and Municipal Employees v. American International Group, Inc. (AFSCME v. AIG)*.³³ In *AFSCME v. AIG*, the Court of Appeals held that proxy access bylaw shareholder proposals are not excludable under Rule 14a-8(i)(8).³⁴ In 2004, AFSCME submitted a proposal requesting that AIG include a proposed new bylaw in its 2005 proxy materials that, if adopted, would require AIG to include in its proxy statement the names of shareholder-nominated director candidates.³⁵ The SEC concurred in the exclusion of the proposal under Rule 14a-8(i)(8) on the basis that it "relates to an election."³⁶ AFSCME brought suit to compel AIG to include the proposal in its proxy statement.³⁷ In an amicus brief, the Commission set forth its interpretation of Rule 14a-8(i)(8) that the election exclusion applies to proxy access bylaw proposals because such proposals "would result in contested elections."³⁸ Disagreeing with the Commission, the Court of Appeals found the rules to be ambiguous and interpreted the election exclusion to apply to shareholder proposals relating to a particular board seat in an upcoming election and not to proposals that would establish the procedural rules governing elections generally even though they might make election contests more likely.³⁹

In July 2007, responding to the *AFSCME v. AIG* litigation, the Commission, by a divided vote, published two new alternative proposals on the subject.ⁿ⁴⁰ The first proposal was to amend Rule 14a-8(i)(8) to codify the SEC's historical interpretation that all proxy access shareholder proposals are excludable.ⁿ⁴¹ The second proposal was to amend Rule 14a-8(i)(8) to permit the inclusion of certain proxy access shareholder proposals and to require additional disclosures by proponents and companies when such proposals are included. Specifically, under the second SEC proposal, a proxy access shareholder proposal would not have been excludable under Rule 14a-8(i)(8) if the shareholder proposal was binding, sought to amend the company's bylaws, the submitting shareholder(s) held at least 5 percent of the company's outstanding stock for at least one year, and the submitting shareholder(s) was eligible to, and had, filed a Schedule 13G with respect to the company.ⁿ⁴² On November 28, 2007, the SEC voted to adopt the first proposal, but not the second.ⁿ⁴³

Mary Schapiro, appointed in 2009 by President Obama to serve as SEC Chairman, stated at her confirmation hearings that the SEC needs to address the issue of proxy access once again in light of the current financial crisis. She subsequently stated: "This crisis has led many to raise serious questions and concerns about the accountability and responsiveness of some companies and boards of directors, to the interests of shareholders."ⁿ⁴⁴ Under Chairman Schapiro's leadership, by a three to two vote, on May 20, 2009, the Commission approved the publication of proposed amendments to the SEC's proxy rules to permit shareholders to nominate directors in a company's proxy materials.ⁿ⁴⁵ The proposals include: (1) a federal proxy access right that would preempt state law and a company's charter and bylaws; and (2) an amendment to Rule 14a-8 to permit proxy access shareholder proposals. The proposals were supported by Chairman Schapiro and Commissioners Elisse Walter and Luis Aguilar, with Commissioners Kathleen Casey and Troy Paredes indicating they could not support the proposals.

Proposed Rule 14a-11 would create a federal law process whereby one or more shareholders could nominate a director and have that nominee included in a company's proxy materials if they beneficially owned individually or in the aggregate at least a certain percentage of the company's voting shares (1% for large accelerated filers, 3% for accelerated filers and 5% for non-accelerated filers) for at least one year. Shareholders would be permitted to include in a company's proxy materials each year the greater of one director nominee or a number of director nominees that equals up to 25% of the company's board. The director nominee would be required to satisfy the independence standards of the applicable national securities exchange or association.

However, proposed Rule 14a-11 (unlike prior proposed SEC rules on proxy access) would not restrict the ability of shareholders to nominate directors with whom they have a relationship, meaning shareholders could nominate themselves or their employees, family members or business associates. The nominating shareholders would be required to file a new Schedule 14N reporting the percentage of shares beneficially owned, the period of time such shares had been beneficially owned, their intent to hold their shares through the date of the meeting and certain other disclosures (*i.e.*, regarding litigation and certain relationships with the company). A company would be required to include in its proxy materials the same information on the nominating shareholder and the director nominee as required in proxy materials related to contested elections. Additionally, proposed Rule 14a-9(c) would make the nominating shareholder liable for false or misleading statements supplied to a company and provide that a company would not be liable for false or misleading information it received from a nominating shareholder or director nominee, unless the company knew or had reason to know the information was false. Significantly, the federal right provided in proposed Rule 14a-11 would preempt any proxy access provisions set forth in applicable state law or in a company's charter or bylaws unless any of those provisions prohibited director nominations by shareholders.ⁿ⁴⁶

The SEC also proposed to amend Rule 14a-8(i)(8) to require companies to include in their proxy materials shareholder proposals to amend a company's governing documents to address nomination rights or the disclosures or procedures related to shareholder nominations unless the shareholder proposals conflict with proposed Rule 14a-11 or state law.ⁿ⁴⁷ Thus, the proposed rules would permit shareholder proposals seeking to give greater rights of access for shareholders than what is provided under the new SEC Rule 14a-11, but could not, for example, set higher thresholds than the federal rule or establish director qualification standards beyond the minimum standards of the stock exchange where a

company's shares are traded.

In addition to the SEC's proxy access proposals, action taken at the state level addressed proxy access. Amendments to the Delaware General Corporation Law, adopted in April 2009 and effective August 1, 2009, include a new Section 112 that permits (but does not require) a corporation to include a provision in its bylaws providing shareholder access to its proxy materials with respect to the election of directors by including in the corporation's proxy materials one or more individuals nominated by a shareholder, in addition to individuals nominated by the board of directors.ⁿ⁴⁸ The bylaws may condition the obligation to include shareholder nominees on the satisfaction of eligibility requirements and/or compliance with procedures set forth in the bylaws. Among other things, these procedures or conditions may include a minimum record or beneficial ownership, or duration of ownership, submission of background information, restrictions on numbers of directors nominated, restrictions on acquisitions of shares of the corporation, a requirement that the shareholder indemnify the corporation in respect of losses arising from information submitted by the stockholder or any other conditions permitted by law. An American Bar Association committee, with jurisdiction over the Model Business Corporation Act ("MBCA"), also drafted amendments to the MBCA similar to the Delaware law changes and is expected to publish its proposals for comment in 2009.

Moreover, on May 19, 2009, U.S. Senators Charles Schumer and Maria Cantwell introduced new corporate governance legislation entitled the "Shareholder *Bill of Rights* Act of 2009" (the "Schumer Bill").ⁿ⁴⁹ Among other things, the Schumer Bill would confirm the SEC's authority to permit shareholders to nominate directors in company proxy materials and would provide that any proxy access rule established by the SEC may not allow such nominations unless the nominating shareholders beneficially owned at least 1% of the company's shares for at least two years.ⁿ⁵⁰ A similar bill was introduced in the House of Representatives on June 12, 2009 by U.S. Representative Gary Peters. The bill, entitled the "Shareholder Empowerment Act of 2009,"ⁿ⁵¹ would require the SEC to adopt rules requiring that companies allow shareholders to vote on director candidates nominated by shareholders holding at least 1% of the company's shares for at least two years. These rules would only be applicable when shareholders nominate less than a majority of directors authorized to serve on the board.

Perhaps in part as a result of the failure of the SEC to adopt rules to date, many shareholders and commentators have been calling for a move from plurality to majority voting in director elections and a growing number of companies have made that change.ⁿ⁵² Over 57 percent of companies in the Fortune 500 and 66 percent of companies in the S&P 500 had adopted either majority voting or modified plurality voting with a policy that required directors to do not receive a majority favorable vote to offer to resign.ⁿ⁵³ Significantly, for the first time, in 2008 a director who did not receive a majority favorable vote offered to resign on the spot at the company's annual meeting, and the board accepted the resignation.ⁿ⁵⁴

During the 2006 proxy season, companies received more than 150 shareholder proposals requesting that they elect directors based on a majority of votes cast; at least 39 such proposals received majority votes.ⁿ⁵⁵ Many majority voting proposals were submitted by building trade unions, including the United Brotherhood of Carpenters and Joiners of America (UBCJA), which submitted at least 66 of these proposals.ⁿ⁵⁶ During the 2007 proxy season, over 150 such proposals were again filed; however, at least 70 were withdrawn before a vote, usually as the result of the company's decision to preempt consideration by amending its bylaws to allow for majority voting.ⁿ⁵⁷

During the 2008 proxy season, the number of majority voting proposals submitted to companies dropped to approximately 90, more than half of which were withdrawn before a vote.ⁿ⁵⁸ The decrease likely was in response to the increase in the number of companies adopting majority voting since 2007.ⁿ⁵⁹ RiskMetrics Group (RMG) and Glass, Lewis & Co., Inc., both of which are proxy advisory firms, as well as the California Public Employees' Retirement System (CalPERS) and the Council of Institutional Investors supported these precatory majority voting proposals.ⁿ⁶⁰ In addition, the American Bar Association's Committee on Corporate Laws established a task force to examine whether to revise the Model Business Corporation Act (which a majority of U.S. states follow in whole or in part) with respect to voting for directors. To assist this effort, the Committee on Corporate Laws published a *Discussion Paper On Voting By*

Shareholders for the Election of Directors, which invited public comment.ⁿ⁶¹ The ABA Committee ultimately decided to revise the Act in June 2006. Rather than changing the statutory plurality default rule, the revised Act permits shareholders or the Board of Directors at individual companies to adopt a majority voting bylaw standard.ⁿ⁶²

In response to these calls for majority voting in director elections, many companies have adopted either a majority voting standard, a director resignation policy, or some combination of the two. Under a director resignation policy a company retains plurality voting but requires that any director nominee who receives a greater number of votes "withheld" from his or her election than votes "for" such election will tender a resignation for consideration by the Board. While majority voting proposals at companies with director resignation policies received considerable support in 2006, these proposals tended to be defeated at companies with director resignation policies.ⁿ⁶³ By February 2007, over 52 percent of S&P 500 companies had adopted some form of majority voting compared to fewer than 20 percent in February 2006, with a majority of these companies choosing to adopt director resignation policies.ⁿ⁶⁴ However, since February 2006, the percentage of companies opting to adopt director resignation policies has been declining, while the percentage of companies choosing to adopt majority voting bylaw provisions has been steadily increasing.ⁿ⁶⁵ As earlier discussed, Business Roundtable's Annual Corporate Governance Survey of 2008 found that 75 percent of Roundtable members now have some form of majority voting for directors, up from a handful just three years before.ⁿ⁶⁶ This trend continues.

The SEC's proposed director election rules and the movement for majority voting indirectly have made companies more concerned about the need to communicate with shareholders about the director elections process. A March 2006 Business Roundtable survey of corporate governance found that 83 percent of Roundtable members indicated that their nominating/governance committees had developed a process "for communicating with/responding to shareholder [suggestions for] nomination[s] of board candidates," up from 78 percent in the 2004 survey and 75 percent in 2003.ⁿ⁶⁷ By 2006, 91 percent of companies surveyed had established procedures for shareholder communications with directors,ⁿ⁶⁸ and the 2007 survey reports that at least one director at 38 percent of the Business Roundtable member companies reported having met with shareholders during the year.ⁿ⁶⁹ Moreover, a few companies have voluntarily implemented many of the director election reforms suggested in the proposed rules and by recent shareholder proposals. For example, Apria Healthcare Group Inc., a New York Stock Exchange ("NYSE") listed company and one of the largest home health care firms in the U.S., voluntarily adopted a policy providing large shareholders with access to the company's proxy materials to nominate up to two directors.ⁿ⁷⁰ According to its non-executive board chairman, Apria's move reflected the prevalence of the belief "that corporate America must improve board room dynamics."ⁿ⁷¹ Revisions to the NYSE and NASDAQ corporate governance listing standards with respect to nominating committees similarly have transformed the method of electing directors. For example, one recruiter indicated that five years ago the chief executive was the client in 95 percent of the searches for new directors while today the nominating committee is the client over half of the time.ⁿ⁷²

Activity during recent proxy seasons demonstrated, in many respects, a more constructive dialogue between shareholders and corporations.ⁿ⁷³ Boards of directors implemented many shareholder proposals that garnered majority or even significant votes relating, for example, to poison pills and staggered boards, and other shareholder proposals were withdrawn.ⁿ⁷⁴ Many companies also established lead and presiding director positions, which include job criteria recommended by RMG.ⁿ⁷⁵ In 2007, Pfizer Inc. invited its large institutional investors to meet with members of the board of directors to get feedback on the company's corporate governance and executive compensation practices.ⁿ⁷⁶ In 2008, the National Association of Corporate Directors published a Blue Ribbon Commission Report on board-shareholder communications, which included best practice recommendations for optimizing these communications.ⁿ⁷⁷

[5] Accounting and Auditing Practices Will Continue to Evolve

Perhaps the most criticized provision in the Sarbanes-Oxley Act was Section 404, which requires management to assess the effectiveness of company internal financial controls and requires auditors to attest whether they are able to agree

with management's assessment based on their own audit of control effectiveness.ⁿ⁷⁸ Section 404 took effect in 2005 for U.S. companies with market capitalizations greater than \$75 million.ⁿ⁷⁹ In that first year, approximately 16 percent of companies required to comply with Section 404 reported having material weaknesses. That percentage was halved, however, in 2006.ⁿ⁸⁰

The primary criticism of Section 404 has been the significant implementation costs. On average, companies' audit fees increased 64 percent in fiscal year 2004 over the prior year to an average of nearly \$9 million per company (up from an average of \$3.8 million in 2001).ⁿ⁸¹ Public Company Accounting Oversight Board (PCAOB) Chairman William McDonough acknowledged "the first round of internal control audits cost too much."ⁿ⁸² In response to this criticism, in April 2005, the SEC hosted a roundtable to discuss this issue and, in May 2005, the PCAOB issued a policy statement that purported to interpret its standard so as to reduce costs.ⁿ⁸³ Also in May 2005, the SEC issued guidance addressing various issues implicated by the Section 404 process.ⁿ⁸⁴ In December 2006, the SEC proposed interpretive guidance for management to use in conducting the annual evaluation of internal control over financial reporting that is required under Section 404.ⁿ⁸⁵ According to then-Chairman Christopher Cox, the SEC proposed the interpretive guidance, premised on a "top-down, risk-based" approach, with the hope of making the Section 404 evaluation process "more efficient and cost-effective."ⁿ⁸⁶ And in May of 2007, the SEC adopted the Section 404 interpretive guidance for management to use in conducting the annual evaluation of internal control over its financial reporting. The Section 404 guidance provides that management should identify both the potential risks to the quality of financial reports and the controls in place to manage those risks. The guidance further provides that once the controls are identified, management should focus its analysis on controls that concern the highest risk areas for financial reporting.ⁿ⁸⁷

Also in May of 2007, PCAOB adopted Auditing Standard No. 5 (AS-5) to supersede Auditing Standard No. 2 (AS-2).ⁿ⁸⁸ AS-5 is intended to align the costs and benefits of internal control audits by scaling audits to the size of the company and allowing auditors to focus on those controls which are most important to ensuring reliable financial reporting.ⁿ⁸⁹ AS-5 differs from AS-2 in several ways. As stated, AS-5 focuses auditors on those controls deemed critical to preserving the integrity of the company's financial reporting. AS-5 also clarifies that auditors are not required to evaluate management's own evaluation process. AS-5 further provides commentary throughout the standard to explain how examinations can be scaled to the size and complexity of the company being audited. Moreover, AS-5 clarifies the appropriate materiality standard to apply in the context of internal audits. Auditors are required to use AS-5 for all internal control audits conducted on companies whose fiscal years end on or after November 15, 2007.ⁿ⁹⁰

The SEC, on June 20, 2007, amended the rules regarding the management report on internal control over financial reporting (ICFR). As announced in the release, though AS-5 does not require auditors to provide an opinion on the management report, auditors are required to assess whether the management report fully discloses the requisite information and, if they determine that the management report is not fairly stated, to modify their reports on the effectiveness of ICFR.ⁿ⁹¹

The SEC final rule concerning ICFR requires a non-accelerated filer to begin filing its management report with the first annual report for a fiscal year ending on or after December 15, 2007.ⁿ⁹² The final rule also requires a non-accelerated filer to file its auditor attestation report with the first annual report for a fiscal year ending on or after December 15, 2008.ⁿ⁹³ However, the SEC announced in June 2008 that it had approved a one-year extension of the compliance date for non-accelerated filers to meet the auditor attestation requirement. With the extension, non-accelerated filers will be required to provide the attestation reports in their annual reports for fiscal years ending on or after December 15, 2009.ⁿ⁹⁴

In response to significant concern over the adequacy of disclosures about post-retirement benefits, in September of 2006, FASB released FAS 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans, requiring an employer that sponsors a single-employer defined benefit postretirement plan to report the overfunded or underfunded status of the plan in its statement of financial position rather than in the notes. For employers with publicly traded equity securities, the requirement to reflect the funded status of a benefit plan in its financial statements and the

disclosure requirements were effective as of the end of the fiscal year ending after December 15, 2006.ⁿ⁹⁵

On March 12, 2009, the House Financial Services Subcommittee on Capital Markets, Insurance and Government-Sponsored Entities held a hearing addressing the fair value accounting rules that some have identified as a factor contributing to the financial crisis.ⁿ⁹⁶ FAS 157, which was issued in September 2006 in response to confusion resulting from the widely differing methodologies used by preparers in determining fair values, does not itself establish that fair value accounting must be used to value certain assets. Rather, it creates a framework for applying fair value accounting where such accounting is required.ⁿ⁹⁷ FASB, as well as the SEC, had issued guidance on the application of FAS 157 at various points during 2008 and in early 2009. Nevertheless, during the March 12th hearings, members of the subcommittee called on FASB to act quickly to issue additional, enhanced guidance under FAS 157, warning that Congress would take action if FASB did not do so in a timely fashion. FASB responded to this Congressional pressure on March 17, 2009 by proposing FSP FAS 157-e, *Determining Whether a Market is Not Active and a Transaction is Not Distressed*, which provides further clarification on the application of FAS 157. On April 2, 2009, FASB voted to prepare a final draft of this guidance. The new guidance will be effective prospectively for interim and annual periods ending after June 15, 2009.

[6] Absent Federal Legislation, Market Demand Likely Would Have Mandated Many of the Sarbanes-Oxley Reforms

One impact of the Sarbanes-Oxley Act "has been the all-but-instant appearance of literally dozens of firms, seminars, consultants, and publications, all designed to solve (for a healthy fee) all worries associated with [Sarbanes-Oxley] compliance."ⁿ⁹⁸ The actual utility of some of these services is questionable--in many cases, the recommendations of such consultants may become just another group of items on a compliance checklist for the board and its committees. There is no substitute for a board's active oversight of management in the development of a plan for compliance with the mandates of Sarbanes-Oxley that fit the company and its culture. However, "even full compliance with [Sarbanes-Oxley], with or without the help of outsiders, is likely to have more form than substance."ⁿ⁹⁹ One reason is that by history and policy, corporate governance in the U.S. is still primarily the province of state law, with a limited role for federal government, which focuses mostly on disclosure and process rather than substance.ⁿ¹⁰⁰ However, the recent financial crisis may be changing this dynamic somewhat as Congress increasingly has been focusing on legislation affecting executive compensation and corporate governance.ⁿ¹⁰¹

Although the passage of the Sarbanes-Oxley Act represents the largest federal incursion into state law control of corporate governance to date, even without federal legislation it is likely that market demand would have required implementation of some of the Sarbanes-Oxley requirements such as audit partner rotation,ⁿ¹⁰² attestation provisions,ⁿ¹⁰³ the reduction of organizational and incentive compensation conflicts of interest for securities analystsⁿ¹⁰⁴ and the prohibition of some auditor consulting services.ⁿ¹⁰⁵ In fact, a number of companies had voluntarily adopted some or all of the Sarbanes-Oxley and listing standards mandates, even before they were enacted or adopted, in the form of best practices for corporate governance, both to demonstrate their commitment to good governance and to avoid being penalized by investors who were wary of questionable governance structures.ⁿ¹⁰⁶ A company's voluntary pledge to "do the right thing" often proved instrumental in restoring investor confidence and proving that a particular company was not a "lemon."ⁿ¹⁰⁷

In addition, some institutional investors, acting as lead plaintiffs in class action securities suits under the Private Securities Litigation Reform Act of 1995 (the "PSLRA"),ⁿ¹⁰⁸ have sought and achieved corporate governance enhancements as part of negotiated settlements. For example, Homestore (now Move, Inc.), an Internet real estate company, settled a class action suit brought by the California State Teachers' Retirement System ("CalSTRS") in August 2003, paying out \$64 million in cash and stock to shareholders and consenting to several corporate governance reforms.ⁿ¹⁰⁹ Homestore agreed to appoint a shareholder-nominated director to the board, ban the use of stock options in director compensation, increase the number of independent directors and committees, and gradually eliminate staggered terms for directors.ⁿ¹¹⁰ As the result of another class action settlement, Siebel Systems, Inc., a provider of

customer-service software, agreed to adopt limits on director compensation and add a new outside director selected with input from the Teachers' Retirement System of Louisiana, a \$10 billion retirement fund that was acting as lead plaintiff in the suit.ⁿ¹¹ Hanover Compressor also settled a shareholder lawsuit in May 2003 by agreeing to rotate its outside audit firm every five years, implement certain restrictions on insider stock sales and permit shareholders with more than 1 percent of the outstanding shares to nominate director candidates.ⁿ¹² In 2005, Ashland Inc. settled a class action lawsuit with the Central Laborers' Pension Fund that provides the plaintiff increased input with respect to director nominations, requires the company to appoint a lead independent director, and mandates that directors accept at least 50 percent of their director fees in Ashland common stock and defer at least 50 percent of their director fees into hypothetical common stock units of Ashland common stock.ⁿ¹³ Tyson Foods settled a shareholder lawsuit in January 2008 by, among other things, agreeing to appoint a lead independent director and to replace at least one inside director with an independent director.ⁿ¹⁴

Though it initially took some time for the market to react to the incentives created by the PSLRA, institutional investors have become increasingly active in securities class actions, often achieving settlements including significant governance enhancements.

FOOTNOTES:

(n1)Footnote 1. According to a 2006 ISS study, 94 percent of the 320 institutional investors interviewed said that a company's corporate governance structure is important to their firms. *See* ISS 2006 Global Institutional Investor Study, available at <http://www.issproxy.com/globalinvestorstudy/index.jsp>. A July 2002 global survey of 200 institutional investors performed by McKinsey & Co. found that: "Corporate governance is at the heart of investment decisions. Investors state that they still put corporate governance on par with financial indicators when evaluating investment decisions. An overwhelming majority of investors are willing to pay a premium for companies exhibiting high governance standards. Premiums averaged 12-14 percent in North America and Western Europe." House Committee on Financial Services, *Rebuilding Investor Confidence, Protecting U.S. Capital Markets, The Sarbanes-Oxley Act: The First Year*, 12 (2003).

In fact, institutional investors have increasingly moved to stocks of companies perceived as being well-governed, penalizing stocks of companies seen as having lax oversight. For example, Cendant Corp. overhauled its governance structure after a 1998 accounting scandal. In the words of Cendant's CEO, Henry R. Silverman, "I think the real impetus [for reform] will not be the NYSE, the President, or Congress--it will be the reality of the marketplace." Louis Lavelle, *The Best & Worst Boards, How the Corporate Scandals are Sparking a Revolution in Governance*, Bus. Wk., Oct. 7, 2002, at 112 (stating that "perhaps the most important driver of change [in governance] is the markets").

(n2)Footnote 2. Additionally, several shareholder advocacy groups, blue ribbon panels and other associations have suggested a set of "best practices" for improving board performance that they urge boards to adopt.

CHAPTER 2 THE FUTURE OF THE CORPORATE GOVERNANCE MOVEMENT

1-2 Corporate Governance: Law and Practice § 2.02

AUTHOR: Nell Minow John F. Olson

§ 2.02 The Legal Landscape of Corporate Governance Reform

[1] The Delaware Judiciary's Stricter Scrutiny of Directors and Corporate Executives

Another source of corporate governance reform has been the Delaware state judiciary, considered the country's most experienced state judiciary in corporate law. The Delaware judiciary has become increasingly active in the corporate governance arena, no doubt motivated in part by a desire to maintain state primacy in corporate governance regulation. During the first half of 2003, Delaware judges spoke out in forums and articles, presenting the view that corporate wrongdoing should be stopped by heightened scrutiny of board decisions.ⁿ¹ These informal assertions foreshadowed an emerging trend in Delaware jurisprudence. The first half of 2003 was characterized by a string of victories for plaintiffs, as Delaware courts reversed decisions in favor of defendant directorsⁿ² and allowed derivative actions against directors to go forward.ⁿ³ By 2006, the trend toward stricter judicial scrutiny of directors' actions began to wane, as Delaware courts upheld judgments in favor of defendant directorsⁿ⁴ and refused to permit some derivative actions against directors to go forward.ⁿ⁵

In *In re Oracle Derivative Litigation* ⁿ⁶ the Delaware Chancery Court set a high bar for independence standards for members of special litigation committees, suggesting that a broader inquiry into director independence may be advisable as a general matter in cases where a conflict of interest may exist. Rejecting the directors' argument that the applicable standard for evaluating the independence of a special litigation committee was simply whether the members of the special litigation committee were under the "domination and control" of the defendant directors, the court looked to more subjective factors, including informal relationships between directors and corporate officers, and considered the appearance of a lack of independence created by such relationships, concluding that the applicable standard was whether the committee members were "*for any substantial reason*, incapable of making a decision with only the best interests of the corporation in mind."ⁿ⁷ The *Oracle* court found that the connections that the corporate officers whose conduct was being investigated and the members of the special litigation committee all had to Stanford University, as alumni, speakers, tenured faculty professors and major donors, were "so substantial that they cause[d] reasonable doubt about the [committee's] ability to [act] impartially."ⁿ⁸

In contrast, in *Beam v. Stewart* ⁿ⁹ the following year, the Delaware Supreme Court affirmed a lower court ruling dismissing a shareholder derivative action challenging the independence of the board of directors of Martha Stewart

Living Omnimedia. In *Beam*, the court rejected the shareholder's "structural bias" argument, which presupposes that the professional and social relationships that naturally develop among members of a board impede independent decisionmaking.¹⁰ In evaluating the directors' independence, the court stated that "[a]llegations of mere personal friendship or a mere outside business relationship, standing alone, are insufficient to raise a reasonable doubt about a director's independence."¹¹ Rather, in order to impair independence, the "relationship must be of a bias-producing nature."¹²

In *Krasner v. Moffett*,¹³ the Delaware Supreme Court reversed the dismissal of a shareholder class action, finding that the complaint adequately alleged that a majority of the directors recommending a merger of sister companies Freeport-McMoRan Sulphur, Inc. (FSC) and McMoRan Oil & Gas Co. (MOXY) to the shareholders had "disabling conflicts of interest."¹⁴ In *Krasner*, the plaintiff FSC shareholders alleged that three of the seven directors of FSC, who were also directors of MOXY, stood on both sides of the transaction and thus could not be considered disinterested and independent. The plaintiffs also alleged that two other FSC directors "had an interest in appeasing the MOXY and FSC insiders who also served with [them] on the boards of other [related] companies."¹⁵

Though the lower court found that the complaint alleged sufficient facts to infer that a majority of the board was interested in the merger, it held that "despite the presence of interested directors ... there are no facts from which one can infer that the interested directors interfered with the committee's deliberations or negotiations."¹⁶ As a result, the Court of Chancery determined that the complaint would be evaluated under the business judgment rule and dismissed the case. However, the Delaware Supreme Court reversed the decision below, concluding that "[b]ecause the plaintiffs have sufficiently alleged facts to suggest that the ... transaction was 'not approved by a majority consisting of disinterested directors,' the plaintiffs are entitled at the pleading stage to the inferences that may lead to the conclusion that the business judgment rule would not apply to the ... board's decision to approve ... the merger and to recommend it" to the stockholders.¹⁷

Cases such as *Oracle* and *Krasner* were described by commentators as decisions that "clearly signal a revolution in the Delaware judiciary's attitude toward boardroom conduct. The perceived leniency of the traditional business judgment rule is being redefined or bypassed by an emerging focus on new rubrics, such as whether the directors acted in good faith, were sufficiently disinterested and met the demands of enhanced scrutiny [T]he 'rules' determining proper board conduct are being changed by the Delaware courts to impose higher standards" on directors.¹⁸ For example, in the March 2007 *Netsmart* decision, Vice Chancellor Strine stated that, in the context of a company's sale, directors assume a fiduciary duty which changes the business judgment rule from a test of mere rationality to one of reasonableness, a "a more searching ... review [with] less tolerance for slack by the directors."¹⁹ "To paraphrase Dorothy's remarks on entering the Land of Oz, 'this sure doesn't look like Delaware anymore.'"²⁰

The options backdating scandal has resulted in further scrutiny of the actions of corporate boards. Stock options are generally set at the market price of the underlying stock on the date of grant. Backdating can have the effect of lowering option exercise prices to a more attractive pre-grant market price. This practice results in both accounting and tax irregularities for the companies that engage in backdating. Barnes & Noble, Apple, Family Dollar Stores and Sepracor are a few of the more than 80 companies that have been forced to restate their financials over 2006 and 2007 as a result of such option grant issues.²¹

Additionally, Chancellor Chandler of the Delaware Chancery Court issued two opinions on February 6, 2007, in which the court rejected the argument that companies are shielded from backdating complaints under the business judgment rule, possibly setting the stage for other options backdating suits. The two cases, *Ryan v. Gifford* and *In re Tyson Foods, Inc.*, are notable as the first in which a court has clearly come down on the side of plaintiffs alleging harm from options backdating. In the *Tyson Foods* opinion, Chancellor Chandler went so far as to state, "At their heart, all backdated options involved a fundamental, incontrovertible lie."²²

These developments do not, however, presage the repeal of the business judgment rule where the issue is one of the

duty of care rather than the duty of loyalty or conflict of interest issues. Importantly, on February 24, 2009 the Delaware Court of Chancery issued an opinion re-affirming the rule. In *In re Citigroup Inc. Derivative Litigation* ("*Citigroup*")ⁿ²³ the Court of Chancery addressed the liability of companies and their boards whose actions (or inactions) may be the prime target of litigation in light of the ongoing financial crisis. In *Citigroup*, the Court dismissed all but one claim in a shareholder derivative action seeking to recover against board members of Citigroup Inc. losses arising from exposure to the subprime lending market. Most noteworthy, the opinion made a clear statement that the business judgment rule continues to be the guiding standard by which to analyze whether directors have met their duty of care, even in light of the current financial crisis.

Plaintiffs, shareholders of Citigroup, brought the action against current and former directors and officers of the company alleging, among other things, that the defendants breached their duties by failing to properly monitor and manage the risks Citigroup faced from problems in the subprime lending market, even in the face of alleged "red flags". Plaintiffs' duty of care argument was based on a theory of director liability articulated in dicta in the 1996 *In re Caremark* decision.ⁿ²⁴ In a typical *Caremark* action, plaintiffs argue that the defendants are liable for damages arising from a failure to properly monitor or oversee employee misconduct or violations of law. Significantly, the Court ruled that the actions of the Citigroup defendants were not properly viewed as failures of oversight but rather as activities protected by the business judgment rule. The Court noted that plaintiffs' claims were based on defendants' alleged failure to properly monitor Citigroup's *business risk*, specifically its exposure to the subprime mortgage market, rather than, for example, an alleged oversight failure allowing widespread criminal activity. As the Court pointed out, plaintiffs were attempting to hold the director defendants personally liable for making business decisions that, in hindsight, turned out poorly for the company.

The Court made it clear that obligations to implement and monitor a system of oversight do not, absent extraordinary circumstances, eviscerate the core protections of the business judgment rule which are "designed to allow corporate managers and directors to pursue risky transactions without the spectre of being held personally liable if those decisions turn out poorly." As the Court further noted, Citigroup was in the business of taking on and managing investment and other business risk, and "[t]o impose oversight liability on directors for failure to monitor "excessive" risk would involve courts in conducting hindsight evaluations of decisions at the heart of the business judgment of directors. Oversight duties under Delaware law are not designed to subject directors, even expert directors, to *personal liability* for failure to predict the future and to properly evaluate business risk." The *Citigroup* decision reinforces the long-standing principle that, absent extraordinary circumstances, a Delaware Court will not second-guess the business decisions made by a well-informed board, and that no different standard will be, or need be, applied in light of current market conditions.

[2] Judicial Exploration of the Doctrine of "Good Faith"

It appears that the Delaware judiciary is also exploring the boundaries of directors' duty to act in good faith, a duty that has traditionally been held to be breached primarily in instances of self-dealing or breach of the duty of loyalty. Recently, allegations that directors were acting with a complete inattention to consequential details have been found sufficient to constitute a violation not only of their fiduciary duties to act with due care and loyalty, but also of their duty to act in *good faith*.ⁿ²⁵ It seems that the Delaware courts no longer intend to limit directors' personal monetary risk to the traditional breach of good faith situations where directors are personally benefiting from the transaction. Rather, commentators have suggested that "[f]ailing to consider publicly articulated and well established principles of good corporate governance could be considered by a court in determining whether the duty of care was met and, according to [then Chief Justice] Veasey, whether the directors acted in good faith when making their decision."ⁿ²⁶ Former Chief Justice Veasey responded that "[t]he concept of good faith has been in our jurisprudence and statutory law for a long time. It works as part of the ... business judgment rule ... and it is part of the directors' statutory oversight responsibility."ⁿ²⁷

[a] *In re The Walt Disney Company Derivative Litigation*

In *In re The Walt Disney Company Derivative Litigation*,ⁿ²⁸ shareholder plaintiffs filed a derivative action alleging that the board of directors breached its duty of care with respect to the hiring and subsequent no-fault termination of Michael Ovitz, the terms of both of which were negotiated almost exclusively by Disney's CEO (and close personal friend of Ovitz), Michael Eisner. Upon his no-fault termination, Ovitz received severance pay and other benefits totaling \$140 million. It was further alleged that the Disney board never sought to negotiate with Ovitz regarding his departure, did not consider whether to seek a termination based on fault and did not explore any alternatives.

In the motion to dismiss stage of this litigation, the court acknowledged its hesitation to second-guess the decisions of independent directors, holding that the complaint sufficiently alleged facts suggesting "that the Disney directors failed to exercise *any* business judgment and failed to make *any* good faith attempt to fulfill their fiduciary duties to Disney and its stockholders."ⁿ²⁹ The court concluded that "[w]here a director consciously ignores his or her duties to the corporation, thereby causing economic injury to its stockholders, the director's actions are either 'not in good faith' or 'involve intentional misconduct.' Thus, plaintiffs' allegations support claims that fall *outside* the liability waiver provided under Disney's certificate of incorporation."ⁿ³⁰

Following a thirty-seven day trial, the *Disney II* court ruled in August 2005 that the Disney defendants did not breach their fiduciary duties or commit waste.ⁿ³¹ The court noted that "Delaware law does not ... hold fiduciaries liable for a failure to comply with the aspirational ideal of best practices," and where "decision-makers act as faithful servants ... [t]he redress for failures ... must come from the markets, through the actions of shareholders and the free flow of capital, and not from this Court."ⁿ³² On the apparent expansion of directors' duty of good faith, the *Disney II* court noted that, in the end, "it makes no difference whether the words 'fiduciary duty of' are placed in front of 'good faith' because acts not in good faith (regardless of whether they might fall under the loyalty or care aspects of good faith) are in any event non-exculpable [under Section 102(b)(7) of the Delaware General Corporation law] because they are disloyal to the corporation."ⁿ³³ In terms of the standard for determining whether directors have acted in good faith, the *Disney II* court stated that "the concept of *intentional dereliction of duty, a conscious disregard for one's responsibilities*, is an appropriate (although not the only one) standard."ⁿ³⁴

In June 2006, the Supreme Court of Delaware affirmed the Court of Chancery's holding in *Disney II* that the Disney defendants did not breach their fiduciary duties or commit waste.ⁿ³⁵ The Court explicitly approved of the good faith standard articulated in *Disney II* as "a legally appropriate, although not the exclusive, definition of fiduciary bad faith."ⁿ³⁶ The Supreme Court emphasized that proving bad faith is a high standard. In answering the question of "whether gross negligence (including a failure to inform one's self of available material facts), without more, can [] constitute bad faith," the court stated, "The answer is clearly no [G]rossly negligent conduct, without more, does not and cannot constitute a breach of the fiduciary duty to act in good faith."ⁿ³⁷ The Court further explained that conduct constituting a failure to act in good faith under the standard described in *Disney II* occurs "where the fiduciary intentionally acts with a purpose other than that of advancing the best interests of the corporation, where the fiduciary acts with the intent to violate applicable positive law, or where the fiduciary intentionally fails to act in the face of a known duty to act, demonstrating a conscious disregard for his duties."ⁿ³⁸ The Court stated that "such misconduct is properly treated as a non-exculpable, nonindemnifiable violation of the fiduciary duty to act in good faith."ⁿ³⁹

The Delaware Chancery Court reiterated several principles espoused in the initial *Disney* decision in *Official Committee of Unsecured Creditors of Integrated Health Services, Inc. v. Elkins*.ⁿ⁴⁰ The plaintiffs asserted that the founder and Chief Executive Officer of the company breached his fiduciary duties of loyalty and good faith by obtaining compensation arrangements without regard to the company's best interests and by exerting improper influence on other board members who approved the compensation. The court, in ruling on a motion to dismiss, found that the plaintiffs' allegations, if true, could indicate that the CEO breached his fiduciary duties since he was under a duty to see that his own employment arrangements were negotiated "in an adversarial and arms-length manner."ⁿ⁴¹ In a nod to concerns over the welfare of the business judgment rule following the *Disney* decision, the *Integrated Health Services* court also indicated that "The court does not look at the reasonableness of a Board's action in this context [executive

compensation], as long as the Board exercised some business judgment."n42

The *Disney* and *Integrated Health Services* decisions are representative of the view that "good corporate governance mandates that directors proactively inform themselves about corporate developments and aggressively intervene to understand reported troublesome corporate behavior that is not voluntarily brought before the Board by management."n43 It is clear that corporate directors can no longer knowingly stick their heads in the sand to avoid addressing corporate issues without exposing themselves to potential liability for breach of the duty of good faith. Additionally, the *Disney* decision (as reiterated in the *Integrated Health* decision) provides a pointed warning that protections afforded by the business judgment rule and exculpatory charter provisions permitted by state law (which in Delaware and some other states have exceptions for acts or omissions not in good faith) will not encompass instances where directors "consciously and intentionally disregard [] their responsibilities, adopting a 'we don't care about the risks' attitude concerning a material corporate decision."n44

[b] *In re Abbott Laboratories Derivative Shareholder Litigation*

Other derivative cases have demonstrated a similar "skepticism of board passivity and the same willingness to find a lack of good faith as Delaware cases have shown"n45 For example, in *In re Abbott Laboratories Derivative Shareholders Litigation* n46 the Seventh Circuit considered shareholder derivative plaintiffs' allegations that over a period of six years, Abbott directors failed to inquire into or even question management about known violations of Food and Drug Administration regulations (reported in the company's filings and in the press) that ultimately resulted in Abbott paying a fine of over \$100 million to the FDA. Similar to the holding in *Disney*, the court found that these claims, if true, "support a reasonable assumption that there was 'a sustained and systematic failure of the board to exercise oversight,' in this case intentional in that the directors knew of the violations of law, [and] took no steps in an effort to prevent or remedy the situation," which resulted in substantial corporate losses.n47 Assuming the truth of the allegations, the court held that the directors' failures were so egregious as to constitute a lack of good faith.n48 Accordingly, the plaintiffs were excused from making demand upon the corporation, and the directors were not entitled to the protections of exculpatory clauses permitted by the Illinois corporate law.n49

In *Disney* and *Abbott Labs.*, courts have held that the allegations of directors' affirmative failure to consider troubling corporate developments cast doubt on whether the directors acted in good faith, and consequently, were entitled to the protections of exculpatory charter provisions.n50

[c] *Stone v. Ritter*

In *Stone v. Ritter*, shareholders brought a derivative complaint against directors of AmSouth Bancorporation ("AmSouth") for failing to ensure that a Bank Secrecy Act compliance and reporting system existed, the lack of which, shareholders alleged, resulted in AmSouth paying \$50 million in fines and civil penalties.n51 The Court of Chancery dismissed the complaint for failure to adequately plead that a pre-suit demand would be futile.n52 In assessing whether pre-suit demand requirements are excused where the claim is based upon failure to exercise oversight, the plaintiff must allege facts that cast doubt on whether directors acted in good faith in exercising their oversight responsibilities.n53 In *Stone v. Ritter*, the Delaware Supreme Court adopted the *Caremark* standard for assessing bad faith in oversight liability cases.n54 In *Caremark*, the Delaware Court of Chancery recognized that "[g]enerally where a claim of directoral liability for corporate loss is predicated upon ignorance of liability creating activities within the corporation ... only a sustained or systematic failure of the board to exercise oversight--such as an utter failure to attempt to assure a reasonable information and reporting system exists--will establish the lack of good faith that is a necessary condition to liability.n55 In *Stone v. Ritter*, the Supreme Court also held that the duty to act in good faith is not a separate duty, but rather is a subsumed within the duty of loyalty. Affirming the lower court's dismissal of the complaint, the Supreme Court held that "the failure to act in good faith is not conduct that results, *ipso facto*, in the direct imposition of fiduciary liability. The failure to act in good faith may result in liability because the requirement to act in good faith 'is a subsidiary element[,] i.e., a condition, 'of the fundamental duty of loyalty.'"n56

[d] Implications for Exculpation and Indemnification

Cases blurring the distinction between breaches of the duties of care and loyalty and breaches of the duty of good faith have introduced uncertainty as to the scope of protection offered by the business judgment rule and exculpatory provisions pursuant to Section 102(b)(7) of the Delaware General Corporation Law.ⁿ⁵⁷ As the concept of the director's obligation to act in good faith is given new breadth and content, it may well restrict a company's ability to indemnify its directors and officers. As a matter of state law in Delaware, directors and officers are not eligible for indemnification where their conduct was "not in good faith."ⁿ⁵⁸ Thus, the holdings in *Disney* and *Stone v. Ritter* raise the possibility (though not addressed by the court) that D&O insurance carriers may disclaim coverage where directors have not acted in good faith, "relying on the exclusions for willful or intentional misconduct and wrongful acts commonly found in recent [D&O] policies."ⁿ⁵⁹ If director inaction is no longer indemnifiable or protected by exculpatory clauses, it is likely that D&O coverage of this area will only be available, if at all, at a significantly increased premium. Thus, judicial exploration of the concept of "good faith" already has affected the accessibility of exculpatory provision protection in some states and has the potential to significantly impact the availability of indemnification and D&O coverage for directors and officers.

FOOTNOTES:

(n1)Footnote 1. For example, at a roundtable discussion sponsored by the Harvard Business Review in January 2003, Delaware Supreme Court Chief Justice E. Norman Veasey alluded to the need for heightened judicial review of director conduct. Chief Justice Veasey indicated that recent events have led to the development of a new set of expectations for directors and executives that is "changing how the courts look at these issues." *What's Wrong With Executive Compensation? A Roundtable Moderated by Charles Elson*, Harv. Bus. Rev., Jan. 2003, at 76. Additionally, in a keynote address to about 40 attendees at an institutional investor conference in early July 2003, Chief Justice Veasey stated that "[t]he courts should examine processes and examine them carefully. Directors should not just go along, as maybe they did years ago." Michael P. Bruno, *Delaware Chief Justice: It's About the Process*, Institutional Shareholder Services, The Friday Report, July 18, 2003.

(n50)Footnote 50. Additionally, it is noteworthy that in two 2003 proceedings involving Chancellor Corporation's former officers and directors, the SEC effectively sought a federal scienter-based antifraud remedy for what amounted to an abdication of state law duties of care and, possibly, good faith. *See SEC Sues Former Top Officers, Directors and Auditors of Chancellor Corporation for Financial Fraud*, SEC Litigation Release No. 18104 (Apr. 24, 2003); *In the Matter of Michael Marchese*, SEC Release No. 34-47732 (Apr. 24, 2003). In these proceedings, one director was sued in an injunctive proceeding and another consented to an administrative settlement for violations of the antifraud provisions of the Securities Exchange Act of 1934 and for causing reporting violations by Chancellor. However, there was no claim that the former directors participated in the fraud themselves. Rather, the allegations were that the directors so neglected to make inquiry despite "red flags" indicating potential management fraud that they were "reckless" in their lack of due care when they signed SEC annual report filings. It appears that the SEC may be moving toward an expanded definition of recklessness as encompassing breaches of the duty of good faith.

(n57)Footnote 57. In pertinent part, Section 102(b)(7) of the DGCL provides that a certificate of incorporation may contain "[a] provision eliminating or limiting the personal liability of a director to the corporation or its stockholders for monetary damages for breach of fiduciary duty as a director, provided that such provision shall not eliminate or limit the liability of a director: (i) for any breach of the director's duty of loyalty to the corporation or its stockholders; (ii) for acts or omissions not in good faith or which involve intentional misconduct or a knowing violation of law; (iii) under § 174 of this title; or (iv) for any transaction from which the director derived an improper personal benefit" (emphasis supplied). A number of other states have a similar "good faith" exception from the liability limitation, but the Model Business Corporation Act, followed in a majority of states, does not.

CHAPTER 2 THE FUTURE OF THE CORPORATE GOVERNANCE MOVEMENT

1-2 Corporate Governance: Law and Practice § 2.03

AUTHOR: Nell Minow John F. Olson

§ 2.03 Increasing Scrutiny of Compensation and Compensation Committee Practices

Though legislators, regulators and investors spent the first few years after the enactment of Sarbanes-Oxley focusing on commendable goals such as increasing the effectiveness of audit committees, increasing financial transparency and the accuracy of financial statements, the focus has shifted to management conduct as exemplified by executive compensation. In the words of Warren Buffett, the "acid test for [corporate governance] reform will be CEO compensation. Managers will cheerfully agree to board 'diversity,' attest to SEC filings and adopt meaningless proposals relating to process. What many will fight, however, is a hard look at their own pay and perks."¹ The scrutiny of executive compensation has grown even more intense in the wake of the recent financial crisis.

[1] Concerns About Executive Pay

Investors have little incentive to beleaguer management in good times. Appeased by high stock values and favorable returns, investors may turn a blind eye to director and executive compensation packages, even if exceedingly generous. Al Dunlap captured the dominant business philosophy during the 1990s: "The best bargain is an expensive CEO You cannot overpay a good CEO and you can't underpay a bad one. The bargain CEO is one who is unbelievably well compensated because he's creating wealth for the shareholders. If his compensation is not tied to the shareholders' returns, everyone's playing a fool's game."² During the booming 1990s, generous stock-option plans flourished, often providing top executives with option packages potentially worth tens of millions of dollars or more. However, investors who may have turned a blind eye to very generous executive pay packages in the 1990s have become less tolerant since the economy began to slump in 2000.³ This attitude is supported by a study showing "large, positive, unexplained bonus and option awards are predictive of both default and large rating downgrades."⁴

The focus of regulators and investors has increasingly turned to criticism of the oversize compensation packages of top executives who have not produced sizeable returns for shareholders.⁵ In July 2006, the SEC adopted sweeping changes to its rules relating to disclosure of executive and director compensation.⁶ In a press release announcing the new rules, then-SEC Chairman Christopher Cox stated his belief that the new rules "will help [shareholders and boards of directors] make better decisions about the appropriate amount to pay the men and women entrusted with running their companies."⁷ In July 2009, the SEC proposed further amendments to the rules relating to executive compensation to require additional disclosure.⁸ The SEC also recently proposed amendments to the proxy rules to provide for

advisory votes on executive compensation at companies that have received federal assistance under the Troubled Asset Relief Program, or TARP.ⁿ⁹

Shareholders are increasingly demanding a greater role in the compensation practices of the companies in which they invest. As of March 2009, RMG reported that it was tracking over 100 proposals requesting that shareholders be given the opportunity at each annual meeting to ratify the compensation of named executive officers set forth in the proxy statement through a non-binding vote.ⁿ¹⁰ This is in stark contrast to the single such proposal submitted to seven companies by the American Federation of State, County and Municipal Employees ("AFSCME") during the 2006 proxy season.ⁿ¹¹ These so-called "advisory vote" or "say on pay" proposals are modeled after the nonbinding shareholder advisory vote on board pay, a statutory requirement since 2002 at all publicly traded companies in the United Kingdom.ⁿ¹²

In addition, late in the 2009 proxy season, the United Brotherhood of Carpenters Pension Fund submitted to 20 companies a new shareholder proposal seeking a multi-pronged triennial vote on executive compensation, and a triennial forum between the compensation committee and shareholders to discuss executive compensation policies and practices.ⁿ¹³ The triennial vote on executive compensation would afford shareholders the opportunity to vote separately on the company's executive compensation practices, annual incentive plan, long-term incentive plan, and post-employment benefits. The Carpenters note the significant costs associated with a thorough compensation analysis and assert that a triennial vote "might improve the quality of the shareholder pay plan analysis and the informative value of the vote."ⁿ¹⁴ These proposals, as well as "traditional" say on pay shareholder proposals, will likely receive considerable attention in the 2009 proxy season.

At a Washington, DC summit in January 2007, Representative Frank, who chairs the House Financial Services Committee explained "We need to find some way to legislate greater shareholder involvement in setting CEO salaries."ⁿ¹⁵ In April of 2007, the U.S. House of Representatives overwhelmingly approved a bill introduced by Representative Frank, "The Shareholder Vote on Executive Compensation Act," that would have made an advisory vote on executive compensation mandatory at annual shareholder meetings occurring after 2008 for U.S. listed companies.ⁿ¹⁶ The bill similarly provided for a shareholder vote on golden parachute arrangements.ⁿ¹⁷ In April 2007, a companion bill was introduced in the Senate by Senator Barack Obama and a large number of cosponsors, but the Senate never acted on the bill.ⁿ¹⁸ On May 19, 2009, Senators Charles Schumer and Maria Cantwell introduced new corporate governance legislation entitled the "Shareholder *Bill of Rights* Act of 2009."ⁿ¹⁹ The legislation, among other things, would require all public companies to hold an annual advisory (non-binding) shareholder vote on executive compensation and would require public companies to obtain shareholder approval of any golden parachutes. A similar bill was introduced in the House of Representatives on June 12, 2009 by U.S. Representative Gary Peters. The bill, entitled the "Shareholder Empowerment Act of 2009,"ⁿ²⁰ would give shareholders an annual, non-binding advisory vote on senior executive compensation and would prohibit the board or compensation committee from entering into agreements providing for severance payments for executives terminated for poor performance.

In addition, on May 7, 2009, Senator Richard Durbin introduced two new pieces of legislation targeting "excessive compensation." The first bill, the "Excessive Pay Shareholder Approval Act," would limit the compensation for any single employee to no more than 100 times the average compensation for all employees unless that employee's compensation is approved by at least 60% of stockholders.ⁿ²¹ The second bill, the "Excessive Pay Capped Deduction Act of 2009," would amend the Internal Revenue Code to deny a deduction for "excessive compensation" paid to any employee, and would define "excessive compensation" as the amount by which an employee's compensation exceeds 100 times the average compensation for all company employees.ⁿ²²

Institutional investors also have increased their focus on executive compensation.ⁿ²³ For example, in 2005, many institutional investors focused on the executive compensation issues surrounding the departure of Phillip Purcell as Morgan Stanley CEO. Specifically, investors criticized Morgan Stanley for Purcell's \$44 million severance package despite Morgan Stanley's recent poor performance and guaranteed payments to other Morgan Stanley executives entered

into immediately before John Mack was appointed as Purcell's successor.ⁿ²⁴ More recently, American International Group ("AIG") became the subject of criticism when on June 15, 2008, the company announced its plans to replace Chief Executive Officer Martin Sullivan with Robert Willumstad, a director of the company who had been chairman since 2006, after the company posted losses for two consecutive quarters totaling \$13 billion. Mr. Sullivan received approximately \$47 million in severance and long-term compensation upon his departure from AIG.ⁿ²⁵ AIG faced criticism again in March 2009 for distributing \$165 million in bonus pay to its executives despite having received bailout funds from the federal government under the Troubled Asset Relief Program.ⁿ²⁶

Examples of situations where corporate directors have been accused of letting compensation spiral out of control abound.ⁿ²⁷ For instance, former AT&T Chairman Edward Whitacre Jr. received an estimated \$65 million (including options) in 2001, while the value of SBC stock dropped 18 percent.ⁿ²⁸ Former Walt Disney Co. CEO Michael Eisner averaged \$122 million in pay annually from 1997 through 2002, though shareholders received a *negative* 5 percent annual return over the same period.ⁿ²⁹ Mr. Eisner even received a \$5 million bonus in 2002 despite what critics said was lackluster performance by Disney stock.ⁿ³⁰ At Blockbuster Inc., CEO John F. Antioco's compensation increased 541 percent to \$56.8 million in 2004 while during the same period Blockbuster's operating income fell nearly 50 percent.ⁿ³¹ Pfizer, Inc., replaced its CEO, Henry McKinnell, in July 2006 after investors criticized his large retirement package and the company's poor stock performance.ⁿ³² Since McKinnell became CEO, Pfizer's shares had fallen 40 percent.ⁿ³³ Dr. McKinnell's retirement package, on the other hand, was valued at \$200 million, including deferred compensation he had earned over his more than 30 years with the company AND pension benefits with an estimated value of \$82.3 million.ⁿ³⁴ In January 2007, The Home Depot, Inc. CEO Robert Nardelli resigned amid controversy over his large compensation package and what some referred to as his "autocratic" management style.ⁿ³⁵ During his five years as CEO at Home Depot, Mr. Nardelli's compensation was valued at over \$245 million and the price of the company's stock dropped roughly 12 percent.ⁿ³⁶ Even Mr. Nardelli's resignation did not end the controversy over his compensation. Mr. Nardelli's generous separation agreement, which entitled him to a \$210 million severance package, based in large part on the contract entered into in 2000 when he was hired as CEO, prompted criticism from shareholders and others, including Congressman Barney Frank.ⁿ³⁷ The employment agreements for the new CEOs at Pfizer and Home Depot were significantly different from those of their predecessors. Mr. Nardelli was subsequently hired by private equity investors to lead a hoped for turnaround of Chrysler with a reported compensation package that was heavily weighted toward attainment of performance goals.ⁿ³⁸ With Chrysler's bankruptcy filing on April 30, 2009, Mr. Nardelli departed without reaping significant benefits from this package.

According to *Forbes*, CEO's at the 500 largest U.S. companies received a 38 percent increase in compensation during 2006 as compared to 2005, with an average compensation package of \$15.2 million.ⁿ³⁹ In fact, the ratio of chief executive pay to that of the average employee can be as high as 500-to-1, according to Bruce Hutton, a professor at the University of Colorado who conducted a private research project on executive compensation.ⁿ⁴⁰ Additionally, an annual Business Week study of executive compensation reported that average chief executive officer annual compensation increased 15 percent up to \$9.6 million in 2004, while the average worker's annual compensation increased 2.9 percent to \$33,176.ⁿ⁴¹ At an investor briefing in New York on June 11, 2002, Legg Mason Value Trust manager Bill Miller cited statistics indicating that CEO pay has increased 535 percent since 1990, far exceeding the 297 percent gain in the S&P 500 stock index, the 116 percent increase in corporate profits and the 32 percent rise in workers' pay.ⁿ⁴² "This is what has the average person up in arms," he said." John J. Castellani, President of Business Roundtable argues that "Executive compensation has closely followed the growth that companies have experienced in the last ten years."ⁿ⁴³ His views are supported by a 2006 study conducted by Frederic W. Cook & Co., Inc. and Mercer Human Resource Consulting for Business Roundtable,ⁿ⁴⁴ which concluded that between 1995 and 2005, the 9.6 percent growth in median total compensation of CEOs has closely tracked with the 9.9 percent median annual shareholder returns and 8.8 percent annual growth in market value of the 350 companies surveyed.ⁿ⁴⁵

The continued existence in a number of cases of what can be perceived as to be overly generous executive compensation packages is evidence that at least some corporate executives have yet to embrace governance reforms that affect their own pay and perks.ⁿ⁴⁶ Investor dismay at such practices will increase downward pressure on executive pay,

including bonuses, option grants and severance packages, in the future. One indication of this trend has been the surge in the number of shareholder proposals seeking to limit executive compensation and severance payments, reduce the number of options granted to executives and reduce pay disparity between a company's top executives and its lowest-paid workers.ⁿ⁴⁷ Furthermore, these proposals are receiving higher levels of support than ever before.ⁿ⁴⁸ Some executives have relinquished some or all of their compensation voluntarily, possibly to differentiate themselves from the pictures of executive excess.ⁿ⁴⁹ Additionally, Business Roundtable, an association of chief executive officers of prominent corporations, identified the concept of "pay for performance" as a fundamental characteristic of appropriate executive compensation programs.ⁿ⁵⁰ One commentator observed, "It is going to take some time before the whiff of illegal activities is dispelled from the arena of CEO pay."ⁿ⁵¹ Until then, companies can expect to feel continued pressure from the investment community to demonstrate their good faith by making cuts where it will be felt most--from their own paychecks.

[2] Changes to Compensation Committee Structure and Process

The role of the compensation committeeⁿ⁵² in determining compensation levels for the CEO and other executive officers varies among companies. Though some compensation committees meet regularly and meaningfully consider these decisions, others are less rigorous in their procedures. The practice of rubber-stamping management's recommendations has become less common, however, since the recent stock options backdating practices of many high profile companies came to light in early 2006 and the new SEC compensation rules were adopted in July of 2006. Since then, compensation committees have begun exercising increasing oversight over the issuance of option grants to ensure that proper practices are followed and that backdating does not occur.ⁿ⁵³

As media coverage of outrageous executive pay packages and compensation committee conflicts of interest increased awareness of compensation issues, it became clear that reform was needed in the area. In 2003, both the NYSE and NASDAQ adopted corporate governance listing standards requiring greater independence for directors tasked with compensation decisions and increased oversight of the decision making process.ⁿ⁵⁴ In the future it is likely that companies concerned with good governance, even if they are not subject to the NYSE or NASDAQ listing standards, will rely on a heightened definition of independence for compensation committee members so as to avoid even the appearance of cronyism or impropriety in decision making. In a January 2007 commentary, the Business Roundtable recommended that all directors "who sit on a compensation committee should be independent in both fact and appearance."ⁿ⁵⁵ Despite these positive reforms, questionable compensation practices continued at some companies during the sub-prime mortgage era. For example, when Angelo Mozilo, the CEO of Countrywide Financial Corp., did not agree with a compensation plan proposed by the compensation consultant hired by the company's compensation committee, he hired his own compensation consultant. The compensation committee approved the second firm's recommendation.ⁿ⁵⁶

The Aspen Institute Business Roundtable and the National Association of Corporate Directors ("NACD") Blue Ribbon Commission on Executive Compensation and the Role of the Compensation Committee endorsed governance best practices that are likely to influence the design, implementation and oversight of future executive compensation programs in companies concerned with good governance.ⁿ⁵⁷ Well-advised companies may implement executive stock ownership and retention requirements to align executive compensation with the long-term interests of shareholders, as described by the Aspen Institute Business Roundtable and the NACD Commission, and are likely to avoid offering "excessive severance packages that reward executives who have not met performance goals and objectives during the term of their employment."ⁿ⁵⁸ It is also likely that companies will focus more attention on the establishment of "meaningful goals for performance-based compensation" that are linked to long-term shareholder value.ⁿ⁵⁹ Additionally, Business Roundtable and the NACD Commission recommended that companies consider a variety of performance metrics, both qualitative and quantitative, including performance relative to companies' peer groups, in setting performance measures, rather than measuring executive performance solely by the corporation's stock price or revenue.ⁿ⁶⁰ The post financial-crisis reform proposals included specifics about the design of pay plans--such as indexed or premium-priced options, clawbacks and bonus banking--and structural proposals regarding the independence

of compensation committees and an increased role for shareholder oversight.

In the future, well-advised companies will increasingly turn to the recommendations of independent compensation consultants and will take pains to follow a thorough and well-reasoned decision making process.ⁿ⁶¹ This is particularly important in light of the Delaware judiciary's demonstration of an increased sensitivity to shareholders' claims and heightened scrutiny of the fiduciary duties of good faith and due care.ⁿ⁶² After the Delaware decisions in *Disney* and *Integrated Health*, it is clear that compensation committees cannot fulfill the fiduciary duty of good faith by blindly rubber-stamping management recommendations.ⁿ⁶³ Selecting a compensation consultant to assist the compensation committee may not be as simple as it would seem, however. Companies must take care that their compensation consultants are and remain truly "independent." The independence of compensation consultants has increasingly come under Congressional scrutiny. In 2007, Congressman Henry Waxman, chairman of the House Committee on Oversight and Government Reform, sent letters to six compensation consultant firms requesting information about their relationship with their clients.ⁿ⁶⁴ In this judicial atmosphere, it is likely that shareholders increasingly will choose to litigate claims that compensation committees and boards did not act in good faith or committed corporate waste by approving excessive compensation or severance packages.

Additionally, it is likely that the common practice of benchmarking executive pay levels against those at peer companies will be subject to increased scrutiny. Over the years, benchmarking has tended to inflate executive compensation as companies compete to set executive pay levels within the top half or the top quarter of their peer group, as identified by consultant surveys. Such a decision is argued to be a sign of a healthy company with strong board support of its executives. However, the natural impact of such benchmarking is to ratchet up compensation to ever-higher levels, even without commensurate improvement in corporate performance. In the future, companies concerned with good governance will follow the NACD Commission's and Business Roundtable's recommendations to resist "an overreliance on surveys and other statistical analyses" and to rely on a variety of different sources, including company-specific factors, in determining executive compensation.ⁿ⁶⁵

While executive compensation in general continues to rise, some compensation committees are becoming more responsive to shareholder concerns. Prior to MBNA's 2006 merger with Bank of America, its compensation committee announced "that reductions in the levels of executive compensation would be appropriate."ⁿ⁶⁶ For example, total compensation at MBNA in 2004 was reduced by 34-37 percent, following 24-30 percent reductions in 2003. Further reductions are in the pipeline. These have included reductions in MBNA's base salary which will, eventually, affect retirement benefits. Furthermore, for the first time in 2004, performance restrictions were placed on MBNA restricted stock awards. Directors also are beginning to publicly express frustration over executive compensation. In July 2005, Cyberonics Inc. filed on Form 8-K an email from the chair of its compensation committee in which he resigned because "I unfortunately cannot support the direction of the governance practices of the Cyberonics board, in particular its practices regarding CEO compensation and succession."ⁿ⁶⁷ In a 2006 interview with Financial Times Jeffrey Immelt, chairman and chief executive of General Electric, urged companies to keep chief executive pay within a small multiple of that of their senior managers.ⁿ⁶⁸ Noting that his own pay was only two to three times that of his immediate subordinates, Immelt stated "The key relationship is the one between the CEO and the top 25 managers in the company because that is the key team. Should the CEO make five times, three times or twice what this group make? That is debatable, but 20 times is lunacy."ⁿ⁶⁹ Warren Buffet, in his 2007 letter to shareholders of Berkshire Hathaway, similarly expressed disapproval of some executives' salaries, deriding them as the result of "irrational and excessive [executive] comp practices."ⁿ⁷⁰

[3] Revisions to Executive Compensation Disclosure Requirements

In response to these widespread concerns regarding executive compensation, in July 2006 the SEC adopted revised executive compensation disclosure requirements.ⁿ⁷¹ The new rules require a Compensation Discussion and Analysis ("CD&A") of named executive officer compensation.ⁿ⁷² The CD&A must discuss the compensation awarded to, earned by, or paid to the named executive officers.ⁿ⁷³ This discussion is required to include, among other things, the

objectives of the company's compensation programs, each element of compensation, how the amount and formula for each element of compensation is calculated, and how each compensation element fits into the company's overall compensation objectives.ⁿ⁷⁴ The SEC is monitoring the quality of CD&A reports to ensure that the disclosures are adequate and that companies do not use "boilerplate" language and has sent comment letters requesting future improvements to several hundred companies.ⁿ⁷⁵ Under the new rules, most companies are required to include six tables disclosing various aspects of the named executive officers' compensation, including tables disclosing summary compensation, grants of plan-based awards, outstanding equity awards at year-end, option exercises and stock vested, pension benefits, and nonqualified deferred compensation.ⁿ⁷⁶ Significantly, companies are required to disclose the total compensation of the named executive officers under the new executive compensation requirements.ⁿ⁷⁷ Because such amounts must now be provided in the Summary Compensation Table, many boards of directors are taking a hard look at the how their executive compensation programs will be received by an increasingly critical external audience.

Moreover, as noted above, in July 2009 the SEC proposed amendments that, if adopted, will further revise the rules relating to executive compensation to require additional disclosure.ⁿ⁷⁸ In a speech to the Council of Institutional Investors on April 6, 2009, Chairman Schapiro questioned "whether our compensation disclosures accomplish the objective of providing shareholders with the most relevant information." She discussed recent studies that indicate the need to align compensation with prudent risk taking and said that the Commission is "considering whether greater disclosure is needed about how a company--and the company's board in particular--manages risk, both generally and in the context of setting compensation." In this regard, if adopted, the proposed amendments to the disclosure rules would require companies to discuss and analyze their overall compensation policies and practices for employees generally, including non-executive officers, if the risks arising from the incentives created by these policies and practices could have a material effect on the company as a whole. The proposed amendments also would require enhanced disclosure of potential conflicts of interests involving compensation consultants that provide advice to the board or compensation committee regarding executive or director compensation and also provide other services to the company.

[4] Executive Compensation Reforms in Response to the Financial Crisis

In October 2008, as part of a broader effort to help the economy recover from the collapse in the credit markets, Congress passed the *Emergency Economic Stabilization Act*, which gave the Treasury Department authority to purchase troubled assets from financial institutions under the Troubled Asset Relief Program ("TARP").ⁿ⁷⁹ Included in the legislation were certain executive compensation reforms for companies participating in TARP, including eliminating compensation programs for senior executive officers that encourage unnecessary and excessive risks, the recovery or "clawback" of any bonus or incentive compensation paid to a senior executive officer if the payment was based on materially inaccurate financial statements or other performance metric criteria, and a prohibition on "golden parachute" payments to senior executive officers.

Shortly after his inauguration, on February 4, 2009, President Barack Obama and Treasury Secretary Timothy Geithner held a press conference announcing new executive compensation guidelines for companies receiving TARP funds, and the Treasury Department issued a press release setting out those guidelines with a statement that further guidance would be issued in the near future.ⁿ⁸⁰ There are separate guidelines for companies that participate in any "generally available capital access program" and for those that need "exceptional assistance." For companies needing exceptional assistance, the guidelines limit the total compensation paid to senior executives to \$500,000 per year, other than payment in long-term restricted stock. In addition, these companies must fully disclose their senior executive compensation structure and strategy, including the rationale for how compensation is tied to sound risk management, and submit the compensation to a non-binding "say on pay" shareholder resolution. The guidelines also expand the group of executives subject to clawback restrictions to the next twenty senior executives, but add a culpability component for the non-senior executive officers, and expand the group of senior executives who are prohibited from receiving any severance payment from the senior executive officers to the company's top ten senior executives. Additionally, the next twenty-five senior executives are limited to a golden parachute of one year's compensation. Finally, a company's board of directors must adopt a company-wide policy on any "luxury expenditures" such as aviation services, renovations, entertainment and

holiday parties, and conferences and events.

Like companies receiving exceptional assistance, any participating company will be required to limit senior executive annual compensation to \$500,000 plus restricted stock unless the company discloses its compensation packages and, if requested, allows a non-binding "say on pay" shareholder resolution. Companies must review and disclose the reasons their compensation programs for both the senior executives and other employees do not encourage excessive and unnecessary risk taking. Thus, participating companies must expand both the scope of compensation arrangements they review (from only those affecting senior executive officers to those affecting potentially all employees) and the scope of the disclosure (from certifying that the arrangements do not encourage risk taking to explaining why the arrangements do not so encourage such behavior). In addition, the golden parachute limitation for the top five senior executives is lowered from no greater than three years' compensation to no greater than one year's compensation. The same policies on clawbacks and luxury expenditures that apply to companies receiving exceptional assistance would apply to all participating companies.

On February 17, 2009, President Obama signed into law the American Recovery and Reinvestment Act of 2009 (the "Stimulus Act").ⁿ⁸¹ The Stimulus Act generally codifies the Treasury Department's guidelines on executive compensation with a few important differences. First, unlike the Treasury Department's guidelines, there is no mandatory cap on total compensation. Second, the standards generally apply equally to all TARP recipients. Third, the standards apply to all TARP recipients the most restrictive limitation on severance benefits--an absolute prohibition on any payment (other than accrued salaries and benefits) following departure of the senior executive officer and next five most highly compensated employees. Additionally, the Stimulus Act directs the Treasury Department to adopt implementing rules for these standards and also grants the Treasury Department the authority to establish additional standards.

Further guidance is expected to be issued soon. In testimony given before the Senate Banking Committee on May 20, 2009, Secretary Geithner stated the Treasury Department is in the process of preparing an Interim Final rule to implement the executive compensation and corporate governance provisions of the Stimulus Act.ⁿ⁸² Moreover, the Wall Street Journal reported on May 13, 2009 that "the Obama administration has begun serious talks about how it can change compensation practices across the financial-services industry, including at companies that did not receive federal bailout money."ⁿ⁸³ The initiative is "part of an ambitious and likely controversial effort to broadly address the way financial companies pay employees and executives, including an attempt to more closely align pay with long-term performance." The administration is also discussing "issuing 'best practices' to guide firms in structuring pay." On June 10, 2009, Secretary Geithner issued a statement outlining a set of five broad-based principles for executive compensation.ⁿ⁸⁴ Specifically, the principles state: (1) compensation plans should properly measure and reward performance; (2) compensation should be structured to account for the time horizon of risks; (3) compensation practices should be aligned with sound risk management; (4) we should reexamine whether golden parachutes and supplemental retirement packages align the interests of executives and shareholders, and; (5) we should promote transparency and accountability in the process of setting executive compensation.

CHAPTER 2 THE FUTURE OF THE CORPORATE GOVERNANCE MOVEMENT

1-2 Corporate Governance: Law and Practice § 2.04

AUTHOR: Nell Minow John F. Olson

§ 2.04 Technological Advances Will Continue to Encourage Shareholder Activism

The key role of directors as the primary monitors of management in corporate governance of the 20th century was posited on the inability of shareholders to discuss and evaluate detailed information on corporate performance and to find and communicate with each other without incurring great expense.ⁿ¹ This basic premise may be changing in response to technological advances. The internet and the increased availability of electronic communication have provided widely accessible means for both low-cost access to information and easier direct communication among beneficial owners. For example, in July 2007, the SEC adopted new rules designed to facilitate the use of the internet to deliver proxy materials to shareholders.ⁿ² Under the so-called e-proxy rules, a company must post its proxy materials on a website and mail a notice to shareholders informing them of the availability of the proxy materials and how to access them.ⁿ³ According to John W. White, then-Director of the SEC's Division of Corporation Finance, the proposed rules are designed "to decrease substantially the costs incurred by issuers and others soliciting proxies while safeguarding the interests of investors."ⁿ⁴

In the past, directors of underperforming companies generally felt pressure only from large, well-funded institutional investors. Today, the internet has democratized the system, giving individual investors a louder voice by facilitating collective investor action. For example, shareholder activist Eric Jackson was credited with removing both Terry Semel, CEO of Yahoo, and Ed Zander, CEO of Motorola, in 2007 through internet-based campaigns.ⁿ⁵ Furthermore, a 2005 shareholder campaign by email and the internet contributed to shareholders of Alaska Air Group withholding approximately 42 percent of the vote from management's nominees, passing two binding mandatory bylaw shareholder proposals by the required supermajority votes and passing two other shareholder proposals.ⁿ⁶ In 1999, a group of irate shareholders of United Companies Financial Corp., a high-risk lender, "met" on an internet discussion board and discovered that they collectively controlled 40 percent of the company.ⁿ⁷ Through this cyberspace relationship, the group was able to deliberate and reach a consensus on what action to take, posting over 6,000 messages in the process.ⁿ⁸ When the company went into bankruptcy, the group successfully acquired a position normally reserved for large creditors, essentially becoming the equity committee.ⁿ⁹ The same year, disgruntled shareholders of Luby's Inc., a food-services company, organized on an internet message board and presented a low-budget slate of dissident candidates to challenge the incumbent directors.ⁿ¹⁰ Although traditionally the prohibitive cost of conducting a proxy fight has limited its availability to large institutional investors with sufficient resources and a considerable interest at stake, the shareholders group at Luby's managed to wage an on-line proxy battle for \$15,000, a comparative bargain.ⁿ¹¹

Though the shareholders' slate ultimately was not elected, the campaign itself was enough to spark significant corporate changes, among them the abrupt resignation of Luby's unpopular CEO. Companies can expect the continuation of internet-based shareholder activism in the future.

CHAPTER 2 THE FUTURE OF THE CORPORATE GOVERNANCE MOVEMENT

1-2 Corporate Governance: Law and Practice § 2.05

AUTHOR: Nell Minow John F. Olson

§ 2.05 A More Active Role for Mutual Funds and Money Managers

Mutual funds held \$3.6 trillion in publicly traded U.S. equity as of April 2005, an 80 percent increase since September 2002, when mutual funds held \$2.0 trillion in publicly traded U.S. equity securities representing approximately 18 percent of all publicly traded U.S. corporate equity securities.ⁿ¹ In turn, in 2004 approximately 92 million individual investors held shares of mutual funds to fund their retirements and other financial needs.ⁿ² Historically, mutual funds have been viewed as primarily passive investors, reluctant to challenge management on corporate governance issues.ⁿ³ Rather, funds have characteristically "voted with their feet," following the "Wall Street Rule" whereby investors who are dissatisfied with corporate management simply sell their stock.ⁿ⁴ However, some funds and institutional investors have become increasingly active, more assertively exercising their proxy voting responsibilities.ⁿ⁵ These votes are more closely examined in light of SEC rules adopted in 2003, requiring increased disclosure from mutual funds and money managers with respect to their proxy voting policies and procedures.

[1] Passage of SEC Proxy Voting Disclosure Rules

The SEC rule, "Disclosure of Proxy Voting Policies and Proxy Voting Records by Registered Management Investment Companies," mandates that mutual funds and investment advisers (i) disclose the policies and procedures that they use to determine how to vote proxies relating to portfolio or client securities, (ii) disclose proxy votes that are inconsistent with their voting policies and procedures and the reasons for such votes, and (iii) file their proxy voting record with the SEC (in the case of mutual funds) or provide records of how they voted each client's proxies upon demand (in the case of money managers).ⁿ⁶ As a result of the rule, the SEC has provided investors "with the right to information that can be used to evaluate the commitment of mutual funds and investment advisers to good corporate governance and long-term shareholder value."ⁿ⁷ Investment advisers (including those to whom mutual fund boards of directors have entrusted proxy voting responsibilities) are bound by a fiduciary obligation to cast votes in accordance with the best interests of the beneficial holders,ⁿ⁸ and the rule offers clients and shareholders the means to monitor whether this fiduciary duty is being upheld. More and more investors today recognize "that poor corporate governance is an investment risk, and wish to evaluate mutual funds and advisers on how they manage this risk."ⁿ⁹

At the same time, mutual funds face criticisms for following board recommendations too closely, which in turn may encourage mutual funds to become more aggressive in seeking to separate themselves from management.ⁿ¹⁰ In a report

called "Compensation Accomplices: Mutual Funds and the Overpaid American CEO," released by the American Federation of State, County and Municipal Employees (AFSCME), the Corporate Library and the Shareowner Education Network (SEN), analyzed mutual fund voting patterns on compensation issues in 2007 and 2008. The report found that mutual funds are increasingly supportive, as a group, of management positions on proposals dealing with executive pay.ⁿ¹¹ The report found that the average level of support for company proposals on compensation issues was 82 percent in 2007 and 84 percent in 2008, a steady increase from 75.8 percent in 2006. The average level of support for the categories of compensation-related shareholder proposals was 42 percent in 2007 and 40 percent in 2008, a significant decrease from the 46.5 percent in 2006. Mutual funds did show they were more willing to withhold votes from directors over compensation issues, increasing the average level of withheld support for certain directors from 42 percent in 2007 to 52 percent in 2008.

[2] The Example of Pension Fund Activism After the "Avon Letter"

In 1988, the Department of Labor issued the "Avon Letter," an interpretive letter stating that voting rights were assets of ERISA benefit plans. This interpretive letter also held that plan fiduciaries, such as investment managers to whom power over plan assets had been delegated, were required to cast votes in accordance with the best interests of plan participants and beneficiaries.ⁿ¹² Since that time, ERISA fiduciaries have expounded and implemented proxy voting policies intended to enhance the value of plan investments and handle conflicts of interest.

ERISA fiduciaries must be discerning in their activism, however. A recent Department of Labor advisory opinion cautioned ERISA fiduciaries against the pursuit of "legislative, regulatory or public policy issues through the proxy process when there is no clear economic benefit to the plan."ⁿ¹³ The advisory opinion stated that, in the view of the Department of Labor, "the use of pension plan assets to further policy or political issues through proxy resolutions that have no connection to enhancing the value of the plan's investment in a corporation would ... violate the prudence and exclusive purpose requirements" applicable to ERISA fiduciaries under the law.ⁿ¹⁴

Just as the pension funds, under the press of the Avon Letter's interpretation of ERISA obligations, became a major force for governance reform throughout the early 1990s, we are likely to witness a surge in investment company activism in the next few years. Now, faced with public accountability for their voting practices, mutual funds and money managers will be encouraged to become more engaged in the corporate governance practices of companies whose securities are held in their portfolios, a practice that could benefit all investors.

[3] Mutual Funds and Hedge Funds Effect Significant Governance Reforms

In a speech to the New York Society of Security Analysts in 2002, John Bogle, founder of The Vanguard Group, stated that he anticipated that mutual funds would become more actively involved in corporate governance in the future.ⁿ¹⁵ In fact, mutual funds have already started to move, albeit slowly, toward activist roles in the capital markets.ⁿ¹⁶ For example, participants in a 2005 corporate governance survey indicated that half have a moderate to high level of participation in corporate governance while the other half are "not active."ⁿ¹⁷

In 2004, the SEC adopted amendments to rules under the Investment Company Act of 1940 (ICA) that set forth mandatory governance requirements for mutual funds seeking to rely on certain ICA exemptive rules.ⁿ¹⁸ Under the rule amendments, in order to engage in certain transactions otherwise prohibited under the ICA, a mutual fund would be required, among other things, to have a board with at least 75 percent independent directors and an independent chairman of the board.ⁿ¹⁹ In *Chamber of Commerce of the United States of America v. Securities and Exchange Commission*, the Court of Appeals held that the SEC's failure to consider the costs of and alternatives to the rules violated the Administrative Procedure Act and remanded the matter to the SEC for consideration of the two deficiencies.ⁿ²⁰ After a bit more than a week of reconsideration, and without inviting further public comment, the SEC decided not to modify the governance rules.ⁿ²¹ The D.C. Circuit later held that SEC was required to afford public comment on the data used to estimate the alternatives to and costs of the rules and ultimately vacated the new rules.ⁿ²²

The SEC published two studies by its economic staff, opened a new public comment period on the vacated rules, and requested other suggestions for fund governance; no action had been taken by April 30, 2009.ⁿ²³

The substantial equity holdings and corresponding voting power of mutual funds "place them in a position to have enormous influence on corporate accountability. As major shareholders, mutual funds may play a vital role in monitoring the stewardship of the companies in which they invest."ⁿ²⁴ The increased consistency and integrity of investment companies' exercise of shareholder ownership rights is likely to become a more productive and effective force and could even lead to the adoption of measures beyond proxy voting that can improve corporate governance.ⁿ²⁵ This may include more aggressive actions such as filing shareholder lawsuits or participating in the nomination of directors.ⁿ²⁶

Even more than mutual funds, hedge funds are increasing their involvement in corporate governance, although their activities have been tempered by the financial crisis. In 2007, there were more than 9,000 hedge funds with approximately \$1.3 trillion in assets compared to 3,900 hedge funds with approximately \$490 billion in assets in 2000.ⁿ²⁷ Along with this growth, hedge funds have come to realize "that you can do something to change the shareholder value [of a company] by picking on the governance side of a company."ⁿ²⁸ For example, following Blockbuster's failed takeover attempt of Hollywood Entertainment, billionaire Carl Icahn and two dissidents were elected to the Blockbuster board in 2005 with the support of hedge funds.ⁿ²⁹ At the same meeting, CEO and Chairman John Antioco lost his seat on the Blockbuster board, although the board subsequently reappointed him.ⁿ³⁰ Carl Icahn also withdrew a threatened proxy fight at Mylan Laboratories Inc. after criticizing a proposed merger between Mylan Labs and King Pharmaceuticals.ⁿ³¹ Icahn previously sued a large Mylan Labs shareholder after alleging that the investor manipulated his shares to assist Mylan Labs' acquisition. Specifically, the shareholder hedged his shares so as to retain voting control but not any economic interest.ⁿ³² OfficeMax avoided a proxy fight with a hedge fund in 2005 when the company agreed to appoint an independent director to the board and give "good faith" consideration to any candidate nominated by the hedge fund.ⁿ³³ In the summer of 2007, Richard Breeden, the former chairman of the SEC and current Chairman and CEO of Breeden Partners L.P., a hedge fund, launched a proxy contest for three seats on the board of H&R Block after disagreement with H&R Block's CEO Mark Ernst over the direction of the company, particularly its foray into the subprime mortgage lending market.ⁿ³⁴ Breeden won the proxy contest at the company's annual meeting in September of 2007 and secured at place for himself and two others on the board.ⁿ³⁵ In 2008, hedge fund investors The Children's Investment Fund and 3G Capital Partners sought five board seats at CSX Corp. CSX sought a court order to block the funds from voting part of their shares for failing to report their beneficial ownership of CSX stock. Although the court concluded that the funds had failed to properly disclose their beneficial ownership interests, it did not block them from voting their shares.ⁿ³⁶ Four dissidents were elected, and CSX ultimately seated two of them.ⁿ³⁷ In June of 2009, Carl Icahn and hedge fund Eastbourne Capital Management waged a successful proxy fight at Amylin Pharmaceuticals, ousting both the chairman of the board and the lead director.ⁿ³⁸

Hedge funds will exercise increasing influence in the corporate governance arena in the future, taking advantage of depressed stock prices and market volatility. But it is likely that hedge funds themselves will be subject to more disclosure requirements and oversight from post-financial crisis reforms.

Coffee, Jr., *The SEC and the Institutional Investor: A Half-Time Report*, 15 *Cardozo L. Rev.* 837 (1994) (noting that institutional investors historically have been passive investors).

(n4)Footnote 4. See SEC Division of Corporate Finance, Staff Report on Corporate Accountability 392 (Sept. 4, 1980) (describing the "Wall Street Rule").

(n5)Footnote 5. See, e.g., Aaron Lucchetti, *A Mutual-Fund Giant is Stalking Excessive Pay*, Wall St. J., June 12, 2002, at C1 (noting that Fidelity has voted against management compensation recommendations that it feels are excessive); Kathleen Day, *Prodding for Disclosure of Funds' Proxy Votes*, Wash. Post, Apr. 8, 2001, at H1 (discussing Domini Equity Social Fund's vote against a management proposal concerning equity compensation for directors); Josh Friedman, *Vanguard to Turn More Activist in Proxy Voting*, L.A. Times, Aug. 22, 2002, at Bus. 1 (discussing Vanguard's announcement that it will adhere to stricter standards for corporate governance in its proxy voting).

(n6)Footnote 6. See SEC Release No. 34-47304, *Disclosure of Proxy Voting Policies and Proxy Voting Records by Registered Management Investment Companies* (Jan. 23, 2003). The adoption of these rules was lauded by shareholder activists as an important decision by the SEC to protect the rights of all investors. "It is important to remember that corporate scandals like Enron, Tyco, and WorldCom were not caused by executive greed alone. Mutual funds were among those who approved Enron's board of directors, supported CEO compensation packages, and voted against numerous corporate governance measures that may well have prevented some of the abuses we've recently witnessed." Statement of Timothy Smith, *On the SEC Mutual Fund/Investment Advisor [sic] Proxy Vote Rule* (Jan. 23, 2002). Additionally, the disclosure of proxy voting will help ensure that mutual funds and money managers do not give in to conflicts of interest that may tempt them to subordinate client and shareholder interests to their own. See Nell Minow and Beth Young, Comment Letter to the SEC re: the Commission's Proposed Rules Requiring Disclosure by Investment Advisers and Mutual Funds of Proxy Voting Policies (Dec. 3, 2002). The SEC's approval of the rules requiring proxy disclosure "tears away the cloak of secrecy that up to now has shielded mutual fund proxy voting from much-needed public scrutiny." Statement of Timothy Smith at www.socialinvest.org/Areas/News/030128.htm.

CHAPTER 2 THE FUTURE OF THE CORPORATE GOVERNANCE MOVEMENT

1-2 Corporate Governance: Law and Practice § 2.06

AUTHOR: Nell Minow John F. Olson

§ 2.06 New Alternatives Will Increase Punishments for Executive Wrongdoing

[1] Pressure on Settlements Without Admissions or Denials of Guilt

In June 2003 six former senior executives at Xerox Corporation, including two former CEOs and the former CFO, settled an SEC enforcement action charging them with fraud. The SEC alleged that, in an effort to boost the company's share price, these top executives had engaged in a fraudulent scheme that overstated the company's revenues by approximately \$3 billion and inflated pre-tax earnings by approximately \$1.4 billion between 1997 and 2000. As a result of the settlement, the six defendants agreed to pay over \$22 million in penalties, disgorgement and interest, though they were not required to admit or deny the SEC's allegations.ⁿ¹

It is common practice for the SEC to allow companies, directors and officers to settle cases without admitting or denying the charges against them, as was the case with the Xerox settlement.ⁿ² As a result, the company may not be statutorily barred from using company resources to pay the cost of directors' and officers' legal defense or to cover fines or other penalties assessed against them. Additionally, some D&O liability policies may provide coverage for the directors and officers.ⁿ³ In many past instances, directors and officers who have settled SEC charges without admitting or denying the Commission's charges have been fully indemnified by the company and have continued to conduct business as usual in the same corporate posts.ⁿ⁴ Though the former Xerox executives were required to pay a small portion of the penalties out of their personal funds, the company indemnified them for the majority of the costs of the settlement.ⁿ⁵

Critics of settlements without admissions of guilt argue that when the accused directors and officers settle with the SEC without admitting wrongdoing, the subsequent availability of corporate indemnification is an unfortunate result in that the shareholders, as the owners of the company, suffer not only corporate losses resulting from the management misconduct, but also are called upon to subsidize the penalties incurred by the offenders.ⁿ⁶ This is a difficult issue. The practice of indemnification initially developed to shield directors and officers from liability that might discourage them from taking necessary business risks and to safeguard them from third-party lawsuits, which may be baseless. Further, the SEC's ability to obtain beneficial settlements and garner its own enforcement resources may be negatively affected if it no longer offers settlement without admissions of guilt.ⁿ⁷

The SEC has acknowledged the potential inequity resulting from reimbursement and indemnification and in some cases has required that settling individuals pay their own civil fines. In the Xerox settlement, for example, the settlement language stated that defendants "shall not seek or accept, directly or indirectly, reimbursement or indemnification, including but not limited to payment made by any issuer or pursuant to any insurance policy with regard to the civil penalty amounts."⁸ The agreement also prohibited the defendants from claiming, asserting or applying for a tax deduction or credit with respect to the penalty amounts.⁹ Former Commissioner Harvey Goldschmid stated that "[i]t's critical [that] when [the Commission] takes money for a civil penalty, which involves a serious wrong, the money not circle back into the hands of those who have been involved in the wrongdoing" through indemnification.¹⁰ Additionally, in a speech before the New York Financial Writers in June 2003, then SEC Chairman Bill Donaldson also acknowledged the problem: "I'm concerned about companies that, under permissive state laws, indemnify their officers and directors against disgorgement and penalties ordered in law enforcement actions, including those brought by the Commission. In my mind, this just isn't good public policy. This is an area in which we may need to consider ways to bring about reform."¹¹ In her first speech as Chairman of the SEC, Chairman Mary Schapiro announced an end to a two-year "pilot" program established by former SEC Chairman Christopher Cox, which had required the staff of the SEC's Division of Enforcement to obtain advance approval of proposed penalties from the Commission in cases seeking civil monetary penalties against public companies as a sanction for securities fraud.¹² Even though the pilot program affected only a handful of cases, the program had been subject to criticism for adding delay to the settlement process and potentially reducing the penalties assessed against companies. Speaking more broadly, Chairman Schapiro stated that she anticipates further improvements "to ensure swift and vigorous enforcement," clearly signaling an intent to make good on her promise at her confirmation hearings to reinvigorate SEC enforcement.

As awareness of the availability of corporate reimbursement for executive wrongdoing increases among shareholders, it may become a more central issue in reform movements. Activists may encourage the Commission, Congress, state legislatures and the courts to mandate changes requiring an increased degree of personal liability for directors and officers whose actions reflect corruption, self-dealing or even a conscious disregard of duty. As we have noted, however, the importance to the SEC of resolving enforcement actions through settlements must be underscored; it is doubtful that the Commission has either the resources or the staff to try all of the more than 500 enforcement cases that it files every year. Defense attorneys will be more reluctant to settle cases if such a settlement would require both an admission of guilt and an increase in personal monetary liability for the targets.

[2] Expansion of Alternative Punishments for Executive Wrongdoing

In its arsenal, the Commission already has highly potent enforcement tools that can be directed at corporate managers and directors. In addition to the power to seek monetary civil remedies (which now may not be indemnifiable), the Commission has authority to seek permanent injunctions, cease-and-desist orders, officer and director bars and suspensions from practice before the Commission.¹³ The Commission also may refer appropriate matters to criminal authorities for prosecution.¹⁴

Additionally, several provisions of the Sarbanes-Oxley Act augment the Commission's authority and ability to effectively enforce the federal securities laws. For example, Section 304, enforceable by the SEC but not by private litigants, requires the CEO and CFO to reimburse the company for any bonus, incentive- or equity-based compensation or any profit from the sale of company securities obtained during the 12 months prior to the period covered by any earnings restatement resulting from a company's noncompliance with reporting requirements as a result of "misconduct."¹⁵ Section 305 expands the scope of the officer and director bar, allowing the Commission to remove directors and officers in administrative, not just judicial, proceedings and to bar them from serving in similar capacities at other companies upon showing their "unfitness."¹⁶

The unusual \$80 million settlement of a securities fraud lawsuit against Hanover Compressor in May 2003 demonstrates another option to more effectively provide redress to injured shareholders. The groundbreaking settlement allowed Hanover's shareholders holding more than one percent of company stock to nominate two independent directors to the

company's slate of candidates in the upcoming proxy season.¹⁷ A first such settlement among publicly traded companies, the settlement provides shareholders with "sweeping new powers to police potential accounting fraud."¹⁸

In another settlement, Siebel Systems, Inc., a provider of customer-service software, resolved a derivative suit brought by a Louisiana pension fund by agreeing to change its executive compensation practices, modify its board, and improve its disclosure of director and executive pay, among other things.¹⁹ Lawsuits like the ones at Siebel Systems and Hanover Compressor "are not just to recoup money anymore;" rather, they increasingly involve compelling companies to change their practices.²⁰

The Department of Justice demonstrated its willingness to consider alternative approaches to handling executive wrongdoing when in 2005 it agreed to defer prosecution of Bristol-Myers for conspiring to commit securities fraud.²¹ Pursuant to the agreement, Bristol-Myers would be required, among other things, engage an independent monitor to oversee the company's remediation efforts and report to the Department of Justice on a regular basis.²² The Department of Justice agreed that if at the end of 24 months, Bristol-Myers has complied with its obligations under the agreement, it would dismiss the criminal complaint against the company.²³ In August 2005, the Department of Justice entered into a similar agreement with KPMG in which the government agreed to defer an indictment of KPMG related to the sale of improper tax shelters.²⁴ Under the deferred-prosecution agreement, the company was required to submit to outside monitoring, pay a \$456 million fine, and dispose of certain of its tax--advisory businesses.²⁵ In January 2007, at the request of the U.S. Attorney for the Southern District of New York, a federal judge dismissed the deferred criminal charge.²⁶ However, a monitor will remain in place at the company until September 2008 to ensure that KPMG continues to comply with the terms of the agreement.²⁷

The SEC has also demonstrated flexibility in its pursuit of remediation for corporate wrongdoing. In October of 2006, the SEC commenced administrative proceedings against Statoil for violations of the Foreign Corrupt Practices Act (FCPA) stemming from payments to an Iranian official in exchange for oil contracts in 2002 and 2003.²⁸ It was determined by the SEC that "during the relevant time period, Statoil employees circumvented Statoil's internal controls and procedures that were in place to prevent illegal payments, and Statoil lacked sufficient internal controls."²⁹ On October 13, 2006, the SEC and DOJ agreed to suspend further proceedings against Statoil on the condition that the company retain an independent compliance consultant, take certain remedial measures to strengthen its internal controls and disgorge over \$10 million to the U.S. Treasury.³⁰

Similarly, the SEC filed FCPA charges in August of 2007 against Textron, Inc. for, among other things, alleged kickbacks to Iraqi officials while participating in the U.N. Oil for Food Program. The SEC found that Textron either "knew or was reckless in not knowing that illicit payments were paid [and] failed to maintain an adequate system of internal controls to detect and prevent the payments."³¹ The SEC and the DOJ accepted Textron's offer of settlement and agreed to pursue no further action against Textron on the condition that the company take certain remedial measures to bolster its FCPA compliance program and to pay over \$3.5 million.³²

The examples set by Hanover, Siebel Systems, Bristol-Myers, Statoil and Textron have the potential to pave the way for the development of other remedies providing increased accountability to shareholders where the SEC believes governance has failed.³³

[3] The Commission's Vigorous Use of Non-Monetary Remedies

Although the Commission did not frequently invoke the officer and director bar in the past, it has increasingly exercised the remedy as part of heightened overall efforts to combat corporate fraud.³⁴ During the Commission's 2003 fiscal year, the Commission sought 170 officer and director bars, up from 38 in fiscal year 2000.³⁵ More recently, the Commission invoked the officer and director bar against the former general counsel of Computer Associates International, Inc.³⁶ Additionally, the SEC has increasingly invoked the remedy of disgorgement. By 2002, "the number of individuals from whom disgorgement of compensation was sought ha[d] risen by 88 percent in the past three

years."³⁷ More recently, the Justice Department has increasingly brought criminal charges against high-profile corporate defendants, including Bernard Ebbers, who was sentenced to 25 years in prison following the \$11 billion accounting fraud at WorldCom, and Richard Scrushy, who was acquitted by a jury of 36 criminal charges following the \$2.7 billion accounting fraud at HealthSouth.³⁸

Responding to former SEC Chairman Donaldson's expressed goal to shift the balance of power away from "imperial CEOs" and back toward investors and the board, the Commission has stepped up enforcement efforts across the board. As Congress nearly doubled the Commission's budget to \$841.5 million for the fiscal year beginning in October 2003, according to Donaldson the SEC would continue "flexing a reinvigorated enforcement muscle at corporate America."³⁹ Though the Commission appears likely to maintain its aggressive efforts to prosecute corporate fraud overall, it is likely that the Commission will face mounting pressure to pair monetary remedies with non-monetary remedies that hold the wrongdoers individually accountable.

CHAPTER 2 THE FUTURE OF THE CORPORATE GOVERNANCE MOVEMENT

*1-2 Corporate Governance: Law and Practice § 2.07***AUTHOR:** Nell Minow John F. Olson**§ 2.07 Internationalization of Corporate Governance**

Interest in corporate governance is not limited to U.S. investors. A recent ServicesRiskMetrics Group (RMG) survey of 322 institutional investors in 18 countries found that a majority of investors in every market consider corporate governance to be important to their firms.ⁿ¹ As corporate governance becomes an international issue, U.S. investors are increasingly looking to the governance practices of foreign companies, which shape investors' views of corporate governance in the United States. One example of this movement is the burgeoning number of shareholder proposals seeking an advisory vote on executive compensation.ⁿ² The focus on shareholder influence over executive pay practices through an advisory vote mechanism has gained popularity with some advocacy groups in the U.S. as a result of such a requirement in the United Kingdom. In 2002, the United Kingdom became the first country to adopt legislation requiring companies to submit the company's annual compensation disclosure statement--the "Directors' Remuneration Report"--to shareholders for a non-binding vote at the company's annual meeting.ⁿ³ Specifically, shareholders may vote on whether to accept or reject the remuneration report as a whole.ⁿ⁴ The remuneration report generally contains executive compensation disclosures equivalent to those required of U.S. companies under SEC rules, including the company's compensation philosophy and actual compensation paid.ⁿ⁵ In 2004, the Netherlands followed suit, incorporating into its Civil Code even stronger provisions requiring public companies to submit remuneration reports to shareholders for a binding vote.ⁿ⁶ Soon after, Sweden and Australia both adopted legislation based on the U.K. model.ⁿ⁷ On April 20, 2007, the U.S. House of Representatives approved "The Shareholder Vote on Executive Compensation Act," which, if adopted, would have required that shareholders approve executive compensation plans.ⁿ⁸ A companion bill introduced in the Senate was never acted on.ⁿ⁹ More recently, Senators Charles Schumer and Maria Cantwell introduced the "Shareholder *Bill of Rights* Act of 2009" in the Senate, and Congressman Gary Peters introduced the "Shareholder Empowerment Act of 2009" in the House of Representatives. These bills, if adopted, would give shareholders an annual non-binding vote on executive compensation.ⁿ¹⁰

Another issue that has garnered the attention of U.S. companies and shareholders is shareholder access to companies' proxy statements, a right that shareholders in the United Kingdom have had since the Companies Act 1985.ⁿ¹¹ The Act grants certain large shareholders or shareholder groups the right to include a resolution for the appointment of a director at an Annual General Meeting of shareholders. Such a resolution requires a simple majority vote and is binding on the company. Similar rules apply in Australia, France, Germany, India, South Africa, and Sweden, among other countries. Some U.S. shareholder advocacy groups hoping to achieve stronger influence over board members have pressed for

SEC adoption of rules to the same effect in the United States. On November 28, 2007, however, the SEC declined to adopt a shareholder proxy access rule and reaffirmed its position that Rule 14a-8(i)(8) allows companies to exclude shareholder proposals relating to director nominations from their proxy statements.ⁿ¹² Then-SEC Chairman Cox stated that the SEC would revisit the issue as early as spring of 2008 in the hopes of finalizing a proposal on shareholder proxy access by November.

Chairman Cox' promise to revisit the issue did little to quiet some proxy access proponents, though. The American Federation of State and County Municipal Employees, for example, proceeded to submit proxy access shareholder proposals for consideration at the 2008 annual meetings of several companies, including Countrywide Financial Corporation, The Bear Stearns Companies Inc., JPMorgan Chase & Co. and E-Trade Financial Corporation, and even threatened to bring suit if the companies failed to include these proposals in their proxy materials.ⁿ¹³ Although the proxy access proposal anticipated by Chairman Cox was never finalized, the SEC revived the issue of proxy access on May 20, 2009 by approving the publication of proposed amendments to the SEC's proxy rules to permit shareholders to nominate directors in a company's proxy materials.ⁿ¹⁴

A prime example of the universality of governance issues is electronic delivery of proxy materials. As discussed above, the Commission adopted rules in 2006 that allow companies to deliver proxy materials to shareholders via the internet and adopted additional rules in 2007 which require large accelerated filers to post proxy materials on their website beginning January 1, 2008, and all other companies to do the same beginning January 1, 2009.ⁿ¹⁵ The adoption of these new rules in the United States coincided with the adoption of legislation in the United Kingdom clarifying that Britain's electronic proxy rule that had been adopted in 2000 permits companies to use electronic communications as the default method of communicating with shareholders. As an increasing number of U.S. shareholders and institutional investors seek to import international trends in corporate governance to the United States, it is important to consider how particular governance issues align with the overall system of corporate governance in the U.S.

CHAPTER 2 THE FUTURE OF THE CORPORATE GOVERNANCE MOVEMENT

1-2 Corporate Governance: Law and Practice § 2.08

AUTHOR: Nell Minow John F. Olson

§ 2.08 Are Directors Effective Corporate Monitors?

[1] Boardroom Culture Can Impede Director Independence and Action

In discussing failures of "intelligent and decent" directors to serve as effective monitors against corporate wrongdoing, Warren Buffett, Chairman of Berkshire Hathaway Inc., laid part of the blame on the impediment that he calls "boardroom atmosphere."¹ Having himself served on 20 public company boards over a span of 40 years, Buffett described "social difficulties" associated with board membership that may deter otherwise able and loyal directors from successfully stewarding a company. For instance, Buffett stated that "it's almost impossible ... in a boardroom populated by well-mannered people, to raise the question of whether the CEO should be replaced."² In Buffett's view, on many boards, questioning the compensation committee's grants to the CEO would be the equivalent of "belching at the dinner table."³

In the context of describing the failure of directors on other boards to question foolish acquisitions or egregious compensation, Buffett admitted, "My own behavior, I must ruefully add, frequently fell short as well: Too often I was silent when management made proposals that I judged to be counter to the interests of shareholders. In those cases, collegiality trumped independence."⁴ If Warren Buffett, a financially independent, business-savvy, motivated and shareholder-oriented director, admittedly has backed down in boardrooms due to social pressure, it is safe to posit that many other directors have done the same thing on far too many occasions.

When otherwise competent, intelligent and independent directors succumb to conformist pressures and fail to challenge imprudent management decisions, boardroom culture needs to change. Directors can only effectively promote corporate success and investor interests by asking hard questions, demanding proper analysis and assertively challenging management when necessary. In the words of Chief Justice Veasey, "[d]irectors who are supposed to be independent should have the guts to be a pain in the neck and act independently."⁵ Directors "should behave as if there was a single absentee owner, whose long-term interest they should try to further in all proper ways. This means that directors must get rid of a manager who is mediocre or worse, no matter how likable he [or she] may be."⁶

Fortunately, it appears that boards are getting tougher, and boardroom culture is evolving. Directors are becoming more comfortable challenging received wisdom and are increasingly likely to reject management proposals that they feel are

unwise. As described by Terry Gallagher, CEO of Corporate Governance Associates, "[a]t many companies, I hear that the boardroom culture clearly has shifted as directors appear much more willing to ask hard questions and probe underneath the surface at companies. This cultural evolution should continue for a few years as the full impact of Sarbanes-Oxley creeps into the corporate governance backbone of these companies."⁷ Moreover, at least one observer considers the rise of "executive sessions" to be "absolutely the most important thing that's happened" in creating independent boards of directors.⁸ Executive sessions have increased dramatically over the last few years, in large part due to the NYSE's listing standards requiring that a board's non-management directors meet at regularly scheduled executive sessions without the presence of management.⁹ "The idea is to allow board members to raise sensitive issues--from executive pay and management style to lackluster performance--that they would find difficult to confront with the chief executive in the room."¹⁰ Executive sessions typically are led by the chairman of the board, if that person is not also the CEO, and in other cases a company may appoint a lead director or presiding director to serve this function.¹¹ In order to be effective, executive sessions should include, among other things, agendas developed based on input from other directors, and examination of difficult issues. Most important is engaging in subsequent conversations with the CEO and other senior management about concerns raised and evaluation of management's response. Hopefully directors will continue to develop a new culture based on constructive skepticism and active, independent oversight.

The financial crisis led to criticism of boards of directors for corporate governance failures, such as executive compensation practices that encourage excessive risk-taking and lax board oversight of risk management. In light of this increased scrutiny, boards will need to examine their executive compensation and risk management practices to see that they are rewarding behavior that will most likely result in the achievement of strategic goals and to ensure adequate assessment of current risks and anticipation of future risks.

[2] It is Difficult to Predict Board Performance on Paper

At the Center for Business Ethics at Houston's University of St. Thomas, a powerful and well-known CEO remarked on corporate governance at his company:

[A] strong, independent, and knowledgeable board can make a significant difference in the performance of any company ... [O]ur corporate governance guidelines emphasize 'the qualities of strength of character, an inquiring and independent mind, practical wisdom and mature judgment.' It is no accident that we put 'strength of character' first. Like any successful company, we must have directors who start with what is right, who do not have hidden agendas, and who strive to make judgments about what is best for the company, and not about what is best for themselves or some other constituency.

The responsibility of our board--a responsibility which I expect them to fulfill--is to ensure legal and ethical conduct by the company and by everyone in the company ... What a CEO really expects from a board is good advice and counsel, both of which will make the company stronger and more successful; support for those investments and decisions that serve the interests of the company and its stakeholders; and warnings in those cases in which investments and decisions are not beneficial to the company and its stakeholders.¹²

Ironically enough, those were the comments of then-Enron CEO Kenneth Lay in April 1999. On paper, the company's corporate governance practices met many standards of the time: the audit and compliance committee and the finance committees met frequently, and the board included a Stanford University professor of accounting, a retired United Kingdom secretary of state for energy, and the chairman of Alliance Capital, one of the largest institutional money management firms in the United States. Despite these credentials and Lay's stated commitment to exemplary corporate governance principles, the Enron board failed to meet its responsibilities as an effective monitor of management.

In contrast, other boards with less apparent independence have been able to act more effectively. Although Freddie

Mac's 18-member board contained several directors whose "resume independence" was questionable because they were previously employed at firms that enjoyed substantial business relationships with the company or were political appointees, as part of a board investigation into accounting irregularities the Freddie Mac board quite rapidly ousted the company's president, CEO and CFO, an unanticipated action lauded by corporate governance advocates. In the words of Charles Elson, director of the Weinberg Center for Corporate Governance at the University of Delaware, "[g]iven the [business] relationships and the political connections, the board would seem to be an unlikely candidate for quick action."¹³

The composition of the "ideal" board for optimal monitoring is not clear. The appointment of independent directors with adequate financial expertise and the endorsement of other governance best practices can be steps in the right direction, but by no means assure a board that will provide effective oversight. "C]hanges in [board] structure and process alone ... will never fully accomplish ... [needed] enhancements in corporate responsibility."¹⁴ Though helpful as starting points, these prescriptions for improved governance cannot supply directors with the motivation to *act* objectively and independently, an element that is critical to the development of an effective system of corporate governance. As corporate governance is more closely scrutinized and better understood, structural solutions like populating board committees with directors who satisfy a standard of "independence" will be less important than evidence that the board members have the expertise, the energy and the opportunity to represent the interests of the shareholders.¹⁵

[3] Efforts to Increase the Effectiveness of Boards as Corporate Monitors May Produce Only Marginal Improvements

Significant requirements for directors were put in place with the enactment of Sarbanes-Oxley, the adoption of corporate governance listing standards by the NYSE and NASDAQ, and the heightened judicial scrutiny of the duty of good faith. Among other things, today directors are asked to work harder, be more conscientious and avoid a wider variety of potential conflicts of interest. Directors meet more frequently and face increased potential liability for errors. At the end of the day, the underlying goal is that the imposition of these requirements will result in substantial improvements in corporate stewardship. However, this enhancement is merely a hope, not a certainty. And some critics believe there is a limit to the ability of directors to be "independent" as long as they are selected by management; however, this criticism is tempered somewhat at NYSE- and NASDAQ-listed companies, where directors are required to be recommended or appointed by nominating committees composed of independent directors.

Despite regulatory efforts to increase board quality, responsibility and effectiveness, directors may become only marginally better at monitoring fraud and protecting shareholder interests. For one thing, directors may not be the best agents for monitoring corporate fraud, as this kind of wrongdoing can be difficult for an outside director to detect, and it is neither feasible nor desirable for directors to become involved in the minutiae of comprehensively managing the company, as they do not have sufficient time or resources to do so effectively. As directors cannot be expected to have knowledge of all aspects of the company's activity, they will necessarily rely to a considerable extent on information provided to them by senior corporate officers. Accordingly, "[d]irectors cannot guarantee corporate compliance; they can only be expected to undertake and execute good faith efforts to ensure that it occurs."¹⁶ In fact, perpetrators of corporate fraud often are discovered not through director scrutiny, but rather through anonymous tips from internal whistleblowers.¹⁷ Rather than being ace fraud detectives, in general the outside directors on corporate boards are better suited to ask hard questions, assure that the company is following a strategic plan that makes sense, maintain discipline and insist on proper analysis. It is worth considering whether corporate governance regulation has placed too much hope in the ability of outside directors, whose involvement with the company is unlikely to extend more than a relatively small number of days each year, to provide more than broad oversight of management.

[4] Effective Monitoring Will Also Require Active and Informed Shareholders

Though the Sarbanes-Oxley Act and other regulatory efforts to enhance corporate governance are geared toward policing the "supply" side--promulgating rules and standards of conduct for lawyers, accountants, the board of directors

and management--shareholders on the "demand" side of the equation play an equally important, though less regulated, role. In the opinion of many commentators, shareholders, particularly large institutional investors, deserve some of the blame for the recent proliferation of corporate excess and scandal as they have re-elected directors of poorly performing companies, failed to challenge outrageous executive pay plans and been otherwise lax in their monitoring of the companies in which they invest.ⁿ¹⁸

The role of directors is to perform an agency function for shareholders, overseeing and protecting shareholder investments in the company. Efforts to more closely align shareholder and director interests, by, for example, requiring directors to hold a minimum amount of equity in the company, are meant to encourage and facilitate the agency role. However, as the principals, shareholders must recognize that no agent will be a perfect monitor. Shareholders must share the responsibility to effectively oversee management, taking the initiative to become informed and aware of corporate matters in order to protect their own investments. In voting their shares, shareholders cannot simply rely on their agents to act as a kind of "proxy monitor." Rather, shareholders must read the company's disclosures in the proxy statement themselves. In the words of Susan Wyderko, the SEC's former Director of Investor Education, "[i]nvesting isn't a spectator sport. If an investor isn't prepared to read a company's filings, and is still willing to purchase the stock, they've taken on additional risk."ⁿ¹⁹

Even as directors may become at least marginally more effective at corporate oversight under the encouragement of the many regulatory efforts to improve corporate governance, the investing public may be somewhat less likely to rely solely on improved board vigilance. Among other things, it is likely that shareholders, particularly institutional investors with holdings substantial enough to force corporate change and mutual fund managers who must report on their voting policies and actions, will become more actively and directly involved in corporate governance.

To the extent that shareholders take a more active role in corporate governance, for example, through the ability to nominate directors in company proxy statements and the ability to approve or disapprove executive compensation through say on pay, they are likely to come under additional scrutiny. For example, a recent law review article argues that corporate law should adapt to the current trend toward greater shareholder participation by applying the rules of fiduciary duty traditionally applicable to officers and directors to certain shareholders as well.ⁿ²⁰ Similarly, the International Corporate Governance Network has published a Statement of Principles on Institutional Shareholder Responsibilities, which states that "The ownership of equity carries important responsibilities, particularly due to the voting rights that can influence the way in which a business is conducted."ⁿ²¹

CHAPTER 2 THE FUTURE OF THE CORPORATE GOVERNANCE MOVEMENT

1-2 Corporate Governance: Law and Practice § 2.09

AUTHOR: Nell Minow John F. Olson

§ 2.09 The Financial Crisis and Corporate Governance Reforms

Companies began facing new challenges because of dramatic economic events that occurred in 2008 leading to a collapse in the credit markets. This turmoil that has catalyzed rapid reshaping of our capital and credit markets is also leading to a reshaping of the corporate governance landscape as the Obama Administration and Congress move forward to address the liquidity crisis and related problems.

Historically, corporate governance in the U.S. primarily has been the province of state law, with a limited role for federal government, which focuses mostly on disclosure and process rather than substance. When the Sarbanes-Oxley Act was enacted in 2002, issues that previously had been considered to fall under the umbrella of state corporate law began being regulated by the federal government. The recent financial crisis may be changing the dynamic even further. As demonstrated by the SEC's proxy access proposals and by the bills recently introduced by Senators Schumer, Cantwell and Durbin and Congressman Peters, discussed above, the SEC and Congress are now considering setting federal corporate governance standards rather than relying on stock exchange listing standards, state law and court decisions. Such actions, if adopted, will represent a significant alteration of state and federal responsibilities.

CHAPTER 3 STOCKHOLDERS' RIGHTS

1-3 Corporate Governance: Law and Practice § 3.01

AUTHOR: J. Travis Laster

§ 3.01 Importance and Nature of the Topic

[1] Stockholder Rights as Central to the Issue of Corporate Governance

The subject of stockholders' rights stands as one of the central issues of corporate governance. The field of corporate governance is generally concerned with the rules and principles that regulate the relationships between managers, who wield day-to-day authority over the corporation, and stockholders, who are the actual owners of the corporation but who are not directly involved in management. It is precisely the separation of management and ownership, together with the use of the board of directors to mediate between the two groups that drives the need for corporate governance.ⁿ¹

Because day-to-day managers are in a natural position of power vis-a-vis absentee owners, the owners need protections. Under the contemporary corporate system, these protections fall under two general headings: (1) duties owed by the managers to the owners, and (2) affirmative rights of the stockholders. The protections in the latter category, which are the subject of this chapter, fall into three categories: (1) voting rights, (2) informational rights, and (3) economic rights, including the right to dividends (when declared) and the right to an appraisal (in connection with certain transactions).

[2] Sources of Authority for Stockholder Rights

Historically in the United States, the definition and enforcement of stockholders' rights have been primarily matters of state law, and state law remains the primary source of authority in this area. More recently, however, beginning with the advent of the federal proxy rules in 1935,ⁿ² both procedural and, to an increasing extent, substantive aspects of the law governing stockholder rights have become subject to federal regulation. The scope of federal regulation initially focused on proxy solicitations and remains primarily concerned with disclosure of material information. A final source of authority is the stock exchange listing rules, which establish requirements for corporations, including the granting of stockholder rights, as a condition of having shares listed on the exchange.

CHAPTER 3 STOCKHOLDERS' RIGHTS

1-3 Corporate Governance: Law and Practice § 3.02

AUTHOR: J. Travis Laster

§ 3.02 Stockholder Voting Rights

[1] State Law

In general, the stockholders of a corporation have the power to vote to elect the directors of a corporation, to amend the bylaws, and to vote on any matter brought before the stockholders at a meeting of stockholders.ⁿ¹ Additional voting rights may be provided in the corporation's charter, by-laws, or both.

Under applicable state law, stockholders may also have additional statutory voting rights with respect to certain extraordinary matters.ⁿ² For example, under the General Corporation Law of the State of Delaware (the "Delaware General Corporation Law"), the stockholders of a corporation have the right to vote on certain extraordinary matters including amendments to the corporation's charter, certain mergers and consolidations, any sale, lease, or exchange of all or substantially all of the assets of a corporation, and the dissolution of a corporation.ⁿ³

[a] The Election of Directors

Under Delaware law, the business and affairs of a corporation is governed by a board of directors.ⁿ⁴ Stockholders have the right to elect the directors who serve on the board of directors.ⁿ⁵ The right of stockholders to elect directors is not merely a formality, but rather "the ideological underpinning upon which the legitimacy of directorial power rests."ⁿ⁶ Generally speaking, "shareholders have only two protections against perceived inadequate business performance[: they] may sell their stock ... or they may vote to replace incumbent board members."ⁿ⁷ Not surprisingly, there are numerous statutes, rules, regulations, and judicial decisions addressing stockholder votes and the mechanics of stockholder voting.

A corporation must hold an annual meeting at which directors may be elected at least every thirteen months.ⁿ⁸ Alternatively, stockholders may act by written consent to elect directors in lieu of holding an annual meeting if the action by written consent is unanimous or if all of the directorships to which directors could be elected at an annual meeting held at the effective time of the action by consent are vacant and filled by the action.ⁿ⁹ If a corporation has not held an annual meeting and the stockholders have not acted by written consent in lieu of an annual meeting within the prior thirteen months, or if it is not possible for the corporation to convene a meeting properly within the thirteen month period, then a stockholder may file suit to compel the holding of an annual meeting.^{n9.1} At a court ordered meeting, unless the court orders otherwise, any quorum requirement in the corporation's certificate of incorporation or bylaws

will not apply, and how ever many stockholders attend, in person or by proxy, will constitute a quorum.

Delaware law does not require that the certificate of incorporation or bylaws of a corporation specify the standard that shall be used for the election of directors. In the absence of any such provision in the certificate of incorporation or bylaws specifying the standard, Section 216 of the Delaware General Corporation Law provides that plurality voting shall apply.ⁿ¹⁰ At present, a majority of public companies incorporated in Delaware employ the plurality voting standard, although there is a growing trend towards employing a majority standard.

In 2006, Section 216 of the Delaware General Corporation Law was amended to provide that a "bylaw amendment adopted by stockholders which specifies the votes that shall be necessary for the election of directors shall not be further amended or repealed by the board of directors."ⁿ¹¹ This amendment was adopted largely in response to a growing number of companies that have adopted stockholder proposals replacing the default plurality standard with a requirement that directors be elected by a majority vote. Under Section 216, directors cannot change a stockholder bylaw amendment that establishes the requisite vote for director elections. The Delaware General Corporation Law does not similarly limit director authority regarding any other types of bylaws, implying that directors may amend any stockholder-adopted bylaws addressing other issues.

The board of directors can be staggered into one, two or three different classes. A staggered board must be authorized in the company's certificate of incorporation, its initial bylaws, or a stockholder-adopted bylaw.ⁿ¹² Only one class of directors will stand for reelection at each annual meeting for the election of directors. A staggered board provision typically will provide that the total number of director seats shall be allocated as evenly as possible among the different classes. Directors on a staggered board only can be removed for cause, unless the certificate of incorporation provides that they can be removed without cause. Directors on a board that is not staggered can be removed with or without cause. A certificate of incorporation also can grant specific rights to a certain class or series of stock to elect directors.ⁿ¹³ The terms and voting powers of these directors may be greater or lesser than any other class of directors.

[b] Bylaw Amendments

Section 109(a) of the Delaware General Corporation Law provides that "[a]fter a corporation has received any payment for any of its stock, the power to adopt, amend or repeal bylaws shall be in the stockholders entitled to vote."ⁿ¹⁴ Delaware law permits the certificate of incorporation of a Delaware corporation to confer the power to adopt, amend or repeal bylaws on the board of directors. Thus, the power to amend bylaws lies exclusively with the stockholders unless the certificate of incorporation grants concurrent authority to the board of directors.ⁿ¹⁵ At present, an overwhelming majority of public companies incorporated in Delaware have conferred this power on the board of directors, and thus the stockholders and the board of directors each have the power to adopt, amend, or repeal bylaws.

[c] Charter Amendments

Under Delaware law, stockholders generally have the right to vote on any amendment to the corporation's certificate of incorporation. After a corporation has received payment for its stock, an amendment of its certificate of incorporation is permitted only in accordance with Section 242 of the Delaware General Corporation Law.ⁿ¹⁶ Under Section 242, a potential amendment first must be approved by the board of directors in a resolution setting forth the proposed amendment, declaring its advisability, and submitting it to the stockholders entitled to vote on approval of the amendment.ⁿ¹⁷ The proposed amendment then must be submitted to a vote of stockholders at the next annual meeting or at a special meeting called for the purpose of considering the amendment.ⁿ¹⁸ Alternatively, stockholders may adopt the amendment through the exercise of written consent.ⁿ¹⁹ Prior to stockholder approval, the corporation must provide the stockholders with written notice of the board's proposed amendment.ⁿ²⁰ The notice must set forth the full text of the amendment, or summarize the changes it will make.ⁿ²¹ The notice should also state that the board has declared adoption of the amendment to be advisable.ⁿ²²

The right of stockholders to vote on a charter amendment is conditioned on prior board action. Stated differently, stockholders may not validly adopt by written consent or vote to approve an amendment that was not first duly adopted by the board of directors.ⁿ²³

Absent a provision in the certificate of incorporation requiring supermajority approval, stockholder votes (or written consents) representing a simple majority of all outstanding stock (*i.e.* 50 percent + 1 share) will then suffice to approve the amendment.ⁿ²⁴ Additionally, approval by a simple majority of particular classes of stock (or particular series within a class) is necessary when the proposed amendment will alter the number of shares in that class or series,ⁿ²⁵ alter their par value, or will adversely affect "the powers, preferences, or special rights" of the shares of such class or series.ⁿ²⁶ A class vote is not required, however, when the holders of a class or series are only indirectly harmed by a proposed amendment, without any actual change of the terms or powers of the class.ⁿ²⁷ And, under the doctrine of independent legal significance, amendments that are incidental to a merger that has been duly approved by a majority of all outstanding shares need not be put to a separate class vote.ⁿ²⁸

[d] Consolidations or Mergers

Under Delaware law, stockholders generally have the right to vote on consolidations or mergers. As with the process for amending the certificate of incorporation, the right of stockholders to vote is dependent on prior board action: a formal stockholder decision regarding a merger or consolidation can take place only after the board of directors has already deliberated, approved and declared the advisability of the proposed transaction.ⁿ²⁹ Once the board has approved and declared its advisability, the merger agreement is then submitted to the stockholders for their rejection or approval.ⁿ³⁰ As with proposed charter amendments, the stockholders may vote on the board's recommended merger agreement at an annual or special meeting called for that purpose, or through the exercise of written consent.ⁿ³¹ Absent a supermajority provision in the certificate of incorporation, the merger will then be approved by a simple majority of all outstanding shares entitled to vote.ⁿ³² Unlike charter amendments,ⁿ³³ mergers are never subject to the approval of a majority of a particular class or series of shares, unless the certificate of incorporation specifically provides otherwise.ⁿ³⁴

Where a stockholder vote on the merger is to take place at an annual or special meeting, the stockholders are entitled to at least 20 days notice of the meeting. The notice must contain either the complete text or a summary of the merger agreement.ⁿ³⁵ In addition, the federal securities laws require that a proxy statement disseminated to stockholders advance of the meeting specify the reasons for engaging in the merger, the percentage vote required for approval, and the stockholders' appraisal rights, if any, under applicable law.ⁿ³⁶ Similar requirements will apply where stockholders act by written consent.ⁿ³⁷

No stockholder vote is required, and the board of directors may act unilaterally to effect a merger or consolidation, where certain conditions are met that suggest the transaction presents minimal dangers to stockholder interests.ⁿ³⁸ Specifically, a vote of the stockholders of a corporation surviving the merger is not required if all three of the following conditions are met: (i) the agreement of merger does not amend the certificate of incorporation of the surviving corporation in any respect; (ii) each share of stock of the surviving corporation outstanding immediately prior to the effective date of the merger continues to be an identical outstanding or treasury share of the corporation; and (iii) the amount of authorized and unissued shares and treasury shares of common stock and securities convertible into common stock to be delivered in the merger do not exceed 20 percent of the amount of shares of common stock of the surviving corporation outstanding immediately before to the merger.ⁿ³⁹ In addition, no stockholder vote is required if the corporation has no outstanding stock when the directors approve the merger agreement, but later issues stock.ⁿ⁴⁰

Finally, under Section 253 of the Delaware General Corporation Law, stockholders of a parent corporation generally will not be entitled to vote on a "short form merger" between the parent and a subsidiary corporation in which the parent owns at least 90% of the outstanding shares of each class of the stock of the subsidiary. Stockholders of the parent corporation may be entitled to vote, however, if the parent corporation does not survive the merger.ⁿ⁴¹ As in the case of a "long form merger," notice must be given at least 20 days before the parent's meeting of stockholders and the merger

must be approved by the holders of a majority of the shares entitled to vote. The same considerations should apply to a meeting of the parent's stockholders as apply to a meeting of the stockholders of a constituent corporation involved in a "long form merger." If the parent is not incorporated in Delaware, the approval of its stockholders must be obtained in accordance with the requirements of the jurisdiction in which it is incorporated.

[e] Sale, Lease, or Exchange of All or Substantially All Assets

Under Section 271 of the Delaware General Corporation Law, stockholders have the right to vote on any proposal by the corporation to convey "all or substantially all" of its assets. As with the process for amending the certificate of incorporation and with votes on mergers or consolidations, the right of stockholders to vote is dependent on prior board action. First, the proposed transaction must be approved by the board of directors. Second, the proposed transaction must be approved by the holders of a majority of the outstanding voting stock either at a meeting called for such purpose or by written consent.ⁿ⁴²

Stockholders must be given notice at least 20 days prior to the meeting at which the resolution to authorize the sale of "all or substantially all" of the corporation's property and assets will be considered.ⁿ⁴³

[f] Dissolution

Dissolution is the process of terminating the legal existence of a corporation, along with its attendant relationships, rights and duties.ⁿ⁴⁴ Stockholders have the power to dissolve the corporation, without regard to the wishes of any non-stockholder directors, officers, employees, etc., in the rare event that all the stockholders entitled to vote on the issue of dissolution consent in writing.ⁿ⁴⁵ Otherwise, the board of directors must adopt a resolution proposing a dissolution, which then must be approved by the holders of a majority of all outstanding shares entitled to vote.ⁿ⁴⁶ The board's resolution may reserve discretion to abandon the dissolution without regard to the wishes of stockholders.ⁿ⁴⁷ The dissolution is effective, and the corporation is deemed dissolved, upon the filing of a certificate of dissolution with the Secretary of State.ⁿ⁴⁸

For three years after the filing of the certificate of dissolution, the corporate existence will continue for the limited purposes of "prosecuting and defending suits ... enabling [corporations] gradually to settle and close their business, to dispose of and convey their property, to discharge their liabilities and to distribute to their stockholders any remaining assets."ⁿ⁴⁹ During such period, the corporation has no power to "continu[e] the business for which the corporation was organized."ⁿ⁵⁰ Rather, it may only conduct business incidental to dissolution, such as hiring counsel to defend against suits,ⁿ⁵¹ and to reasonably employ others to help in the liquidation and distribution of corporate assets.ⁿ⁵²

Because dissolution ends the ability of the corporation to engage in normal business, stockholders lose most of their rights relating to their interest in maximizing the value of investment.ⁿ⁵³ Stockholders retain only a property interest in their pro rata share of the residual assets of the corporation.ⁿ⁵⁴

During the three-year statutory wind-up period, a corporation may revoke its dissolution.ⁿ⁵⁵ In order to revoke dissolution, the board of directors must adopt a resolution recommending that the dissolution be revoked and submit the resolution to a vote of the stockholders.ⁿ⁵⁶ Dissolution will be revoked if the holders of a majority of the shares outstanding at the time of the dissolution so approve.ⁿ⁵⁷

[g] Special Voting Rights and Preferred Stock

In addition to the voting rights granted under Delaware law, the certificate of incorporation or bylaws of a corporation may confer additional voting rights on stockholders or on certain classes or series of stock. A common example of special voting rights are those conferred on classes or series of preferred stock. Like the other rights and preferences of a particular class or series of preferred stock, special voting rights must be clearly and expressly stated in the certificate of

incorporation.ⁿ⁵⁸ These rights are "essentially contractual" and therefore are interpreted under applicable principles of contract law.ⁿ⁵⁹ A court will not presume any preferred stock rights in addition to those that are expressly stated in the certificate of incorporation.ⁿ⁶⁰ Applying these principles, courts have held that express requirements for a separate vote in the event of adverse changes to rights or preferences of preferred stock or to the company's governing documents do not apply when the cause of such change(s) is a merger.ⁿ⁶¹ This seemingly narrow interpretation is based on the presumption that holders of preferred stock acquire their shares with knowledge that, under numerous cases applying the doctrine of independent legal significance, their rights are subject to defeasance in the event of a merger complying with the applicable statute.ⁿ⁶²

The case of *Elliot Associates, L.P. v. Avatex Corp.*,ⁿ⁶³ demonstrates the importance of the specific language used in a certificate of incorporation. There, the Supreme Court of Delaware interpreted a charter provision which stated that the consent of two-thirds of the preferred stockholders "voting separately as a class" was necessary to permit any "amendment, alteration or repeal [of the company charter], ... by merger, consolidation or otherwise ... which would materially and adversely affect any right, preference, privilege or voting power of" the preferred stock.ⁿ⁶⁴ The defendants argued that its charter would not be amended in the merger, but would be nullified and replaced by the charter of its merger partner.ⁿ⁶⁵ The court held that the words "amendment, alteration or repeal" suggested an intent to include situations where a certificate of incorporation is displaced or substituted by a merger partner's charter, or by an entirely new certificate of incorporation.ⁿ⁶⁶ It based this conclusion, in part, on the use of the word "consolidation," which suggests an intent to allow voting rights in situations where none of the original entities survive and their charters are nullified.ⁿ⁶⁷ The court also held that the preferred stock would be "materially and adversely" affected because the merger would render the company charter--the source of the preferred stocks' rights--a legal nullity.ⁿ⁶⁸

[2] Stock Exchange Rules

Stockholders may also receive the right to vote on certain matters by virtue of a corporation being subject to the rules of a stock exchange on which the corporation's shares are listed. In general, the rules of the NYSE and the NASDAQ require a stockholder vote with respect to equity compensation plans and with respect to certain share issuances.ⁿ⁶⁹

In 2003, the SEC approved rule changes significantly broadening the stockholder approval requirements for equity compensation plans.ⁿ⁷⁰ Under these rules, an equity compensation plan is defined as a plan or other arrangement that provides for the delivery of equity securities (either newly issued or treasury shares) of the listed company to any employee, director or other service provider as compensation for services, including a compensatory grant of options or other equity securities that is not made under the plan. Certain plans or arrangements are either excluded from the definition of equity compensation plans or are exempted from the stockholder approval requirement, including the following: (i) plans that are made available to stockholders generally (such as a typical dividend reinvestment plan), (ii) plans that merely allow employees, directors, or other service providers to elect to buy shares on the open market or from the listed company for their current fair market value, (iii) employment inducement awards, (iv) certain grants, plans, and amendments in the context of mergers and acquisitions, (v) plans intended to meet the requirements of *Sections 401(a) and 423 of the Internal Revenue Code*, and (vi) certain types of pension plans within the meaning of the Employee Retirement Income Security Act.

In addition, the NYSE rules also require prior stockholder approval prior to certain share issuances.ⁿ⁷¹ For example, ordinarily, prior stockholder approval is required for share issuances by an issuer to (i) a director, officer, or substantial security holder of the company (a "Related Party"), (ii) a subsidiary, affiliate, or closely related person of a Related Party, or (iii) any company or entity in which a Related Party has a substantial direct or indirect interest, if such share issuance exceeds one percent of the total number of shares outstanding, or one percent of the voting power outstanding, of the issuer.ⁿ⁷² However, if the Related Party involved in the transaction is classified as such solely because such person is a substantial security holder, and if the issuance relates to a sale of stock for cash at a price at least as great as each of the book and market value of the issuer's common stock, then stockholder approval will not be required unless the number of shares of common stock to be issued, or unless the number of shares of common stock into which the

securities may be convertible or exercisable, exceeds either five percent of the number of shares of common stock or five percent of the voting power outstanding before the issuance."ⁿ⁷³

A stockholder vote may also be required prior to a share issuance constituting 20 percent or more of the total number of shares outstanding, or 20 percent or more of the voting power outstanding, of the issuer before the issuance of the stock.ⁿ⁷⁴ There are a number of exceptions to this general rule. Stockholder approval is not required for any such issuance involving:

- any public offering for cash;
- any bona fide private financing, if such financing involves a sale of:
 - common stock, for cash, at a price at least as great as each of the book and market value of the issuer's common stock; or
 - securities convertible into or exercisable for common stock, for cash, if the conversion or exercise price is at least as great as each of the book and market value of the issuer's common stock. Likewise, a stockholder vote may be required prior to a share issuance that will result in a change of control of the issuer.ⁿ⁷⁵

NASDAQ also requires a stockholder vote for certain equity compensation plans. As with the NYSE rules, the NASDAQ rules with respect to equity compensation plans were revised in 2003 to broaden significantly the stockholder approval requirements.ⁿ⁷⁶ The new NASDAQ rules are now substantially similar to the NYSE rules in this regard.

NASDAQ also requires a stockholder vote for certain share issuances. For example, a stockholder vote is required for a share issuance that will result in a change of control.ⁿ⁷⁷ A stockholder vote is also generally required for a share issuance, other than a public offering, involving the issuance of 20 percent or more of the common stock (or securities convertible into common stock) outstanding, or 20 percent or more of the voting power outstanding, of the issuer before the issuance (or if the sale or issuance is at less than the greater of market and book value and, together with sales by directors, officers, or substantial shareholders, it amounts to 20 percent or more of the common stock (or securities convertible into common stock) outstanding, or 20 percent or more of the voting power outstanding, of the issuer before the issuance).ⁿ⁷⁸

In addition, an issuer must obtain a stockholder approval vote for the issuance of common stock (or securities convertible into common stock) in connection with the acquisition of the stock or assets of another company:

- (i) if any director, officer, or substantial stockholder of the issuer has a five percent or greater interest (or such persons collectively have a ten percent or greater interest), directly or indirectly, in the company or assets to be acquired or in the consideration to be paid in the transaction or series of related transactions and the present or potential issuance of common stock, or securities convertible into or exercisable for common stock, could result in an increase in outstanding common shares or voting power of five percent or more; or
- (ii) where, due to the present or potential issuance of common stock, or securities convertible into or exercisable for common stock, other than a public offering for cash--
 - (a) the common stock has or will have upon issuance voting power equal to or in excess of 20 percent of the voting power outstanding before the issuance of stock or securities convertible into or exercisable for common stock; or

(b) the number of shares of common stock to be issued is or will be equal to or in excess of 20 percent of the number of shares or common stock outstanding before the issuance of the stock or securities.ⁿ⁷⁹

As with the NYSE rules, these requirements are subject to certain exceptions.ⁿ⁸⁰ A company relying on this exception must mail to all stockholders not later than 10 days before issuance of the securities a letter notifying them of its decision not to seek the stockholder approval that would otherwise be required and indicating that the audit committee or a comparable body of the board of directors has expressly approved the exception. Rules of other self-regulatory organizations that apply to a particular corporation may also require a stockholder vote for certain matters.

(n7)Footnote 7. *Blasius*, 564 A.2d at 659.

(n8)Footnote 8. *Del. Code Ann. tit. 8, § 211(c)*. In *Hoschett v. TSI Int'l Software, Ltd.*, 683 A.2d 43, 44-45 (Del. Ch. 1996), the Delaware Court of Chancery highlighted the importance of stockholder meetings for the election of directors:

Delaware courts have long recognized the central role of annual meetings in the scheme of corporate governance. Even the shareholders' power to approve amendments to the charter does not extend so far as to permit a Delaware corporation legitimately to dispense with the annual meeting. The critical importance of shareholder voting both to the theory and to the reality of corporate governance, may be

thought to justify the mandatory nature of the obligation to call and hold an annual meeting.

CHAPTER 3 STOCKHOLDERS' RIGHTS

1-3 Corporate Governance: Law and Practice § 3.03

AUTHOR: J. Travis Laster

§ 3.03 Informational Rights

[1] Books and Records

Under Delaware law, "any stockholder" may inspect and copy a corporation's books and records during usual business hours for any proper purpose reasonably related to the stockholder's interests as a stockholder.ⁿ¹ The right to inspect books and records extends to the books and records of subsidiaries, to the extent that the corporation has actual possession and control of such records or could obtain such records through the exercise of control over the subsidiary, as long as (A) the inspection would not violate a confidentiality agreement with any third party and (B) the subsidiary would not have the right, under applicable law, to deny the corporation access to such books and records upon demand. The term "stockholder" includes "a holder of record ... or a person who is the beneficial owner of shares of such stock held either in a voting trust or by a nominee on behalf of such person ..." and the inspection and copying may be done by the stockholder or his or her attorney or other agent.ⁿ²

To be entitled to inspect books and records, a stockholder must make a demand in writing, stating the purpose for which inspection is sought.ⁿ³ The demand should be delivered to the corporation's principal place of business, although the statute also permits delivery to the corporation's registered agent.ⁿ⁴ When an attorney or other agent seeks the right to inspection, the demand must be accompanied by a power of attorney or other writing authorizing the attorney or agent to act on behalf of the stockholder.ⁿ⁵ The demand must be made "under oath," which includes a statement by the declarant affirming that the matters are true under penalty of perjury. The demand may be notarized, but this is not required.ⁿ⁶ A high-ranking officer in a corporation can make a demand on behalf of the company.ⁿ⁷

If a corporation fails to respond to a Section 220 demand, a stockholder may seek to enforce its informational rights. A stockholder cannot commence a suit until at least five days after the company receives the demand and fails to respond.ⁿ⁸ The five-day waiting period is a jurisdictional "prerequisite" to relief.ⁿ⁹

One issue that is litigated often in Section 220 proceedings is whether the stockholder has a proper purpose for seeking inspection. A proper purpose for a stockholder is any purpose reasonably related to its interest as a stockholder.ⁿ¹⁰ Applying this standard, Delaware courts have consistently held that valuation of one's shares is a proper purpose for seeking inspection.ⁿ¹¹ This purpose is proper even where the entity at issue is a closely held corporation.ⁿ¹² Delaware

courts also have held that investigation of corporate mismanagement is a proper purpose when a stockholder alleges a credible basis to infer that mismanagement has occurred.¹³ Once a proper purpose is stated, stockholders generally will be entitled to inspect those books and records that are necessary and essential to the satisfaction of the stated purpose. When the purpose is the investigation of fiduciary misconduct, however, stockholders frequently are entitled to broader inspection rights.¹⁴

[2] Disclosure

Stockholders have a right to information in the form of disclosure under state incorporation laws, state common law doctrines, and the federal securities laws. Under the Delaware General Corporation Law, the only action that a corporation must take annually and must disclose to its stockholders is the holding of an annual meeting at which directors are elected, or the taking of action by written consent to elect directors in lieu of the annual meeting. If the corporation holds an annual meeting, then stockholders have a statutory right to receive notice of the meeting stating the date, time, and location of the meeting.¹⁵ No other information is required as a matter of statute. If directors are elected by written consent, then any non-consenting stockholders are entitled to notice of the action taken.¹⁶ Other notice requirements apply in the event the corporation chooses to hold a special meeting or pursues an extraordinary transaction, such as a merger or a sale of assets.¹⁷

Under Delaware common law, directors of a Delaware corporation have a fiduciary duty to disclose all material information to stockholders when seeking stockholder action.¹⁸ Directors of a Delaware corporation also have a fiduciary duty to speak truthfully and completely when they choose to speak, even if they are not seeking stockholder action.¹⁹ To survive a motion to dismiss a disclosure action, the shareholder's complaint must set forth "well-pleaded facts from which it can be reasonably inferred that [the omitted fact] was knowable and that the defendant was in a position to know it."²⁰ The extensive disclosure obligations imposed on public companies by the federal securities laws are beyond the scope of this chapter.²¹

CHAPTER 3 STOCKHOLDERS' RIGHTS

1-3 Corporate Governance: Law and Practice § 3.04

AUTHOR: J. Travis Laster

§ 3.04 Stockholder Lists

[1] State Law

In Delaware, stockholders have the right to obtain a copy of the materials used to identify those entitled to vote at the meeting as the [corporation] itself now possesses or as may be supplemented before the annual meeting.ⁿ¹ Delaware law gives stockholders the right to inspect all of the materials reasonably available to the corporation so that stockholders will not be unfairly disadvantaged in a proxy contest or tender offer.ⁿ²

In addition to the stockholder list, under Delaware law stockholders may inspect and copy transfer sheets documenting changes of ownership subsequent to the date of the list, a magnetic computer tape containing a list of the stockholders and such computer processing data as is necessary to use the tape, a print-out of the tape for verification purposes, a listing of the brokers and institutions holding stock in street name through various depositories or nominees, and information in the company's possession concerning the identity of beneficial owners who have not objected to disclosure of their identities (a so-called NOBO list). The SEC requires that registered brokers and dealers provide companies with a list of their customers who are beneficial owners of the company's securities and who have not objected to the disclosure of that information.ⁿ³ The NOBO list is to be used only for corporate communications.ⁿ⁴ In short, Delaware law requires corporations responding to a Section 220 demand to "include all of those forms of stockholder data readily available to the corporation."ⁿ⁵

The Court of Chancery held that the purposes of Section 220 do not expressly conflict with the SEC rules regarding NOBO lists and, thus, "[w]here ... the corporation has obtained a NOBO list and is or will be using it to solicit its stockholders in connection with the annual meeting, plaintiff should be allowed the same channel of communication."ⁿ⁶ The Court of Chancery also held that plaintiffs who secure NOBO lists pursuant to a Section 220 demand are "expressly bound" by the limitations imposed on the proper use of such lists by the SEC. Nevertheless, under Delaware law, if the corporation does not already have a NOBO list, the corporation is not required to obtain such a list in response to a Section 220 demand.ⁿ⁷

Another type of stockholder list often sought by stockholders is the DTC or Cede breakdown. The Depository Trust Company ("DTC") uses the name Cede & Co. to hold shares owned by DTC in street name. DTC is "an association of

more than 200 brokerage houses and financial institutions which was formed for the purpose of owning shares held in street name for the beneficial interest of customers of the brokerage firms and financial institutions."n8 Thus, when Cede appears as a stockholder on a corporate ledger, it is "thrice removed from the true beneficial owner."n9

A Cede breakdown revealing "just which brokerage firms own shares and the number of shares owned by each ... can be provided to the corporation at its request."n10 Because a Cede breakdown may be generated in a matter of hours, Delaware courts have held such lists to be "readily available to the corporation ... and should be made available to plaintiff ... so that his list of stockholders for his proper purpose of soliciting proxies is at least equivalent, in this aspect, with the list available to the corporation for the same purpose."n11 Thus, unlike a NOBO list, under Delaware law a Cede breakdown must be made available to a stockholder upon proper demand.n12

[2] Proxy Rules

Under SEC proxy rules, a company is required to provide stockholders with a process for contacting other stockholders in two situations: (i) whenever the company itself solicits proxies and a shareholder makes a proper demand for the company to provide for the distribution of the shareholder's materials to the same stockholders; and (ii) when stockholders solicit proxies in connection with a tender offer to acquire the company's securities from existing stockholders. Generally, in both situations, the company may choose to either provide the stockholder list to the requesting stockholder or mail the requesting stockholder's soliciting or tender offer materials to other stockholders at the requesting stockholder's expense.

Under Rule 14a-7, if the issuer has made or intends to make a proxy solicitation in connection with a security holder meeting or action by consent or authorization, upon the written request by any record or beneficial holder of securities of the class entitled to vote at a meeting or to execute a consent or authorization to provide a list of security holders or to mail the requesting security holder's materials, the issuer is required, within five business days of receiving the request, to (i) notify the requesting stockholder whether it has elected to mail the soliciting materials or provide a security holder list, if the issuer is entitled to make that election (see below), (ii) state the approximate number of record and beneficial holders, separated by type of holder and class, and (iii) provide the estimated cost of mailing a proxy statement to such holders, including, to the extent reasonably known or available, the estimated costs of any bank or broker through whom the issuer intends to solicit beneficial owners in connection with the security holder meeting or action by written consent.n13

At the issuer's or security holder's option (if the matter at hand is a going-private transaction or certain type of roll-up transaction), or at the issuer's option (if the subject matter is anything else), the issuer may (a) mail copies of a proxy statement or other solicitation furnished by the requesting security holder to the record holders, including banks and brokers who are so designated by the requesting security holder, or (b) within five business days after receiving the security holder's request, provide the security holder with a reasonably current list of shareholders' securities positions of record, names, and addresses. When the issuer mails the security holder's materials, the issuer may not delay sending the material but must mail the security holder materials with reasonable promptness after receiving them, along with appropriate envelopes or other containers, postage or payment for postage, and other reasonable expenses of such mailing. The issuer is, of course, not responsible for the content of the material.n14

When the elected method is delivery of a shareholder list, the issuer must provide: (i) a reasonably current list of the names, addresses and security positions of the record holders, including banks, brokers, and similar entities holding securities in the same class or classes as holders that have been or are to be solicited on management's behalf, or any more limited group of such holders designated by the security holder if available or retrievable under the issuer's or its transfer agent's security holder data systems;n15 (ii) the most recent list of names, addresses and security positions of beneficial owners as specified in Rule 14a-13(b) (the NOBO list), in the possession, or which subsequently comes into the possession, of the issuer; and (iii) the names of security holders at a shared address that have consented to delivery of a single copy of proxy materials to a shared address, if the issuer has received written or implied consent in

accordance with Rule 14a-3(e)(1).ⁿ¹⁶ The issuer is required to provide the security holder list information in the form specified by the requesting security holder if such form is available without undue burden or expense. There is a continuing obligation to update the record holder information on a daily basis or, if not available on a daily basis, at the shortest reasonable intervals, up to the record date for the meeting or action.ⁿ¹⁷

In connection with a tender offer, a bidder may seek a stockholder list from a company under Rule 14d-5 of the Securities Exchange Act of 1934 (the "1934 Act"). The bidder must present a written request to the company identifying: (i) the identity of the bidder; (ii) the title of the class of securities which is the subject of the bidder's tender offer; (iii) a statement that the bidder is making a request to the subject company pursuant to Rule 14d-5(a) for the use of the stockholder list and security position listings for the purpose of disseminating a tender offer to security holders; (iv) a statement that the bidder is aware of and will comply with the relevant provisions of Rule 14d-5; (v) a statement as to whether or not it has elected to disseminate amendments disclosing material changes to the tender offer materials pursuant to this section; and (vi) the name, address, and telephone number of the person whom the subject company shall contact in connection with the request. Following receipt of the request, the company may choose to either complete the mailing to the stockholders for the bidder or provide the stockholder list to the bidder.ⁿ¹⁸

Rule 14(d) limits the requesting security holder's use and retention of the information discussed above:

The security holder shall not use the information furnished by the [issuer] ... for any purpose other than to solicit security holders with respect to the same meeting ... for which the [issuer] is soliciting or intends to solicit or communicate with security holders with respect to a solicitation commenced by the [issuer]; or disclose such information to any person other than an employee ... or beneficial owner for whom a request was made The security holder shall return the information ... and shall not retain any copies thereof or information derived from such information after the termination of the solicitation.ⁿ¹⁹

Rule 14(d) also requires the requesting security holder to reimburse the issuer for costs associated with the request.

CHAPTER 3 STOCKHOLDERS' RIGHTS

1-3 Corporate Governance: Law and Practice § 3.05

AUTHOR: J. Travis Laster

§ 3.05 Annual Meeting of Stockholders

[1] Basic Requirements

[a] Time and Location

As a general rule, a corporation must hold an annual meeting of stockholders for the election of directors.ⁿ¹ A narrow exception to this rule allows stockholders to act by written consent in lieu of an annual meeting in certain rare circumstances where either (i) stockholders exercise unanimous written consent, or (ii) all of the directorships to be voted upon at the annual meeting are vacant at that time and are then filled by written consent.ⁿ² Director election by written consent that is (i) non-unanimous or (ii) involves the re-election or removal and replacement of less than all sitting directors will not suffice to fulfill the annual meeting requirement.ⁿ³ Such directors will be up for re-election at the next annual meeting.ⁿ⁴

A corporation has great flexibility in determining the location and timing of its annual meeting. The corporation may choose any date and time for its annual meeting and specify the exact timing in its bylaws.ⁿ⁵ Most corporate bylaws do not designate a particular date for the annual meeting, but rather specify that it will occur on a certain day in a particular month-- *e.g.* the third Tuesday in May.ⁿ⁶ Where applicable, federal securities laws and stock exchange rules may require that the annual meeting take place after the distribution of an annual report and within a reasonable time after the close of the preceding fiscal year.ⁿ⁷ A corporation's claimed inability to prepare such materials, however, will not justify an otherwise objectionable delay in holding an annual meeting.ⁿ⁸ Similarly, the location for the annual meeting may be anywhere specified in the bylaws or certificate of incorporation.ⁿ⁹ The annual meeting need not take place within the state of incorporation.ⁿ¹⁰ If the bylaws or certificate of incorporation do not address the timing or location of the annual meeting (or expressly delegate such matters to the board of directors), the board has discretion over these matters.ⁿ¹¹ The board may decide to hold the annual meeting without any physical location, by means of remote communication devices that allow stockholders "a reasonable opportunity to participate and vote."ⁿ¹²

The failure to hold an annual meeting as scheduled has no adverse consequences for the corporation or its directors under the statutory scheme.ⁿ¹³ The mere fact that a corporation has a holdover board will not cause the dissolution of the corporation or have any affect on otherwise valid corporate actions.ⁿ¹⁴ Nevertheless, a board may not delay an annual meeting indefinitely. Any stockholder or director may petition the court to schedule an annual meeting where

more than thirty days have passed since the date specified in the bylaws or, if the bylaws do not set a date, where the last annual meeting occurred more than thirteen months before.ⁿ¹⁵ In such circumstances, the court may designate the time and place of the meeting, the record date to determine stockholders entitled to vote, and the contents of the notice for the meeting.ⁿ¹⁶ Where an annual meeting date is set by court order, otherwise applicable quorum requirements will not apply, and the number of shares actually present or represented by proxy are deemed sufficient for the conduct of business.ⁿ¹⁷ The statutory requirement of a timely annual meeting still applies where the corporation has ceased its ongoing business operations and is on the verge of liquidation.ⁿ¹⁸

Even where the timing of the annual meeting is left to directors' discretion, there are equitable limits on a boards' ability to set a meeting date. These equitable limits on directors acknowledge that the stockholder vote is "the ideological underpinning upon which the legitimacy of directorial power rests."ⁿ¹⁹ For this reason, directors' decisions in this context will be invalid when they are taken for the inequitable purpose of impairing stockholders' voting rights, unless the board can show a compelling justification for its actions.ⁿ²⁰ The result of this inquiry will depend upon whether the circumstances clearly indicate the presence of an inequitable purpose.ⁿ²¹

In *Schnell v. Chris-Craft Indus., Inc.*,ⁿ²² for example, two days after stockholders became dissatisfied with management performance and revealed their intention to wage a proxy fight to replace the incumbent directors, those same directors amended the corporate bylaws to move up the annual meeting date by one month.ⁿ²³ Corporate management had also refused to produce its list of stockholders, while hiring two proxy solicitors to help fight the dissident stockholders.ⁿ²⁴ The court held that, although the directors' bylaw amendment was in compliance with the applicable statute, it was rendered invalid by its being taken for "inequitable purposes, contrary to established principles of corporate democracy."ⁿ²⁵ The court ordered the original meeting date reinstated.ⁿ²⁶

An inequitable purpose has also been found where incumbent directors have sought to delay an annual meeting.ⁿ²⁷ In *Aprahamian v. HBO & Co.*,ⁿ²⁸ for example, incumbent directors sought to postpone a scheduled annual meeting for approximately five months.ⁿ²⁹ A month before the scheduled meeting, a group of dissident stockholders who opposed the directors' reelection and advocated a possible sale of the company began to solicit proxies from other stockholders. The day before the meeting, after the incumbent directors received reports that the election was too close to call, they decided to postpone the annual meeting and set a new record date.ⁿ³⁰ The court found that, because the directors had manipulated the election process, they bore the burden of showing that a delay would serve stockholders' significant interests.ⁿ³¹ Because the directors could not do so,ⁿ³² the court ordered that the meeting be convened in order to preserve the record date and prevent the expiration of the plaintiffs' proxies. It would then be adjourned and reconvened shortly thereafter with new notice to stockholders, who were understandably "bewildered" by the directors' sudden postponement and the ensuing litigation.ⁿ³³

On the other hand, "well-motivated, independent directors" may reschedule a special meeting within a reasonable time to consider an offer from a third-party acquirer when they believe the shareholders may reject the offer and discourage the acquirer, and want to provide more information to the shareholders before the vote.^{n33.1} Vice Chancellor Strine held that the proper standard of review is "a reasonableness standard," and that the initial burden is on the board to "identify a legitimate corporate objective served by its decision" to reschedule the meeting and "show that their motivations were proper and not selfish."^{n33.2}

In general, courts will typically uphold the directors' decision where there is no showing of objective harm to the electoral process (other than a delay).ⁿ³⁴ In particular, where no meeting date is formally set and no actual proxy contest is yet underway, a board's decision to delay holding an annual meeting will generally be upheld.ⁿ³⁵ Similarly, the courts will not presume that, during a delay, incumbent directors will breach their fiduciary duties to the detriment of the company.ⁿ³⁶

Finally, an otherwise objectionable re-scheduling of an annual meeting may be justified as being in the best interest of the corporation where the board makes an informed decision that it needs additional time to evaluate and explore

alternatives to new acquisition offers.ⁿ³⁷

[b] Adjournment of Meetings

Once a meeting is convened and underway, circumstances may arise making an adjournment desirable. Such circumstances may include facts evidencing vote fraud, the absence of a quorum, the need to count votes submitted at a meeting, or waiting for a court opinion regarding matters at issue.ⁿ³⁸ Meetings of stockholders may generally be adjourned by an authorized officer presiding at the meeting or with the approval of a majority of shares present.ⁿ³⁹ Applicable statutes or the corporation's charter or bylaws may specify the procedure for conducting and adjourning a meeting.ⁿ⁴⁰

The notice required for a meeting that is reconvened after adjournment may be determined by the company's bylaws.ⁿ⁴¹ Where the bylaws are silent, no new notice need be given for an adjourned meeting if (1) the time and place where the meeting will be reconvened are announced at the original meeting, (2) the original record date is kept, and (3) the reconvened meeting is held within 30 days.ⁿ⁴² The reconvened meeting is a continuation of the initial meeting,ⁿ⁴³ and so, if a quorum was present at the initial meeting, no quorum count is necessary at the reconvened meeting.ⁿ⁴⁴ Any business that could be conducted at the original meeting may be considered at the reconvened meeting.ⁿ⁴⁵ A quorum at the original meeting (prior to adjournment) suffices to validate action taken at a reconvened meeting even though stockholders or proxies withdraw from the meeting in the interim.ⁿ⁴⁶

As with the initial scheduling of an annual meeting,ⁿ⁴⁷ there are equitable limits on corporate officers' discretion in adjourning and reconvening a meeting. In *State of Wisconsin Inv. Board v. Peerless Sys. Corp.*,ⁿ⁴⁸ a large institutional investor challenged the decision of the company's Chairman and CEO to adjourn an annual meeting without closing the polls on a controversial proposal to add one million shares to the company's stock option plan.ⁿ⁴⁹ After receiving the company's proxy statement, the plaintiff initiated a proxy fight to defeat the proposal, emphasizing the potential dilutive impact of the issuance upon existing stockholders.ⁿ⁵⁰ At an annual meeting just over two weeks later, a majority of a quorum overwhelmingly voted in favor of management's other proposals, but voted against the dilutive option proposal.ⁿ⁵¹ The meeting was then adjourned for thirty days, with the polls left open on only the dilutive option proposal. During the adjournment, the company selectively contacted stockholders to solicit votes on the proposal. At the reconvened meeting, over 95 percent of the votes favored the proposal, which narrowly passed.ⁿ⁵²

The company and its Chairman moved for summary judgment, arguing that his decision to adjourn the meeting was protected by the business judgment rule. The court denied the defendants' motion, finding that the "primary purpose behind the adjournment was to ensure the passage" of the proposal.ⁿ⁵³ Sworn affidavits from company officers suggested that the adjournment was intended to achieve a favorable vote. Moreover, the company's failure to inform all stockholders of the adjournment and their ability to vote on the proposal while instead soliciting votes in secret from only certain stockholders suggested an intent to manipulate the vote. The court declined to rule on whether the defendants' proffered justifications, that included a concern for a low voter turnout on the proposal and apparent difficulties of European investors in voting, were sufficiently compelling to justify their otherwise inequitable conduct.ⁿ⁵⁴

[c] Record Date for Meetings

The continuous transfer of corporate shares necessitates that there be some specific time fixing the stockholders entitled to vote and receive notice of a meeting. At common law, corporations were permitted to close the corporation's share transfer books, thereby ceasing all the trading in their shares, for a reasonable period before a stockholders' meeting.ⁿ⁵⁵ Modern record date statutes enable the continuous trading of corporate shares by permitting a corporation to set a record date. The stockholders of record as of the record date, regardless of any subsequent transfers, are entitled to vote and receive notice of an upcoming annual meeting.ⁿ⁵⁶

Statutes permit the record date to be set within a certain time period preceding a stockholders' meeting. Statutes may permit the exact record date to be set by the corporation's bylaws or reserve power to the board to fix an exact date.ⁿ⁵⁷ Under Delaware's statute, the board of directors must fix a record date that is no more than 60 and no fewer than 10 days before the date of the meeting of stockholders.ⁿ⁵⁸ The board cannot set the record date retroactively by choosing a date that precedes the date on which their decision is made.ⁿ⁵⁹ If the board does not exercise its discretion to set a record date, the default record date is the day before notice is sent out to stockholders.ⁿ⁶⁰ If the meeting is adjourned, the statute authorizes directors to set a new record date for the reconvened meeting.ⁿ⁶¹

A board may abuse its discretion when it sets a record date in order to impede stockholder voting rights.ⁿ⁶² It is uncertain, however, what facts would suffice to cause the invalidation of a record date that otherwise complied with the statute. In *Wyser-Pratte v. Smith*,ⁿ⁶³ for example, the Court of Chancery dismissed a claim that the board had inequitably set the record date for only twelve days prior to a special meeting of stockholders. The plaintiffs argued that this short time period in which to act would discourage or impede stockholders from taking the necessary steps to exercise their voting rights.ⁿ⁶⁴ Having such a short time period in which to solicit proxies could also impair the stockholders' ability to wage a proxy fight. The court dismissed the plaintiff's claim, however, noting "[t]he impact of the selection of the record date on the logistics of the proxy contest were certainly known to the General Assembly when § 213 was enacted."ⁿ⁶⁵ Because the statute permits record dates that make proxy contests difficult and because plaintiff pled no specific facts regarding the board's alleged inequitable purpose, the court dismissed the plaintiff's claim.ⁿ⁶⁶

Similarly, in *In re The MONY Group, Inc., S'holders' Litig.*,ⁿ⁶⁷ the Court of Chancery upheld a board's decision to re-set the record date to determine stockholders entitled to vote on a merger that the board believed to be in the best interest of the corporation, holding the decision was committed to the directors' business judgment. There, the board re-set the record date for the related purposes of (1) enfranchising the approximately 52 percent of stockholders who purchased their shares during high volume trading after the original record date, and (2) enabling the merger to receive the statutorily required minimum approval of over half of all outstanding shares entitled to vote on the merger.ⁿ⁶⁸ Because neither of these purposes were tainted by director self-interestⁿ⁶⁹ and the action taken did not impede the exercise of the stockholder franchise, the court upheld the directors' decision under the deferential business judgment rule.

A new subsection to § 213, effective August 1, 2009, allows a board of directors to set one record date for determining shareholders entitled to receive notice of a meeting, and a second record date to establish the shareholders entitled to vote.^{n69.1} The voting record date can be later than the notice record date, including the date of the meeting. The requirement that the notice record date be not more than 60 and not less than 10 days before the meeting remains in effect. This change was meant to minimize "empty voting" by those who no longer own stock as of the meeting date or otherwise acquire voting rights without a corresponding economic interest and might therefore not vote in the manner most beneficial to the corporation.

[2] Electronic Meetings

A corporation's bylaws often do not provide a specific time and place for an annual meeting of stockholders, but, rather, specify the method by which the time and place may be determined. Statutes in Delaware and several other states permit stockholders' meetings to be held without any physical location whatsoever, solely by means of remote communication.ⁿ⁷⁰ Under Delaware law, stockholders will be deemed present at the meeting for quorum purposes, and entitled to vote, provided that the corporation implements reasonable measures (1) to verify stockholder or proxyholder status, (2) to enable participation in the meeting, including an opportunity to read or hear the proceedings substantially concurrently, and (3) maintain a record of any votes submitted by remote means.ⁿ⁷¹ Provided that the above requirements are met, a board that may otherwise determine the location of stockholder meetings may decide to dispense with a physical location altogether.ⁿ⁷²

Creating access via remote or electronic media may increase stockholder participation in the actual conduct of the meeting by eliminating the stockholders' need to travel to a physical location. Relatedly, dispensing with a physical location altogether may reduce the costs of the meeting to the corporation.ⁿ⁷³ The increased stockholder participation and flexibility afforded by electronic meetings, however, may constitute significant drawbacks from management's perspective; increased stockholder participation increases the risk that a large number of stockholders may revoke their votes at the meeting, thereby increasing the uncertainty associated with stockholder votes.ⁿ⁷⁴ From the stockholders' perspective, dispensing with any physical location may also impede the increased accountability thought to result from stockholders' direct interaction with management. Arguing that the benefits of increased stockholder participation through electronic means could always be achieved without dispensing with the physical location, stockholder activists have resisted corporate attempts to eliminate physical meeting sites.ⁿ⁷⁵

[3] Vote Required for Transaction of Business

[a] General Rule

In Delaware, absent a contrary bylaw or charter provision or a specific statutory requirement (such as in the case of stockholder approval of mergers):ⁿ⁷⁶

- (1) a majority of the shares entitled to vote, which when present in person or represented by proxy at the meeting, shall constitute a quorum;
- (2) in all matters on which shareholders are entitled to vote, other than the election of directors, the affirmative vote of the majority of shares present in person or represented by proxy at the meeting and entitled to vote on the subject matter of the particular proposal concerned shall be necessary and sufficient for the conduct of business; and
- (3) directors shall be elected by a plurality of the votes of the shares present in person or represented by proxy at the meeting and entitled to vote on the election of directors; and
- (4) the same rules apply when a separate vote of a class or series of shares is required, except that the shares counted for purposes of determining the required quorum or vote are limited to those in that class or series.

These rules can be changed by charter or bylaw provisions except that in no event shall a quorum be less than one-third of the shares entitled to vote at the meeting (or, in the case of a vote required of a class or series of shares, one-third of the shares in that class or series).ⁿ⁷⁷ Once a quorum is established by the presence in person or representation by proxy of the requisite number of shares, a shareholder or proxy-holder cannot subsequently defeat the quorum by physically withdrawing from the meeting.ⁿ⁷⁸

[b] Abstentions and Broker Non-Votes

There is of course no duty to exercise voting rights associated with stock ownership.ⁿ⁷⁹ Stockholders abstain from voting when they are present at a meeting and are otherwise entitled to vote, but decline to cast a vote on a particular matter.ⁿ⁸⁰ States are split over how (and whether) to count abstentions for voting purposes.ⁿ⁸¹ States with statutes like Delaware's, which generally require an affirmative vote of the majority of shares present or represented and entitled to vote in order for a proposal to pass, have the effect of counting abstentions as negative votes.ⁿ⁸² In contrast, the Model Business Corporation Act and approximately half of the states generally only require that the votes cast for a proposal exceed the votes cast against the proposal.ⁿ⁸³

Similar to abstentions, beneficial owners of stock may inadvertently prevent their shares from being voted on a

particular proposal by failing to give the record owners (*i.e.*, agents of the beneficial owners, such as stock brokers, who are said to hold shares in "street name") either voting discretion or specific instructions with regards to a particular proposal.ⁿ⁸⁴ State law authorizes such fiduciaries to vote the stock they hold on behalf of beneficial owners,ⁿ⁸⁵ and authorizes corporations to rely on and communicate solely with record owners when communicating regarding upcoming votes.ⁿ⁸⁶ With respect to voting in publicly held companies, the specific nature of the fiduciary relationship between record and beneficial owners is governed by stock exchange rules. For example, New York Stock Exchange Rule 452 governs when NYSE member brokers holding shares in "street name" may vote those shares without specific voting instructions of the beneficial holders.ⁿ⁸⁷ Generally, to be able to do so, a NYSE member organization must have transmitted the proxy statement and accompanying materials to the beneficial holder or his or her designated investment advisor, not have received voting instructions from the beneficial holder or designated investment advisor, and have "no knowledge of any contest as to the action to be taken at the meeting and provided such action is adequately disclosed to stockholders and does not include authorization for a merger, consolidation of any matter which may affect substantially the rights or privileges of such stock." Procedurally, once the Exchange has reviewed the proxy statement, it designates in the list of stockholder meetings appearing in the Weekly Bulletin whether (a) members may vote a proxy without instructions of beneficial owners, (b) members may not vote on specific matters on the proxy, or (c) members may not vote the proxy at all.ⁿ⁸⁸

The Delaware Supreme Court distinguished between abstentions and broker non-votes in *Berlin v. Emerald Partners*.ⁿ⁸⁹ In that case, the court recognized that, unlike abstentions, broker non-votes with respect to a particular proposal occur precisely because the record owners are not "entitled to vote" with respect to the particular matter.ⁿ⁹⁰ For this reason, unlike abstentions, broker non-votes should not be counted towards a quorum with respect to the particular proposals for which they cannot vote.ⁿ⁹¹ For similar reasons, unlike abstentions, broker non-votes will not be treated as votes against a particular proposal.

[4] Stockholder Proposals

[a] State Law

Delaware law does not expressly address substantive requirements for proposals submitted by stockholders for consideration at an upcoming meeting. Nevertheless, many corporations have procedural requirements that must be complied with before a proposal may be considered at an annual meeting. These frequently take the form of advance notice provisions in the company charter or bylaws, which require that stockholders provide a company with notice of certain proposals a set period in advance of a meeting.ⁿ⁹² While courts regard advance notice provisions as defensive measures,ⁿ⁹³ they are generally held to be a valid means of ensuring that a corporation has sufficient time to include any proposal in its proxy materials and to allow a period of deliberation prior to the meeting.ⁿ⁹⁴

A close reading of the bylaw is necessary to determine how an advance notice provision will operate. For example, in *Jana Master Fund, Ltd. v. CNET Networks, Inc.*,^{n94.1} the bylaws required a stockholder to have beneficially owned at least \$1,000 in common stock for a year before seeking to transact business at the annual meeting. Although the shareholder had held shares for only eight months, the court of chancery held that the corporation could not exclude the shareholder's proposals, because the bylaw only applied to shareholder proposals under SEC Rule 14a-8. Similarly, ^{n94.2} the chancery court narrowly interpreted an advance notice bylaw in favor of the shareholder. Although the court concluded that the bylaw in question did cover nomination of directors, the court held that the shareholder's nomination of alternate directors was proper business for the annual meeting because the directors' own notice of meeting announced that one matter to be addressed was election of the board of directors.

Even when interpreted to operate as intended, advanced notice provisions may be problematic where they unreasonably impair the exercise of the stockholder franchise--particularly the ability of stockholders to nominate directors.ⁿ⁹⁵ In *Lerman v. Diagnostic Data, Inc.*, for example, the court invalidated an incumbent board's use of a 70 day advance notice bylaw to prevent a known insurgent from nominating his slate of directors, where the board gave stockholders

only 63 days' notice of the annual meeting date.ⁿ⁹⁶ Similarly, in *Linton v. Everett*, the court set aside a stockholder vote re-electing the incumbent board where the board gave short notice of an annual meeting in deviation from its prior practice, inevitably in a manner foreseeably adverse to any shareholder desiring to nominate an opposing slate.ⁿ⁹⁷ Advance notice provisions may also have an inequitable effect where "a material change of circumstances" occurs after the submission deadline of an advance notice provision.ⁿ⁹⁸ In *Hubbard v. Hollywood Park Realty Enters., Inc.*, such a material change was present, requiring the board to waive the application of an advance notice provision, where the board entered into a settlement agreement with an insurgent stockholder three weeks after the submission deadline, which required the board to nominate the insurgent for a directorship.ⁿ⁹⁹ The "unanticipated change of allegiance by a majority" of the board in aligning itself with the insurgent, who had previously indicated an intent to make fundamental changes to the company's management, operations, and business policy, mandated waiver of the advance notice requirement.ⁿ¹⁰⁰ Finally, the Court of Chancery has invalidated the board's interpretations of advance notice provisions, when they were announced at a time so as to have the effect of impeding a takeover attempt and perpetuating current management.ⁿ¹⁰¹

[b] Proxy Rules

[i] Amended Rule 14a-8 n102

SEC Rule 14a-8, adopted under the 1934 Act, addresses when a company must include a stockholder's proposal in its proxy statement and identify the proposal in its form of proxy when the company holds an annual or special meeting of stockholders. As amended in 1998, the Rule includes detailed requirements, procedures, and standards for analyzing stockholder proposals. In summary, to require a company to include a proposal on the company's proxy card, and to include the proposal and any supporting statement in its proxy statement, the stockholder must be eligible and follow certain procedures. Under certain circumstances, the company is permitted to exclude the proposal, but only after submitting its reasons to the SEC.

[ii] Procedural Issues

A stockholder who holds at least \$2,000 in market value, or one percent, of a corporation's stock entitled to vote on a proposal and who has held that stock continuously for at least one year prior to its submission (and continues to hold the stock through the date of the meeting) may submit one proposal to a corporation for inclusion on the company's proxy statement and on the company's proxy card for a shareholder vote at an upcoming stockholders meeting. The proposal, including the accompanying supporting statement, may not exceed 500 words.

Stockholders under common control and family members are limited to one proposal for the group.ⁿ¹⁰³ If a proposal is several proposals combined into one, the proposal need not be included in the corporation's proxy material.ⁿ¹⁰⁴ If the proponent violates the one-proposal rule, the corporation must ask the proponent to reduce the number of proposals to one. If the corporation fails to make such a request, the additional proposals may not be omitted from the proxy materials.ⁿ¹⁰⁵ If the corporation makes such a request and the proponent fails to comply, the corporation may omit the proposals from the proxy materials.ⁿ¹⁰⁶

Before a corporation may exclude a proposal from its proxy material, the corporation must notify the stockholder of the problem with the proposal within 14 days of receipt and allow the stockholder to correct the problem. The stockholder must respond to the corporation's notice within 14 days of receiving the corporation's notice. If the deficiency in the stockholder proposal cannot be remedied (*e.g.*, the stockholder has not held the required number of shares for one year prior to the submission of the proposal), the corporation is not required to notify the stockholder of the deficiency prior to omitting the proposal. The burden is on the corporation to show that a proposal can be excluded.

A stockholder, or a representative appearing on the stockholder's behalf, must attend the stockholder meeting to present the proposal. If a stockholder, or the stockholder's representative, fails to attend the stockholder's meeting to present the

proposal, the corporation is entitled to exclude all of such stockholder's proposals from the corporation's proxy materials for any meetings held within the following two years.

If a corporation intends to exclude a stockholder proposal, the corporation must file its reasons for excluding the proposal, including applicable SEC authority or supporting law, with the SEC at least 80 days before it files its definitive proxy statement and must send a copy of its SEC submission to the proponent. The proponent is entitled, but not required, to file a response to the corporation's submission with the SEC.

[iii] *Grounds for Exclusion of Stockholder Proposals*

The 13 subparagraphs of Question 9 set forth the substantive grounds for excluding a stockholder proposal from the corporation's proxy statement.

Under Rule 14a-8(i)(1), a corporation may exclude a stockholder proposal if the proposal is not a proper subject for stockholder action under the law of the company's domicile. Because the laws of most states include language similar to Delaware's requirement that "[t]he business and affairs of every corporation organized under this chapter shall be managed by or under the direction of a board of directors,"ⁿ¹⁰⁷ the SEC staff has determined that proposals mandating the board to take certain action "may constitute an unlawful intrusion on the board's discretionary authority under the typical statute."ⁿ¹⁰⁸ Therefore, the SEC has allowed companies to exclude from their proxy materials mandatory stockholder proposals on issues that state law normally relegates to the authority and discretion of the board of directors.ⁿ¹⁰⁹

Nevertheless, the SEC has also stated that "proposals that merely recommend or request that the board take certain action would not appear to be contrary to the typical state statute."ⁿ¹¹⁰ For this reason, shareholder proposals, especially those dealing with fundamental matters of corporate governance (such as, for example, the repeal of bylaw provisions classifying corporate boards so that only one-third of the directors are elected each year, or the redemption of shareholder-rights plans), are often precatory, rather than mandatory.

The combined effect of the federal proxy rules and state law in this regard has raised an issue for corporate governance activists about how boards of directors should react to the adoption of precatory shareholder proposals, especially those that are adopted by an overwhelming majority vote of the shareholders.ⁿ¹¹¹ For purposes of this treatise, suffice it to say that some shareholder activists would like companies to treat precatory resolutions receiving the affirmative vote of a clear majority of shares outstanding voted as, in essence, mandatory, despite the SEC's historical position under proxy rule 14a-8(i)(1).ⁿ¹¹²

To get around the "proper subject for action by shareholders" restriction of Rule 14a-8(i)(1), some shareholder proponents have taken to casting their proposals as actions to amend corporate bylaws. In Delaware, as in most other states, corporate bylaws may be amended directly by the shareholders.ⁿ¹¹³ Commentators have questioned the validity of using mandatory bylaw proposals to end-run the "proper subject for action by shareholders" restriction and the basic principle that the business of every corporation is managed by or under the direction of the board of directors.ⁿ¹¹⁴ Nevertheless, one federal court has upheld the validity, under Oklahoma law, of a shareholder proposal for a mandatory bylaw amendment requiring a company to redeem its shareholder rights plan.ⁿ¹¹⁵

Under Rule 14a-8(i)(2), a corporation may omit a stockholder proposal if the proposal could require the corporation to violate state, federal or foreign law.ⁿ¹¹⁶ In 2008, the SEC, for the first time, requested the opinion of the Delaware Supreme Court on the validity of a proposed shareholder bylaw mandating reimbursement of dissidents' solicitation expenses in a successful short slate proxy fight.^{n116.1} Partially resolving a longstanding debate about the relationship between Delaware Code Sections 109(b) and 141(a), the Supreme Court concluded that such a mandatory bylaw was a "proper subject for action by the shareholders," and did not unduly encroach upon the board's authority simply by requiring the payment of money, but the particular proposal was illegal under Delaware law because could result in

mandating that the board pay money in a manner that violated its fiduciary duties, for example, "in a situation where the proxy contest is motivated by personal or petty concerns, or to promote interests that do not further, or are adverse to, those of the corporation."

Under Rule 14a-8(i)(3), a corporation may exclude a stockholder proposal if the proposal is contrary to any of the SEC's proxy rules. Typically, this rule is applied to exclude proposals that are vague or misleading or to require revisions to proposals that contain vague or misleading statements.ⁿ¹¹⁷

Under Rule 14a-8(i)(4), a corporation may exclude stockholder proposals addressing personal claims or grievances or to further the personal interest of a stockholder.ⁿ¹¹⁸

Rule 14a-8(i)(5) allows a corporation to exclude stockholder proposals that are not significantly related to the corporation's business. The provision permits omission of a stockholder proposal that is related to operations that account for less than five percent of the corporation's total assets and less than five percent of the corporation's net earnings and gross sales, and "is not otherwise significantly related to the issuer's business." According to the SEC, this provision "relates to proposals concerning the functioning of the economic business of an issuer and not to such matter as stockholders' rights, *e.g.*, cumulative voting."ⁿ¹¹⁹ The SEC has cited the above-quoted language relating to the "functioning of the economic business" to conclude that certain proposals meeting the economic insignificance test are nevertheless not excludable if they urge particular social or political positions.ⁿ¹²⁰

Rule 14a-8(i)(6) allows a corporation to exclude stockholder proposals that are beyond the corporation's power to effectuate. Under this rule, the staff SEC has issued "no-action" letters relating to proposals that would require the corporation to violate existing legal obligations.ⁿ¹²¹ The staff has also allowed exclusion of proposals that set vague or general objectives and do not suggest specific means for achieving such objectives.ⁿ¹²² Under this provision, the staff has also issued "no-action" letters regarding proposals that have attempted to regulate stockholder decisions and that are beyond the power of the corporation to implement.ⁿ¹²³

Rule 14a-8(i)(7) allows a corporation to exclude proposals dealing with the ordinary business operations of the corporation.ⁿ¹²⁴ Even in matters involving fundamental corporate governance procedures, the SEC has allowed the exclusion of shareholder proposals on the ground that "they relate to the ordinary business operations of the corporation."ⁿ¹²⁵

In 2002, the SEC changed its position significantly on the issue of whether certain executive-compensation-related proposals could be excluded on "ordinary business" grounds.ⁿ¹²⁶ The SEC declared that the "ordinary business" exclusion would not be available to exclude proposals focusing on equity compensation plans used to compensate only senior executive officers and directors. A few months later, the SEC underscored the point by reversing the Corporation Finance staff's position in a case involving National Semiconductor. The SEC concluded that the company could not exclude, under the "ordinary business" exclusion, a proposal that would require expensing of stock options.ⁿ¹²⁷

Rule 14a-8(i)(8) allows a corporation to exclude proposals dealing with elections to office.ⁿ¹²⁸

Rule 14a-8(i)(9) allows a corporation to exclude a proposal that directly conflicts with the corporation's own proposal.ⁿ¹²⁹

Rule 14a-8(i)(10) allows a corporation to omit a proposal if the proposal has been rendered moot because the corporation has already substantially implemented the proposal.ⁿ¹³⁰

Rule 14a-8(i)(11) allows a corporation to omit a proposal that is substantially duplicative of a proposal submitted by another stockholder that will be included in the corporation's proxy material.ⁿ¹³¹

Rule 14a-8(i)(12) allows a corporation to omit resubmissions or proposals that address substantially the same subject matter as proposals included in the corporation's proxy materials during the preceding five years if the proposal did not receive a required percentage of votes.ⁿ¹³²

Rule 14a-8(i)(13) allows a corporation to omit stockholder proposals dealing with specific amounts of cash or stock dividends.ⁿ¹³³

(n49)Footnote 47. *See* § 3.05[1][a] above.

(n50)Footnote 48. *State of Wisconsin Inv. Board v. Peerless Sys. Corp.*, CA 17637, 2000 Del. Ch. LEXIS 170 (Dec. 4, 2000) .

(n51)Footnote 49. *State of Wisconsin Inv. Bd.*, **1-2. Section 231(c) of the Delaware General Corporation Law provides that "[t]he date and time of the opening and the closing of the polls for each matter upon which the stockholders will vote ... shall be announced at the meeting." *See Del. Code Ann., tit. 8, § 231(c)*. It further states that no votes may be added or changed after the closing of the polls, unless a stockholder convinces the Court of Chancery otherwise. *See Del. Code Ann., tit. 8, § 231(c)*. While this statute would seem relevant to the validity of the conduct at issue in *Peerless*, no Delaware court has applied it in this context.

(n52)Footnote 50. *State of Wisconsin Inv. Bd.*, at **6-7.

(n53)Footnote 51. *State of Wisconsin Inv. Bd.*, at **8-11.

(n54)Footnote 52. *See State of Wisconsin Inv. Bd.*, at **16-17; *Cf. Derdiger v. Tallman*, (Sept. 11, 2002), 773 A.2d 1005 (holding business judgment rule would apply to one-day adjournment while keeping the polls open on re-domestication merger vote, where plaintiff alleged only that the proposal barely passed, without pleading facts suggesting any interference with or manipulation of the stockholder franchise).

(n55)Footnote 53. *State of Wis. Inv. Board*, 2000 Del. Ch. LEXIS 170 at *39 .

(n56)Footnote 54. *See State of Wisconsin Inv. Bd.*, , at **47, 50. Shortly after the *Peerless* decision, defendants in a suit with almost identical facts settled the plaintiff's voting manipulation claims. The court awarded the plaintiffs' attorneys' fees in recognition that the cessation of probable voting manipulation constitutes a benefit to the corporation and its stockholders. *See La. State Employees' Ret. Sys. v. Citrix Sys., Inc.*, CA 18298, 2001 Del. Ch. LEXIS 115 (Sept. 17, 2001) . One year later, in *Coates v. Netro Corp.*, No. 19154, 2002 WL 31112340, *2 (Del. Ch. Sept. 11, 2002), the Chancery court looked more kindly on a much shorter delay, observing that the mere fact that a meeting adjourned on May 31 and reconvened on June 1 did not state a cognizable claim for voting manipulation because "the plaintiff does not show 'that the primary purpose of the board's action was to interfere with or impede exercise of the shareholder franchise'" and that the adjournment therefore "receives the benefit of the business judgment rule."

(n57)Footnote 55. *See generally* Model Bus. Corp. Act Annot. § 7.07 at 7-67 to 68 (3d ed. 2002) (describing the historical background of modern record date statutes).

(n58)Footnote 56. Post record date transfers may, as a practical matter, have the effect of eliminating the voting rights associated with the transferred shares. *See In re The MONY Group, Inc. S'holders' Litig.*, CA 20554, 853 A.2d 661, 2004 Del. Ch. LEXIS 35 , **10-11 (Apr. 9, 2004) (recognizing that shares often do not trade with a proxy permitting the purchaser to vote and that many large institutional investors will not exercise the voting rights associated with shares they have since traded).

(n59)Footnote 57. *See generally* Fletcher's Cyclopedia of Corporations § 2007 at 52-53 (1996); *see also* Revised Model Bus. Corp. Act § 7.07 (2002 Supp.) (permitting bylaws or, absent a bylaw, board of directors to specify record date).

(n60)Footnote 58. *Del. Code Ann. tit. 8, § 213(a)*.

(n61)Footnote 59. *See Del. Code Ann. tit. 8, § 213(a)*.

(n62)Footnote 60. *Del. Code Ann. tit. 8, § 213(a)*.

(n63)Footnote 61. *Del. Code Ann. tit. 8, § 213(a); Del. Code Ann. tit. 8, § 222(c)*.

(n64)Footnote 62. *See Wyser-Pratte*, (Mar. 18, 1997) (stating that a voting manipulation claim could be stated in

the context of setting a record date); *cf.* *Gintel v. XTRA Corp.*, CA 11422 (Del. Ch. Feb. 27, 1990) (permitting brief adjournment where the same record date was preserved).

(n65)Footnote 63. *Wyser-Pratte, 1997 Del. Ch. LEXIS 41, at *41* .

(n67)Footnote 65. *See Wyser-Pratte, 1997 Del. Ch. LEXIS 41, at *6* .

(n68)Footnote 66. *See Wyser-Pratte, 1997 Del. Ch. LEXIS 41, *6* ; *see also Golden Cycle LLC v. Allan, CA 16301, 1998 Del. Ch. LEXIS 80, *23 (May 20, 1998)* (refusing to apply heightened scrutiny to record date set in compliance with statute, even though "the haste with which the Board acted to fix the record date and the Company's failure to give prompt notice of its establishment to suggest that [the Board] thought their actions would limit or interfere with [the plaintiff-stockholder's] ability to solicit consents"); *accord McDonough v. Foundation Co.*, 7 Misc. 2d 571, 155 N.Y.S.2d 67 (N.Y. Sup. Ct. 1956) (reasoning that, because the record date procedure is "intended for the administrative convenience of corporations ... rather than for the benefit of stockholders" there was no valid reason to deny the board the power to change the record date for a meeting to be reconvened after adjournment).

(n69)Footnote 67. *In re The MONY Group, Inc., S'holders' Litig.*, CA 20554, 853 A.2d 661, 2004 Del. Ch. LEXIS 35 (April 12, 2004) .

(n70)Footnote 68. *The MONY Group, 2004 Del. Ch. LEXIS 35, at *21* .

(n71)Footnote 69. The court distinguished cases applying heightened scrutiny to board decisions impacting votes in contested elections of directors. *See The MONY Group, 853 A.2d 661, 2004 Del. Ch. LEXIS 35* , at **24-28.

(n72)Footnote 69.1. 2009 Del. Laws Ch. 14, § 5, effective Aug. 1, 2009.

(n73)Footnote 70. *See, e.g., Model Bus. Corp. Act § 7.01 comm. at 7-8 (2002 Supp.)* (listing Delaware, Oklahoma, and Michigan as states permitting meeting to be held solely by remote communication.); *see also Md. Code Ann., Corps. & Ass'ns, § 2-503*.

(n74)Footnote 71. *See Del. Code Ann. tit. 8, § 211(a)(2)*.

(n75)Footnote 72. *See Del. Code Ann. tit. 8, § 211(a)(1)*.

(n76)Footnote 73. One of the few companies to have meetings solely by means of remote communication, Inforte, Inc., reported spending only \$2,000 of the \$20,000 it normally budgeted for its annual meeting. Significant cost savings were tied to simpler planning and eliminating the need for management and the board to travel to the meeting. *See Broc Romanek, Use of Electronic Access to Physical Stockholders' Meetings, available at www.realcorporatelawyer.com/faqs/meetings.html* (last visited Mar. 31, 2004).

(n77)Footnote 74. *See generally* Jesse A. Finklestein, *Shareholder Meetings in Cyberspace: Will Your Next Meeting Location Be a Website?*, Insights, Vol. 14, No. 6 at 15 (June 2000); *see also* Gregory V. Varallo and Richard P. Rollo, *Developments in Shareholders' Meetings: New Delaware Legislation and the ABA Handbook*, Insights, Vol. 15, No. 1 at 11 (Jan. 2001) (explaining that, because of this increased uncertainty, "well advised corporate boards would not want to hold *contested* cyberspace meetings").

(n78)Footnote 75. *See, e.g.,* The Council of Institutional Investors, *Council Policies - Shareholder Meetings, available at www.cii.org* (last visited Mar. 31, 2004) (stating "Companies should hold shareholder meetings by remote communication (so-called electronic or 'cyber' meetings) only as a supplement to traditional in-person shareholder meetings, not as a substitute"); *see also Delaware Law Allows "Virtual" Annual Meetings, available at www.socialfunds.com/news/article.cgi/article296.html* (last visited Mar. 31, 2004) (noting that the amendment to

Delaware's General Corporation Law passed despite "vigorous attempts by shareholder advocacy groups" to impede it).

(n79)Footnote 76. *Del. Code Ann. tit. 8, § 216*.

(n80)Footnote 77. *Del. Code Ann. tit. 8, § 216*.

(n81)Footnote 78. *Duffy v. Loft, Inc., 17 Del. Ch. 376, 152 A. 849, 853 (Del. 1930)* .

(n82)Footnote 79. *See, e.g., Ringling Bros.-Barnum & Bailey Combined Shows, Inc. v. Ringling, 29 Del. Ch. 610, 53 A.2d 441, 447 (Del. 1947)* (stating that "[t]he ownership of voting stock imposes no legal duty to vote at all"); *accord* SEC Rule 14a-4b(1) (requiring that proxy cards permit stockholders to vote for, against, or abstain from voting with respect to each matter presented for a stockholder vote).

(n83)Footnote 80. *See generally Hammersmith v. Elmhurst-Chicago Stone Co., CA 10,837, 1989 Del. Ch. LEXIS 98 (Aug. 17, 1989)* (citing lay dictionary).

(n84)Footnote 81. In contrast, voluntary abstentions of shares entitled to vote are counted for purposes of state statutes giving default quorum requirements. *See generally* Fletcher's Cyclopedia of Corporations § 2013 (1996 Supp.) (reporting that a majority of states, like Delaware, have default quorum provisions providing that a majority of shares entitled to vote constitute a quorum); *see also Duffy v. Loft, Inc., 17 Del. Ch. 140, 151 A. 223 (Del. Ch. 1930)* , *aff'd, 17 Del. Ch. 376, 152 A. 849 (Del. 1930)* .

(n85)Footnote 82. *See Del. Code Ann. tit. 8, § 216(2)*. Running against this general rule, directors may be elected by a plurality of the shares present or represented by proxy and entitled to vote. *See Del. Code Ann. tit. 8, § 216(2)* at § 216(3).

(n86)Footnote 83. *See* Model Bus. Corp. Act § 7.25(c), and comm. thereto (1999 Supp.); *see, e.g., N.Y. Bus. Corp. Law § 614(b)* ("Whenever any corporate action, other than the election of directors, is to be taken under this chapter by vote of the shareholders, it shall, except as otherwise required by this chapter or by the certificate of incorporation as permitted by this chapter or by the specific provisions of a bylaw adopted by the shareholders, be authorized by a majority of the votes cast in favor of or against such action at a meeting of shareholders by the holders of shares entitled to vote thereon. Except as otherwise provided in the certificate of incorporation or the specific provision of a bylaw adopted by the shareholders, an abstention shall not constitute a vote cast.").

(n87)Footnote 84. *See Berlin v. Emerald Partners, 552 A.2d 482, 494 (Del. 1989)* .

(n88)Footnote 85. *See Del. Code Ann. tit. 8, § 217(a)*.

(n89)Footnote 86. "[I]n dealing with its stockholders a Delaware corporation need not look beyond the registered owners." *Berlin v. Emerald Partners, 552 A.2d 482, 494 (Del. 1989)* , quoting, *Williams v. Sterling Oil of Oklahoma, Inc., 267 A.2d 630, 634 (Del. Ch. 1970)* , *rev'd on other grounds, 273 A.2d 264 (Del. 1971)* .

(n90)Footnote 87. Official Constitution and Rules of the New York Stock Exchange, NYSE Rule 452.

(n91)Footnote 88. The Rules of the American Stock Exchange are substantially similar. *See* AMEX Rules 576 and 577.

(n92)Footnote 89. *Berlin v. Emerald Partners, 552 A.2d 482 (Del. 1989)* .

(n93)Footnote 90. *Berlin, 552 A.2d at 494* .

(n94)Footnote 91. *See Berlin, 552 A.2d at 494* . As discussed above, a similar result would obtain under the majority of state statutes providing, as a default rule, that only those shares entitled to vote on a matter should be

counted toward quorum purposes. *See above*.

(n95)Footnote 92. Typical advance notice provisions require 60 to 90 days pre-meeting notice. In contrast, SEC rules generally require that stockholder proposals be included in the company's proxy materials and received at least 120 days before the proxy materials are mailed. *See* Rule 14a-8, question 5.

(n96)Footnote 93. *See, e.g., In re Gaylord Container Corp. S'holders' Litig.*, 753 A.2d 462, 464 (Del. Ch. 2000) (describing advance notice bylaw as one of several "garden-variety defensive measures that gave the board leverage to negotiate with any potential acquiror"); *Henley v. Santa Fe S. Pac. Corp.*, CA 9569, 1988 Del. Ch. LEXIS 32, *16 (Apr. 18, 1988) (characterizing advance notice bylaws adopted coincident with other defensive measures as "antitakeover measures typically taken in anticipation of a proxy contest.").

(n97)Footnote 94. *See, In re Gaylord Container Corp. S'holders' Litig.*, 753 A.2d at 482 (noting that "the fact that an acquiror must make its nomination at least sixty days in advance of the meeting merely lengthens the electoral contest in a way that appears to strike a reasonable balance between the electorate's need to hear out all participants in the debate and the acquiror's need for an adequate opportunity to line up a slate before the meeting"); *see also Stroud v. Grace*, 606 A.2d 75, 95-96 (Del. 1992) (reversing the Court of Chancery; holding that advance notice bylaw was valid absent a showing that it was abused in the context); *Mentor Graphics Corp. v. Quickturn Design Sys., Inc.*, 728 A.2d 25, 41-43 (Del. Ch. 1998) (discussing the reasonableness and commonality of advance-notice bylaws); *see also Hubbard v. Hollywood Park Realty Enters., Inc.*, CA 11779, 1991 Del. Ch. LEXIS 9 (Jan. 14, 1991) (noting that a 60-day advance notice provision was facially valid).

CHAPTER 3 STOCKHOLDERS' RIGHTS

1-3 Corporate Governance: Law and Practice § 3.06

AUTHOR: J. Travis Laster

§ 3.06 Special Meetings and Action by Written Consent

[1] Special Meetings

The statutes of most jurisdictions expressly permit stockholders to call special meetings.ⁿ¹ Jurisdictions that statutorily authorize stockholders to call special meetings usually limit this right to situations where holders of a minimum percentage of outstanding shares demand a special meeting.ⁿ² The applicable Delaware statute simply provides that special meetings may be called by the board of directors and by any other persons authorized by either the certificate of incorporation or the by-laws.ⁿ³ Where the charter or by-laws grant a clear and unconditioned right, the directors and officers do not have the discretion to refuse to call a special meeting.ⁿ⁴ Any ambiguities in the charter or bylaws with respect to stockholders' rights to call an annual meeting will be construed in favor of the right.ⁿ⁵ The remedy for a corporation's wrongful failure to call a special meeting is for stockholders to seek a court order compelling the call of the meeting.ⁿ⁶ Relatedly, courts have invalidated action taken at special meetings not called in accordance with the charter or bylaws.ⁿ⁷

A corporation's bylaws may clearly restrict or eliminate the ability of stockholders to call a special meeting. The Delaware courts have approved the adoption of bylaw provisions eliminating the right of stockholders to call special meetings, limiting the right to stockholders owning a particular portion of the corporation's equity, imposing a mandatory time period for the holding of a special meeting following the call by a stockholder, empowering the board to determine the time and place of a stockholder called meeting, and combinations of these provisions.ⁿ⁸ Although statutorily valid, directors must comply with their fiduciary duties when adopting these types of provisions.ⁿ⁹

[2] Action by Written Consent

All jurisdictions currently provide stockholders with the right to act by written consent in lieu of a stockholders' meeting.ⁿ¹⁰ Many states will permit stockholder action in lieu of a meeting only where the stockholders unanimously consent.ⁿ¹¹ Other jurisdictions, like Delaware, permit stockholders to act by written consent to take any action that could be taken at an annual or special meeting, upon the signing and delivery of written consents representing at least the minimum number of votes needed to authorize such action at a meeting in which all shares entitled to vote were cast.ⁿ¹² Generally this means that the holders of a majority of all outstanding shares entitled to vote on a matter can act by written consent. This right can be eliminated or modified only in the certificate of incorporation.ⁿ¹³ Stockholders

may act by written consent without prior notice, although non-consenting stockholders who would otherwise be entitled to vote on the particular matters affected are entitled to "prompt notice" once the consent is effected.ⁿ¹⁴ The delivery of the first written consent starts a sixty day window period, during which a sufficient number of consents to effect the action must be delivered to the corporation.ⁿ¹⁵

While the right to act by written consent was originally granted to eliminate the requirement of a stockholders' meeting where the outcome of the vote would be a foregone conclusion,ⁿ¹⁶ it has been surprisingly important in the takeover context.ⁿ¹⁷ The written consent mechanism is an important tool for a would-be insurgent, as it entails the power to determine the timing of a contest for corporate control, without prior notice to incumbent management.ⁿ¹⁸ In part because of the risks that are perceived to be associated with stockholders having the ability to immediately amend bylaws or oust an incumbent board, the statute has been narrowly construed.ⁿ¹⁹ For example, the statutory requirement that such consents must be signed by "the holders of outstanding stock" has been interpreted as limiting the power to act by written consent to stockholders of record or those acting by proxy for stockholders of record.ⁿ²⁰ Similarly, the technical requirement that each written consent be datedⁿ²¹ has been construed as a strict prerequisite to its efficacy, even where it is clear that the written consents were submitted within the statutory sixty day period.ⁿ²²

As with other aspects of stockholder governance, directors breach their fiduciary duties in taking actions that delay the written consent process for the purpose of entrenching themselves in office.ⁿ²³ For example, in *Datapoint Corp. v. Plaza Sec. Co.*, the Delaware Supreme Court considered the validity of bylaw amendments that created a sixty day waiting period before written consents delivered to the corporation would become effective.ⁿ²⁴ The incumbent board adopted the amendments after being advised of a 10 percent stockholder's intent to acquire control of the company, possibly through a consent solicitation.ⁿ²⁵ Acting upon the advice of counsel, the board adopted the amendments for the admitted purpose of obtaining additional time to "explore alternatives" including the possible distribution of "opposing solicitation material."ⁿ²⁶ Accordingly, the court invalidated the bylaw. While the *Datapoint* Court left open the possibility that bylaws "which would impose minimal essential provisions for ministerial review ..." of consents may be valid,ⁿ²⁷ the Delaware Supreme Court has never upheld a bylaw on this basis.ⁿ²⁸

Apparently in harmony with the Supreme Court's dictum in *Prime Computer*, the Delaware General Corporation Law permits a board of directors to perform the essentially ministerial task of fixing a record date for a consent solicitation.ⁿ²⁹ The board may adopt a resolution setting the record date within the next ten days.ⁿ³⁰ Where the board does not do so, the record date is the date upon which the first valid written consent is delivered to the corporation.ⁿ³¹ The board can preserve its discretion to set the record date by, prior to the delivery of the first valid written consent, adopting a bylaw or charter provision requiring the board to adopt a resolution fixing the record date within a set period after receiving notice of a stockholder's intention to solicit written consents.ⁿ³² Absent such a provision, however, the board loses its discretion to fix a record date upon the delivery of the first written consent.ⁿ³³

Ch. 1962) (granting mandatory injunction ordering company president to call special meeting where requirements in bylaws were satisfied).

(n5)Footnote 5. *See Stengel v. Rotman*, CA 18109, 2001 Del. Ch. LEXIS 22, **17-18 (Feb. 26, 2001) (construing bylaws in favor of stockholders' right to call special meeting to elect directors).

(n6)Footnote 6. *See Young v. Janas*, 34 Del. Ch. 287, 103 A.2d 299, 304 (Del. Ch. 1954) ; *see generally* Fletcher's Cyclopedia of Corporations § 2000 (2002 Supp.).

(n7)Footnote 7. *See, e.g., Young v. Janas*, 34 Del. Ch. 287, 103 A.2d 299, 304 (Del. Ch. 1954) ; *Josephson v. Cosmocolor Corp.*, 31 Del. Ch. 46, 64 A.2d 35, 48 (Del. Ch. 1949) .

(n8)Footnote 8. *See, e.g., In re Gaylord Container Corp. S'holders' Litig.*, 753 A.2d 462 (Del. Ch. 2000) (upholding bylaw amendment eliminating stockholders' ability to call special meetings as one of several related defensive measures); *Mentor Graphics Corp. v Quickturn Design Sys., Inc.*, 728 A.2d 25 (Del. Ch. 1998) , *aff'd*, 721 A.2d 1281 (Del. 1998) (upholding bylaw amendment creating mandatory 90-100 day delay); *Kidsco, Inc. v. Dinsmore*, 674 A.2d 483 (Del. Ch. 1995) , *aff'd*, 670 A.2d 1338 (Del. 1995) (upholding bylaw amendment raising minimum delay for special meeting from 35 days to 60 days).

(n9)Footnote 9. *See, e.g., Kidsco, Inc. v. Dinsmore*, 674 A.2d 483 (Del. Ch. 1995) , *aff'd*, 670 A.2d 1338 (Del. 1995) .

(n10)Footnote 10. *See* Model Bus. Corp. Act, comm. to § 7.04, at 7-38 (2002 Supp.). Under Delaware law, the removal and replacement of directors by written consent does not obviate the requirement that a corporation hold annual meetings for the election of directors. *See Hoschett v. TSI Int'l Software, Inc.*, 683 A.2d 43 (Del. Ch. 1996) . Directors placed by written consent hold office only until the next annual meeting.

(n11)Footnote 11. *See* Model Bus. Corp. Act Annot., comm. to § 7.04, at 7-38 (2002 Supp.) (noting that 28 jurisdictions, like the relevant Model Act provision, require unanimity).

(n12)Footnote 12. *See Del. Code Ann. tit. 8, § 228(a)*. In 1967, the Delaware statute was amended to eliminate the prior requirement of unanimity. *See* Drexler et al., *Delaware Corporation Law and Practice*, § 31.01 (LexisNexis Matthew Bender).

(n13)Footnote 13. *See Del. Code Ann. tit. 8, § 228(a)*; *see also Allen v. Prime Computer, Inc.*, 540 A.2d 417, 420 (Del. 1988) .

(n14)Footnote 14. *See Del. Code Ann. tit. 8, §§ 228(a), (e)*. The legal consequences of failing to give "prompt notice" after taking written consent are currently uncertain. In the only case to address this issue, *Di Loreto v. Tiber Holding Corp.*, the Court of Chancery suggested that a charter amendment could take effect upon approval and a filing of the amended certificate with the Secretary of State. The court refused to enforce the charter amendment, however, against non-consenting stockholders who did not receive notice of the exercise of written consent for five months, and who had acted in reliance on provisions in the pre-amendment charter. *See Di Loreto v. Tiber*, CA 16564, 1999 Del. Ch. LEXIS 87, **17-18 (June 29, 1999).

(n15)Footnote 15. *See Del. Code Ann. tit. 8, § 228(c)*.

(n16)Footnote 16. *See, e.g., Grynberg v. Burke*, CAs 5198 and 6480, 1981 Del. Ch. LEXIS 487, *18 (Aug. 13, 1981) (stating the written consent procedure is "obviously designed to facilitate shareholder action where the outcome is

a foregone conclusion").

(n17)Footnote 17. *See Allen v. Prime Computer, Inc.*, 540 A.2d 417, 419 (Del. 1988) .

(n18)Footnote 18. *See Drexler, et al., Delaware Corporation Law and Practice*, § 31.01 at 31-2 (2002 Supp.) (explaining that, absent the written consent procedure, incumbent directors would be entitled to focus any control contest around the annual meeting, the timing of which is frequently committed to directors' discretion).

(n19)Footnote 19. *See, e.g., H-M Wexford, LLC v. Encorp, Inc.*, 832 A.2d 129, 152 (Del. Ch. 2003) ; *Grynberg v. Burke*, 1981 Del. Ch. LEXIS 487, *18 (Del. Ch. Aug. 13, 1981) .

(n20)Footnote 20. *See, e.g., Freeman v. Fabinak*, C.A. No. 8035, mem. op. at 19, Hartnett, V.C. (Aug. 15, 1985); *Grynberg v. Burke*, 1981 Del. Ch. LEXIS 487, *18 (Del. Ch. Aug. 31, 1981) .

(n21)Footnote 21. *See Del. Code Ann. tit. 8, § 228(c)*.

(n22)Footnote 22. *See H-M Wexford LLC v. Encorp, Inc.*, 832 A.2d 129, 152 (Del. Ch. 2003) .

(n23)Footnote 23. *See, e.g., Allen v. Prime Computer, Inc.*, 540 A.2d 417, 420 (Del. 1988) (stating that "[a] bylaw [affecting the consent process] whose real purpose is delay of shareholder action is *per se* unreasonable") (emphasis added); *Datapoint Corp. v. Plaza Sec. Co.*, 496 A.2d 1031, 1036 (Del. 1985) (invalidating bylaw delaying the efficacy of written consents that was intended "to provide the incumbent board with *time* to seek to defeat the shareholder action ..."); *accord Edelman v. Authorized Distribution Network, Inc.*, 1989 Del. Ch. LEXIS 156 (Del. Ch. Nov. 3, 1989) (denying summary judgment for plaintiff-stockholders due to material dispute of fact regarding directors' purpose in adopting bylaw).

CHAPTER 3 STOCKHOLDERS' RIGHTS

1-3 Corporate Governance: Law and Practice § 3.07

AUTHOR: J. Travis Laster

§ 3.07 Protection of Minority Stockholders

Over time, certain duties, rules, and procedures have been developed to provide some measure of protection to minority stockholders. These duties are grounded in the concept that a controlling stockholder owes fiduciary duties to minority stockholders.

[1] Fiduciary Duty of Controlling Majority Stockholder to Minority

Under Delaware law, controlling stockholders owe fiduciary duties to the corporation and its minority stockholders.ⁿ¹ When a stockholder acquires or owns more than 50 percent of the company's common stock, or otherwise dominates and controls its affairs, the stockholder acquires fiduciary status.ⁿ² It is the "actual exercise of such control, not the simple potential for control, that creates the special duty."ⁿ³ Therefore, if a controlling stockholder takes no action with respect to a transaction involving the corporation, its status as a controlling stockholder alone will not impose a special duty.ⁿ⁴

As a fiduciary, a controlling stockholder owes duties of loyalty, care, and disclosure to the corporation and its minority stockholders. The duty of loyalty requires a controlling stockholder to refrain from acting in a self-interested manner. In the words of the Delaware Supreme Court, "Essentially, the duty of loyalty mandates that the best interest of the corporation and its [stockholders] takes precedence over any interest possessed by a director, officer or controlling [stockholder] and not shared by the stockholders generally."ⁿ⁵ Issues involving the duty of loyalty often arise in business dealings between a controlling stockholder and a corporation due to the possibility that the controlling stockholder may be acting in its own self interest.ⁿ⁶

Because of the potential for self-interested conduct, the Delaware Supreme Court has held repeatedly that "when a controlling stockholder stands on both sides of the transaction the conduct of the parties will be viewed under the more exacting standard of entire fairness as opposed to the more deferential business judgment standard."ⁿ⁷ The burden to show entire fairness rests on the defendant controlling stockholder. The burden may shift to the plaintiff if a truly independent, disinterested, and informed special committee of outside directors negotiates the transaction on behalf of the minority stockholders.ⁿ⁸

The entire fairness standard of review is composed of two parts: fair dealing and fair price. The fair dealing aspect relates to the process by which the transaction was approved and "embraces the questions of when the transaction was timed, how it was initiated, structured, negotiated, disclosed to the directors, and how the approvals of the directors and stockholders were obtained."⁹ Fair price involves the substantive terms of the transaction.¹⁰

A controlling stockholder also owes a limited duty of care to minority stockholders when selling its shares. Although a controlling stockholder generally may sell its block of stock to whomever it chooses and for any price negotiated,¹¹ a controlling stockholder may not intentionally or negligently sell to someone who would loot or otherwise intentionally harm the corporation.

[W]hile a person who transfers corporate control to another is surely not a surety for his buyer, when the circumstances would alert a reasonably prudent person to a risk that his buyer is dishonest or in some material respect not truthful, a duty devolves upon the seller to make such inquiry as a reasonably prudent person would make, and generally to exercise care so that others who will be affected by his actions should not be injured by wrongful conduct.¹²

The Delaware Court of Chancery has assumed without deciding "that a duty of care of a controlling [stockholder] that may in special circumstances arise in connection with a sale of corporate control is breached only by grossly negligent conduct."¹³ A more recent decision, however, suggests that a minority stockholder must "show that the controller acted with scienter and did not simply fail in the due diligence process"¹⁴

A controlling stockholder must also disclose "all material facts and circumstances surrounding the transaction."¹⁵ This duty applies most frequently to controlling stockholders in connection with cash-out mergers and tender offers where appraisal rights or "quasi-appraisal" rights are or will be available.¹⁶ In these circumstances, a stockholder plaintiff may claim that the duty of disclosure was breached because all material information was not disclosed. The duty of disclosure and the steps taken by a controlling stockholder to fulfill its duty also are considered as a component of the "fair dealing" prong of the entire fairness standard.¹⁷

Although a controlling stockholder owes fiduciary duties to the minority stockholders, the controlling stockholder may act in a self-interested manner when acting "qua stockholder."¹⁸ A controlling stockholder can vote its shares in favor or against a transaction for any reason whatsoever: "It is not objectionable that their motives may be for personal profit, or determined by whim or caprice, so long as they violate no duty owed other stockholders."¹⁹ Furthermore, Delaware courts have stated that "[the law] does not, absent a showing of culpability, require that directors or controlling [stockholders] sacrifice their own financial interest in the enterprise for the sake of the corporation or its minority [stockholders]."²⁰ Delaware courts also have recognized that "one who may be both a creditor and a fiduciary (*e.g.*, a director or controlling shareholder) does not by reason of that status alone have special limitations imposed upon the exercise of his or her creditor rights."²¹

[2] All-Holders and Best-Price Rules

Minority stockholders are also protected under federal rules that regulate tender offers. Rule 14d-10(a), promulgated under the 1934 Act, states that "[n]o bidder shall make a tender offer unless: (1) [t]he tender offer is open to all security holders of the class of securities subject to the tender offer; and (2) [t]he consideration paid to any security holder pursuant to the tender offer is the highest consideration paid to any other security holder during such tender offer."²² These rules are commonly known as the all-holders and best-price rules.

Although the rules seem straightforward, interpretation of the best-price rule can be difficult. Most large corporate transactions occur in stages over an extended period. Furthermore, many directors and officers are also stockholders of the corporation. As a result, questions often arose concerning compensation packages that directors and officers were offered in connection with a tender offer. As a result of uncertainty over how compensation arrangements would be

treated under the best-price rule, transaction planners often favored long-form mergers over tender offers to avoid the risk of inadvertently triggering a requirement to pay a higher tender offer price.

In 2006, the SEC amended the best-price rule to clarify that the rule requires only that the consideration paid to any security holder in the tender offer be the highest consideration paid to any other security holder for the securities tendered in the offer. The SEC thus made clear that the intent of the rule was not to require an analysis of payments to employees, directors, or other stockholders of the corporation pursuant to compensation, severance, employee benefit, or other arrangements. The SEC also specifically exempted from the best price rule employment compensation, severance and other employee benefit arrangements entered by the bidder or target company with any holder of securities of the target company, as well as payments made in connection with those arrangements, provided that such payments are being paid for services performed and are not calculated based on the number of shares tendered. The SEC observed that while personnel decisions often are made concurrently with the decision to pursue a transaction, they are generally made independent of the consideration paid for tendered securities.

The amended rule also creates a non-exclusive safe harbor provision excluding compensation, severance and benefit arrangements from the best price rule if these arrangements are approved by the compensation committee of the board of directors of the target company, or a committee performing similar functions. The arrangements also may be approved by the board or a similar committee of the bidder, if the bidder is a party to the arrangement. The board or committee must determine that the payment is being paid and is not calculated based on the number of shares tendered.

[3] Cumulative Voting in Elections of Directors

Cumulative voting increases the voting power of shares by permitting stockholders to accumulate all of the possible votes they could cast for all the directorships to be contested, and then vote them as they wish in favor of (or against) just one or a few candidates.ⁿ²⁵ It reduces the minimum number of votes a stockholder must have to be mathematically assured of electing a director, which number will continue to decrease as the number of directors standing for election increases. Under a cumulative voting regime, the number of shares needed to elect a desired number of directors is roughly determined by (i) multiplying the total number of outstanding shares authorized to vote by the desired number of directors to be elected, (ii) dividing this product by the number that equals the total number of directors standing for election plus one, and (iii) adding one to the quotient (or some fraction of one, where fractional voting of shares is permitted).ⁿ²⁶ Applying this formula reveals that, for example, in an election with five contested directorships, holders of greater than 16.67 percent of the corporations' applicable voting power can be assured of board representation by accumulating votes and casting them for one director.ⁿ²⁷ Under traditional or straight voting, of course, one would need greater than 50 percent of the applicable voting power to be ensured of electing one director.

While several jurisdictions have statutes or constitutional provisions making cumulative voting rights mandatory, the great majority of jurisdictions permit but do not require it.ⁿ²⁸ By statute, Delaware permits cumulative voting to the extent provided for in a company's certificate of incorporation.ⁿ²⁹ Like other provisions in a company's charter, cumulative voting provisions can be repealed, at least where such amendment is not accomplished for an inequitable purpose.ⁿ³⁰ Delaware courts have repeatedly upheld corporate actions that adversely impact minority rights under cumulative voting provisions where such actions are at least arguably in the best interest of the corporation.ⁿ³¹ Yet, so long as a certificate of incorporation provides for cumulative voting, directors cannot be removed without cause where the votes cast against removal, if voted cumulatively, would be sufficient to elect the director at a contested election.ⁿ³² On the other hand, the minority's cumulative voting rights cannot save a director whom the holders of a majority of shares have voted to remove for cause.ⁿ³³

[4] Appraisal Proceedings

Stockholders' appraisal rights refer to minority stockholders' entitlement to receive in cash the fair value of their stock, as determined by a judge on the basis of a factual record developed in litigation, in certain limited circumstances.ⁿ³⁴

Minority stockholders' appraisal rights developed as a statutory remedy to compensate stockholders for the loss of broader common law rights to prevent certain fundamental corporate transactions, which then required unanimous stockholder approval, by simply withholding their consent.ⁿ³⁵ Under Delaware's appraisal statute, stockholders of corporations that are involved in a consolidation or merger are entitled to demand appraisal rights.ⁿ³⁶ Unlike many other jurisdictions, the sale of all or substantially all assets does not trigger appraisal rights under Delaware law.ⁿ³⁷ Upon the perfection of appraisal rights, the traditional rights incidental to the stockholder-company relationship are lost, and the stockholder comes to occupy the position of "a quasi-creditor with a monetary claim" against the corporation.ⁿ³⁸

There are several exceptions to the general rule that appraisal rights are available in a merger or consolidation. Section 262(b)(1) provides in pertinent part:

[N]o appraisal rights under this section shall be available for the shares of any class or series of stock, which stock, or depository receipts in respect thereof, at the record date fixed to determine the stockholders entitled to receive notice of and to vote at the meeting of stockholders to act upon the agreement of merger or consolidation, were either (i) listed on a national securities exchange or designated as a national market system security on an interdealer quotation system by the National Association of Securities Dealers, Inc., or (ii) held of record by more than 2,000 holders ...ⁿ³⁹

These so-called "market out" exceptions disallow appraisal rights when stockholders who are dissatisfied with merger consideration will have the viable opportunity to receive "fair value" for their shares through market trades.ⁿ⁴⁰ However, the market out exceptions are inapplicable, and appraisal rights will be available, where a stockholder is required to accept anything other than (a) shares of the surviving corporation, (b) shares of any other corporation meeting the marketability test set forth above, (c) cash in lieu of fractional shares, or some combination of (a)-(c) above.ⁿ⁴¹ Appraisal rights are unavailable to the stockholders of a corporation surviving a merger where, because of the minimal impact of the merger upon existing stockholder interests, no stockholder approval was required for consummation.ⁿ⁴² In statutory "short form" mergers between subsidiaries and parents owning greater than 90 percent of the subsidiaries' voting securities,ⁿ⁴³ the stockholders of the parent corporation do not enjoy appraisal rights, unlike their counterparts in the subsidiary.ⁿ⁴⁴

A dissenting stockholder demanding appraisal rights must demonstrate that he is entitled to an appraisal.ⁿ⁴⁵ Appraisal rights are only available to stockholders of record on the date of the making of the demand for appraisal who continue to be record holders on the effective date of the merger.ⁿ⁴⁶ Furthermore, appraisal rights are only available to stockholders who have not voted in favor or otherwise consented to the merger.ⁿ⁴⁷ A stockholder may pursue appraisal for shares acquired after the announcement of or the record date for the vote on the merger.^{n47.1}

The corporation must notify each stockholder of record that appraisal rights are available at least 20 days prior to the meeting held for a vote on the merger.ⁿ⁴⁸ Such notice must include a copy of Section 262.ⁿ⁴⁹ Where the merger is approved by written consent, or is a "short-form" merger for which no vote is required, the surviving or resulting corporation must provide notice within ten days thereafter.ⁿ⁵⁰

Where a stockholder vote on the merger is required, stockholders may perfect appraisal rights by making a written demand for appraisal prior to the vote.ⁿ⁵¹ Where the merger is effected without a stockholder vote, demands for appraisal must be submitted within 20 days after the notice announcing the transaction.ⁿ⁵² There is no required form for a demand.ⁿ⁵³ By statute, a demand is sufficient if it reasonably informs the corporation of the identity of the stockholder and that the stockholder intends thereby to demand the appraisal of his shares.ⁿ⁵⁴ Submitting a written proxy voting against the merger will not itself suffice for a written demand.ⁿ⁵⁵ Where a dispute arises as to whether the demand suffices to notify the corporation of the intent to seek appraisal, the issue will be whether the writing fairly implies such an intention.ⁿ⁵⁶ The written demand must be signed by the holder of record or joint holders of the shares in order to be effective under the statute.ⁿ⁵⁷ Unlike the liberal and permissive standard to determine whether a demand

gives sufficient notice, the procedural aspects of the statute, including those pertaining to record ownership, are strictly construed.ⁿ⁵⁸

Once made, demands for appraisal may later be withdrawn, with the effect of allowing the stockholder to accept the merger consideration, in certain well-defined circumstances. First, a demand may be withdrawn for a period of 60 days after the effective date of the merger as a matter of right.ⁿ⁵⁹ After the 60 day period, demands may only be withdrawn with the corporation's written consent and with the approval of the court.ⁿ⁶⁰ A purpose of this requirement is to prevent a party to an appraisal action from being induced to abandon the action, through the receipt of a premium settlement offer, to the detriment of the remaining stockholders demanding appraisal.ⁿ⁶¹

If the merger is approved at the meeting, the corporation must send notice that the merger has become effective to each stockholder who has complied with the requirements of Section 262 and has not voted for the merger, within 10 days after the effectiveness of the merger.ⁿ⁶² The stockholder then has 20 days from the date of the mailing of the notice of effectiveness of the merger to demand in writing his appraisal rights.ⁿ⁶³ Within 120 days after the effective date of the merger, the surviving corporation or any stockholder who preserved his appraisal claims may file a petition in the Court of Chancery demanding a determination of the value of the stock of all such stockholders.ⁿ⁶⁴ Within 120 days after the effective date of the merger, upon written request, such stockholder is entitled to receive a statement from the corporation setting forth the aggregate number of shares not voted in favor of the merger and the aggregate number of shares making demands for appraisal.ⁿ⁶⁵

The corporation cannot modify the time periods specified in Section 262. Delaware courts have indicated that, since stockholders are required to strictly comply with the formalities of Section 262 when seeking to exercise their appraisal rights, corporations should be held to the same standard.ⁿ⁶⁶

Stockholders who vote for or otherwise consent to a merger forfeit their appraisal rights.ⁿ⁶⁷ However, it is not necessary for a stockholder to vote against the proposed merger.ⁿ⁶⁸ Courts generally look at the actions of the holder of record when determining whether a stockholder is entitled to an appraisal. Therefore, if the record holder tenders its shares and accepts the merger consideration, the beneficial holder of the shares may lose his right to an appraisal even where the beneficial owner submits a demand to the corporation.ⁿ⁶⁹ Holders of non-voting stock who properly dissent from a transaction are entitled to the same appraisal remedy afforded to dissenting holders of voting shares.ⁿ⁷⁰ The appraisal rights of stockholders who split their holdings and vote some shares in favor of the merger while withholding consent as to others has yet to be determined.ⁿ⁷¹ The Court of Chancery upheld a stockholder's decision to withdraw an appraisal demand with regards to some, but not all, of the shares covered under the demand.ⁿ⁷² The court reasoned that the literal terms of the statute did not preclude the partial withdrawal, which in any event had the benefit of permitting stockholders' use of the merger consideration received in exchange for tendering some shares in order to defray the costs of an appraisal proceeding.ⁿ⁷³

The final step in perfecting appraisal rights is the filing of a petition in the Court of Chancery demanding a valuation with respect to all stockholders and shares seeking to exercise their appraisal rights. Either the corporation or any stockholder seeking appraisal may submit the petition, which must be filed within 120 days after the effective date of the merger.ⁿ⁷⁴ Either coincident with its filing of the petition, or within 20 days after being served by a stockholder-filed petition, the corporation must file a verified list of the names and addresses of stockholders seeking appraisal rights.ⁿ⁷⁵ Due to the narrow scope of an appraisal proceeding, the corporation's answer to the petition may not assert counterclaims unrelated to the petition.ⁿ⁷⁶ The Delaware courts previously held that only a holder of record could file an appraisal petition under § 262,ⁿ⁷⁷ but in 2007 the legislature made it clear that a beneficial owner could also file an appraisal petition or request a statement of shares with respect to which demands for appraisal have been received.ⁿ⁷⁸

A hearing is then held to determine the stockholders who have submitted proper and timely demands.ⁿ⁷⁹ Each stockholder seeking appraisal bears the burden of proving compliance with the statutory requirements.ⁿ⁸⁰ With respect

to all stockholders making proper appraisal demands, the proceeding is in the nature of a class suit to determine the value to be paid by the corporation.ⁿ⁸¹ Like a class action plaintiff, a stockholder filing the petition stands in a fiduciary relationship to other stockholders seeking appraisal.ⁿ⁸²

Strict compliance with the statutory prerequisites is required. For example, failure of a stockholder demanding appraisal to comply with filing deadlines provides the corporation with a valid defense to the appraisal claim regardless of whether the corporation is proximately harmed by the lack of statutory notice.ⁿ⁸³

After the court determines which shares qualify for participation in the appraisal proceeding, the value of the respective shares must be determined. Delaware courts have "recognized that there is no one exclusive means of assigning value to a Delaware corporation for purposes of an appraisal."ⁿ⁸⁴ Although the valuation of a particular stock will vary according to the peculiar facts of a case, Section 262 requires a determination of value isolated from any transactional effects.ⁿ⁸⁵ Thus, "[f]uture value that would not exist but for the merger cannot ... accurately be said to have been taken from a dissenting stockholder in the merger, even if it is capable of being proven on the date of the merger."ⁿ⁸⁶ Section 262(h) states the standard for appraisal as follows:

[T]he Court shall appraise the shares, determining their fair value exclusive of any element of value arising from the accomplishment or expectation of the merger, together with a fair rate of interest, if any, to be paid upon the amount determined to be the fair value. In determining such fair value, the Court shall take into account all relevant factors.ⁿ⁸⁷

The Court of Chancery thus has an obligation to consider all relevant factors in appraising the value of stock held by dissenters.ⁿ⁸⁸

As explained by the Delaware Supreme Court, the "basic concept" of fair value is that "the stockholder is entitled to be paid for that which has been taken from him, viz., his proportionate interest in a going concern," taking into account all factors and elements, including a corporation's future prospects, that reasonably bear on its true value.ⁿ⁸⁹ The Court of Chancery has broad discretion in this regard and may choose to adopt any valuation method offered by the parties, or may use any other method as it deems appropriate.ⁿ⁹⁰ Asset value, market value, earnings, future prospects of the corporation and "any other elements that affect the intrinsic or inherent value" of the appraised stock may be considered.ⁿ⁹¹ Where the merger results from arms' length negotiations and an open bidding process, the merger consideration (minus any sums attributable to anticipated post-merger synergies) may itself be the best indicator of fair value.ⁿ⁹²

Delaware courts have explained the burden of proof in an appraisal action as follows:

In an appraisal action, each side has the burden of proving its respective valuation position. No presumption, favorable or unfavorable, attaches to either side's valuation, including the actual merger price. Because no determination of 'liability' is required to obtain relief under § 262, and since neither side is benefitted or burdened by any presumption, the burden of proof in an appraisal action should be the same as in any normal civil action, i.e., proof by a preponderance of the evidence.ⁿ⁹³

In the event that none of the parties establishes a value satisfactory to the court, the court must make such a determination based upon its own analysis.ⁿ⁹⁴

CHAPTER 4 LEGAL DUTIES AND RESPONSIBILITIES OF THE BOARD

1-4 Corporate Governance: Law and Practice § 4.01

AUTHOR: J. Travis Laster

§ 4.01 The Business of the Corporation "Shall Be Managed by or Under the Direction of a Board of Directors"

It is universally recognized that the board of directors is vested with the ultimate power and duty to manage the business of the corporation. The Model Business Corporation Act provides that "[a]ll corporate powers shall be exercised by or under the authority of, and the business and affairs of the corporation managed by or under the direction of, its ... [the company's] board of directors"n1 The American Law Institute's *Principles of Corporate Governance: Analysis and Recommendations* applies a comparable concept: "The board of directors of a publicly held corporation should ... [m]anage the business of the corporation"n2 The corporation laws of all fifty states address the powers and duties of directors.n3 The Delaware General Corporation Law provides, "[t]he business and affairs of every corporation organized under this chapter shall be managed by or under the direction of a board of directors, except as may be otherwise provided in this chapter or in its certificate of incorporation"n4 The remainder of this chapter will focus on, and all section references will refer to, the Delaware General Corporation Law.

The phrase "business and affairs of every corporation"n5 has been interpreted to grant extremely broad powers to the board of directors. This broad grant of authority reflects the underlying policy that "directors, not shareholders, are charged with the duty to manage the firm."n6 Directors' managerial prerogatives include the power to devise a plan for the corporate enterprise and to select a time frame for the achievement of corporate goals.n7 This includes the power to control all the various tasks associated with running a public corporation, such as deploying capital and making investments,n8 devising a marketing strategy,n9 and paying dividends.n10 Directors are similarly empowered in decisions regarding matters of fundamental importance to the corporate enterprise. In the takeover context, for example, the board has broad power and authority, as well as a concomitant duty, to determine and implement a course of action that is in the corporation's best interests.n11 In the merger context, the directors are similarly empowered to choose a merger partner for the corporation.n12

Although the Delaware General Corporation Law grants broad powers to the board of directors, the stockholders must make the final decision in some matters of great importance. For example, a board cannot alter the fundamental governing documents of the corporation (i.e., the certificate of incorporation and by-laws) without some form of stockholder approval. At most, the board can recommend changes to the certificate of incorporation for stockholder approval.n13 The board of directors only has the power to adopt, amend, or alter the corporation's by-laws if the stockholders previously granted the directors that power in the certificate of incorporation, and the grant of this power

to the board of directors in no way limits the stockholders' power to adopt, amend, or repeal by-laws.ⁿ¹⁴ For certain other matters of fundamental corporate importance, such as mergers, liquidations, and sales of all or substantially all assets, the stockholders have the ultimate discretion to approve or veto the board's recommendations.ⁿ¹⁵ But even where stockholders have the final say, only the board has the power to initiate such changes via formal resolution.ⁿ¹⁶ The only exceptions to the general rule requiring board action are that shareholders unilaterally may dissolve the corporation,ⁿ¹⁷ amend the by-laws,ⁿ¹⁸ and effect a short-form merger.ⁿ¹⁹

The duties conferred under Section 141(a) have been construed to prevent a board of directors from limiting its fiduciary responsibilities. In *Quickturn Design Systems, Inc. v. Shapiro*, for example, the Delaware Supreme Court held that a delayed redemption provision in a stockholder rights plan, also known as a "slow hand" poison pill, was invalid.ⁿ²⁰ The provision purported to limit newly elected directors from redeeming the poison pill for a period of six months. The court explained that "Section 141(a) requires that any limitation on the board's authority be set out in the certificate of incorporation."ⁿ²¹ Because there was no applicable provision in Quickturn's charter, the delayed redemption provision was invalid because Section 141(a) "confers upon any newly elected board of directors full power to manage and direct the business and affairs of a Delaware corporation."ⁿ²²

The holding in *Quickturn*, however, should be contrasted with the Court of Chancery's decision in *UniSuper Ltd. v. News Corp.*ⁿ²³ In *Unisuper*, several institutional stockholders brought suit to enforce a company's alleged agreement to submit the decision to renew the company's poison pill to a stockholder vote. The company argued that the agreement would be invalid under Section 141(a). The court disagreed, stating that the agreement did not violate Section 141(a) because it ceded the board's power to the stockholders rather than a third party.ⁿ²⁴

Another one of the obligations created by the broad statutory grant of authority to directors is that directors may not abdicate their management responsibilities or delegate them wholesale to others.ⁿ²⁵ Directors abdicate their management responsibilities when they render themselves unable to exercise independent business judgment with regard to the matter at issue.ⁿ²⁶ For this reason, a director may not act by proxy.ⁿ²⁷ Directors also may not delegate duties assigned to the board of directors by statute.ⁿ²⁸ For example, a board may not delegate to officers of the corporation complete authority to negotiate, fix the final terms of, and conclude a binding agreement for the sale of all or substantially all of the corporation's assets.ⁿ²⁹ Directors may, however, direct officers or agents of the corporation to carry out tasks under the supervision and control of the board, including the day-to-day management of the corporation or negotiation of terms of significant agreements subject to board approval.ⁿ³⁰ As discussed in the next section, the board of directors also may delegate tasks and authority to committees of the board.

CHAPTER 4 LEGAL DUTIES AND RESPONSIBILITIES OF THE BOARD

1-4 Corporate Governance: Law and Practice § 4.02

AUTHOR: J. Travis Laster

§ 4.02 The Board's Authority to Delegate to a Committee and the Use of Committees under State Law

Boards of directors frequently delegate tasks and functions to committees. Depending on the scope of the grant of authority to the committee, the committee can wield many of the powers of the board in the management of the business and affairs of the corporation and potentially act for the whole board on matters that fall within the committee's delegated area of responsibility. Common board committees include the executive committee, finance committee, audit committee, compensation committee, nominating committee, and with growing frequency, the corporate governance and nominating committee.ⁿ¹ Detailed discussions of the required and recommended composition, scope of responsibilities, charters, and procedures of the nominating and corporate governance committee, the audit committee and the compensation committee, may be found in Chapters 8, 9, and 10 *below*. In instances where a board utilizes committees, particularly audit and compensation committees, the committees may perform the board's task of monitoring the management of the corporation. Such committees should be comprised primarily of non-management directors.ⁿ² Under the Sarbanes-Oxley Act, audit committees must be composed exclusively of independent directors.ⁿ³

Boards of directors often form so-called special committees to address transactions in which certain directors have a conflict of interest, such as management buy-outs or transactions involving a controlling stockholder.ⁿ⁴ Boards of directors also frequently use special committees to investigate allegations of wrongdoing and determine whether to initiate litigation on behalf of the corporation or permit a stockholder derivative suit to proceed.ⁿ⁵

Delaware law does not place significant restrictions or requirements on the ability of a board of directors to form and delegate authority to a committee. Under Section 141(c) of the Delaware General Corporation Law, the board of directors of a Delaware corporation has the power to "designate one or more committees, each committee to consist of one or more of the directors of the corporation."ⁿ⁶ The board may, with certain exceptions, delegate to a committee all of its power and authority of the board in managing the business and affairs of the corporation. The exceptions to the board's authority in this area depend on whether the corporation is governed by Section 141(c)(1) or (c)(2) of the Delaware General Corporation Law.

Section 141(c)(1) of the Delaware General Corporation Law governs all corporations incorporated prior to July 1, 1996 unless a majority of the whole board of such a corporation adopts a resolution declaring that the corporation shall be

governed by Section 141(c)(2).ⁿ⁷ Under Section 141(c)(1), a board committee may be granted the full powers of the board except that a committee may not be given the power to (i) amend the corporation's by-laws or certificate of incorporation, (ii) recommend to stockholders an amendment to the by-laws or certificate of incorporation, (iii) adopt an agreement of a merger or consolidation, (iv) recommend to the stockholders a sale of all or substantially all of the corporation's assets, or (v) recommend the corporation's dissolution or a revocation of a dissolution.ⁿ⁸ Also under Section 141(c)(1), a committee of the board may not declare a dividend, issue stock fixing the designations and any preferences or rights of certain classes of stock insofar as they relate to dividends, redemption, dissolution, any distribution of assets of the corporation or the conversion into, or the exchange of such shares for, shares of any other stock of the corporation, or approve a certificate of ownership in a short-form merger of a 90-percent-owned subsidiaryⁿ⁹ unless the resolution creating the committee, the by-laws, or the certificate of incorporation specifically bestows such powers upon the committee.ⁿ¹⁰

Section 141(c)(2) of the Delaware General Corporation Law governs all corporations incorporated on or after July 1, 1996.ⁿ¹¹ Section 141(c)(2) permits broader authority to be granted to board committees. Under Section 141(c)(2), any board committee "shall have and may exercise all the powers and authority of the board of directors in the management of the business and affairs of the corporation" to the extent granted in the by-laws or the resolutions creating the committee.ⁿ¹² There are two significant exceptions. First, a committee cannot approve, adopt, or recommend to shareholders any action or matter expressly required by the Delaware General Corporation Law to be submitted to shareholders for a vote.ⁿ¹³ Second, a committee cannot adopt, amend, or repeal any by-law.ⁿ¹⁴

The more limited powers and authorities that can be granted to a committee under Section 141(c)(1) require particular care when using a committee to issue blank check preferred stock.ⁿ¹⁵ Under Section 141(c)(1), a committee of the board of directors may, to the extent authorized in the resolutions providing for the committee, fix the designations of shares of blank check preferred stock, the number of shares in a series of such stock, and certain preferences or rights of such shares, *but not voting rights*, which must be established by the full board.ⁿ¹⁶ In contrast, committees governed by Section 141(c)(2) can fix the voting rights of blank check preferred stock so long as the resolution establishing the committee empowers the committee to do so.ⁿ¹⁷

Sections 141(c)(1) and (2) specifically provide for the designation of alternate members of committees. These sections permit the board to designate in advance the alternate members to replace an absent or disqualified member. Alternatively, the by-laws may set forth a procedure whereby the remaining committee members present at the meeting unanimously appoint an alternate.ⁿ¹⁸

In addition to committees of the board, the board may create any number of committees of the corporation. Committees of the corporation may only advise the board and do not have the power to act for the board. Because their role is advisory, committees of the corporation need not be created by the statutory procedure set forth in Section 141(c) and may have members other than current directors.ⁿ¹⁹

CHAPTER 4 LEGAL DUTIES AND RESPONSIBILITIES OF THE BOARD

1-4 Corporate Governance: Law and Practice § 4.03

AUTHOR: J. Travis Laster

§ 4.03 Basic Duties of Directors

[1] Overview of Directors' Duties

Under Delaware law, directors owe basic fiduciary duties of care and loyalty, along with the subsidiary duty of good faith.ⁿ¹ In addition to the traditional fiduciary duties, Delaware directors also have a duty of oversight. The duty of care generally requires directors to inform themselves of all material facts regarding a decision and to give the matter before them due deliberation before taking action. The duty of loyalty generally requires that directors act solely in furtherance of the best interests of the corporation and its shareholders. The duty of good faith is part of the duty of loyalty and requires that a director not intentionally or recklessly disregard his duties. The duty of oversight is a process-oriented duty that requires directors to act in good faith to establish an adequate system to monitor corporate compliance with legal obligations.

[2] The Duty of Care

The essence of the duty of care is the directors' obligation to inform themselves "prior to making a business decision, of all material information reasonably available to them."ⁿ² Directors should have sufficient opportunity to acquire knowledge material to the decisions they need to make and should have the benefit of the appropriate advice and input from management and advisers.ⁿ³ While the board must be reasonably informed, it need not be informed of every fact.ⁿ⁴ The duty of care becomes even more important in the context of a decision to sell the corporation or to engage in an extraordinary transaction.ⁿ⁵

Under Section 141(e) of the Delaware General Corporation Law, any member of the board of directors "shall, in the performance of such member's duties, be fully protected in relying in good faith upon the records of the corporation and upon such information, opinions, reports or statements presented to the corporation by any of the corporation's officers or employees, or committees of the board of directors, or by any other person as to matters the member reasonably believes are within such other person's professional or expert competence and who has been selected with reasonable care by or on behalf of the corporation."ⁿ⁶ Still, directors are only "entitled to good faith, not blind, reliance" on the reports of experts.ⁿ⁷ In fulfilling their duty of care, directors must make a "reasonable inquiry" into reports submitted to the board.ⁿ⁸

Section 141(e) will not preserve deferential business judgment review of a transaction approved by a board if the directors were deliberately misled by management or their advisors.ⁿ⁹ The Court of Chancery has held that a board of directors could not have reasonably relied on a valuation report that expressly disclosed that it was based on unverified and undocumented information (that allegedly consisted of fabrications by certain board members) and that relied on facts that the directors knew or should have known to be false.ⁿ¹⁰

In the post-trial decision in *In re The Walt Disney Co. Derivative Litigation*, the Court of Chancery held that a compensation committee reasonably relied on a compensation expert who worked with two members of the committee in analyzing a proposed compensation package for incoming company president Michael Ovitz.ⁿ¹¹ Upon publicity of Ovitz's severance payments upon his termination, the expert had made comments in the media criticizing his own failure to make certain calculations regarding the cost of potential termination payments. The Court, however, observed that it could not conclude that any member of the committee had actual knowledge that the expert's analysis was inaccurate or incomplete. The Court also held it unnecessary for the expert's advice or reports to be formally relayed to the committee as a whole for reliance to be proper under Section 141(e).ⁿ¹² Moreover, the Court held that directors may place good faith reliance on experts even when they do not follow that expert's recommendations to the letter. The Court noted that "[t]he role of experts under § 141(e) is to assist the board's decisionmaking--not supplant it," and that a contrary interpretation would conflict with the mandate of Section 141(a) that the corporation be managed "by or under the direction of a board of directors."ⁿ¹³

In reviewing directors' compliance with the duty of care, Delaware courts consider a number of factors, including whether the directors (i) had sufficient advance notification of the purpose of the meeting and documentation describing the essentials of any proposed course of action; (ii) were informed of pertinent internal and/or external developments leading to the issue under consideration; (iii) discussed the issue thoroughly and/or consulted with the appropriate independent legal, financial, or other advisors; (iv) reviewed or received presentations on the relevant documents or summaries or extracts of the documents; (v) made reasonable inquiries into and critiqued the proposed course of action; and (vi) took sufficient time under the circumstances and acted in a deliberative manner. While directors should not act with undue haste, they may act speedily when necessary or appropriate. Directors must understand the transaction proposed and they must take adequate time to reflect. The directors' duty of care also requires them to comply with established principles of Delaware law.ⁿ¹⁴

[3] The Duty of Loyalty

The essence of the duty of loyalty is that "[c]orporate officers and directors are not permitted to use their position of trust and confidence to further their private interests [A]n undivided and unselfish loyalty to the corporation demands that there shall be no conflict between duty and self-interest."ⁿ¹⁵ The Court of Chancery has explained,

[I]t is possible to say broadly that the duty of loyalty is transgressed when a ... director ... uses his or her corporate office ... to promote, advance or effectuate a transaction between the corporation and such person (or an entity in which the fiduciary has a substantial economical interest, directly or indirectly) and that transaction is not substantively fair to the corporation. That is, breach of loyalty cases inevitably involve conflicting economic or other interests, even if only in the somewhat diluted form present in every "entrenchment case."ⁿ¹⁶

Analysis of the duty of loyalty typically turns on two concepts: independence and interest. A director is deemed to be independent "when he is in a position to base his decision on the merits of the issue rather than being governed by extraneous considerations or influences."ⁿ¹⁷ A director is considered "interested" when divided loyalties are present, or when, as a result of a transaction, the director enjoys a special benefit that is not available to all the corporation's shareholders.ⁿ¹⁸ The alleged conflict of interest must be actual and imminent, and not speculative and remote.ⁿ¹⁹

Divided loyalties exist when a director serves on the boards of two corporations where each has a stake in the proposed

transaction.ⁿ²⁰

A personal interest in a transaction exists when the director stands to receive a benefit from the transaction that is material in the context of that specific director's personal circumstances such that the interest affects or is likely to affect the director's actions.ⁿ²¹ The interest may arise indirectly, such as through benefits conferred on a family member.ⁿ²² A director's receipt of customary director fees, standing alone, is not a disqualifying financial interest.ⁿ²³ The receipt of indemnification for litigation expenses likewise does not taint directors with a presumption of self-interest.ⁿ²⁴

In analyzing duty of loyalty issues, it is important to remember that directors of a Delaware corporation owe fiduciary duties to all of the corporation's shareholders and not just to the holders of the particular class or series of stock that may have elected them.ⁿ²⁵ If a decision poses a conflict between two different classes of shareholders (one of which may have elected some or all of the directors), directors should be acutely aware of and sensitive to any conflicting interests. In those circumstances, it may be the case that "total abstinence from attendance and participation in the discussion is appropriate."ⁿ²⁶

Preferred stock presents slightly different issues. Directors generally owe fiduciary obligations to holders of preferred stock.ⁿ²⁷ But when the holders of the preferred stock invoke their preferences or other contractual rights, the directors' fiduciary duties do not apply and the corporation's obligations are determined by the language of the preferred stock designations and principles of contract law.ⁿ²⁸

While directors owe fiduciary duties to the corporation and its shareholders, a board of directors may, under certain circumstances, take other constituencies into account. Among such constituencies are "creditors, customers, employees, and perhaps even the community generally."ⁿ²⁹ For example, when a corporation is in the vicinity of insolvency and "where foreseeable financial effects of a board decision may importantly fall upon creditors as well as holders of common stock ... an independent board may consider the impacts upon all corporate constituencies in exercising its good faith business judgment for [the] benefit of the 'corporation.'"ⁿ³⁰ Similarly, when responding to a threatened takeover, directors may properly consider "the impact [of the bid] on constituencies other than shareholders."ⁿ³¹ Consideration of other constituencies, however, should always be in the context of how benefiting those constituencies ultimately benefits shareholders.ⁿ³² If there is no long-term plan for the corporation in which benefits for other constituencies would benefit shareholders, then the board of directors no longer has a basis for considering other constituencies. For example, as the Delaware Supreme Court has explained, "concern for non-stockholder interests is inappropriate when an auction among active bidders is in progress, and the object no longer is to protect or maintain the corporate enterprise but to sell it to the highest bidder."ⁿ³³

There is limited support under Delaware law for the concept of an unintentional breach of the duty of loyalty.ⁿ³⁴ These instances have occurred primarily in the context of defensive responses to hostile takeovers. In *Blasius Industries, Inc. v. Atlas Corp.*, for example, the court affirmatively found that the directors of Atlas corporation acted in good faith but had nonetheless breached their fiduciary duty of loyalty.ⁿ³⁵ The court accepted the directors' explanation that they had added two members to the company's board of directors as a well-intentioned response to a stockholder's proposed recapitalization plan. Nevertheless, the court found that the directors' actions, however, were "designed principally to interfere with the effectiveness of a [stockholder] vote" and were therefore invalid.ⁿ³⁶ The court explained "that the concept of an unintended breach of the duty of loyalty is unusual but not novel."ⁿ³⁷

[4] The Duty of Good Faith As Part Of The Duty Of Loyalty

The Court of Chancery decision in *Disney* provided significant insight into the contours of good faith under Delaware law.ⁿ³⁸ The court observed that it was likely easier to define bad faith, which would include "authorizing a transaction for some purpose other than a genuine attempt to advance corporate welfare or [when the transaction] is known to constitute a violation of applicable positive law."ⁿ³⁹ It does not matter why the director intentionally fails to pursue the best interests of the corporation. Bad faith can be the result of anything that causes a director to "intentionally place his

own interests, preferences or appetites before the welfare of the corporation, including greed, hatred, lust, envy, revenge, shame, or pride."⁴⁰ The Court of Chancery concluded that:

intentional dereliction of duty, a conscious disregard for one's responsibilities, is an appropriate (although not the only) standard for determining whether fiduciaries have acted in good faith. Deliberate indifference and inaction *in the face of a duty to act* is, in my mind, conduct that is clearly disloyal to the corporation. It is the epitome of faithless conduct.⁴¹

The Delaware Supreme Court affirmed the Court of Chancery's decision in *Disney* and adopted the trial court's view of good faith.⁴² The court explained that one type of good faith violation is predicated on intentional misconduct.⁴³ The second type of good faith violation, it continued, is based on the Court of Chancery's formulation of an "intentional dereliction of duty" or "a conscious disregard for one's responsibilities."⁴⁴ The court held, however, that this latter category requires a showing of culpability beyond gross negligence: "Cases have arisen where corporate directors have no conflicting self-interest in a decision, yet engage in misconduct that is more culpable than simple inattention or failure to be informed of all facts material to the decision A vehicle is needed to address such violations doctrinally, and that doctrinal vehicle is the duty to act in good faith."⁴⁵

In *Stone v. Ritter*, the Delaware Supreme Court held that the duty of good faith is not a standalone fiduciary duty, but instead is a subpart of the broader duty of loyalty.⁴⁶ Thus, director liability can be established only by showing a care or loyalty violation, with good faith operating as part of the duty of loyalty. This holding provides some doctrinal clarity in corporate law and makes clear that there is no "triad" of fiduciary duties. The practical implications of the opinion, however, are limited. Corporate fiduciaries should be advised that they are subject to the duties of care and loyalty. The duty of loyalty includes the traditional prohibition against self-dealing and governs conflicts of interest, but it also encompasses the obligation to act in good faith.

Recent cases emphasized the "*mens rea*" aspect of the duty of good faith. In *Lyondell Chemical Company v. Ryan*,⁴⁷ the Delaware Supreme Court reversed a chancery court ruling where the trial court erroneously "equated an arguably imperfect attempt to carry out *Revlon* duties with a knowing disregard of one's duties that constitutes bad faith." The chancery court has interrelated the duty of good faith as requiring facts from which intentional conduct can be inferred, such that reckless conduct is not sufficient to give rise to a finding of bad faith.⁴⁸ Detailed allegations that directors and officers engaged in knowing violations of criminal law was held sufficient to state a claim for action in bad faith.⁴⁹ Another area in which director action was framed as a violation of the subsidiary duty of good faith was in the backdating or "spring loading" of stock options. In *Ryan v. Gifford*, the Court of Chancery concluded that directors "should not be surprised to find that lying to shareholders [by backdating options] is inconsistent with loyalty, which necessarily requires good faith."⁵⁰

[5] The Duty of Oversight

The fiduciary duty of care is not limited to making decisions. Directors also have a duty to exercise care in overseeing the business and operations of the corporation and the conduct of corporate employees. In *Graham v. Allis-Chalmers*, the Delaware Supreme Court held that

[D]irectors are entitled to rely on the honesty and integrity of their subordinates until something occurs to put them on suspicion that something is wrong. If such occurs and goes unheeded, then liability of the directors might well follow, but absent cause for suspicion there is no duty upon the directors to install and operate a corporate system of espionage to ferret out wrongdoing which they have no reason to suspect exists.⁵¹

Revisiting the issue 36 years later in *In re Caremark International, Inc. Derivative Litigation*,⁵² the Delaware Court of Chancery elaborated on the nascent duty of oversight identified in *Graham* and held that directors have a

responsibility to assure that appropriate information and reporting systems are established and implemented so that senior management and the board have adequate information on the company's business and operations, material events, and compliance with applicable statutes and regulations. The court rejected an interpretation of *Graham* that would not impose a duty on directors (absent some basis to suspect a legal violation) to assure that a corporate information gathering and reporting system exists to provide senior management and the board of directors with information about the company's business and operations, material events, and compliance with applicable statutes and regulations.

Then-Chancellor William T. Allen's opinion in *Caremark* marked the beginning of a sea change in Delaware jurisprudence regarding the duty of oversight. Caremark International, Inc. ("Caremark") and some of its mid-level employees had been indicted for alleged violations of federal health-care reimbursement regulations. Thereafter, Caremark shareholders filed five derivative actions in the Court of Chancery. The derivative actions alleged that Caremark's directors had breached their fiduciary duty of care by permitting the alleged violations to occur. The shareholders claimed that the directors had failed to monitor the company's employees or to institute corrective measures, thus exposing the company to significant liability. Caremark and its directors reached an agreement to settle the government investigations and the derivative litigation. As part of the settlement, Caremark agreed, among other things, to establish a new compliance and ethics committee of the board and a centralized system for regular monitoring of legal compliance at lower levels of management and in the field.

In the course of approving what would otherwise have been a routine settlement, Chancellor Allen took on the issue of whether the shareholder plaintiffs had the ability to hold directors liable for losses arising "from unconsidered inaction."⁵³ Chancellor Allen summarized the claim as one in which "the directors allowed a situation to develop and continue which exposed the corporation to enormous legal liability and that in so doing they violated a duty to be active monitors of corporate performance."⁵⁴ Chancellor Allen described such a claim as "possibly the most difficult theory in corporation law upon which a plaintiff might hope to win a judgment."⁵⁵ He agreed, however, that directors may be held liable under such a theory:

[I]t would ... be a mistake to conclude ... that corporate boards may satisfy their obligation to be reasonably informed concerning the corporation, without assuring themselves that information and reporting systems exist in the organization that are reasonably designed to provide to senior management and to the board itself timely, accurate information sufficient to allow management and the board, each within its scope, to reach informed judgments concerning both the corporation's compliance with law and its business performance [A] director's obligation includes a duty to attempt in good faith to assure that a corporate information and reporting system, which the board concludes is adequate, exists [F]ailure to do so under some circumstances may ... render a director liable⁵⁶

Having outlined this theory of liability in broad strokes, Chancellor Allen then articulated four limiting principles. First, "only a sustained or systematic failure of the board to exercise oversight--such as an utter failure to attempt to assure a reasonable information and reporting system exists--will establish the lack of good faith that is a necessary condition to liability."⁵⁷ Second, "the level of detail that is appropriate for such an information system is a question of business judgment."⁵⁸ Third, since "no rationally designed information system will remove the possibility" of losses, the plaintiff must establish and the court must find that the failure of oversight was the "proximate cause" of the damage.⁵⁹ Fourth, a charter provision adopted pursuant to Section 102(b)(7) of the Delaware General Corporation Law might completely insulate covered directors from liability.⁶⁰ These limitations significantly restrict the risk of liability that otherwise might exist from a broad oversight obligation.

In applying the duty of oversight to the situation in *Caremark*, Chancellor Allen went further in restricting the doctrine by holding that the internal systems at Caremark appeared sufficient to render the complaint "susceptible to a motion to dismiss."⁶¹ At the time of the alleged wrongdoing, however, Caremark had only the most basic of controls in place: a generic internal audit program and the services of an outside auditor. Caremark did not take more significant action until after the crisis. The board asked its outside auditor to review and report on the company's internal audit system and

adopted a new and strengthened internal audit policy.⁶² The board also took steps to ensure that it was receiving regular reports from management by centralizing the management reporting structure and appointing a senior Caremark executive as a compliance officer.⁶³ Chancellor Allen's analysis thus suggests that a generic internal audit plan, an independent auditor, and perhaps corrective action after the fact may be sufficient to defeat a duty of oversight claim.

The Delaware Supreme Court has adopted the rationale of *Caremark* but has described the duty as one of good faith.⁶⁴ The undeniable lesson from *Stone* and *Caremark* is that "a director's obligation includes a duty to attempt in good faith to assure that a corporate information and reporting system, which the board concludes is adequate, exists."⁶⁵ Failing to fulfill this duty could render a director liable.⁶⁶

In the post-Enron business environment, *Caremark* oversight has become even more significant. The actions of directors are increasingly viewed under an unfriendly microscope. In this environment, directors are demanding additional information and procedural protections to ensure that they have met their duty of oversight obligations. The *Caremark* duty also has been reinforced by the corporate governance listing requirements of the New York Stock Exchange, which assign to the board audit committee a duty to "assist board oversight of ... the company's compliance with legal and regulatory requirements."⁶⁷

To protect against duty of oversight claims, boards and/or their audit committees⁶⁸ are well advised to do the following:

- Have the chief legal officer and the chief compliance officer--or persons performing similar functions--periodically (perhaps annually or biennially) make a comprehensive presentation to the board or the audit committee on the company's compliance policies, systems, and procedures, including its code of conduct.
- Have the chief legal officer or other appropriate officer report to the board audit committee, or to the board as a whole, on
 - major regulatory issues and issues arising in civil litigation (or threatened civil litigation) that, in either case, implicate possible ethical violations, violations of the company code of conduct or of company policies relating to honesty, proper use of company assets, and the like; and
 - any proceeding, investigation, or other matter involving alleged or possible criminal conduct (whether under U.S. law or the law of any other jurisdiction) on the part of any officer or on the part of any employee in the course of the performance of his or her duties as an employee.
- In either case,
 - require the responsible corporate officer to report on what the company has done or is doing to investigate and eliminate, or reduce the likelihood of, any breakdowns in compliance procedures that may have allowed such conduct to occur or to go undetected for any period of time, and follow up in subsequent meetings until all appropriate modifications in systems or procedures have been completed and documented to the satisfaction of the board or committee; and
 - inquire into and be satisfied with the disciplinary action taken against any officer or employee who has committed intentional wrongdoing or, in appropriate cases, should be put on administrative suspension and relieved of his or her duties pending the

investigation of alleged wrongdoing.

- Receive a regular report on any complaints or allegations that the company has received on its "hotline" (even if the communication was not directed to the outside directors per se) alleging fraud or other intentional wrongdoing.
- Have a regularly scheduled executive session with the chief legal officer, without the presence of other corporate officers.

Directors may also take care to document compliance with Chancellor Allen's limiting principles. For instance, directors may wish to document with specificity the manner in which they have attempted to assure that a reasonable information and reporting system exists. Directors may also seek the advice of expert consultants in information management to advise them on an appropriate system for their particular corporation. Such a step would, of course, be documented and might serve to defeat causation thus preventing recovery.

[6] Business Judgment Rule

Out of respect for the board of directors' statutory and fiduciary duty and obligation to manage and oversee the business and affairs of a corporation, courts have developed a policy of affording substantial deference to the business decisions that disinterested and independent corporate directors have made in good faith and after due deliberation. This policy is referred to as the "business judgment rule," and when it applies, the decisions of a board of directors "will not be disturbed if they can be attributed to any rational business purpose."⁶⁹ "A court under such circumstances will not substitute its own notions of what is or is not sound business judgment."⁷⁰

The business judgment rule is the product of multiple factors, including (i) Section 141(a) of the Delaware General Corporation Law, which provides that the "business and affairs" of the corporation "shall be managed by or under the direction of a board of directors";⁷¹ (ii) recognition that courts are ill-equipped in terms of substantive knowledge to engage in meaningful review of "ordinary" business decisions;⁷² (iii) the need to encourage entrepreneurial risk taking; and (iv) the fact that a corporation will only be able to recruit competent directors if their potential liability for erroneous decisions is limited.⁷³

Ordinarily, the effect of reviewing a transaction pursuant to the business judgment rule is to preclude director liability unless the plaintiff can show a breach of fiduciary duty.⁷⁴ The prerequisites for the application of the business judgment rule were set forth by the Delaware Supreme Court in *Aronson v. Lewis*:⁷⁵

First, "the business judgment rule operates only in the context of director action [or conscious inaction]. Technically speaking, it has no role where directors have either abdicated their functions, or absent a conscious decision, failed to act."⁷⁶

Second, the rule's "protections can only be claimed by disinterested [and independent] directors."⁷⁷

Third, "[t]o invoke the rule's protection directors have a duty to inform themselves, prior to making a business decision, of all material information reasonably available to them. Having become so informed, they must then act with requisite care in the discharge of their duties."⁷⁸

Fourth, the business judgment rule applies only where directors acted "in good faith and in the honest belief that the action taken was in the best interests of the company."⁷⁹

[a] Presumption of Regularity

While the presumption of regularity is strong in the context of ordinary business decisions, its strength varies according to the context in which the business judgment rule is raised.ⁿ⁸⁰ In some circumstances, directors are not entitled to the benefit of the business judgment presumption until they make a threshold showing. For example, when the justification of a particular defensive measure is at issue, the business judgment rule will not apply until the board meets an initial burden of showing that it acted with good faith after a reasonable investigation and adopted a defensive measure that was reasonable in relation to the threat posed.ⁿ⁸¹ The presumption is weaker in such settings because of the inherent conflict directors face when deciding how to respond to a threat to their control of the corporation.ⁿ⁸² But even in such circumstances, the deference paid to directors' decisions is "heightened" or "materially enhanced" where a majority of the members of the subject board are independent, outside directors.ⁿ⁸³

[b] Rebutting the Presumption

Because directors are presumed not to breach their duties of care and loyalty, the business judgment rule has the effect of precluding a court from re-examining the merits of a board's decision, unless the plaintiff is able to plead facts rebutting one of the elements of the rule. When a plaintiff can point to facts calling into question the applicability of the presumption, a court will engage in "a threshold review of the objective financial interests of the board whose decision is under attack (that is, independence), a review of the board's subjective motivation (that is, good faith), and an objective review of the process by which it reached the decision under review (that is, due care)."ⁿ⁸⁴

As mentioned above, the party challenging director action bears the burden of rebutting the business judgment presumption by showing that board members acted disloyally or without due care. The most frequently invoked method of attacking the presumption is to claim a breach of the duty of loyalty due to director interest in the challenged transaction.ⁿ⁸⁵ Delaware courts have "refrained from adopting a bright-line rule for determining when a director's ... self-interest translates into evidence sufficient to rebut the business judgment" rule.ⁿ⁸⁶

The business judgment rule can also be rebutted by evidence of directors' gross negligence in the decision making process.ⁿ⁸⁷ As opposed to the "reasonably prudent person" standard for simple tort law negligence, "gross negligence" in the duty of care context requires a showing that directors "acted without the bounds of reason and recklessly" in making their decision.ⁿ⁸⁸ The very few cases that have held that this high standard for liability was met have involved boards who had not attempted to gather or consider helpful or relevant information to aid them in making important decisions.ⁿ⁸⁹ The cases also typically involve boards that have acted with needless haste.ⁿ⁹⁰

[c] Legal Consequences of Finding that a Board Acted Within Its Business Judgment

When a party challenging board action is able to rebut an element of the business judgment rule, then the directors may be personally liable for any damages resulting from their breach of fiduciary duty unless their actions are shown to be entirely fair to the corporation and its stockholders. Section 102(b)(7) permits a corporation to exculpate directors from liability for breaches of the duty of care, but not for breaches of the duty of loyalty.ⁿ⁹¹ A Section 102(b)(7) provision will not prevent a transaction from being enjoined or rescinded by a reviewing court.ⁿ⁹²

When a party challenging board action is unable to rebut the business judgment presumption, the directors will not be held personally liable, even when hindsight demonstrates that their decision was ill-advised or incorrect.ⁿ⁹³ The business judgment rule will similarly protect a corporate transaction against rescission or injunction, regardless of whether it might reasonably be thought harmful to the corporation or its stockholders.ⁿ⁹⁴ Under business judgment review, a court simply will not reach the merits of the challenged decision.ⁿ⁹⁵

There are certain frequently encountered descriptions of the business judgment rule that suggest that, even if the plaintiff fails to rebut the business judgment presumption, extreme circumstances may warrant a court substituting its own judgment for that of the disinterested directors. As former Chancellor Allen once noted, "[t]his 'escape hatch' language has been variously stated in the Delaware opinions: 'egregious' decisions are said to be beyond the protections

of the business judgment rule, as are decisions that cannot 'be attributed to any rational business purpose,' or decisions that constitute 'a gross abuse of discretion.'ⁿ⁹⁶ Though such terms appear frequently as *dicta* in cases upholding directors' decisions, the relatively few cases that ascribe them substantive content suggest that they add nothing to the well-established notions that directors cannot waste corporate assets or otherwise act in bad faith.

The sole Delaware decision that may be construed as granting relief from a board decision that lacked a rational business purpose is *Gimbel v. Signal Cos., Inc.*ⁿ⁹⁷ In *Gimbel*, the Delaware Supreme Court preliminarily enjoined a corporate parent from selling its subsidiary for an allegedly "wholly inadequate" sale price.ⁿ⁹⁸ The *Gimbel* court noted that board decisions "will not be disturbed if they can be attributed to any rational business purpose," citing *dictum* from a prior Delaware Supreme Court case.ⁿ⁹⁹ The *Gimbel* court then framed the actual legal issue for decision as follows: "Did the Signal Directors act recklessly in accepting a wholly inadequate price for Signal Oil?"ⁿ¹⁰⁰ Director recklessness generally suggests gross negligence in the decision-making process, which is itself sufficient to rebut the presumption that directors acted with due care.ⁿ¹⁰¹ Alternatively, director recklessness suggests a bad faith indifference to the corporate welfare, which also suffices to rebut the business judgment presumption.ⁿ¹⁰² The *Gimbel* court's analysis focused on director carelessness due to needless haste, finding that a "forced decision" to sell the subsidiary was made "on a tight time schedule."ⁿ¹⁰³ The court also focused on the possibility that the sale would entail a waste of corporate assets, given that the plaintiff claimed the subsidiary was worth almost twice as much (and several hundred million dollars more) than the defendant claimed.ⁿ¹⁰⁴ The *Gimbel* decision thus need not be viewed as depending on the lack of a "rational basis" for the directors' decision. Interestingly, although the court preliminarily enjoined the sale of assets, the injunction issued contingent upon the plaintiffs' posting of a substantial bond. As former Chancellor Allen later observed, "the obviously problematic nature of entering an injunction (even a preliminary injunction) against directors, while at the same time holding that they were neither suffering from any conflicting interest nor acting in bad faith, caused the *Gimbel* court to impose a bond that was unprecedented in size, especially for the period (\$25 million) and which, in fact, was never satisfied. Therefore, while the court indicated its conditional willingness in *Gimbel* to enter an injunction, in fact no relief ever issued."ⁿ¹⁰⁵

Along similar lines, several Delaware cases in the derivative suit context have found that pre-suit demand upon a board of directors would be futile because, although the board was disinterested and independent, there was a "reasonable doubt" that the transaction challenged was "otherwise the product of a valid exercise of business judgment."ⁿ¹⁰⁶ At first blush these cases suggest that a reviewing court has free rein to pass upon the "soundness" or "egregiousness" of a board's decision.ⁿ¹⁰⁷ Yet the relatively few decisions excusing demand on this ground add nothing to the simple and well-established notion that a waste or gift of corporate assets will not be protected by the business judgment presumption.ⁿ¹⁰⁸

Finally, a similarly problematic description of the business judgment presumption suggests that, even where the presumption would normally apply to protect a board's decision, it may be rebutted by evidence showing "gross and palpable overreaching" by the board.ⁿ¹⁰⁹ The phrase "gross and palpable overreaching" first appeared in Delaware cases involving the business judgment rule in 1967, in the Delaware Supreme Court's opinion in *Meyerson v. El Paso Natural Gas Co.*ⁿ¹¹⁰ In refusing to reform an agreement between a parent and subsidiary corporation, the *Meyerson* court quoted from a dissenting opinion from the New York Court of Appeals, which emphasized on similar facts that "anything short of gross and palpable overreaching does not warrant court interference."ⁿ¹¹¹ The phrase quickly became a part of the recitation of the business judgment rule in parent-subsidiary transactions.ⁿ¹¹² Yet the statement that the business judgment rule does not embrace "gross and palpable overreaching" merely underscores that the business judgment presumption only applies to actions taken by disinterested fiduciaries, in good faith, in the honest belief that such action is in the best interests of the corporation.ⁿ¹¹³ Indeed, no Delaware decision has actually found the business judgment presumption to be rebutted by "gross and palpable overreaching," as opposed to other forms of disloyal and self-dealing conduct. Yet the repetition of unnecessary rhetoric tends to create confusion in the law.ⁿ¹¹⁴

[d] Implications for Board Processes and Procedures

Given the powerful effect of the business judgment rule, directors should seek to craft board processes and procedures that increase the likelihood that their decisions will benefit from the rule. As a general matter, the board should be informed, diligent and act in an independent and disinterested manner. The post-trial decision in the *Disney* matter,ⁿ¹¹⁵ "strongly encourages directors and officers to employ best practices, as those practices are understood at the time a corporate decision is taken."ⁿ¹¹⁶ While the Court in *Disney* also noted that Delaware law will not hold fiduciaries liable for a failure to comply with the aspirational ideal of best practices alone, compliance with such best practices where appropriate will help serve to demonstrate the board's faithfulness and honesty on behalf of the stockholders.

Adherence to the following guidelines will maximize the chances that a board's decision will be protected by the business judgment rule, rather than be subject to second guessing by plaintiffs and judges:

- A good set of written materials should be delivered to each director in time to allow him or her to review them carefully in advance of the meeting. These may include memoranda from the CEO or other executives responsible for the proposed transaction to be decided upon, copies of agreements and resolutions the board will be asked to approve, investment bankers' financial analyses, and lawyers' summaries of the major and most important legal issues or contract provisions involved in the decision the board will be asked to make. The larger the packet and the more complex the materials, the more time should be allowed for the directors to read and digest them before the meeting.

- In the event that the board packet includes lengthy agreements (such as a long merger agreement or loan agreement) or other legal documents, the most important provisions should be separately and clearly explained to the directors. This can be done in a "bullet point" executive summary that goes out with the board packets or by a live presentation at the board meeting to "walk the directors through" the most important aspects of the documents and the transaction they are being asked to consider.

- The board should be sure that it has access to all the information it needs to evaluate the proposed transaction and its alternatives. While an investment banker's fairness opinion is not required as a matter of law, it is good practice for the directors to have the benefit of such an opinion and to make sure that they understand the basis for it before approving any major merger, acquisition, or disposition of material assets.

- It should be clear that the board, or any committee of the board, is free to retain independent experts at the company's expense when necessary and appropriate. In connection with major issues involving executive compensation, it can be useful for the outside directors to hear from independent executive compensation consultants that they, rather than the executives, have retained. In connection with any issue involving the propriety of actions taken by management, the directors should consider whether they would benefit from the input and assistance of independent counsel with no regular or ongoing business relationship with the company.

- While the independent directors are not required to meet separately in executive session in connection with every decision the board is asked to make, they should consider doing so whenever executive directors may have interests that differ from those of the shareholders (such as when they will receive significant compensation or severance in connection with the proposed transaction).

- The board should allow plenty of time for consideration and discussion of the proposed transaction, over the course of more than one meeting if appropriate and time permits. Boards should not hesitate to act quickly when a business opportunity may be fleeting, but decision-making should never be rushed when there is not a compelling reason for a prompt decision.

- Directors should not vote on any transaction until they are satisfied with the answers to these

questions:

- How much will it cost?
- What is the benefit to the company and its shareholders?
- What are the alternatives? Had management explored them to the point of reasonable assurance that this is the best course of action available?

■ Minutes of meetings should be reasonably detailed and promptly drafted for approval by the board.¹⁷

In addition to these guidelines, the former Chief Justice of the Delaware Supreme Court has suggested a list of "aspirational norms" of board practice:

- (1) [T]here should be a heavy majority of purely independent directors on every board.
- (2) The board should be engaged in actual governance, and not merely act as advisors to the Chief Executive Officer. This does not mean that the board runs the operations of the company (normally they should not). It means directors are in control of the policy of the firm and the managers work for them.
- (3) The directors should meet face-to-face frequently throughout the year and spend substantial time on their homework. A norm of at least one hundred hours per year on each board has been suggested and seems reasonable Of course more than the norm may be required in time of crisis, and directors should not become so over-committed that they cannot deal adequately with crises.
- (4) The directors should limit to a reasonable number the major boards on which they serve. What is a reasonable number depends on the extent to which each director is able to carry out his or her responsibilities to each board in a professional manner.
- (5) Independent directors should regularly evaluate the CEO and they should meet with each other alone in executive session on a regular basis. The board should have independent audit compensation and nominating committees. In most instances at least the audit and compensation committees should be independently advised.
- (6) The board should establish and monitor reasonable law compliance programs.
- (7) The board should carefully review disclosure documents to ensure that all material information reasonably available is disclosed to the relevant audience.¹⁸

Adherence to these "aspirational norms" does not guarantee that a particular business decision will receive the benefit of the business judgment rule. Rather, each factual circumstance is unique and must be evaluated in context. Thus, there is no exact formula or routine that will provide protection in all circumstances. Nevertheless, a board that adopts processes and procedures designed to increase the likelihood that a particular decision will be protected by the business judgment rule should find itself in an advantageous position if the decision is challenged, both from the standpoint of their potential exposure for personal liability and from the standpoint of the potential for their decision to be restrained or enjoined.¹⁹

The *Disney* post-trial decision also offers several lessons to be learned regarding board independence. While the Court of Chancery there found that the defendants had acted in good faith and therefore entered judgment in favor of all

defendants, it was at times sharply critical of defendants' actions:

- The Court criticized CEO and Chairman Michael Eisner for being "imperial" and for unduly handling the Board.ⁿ¹²⁰
- The Court criticized the Board in strident terms for not exhibiting more assertiveness and independence.ⁿ¹²¹
- The Court criticized minutes of meetings for not being informative enough regarding what topics had been discussed and, in particular, whether certain topics were discussed for a much longer span of time than other topics.ⁿ¹²²
- The Court criticized Eisner for acting in a unilateral manner by not calling a board meeting prior to sending out a press release announcing the hiring of President Michael Ovitz.ⁿ¹²³
- The Court said that it would have been ideal for certain compensation committee members to have been better qualified and more involved in the decision regarding an appropriate compensation package for Ovitz.ⁿ¹²⁴
- The Court criticized the board for not meeting to discuss Ovitz's non-fault termination which, under his contract, entitled Ovitz to certain non-fault termination payments, while holding that it had no duty to do so.ⁿ¹²⁵
- The Court criticized a press release which stated that Ovitz would continue to serve as an advisor and consultant to the board subsequent to his termination when in fact such an arrangement had been rejected.ⁿ¹²⁶

CHAPTER 4 LEGAL DUTIES AND RESPONSIBILITIES OF THE BOARD

1-4 Corporate Governance: Law and Practice § 4.04

AUTHOR: J. Travis Laster

§ 4.04 The Effect of Director Interest or Lack of Independence

As discussed above, a condition to a board's decision receiving deferential review under the business judgment rule is that the individual directors making the decision be disinterested and independent. This means that business decisions made by boards of directors must be based "entirely on the corporate merits of the transaction and ... not influenced by personal or extraneous considerations."¹ While directors' interest and lack of independence are distinct concepts, both share a similar concern with possible influences on judgment that create a particular risk of compromising a director's unremitting duty of loyalty to the corporation and its stockholders.

[1] Interested Directors

The paradigmatic cases of self-interest occur when corporate fiduciaries deal directly with the corporations to which they owe a duty of loyalty. Such classic self-dealing occurs when a corporate fiduciary is "on both sides of a transaction."² That is, when a corporate fiduciary "deals directly with the corporation, or has a stake in or is an officer or director of a firm that deals with the corporation."³ For example, a director engages in self-dealing when he or she is a partner in a firm that purchases property from the corporation.⁴ Self-dealing would also exist where a director sells property to the corporation.⁵ In cases such as these, a director's personal self-interest in (and natural inclination toward) maximizing the value of the deal will conflict with the continuing obligation to serve the best interest of the corporation. Because of this conflict, and the frequent attendant circumstance of a lack of arm's length negotiations otherwise supporting the fairness of the deal, Delaware courts conclusively presume that self-dealing directors cannot judge the corporate merits of the transaction in a disinterested manner. Thus, such self-dealing directors are deemed "interested" in the transaction regardless of the likelihood that such personal or extraneous influences might actually cause disloyal behavior or otherwise harm the corporation.⁶ Because self-dealing directors are conclusively presumed to be interested, the business judgment rule does not apply to their decisions.

Even where a director does not appear on both sides of a transaction, a director may be deemed interested in a corporation's transaction with a third party in virtue of having a material financial interest in the transaction that is not generally shared with stockholders.⁷ Unlike cases of classic self-dealing, where a director is *per se* interested, a director's unshared financial interest in a third-party transaction is only debilitating when it is material.⁸ Interest is not created by the mere fact that a director generally has had some business or commercial affiliations with the party

adverse to the corporation, without some showing that such dealings created a material unshared financial interest in a particular transaction.ⁿ⁹

The standard for determining whether a fiduciary's financial interest is material is a subjective test: whether, in the context of the particular fiduciary's economic circumstances, the fiduciary was or would likely be affected by that financial interest.ⁿ¹⁰ This subjective test requires the reviewing court to examine the record for evidence that a particular allegedly interested fiduciary would be especially immune from or susceptible to opportunities for self-enrichment, or would otherwise behave differently than a reasonable person in the situation.ⁿ¹¹ Unshared economic benefits are not sufficient to create director self-interest when, in the fiduciary's particular circumstances, their value is *de minimis*.ⁿ¹²

As this subjective standard suggests, "the question of when director self-interest translates into board disloyalty is a fact-dominated question, the answer to which will necessarily vary from case to case."ⁿ¹³ Nonetheless, several clear principles have emerged. First, the mere ownership of a substantial number of shares of stock does not suffice to create director self-interest. In fact, it tends to align director's interests with those of shareholders.ⁿ¹⁴ Second, the mere fact that one or more directors will retain their present board memberships following a transaction is insufficient as a matter of law to create director self-interest.ⁿ¹⁵ And, relatedly, the mere post-transaction receipt of normal director's fees fails to show director interest as a matter of law.ⁿ¹⁶

Otherwise, a court applying the above "unshared material financial benefit" test is likely to estimate the magnitude of the fiduciary's divergent financial interests in the particular transaction. A fiduciary is clearly self-interested with regard to a merger, for example, where he is also the chairman of a consulting company that is employed and paid seven-figure sums to effectuate the merger.ⁿ¹⁷ Similarly, fiduciaries with stock options were interested in a decision to cancel options and pay option-holders the difference between their exercise price and the pro rata price of a related tender offer.ⁿ¹⁸

Even though a fiduciary's stock ownership tends to align the fiduciary's interests with general shareholder interests, other conflicting interests of director-stockholders may make them materially self-interested. In *Ryan*, for example, minority shareholders alleged that controlling shareholders (who also were corporate directors) had a material unshared financial interest in connection with an asset sale.ⁿ¹⁹ In 1986, third-party purchasers offered to buy the corporation's assets for \$11 million dollars. Related agreements with the directors would pay them \$2 million for refraining from competition and for giving advice when requested. When the stock market declined in October 1987, the purchasers reduced their offer for the corporate assets to \$9.75 million dollars, but the directors' related agreements remained unchanged.ⁿ²⁰ The court considered the asset sale and the concurrent non-competition/consultant agreements to be different aspects of the same transaction.ⁿ²¹ Had the \$2 million non-compete payment been paid directly to the corporation, the directors' pro rata share would only have been approximately \$1.5 million. This \$500,000 difference amounted to a 7 percent premium above the directors' pro rata share from the sale of the assets alone and was equal to twice the directors' combined annual salaries. Accordingly, it was deemed a sufficiently material interest to cause them to negotiate the \$2 million as a direct side payment to themselves, to the neglect of the minority shareholders.ⁿ²²

[2] Independent Directors

Like director interest, the inquiry into director independence is ultimately concerned with a corporate fiduciary's ability to focus on the corporate merits of a particular decision, rather than "extraneous considerations or influences."ⁿ²³ Whereas a debilitating self-interest flows from a directors' role or financial stake in a transaction, directors lack independence in virtue of certain types of relationships to others who are the proponents of, or are otherwise "interested" in, a given transaction.ⁿ²⁴ Specifically, such problematic relationships exist when a director is " beholden " to a person or entity that is interested in, or a strong supporter of, the challenged transaction.ⁿ²⁵ This fact-intensive inquiry considers and assesses the likely impact of any substantial influence the interested party (or proponent of a transaction) could assert over a director, in light of the particular circumstances of that director.ⁿ²⁶ Whereas an inquiry

into director interestedness focuses on conflicts presented by a specific transaction, a determination of director independence focuses on general influences on business judgment.ⁿ²⁷

Lack of independence is most commonly found when a director is beholden to interested persons for the continued receipt of a financial benefit that is material in the particular director's circumstances.ⁿ²⁸ Courts have taken into account a director's close relationship with third parties whose financial well-being could be materially harmed by interested persons.ⁿ²⁹ The mere fact that a director has been appointed by an interested party, and therefore may be dependent upon such person for the continued receipt of normal directors' fees, does not suffice to show a lack of independence.ⁿ³⁰ Similarly, the mere fact of various business relationships, absent a showing of control over a directors' material financial interest, generally does not indicate a lack of independence.ⁿ³¹

Courts have generally been reluctant to find that the presence of a personal relationship, without the influence of possible financial retribution, suffices to show a lack of independence.ⁿ³² Arguments supposing "the professional and social relationships that naturally develop among members of a board impede independent decisionmaking" will be rejected.ⁿ³³ Nevertheless, cases weigh the presence of strong personal or familial ties in assessing likely influences upon directors' judgment.ⁿ³⁴ Past decisions by directors that suggest a willingness to cede control to a certain favored self-interested person may suggest a lack of independence.ⁿ³⁵

Perhaps the most significant recent independence case, and one that exemplifies the extremely fact-intensive nature of this inquiry, is the Court of Chancery's decision in *In re Oracle Corp. Derivative Litigation*, which held that directors' "shared material affiliations" may in some circumstances create doubts regarding their independence.ⁿ³⁶ There, the allegedly "beholden" directors were two members of the senior faculty at Stanford University, who were a Special Litigation Committee (the "SLC") formed to investigate alleged breaches of fiduciary duty stemming from insider trading by Oracle senior executives, including four members of its board of directors.ⁿ³⁷ After an investigation that involved more than seventy witness interviews, resulted in a more than 1,100 page report, and which the Court characterized as "extensive ... by any objective measure," the committee found the suit to be meritless, and moved to terminate the litigation.ⁿ³⁸ In order for its motion to be granted, the SLC had to show that there was no material issue of fact calling into doubt its independence.ⁿ³⁹

Discovery into the committee's independence revealed numerous ties between the defendant directors and Stanford. Like the SLC members, one defendant director was also a senior faculty member at Stanford, who had taught one of the two SLC members in graduate school at Stanford.ⁿ⁴⁰ The defendant director and his former student remained in contact over the years, and both were currently senior fellows at a Stanford research center.ⁿ⁴¹ Another of the defendant directors was a "very loyal alumnus" of Stanford who had personally donated over \$600,000 to the school and had chaired a foundation that donated an additional \$11.7 million. Among his personal donations was a \$50,000 grant in appreciation for a speech given by one of the SLC members at Stanford's law school.ⁿ⁴² A third defendant-director, the founder of Oracle, was one of the wealthiest men in America. One of his charitable foundations had donated approximately \$10 million to Stanford. During his tenure as Oracle's CEO, the company made \$300,000 in additional donations to Stanford. At the time the allegations of insider trading began to surface, media sources reported that he was considering an \$150 million donation to Stanford, as well as leaving his \$100 million home to Stanford at his death.ⁿ⁴³ The court noted its "shock" at learning these facts, none of which were disclosed in the SLC's report.ⁿ⁴⁴

The court began its analysis by emphasizing that directors can be beholden to controlling persons by virtue of having influence over factors other than the directors' financial well-being: "Delaware law should not be based on a reductionist view of human nature that simplifies human motivations on the lines of the least sophisticated notions of the law and economics movement. *Homo sapiens* is not merely *homo economicus*."ⁿ⁴⁵ The court then framed the "beholden" inquiry in light of "the social nature of humans," observing that "corporate directors are generally the sort of people deeply enmeshed in social institutions. Such institutions have norms, expectations that explicitly and implicitly, influence and channel the behavior of those who participate in their operation."ⁿ⁴⁶ In particular, the court recognized "the extreme importance and difficulty of [a special litigation committee's] responsibility," observing that it is easier "to

say no to a friend, relative, colleague, or boss who seeks assent for an act (*e.g.*, a transaction) that has not yet occurred than it would be to cause a corporation to sue that person."ⁿ⁴⁷ If the SLC decided there was cause to pursue the insider trading claims, it would expose their colleagues to "the possibility of a large damage award" and "great reputational harm."ⁿ⁴⁸ Finally, the court thought it significant that the SLC would have to judge whether their colleagues acted with a culpable state of mind.ⁿ⁴⁹

Taking all this into account, the court held that the SLC could not show that there was no material fact calling into doubt its independence. With regard to the defendant director who, like the SLC members, was a member of Stanford's faculty and had taught one of the SLC members, the court found that "a general sense of human nature" suggested that the SLC members would ponder their personal ties and mutual affiliations when making their decision.ⁿ⁵⁰ With regard to the director defendant who was an alumnus of and large contributor to Stanford, the court also found it likely that the SLC members would consider the effect of their decision on Stanford's relationship with him. Although the SLC members argued they were unaware what a large donor he had been, the court found that this was improbable, and in any event their ignorance undermined confidence in their investigation.ⁿ⁵¹ The court rejected the SLC's argument that, given Stanford's immense financial resources, the donations of one person could not constitute a "material" financial benefit. In doing so, the court stated that "[e]ndowments and buildings grow one contribution at a time," and noted that Stanford's various means of expressing gratitude, *e.g.*, naming buildings after large donors, suggested such donations were important to it.ⁿ⁵² Finally, with regard to Oracle's founder, one of the wealthiest men in America who made large donations to Stanford, the court found his beneficence to Stanford sufficient to create doubt as to the SLC's independence. The court was also clearly impressed by how difficult it would be bring claims against a person of his stature, who was a dominant presence in the community in which he and the SLC members lived.ⁿ⁵³ Because the court found these facts would "be on the mind of the SLC members in a way that generates an unacceptable risk of bias," it denied the SLC's motion to terminate the litigation. A lack of independence would always require this result, regardless of the "subjective good faith and the reasonableness of [the SLC's] conclusions."ⁿ⁵⁴

In the recent case of *Beam v. Stewart*, however, the Delaware Supreme Court suggested that *Oracle* and other cases addressing the independence of special litigation committees may have limited precedential value outside the SLC context.ⁿ⁵⁵ In distinguishing *Oracle*, the Court reasoned that, unlike directors in a demand futility case, the members of an SLC bear the burden of proving their independence. It also reasoned that the issue of an SLC's independence only arises after a pre-suit demand has been excused, in the context of deciding whether to dismiss an otherwise valid derivative claim. The Court simply stated, without supporting analysis, that *Oracle* was distinguishable on its facts.ⁿ⁵⁶ While the Court expressly refused to decide whether the substantive test of independence is greater in the SLC context, its broad manner of distinguishing *Oracle* would certainly support this conclusion.

In *Beam*, the Delaware Supreme Court pointed out the serious risk a director would take in protecting a social acquaintance at the possible expense of the destruction of that director's hard-earned reputation. Thus, *Beam* held, not only must such allegations be factually specific, they must support a reasonable inference that the director was more willing to risk his or her reputation than the relationship. The Court, however, stated that some professional or personal friendships which "border on or even exceed familial loyalty and closeness" may establish demand futility.^{n56.1} Reasonable doubt as to director independence might arise "either because of financial ties, familial affinity, a particularly close or intimate personal or business affinity or because of evidence that in the past the relationship caused the director to act non-independently vis-a-vis an interested director."^{n56.2}

[3] Special Situations Influencing Directors' Business Judgment

[a] Dual Fiduciaries

So-called "dual fiduciary" situations involve classic self-dealing. In such situations, a corporate fiduciary serves on the boards of two or more corporations that may deal with one another. This predicament arises most frequently in the parent and non-wholly owned subsidiary context.ⁿ⁵⁷

"There is no dilution of [fiduciary] obligations where one holds dual or multiple directorships, as in a parent-subsiary context. Thus, individuals who act in a dual capacity as directors of two corporations, one of whom is parent and the other subsidiary, owe the same duty of good management to both corporations."ⁿ⁵⁸ Where possible, the dual fiduciary must act to further the best interests of both corporations, thereby satisfying the duty of loyalty to each of the corporations he or she serves.ⁿ⁵⁹ In such situations, the directors need not abstain from any board deliberations and may participate in the decision-making process. In some circumstances, however, such as when the corporations deal with one another or when the board of one corporation is considering action that would harm the other, the interests of the two corporations will be in direct conflict, such that there is no course of action that is in both of their best interests. In these circumstances, the dual fiduciary is not required to but should either abstain from voting or refrain from participating in decision making for either company.ⁿ⁶⁰

[b] Controlling Stockholders' Self-Dealing

Where a controlling stockholder "stands on both sides of a transaction," the business judgment rule will not apply to protect directors' decisions, regardless of the directors' disinterest or independence.ⁿ⁶¹ A stockholder is deemed to have control over a corporation when he or she (i) owns a mathematical majority of the voting power of a corporation's outstanding stock or (ii) otherwise exercises control over its business affairs.ⁿ⁶² While the inquiry into whether a stockholder has a "controlling" status will sometimes overlap with the normal inquiry into director independence,ⁿ⁶³ it is possible for a stockholder to be deemed in control of otherwise disinterested and independent directors.ⁿ⁶⁴ This result stems from the "inherent coercion" from the controlling stockholder, who will continue to dominate the company after a transaction and who may retaliate against or replace directors who act against its wishes.ⁿ⁶⁵ As the Court of Chancery has colorfully explained, Delaware law views the "controlling stockholder as the 800-pound gorilla whose urgent hunger for the rest of the bananas is likely to frighten less powerful primates like putatively independent directors who might well have been hand-picked by the gorilla (and who at the very least owed their seats on the board to his support)."ⁿ⁶⁶ In such circumstances, the business judgment rule will not apply, as courts deem directors to be incapable of fulfilling their obligation to act in the best interests of all of the corporation's stockholders.ⁿ⁶⁷

To the extent the courts' unwillingness to rely on directors' business judgment in controlling stockholder transactions is based on the mere fact directors might lose their board positions, this is in tension with the maxim that, to be debilitating, the potential financial loss must be material in the particular director's circumstances.ⁿ⁶⁸

FOOTNOTES:

(n1)Footnote 1. *Cede & Co. v. Technicolor, Inc.*, 634 A.2d 345, 362 (Del. 1993) ; see also the discussion of the duty of loyalty at § 4.03[3] above .

(n2)Footnote 2. *Sinclair Oil. Corp. v. Levien*, 280 A.2d 717, 720 (Del. 1971) .

(n3)Footnote 3. *Cinerama, Inc. v. Technicolor, Inc.*, 663 A.2d 1156, 1169 (Del. 1995) (citing *Del. Code Ann. tit. 8, § 144(a)* (2003)). As discussed in greater detail below, Section 144 of the Delaware General Corporation Law provides a statutory "safe-harbor" for transactions that would be voidable at common law.

(n4)Footnote 4. See *HMG/Courtland Properties, Inc. v. Gray*, 749 A.2d 94 (Del. Ch. 1999) ; see also *Harbor Fin.*

Partners v. Huizenga, 751 A.2d 879, 887 (Del. Ch. 1999) (self-dealing, within rubric of Section 144, present where four of seven directors held substantial stock interest in merger target).

(n5)Footnote 5. See *Cheff v. Mathes*, 199 A.2d 548, 554 (Del. 1964) (providing example).

(n6)Footnote 6. See *HMG/Courtland Properties, Inc. v. Gray*, 749 A.2d 94, 113-114 (Del. Ch. 1999) (holding that directors are inherently interested in self-dealing transactions, regardless of the magnitude or strength of the personal or external influence in the particular transaction); *Cede Co. v. Technicolor, Inc.*, 634 A.2d 345, 362 (Del. 1993) (distinguishing between "classic self-dealing" and a third-party arm's length transaction in which directors have a material financial interest); *But see, Harbor Fin. Partners v. Huizenga*, 751 A.2d 879, 887 n. 20 (Del. Ch. 1999) (stating, in dicta, "[t]here is analytic force to the argument that Section 144 should, like many statutes, be read as incorporating a 'materiality' element. Such an element would ensure that a director who, for example, owns one share of stock worth \$100 or even \$1,000, in another entity with which the corporation of which he is a fiduciary is transacting business is not considered 'interested' ").

(n7)Footnote 7. See *Cinerama, Inc. v. Technicolor, Inc.*, 663 A.2d 1134 (Del. Ch. 1994) , *aff'd*, 663 A.2d 1156, 1169 (Del. 1995) ; *see, e.g., Siegman v. Tri-Star Pictures, Inc.*, CA 9477, 1989 Del. Ch. LEXIS 56 (May 5, 1989, revised May 30, 1989) (finding reasonable doubt of director disinterest where directors of target corporation owned stock in acquiror and plan of agreement required acquiror to pay a special dividend post-combination); *cf. Ivanhoe Partners v. Newmont Mining Corp.*, 535 A.2d 1334, 1341 (Del. 1987) (holding that directors were not interested in standstill agreement under which a dividend would be paid to all stockholders on a *pro rata* basis). Careful readers will see that the *Siegman* holding falls within the language of Section 144 and so may rightly be considered a case of "self-dealing" that renders a director per se "interested" regardless of the magnitude of his financial interest in the transaction. *Siegman* was decided before Delaware cases began to equate any Section 144 transaction with self-dealing. If *Siegman* was argued today, the plaintiffs' counsel could make a strong argument for *per se* interestedness, without regard to the materiality inquiry described below.

(n24)Footnote 24. See, e.g., *Levine v. Smith*, 591 A.2d 194, 205 (Del. 1990) ("[w]hen lack of independence is charged, a plaintiff must show that the Board is either dominated by an officer or director who is the proponent of the challenged transaction or that the Board is so under his influence that its discretion is 'sterilize[d]' ") quoting *Zapata Corp. v. Maldonado*, 430 A.2d 779, 784 (Del. 1981) ; *Friedman v. Beningson*, CA 12232, 1995 Del. Ch. LEXIS 154, at *12 (Dec. 4, 1995) (stating that the independence inquiry looks to the influence of a person "with a material financial interest in the transaction under attack, which interest is adverse to that of the corporation").

(n25)Footnote 25. See, e.g., *In re Oracle Corp. Derivative Litig.*, 824 A.2d 917, 928-929 (Del. Ch. 2003) ("a director may be compromised if he is beholden to an interested person"); *Rales v. Blasband*, 634 A.2d 927, at 936 (Del. 1993) (proving a lack of independence requires showing that directors are so "beholden" to controlling persons "or so under their influence that their discretion would be sterilized").

(n26)Footnote 26. See *McMullin v. Beran*, 765 A.2d 910, 923 (Del. 2000) (stating that an assessment of director independence requires a subjective "actual person" standard to determine whether a "given" director was likely to be affected in the same or similar circumstances); *In re Oracle Corp. Derivative Litig.*, 824 A.2d 917, 938 (Del. Ch. 2003) (stating that "the question of independence turns on whether a director is, for any substantial reason, incapable of making a decision with only the best interests of the corporation in mind") (emphasis in original) (citation omitted); *Friedman*, 1995 Del. Ch. LEXIS 154 at *12 (stating that a court must inquire "into all of the circumstances that are alleged to have inappropriately affected board power").

(n27)Footnote 27. See *Pogostin v. Rice*, 480 A.2d 619 (Del. 1984) ("[t]he question of independence flows from an analysis of the factual allegations pertaining to the influences upon the directors' performance of their duties generally,

and more specifically in respect to the challenged transaction").

(n28)Footnote 28. *See, e.g., Rales v. Blasband*, 634 A.2d 927, 937 (Del. 1993) (finding reasonable doubt that insider director was independent when interested directors could "exert considerable influence" over his continued employment at a \$1 million per year); NC, 2002 Del. Ch. LEXIS 71 , **14-15 (June 14, 2002) (finding long-standing business relationship, where director served on boards and as a short-term executive at several of interested party's companies, supported lack of independence); *Steiner v. Meyerson*, CA 13139, 1997 Del. Ch. LEXIS 88 (June 13, 1997) (finding small law firm's receipt of \$1 million per year from corporation was a substantial material benefit to a partner, which could be terminated at the behest of an interested CEO); *Friedman v. Benningson*, CA 12232, 1995 Del. Ch. LEXIS 154 at **13-16 (Dec. 4, 1995) (finding \$48,000 annual consulting fees to be a material financial interest that could be put in jeopardy by disagreeing with interested 36 percent stockholder/CEO).

(n29)Footnote 29. *See, e.g., Rales v. Blasband*, 634 A.2d 927, 937 (Del. 1993) (finding the fact that director's brothers' continued employment was controlled by interested party supported lack of independence); *California Pub. Employees Ret. Sys. v. Coulter*, CA 19191, 2002 Del. Ch. LEXIS 144 at **28-29, (Dec. 18, 2002) (finding fact that director's son was a restaurant manager for a corporation for which interested party was CEO supported lack of independence).

(n30)Footnote 30. *See, e.g., Aronson v. Lewis*, 473 A.2d 805, 816 (Del. 1984) ; *In re The Limited, Inc. S'holders Litig.*, CA 17148- NC, 2002 Del. Ch. LEXIS 28, at *7 (Mar. 27, 2002) (stating that "[a]llegations as to one's position as a director and the receipt of director's fees," without more, however, are not enough "to show a reasonable doubt of independence"); *accord In re KDI Corp. CHAPTER 4 LEGAL DUTIES AND RESPONSIBILITIES OF THE BOARD

1-4 Corporate Governance: Law and Practice § 4.05

AUTHOR: J. Travis Laster

§ 4.05 Application of the Entire Fairness Standard of Review

[1] Entire Fairness Review of Board Decisions

The entire fairness standard, rather than deferential review under the business judgment rule, will be used by a court to review board decisions when a plaintiff has rebutted one of the elements of the business judgment rule.ⁿ¹ Delaware courts have "generally and consistently refrained from adopting a bright-line rule for determining when a director's breach of duty of independence through self-interest translates into evidence sufficient to rebut the business judgment presumption accorded board action."ⁿ² This case-specific determination is further complicated by the fact that, by taking certain procedural safeguards to be discussed below, directors may sometimes preserve business judgment review.ⁿ³

Entire fairness review will apply from the outset when director self-interest or lack of independence has deprived the corporation of a "neutral decision-making body."ⁿ⁴ A corporation presumptively lacks a "neutral decision-making body" where a majority of the board of directors is interested in or lacks independence regarding a given transaction.ⁿ⁵ Entire fairness review will also presumptively apply where any director is interested in a challenged transaction but fails to disclose such self-interest to the entire board when a reasonable director would have viewed the existence of the material interest as a significant fact.ⁿ⁶ And even where a majority of the board is disinterested and independent, and where there has been disclosure of any conflicts that exist, entire fairness review may still apply where a stockholder's voting power gives it the ability to control both corporate parties to a transaction and the potential exercise of that power is deemed coercive in the circumstances.ⁿ⁷ The application of entire fairness review, rather than deferential business judgment review, is often outcome-determinative.ⁿ⁸

[2] Entire Fairness Analysis

"[T]he doctrine of entire fairness does not lend itself to bright line precision or rigid doctrine."ⁿ⁹ Nevertheless, the description of the doctrine in *Weinberger v. U.O.P., Inc.* ⁿ¹⁰ remains the definitive articulation of the standard:

The concept of fairness has two basic aspects: fair dealing and fair price. The former embraces questions of when the transaction was timed, how it was initiated, structured, negotiated, disclosed to the directors, and how the approvals of the directors and the stockholders were obtained. The latter aspect of

fairness relates to the economic and financial considerations of the proposed merger, including all relevant factors However, the test for fairness is not a bifurcated one as between fair dealing and price. All aspects of the issue must be examined as a whole since the question is one of entire fairness. However, in a non-fraudulent transaction, we recognize that price may be the preponderant consideration outweighing other features of the merger.¹¹

Courts generally have equated entire fairness with the terms of a hypothetical arm's-length transaction between two unrelated parties.¹² The use of protective devices in conflict transactions, such as a special committee of independent directors or a majority-of-the-minority voting condition, generally is viewed as evidence of fairness. The absence of these devices may or may not be regarded as evidence of unfairness.¹³ The court's "broad remedial powers" to address unfair transactions include the ability to reform a contract in order to remedy a breach of fiduciary duty,^{13.1} or to require directors to disgorge bonuses.^{13.2}

[a] Fair Dealing

In determining whether there has been "fair dealing," courts have looked at such elements as: (1) whether the corporation was financially injured by the timing of the transaction and whether the interested directors gained from the timing of what the corporation lost;¹⁴ (2) whether the transaction was structured to maximize benefits to the fiduciaries at the expense of corporate profits;¹⁵ (3) whether the transaction was negotiated by an independent committee of disinterested directors (or otherwise approved by a majority of the "disinterested members of the board") or whether procedural safeguards were in place to protect the interests of disinterested shareholders.¹⁶ The purpose of an independent negotiating structure is to replicate the result of arm's-length negotiations.¹⁷

Adequate disclosure to disinterested directors and stockholders is another factor in determining whether there has been fair dealing.¹⁸

Courts have found unfair dealing particularly in situations where the board's process was insufficient or tainted. The failure to use independent advisors and directors in negotiating an interested transaction can support a finding of unfair dealing.¹⁹ Courts also have found unfair dealing where an interested party obtained confidential information from the special committee or conspired with the special committee's advisors.²⁰

[b] Fair Price

Inquiry into fair price is complex and arises often in the context of parent-subsidary transactions, such as mergers where the dominating corporation is deemed to be on both sides of the transaction.

The "fair price" aspect of the entire fairness standard involves consideration of "all relevant factors," with a conclusion based on "proof of value by any techniques or methods which are generally considered acceptable in the financial community."²¹ Importantly, the fair price analysis under the entire fairness standard differs from the unique fair value analysis conducted by Delaware courts in examining the appraisal value of a shareholder's shares under the Delaware appraisal statute.²² Under an appraisal analysis, a Delaware court is required to "appraise the shares, determining their fair value, exclusive of any element of value arising from the accomplishment or expectation of the merger or consolidation, together with a fair rate of interest, if any, to be paid upon the amount determined to be the fair value."²³ In contrast, under an entire-fairness analysis, a court will take into account the value of "synergies" or consolidation economies resulting from the transaction.²⁴ Of course, any determination of fair price will depend on the facts underlying the given transaction or decision. In the context of self-dealing transactions, however, entire fairness is recognized as being a fair price is as close an approximation as can be judicially constructed to what the value that arm's-length bargaining might produce.²⁵

Many Delaware courts have observed that in a "non-fraudulent transaction," price may be "the preponderant consideration."ⁿ²⁶ There also is a small number of decisions applying the entire fairness standard and finding that the transactions were fair despite the presence of unfair dealing.ⁿ²⁷ Other decisions suggest, however, that unfair dealing usually prevents a finding of entire fairness because the unfair dealing adversely affects the price paid to the stockholders for their shares.ⁿ²⁸

[3] Section 144: Delaware's "Safe Harbor" Statute

At common law, a transaction in which a majority of the board was interested was voidable at the insistence of the corporation or its shareholders.ⁿ²⁹ It is unlikely that this was a rule of *per se* voidability that would be applied without regard to the fairness of a transaction.ⁿ³⁰ Section 144 of the Delaware General Corporation Law was enacted in 1967 to provide a "safe harbor" from this common law rule and establish clearly that such transactions are not void or voidable solely because of the financial interests in the transaction of officers or directors or solely because such officers or directors are present at or participate in the meeting of the board or committee that authorizes the transaction or because their votes are counted for the approval of the transaction. Section 144 operates to validate the transaction if either (i) the material facts concerning the interests of officers and directors in the transaction and as to the contract or transaction itself are disclosed to or known by the board or committee approving the transaction, which is authorized in good faith by the affirmative vote of a majority of the disinterested directors or of the shareholders; or (ii) the transaction is entirely fair to the corporation as of the time it is authorized, approved or ratified. Section 144 provides:ⁿ³¹

(a) No contract or transaction between a corporation and 1 or more of its directors or officers, or between a corporation and any other corporation, partnership, association, or other organization in which 1 or more of its directors or officers, are directors or officers, or have a financial interest, shall be void or voidable solely for this reason, or solely because the director or officer is present at or participates in the meeting of the board or committee which authorizes the contract or transaction, or solely because any such director's or officer's votes are counted for such purpose, if:

(1) The material facts as to the director's or officer's relationship or interest and as to the contract or transaction are disclosed or are known to the board of directors or the committee, and the board or committee in good faith authorizes the contract or transaction by the affirmative votes of a majority of the disinterested directors, even though the disinterested directors be less than a quorum; or

(2) The material facts as to the director's or officer's relationship or interest and as to the contract or transaction are disclosed or are known to the shareholders entitled to vote thereon, and the contract or transaction is specifically approved in good faith by vote of the shareholders; or

(3) The contract or transaction is fair as to the corporation as of the time it is authorized, approved or ratified, by the board of directors, a committee or the shareholders.

(b) Common or interested directors may be counted in determining the presence of a quorum at a meeting of the board of directors or of a committee which authorizes the contract or transaction.

By its own terms, Section 144 applies only to self-dealing transactions where corporate directors or officers appear on both sides of a transaction or have a financial interest in a business organization that is dealing with their corporation.ⁿ³² Delaware courts have acknowledged, however, that transactions involving interested and possibly non-independent directors, but that do not involve the self-dealing that falls within the literal language of Section 144, should still be reviewed in light of the procedural protections of Section 144.ⁿ³³

[a] The Effect of Complying with the Procedural Protections of § 144

Although Section 144 of the Delaware General Corporation Law saves conflict transactions from being voidable at the insistence of the corporation or the shareholders, Section 144 does not insulate such transactions from judicial scrutiny. The plain language of Section 144 makes clear that the failure to obtain informed director or stockholder approval for a transaction will render it subject to entire fairness review under subsection Section 144(a)(3). Some cases indicate that even if a corporation complies with the "safe harbors" of Section 144(a)(1) or (a)(2), a court still may review the transaction for fairness.ⁿ³⁴ Delaware courts have distinguished between transactions involving a controlling stockholder and those that do not. When a controlling stockholder is present, compliance with Section 144(a)(1) or (2) does not result in deferential review under the business judgment rule but merely shifts the burden of proving entire fairness from the defendants to the plaintiff.ⁿ³⁵ In the absence of a controlling stockholder, compliance with Section 144(a)(1) or (2) usually will result in deferential review under the business judgment rule.ⁿ³⁶

The application of the entire fairness standard whenever a controlling stockholder is present stems from the "inherent coercion" allegedly created when a controlling stockholder stands on both sides of a transaction. This so-called "*Lynch* doctrine" originated in *Kahn v. Lynch Communications Systems, Inc.*ⁿ³⁷ where the Supreme Court of Delaware addressed a split in Chancery Court precedent regarding the effect of disinterested directors' approval upon a controlling stockholder's burden of demonstrating entire fairness. Under one line of cases, disinterested-director approval of such transactions resulted in application of business judgment review.^{n37.1} A different line of cases held that such approval merely shifted the burden of proof to the plaintiff to show that the transaction was unfair.ⁿ³⁸ The court adopted the reasoning of the former line of cases without much analysis, holding:ⁿ³⁹

The exclusive standard of judicial review in examining the propriety of an interested cash-out merger transaction by a controlling or dominating shareholder is entire fairness. The initial burden of establishing entire fairness rests upon the party who stands on both sides of the transaction. However an approval of the transaction by an independent committee of directors or an informed majority of minority shareholders shifts the burden of proof on the issue of fairness from the controlling or dominating shareholder to the challenging shareholder-plaintiff. Nevertheless, even when an interested cash-out merger transaction receives the informed approval of a majority of the minority stockholders or an independent committee of disinterested directors, an entire fairness analysis is the only proper standard of judicial review.ⁿ⁴⁰

As the Court of Chancery has recently explained, under the *Lynch* doctrine,

Even if an independent board attempts to wholly replicate the situation that pertains when there is no controlling stockholder by hinging the procession of the merger on: (1) the negotiation and approval of the merger by independent directors on an adversarial basis; and (2) approval by disinterested stockholders, the *Lynch* doctrine says that the entire fairness standard governs.ⁿ⁴¹

The *Lynch* doctrine will also apply where, at the time of the merger, there is no controlling stockholder, if facts show that a stockholder had controlling status during the merger negotiations.ⁿ⁴² In addition to controlling stockholder mergers, the *Lynch* doctrine has also been applied to a stock sale between two corporations dominated by a controlling stockholder.ⁿ⁴³

Despite the mandated application of entire fairness, the *Lynch* doctrine seeks to encourage the use of such procedural protections by shifting the burden of proof on the issue of fairness from the defendant to the plaintiff.ⁿ⁴⁴ A recent Court of Chancery decision has critiqued the practical value of this incentive, noting that the placement of the burden of proof under a preponderance standard is not very significant and that the very fact-intensive nature of the inquiry into whether adequate procedural protections have been employed will usually preclude a shift of the burden until after a trial has been completed.ⁿ⁴⁵ Thus, as a practical matter, a defendant litigating under the *Lynch* doctrine will often bear the burden of proving fairness throughout trial.ⁿ⁴⁶

[4] Procedures Sufficient to Change the Standard of Review or Shift the Burden of Proving Fairness

[a] Disclosure of Material Facts

For a transaction involving interested directors to benefit from procedural protections in the manner described above,ⁿ⁴⁷ there must be full disclosure of the material facts relating to the transaction, including the disclosure of any debilitating self-interest.ⁿ⁴⁸ In order for director or stockholder ratification to be effective, Section 144 requires a state of affairs in which the "material facts as to the director's or officer's relationship or interest and as to the contract or transaction are disclosed or are known."ⁿ⁴⁹ Those who would rely upon disinterested director or stockholder ratification to uphold a transaction bear the burden of showing the disclosure of all material facts.ⁿ⁵⁰

Delaware decisions have focused on objective indicia of full disclosure, rather than the more subjective standard of directors' or shareholders' knowledge.ⁿ⁵¹ Because this inquiry focuses on disclosure of material facts, a relevant issue is what facts are material. The standard of materiality under Delaware law is the same as the standard under the federal securities laws:

An omitted fact is material if there is a substantial likelihood that a reasonable shareholder would consider it important in deciding how to vote It does not require proof of a substantial likelihood that disclosure of the omitted fact would have caused the reasonable investor to change his vote. What the standard does contemplate is a showing of a substantial likelihood that, under all the circumstances, the omitted fact would have assumed actual significance in the deliberations of the reasonable shareholder. Put another way, there must be a substantial likelihood that the disclosure of the omitted fact would have been viewed by the reasonable investor as having significantly altered the "total mix" of information made available.ⁿ⁵²

Materiality is frequently stated to be viewed from the perspective of a "reasonable investor" or "reasonable shareholder" for purposes of stockholder ratification under Section 144(a)(2), and a similar standard applies in the context of disinterested-director approval under Section 144(a)(1).ⁿ⁵³ Despite the similar framing of standards, however, what is material to a reasonable director in the fiduciary context of director decision making may be different than what is material to a reasonable stockholder evaluating a transaction.ⁿ⁵⁴ A director's financial interest in a business entity that stands on the other side of a transaction from the corporation is per se material and must be disclosed, regardless of whether it is so large as to constitute a likely influence on the particular director.ⁿ⁵⁵ This rule is consistent with the general principle that facts giving rise to any debilitating self-interest or lack of independence must be fully disclosed.ⁿ⁵⁶

[b] Disinterested-Director Approval

As discussed above, depending on the legal circumstances of the transaction, disinterested-director approval of a transaction may restore review under the business judgment rule or shift the burden to the plaintiffs to prove the transaction was unfair.ⁿ⁵⁷ A common method of securing disinterested-director approval of a challenged transaction is through the use of a special committee of disinterested and independent directors. The widespread use of special committees in interested-director transactions was prompted by a statement by the Delaware Supreme Court in *Weinberger v. U.O.P., Inc.*,ⁿ⁵⁸ which has been reiterated in subsequent decisions,ⁿ⁵⁹ that negotiation on behalf of the minority shareholders by a committee of independent directors would constitute strong evidence of the fairness of a transaction. Relatedly, the Delaware Court of Chancery has noted that the failure to utilize a committee of independent directors or other procedural safeguards "evidences the absence of fair dealing."ⁿ⁶⁰ While the formation of a special committee of independent directors is not required for effective disinterested-director approval,ⁿ⁶¹ the ability of such committees to keep otherwise compromised negotiations "at arms' length" is an important indicia of procedural fairness.ⁿ⁶²

To gain the benefits of using a special committee of disinterested directors, a transaction's proponents must prove the independence of the committee members and the thoroughness with which the committee has performed its duties.ⁿ⁶³ The special committee must have real bargaining power that it can exercise on an arm's-length basis.ⁿ⁶⁴ For example, in *Kahn v. Lynch Communications Systems, Inc.*ⁿ⁶⁵ There, Lynch shareholders challenged the merger of Lynch Communications Systems, Inc. into Alcatel U.S.A. Corp, which owned 43.3 percent of Lynch and exercised control over its operations. Although Alcatel designated only five of the eleven Lynch directors, "the non-Alcatel directors deferred to Alcatel because of its position as a significant shareholder and did not exercise their own business judgment that Alcatel's position was correct."ⁿ⁶⁶ In the past, Alcatel had demanded that the board respect its large stockholder status and had exercised influence in decisions about executive compensation and strategic transactions.ⁿ⁶⁷ Although the Lynch board formed a special committee of independent directors to negotiate the merger, the court found that the committee's decision was influenced by Alcatel's control. After rejecting three Alcatel offers as inadequate, the committee ultimately agreed to a price that its members believed was unfair in order to avoid a threatened hostile tender offer by Alcatel at an even lower price.ⁿ⁶⁸ Because the court found that the committee had surrendered to the dictated terms of the controlling shareholder, there was no valid disinterested-director approval sufficient to shift the burden of proof.ⁿ⁶⁹

A similar result was obtained in *Kahn v. Tremont Corp.*ⁿ⁷⁰ There the Delaware Supreme Court reversed the Court of Chancery finding that a special committee acted with sufficient independence and diligence to constitute an effective disinterested-director approval. The challenged transaction was a stock sale where both the seller and purchaser corporations were dominated by a controlling stockholder. The purchaser formed a special committee, consisting of three outside directors, to negotiate on its behalf. The chairman of the special committee had a long-time personal and professional relationship with an interested director, who was likely dominated by the controlling stockholder by virtue of his service as the corporation's president and CEO. The two other members of the special committee had previously been employed by the controlling stockholder. For its financial advisor, the committee chose a bank that was the current employer of the special committee's chairman and that had done substantial work for the controlling stockholder's other companies. The committee's legal advisor had also worked for the controlling stockholder's other companies, including the seller. While the committee and its advisors met four times to discuss the transaction, only the chairman was present at all four meetings. The chairman also seemed to have been the sole committee member involved in the actual negotiations over the terms of the deal.ⁿ⁷¹ Although the committee recommended the purchase, the court could not accept this as sufficiently valid disinterested-director approval. In particular, it noted that the ties between the committee, its advisors, and management and the controlling stockholder created doubts as to its true independence. Also, only one of the three committee members was adequately informed and actually engaged in the deliberative and negotiating process. Because this process did not suffice for valid disinterested-director approval, the defendants could not shift their burden under the *Lynch* doctrine.ⁿ⁷²

[c] Disinterested Stockholder Approval

As with disinterested-director approval, depending on the legal circumstances of the transaction, approval of a transaction through a vote of disinterested and informed stockholders may restore the business judgment rule or shift the burden to the plaintiffs to prove the transaction was unfair.ⁿ⁷³ At common law, majority stockholder approval of a transaction prevented it from being voidable by reason of director interest.ⁿ⁷⁴ This common law principle survived the enactment of Section 144, as evidenced by numerous decisions discussing the validating effect of stockholder ratification in general, without regard to the specific language of Section 144(a)(2).ⁿ⁷⁵

Under the common law, the validating effect of stockholder ratification only applied to votes by independent or disinterested stockholders.ⁿ⁷⁶ Although Section 144(a)(2) seems only to require a good faith approval of the stockholders entitled to vote on a transaction, the Delaware Supreme Court has required that, to be effective, such ratification must be made by a majority of disinterested stockholders entitled to vote on a transaction.ⁿ⁷⁷ This doctrine was first established in *Fliegler v. Lawrence*,ⁿ⁷⁸ which concerned the fairness of the consideration a corporation paid to purchase all the stock of a second corporation. The individual defendants were directors and officers of the purchasing

corporation, who were significant stockholders in the purchaser and owned a majority of the stock in the seller as well. Although the defendants "stood on both sides of the transaction," they argued that the entire fairness standard was inapplicable because a majority of the purchaser's stockholders ratified the purchase agreement. The court rejected this argument because most of the votes in favor of the transaction had been cast by the defendants, who were interested in the transaction. Though the defendants argued that Section 144(a)(2) does not require that ratifying stockholders be disinterested or independent, the court disagreed and placed the burden upon the defendants to show the entire fairness of the transaction.ⁿ⁷⁹ The *Fliegler* decision, read in light of the *Lynch* doctrine discussed above, indicates that, where a controlling shareholder is involved in an interested transaction, Section 144(a)(2) shareholder ratification cannot be relied upon to shift the burden of proof unless the transaction is approved by a majority of the disinterested minority stockholders.

The effect of independent stockholder ratification as it relates to alleged breaches of the duty of loyalty remains undeveloped.ⁿ⁸⁰ As noted above, stockholder approval ultimately can lead to business judgment review unless a controlling stockholder is involved in the transaction. In controlling stockholder transactions, approval by fully-informed holders of a majority of the minority shares merely shifts the burden of proving entire fairness to the plaintiff.ⁿ⁸¹ The Delaware courts have explained that a contractual provision that conditions the controlling stockholder transaction on minority stockholder approval can ameliorate the coercive influence of the controlling stockholder.ⁿ⁸² A recent Court of Chancery decision held that a majority-of-the-minority approval requirement should be conditioned on approval by a majority of the total number of outstanding minority shares entitled to vote on the transaction, rather than a majority of those minority shares actually voting on the transaction.ⁿ⁸³

(n11)Footnote 11. *Weinberger*, 457 A.2d at 711 .

(n12)Footnote 12. *See, e.g., Getty Oil v. Skelly Oil Co.*, 267 A.2d 883 (Del. 1970) .

(n13)Footnote 13. *Compare Smith v. Van Gorkom*, 488 A.2d 858, 876 (Del. 1985) (holding that an outside fairness opinion is not required as a matter of law where directors are entitled to good faith reliance upon the accuracy of management reports); *Sealy Mattress Co. of NJ, Inc. v. Sealy, Inc.*, 532 A.2d 1324, 1336 (Del. Ch. 1987) (finding absence of procedural protections were "pertinent factors" and "highly persuasive" evidence of procedural unfairness) *with Jedwab v. MGM Grand Hotels, Inc.*, 509 A.2d 584, 599 (Del. Ch. 1986) (noting that "the presence of such factors [suggesting independent negotiating structures] typically constitute indicia of fairness; their absence, however, does not itself establish any breach of duty) *and Wiegand v. Berry Petroleum Co.*, CA 9316, 1991 Del. Ch. LEXIS 37 (Mar. 27, 1991) (finding fact that controlling stockholder "furnished no procedural protections for the minority, such as independent negotiators, legal and financial advisors, or a 'majority of the minority' veto" constituted evidence of unfair dealing).

(n14)Footnote 13.1. *In re Loral Space and Communications Inc.*, Nos. 2808, 3022, 2008 WL 4293781 (Del. Ch. Sept. 19, 2008) (declining to decide whether individual directors had engaged in conduct exposing them to personal liability, because reformation was a sufficient remedy).

(n15)Footnote 13.2. *Julian v. Eastern States Const. Serv., Inc.* , No. 1892, 2008 WL 2673300 (Del. Ch. July 8, 2008) ("Self-interested directorial compensation decisions made without independent protections, like other interested transactions, are subject to entire fairness review.").

(n16)Footnote 14. *See, e.g., Kumar v. Racing Corp.*, CA 12039, 1991 Del. Ch. LEXIS 75 (Apr. 26, 1991) (finding that timing of merger in order to avoid honoring put and conversion rights of preferred stockholders supported finding of unfair dealing); *Van de Walle v. Unimation, Inc.*, CA 7046, 1991 Del. Ch. LEXIS 27 (Mar. 7, 1991) (finding timing of merger did not support unfair dealing where majority stockholder had reason to believe less valuable consideration would be available in the future and the minority was not deprived of tax savings going to majority); *Smith v. SPNV Holdings, Inc.*, CA 8395, 1989 Del. Ch. LEXIS 46 (Apr. 26, 1989) (denying plaintiff's motion for summary judgment where defendant's argument that stockholders' lost dividend was offset by time-value benefit of early receipt of merger consideration created issue of material disputed fact); *Jedwab v. MGM Grand Hotels, Inc.*, 509 A.2d 584, 599 (Del. Ch.

1986) (holding that controlling stockholder's timing of merger for personal gain, with no corresponding benefit to corporation or stockholders, would not support finding of unfair dealing without showing of some harm to corporation).

(n17)Footnote 15. *See, e.g., Summa Corp. v. Trans World Airlines, Inc.*, 540 A.2d 403, 407 (Del. 1988) (finding parent corporation's requirement that subsidiary deal exclusively with parent, at prices causing loss to the subsidiary, and structuring lease transactions to create tax benefits to parent to the harm of the subsidiary suggested unfair dealing); *Van deWalle v. Unimation, Inc.*, CA 7046, 1991 Del. Ch. LEXIS 27 (Mar. 7, 1991) (finding majority stockholder's side deals with merger partner did not support finding of unfair dealing where side deals had valid business rationales, subjected majority stockholder to financial obligations not shared by the minority, and no facts indicated they diverted merger consideration from minority stockholders).

(n18)Footnote 16. *See, e.g., Rosenblatt v. Getty Oil Co.*, 493 A.2d 929, 937-39 (Del. 1985) (finding strong evidence in support of fair dealing where majority of minority stockholders voted to approve merger agreement and board set up independent bargaining team to negotiate agreement in an adversarial manner); *Weinberger v. U.O.P., Inc.*, 457 A.2d 701, 714 n. 7 (Del. 1983) (noting that, since "fairness in this context [of a controlling stockholder merger] can be equated to conduct by a theoretical, wholly independent, board of directors acting upon the matter before them, it is unfortunate that this course apparently was neither considered nor pursued"); *Citron v. E.I. DuPont de Nemours & Co.*, 584 A.2d 490, 504 (Del. Ch. 1990) (finding "strong evidence of fair dealing" where majority of minority stockholders approved merger, which was negotiated by an independent committee of directors and non-independent directors completely abstained from decisionmaking process); *Shamrock Holdings, Inc. v. Polaroid Corp.*, 559 A.2d 257, 275 (Del. Ch. 1989) (finding evidence supported fair dealing in adoption of employee stock ownership plan that would arguably prevent hostile takeovers where employees fully funded the plan and controlled the disposition and voting of stock covered by the plan; analogizing this process to an independent board committee); *Sealy Mattress Co. of NJ, Inc. v. Sealy, Inc.*, 532 A.2d 1324, 1336 (Del. Ch. 1987) (finding board's lack of any independent directors or advisors "highly persuasive evidence" of unfair dealing).

(n19)Footnote 17. *See, e.g., Kahn v. Lynch Communication Sys., Inc.*, 638 A.2d 1110, 1121 (Del. 1994) (stating that courts must scrutinize actions of purportedly independent negotiators to see if they "replicated a process 'as though each of the contending parties had in fact exerted its bargaining power at arm's length.'"), quoting *Weinberger v. U.O.P., Inc.*, 457 A.2d 701, 709-710 n.7 (Del. 1983) .

(n20)Footnote 18. *See, e.g., Sealy Mattress Co. of NJ, Inc. v. Sealy, Inc.*, 532 A.2d 1324, 1336 (Del. Ch. 1987) (finding board's failure to make "any effort to determine whether the [merger] price was fair" and reliance on information provided by controlling stockholder supported finding of unfairness); *see also Smith v. Van Gorkom*, 488 A.2d 858, 873-78 (Del. 1985) (finding the lack of valid internal information or independent opinions supporting fairness of merger consideration supported finding that board did not validly approve merger).

(n21)Footnote 19. *See Oliver v. Boston University*, 2006 WL 1064169 (Del. Ch. Apr. 14, 2006) .

(n22)Footnote 20. *See In re Emerging Commc'ns S'holders Litig.*, 2004 WL 1305745, at *39-40 (Del. Ch. May 3, 2004) ; *Gesoff v. IIC Indus. Inc.*, 2006 WL 1458218 (Del. Ch. May 18, 2006) .

(n23)Footnote 21. *See Weinberger v. U.O.P., Inc.*, 457 A.2d 701, 713 (Del. 1983) .

(n24)Footnote 22. *Del. Code Ann. tit. 8, § 262* (2003).

(n25)Footnote 23. *Del. Code Ann. tit. 8, § 262(h)* (2003).

(n26)Footnote 24. *See Cinerama, Inc. v. Technicolor, Inc.*, 663 A.2d 1134, 1143 (Del. Ch. 1994) , *aff'd*, 663 A.2d 1156 (Del. 1995) (stating "the components of value in an acquisition might be considered to be two: the going concern value of the firm as currently organized and managed and the 'synergistic value' to be created by the changes the bidder contemplates (e.g., new management, cost efficiencies, etc.). This second component will vary to some extent among

bidders. It is the expectation of such synergies that allows a rational bidder to pay a premium when he negotiates a transaction"); *see also* *Allied Chem. & Dye Corp. v. Steel & Tube Co.*, 122 A. 142, 144 (Del. Ch. 1923) (finding that "[t]he fair price at which assets should be sold is to be determined by considering the matter not only from the side of the seller ..., but also from the side of possible purchasers in the light of what the assets may be worth to them").

(n27)Footnote 25. *Getty Oil Co. v. Skelly Oil Co.*, 267 A.2d 883, 886-887 (Del. 1970) (equating fair price with what would obtain in an unimpaired free market), *rev'd on other grounds*, 694 A.2d 422 (Del. 1997) ; *see also* *HMG/Courtland Properties, Inc. v. Gray*, 749 A.2d 94, 118 (Del. Ch. 1999) (finding that the price paid was unfair because, among other things, "a skilled and properly motivated negotiator could have done better ... in price negotiations").

(n28)Footnote 26. *Weinberger v. UOP, Inc.*, 457 A.2d 701, 711 (Del. 1983) .

(n29)Footnote 27. *See Emerald Partners v. Berlin*, 840 A.2d 641 (Del. 2003) ; *Cinerama, Inc. v. Technicolor, Inc.*, 663 A.2d 1156, 1178 (Del. 1995) ; *Oliver v. Boston Univ.*, C.A. No. 16570, 2006 WL 1064169, at *25 (Del. Ch. Apr. 14, 2006) .

(n30)Footnote 28. *See, e.g., HMG/Courtland Properties, Inc. v. Gray*, 749 A.2d 94, 118 (Del. Ch. 1999) .

(n31)Footnote 29. *See, e.g., Kerbs v. Cal. E. Airways*, 90 A.2d 652, 655 (Del. 1952) (holding that, although the status of a majority of directors as beneficiaries under stock option rendered it voidable, a majority of stockholders could ratify their act).

(n32)Footnote 30. *See, e.g., Oberly v. Kirby*, 592 A.2d 445, 466 (Del. 1991) ("At common law, a corporation's stockholders did have the power to nullify an interested transaction, although considerations of the transaction's fairness appear to have played some part in judicial decisions applying this rule"); Rodman Ward, Jr. *et al.*, *Folk on the Delaware General Corporation Law* § 141.1 at IV-197 (4th Ed. 2003) (arguing that a per se rule did not apply at common law, as courts considered the motives of the interested directors and the effects of the transaction).

(n33)Footnote 31. *Del. Code Ann. tit. 8, § 144* (2003).

(n34)Footnote 32. The statute applies to any "contract or transaction [1] between a corporation and 1 or more of its directors or officers, or [2] between a corporation and any other corporation, partnership, association, or other organization in which 1 or more of its directors or officers, are directors or officers, or have a financial interest." *Del. Code Ann. tit. 8, § 144* (2003); *see also*, *Cooke v. Oolie*, CA 11134, 1997 Del. Ch. LEXIS 92 , at * 32-40 (June 23, 1997) (applying Section 144 to classic self-dealing transaction in which directors lent money to their corporation); *cf.* *Cooke v. Oolie*, CA 11134, 2000 Del. Ch. LEXIS 89, at *44, 45 n.39 (May 24, 2000) (holding Section 144 did not apply where directors' status as creditors created material financial interest in the transaction divergent from that of stockholders).

(n35)Footnote 33. *See Cinerama Inc. v. Technicolor, Inc.*, 663 A.2d 1156, 1169-1170 (Del. 1995) (approving of Court of Chancery's analysis to uphold transaction outside literal language of statute where interested director made full disclosure and decision was ratified by independent majority of the board); *HMG/Courtland Properties, Inc. v. Gray*, 749 A.2d 94, 112-113 (Del. Ch. 1999) (explaining that precedent and the "desirability of doctrinal and statutory coherence" suggest transactions outside the literal language of Section 144 should be viewed in light of its statutory policies and procedures); *accord Oberly v. Kirby*, 592 A.2d 445, 467 (Del. 1991) (applying procedures of statutory safe harbor in allowing independent directors to ratify interested transaction of non-stock charitable corporation).

(n36)Footnote 34. *See Remillard Brick Co. v. Remillard-Dandini Co.*, 241 P.2d 66, 74 (Cal. Dist. Ct. App. 1952) (stating that "[e]ven though the [disinterested ratification] requirements of [a similar statute] are technically met, transactions that are unfair and unreasonable to the corporation may be avoided"); *Aronoff v. Albanese*, 446 N.Y.S.2d 368, 371 (App. Div. 1982) (holding that ratification under statute similar to Section 144 shifts burden of proof on the

issue of fairness, but does not validate transaction); *Scott v. Multi--Amp Corp.*, 386 F. Supp. 44, 68 (D.N.J. 1974) (stating, notwithstanding the disjunctive framing of a similar statute, there is "nothing in the [statute] to suggest that the legislature intended it to alter the traditional doctrine that a fiduciary who engages in self-dealing must endure the burden of proving that a challenged transaction is fair and equitable).

(n37)Footnote 35. See *Kahn v. Lynch Communication Sys.*, 638 A.2d 1110, 117 (Del. 1994) (holding, in the context of a negotiated controlling stockholder merger, that compliance with Section 144(a)(1) and/or 144(a)(2) merely shifts the burden on the issue of fairness, and does not restore the protections of the business judgment rule); *Cinerama, Inc. v. Technicolor, Inc.*, 663 A.2d 1134, 1154 (Del. Ch. 1994), *aff'd*, 663 A.2d 1156 (Del. 1995) (citing *Lynch* for the proposition that "compliance with the terms of Section 144 does not restore to the board the presumption of the business judgment rule; it simply shifts the burden to plaintiff to prove unfairness"); *Citron v. E. I. DuPont de Nemours & Co.*, 584 A.2d 490, 502 (Del. Ch. 1990) (finding that approval of a cash-out merger by the disinterested directors or a majority of the minority shareholders results in burden-shifting rather than the application of the business judgment rule and stating that "shareholder ratification and disinterested director intervention have a different procedural effect where the transaction is a parent-subsidary merger, than in the cases where the transaction is with a fiduciary that does not control the corporation"); *but see* Steven M. Haas, *Toward a Controlling Shareholder Safe Harbor*, 90 Va. L. Rev. 2245 (2004).

(n38)Footnote 36. See *Cede & Co. v. Technicolor, Inc.*, 634 A.2d 345, 365-66 (Del. 1993) (construing Section 144 as to allow "three alternative methods permit[ing] an otherwise interested transaction to be brought within the protection of the business judgment rule"); *Cooke v. Oolie*, CA 11134, 2000 Del. Ch. LEXIS 89, at **44-45 (May 24, 2000) (explaining that business judgment review should apply where a minority of the board's interest in the transaction is disclosed and ratified by a disinterested majority of directors); *Nebenzahl v. Miller*, CA 13206, 1996 Del. Ch. LEXIS 113, at *12 (Aug. 26, 1996) ("It certainly seems unlikely the General Assembly intended the same Director Defendants, who have made full disclosure and whose contemplated transaction has received the blessings of a majority of disinterested directors and a majority of the shareholders, to defend against a claim that the transaction was nonetheless unfair"); *Kaplan v. Goldsamt*, 380 A.2d 556 (Del. Ch. 1977) (holding that board's decision to have corporation purchase stock from director would be reviewed under the business judgment rule, absent a showing of waste); *Alcott v. Hyman*, 208 A.2d 501, 507 (Del. 1965) ("In the absence of stockholder ratification, the burden of the defendants is to show to the court's satisfaction, in the exercise of its own judgment after a close scrutiny of the transaction, that the directors in fact acted in utmost good faith and exercised scrupulous fairness. Given such stockholder ratification, however, the defendants' burden is reduced to that of showing that the terms were not so unbalanced as to amount to waste or that the question is such a close one factually as to fall within the realm of the exercise of sound business judgment"); *Gottlieb v. Heyden Chem. Corp.*, 33 Del. Ch. 177, 91 A.2d 57 (Del. 1952), *rev'd and remanded*, 92 A.2d 594 (Del. 1952) (holding that the business judgment rule would apply to directors' decision to award themselves stock options, wherein the directors "represented both themselves and the corporation," so long as there was stockholder ratification).

(n39)Footnote 37. *Kahn v. Lynch Communication Sys.*, 638 A.2d 1110 (Del. 1994) .

(n40)Footnote 37.1. See *in re Trans World Airlines, Inc. S'holders Litig.*, 1988 WC 111271 (Del. Ch. Oct. 21, 1988); *Puma v. Marriott*, 283 A.2d 693. (Del. Ch. 1971) .

(n41)Footnote 38. See *Lynch*, 638 A.2d at 1115-1116 (citing cases).

(n42)Footnote 39. In stating the "policy rationale" for an exceptionless rule that entire fairness review be applied, the court simply quoted at length from a case that emphasized a controlling stockholder's "potential to influence, however subtly, the vote of ratifying minority stockholders" by possibly taking future retributive actions against stockholders. See *Lynch*, 638 A.2d at 1115-1116, quoting *Citron v. E.I. Du Pont de Nemours & Co.*, 584 A.2d 490, 502 (Del. Ch. 1990) . Regardless of the accuracy of this observation, it fails to address the deference normally given to decisions of putatively independent directors, which is in large part the subject of this chapter.

(n43)Footnote 40. See *Lynch*, 638 A.2d at 1117 (citations omitted).

(n44)Footnote 41. *In re Cysive, Inc., S'holder Litig.*, 836 A.2d 531, 548 (Del. Ch. 2003) ; see also *Kahn v. Tremont Corp.*, 694 A.2d 422, 428 (Del. 1997) (explaining that "the underlying factors which raise the specter of impropriety can never be completely eradicated and still require careful judicial scrutiny").

(n45)Footnote 42. See *Emerald Partners v. Berlin*, 726 A.2d 1215 (Del. 1999) ; see also *Orman v. Cullman*, 794 A.2d 5, 20-21 n.34 (Del. Ch. 2002) (interpreting the *Emerald Partners* decision).

(n46)Footnote 43. See *Kahn v. Tremont Corp.*, 694 A.2d 422 (Del. 1997) ; cf. *In re Wheelabrator Tech., Inc.*, 663 A.2d 1194, 1205 (Del. Ch. 1995) (holding the *Lynch* doctrine inapplicable to merger with 22 percent, non-controlling stockholder).

(n47)Footnote 44. See *In re Cysive, Inc., S'holder Litig.*, 836 A.2d 531, 548 (Del. Ch. 2003) .

(n48)Footnote 45. *Cysive*, 836 A.2d at 549 .

(n49)Footnote 46. See *In re Cox Communications, Inc. S'holders Litig.*, 879 A.2d 604 (Del. Ch. 2005) .

(n50)Footnote 47. The precise benefits are that (1) the transaction will not be voidable under the common law rule, and either (a) it will be reviewed under the deferential business judgment rule (most cases), or (b) enjoy a shift in the burden of proof under the *Lynch* doctrine. See § 4.05[3][a] above.

(n51)Footnote 48. See *Del. Code Ann. tit. 8, § 144(a)(1) and (2)* (2003).

CHAPTER 4 LEGAL DUTIES AND RESPONSIBILITIES OF THE BOARD

1-4 Corporate Governance: Law and Practice § 4.06

AUTHOR: J. Travis Laster

§ 4.06 The Appraisal Remedy and Cash-Out Mergers--*Weinberger v. UOP, Inc.*

In *Weinberger v. U.O.P., Inc.*, n1 a former shareholder of UOP challenged a cash-out merger between UOP and its majority shareholder, Signal Companies, Inc. Prior to the merger, Signal owned 50.5 percent of the stock of UOP. Seeking an investment for its excess cash, Signal arranged for two officers of Signal who were also directors of UOP to conduct an internal feasibility study. The study showed that it would be a good investment for Signal to acquire the remaining shares of UOP for up to \$24.00 per share. The market prices at the time was \$14.50 per share. Signal proposed a cash-out price of \$20 to \$21 per share and retained an investment banker, which rendered an opinion that a price in the \$20 to \$21 range was fair to the minority shareholders. The disinterested directors and a majority of the minority shareholders of UOP approved a cash-out merger at \$21 per share.

The plaintiff claimed that the merger price was unfair and that Signal and the UOP board had breached their fiduciary duties to the minority shareholders of UOP. The Court of Chancery entered judgment for the defendant, finding that there were no material misstatements or omissions in the proxy statement and the cash-out price was entirely fair. The Delaware Supreme Court reversed, holding that the cash-out merger failed to satisfy any reasonable concept of fair dealing. The Delaware Supreme Court focused on the feasibility study that concluded that it would be beneficial for Signal to acquire the UOP shares at a price of up to \$24.00, which had been prepared by officers of Signal who were also directors of UOP and had not been disclosed either to the outside directors of UOP or to the UOP minority shareholders. The court discussed the fiduciary duties of dual directors and noted that the transaction had been initiated by Signal, was presented to and approved by the UOP board within four business days, proceeded without arm's-length negotiations, and the outside directors and UOP minority shareholders had not been given material information. The court affirmed that the minority shareholder had the burden to demonstrate some unfairness before the majority shareholder would be required to show fairness and further held that, where the merger had been approved by a fully informed vote of a majority of the minority shareholders, the burden would shift to the plaintiff to prove that the transaction was unfair. However, the court also determined that the burden of proof would remain on the majority shareholder to show that all material facts had been disclosed to the minority shareholders.

In the course of its analysis of the transaction, the *Weinberger* court held that the appraisal remedy "shall govern the financial remedy available to minority shareholders in a cash-out merger."n2 The court cautioned, however, that where "fraud, misrepresentation, self-dealing, deliberate waste of corporate assets, or gross and palpable overreaching are

involved," the appraisal remedy may be inadequate.ⁿ³ The court's holding in *Weinberger* led to a short-lived rule that, in the absence of fraud, misrepresentation, or other indications of unfair dealing, the appraisal remedy would be the sole remedy for minority shareholders in a cash-out merger.ⁿ⁴

Nevertheless, in the first post-*Weinberger* cash-out merger case it reviewed, the Delaware Supreme Court held that appraisal proceedings are not the exclusive remedy for an allegedly unfair price in a cash-out merger, even in the absence of fraud.ⁿ⁵ The court in *Rabkin v. Philip A. Hunt Chem. Corp.*,ⁿ⁶ refused to interpret *Weinberger* as holding that, absent evidence of unfair dealing, a minority shareholder's sole remedy in a cash-out merger is appraisal.ⁿ⁷ The *Rabkin* court instead interpreted *Weinberger* narrowly, holding that appraisal is the exclusive remedy only where the plaintiff attacks "judgmental factors of valuation," such as methodology used in calculating a fair price, rather than specific allegations of procedural unfairness or unfair dealing.ⁿ⁸ As the Delaware Supreme Court noted in *Glassman v. Unocal Exploration Corp.*,ⁿ⁹ this interpretation of *Weinberger* effectively eliminated the rule that appraisal is the exclusive remedy in a long-form merger.

CHAPTER 4 LEGAL DUTIES AND RESPONSIBILITIES OF THE BOARD

*1-4 Corporate Governance: Law and Practice § 4.07***AUTHOR:** J. Travis Laster**§ 4.07 Review of Director Decisions in the Short-Form Merger Context**

In contrast to entire fairness review of director decisions in long-form mergers with controlling stockholders, Delaware has adopted a policy of non-review for transactions in which the controlling stockholder unilaterally announces a tender offer or exchange offer with the goal of increasing its ownership level in the subsidiary above 90 percent. If the offer is successful, the parent effects a short-form merger under Section 253 to eliminate the remaining public shareholders. In *In re Siliconix Inc. Shareholders Litigation*,ⁿ¹ the Court of Chancery confirmed that a parent has no obligation to offer a fair price in a tender or exchange offer. In *Glassman v. Unocal Exploration Corp.*,ⁿ² the Delaware Supreme Court held that the exclusive remedy for minority shareholders following a short-form merger is an appraisal. A two-step transaction in which a parent unilaterally makes a tender offer or exchange offer followed by a short-form merger thus arguably does not trigger fairness review at either stage.ⁿ³ The fiduciary duty of disclosure, however, continues to apply, and in *Berger v. Pubco Corp.*,^{n3.1} the Court of Chancery concluded that the controlling stockholder had violated its fiduciary duty of disclosure by failing to disclose the method by which it had calculated the cash-out price. The company argued that since it had no obligation to set a fair price, the methodology was irrelevant, but the court disagreed, concluding that shareholders were entitled to know "in a broad sense what the process was, assuming [the parent corporation] followed a process at all and did not simply choose a number randomly."^{n3.2} The court held that the shareholders were entitled to a "quasi-appraisal" remedy for this breach of fiduciary duty.

In *In re Pure Resources, Inc. Shareholders Litigation*,ⁿ⁴ the Court of Chancery elaborated on two-step transactions initiated by controlling stockholders. The court advised that a tender offer following by a short-form merger will not be subject to entire fairness review if (1) the tender offer includes a non-waivable majority of the minority stockholder tender condition, (2) the controlling stockholder promises to commence a short-form merger promptly and at the same price as the tender offer consideration if the controlling stockholder acquires 90% or more of the company's outstanding shares, and (3) the controlling stockholder does not otherwise make any retributive threats.ⁿ⁵ Directors, however, remain subject to their fiduciary duties in responding to the controlling stockholder's two-step proposal.ⁿ⁶

The *Siliconix* line of cases raises a number of issues for boards and their advisors. Most obviously, there is an apparent distinction between two-step transactions effected pursuant to a merger agreement and two-step transactions effected unilaterally by a controlling shareholder. This creates a disincentive for parent corporations to negotiate and enter into merger agreements with subsidiaries and, accordingly, undermines the utility of the special committee process. These

results raise significant policy considerations. The Delaware Supreme Court has not yet weighed in on these issues and may be influenced by broader policy concerns. It is not clear to what extent negotiations with the subsidiary or the endorsement of a transaction by the subsidiary's board, albeit short of entering into a merger agreement, would affect the analysis and create a fairness obligation.

CHAPTER 4 LEGAL DUTIES AND RESPONSIBILITIES OF THE BOARD

1-4 Corporate Governance: Law and Practice § 4.08

AUTHOR: J. Travis Laster

§ 4.08 Interested-Director Transactions in Other States

Virtually every state has adopted a statute governing conflict of interest transactions. Although the statutes typically contain certain similarities, there are also significant variations. The general purpose of the conflict of interest statutes is to relax the common law rule that conflict of interest transactions were voidable and to establish that interested transactions will not be voidable solely as a result of a director's interest in the transaction, provided certain statutory requirements are met.

As is the case in Delaware, the statutes generally do not set forth the effect of disinterested director or shareholder approval, so the effect of such approval is unclear.ⁿ¹ As a result, courts have struggled to determine whether disinterested director or shareholder approval shifts the burden to the plaintiffs to prove unfairness or if such approval insulates the transaction from further review.ⁿ²

The Model Business Corporation Act was amended in 1988 to provide a comprehensive treatment of conflict of interest transactions and, perhaps, some enhanced predictability.ⁿ³ The Model Business Corporation Act specifically defines a conflict of interest transaction,ⁿ⁴ and also spells out in some detail the steps required for effective shareholder or director approval.ⁿ⁵ Under the Model Business Corporation Act, compliance with the detailed disinterested director or disinterested shareholder approval sections is intended to insulate the transaction from judicial review based on a conflict of interest claim.ⁿ⁶ A number of states have adopted the Model Business Corporation Act.ⁿ⁷

Florida's statutory provision regarding conflict of interest transactions closely resembles Section 8.31 of the 1984 version of the Model Business Corporation Act.ⁿ⁸ Section 607.0832 provides a safe harbor for interested-director transactions if the director discloses the fact of the existence of the conflict and the transaction is approved by a majority of the disinterested directors or shareholders, or if the transaction is fair to the corporation. Despite the disjunctive language of the statute, cases and commentators have found that Section 607.0832 should be read to require a determination of fairness in all interested-director transactions.ⁿ⁹

California's statutory provision expressly requires a fairness test if an interested transaction is approved by the directors of the corporation.ⁿ¹⁰ The California statute also contains a provision that, if an interested transaction does not receive approval from disinterested directors or disinterested shareholders, then the "person asserting the validity of the contract

or transaction sustains the burden of proving that the contract or transaction was just and reasonable as to the corporation at the time it was authorized, approved or ratified."¹¹ This provision has been interpreted to mean that if disinterested-director approval is obtained, the burden does not remain on the transaction's proponent, but shifts to the transaction's challenger to prove the unfairness of the transaction.¹²

Under New York law, a fairness review is always required in connection with an interested transaction.¹³ Disinterested board or shareholder approval makes the objecting shareholders' burden more difficult since such approval shifts the burden of proof to the challengers of the transaction, but compliance with *Section 713 of the New York Business Corporation Law* does not automatically validate a transaction or remove it from entire fairness review.¹⁴

In the cash-out merger context, some states have applied the entire fairness doctrine, while others have limited the minority shareholder to the appraisal remedy in the absence of fraud.¹⁵ The North Carolina statute provides that a dissenting shareholder cannot challenge a merger "unless the action is unlawful or fraudulent" to the shareholders or the corporation.¹⁶ In *Werner v. Alexander*,¹⁷ minority shareholders challenged a cash-out merger claiming that the defendants had engaged in a course of conduct designed to reduce the value of their shares. The Court of Appeals of North Carolina held that the shareholder's claim was one for unfair price which would not support a claim of fraud.

In *Kreiger v. Gast*,¹⁸ the United States District Court for the Western District of Michigan, applying Michigan law, held that the Michigan courts would not apply the entire fairness test in addition to statutory appraisal, stating that "appraisal is the sole remedy available to a minority shareholder, even in a conflict transaction, so long as the shareholder's complaint is that he was paid less than the fair value of his shares."¹⁹

CHAPTER 5 LIABILITY OF OFFICERS AND DIRECTORS; STATUTORY LIMITATIONS, INDEMNIFICATION
AND D&O INSURANCE

1-5 Corporate Governance: Law and Practice § 5.01

AUTHOR: Gillian McPhee

§ 5.01 Limitations on Liability of Officers and Directors: Introduction

In the wake of an unprecedented wave of corporate scandals that began with the collapse of Enron Corp., and the passage of the Sarbanes-Oxley Act of 2002ⁿ¹ (the "Sarbanes-Oxley Act" or "Sarbanes-Oxley"), which imposed substantial additional responsibilities on directors and officers of public companies, the availability of indemnification, insurance, and other protective mechanisms took on renewed significance for corporate directors and officers. More recently, the turmoil in the financial markets and the resulting increase in litigation,ⁿ² as well as the high-profile failures of several major financial institutions, have once again reinforced the importance of these protective mechanisms. More than ever, individuals considering whether to join or remain on a board know that they will be subject to heightened scrutiny and the prospect of significant threats of liability.

The director settlements at WorldCom, Inc. and Enron Corp. underscored this point.ⁿ³ In March 2005, twelve former nonmanagement directors of WorldCom agreed to pay a total of almost \$25 million of their personal funds to settle class action stockholder litigation arising out of the massive accounting fraud at WorldCom. This settlement agreement revived an earlier agreement that had been reached in January 2005 but failed to receive court approval for technical reasons. Under that agreement, ten former nonmanagement directors had agreed to contribute \$18 million of their personal funds to a \$54 million settlement, representing approximately 20% of their cumulative net worth (excluding certain assets such as their primary residences, retirement accounts and judgment-proof assets). The \$25 million settlement supplemented an additional \$36 million to be paid on the directors' behalf under WorldCom's directors' and officers' liability insurance coverage, ("D&O insurance"). Soon after the announcement of the first WorldCom settlement, it was reported that, in a confidential agreement reached in October 2004, ten former nonmanagement directors of Enron had agreed to pay \$13 million of a \$168 million settlement out of their personal funds in order to resolve claims against them arising out of Enron's fraudulent accounting practices. The remainder of the settlement was to be covered by D&O insurance.

In September 2006, four former nonmanagement directors of Just for Feet, Inc. agreed to pay \$40 million to settle a bankruptcy trustee's claim against them for alleged bad faith, breach of fiduciary duties, misrepresentations and conflicts of interest. The remaining nonmanagement director agreed to pay an additional \$1.5 million in March 2007. The company had collapsed in 1999 amid an accounting fraud and the company's D&O insurance had been largely

exhausted by a \$24.5 million settlement of a 2002 stockholders' securities class action lawsuit. Therefore, the company did not have enough insurance to cover the settlement contributions and, given that it was in bankruptcy, could not indemnify the directors.ⁿ⁴ This is very likely the largest out-of-pocket payment by outside directors stemming from corporate fraud allegations.

Although the WorldCom and Enron settlements resulted from circumstances that involved well-documented and egregious wrongdoing, and directors rarely personally contribute to settlementsⁿ⁵ (notwithstanding the outcomes in WorldCom, Enron and Just for Feet), there is no question that directors and officers today are operating in a more precarious environment that presents increased risks of liability. As a result, public corporations, and their directors and officers, are looking carefully at the nature and extent of the protections that are available to corporate officials. Almost universally, these protections include a combination of charter provisions that may be adopted by stockholders to limit or eliminate the monetary liability of directors (and, in a few states, officers) in specified circumstances, indemnification, and D&O insurance. The availability of robust protections is critical to effective corporate governance because it directly affects a corporation's ability to attract qualified directors and officers. Robust protections are particularly important in view of the growing consensus that changes in corporate governance practices are creating new and heightened expectations for directors.

CHAPTER 5 LIABILITY OF OFFICERS AND DIRECTORS; STATUTORY LIMITATIONS, INDEMNIFICATION
AND D&O INSURANCE

1-5 Corporate Governance: Law and Practice § 5.02

AUTHOR: Gillian McPhee

§ 5.02 Exculpation under Section 102(b)(7) of the Delaware General Corporation Law

[1] The Genesis of Exculpatory Charter Provisions

An effective corporate governance system depends upon the critical eye and watchful oversight of an independent board. Such a system can succeed only if qualified individuals are willing to serve as directors. By the mid-1980's, there were increasing concerns about the ability of Delaware corporations to attract and retain highly qualified directors due to a contraction in the availability and scope of D&O insurance coverage and an increase in premiums and deductibles, combined with an expansion in litigation involving directors and officers. In particular, the 1985 Delaware Supreme Court decision in *Smith v. Van Gorkom*, holding that directors could be personally liable for monetary damages for gross negligence in their decision-making processes,ⁿ¹ meant that individuals serving as directors faced the prospect of multi-million dollar judgments. The reluctance of many directors to serve without adequate insurance protection, and the possibility that the specter of liability would discourage directors from making business judgments that entail entrepreneurial risk, or from serving on boards at all, were viewed as "threaten[ing] the quality and stability of the governance of Delaware corporations."ⁿ² It was against this backdrop that Section 102(b)(7) of the Delaware General Corporation Law was enacted in 1986.ⁿ³

The statutory provision was a direct response to the drying up of the market for D&O insurance that followed the *Van Gorkom* decision. A similar tightening of the availability of D&O insurance occurred as a result of the failures of Enron Corp., WorldCom, Inc. and other large corporations, and because of serious issues of management integrity at companies like Adelphia Communications Corporation and Tyco International Ltd. The hardened market for D&O insurance that followed Enron and WorldCom began to soften again in 2004 and continued for several years, but the subprime mortgage meltdown and financial crisis have resulted in a retightening of the market for D&O coverage in the financial services sector, and a leveling off of the market in other sectors after several years of decreasing premiums and more favorable coverage terms in the D&O insurance market as a whole.ⁿ⁴

Section 102(b)(7) of the Delaware General Corporation Law permits a Delaware corporation to include in its original certificate of incorporation or an amendment to the certificate of incorporation a provision limiting or eliminating the personal liability of directors to the corporation and its stockholders for monetary damages for breaches of their

fiduciary duties as directors. Section 102(b)(7) also enumerates several circumstances in which a director's liability for breach of fiduciary duty may *not* be limited or eliminated. Specifically, no provision can eliminate a director's liability for:

- (1) breach of the director's duty of loyalty to the corporation and its stockholders;⁵
- (2) acts or omissions not in good faith or involving intentional misconduct or a knowing violation of law;⁶
- (3) willful or negligent conduct in paying dividends or repurchasing or redeeming stock out of funds that are not lawfully available, in violation of Section 174 of the Delaware General Corporation Law;⁷ or
- (4) any transaction from which the director derives an improper personal benefit.⁸

In large part, these limitations mirror the exclusions traditionally found in D&O insurance policies⁹ and reflect public policy determinations that it would be inappropriate to limit liability in circumstances where there is wrongdoing that involves some level of intent on the part of the director.

Since Section 102(b)(7) was enacted in 1986, nearly all states and the Model Business Corporation Act have followed Delaware's lead and now have provisions permitting stockholders to limit or eliminate the personal monetary liability of directors for breach of certain duties.¹⁰ A few states have taken a different approach and have enacted self-executing statutes that do not require stockholder action to become effective. These statutes alter the standard of care to make claims for monetary damages against directors more difficult.¹¹ As a result of Section 102(b)(7) and similar statutes in other states, the majority of large American corporations now have limitation-of-liability provisions in their charters.¹²

Charter provisions limiting or eliminating liability under Section 102(b)(7) generally take one of two forms. Some faithfully track the language of the statutory provision. Others provide for the limitation or elimination of liability "to the fullest extent permitted by Delaware law," language that is designed to capture any limitations on liability that may be authorized as a result of future amendments to Delaware law.

As discussed in more detail below, Section 102(b)(7) does not provide absolute protection from liability. It does, however, afford directors an added layer of protection by reducing the number of instances in which their personal assets may be put at risk to satisfy a judgment. A charter provision adopted under Section 102(b)(7) supplements the protections afforded by indemnification and D&O insurance.

[2] Extent of Limitations on Liability

Section 102(b)(7) of the Delaware General Corporation Law effectively enables a corporation to limit or eliminate the personal monetary liability of its directors to the corporation and its stockholders for breach of the duty of care, which requires that directors exercise diligence and care in managing the business and affairs of a corporation and exercise an informed business judgment in the discharge of their responsibilities.¹³ However, Section 102(b)(7) expressly prohibits insulation from liability for breach of the duty of loyalty.¹⁴ Although the term "duty of loyalty" is not defined in the Delaware General Corporation Law, this duty essentially requires that the best interests of the corporation and its stockholders take precedence over any interests of the directors that are not shared by the stockholders generally.¹⁵ Because Section 102(b)(7) distinguishes between the duty of care and the duty of loyalty, and does not permit limitation or elimination of liability for breach of the duty of loyalty, the issue of how director conduct is classified can have great significance, although this distinction is not always clear.¹⁶

There are several important limitations on the scope of Section 102(b)(7):

- (1) Section 102(b)(7) permits the limitation or elimination of liability for monetary damages only to a corporation and its stockholders, and not to third parties.
- (2) Section 102(b)(7) does not limit or eliminate equitable remedies, such as injunctive relief, although as a practical matter many such remedies (*e.g.*, an injunction against a transaction approved by the board) must be obtained quickly or they may have little practical effect.ⁿ¹⁷
- (3) Section 102(b)(7) applies only where a director is acting in the capacity of a director. Accordingly, actions taken by a corporate officer who is also a director, while acting as an officer, are outside the scope of Section 102(b)(7).ⁿ¹⁸
- (4) Section 102(b)(7) can only limit or eliminate liability arising under Delaware corporate law and does not apply to liability arising under other laws and regulations, such as the federal securities laws.
- (5) For corporations that do not have a Section 102(b)(7) provision in their original certificate of incorporation, the adoption of such a provision requires the approval of the corporation's stockholders.

Section 102(b)(7) also states that corporations cannot limit or eliminate directors' liability for acts or omissions not in good faith or involving intentional misconduct or a knowing violation of law.ⁿ¹⁹ While Section 102(b)(7) shields directors from liability even for actions that are grossly negligent,ⁿ²⁰ it is unclear whether Section 102(b)(7) can be used to protect directors from liability for actions that are reckless--that is, actions that are more than negligent but fall short of intentional wrongdoing. A handful of commentators have argued that the Delaware statutory provision permits corporations to eliminate totally their directors' liability for recklessness.ⁿ²¹ The more conservative view is that, to the extent that recklessness involves a conscious disregard of known risks, a director whose behavior is reckless has not acted in good faith and would not be eligible for exculpation under Section 102(b)(7).ⁿ²²

One issue that has received increased attention in the post-Enron environment is the extent to which a director's abdication of duty or lack of oversight constitutes a lack of good faith, making the protections of Section 102(b)(7) inapplicable.ⁿ²³ Following the collapse of Enron Corp., Vice Chancellor Strine of the Delaware Court of Chancery published an article in which he suggested that courts may find that a director who is conscious that he or she is not devoting sufficient attention to his or her duties is not acting in good faith, and is therefore not entitled to exculpation from liability under Section 102(b)(7).ⁿ²⁴ Since then, the Delaware courts have addressed the contours of good faith, and the related question of director liability for oversight failures, in a series of decisions holding that directors may not be acting in good faith if they consciously disregard either their responsibilities as board members or known risks to the company that they serve. These decisions arguably reflect a more expansive notion of the concept of "good faith" that has taken hold and that illustrates the evolving expectations on directors in performing their oversight responsibilities.ⁿ²⁵

In *In re Walt Disney Company Derivative Litigation*, the company's stockholders had filed a derivative suit alleging that the board breached its fiduciary duties by "blindly" approving the hiring and compensation of Disney's president, Michael Ovitz. According to the plaintiffs' complaint, neither the compensation committee nor the board reviewed or approved the final terms of Mr. Ovitz's compensation package, instead delegating to chief executive officer Michael Eisner, Mr. Ovitz's close friend of 25 years, responsibility to negotiate and approve significant details of the employment agreement. Both the compensation committee and the board allegedly spent less than one hour each approving Mr. Ovitz's hiring, and did so without considering information about the total potential payout under the agreement, data about industry standards for comparable executives and agreements, or expert advice from compensation consultants. The complaint alleged a "similar, ostrich-like approach" on the part of the board with respect to the process of negotiating Mr. Ovitz's departure from Disney, including a failure to consider alternatives to a nonfault termination provision that allowed Mr. Ovitz to leave Disney after barely one year with a payout (according to the plaintiffs' calculations) that amounted to \$140 million in cash and options.

In 2003, the Delaware Court of Chancery refused to dismiss the complaint against Disney's directors based on a Section 102(b)(7) provision in Disney's charter documents, stating that, if true, the plaintiffs had alleged facts demonstrating that the directors had "consciously and intentionally disregarded their responsibilities, adopting a 'we don't care about the risks' attitude concerning a material corporate decision."ⁿ²⁶ The court concluded that "[k]nowing or deliberate indifference by a director to his or her duty to act faithfully and with appropriate care" is conduct that either is not in good faith or involves intentional misconduct, placing it outside the protection of Section 102(b)(7).ⁿ²⁷

The principle articulated in *Disney I* was subsequently reaffirmed in *Official Committee of Unsecured Creditors of Integrated Health Services, Inc. v. Elkins*,ⁿ²⁸ a case that, like *Disney*, alleged breach of fiduciary duties in connection with approval of executive compensation arrangements. In *Integrated Health*, the Delaware Court of Chancery considered whether the directors "consciously and intentionally disregarded their responsibilities" to an extent that they could not be shielded by the company's Section 102(b)(7) provision, stating that:ⁿ²⁹

One may ... conceptualize the holding in *Disney I* as a duty of care claim that is so egregious--that essentially alleges the Board abdicated its responsibility to make any business decision--that it falls within the second exception to the general exculpating power of § 102(b)(7). See 8 *Del. C.* § 102(b)(7)(ii) (preventing exculpation from monetary liability "for acts or omissions not in good faith ...").

In concluding that the protections of Section 102(b)(7) were available for some claims relating to the approval of the compensation arrangements but not others, the court distinguished between claims that involved nondeliberation and those that involved insufficient deliberation:ⁿ³⁰

The facts in this case are different from those in *Disney*. Elkins founded [Integrated Health] and had been an executive of the company for over 10 years at the time of the first Challenged Transaction. Ovitz was at Disney for one year. No expert was retained by Disney, while [compensation consultant] Bachelder (regardless of questions over the method of his selection) was retained by [Integrated Health]. Thus, a change in characterization from a total lack of deliberation (and for that matter, a difference between the meaning of discussion and deliberation, if there is one), to even a short conversation may change the outcome of a *Disney* analysis. Allegations of nondeliberation are different from allegations of not enough deliberation.

The relevant inquiry, according to the court, was whether the board took some action or exercised some business judgment. In circumstances where the board did so, the court could not conclude that the board had consciously and intentionally disregarded its duties and had not acted in good faith, and therefore, Section 102(b)(7) would prevent the imposition of liability.ⁿ³¹

On August 9, 2005, following a lengthy trial, the Delaware Court of Chancery issued its long-awaited opinion in *The Walt Disney Company* litigation and on June 8, 2006, the Supreme Court of Delaware affirmed.ⁿ³² Among other things, the Court of Chancery held, and the Supreme Court affirmed the holding, that Disney's directors did not breach their fiduciary duties in connection with Ovitz's hiring and termination. Although the Court of Chancery had found (and the Supreme Court agreed) that "many aspects of defendants' conduct ... fell significantly short of the best practices of ideal corporate governance,"ⁿ³³ the Court of Chancery concluded that "Delaware law does not ... hold fiduciaries liable for a failure to comply with the aspirational ideal of best practices."ⁿ³⁴ However, after noting that a "fiduciary's duties do not change over time,"ⁿ³⁵ the Court of Chancery went on to state that "[h]ow we understand those duties may evolve and become refined."ⁿ³⁶ Accordingly, the liability standards applied to acts or omissions by directors today may be different from those applied to Disney's directors as a result of the corporate governance developments that have occurred in the ten years since the events giving rise to the *Disney* litigation.

Ultimately, the Section 102(b)(7) provision in Disney's charter documents did not affect the outcome of the litigation because the Delaware Court of Chancery concluded that Disney's directors had not acted in bad faith. In determining whether directors have acted in good faith, the Delaware Court of Chancery held that "the concept of intentional dereliction of duty, a conscious disregard for one's responsibilities, is an appropriate (although not the only) standard."ⁿ³⁷ In affirming the Court of Chancery's judgment, the Supreme Court of Delaware upheld this definition as "a legally appropriate, although not the exclusive, definition of fiduciary bad faith."ⁿ³⁸ The Delaware Supreme Court also addressed an issue that had not been entirely clear from the Court of Chancery's opinion--that is, how allegations of a lack of good faith should be treated for purposes of determining whether exculpation from liability is available under Section 102(b)(7). Acknowledging that the contours of the duty of good faith remain "relatively uncharted" and that there has been "an increased recognition of the importance of good faith,"ⁿ³⁹ the Delaware Supreme Court stated that "some conceptual guidance to the corporate community may be helpful."ⁿ⁴⁰ In providing this guidance, the Delaware Supreme Court explicitly rejected the argument that a breach of the duty of care (which requires conduct involving gross negligence) would automatically constitute a failure to act in good faith.ⁿ⁴¹ The Delaware Supreme Court further concluded that the definition of conduct not in good faith articulated by the Court of Chancery in *Disney II*--an "intentional dereliction of duty, a conscious disregard for one's responsibilities"--is properly treated as a non-exculpable, non-indemnifiable violation of the duty to act in good faith. According to the Supreme Court:ⁿ⁴²

[T]he universe of fiduciary misconduct is not limited to either disloyalty in the classic sense ... or gross negligence [the standard for finding a violation of the duty of care]. Cases have arisen where corporate directors have no conflicting self-interest in a decision, yet engage in misconduct that is more culpable than simple inattention or failure to be informed of all facts material to the decision. To protect the interests of the corporation and its shareholders, fiduciary conduct of this kind, which does not involve disloyalty (as traditionally defined) but is qualitatively more culpable than gross negligence, should be proscribed. A vehicle is needed to address such violations doctrinally, and that doctrinal vehicle is the duty to act in good faith.

In reaching its conclusion, the Supreme Court of Delaware also looked to the language of Section 102(b)(7), which prohibits elimination of a director's liability for acts or omissions not in good faith or involving intentional misconduct or a knowing violation of law.ⁿ⁴³ Because Section 102(b)(7) only permits elimination of liability for a breach of the duty of care (which requires conduct involving gross negligence), the Delaware Supreme Court concluded that Section 102(b)(7)'s denial of exculpation for acts not in good faith "must encompass the intermediate category of misconduct captured by the [Delaware Court of Chancery's] definition of 'bad faith.'"ⁿ⁴⁴

In a subsequent case, the Supreme Court of Delaware addressed the issue of whether there is a separate fiduciary duty of good faith under Delaware law, in addition to the fiduciary duties of care and loyalty. The issue arose in a case involving the standard to be applied under Delaware law when assessing the personal liability of corporate directors for failing to oversee a corporation adequately.ⁿ⁴⁵ In *Stone v. Ritter*, the Delaware Supreme Court affirmed the Court of Chancery's decision to apply the so-called *Caremark* standardⁿ⁴⁶ for assessing a director's potential personal liability for failing to act in good faith in discharging his or her oversight responsibilities. In affirming this decision, the Supreme Court of Delaware observed that the *Disney III* case had left open the issue of whether a failure to act in good faith, by itself, can serve as a basis for the imposition of liability.ⁿ⁴⁷ The Delaware Supreme Court concluded that, although the duty to act in good faith could be described colloquially as part of a "triad" of fiduciary duties that includes the duties of care and loyalty, the obligation to act in good faith does not establish an independent fiduciary duty that stands on the same footing as the duties of care and loyalty.ⁿ⁴⁸ However, a showing of bad faith conduct can still result indirectly in liability because a director's failure to act in good faith is a breach of the director's duty of loyalty.ⁿ⁴⁹ In this regard, the Delaware Supreme Court stated that "[w]here directors fail to act in the face of a known duty to act, thereby demonstrating a conscious disregard for their responsibilities, they breach their duty of loyalty by failing to discharge that fiduciary obligation in good faith."ⁿ⁵⁰

The Delaware Court of Chancery reiterated this principle in *In re Citigroup Inc. Shareholder Derivative Litigation*,

stating that "a showing of bad faith is a *necessary condition* to oversight liability."ⁿ⁵¹ In *Citigroup*, the court dismissed claims against current and former Citigroup directors alleging that they failed adequately to oversee and manage the risks that the company faced from exposure to the problems in the subprime mortgage market in 2007 and 2008, even in the face of alleged "red flags." In addressing the plaintiffs' claims, the Court of Chancery noted that the company had a Section 102(b)(7) charter provision. As a result, the court observed that "a serious threat of liability may only be found to exist if the plaintiff pleads a *non-exculpated claim* ... based on particularized facts."ⁿ⁵² To plead a claim for oversight failures, which (as noted above) are rooted in bad faith, the court stated that it would be necessary for a plaintiff to allege particularized facts showing that a director consciously disregarded an obligation to be reasonably informed about a company's business and its risks or consciously disregarded the duty to monitor and oversee the company's business.ⁿ⁵³ After noting that this placed an extremely high burden on the Citigroup plaintiffs,ⁿ⁵⁴ the court concluded that the plaintiffs had failed to meet this burden and dismissed all but one of their claims, including their claims for oversight failures. In doing so, the court noted that the plaintiffs' allegations amounted to little more than a claim that Citigroup had suffered large losses, that there were warning signs about the risks Citigroup faced in the subprime mortgage market, and that, because the directors failed to prevent the losses, the directors must have consciously ignored the warning signs or knowingly failed to monitor the company's risks.ⁿ⁵⁵

The foregoing cases illustrate that, under Delaware law, directors who engage in conduct that amounts to an intentional dereliction of duty or conscious disregard for their responsibilities will not be entitled to exculpation under Section 102(b)(7). This conduct is both conduct not in good faith and a breach of the duty of loyalty. Although the Supreme Court of Delaware made clear in *Disney III* that a breach of the duty of care does not equate with a failure to act in good faith, to the extent that conduct can be characterized as involving a lack of good faith, and therefore, a violation of the duty of loyalty,ⁿ⁵⁶ it is likely to be more difficult to obtain dismissal of complaints in reliance on a Section 102(b)(7) provision.ⁿ⁵⁷ However, as the result in *Citigroup* demonstrates, it remains difficult to state a claim against directors for oversight liability based on the failure to perform their oversight responsibilities.ⁿ⁵⁸

[3] Procedural Aspects of Invoking Section 102(b)(7)

In 2001, the Supreme Court of Delaware decided two cases that address when and how directors can invoke a limitation-of-liability provision adopted under Section 102(b)(7), *Malpiede v. Towson* ⁿ⁵⁹ and *Emerald Partners v. Berlin*.ⁿ⁶⁰ Specifically, the cases address the circumstances in which directors can rely on Section 102(b)(7) in the early stages of litigation, prior to discovery and a long and costly trial on the merits. One of the beneficial effects of an exculpatory charter provision "is to guarantee that ... directors do not suffer discovery or a trial simply because the plaintiffs have stated a non-cognizable damages claim for a breach of the duty of care."ⁿ⁶¹ Accordingly, the ability to invoke a Section 102(b)(7) provision at the start of litigation is significant. "To give [an] exculpatory charter provision any less substantial effect would be to strip away a large measure of the protection" provided by Section 102(b)(7).ⁿ⁶²

A charter provision adopted under Section 102(b)(7) is "in the 'nature of an affirmative defense' " and must be affirmatively raised by the director defendants.ⁿ⁶³ In *Malpiede v. Towson*, the Supreme Court of Delaware held that, when the business judgment rule provides the standard of review in a case, raising the existence of a valid Section 102(b)(7) provision in the corporate charter entitles a director to dismissal of any claims for monetary damages that are based solely on alleged breaches of the duty of care.ⁿ⁶⁴ The business judgment rule is a presumption that, in making a business decision, a corporation's directors "acted on an informed basis, in good faith and in the honest belief that the action taken was in the best interests of the company."ⁿ⁶⁵ The effect of the business judgment rule is to place the burden on the plaintiff to rebut the presumption of regularityⁿ⁶⁶ by showing that, in reaching its decision, the board "breached any one of its triad of fiduciary duties: due care, loyalty, or good faith."ⁿ⁶⁷

Under *Malpiede* and the Supreme Court of Delaware's subsequent decision in *Emerald Partners v. Berlin*,ⁿ⁶⁸ one procedure governs reliance on a Section 102(b)(7) provision where the well-pleaded facts allege only breach of the duty of care and a different procedure governs where a plaintiff overcomes the presumption of the business judgment rule by alleging breach of the duties of loyalty or good faith. *Malpiede* establishes that, where a plaintiff successfully alleges

only violations of the duty of care, a trial on the merits is unnecessary because Section 102(b)(7) would bar the defendants' liability for monetary damages that are attributable to violations of the duty of care.ⁿ⁶⁹ Accordingly, when a company has a Section 102(b)(7) charter provision and the complaint fails to allege facts that, if true, would implicate a breach of the duties of loyalty or good faith, the complaint can be dismissed at the outset of the litigation.ⁿ⁷⁰

In *Emerald Partners v. Berlin*,ⁿ⁷¹ the Supreme Court of Delaware established the procedure for determining the exculpatory effect of Section 102(b)(7) provisions where a plaintiff has rebutted the presumption of the business judgment rule by alleging a violation of the duty of loyalty or the failure to act in good faith. Where (as in *Emerald Partners*) a transaction is challenged and the business judgment rule is rebutted in connection with the transaction, the burden shifts to the defendant directors to prove that the transaction was "entirely fair" to the plaintiff stockholder.ⁿ⁷² In *Emerald Partners*, the Supreme Court of Delaware held that, when entire fairness is the applicable standard of review, a determination that directors are not liable for monetary damages under an exculpatory charter provision can be made only *after* the trier of fact decides whether the transaction was entirely fair.ⁿ⁷³

The rationale for making a determination of entire fairness a "condition precedent to any consideration of damages"ⁿ⁷⁴ is that the requirement of entire fairness is "unflinching in its demand."ⁿ⁷⁵ Accordingly, unlike where violations of the duty of care are alleged, directors cannot avoid having to demonstrate entire fairness by pointing to the existence of a Section 102(b)(7) provision and making the argument that, even if the transaction were determined to be unfair, the plaintiffs could not collect monetary damages. When the Supreme Court of Delaware remanded the case in *Emerald Partners*, it instructed the Court of Chancery to address the Section 102(b)(7) charter provision only if it determined that the challenged transaction was not entirely fair, at which point the issue of exculpation under Section 102(b)(7) could be examined in light of that finding.ⁿ⁷⁶ At that point, the directors may "avoid personal liability for paying monetary damages only if they have established that their failure to withstand an entire fairness analysis is exclusively attributable to a violation of the duty of care."ⁿ⁷⁷ In affirming the Delaware Court of Chancery decision that the transaction was entirely fair, the Supreme Court of Delaware, citing the Court of Chancery holding in the *Disney I* case,ⁿ⁷⁸ concurred that there were "process flaws" in the negotiations leading up to the transaction that "raise[d] serious questions as to the independent directors' good faith."ⁿ⁷⁹ However, the court declined to address the good faith issue because, even if the directors would not be protected by the Section 102(b)(7) charter provision due to a lack of good faith, they were not liable for monetary damages in view of the conclusion that the transaction was entirely fair.ⁿ⁸⁰

The rule articulated by the Supreme Court of Delaware in its decisions in *Malpiede* and *Emerald Partners*--that a director defendant bears the burden of pleading and establishing the elements of a defense based on Section 102(b)(7) unless only a violation of the duty of care is alleged--has been criticized on the ground that it effectively requires directors to establish that their conduct does not fall within any of the exceptions set forth in Section 102(b)(7), such as breach of the duty of loyalty.ⁿ⁸¹ The effect of these decisions is to limit the disposition under Section 102(b)(7) of claims in the early stages of litigation to cases alleging only violations of the duty of care. Where a breach of the duty of loyalty or a failure to act in good faith is successfully alleged, and the presumption of the business judgment rule rebutted, a court may assess the application of a Section 102(b)(7) charter provision only after discovery and a trial involving an assessment of the director's conduct. Moreover, as the concept of good faith increasingly becomes a subject of focus, as exemplified by the decisions in the *Disney* litigation and the *Integrated Health* and *Stone* cases,ⁿ⁸² the *Malpiede* and *Emerald Partners* decisions may result in even fewer cases being dismissed on the pleadings under Section 102(b)(7) charter provisions. In the *Disney I* and *Integrated Health* cases, as noted above, the Court of Chancery refused to dismiss complaints against the companies' directors in reliance on the companies' Section 102(b)(7) provisions, with the result that the cases would proceed to discovery and trial. Although the Supreme Court of Delaware did make clear in *Disney III* that a breach of the duty of care does not automatically equate with a failure to act in good faith,ⁿ⁸³ to the extent that conduct can be characterized as not in good faith, it is likely to become correspondingly easier for plaintiffs to plead violations of the duty of loyalty, and thus, to defeat defendants' ability to rely on Section 102(b)(7) provisions as a means of dismissing litigation at an early stage.ⁿ⁸⁴

(n2)Footnote 2. S.B. 533, 133rd Gen. Assem. (synopsis) (Del. 1986). The synopsis to the bill explains that

Section 102(b)(7) and the amendments to Section 145 represent a legislative response to recent changes in the market for directors' liability insurance. Such insurance has become a relatively standard condition of employment for directors. Recent changes in that market, including the unavailability of the traditional policies (and, in many cases, the unavailability of any type of policy from the traditional insurance carriers) have threatened the quality and stability of the governance of Delaware corporations because directors have become unwilling, in many instances, to serve without the protection which such insurance provides and, in other instances, may be deterred by the unavailability of insurance from making entrepreneurial decisions. The amendments are intended to allow Delaware corporations to provide substitute protection, in various forms, to their directors and to limit director liability under certain circumstances.

(n10)Footnote 10. *See* Model Bus. Corp. Act Ann. § 2.02(b)(4) (4th ed. 2008). All but a handful of states (Florida, Indiana, Ohio and Wisconsin) and the District of Columbia expressly permit the inclusion of a provision in the certificate of incorporation, charter or bylaws limiting or eliminating the personal liability of directors. *See also* Mark A. Sargent & Dennis R. Honabach, *D&O Liability Handbook: Law-Sample Documents-Forms* (Thomson West 2009) (compiling and discussing the relevant statutory provisions of various jurisdictions). *See also* Roberta Romano, *The States as a Laboratory: Legal Innovation and State Competition for Corporate Charters* 7-12. (European Corporate Governance Institute Working Paper Series in Law, Working Paper No. 34/2005 (Apr. 2005)), available at http://papers.ssrn.com/sol3/papers.cfm?abstract_id=706522 (discussing approaches taken by different jurisdictions). Several states also permit or provide by statute for limitation of monetary liability for officers. *See, e.g., La. Rev. Stat. Ann. § 12:24(C)(4)* (2008); *Md. Code Ann., Corps. & Ass'ns §§ 2-104(b)(8), 2-405.2* (2008); *Nev. Rev. Stat. § 78.138(7)* (2009); *N.H. Rev. Stat. Ann. § 293-A:2.02(b)(4)* (2009); *N.J. Stat. Ann. § 14A:2-7(3)* (2009); *Utah Code Ann. § 16-10a-840(4)* (2008); *Va. Code Ann. § 13.1-692.1(A)* (2009).

(n11)Footnote 11. *See, e.g., Fla. Stat. ch. 607.0831(1)(b)(5)* (2009) (directors not personally liable to a corporation or any other person unless the breach of, or failure to perform, their duties constitutes "recklessness or an act or omission which was committed in bad faith or with malicious purpose or in a manner exhibiting wanton and willful disregard of human rights, safety, or property"; *see also Fla. Stat. ch. 607.0831(2)* (2009) (definition of "recklessness"); *Ind. Code Ann. § 23-1-35-1(e)* (2009) (directors not liable for breach of or failure to perform duties unless breach or failure constitutes "willful misconduct or recklessness"); *Ky. Rev. Stat. Ann. § 271B.8-300(5)* (2009) (in addition to any other limitations set forth in an exculpatory charter provision adopted pursuant to Section 271B.2-020, directors are not liable for breach of or failure to perform duties unless such breach or failure constitutes "willful misconduct or wanton or reckless disregard for the best interests of the corporation and its shareholders"); *Ohio Rev. Code Ann. § 1701.59(D)* (2009) (a director is liable in damages only if proved by clear and convincing evidence that the director acted with deliberate intent to cause injury to the corporation or with reckless disregard for the corporation's best interests, unless the corporation opts in its charter or bylaws not to be governed by this standard); *Utah Code Ann. § 16-10a-840(4)* (2008) (directors not liable to a corporation, its shareholders, or any conservator, receiver, or assignee or successor-in-interest thereof, for breach of or failure to perform duties unless such breach or failure constitutes "gross negligence, willful misconduct, or intentional infliction of harm on the corporation or the shareholders"); *Wis. Stat. §§ 180.0828(1)(a)-(d)* (2008) (directors not liable to a corporation or its shareholders for breach of or failure to perform duties unless such breach or failure constitutes a "willful failure to deal fairly with the corporation or its shareholders in connection with a matter in which the director has a material conflict of interest ... [a] violation of criminal law (unless the director had reasonable cause to believe that his or her conduct was lawful or no reasonable cause to believe that his or her conduct was unlawful) ... [a] transaction from which the director derived an improper personal profit ... [or] [w]illful misconduct").

(n12)Footnote 12. A study of 100 companies in the "Fortune 500" demonstrated that: (1) 98 of the stock corporations incorporated in jurisdictions that permit exculpatory charter provisions had such provisions; and (2) every Delaware corporation had adopted an exculpatory charter provision. Out of a sample of 100 small- and mid-capitalization companies, all but one of those incorporated in jurisdictions that permit exculpatory charter provisions had them. Lawrence A. Hamermesh, *Fiduciary Duty, Limited Liability, and the Law of Delaware: Why I Do Not Teach Van Gorkom*, 34 *Ga. L. Rev.* 477, 490 & App. A (2000); *see also* Roberta Romano, *Corporate Governance in the Aftermath of the Insurance Crisis*, 39 *Emory L.J.* 1155, 1160-61 & n.11 (1990) (in a random sample of 180 Delaware corporations listed on the NYSE or NASDAQ, 90 percent had adopted a limitation-of-liability provision within one year of the enactment of Section 102(b)(7)).

(n13)Footnote 13. *See, e.g., Smith v. Van Gorkom*, 488 A.2d 858, 872-73 (Del. 1985) . Liability for breach of the duty of care requires a finding by a court that a director was grossly negligent. *See, e.g., Van Gorkom at 873* (citing *Aronson v. Lewis*, 473 A.2d 805, 812 (Del. 1984)) .

(n14)Footnote 14. *Del. Code Ann. tit. 8, § 102(b)(7)(i)* (2009); *Zirn v. VLI Corp.*, 621 A.2d 773, 783 (Del. 1993), *aff'd*, 681 A.2d 1050 (Del. 1996) ("the legislative history of [Section 102(b)(7)] indicates that corporations are empowered to shield directors from breaches of the duty of care, not the duty of loyalty" (citations omitted)).

(n15)Footnote 15. *See, e.g., Cede & Co. v. Technicolor, Inc.*, 634 A.2d 345, 361 (Del. 1993) (citations omitted).

(n16)Footnote 16. *See* 1 R. Franklin Balotti & Jesse A. Finkelstein, *The Delaware Law of Corporations and Business Organizations* § 4.16 & n.695 (3d ed. Supp. 2009) (noting that although the concepts of loyalty and due care seem analytically distinct, the cases have blurred the distinction, and some cases have used the concepts almost interchangeably in describing the same breach of duty).

(n17)Footnote 17. *See, e.g., Zirn v. VLI Corp.*, 681 A.2d 1050, 1062 (Del. 1996) . In *Zirn*, the Supreme Court of Delaware held that although VLI Corp.'s directors had breached their duty of care by making materially misleading partial disclosures in connection with a tender offer, they were protected from liability for monetary damages by an exculpatory charter provision approved by VLI Corp.'s stockholders under Section 102(b)(7). In noting that its decision

would leave the plaintiff stockholders with no redress, the court also pointed out that they could have sought injunctive relief if they had acted earlier and demonstrated the disclosure violations ultimately found by the court.

(n18)Footnote 18. According to one member of the Corporation Law Section of the Delaware State Bar Association, which drafted Section 102(b)(7), this limitation "reflects again the limited purpose of the statute" to encourage outside directors to serve and "to right the balance" between attracting and retaining qualified directors, on the one hand, and preserving the threat of personal liability as a mechanism for policing their actions, on the other hand. "It was not felt that the increased perception of risk of personal liability coupled with the unavailability of D&O insurance were sufficient to cause officers, who depend upon a corporation for their livelihood, to resign or refuse to serve." A. Gilchrist Sparks III, *Delaware's D&O Liability Law; Other States Should Follow Suit*, Legal Times, Aug. 18, 1986, at 10. Some states do permit corporations to exculpate officers from liability through charter or bylaw provisions. *See, e.g., La. Rev. Stat. Ann. § 12:24(C)(4)* (2008); *Md. Code Ann., Corps. & Ass'ns §§ 2-104(b)(8), 2-405.2* (2008); *N.J. Stat. Ann. § 14A:2-7(3)* (2009); *Va. Code Ann. § 13.1-692.1(A)* (2009). In 2009, the Supreme Court of Delaware explicitly held for the first time that officers have the same fiduciary duties as directors, confirming a point that had previously been addressed in dicta and had been a subject of consensus among practitioners. *Gantler v. Stephens*, 965 A.2d 695 (Del. Ch. 2009). However, the court noted that the consequences of a breach of fiduciary duty may not be the same for officers as for directors because of the availability of Section 102(b)(7) to directors. *Gantler*, 965 A.2d at 708-09 & n.36 (Del. Ch. 2009).

(n76)Footnote 76. Although the Delaware Court of Chancery found on remand that the transaction at issue in the *Emerald Partners* litigation was entirely fair, the court went on to address the availability of the Section 102(b)(7) charter provision in its opinion. See *Emerald Partners v. Berlin*, 2003 Del. Ch. LEXIS 42, at *133-*149 (Apr. 28, 2003) (*Emerald Partners II*) , *aff'd*, 840 A.2d 641 (Del. 2003) . After noting the Delaware Supreme Court's conclusion that, if the transaction were found to be entirely fair, no further analysis was necessary, the Court of Chancery indicated that it was addressing the availability of the exculpatory charter provision for two reasons: (1) the likelihood of an appeal given the lengthy history of appellate review in the case; and (2) the desirability of avoiding, if possible, a further remand in the event that the Court of Chancery's entire fairness determination was overturned. *Emerald Partners II*, 2003 Del. Ch. LEXIS 42 , at *72-*74 & n.63, *133-*134 & n.129 (citing *Emerald Partners v. Berlin*, 787 A.2d 85, 98 (Del. 2001)) . For purposes of its analysis, the court assumed that the merger was not entirely fair and considered whether the unfairness was the product of a breach of the duty of care or the duty of loyalty. *Emerald Partners II*, 2003 Del. Ch. LEXIS 42, at *135-*149 . The court concluded that, even if the merger had been found not to be entirely fair, the unfairness would have been, at most, solely the result of a breach of the duty of care and that, as a result, the defendant directors would be exculpated from monetary liability under the Section 102(b)(7) charter provision. *Emerald Partners II*, 2003 Del. Ch. LEXIS 42, at *135, *149 .

CHAPTER 5 LIABILITY OF OFFICERS AND DIRECTORS; STATUTORY LIMITATIONS, INDEMNIFICATION
AND D&O INSURANCE

1-5 Corporate Governance: Law and Practice § 5.03

AUTHOR: Gillian McPhee

§ 5.03 Indemnification

[1] Introduction and Background

Like exculpatory charter provisions, indemnification can be an important tool in attracting qualified individuals to serve as directors. While charter provisions under Section 102(b)(7) of the Delaware General Corporation Law or similar statutes can limit or eliminate directors' liability for monetary damages, indemnification can protect directors and other corporate officials from the expenses of litigation and, in some cases, from the cost of settlements or judgments.

Indemnification is one person's agreement to pay for the debts of another. In the present context, it is the use of a corporation's funds to compensate its officials for personal losses they have incurred as a consequence of the proper conduct of their official responsibilities.ⁿ¹ Indemnification rights are generally governed by the law of the jurisdiction in which a company is incorporated.ⁿ² The Delaware General Corporation Law and the corporation statutes of most states specify the circumstances in which a corporation is permitted, and in some instances, required to indemnify its directors, officers and other corporate officials against liabilities and related expenses incurred in connection with their service to a corporation.ⁿ³

For purposes of illustrating some fundamental principles about how indemnification works, this discussion will focus on the indemnification provisions of the Delaware General Corporation Law, both because of Delaware's popularity as a jurisdiction of incorporation and because Delaware's indemnification statute, set forth in Section 145 of the Delaware General Corporation Law,ⁿ⁴ has served as a model for a number of other jurisdictions.ⁿ⁵

Section 145 of the Delaware General Corporation Law, like analogous statutory provisions in other states, serves the dual purposes of:ⁿ⁶

- (a) allowing corporate officials to resist unjustified lawsuits, secure in the knowledge that, if vindicated, the corporation will bear the expense of litigation; and
- (b) encouraging capable women and men to serve as corporate directors and officers, secure in the knowledge that the corporation will absorb the cost of defending their honesty and integrity.

Consistent with applicable law, the rights granted under state indemnification statutes can be modified and tailored to meet a corporation's needs through the use of charter and bylaw provisions, as well as indemnification agreements.

[2] Who Is Eligible for Indemnification

One of the threshold issues to be addressed in considering indemnification is who is entitled to receive indemnification. Eligibility for indemnification generally depends on an individual's position at a corporation, as well as the capacity in which the individual is acting. Although this discussion focuses on the indemnification of directors because of their role in the governance of a corporation, the Delaware statute also permits indemnification and advancement of expenses for officers, employees and agents.ⁿ⁷ In each case, the entitlement to indemnification arises "by reason of the fact that the person is or was a director, officer, employee or agent of the corporation."ⁿ⁸ Indemnification also protects directors, officers, employees or agents of the indemnifying corporation who serve at the corporation's request in any of these positions at another entity.ⁿ⁹

In the absence of action by a Delaware corporation to limit continuing indemnification, indemnification continues after an individual has ceased to be a director, officer, employee or agent of a corporation, and inures to the benefit of the individual's heirs, executors and administrators, with respect to actions, suits or proceedings arising out of events that occurred during the period of an individual's service to the corporation.ⁿ¹⁰ In addition, under 2009 amendments to the Delaware General Corporation Law, corporations may not retroactively limit or eliminate indemnification rights granted under their charters or bylaws through amendments adopted after the occurrence of an act or omission to which indemnification relates, absent express language permitting this.ⁿ¹¹ The Delaware statute also protects directors, officers, employees and agents of corporations that are merged out of existence by providing that such individuals will stand in the same position with respect to the surviving corporation in a merger as they would have if the disappearing corporation had continued its separate existence.ⁿ¹²

The capacity in which an individual is acting is also relevant to whether the individual is entitled to indemnification. Under the Delaware statute, for indemnification to be available, an individual must be made (or threatened to be made) party to an action, suit or proceeding "by reason of" the individual's status as an officer, director, employee or agent of the corporation. Courts have shown some latitude in interpreting this language such that "if there is a nexus or causal connection between any of the underlying proceedings ... and one's official corporate capacity, those proceedings are 'by reason of the fact' that one was" an officer, director, employee or agent.ⁿ¹³ Accordingly, the availability of indemnification generally is not strictly limited to suits and proceedings involving actions taken in connection with the conduct of a corporate official's responsibilities on behalf of a corporation. For example, in *VonFeldt v. Stifel Financial Corporation*, the Supreme Court of Delaware refused to distinguish between various capacities in which an individual was serving at a wholly-owned subsidiary in determining that the individual was entitled to indemnification from the parent company, holding that the individual was serving at the request of the parent where the parent had elected him to the subsidiary's board of directors and calling "immaterial" the fact that the complaint named him as a defendant only in his capacities as an officer and employee and not as a director.ⁿ¹⁴

Moreover, the Supreme Court of Delaware has held that, provided the requisite nexus or causal connection is present, the motivations of the corporate official whose conduct is at issue in a proceeding are not relevant.ⁿ¹⁵ In a protracted litigation brought by Peter Tafeen, a former officer of Homestore, Inc., to compel advancement of expenses, Homestore argued that Tafeen had received \$15 million as a result of irregularities in Homestore's financial statements and that his actions were outside the scope of his official duties because they were motivated by personal greed. The Delaware Court of Chancery rejected this argument, and the Supreme Court of Delaware affirmed, holding that Tafeen was a party to the proceedings arising out of Homestore's financial statement irregularities because of his alleged role in a scheme to inflate the company's financial results while serving as an officer.ⁿ¹⁶ Accordingly, Tafeen was a party "by reason of" his status as a former officer, as required by the Delaware statute, and "without regard to [his] motivation for engaging in [the] conduct."ⁿ¹⁷

By contrast, a court found that no such nexus or causal connection was present in a proceeding arising out of the bankruptcy of Adelphia Communications Corporation in which members of the company's founding family, the Rigases, sought indemnification for defense costs incurred in connection with wire fraud charges of which they were acquitted.¹⁸ The Rigas defendants had authorized the indemnification in their capacity as directors of their privately owned cable companies, control of which had been transferred to Adelphia (the "managed entities"), and sought an injunction ordering Adelphia to pay the indemnification from these entities. The court concluded that indemnification was not available because the wire fraud charges were not brought against the Rigas defendants "by reason of" their status as directors of the managed entities or their positions with Adelphia.¹⁹ According to the court, because the wire fraud charges arose out of wire transfers made for the purpose of paying margin loans of Rigas-owned entities other than the managed entities, the charges had not been brought against them in their official capacity as directors or officers of the managed entities, and moreover, did not arise more tangentially from their roles, positions or status as such.²⁰ In reaching this conclusion, the court rejected the argument that the "by reason of" requirement had been met because the facts underlying the wire fraud charges were part of a broader conspiracy that allegedly was committed and resulted in injury to Adelphia, its investors, and banks and other creditors.²¹ Furthermore, certain types of conduct--such as sexual harassment--that are inconsistent with corporate standards or policies, and thus not explicitly or implicitly authorized by the corporation, will often be viewed as outside the scope of employment, with the result that indemnification will not be available.²²

[3] Mandatory Indemnification

Indemnification available under state indemnification statutes generally falls into two categories: mandatory indemnification and permissive indemnification. Under Section 145(c) of the Delaware General Corporation Law, indemnification of expenses for directors and officers is mandatory to the extent they are successful in defending a proceeding.²³ Accordingly, where directors and officers are defendants in a proceeding by reason of their service in such positions, to the extent they are successful, on the merits or otherwise, they are entitled to reimbursement of expenses actually and reasonably incurred in connection with mounting their defense.

The application of Section 145(c) is straightforward where a director or officer is completely victorious on the merits. In such an instance, a director or officer need only show "success" to be entitled to indemnification. Similarly, if a director or officer successfully asserts a procedural defense--such as the statute of limitations--the director or officer is entitled to indemnification as a matter of right under Section 145(c) because it mandates indemnification in the event of success "on the merits or otherwise." Absent such language, a defendant who successfully invoked the statute of limitations or another procedural defense in the early stages of litigation would be forced to undergo a trial on the merits in order to assert rights to mandatory indemnification of expenses.

Because Section 145(c) allows for partial mandatory indemnification, success in one of several related proceedings means that directors and officers are entitled to indemnification with respect to that proceeding, regardless of the outcome in other proceedings.²⁴ Likewise, where an indemnitee is successful in the defense of some, but not all, claims or counts of a single proceeding, the corporation must indemnify with respect to those claims or counts, even if the indemnitee is unsuccessful on related claims or counts.²⁵ A negotiated settlement that results in the dismissal of a case with prejudice and without any payment or assumption of liability is considered a "success" for purposes of Section 145(c),²⁶ while a dismissal of claims without prejudice is not because the claims could be litigated in another proceeding.²⁷

In contrast to Section 145(c), the Model Business Corporation Act and the indemnification statutes of those states that have followed it require that an indemnitee be "wholly successful on the merits or otherwise" to be entitled to mandatory indemnification.²⁸ The Official Comment to the Model Business Corporation Act states that, to be "wholly successful," the entire proceeding involving a director must be disposed of on a basis that does not involve a finding of liability against the director.²⁹

One court, however, has interpreted the "wholly successful" language as permitting indemnification where a result less than an acquittal or other final, favorable disposition has been obtained. In *In re Adelfia Communications Corporation*, a New York court interpreting the indemnification statutes of Georgia and North Carolina, which are both Model Act states, held that a defendant was entitled to indemnification of defense costs incurred in connection with a criminal trial where the jury hung with respect to some of the criminal counts.ⁿ³⁰ After analyzing the language of the Model Business Corporation Act and the accompanying commentary, the court concluded that the "wholly successful" requirement would be defeated by a conviction or plea, but not a hung jury.ⁿ³¹ In reaching this conclusion, the court emphasized that the Model Business Corporation Act clearly reflects a policy determination that, in criminal cases, a conviction or plea as to one count should deprive a director or officer of indemnification as to other counts.ⁿ³² The court went on to state, however, that the drafters of the Model Business Corporation Act did not plainly reject the notion that any result other than a conviction is a success.ⁿ³³ The court also emphasized that treating a hung jury as a conviction (or even as a basis for making a corporate official wait for indemnification until a decision was made on whether to retry the official) would be inconsistent with the policy in state indemnification statutes of encouraging corporate officials to serve with the assurance that they will be indemnified until they are found to have acted wrongfully.ⁿ³⁴

In practice, it is not clear whether the distinction between the Delaware General Corporation Law and the Model Business Corporation Act on the issue of partial indemnification would make much of a difference, since a director who is not "wholly successful" might still be entitled to indemnification under a corporation's charter or bylaws or an indemnification agreement if the director had acted in accordance with the statutory standard of conduct.ⁿ³⁵

[4] Permissive Indemnification and the Statutory Standard of Conduct

As discussed above, the indemnification available under state indemnification statutes generally falls into two categories: mandatory indemnification and permissive indemnification. While the limits of mandatory indemnification typically are circumscribed by statute in a fairly precise fashion, a corporation has the authority to grant permissive indemnification in a host of situations where an indemnitee is not wholly or partially successful on the merits or otherwise and thus would not be entitled to mandatory indemnification. In these situations, indemnification is left to the discretion of the corporation, subject to the satisfaction of the statutory standard of conduct. Consistent with their own interests and applicable law, corporations generally try to afford their directors and officers indemnification rights that are as broad as possible--through charter provisions, bylaws, indemnification agreements or some combination thereof--to assure these individuals that they will be protected. At the same time, however, Delaware courts have urged boards of directors to be mindful of their fiduciary duties to stockholders in adopting and reviewing indemnification and advancement protections.ⁿ³⁶ While recognizing the incentives to make these protections as broad as possible, the courts have cautioned that indemnification and advancement provisions should be "written in a manner that is fundamentally fair to the company and its stockholders."ⁿ³⁷

There are three provisions of Section 145 of the Delaware General Corporation Law that relate to permissive indemnification. For public policy reasons that will be discussed in more detail below, the Delaware General Corporation Law distinguishes between indemnification in suits brought by third parties and indemnification in suits brought by the corporation or on its behalf (such as derivative actions).

Section 145(a), which applies to third-party suits, permits a corporation to indemnify its directors, officers, employees and agents against expenses (including attorneys' fees), judgments, fines and settlement amounts incurred in any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative.ⁿ³⁸ Section 145(b), which applies to suits "by or in the right of the corporation," expressly permits indemnification of directors, officers, employees and agents only for expenses (including attorneys' fees) incurred in connection with the defense or settlement of an action or suit.ⁿ³⁹

The grant of indemnification under Sections 145(a) and (b) is not automatic. Rather, indemnification must be authorized

in the specific case upon a finding by the appropriate body that an individual is entitled to indemnification. Section 145(d) of the Delaware General Corporation Law, the third provision relevant to permissive indemnification, sets forth the procedure for determining whether an individual is entitled to indemnification under Section 145(a) or 145(b). Under Section 145(d), indemnification can be paid only "as authorized in the specific case upon a determination that indemnification ... is proper in the circumstances because the person has met the applicable standard of conduct set forth in subsections (a) and (b)" of Section 145.ⁿ⁴⁰ To satisfy the statutory standard of conduct, a person must have acted "in good faith" and "in a manner the person reasonably believed to be in or not opposed to the best interests of the corporation."ⁿ⁴¹ In addition, in any criminal action or proceeding, the person must also have had "no reasonable cause to believe the person's conduct was unlawful."ⁿ⁴²

Because indemnification must be authorized "in the specific case," it may not be made in advance pursuant to blanket authority, although directors and officers can be assured, by contract or by appropriate charter and bylaw provisions, that they will be indemnified under appropriate circumstances.ⁿ⁴³ For current directors and officers, indemnification must be authorized by one of:ⁿ⁴⁴

- (1) a majority of the directors who are not party to the suit with respect to which indemnification is sought (even if less than a quorum);
- (2) a committee of such directors (even if less than a quorum);
- (3) independent legal counsel in a written opinion; or
- (4) the corporation's stockholders.

Indemnification of employees and agents, and of former directors and officers, may be authorized by anyone that has the authority to act on behalf of the corporation for this purpose.ⁿ⁴⁵ Indemnification may also be authorized by a court, and Section 145(k) of the Delaware General Corporation Law vests exclusive jurisdiction in the Court of Chancery to hear and determine all actions for indemnification brought under Section 145 or any bylaw, agreement or otherwise.ⁿ⁴⁶

In a 2002 decision, the Supreme Court of Delaware held that, in the absence of an express demand requirement in a corporation's bylaws, there is nothing that precludes an individual from applying directly to a court to recover amounts for which indemnification is sought. That is, in the absence of a bylaw provision to the contrary, there is no requirement that an individual first apply to the corporation to have indemnification authorized through one of the four procedures (approval of the disinterested directors, a committee of disinterested directors, legal counsel, or the corporation's stockholders) outlined in Section 145(d).ⁿ⁴⁷

As long as the corporation can determine that the director has met the standard of conduct set forth in the Delaware General Corporation Law, the corporation can authorize indemnification. In addition, Section 145(a) of the Delaware General Corporation Law expressly states that "[t]he termination of any action, suit or proceeding by judgment, order, settlement, conviction, or upon a plea of *nolo contendere* or its equivalent, shall not, of itself, create a presumption that" an individual did not meet the standard of conduct.ⁿ⁴⁸ Accordingly, unless the proceeding to which a director is party establishes that the director acted in bad faith or in a manner contrary to the corporation's best interests, it is possible for the corporation to authorize indemnification even if the proceeding results in a criminal conviction or judgment against the director.ⁿ⁴⁹

The availability of permissive indemnification, in Delaware and in most other jurisdictions, generally depends on the type of proceeding brought against a corporate official and the outcome of the proceeding. As discussed above, the Delaware statute distinguishes between indemnification in third-party suits (Section 145(a)) and suits brought "by or in the right of" a corporation (Section 145(b)), which include both derivative suits and direct actions by a corporation against a director or other corporate official.

In derivative suits and direct actions against corporate officials, Section 145(b) expressly authorizes indemnification only for expenses and attorneys' fees incurred in defending or settling a suit and only in circumstances where there has been no adjudication of monetary liability to the corporation.ⁿ⁵⁰ Indemnification of expenses for any claim, issue or matter as to which an individual is adjudged liable to the corporation is prohibited, absent a determination by a court that "despite the adjudication of liability but in view of all the circumstances of the case, such person is fairly and reasonably entitled to indemnity for such expenses which the Court of Chancery or such other court shall deem proper."ⁿ⁵¹ There are no definitive criteria in the Delaware General Corporation Law or the case law establishing the showing that must be made to satisfy a court that indemnification is proper.ⁿ⁵²

The rationale for the more limited indemnification rights expressly authorized in Section 145(b) is that, in a derivative suit, or a direct suit by a corporation against its officials, the corporation would not receive the benefit of judgment or settlement amounts paid to it by a corporate official if the corporation were then required to repay those amounts as indemnification. Accordingly, in actions by or in the right of a corporation, indemnification will, as a practical matter, generally be limited to expenses and attorneys' fees, when a director or officer settles or successfully defends an action, and will not extend (as in suits brought by third parties) to the amount of any judgments or settlements, although indemnification might be available with court approval or if provided for under an indemnification agreement. For example, it could be argued that, because Section 145(b) does not expressly prohibit indemnification of judgments or settlements amounts, indemnification may be provided under the nonexclusivity provision in Section 145(f) of the Delaware General Corporation Law.ⁿ⁵³

Charter or bylaw provisions, and indemnification agreements, often provide for indemnification of judgment and settlement amounts in direct and derivative suits by a corporation under the nonexclusivity provision of the Delaware General Corporation Law.ⁿ⁵⁴ Accordingly, it is possible that, with court approval, indemnification for judgment or settlement amounts would be permitted in these circumstances.ⁿ⁵⁵ If, however, an official is "adjudged liable" to the corporation, even expenses are not available, unless permitted by court order.ⁿ⁵⁶

[5] Advancement of Expenses

The right to obtain advancement of defense expenses can be critical because in many instances, the costs of defending a lawsuit are more daunting, as well as more immediate, than the ultimate threat of liability. As the Supreme Court of Delaware has observed, "[a]dvancement provides corporate officials with immediate interim relief from the personal out-of-pocket financial burden of paying the significant on-going expenses inevitably involved with investigations and legal proceedings."ⁿ⁵⁷ Most state corporation statutes specify the circumstances in which corporations may advance expenses to corporate officials to pay or reimburse reasonable expenses of defense that they incur prior to the final disposition of a proceeding. The advancement of expenses under these statutes is generally permissive, although a corporation can provide for mandatory advances in its certificate of incorporation or bylaws, or by contract. Section 145(e) of the Delaware General Corporation Law provides that a corporation may advance expenses (including attorneys' fees) incurred by a current director or officer in defending any civil, criminal, administrative or investigative action, suit or proceeding in advance of its final disposition "upon receipt of an undertaking by or on behalf of such director or officer to repay such amount if it shall ultimately be determined that such person is not entitled to be indemnified by the corporation as authorized in this section."ⁿ⁵⁸ An undertaking is not required for employees and agents, or former directors and officers. Their expenses may be advanced "upon such terms and conditions, if any, as the corporation deems appropriate."ⁿ⁵⁹

Section 145(e) does not require that an undertaking to repay amounts advanced be secured, nor is the availability of advancement contingent upon an individual's financial ability to repay the corporation, although a corporation may require, in its bylaws or by contract, that a recipient of advances furnish security or demonstrate adequate financial resources.ⁿ⁶⁰ The absence of such conditions in the statute is consistent with the purpose underlying Section 145(e), which is to: "encourag[e] qualified persons to become or remain as directors of Delaware corporations, by assuring

them, *ex ante*, that they may resist lawsuits that they consider meritless, free of the burden of financing (at least initially) their own legal defense."ⁿ⁶¹ However, in a series of cases--most notably, the protracted litigation involving Homestore, Inc. and a former officer's right to advancement of expenses--the Delaware courts have increasingly emphasized that this goal must be balanced against "the obligation to ensure that advancement and indemnification [protections] are written in a manner that is fundamentally fair to the company and its stockholders."ⁿ⁶² In this regard, the Delaware Court of Chancery has stated that Section 145(e) merely sets forth the "bare minimum requirements" with respect to advancements, but leaves to the corporation itself (in its organizational documents and/or indemnification agreements) the determination as to "the *proper* balance between seeking able persons to serve as directors and officers and safeguarding the expenses advanced by the company, and thus the corporation's stockholders."ⁿ⁶³ Accordingly, the Delaware courts have rejected companies' attempts to argue "in broad-brush fashion" that the goal of attracting qualified directors and officers necessitates extensive advancement and indemnification rights, noting that this argument "falls woefully short of explaining the basis for exempting from *any* form of secured undertaking corporate [officials] who have been compensated at levels that would make it relatively simple to provide secured undertakings for the advancement of fees and costs."ⁿ⁶⁴

At the same time, however, the Delaware courts have made clear, in the *Homestore* litigation and subsequent cases, that they will enforce broad advancement provisions as written.ⁿ⁶⁵ Accordingly, the Delaware courts have not permitted companies "to escape the consequences of their own contractual freedom":ⁿ⁶⁶

Regretting the broad grant of mandatory advancement they forged on a clear day, [companies] seek to have the judiciary ignore the plain language of their contracts and generate an after-the-fact judicial contract that reflects their current preference. But is not the job of a court to relieve sophisticated parties of the burdens of contracts they wish they had drafted differently but in fact did not. Rather, it is the court's job to enforce the clear terms of contracts.

Instead, the Delaware courts have "emphasize[d] the unambiguous fact that corporations that voluntarily extend to their officers and directors the right to indemnification and advancement under *8 Del. C. § 145* have a duty to fulfill their obligations under such provisions with good faith and dispatch."ⁿ⁶⁷

In the *Homestore* litigation,ⁿ⁶⁸ a lengthy proceeding in which former officer Peter Tafeen sought to compel advancement of legal expenses, the Delaware Court of Chancery rejected the argument that it would undermine the policy of encouraging individuals to serve as directors and officers to allow an "unclean hands" defense to Tafeen's request for advancement where he had allegedly sheltered assets to evade a potential obligation to repay advanced funds.ⁿ⁶⁹ In the course of the advancement proceeding, Homestore argued that Tafeen had taken affirmative actions to shelter his assets in order to avoid having to reimburse the corporation if it were ultimately determined that he was not entitled to be indemnified. Therefore, Homestore argued, Tafeen had acted in bad faith and his claim for advancement should be barred by the doctrine of "unclean hands" and his breach of an implied covenant of good faith and fair dealing. In ordering a trial to resolve factual issues relating to Tafeen's conduct, the court concluded that a corporate official would "not be permitted to use the *statute itself* [Section 145(e)] after taking improper actions at the expense of the corporation's stockholders."ⁿ⁷⁰ Following a trial, the Delaware Court of Chancery concluded that Homestore had not met its burden of establishing that Tafeen had been engaged in a deliberate effort to shelter assets from Homestore.ⁿ⁷¹ The court also noted that an inability to repay is not a disqualification from advancement and refused to interpret Homestore's broad advancement bylaw as obligating Tafeen to maintain and demonstrate a financial ability to repay when the bylaw did not require a secured undertaking or any showing of ability to repay.ⁿ⁷² The court subsequently entered a final order directing Homestore to pay legal fees and expenses that Tafeen had previously incurred (with interest) and to advance his legal fees and expenses going forward.ⁿ⁷³ The Court of Chancery later denied Homestore's request for a stay of the court's order, and the Supreme Court of Delaware affirmed.ⁿ⁷⁴ In denying Homestore's request, the Court of Chancery concluded, among other things, that granting the stay would violate Delaware's public policy of encouraging individuals to serve as directors and officers by providing them with indemnification and advancement rights and Delaware's public policy of resolving advancement issues quickly.ⁿ⁷⁵ For

this reason, Section 145(k) of the Delaware General Corporation Law provides for expedited proceedings to determine advancement rights. These proceedings are "summary" in nature, meaning that they are generally limited to determining whether the relevant governing documents (charter, bylaws, indemnification agreements) provide a right to advancement.ⁿ⁷⁶ After noting that "[c]learly, to be of any value to the executive or director, advancement must be made promptly, otherwise its benefit is forever lost,"ⁿ⁷⁷ the Court of Chancery concluded that granting Homestore's request for a stay:ⁿ⁷⁸

would allow it to continue to be derelict in its contractual protection of its directors/officers, and that would force its directors/officers to compromise their litigations in the face of cost concerns, a result that is clearly against Delaware's policy of resolving advancement issues as quickly as possible.

The Supreme Court of Delaware subsequently affirmed the holdings of the Delaware Court of Chancery in the *Homestore* litigation, including the Court of Chancery's conclusions that Tafeen's actions did not rise to the level of "unclean hands" or a breach of the implied covenant of good faith and fair dealing that would relieve Homestore of its obligation to advance his expenses.ⁿ⁷⁹ Shortly after the Supreme Court of Delaware issued its decision, Homestore and Tafeen entered into a settlement agreement requiring Homestore to reimburse Tafeen up to a maximum of almost \$12 million, including approximately \$6.5 million that had already been advanced through January 2006. Under the settlement agreement, Homestore also agreed not to seek repayment of any funds advanced to Tafeen if it should subsequently be determined that Tafeen is not entitled to indemnification.ⁿ⁸⁰ Eight days after the announcement of the settlement, Tafeen pleaded guilty to one count of securities fraud under a plea agreement stating that he had received \$6.4 million from insider trading in Homestore's stock.ⁿ⁸¹

In *Barrett v. American Country Holdings, Inc.*,ⁿ⁸² the Delaware Court of Chancery concluded that a company's directors and officers had a clear right to advancement under the company's certificate of incorporation and sharply criticized the company's attempts to extract a settlement from the former directors and officers by arguing that they had forfeited that right as a result of refusing to settle the company's claims against them. The Court of Chancery upheld the advancement rights of the former directors and officers, characterizing the company's arguments to the contrary as "outlandish," "baseless" and "illogical."ⁿ⁸³ In *Barrett*, plaintiffs were former directors and officers of American Country Holdings, Inc., who were suing for enforcement of their advancement rights in connection with litigation brought against them by American Country arising out of the company's acquisition by Kingsway Financial Services, Inc. The basic contention was that the former directors and officers had misled Kingsway concerning the true financial condition of American Country. The D&O insurer had been advancing fees for the defense of that action, but the policy limits were about to be exhausted, so the directors and officers asked the company to confirm that they were entitled to advancement of their legal fees going forward. The company failed to respond, and the directors and officers sued. Despite clear terms in its certificate of incorporation requiring advancement, the company took the position that the directors and officers had forfeited their right to advancement by unreasonably rejecting the company's offers to settle the litigation against them.

The Delaware Court of Chancery rejected the company's arguments, describing the company's position as "truly astounding," and "stunning for its lack of basis in law, logic or common sense."ⁿ⁸⁴ The company's suit against the directors and officers entitled them to "put up a vigorous defense," and to have the company honor its contractual advancement obligations in doing so. According to the court, an "important part of the policy rationale supporting indemnification and advancement is that corporate officials should be able to defend not only their pocketbooks, but also their good names."ⁿ⁸⁵ The court made clear that "a defendant who faces claims of official wrongdoing and who is owed advancement rights is entitled to have those rights honored precisely so that she can defend her good name and personal wealth."ⁿ⁸⁶

In concluding that the directors and officers had a clear right to advancement, the court noted, as it has in previous cases, that if companies wish to avoid advancing expenses in certain circumstances, such as where they believe an individual may have engaged in misconduct, then they should draft their advancement provisions differently:

One wishes that the tsunami of regret that swept over corporate America regarding mandatory advancement contracts would have been followed by the more careful tailoring of advancement provisions, with a diminishment (especially as to officers) of the mandatory term that seems to so bother directors faced with the responsibility of actually ensuring that the corporation honors its contractual duties once a (typically) former officer is sued or prosecuted for fraud or other serious wrongdoing. Although it is uncomfortable to cause the corporation to advance millions in fees to a former officer the current board believes engaged in serious misconduct, it does stockholders no service for a board to refuse to do so when the advancement obligation is clear. If the directors in such a situation truly wish to serve the stockholders, they should fix what they can by revising the corporation's advancement obligations on a going-forward basis. To breach a contract because you do not like its terms while refusing to change it when you have the authority to do so is hard to explain as an act of appropriate fiduciary fortitude.ⁿ⁸⁷

The Delaware statute has also taken what one pair of commentators calls "a realistic approach" of not conditioning eligibility for advances on compliance with a particular standard of conduct, in recognition of the fact that the propriety of an individual's conduct may not be ascertainable in the early stages of litigation.ⁿ⁸⁸ Accordingly, even if a complaint against a corporate official alleges facts that, if true, would prohibit indemnification, to be entitled to advances the official need only provide an undertaking to return any amounts advanced if it is later determined that he or she is not entitled to indemnification because of a failure to meet the statutory standard of conduct. In fact, the Delaware courts have observed that "it is in those very cases" where a corporate official is accused of serious wrongdoing "that the right to advancement attaches most strongly."ⁿ⁸⁹ In this regard, the Supreme Court of Delaware has observed that the public policy behind the Delaware advancement statute "will only be achieved if the promissory terms of advancement contracts are enforced by courts even when corporate officials ... are accused of serious misconduct."ⁿ⁹⁰

Accordingly, even where a corporate officer has been convicted of criminal charges and sentenced but has time remaining to appeal, or has admitted wrongdoing and pled guilty to criminal charges the Delaware Court of Chancery has held that the officer is entitled to continue to receive advancement of his legal expenses under a typical, broad-based mandatory advancement provision.ⁿ⁹¹

Sun-Times Media Group, Inc. v. Conrad M. Black, et al. involved four former officers of the company who had been convicted of criminal charges at the trial court level and had been sentenced. After their sentencing, Sun-Times informed the former officers that it would no longer advance expenses to them. Like many public companies, Sun-Times had an advancement provision in its bylaws that mirrored the language in Section 145(e) of the Delaware General Corporation Law, providing that directors and officers were entitled to have their expenses paid by Sun-Times "in advance of the final disposition" of an action, suit or proceeding, subject to an agreement of the director or officer to repay any advances "if it shall ultimately be determined that he is not entitled to be indemnified."ⁿ⁹² At the time the Delaware Court of Chancery heard the case, the U.S. Court of Appeals for the Seventh Circuit had affirmed the convictions of the former officers, but the time period for filing a petition for certiorari with the U.S. Supreme Court had not yet expired.ⁿ⁹³ The court held that the "final disposition" of an action, suit or proceeding means a "final, non-appealable conclusion of that proceeding" and that, because appellate proceedings were not yet concluded, Sun-Times remained obligated to advance expenses to its former officers despite their conviction and sentencing.ⁿ⁹⁴ The court based its holding on the "final disposition" language of the Sun-Times bylaws and the corresponding provision of Section 145(e) of the Delaware General Corporation Law, the Delaware public policy favoring advancement of expenses and the practical difficulties that would arise if each successive stage of a legal action were considered a separate proceeding in which a "final disposition" could occur.

The *Sun-Times* opinion discussed at some length the Delaware Court of Chancery's earlier decision in *Bergonzi v. Rite Aid Corporation*.ⁿ⁹⁵ In *Bergonzi*, the court held that Rite Aid remained obligated to continue advancing expenses to its former Chief Financial Officer, Frank Bergonzi, who had pled guilty to participating in a criminal conspiracy to defraud the company and admitted under oath to deliberate falsification of the company's financial statements and to receiving a

fraudulently backdated employment agreement that purported to grant him millions of dollars. Following the guilty plea, Rite Aid notified Bergonzi that it would no longer advance the costs of his defense. The advancement provision in Rite Aid's certificate of incorporation was identical in substance to the provision in the *Sun-Times* bylaws. The Delaware Court of Chancery concluded that even though Bergonzi had pled guilty, his proceedings had not reached a "final disposition" because he was required to testify in a related proceeding pursuant to his plea agreement, and this testimony would impact whether he received a favorable sentencing recommendation.ⁿ⁹⁶ Accordingly, the court concluded that Bergonzi continued to have an enforceable right to advancement and that Rite Aid was required to continue advancing his expenses.ⁿ⁹⁷ The court also rejected the argument that the guilty plea was an "ultimate determination" that Bergonzi was not entitled to indemnification, and therefore was no longer entitled to receive advances.ⁿ⁹⁸ In reaching this conclusion, the court cited language in the undertaking Bergonzi had provided to Rite Aid requiring the return of advances in the event of an ultimate determination by a court in a final judgment, which had not occurred.ⁿ⁹⁹ The court also cited language in Rite Aid's certificate of incorporation establishing that, in proceedings to enforce rights to indemnification, *but not* advancements, "[i]t shall be a defense" that an individual has not met the statutory standard of conduct that makes indemnification permissible under Delaware law.ⁿ¹⁰⁰ According to the court, the plain language of the certificate of incorporation precluded RiteAid from asserting that Bergonzi had not met the standard of conduct as a defense to Bergonzi's claim for advances.ⁿ¹⁰¹

In May 2007, former Qwest Communications International Inc. Chairman and CEO Joseph Nacchio filed a lawsuit in the Delaware Court of Chancery seeking payment of his legal bills.ⁿ¹⁰² In addition to facing criminal insider trading charges, Nacchio was named in several stockholder suits and was charged with civil fraud by the SEC stemming from an accounting scandal. Qwest had been advancing Nacchio's legal fees and expenses since early 2006. However, following his April 2007 insider trading conviction, Nacchio claimed that Qwest had threatened to discontinue these payments. Though the company had not officially refused to continue its payments, Nacchio sued to enforce provisions of his employment agreement and resignation agreement that provided for mandatory advancement of legal expenses. He argued that Qwest was bound by Delaware law to pay all his legal bills unless and until there was a final determination that he had been dishonest and that a delay in payment pending Qwest's review of its obligations would jeopardize his defense. In July 2007, Nacchio and Qwest reached a settlement whereby Qwest agreed to pay all past legal bills and all future bills related to the civil cases but Nacchio would be responsible for the expenses associated with the appeal of his criminal insider trading conviction.ⁿ¹⁰³ Nacchio's conviction for insider trading was overturned and a new trial was ordered by a three-judge panel of the U.S. Court of Appeals for the 10th Circuit in March 2008.ⁿ¹⁰⁴ Then, in February 2009, the full 10th Circuit reinstated Nacchio's conviction.ⁿ¹⁰⁵ Nacchio filed a petition with the U.S. Supreme Court in March 2009.ⁿ¹⁰⁶ Qwest has indicated that it will wait until the end of the appeals process before deciding whether to try to recover the legal fees that it has advanced to Nacchio.ⁿ¹⁰⁷ The history of these insider trading proceedings illustrates precisely the type of practical difficulties that would arise if each successive stage of a legal action were considered a separate proceeding in which a "final disposition" could occur--difficulties that the Delaware Court of Chancery cited in the *Sun-Times* case (discussed above) in holding that a "final disposition" means the "final, non-appealable conclusion of [a] proceeding."

In contrast to the Delaware statute, the Model Business Corporation Act contains a good faith requirement as a condition of receiving an advancements of expenses. Section 8.53(a) of the Model Business Corporation Act requires a written affirmation by a director stating the director's good faith belief that he or she has met the applicable standard of conduct (or that the proceeding involves conduct for which liability has been eliminated under an exculpatory charter provision),ⁿ¹⁰⁸ along with an undertaking to repay any funds advanced if the director is not entitled to mandatory indemnification and it is ultimately determined that the director did not meet the standard of conduct.ⁿ¹⁰⁹ The practical result of the good faith requirement is that, under the Model Business Corporation Act, if a corporation were to disagree with a director's good faith belief regarding satisfaction of the applicable standard of conduct, it could be necessary for the director to litigate to demonstrate an entitlement to advances even if the corporation has provided for mandatory advancements in its certificate of incorporation or bylaws or by contract. Under Delaware law, if advancements are mandatory, that is the end of the inquiry.

To protect their officers and directors, many corporations mandate advancement of expenses through provisions in the certificate of incorporation, bylaws, or indemnification agreements. To the extent that advancement is not mandatory, and is left to the discretion of the board of directors, the decision to advance expenses is a business judgment that must be made consistent with the duties of care and loyalty.ⁿ¹¹⁰

In considering whether to authorize advances, directors must determine whether the undertakings provided by those seeking advances are sufficient, in all of the circumstances, to protect the corporation's interests in repayment and whether advancement would, on balance, be likely to promote the corporation's interests.ⁿ¹¹¹

The results in the *Sun-Times*, *Bergonzi* and *Homestore* cases, as well as the Qwest litigation, illustrate the importance of giving careful consideration to the scope of the advancement, and indemnification, rights that a corporation provides to its directors and officers. In this regard, boards should consider whether, and to whom, mandatory advancement rights should be granted and, to the extent mandatory rights are granted, whether limitations on those rights are appropriate. These limitations might include requiring a secured undertaking of the obligation to repay, permitting advances in third-party suits but not in suits brought by or on behalf of the company or by a corporate official against the company, or granting discretion to the board of directors or another decision-maker to curtail the advancement of expenses to directors and/or officers if a determination is made at some point in a legal proceeding, based on the facts and circumstances, that an individual failed to meet the statutory standard of conduct.ⁿ¹¹² A small number of companies have taken this latter approach by adopting broad-based, mandatory advancement rights in their charters and/or bylaws, but making these rights subject to limitations that are designed to protect against the possibility of having to advance expenses to so-called "bad actors."ⁿ¹¹³

To the extent the corporation intends to limit advancement rights, the preferred approach is to spell out any limitations clearly.ⁿ¹¹⁴ However, the Delaware Court of Chancery's 2007 decision in *Thompson v. The Williams Cos.*ⁿ¹¹⁵ suggests that a company need not always articulate in advance the specific conditions that it intends to place on advancement rights. Instead, it is sufficient for a company to provide "fair notice" that it may impose limits on those rights. *Thompson* involved an advancement bylaw stating that expenses incurred by employees and agents "shall be paid upon such terms and conditions, if any, as the Board of Directors deems appropriate."ⁿ¹¹⁶ The Delaware Court of Chancery rejected the argument made by Thompson, an employee, that the company was not entitled under the language of the bylaw to condition advancement of expenses on Thompson's provision of an undertaking and full security for the amounts advanced. In doing so, the Court of Chancery concluded that the advancement bylaw "expressly sets forth the right of the board to impose terms and conditions, and it gives fair notice to anyone hoping to rely on that provision that prerequisites to a grant of advancement might be demanded."ⁿ¹¹⁷ Given the bylaw language, the key issue for the Court of Chancery was whether the conditions set by the company were "appropriate," a term that was "best understood as enabling the board to condition a grant of advancement on terms and conditions that rational directors might believe necessary to protect [the company's] legitimate interests."ⁿ¹¹⁸

Another case reflecting that Delaware courts will enforce obligations to advance expenses as written--although one that involved an unfavorable outcome for a former director seeking to enforce his advancement rights--is the Delaware Court of Chancery's 2008 decision in *Schoon v. Troy Corp.*ⁿ¹¹⁹ In *Schoon*, the Court of Chancery held that a former director was not entitled to advancement where, subsequent to the director's departure from the company's board, the company revised its bylaws to eliminate advancement rights for former directors. The former director had resigned from the board in 2005. At the time of his resignation, Troy Corporation's bylaws expressly provided for indemnification and advancement rights to former directors. Thereafter, however, Troy's board amended the bylaw granting advancement rights to remove the word "former." Then, in January 2006, Troy asserted breach of fiduciary duty claims against the former director, who sought a court ruling that he was entitled to advancement.

The Delaware Court of Chancery strictly construed Troy's bylaws and rejected the former director's argument that his advancement rights became vested at the time he took office as a director and could not be unilaterally changed thereafter. Distinguishing an earlier Delaware decision in *Salaman v. National Media Corp.*,ⁿ¹²⁰ the court concluded

that the right to advancement only becomes vested when litigation is actually filed. In *Schoon*, Troy brought suit against the former director after he left the board and after the board had amended the bylaws to eliminate advancement for former directors.ⁿ¹²¹ Moreover, although Troy conceded that its bylaws, as amended, allowed former officers to be *indemnified*, the court read the bylaws to distinguish between former directors' rights to indemnification and to advancement. In the latter case, the bylaw change following the former director's departure from the board clearly and unambiguously eliminated the right of advancement to former directors. The *Schoon* decision prompted numerous companies to revise their indemnification bylaws to clarify that rights to indemnification and advancement vest at the commencement of an individual's service as a director or officer or to enter into stand-alone indemnification agreements to provide their directors and officers with contractual rights. However, this proved to be unnecessary because, in 2009, the Delaware legislature adopted an amendment to Section 145(f) of the Delaware General Corporation Law in response to the *Schoon* decision that limits the ability of corporations to amend indemnification and advancement provisions retroactively. Under amended Section 145(f), rights to indemnification and advancement of expenses arising under a corporation's charter or bylaws cannot be eliminated or impaired by an amendment adopted after the occurrence of the act or omission to which the indemnification or advancement of expenses relates, unless the charter or bylaw provision in effect at the time of the act or omission expressly permits this.ⁿ¹²²

Another development suggesting that courts will respect advancement obligations in the context of criminal prosecutions is the 2008 ruling by the U.S. Court of Appeals for the Second Circuit in *United States v. Stein*.ⁿ¹²³ In that case, the Second Circuit upheld the dismissal by the U.S. District Court for the Southern District of New York of an indictment against 13 former partners and employees of KPMG LLP and affirmed the lower court's holding that the U.S. government had deprived the individuals of their *Sixth Amendment* right to counsel by causing KPMG to impose conditions on the advancement of legal fees to the individuals, cap their fees, and ultimately stop advancing fees altogether.

The KPMG case involved the now-superseded "Thompson memo" issued by former Deputy Attorney General Larry Thompson in 2003 following the unprecedented wave of corporate scandals that began with the collapse of Enron Corp.ⁿ¹²⁴ The Thompson memo set forth factors that federal prosecutors were required to consider in assessing an organization's cooperation for purposes of deciding whether to indict the organization. These included "whether the corporation appears to be protecting its culpable employees and agents" through, among other things, "the advancing of attorneys fees," although the advancement of legal fees would not be viewed as a failure to cooperate where required by state law.ⁿ¹²⁵ Not long after the lower court decision in the KPMG case, in December 2006, Deputy Attorney General Paul J. McNulty announced the release of revised corporate charging guidelines for federal prosecutors. These guidelines superseded the Thompson memo. The so-called "McNulty memo" instructed prosecutors that they generally could not consider a corporation's advancement of attorney's fees when deciding whether to charge the corporation, but there was an exception for instances where advancement was intended to impede the government's investigation.ⁿ¹²⁶ On the same day that the Second Circuit issued its decision in the KPMG case, the Department of Justice announced that it was changing its policy in this area. The August 2008 "Filip memo" explicitly states that prosecutors should not take into account whether a corporation is advancing or reimbursing attorneys' fees in evaluating its cooperation with a government investigation and that they may not ask a corporation to refrain from advancing or reimbursing attorneys' fees.ⁿ¹²⁷ The KPMG decision and the Filip memo provide some assurance to directors and officers of corporations that have undertaken the obligation to provide mandatory advancement and indemnification that this obligation will be protected in the event of a government investigation.

Where a corporation does intend to make advances mandatory, this intention should be stated expressly in the corporation's certificate of incorporation or bylaws, or in the relevant indemnification agreement and addressed separate and apart from rights to indemnification. The Delaware courts have construed provisions that mandate indemnification, without making specific reference to advances, as not including advances. In *Advanced Mining Systems, Inc. v. Fricke*, the Delaware Court of Chancery considered whether a bylaw provision provided for mandatory advancement of expenses where the provision required that the corporation "indemnify" its directors, officers, employees and agents to the fullest extent permitted by the Delaware General Corporation Law.ⁿ¹²⁸ The court held that the provision did not, on

the grounds that indemnification and advances implicate distinct corporate interests and different types of rights.ⁿ¹²⁹ In the court's view, because the decision to advance expenses is subject to an undertaking to repay those amounts if it is ultimately determined that the recipient is not entitled to indemnification, it "is essentially simply a decision to advance credit."ⁿ¹³⁰ The court concluded that interpreting the bylaw provision to mandate advances would deprive the board of its function under Section 145(e) to evaluate the corporation's interest with respect to the advancement of expenses.ⁿ¹³¹

By contrast, under the Model Business Corporation Act, the intention to provide mandatory advancement of expenses is implied in any provision that obligates a corporation to provide indemnification to the fullest extent permitted by law, unless the provision expressly states otherwise.ⁿ¹³² As with advances, corporations that intend to authorize payment of "fees on fees"--that is, fees incurred to enforce rights to advances--should explicitly provide for this in their organizational documents or indemnification agreements, as discussed in more detail below.ⁿ¹³³

While Delaware case law suggests that agreements to advance legal expenses will be enforced as written, there are exceptions. In October 2006, the First Circuit Court of Appeals, applying Delaware law, permitted Corning, Inc. to condition advancement of expenses to a director on his agreement to repay the advances on terms different from--and arguably less advantageous to the director than--those provided for in the company's bylaws and the director's indemnification agreement.ⁿ¹³⁴ Happ was a director of Galileo, Inc., a Delaware corporation, and the SEC charged him with insider trading. At the time Happ sought advances to cover his defense costs, Galileo had been acquired by Corning.ⁿ¹³⁵ Galileo's bylaws and Happ's indemnification agreement provided that Happ was entitled to indemnification if he "acted in good faith and in a manner that he reasonably believed to be in or not opposed to the best interests" of Galileo, and that Galileo would advance Happ's defense costs so long as he executed an undertaking to repay the advances "if it shall ultimately be determined that [he] is not entitled to be indemnified."ⁿ¹³⁶ When Happ sought advances, Corning refused until Happ agreed to repay in the event he lost the insider trading enforcement action.ⁿ¹³⁷

Happ and Corning continued to have disputes over advances, and Happ sued Corning. Happ lost the insider trading enforcement action and Corning then counterclaimed, seeking repayment of the advances. Happ claimed that his undertaking had been obtained through duress and that his obligation to repay should be governed by the original terms of the bylaws and indemnification agreement, rather than by the differently phrased terms of the undertaking. The First Circuit disagreed, concluding first that Corning's negotiation of the terms of Happ's undertaking to repay was "commercial bargaining," not wrongful duress. The Circuit Court then determined that it was questionable whether Happ or any director found liable for insider trading could ever be entitled to indemnification, even under the language of the original bylaws and indemnification agreement. Finally, the court found that it was not unreasonable for Corning to insist on renegotiating the standard for Happ's obligation to repay, given that the bylaws and indemnification agreement did not state precisely how the undertaking to repay advances should be phrased or whether the company had any right to insist on spelling out the circumstances in which Happ would not be entitled to indemnification.ⁿ¹³⁸ The First Circuit ultimately did not settle the issues of whether, how, and by how much companies may narrow the scope of their indemnification agreements with their directors after those directors have been sued or are under investigation. It should also be noted that the director's difficulties in *Happ* followed a change of control.

As the *Happ* case demonstrates, when drafting undertakings made in connection with an agreement to advance legal fees, it is unclear the extent to which a corporation will be able to limit its advancement obligations after the fact by demanding more narrowly-drafted language in an undertaking than that contained in the original indemnification provision. Interestingly, the First Circuit acknowledged that if, instead of signing the undertaking, Happ had challenged Corning's insistence on renegotiating the terms of his obligations to repay in a summary proceeding in Delaware, he might have prevailed. Therefore, it is possible that Happ could have held Corning to an undertaking that was consistent with the language of the bylaws and indemnification agreement.

[6] Sarbanes-Oxley Act Loan Prohibition

Since the passage of the Sarbanes-Oxley Act, questions have arisen about the status of advances. Section 402 of the Sarbanes-Oxley Act makes it unlawful for public companies to extend credit "in the form of a personal loan to or for any director or executive officer."ⁿ¹³⁹ As some practitioners have noted, this provision calls into question whether advancement of defense costs that have to be repaid to the corporation constitute a personal loan.ⁿ¹⁴⁰ In a 2004 decision, the Delaware Court of Chancery bypassed this issue by concluding that Section 402 applies only to current directors and officers, and therefore was not relevant in a proceeding involving advances to a former officer.ⁿ¹⁴¹ The same issue arose in a 2006 case in the U.S. District Court for the Southern District of New York, *Envirokare Tech, Inc. v. Pappas*, but instead of relying on the reasoning that Section 402 does not prohibit loans to *former* officers, the court held that an advancement of defense costs did not constitute a "personal loan."ⁿ¹⁴²

The result in *Envirokare* is consistent with a position paper issued in October 2002 by a consortium of 25 major U.S. law firms that addressed interpretive issues under Section 402, including the status of advances to officers and directors.ⁿ¹⁴³ The position paper offers several arguments as to why advances should not be considered prohibited personal loans under Section 402. First, the paper argues that there is a well-developed and longstanding state policy interest in providing advances that is unrelated to the types of insider conflicts of interest at which Section 402 is directed, and neither the text of the statutory provision nor the limited legislative history of the Sarbanes-Oxley Act suggests that Congress intended to limit historic state authority in this area.ⁿ¹⁴⁴ Second, the prospect of indemnification becoming unavailable could significantly discourage service as an executive officer or director, to the detriment of public companies.ⁿ¹⁴⁵

The paper also makes several arguments based on the language of Section 402. For example, it takes the position that advances are not "in the form of a ... loan" because at the time a commitment to pay advances arises (for example, at the outset of service to the corporation), and presumably even at the time advancement occurs, the recipient of the advances is only contingently required to repay the issuer and the contingency makes the likelihood of repayment reasonably uncertain.ⁿ¹⁴⁶ Similarly, another authority has argued that the unconditional obligation to repay "is the most central feature of a loan."ⁿ¹⁴⁷ Accordingly, because a director or officer is not obligated to repay an advance unless, at a later date, "a contingency of reasonable uncertainty occurs," this contingency "distinguishes ... advances from personal loans and should remove them from Section 402."ⁿ¹⁴⁸

In addition, the law firm position paper argues that an advancement of expenses is not "personal" because the expenses are incurred in connection with services to a company that constitute a business purpose regardless of whether ultimately these amounts need to be repaid. According to the position paper, the repayment obligation contemplated by the arrangement and triggered by external events does not change the business nature of the arrangement.ⁿ¹⁴⁹

In the absence of further clarification, the impact of Section 402 on the viability of advances remains uncertain, although corporations have continued to advance expenses to their directors and officers since the passage of the Sarbanes-Oxley Act. In view of the uncertainty about Section 402, some public companies have moved to revise language in their organizational documents and indemnification agreements to characterize "advances" as "payments" and to indicate that such payments will not be deemed to be loans, although the presence of such language may not be dispositive of the status of advances under Section 402.

[7] Statutory Nonexclusivity Provisions

The corporation laws of most states, including Delaware, contain what are known as "nonexclusivity" provisions, which state that statutory rights to indemnification and advancement are not exclusive of other rights that may be granted pursuant to a corporation's charter or bylaws, by contract, or otherwise.ⁿ¹⁵⁰ Section 145(f) of the Delaware General Corporation Law, for example, provides that:ⁿ¹⁵¹

The indemnification and advancement of expenses provided by, or granted pursuant to, the other subsections of this section shall not be deemed exclusive of any other rights to which those seeking

indemnification or advancement of expenses may be entitled under any bylaw, agreement, vote of stockholders or disinterested directors or otherwise, both as to action in such person's official capacity and as to action in another capacity while holding such office.

A nonexclusivity provision like Section 145(f) provides authority for charter provisions, bylaws, and indemnification agreements that expand upon the indemnification rights expressly granted by statute. Although there has been little authority under Delaware law clarifying the precise scope of rights that can be granted under Section 145(f), these rights are generally thought to be subject to public policy limitations and to the substantive limits of the Delaware General Corporation Law (such as the limitations on indemnification in derivative suits under Section 145(b)).¹⁵² The Supreme Court of Delaware, for example, has taken the position that the scope of indemnification rights granted to an individual by contract cannot be broader than the indemnification rights granted by statute.¹⁵³ Accordingly, if Section 145 were amended to curtail statutory indemnification rights, "the fact that [a director's] rights were also secured by contract would be of little use to him. Private parties may not circumvent the legislative will simply by agreeing to do so."¹⁵⁴

A Second Circuit case interpreting Section 145 is consistent with this position. In *Waltuch v. ContiCommodity Services, Inc.*, the Second Circuit affirmed a lower court holding that Section 145(f) cannot be used to circumvent the good faith requirement embodied in Section 145(a) of the Delaware General Corporation Law.¹⁵⁵ The plaintiff in *Waltuch*, a corporate officer, sought indemnification for defense costs in reliance on a provision in the certificate of incorporation that provided for mandatory indemnification but did not expressly require good faith as a condition of indemnification. In reliance on the nonexclusivity provision in Section 145(f), plaintiff *Waltuch* argued that the statutory good faith requirement could not be read as a limitation of the additional rights conferred under the certificate of incorporation and that Section 145(f) allows corporations to indemnify their officials in a manner broader than that set out in Section 145(a). Both the lower court and the Second Circuit disagreed, concluding that:¹⁵⁶

Under § 145(f), a corporation may provide indemnification rights that go 'beyond' the rights provided by § 145(a) and the other substantive subsections of § 145. At the same time, any such indemnification rights provided by a corporation must be 'consistent with' the substantive provisions of § 145, including § 145(a).

The Second Circuit reasoned that the good faith requirement in Section 145(a) "must mean that there is *no power* to indemnify" if a corporate officer did not act in good faith because otherwise the good faith clause would have no meaning and corporations could indemnify whomever and however they wanted regardless of any limitations in the statutory provision.¹⁵⁷ Based on this reasoning, the court concluded that the provision in the certificate of incorporation, which would have required indemnification of *Waltuch* even if he had acted in bad faith, was inconsistent with Section 145(a) and exceeded the scope of a Delaware corporation's powers to indemnify.¹⁵⁸

Delaware courts have subsequently adopted the position taken by the Second Circuit in *Waltuch*.¹⁵⁹ Accordingly, although indemnification rights granted under Section 145(f) can be broader than those expressly provided for under other parts of Section 145, the grant of rights may not permit indemnification in a manner that is inconsistent with the substantive provisions of Section 145.¹⁶⁰

[8] Charter and Bylaw Provisions

As permitted by the nonexclusivity provisions of state corporate law, many corporations have adopted charter and bylaw provisions addressing indemnification. These provisions can afford directors and officers increased protection by granting them substantive rights in addition to those expressly provided for by state indemnification statutes and by supplementing the coverage available under D&O insurance policies. Charter and bylaw provisions are also used to clarify the extent of the indemnification rights available in particular circumstances and to establish procedures and presumptions that make indemnification more favorable to directors, officers and other corporate officials. Appendix

5-A to this chapter contains a sample exculpatory charter provision for a Delaware company and Appendix 5-B contains a sample indemnification bylaw provision for a publicly held Delaware company.

The advantages of addressing indemnification in the certificate of incorporation rather than the bylaws are comparatively few, and it is more common to see detailed indemnification provisions in a corporation's bylaws. The primary benefit of a charter provision lies in the fact that the certificate of incorporation generally may be amended only with stockholder approval. This, in turn, can protect against changes in indemnification rights in the event of a change in the majority of the board of directors. Another benefit of a charter provision--also related to the requirement of stockholder approval--is that stockholder approval often lends a degree of corporate authority to indemnification provisions. Amendment of an indemnification bylaw, however, can also be made subject to approval of a corporation's stockholders. Moreover, if there are concerns about the repeal or amendment of charter or bylaw provisions establishing rights to indemnification, the requirement of stockholder approval can be strengthened by conditioning changes to those provisions on receipt of a super-majority vote (*i.e.*, two-thirds or three quarters of outstanding shares). It should be noted that some companies have moved to eliminate super-majority vote provisions in recent years in response to stockholder proposals.

Although bylaws can be adopted by a corporation's board of directors as well as its stockholders, a corporation could voluntarily submit indemnification bylaws to its stockholders for approval to lend those provisions the same added authority as a charter amendment. In addition, obtaining stockholder approval of an indemnification bylaw could reduce the likelihood that the directors who approve the bylaw will be deemed "interested" in the transaction and that it could be successfully challenged as a conflict of interest. On the other hand, a requirement of stockholder approval can make changing indemnification provisions more difficult and expensive. Moreover, in the post-Enron environment, where the actions of corporate officials are subject to increased scrutiny, corporations may be hesitant to seek stockholder approval of bylaw provisions establishing or enhancing indemnification rights.¹⁶¹ However, if a corporation's stockholders have previously approved an indemnification bylaw, care should be taken to ensure that any subsequent amendments by the board of directors do not detract from stockholder-approved rights.

Many corporations that take the approach of adopting a detailed indemnification bylaw nevertheless find it useful to include a general declaration of their commitment to indemnify corporate officials in the certificate of incorporation. To the extent that a corporation addresses indemnification in both its charter and bylaws, it is critical for the provisions in the two documents to be consistent. In addition, in situations where charter or bylaw provisions are approved by a corporation's stockholders, the provisions should authorize the board to make further amendments and to implement the provisions through bylaws, agreements, and insurance, subject to the restriction that none of the implementing actions may restrict the indemnification rights approved by the corporation's stockholders.

Charter and bylaw provisions are most commonly used to convert a corporation's authority to indemnify--which is generally permissive under state corporate law--into an obligation by requiring (rather than simply permitting) indemnification of specified corporate officials.¹⁶² A typical provision states that a corporation "shall" indemnify its officials "to the fullest extent permitted by applicable law." Although very common, such a provision can create uncertainty in states, like Delaware, that have nonexclusivity statutes because there may be no way of determining what the "full extent of the law" permits. In addition, the courts may construe this language as affording rights to indemnification in instances where a corporation did not intend, and may not have wished, to provide it as a matter of right.

A 2002 decision by the Supreme Court of Delaware illustrates the ambiguity inherent in the "fullest extent" language and the possibility that such language may be construed judicially to confer rights that a corporation may not have intended to grant. The courts have generally been split on whether fees incurred to enforce rights to indemnification and advancement--so-called "fees on fees"--are recoverable if not explicitly authorized in a corporation's charter or bylaws or an indemnification agreement. As a means of affording directors and officers additional protection, it is not uncommon for corporations to include in their charters, bylaws or indemnification agreements language expressly

authorizing reimbursement of the costs incurred by a claimant who institutes litigation to enforce rights to indemnification or advances following the denial of a request for payment. In *Stifel Financial Corporation v. Cochran*, the Supreme Court of Delaware held that a bylaw providing mandatory indemnification "to the full extent authorized by law" included fees incurred in pursuing a claim for indemnification.ⁿ¹⁶³ The decision reversed an earlier line of cases establishing that fees on fees are not available unless expressly provided for.ⁿ¹⁶⁴

Although *Stifel* did not establish that fees on fees are available in suits to enforce rights to advancement, the Delaware Court of Chancery subsequently has taken the position that under the holding in *Stifel*, corporate officials are entitled to an award of fees incurred in connection with successfully bringing claims for advancement.ⁿ¹⁶⁵ The Court of Chancery has further concluded that, under *Stifel*, if a corporation does not want to incur the obligation to pay fees on fees, it must expressly preclude any such right.ⁿ¹⁶⁶

In *Weaver v. ZeniMax Media, Inc.*, the Delaware Court of Chancery held that, under *Stifel*, " 'fees on fees' are an inherent right of the party materially successful in asserting a claim for indemnification or advancement unless the corporation, as it may, chooses to deny that right."ⁿ¹⁶⁷ The court concluded that the *Stifel* holding was not dependent upon the "full extent" language in an indemnification bylaw, but rather, among other things, upon the conclusion that indemnification rights would be incomplete without the ability to obtain litigation costs incurred to vindicate these rights.ⁿ¹⁶⁸ Additionally, in May of 2007, the Delaware Court of Chancery ruled that the provisions in indemnification agreements that mandate fees on fees in *unsuccessful* suits to enforce indemnification and advancement rights were unenforceable in connection with a claim brought by a company's former nonmanagement directors to obtain indemnification for monies paid in settlement on their behalf by a third party.ⁿ¹⁶⁹ The agreements in question provided for payment of fees on fees "regardless of whether [an indemnitee] is ultimately determined to be entitled" to indemnification or advances. Noting that the Delaware courts had not previously addressed whether a company could provide such an expansive right to fees on fees, the court concluded that the fees on fees provision was invalid after considering relevant precedent and the framework of Section 145 of the Delaware General Corporation Law. According to the court, a party's right to fees on fees hinges upon its success in the underlying action and partial success in an action leads to partial indemnification of the party's fees commensurate with the extent of the victory.ⁿ¹⁷⁰ Discussing the public policy rationale for its conclusion, the court stated that allowing fees on fees in connection with unsuccessful claims would "encourage directors and officers to bring non-meritorious claims against the corporation."ⁿ¹⁷¹ In view of these decisions, and for purposes of certainty, it is preferable for Delaware corporations to address the issue of fees on fees explicitly in the case of both indemnification and advancements.

As the discussion of fees on fees illustrates, bylaw and charter provisions can also be used to provide greater clarity and specificity with respect to indemnification rights. Many indemnification statutes, including Delaware's, grant authority to indemnify employees and agents, as well as officers and directors. A typical bylaw provision would grant mandatory indemnification to officers and directors and permissive indemnification to employees and agents, although some companies do provide mandatory indemnification rights to all employees and an even smaller number of companies provide mandatory indemnification rights to agents. It may, however, be appropriate to limit mandatory indemnification rights to directors and officers, since a corporation may not want to commit in advance to indemnify all employees and agents without the opportunity to consider or negotiate the terms of indemnification. Corporations--particularly larger ones--may wish to preserve this opportunity in the case of lower-level employees and agents through permissive indemnification rather than granting them an automatic right to indemnification.

Two 2008 Delaware cases illustrate the unintended consequences that may arise where companies provide agents with mandatory indemnification and advancement rights. In *Jackson Walker L.L.P. v. Spira Footwear, Inc.*, the Delaware Court of Chancery held that Spira Footwear, Inc.'s former outside litigation counsel was an "agent" under the company's indemnification bylaw.ⁿ¹⁷² The court defined the term "agent" in the indemnification context to include individuals and organizations, such as a law firm, that act on behalf of a company in relations with third parties. The court distinguished between different types of legal services that can result in agent status for indemnification purposes, stating that the concept of "agent" would not include a lawyer who acts as a legal advisor to a corporate client but does

not act on the client's behalf with respect to third parties. Conversely, the Court of Chancery concluded that attorneys representing a client in litigation would be considered agents because they have the ability to bind their clients in dealings with the court and other parties to the litigation. Based on this definition, the court held that Spira Footwear had to advance expenses to its former outside litigation counsel under a bylaw provision that mandated advancement of expenses to directors, officers, employees and agents. In reaching its decision, the court observed that "Delaware courts understandably proceed with caution in granting advancement and indemnification to agents in general, and to attorneys in particular,"¹⁷³ but that Delaware law gives companies the option of indemnifying and advancing litigation expenses for their agents.

Similarly, in *Zaman v. Amedeo Holdings, Inc.*, the Delaware Court of Chancery held that two attorneys with broad managerial and financial authority over numerous entities controlled by Prince Jefri of the Brunei Royal Family were "agents" of these entities and were therefore entitled to indemnification and advancement with respect to expenses incurred in defending claims brought against them by those same entities.¹⁷⁴ The bylaws of the relevant entities provided for mandatory indemnification and advancement to persons serving at the request of the entities as agents of other entities.¹⁷⁵

Indemnification bylaws and charter provisions also frequently provide that a corporation will indemnify employees who serve as trustees or other fiduciaries of employee benefit plans, as well as directors, officers and employees who serve at the request of the corporation in analogous capacities at a subsidiary of the corporation or an entity in which the corporation has an interest.

Bylaw provisions may also address in greater detail than is provided by statute the rights of successors to corporate officials originally covered by an indemnification bylaw, as well as the rights to continuing indemnification after termination of an individual's relationship with the corporation.¹⁷⁶ A typical bylaw would provide that heirs, personal representatives, and estates of indemnitees may obtain indemnification to the same extent as a deceased indemnitee for claims arising out of the indemnitee's service to the corporation. A typical provision on continuing indemnification would provide that an individual's rights to indemnification survive termination of service to the corporation with respect to claims relating to the period during which the individual served at the corporation.

Importantly, charter and bylaw provisions can also provide additional clarity about the types of proceedings with respect to which indemnification is available. Absent express language, it is not always certain, for example, whether indemnification and advances are available in investigative proceedings, or whether and to what degree expenses of settlement are indemnifiable. For example, preliminary investigations by law enforcement or administrative agencies, internal corporate investigations, and Congressional investigations and hearings may not result in the institution of a formal proceeding, although it may be appropriate to advance funds to directors, officers and others who must respond to such investigations. Similarly, in some states, there may be questions about the availability of indemnification of and advances for settlement amounts in derivative suits.¹⁷⁷ Even in jurisdictions that do permit indemnification of such amounts,¹⁷⁸ a bylaw or charter provision that does not explicitly address the treatment of settlements may be construed judicially as not covering them. A common form of charter or bylaw provision would permit, or mandate, indemnification of settlement amounts and related expenses.

Charter and bylaw provisions also frequently incorporate burden-shifting mechanisms and other procedural provisions that may afford an additional layer of protection to directors and officers when they make a demand for indemnification or advancement. While Section 145(d) of the Delaware indemnification statute provides that the grant of discretionary indemnification must be determined "in the specific case," it does not specify who has the burden of proof of entitlement. Thus, a typical burden-shifting provision places the burden on the corporation's board of directors or other authorized party to make an affirmative finding that an individual seeking indemnification has not met the statutory standard of conduct and is not entitled to indemnification. This relieves the individual of having to carry the initial burden of proving that he or she is entitled to indemnification by virtue of having met the requisite standard. Such a mechanism is often accompanied by language indicating that indemnification is mandatory, or that the indemnitee is

presumed entitled to indemnification, if the board or other authorized party fails or refuses to act within a specified period of time following receipt of a request for indemnification. Although, as noted above, these types of provisions may afford directors and officers additional protection, they have not been tested in court. Accordingly, it is unclear how courts would view them under Section 145(d) of the Delaware General Corporation Law, which includes a procedure for authorizing indemnification,¹⁷⁹ and Delaware's nonexclusivity provision.¹⁸⁰

Similar language is often seen with respect to advances. Some corporations, for example, have provided in the certificate of incorporation or bylaws that the entitlement to advances is mandatory and automatic unless the corporation takes affirmative steps to deny a claim and subject, in the case of current officers and directors, to receipt of the required undertaking to repay any amounts advanced in the event it is determined that the officer or director did not meet the statutory standard of conduct.¹⁸¹ For reasons discussed earlier in this Subsection 5.03[8], in certain instances it may be advisable to leave determinations about advances to the discretion of the board or other appropriate decision-making authority. To provide additional protection to corporate officials, some corporations include language establishing that a denial by the corporation of a request for indemnification or advances is not a defense in a suit by an official to enforce rights to indemnification.

Another element of a charter or bylaw provision that is essential in view of the uncertainty surrounding many areas of the law relating to indemnification is a "savings" or "severability" clause. The purpose of such a clause is to preserve the remainder of an indemnification provision to the extent that any portion of the provision is found to be unenforceable.

[9] Indemnification Agreements

Indemnification agreements with directors, officers and other corporate officials are used to accomplish many of the same purposes as charter and bylaw provisions. In states (such as Delaware) that have nonexclusivity provisions, indemnification agreements may provide for a variety of rights that are not explicitly spelled out in the indemnification statute and that are, at the same time, consistent with the statute. These rights may include:

- (1) mandatory indemnification, unless prohibited by statute;
- (2) mandatory advancement of expenses, which the indemnitee can, in many instances, obtain on demand, subject to the provision of an undertaking to repay, if required;
- (3) accelerated procedures for "determination" of entitlements to indemnification;
- (4) litigation "appeal" rights in the event of an unfavorable determination by the corporation;
- (5) procedures under which a favorable determination will be deemed to have been made under circumstances where the board or other appropriate body fails or refuses to act;
- (6) reasonable funding mechanisms; and
- (7) rights to "fees on fees."¹⁸²

While it is also possible to provide for rights that go above and beyond those explicitly granted by statute through the use of charter or bylaw provisions, these rights may be more secure to the extent they are guaranteed by contract. It is unclear, however, whether a contractual right to indemnification would be enforceable if a corporate official were not entitled to indemnification under state law.¹⁸³ As with rights granted under charter and bylaw provisions, rights articulated in indemnification agreements likely will be subject to public policy and other substantive limitations embodied in a state's indemnification statute.¹⁸⁴ Accordingly, although the enforceability of indemnification agreements has been upheld as a general matter,¹⁸⁵ it is unclear how specific contractual provisions that may be

argued to contravene public policy--such as those permitting indemnification of settlement and judgment amounts in derivative suits--would be viewed by a court if challenged.

There are, however, several advantages to providing for indemnification rights in a separate agreement instead of, or in addition to, any rights established in the corporation's certificate of incorporation or bylaws:

- As an initial matter, indemnification agreements may be more readily enforceable by corporate officials because they reflect bargained-for consideration in the form of an individual's agreement to accept or continue service with the corporation.
- An indemnification agreement also affords more protection than charter or bylaw provisions because it is not subject to unilateral amendment or rescission by the corporation and, thus, would not be jeopardized by a change in control or the termination of an individual's service with a corporation.¹⁸⁶
- A contract also allows a corporation to tailor protections to the specific circumstances of the individuals involved and to provide protections commensurate with the nature and level of their responsibilities and their potential for exposure. It would, for example, be customary to provide directors and executive officers with greater rights than lower-level management because of the increased exposure to liability that accompanies their significant responsibilities.
- In addition, it is possible to afford individuals that perform specialized functions, such as serving as a trustee of an employee benefit plan or a director of a subsidiary or affiliated entity, with the protection of an express contractual provision that extends indemnification and related rights to their service in those specialized capacities.
- Finally, the existence of a separate agreement that is personal to an individual director or officer can provide a degree of psychological security that may not be present with a bylaw or charter provision of more general application.

Many of the same principles that apply when drafting a charter or bylaw provision also apply to the drafting of indemnification agreements. For example, where a corporation intends to provide for mandatory advancement of expenses or "fees on fees," this intention should be stated clearly in the indemnification agreement. A provision mandating indemnification, without making reference to advances, may be construed by a court not to cover advances.¹⁸⁷ Conversely, if a corporation intends to limit the right to advancement in certain circumstances, such as where the board determines, at some point during the course of a legal proceeding, that an individual has acted improperly, the agreement should articulate this clearly.¹⁸⁸

Similarly, to avoid ambiguity, the agreement should state expressly that an undertaking is required and whether or not it need be secured. It may also be appropriate to address whether, and to what extent, indemnification and advances are available outside the scope of an "action, suit or proceeding"--for example in investigative proceedings or proceedings where a director or officer is not a party but serves as a witness. By addressing these types of eventualities, the indemnification agreement can be tailored to define and limit the corporation's exposure, while at the same time providing clarity and additional protection for officers and directors. In view of the uncertainties about the types of claims that may be indemnified, a severability clause is also important to insulate and preserve the remainder of the indemnification agreement in the event that one or more provisions is deemed to be invalid.

Appendix 5-C to this chapter contains a sample indemnification agreement for a Delaware company. This particular sample agreement was drafted with a view to providing the broadest possible rights to directors and officers.

[10] Alternative Funding Mechanisms

The availability of indemnification, whether under charter or bylaw provisions or separate indemnification agreements, is ultimately dependent on a corporation's ability to pay. This ability may be compromised where a corporation is experiencing financial difficulties or if the corporation is insolvent, in which case the corporation's assets may be subject to the claims of other creditors.ⁿ¹⁸⁹ The availability of indemnification may also be jeopardized following a change in control of a corporation if a new board of directors is unwilling to authorize indemnification payments to outgoing officers and directors. Coverage under a D&O insurance policy may not be available or may be subject to limitations and exclusions, depending on the circumstances. In recognition of these possibilities, and in an effort to provide their directors and officers with the maximum possible protection from personal liability, many corporations are increasingly exploring alternative ways to fund indemnification, as well as alternatives to traditional D&O insurance.ⁿ¹⁹⁰

Alternative funding mechanisms generally fall into two categories:

- (1) mechanisms such as indemnification trusts and letters of credit that serve as a means of funding indemnification by segregating funds and authorizing their release when certain procedures are followed; and
- (2) mechanisms such as captive insurance company policies, finite risk policies, and fronting arrangements that may serve as a substitute for traditional D&O insurance and that, like such insurance, can provide coverage for claims that may not be indemnifiable under state and federal law.

Whether mechanisms such as captive insurance company policies can function as a substitute for traditional insurance depends on whether they constitute "insurance" under state and federal law. This, in turn, is significant because if an alternative funding arrangement does not constitute insurance, amounts used to fund the arrangement--the equivalent of traditional insurance premiums--may not be deductible for tax purposes. In addition, payment of these "premiums" may not be authorized with corporate funds under a state statute that, like Delaware's,ⁿ¹⁹¹ permits the purchase of insurance but does not explicitly authorize expenditures for special arrangements. Finally, if an alternative funding mechanism is not classified as insurance, it may be subject to the same public policy limitations as indemnification. Accordingly, the mechanism would not provide protection for claims that are not indemnifiable under state and federal law.ⁿ¹⁹²

Some states have amended their indemnification statutes to provide express authorization for alternative funding mechanisms.ⁿ¹⁹³ Although, as noted above, Delaware is not among them, the Delaware statute does authorize the purchase of insurance.ⁿ¹⁹⁴ In addition, some statutes provide that, in the absence of actual fraud, a board decision concerning the terms and conditions of insurance or alternative funding arrangements is "conclusive," and that the insurance or alternative funding arrangement is not voidable and no director can be subjected to liability for a decision approving its terms and conditions, even where the director is a beneficiary of the arrangement.ⁿ¹⁹⁵ Such provisions may afford directors protection in the event that the establishment of alternative funding mechanisms are otherwise subject to attack under state law principles relating to breach of directors' duties. Because the corporate officials who establish such mechanisms will also be its beneficiaries, their decisions may be subject to heightened scrutiny.

One common vehicle for funding indemnification is an indemnification trust.ⁿ¹⁹⁶ Indemnification trusts are appealing as alternative funding mechanisms because, if appropriately structured, they can provide directors, officers and other covered persons with greater comfort that funding will be available in the event of insolvency or a change in control. Under an indemnification trust, a third party trustee, typically a bank or one or more individuals, holds in trust funds that a corporation deposits for the benefit of corporate officials entitled to indemnification. Claims for indemnification are paid as they arise in accordance with procedures set forth in the trust documents. The governing documents may provide for the corporation to administer indemnification claims directly by determining the availability of indemnification and then directing payments by the trustee. Alternatively, the trustee may be given the authority to receive claims and make determinations about the entitlement to indemnification.

Although indemnification trusts have received only limited judicial scrutiny, relevant case law suggests that they are enforceable as a general matter. The leading case upholding indemnification trusts, *Security America Corp. v. Walsh*, upheld the validity under Delaware law of two irrevocable and unamendable trusts established in the face of a change in control to provide for the advancement of expenses to outgoing directors.ⁿ¹⁹⁷ Although the court noted the "troubling circumstances" surrounding the establishment of the trusts,ⁿ¹⁹⁸ it emphasized the underlying right to indemnification established in the corporation's bylaws in holding that the use of the indemnification trusts was proper:

[The corporation's new board] contends that the trusts disable the corporation from reviewing a discretionary decision on a continuing basis and that there is no guarantee that the defendants can ever repay. True it is that the trust put beyond the reach of the present management the decision not to advance expenses, a decision which is normally reviewable. Nor is there a certainty of repayments. It is clear, however, that the bylaws, adopted long before this dispute arose, contemplated such advances and the directors accepted their positions with that knowledge; that the present management had the pronounced intention not to exercise discretion but to terminate litigation support; and that the likelihood that [the corporation] would in the future be able to respond to a legal obligation to indemnify was far more questionable than the likelihood that defendants, collectively, could repay. Given the policy of the Delaware law, this court is persuaded that the trusts, in the circumstances presented here, were permissible.ⁿ¹⁹⁹

Like the trusts in *Security America*, an appropriately structured indemnification trust should be irrevocable and unamendable.ⁿ²⁰⁰ This assures, to the extent possible, that the corpus of the trust will be beyond the reach of creditors in the event of insolvency and that new management will not have the ability to amend the terms of trust--and possibly deny indemnification--following a change in control. Although trust documents could provide that a trust becomes irrevocable and unamendable automatically upon a change of control or insolvency, this may make the trust more vulnerable to challenge by a bankruptcy trustee.ⁿ²⁰¹

The indemnification trust at issue in *Askanase v. LivingWell, Inc.* provided that "[c]hanges to this Trust Agreement may be made at any time or from time to time by the Company by resolution of its Board of Directors, and provided that in no case shall an amendment affect the rights, duties or responsibilities of the Trustee or Administrator without its consent."ⁿ²⁰² The court interpreted this language as granting the board of directors "a nearly unlimited power of amendment" and upheld the authority of the bankruptcy trustee (as successor to the board) to terminate the trust.ⁿ²⁰³ After terminating the trust, the trustee filed a lawsuit against the corporation's former officers and directors asserting claims that the trust had been designed to cover and arguing that the officers and directors were not entitled to have indemnification and expenses relating to the suit paid from the trust because they had filed claims subsequent to its termination.ⁿ²⁰⁴ Although the Court of Appeals instructed the lower court to consider on remand whether there were any valid claims against the trust corpus, it noted that, because any funds remaining after valid claims were paid would be returned to the bankruptcy estate, "claims for indemnification of the former directors and officers not covered by the trust as terminated ... can be pursued as claims against the estate."ⁿ²⁰⁵

It is important to note that the use of an indemnification trust does not extend the scope of the substantive coverage available under applicable law and any relevant charter or bylaw provisions and indemnification agreements. In this regard, indemnification trusts are generally thought to be subject to applicable statutory and public policy limitations on indemnification.

Unlike D&O insurance, and some of the alternatives to D&O insurance,ⁿ²⁰⁶ an indemnification trust does not involve the shifting of risk away from the corporation to a third party. Accordingly, one of the primary benefits of insurance--the availability of coverage for claims that are not indemnifiable under state law--is generally not available through indemnification trusts.ⁿ²⁰⁷ The indemnification statutes of some states, however, do permit indemnification trusts to cover liabilities that corporations cannot indemnify, including statutes in Louisiana, Maryland, Nevada, New

Mexico, Ohio, Pennsylvania and Texas.ⁿ²⁰⁸

As is the case with indemnification, the practical value of indemnification trusts is dependent on a corporation's financial resources and, specifically, its ability to fund the trust corpus. For this reason, a corporation considering the establishment of an indemnification trust should take steps to put the trust arrangement in place at a time when the corporation is financially healthy and before any substantial claims for indemnification have been made. This is crucial not only because the corporation must have sufficient assets to fund the trust, but also because an indemnification trust may also be subject to attack under state fraudulent conveyance laws and federal bankruptcy laws. A successful challenge under these laws could result in the trust being deemed void and the transfer of assets to the trust being set aside. The closer in time to its insolvency that a corporation establishes an indemnification trust, the greater the likelihood that it may be set aside. By contrast, an irrevocable indemnification trust that is funded at a reasonable level at time when a corporation is solvent should be able to withstand attack by a corporation's creditors or a trustee in bankruptcy.

Another alternative funding mechanism that companies often consider is a captive insurance company policy.ⁿ²⁰⁹ Obtaining coverage under such a policy requires the formation and capitalization of a wholly-owned insurance company by a parent entity, such as a public company. The captive insurance company is managed by insurance brokers or other professional insurance managers and it provides insurance policies to its parent that are generally modeled on commercially available policies, except that it may omit exclusions and restrictions that are objectionable to the parent company. A captive insurance company can provide cost-reduction benefits because its premium schedules focus on the parent's loss history and actuarial analysis.

Whether a captive insurance company policy can fill key gaps in indemnification coverage depends on whether it constitutes "insurance" under state and federal law. Because insurance generally involves a spreading or shifting of risk of loss,ⁿ²¹⁰ an insurance policy that assigns the risk of loss to a wholly-owned captive company--whose profits and losses are borne entirely by the parent company--is unlikely to qualify as insurance. Among other things, this would mean that a pure captive insurance company policy could be subject to the same public policy limitations that apply to indemnification. Although a "group captive insurance company," in which risk is spread among a number of unrelated corporations, would address the issue of risk-sharing, establishing a group captive insurance company may be difficult because each participant must agree on the terms of implementation, and each must be comfortable with the others' risks.

Another alternative funding mechanism is a finite risk policy. Properly structured finite risk policies combine the transfer of risk with a profit-sharing arrangement between the insurance company and its client, who share in the risks and returns based on the losses paid out under the policy and the income earned on premiums. Under a finite risk policy, a public company would obtain a defined amount of coverage in exchange for paying a sizeable premium--one that is large enough to fund a portion of the losses anticipated under the policy--and that earns investment income over the life of the policy. In the event of a favorable loss experience (*i.e.*, where the losses under policy are less than the premium paid by the company), the company can recover a portion of the premium plus associated investment income.

Finite risk policies raise complex tax and accounting issues. As with the other alternative funding mechanisms discussed above (except indemnification trusts), whether finite risk policies can afford protection beyond that provided by indemnification and traditional insurance depends on whether these policies constitute "insurance," which, in turn, depends on how much risk is transferred under the policy. For a number of years, many accountants and insurance practitioners applied what is known as the "10/10 rule" for purposes of determining whether a finite risk policy could be considered "reinsurance" for accounting purposes--, meaning that there had to be at least a 10% probability of a 10% economic loss to the reinsurer on the finite risk policy.ⁿ²¹¹ However, in the last few years, this rule has fallen out of use in favor of a more conservative approach as finite risk insurance has come under increased scrutiny,ⁿ²¹² with regulators launching investigations into the use of finite risk insurance and other reinsurance products, looking specifically at whether some insurers had been using finite risk insurance arrangements that involve little or no transfer

of risk to "smooth" their earnings or otherwise distort their financial statements. In particular, finite risk policies have been the subject of litigation and regulatory proceedings in connection with a series of transactions between General Re Corporation and American International Group, Inc. In March 2008, following a multi-week trial, several defendants in the criminal cases were found guilty of having engaged in fraudulent finite risk transactions. The trial focused in part on the issue of loss reserves associated with the finite risk policies in question. Following the trial, Gen Re's CEO, Joseph Brandon, resigned and by April 2009 each of the defendants had been sentenced to prison terms ranging from one to four years, although the defendants continue to appeal their sentences. In the wake of this and other controversies involving the use of finite risk insurance, companies are advised to proceed with care in evaluating whether finite risk policies can provide an alternative to traditional insurance.

Fronting arrangements, which are similar to finite risk policies, permit a corporation to share in a positive loss experience through premium recapture, but also require the corporation to reimburse the insurer in full for any losses paid out in excess of premiums received. It is unclear whether a fronting arrangement involves any real risk transfer to the insurer, and thus, whether it qualifies as "insurance."

[11] Indemnification in the Private Equity Context

In 2007 and 2008, there were a series of decisions in the Delaware Court of Chancery that are relevant to indemnification and advancement of expenses in the private equity context. The first of these decisions, *Levy v. HLI Operating Co., Inc.*, addressed the relative indemnification obligations of a private equity fund and one of its portfolio companies.²¹³ Private equity funds routinely appoint fund representatives to serve on the boards of directors of their portfolio companies. These individuals are typically entitled to indemnification and advancements of expenses under the funds' organizational documents, as well as the charter and/or bylaws of the portfolio companies and, in some cases, separate indemnification agreements if the portfolio company has them. Prior to the court's decision in *Levy*, many expected that a portfolio company would be primarily responsible for paying indemnification and advancement obligations if a fund representative were sued in his or her capacity as a director of the portfolio company. *Levy*, however, changed this expectation.

In *Levy*, a private equity fund appointed four of its principals to serve on the board of a portfolio company. When the portfolio company announced that some of its financial statements were inaccurate, stockholders and bondholders sued the company and certain officers and directors, including the fund's representatives. In connection with settling the lawsuit, the private equity fund paid a portion of the total settlement amount on the representatives' behalf, pursuant to its obligation to indemnify the representatives under the fund's limited partnership agreement. The representatives sought to recover the amounts paid by the private equity fund from the portfolio company pursuant to indemnification agreements between the portfolio company and the representatives. The Delaware Court of Chancery held that the fund representatives could not seek indemnification for the settlement amounts from the portfolio company because the private equity fund had already paid on their behalf. The court also held that the private equity fund could seek contribution directly from its portfolio company because the fund and its portfolio company owed concurrent indemnification obligations and each was therefore responsible for half of the amounts paid in respect of these obligations. The reason the court found that the indemnification obligations of the two entities were concurrent was because both the fund and the portfolio company were contractually obligated to indemnify the director-appointees.

In *Schoon v. Troy*, the Delaware Court of Chancery reached a different result based on the fact that a company's significant stockholder had voluntarily undertaken to advance litigation expenses to the directors it had appointed to the company's board.²¹⁴ The court determined that the directors could still pursue indemnification and advancement claims against the company, because unlike in *Levy*, the significant stockholder had not undertaken an obligation to indemnify or advance expenses to the directors, so the company's indemnification and advancement obligations had not been extinguished.

A third case, *Sodano v. American Stock Exchange*, confirmed that parties can contract around the result in *Levy* by

prioritizing indemnification and advancement obligations.ⁿ²¹⁵ In *Sodano*, the indemnification dispute was between the American Stock Exchange, or Amex, and the NASD, which owned Amex at the time. The Delaware Court of Chancery upheld a priority provision in the NASD's organizational documents that rendered its indemnification and advancement obligations secondary to the obligations of Amex.

Accordingly, a private equity fund can avoid the result in *Levy* by reviewing its own indemnification and advancement obligations and those of its portfolio companies early on, so that it and its portfolio companies know the extent of their respective obligations and documents can be drafted accordingly to reflect the intentions of the parties with respect to the priority of these obligations. One solution to the issue raised in the *Levy* case is a "priority agreement" between the private equity fund and the portfolio company. This type of agreement would make clear that the portfolio company is primarily liable for indemnification and advancement of expenses to private equity fund representatives serving on the portfolio company board. The agreement would specify that the portfolio company agrees to indemnify and advance expenses to the fund representatives in accordance with the terms of the company's organizational documents and any indemnification contracts. The agreement also would make clear that, if the private equity fund steps in and actually pays indemnification or advancement to the fund representatives, then the fund is entitled to reimbursement for those amounts from the portfolio company. Similar types of "priority" provisions also can be included in the private equity fund's organizational documents.ⁿ²¹⁶ These provisions would require that individuals look first to the portfolio company for indemnification and advancement and would state that the fund is liable for indemnification and advancement only if, and to the extent that, the portfolio company does not pay. The private equity fund also could require individuals to reimburse it for any amounts paid by the fund to the extent they receive payment from the portfolio company.

(n5)Footnote 5. Delaware's original indemnification statute served as the model for the indemnification provision in the Model Business Corporation Act of 1950, the first version of the Model Act. In 1967, when Delaware's new General Corporation Law was published, it included a comprehensive redraft of the indemnification provisions. Over the next 15 years, 27 states adopted some form of the Delaware indemnification statute. See John F. Olson *et al.*, *Director and Officer Liability: Indemnification and Insurance* § 4:24 (Thomson West 2003 (revision by Jennifer Berger & Mitchell A. Kaufman)). Today, seven states have adopted Section 145 of the Delaware General Corporation Law almost verbatim. See Model Bus. Corp. Act Ann. § 8.50 statutory comparison (4th ed. 2008) (stating that Arkansas,

Illinois, Kansas, Missouri, Oklahoma and Pennsylvania have adopted statutes that closely track Section 145 of the Delaware General Corporation Law).

(n6)Footnote 6. *VonFeldt v. Stifel Fin. Corp.*, 714 A.2d 79, 84 (Del. 1998) (citation omitted).

(n7)Footnote 7. *Del. Code Ann. tit. 8, § 145* (2009). As is true for directors, under certain circumstances, indemnification of officers is mandatory. *See Del. Code Ann. tit. 8, § 145(c)* (2009).

(n8)Footnote 8. *Del. Code Ann. tit. 8, §§ 145(a) & (b)* (2009).

(n9)Footnote 9. *See Del. Code Ann. tit. 8, §§ 145(a) & (b)* (2009).

(n10)Footnote 10. *Del. Code Ann. tit. 8, § 145(j)* (2000). Under Section 145(j) of the Delaware General Corporation Law, a corporation must act at the time a grant of indemnification is authorized or ratified in order to limit rights to continuing indemnification.

(n11)Footnote 11. *See Del. Code Ann. tit. 8, § 145(f)* (effective Aug. 1, 2009); *see also* Synopsis, House Bill No. 19 (Apr. 10, 2009), available at <http://legis.delaware.gov/LIS/lis145.nsf/vwLegislation/HB+19?Opendocument>. The restriction on retroactive amendments also applies to the advancement of expenses and was a legislative response to the result in *Schoon v. Troy*, 948 A.2d 1157 (Del. Ch. 2008), discussed in § 5.03[5] below.

Ct. 1987) (corporate officer was not entitled to indemnification for the costs of defending a sexual harassment lawsuit because actions were viewed as outside the scope of the officer's employment).

(n23)Footnote 23. *Del. Code Ann. tit. 8, § 145(c)* (2009). The Delaware statute was amended in 1997 to eliminate mandatory statutory indemnification of expenses for non-director and non-officer employees and agents, effective for all acts and omissions occurring after July 1, 1997. *See Del. Code Ann. tit. 8, amended by 71 Del. Laws 120 (1997).*

(n24)Footnote 24. *See, e.g., Green v. Westcap Corp. of Delaware, 492 A.2d 260 (Del. Super. Ct. 1985).*

(n25)Footnote 25. *See, e.g., Cochran v. Stifel Fin. Corp., 2000 Del. Ch. LEXIS 179, at *4 n.10 (Dec. 13, 2000), aff'd in part, rev'd in part on other grounds, 809 A.2d 555 (Del. 2002)* (awarding defendant indemnification for claims he successfully defended and noting parties' position that, where separate claims brought in one action can be sensibly segregated for purposes of analyzing whether indemnity is owed, the court may segregate the claims) (citing *Meritt-Chapman & Scott Corp. v. Wolfson, 321 A.2d 138, 141 (Del. Super. Ct. 1974)*).

(n26)Footnote 26. *See, e.g., Owens-Corning v. National Union Fire Ins. Co., 257 F.3d 484, 496 (6th Cir. 2001); Waltuch v. Conticommodity Servs., Inc., 88 F.3d 87, 95-97 (2d Cir. 1997); Safeway Stores, Inc. v. National Union Fire Ins. Co., 64 F.3d 1282, 1290 n.24 (9th Cir. 1995); Wisener v. Air Express Int'l Corp., 583 F.2d 579, 583 (2d Cir. 1978); VonFeldt v. Stifel Fin. Corp., CA 15688, 1999 Del. Ch. LEXIS 131, at *15-*16 (June 11, 1999); B&B Inv. Club v. Kleinert's, Inc., 472 F. Supp. 787, 790-791 (E.D. Pa. 1979).* Each of these cases involved settlements that did not require the individual seeking indemnification to pay any monetary damages or concede liability. In *Owens-Corning*, the Sixth Circuit, interpreting Delaware law, held that defendants who had paid a settlement of almost \$10 million could not rely on Section 145(c) as a basis for obtaining indemnification. *See Owens-Corning, 257 F.3d at 495.* Finding it "extremely dubious" that Delaware courts would view a \$10 million settlement as a "success" for purposes of Section 145(c), the court pointed to the explicit references to settlement amounts in Sections 145(a) and 145(b) as a "strong indication" that Section 145(c) was not intended "to be ordinarily applicable to settlements." *Owens-Corning, 257 F.3d at 495.* The court did indicate, however, that if the amount of a settlement were lower than the expected attorneys' fees and costs that would be incurred in the absence of the settlement, there was a "good argument" for success under Section 145(c) despite payment. *Owens-Corning, 257 F.3d at 495 n.6.* In making this statement, the Sixth Circuit cited a Delaware Chancery Court decision in which the court acknowledged that "room might exist for recognizing that dismissal with prejudice with the payment of nominal consideration, amounting perhaps to the nuisance value of the suit, is an appropriate understanding of the phrase 'success on the merits or otherwise.'" *VonFeldt, 1999 Del. Ch. LEXIS 131, at *16.* In *VonFeldt*, and in *Waltuch*, the courts declined to reach the issue of whether a settlement payment automatically renders a defendant unsuccessful under Section 145(c) of the Delaware General Corporation Law. *See VonFeldt, 1999 Del. Ch. LEXIS 131, at *16; Waltuch, 88 F.3d at 96 n.12.*

(n27)Footnote 27. *See, e.g., Galdi v. Berg, 359 F. Supp. 698, 700-702 (D. Del. 1973)* (indemnification award would be premature and contrary to the purpose of the statute where case was dismissed without prejudice so that same issue could be litigated in another pending proceeding, but the defendant was not foreclosed from seeking indemnification if he were ultimately successful on the merits or otherwise in having the charges against him dismissed with prejudice in the other pending cases).

(n28)Footnote 28. Model Bus. Corp. Act Ann. § 8.52 & statutory comparison (4th ed. 2008). The *Merritt-Chapman* case (*see above* (citing *Meritt-Chapman & Scott Corp. v. Wolfson, 321 A.2d 138 (Del. Super. Ct. 1974)*)) was instrumental in causing the drafters of the Model Business Corporation Act to move away from the Delaware model and require a defendant to be "wholly successful on the merits or otherwise" in order to be entitled to mandatory indemnification. *See also* Model Bus. Corp. Act Ann. § 8.52 official cmt. (4th ed. 2008). In *Meritt-Chapman*, the court held that a defendant who pled *nolo contendere* to a single count of an indictment in return for dismissal of the remaining counts against him was entitled to mandatory indemnification for litigation expenses incurred in defending all of the counts that were dismissed.

(n50)Footnote 50. *Del. Code Ann. tit. 8, § 145(b)* (2009).

(n51)Footnote 51. *Del. Code Ann. tit. 8, § 145(b)* (2009).

(n52)Footnote 52. See 1 R. Franklin Balotti & Jesse A. Finkelstein, *The Delaware Law of Corporations and Business Organizations* § 4.12[A] (3d ed. Supp. 2009).

(n53)Footnote 53. But see 1 R. Franklin Balotti & Jesse A. Finkelstein, *The Delaware Law of Corporations and Business Organizations* § 4.12[A] (3d ed. Supp. 2009) (raising but rejecting this argument); S. Samuel Arsht & Walter K. Stapleton, *Delaware's New General Corporation Law: Substantive Changes*, 23 *Bus. Law.* 75, 79-80 (1967)

(indicating that the Delaware Corporation Law Revision Committee decided that to "permit the corporation to nullify a judgment in its favor against a director simply by refunding the director's payment on it would, in the committee's judgment, subvert the substantive provisions of the corporation law and should not be permitted." With respect to settlement amounts, the Committee thought that to permit indemnification "would have the ultimate effect of discouraging settlements since, in such a situation, derivative plaintiffs could demonstrate no benefit arising to the corporation from their action and, presumably, could not justify being reimbursed for their litigation expenses, including counsel fees.").

(n54)Footnote 54. *See Del. Code Ann. tit. 8, § 145(f)* (2009).

(n55)Footnote 55. *See, e.g., TLC Beatrice Int'l Holdings, Inc. v. CIGNA Ins. Co., 1999 U.S. Dist. LEXIS 605, at *13-*20 (S.D.N.Y. Jan. 27, 1999)* (New York court interpreting Delaware law concluded that omission of judgment and settlement amounts in derivative suits under Section 145(b) was intentional, rejected argument that indemnification was permitted under Section 145(f), and held that Delaware law does not empower corporations to indemnify directors for settlement amounts in derivative suits); *Arnold v. Society for Sav. Bancorp, 678 A.2d 533, 540 & n.18 (Del. 1996)* (noting that Section 145(b) was intentionally drafted to avoid a circular result where a corporation would simply be paying itself for injury caused to it by the very directors being indemnified by the corporation); *but see Heffernan v. Pacific Dunlop GNB Corp., 1993 U.S. Dist. LEXIS 5, at *15 (N.D. Ill. Jan. 5, 1993)* (Illinois court interpreting Delaware law and upholding bylaw provision permitting indemnification for charges, costs, judgments, fines, and amounts paid to settle suits by or on behalf of a corporation because Delaware statutory law "does not mark the exclusive ambit of indemnification rights" and statutory indemnification rights "co-exist with" rights conferred under corporate bylaws).

(n58)Footnote 58. *Del. Code Ann. tit. 8, § 145(e)* (2009).

(n59)Footnote 59. *Del. Code Ann. tit. 8, § 145(e)* (2009).

(n60)Footnote 60. *See, e.g., Tafteen v. Homestore, Inc., 2004 Del. Ch. LEXIS 38 (Mar. 22, 2004)*; In *Homestore*, the court rejected Homestore's argument that advancing expenses to an officer would place the corporation in a position of severe financial hardship where the corporation had a broad advancement bylaw that conditioned payment of advances only on the receipt of an unsecured undertaking to repay. According to the court, the existence of financial hardship was not a defense to a request for advancement when Homestore could have adopted a more stringent bylaw that would have lessened the credit risk posed by the possibility of an inability to repay. *See Homestore, 2004 Del. Ch. LEXIS 38, at *41-*45*.

(n110)Footnote 110. See *Advanced Mining Sys., Inc. v. Fricke*, 623 A.2d 82, 84 (Del. Ch. 1992).

(n111)Footnote 111. See *Advanced Mining*, 623 A.2d at 84. In a series of opinions, the Delaware Court of Chancery issued, and subsequently refused to vacate, a preliminary injunction enjoining a corporation's board of directors from authorizing advancements of litigation expenses to the directors where the directors were unable to demonstrate that they had considered either of these factors. See *Havens v. Attar*, 1997 Del. Ch. LEXIS 12 (Jan. 30, 1997) (unpublished) (issuing injunction); *Havens v. Attar*, 1997 Del. Ch. LEXIS 164 (Sept. 22, 1997) (denying motion to dissolve injunction); *Havens v. Attar*, 1997 Del. Ch. LEXIS 147 (Nov. 5, 1997) (denying motion for reargument to dissolve injunction). The court found that the directors had failed to consider any evidence pertaining to potential litigation expenses, potential damages, or their ability to repay amounts advanced if they were found not to be entitled to indemnification. See *Havens v. Attar*, 1997 Del. Ch. LEXIS 12, at *43-*47 (Jan. 30, 1997) (unpublished). On this basis, the court determined that the plaintiffs would likely be able to establish a breach of the duty of care (thereby rebutting the presumptive protections of the business judgment rule) and that it was unlikely that the defendants, as interested parties, would be able to demonstrate that they had not breached their duty of loyalty and that the advancement decision was entirely fair to the corporation and its stockholders. *Havens*, 1997 Del. Ch. LEXIS 12, at *43-*47.

(n112)Footnote 112. See John Mark Zeberkiewicz & Blake Rohrbacher, *No Surprises: The Mandatory Nature of Mandatory Advancement and Indemnification*, 15 The Corporate Governance Advisor No. 6, at 24 (Nov./Dec. 2007) ("Corporations and their advisors need to think carefully before drafting mandatory advancement provisions."); see also Stephen A. Radin, *"Sinners Who Find Religion": Advancement of Litigation Expenses to Corporate Officials Accused of Wrongdoing*, 25 Rev. Litig. 251, 290-292 (2006) (stating that boards should "make a business judgment, and periodically revisit that business judgment" with respect to the scope of advancement rights to be granted to directors, officers and others). *Id.* at 291.

(n113)Footnote 113. See, e.g., Amended and Restated Bylaws of The Estee Lauder Companies Inc. (May 8, 2009), available at http://www.sec.gov/Archives/edgar/data/1001250/000110465909031902/a09-13261_1ex3d1.htm. Section 2 of Article VI provides in relevant part:

No advance shall be made by the Corporation if a determination is reasonably and promptly made by a majority vote of disinterested directors, even if the disinterested directors constitute less than a quorum, or (if such a quorum is not obtainable or, even if obtainable, a quorum of disinterested directors so directs) by independent legal counsel in a written opinion, that, based upon the facts known to the Board or counsel at the time such determination is made, the indemnitee has acted in such a manner as to permit or require the denial of indemnification pursuant to the provisions of Section 1 of this Article VI.

(n114)Footnote 114. See William D. Johnston, *Message From Delaware Courts is Unmistakable--'Mandatory' Advance Defense Expenses Means Just That*, Atlantic Coast In-House (Apr. 2006) (stating that "if bylaw or charter provisions or the terms of a separate agreement are really not intended to provide advancement or indemnification 'to the fullest extent permitted by law,' they shouldn't say so or allow for any even arguable ambiguity in that regard.").

(n132)Footnote 132. Model Bus. Corp. Act Ann. § 8.58(a) (4th ed. 2008). Section 8.58(a) provides that:

A corporation may, by a provision in its articles of incorporation or bylaws or in a resolution

adopted or a contract approved by its board of directors or shareholders, obligate itself in advance of the act or omission giving rise to a proceeding to provide indemnification in accordance with section 8.51 or advance funds to pay for or reimburse expenses in accordance with section 8.53. Id. ... Any such provision that obligates the corporation to provide indemnification to the fullest extent permitted by law shall be deemed to obligate the corporation to advance funds to pay for or reimburse expenses in accordance with section 8.53 to the fullest extent permitted by law, unless the provision specifically provides otherwise.

Section 8.58(a) is intended to prevent the result in *Advanced Mining*. Model Bus. Corp. Act Ann. § 8.58(a) official cmt. (4th ed. 2008). *See also Barry v. Barry*, 28 F.3d 848, 850-851 (8th Cir. 1994) (affirming lower court opinion that contractual provision mandating indemnification to the extent provided under Minnesota law also incorporated a right to mandatory advancement of expenses). The Minnesota indemnification statute makes both indemnification and advancements mandatory unless a corporation opts out of the statutory scheme. *See Minn. Stat. § 302A.521 subds. 2 & 3* (2008).

(n150)Footnote 150. See Mark A. Sargent & Dennis R. Honabach, *D&O Liability Handbook: Law-Sample Documents-Forms* (Thomson West 2009) (compiling and discussing nonexclusivity provisions of various jurisdictions).

(n151)Footnote 151. *Del. Code Ann. tit. 8, § 145(f)* (2009).

(n152)Footnote 152. *But see PepsiCo, Inc. v. Continental Cas. Co.*, 640 F. Supp. 656, 661 (S.D.N.Y. 1986) (interpreting Delaware General Corporation Law Sections 145(a) and (b)). In *PepsiCo*, the court considered whether a decision to indemnify the company's directors comported with Section 145(d) of the Delaware General Corporation Law where the decision was not approved in accordance with the procedures set forth in that section and did not involve any evaluation as to whether the statutory standard of conduct had been met. The court concluded that the failure to comply with Section 145(d) was "made irrelevant by the fact that these provisions are not exclusive conditions for indemnification"; rather, they are simply " 'fall back' provisions which a Delaware corporation may or may not adopt." *PepsiCo, Inc.*, 640 F. Supp. at 661 . *PepsiCo, Inc.* had a bylaw provision requiring it to provide indemnification "to the full extent permitted by law." According to the court, because the bylaw made indemnification of the company's directors and officers the rule rather than the exception, the company had "supplanted the 'backstop' provisions included in [Sections 145(a) and (b)]." *PepsiCo, Inc.*, 640 F. Supp. at 661 . The court determined that the procedures in Section 145(d) "apply only when a corporation indemnifies pursuant to those backstop provisions." *PepsiCo, Inc.*, 640 F. Supp. at 661 . See also *Heffernan v. Pacific Dunlop GNB Corp.*, 1993 U.S. Dist. LEXIS 5, at *15 (N.D. Ill. Jan. 5, 1993) (citing Delaware's nonexclusivity provision, Illinois court interpreting Delaware law concluded that Delaware statutory law "does not mark the exclusive ambit of indemnification rights" and statutory indemnification rights "co-exist with" rights conferred under corporate bylaws).

(n153)Footnote 153. See *Citadel Holding Corp. v. Roven*, 603 A.2d 818, 823 (Del. 1992) .

(n154)Footnote 154. *Citadel Holding*, 603 A.2d at 823 (citation omitted). See also *Mooney v. Willys-Overland Motors, Inc.*, 204 F.2d 888, 896 (3d Cir. 1953) (Third Circuit, applying Delaware law, holding contractual rights to indemnification enforceable if supported by an "independent legal ground" but suggesting that scope of indemnification rights may be subject to "realistic limits"); John F. Olson *et al.*, *Director and Officer Liability: Indemnification and Insurance* § 4:21 (Thomson West 2003 (revision by Jennifer Berger & Mitchell A. Kaufman)) (stating that the "realistic limits" language in *Mooney* "may serve as a warning to those who would rely on overly aggressive indemnity agreements").

(n155)Footnote 155. *Waltuch v. ContiCommodity Services, Inc.*, 88 F.3d 87 (2d Cir. 1996) .

(n156)Footnote 156. *Waltuch*, 88 F.3d at 91 . See also S. Samuel Arshat, *Indemnification Under Section 145 of the Delaware General Corporation Law*, 3 *Del. J. Corp. L.* 176, 176-77 (1978), quoted in *Waltuch*, 88 F.3d at 91 n.7 (emphasis added) ("Subsection (f) [of Section 145] permits additional rights to be created, but it is not a blanket authorization to indemnify directors against all expenses, fines, or settlements of whatever nature and regardless of the directors' conduct. The statutory language is circumscribed by the limits of public policy.").

(n157)Footnote 157. *Waltuch*, 88 F.3d at 93. "[T] here would be no point to the carefully crafted provisions of

Section 145 spelling out the permissible scope of indemnification under Delaware law if subsection (f) allowed indemnification in additional circumstances without regard to these limits. The exception would swallow the rule." *Waltuch*, 88 F.3d at 91 (quoting *Waltuch v. Conticommodity Services, Inc.*, 833 F. Supp. 302, 309 (S.D.N.Y. 1993)).

(n158)Footnote 158. *Waltuch v. ContiCommodity Services, Inc.*, 88 F.3d 87, 95 (2d Cir. 1996) .

(n159)Footnote 159. See, e.g., *Mayer v. Executive Telecard, Ltd.*, 705 A.2d 220, 224 & n.6 (Del. Ch. 1997) (concurring with the Second Circuit's construction of Section 145 that a Delaware corporation lacks the power to indemnify a party who did not act in good faith); see also *Morgan v. Grace*, 2003 Del. Ch. LEXIS 113, at *12 & n.20 (Oct. 29, 2003) (citing *Mayer*) ("It is easy to imagine legal limitations on the obligation created by [the contract] that depend upon the nature of the conduct involved. For example, the court presumes that the duty to pay fees and expense[s] would not extend to a case where the defendants are shown to have engaged in intentionally fraudulent or illegal conduct."); *VonFeldt v. Stifel Fin. Corp.*, 1999 Del. Ch. LEXIS 131, at *5-*9 (June 11, 1999) ("While § 145(f) permits indemnification on terms other than as set forth in the rest of § 145, such other indemnification must be consistent with the policies expressed in the other parts of § 145.").

(n160)Footnote 160. *But see Va. Code Ann. § 13.1-704(B)* (2009) (Virginia's statutory nonexclusivity provision). As under Delaware law, Virginia law permits corporations to provide indemnification if an individual acted in good faith. *Va. Code Ann. § 13.1-697(A)* (2009). However, Virginia's nonexclusivity provision establishes a separate and independent basis for granting additional indemnification and advancement rights (beyond those expressly granted by statute) that is not subject to satisfaction of this good faith standard. The nonexclusivity provision authorizes Virginia corporations to provide further indemnification and advancement rights in their articles of incorporation or a stockholder-approved bylaw, except in cases of willful misconduct or a knowing violation of criminal law. *Va. Code Ann. § 13.1-704(B)* (2009).

(n161)Footnote 161. In addition, the corporation statutes of some states require companies to report in writing to their stockholders on modifications to indemnification rights, and on indemnification payments and advances made to directors and officers. See, e.g., *Md. Code Ann., Corps. & Ass'ns § 2-418(l)* (2008) (reporting of indemnification and advances paid to directors in suits by or in the right of a corporation); *N.Y. Bus. Corp. L. §§ 725(c) & (d)* (2000) (reporting of any expenses and other amounts paid by way of indemnification and of actions taken by bylaw amendment, board resolution or agreement with respect to indemnification of directors and officers). This reporting usually occurs in a company's annual proxy statement 42. See, e.g., Xerox Corporation 2009 Annual Proxy Statement (Apr. 9, 2009), available at http://www.sec.gov/Archives/edgar/data/108772/000120677409000706/xerox_def14a.htm (stating that, since the company last reported to stockholders, the company had advanced an aggregate of approximately \$5 million in legal fees and expenses to present and former directors and officers involved in various litigation).

(n162)Footnote 162. See, e.g., *Advanced Mining Sys., Inc. v. Fricke*, 623 A.2d 82, 83 (Del. Ch. 1992) ("virtually all public corporations have by by-law exercised the authority recognized by Section 145 so as to mandate the extension of indemnification rights in circumstances in which indemnification would be permissible under Section 145").

(n163)Footnote 163. *Stifel Fin. Corp. v. Cochran*, 809 A.2d 555, 560-562 (Del. 2002) . In reaching its decision, the court noted that "corporations will not be unduly punished by this result. They remain free to tailor their indemnification bylaws to exclude 'fees on fees,' if that is a desirable goal." *Stifel*, 809 A.2d at 561-562 . *But see Baker v. Health Mgmt. Sys., Inc.*, 98 N.Y.2d 80, 745 N.Y.S.2d 741, 772 N.E. 2d 1099 (N.Y. 2002) (director or officer is not entitled to indemnification for legal expenses incurred in obtaining indemnification, even if director or officer was successful in underlying action--unless corporation's bylaws, insurance policy or agreements with director or officer explicitly provide for indemnification of fees on fees).

(n164)Footnote 164. See, e.g., *Mayer v. Executive Telecard, Ltd.*, 705 A.2d 220 (Del. Ch. 1997) .

(n165)Footnote 165. See, e.g., *Fasciana v. Electronic Data Sys. Corp.*, 829 A.2d 178, 183 (Del. Ch. 2003)

(individual who won limited right to advancement of defense costs in action under Section 145 was entitled to indemnification for portion of litigation expenses incurred in enforcing right to advancement).

(n166)Footnote 166. See *Weaver v. ZeniMax Media, Inc.*, 2004 Del. Ch. LEXIS 10 (Jan. 30, 2004) (concluding that corporate officer and director was entitled to fees on fees in an advancement action where the corporation's bylaws provided mandatory advancement of actual and reasonable expenses and did not specifically exclude fees on fees, even though the bylaws did not specify that indemnification or advancement would be provided "to the full extent authorized by law").

(n167)Footnote 167. *Weaver*, 2004 Del. Ch. LEXIS 10, at *27 .

(n172)Footnote 172. 2008 Del. Ch. LEXIS 82 (Del. Ch. June 23, 2008) .

(n173)Footnote 173. *Jackson Walker*, 2008 Del. Ch. LEXIS 82 at 36 .

(n174)Footnote 174. 2008 Del. Ch. LEXIS 60 (Del. Ch. May 23, 2008) (unpublished).

(n175)Footnote 175. *Zaman*, 2008 Del. Ch. LEXIS at 35-36.

(n176)Footnote 176. See, e.g., *Del. Code Ann. tit. 8, § 145(j)* (2009). Section 145(j) generally provides that indemnification continues after an individual has ceased to be a director, officer, employee or agent of a corporation, and inures to the benefit of the individual's heirs, executors and administrators.

(n177)Footnote 177. See discussion in § 5.03[4] above.

(n178)Footnote 178. See Model Bus. Corp. Act Ann. § 8.51 statutory comparison (4th ed. 2008) (surveying extent to which indemnification statutes of various jurisdictions permit indemnification in derivative suits).

(n179)Footnote 179. See § 5.03[4] above.

(n180)Footnote 180. See § 5.03[7] above.

(n181)Footnote 181. See *Del. Code Ann. tit. 8, § 145(e)* (2009).

(n182)Footnote 182. See *Waltuch v. ContiCommodity Services, Inc.*, 88 F.3d 87, 94 (2d Cir. 1996) (citing E. Norman Veasey *et al.*, *Delaware Supports Directors With a Three-Legged Stool of Limited Liability, Indemnification, and Insurance*, 42 *Bus. Law.* 399, 415 (1987)); see also 1 R. Franklin Balotti & Jesse A. Finkelstein, *The Delaware Law of Corporations and Business Organizations* § 4.12[E] (3d ed. Supp. 2009). "Fees on fees" are discussed in § 5.03[8] above.

(n183)Footnote 183. See, e.g., *Citadel Holding Corp. v. Roven*, 603 A.2d 818, 823 (Del. 1992) (citation omitted) ("Private parties may not circumvent the legislative will simply by agreeing to do so.").

(n184)Footnote 184. See § 5.03[7] above (discussing nonexclusivity provision of Delaware indemnification

statute).

(n185)Footnote 185. *See, e.g., Mooney v. Willys-Overland Motors, Inc., 204 F.2d 888, 893-96 (3d Cir. 1953)* (Third Circuit, applying Delaware law, rejected argument that Delaware indemnification statute and corporate bylaw should control indemnification to the exclusion of all other arrangements and held that indemnification rights set forth in severance agreement were enforceable as long as rights were supported by an "independent legal ground."). *See also* Ronald E. Mallen & David W. Evans, *Surviving the Directors' and Officers' Liability Crisis: Insurance and the Alternatives*, 12 *Del. J. Corp. L.* 439, 465 (1987) ("Although what constitutes an 'independent legal ground' may be susceptible of varying interpretations, some form of consideration, stockholder approval or demonstrable benefit to the corporation would probably have to be shown.").

(n186)Footnote 186. The risks inherent in the possibility of unilateral amendment were clearly illustrated by *Schoon v. Troy Corp.*, a 2008 decision in which the Delaware Court of Chancery held that a former director was not entitled to advancement where, subsequent to the director's departure from the company's board, the board amended the bylaws to eliminate advancement rights for former directors. *See Schoon v. Troy Corp., 948 A.2d 1157 (Del. Ch. 2008)*, and § 5.03[5] above for a discussion of *Schoon*.

(n187)Footnote 187. *See* § 5.03[5] above (discussing *Advanced Mining Sys., Inc. v. Fricke, 623 A.2d 82 (Del. Ch. 1992)*) and § 5.03[8] above (discussing fees on fees).

(n188)Footnote 188. *See* § 5.03[5] above for a discussion of bylaw provisions giving the board or another appropriate decision-maker discretion to cut off advancement rights to so-called "bad actors."

(n189)Footnote 189. *See, e.g.,* Richard M. Cieri & Michael J. Riela, *Protecting Directors and Officers of Corporations That Are Insolvent or in the Zone or Vicinity of Insolvency: Important Considerations, Practical Solutions*, 2 *DePaul Bus. & Comm. L.J.* 295 (Winter 2004).

(n190)Footnote 190. D&O insurance is discussed in § 5.04 below.

(n191)Footnote 191. *See Del. Code Ann. tit. 8, § 145(g)* (2009).

(n192)Footnote 192. *See* discussion in § 5.04[2] below.

(n193)Footnote 193. *See, e.g., La. Rev. Stat. Ann. § 12:83(F)(1)* (2008) (authorizing creation of "a trust fund or other form of self-insurance arrangement for the benefit of persons indemnified by the corporation"); *Md. Code Ann., Corps. & Ass'ns § 2-418(k)(2)* (2008) (authorizing protection "similar" to insurance, "including a trust fund, letter of credit, or surety bond"); *Nev. Rev. Stat. § 78.752(2)* (2009) (authorizing creation of "other financial arrangements" on behalf of indemnitees, including creation of a trust fund, establishment of a program of self-insurance, the "securing of [the corporation's] obligation of indemnification by granting a security interest or other lien on any assets of the corporation," and "establishment of a letter of credit, guaranty or surety"); *N.M. Stat. Ann. § 53-11-4.1(J)* (2008) (authorizing "similar protection" to insurance, "including but not limited to providing a trust fund, a letter of credit or self-insurance"); *Ohio Rev. Code Ann. § 1701.13(E)(7)* (2009) (authorizing protection "similar" to insurance, "including, but not limited to, trust funds, letters of credit, or self-insurance"); *15 Pa. Cons. Stat. Ann. § 518(a)* (2008) ("Any domestic corporation may create a fund of any nature, which may, but need not be, under the control of a trustee, or otherwise secure or insure in any manner its indemnification obligations."); *Tex. (n196)Footnote 196. Another funding mechanism that, like an indemnification trust, permits corporations to earmark and segregate funds for payment of indemnification and provides for the release of those funds when certain procedures are followed, is a standby letter of credit, which requires a third party, such as a bank, to assume the risk that a corporation will not pay indemnification. See John F. Olson *et al.*, *Director and Officer Liability: Indemnification and Insurance* § 11:5 (Thomson West 2003 (revision by Jennifer Berger & Mitchell A. Kaufman)); see also J. Phil Carlton & M. Guy Brooks, III, *Corporate Director and Officer Indemnification: Alternative Methods for Funding*, 24 *Wake Forest L. Rev.* 53 (1989); Joseph F. Johnston, Jr., *How to Fund Indemnification Arrangements*, 1 *Insights No. 2*, at 3 (Aug. 1987).

(n200)Footnote 200. See John F. Olson *et al.*, *Director and Officer Liability: Indemnification and Insurance* § 11:6 (Thomson West 2003 & Supp. 2008-09 (revision by Jennifer Berger & Mitchell A. Kaufman)); J. Phil Carlton & M. Guy Brooks, III, *Corporate Director and Officer Indemnification: Alternative Methods for Funding*, 24 *Wake Forest L. Rev.* 53, 69 n.113 (1989); Joseph F. Johnston, Jr., *How to Fund Indemnification Arrangements*, 1 *Insights No. 2*, at 3, 5-7 (Aug. 1987).

(n201)Footnote 201. See John F. Olson *et al.*, *Director and Officer Liability: Indemnification and Insurance* § 11:6 (Thomson West 2003 & Supp. 2008-09 (revision by Jennifer Berger & Mitchell A. Kaufman)). In the event of bankruptcy, the transfer of assets to the trust could be subject to attack under state fraudulent conveyance statutes and the federal bankruptcy laws. Under the Uniform Fraudulent Transfer Act and its predecessor, the Uniform Fraudulent Conveyance Act, a creditor or trustee in bankruptcy may be able to recover assets transferred by a debtor if the debtor made the transfer without receiving "reasonably equivalent value" ("fair consideration" is the term used in the Uniform Fraudulent Conveyance Act) and the debtor was insolvent at the time of the transfer or became insolvent as a result of it. See Uniform Fraudulent Transfer Act, §§ 4(a)(2) & (5)(a) (2007); Uniform Fraudulent Conveyance Act § 4 (2007). In addition, a transfer may be deemed fraudulent under state law if it was made with actual intent to hinder, delay or defraud creditors. See Uniform Fraudulent Transfer Act, § 4(a)(1) (2007); Uniform Fraudulent Conveyance Act § 7 (2007). Under the federal bankruptcy laws, a trustee may avoid certain pre-bankruptcy transfers by a debtor that occurred within a short period prior to commencement of the bankruptcy case. See 11 U.S.C. § 547(b) (2008). A transfer may also be set aside as fraudulent if it occurred within two years prior to commencement of the bankruptcy case, and it was made with actual intent to hinder, delay or defraud creditors or the debtor received less than reasonably equivalent value and was, or was rendered, insolvent, undercapitalized, or unable to pay its debts as they came due. See 11 U.S.C. § 548(a) (2007).

CHAPTER 5 LIABILITY OF OFFICERS AND DIRECTORS; STATUTORY LIMITATIONS, INDEMNIFICATION
AND D&O INSURANCE

1-5 Corporate Governance: Law and Practice § 5.04

AUTHOR: Gillian McPhee

§ 5.04 D&O Insurance

[1] Corporate Governance and the D&O Insurance Marketplace

D&O insurance is important in attracting qualified directors. As one court has noted, D&O insurance "plays an important role in corporate governance in America" because "[u]nless directors can rely on the protections given by D&O policies, good and competent men and women will be reluctant to serve on corporate boards."ⁿ¹

Today, directors face a more challenging environment than at any time in recent history--an environment in which there is an increased risk of litigation, the prospect of million dollar judgments in securities class action and derivative lawsuits, and heightened scrutiny from regulators and investors. In this environment, insurance may offer the last source of protection from substantial personal liability if a corporation is unable or unwilling to pay indemnification. The corporate laws of most states provide that corporations have the power to purchase and maintain insurance, at the corporation's expense, on behalf of directors, officers, employees and agents,ⁿ² and to insure these individuals against potential liability even in instances where the corporation may not have the power to indemnify them, such as for claims involving violations of the federal securities laws. Accordingly, insurance can be important in filling the gaps in situations where indemnification is unavailable.

Beginning in the mid-1990s, following the passage of the Private Securities Litigation Reform Act of 1995, D&O insurance premiums fell dramatically and insurers expanded the coverage available under "standard" D&O policies, resulting in significantly more favorable coverage terms at greatly reduced rates.ⁿ³ From 2001 through the end of 2003, this trend reversed, as public companies faced one of the most difficult insurance markets in years. A significant increase in the number of restatements of public company financial statements and the unprecedented wave of scandals at Enron Corp., WorldCom, Inc., Adelphia Communications Corporation, Tyco International Ltd., and HealthSouth Corporation led to increased regulatory investigations and a surge in the number of securities cases against public companies and their officers and directors. At the same time, some suggested that the Private Securities Litigation Reform Act had failed to accomplish its intended purpose of reducing the number of securities lawsuits filed, increasing the number of dismissals at earlier stages of litigation, and lowering settlement costs,ⁿ⁴ thereby contributing to the increase in the frequency and severity of securities claims.ⁿ⁵

Faced with having to absorb the lion's share of massive settlement and defense costs resulting from such litigation, D&O insurers responded with more restrictive coverage terms and substantial premium increases. Although many of the trends that led to the tightening of the D&O insurance market beginning in 2001 have continued, such as increased securities enforcement activity and massive securities class action lawsuits,ⁿ⁶ the market for D&O insurance began to soften in 2004 and coverage restrictions began to ease, with companies generally experiencing lower premiums and retentions and more room to negotiate coverage endorsements.ⁿ⁷ More recently, however, the subprime mortgage meltdown and financial crisis have resulted in significant price increases in the financial services sector, together with a reduction in policy limits and more restrictive policy terms. A similar tightening has not yet occurred in other sectors, though some experts have predicted that it is only a matter of time before the remainder of the market for D&O insurance is impacted.ⁿ⁸ On the whole, public companies still are finding it more difficult than in the past to secure adequate levels of D&O insurance coverage. In this regard, it is expected that the practice of purchasing additional "Side A" coverage for nonindemnifiable losses will continue.

To the extent that D&O insurance is difficult or expensive to obtain, this has ramifications for corporate governance because it reduces the incentive for qualified, talented directors to serve. Directors may have concerns, for example, about whether a company's D&O insurance coverage is sufficient to cover them or about the availability of coverage for particular types of claims.ⁿ⁹ In addition, the quality of a company's corporate governance practices can impact its ability to obtain insurance at a reasonable cost. Following the collapse of Enron Corp. and the series of corporate scandals in its wake, one commentator predicted that companies with "corporate governance red flags may face, at best, bigger premium increases or more restrictive coverage terms on renewal."ⁿ¹⁰ Companies looking to obtain or renew D&O insurance coverage should expect that their corporate governance practices will be subject to scrutiny by insurers.ⁿ¹¹ In this regard, areas that insurers look at to assess risk include a company's overall financial circumstances, accounting practices, governance and executive compensation, stock price volatility, Sarbanes-Oxley compliance, internal controls, insider trading and disclosure practices, including processes for complying with Regulation Fair Disclosure.ⁿ¹² Accordingly, transparent, progressive corporate governance practices may yield tangible benefits for corporations seeking to obtain comprehensive and cost effective D&O insurance coverage.ⁿ¹³

[2] The Role of Insurance

The fundamental purpose of D&O insurance is to shift by contract to an independent third party--the insurance carrier--a portion of the risk arising out of actions taken both by the corporation's officers and directors in their official capacity and by the corporation itself in connection with securities law matters. This is done in several ways. First, the standard "Side A" portion of a primary D&O policyⁿ¹⁴ protects insured directors and officers against certain types of losses against which the corporation does not or cannot indemnify them, including losses arising out of conduct against which a corporation may not have authority to indemnify under state corporate law or the federal securities laws. In response to increased concerns about the availability of coverage for nonindemnifiable losses, many corporations have expanded their Side A coverage in recent years by purchasing additional Side A capacity beyond that available under their primary policy.ⁿ¹⁵

There are a number of circumstances in which indemnification may not be available. For example, a director or officer who is determined not to have acted in good faith and in a manner reasonably believed to be in the corporation's best interests is not eligible for indemnification as a matter of state law.ⁿ¹⁶ Depending on the facts, the D&O policy may cover the cost of defense of, as well as the settlement or judgment resulting from, such allegations, even though the corporation could not indemnify the director.

Indemnification may also be unavailable where a corporation has filed for bankruptcy or is financially troubled, or following a change in control if a new board of directors is unwilling to authorize indemnification of outgoing directors and officers. Similarly, indemnification may be limited in derivative suits. Under Delaware law, for example, if a director or officer is found liable to the corporation, indemnification for expenses is permitted only with court

approval,¹⁷ and it is generally thought that indemnification for judgment and settlement amounts is not available¹⁸ because a corporation would not receive the benefit of those amounts if it were then required to pay them out as indemnification.¹⁹

Finally, state and federal laws, as well as a corporation's organizational documents, may limit the corporation's ability to indemnify for public policy reasons. For example, the SEC and the courts have taken the position that corporations may not indemnify their officials against liability for violating the Securities Act of 1933 Act (the "1933 Act") because permitting indemnification would undermine the policy of the securities laws, which seek "to encourage diligence, investigation and compliance with the requirements of the statute by exposing issuers and underwriters to the substantial hazard of liability for compensatory damages."²⁰ Under Regulation S-K, a company registering securities under the 1933 Act must acknowledge the SEC's position by including disclosure in its registration statement indicating that it has been informed that, in the opinion of the SEC, indemnification of directors and officers for violations of the 1933 Act "is against public policy as expressed in the Act and is therefore unenforceable."²¹ Over the years, some courts have expanded this position to prohibit indemnification for claims based on certain violations of the 1934 Act, particularly violations of the antifraud provisions, as contrary to public policy.²² Since antifraud claims require knowing misconduct, this limitation is consistent with the broader public policy limitations applicable to indemnification under most state laws, which prohibit indemnification for such misconduct. Although the SEC historically has permitted insurance, following several high-profile settlements in recent years in which defendants were able to obtain indemnification and/or insurance coverage for civil fines, the SEC adopted a policy of requiring settling parties to forego any rights they have to indemnification, reimbursement through D&O or other insurance, or favorable tax treatment of civil penalties paid to the SEC in SEC enforcement proceedings.²³

In 2003, after Xerox Corporation announced its intention to indemnify several executives in a settlement with the SEC,²⁴ then-SEC Chairman William Donaldson expressed "concern" about "companies that, under permissive state laws, indemnify their officers and directors against disgorgement and penalties ordered in law enforcement actions, including those brought by the [SEC]," saying that it "just isn't good public policy" and is "an area in which [the SEC] may need to consider ways to bring about reform."²⁵ Since then, the SEC has required, as a condition of settlement in enforcement proceedings, that directors and others agree not to seek or accept indemnification, or reimbursement from any source (including D&O insurance), for civil monetary penalties.²⁶ For example, in the SEC's enforcement action against Lucent Technologies Inc. arising out of the improper recognition of over \$1 billion in revenue,²⁷ Lucent and three settling individual defendants agreed not to seek or accept reimbursement or indemnification from any source, including, but not limited to, insurance, with regard to any civil penalties. What was also noteworthy about the *Lucent* proceeding, however, was the SEC's imposition of a \$25 million penalty for Lucent's failure to cooperate that was based in part on Lucent's decision to provide indemnification to certain employees in connection with the settlement, a decision that the SEC viewed as against public policy:²⁸

After reaching an agreement in principle with the staff to settle the case, and without being required to do so by state law or its corporate charter, Lucent expanded the scope of employees that could be indemnified against the consequences of this SEC enforcement action. Such conduct is contrary to the public interest.

In a public statement, an SEC official explained that, in the SEC's view, "Lucent's offer to pick up the legal tab for employees who would not normally be covered by such benefits was equivalent to handing these employees 'a blank check to litigate with us, with no consequences.'"²⁹ Accordingly, under the SEC's current policy, civil penalties assessed against an individual in an SEC enforcement proceeding must be personally paid by the individual. To date, the SEC has not directly addressed whether amounts other than civil penalties, such as insider trading profits disgorged under equitable remedies, may be reimbursed through indemnification or insurance. However, most D&O insurance policies do not cover disgorgement of insider trading profits or of payments to which directors or officers are determined not to have been entitled.³⁰

Finally, it is possible that some violations of the Sarbanes-Oxley Act could result in a director or officer being deemed not to have acted in good faith. This, in turn, could result in those violations not being indemnifiable under state law, although the extent to which some Sarbanes-Oxley violations would be covered under a company's D&O insurance policy remains unclear.ⁿ³¹ For example, indemnification could be unavailable for violations of Sarbanes-Oxley Act provisions relating to:

- improper influence on the conduct of an audit;ⁿ³²
- disgorgement of officer compensation and trading profits following a restatement;ⁿ³³
- false certifications by officers;ⁿ³⁴
- trading during pension fund blackout periods;ⁿ³⁵
- knowingly destroying or falsifying corporate documents;ⁿ³⁶ and
- retaliating against whistleblowers.ⁿ³⁷

Insurance may also be subject to public policy limitations,ⁿ³⁸ although the availability of indemnification varies from state to state and corporation to corporation. For this reason, insurance may provide an alternative source of payment. Nevertheless, D&O insurance policies generally exclude payment for intentional fraud and some D&O policies' standard "Side A" coverage explicitly excludes payment for violation of the federal securities laws. Therefore, to the extent that the company's objective is to protect directors and officers for losses resulting from certain violations of the federal securities laws because it cannot directly indemnify them for such losses, it is important to read the policy exclusions carefully and to understand the extent to which, after the exclusions are taken into account, a D&O policy is really likely to fill any gaps.ⁿ³⁹

D&O insurance can also serve as an important source of protection for the corporation itself. "Side B" of the typical D&O policy compensates a corporation for expenses that it incurs as a result of indemnifying directors and officers and that, in the absence of insurance, would have to be paid out of corporate funds. In addition, beginning in the mid-1990's, there was a broadening of coverage under many policy forms to provide so-called "entity" coverage. Entity coverage protects the corporation from claims--such as securities claims--that are brought directly against the corporation.

The existence of entity coverage has given rise to increasing concern about the continued availability of D&O insurance coverage for directors and officers in the bankruptcy context and the adequacy of coverage amounts available for these individuals because the D&O insurance is shared with the company.ⁿ⁴⁰ At the same time, financial restatements and corporate scandals have heightened awareness of the risk that insurers may seek to deny or rescind coverage. In response to these realities, corporations increasingly are relying on multiple layers of coverage to protect their directors and officers. This coverage typically takes the form of a so-called "Side A tower" of coverage that is in addition to the standard Side A, Side B and entity coverage. It protects directors and officers only and is not shared with the company. Insurers have also begun offering individual director liability insurance policies, which can be purchased either by a corporation or by directors themselves, as well as policies targeted to retired directors and officers.ⁿ⁴¹

[3] Important Features of Insurance Coverage

[a] Structure of a Typical Policy

Although D&O insurance policies vary in their form and language, modern policies typically consist of three possible insuring clauses or insuring agreements that establish the scope of coverage to be provided by the insurer. The first of the insuring clauses, known as "Side A" or "individual side" coverage, provides coverage to officers and directors for

losses they incur that are not indemnified by the corporation.ⁿ⁴² The second of the insuring clauses, known as "Side B" or indemnification coverage, provides coverage to the corporation for losses incurred as a result of paying indemnification to officers and directors. The third clause, which is found in some but not all policies, provides "entity" coverage, which provides insurance to a corporation for claims that are brought directly against it. In public company D&O policies, entity coverage generally is limited to securities claims, while for other types of organizations, such as private companies and nonprofit organizations, it often extends to a broader range of claims against an organization. A typical policy also contains definitions of important terms, exclusions from coverage, and endorsements (a series of agreements in addition to those contained in the body of the main insurance policy that address matters such as additional coverage, exclusions, conditions and adjustments to the premium).

Within the parameters of the insuring clauses described above, D&O insurance policies generally cover "losses" incurred by an insured resulting from "claims" made against the insured arising out of the insured's "wrongful acts."

[b] Claims

D&O insurance policies are "claims-made" policies, which means that they provide coverage only for claims that are first made against the insured director or officer during the policy term. A "claim" refers to a demand by a third party against the insured seeking to hold the insured responsible for the consequences of an allegedly wrongful act. The claim is "made" when the officer or director receives or learns of it. Most policies also require that the insured officers and directors report claims to the insurer within the policy period or within a relatively short period of time (such as 60 days) after the coverage period, although the standard D&O policy also provides for "tail" or extended reporting coverage whereby, for a specified additional premium, the carrier will honor claims reported under the policy for an additional specified period of time.

To avoid potential ambiguities, policies typically contain a definition of "claim," which generally covers civil proceedings, post-indictment criminal proceedings, and administrative proceedings (after receipt or filing of a notice of charges), and monetary or nonmonetary damages or relief for any of these types of proceedings. The definition of "claim" may also include civil, criminal, administrative or regulatory investigations and grand jury proceedings against an insured for a wrongful act, although most D&O insurance policies do not provide coverage for the initial stages of an investigation.ⁿ⁴³ The definition of "claim" can be critical because D&O policies generally do not cover defense costs until a matter ripens into a "claim."

[c] Wrongful Acts

As discussed above, D&O policies provide coverage for losses resulting from claims made against an insured arising out of the insured's "wrongful acts." A "wrongful act" is typically defined to include:

any error, misstatement, misleading statement, act, omission, neglect, or breach of duty committed, attempted, or allegedly committed or attempted, by any Insured Person, individually or otherwise, in his Insured Capacity, or any matter claimed against him solely by reason of his serving in such Insured Capacity.ⁿ⁴⁴

The definition of "wrongful act" can be critical in determining the scope of coverage available under a D&O insurance policy. Some courts have concluded that language defining a "wrongful act" as "any negligent act, error, omission, misstatement or misleading statement" did not extend to cover intentional--as opposed to merely negligent--wrongful acts.ⁿ⁴⁵ In addition, losses resulting from intentional wrongful acts are often specifically excluded from coverage.

Directors and officers frequently act in a number of capacities vis-a-vis a corporation. In addition to being directors or officers, they may be stockholders or they may act as a fiduciaries for benefit plans.ⁿ⁴⁶ The definition of "wrongful act" in D&O policies generally requires, as a condition of coverage, that an individual be acting in the capacity of a director

or officer. Courts have typically taken the position that coverage is not available for claims against directors and officers for wrongful acts that do not relate to their corporate duties.ⁿ⁴⁷ Accordingly, if a director or officer of an insured corporation serves, at the corporation's request, as a director or officer of another corporation that is not a subsidiary of the corporation, the D&O policy of the insured corporation would not cover claims arising out of that service unless such coverage were specifically provided in the policy. Coverage for service at outside entities is commonly provided by endorsement and may be incorporated into the definition of "wrongful act." Other claims that would fall outside the definition of "wrongful act" because an individual is not acting in the capacity as a director or officer include claims arising out of the provision of professional services (such as legal or consulting services) to a corporation and insider trading.

[d] Losses

In order to be eligible for coverage, an insured that is the subject of a claim arising out of a wrongful act must suffer a "loss." Where the insured is an individual, such as a director or officer, a loss is generally defined as any amount for which the insured is legally liable and that arises out of a "claim" made against the insured for a wrongful act. Costs of defense are either included in the definition of loss or provided as a separate element of the coverage. Where the insured is a corporation, under the "Side B" coverage of the D&O insurance policy, a "loss" would include any amount for which the corporation indemnifies directors or officers for their respective wrongful acts, and, if entity coverage is included in the policy, any losses the corporation incurs arising out of claims brought directly against it, as well as the costs of defense. Coverage for "losses," including defense costs, is often predicated on the existence of a "claim," which may or may not include investigations, particularly in their preliminary stages.ⁿ⁴⁸ Such coverage will depend on the wording of the particular policy. In addition, in some D&O policies, the definition of "defense costs" includes fees and expenses incurred in the "investigation, defense and/or appeal" of a "claim," although many other D&O policies include within that definition only fees and expenses incurred in "defending" a "claim." Accordingly, costs incurred in responding to a regulatory investigation (at least in the initial stages) or in conducting an internal investigation may not be covered under a D&O policy, even though these costs may be substantial. Since directors and officers may expect the corporation to cover costs they incur in responding to investigations, corporations should understand the scope of coverage available for investigation costs under a D&O policy and negotiate for the broadest coverage possible in this area.

The definition of "loss" in D&O policies typically incorporates a number of exceptions, the most common of which are for failure to pay taxes,ⁿ⁴⁹ fines and penalties,ⁿ⁵⁰ and other matters deemed uninsurable under the law pursuant to which the policy is construed,ⁿ⁵¹ including punitive damages.ⁿ⁵² As a practical matter, the fact that most claims against directors and officers are either settled or dropped, and thus do not result in judgments, minimizes the impact of the exclusion for punitive damages on director and officer liability. The general theory behind excluding coverage for punitive damages under D&O insurance policies (as well as other types of insurance policies) is that punitive damages--much like fines and penalties--are designed to punish wrongdoers and allowing wrongdoers to shift liability for punitive damages to an insurance company fails to punish them or to deter similar undesirable conduct in the future.ⁿ⁵³ Where the language of an insurance policy does provide coverage for punitive damages--which, as noted above, most D&O policies do not--the relevant inquiry shifts to whether coverage is prohibited on public policy grounds. This is a matter of state law, which means that the availability of insurance depends on the public policy of the state whose law governs the insurance contract.ⁿ⁵⁴

[e] Notice

D&O insurance policies typically specify that insureds must give the insurer notice when they receive a claim or become aware of facts that may result in a claim. The result in *Country Mutual Insurance Co. v. Livorsi Marine, Inc.*ⁿ⁵⁵ highlights the importance of providing insurers with prompt notice of potential and actual claims. In this case, the insurer faced a somewhat unusual situation because two corporations, both of which it insured, had sued each other for trademark infringement, but more than one and a half years passed before either insured tendered notice to the

insurer.ⁿ⁵⁶ The insurer denied coverage to both corporations on the basis of lack of proper notice under the policy. The corporations argued that the failure to notify the insurer had caused it no prejudice since both corporations used the insurer. The insurer argued that failure to notify for over one-and-a-half years was unreasonable as a matter of law, and that the corporations had no justification or other defense as to why they had failed to notify the insurer.ⁿ⁵⁷ The court in *Country Mutual* considered prejudice to the insurer, but noted that this was only one factor among many that required evaluation, including the lack of notice language in the policy, the policyholder's business and insurance sophistication, awareness of events that would be covered and whether the insured exercised diligence in considering whether coverage was available.ⁿ⁵⁸ After weighing these factors, the court found that because the insurer did not receive reasonable notice, the corporations were barred from recovering under the policy, "regardless of whether the lack of reasonable notice prejudiced the insurer."ⁿ⁵⁹

The Texas Supreme Court, however, reached a contrary result in 2009 in *Prodigy Communications Corp. v. Agricultural Excess and Surplus Insurance Co.*, holding that a failure to give notice "as soon as practicable" will not result in a loss of coverage unless the insurer is prejudiced by the failure.ⁿ⁶⁰ The *Prodigy* case involved a D&O insurance policy that contained a notice provision requiring, "as a condition precedent" to the insured's rights under the policy, that the insured give notice of any claim to the insurer "as soon as practicable ... but in no event later than ninety (90) days after the expiration of the Policy Period, or Discovery Period."ⁿ⁶¹ *Prodigy* learned of a claim on June 20, 2002, but did not notify its insurer until nearly a year later (though prior to the expiration of the discovery period), on June 6, 2003. The court analyzed the rationale for requiring notice in a "claims-made" policy, such as a D&O insurance policy, and concluded that requiring notice within the policy period or a specified period of time thereafter was an essential part of the bargained-for exchange between an insurer and its insured, but that requiring notice to be given "as soon as practicable" was not essential.ⁿ⁶² On that basis, the court held that "[i]n a claims-made policy, when an insured notifies its insurer of a claim within the policy term or other reporting period that the policy specifies, the insured's failure to provide notice 'as soon as practicable' will not defeat coverage in the absence of prejudice to the insurer."ⁿ⁶³

To avoid difficulties, an insured should give notice to both its broker and insurer in accordance with the policy terms as soon as practicable after learning of a claim in order to avoid difficulties. Failure to do so may result in coverage questions, a lengthy or expensive trial or worse, in the denial of coverage.

[f] Insurers' Consent to Settlement

D&O insurance policies typically contain a provision requiring the consent of the insurer before an insured enters into a settlement, often coupled with a proviso that consent may not be "unreasonably withheld." In a 2008 case, a court enforced the consent provision in a D&O insurance policy and held that, as a result, The Bear Stearns Companies, Inc. had no coverage under the policy for settlement amounts it agreed to pay without the insurer's prior consent. In *Vigilant Ins. Co. v. Bear Stearns Cos.*, the New York Court of Appeals held that Bear Stearns violated the consent provision in its D&O insurance policy by entering into a settlement with the SEC, in which it agreed to pay \$80 million to resolve an outstanding investigation into alleged analyst conflicts of interest, before notifying its D&O insurer or obtaining the insurer's approval.ⁿ⁶⁴ The Court of Appeals, applying New York law, granted the insurer's motion for summary judgment and held that Bear Stearns could not recover the settlement proceeds from the insurer. Importantly, the court focused on the language of the D&O insurance policy exclusively; it did not require the insurer to demonstrate that it had suffered any prejudice from Bear Stearns' failure to obtain prior consent.

[4] Common Coverage Exclusions

[a] Categories of Exclusions

As discussed above, the defined terms in D&O insurance policies frequently contain exclusions--such as the exclusion for fines and penalties--that can materially affect the scope of coverage under a policy. D&O insurance policies generally also include a list of exclusions that carve out certain acts and types of liabilities from coverage under the

policy. These exclusions, which are discussed below, generally fall into three categories:

- (1) Exclusions pertaining to the conduct of the insured that the insurer has deemed to be uninsurable or inappropriate for coverage.ⁿ⁶⁵ These exclusions constitute what one commentator has referred to as "corporate governance exclusions" because they "have their origin in principles of good corporate governance and, in particular, state statutory law regarding indemnification of directors and officers by the corporation and ... laws exculpating directors and officers from liability in certain circumstances."ⁿ⁶⁶
- (2) Exclusions pertaining to matters that should be covered under other insurance policies.ⁿ⁶⁷
- (3) The "insured versus insured" exclusion.ⁿ⁶⁸

As discussed in more detail below, some of the more common exclusions from coverage may preclude coverage for violations of the Sarbanes-Oxley Act.

[b] Conduct of the Insured

The conduct exclusions in a D&O insurance policy prohibit coverage for acts that the insurance carrier determines are uninsurable or inappropriate for coverage. Conduct exclusions typically carve out coverage for:

- **Criminal or fraudulent acts.** A typical exclusion for criminal or fraudulent acts precludes coverage for claims "brought about or contributed to by the fraudulent, dishonest or criminal acts" of the insured.ⁿ⁶⁹ As with the personal profits exclusion discussed below, much of the conduct covered by this exclusion is conduct for which state corporate law prohibits indemnification and the elimination or limitation of liability. To maximize the scope of coverage and obtain an exclusion that is written as narrowly as possible, corporations should look for two characteristics in a dishonesty exclusion. First, policy language that requires "deliberate" dishonest acts is preferable to broader language that excludes coverage for acts that are merely "dishonest" because a state-of-mind requirement can make it more difficult for an insurer to deny coverage. According to one commentator, the requirement of deliberate dishonesty "implies that the activity was decided upon after examination and reflection, and that the consequences of such deliberate action were weighed and carefully considered."ⁿ⁷⁰

Second, the language of the policy should require a "final adjudication" that establishes the occurrence of a fraudulent or criminal act or a factual record that would support a finding that such an act occurred. This is preferable to language, found in some policies, requiring a showing that a fraudulent or criminal act occurred "in fact" because it precludes an insurer from arguing for application of the exclusion absent a final judgment establishing that misconduct occurred.ⁿ⁷¹ Accordingly, the requirement of a final adjudication affords an officer or director greater protection because an insurer must await the outcome of the underlying claims against the insured before the exclusion attaches. It also means that if an underlying claim is settled without an adjudication regarding the excluded conduct, the exclusion does not apply. Language that is most favorable to the insured would specify that the final adjudication of a fraudulent or criminal act must occur in the context of the underlying claim. This type of language is designed to prevent an insurer from litigating the existence of an insured's fraudulent or criminal act in a subsequent coverage action and attempting to establish, regardless of the outcome in the underlying litigation, that the insured's misconduct precludes coverage under the policy.

The breadth of a typical exclusion for criminal or fraudulent acts could block insurance coverage for violations of several provisions of the Sarbanes-Oxley Act. For example, a finding of liability under Section 303, relating to improper influence on auditors,ⁿ⁷² would mean that an individual had the requisite intent to fraudulently influence, manipulate or mislead the company's outside auditor, which

could constitute deliberate wrongdoing. In addition, a conviction for violating Section 906 of the Sarbanes-Oxley Act,ⁿ⁷³ relating to certifications of financial reports, requires a finding that the convicted officer made his or her certification while "knowing" that the financial report did not meet the requirements of Section 906.

- **Short-swing profits.** The exclusion for short-swing profits precludes coverage for the return of short-swing profits paid in violation of Section 16(b) of the 1934 Act.ⁿ⁷⁴

- **Personal profits and illegal remuneration.** The "personal profits" exclusion precludes coverage for claims that arise where an insured gains a personal profit or advantage to which the insured was not legally entitled, and for the return of remuneration or compensation that is paid to an insured in violation of the law. Because the exclusion often applies to claims relating to self-dealing and conflicts of interest, much of the conduct that falls within the personal profits exclusion is conduct for which state corporate law prohibits indemnification and the elimination or limitation of liability under exculpatory charter provisions. The language of the exclusion should be drafted to provide that it is triggered only where there is a "final adjudication" that a director or officer has gained an improper personal profit. As discussed above in connection with the exclusion for criminal or fraudulent acts, this is preferable to the "in fact" language found in some policies because it precludes an insurer from arguing for application of the exclusion in the absence of a final judgment establishing that an insured gained an improper personal profit, and therefore affords greater protection to insureds. The personal profits exclusion could be relevant if the chief executive officer or chief financial officer must disgorge a bonus under Section 304 of the Sarbanes-Oxley Actⁿ⁷⁵ following a restatement, or if a director or officer were found liable for trading during a pension fund blackout period under Section 306 of the Sarbanes-Oxley Act.ⁿ⁷⁶

In a 2004 case involving the application of the personal profits exclusion in a D & O insurance policy, the Court of Appeals for the Fifth Circuit affirmed a lower court holding that the exclusion barred coverage for all of a company's directors and officers based on the conduct of a single individual who was found to have gained an improper personal profit.ⁿ⁷⁷ *TIG Specialty Insurance Co. v. PinkMonkey.com Inc.* involved a jury verdict against Patrick Greene, the Chairman, Chief Executive Officer and majority stockholder of PinkMonkey.com, an internet start-up company, for statutory stock fraud under Texas law in connection with the sale of the company's stock. PinkMonkey.com's D&O insurance policy contained an exclusion from coverage for any claim based on "an Insured having gained in fact any personal profit, remuneration, or advantage to which such Insured was not legally entitled."ⁿ⁷⁸ After concluding that the personal profits exclusion barred coverage for Greene,ⁿ⁷⁹ the three-judge panel of the Fifth Circuit ruled two to one that the exclusion also precluded coverage for PinkMonkey.com's other directors and officers, even though they did not obtain an improper personal profit.ⁿ⁸⁰ The court held that, under the plain language of the policy, "a claim arising out of an Insured having gained a personal profit is not limited to a claim against the Insured who profited."ⁿ⁸¹ According to the court, because the claims against PinkMonkey.com's other directors and officers were based upon Greene having gained a profit to which he was not legally entitled, the exclusion barred coverage for them as well.ⁿ⁸²

The result in the *TIG Specialty* case highlights another important attribute of a D&O insurance policy: severability. Although the policy in *TIG Specialty* apparently did not contain severability language, this language is essential where one or more directors or officers covered under a D&O insurance policy is accused of deliberate fraudulent or dishonest conduct but other officers and directors were unaware of the conduct. A "severability of exclusions" clause provides that the wrongful acts of one insured may not be imputed to other insureds, which can prevent a denial of coverage with respect to innocent insureds based on the wrongful acts of others covered by the policy. Strong severability language also is critical in preventing rescission of a policy based on misrepresentations made by some but not all of the

insureds.n83

Along the same lines of the personal profit exclusion, a number of courts have held that insurers have good grounds to deny coverage in situations where a corporation is sued either for restitution or for disgorgement of ill-gotten gains. The reason for precluding coverage in such cases is that an insurer should not have to pay when the insured wrongfully obtains assets or funds and has to return those assets or funds to their rightful owner. The availability of D&O insurance coverage for "ill-gotten gains" has arisen with increasing frequency in recent years in the context of lawsuits alleging violations of Section 11 of the 1933 Act. Section 11 applies to public offerings and other underwritings of securities and imposes strict liability on companies for material misrepresentations and omissions in offering documents. Section 11 claims typically involve a public securities offering in which the company issuing the securities is accused of making false statements in the registration statement, thus obtaining for itself the proceeds of the offering to the detriment of investors. For instance, in *Level 3 Communications, Inc. v. Federal Insurance Co.*, the U.S. Court of Appeals for the Seventh Circuit held that a claim for securities fraud did not properly constitute a "loss" under the terms of a D&O insurance policy because the plaintiffs were essentially seeking restitution of ill-gotten gains.n84 The underlying claim for securities fraud against Level 3 was that former stockholders of Level 3's predecessor had sold their shares back to the company for less than they were worth because Level 3's predecessor had withheld material information from the former stockholders.n85 The Seventh Circuit agreed with the insurer's characterization of the lawsuit that "[i]t's as if ... Level 3 had stolen cash from the [former stockholders] and had been forced to return it and were now asking the insurance company to pick up the tab."n86 The court distinguished a claim for restitution from a securities fraud claim where the defendant did not directly benefit from the fraud.n87

In the wake of the Seventh Circuit decision in *Level 3*, an Indiana state court issued a decision that has become a source of controversy on the issue of coverage for Section 11 claims under the 1933 Act. In *Conseco, Inc. v. National Union Fire Insurance Co.*,n88 the state court held that under Indiana law, public policy would bar coverage for a Section 11 claim. The *Conseco* analysis hinged on the definition of "loss" in the company's D&O insurance policies, which provided that loss shall not include "matters which may be deemed uninsurable under the law pursuant to which this policy shall be construed."n89 Thus, if a Section 11 claim were to be deemed uninsurable under some state's law, the policy definition of loss would exclude the claim from coverage. In *Conseco*, the court viewed a Section 11 claim as inherently restitutionary in nature--if successful, the plaintiff essentially forces the company to give the public offering proceeds back. As such, coverage for the claim ran afoul of Indiana public policy, which barred insurance for payments that are restitutionary in nature.

In two subsequent cases after *Conseco*, courts split on the issue of whether the traditional definition of "loss" precludes coverage for Section 11 claims. In March 2007, the Middle District of Florida held that a settlement paid by the insured in a disgorgement case under Section 11 was not a defined "loss" under the D&O policy, and that two insurers who denied coverage were within their rights in doing so.n90 The insurers denied coverage after the insured corporation, CNL Hotels & Resorts, settled two class action suits related to improper accounting included in a combined proxy statement/prospectus filed using a Form S-4 under which stockholder approval was obtained for a material acquisition. The class actions sought to nullify the stockholder approval and to obtain an injunction to prevent the consummation of a related underwritten offering later postponed by CNL. In the settlement, CNL agreed to establish a \$35 million fund that would be used to pay the Section 11 claims, but it did not admit wrongdoing in connection with the claims in the class action.n91 The insurers, however, took the position that the settlement fund was a type of disgorgement related to the Section 11 violations and not an actual "loss," and on that basis, the insurers were entitled to deny coverage. Applying New York law, the court agreed, finding that the payout in and of itself was not an insurable loss because an insured "may not insure itself against the risk of having to return money that it has obtained improperly."n92 The Eleventh Circuit affirmed the decision of the lower court in August 2008.n93

In contrast, in a decision in December 2007, a state court in North Carolina concluded that certain Section 11 claims involved in the WorldCom litigation were covered under a D&O insurance policy.n94 *Bank of America Corp. v. SR International Business Insurance* involved Section 11 claims made against Bank of America as an underwriter of two

public bond offerings. The court distinguished the *Level 3* and *CNL* cases on the basis that, in those cases, the plaintiffs sought recovery from the issuers of the securities, who had allegedly received "ill-gotten gains" as a result of their own officers' misconduct.ⁿ⁹⁵ In contrast, the court observed that Bank of America was not the issuer of the bonds that gave rise to the lawsuit and did not receive the proceeds of the bond offering. Therefore, the court concluded, the damages sought in the lawsuit were not restitutionary in nature.ⁿ⁹⁶

The results in *Conseco*, *CNL* and other similar cases have disrupted settled expectations in the D&O insurance industry, which traditionally had understood that D&O insurance policies would, and should, cover Section 11 claims. In this regard, it is important to note that Section 11 imposes strict liability, and that companies often make the judgment to settle claims as an alternative to protracted expensive litigation. Accordingly, a company that agrees to settle a Section 11 claim has not necessarily engaged in conduct that resulted in the receipt of "ill-gotten gains." In this respect, Section 11 claims are precisely the types of claims for which companies buy insurance. In response to concerns about the results in these cases, several major D&O insurers now offer a "public offering endorsement" to their policies in which they agree not to assert that losses resulting from the settlement of Section 11 claims are uninsurable under their policies. At least one large insurer offers an expanded version of this endorsement that applies to judgments as well as settlements.

[c] Matters Covered Under Other Insurance Policies

A second category of exclusions in a typical D&O insurance policy covers matters that should be insured under other types of policies. These exclusions generally address:

- **"Bodily injury."** Claims for bodily injury, sickness, disease, or death of any person, and claims for damage to, or destruction or loss of any tangible property are typically excluded from coverage under a D&O insurance policy because they are covered by a comprehensive or commercial general liability insurance policy.
- **Violations of the Employee Retirement Income Security Act of 1974.** Claims against fiduciaries for violations of the Employee Retirement Income Security Act of 1974 are typically excluded from coverage under a D&O insurance policy because they are often covered by a fiduciary liability policy.
- **Environmental liabilities.** Claims arising out of pollution conditions are typically excluded from coverage under a D&O insurance policy under the so-called pollution exclusion because they are often covered under a comprehensive or commercial general liability policy.ⁿ⁹⁷ Alternatively, they may be covered by a separate pollution liability or environmental impairment policy.
- **Earlier D&O policies.** Claims to which an earlier D&O insurance policy was applicable are generally excluded from coverage.
- **Pending and prior litigation.** Claims arising out of litigation that was pending as of, or completed prior to, the inception date of the D&O insurance policy are generally excluded from coverage, although the exclusion is not strictly limited to pending and prior "litigation." Typically, it covers any claims under the policy arising out of litigation, claims, demands, arbitrations, decrees or judgments occurring prior to or pending as of the inception date of the policy that were known to the corporation or its directors and officers. Claims arising out of future litigation that is based on or derived from substantially the same facts that gave rise to the earlier litigation are generally also excluded.
- **Claims insured under other policies.** D&O insurance policies also typically contain an exclusion for any claims that are insured against by any other policies (except to the extent those policies are specifically written as excess insurance over the coverage provided by the D&O insurance policy). The effect of this exclusion is to make the D&O policy excess over other insurance policies that may apply to

a given claim.

[d] Insured versus Insured Exclusion

Another exclusion commonly seen in D&O insurance policies is the "insured versus insured" exclusion. Consistent with the underwriting philosophy behind a D&O insurance policy, which is to provide coverage brought for claims brought by third parties, the "insured versus insured" exclusion generally precludes coverage for losses arising out of claims against a director or officer by another director or officer or by the corporation. The purpose of the exclusion is to prevent corporations from cashing in on their D&O policies by suing officers and directors. In addition, where there are insureds on both sides of a claim, there is the potential for collusion and a reduced incentive to cooperate with the insurer and mount a vigorous defense. In most policies, the exclusion contains an important carve-out for stockholder derivative suits, which, in the absence of appropriate qualifying language, would fall within the scope of the exclusion because they are brought in the name of the corporation.

When a policy uses an expanded definition of "insured," a number of questions may arise as to the applicability of the insured versus insured exclusion. One of these questions is whether an insurer can use the insured versus insured exclusion to deny coverage if former officers and directors file a lawsuit against the corporation. In at least one court's 2006 opinion, the answer to that question was "no." In *MegAvail, Inc. v. Illinois Union Ins. Co.*,⁹⁸ two former officers and directors of a corporation joined forces with four other stockholders to file a derivative action against certain current officers and directors alleging breach of fiduciary duty and misappropriation of corporate opportunities.⁹⁹ The insurer denied coverage, taking the position that the suit fell under the insured versus insured exclusion, which defined former officers and directors as "insureds."¹⁰⁰ The Court disagreed, however, holding that the action was not collusive and that the former officers and directors had acted independently. Furthermore, the allegations in the suit fell within those covered under the policy and thus the insurer was bound to provide coverage.¹⁰¹ To address the subject of suits by former officers and directors, it is fairly common for insured versus exclusions to contain an exception that preserves coverage for suits brought by former officers and directors of a corporation who have not served in that capacity for a specified period of time (such as three to four years) before a claim is filed.

Another area that implicates the insured versus insured exclusion is whistleblower claims, which have become more of a focus post Sarbanes-Oxley. In circumstances where whistleblowers are officers, coverage for whistleblowers' claims would otherwise be precluded under a traditional insured versus insured exclusion. Insurers are addressing this by providing exceptions to the exclusion for claims by one insured (such as an officer) against another insured (such as the corporation or another officer or director) to provide coverage for whistleblower claims.

The insured versus insured exclusion also is relevant in the bankruptcy context, where suits are often brought by a corporate debtor against the bankrupt corporation's directors and officers. Insurers have sought to exclude coverage in such suits by arguing that the bankruptcy trustee, who brings the suits, has simply stepped into the shoes of the corporation. Courts have reached differing results on this issue.¹⁰² A number of courts have rejected this argument on the grounds that a bankruptcy trustee is an entity separate and distinct from the corporate debtor and that the purpose of the exclusion--which is to prevent collusive lawsuits by corporate insiders--does not apply in the context of claims brought by a trustee against a debtor corporation's directors and officers because the trustee is asserting those claims on behalf of creditors. Accordingly, unlike the debtor corporation, the trustee is truly adverse to the debtor corporation's directors and officers and there is no danger of collusion.¹⁰³

On the other hand, some courts have concluded that the insured versus insured exclusion bars coverage for claims brought by a bankruptcy trustee, reasoning that there is no legal distinction between the trustee and the debtor corporation and that, as a result, any claims brought by the trustee are brought on behalf of the company.¹⁰⁴

In recent years, it has become standard for the insured versus insured exclusion in a D&O insurance policy to carve out claims brought by a bankruptcy trustee, receiver, debtor-in-possession or equivalent, so that coverage for these claims is

available. Regardless of the financial health of a corporation, at the time it obtains a D&O insurance policy, it is critical that the insured versus insured exclusion in the policy contain a well-drafted bankruptcy carve-out.

[5] Severability and Rescission

When a D&O insurance policy is issued or renewed, it is typically preceded by an underwriting process in which the company submits information to the insurer for the purposes of assessing the risk of insuring the company. This information includes details about the company's financial and operational performance. In most cases, a written application is required. The D&O insurance policy typically contains a clause in which the insurer incorporates all of the company's public statements into the policy application, including statements that the company has made in its periodic filings with the SEC, going back for a specified period, such as 12 months. The policy also will contain a provision that, in one form or another, states that the policy is being issued or renewed in reliance upon the information transmitted or incorporated by reference into the application, and that if there are any materially false statements or omissions in the application, the policy can be voided. In securities cases, the truth of the company's public statements is typically at issue, particularly in cases involving restatements of financial statements, where plaintiffs often argue that a restatement, by definition, rendered the company's prior SEC filings false. In these types of cases, insurers have sought to rescind policies on the grounds that the policies were induced by misstatements of material fact in the application for coverage. If successful, rescission renders a policy void *ab initio*, and it is as if coverage never existed.

Insurers have become increasingly aggressive in their efforts at rescission, as evidenced by the insurers for Enron Corp., WorldCom, Inc., Tyco International Ltd, Adelphia Communications Corporation, HealthSouth Corporation, and other companies that have faced financial scandals. Where an insurer attempts to rescind a D&O insurance policy, the existence of a "severability of the application" clause in the policy can be critical to preserving coverage.ⁿ¹⁰⁵ In the absence of such a clause, innocent directors and officers may lose coverage, and a company may be forced to use corporate funds (rather than relying on insurance) to pay defense and other costs associated with legal proceedings, as was the case with Homestore, Inc. As the protracted legal proceeding over former Homestore officer Peter Tafeen's right to advancement of expenses was drawing to a close,ⁿ¹⁰⁶ two courts issued rulings permitting rescission of Homestore's D&O insurance policies based on misrepresentations about Homestore's financial condition contained in the company's applications for D&O insurance coverage.ⁿ¹⁰⁷ The policy language provided that the policies would be void in their entirety if misrepresentations were known by "one or more of the individuals who signed" the applications for coverage. Based on this language, the courts permitted rescission of the policies as to all of Homestore's directors and officers as a result of misrepresentations known to Homestore's CFO, who signed the applications. The Ninth Circuit also rejected the argument that the public policy of California (whose law governed the policies) prevented rescission as to "innocent" directors and officers who had no knowledge of the misrepresentations because of the "unambiguous language" of the policy coupled with California's Insurance Code, which mandates that the right to rescind applies to all insureds unless the policy provides otherwise.ⁿ¹⁰⁸

A "severability of the application" clause, as its name suggests, creates a legal and contractual basis to distinguish between various individuals' knowledge at the time a D&O insurance policy was issued or renewed, and to limit the categories of people whose knowledge may allow the insurer to void the policy due to an allegedly misleading application. The effect of such a clause is that an insurer cannot rescind coverage for one insured based on misrepresentations made by other insureds in the application for coverage.

Rescission is governed by state common law, and sometimes by statute, and the elements required to support a claim for rescission vary from state to state.ⁿ¹⁰⁹ Most states permit insurers to rescind a policy if the insured made a material misrepresentation and the insurer relied on the misrepresentation in issuing the policy.ⁿ¹¹⁰ Only a minority of states imposes the additional requirement that the insured have had knowledge that a misrepresentation was false or have intended to deceive the insurer.ⁿ¹¹¹ Accordingly, under the laws of most states, it could be argued that a severability provision barring imputation of knowledge is irrelevant, because knowledge of the insured is not an element of a rescission claim, and therefore, knowledge (and imputation of knowledge) are irrelevant. However, courts increasingly

are treating state law requirements as minimum protections that must be afforded to insureds, while allowing the negotiation of more favorable protections--in the form of severability language--than that provided under applicable state law.¹¹² Accordingly, courts are enforcing severability clauses, and denying insurers' claims for rescission, even where knowledge of a misrepresentation or an intent to deceive is not required under state law in order for an insurer to rescind a policy.¹¹³

Severability clauses can vary greatly from one D&O insurance policy to the next, and may take the form of "partial" or "full" severability. Severability language that does not allow an insurer to impute the misrepresentations of one insured to other insureds generally is thought to provide the greatest protection against rescission and often is referred to as "full" severability.¹¹⁴ A typical full severability clause states that the application for insurance coverage:¹¹⁵

will be construed as a separate application for coverage by each individual insured and that the knowledge of one individual insured will not be imputed to any other individual insured for purposes of determining if coverage is available.

If the policy includes entity coverage, the full severability language may also state that only the knowledge of certain executive officers is imputed to the company for purposes of determining coverage.

Courts generally have interpreted full severability language as limiting an insurer's right to rescind coverage to those individuals who made knowing misrepresentations in the application for coverage or otherwise had knowledge of underlying fraud. For example, in a rescission action brought by insurers of HealthSouth Corporation, the court concluded that a full severability clause in HealthSouth's D&O insurance policies required proof of knowing misrepresentations personally made by each insured for which the insurers sought to void coverage.¹¹⁶ The insurers claimed that HealthSouth had used materially false and misleading financial information to procure insurance coverage, and that the policies were therefore void *ab initio*. The court, applying Alabama law, held that the insurers did not have the right to rescind the policies.¹¹⁷ The court stated that even though the applicable state statute permitted insurers to void coverage on account of innocent but otherwise material misrepresentations, the "full" severability language modified the statutory protection and "unambiguously provide[d] that the rights of each insured as to coverage will be separately determined."¹¹⁸

In contrast to full severability language, more limited "partial" severability language generally imputes the knowledge of the individuals who signed the application for coverage to all insureds. A typical partial severability clause provides that:¹¹⁹

no knowledge or information possessed by any individual insured will be imputed to any other individual insured except for material facts or information known to the persons who signed the application.

As the language of this clause illustrates, partial severability language does not protect even innocent insureds in circumstances where an individual signing the application for insurance coverage has knowledge of wrongdoing. The case of *Cutter & Buck, Inc. v. Genesis Insurance Company* illustrates circumstances in which innocent directors and officers lost their coverage entirely due to the limitations of partial severability language in the company's D&O policy.¹²⁰ In *Cutter & Buck*, the court, applying Washington law, permitted complete rescission of Cutter & Buck's D&O insurance policy as to all of the company's insured directors and officers. The policy contained a poorly drafted partial severability clause that precluded the imputation of knowledge possessed by one insured to other insureds except in the case of "material information known to the person or persons who signed the Application."¹²¹ The company's CFO knew that the financial statements, which were part of the application for coverage, contained false information. Because the CFO signed the application, his knowledge was imputed to all the other insureds, and the court held that the insurer had the right to rescind coverage.¹²² As a result, the company's remaining directors and officers were left entirely without coverage.

One development in the rescission area that is favorable to directors and officers is reflected in several cases limiting an insurer's unilateral right to rescind D&O insurance policies. Traditionally, insurers have assumed, based on contract law, that they have a unilateral right to rescind a policy by returning premium payments to an insured. However, in cases involving Tyco International Ltd. and Adelphia Communications Corporation, two courts have held that, until a rescission claim is litigated in favor of an insurer and there is a judicial declaration that a policy is void *ab initio*, coverage remains in effect.ⁿ¹²³ In *Tyco*, the company's former Chairman and CEO, L. Dennis Kozlowski, was a defendant in more than 30 civil lawsuits and criminal proceedings alleging misconduct in his capacity as a Tyco officer. When Kozlowski notified Tyco's insurer of the lawsuits and demanded that the insurer either provide him with a defense or pay his defense costs, the insurer unilaterally rescinded the policies and returned Tyco's premiums on the ground that Kozlowski had misrepresented material information about Tyco's finances and other matters in the applications for insurance. The insurer sought a declaration confirming that the policies were rescinded and void *ab initio*. Kozlowski sought a declaration that the insurer had a duty to defend him or pay his defense costs in several of the lawsuits. In the absence of significant New York case law on the subject, the Supreme Court of New York looked to rulings from other jurisdictions holding that "an insurer's present duty to defend under a liability policy is unaffected by an unproven claim for rescission."ⁿ¹²⁴ Based on this, the court held that until the insurer's rescission claims were litigated in its favor and the policies were declared void *ab initio*, the policies remained in effect and bound the parties.ⁿ¹²⁵ The court went on to conclude, however, that if the insurer ultimately prevailed in its rescission action and the policies were declared void, the insurer might recover the defense costs it had provided Kozlowski.ⁿ¹²⁶

Similarly, in a proceeding involving former directors and officers of Adelphia Communications Corporation, the U.S. District Court for the Eastern District of Pennsylvania held that, in the absence of rescission, Adelphia's insurers were obligated to advance defense costs.ⁿ¹²⁷ In *Associated Electric & Gas Insurance Services, Ltd. v. Rigas*, Adelphia's insurers argued that they had no obligation to advance defense costs to five former directors and officers of Adelphia because the insurers had rescinded the policies on the ground that the policies had been procured by fraud. Adelphia's primary D&O insurance policy, which was the focus of the case, was silent on the issue of rescission. The insureds argued that the insurers had no unilateral right to rescind the policy without an adjudication that rescission was proper because a unilateral right of rescission would result in an unconscionable contract. Accordingly, the insureds argued, until an adjudication occurred, the insurers were obligated to advance the insureds' defense costs.

The procedural posture in the *Adelphia* case was somewhat unusual because the automatic stay imposed under *Section 362 of the U.S. Bankruptcy Code*ⁿ¹²⁸ in Adelphia's bankruptcy proceedings precluded the Pennsylvania district court from making a determination on the issue of rescission.ⁿ¹²⁹ In addition, the insurers had not completed the unilateral rescission because, in their view, the automatic stay prevented them from returning the insurance premiums.ⁿ¹³⁰ However, the court nevertheless considered the issue of rescission, and, citing the *Tyco* decision, concluded that "because a contract is in effect until the issue of rescission is adjudicated, an insurer is bound by the obligations in that contract to advance defense costs until the contract is found to be rescinded."ⁿ¹³¹ The court went on to consider whether the language of the policy required the insurers to advance defense costs, and concluded that it did.ⁿ¹³² In reaching this conclusion, the court noted that it was influenced by public policy considerations, including the presumption of innocence to which directors and officers are entitled.ⁿ¹³³

The subject of severability also arises in the context of the conduct exclusions in D&O insurance policies. These exclusions typically preclude coverage for criminal or fraudulent acts, as well as short-swing profits paid in violation of Section 16(b) of the 1934 Act, and personal profits or remuneration to which an insured was not legally entitled.ⁿ¹³⁴ A "severability of the exclusions" clause typically states that "[t]he Wrongful Act of an Insured shall not be imputed to any other Insured for the purpose of determining the applicability of" the conduct exclusions in the policy. Such a clause is intended to prevent an insurer from denying coverage to innocent insureds based on misconduct committed by another insured.

Securing appropriate severability language to safeguard against both denials of coverage and rescission is critical. It is

of greatest importance with respect to a company's primary policy, because this policy provides the first line of defense to a company's directors and officers. However, severability language also is important in excess policies, because these policies will provide coverage if the primary policy is exhausted or unavailable.ⁿ¹³⁵ An excess policy may not always contain the same severability protections as the primary policy, and it is important to examine the language of the excess policy on this point.ⁿ¹³⁶ A Side A excess policy (that is, a policy that covers only the company's directors and officers) that specifically provides that it is nonrescindable also can protect against rescission.ⁿ¹³⁷

A 2009 case involving D&O insurance coverage issued to Refco Inc. illustrates the distinction between the two types of severability language discussed above--"severability of the application" and "severability of the exclusions" clauses--as well the interplay between the severability language in primary and excess D&O insurance policies. The policies at issue in *XL Specialty Insurance Co. v. John D. Agoglia* ⁿ¹³⁸ were issued to Refco in connection with its 2005 initial public offering. Two months after the offering, Refco announced that it had been carrying an undisclosed \$430 million receivable from an entity controlled by its CEO. The receivable had been hidden from Refco's auditors for years through fraudulent loan transactions. Following the announcement, Refco's stock plummeted, and the company later filed for bankruptcy. In the wake of these events, the CEO pled guilty to criminal charges relating to his participation in the fraudulent scheme to conceal the receivable, and the company's directors and officers became the targets of extensive litigation, for which they sought coverage under Refco's D&O insurance policies. Like many other public companies, Refco had a D&O insurance program that consisted of a primary policy and several excess policies. In *XL Specialty*, three of Refco's excess insurers moved for summary judgment seeking a declaration that they were not obligated to provide coverage to Refco's directors and officers under "prior knowledge" exclusions in the D&O insurance policies on the grounds that the CEO had knowledge of the undisclosed receivable at the time the policies were issued. A prior knowledge exclusion typically bars coverage for claims arising out of acts, errors or omissions committed prior to the inception of the insurance policy if the insured knew or should have known such an act, error or omission could result in a claim. The court granted summary judgment to the third and fourth excess insurers and denied summary judgment to the fifth level excess insurer.

The third and fourth excess policies issued to Refco were "follow-form" policies, meaning that they provided coverage on the same terms and conditions as the primary policy, except to the extent that they contained limitations or restrictions beyond those in the primary policy. The primary policy contained a "severability of the exclusions" clause stating that:ⁿ¹³⁹

For purposes of determining the application of the above EXCLUSIONS, no Wrongful Act of any Insured Person will be imputed to any other Insured Person who did not have actual knowledge of, or directly participate in the commission of, such Wrongful Act.

The court concluded that this provision did not apply to the excess policies because it applied only to the "above" exclusions--that is, the exclusions in the primary policy.ⁿ¹⁴⁰ The primary policy also contained a provision titled "Full Severability," which stated in part that:ⁿ¹⁴¹

No knowledge or information possessed by any Insured will be imputed to any other Insured. If any of the particulars or statements in the Application is untrue, this Policy will be void with respect to any Insured who knew of such untruth.

The insureds argued that this provision was not simply a "severability of the application clause," but rather, that it operated more broadly as a general non-imputation clause to prevent denials of coverage to innocent insureds.ⁿ¹⁴² The third and fourth excess policies themselves also contained a prior knowledge exclusion stating that the insurer would not be liable for losses in connection with a claim arising out of facts or circumstances as to which *any insured* had knowledge or information.ⁿ¹⁴³ The court found that it was irrelevant whether the "Full Severability" provision in the primary policy applied more broadly because it was superseded by the prior knowledge exclusions in the third and fourth excess policies. Therefore, the court held that the prior knowledge exclusions precluded coverage for all insureds

because of the CEO's prior knowledge of the undisclosed receivable.

The fifth excess policy issued to Refco was not a "follow-form" policy and included both a severability clause and a prior knowledge exclusion. The severability clause looked like a traditional "severability of the application clause," but stated, without limiting the statement to the insurance application, that:¹⁴⁴

No knowledge or information possessed by any Insured Person will be imputed to any other Insured Person for the purposes of determining the availability of cover-age with respect to Claims made against any other Insured Person.

The prior knowledge exclusion included in the fifth excess policy stated that no coverage would be available under the policy for claims arising from any fact, circumstance or situation as to which *any insured* had knowledge.¹⁴⁵ The court held that because both the severability clause and the prior knowledge exclusion were in the same policy, the prior knowledge exclusion did not automatically supersede the severability clause and the insurer had not met its burden of showing that the severability clause was limited to statements contained in the insurance application. As a result, summary judgment was not appropriate because if the severability clause were found to operate more broadly, the insurer would not be able to deny coverage to all insureds on the basis of the CEO's prior knowledge of the undisclosed receivable.¹⁴⁶

[6] Entity Coverage

Entity coverage provides insurance to a corporation for claims that are brought directly against it. In this regard, it represents an expansion of traditional D&O insurance, which historically focused on protecting the personal assets of a corporation's directors and officers, rather than the corporation itself. Entity coverage emerged in the mid-1990s as a solution to the problem of allocation in securities lawsuits. Prior to the existence of entity coverage, it was common for insurers and corporations to negotiate a division between the losses that the D&O policy would cover and the losses that would be allocated to the corporation--which was not insured under the policy--for its own liabilities. This led to gaps in coverage and disputes about allocation. Entity coverage was intended to eliminate these difficulties and to align the interests of insurers, and corporations and their directors and officers, in defending litigation. Although entity coverage did eliminate the issues raised by allocation, it also had the negative effect of diluting the coverage afforded to directors and officers. Where a D&O insurance policy has shared liability limits applicable to both the company and its directors and officers, directors and officers face the risk that policy limits will be eroded or exhausted by payment of the company's claims.

In the wake of Enron Corp.'s collapse and the exposure of major accounting and financial irregularities at other large U.S. public companies, one issue that has arisen with increasing frequency is the effect of entity coverage on a D&O insurance policy once a corporation files for bankruptcy. D&O insurance takes on an increased importance in bankruptcy because a corporate debtor may be unable or unwilling to pay judgments, settlements and costs of defense incurred by the debtor's directors and officers. Where a corporation is itself an insured under a D&O policy because of the existence of entity coverage, there is a possibility that the proceeds of the entire policy may be deemed an asset of the bankruptcy estate.¹⁴⁷ This, in turn, means that policy proceeds that could otherwise be paid to directors and officers--who are also insureds under the policy--may not be available.¹⁴⁸

For example, in a 2005 proceeding involving a primary D&O insurance policy, a bankruptcy court concluded that, due to the presence of entity coverage, the debtor corporation had a limited right to a portion of the policy proceeds. In *National Century Financial Corporation v. Gulf Insurance Company, Inc.*,¹⁴⁹ National Century, the debtor corporation, argued that the court should allocate the proceeds of the policy proportionally according to the amount of the losses, which would have resulted in National Century taking almost all of the proceeds. National Century's directors and officers argued that the debtor's claims should be subordinated. The policy had no "priority of payments" provision or other language addressing allocation. After noting that, without subordination, the debtor would take "the

mammoth portion" of the policy proceeds and that this would not serve the underlying reason for the issuance of D&O insurance policies, the court partially subordinated the debtor's claims against the Side B and entity coverage under the policy, awarding the directors and officers 70% of the proceeds and the debtor corporation the remaining 30%. The court did not explain how it arrived at this allocation, except to state that this was a "proper balance." In allocating the 70% of the policy proceeds among the seven directors and officers, the court noted that the weight of authority supported a pro rata allocation (which would give each individual the same percentage of his or her defense costs), but concluded that a per capita approach would be more equitable. Given the limited funds available under the policy, the fact that the expenses incurred would far exceed the available proceeds, and the wide range of expenses incurred by the directors and officers, the court concluded that equity dictated giving each individual an equal amount. The end result of the court's decision was that, of a \$5 million policy, the debtor corporation received \$1.5 million, while each individual director and officer received \$500,000.

Many courts distinguish between an insurance policy and its proceeds when deciding whether the policy is estate property. When considering other types of insurance policies, such as a general liability or fire protection policy, the general result is that if a policy is property of the estate, then its proceeds also belong to the estate.¹⁵⁰ Yet courts have recognized that this general rule is inappropriate for D&O insurance policies, because D&O insurance policies differ fundamentally from other types of liability insurance. First, the company often is not the direct beneficiary.¹⁵¹ In most cases, the debtor corporation has purchased the policy for the benefit of its directors and officers, not for the benefit or protection of the corporation itself.¹⁵² Also, the proceeds from Side A and Side B coverage do not ultimately inure to the benefit of the company, but to its officers and directors.¹⁵³ As a result of the structural differences between D&O and general liability insurance policies, courts have created a distinction between ownership of the D&O insurance policy and ownership of its proceeds. Numerous courts have held that D&O policies themselves--in contrast to their proceeds--are property of the bankruptcy estate, especially policies that combine coverage for individual directors and officers with Side B (indemnification) and entity coverage.¹⁵⁴ Entity coverage, by contrast, is written for the protection and benefit of the corporation, not its directors and officers. Courts have reached differing results on the issue of whether policy proceeds are assets of the estate,¹⁵⁵ and a number of courts have concluded that this issue must be examined based on the facts of the particular case.¹⁵⁶ Courts that have conducted a fact-specific analysis have generally weighed the expected needs of directors and officers to access insurance policy proceeds to fund their defense costs against the interests of the corporate debtor, which may need the entity coverage for its own liabilities, or may seek reimbursement under the policy for indemnification to its directors and officers. A proceeding involving Adelphia Communications Corporation involved requests by certain directors and former employees of the company who sought relief from the automatic stay under *Section 362 of the U.S. Bankruptcy Code*¹⁵⁷ to make claims against the company's D&O policy insurers for costs of defense in a variety of civil lawsuits. One of the corporate debtors was a former Adelphia subsidiary that had insurance under policies purchased by Adelphia before the subsidiary was spun off. Although there was no litigation pending against the subsidiary's directors and officers, the subsidiary had been unable to obtain insurance from other carriers and sought to rely on those policies on a going-forward basis. Because the policies were subject to an aggregate limit, any sums paid out if the stay were lifted would reduce the amounts available under the policies.

The bankruptcy court concluded that the policy proceeds were property of the estate and that a motion for relief from the automatic stay was necessary to access those proceeds.¹⁵⁸ In reaching this conclusion, the bankruptcy court accorded weight to the importance of D&O insurance policies in encouraging corporate officials to serve and expressed concern that allowing insureds to lay claim to policy proceeds could hamper a corporation's ability to reorganize following bankruptcy by compromising its ability to attract qualified directors and officers:¹⁵⁹

by reason of the need to secure independent directors and officers who are willing to serve, and their legitimate desire to have D&O policy protection when continuing to serve, simply *having* a D&O policy is an important need of any company wishing to reorganize ... and ... the unfettered resort to policy proceeds by some insureds under the policies could result, as a practical matter, in the total depletion of the policies, with the result that they are no longer available to give directors and officers the comfort

they need to serve or continue to serve.

Moreover, because of the existence of entity coverage, the bankruptcy court capped the amount of insurance that the directors and former employees could seek from Adelphia's insurers, giving them permission to seek up to \$300,000 each in defense costs.¹⁶⁰

On appeal, the U.S. District Court for the Southern District of New York reversed, holding that the policy proceeds were not part of the bankruptcy estate.¹⁶¹ The court reasoned that Adelphia did not yet have a property interest in the proceeds because: (1) there was no indication that any of the debtor companies had made any payments for which they would be entitled to indemnification coverage, or that any such payments were contemplated; and (2) none of the debtors had made or committed themselves to payments using their entity coverage.¹⁶² According to the court, claiming that the debtors had a property interest in the proceeds would be akin to car owners with collision coverage claiming that they had a right to the proceeds of their insurance policies because of the possibility that an accident could occur or a living person with a death benefit policy claiming that the person's beneficiaries had a property interest in the policy proceeds even though the person remained alive.¹⁶³ As a result, the court concluded that recognizing that Adelphia had a property interest in the proceeds "makes no sense at this juncture."¹⁶⁴

Like Adelphia, Enron Corp. had entity coverage. The bankruptcy court in *In re Enron Corp.* lifted the automatic stay to permit certain present and former directors and officers of the company to access the proceeds of a D&O policy in order to pay their defense costs.¹⁶⁵ The policy in question, however, also had a "priority of payments" endorsement, which provided that both the entity coverage and the Side B coverage (under which Enron Corp. could seek reimbursement for amounts paid as indemnification) were subordinated to the rights of the insured directors and officers under the policy.¹⁶⁶ "Priority of payments" provisions have been used by some insurance carriers to address problems caused by the presence of entity coverage. Their purpose is to ensure that proceeds are paid first to directors and officers, even in the event of the corporation's insolvency. Another possible solution, offered by some insurers, is an endorsement containing a pre-petition waiver of the automatic stay. This type of endorsement typically states that, in the event of the insured corporation's bankruptcy, the corporation and the officers and directors insured under the D&O insurance policy: (1) waive and release the automatic stay to the extent it may apply to the proceeds of the policy; and (2) agree not to oppose or object to any efforts by the insurer or the insureds to obtain relief from the stay. The extent to which such a waiver would be enforceable, however, is unclear.¹⁶⁷ A third alternative to addressing the presence of entity coverage is to obtain additional coverage that is not shared with the corporation, which companies increasingly are doing.¹⁶⁸

Although entity coverage was once widespread among public companies, insurers have been moving away from providing it due to cost and uncertainty about the treatment of policy proceeds in the event of bankruptcy.¹⁶⁹ The use of an allocation clause in a D&O insurance policy can eliminate the uncertainty that exists in the bankruptcy context where a corporation has entity coverage. Unlike entity coverage, an allocation clause does not insure the corporation against claims brought against the corporation itself. Instead, such a clause guarantees that a D&O insurance policy will cover an amount of any liability imposed against the corporation's officers and directors. An allocation clause may provide for a pre-set percentage that the insurer and the corporation agree to pay in suits (such as those involving securities claims) where the corporation is sued along with its officers and directors. Alternatively, the policy language may specify that the parties will use their "best efforts" or "good faith" to agree upon an allocation, or that allocation will be made based on the relative legal exposure of the insureds.¹⁷⁰ A D&O insurance policy may also provide for the allocation of defense costs. Absent policy language addressing allocation, expenses of defense that are reasonably related to a covered claim generally can be allocated wholly to the covered claim and therefore would be covered under a policy.¹⁷¹

One case illustrating the difficulties involved in allocation is the Fourth Circuit's 2006 decision in *Perdue Farms, Inc. v. Travelers Casualty & Surety Company of America*.¹⁷² This case involved class action claims under the Fair Labor Standards Act, ERISA and wage and hour laws. The corporation's D&O insurance policy provided coverage for the

ERISA claims but not the wage and hour claims. The insured settled all claims for a total of \$10 million; however, there was no allocation of the \$10 million settlement between covered claims and uncovered claims. When the insured sought coverage from Travelers for the settlement (with a minor deduction for the wage and hour claims), Travelers denied to provide it, claiming that it had no duty to provide coverage for any portion of the settlement except what was strictly related to the ERISA claims.¹⁷³

The trial court had found in the insured's favor on the basis that the wage and hour claims were "reasonably related" to the ERISA claims and therefore covered under the policy. The Fourth Circuit reversed, holding that use of the "reasonably related" test could result in insurers footing the bill for any number of claims and settlements that were never contemplated by the policy or the parties.¹⁷⁴ The Fourth Circuit remanded the case for proceedings intended to identify exactly how much of the settlement was attributable to the ERISA claims and how much to all other claims, from which an appropriate percentage could be applied against the \$10 million to determine Traveler's coverage obligation for ERISA claims.¹⁷⁵

[7] Supplemental Coverage

An increased risk of litigation, the prospect of multi-million dollar judgments in securities class action and derivative lawsuits, and the magnitude of defense costs all have given rise to increasing concern among companies about whether the amount of their D&O insurance coverage will be adequate to protect their officers and directors, especially outside directors. Meanwhile, the prevalence of entity coverage has raised questions about the continued availability of coverage for directors and officers in the bankruptcy context.¹⁷⁶ At the same time, financial restatements and corporate scandals have heightened awareness of the risk that insurers may seek to deny coverage or rescind coverage altogether. The Sarbanes-Oxley Act has created additional responsibilities and the possibility of new liabilities for corporate officials. As a result, directors are likely to view the availability of comprehensive D&O insurance as an important factor in deciding whether to join a board or remain on a board.¹⁷⁷

To avoid the potential for dilution that exists where the company also is an insured under a D&O insurance policy, and to avoid ambiguity about directors' and officers' rights to coverage in the event of bankruptcy, corporations increasingly are purchasing separate "Side A" coverage to supplement their primary policies, which typically consist of Side A and "Side B" coverage, and sometimes entity coverage.¹⁷⁸ Other factors that have contributed to an increase in the purchase of additional Side A coverage include the following: recent, high-profile bankruptcies and settlements involving directors making personal payments¹⁷⁹; concerns that indemnifiable claims will exhaust policy limits; fear of D&O policy rescission; and perceived economies in restricting the purchase of higher limits to Side A insurance only.¹⁸⁰

Side A coverage is available either on a standalone basis that provides coverage from the first dollar up alongside a company's primary policy, or as excess coverage. Most supplemental Side A coverage takes the form of a so-called "Side A tower" that sits as excess above the standard Side A, Side B and entity coverage. Excess policies generally are "follow-form" of a primary policy--that is, they provide coverage on the same terms as the primary policy, except to the extent that any provisions in the "follow-form" policy are more restrictive than those in the primary policy. However, this is not always the case, and excess policies do not uniformly adopt the same terms as the underlying primary policy.¹⁸¹ This was exemplified in the *XL Specialty* case,¹⁸² in which the U.S. District Court for the Southern District of New York held that the "severability of the exclusions" clause in a primary D&O insurance policy did not apply to two "follow-form" excess policies, and that the "severability of the application" clause in the primary policy was superseded by conflicting language in the two excess policies.

Standard Side A excess coverage protects directors and officers only and is not shared with the company. However, it is important to note that the coverage available to any given director or officer insured under a Side A-only policy may be diluted because other directors and officers share in the policy coverage.¹⁸³ Accordingly, a large claim involving an officer, and corresponding defense costs, could erode the coverage available to outside directors under the policy. Side

A excess coverage can be structured so that the coverage is nonrescindable for any reason (except nonpayment of premiums). A relatively newer form of coverage available in the market is so-called "Side A Difference-in-Conditions" coverage. Sometimes referred to as "Excess DIC Side A," the "difference-in-conditions" component broadens the standard Side A excess coverage. Excess DIC Side A usually is written at a very high excess "attachment" level, and dedicated to the coverage of directors and officers in the event of a catastrophic loss. Excess DIC Side A coverage typically is written that it "drops down" to act as primary coverage in the event that the company refuses or is unable (whether due to insolvency or otherwise) to indemnify, or where the underlying insurers have denied or rescinded coverage, where the underlying insurers have become insolvent, or where one or more of the underlying policies are unavailable due to bankruptcy. Finally, Excess DIC Side A typically is nonrescindable and includes full severability language.ⁿ¹⁸⁴

Another new form of coverage, less prevalent among public companies,ⁿ¹⁸⁵ is so-called "Independent Director Liability" ("IDL") coverage, which, like Excess DIC Side A coverage, is excess coverage that attaches at very high levels. It typically provides "drop down" protection when the underlying insurance is unavailable, either because the underlying insurer has denied or rescinded coverage, one or more of the underlying carriers has become insolvent, or one or more of the underlying policies have been stayed by a bankruptcy court. In addition, IDL policies can be structured so that they are nonrescindable, and many IDL policies do not contain exclusions normally found in traditional D&O insurance policies or contain narrower exclusions.ⁿ¹⁸⁶ IDL coverage is reserved for nonmanagement directors of a company and is available in several forms. Some IDL policies cover an individual director for all, or a combination of, the boards on which the director sits, while other policies cover all of the nonmanagement directors of a single company with respect to the directors' service on that company's board. IDL coverage can be purchased by a company or by directors themselves. To date, relatively few companies and directors have purchased IDL, and its utility therefore cannot be assessed with any reliability. IDL coverage may, however, prove useful in addressing the risk of dilution present with supplemental Side A coverage because that coverage is shared with other directors and officers.

Yet another new form of D&O insurance policy covers former directors and officers once they leave a corporation. Until applicable statutes of limitations have run, a former director or officer could be subject to potential claims based on acts or omissions that occurred while he or she was still at the corporation. Because D&O insurance policies are "claims-made" policies, the policy or policies that would apply to these claims is whatever the corporation has in effect at the time the claims are brought. In addition, a company's financial condition--and therefore, its ability to pay indemnification--could change during the period after a director or officer leaves the corporation. A retired director or officer liability policy is designed to address these issues. It can be structured to provide coverage with respect to service at a single company or at multiple companies. The policy is noncancelable and nonrescindable and does not include most of the exclusions of a traditional D&O policy.ⁿ¹⁸⁷ Like IDL coverage, because retired director and officer liability policies are specific to an individual, they remove the potential for dilution that exists with supplemental Side A coverage. Given the relatively recent introduction of retired director and officer liability policies into the marketplace, it is not yet clear how common they will become.

Supplemental Side A coverage is an increasingly common component of a well-constructed D&O insurance program. Companies considering the purchase of supplemental Side A coverage should be mindful that terms and conditions differ from one policy to the next, and that policy language can be negotiated. Companies also should be aware, as noted above, that terms and conditions in excess D&O insurance policies do not automatically "follow form" over the underlying primary policy. Even if an excess policy does "follow form," an excess insurer is not necessarily bound by the actual or implied coverage decisions of the primary carrier. In *Allmerica Financial Corporation v. Certain Underwriters at Lloyd's, London*,ⁿ¹⁸⁸ Allmerica sought payment from its primary and excess insurers following settlement of a class action lawsuit. The excess insurance policy at issue in the case was a "follow-form" policy. The primary insurer in Allmerica paid out the full amount of the policy, but the excess insurer denied coverage on the basis that certain policy exclusions applied. The Supreme Court of Massachusetts held that the excess insurer was not bound by the actual or implied coverage decisions of the primary insurer. The "follow-form" nature of the policy did not change the fact that the excess policy was a distinct agreement.

In addition, companies should pay particular attention to the "trigger" language in excess policies, which establishes when coverage becomes available under the policies. Excess policies will often state that coverage attaches only after the underlying insurance has been exhausted by the actual payment of losses by the insurers. This language can be problematic where an underlying insurer does not pay, whether due to a coverage dispute, financial inability or insolvency, or otherwise. For example, if an insured settles a claim within the limits of its primary policy, pays the difference on the claim up to the primary policy limits, and seeks coverage from its excess insurers for payments in excess of those limits, coverage may not be available because the policy language stipulates that the insurers must have paid up to the underlying policy limits.

This outcome has occurred recently in cases involving excess policies that contained this type of language. In a 2008 case involving Qualcomm, Inc.,¹⁸⁹ a California appellate court held that Qualcomm's excess insurer had no legal obligation to cover a claim where the company had settled with an underlying insurer for a payment that was less than full policy limits. There, Qualcomm's primary insurance had an aggregate limit of \$20 million, and the settlement with the insurer resulted in a payment of \$16 million, leaving a "gap" of \$4 million. Although it was undisputed that Qualcomm had additional settlement and defenses costs of over \$12 million, the court concluded that the excess insurer should bear no coverage obligation for any of that amount. The court stated that the "exhaustion clause here compels us to conclude that the parties expressly agreed that [the primary insurer] was required to pay (or be legally obligated to pay) no less than \$20 million as a condition of [the excess insurer's] liability."¹⁹⁰ The *Qualcomm* decision followed a similar ruling by a Michigan court in mid-2007 in a coverage dispute involving an excess policy issued to Comerica Inc.¹⁹¹

In view of these considerations, it is critical to scrutinize the policy language carefully and understand what is and is not covered. Due to the complexity of policy language and the issues involved, expert advice from qualified insurance and legal professionals can be important in obtaining a thorough understanding of the coverage available under a company's D&O insurance program. A growing number of boards of directors are seeking comprehensive analyses of their companies' D&O insurance programs, undertaken with the assistance of experts, in connection with the purchase or renewal of D&O insurance coverage. According to one survey of more than 700 corporate directors, approximately 81% indicated that their boards reviewed the company's D&O insurance policies annually.¹⁹²

(n17)Footnote 17. *Del. Code Ann. tit. 8, § 145(b)* (2009).

(n18)Footnote 18. See discussion in § 5.03[4] above.

(n19)Footnote 19. See, e.g., *TLC Beatrice Int'l Holdings, Inc. v. CIGNA Ins. Co.*, 1999 U.S. Dist. LEXIS 605 , at *13-*20 (S.D.N.Y. Jan. 27, 1999) (New York court interpreting Delaware law concluded that omission of judgment and settlement amounts in derivative suits under Section 145(b) was intentional, rejected argument that indemnification was permitted under Section 145(f), and held that Delaware law does not empower corporations to indemnify directors for settlement amounts in derivative suits); *Arnold v. Society for Sav. Bancorp, Inc.*, 678 A.2d 533, 540 & n.18 (Del. 1996) (noting that Section 145(b) was intentionally drafted to avoid a circular result where a corporation would simply be paying itself for injury caused to it by the very directors being indemnified by the corporation); but see *Heffernan v. Pacific Dunlop GNB Corp.*, 1993 U.S. Dist. LEXIS 5, at *15 (N.D. Ill. Jan. 5, 1993) (Illinois court interpreting Delaware law and upholding bylaw provision permitting indemnification for charges, costs, judgments, fines, and amounts paid to settle suits by or on behalf of a corporation because Delaware statutory law "does not mark the exclusive ambit of indemnification rights" and statutory indemnification rights "co-exist with" rights conferred under corporate bylaws); see also S. Samuel Arshat & Walter K. Stapleton, *Delaware's New Corporation Law, Substantive Changes*, 23 *Bus. Law.* 75, 79-80 (1967) (indicating that the Delaware Corporation Law Revision Committee decided that to "permit the corporation to nullify a judgment in its favor against a director simply by refunding the director's payment on it would, in the committee's judgment, subvert the substantive provisions of the corporation law and should not be permitted." With respect to settlement amounts, the Committee thought that to permit indemnification "would have the ultimate effect of discouraging settlements since, in such a situation, derivative plaintiffs could demonstrate no benefit arising to the corporation from their action and, presumably, could not justify being reimbursed for their litigation expenses, including counsel fees.").

(n20)Footnote 20. *Globus, Inc. v. Law Research Serv., Inc.*, 418 F.2d 1276, 1289 (2d Cir. 1969) ; see also Joseph W. Bishop, Jr., *New Problems in Indemnifying and Insuring Directors: Protection Against Liability Under the Federal Securities Laws*, 1972 *Duke L.J.* 1153, 1161-66 (1972) (quoting *Brief for SEC as Intervenor, Feit v. Leasco Data Processing Equip. Corp.*, 332 F. Supp. 544 (E.D.N.Y. 1971) , in which the SEC relied on the Second Circuit's position in *Globus*). But see *Fromer v. Yogel*, 50 F. Supp. 2d 227, 237-40 & n.8 (S.D.N.Y. 1999) (denying motion to dismiss claim for indemnification for liability arising under Section 10(b) of 1934 Act and suggesting, in reliance on *Globus*, that although indemnification is unavailable where an individual has knowingly and willfully violated the federal

securities laws, it may be available where a party that has been found jointly liable is without fault) (citing *Globus, Inc. v. Law Research Serv., Inc.*, 287 F. Supp. 188, 199 (S.D.N.Y. 1968), *aff'd in relevant part*, *rev'd in part on other grounds*, 418 F.2d 1276, 1288-89 (2d Cir. 1969)).

(n21)Footnote 21. 17 C.F.R. § 229.510 (2009).

(n22)Footnote 22. See, e.g., *In re Cendant Corp. Litig.*, 264 F.3d 286, 301 (3d Cir. 2001) ("[F]ederal courts disallow claims for indemnification because such claims run counter to the policies underlying the [1933 and 1934 Acts]."); *In re Enron Corp. Securities, Derivative & "ERISA" Litig.*, 2008 U.S. Dist. LEXIS 48516, at *51-53 (S.D. Tex. June 24, 2008) (citing various courts' discussions on indemnification under the 1933 and 1934 Acts); *Globus, Inc. v. Law Research Serv., Inc.*, 287 F. Supp. 188, 198-99 (S.D.N.Y. 1968), *aff'd in part*, *rev'd in part on other grounds*, 418 F.2d 1276 (2d Cir. 1969). Some courts have gone further and concluded that there is no right to indemnification of any kind under the 1934 Act. See, e.g., *Eichenholtz v. Brennan*, 52 F.3d 478, 483-85 (3d Cir. 1995) ("[I]ndemnification runs counter to the policies underlying the 1933 and 1934 Acts," which is "encouraging diligence and discouraging negligence in securities transactions."); *In re United States Oil & Gas Litig.*, 967 F.2d 489, 495 (11th Cir. 1992) ("Indemnification claims are not cognizable under the Securities Acts of 1933 and 1934."). At least one court has also extended the public policy limitations on indemnification to the proxy rules. In *Gould v. American-Hawaiian Steamship Co.*, the court concluded that indemnification was not available on public policy grounds where the defendants had violated Rule 14a-9 because Section 14(a) reaches negligent as well as deliberately deceptive conduct. *Gould v. American Hawaiian S.S. Co.*, 387 F. Supp. 163, 167 (D. Del. 1974), *vacated on other grounds*, 535 F.2d 761 (3d Cir. 1976). Stating that most of the cases on indemnity under the federal securities laws could be read to support the proposition that an unsuccessful defendant may obtain indemnity from a significantly more culpable defendant, the court concluded that the justification for permitting a shifting of liability was more compelling where a violation of the antifraud provisions of the federal securities was involved because these provisions implicate fraudulent and intentional misconduct. *Gould*, 387 F. Supp. at 167. By contrast, the court reasoned that the purpose of Section 14(a) was "regulatory, not compensatory ... Thus, the question of who pays the damages to the plaintiffs is of as great concern as the issue of whether the plaintiffs are compensated at all. To allow indemnity to those who have breached responsibilities squarely placed upon them by statute would vitiate the remedial purposes of § 14(a). Only a realistic possibility of liability for damages will encourage due diligence by those who solicit proxies and will protect the interest of informed corporate suffrage." *Gould*, 387 F. Supp. at 168.

(n34)Footnote 34. 15 U.S.C. § 7241 (2009) (Section 302); see also 17 C.F.R. §§ 240.13a-14 & 15d-14 (2009) (SEC rules implementing Section 302); 18 U.S.C. § 1350 (2009) (Section 906).

(n35)Footnote 35. 15 U.S.C. § 7244(a) (2009); see also 17 C.F.R. §§ 245.100-245.104 (2009) (SEC implementing rules).

(n36)Footnote 36. 18 U.S.C. § 1519 (2009).

(n37)Footnote 37. 18 U.S.C. § 1514A (2009) (Section 806); 18 U.S.C. § 1513(e) (2009) (Section 1107).

(n38)Footnote 38. See, e.g., *Vigilant Ins. Co. v. Credit Suisse First Boston Corp.*, 6 Misc. 3d 1020A, 800 N.Y.S.2d 358 (July 8, 2003), *aff'd in part, rev'd in part*, 10 A.D.3d 528, 782 N.Y.S. 2d 19 (N.Y. App. Div. 2004). In *Vigilant*, the Supreme Court of New York held that, for public policy reasons, Credit Suisse First Boston could not recoup from its insurers \$70 million in disgorgement paid to settle an SEC action. According to the court, allowing Credit Suisse to pass the burden of settlement on to the company's insurers would: (1) defeat the policy behind disgorgement, which was to deprive Credit Suisse of money it had obtained unjustly and to deter similar future conduct; and (2) defeat the purpose of the final judgment ordering the disgorgement in the SEC action. Although the judgment was not a final adjudication of wrongdoing by Credit Suisse, the judgment specifically linked the disgorgement payment to the improper activity alleged by SEC. The court did allow Credit Suisse to recover the costs of defending the SEC action because, under the language of the insurance policy, the term "Loss" was defined to include defense costs. On appeal, the Supreme Court of New York, Appellate Division, affirmed the trial court's decision that Credit Suisse was not entitled to insurance coverage for the \$70 million disgorgement payment, stating that "[t]he risk of being directed to return improperly acquired funds is not insurable." *Vigilant*, 10 A.D.3d at 528. The Appellate Division reversed the part of the trial court order that permitted Credit Suisse to recover its defense costs incurred in the SEC action. *Vigilant*, 10 A.D.3d at 529. In reaching this conclusion, the Appellate Division relied on the definition of the term "Loss," which excluded matters uninsurable under the law governing the insurance policy. The Appellate Division also relied on the fact that the policy was a "no-duty-to-defend" policy, stating that, although insurers may be required to advance defense costs under such a policy, an insured must repay the advances upon a finding that the insured is not entitled to payment of a "Loss." *Vigilant*, 10 A.D.3d at 529. See also *Level 3 Comms., Inc. v. Federal Ins. Co.*, 272 F.3d 908 (7th Cir. 2001) (claim for securities fraud did not constitute a loss under terms of D&O insurance policy because court found that insured was essentially seeking restitution for ill-gotten gains). The drafters of Section 145(g)

of the Delaware General Corporation Law specifically intended that the availability of insurance under this provision be limited by public policy considerations. See S. Samuel Arsht, *Indemnification Under Section 145 of Delaware General Corporation Law*, 3 *Del. J. Corp. L.* 179-180 (1978); see also E. Norman Veasey et al., *Delaware Supports Directors With a Three-Legged Stool of Limited Liability, Indemnification, and Insurance*, 42 *Bus. Law.* 399, 418 & n.68 (citing same and noting that D&O insurance policies routinely provide that no payment will be made for claims deemed "uninsurable" under state law) (citations omitted).

(n39)Footnote 39. A 2008 decision of the U.S. Court of Appeals for the Eighth Circuit underscores the importance of carefully reading and understanding the actual language of a D&O insurance policy and not simply relying on intent or industry understanding. In *In re SRC Holding Corp.*, which involved claims against a financial services company and certain of its directors and officers for alleged wrongful acts in connection with the company's underwriting and sale of municipal bonds, the court held that a securities claim exclusion in the company's D&O insurance policy precluded coverage for all securities claims despite evidence that the exclusionary language was generally thought in the industry to exclude coverage only for liability resulting from the insured's sale of its own securities. See *In re SRC Holding Corp.*, 545 F.3d 661 (8th Cir. 2008). See also Kevin LaCroix, *The D&O Diary: D&O Insurance Policy Wordings, Exclusionary Preambles and Securities Claims* (Nov. 30, 2008), available at <http://www.dandodiary.com/2008/11/articles/d-o-insurance/do-insurance-policy-wordings-exclusionary-preambles-and-securities-claims> (discussing case).

(n40)Footnote 40. See discussion in § 5.04[6] below.

(n41)Footnote 41. See § 5.04[7] below (discussing supplemental insurance coverage).

(n42)Footnote 42. Some examples of non-indemnifiable losses include judgments or settlements in derivative actions, losses related to certain violations of the federal securities laws (where indemnification would be against public policy), losses that the corporation is financially unable to fund and losses for which applicable law or the corporation's certificate of incorporation or bylaws prohibit indemnification.

(n43)Footnote 43. See John C. Tanner & David E. Howard, *Blowing Whistles and Climbing Ladders: The Hidden Insurance Issues Behind Sarbanes-Oxley and Recent Corporate Governance Reform*, 23 ACC Docket No. 4, at 32, 34-35, 48-49 (Apr. 2005) (stating that the heightened regulatory climate brought about by the Sarbanes-Oxley Act has "dramatically increased public company D&O claim exposure to SEC and other governmental investigations" and advising companies to see that their policies provide maximum coverage for investigations). See also, e.g., Patricia A. Bronte, *D&O Coverage for Corporate Criminal Investigations*, 7 *The Insurance Law Coverage Bulletin* No. 11 (Dec. 2008) (discussing cases that have analyzed whether a corporate criminal investigation constitutes a "claim"); Robert D. Chesler & Cindy Tzvi Sonenblich, *Does a Subpoena Constitute a 'Claim' for Purposes of D&O Insurance Coverage?*, 14 MEALEY's Emerging Insurance Disputes No. 2 (Jan. 21, 2009) (discussing cases that have analyzed whether a subpoena constitutes a "claim").

(n44)Footnote 44. See, e.g., Federal Insurance Company Executive Liability Coverage Policy (quoted in *Federal Ins. Co. v. Kozlowski*, 18 A.D.3d 33, 792 N.Y.S. 2d 397, 399 (N.Y. App. Div. 2005) and *In re Healthsouth Corp. Ins. Litig.*, 308 F. Supp. 2d 1253, 1260-61 (N.D. Ala. 2004)).

(n94)Footnote 94. *Bank of America Corp. v. SR Int'l Bus. Ins.*, 2007 NCBC 36 (N.C. Super. Ct. Dec. 19, 2007) (unpublished) (applying North Carolina law).

(n95)Footnote 95. *Bank of America*, 2007 NCBC 36 at *49 .

(n96)Footnote 96. *Bank of America*, 2007 NCBC 36 at *50 .

(n97)Footnote 97. In *Massachusetts v. EPA*, the U.S. Supreme Court held that greenhouse gas emissions are "pollutants" under the Clean Air Act. 549 U.S. 497, 127 S. Ct. 1438, 1462 (2007) . Since that decision, some commentators have raised the question of whether the pollution exclusion will result in successful denials of insurance coverage for securities claims based on, for example, inadequate disclosures or misrepresentations regarding climate change. See, e.g., Erin Coe, *Global Warming Raises Risks for Directors, Officers*, Law360 (Oct. 14, 2008), available at <http://www.tsmp.com/files/News/55267008-9d1a-40ca-84ce-0100c2c2e9f8/Presentation/NewsAttachment/72a03b07-99dd-4925-8c54-0> Kevin LaCroix, *The D&O Diary: Climate Change and D&O Risk* (April 9, 2007), available at <http://www.dandodiary.com/2007/04/articles/environmental-liability/climate-change-and-d-o-risk/>. In 2008, a New Jersey intermediate appellate court affirmed a trial court decision answering "no" to that question and holding that the pollution exclusion would not bar insurance coverage for a securities class action lawsuit alleging misrepresentation of asbestos-related claims. *Sealed Air Corp. v. Royal Indem. Co.*, 961 A.2d 1195 (N.J. Super. Ct. App. Div. 2008) .

(n105)Footnote 105. For a more detailed discussion of rescission, see, e.g., Daniel Aronowitz, *The New Rescission Rules for D&O Insurance Policies*, 38 The Review of Secs. and Commodities Regulation No. 2, at 13 (Jan. 26, 2005); John C. Tanner, *So Long, D&O Coverage: Policy Rescission--What the Insured Can Do*, Business Law Today 54 (Mar./Apr. 2005); Murray D. Sacks & Kathrin V. Smith, *How to Fight the Rescission of a D&O Insurance Policy*, 17 Insights No. 7, at 2 (July 2003).

(n106)Footnote 106. The Homestore advancement proceedings are discussed in detail in § 5.03[5] above.

(n107)Footnote 107. See *Fed. Ins. Co. v. Homestore, Inc.*, 144 Fed. Appx. 641 (9th Cir. 2005); *TIG Ins. Co. of Michigan v. Homestore, Inc.*, 137 Cal. App. 4th 749 (2006).

(n108)Footnote 108. See *Fed. Ins. Co.*, 144 Fed. Appx. at 648.

(n109)Footnote 109. See, e.g., Daniel Aronowitz, *The New Rescission Rules for D&O Insurance Policies*, 38 The Review of Secs. and Commodities Regulation No. 2, at 13-17 (Jan. 26, 2005) (surveying state law). For example, as discussed above, California law, which governed Homestore's policies, requires that rescission apply to all insureds unless the policy provides otherwise. *Cal. Ins. Code* § 650 (2008).

(n110)Footnote 110. See Daniel Aronowitz, *The New Rescission Rules for D&O Insurance Policies*, 38 The Review of Secs. and Commodities Regulation No. 2, at 13-16 (Jan. 26, 2005). See, e.g., *Republic Ins. Co. v. Masters, Mates & Pilots Pension Plan*, 77 F.3d 48, 52 (2d Cir. 1996) (New York law) ("Under New York law ... an insurance policy issued in reliance on a material misrepresentation is void from its inception." (citations omitted)); see also *N.Y. Ins. Law* § 3105 (2009) (defining material misrepresentation); *Merced County Mutual Life Ins. Co. v. State of California*, 233 Cal. App. 3d 765, 771, 284 Cal. Rptr. 680 (1991) (California law) (citing *Cal. Ins. Code* § 359 (2009) ("If a representation is false in a material point, whether affirmative or promissory, the injured party is entitled to rescind the contract from the time the representation becomes false."). Under California law, "[t]he materiality of a representation is a question of law ... to be determined solely by the probable and reasonable effect which truthful answers would have had upon the insurer (Ins. Code § 334); i.e., was the insurer misled into accepting a risk, fixing the premium of insurance, estimating the disadvantages of the proposed contract or making his inquiries." *Merced*, 233 Cal. App. 3d 765 at 772 (citations omitted); see also *Cal. Ins. Code* § 334 (2008) ("Materiality is to be determined not by the event, but solely by the probable and reasonable influence of the facts upon the party to whom the communication is due, in forming his estimate of the disadvantages of the proposed contract, or in making his inquiries.").

(n111)Footnote 111. See Daniel Aronowitz, *The New Rescission Rules for D&O Insurance Policies*, 38 The Review of Secs. and Commodities Regulation No. 2, at 13, 15, 16-17 (Jan. 26, 2005). See, e.g., *Matinchek v. John Alden Life Ins. Co.*, 93 F.3d 96, 102 (3d Cir. 1996) (Pennsylvania law) ("Under Pennsylvania law, an insurance contract is void if (1) the representation was false; (2) the insured knew it to be false when made or acted in bad faith; and (3) the representation was material to the risk being insured." (citation omitted)); *Albany Ins. Co. v. Anh Thi Kieu*, 927 F.2d 882, 891 (5th Cir. 1991) (Texas law) ("Under Texas insurance law, an insurer may invalidate a policy of insurance on the basis of the insured's misrepresentations in the insurance application only if the insurer can successfully plead and prove the following five elements: (1) the making of the representation; (2) the falsity of the representation; (3) reliance thereon by the insurer; (4) the intent to deceive on the part of the insured in making same; and (5) the materiality of the representation The unique aspect of this Texas law is the requirement that the insurer plead and prove the insured's intent to deceive.' It is incumbent upon the insurer to prove that the insured made some material misrepresentation willfully and with design to deceive or defraud,' as an element of this [misrepresentation] defense.' " (citations omitted)).

LIABILITY OF DIRECTORS

Section 1 . No Personal Liability. To the fullest extent permitted by the DGCL as the same exists or as may hereafter be amended, no director of the Corporation shall be personally liable to the Corporation or its stockholders for monetary damages for breach of fiduciary duty as a director.

Section 2 . Amendment or Repeal. Any amendment, alteration or repeal of this Article XI that adversely affects any right of a director shall be prospective only and shall not limit or eliminate any such right with respect to any proceeding involving any occurrence or alleged occurrence of any action or omission to act that took place prior to such amendment or repeal.

[5-B] Sample Indemnification Bylaw for a Publicly Held Delaware Company

ARTICLE VI -- INDEMNIFICATION

Section 6.1 Right to Indemnification. Each person who was or is made a party or is threatened to be made a party to or is otherwise involved in any action, suit, arbitration, alternative dispute mechanism, inquiry, administrative or legislative hearing, investigation or any other actual, threatened or completed proceeding, including any and all appeals, whether civil, criminal, administrative or investigative (hereinafter a "proceeding"), by reason of the fact that he or she is or was a director or an officer of the Corporation or while a director or officer of the Corporation is or was serving at the request of the Corporation as a director, officer, employee, agent or trustee of another corporation or of a partnership, joint venture, trust or other enterprise, including service with respect to an employee benefit plan (hereinafter an "indemnitee"), whether the basis of such proceeding is alleged action in an official capacity as a director, officer, employee, agent or trustee or in any other capacity while serving as a director, officer, employee, agent or trustee, shall be indemnified and held harmless by the Corporation to the fullest extent authorized by the DGCL, as the same exists or may hereafter be amended, against all expense, liability and loss (including attorneys' fees, judgments, fines, ERISA excise taxes or penalties and amounts paid in settlement) reasonably incurred or suffered by such indemnitee in connection therewith; provided, however, that, except as provided in Section 6.3 with respect to proceedings to enforce rights to indemnification, the Corporation shall indemnify any such indemnitee in connection with a proceeding (or part thereof) initiated by such indemnitee only if such proceeding (or part thereof) was authorized or ratified by the Board of Directors of the Corporation.

Section 6.2 Right to Advancement of Expenses. In addition to the right to indemnification conferred in Section 6.1, an indemnitee shall, to the fullest extent not prohibited by law, also have the right to be paid by the Corporation the expenses (including attorneys' fees) incurred in defending any such proceeding in advance of its final disposition (hereinafter an "advancement of expenses"); provided, however, that, if the DGCL requires, an advancement of expenses incurred by an indemnitee in his or her capacity as a director or officer (and not in any other capacity in which service was or is rendered by such indemnitee, including, without limitation, service to an employee benefit plan) shall be made only upon delivery to the Corporation of an undertaking (hereinafter an "undertaking"), by or on behalf of such indemnitee, to repay all amounts so advanced if it shall ultimately be determined by final judicial decision from which there is no further right to appeal (hereinafter a "final adjudication") that such indemnitee is not entitled to be

indemnified for such expenses under this Section 6.2 or otherwise.

Section 6.3 Right of Indemnitee to Bring Suit. If a claim under Section 6.1 or 6.2 of this Article VI is not paid in full by the Corporation within 60 days after a written claim has been received by the Corporation, except in the case of a claim for an advancement of expenses, in which case the applicable period shall be 20 days, the indemnitee may at any time thereafter bring suit against the Corporation in a court of competent jurisdiction in the State of Delaware to recover the unpaid amount of the claim. If successful in whole or in part in any such suit, or in a suit brought by the Corporation to recover an advancement of expenses pursuant to the terms of an undertaking, the indemnitee shall be entitled to be paid also the expense of prosecuting or defending such suit. In (a) any suit brought by the indemnitee to enforce a right to indemnification hereunder (but not in a suit brought by the indemnitee to enforce a right to an advancement of expenses) it shall be a defense that, and (b) any suit brought by the Corporation to recover an advancement of expenses pursuant to the terms of an undertaking, the Corporation shall be entitled to recover such expenses upon a final adjudication that, the indemnitee has not met any applicable standard for indemnification set forth in the DGCL. Neither the failure of the Corporation (including its directors who are not parties to such action, a committee of such directors, independent legal counsel, or its stockholders) to have made a determination prior to the commencement of such suit that indemnification of the indemnitee is proper in the circumstances because the indemnitee has met the applicable standard of conduct set forth in the DGCL, nor an actual determination by the Corporation (including its directors who are not parties to such action, a committee of such directors, independent legal counsel, or its stockholders) that the indemnitee has not met such applicable standard of conduct, shall create a presumption that the indemnitee has not met the applicable standard of conduct or, in the case of such a suit brought by the indemnitee, be a defense to such suit. In any suit brought by the indemnitee to enforce a right to indemnification or to an advancement of expenses hereunder, or brought by the Corporation to recover an advancement of expenses pursuant to the terms of an undertaking, the burden of proving that the indemnitee is not entitled to be indemnified, or to such advancement of expenses, under this Article VI or otherwise shall be on the Corporation.

Section 6.4 Non-Exclusivity of Rights. The rights to indemnification and to the advancement of expenses conferred in this Article VI shall not be exclusive of any other right which any person may have or hereafter acquire under any law, agreement, vote of stockholders or directors, provisions of the Certificate of Incorporation or these Bylaws or otherwise.

Section 6.5 Insurance. The Corporation may maintain insurance, at its expense, to protect itself and any director, officer, employee or agent of the Corporation or another corporation, partnership, joint venture, trust or other enterprise against any expense, liability or loss, whether or not the Corporation would have the power to indemnify such person against such expense, liability or loss under the DGCL.

Section 6.6 Indemnification of Employees and Agents of the Corporation. The Corporation may, to the extent authorized from time to time by the Board of Directors, grant rights to indemnification and to the advancement of expenses to any employee or agent of the Corporation to the fullest extent of the provisions of this Article VI with respect to the indemnification and advancement of expenses of directors and officers of the Corporation.

Section 6.7 Nature of Rights. The rights conferred upon indemnitees in this Article VI shall be contract rights and such rights shall continue as to an indemnitee who has ceased to be a director, officer or trustee and shall inure to the benefit of the indemnitee's heirs, executors and administrators. Any amendment, alteration or repeal of this Article VI that adversely affects any right of an indemnitee or its successors shall be prospective only and shall not limit or eliminate any such right with respect to any proceeding involving any occurrence or alleged occurrence of any action or omission to act that took place prior to such amendment, alteration or repeal.

Section 6.8 Settlement of Claims. The Corporation shall not be liable to indemnify any indemnitee under this Article VI for any amounts paid in settlement of any action or claim effected without the Corporation's written consent, which

consent shall not be unreasonably withheld, or for any judicial award if the Corporation was not given a reasonable and timely opportunity, at its expense, to participate in the defense of such action.

Section 6.9 Subrogation. In the event of payment under this Article VI, the Corporation shall be subrogated to the extent of such payment to all of the rights of recovery of the indemnitee, who shall execute all papers required and shall do everything that may be necessary to secure such rights, including the execution of such documents necessary to enable the Corporation effectively to bring suit to enforce such rights.

Section 6.10 Procedures for Submission of Claims. The Board of Directors may establish reasonable procedures for the submission of claims for indemnification pursuant to this Article VI, determination of the entitlement of any person thereto and review of any such determination.

[5-C] Sample Director and Officer Indemnification Agreement for a Delaware Company

INDEMNIFICATION AGREEMENT

dated as of _____, 200____ between _____ Company (the "Company"), and _____ ("Indemnitee")

WHEREAS, the Board of Directors has determined that the inability to attract and retain qualified persons as directors and officers is detrimental to the best interests of the Company's stockholders and that the Company should act to assure such persons that there shall be adequate certainty of protection through insurance and indemnification against risks of claims and actions against them arising out of their service to and activities on behalf of the Company; and

WHEREAS, the Company has adopted provisions in its [**Certificate of Incorporation**] [**and**] [**By-laws**] providing for indemnification and advancement of expenses of its directors and officers to the fullest extent permitted by the Delaware General Corporation Law, and the Company wishes to clarify and enhance the rights and obligations of the Company and Indemnitee with respect to indemnification and advancement of expenses; and

WHEREAS, in order to induce and encourage highly experienced and capable persons such as Indemnitee to serve and continue to serve as directors and officers of the Company and in any other capacity with respect to the Company, and to otherwise promote the desirable end that such persons shall resist what they consider unjustified lawsuits and claims made against them in connection with the good faith performance of their duties to the Company, with the knowledge that certain costs, judgments, penalties, fines, liabilities and expenses incurred by them in their defense of such litigation are to be borne by the Company and they shall receive the maximum protection against such risks and liabilities as may be afforded by law, the Board of Directors of the Company has determined that the following Agreement is reasonable and prudent to promote and ensure the best interests of the Company and its stockholders; and

WHEREAS, the Company desires to have Indemnitee continue to serve as a director or officer of the Company and in such other capacity with respect to the Company as the Company may request, as the case may be, free from undue concern for unpredictable, inappropriate or unreasonable legal risks and personal liabilities by reason of Indemnitee acting in good faith in the performance of Indemnitee's duty to the Company; and Indemnitee desires to continue so to

serve the Company, provided, and on the express condition, that he or she is furnished with the indemnity set forth hereinafter;

Now, therefore, in consideration of Indemnitee's continued service as a director or officer of the Company, the parties hereto agree as follows:

1. **Service by Indemnitee.** Indemnitee shall serve and/or continue to serve as a director or officer of the Company faithfully and to the best of Indemnitee's ability so long as Indemnitee is duly elected or appointed and until such time as Indemnitee is removed as permitted by law or tenders a resignation in writing.

2. **Indemnification and Advancement of Expenses.** The Company shall indemnify Indemnitee, and shall pay to Indemnitee in advance of the final disposition of any Proceeding all Expenses incurred by Indemnitee, to the fullest extent permitted by the Delaware General Corporation Law in effect on the date of this Agreement or as such law may from time to time be amended (but, in the case of any such amendment, only to the extent that such amendment permits the Company to provide broader rights than said law permitted the Company to provide prior to such amendment). Without diminishing the scope of the rights provided by this Section, the rights of Indemnitee to indemnification and advancement of Expenses provided hereunder shall include but shall not be limited to those rights hereinafter set forth, except that no indemnification or advancement of Expenses shall be paid to Indemnitee:

(a) to the extent expressly prohibited by Delaware law or the **[Certificate of Incorporation] [and] [By-laws]** of the Company;

(b) for which payment is actually made to Indemnitee under a valid and collectible insurance policy or under a valid and enforceable indemnity clause, provision of the certificate of incorporation or by-laws, or agreement of the Company or any other company or organization where Indemnitee is serving at the request of the Company, except in respect of any indemnity exceeding the payment under such insurance, indemnity clause, provision of the certificate of incorporation or by-laws, or agreement;
[or]

(c) in connection with an action, suit or proceeding, or part thereof (including claims and counterclaims) initiated by Indemnitee, except a judicial proceeding or arbitration pursuant to Section 10 to enforce rights under this Agreement, unless the action, suit or proceeding (or part thereof) was authorized by the Board of Directors of the Company;
[or]

(d) with respect to any Proceeding brought by or on behalf of the Company against Indemnitee that is authorized by the Board of Directors of the Company, except as provided in Sections 4, 5 and 6 *below*.n1

3. **Action or Proceedings Other than an Action by or in the Right of the Company.** Except as limited by Section 2 above, Indemnitee shall be entitled to the indemnification rights provided in this Section if Indemnitee is a party or is threatened to be made a party to any Proceeding (other than an action by or in the name of the Company) by reason of the fact that Indemnitee is or was a director, officer, employee, agent or fiduciary of the Company, or is or was serving at the request of the Company as a director, officer, employee, agent or fiduciary of any other entity (including, but not limited to, another corporation, partnership, joint venture or trust); or by reason of anything done or not done by Indemnitee in any such capacity. Pursuant to this Section, Indemnitee shall be indemnified against all costs,

judgments, penalties, fines, liabilities, amounts paid in settlement and Expenses, actually and reasonably incurred by Indemnitee in connection with such Proceeding, if Indemnitee acted in good faith and in a manner Indemnitee reasonably believed to be in or not opposed to the best interests of the Company, and with respect to any criminal Proceeding, had no reasonable cause to believe his or her conduct was unlawful.

4. Indemnity in Proceedings by or in the Name of the Company. Except as limited by Section 2 *above*, Indemnitee shall be entitled to the indemnification rights provided in this Section if Indemnitee was or is a party or is threatened to be made a party to any Proceeding brought by or in the name of the Company to procure a judgment in its favor by reason of the fact that Indemnitee is or was a director, officer, employee, agent or fiduciary of the Company, or is or was serving at the request of the Company as a director, officer, employee, agent or fiduciary of any other entity (including, but not limited to, another corporation, partnership, joint venture or trust); or by reason of anything done or not done by Indemnitee in any such capacity. Pursuant to this Section, Indemnitee shall be indemnified against all costs, judgments, penalties, fines, liabilities, amounts paid in settlement and Expenses, actually and reasonably incurred by Indemnitee in connection with such Proceeding if Indemnitee acted in good faith and in a manner Indemnitee reasonably believed to be in or not opposed to the best interests of the Company; provided, however, that no such indemnification shall be made in respect of any claim, issue, or matter as to which Delaware law expressly prohibits such indemnification by reason of any adjudication of liability of Indemnitee to the Company, unless and only to the extent that the Court of Chancery of the State of Delaware or the court in which such Proceeding was brought shall determine upon application that, despite the adjudication of liability but in view of all the circumstances of the case, Indemnitee is entitled to indemnification for such costs, judgments, penalties, fines, liabilities, amounts paid in settlement and Expenses as such court shall deem proper.

5. Indemnification for Costs, Charges and Expenses of Successful Party. Notwithstanding the limitations of Section [2(d)],n2 3 and 4 *above*, to the extent that Indemnitee has been successful, on the merits or otherwise, in whole or in part, in defense of any Proceeding or in defense of any claim, issue or matter therein, including, without limitation, the dismissal of any action without prejudice, or if it is ultimately determined, after all appeals by a court of competent jurisdiction, that Indemnitee is otherwise entitled to be indemnified against Expenses, Indemnitee shall be indemnified against all Expenses actually and reasonably incurred in connection therewith.

6. Partial Indemnification. If Indemnitee is entitled under any provision of this Agreement to indemnification by the Company for some or a portion of the costs, judgments, penalties, fines, liabilities, amounts paid in settlement or Expenses, actually and reasonably incurred in connection with any Proceeding, or in connection with any judicial proceeding or arbitration pursuant to Section 10 to enforce rights under this Agreement, but not, however, for all of the total amount thereof, the Company shall nevertheless indemnify Indemnitee for the portion of such costs, judgments, penalties, fines, liabilities, amounts paid in settlement and Expenses, actually and reasonably incurred to which Indemnitee is entitled.

[7. Indemnification for Expenses of a Witness. Notwithstanding any other provision of this Agreement, to the maximum extent permitted by the Delaware General Corporation Law, Indemnitee shall be entitled to indemnification against all Expenses actually and reasonably incurred or suffered by Indemnitee or on Indemnitee's behalf if Indemnitee appears as a witness or otherwise incurs legal expenses as a result of or related to Indemnitee's service as a director or officer of the Company, in any threatened, pending or completed action, suit or proceeding, whether of a civil, criminal, administrative,

investigative, legislative or other nature, to which Indemnitee neither is, nor is threatened to be made, a party.

8. **Determination of Entitlement to Indemnification.** To receive indemnification under this Agreement, Indemnitee shall submit a written request to [the Secretary of] the Company. Such request shall include documentation or information which is necessary for such determination and which is reasonably available to Indemnitee. Upon written request by Indemnitee for indemnification pursuant to Sections 3, 4, 5, 6 or [7] the entitlement of Indemnitee to indemnification, to the extent not provided pursuant to the terms of this Agreement, shall be determined by the following person or persons who shall be empowered to make such determination: (a) the Board of Directors of the Company by a majority vote of Disinterested Directors, whether or not such majority constitutes a quorum; (b) a committee of Disinterested Directors designated by a majority vote of such directors, whether or not such majority constitutes a quorum; (c) if there are no Disinterested Directors, or if the Disinterested Directors so direct, by Independent Counsel in a written opinion to the Board of Directors, a copy of which shall be delivered to Indemnitee; (d) the stockholders of the Company; or (e) in the event that a Change in Control has occurred, by Independent Counsel in a written opinion to the Board of Directors, a copy of which shall be delivered to Indemnitee. Such Independent Counsel shall be selected by the Board of Directors and approved by Indemnitee, except that in the event that a Change in Control has occurred, Independent Counsel shall be selected by Indemnitee. Upon failure of the Board so to select such Independent Counsel or upon failure of Indemnitee so to approve (or so to select, in the event that a Change in Control has occurred), such Independent Counsel shall be selected upon application to a court of competent jurisdiction. The determination of entitlement to indemnification shall be made not later than 30 calendar days after receipt by the Company of a written request for indemnification. Any amounts incurred by Indemnitee in connection with a request for indemnification or payment of Expenses hereunder, under any other agreement, any provision of the Company's [**Certificate of Incorporation**] [**and**] [**By-laws**] or any directors' and officers' liability insurance, shall be borne by the Company. The Company hereby indemnifies Indemnitee for any such amounts and agrees to hold Indemnitee harmless therefrom irrespective of the outcome of the determination of Indemnitee's entitlement to indemnification. If the person making such determination shall determine that Indemnitee is entitled to indemnification as to part (but not all) of the application for indemnification, such person shall reasonably prorate such partial indemnification among the claims, issues or matters at issue at the time of the determination.

9. **Presumptions and Effect of Certain Proceedings.** The Secretary of the Company shall, promptly upon receipt of Indemnitee's written request for indemnification, advise in writing the Board of Directors or such other person or persons empowered to make the determination as provided in Section 8 that Indemnitee has made such request for indemnification. Upon making such request for indemnification, Indemnitee shall be presumed to be entitled to indemnification hereunder and the Company shall have the burden of proof in making any determination contrary to such presumption. If the person or persons so empowered to make such determination shall have failed to make the requested determination with respect to indemnification within 30 calendar days after receipt by the Company of such request, a requisite determination of entitlement to indemnification shall be deemed to have been made and Indemnitee shall be absolutely entitled to such indemnification, absent actual and material fraud in the request for indemnification. The termination of any Proceeding described in Sections 3 or 4 by judgment, order, settlement or conviction, or upon a plea of *nolo contendere* or its equivalent, shall not, of itself: (a) create a presumption that Indemnitee did not act in good faith and in a manner which Indemnitee reasonably believed to be in or not opposed to the best interests of the Company, or, with respect to any criminal Proceeding, that Indemnitee had reasonable cause to believe that Indemnitee's conduct was unlawful; or (b) otherwise adversely affect the rights of Indemnitee to indemnification except as may be provided herein.

10. Remedies of Indemnitee in Cases of Determination not to Indemnify or to Advance Expenses. In the event that a determination is made that Indemnitee is not entitled to indemnification hereunder or if payment has not been timely made following a determination of entitlement to indemnification pursuant to Sections 8 and 9, or if Expenses are not paid pursuant to Section 15, Indemnitee shall be entitled to final adjudication in a court of competent jurisdiction of entitlement to such indemnification or payment. Alternatively, Indemnitee at Indemnitee's option may seek an award in an arbitration to be conducted by a single arbitrator pursuant to the rules of the American Arbitration Association, such award to be made within 60 calendar days following the filing of the demand for arbitration. The Company shall not oppose Indemnitee's right to seek any such adjudication or award in arbitration or any other claim. The determination in any such judicial proceeding or arbitration shall be made *de novo* and Indemnitee shall not be prejudiced by reason of a determination (if so made) pursuant to Sections 8 or 9 that Indemnitee is not entitled to indemnification. If a determination is made or deemed to have been made pursuant to the terms of Section 8 or 9 that Indemnitee is entitled to indemnification, the Company shall be bound by such determination and is precluded from asserting that such determination has not been made or that the procedure by which such determination was made is not valid, binding and enforceable. The Company further agrees to stipulate in any such court or before any such arbitrator that the Company is bound by all the provisions of this Agreement and is precluded from making any assertions to the contrary. If the court or arbitrator shall determine that Indemnitee is entitled to any indemnification or payment of Expenses hereunder, the Company shall pay all Expenses actually and reasonably incurred by Indemnitee in connection with such adjudication or award in arbitration (including, but not limited to, any appellate proceedings).

11. Other Rights to Indemnification. Indemnification and payment of Expenses provided by this Agreement shall not be deemed exclusive of any other rights to which Indemnitee may now or in the future be entitled under any provision of the Certificate of Incorporation or By-laws of the Company, vote of stockholders or Disinterested Directors, provision of law, agreement or otherwise.

12. Expenses to Enforce Agreement. In the event that Indemnitee is subject to or intervenes in any action, suit or proceeding in which the validity or enforceability of this Agreement is at issue or seeks an adjudication or award in arbitration to enforce Indemnitee's rights under, or to recover damages for breach of, this Agreement, Indemnitee, if Indemnitee prevails in whole or in part in such action, suit or proceeding, shall be entitled to recover from the Company and shall be indemnified by the Company against any Expenses actually and reasonably incurred by Indemnitee.

13. Continuation of Indemnity. All agreements and obligations of the Company contained herein shall continue during the period Indemnitee is a director, officer, employee, agent or fiduciary of the Company or is serving at the request of the Company as a director, officer, employee, agent or fiduciary of any other entity (including, but not limited to, another corporation, partnership, joint venture or trust) and shall continue thereafter with respect to any possible claims based on the fact that Indemnitee was a director, officer, employee, agent or fiduciary of the Company or was serving at the request of the Company as a director, officer, employee, agent or fiduciary of any other entity (including, but not limited to, another corporation, partnership, joint venture or trust). This Agreement shall be binding upon all successors and assigns of the Company (including any transferee of all or substantially all of its assets and any successor by merger or operation of law) and shall inure to the benefit of the heirs, personal representatives and estate of Indemnitee.

14. Notification and Defense of Claim. Promptly after receipt by Indemnitee of notice of any Proceeding, Indemnitee shall, if a claim in respect thereof is to be made against the Company under this Agreement, notify the Company in writing of the commencement thereof; but the omission so to notify

the Company shall not relieve it from any liability that it may have to Indemnitee. Notwithstanding any other provision of this Agreement, with respect to any such Proceeding of which Indemnitee notifies the Company:

(a) The Company shall be entitled to participate therein at its own expense; and

(b) Except as otherwise provided in this Section 14(b), to the extent that it may wish, the Company, jointly with any other indemnifying party similarly notified, shall be entitled to assume the defense thereof, with counsel satisfactory to Indemnitee. After notice from the Company to Indemnitee of its election so to assume the defense thereof, the Company shall not be liable to Indemnitee under this Agreement for any expenses of counsel subsequently incurred by Indemnitee in connection with the defense thereof except as otherwise provided below. Indemnitee shall have the right to employ Indemnitee's own counsel in such Proceeding, but the fees and expenses of such counsel incurred after notice from the Company of its assumption of the defense thereof shall be at the expense of Indemnitee unless (i) the employment of counsel by Indemnitee has been authorized by the Company, (ii) Indemnitee shall have reasonably concluded that there may be a conflict of interest between the Company and Indemnitee in the conduct of the defense of such Proceeding, or (iii) the Company shall not within 60 calendar days of receipt of notice from Indemnitee in fact have employed counsel to assume the defense of the Proceeding, in each of which cases the fees and expenses of Indemnitee's counsel shall be at the expense of the Company. The Company shall not be entitled to assume the defense of any Proceeding brought by or on behalf of the Company or as to which Indemnitee shall have made the conclusion provided for in (ii) above; and

(c) If the Company has assumed the defense of a Proceeding, the Company shall not be liable to indemnify Indemnitee under this Agreement for any amounts paid in settlement of any Proceeding effected without the Company's written consent. The Company shall not settle any Proceeding in any manner that would impose any penalty or limitation on or disclosure obligation with respect to Indemnitee without Indemnitee's written consent. Neither the Company nor Indemnitee shall unreasonably withhold its consent to any proposed settlement.

15. **Advancement of Expenses.** All Expenses incurred by Indemnitee in advance of the final disposition of any Proceeding shall be paid by the Company at the request of Indemnitee. To receive payment of Expenses under this Agreement, Indemnitee shall submit a written request to [the Secretary of] the Company. Such request shall reasonably evidence the Expenses incurred by Indemnitee and shall include or be accompanied by an undertaking, by or on behalf of Indemnitee, to reimburse such amounts if it is ultimately determined, after all appeals by a court of competent jurisdiction, that Indemnitee is not entitled to be indemnified against such Expenses by the Company as provided by this Agreement or otherwise. Indemnitee's undertaking to reimburse any such amounts is not required to be secured. Each such payment of Expenses shall be made within 20 calendar days after the receipt by the Company of such written request. Indemnitee's entitlement to such Expenses shall include those incurred in connection with any action, suit or proceeding by Indemnitee seeking a judgment in court or an adjudication or award in arbitration pursuant to Section 10 of this Agreement (including the enforcement of this provision) to the extent the court or arbitrator shall determine that Indemnitee is entitled to payment of Expenses hereunder.

16. **Separability; Prior Indemnification Agreements.** If any provision or provisions of this Agreement shall be held to be invalid, illegal or unenforceable for any reason whatsoever (a) the validity, legality

and enforceability of the remaining provisions of this Agreement (including without limitation, all portions of any paragraphs of this Agreement containing any such provision held to be invalid, illegal or unenforceable, that are not by themselves invalid, illegal or unenforceable) shall not in any way be affected or impaired thereby, and (b) to the fullest extent possible, the provisions of this Agreement (including, without limitation, all portions of any paragraph of this Agreement containing any such provision held to be invalid, illegal or unenforceable, that are not themselves invalid, illegal or unenforceable) shall be construed so as to give effect to the intent of the parties that the Company provide protection to Indemnitee to the fullest enforceable extent. This Agreement shall supersede and replace any prior indemnification agreements entered into by and between the Company and Indemnitee and any such prior agreements shall be terminated upon execution of this Agreement.

17. **Headings; References; Pronouns.** The headings of the sections of this Agreement are inserted for convenience only and shall not be deemed to constitute part of this Agreement or to affect the construction thereof. References herein to section numbers are to sections of this Agreement. All pronouns and any variations thereof shall be deemed to refer to the masculine, feminine, neuter, singular or plural as appropriate.

18. **Definitions.** For purposes of this Agreement:

(a) "Change in Control" means a change in control of the Company occurring after the date of this Agreement of a nature that would be required to be reported in response to Item 5.01 of Current Report on Form 8-K (or in response to any similar item on any similar schedule or form) promulgated under the Securities Exchange Act of 1934, whether or not the Company is then subject to such reporting requirement; provided, however, that, without limitation, a Change of Control shall be deemed to have occurred if after the date of this Agreement (i) any "person" (as such term is used in Sections 13(d) and 14(d) of the Securities Exchange Act of 1934) becomes the "beneficial owner" (as defined in Rule 13d-3 under the Securities Exchange Act of 1934), directly or indirectly, of securities of the Company representing [30%] or more of the combined voting power of the Company's then outstanding securities without the prior approval of at least two-thirds of the members of the Board of Directors in office immediately prior to such person attaining such percentage, (ii) the Company is a party to a merger, consolidation, sale of assets or other reorganization, or a proxy contest, as a consequence of which members of the Board of Directors in office immediately prior to such transaction or event constitute less than a majority of the Board of Directors thereafter, or (iii) during any period of two consecutive years, individuals who at the beginning of such period constituted the Board of Directors (including for this purpose any new director whose election or nomination for election by the Company's stockholders was approved by a vote of at least two-thirds of the directors then still in office who were directors at the beginning of such period) cease for any reason to constitute at least a majority of the Board of Directors.

(b) "Disinterested Director" means a director of the Company who is not or was not a party to the Proceeding in respect of which indemnification is being sought by Indemnitee.

(c) "Expenses" includes, without limitation, expenses incurred in connection with the defense or settlement of any investigation, action, suit or other proceeding, including any judicial, administrative, investigative, legislative or other proceedings, and appeals, attorneys' fees, witness fees and expenses, fees and expenses of accountants and other

advisors, retainers and disbursements and advances thereon, the premium, security for, and other costs relating to any bond (including cost bonds, appraisal bonds or their equivalents), and any expenses of establishing a right to indemnification or advancement under Sections 8, 10, 12 and 15 above but shall not include the amount of judgments, penalties, fines or amounts paid in settlement.

(d) "Independent Counsel" means a law firm or a member of a law firm that neither is presently nor in the past five years has been retained to represent: (i) the Company or Indemnitee in any matter material to either such party, or (ii) any other party to the Proceeding giving rise to a claim for indemnification hereunder. Notwithstanding the foregoing, the term "Independent Counsel" shall not include any person who, under the applicable standards of professional conduct then prevailing, would have a conflict of interest in representing either the Company or Indemnitee in an action to determine Indemnitee's right to indemnification under this Agreement.

(e) "Proceeding" includes any threatened, pending or completed investigation, action, suit or other proceeding, whether brought in the name of the Company or otherwise, against Indemnitee, whether of a civil, criminal, administrative, investigative, legislative or other nature, including, but not limited to, actions, suits or proceedings in which Indemnitee may be or may have been involved as a party or otherwise, by reason of the fact that Indemnitee is or was a director, officer, employee, agent or fiduciary of the Company, or is or was serving, at the request of the Company, as a director, officer, employee, agent or fiduciary of any other entity, including, but not limited to, another corporation, partnership, joint venture or trust, or by reason of anything done or not done by Indemnitee in any such capacity, whether or not Indemnitee is serving in such capacity at the time any liability or expense is incurred for which indemnification or reimbursement can be provided under this Agreement.

19. Other Provisions.

(a) This Agreement shall be interpreted and enforced in accordance with the laws of Delaware.

(b) This Agreement may be executed in one or more counterparts, each of which shall for all purposes be deemed to be an original but all of which together shall constitute one and the same Agreement. Only one such counterpart signed by the party against whom enforceability is sought needs to be produced as evidence of the existence of this Agreement.

(c) This Agreement shall not be deemed an employment contract between the Company and any Indemnitee who is an officer of the Company, and, if Indemnitee is an officer of the Company, Indemnitee specifically acknowledges that Indemnitee may be discharged at any time for any reason, with or without cause, and with or without severance compensation, except as may be otherwise provided in a separate written contract between Indemnitee and the Company.

(d) Upon a payment to Indemnitee under this Agreement, the Company shall be subrogated to the extent of such payment to all of the rights of Indemnitee to recover against any person for such liability, and Indemnitee shall execute all documents and instruments required and shall take such other actions as may be necessary to secure such

rights, including the execution of such documents as may be necessary for the Company to bring suit to enforce such rights.

(e) No supplement, modification or amendment of this Agreement shall be binding unless executed in writing by both parties hereto. No waiver of any of the provisions of this Agreement shall be deemed or shall constitute a waiver of any other provisions hereof (whether or not similar) nor shall such waiver constitute a continuing waiver.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement on and as of the day and year first above written.

The Company

By _____

Indemnitee

FOOTNOTES:

(n2)Footnote 1. This is a fairly common limitation on indemnification and advancement rights and could be included here to the extent a company has such a limitation in its charter or bylaws.

(n3)Footnote 2. To be included if the limitation in Section 2(d) *above* is included.

(n4)Footnote 3. This provision is optional. In weighing whether to include it, a company should consider that covering expenses of directors and officers who serve as witnesses in actions to which they are not a party could result in substantial costs for the company.

(n5)Footnote 4. To be included if the company includes the witness provision in Section 7 *above*.

CHAPTER 6 CORPORATE GOVERNANCE GUIDELINES FOR BOARD PRACTICES AND PROCEDURES

1-6 Corporate Governance: Law and Practice § 6.01

AUTHOR: Holly J. Gregory

§ 6.01 Corporate Governance Guidelines: Introduction

To achieve the accountability that is the foundation of good corporate governance, the board must consider and maintain a consistent approach to monitoring and guiding the corporation's affairs. Formalizing board policies and procedures through the articulation of a set of corporate governance guidelines helps the board formulate its ideas about how it will govern and assures consistency. Formalized guidelines also provide a useful means for communicating the board's governance approach to shareholders and other interested observers. This chapter discusses elements often addressed in corporate governance guidelines to comport with contemporary views of effective governance practices as well as with recently imposed listing requirements of the New York Stock Exchange ("NYSE").

[1] Corporate Governance Guidelines: Overview

The law holds the board of directors responsible for monitoring management to assure shareholders that corporate assets are being used in the interests of the corporation.ⁿ¹ To meet this responsibility the board must support entrepreneurial risk-taking on the one hand, while holding management accountable on the other. The articulation of clear corporate governance principles assists the board in achieving this balance by:

- Establishing a culture that fosters objective judgment;
- Delineating roles and focusing the board on specific governance tasks;
- Providing a framework for decision-making and crisis response;
- Facilitating effective legal and regulatory compliance;
- Encouraging ongoing evaluation of governance structures and processes; and
- Maintaining governance continuity.

In addition, disclosure of corporate governance principles helps assure investors that the board understands and is

committed to its responsibilities.

Any one of these positive effects ought to cause a board to consider articulating its corporate governance principles in a formal written set of guidelines. In addition, interest in guidelines has been generated by legislative and regulatory activity at the federal level that has raised the bar of acceptable corporate governance practices for public companies.ⁿ² More specifically, in 2003 the NYSE adopted new listing standards that, among other things, require domestic listed companies to adopt and disclose a set of "corporate governance guidelines."ⁿ³

[2] Codes of Best Practice

Interest in the role of the board and, in particular, the role of independent directors began to accelerate in the 1970s, when a series of corporate failures and scandals at a number of U.S. corporations led to passage of the Foreign Corrupt Practices Act of 1977 and the adoption by the NYSE of audit committee requirements.ⁿ⁴ As this interest grew throughout the past decade and a half, a number of legal, management, director and investor organizations articulated ideas about governance "best practice," often in published statements generically described as "codes of best practice." The American Law Institute, the Business Roundtable, the National Association of Corporate Directors ("NACD"), the Conference Board, and the Business Law Section of the American Bar Association have published recommendations on improving practices and procedures in corporate governance that, to varying extents, provide the basis for increasing a board's ability and motivation to monitor managerial performance.ⁿ⁵ These codes of best practice focus on how to ensure that the board is positioned as an entity separate and distinct from corporate management to bring informed and objective judgment to its decision-making. Codes of best practice have long expressed consensus as to the importance of director independence and, specifically, the need for non-management directors to control the audit, compensation, and nominating functions, the performance evaluation of the CEO and the determination of the board's own governance processes.

The "soft regulation" provided by these codes of best practice is in keeping with the regulatory philosophy that "one size does not fit all" when it comes to board practices. By definition, codes of best practice provide standards to aspire to. This does not mean that these codes of best practice lack force and effect. Even though compliance with substantive code provisions is wholly voluntary, reputation and market forces have focused corporate and investor attention on governance issues and have provided compliance pressures.ⁿ⁶ Over time, recommended best practices have often become the norm and in many instances the basis for minimum standards, as, for example, reflected in the amendments to the listing rules of the NYSE and The NASDAQ Stock Market ("NASDAQ").ⁿ⁷ They may also influence judicial expectations about board behavior.ⁿ⁸

The structure and practice of corporate boards of directors has been a particular focus of institutional activism in recent years. Coincident with their growing dominance as shareholders of publicly traded corporations, institutional investors have become active in corporate governance reform efforts. Increased sophistication about the use of shareholder power--and limits on their ability to sell the stock of underperforming portfolio companies--has focused key institutional investors on improving the accountability of corporate boards and managers. In recent years, two of the most influential institutional investors, the California Public Employees' Retirement System ("CalPERS") the largest U.S. public pension fund, with more than U.S. \$200 billion in assets under management) and the Teachers Insurance and Annuity Association-College Retirement Equities Fund ("TIAA-CREF"), a private pension fund that is the largest U.S. pension fund, public or private, with assets of more than U.S. \$370 billion under management, have issued guideline documents that express their expectations about how the board of directors carries out its functions.ⁿ⁹ Also in recent years, the Council of Institutional Investors ("CII") (representing over 140 pension fund members with more than U.S. \$3 trillion in assets under management) and the American Federation of Labor and Congress of Industrial Organizations ("AFL-CIO") (representing over 9 million persons organized in labor unions) have issued guidelines relating to the corporate governance practices of the board.ⁿ¹⁰ In emphasizing the need for directors to exert independent influence over management while abjuring a "one-size-fits-all" approach, these documents tend to express philosophies similar to the board best practice suggestions issued by the NACD, the Business Roundtable and others.

Nonetheless, some differences remain on topics such as who should qualify as an "independent director," and whether and to what extent independent board leadership is called for.

[3] The Corporate Governance Guideline Movement

In early 1994, the General Motors board of directors issued a set of corporate governance guidelines it had designed after a management crisis. The guidelines set forth procedures and structures the board designed to assist it in active and independent monitoring of management performance.¹¹ Key provisions included:¹²

- Independent leadership in the form of either a separate independent chairman or a lead independent director;
- "Executive sessions" of the independent directors without management present at least two or three times per year to discuss management performance and to evaluate the chief executive officer ("CEO");
- CEO evaluation based on objective criteria, including the performance of the business and accomplishment of its strategic objectives;
- Annual board self-evaluation;
- Independent director control (through a committee) over board governance processes;
- Separate chairman or lead director input into setting the board agenda and determining the board's information needs (together with the CEO), with additional input from board members;
- Concise information on agenda items circulated in advance, with board meeting time reserved for discussion;
- Independent director control of the selection of board candidates (with input from the CEO); and
- Invitations to join the board extended by the board itself.

GM's efforts caught the attention of CalPERS, who asked the 300 largest public companies in its portfolio if they had adopted similar guidelines and then graded and published the responses. The "grades" ranged from "A+" to "F," based on whether, and to what degree, the response indicated board involvement in developing an independent monitoring relationship between the board and management, and whether that relationship was formally established in a set of guidelines. The considerable publicity generated by CalPERS caused a number of boards to adopt and publish guidelines and generally spurred interest in governance practices among the investor community.¹³

By 2003, just prior to adoption of the NYSE's requirement that domestic listed companies adopt and disclose guidelines, the adoption of corporate governance guidelines had become a common practice among large Fortune 1000 companies listed on the NYSE and NASDAQ.¹⁴

FOOTNOTES:

(n1)Footnote 1. *See* Delaware General Corporation Law ("DGCL") § 141(a) (*Del. Code Ann. tit. 8, § 141(a)*) (revised 1974)) [hereinafter DGCL § 141]. Directors owe fiduciary duties to the corporation and its common shareholders. *Reylon, Inc. v. MacAndrews & Forbes Holdings, Inc.*, 506 A.2d 173 (*Del. 1985*) ; *Jackson Nat'l Life Ins. Co. v. Kennedy*, 741 A.2d 377 (*Del. Ch. 1999*) .

The inherent tension between managerial and shareholder interests forms the central problem of corporate governance. As observed by Adam Smith in 1776 and Berle and Means in 1932, the human tendency to benefit oneself, which is at the heart of economic activity, may result in managerial self-dealing, entrenchment, or the inefficient use of corporate assets. Adam Smith, *An Inquiry Into The Nature and Cause of the Wealth of Nations*, Vol. II, 264-65 (Edwin Canaan edition, 1776); Adolf A. Berle & Gardiner C. Means, *The Modern Corporation and Private Property* 123 (1932). *See also* Ira Millstein & Paul W. MacAvoy, *The Active Board of Directors and Performance of the Large Publicly Traded Corporation*, 98 *Colum. L. Rev.* 1283, 1292 (1998) ("[T]he board is the agent for shareholders and monitors management to assure that managerial decisions are in the best interests of shareholders.").

(n2)Footnote 2. *See generally* the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"), 15 U.S.C. §§ 78, 7201 *et seq.* (2003), and related Securities and Exchange Commission ("SEC") rules.

(n3)Footnote 3. Under revisions to the NYSE listing rules approved by the SEC on November 4, 2003 and amendments approved by the SEC on November 3, 2004, domestic listed companies are required to adopt and disclose a set of corporate governance guidelines. NYSE Listed Company Manual § 303A.09. Commentary to § 303A.09 provides that each company's website must include its guidelines and its key committee charters, and that the company's annual report on Form 10-K filed with the SEC "must state that the foregoing information is available on its website, and that the information is available in print to any shareholder who requests it." Listed foreign private issuers must disclose any significant ways in which their corporate governance practices differ from those required of domestic companies. NYSE Listed Company Manual § 303A.11. The entire NYSE Listed Company Manual § 303A, Corporate Governance Standards, is reproduced in Appendix B to this treatise.

The corporate governance listing standards of The NASDAQ Stock Market ("NASDAQ") do not require that domestic listed companies adopt and disclose a set of corporate governance guidelines. However, a number of NASDAQ companies do so as a matter of best practice. *See, e.g.*, Korn/Ferry Int'l, 31st Annual Board of Directors Study 33 (2004) [hereinafter "2004 Korn/Ferry Study"] (96 percent of respondents report that their boards have adopted written corporate governance guidelines-up from 71 percent in 2002).

(n4)Footnote 4. Ira M. Millstein & Paul W. MacAvoy, *The Recurrent Crises in Corporate Governance* (Chapter 3) 20-22 (2003) (citations omitted):

In the early 1970s, the SEC launched an investigation of Penn Central Railroad: 'the Enron failure of its day.' The SEC criticized the Penn Central board for failing to oversee the company's operations, for lacking independence from management, and for being unable to identify the company's financial problems.

Following the Penn Central investigation, the SEC began to focus on financial reporting and board oversight of management in a number of other corporations. While the link between Penn Central and SEC focus on audit procedures was not totally clear in its enforcement actions, the SEC in general began to require that boards form committees, composed wholly of independent directors, designed to monitor compliance with SEC regulations on financial reporting. Then, in 1977, the SEC approved a New York Stock Exchange rule requiring all listed US companies to form audit committees comprised of a majority of independent directors. The new listing rule marked the beginning of the emergence of independent

directors as a key component of governance change.

The board's responsibilities gained further attention in the mid-1980s when the surge in corporate takeover activity, and related court actions, led the SEC to require boards to pursue the interests of investors seeking to sell their shares to acquiring firms when management resisted a takeover. The SEC made board positions contestable when it revised the proxy rules for voting shares in annual board elections to allow shareholders to join together and publicize their voting positions against a management initiative. With increasing sophistication in the use of shareholder power-and recognition of their limited ability to sell the stock of under-performing portfolio companies-key institutional investors began to work to improve the accountability of corporate managers.

Finally, the decision by the General Motors (GM) board to publish 'governance guidelines' after it had discharged a non-performing CEO-and the decision by CalPERS to ask its portfolio companies whether they had considered adopting guidelines similar to the GM guidelines-brought the issue of governance and corporate performance to the attention of all large US corporations.

See Foreign Corrupt Practices Act of 1977, 15 U.S.C.A. §§ 78a-78ff (1977, as amended). In 1977, the SEC approved a NYSE listing rule requiring that each listed company have an audit committee in place as of June 30, 1978. NYSE Listed Company Manual § 901.01, II, 7 ("The Corporation will maintain an audit committee in conformity with Exchange requirements (effective 6-30-78)").

(n6)Footnote 6. Issues that institutional shareholders have focused on in recent years include: improving the quality of executive compensation disclosures (details regarding pay for performance; dates of stock option grants; and a company's relationship with a compensation consultant); providing shareholders with access to proxy statements; implementing majority voting standards (discussed in more detail in *Section 6.03[4]*) and declassified boards; requiring policies designed to recoup compensation awarded to executives during periods of fraud or a restatement of financial statements; eliminating supermajority voting requirements for actions such as amending a company's corporate documents; and requiring shareholder approval for a variety of corporate actions (such as approval to renew or adopt shareholder rights plans).

(n7)Footnote 7. On November 4, 2003 the SEC approved the corporate governance standards filed by the NYSE and NASDAQ. *See* SEC Release No. 34-48745 (Nov. 4, 2003). On November 3, 2004 the SEC approved amendments

to the NYSE corporate governance standards. *See* SEC Release No. 34-50625 (Nov. 3, 2004). The entire NYSE Listed Company Manual § 303A is reproduced in Appendix B to this treatise. Note that on November 23, 2005, the NYSE filed with the SEC proposed rule changes to Section 303A of the NYSE Listed Company Manual concerning the standards for determining director independence and related disclosure requirements (File No. SR-NYSE-2005-81). Partly in response to the amendments made by the SEC to its director independence disclosure requirements in August 2006 (*i.e.*, new Item 407 of Regulation S-K) on June 20, 2007 the NYSE filed with the SEC an amendment to its proposed changes (File No. SR-NYSE-2005-81 Amendment No. 2). On July 28, 2006, Nasdaq filed with the SEC proposed amendments relating to the definition of "independent director." (Rel. No. 34-54333; SEC File No. SR-NASDAQ-2006-021). The SEC approved these amendments on October 6, 2006 (Rel. No. 34-54583, File No. SR-NASDAQ-2006-021). On October 3, 2006 Nasdaq filed with the SEC proposed rule changes to Nasdaq's definition of "independent director" (File No. SR-NASDAQ-2006-041) and on March 2, 2007 filed Amendment No. 1 to the proposed rule change which would increase the "bright line" test with respect to a director's receipt of compensation from the issuer from \$60,000 to \$100,000. On March 13, 2007 the SEC granted approval to this rule change on an accelerated basis (Release No. 34-55463, File No. SR-NASDAQ-041).

General Motors Board of Directors, Corporate Governance Guidelines on Significant Corporate Governance Issues [hereinafter GM Corporate Governance Guidelines] (1994, most recently revised May 2007) *available at* www.gm.com/company/investor_information/corp_gov/guidelines.html. The GM Corporate Governance Guidelines adopted in 1994 were consistent with principles of board governance advocated by a coalition of lawyers for large public companies and leading institutional investors:

- The board of directors should evaluate the performance of the CEO regularly against established goals and strategies.
- This evaluation should be performed by "outside" directors.
- All outside directors should meet alone, at least once a year, coordinated by a leader.
- Directors should establish appropriate qualifications for board members and communicate those qualifications clearly to shareholders.
- Outside directors should screen and recommend candidates based on qualifications established by the board.

July-Aug. 1991, at 141-143.

(n13)Footnote 13. The corporate governance practices of public company boards are highly scrutinized by large institutional shareholders such as CalPERS, TIAA-CREF and the AFL-CIO, as well as by shareholder groups such as CII, and proxy voting advisers like Institutional Shareholder Services, Inc. ("ISS"). Ratings services (ISS, GovernanceMetrics International ("GMI"), Standard & Poor's and Moody's Investors Service) are also focusing on governance practices and, as a result, a board's ability to demonstrate and communicate a commitment to good governance practices has become an important aspect of investor relations. "Governance experts say the rating agencies are beginning to address the fact that issues such as lazy boards of directors, dominant chief executives or bloated pay structures can threaten companies' success--and investor wealth--as seriously as excess debt or flawed business plans." Ben White, *Bond-Rating Firms Get Into Governance; Analysts Assess Corporate Practices*, Wash. Post, Feb.15, 2003, at E01. ISS has developed a Corporate Governance Quotient ("CGQ") which uses 61 criteria sorted into eight core categories (including board structure, audit, charter and bylaw provisions, laws of the state of incorporation, executive and director compensation, qualitative factors, D&O stock ownership, and director education) to evaluate corporate governance issues. ISS Corporate Governance Quotient *available at* www.isscgq.com/abouttheratings.htm. GMI takes into account many of the same criteria as ISS, but weights more than 600 variables, including environmental and workplace safety and earnings management. Phyllis Plitch, *Corporate Governance Gets a Rating*, Wall St. J., Feb. 26, 2003, at B6G; *See* The GMI Rating Process: Information for Rated Companies *available at* [www.gmiratings.com/\(u12xt5yhgi345rjo5lvfp545\)/Default.aspx](http://www.gmiratings.com/(u12xt5yhgi345rjo5lvfp545)/Default.aspx). Standard & Poor's launched its governance-rating service in 1998. For a fee, "domestic companies can hire S&P to come in and perform an extensive review of their corporate governance practices, from director independence to executive pay and benefits, to shareholders rights and takeover defense mechanisms." CHAPTER 6 CORPORATE GOVERNANCE GUIDELINES FOR BOARD PRACTICES AND PROCEDURES

1-6 Corporate Governance: Law and Practice § 6.02

AUTHOR: Holly J. Gregory

§ 6.02 Corporate Governance Guideline Elements Required by the NYSE

Section 303A.09 of the NYSE Listed Company Manual provides that: "Listed companies must adopt and disclose corporate governance guidelines."ⁿ¹ The commentary to Section 303A.09 notes that no single set of guidelines would be appropriate for every company.ⁿ² Various factors unique to a company (including, among others, size, organizational structure, line of business and applicable requirements of local, regional or national law) may affect the provisions that should be addressed. However, there are certain elements which must be addressed.ⁿ³ This section discusses the elements required by the NYSE to be addressed in published guidelines, together with clearly related topics.

Note that corporate governance guidelines are generally meant to serve as a practical tool, within the larger framework of laws and regulations that define the board's role and its obligations. Some companies' guidelines include language to indicate that they are not intended, and should not be read, to place additional legal obligations on the board.ⁿ⁴

[1] Director Responsibilities

Corporate governance guidelines commonly begin with a recitation of the board's responsibilities, often including statements about the corporate objective, accountability to shareholders, relationships with employees, customers, suppliers and the broader community, and director duties of care, loyalty and good faith.ⁿ⁵

The NYSE Listed Company Manual requires that listed companies address the topic of director responsibilities in their corporate governance guidelines in a manner that "clearly articulate[s] what is expected from a director, including basic duties and responsibilities with respect to attendance at board meetings and advance review of meeting materials."ⁿ⁶

Directors' responsibilities fall into two major categories:

- *Decision Making on Key Matters.* Generally, the board decides what operations the corporation will pursue, its long term business plans, which officers will run the corporation, where and how they will run the business and how the corporation will organize itself to benefit the shareholders.ⁿ⁷ Generally, directors have the ultimate responsibility for the management of the enterprise and they typically satisfy

their obligations by appointing qualified, professional managers, establishing or approving goals and plans and monitoring performance.

■ *Oversight.* Directors have a duty to oversee the management of the corporation. This requires that they monitor the performance of the officers of the corporation in managing the corporation's business and affairs. However, directors may rely in good faith upon information provided by the officers.⁸ Directors also have a duty to create reporting systems designed to discourage and detect the fraudulent, illegal or criminal activities of subordinates.⁹

By articulating board responsibilities, guidelines remind directors of the stewardship they have undertaken. Specific board duties typically addressed throughout guidelines include:¹⁰

- Approving a corporate philosophy and mission;
- Selecting, monitoring, evaluating, choosing goals for, compensating and--if necessary--replacing the CEO and in some circumstances, other principal senior executives;
- Reviewing and approving management's strategic and business plans and monitoring corporate performance against the strategic and business plans to evaluate whether the business is being properly managed;
- Reviewing and approving the corporation's financial objectives and major corporate plans and actions;
- Reviewing and approving material transactions not in the ordinary course of business;
- Reviewing and approving major changes in the auditing and accounting principles and practices to be used in preparing the corporation's financial statements;
- Providing oversight of risk assessment, internal controls and processes designed to promote legal and ethical compliance and monitoring compliance with those policies;
- Articulating expectations and standards related to corporate culture and the "tone at the top";
- Understanding the corporation's financial statements and monitoring the adequacy of its financial and other internal controls, as well as its disclosure controls and procedures;
- Developing and implementing succession plans for the CEO;
- Reviewing the process for providing adequate and timely financial and operational information to management, directors and shareholders;
- Establishing the composition of the board and its committees and determining governance practices;
- Retaining independent advisors in performance of committee duties and decision-making;
- Assessing the effectiveness of the board and its committees; and
- Performing any other functions prescribed by law.

Guidelines may list additional activities related to the firm's specific business operations, but further elaboration as to board tasks is relatively uncommon, and usually reserved to committee charters.

Guidelines sometimes also address the care, loyalty and good faith required of directors by addressing expectations concerning regular meeting attendance, time commitment, preparation, the need to be inquisitive and seek out information, as well as the need to avoid and disclose conflicts, hold information confidentially and handle corporate opportunities appropriately.

[2] Director Qualification Standards

The NYSE Listed Company Manual requires that corporate guidelines address director qualification standards, and, at minimum, reflect the independence requirements set forth in NYSE rules.ⁿ¹¹ The NYSE also advises that guidelines may address other director qualification standards, including limits on the number of boards a director may serve and director tenure, retirement and succession.ⁿ¹²

[a] General Qualification Criteria

A company's board may choose to address qualification criteria generally in its corporate governance guidelines or may give more expansive treatment to the subject of director qualifications. In either event, the task of developing specific requirements for board qualifications usually rests with an independent nominating/corporate governance committee.ⁿ¹³ While recognizing that suitable qualifications depend on the unique circumstances and business considerations affecting the company, the NACD suggests that qualifications include personal characteristics such as integrity, accountability, judgment, confidence, high performance standards and financial literacy.ⁿ¹⁴ In addition, qualifications should provide for an adequate mix of core competencies on the board in areas of accounting and finance, business judgment, management, crisis response, industry knowledge, international markets, leadership and strategic vision.ⁿ¹⁵ The NACD advises that boards should select individuals on the basis of their commitment to learn the business of the company, meet any stock ownership requirements and devote the requisite time and attention.ⁿ¹⁶ The NACD also advocates that consideration be given to (i) the ability to "approach others assertively, responsibly and supportively;" and (ii) the "willingness to raise tough questions in a manner that encourages open discussion."ⁿ¹⁷ It suggests that a director's suitability be re-evaluated whenever he or she resigns from or changes employment.ⁿ¹⁸

The CalPERS Core Principles and Guidelines similarly recommend that a board evaluate each nominee on the basis of his or her ability to contribute to the mix of characteristics, experience, diverse perspectives and skills most appropriate for the company.ⁿ¹⁹ Some guidelines note that the corporation's need for particular backgrounds and experiences may change over time, and the board (or the nominating committee) monitors the mix of skills and experience that directors bring to the board, to ensure that the board has the necessary tools to perform its oversight function effectively.ⁿ²⁰

[b] Independence

Both the NYSE listing rules and the NASDAQ listing rules generally require listed company boards to be comprised of a majority of independent directors and require disclosures relating to how the board meets this requirement.ⁿ²¹ Many companies impose standards that go beyond the minimum requirements, for example, by requiring that a "substantial majority" of directors be independent.ⁿ²²

Under NYSE rules, companies must identify which directors are independent and disclose the basis for that determination.ⁿ²³ To qualify as independent the board of directors must affirmatively determine that the director has no "material relationships" with the company, either directly or as a partner, shareholder or officer of an organization that has a relationship with the company.ⁿ²⁴ Material relationships may include "commercial, industrial, banking, consulting, legal, accounting, charitable and familial relationships among others."ⁿ²⁵ The basis for determining that a

relationship is not material must be disclosed in the company's annual proxy statement to shareholders.ⁿ²⁶ The board can satisfy this requirement by adopting and disclosing categorical standards for qualifying as independent and then disclosing whether an individual director meets the standard.ⁿ²⁷ Corporate governance guidelines can provide the form for adopting and disclosing these categorical standards.

Under NYSE rules, directors having any of the following relationships within the last three yearsⁿ²⁸ are not eligible to be considered independent:ⁿ²⁹

- A director who is, or has been within the last three years, an employee, or whose immediate family member is, or has been within the last three years, an executive officer, of the company;
- A director who receives, or whose immediate family member receives, during any twelve-month period within the last three years, direct compensation of more than \$100,000 per year from the company, not including director compensation or pension or deferred compensation for prior service (provided that such compensation is not contingent in any way on continued service);ⁿ³⁰
- (A) a director who is, or whose immediate family member is, a current partner of the company's auditor; (B) a director who is a current employee of the company's auditor; (C) any immediate family member of the director who is a current employee of the company's auditor and who participates in the auditor's audit, assurance or tax compliance (but not tax planning) practice; or (D) a director who was, or whose immediate family was, within the last three years (but is no longer) a partner or employee of the company's auditor who personally worked on the company's audit within that time frame;
- A director who is, or has been within the last three years, or whose immediate family member is, or has been within the last three years, an executive officer of another company upon whose compensation committee any of the listed company's current executives serve; and
- A director who is a current employee, or whose immediate family member is a current executive officer, of a company that makes payments to, or receives payments from, the listed company for property or services in an amount that, in any of the last three fiscal years, exceeds the greater of \$1 million, or 2 percent of such other company's consolidated gross revenues.ⁿ³¹

Under NASDAQ rules an independent director is a director who, in the opinion of the board, lacks relationships that would interfere with the exercise of independent judgment in carrying out the responsibilities of a director.ⁿ³² Under NASDAQ rules, directors having any of the following relationships cannot be considered independent:ⁿ³³

- A director who is, or within the past three years was, an employee or officer of the company or any of its affiliates;
- A director who is a family member of an individual who is, or within the past three years was, employed by the corporation or any of its affiliates as an executive officer;
- A director who is, or within the past three years was (or has a family member who is or was), compensatedⁿ³⁴ by the company or any of its affiliates in excess of \$100,000ⁿ³⁵ per annum, not including compensation for board service, benefits under a qualified retirement plan, non-discretionary compensation, or compensation paid to a family member who is an employee (other than an executive officer) of the company or its affiliates;
- A person who is, or whose family member is, a partner in, or controlling shareholder or executive officer of, an organization (including non-profits) to which the company made, or from which the

company received, payments that exceeded 5 percent of the recipient's consolidated gross revenues for that year, or \$200,000, whichever is more, in any of the past three years (excluding payments arising solely from investments in the company's securities or payments under non-discretionary charitable contribution matching programs);

- A person who is, or whose family member is, employed as an executive officer of another entity where at any time during the past three years any of the company's executive officers serve on that entity's compensation committee; or
- A person who is, or whose family member is, a current partner of the company's outside auditor or was a partner or employee of the company's outside auditor who worked on the company's audit at any time during any of the past three years.ⁿ³⁶

The contemporary push for independent boards is based on the following goals and assumptions:

The independence of directors must be *de facto* as well as *de jure*. In practical terms, independence may be considered as: the ability to think independently; the ability to consider board matters with objectivity, impartiality, fairness and flexibility; the exercise of independent judgment about management's actions and competence; the courage to challenge management's current or projected future actions—and vote against them when this is warranted; the commitment to review and discuss all proposals of importance, and a governance environment that encourages directors to voice their opinions without the fear that they will incur the wrath or ridicule of other board members or management.ⁿ³⁷

Since it is impossible to set standards that will guarantee the kind of objectivity and independent thought described, an absence of the kind of relationships that may result in conflicted interests is used as a surrogate.

In adopting categorical independence standards for disclosure,ⁿ³⁸ more than the per se prohibitions provided by applicable listing rules should be described. For example, in determining the independence of directors, some boards set more rigorous financial thresholds than listing rules require and/or describe certain charitable relationships that would impair a director's independence.ⁿ³⁹

[c] Limits to Service on Other Boards

Board service requires a significant commitment of time and energy.ⁿ⁴⁰ Therefore, some boards adopt guidelines limiting the number of public company boards and, in some instances non-profit boards, on which a director may sit.ⁿ⁴¹ In addition to setting numerical limits, guidelines may require directors to notify the board, the board chairman or the chairman of the nominating/corporate governance committee prior to accepting an invitation to serve on another board. For example, the NACD recommends that, subject to individual exceptions, the numbers of positions on other boards be limited to one or two for CEOs and other senior executives, three or four for other fully employed directors, and five or six for all other directors.ⁿ⁴²

[d] Term and Age Limits

Boards often adopt guidelines that limit the number of terms a director may serve or set an age limit for directors.ⁿ⁴³ Term and age limits are useful methods for ensuring that new perspectives and energy are periodically introduced into the board dynamic.ⁿ⁴⁴ However, the efficacy of such policies should be balanced by a need for board continuity and institutional history.ⁿ⁴⁵

[e] Changes in Position

Over the past decade, boards have increasingly adopted guidelines that provide that upon a change in a director's

professional responsibilities (such as retirement, resignation or change in employer), such director notify the board and even tender his or her resignation to the board. Such a requirement acknowledges that the other positions a director holds often are a consideration in the nominating decision. Additionally, a notification requirement that includes tender of resignation helps send the signal that continued board service is not automatic. It also helps avoid placing the board in the potentially awkward situation of having to ask such a director for his or her resignation. Usually, the requirement is tempered by a provision that, upon receiving the resignation, the board shall determine whether such change in status will impact that person's ability to fulfill his or her directorship obligation and, accordingly, accept or reject the director's resignation.ⁿ⁴⁶

[f] Board Committees

Board committees provide an important means for organizing the considerable work of the board in an efficient manner.ⁿ⁴⁷ Federal law and listing rules, and codes of best practice have highlighted the importance of committee independence for the three key board committees--audit, compensation, and nominating/governance--and the need for relevant expertise.ⁿ⁴⁸ Corporate governance guidelines often state that the board has delegated certain tasks to a committee, and may also provide that the board relies on the diligence and recommendations of board committees in its deliberations. In recognition of the prominent role board committees play, corporate governance guidelines often include provisions regarding appropriate qualifications and independence criteria for committee members.ⁿ⁴⁹

The Sarbanes-Oxley Act and related SEC rules require that every member of an audit committee be "independent."ⁿ⁵⁰ Additionally, the NYSE and NASDAQ have adopted listing standards regarding the requirements of audit committee members.ⁿ⁵¹ Both the NYSE and NASDAQ require that audit committee members meet the independence requirements of the Sarbanes-Oxley Act and the SEC implementing rules;ⁿ⁵² NASDAQ rules also require that an audit committee member must not have participated in the preparation of the financial statements of the company or any current subsidiary at any time during the past three years.ⁿ⁵³ Additionally, a public company must disclose in its annual report to the SEC or in its annual proxy statement whether at least one member of the audit committee qualifies as a "financial expert."ⁿ⁵⁴ NYSE and NASDAQ rules have additional financial literacy and financial expertise requirements.ⁿ⁵⁵

[3] Director Access to Management, Independent Advisers and Information

Generally, directors may reasonably rely upon, and delegate board functions to, board committees, corporate officers and independent advisors, provided the decision to delegate is an informed one.ⁿ⁵⁶ For example, Delaware General Corporation Law § 141(e) permits the board to rely in good faith on officers, employees, committees of the board of directors or competent outside advisors, provided that due care is exercised in selecting those upon whom reliance is placed.ⁿ⁵⁷ In doing so, the board "is entitled to the presumption that it exercised proper business judgment, including proper reliance on the expert."ⁿ⁵⁸ Directors may not, however, blindly rely on even a carefully selected and qualified expert.ⁿ⁵⁹

The NYSE Listed Company Manual requires that guidelines address directors' access to management and, as necessary, independent advisors.ⁿ⁶⁰ Corporate governance guidelines should facilitate the ability of the board, committees and individual directors to interact with senior managers, while encouraging the use of good judgment to ensure that such contact is not distracting to the operation of the company. Guidelines often welcome the regular attendance of senior managers at board meetings,ⁿ⁶¹ both for their insights into items being discussed, but also as a means of understanding the "bench strength" of the organization for purposes of management development and succession planning.

Other resources crucial to effective decision-making are access to legal counsel, experts and independent advisors. For example, NYSE rules require that the audit committee have the authority to engage independent counsel and other advisors as it determines necessary to carry out its duties, with appropriate funding--as determined by the audit committee--from the company for payment of compensation to any outside legal, accounting or other advisors

employed by the audit committee.ⁿ⁶² The NYSE rules also state that the compensation committee charter should give that committee sole authority to retain and terminate compensation consultants assisting in the evaluation of director, CEO or senior executive compensation, including sole authority to approve the firm's fees and other retention terms.ⁿ⁶³ Similarly, the charter of the nominating/corporate governance committee should give that committee sole authority to retain and terminate any search firm to be used to identify director candidates, including sole authority to approve the search firm's fees and other retention terms.ⁿ⁶⁴ Board guidelines often provide that committees may retain and obtain advice from such resources on an ongoing basis, free of influence from management, and that committees may rely on these resources when presented with complex and technical matters in which members lack knowledge or expertise.ⁿ⁶⁵

[4] Board Agenda and Information

[a] Board Agenda

It is common for corporate governance guidelines to address issues related to the setting of meeting agendas. Guidelines often address who participates in agenda settingⁿ⁶⁶ (e.g., "The Chairman of the Board, with input from senior members of management and directors, establishes the agenda for each board meeting."). It is also common for guidelines to provide that the agenda will circulate in advance,ⁿ⁶⁷ and that the schedule of agenda subjects to be discussed for the ensuing year is issued at the beginning of each year (to the degree that these can be foreseen).ⁿ⁶⁸ The role of the lead or presiding director in helping to determine appropriate agenda issues with the Chairman/CEO (when those roles are combined) may also be specified.ⁿ⁶⁹

[b] Materials and Information

Corporate governance guidelines often address expectations about the timing, delivery and quality of information distributed to directors. A board lacking appropriate and timely information related to company performance, the environment in which it operates and material issues facing the company may be compromised in its ability to make informed and objective decisions.ⁿ⁷⁰ This, in turn, may make directors vulnerable in lawsuits relating to their conduct. "[I]f directors are fully informed and are diligent prior to making a decision, their decision will be given great deference--especially if the board is composed of a majority of outside directors."ⁿ⁷¹

Corporate governance guidelines often note that information and data that is important to the board's understanding of business and agenda items should be distributed in writing to the board in advance of the board meeting (to the extent possible).ⁿ⁷² The provisions related to advance distribution should not be unduly strict, however, and should allow for unusual circumstances. An advance notice requirement should not serve to prevent information (or an issue) from coming before the board.

The quality of the information available to directors impacts their decision-making capacity. Information made available to directors should be "(i) timely and relevant, (ii) concise and accurate, (iii) well organized, (iv) supported by any background or historical data necessary to place the information in context and (v) designed to inform directors of material aspects of the corporation's business, performance and prospects."ⁿ⁷³ Information important to directors' ability to evaluate corporate performance should provide an understanding of:ⁿ⁷⁴

- The corporation's business or operations;
- The principal operational, financial and other plans, strategies and objectives of the corporation;
- The economic and competitive risks to which the corporation is subject;
- The ongoing financial condition of the corporation;

- The performance of the corporation's significant business segments; and
- The corporation's performance compared with that of its competitors.

[5] Director Compensation

Director compensation policies commonly are designed to align the interests of shareholders and directors and compensate directors for the significant time commitments they are expected to devote to the board. Appropriate compensation may also facilitate recruitment of outside directors. Director compensation is largely self-determined, and therefore the safeguards that transparency provides are important. The NYSE Listed Company Manual states:

Director compensation guidelines should include general principles for determining the form and amount of director compensation (and for reviewing those principles, as appropriate). The board should be aware that questions as to directors' independence may be raised when directors' fees and emoluments exceed what is customary. Similar concerns may be raised when the company makes substantial charitable contributions to organizations in which a director is affiliated, or enters into consulting contracts with (or provides other indirect forms of compensation to) a director. The board should critically evaluate each of these matters when determining the form and amount of director compensation, and the independence of a director.ⁿ⁷⁵

A 1995 report issued by the NACD describes principles and procedures for boards to consider in implementing or revising director compensation policies:ⁿ⁷⁶

- Director compensation should be determined by the board and fully disclosed to shareholders;
- Director compensation should be aligned with the long-term interests of shareholders;
- Directors should be adequately compensated for their time and effort;
- Compensation should be approached on an overall basis, rather than as an array of separate elements;
- Boards should establish a process by which directors can determine the compensation program in a deliberate and objective way;
- Boards should set a substantial target for stock ownership by each director and a time period during which this target is to be met;
- Boards should define a desirable total value of all forms of director compensation;
- Boards should pay directors solely in the form of equity and cash—with equity representing 50 to 100 percent of the total; dismantle the existing benefit programs and avoid creating new ones;
- Boards should adopt a policy stating that a company should not hire a director or a director's firm to provide professional services to the corporation; and
- Boards should disclose fully in the proxy statement the philosophy and process used in determining director compensation and the value of all elements of compensation.

Although stock ownership by directors is generally viewed to align directors' interests with those of shareholders,ⁿ⁷⁷ recently the use of stock options as a component of director compensation has been called into question,ⁿ⁷⁸ especially

if the options are exercisable within a short periodⁿ⁷⁹ or other option conditions provide undue incentives for directors to support management and continue their position on the board.ⁿ⁸⁰ The stated concern is that "the motivation of directors should be different than those of management. Directors are not strategic partners with management in creating value for shareholders; they are guardians of shareholders' interests."ⁿ⁸¹

[6] Director Orientation and Continuing Education

Increasingly, director orientation and continuing education are considered components of effective board governance.ⁿ⁸² NYSE listed companies must address director orientation and continuing education in their corporate governance guidelines.ⁿ⁸³ Often boards delegate to the nominating/corporate governance committee (or other appropriate board committee) the task of designing an appropriate orientation program for new directors (which often includes distribution of background material, meetings with senior management and visits to company facilities), as well as the task of designing or making available continuing education opportunities for directors.ⁿ⁸⁴ Continuing education programs often rely on both corporate resources (for in-house programs) and programs available from universities and other providers.

Rating agencies have taken note of the importance of director education programs. For example, ISS's Corporate Governance Quotient includes director education among the eight core categories rated and provides a higher rating for companies whose directors have participated in ISS accredited director education programs, including programs offered by the NACD.ⁿ⁸⁵

[7] Management Succession and Development

According to the NYSE Listed Company Manual, corporate governance guidelines must address management succession.ⁿ⁸⁶ "Succession planning should include policies and principles for CEO selection and performance review, as well as policies regarding succession in the event of an emergency or the retirement of the CEO."ⁿ⁸⁷ Companies often delegate the task of reviewing and evaluating the management succession plan to the nominating and governance committee or to the compensation committee.

Succession planning should involve both a plan for who will step in if the CEO leaves suddenly or is incapacitated and a plan for the orderly transfer of leadership at some appropriate future time in the normal course. Both aspects of succession planning require an understanding of the depth and breadth of the potential available talent, both within and outside the company.

Management succession is often a difficult topic for the CEO, who must face his or her own mortality. This natural hesitancy can be overcome by linking succession planning to management development. Management development is closely related to succession planning, since it enables the company to look internally in the first instance for potential succession candidates. Succession planning is assisted when the company is an organization that attracts, and then works to further develop, talent with appropriate leadership and management skills. Addressing these topics in guidelines provides the board an opportunity to consider its approach to this sensitive issue as a policy matter distinct from decisions concerning a particular individual's position.

In any event, succession planning should involve the board and the CEO in a continuous, collaborative and iterative process. The CEO often has the best understanding of the company's leadership needs and the talent within the organization. The board's role is to:ⁿ⁸⁸

- Engage the CEO in the discussion of succession;
- Continually evaluate CEO performance, including the alignment between leadership competency and corporate strategy; and

- Continually review the depth of leadership talent within the management team, including through regular discussion with the CEO of efforts to develop the management team and cultivate the compliment of skills and leadership expertise consistent with future needs.

[8] Annual Performance Evaluations

[a] Board and Committee Evaluations

Board evaluation provides an opportunity to facilitate board cohesiveness and improve performance, while reminding directors of their roles and responsibilities.ⁿ⁸⁹ For the past decade, it has been considered a component of best practice. Self-evaluation helps ensure that board practices that may have originated from habit, best practices theories or obsolete business models or assumptions will be assessed against actual results. Establishing and disclosing that the board has an evaluation process signals the board's commitment to its governance responsibilities to shareholders.ⁿ⁹⁰

The NYSE Listed Company Manual requires that the corporate governance guidelines of listed companies address board evaluations.ⁿ⁹¹ "The board should conduct a self-evaluation at least annually to determine whether it and its committees are functioning effectively."ⁿ⁹² In addition, key committee charters must provide for annual evaluations of committee operations.ⁿ⁹³ (NASDAQ listing standards do not require board or committee evaluations, although many NASDAQ listed companies perform such evaluations as a best practice.) There are no specific requirements for the content of these evaluations nor any requirement that such evaluations be written.ⁿ⁹⁴ Topics that are often addressed in evaluations, in addition to compliance with guidelines and committee charters, include the appropriateness, quality of and/or efficiency of practices relating to board agenda and information flow, board size, composition and independence, board accountability, standards of board conduct, relations between directors and between the board and management, board discussions, board committee functions, board materials and governance guidelines.ⁿ⁹⁵

Because evaluation materials may be discoverable in litigation,ⁿ⁹⁶ some boards are opting for paperless facilitated board and committee discussions as the means of evaluation. When written forms are used, they are typically relied on to collect director viewpoints for a report that is given to the board on the results--as an opportunity to engage the full board in a discussion of board performance. A board should consider, as a matter of policy, whether or not to retain the executed forms (and any related reports) once the information is reviewed, and whether or not the final report should be written or oral.ⁿ⁹⁷ Boards often rely on an outside lawyer or other consultant to assist in gathering and digesting viewpoints (whether using forms or interviews) about board performance and facilitating a board discussion.

[b] Individual Director Evaluations

While not required by listing rules, some boards address individual director evaluations in corporate governance guidelines.ⁿ⁹⁸ Formal individual director evaluations have not been as widely adopted as board and committee evaluations, although they are gaining acceptance. Some boards may view such evaluations as potentially divisive or as difficult to perform in a meaningful way. Many boards already incorporate informal evaluations of individual directors in their re-nomination decisions. Often, the process of reviewing directors is left to the nominating/corporate governance committee.ⁿ⁹⁹

Qualities to consider when identifying the substance for director evaluations may include:

[A]ttendance, preparedness, and participation; business sense and experience; decisiveness; skills in motivating others; oral communications and listening skills; awareness of conflicting interests, critical faculty and problem-solving skills; organizational and strategic awareness; judgment, change-orientation; and integrity. The assessment might also consider objective factors such as standards for director "independence"; whether a director serves on too many other boards; term or age limits; and changes in directors' professional status.ⁿ¹⁰⁰

[c] Chief Executive Officer Evaluations

Some governance guidelines address CEO evaluation procedures, although such procedures are often delegated to an independent committee (usually the nominating/corporate governance or compensation committee). Addressing these procedures in guidelines may help establish a clear understanding between the board and the CEO regarding the process. Formal CEO evaluations are an important component of effective governance and should be linked to the process for determining CEO compensation.ⁿ¹⁰¹ If properly conducted, CEO evaluations can:ⁿ¹⁰²

- Facilitate board-CEO communication regarding company and CEO performance expectations;
- Improve communication between the board and the CEO regarding the evaluation of performance;
- Help the CEO identify personal strengths and weaknesses;
- Provide early warning signals of potential problems to the CEO and the board;
- Provide clear guidelines for CEO compensation decisions;
- Help to foster a sense of teamwork between the board and the CEO;
- Increase the likelihood that the board will support the CEO in times of crisis; and
- Provide a clear signal to shareholders and regulators that the board is monitoring and evaluating the actions of the CEO and senior management.

Factors often considered in CEO evaluations include integrity, vision, leadership, ability to meet specific corporate performance objectives, succession planning, shareholder relations, stakeholder relations and CEO-board relations.ⁿ¹⁰³

(n1)Footnote 1. NYSE Listed Company Manual § 303A.09. The entire NYSE Listed Company Manual § 303A, Corporate Governance Standards, is reproduced in Appendix B to this treatise.

(n2)Footnote 2. NYSE Listed Company Manual § 303A.09 Commentary.

(n3)Footnote 3. NYSE Listed Company Manual § 303A.09 Commentary.

(n4)Footnote 4. *See e.g.*, Sample Corporate Governance Guidelines attached as Appendix 6-A to this chapter.

(n5)Footnote 5. Delaware law provides that "[t]he business and affairs of every corporation organized ... shall be managed by or under the direction of a board of directors." DGCL § 141. *See also* Model Bus. Corp. Act § 8.01(b) (1984, revised 2002) ("All corporate powers shall be exercised by or under the authority of, and the business and affairs of the corporation managed by or under the direction of, its board of directors."). The corporate objective is generally

recognized to be "the conduct of business activities with a view to enhancing corporate profit and shareholder gain." ALI Principles of *Corporate Governance* § 2.01(a). See, e.g., *Dodge v. Ford Motor Co.*, 204 Mich. 459, 170 N.W. 668, 684 (Mich. 1919) ("A business corporation is organized and carried on primarily for the profit of the stockholders."). Directors stand in a fiduciary relationship to the company and its shareholders, and owe duties of care, loyalty and good faith. The duty of care requires that, in managing the corporation's affairs, directors act: (i) in good faith; (ii) with the care an ordinarily prudent person in a like position would exercise under similar circumstances; and (iii) in a manner the director reasonably believes to be in the best interests of the corporation. See 2 Model Bus. Corp. Act Annotated §§ 8.30(a)-(b) (3d ed. Supp. 1998/99); Dennis J. Block, Nancy E. Barton, Stephen A. Radin, *The Business Judgment Rule: Fiduciary Duties of Corporate Directors* 20-40, 51-82 (5th ed. 1998) [hereinafter BJR]; *Cede & Co. v. Technicolor, Inc.*, 634 A.2d 345, 361 (Del. 1993); *Smith v. Van Gorkom*, 488 A.2d 858 (Del. 1985); *Graham v. Allis-Chalmers Mfg. Co.*, 188 A.2d 125 (Del. Ch. 1963); *Broderick v. Horvatt*, 148 Misc. 731, 266 N.Y.S. 341 (1933); 3A Fletcher *Cyclopedia of the Law of Private Corporations* § 1036 (1984 and 1991 Supp.). The duty of loyalty requires directors to take only those actions that are within the best interests of the corporation, rather than in their own interests. See *Cinerama, Inc. v. Technicolor, Inc.*, 663 A.2d 1156 (Del. 1995); *Cede & Co. v. Technicolor, Inc.*, 634 A.2d 345, 361 (Del. 1993) ("the duty of loyalty mandates that the best interest of the corporation and its shareholders takes precedence over any interest possessed by a director, officer or controlling shareholder and not shared by the stockholders generally"); *Guth v. Loft, Inc.*, 23 Del. Ch. 255, 5 A.2d 503 (Del. 1939); BJR at 263. Engaging in self-dealing, misappropriating corporate assets or opportunities, having conflicts of interest, or otherwise profiting in a transaction that is not substantively or "entirely fair" to the corporation are all considered breaches of the duty of loyalty. *Solash v. Telex Corp.*, CA 9518, 1988 Del. Ch. LEXIS 7 (1988). Good faith "requires an honesty of purpose and eschews a disingenuous mindset of seeming to act for the corporate good, but not caring for the well being of the constituents of the fiduciary." E. Norman Veasey, *Musings on the Dynamics of Corporate Governance Issues, Director Liability Concerns, Corporate Control Transactions, Ethics and Federalism*, University of Pennsylvania Symposium on Control Transactions, at 5 (Feb. 8, 2003). See also Millstein & MacAvoy, *The Recurrent Crises in Corporate Governance* (Chapter 7) 107; *In re Walt Disney Co. Derivative Litigation*, 907 A.2d 693 at 755 (Del. Ch. Aug 09, 2005) *aff'd* 906 A.2d 27 (Del. Jun 8, 2006) ("[t]he good faith required of a corporate fiduciary includes not simply the duties of care and loyalty ... in the narrow sense ... but all actions required by true faithfulness and devotion to the interests of the corporation and its shareholders." The court identified the following three "most salient" examples of "[a] failure to act in good faith" or "bad faith," all of which include the element of intent: "where the fiduciary *intentionally* acts with a purpose other than that of advancing the best interests of the corporation," "where the fiduciary acts with *intent* to violate applicable positive law," or "where the fiduciary *intentionally* fails to act in the face of a known duty to act, demonstrating a conscious disregard for his duties." [emphasis added]). "When a court is considering whether directors breached their fiduciary duties, the business judgment rule is the standard of review that most frequently applies. This is not a rule in the usual sense of the term; it is not set forth by regulators. Rather it is a concept that judges articulate and apply to their review of the facts of a case. Applying this rule, a court presumes that when making a business decision, the directors acted in good faith and in the honest belief that their decision was in the corporation's best interest, taking into account appropriate information." NACD Report on Director Liability 10. If a director's decision is irrational or so beyond reason that no responsible director would credit it, then bad faith may be inferred. See E. Norman Veasey, *Delaware Corporation Law Ethics and Federalism*, The Metropolitan Corporate Counsel, at 13 (Nov. 2002). See also Chapter 4 *above*, discussing the legal duties and responsibilities of the board. "If directors act honestly and in the best interests of the corporation and do not consciously disregard their responsibilities or intentionally neglect their duties, they will satisfy their obligations to conduct themselves loyally and in good faith." NACD Report on Director Liability 10.

(n11)Footnote 11. NYSE Listed Company Manual § 303A.09 Commentary. Sections 303A.01 and.02 of the NYSE Listed Company Manual require that listed companies have a majority of independent directors and provide a detailed definition of independence. The entire NYSE Listed Company Manual § 303A, Corporate Governance Standards, is reproduced in Appendix B to this treatise.

(n12)Footnote 12. NYSE Listed Company Manual § 303A.09 Commentary.

(n13)Footnote 13. NYSE listed companies must have an independent nominating/corporate governance committee comprised entirely of independent directors and the committee must have a charter that addresses the committee's purpose. NYSE Listed Company Manual § 303A.04. At a minimum, that purpose must include: (a) identification of qualified board candidates; (b) selection (or recommendation for board selection) of director nominees; (c) development of a set of corporate governance principles applicable to the company; and (d) overseeing the evaluation of the board and management. NYSE Listed Company Manual § 303A.04. NASDAQ listing rules require that director nominees must either be selected (or recommended for the Board's selection) either by a majority of independent directors or a nominating committee comprised solely of independent directors; additionally, boards must adopt a charter or board resolution, as applicable, regarding the nomination process and other such related matters as required by federal securities laws. NASD Rule 4350(c) (NASD Rule 4350 is reproduced in Appendix C to this treatise). *See also* Chapter 8 *below*, discussing the nominating/corporate governance committee.

(n14)Footnote 14. Note that the listing rules of the NYSE and NASDAQ require audit committee members to be financially literate. NYSE Listed Company Manual § 303A.07(a) Commentary; NASD Rule 4350(d). The NACD focuses on financial literacy as an important requirement for all directors, given the need for directors to continually monitor the financial information of the firm; review financial reports and complex business arrangements (such as derivative instruments or off-balance-sheet obligations) with risks in mind; understand and enhance the company's accounting policies; and remain prepared to question and challenge the company's business and financial disclosure. *See* NACD Report on Director Professionalism 9-10; NACD, Report of the NACD Blue Ribbon Commissions on Risk Oversight 23-25 (2002). *See also* Chapter 9 *below*, discussing the audit committee.

(n23)Footnote 23. NYSE Listed Company Manual § 303A.02(a).

(n24)Footnote 24. NYSE Listed Company Manual § 303A.02(a).

(n25)Footnote 25. NYSE Listed Company Manual § 303A.02(a) Commentary. The commentary to Rule 303A.02(a) states that "when assessing the materiality of a director's relationship with the company, the board should consider the issue not merely from the standpoint of the director, but also from that of persons or organizations with which the director has an affiliation."

(n26)Footnote 26. NYSE Listed Company Manual § 303A.02(a) Commentary. If the company does not file an annual proxy statement, the basis for the determination that a relationship is not material must be disclosed in the Company's annual report on Form 10-K filed with the SEC. NYSE Listed Company Manual § 303A.02(a) Commentary.

(n27)Footnote 27. NYSE Listed Company Manual § 303A.02(a) Commentary.

(n28)Footnote 28. A transition rule in effect until November 4, 2004 uses a one-year look back rather than the three year look back. NYSE Listed Company Manual § 303A.02 Transition Rule.

(n29)Footnote 29. NYSE Listed Company Manual § 303A.02(b)(i)-(v).

(n30)Footnote 30. Compensation received (i) for prior service as an interim Chairman, CEO or other executive officer or (ii) by an immediate family member for service as an employee (other than an executive officer) of the listed company is not considered disqualifying for this purpose.

(n31)Footnote 31. The general commentary to NYSE Listed Company Manual § 303A.02(b) notes that an "immediate" family member includes a person's spouse, parents, children, siblings, mothers- and fathers-in-law, sons- and daughters-in-law, brothers- and sisters-in-law, and anyone (other than domestic employees) who shares such person's home. The NYSE has proposed amending the definition of "immediate family member" to clarify that it does not include stepchildren who do not share a stepparent's home, or the in-laws of such stepchildren. *See* SEC File No. SR NYSE-2005-81 (Nov. 23, 2005).

(n32)Footnote 32. NASD Rule 4350(c). According to this rule, the board has an affirmative responsibility to determine that a director does not have a relationship that would interfere with the exercise of independent judgment.

(n33)Footnote 33. NASD Rule 4200(a)(15), reproduced in Appendix C to this treatise.

(n34)Footnote 34. Nasdaq recently amended this provision to substitute "compensation" for "payments." This amendment clarifies that payments for personal services or political contributions to a candidate will be considered disqualifying compensation. *See* SEC File No. SR-NASDAQ-2006-021 (Oct. 6, 2006).

(n35)Footnote 35. On October 3, 2006 Nasdaq filed with the SEC proposed rule changes to Nasdaq's definition of "independent director" (File No. SR-NASDAQ-2006-041) and on March 2, 2007 filed Amendment No. 1 to the proposed rule change which would increase the "bright line" test with respect to a director's receipt of compensation from the issuer from \$60,000 to \$100,000. On March 13, 2007 the SEC granted approval to this rule change on an accelerated basis (Release No. 34-55463, File No. SR-NASDAQ-041).

(n36)Footnote 36. NASD Rule 4200(a)(14). Under this rule, "family member" includes a person's spouse, parents, children, and siblings, whether by blood, marriage or adoption, or anyone residing in such person's home.

(n37)Footnote 37. NACD, Report of the NACD Blue Ribbon Commission on Board Evaluations 8 (2001).

(n38)Footnote 38. *See* discussion in this § 6.02[2][b] above .

(n39)Footnote 39. *See, e.g.*, General Electric Company Board of Directors, Governance Principles, Principle 4, *available at* www.ge.com/en/company/governance/govprinc.htm [hereinafter GE Governance Principles] ("A director will not be independent if, at the time of the independent determination, the director serves as an executive officer, director or trustee of a charitable organization, and GE's discretionary charitable contributions to the organization are the greater of \$200,000 or one percent of that organization's annual consolidated gross revenues during its last completed fiscal year. (GE's automatic matching of employee charitable contributions will not be included in the amount of GE's contributions for this purpose.)"); The Disney Company, Corporate Governance Guidelines, Guideline 3 (as amended and restated through October 1, 2007) *available at* <http://corporate.disney.go.com/corporate/guidelines.html> [hereinafter Disney Corporate Governance Guidelines]. (A director who is, or whose immediate family member is, affiliated with or employed by a tax-exempt entity that received significant contributions (i.e., more than 2 percent of the annual contributions received by the entity or more than \$200,000 in a single fiscal year, whichever amount is lower) from the company or any executive officer (or any affiliates of the company or of any executive officer) within the preceding twelve-month period may not be deemed independent, unless the contribution was approved in advance by the board of directors; a director who is, or whose immediate family member is, an executive officer, general partner or significant equity holder (i.e., in excess of 10 percent) of an entity that is a paid provider of professional services to the Company (or any of its affiliates, any executive officer or any affiliate of an executive officer) that exceed \$60,000 (but do not exceed the greater of \$1 million or 2 percent of such other entity's consolidated gross revenues) within the preceding twelve month period may not be deemed independent.).

(n40)Footnote 40. Directors must devote sufficient time to prepare for and attend board and committee meetings and stay informed about the corporation's performance. While time commitments vary among companies, generally the time required of directors has significantly increased in recent years as federal laws and listing rules have added additional responsibilities for independent directors and members of various committees (particularly audit committee members). ABA Corporate Director's Guidebook 49-50. *See* Korn/Ferry Int'l, 33rd Annual Board of Directors Study 23 (2006) ("Respondents estimate they devote an average of 17 hours a month to director duties.").

(n41)Footnote 41. The commentary to NYSE Listed Company Manual § 303A.09 states that in their corporate governance guidelines companies may address substantive qualification requirements, including limiting the number of boards on which a director may sit.

(n42)Footnote 42. NACD Report on Director Professionalism 14, 26.

(n43)Footnote 43. The GM guidelines provide for a retirement age of 72, although directors have the flexibility to voluntarily retire at age 70, if they desire. GM Corporate Governance Guidelines, Guideline 15. *See also* § 7.01[2][c] *below* for discussion of director tenure and retirement age.

(n44)Footnote 44. NACD Report on Director Professionalism 14. The NACD favors a strong director evaluation process to assure effective director participation. However, the NACD recognizes that predetermined criteria, such as term or age limits, may serve as an alternate means for determining when board service should end. NACD Report on Director Professionalism 14.

(n45)Footnote 45. *See* NACD Report on Director Professionalism 14.

(n46)Footnote 46. NACD Report on Director Professionalism 15. The NACD supports the continued membership of a director on the board who has had a change in professional responsibilities, if the board determines that such a director continues to make a contribution to the organization.

(n47)Footnote 47. NACD Report on Director Professionalism 4, 5.

(N48)Footnote 48. Sarbanes-Oxley Act § 301, 15 U.S.C. § 78j-1(m)(3) (audit committee). *See, e.g.*, Report of the American Bar Association Task Force on Corporate Responsibility 66 (Mar. 31, 2003) *available at*

www.abanet.org/buslaw/corporateresponsibility/final_report.pdf, *59 Bus. Law. 145 (2003)* [hereinafter ABA Corporate Responsibility Report] (recommending the establishment of a compensation committee, a legal compliance committee, a corporate governance committee and an audit committee composed of independent directors). Both NYSE and NASDAQ listed companies are required to have independent audit committees. NYSE Listed Company Manual § 303A.07(b); NASD Rule 4350(d). NYSE listing standards also require a nominating/corporate governance committee and compensation committee composed entirely of independent directors. NYSE Listed Company Manual §§ 303A.04(a), 303A.05(a). NASDAQ listing rules require that the compensation of executive officers must be determined (or recommended for the board's determination) either by a majority of the independent directors or a compensation committee comprised solely of independent directors and that director nominees must be selected (or recommended for the board's selection) either by a majority of the independent directors or a nominations committee comprised solely of independent directors. NASD Rule 4350(c)(3), (4).

(n49)Footnote 49. The NACD has long recommended that boards should require the three key committees--audit, compensation and nominating or governance--include only independent directors. *See* NACD Report on Director Professionalism 7.

(n50)Footnote 50. In order to be independent, an audit committee member (i) may not accept any direct or indirect compensatory fee from the company or any of its subsidiaries, other than compensation for service as a director and certain types of deferred compensation and (ii) may not be an "affiliated person" of the company. Sarbanes-Oxley Act § 301, *15 U.S.C. § 78j-1*; 1934 Act Rule 10A-3, *17 CFR § 240.10A-3 (2003)*. An "affiliated person" is defined as "a person that, directly or indirectly through one or more of its intermediaries, controls, or is controlled by, or is under common control with, the person specified." 1934 Act Rule 10A-3, *17 CFR § 240.10A-3 (2003)*. "Control" is defined as "the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a person, whether through the ownership of voting securities, by contract, or otherwise." 1934 Act Rule 10A-3, *17 CFR § 240.10A-3 (2003)*.

(n51)Footnote 51. NYSE Listed Company Manual § 303A.07; NASD Rule 4350(d).

(n52)Footnote 52. NYSE Listed Company Manual § 303A.07; NASD Rule 4350(d).

(n53)Footnote 53. NASD Rule 4350(d).

(n54)Footnote 54. Sarbanes-Oxley Act § 407, *15 U.S.C. § 7265*; Regulation S-K Item 401(h), *17 CFR § 229.401 (2003)*. An audit committee "financial expert" is a person who has (i) an understanding of financial statements, generally accepted accounting principles ("GAAP"), internal controls and procedures for financial reporting and audit committee functions; (ii) an ability to assess the general application of GAAP in connection with accounting for estimates, accruals and reserves; and (iii) experience in preparing, auditing, analyzing or evaluating financial statements that present a breadth and level of complexity comparable to that which can be expected to be raised by the company's financial statements, or experience in actively supervising one or more persons engaged in such activities. An audit committee "financial expert" may gain this experience as a result of (a) education and experience as a public accountant, auditor, principal financial officer, controller or principal accounting officer of a company or position involving similar functions; (b) experience actively supervising a principal financial officer, principal accounting officer, controller, public accountant, auditor or person performing similar functions; (c) experience overseeing or assessing the performance of companies or public accountants with respect to the preparation, auditing or evaluation of financial statements; or (d) other relevant experience. Regulation S-K Item 401(h)(2), *17 CFR § 229.401 (2003)*.

(n55)Footnote 55. The commentary to NYSE Listed Company Manual § 303A.07 requires that audit committee members must be financially literate, as determined by the board in its business judgment, or must become financially literate within a reasonable period of time following their appointment. In addition, at least one member of the committee (who need not be the committee chair) must have "accounting or related financial management expertise." The NYSE does not require that a listed company's audit committee include a person who satisfies the definition of an

audit committee expert set out in Item 401(h) of Regulation S-K (discussed above), but a board may presume that such a person qualifies as having the requisite expertise. NYSE Listed Company Manual § 303A.07 Commentary. NASD Rule 4350(d) requires that audit committee members be able to read and understand financial statements at the time of appointment. In addition, at least one committee member must have past employment experience in finance or accounting, professional certification in accounting or other comparable experience or background. A director who qualifies as an audit committee financial expert under Item 401(h) of Regulation S-K is presumed to qualify. NASD Rule 4350(d).

(n64)Footnote 64. NYSE Listed Company Manual § 303A.04 Commentary.

(n65)Footnote 65. Note that an American Bar Association task force has recommended that public corporations adopt practices in which: (i) the board has responsibility for approving the selection, retention and compensation of the general counsel; (ii) executive sessions are scheduled between the general counsel and a committee of independent directors to discuss legal compliance matters; and (iii) reporting protocols include "a direct line of communication" for internal and outside lawyers to inform the general counsel of illegal conduct or breaches of fiduciary duties to the corporation. ABA Corporate Responsibility Report 32.

(n66)Footnote 66. *See, e.g.*, ABA Corporate Director's Guidebook 42.

(n67)Footnote 67. *See, e.g.*, Tyco International, Board Governance Principles 8 (Amended December 2006) [hereinafter Tyco Governance Principles] *available at* www.tyco.com/www/Documents/pdf/tyco_board_principles.pdf. ("Directors receive the agenda and materials for regularly scheduled meetings in advance. Best efforts will be made to make materials available as soon as one week in advance, but no later than three days in advance.").

(n68)Footnote 68. "The board" should satisfy itself that there is an overall annual agenda of the matters that require recurring and focused attention such as the achievement (as well as periodic re-examination and updating) of

operational and financial plans, the performance of the CEO and other members of executive management, an evaluation of board and committee performance, and the adequacy and appropriateness of corporate systems and controls that address legal compliance, risk management, corporate policy supervision, financial management and timely and accurate financial reporting and other disclosures." ABA Corporate Director's Guidebook 42.

(n69)Footnote 69. *See, e.g.*, GE Governance Principles, Principle 11 ("Prior to each board meeting, the CEO will discuss the other specific agenda items for the meeting with the presiding director..."); Tyco Governance Principles 8 ("The lead director, in consultation with the Chairman/CEO, is responsible for setting meeting agendas with input from the directors.").

(n70)Footnote 70. Structural flaws in the flow of material information and analysis to outside directors, such as nearly exclusive reliance on senior executive officers or advisers selected by such officers for information and guidance about corporate affairs, undermine effective and independent oversight by outside directors. ABA Corporate Responsibility Report 26. Corporate governance principles can address this concern by setting forth policies designed to "provide the directors with timely and sufficient information and analysis necessary to the discharge of their oversight responsibilities." ABA Corporate Responsibility Report 26. "One of the key ingredients for empowerment of any board is knowledge. Information flow, therefore, is a key prerequisite for directors to fulfill their oversight and decision-making functions ... While management should establish formal processes and communication channels to provide information to directors, directors should also seek information from carefully selected experts and other non-management sources on which they can rely in good faith. In addition, directors should cultivate an environment that encourages candid delivery of the most useful information, on a real-time basis." NACD Report on Director Liability 20.

(n77)Footnote 77. Report of the NACD Blue Ribbon Commission on Director Compensation (1995, updated 2006).

(n78)Footnote 78. In 2006 the United States Department of Justice, the SEC and the IRS instituted investigations against numerous companies regarding whether companies manipulated their stock-option grants to make them more lucrative (including whether companies back-dated or forward-dated such option grants). Additionally, in August 2006 the SEC adopted amendments to the disclosure requirements for executive and director compensation, related person transactions, director independence and other corporate governance matters, and securities ownership of officers and directors. These changes represent the first overhaul of executive and director compensation disclosure in over 14 years. These new rules require more disclosures concerning programs, plans and practices relating to the granting of options, including in particular the timing of option grants in coordination with the release of material nonpublic information and the selection of exercise prices that differ from the underlying stock's price on the grant date. For a more detailed

discussion of the changes to the executive compensation rules, *see* Chapter 10.

CHAPTER 6 CORPORATE GOVERNANCE GUIDELINES FOR BOARD PRACTICES AND PROCEDURES

1-6 Corporate Governance: Law and Practice § 6.03

AUTHOR: Holly J. Gregory

§ 6.03 Other Common Corporate Governance Guideline Topics

Corporate governance guidelines frequently address additional topics such as the selection and invitation of new directors, executive sessions, and board leadership structure.

[1] Selecting and Inviting New Directors

While not required to be addressed in corporate governance guidelines, both the NYSE and the NASDAQ require listed company boards to delegate the process of identifying qualified director nominees, and overseeing the board's selection of the slate of director nominees, to an independent body.ⁿ¹

Many best practices documents and institutional investors have recommended that information about the director nomination process be disclosed to shareholders (for example, through published charters or guidelines). Under SEC rules adopted in 2003, public companies must disclose in their proxy statements certain information regarding the policies and procedures used in the board's selection of nominees.ⁿ² Among other things, disclosure is required in the proxy statement about the role played in the nominating process by a nominating committee and whether the board will consider for nomination candidates recommended by shareholders. Assuming that shareholder candidates will be considered for nomination by the board, the material terms of any policy relating to such consideration and the procedure shareholders should follow to submit candidates for consideration must be disclosed. In addition, any qualities and skills that the nominating committee considers necessary for service as a director must be disclosed.

Guidelines may also address the manner in which potential director nominees are invited to the board. As part of the cultural shift away from a CEO-dominated nominating process, some boards state in guidelines that such invitations are extended by the board of directors through the chairman of the nominating/governance committee or another director.ⁿ³

[2] Executive Sessions

NYSE and NASDAQ rules require that non-management/independent directors convene regularly in executive sessions without management participation.ⁿ⁴ Holding regular sessions outside of management's presence provides an opportunity for management performance to be fully critiqued and for other issues related to management to be explored, for example, issues of succession and compensation. Corporate governance guidelines and principles often

address the frequency with which executive sessions are held. They may also address who convenes and chairs such sessions and the decision-making authority of the body.ⁿ⁵ If the chairman of the board is not qualified to preside at the executive sessions (because he or she is a member of management or not independent), the board should determine who will preside at executive sessions or, if the presiding position is to rotate, what process is used. NYSE listing rules require that if one director is to preside at executive sessions, his or her name must be disclosed in the company's annual proxy statement or, if the company does not file an annual proxy statement, in the company's annual report on Form 10-K filed with the SEC.ⁿ⁶ If there will not be an identified presiding director, the company must disclose the procedure by which a presiding director is selected for each executive session.ⁿ⁷ A non-management director must preside over each executive session of the non-management directors, though the same director is not required to preside at all such sessions. It is becoming increasingly common to provide the opportunity for an executive session at every board meeting, at least among the larger public companies.

[3] Board Leadership Structure

The board's duty to monitor management performance creates a potential conflict for a board chairman who serves simultaneously as the CEO (or in another position in the company). The CEO must lead the management team; the chairman must lead the board in monitoring the performance of the CEO and the management team. Some governance reformers view separation of the roles of chairman and CEO or, at least, the appointment of a lead independent director, as an important means of providing checks and balances within the board's governance structure to address this conflict.ⁿ⁸

Independent leadership is critical to positioning the board as an objective body distinct from management and, in particular, to the board's ability to: (i) identify the issues it should focus on including, in particular, the strategic issues of importance; (ii) obtain the information it needs to assess management's performance against its chosen strategy, including the overall conduct of the business; and (iii) prevent any management efforts to obfuscate important issues or information needed, thereby hindering the board's ability to fulfill its responsibilities. This is intended to further support effective management as much as to ferret out bad decisions and poorly functioning systems.ⁿ⁹

The board cannot simply strip the title from a sitting chairman/CEO and hand it to someone else. Removing a title from such an individual looks like a demotion and sends a message that the board lacks confidence in the corporation's leadership. Instead, boards should view separation as a key issue to be resolved in succession, to be implemented when whoever is serving in both roles steps down. Our experience is that the lead director works for the chairman, with the result that complexities are increased and the inherent conflicts in the executive chairmanship are not resolved. While the appointment of a "lead" or "presiding" director, may be the beginning of the process ... it is not enough. Thus, while the institutionalization of a lead director may be better than nothing, a concerted effort should be made to institutionalize the concept of an independent chairman.ⁿ¹⁰

Where the chairman is not an independent director, a board may wish to appoint a lead independent director to help set the board agenda and determine board information needs, organize the board's evaluation of the CEO, lead the board in the case of a crisis involving management, and convene and preside at executive sessions.ⁿ¹¹ (The NYSE rules do not require that there be a single presiding director at all executive sessions; listed companies may have a procedure by which a different presiding director is selected for each executive session.ⁿ¹²)

Separation of the positions of CEO and chairman or alternatively naming a lead independent director are viewed by some as potentially confusing and inefficient, called for only when there is an unplanned and unexpected absence of a CEO.ⁿ¹³ Shareholders of some companies, particularly smaller companies, may rely on and depend upon the expertise and vision of a single individual and prefer to have the role of chairman and CEO filled by this person.ⁿ¹⁴ In contrast, institutional shareholders and commentators note that separating the positions of CEO and chairman, or creating a lead

independent director would most likely reduce the CEO's undue influence over the board.ⁿ¹⁵

[4] Director Resignation Policy

Unless otherwise provided in a company's articles of incorporation or bylaws, plurality votingⁿ¹⁶ is the standard for the election of directors at most companies. For example, Delaware law provides that unless otherwise provided by the certificate of incorporation or bylaws, "[d]irectors shall be elected by a plurality of the votes of the shares present in person or represented by proxy at the meeting and entitled to vote on the election of directors."ⁿ¹⁷ Current shareholder activism focused on this standard is causing companies to reconsider the voting standard for directors and a number of companies have adopted a majority vote standards.ⁿ¹⁸ In the 2006 proxy season more than 150 companies received shareholder proposals calling for adoption of a majority vote standard,ⁿ¹⁹ and such proposals tended to receive high votes in favor, and support from proxy advisors.ⁿ²⁰

A company that wishes to implement some variety of majority voting has the following options: (1) adopt a policy (in Corporate Governance Guidelines or as a separate policy) that a director will resign from the board if he or she does not receive a majority of votes cast "for" election ("director resignation"); (2) amend their Bylaws to include such a director resignation provision; (3) amend their Bylaws to provide that directors shall be elected by a majority of votes cast (a "majority vote standard"); or (4) amend their Certificate of Incorporation to include a majority vote standard.ⁿ²¹

A director resignation policy implemented in a company's Corporate Governance Guidelines would require a director to resign if the number of votes "withheld" from his or her election exceeded the number of votes received "for" his or her election.ⁿ²² This option gives the board discretion to accept or reject the resignation. The board could strengthen the policy by providing that the board would accept the resignation of a director "absent a compelling reason" and the policy could articulate examples of such compelling reasons (for example, if the director in question is also the CEO or the audit committee financial expert).ⁿ²³ Similarly, the board could amend their Bylaws to include a resignation provision,ⁿ²⁴ along the lines described above.

A decision to adopt a director resignation policy rather than a majority vote standard would presumably be based on the generally recognized issues relating to such a standard, including: (1) that where an incumbent director fails to get the requisite majority vote, he or she remains in office under the statutory "holdover director" rule,ⁿ²⁵ so that a resignation policy remains necessary to address such a situation; and (2) that the board requires some opportunity to address the potentially adverse effects on the corporation of a "failed election,"ⁿ²⁶ including but not limited to the disruption that may attend the need to hold another election.ⁿ²⁷

Alternatively, several companies have adopted a majority vote standard in their bylaws.ⁿ²⁸ In the future shareholders would be able to unilaterally alter the majority vote standard by amending the Bylaws without board approval.ⁿ²⁹ Finally, the board could amend their Certificate of Incorporation to incorporate a majority vote standard which would require both board and shareholder approval and therefore could not be amended by shareholders unilaterally.

FOOTNOTES:

(n1)Footnote 1. NYSE Listed Company Manual § 303A.04 and Commentary; NASD Rule 4350(c).

(n2)Footnote 2. 1934 Act Rule 14a-101, Item 7(d)(2), *17 CFR § 240.14a-101 (2003)*. The Second Circuit Court of Appeals has held that a company may not exclude, under 1934 Act Rule 14a-8(i)(8), a shareholder proposal that would require the company to place candidates nominated by the shareholders on the company's proxy in certain circumstances. (*American Federation of State, County & Municipal Employees Pension Plan v. American International Group*, Docket No. 05-2825-cv, Sept. 5, 2006). In this holding, the Court rejected the SEC's longstanding interpretation of the application of Rule 14a-8(i)(8) under the 1934 Act as permitting a company to exclude a shareholder proposal granting shareholder increased access to proxy statements. The rule states that a company may exclude a shareholder proposal from its proxy statement "[i]f the proposal relates to an election for membership on the company's board of directors or analogous governing body." The Court held that the Rule 14a-8(i)(8) applies "to shareholder proposals that relate to a particular election and not to proposals that ... would establish the procedural rules governing elections generally." At its open meeting on July 25, 2007 the SEC voted to approve two different (and conflicting) rulemaking proposals on "shareholder access." Although neither proposal would itself mandate access; both concern the means by which shareholder may seek to institute an access regime: One proposal would, under certain circumstances, grant shareholders the right to require a company to *include* in its proxy materials for a vote a proposal to adopt a binding bylaw entitling shareholders to access to company proxy materials. The other proposal would grant companies the ability to *exclude* from company proxy materials shareholder proposals seeking access under this proposal, a shareholder sponsoring any such proposal would have to do so by soliciting shareholders on its own, as has traditionally been the case. The SEC has requested comments on these proposals and the Chairman of the SEC has indicated his intention to having a clear rule on this issue in place for the 2008 proxy season.

(n3)Footnote 3. An invitation to join the GM Board is extended by the board via the chairman of the board and the CEO, together with an independent director (when appropriate). GM Corporate Governance Guidelines, Guideline 3.

(n4)Footnote 4. NYSE Listed Company Manual § 303A.03 and Commentary (non-management directors must meet at regularly scheduled executive sessions without management; if the non-management directors include directors who are not independent under NYSE rules, listed companies should schedule an executive session including only independent directors at least once a year); The NYSE has proposed to amend this rule to clarify that the "executive session" meetings that it requires be regularly held may be held among only independent directors (and are not required to also include non-independent, non-management directors, but in the directors' discretion may do so, although at least one such meeting each year should include only independent directors). *See* SEC File No. SR-NYSE-2005-81 Amendment No. 2 (June 20, 2007). NASD Rule 4350(c)(2) (boards must convene regular meetings of "independent" directors in executive session).

(n5)Footnote 5. *See, e.g.,* NACD Report on Board Evaluation 30, *citing* NACD Report on Director Professionalism 6-7 ("Regularly scheduled executive sessions afford independent directors an opportunity to react to management proposals and other actions in an environment free from formal or informal management constraints."); The Conference Board, Findings and Recommendations, Part 2 at 6 (Jan. 9, 2003) (recommending frequent, regular meetings of independent directors to facilitate proper oversight of the CEO).

(n6)Footnote 6. NYSE Listed Company Manual § 303A.03 Commentary.

(n7)Footnote 7. NYSE Listed Company Manual § 303A.03 Commentary.

(n8)Footnote 8. Millstein & MacAvoy, *The Recurrent Crisis in Corporate Governance* (Ch. 7) 95; Institutional Shareholder Services, U.S. Proxy Voting Manual 2 (2005) ("Generally vote FOR shareholder proposals requiring the position of chairman be filled by an independent director unless there are compelling reasons to recommend against the proposal, such as a counter balancing governance structure."). CII Policies state that the board should be chaired by an independent director and that the CEO and chair roles should be combined in very limited circumstances (Council of Institutional Investors, *Corporate Governance Policies*; (March 1998, most recently revised April 2006) pg. 3); ISS also

believes that the positions of the chairman and CEO should be separated and the chairman should be an independent outsider (Governance Standard 12) (Noting that "the positions of chairman and CEO are two distinct jobs with different job responsibilities ... Some believe that having the same person hold the positions of the chairman and CEO calls into question whether the board can adequately oversee and evaluate the performance of senior officers (including the CEO) and the company (Commentary on Governance Standard 12).") ISS will generally vote in favor of "shareholder proposals requiring the position of chairman be filled by an independent director unless there are compelling reasons to recommend against the proposal, such as a counterbalancing governance structure." (ISS 2007 U.S. Proxy Voting Manual, Chapter 2.) Examples of such governance structures include a "designated lead director, elected by and from the independent board members with clearly delineated duties." (ISS 2007 U.S. Proxy Voting Manual, Chapter 2.) Additionally, ISS has amended its "Chairman/CEO Separation" rating in its Corporate Governance Quotient ("CGQ") to be consistent with its voting policy on the topic. (ISS US Corporate Governance Policy 2007 Updates (pg. 24).)

(n9)Footnote 9. Millstein & MacAvoy, *The Recurrent Crisis in Corporate Governance* (Ch. 7) 95.

(n10)Footnote 10. Millstein & MacAvoy, *The Recurrent Crisis in Corporate Governance* (Ch. 7) 118.

(n11)Footnote 11. *See* NACD Report On Director Professionalism 6.

(n12)Footnote 12. NYSE Listed Company Manual § 303A.03 Commentary (The name of the director presiding at the executive sessions, or the procedure by which the presiding director is selected for each executive session, must be disclosed in the proxy statement (or, if the company does not file a proxy statement, in the company's annual report), together with information about how interested parties can communicate with the presiding director or the non-management directors as a group.).

(n13)Footnote 13. *Business Roundtable Principles* at 15 ("Some corporations have found it useful to separate the roles of CEO and chairman of the board to provide continuity of leadership in times of transition.").

(n14)Footnote 14. AFL-CIO Proxy Voting Guidelines IV.A.7 ("[I]n certain circumstances, such as a small-cap company with a limited group of leaders, it may be appropriate for [the chairman and CEO] positions to be combined for some period of time.").

(n15)Footnote 15. *The Conference Board, Findings and Recommendations, Part 2, Principle I, Best Practice 1a* ("Each corporation should give careful consideration to separating the offices of Chairman of the Board and CEO, with those two roles being performed by separate individuals. The Chairman would be one of the independent directors."); *AFL-CIO Proxy Voting Guidelines IV.A* ("[T]he trustees believe that having an independent director serve as chairperson enhances the board's independence and effectiveness."); *ISS U.S. Proxy Voting Manual*; *TIAA-CREF Policy Statement 8* ("[W]hen the board chooses not to separate the positions [of chairman and CEO], it should designate a lead or presiding director who would preside over executive sessions of independent directors and ... participate actively in the preparation of board agendas."); *MacAvoy & Millstein, The Recurrent Crisis in Corporate Governance* 95.

(n16)Footnote 16. Under plurality voting, a director is elected if he or she receives more affirmative votes cast "for" his or her election than for another nominee, without regard to the number of "withheld" votes or votes not cast. Under a majority vote requirement, a nominee is elected only if he or she receives a majority of the votes cast.

(n17)Footnote 17. DGCL § 216(3). New York corporate law provides that unless a company's certificate of incorporation provides otherwise, a plurality of all the votes cast at a meeting at which a quorum is present is sufficient to elect a director. *New York Business Corporation Law § 614(a)* (2006).

(n18)Footnote 18. On October 24, 2006 the NYSE filed with the SEC a proposed amendment of NYSE Rule 452 and corresponding NYSE Listed Company Manual Section 402.08 that would eliminate broker discretionary voting on the election of shares held in client accounts, as currently permitted, when the broker has not timely received voting

instructions from the client. (File No. SR-NYSE-2006-92) The proposed amendment is subject to approval by the SEC and will be applicable to proxy voting by NYSE member-firm brokers with respect to shareholder meetings held on or after January 1, 2008, except to the extent that a meeting was originally scheduled to be held in 2007 but was adjourned to 2008. NYSE Rule 452 allows brokers who have not received voting instructions from the beneficial owner for the shares at least 10 days before a scheduled meeting to vote on "routine" matters. Director elections have been considered routine. However, "shareholders and others have long argued against such a designation, particularly in recent years as institutional investors have pushed for majority voting in director elections and the ability to nominate board candidates." (ISS Corporate Governance Blog, "NYSE Proposes to Bar Election-Related Broker Votes in 2008", Oct. 27, 2006.) The NYSE's press release announcing the proposed change stated that "the goal of the NYSE has been to not allow the broker to vote on any proposal that substantially affects the rights of shareholders ... today the election of directors is simply too important to ever be considered routine, even where the election is uncontested. Shareholder voting on the election of directors is a critical component of good corporate governance." (NYSE News Release, "NYSE Adopts Proxy Working Group Recommendation to Eliminate Broker Voting In 2008", Oct. 24, 2006).

(n19)Footnote 19. Institutional Shareholder Services, *Policy Formulation and Outreach Process for the 2007 Proxy Season: Policy Review and Comments Period* (Sept. 20, 2006) at 3 [hereinafter ISS 2007 Proxy Season Policy].

(n20)Footnote 20. "ISS will generally recommend FOR precatory and binding resolutions requesting that the board change the company's bylaws to stipulate that directors need to be elected with an affirmative majority of votes cast, provided it does not conflict with the state law where the company is incorporated. Binding resolutions need to allow for a carve-out for a plurality vote standard when there are more nominees than board seats." *See* ISS U.S. Corporate Governance Policy 2007 Updates (2006) at 11.

(n21)Footnote 21. State law may provide that in order for a company to implement a majority vote standard, an amendment to their Certificate of Incorporation is required. "Directors shall, except as otherwise required by this chapter or by the certificate of incorporation as permitted by this chapter, be elected by a plurality of votes cast at a meeting of shareholders by the holders of shares entitled to vote in the election." (New York State Consolidated Laws, Chapter 4, Article 6, Section 614(a)). "Unless otherwise provided in the articles of incorporation, directors are elected by a plurality of the votes cast by the shares entitled to vote in the election at a meeting which a quorum is present." (Indiana Code, Title 23, Article 1, Chapter 30, Section 9(a)).

(n22)Footnote 22. ISS states in its U.S. Corporate Governance 2007 Policy Updates that companies "are strongly encouraged to also adopt a post-election policy (also known as a director resignation policy)"... *See* ISS U.S. Corporate Governance Policy 2007 Updates (2006) at 11. Policies should address the specific circumstances of each company.

(n23)Footnote 23. Some companies, such as The Procter & Gamble Co. have adopted such policies. *See* The Procter & Gamble Company Board of Directors Corporate Governance Guidelines *available* at http://www.pg.com/company/our_commitment/corp_gov/corp_gov_guidelines.jhtml: "In any non-contested election of directors, any director nominee who receives a greater number of votes "withheld" from his or her election than votes "for" such election according to certified election results shall immediately tender his or her resignation as a Director to the Board of Directors. Within ninety days following the certification of the election results, the Board of Directors will decide, after taking into account the recommendation of the Governance and Public Responsibility Committee (in each case excluding the nominee in question) whether to accept the resignation. *Absent a compelling reason for the director to remain on the Board, the Board of Directors shall accept the resignation.*" (emphasis added).

(n24)Footnote 24. Under Delaware law, the board is permitted to amend bylaws only if authorized to do so by the certificate of incorporation: DGCL § 109(a).

(n25)Footnote 25. DGCL § 141(b): "Each director shall hold office until such director's successor is elected and qualified or until such director's earlier resignation or removal."

(n26)Footnote 26. A "failed election" occurs when one or more nominees are not seated on the board. The consequences can include: (1) breach of an executive employment agreement and possible severance liability, where the nominee is also the CEO or other senior executive; (2) change in control that accelerates debt or triggers changes in agreements, where shareholders fail to elect a specified percentage of directors; (3) altered relationships among shareholders of different classes, where holders of one class of securities are to elect a fixed number of directors; (4) non-compliance with listing standards requiring independent directors or directors with particular qualifications; (5) altered consequences of having a classified board; and (6) altered dynamics of control contests, where a dissident group with minority representation on the board can enlarge its percentage of directors without the need for a direct proxy contest. *See* Committee on Corporate Laws, ABA Section of Business Law, *Changes in the Model Business Corporation Act--Proposed Amendments to Chapters 8 and 10 Relating to Voting by Shareholders for the Election of Directors* (Mar. 6, 2006) ("*ABA Report*") 15-16.

(n27)Footnote 27. These (and other) negative aspects of a majority vote standard have led the American Bar Association Committee on Corporate Laws ("*ABA*") to recommend against a majority vote standard as a generally applicable director election standard and to propose alternative statutory provisions that provide corporations greater flexibility in their director election process, including modification of the holdover director rule and a "modified plurality approach." Under the "modified plurality approach," the current plurality standard would apply "but a director who receives more votes against than for his or her election would cease to hold office 90 days after the election unless the director is confirmed in office by the board;" under a variation of that approach, the director would not be automatically removed, but could be removed by the board during the 90-day period. Both provisions recommended by the ABA would require statutory amendments to the Delaware corporation statute.

(n28)Footnote 28. Examples of companies that have amended bylaws to provide for majority voting in the election of directors include General Electric Co., The Walt Disney Co., Dell Inc., Intel Corporation, Dillard's Inc., Trimeris Inc., Automatic Data Processing, Inc. and N-Viro International Corp.

(n29)Footnote 29. DGCL § 216 was amended on June 27, 2006 (effective August 1, 2006) to include the following: "A bylaw amendment adopted by stockholders which specifies the votes that shall be necessary for the election of directors shall not be further amended or repealed by the board of directors." *See* S. 322, 143rd Gen. Assem. § 5 (Del. 2006).

CHAPTER 6 CORPORATE GOVERNANCE GUIDELINES FOR BOARD PRACTICES AND PROCEDURES

1-6 Corporate Governance: Law and Practice § 6.04

AUTHOR: Holly J. Gregory

§ 6.04 Creating and Disclosing Corporate Governance Guidelines

The task of developing corporate governance guidelines is often delegated to the nominating/governance committee or other body of independent directors in the first instance. It often involves feedback from management and the board, and usually the guidelines are approved by the full board. As a matter of best practice, the Business Roundtable recommends that the corporate governance committee "develop and recommend to the board a set of corporate governance principles."¹ The NYSE Listed Company Manual requires that the nominating/governance committee charter include among the committee's purpose and responsibilities, the development (for recommendation to the board) of a set of corporate governance principles.²

Generally the body drafting a set of guidelines has significant discretion concerning the topics to include (although NYSE companies must address certain topics³). For this reason, having a full discussion at the board level prior to final adoption is important both to obtain formal approval and to provide education about the matters included. This discussion may be likened to a board evaluation discussion focused on how the board is functioning and in what areas improvements may be called for.

Generally, governance guidelines are made public.⁴ The Business Roundtable suggests that "[governance] principles should be communicated to the corporation's stockholders and should be readily available to prospective investors and other interested persons."⁵ Additionally, TIAA-CREF's policy on corporate governance states that "[t]he board should develop a clear and meaningful set of governance principles and disclose them to shareholders on the company's website, as well as in the annual report or proxy statement."⁶

In drafting corporate governance guidelines and principles, a board should strive to create a culture of ethics, compliance with law, inclusiveness and dedication to the firm's viability. Additionally, drafters of corporate governance guidelines should attempt to make the exercise a transparent, inclusive process in which all board members and management have an opportunity to make meaningful contributions. Every board, whether of a publicly-traded or privately-held company, has significant discretion to consider and resolve governance issues for itself. Boards should do so actively, within the framework of applicable laws, regulations and listing rules, as well as the unique context of the company's business needs and environment.⁷ The process of determining governance procedures represents a valuable opportunity for directors to become vested in their responsibilities and to proactively discuss and decide how best to

approach those responsibilities as a collective body.

Appendix 6-A Sample Corporate Governance Guidelines and Principles

1-6-A Corporate Governance: Law and Practice [6-A]

[6-A] Sample Corporate Governance Guidelines and Principles

Developed by Weil, Gotshal & Manges LLP. Reprinted with permission.

The sample set of corporate governance guidelines and principles attached is intended to comport with corporate governance listing standards of the principal U.S. stock markets and generally accepted practices for boards of listed companies. It incorporates elements suggested or required by the corporate governance listing standards of the New York Stock Exchange ("NYSE") and the Nasdaq Stock Market ("Nasdaq").

The NYSE requires U.S. listed companies to adopt and disclose a set of guidelines and principles that address: director responsibilities; director qualification standards, including independence; director orientation and continuing education; director compensation; annual board performance evaluation; director access to management; management succession; and board access to independent advisers.

Nasdaq's corporate governance listing standards do not require that listed companies adopt and disclose a set of corporate governance guidelines, although a number of Nasdaq companies do so.

*Corporate governance guidelines and principles are very specific to the needs and circumstances of the individual company. This sample provides only one fairly simple example. For additional information about governance guidelines, including provisions recommended by The Business Roundtable, the National Association of Corporate Directors and various institutional investors, see Gregory, *Comparison of Corporate Governance Guidelines and Codes of Best Practice: United States (2006)*, available from WG&M at <http://www.weil.com/wgm/pages/Controller.jsp?z=p&sz=CorpGov&db=wgm/WGMDoc.nsf&d=7fa691ef5e6d00ef85256d81004b74ba>. A shortened version of this comparison is attached as Appendix 6-C to this chapter.*

Please note that various factors unique to a company (including, among others, organizational structure, lines of business, and applicable requirements of local, regional or national law) may affect the provisions that should be addressed. Accordingly, while this sample includes standards and provisions that are appropriate generally for most publicly-traded U.S. companies, different and additional provisions may be appropriate in particular circumstances.

[NAME OF COMPANY]

Corporate Governance Guidelines and Principles

These Corporate Governance Guidelines and Principles were adopted by the Board of Directors (the "Board") of _____ (the "Company") [on / and amended through] [month] [day], [year].n*

*These Corporate Governance Guidelines and Principles are intended as a component of the flexible governance framework within which the Board, assisted by its committees, directs the affairs of the Company. While they should be interpreted in the context of all applicable laws, regulations and listing requirements, as well as in the context of the Company's Certificate of Incorporation and Bylaws, they are not intended to establish by their own force any legally binding obligations. [I]DIRECTOR RESPONSIBILITIES***

The role of the Board is to: (i) direct the affairs of the Company in the interests of the shareholders, including their interest in optimizing financial returns and the value of the Company over the long term; and (ii) set expectations about the tone and ethical culture of the Company.[A] Board Role

The Board fulfills its role (directly or by delegating certain responsibilities to its committees) by:

1. providing advice and counsel to the Chief Executive Officer and principal senior executives;
2. selecting, regularly evaluating, fixing the compensation of, and, where appropriate, replacing the Chief Executive Officer;
3. overseeing the conduct of the Company's business and strategic plans to evaluate whether the business is being properly managed;
4. reviewing and approving the Company's financial objectives and major corporate plans and actions;
5. reviewing and approving major changes in the appropriate auditing and accounting principles and practices;
6. providing oversight of internal and external audit processes and financial reporting;
7. providing oversight of risk assessment and protection processes and processes designed to promote legal compliance; and
8. performing such other functions as the Board believes appropriate or necessary, or as otherwise prescribed by rules or regulations.

[B] Care, Candor and Avoidance of Conflicts

The Company's directors recognize their obligation individually and collectively as the Board to pay careful attention and be properly informed. This requires regular attendance at board meetings and preparation for board meetings, including the advance review of circulated materials. The directors also recognize that candor and the avoidance of conflicts in fact and in perception are hallmarks of the accountability owed to the shareholders. Directors have a personal obligation to disclose a potential conflict of interest to the Chairman of the Board prior to any Board decision related to the matter and, if the Chairman in consultation with legal counsel determines a conflict exists or the perception of a conflict is likely to be significant, to recuse themselves from any discussion or vote related to the matter.[C] Integrity and Conduct

Each director is expected to act with integrity and to adhere to the policies in the Company's Code of Business Conduct and Ethics. Any waiver of the requirements of the Code of Business Conduct and Ethics for any director must be approved by the Board and promptly disclosed on the Company's website.[D] Confidentiality

Each director has an obligation to keep confidential all non-public information that relates to the Company's business. Such information includes, but is not limited to, information regarding the strategy, business, finances and operations of the Company, minutes, reports and materials of the Board and its committees, and other documents identified as confidential by the Company. Additionally, the proceedings and deliberations of the Board and its committees are confidential.[II]EXECUTIVE SESSIONS & INDEPENDENT BOARD LEADERSHIP

The [independent/non-management] directors meet regularly without members of management present in executive session, no less frequently than _____ times per year, and as otherwise determined by such directors. [If any of the non-management directors do not qualify as an "independent director" as set forth in Section V below, one or more additional executive sessions are held annually, attended only by independent directors.]n1

The executive sessions have such agendas and procedures as determined by the non-management and independent directors. The authority in such sessions to act on behalf of the Company or the Board on any matters requires an express delegation of authority by the Board.

[If the Company has a separate independent chairman, include a statement indicating that fact.][III] FORMAL EVALUATION OF THE CHIEF EXECUTIVE OFFICER

The Board has delegated to the Compensation Committee² the task of evaluating the Chief Executive Officer annually and reporting its recommendations to the Board. The Chairman of the Compensation Committee (together with the Lead Director or Chairman of the Board if the Chairman is an independent director) communicates the Board's conclusions to the Chief Executive Officer.

The evaluation is based on objective criteria including performance of the business, accomplishment of long-term strategic objectives, development of management, etc. The evaluation is used by the Compensation Committee in determining the Chief Executive Officer's compensation.[IV]MANAGEMENT DEVELOPMENT AND SUCCESSION PLANNINGn**

The Chief Executive Officer reports at least annually to the Board on the Company's program for management development and on succession planning, which the Board views as closely-related issues. In its consideration of these issues, it is the policy of the Board to consider issues related to CEO and senior executive selection and performance.

In addition, there is available on a continuing basis, and the Board and CEO periodically discuss, the Chief Executive Officer's recommendation as to a successor in the event of the sudden resignation, retirement or disability of the Chief Executive Officer.[A] Selection of Board Nominees

The Board is responsible for recommending director nominees to shareholders for election. The Board has delegated the screening process to the Nominating and Corporate Governance Committee.n3

The Nominating and Corporate Governance Committee is responsible for reviewing with the Board, on an annual basis, the appropriate skills and characteristics required of directors in the context of the current make up of the Board. This assessment includes issues of judgment, diversity, age, skills (such as an understanding of relevant technologies, international background, etc.), in the context of an assessment of the perceived needs of the Board at that point in time.

The Nominating and Corporate Governance Committee considers recommendations for Board candidates submitted by shareholders using the same criteria it applies to recommendations from the Committee, directors and members of management. Shareholders may submit recommendations by writing to the Committee at _____.

Invitations to serve as a nominee are extended by the Board itself via the Chairman of the Board and the Chairman of

the Nominating and Corporate Governance Committee.

[If applicable, include a reference to majority voting and/or director resignation policy]ⁿ⁴ [B] Board Independence ⁿ⁵

The Board has a majority of directors who are not officers or employees of the Company or its subsidiaries and who, in each case, the Board has affirmatively determined lack a "material relationship" with the Company (either directly or as a partner, controlling shareholder or executive officer of an organization that has a material relationship with the Company).

The Board defines a director as lacking a material relationship and therefore will be "independent" (subject to the guidance provided by the Listing Rules of the New York Stock Exchange) if he or she does not have any of the following relationships:

1. within the past three years

(i) is or has been employed by the Company or has an immediate family member who has been an executive officer of the Company;

(ii) has received, or has an immediate family member who has received, more than \$100,000 per year in direct compensation from the Company, other than director and committee fees and pension or other forms of deferred compensation for prior service (provided such compensation is not contingent in any way on continued service);ⁿ⁶

(iii) has provided significant advisory or consultancy services to the Company, and is, or has an immediate family member who is, affiliated as an executive officer, partner or controlling shareholder with a company or a firm that has provided such significant services (revenue of the greater of 2% of the other company's consolidated gross revenues or \$1 million is considered significant);

(iv) has been a significant customer or supplier of the Company or has been, or has an immediate family member who has been, a partner, controlling shareholder or executive officer of a company or firm that is (revenue of the greater of 2% of the other company's consolidated gross revenues or \$1 million is considered significant);

(v) (a) is, or whose immediate family member is, a current partner of a firm that is the company's internal or external auditor; (b) is a current employee of such a firm; (c) has an immediate family member who is a current employee of such a firm and who participates in the firm's audit, assurance or tax compliance; or (d) was, or has an immediate family member who was (but is no longer) a partner or employee of such a firm and personally worked on the Company's audit;

(vi) has been, or has an immediate family member who has been, employed by another company where any of the Company's current executive officers serve, or within the past three years served, on that company's compensation committee;

For these purposes, "immediate family member" includes a person's spouse, parent, sibling, child, mother- or father-in-law, son- or daughter-in-law or brother- or sister-in-law or anyone (other than domestic employees) who shares a person's home.ⁿ⁷

2. is an executive officer or chairman of the board of a tax-exempt entity that within the past 12 months

received significant contributions from the Company (revenue of the greater of 2% of the entity's consolidated gross revenues or \$1 million is considered significant); and

3. has any other relationships with the Company or with members of senior management that the Board determines to be material.

[C] Commitment and Limits on Other Activities

Directors are expected to limit the number of other boards (excluding non-profits) on which they serve to between _____ and _____, with the lower limit applying to directors who are engaged full-time in another business. Directors are asked to advise the Chairman of the Board and the Chairman of the Nominating and Corporate Governance Committee in advance of accepting an invitation to serve on another board.[D]

Term and Age Limits

As an alternative to term limits, the Nominating and Corporate Governance Committee formally reviews each director's continuation on the Board at the expiration of the director's term. The Board also has set an age limit of [_____] for directors.[E] Offer of Resignation Upon a Job Change

When a director's principal occupation or business association changes substantially from the position such director held when originally invited to join the Board, the director shall submit to the Chairman of the Nominating and Corporate Governance Committee an offer to resign. The Committee shall review whether it would be appropriate for the director to continue serving on the Board and recommend to the Board whether, in light of the circumstances, the Board should accept the proposed resignation or request that the director continue to serve.n8 [VI]DIRECTOR ORIENTATION AND CONTINUING EDUCATIONn**

The Board has delegated to the Nominating and Corporate Governance Committee the task of designing, with Company management, an appropriate orientation program for new directors that includes background material, meetings with senior management and visits to Company facilities. The Committee also explores, makes available, and designs and provides continuing education opportunities for directors, from time to time.[VII]DIRECTOR COMPENSATION AND STOCK OWNERSHIPn**

The Nominating and Corporate Governance Committee recommends to the Board for approval general principles for determining the form and amount of director compensation and subject to such principles, evaluates annually the status of Board compensation in relation to comparable U.S. companies (in terms of size, business sector, etc.), reporting its findings and recommendations to the Board for approval.n9

[Expand with a brief description of the components of director compensation, general principles for determining the form and amount of director compensation and any policy on stock ownership.]n10 [VIII]BOARD AGENDA, MATERIALS, INFORMATION AND PRESENTATIONS

The Chairman of the Board, with input from senior members of management and the Lead Director, establishes the agenda for each Board meeting. A schedule of agenda subjects to be discussed for the ensuing year is issued at the beginning of each year (to the degree these can be foreseen). Each director is free to suggest the inclusion of item(s) on the agenda.

Information and data that is important to the Board's understanding of the business is distributed in writing to the Board generally five to seven days before the Board meets, although this is not a strict standard, so as to allow for unusual circumstances. Management should ensure that material is as brief as possible while still providing the desired information.

As a general rule, Board meeting time is reserved for discussion. Presentations on specific subjects are forwarded to the

directors in advance so that directors may prepare, Board meeting time may be conserved, and discussion time may be focused. However, it is recognized that there may be occasions when an important issue arises without time for written background materials to circulate or the subject matter is not appropriate for written materials, such that more presentation time will be required.[IX]DIRECTOR ACCESS TO SENIOR MANAGERS AND INDEPENDENT ADVISERSn**

Directors have complete access to senior management and to the Board's advisers. Directors are expected to use good judgment to ensure that this contact is not distracting to the business operation of the Company, and that independent advisers are used efficiently.

The Board welcomes regular attendance of senior managers at Board meetings. Should the Chairman and Chief Executive Officer wish to suggest that a senior manager attend on a regular basis, such suggestion is made to the Board for its concurrence. The Board encourages management to bring managers into Board meetings who: (a) can provide additional insight into the items being discussed because of personal involvement in these areas, and/or (b) have future potential such that management believes the Board should have greater exposure to the individual.[X] BOARD INTERACTION WITH SHAREHOLDERS AND OTHERS/ANNUAL MEETINGS

Management, and, in particular, the Chief Executive Officer, speaks for the Company with shareholders, investors, employees, customers, suppliers, the press and others. The Chairman of the Board and, in certain circumstances, the Lead Director, speaks for the Board. Individual directors may, from time to time at the request of management, meet or otherwise communicate with various constituencies. If comments from the Board are appropriate, however, they should, in most circumstances, come from the Chairman. Directors are expected to take special care in all communications concerning the Company, in light of confidentiality requirements and laws prohibiting insider trading, tipping and avoidance of selective disclosure.

It is a policy of the Board that all Directors attend the Annual Meeting of Shareholders absent unusual circumstances. (The Company is required to disclose director attendance at such meeting in the Company's next proxy statement or on the Company's website).[XI]STANDING BOARD COMMITTEES

The Board currently has [three] committees: Audit, Compensation and Nominating and Corporate Governance.n11 Membership on such committees is limited to independent directors. The Board retains discretion to form new committees or disband current committees depending upon the circumstances.

The Nominating and Corporate Governance Committee recommends, after consultation with the Chairman of the Board and Chief Executive Officer, and with consideration of the desires of individual directors, the appointment of directors to various committees and the appointment of committee chairmen, for Board approval.[XII]ANNUAL BOARD AND COMMITTEE PERFORMANCE EVALUATIONSn**

The Board conducts an annual self-evaluation of its performance and the performance of its committees. The Nominating and Corporate Governance Committee recommends to the Board and its committees the methodology for such evaluations and oversees its execution.[XIII]COMMUNICATING WITH THE BOARD

Shareholders are invited to communicate to the Board or its committees by writing to: _____ .n12 [XIV] CORPORATE GOVERNANCE GUIDELINES

The Nominating and Corporate Governance Committee reviews these Guidelines periodically and recommends amendments to the Board as necessary.

These Guidelines are posted on the Company's website for communication to the Company's shareholders.n13 [I]DIRECTOR RESPONSIBILITIESn**

1-6-A Corporate Governance: Law and Practice [6-A]

The role of the Board is to: (i) direct the affairs of the Company in the interests of the shareholders, including their interest in optimizing financial returns and the value of the Company over the long term; and (ii) set expectations about the tone and ethical culture of the Company.[A] Board Role

The Board fulfills its role (directly or by delegating certain responsibilities to its committees) by:

1. providing advice and counsel to the Chief Executive Officer and principal senior executives;
2. selecting, regularly evaluating, fixing the compensation of, and, where appropriate, replacing the Chief Executive Officer;
3. overseeing the conduct of the Company's business and strategic plans to evaluate whether the business is being properly managed;
4. reviewing and approving the Company's financial objectives and major corporate plans and actions;
5. reviewing and approving major changes in the appropriate auditing and accounting principles and practices;
6. providing oversight of internal and external audit processes and financial reporting;
7. providing oversight of risk assessment and protection processes and processes designed to promote legal compliance; and
8. performing such other functions as the Board believes appropriate or necessary, or as otherwise prescribed by rules or regulations.

[B] Care, Candor and Avoidance of Conflicts

The Company's directors recognize their obligation individually and collectively as the Board to pay careful attention and be properly informed. This requires regular attendance at board meetings and preparation for board meetings, including the advance review of circulated materials. The directors also recognize that candor and the avoidance of conflicts in fact and in perception are hallmarks of the accountability owed to the shareholders. Directors have a personal obligation to disclose a potential conflict of interest to the Chairman of the Board prior to any Board decision related to the matter and, if the Chairman in consultation with legal counsel determines a conflict exists or the perception of a conflict is likely to be significant, to recuse themselves from any discussion or vote related to the matter.[C] Integrity and Conduct

Each director is expected to act with integrity and to adhere to the policies in the Company's Code of Business Conduct and Ethics. Any waiver of the requirements of the Code of Business Conduct and Ethics for any director must be approved by the Board and promptly disclosed on the Company's website.[D] Confidentiality

Each director has an obligation to keep confidential all non-public information that relates to the Company's business. Such information includes, but is not limited to, information regarding the strategy, business, finances and operations of the Company, minutes, reports and materials of the Board and its committees, and other documents identified as confidential by the Company. Additionally, the proceedings and deliberations of the Board and its committees are confidential.[II] EXECUTIVE SESSIONS & INDEPENDENT BOARD LEADERSHIP

The [independent/non-management] directors meet regularly without members of management present in executive session, no less frequently than _____ times per year, and as otherwise determined by such

directors. [If any of the non-management directors do not qualify as an "independent director" as set forth in Section V below, one or more additional executive sessions are held annually, attended only by independent directors.]n1

The executive sessions have such agendas and procedures as determined by the non-management and independent directors. The authority in such sessions to act on behalf of the Company or the Board on any matters requires an express delegation of authority by the Board.

[If the Company has a separate independent chairman, include a statement indicating that fact.][III] FORMAL EVALUATION OF THE CHIEF EXECUTIVE OFFICER

The Board has delegated to the Compensation Committee² the task of evaluating the Chief Executive Officer annually and reporting its recommendations to the Board. The Chairman of the Compensation Committee (together with the Lead Director or Chairman of the Board if the Chairman is an independent director) communicates the Board's conclusions to the Chief Executive Officer.

The evaluation is based on objective criteria including performance of the business, accomplishment of long-term strategic objectives, development of management, etc. The evaluation is used by the Compensation Committee in determining the Chief Executive Officer's compensation.[IV]MANAGEMENT DEVELOPMENT AND SUCCESSION PLANNINGn**

The Chief Executive Officer reports at least annually to the Board on the Company's program for management development and on succession planning, which the Board views as closely-related issues. In its consideration of these issues, it is the policy of the Board to consider issues related to CEO and senior executive selection and performance.

In addition, there is available on a continuing basis, and the Board and CEO periodically discuss, the Chief Executive Officer's recommendation as to a successor in the event of the sudden resignation, retirement or disability of the Chief Executive Officer.[A] Selection of Board Nominees

The Board is responsible for recommending director nominees to shareholders for election. The Board has delegated the screening process to the Nominating and Corporate Governance Committee.n3

The Nominating and Corporate Governance Committee is responsible for reviewing with the Board, on an annual basis, the appropriate skills and characteristics required of directors in the context of the current make up of the Board. This assessment includes issues of judgment, diversity, age, skills (such as an understanding of relevant technologies, international background, etc.), in the context of an assessment of the perceived needs of the Board at that point in time.

The Nominating and Corporate Governance Committee considers recommendations for Board candidates submitted by shareholders using the same criteria it applies to recommendations from the Committee, directors and members of management. Shareholders may submit recommendations by writing to the Committee at _____.

Invitations to serve as a nominee are extended by the Board itself via the Chairman of the Board and the Chairman of the Nominating and Corporate Governance Committee.

[If applicable, include a reference to majority voting and/or director resignation policy]n4 [B] Board Independence n5

The Board has a majority of directors who are not officers or employees of the Company or its subsidiaries and who, in each case, the Board has affirmatively determined lack a "material relationship" with the Company (either directly or as a partner, controlling shareholder or executive officer of an organization that has a material relationship with the Company).

The Board defines a director as lacking a material relationship and therefore will be "independent" (subject to the guidance provided by the Listing Rules of the New York Stock Exchange) if he or she does not have any of the following relationships:

1. within the past three years

(i) is or has been employed by the Company or has an immediate family member who has been an executive officer of the Company;

(ii) has received, or has an immediate family member who has received, more than \$100,000 per year in direct compensation from the Company, other than director and committee fees and pension or other forms of deferred compensation for prior service (provided such compensation is not contingent in any way on continued service);⁶

(iii) has provided significant advisory or consultancy services to the Company, and is, or has an immediate family member who is, affiliated as an executive officer, partner or controlling shareholder with a company or a firm that has provided such significant services (revenue of the greater of 2% of the other company's consolidated gross revenues or \$1 million is considered significant);

(iv) has been a significant customer or supplier of the Company or has been, or has an immediate family member who has been, a partner, controlling shareholder or executive officer of a company or firm that is (revenue of the greater of 2% of the other company's consolidated gross revenues or \$1 million is considered significant);

(v) (a) is, or whose immediate family member is, a current partner of a firm that is the company's internal or external auditor; (b) is a current employee of such a firm; (c) has an immediate family member who is a current employee of such a firm and who participates in the firm's audit, assurance or tax compliance; or (d) was, or has an immediate family member who was (but is no longer) a partner or employee of such a firm and personally worked on the Company's audit;

(vi) has been, or has an immediate family member who has been, employed by another company where any of the Company's current executive officers serve, or within the past three years served, on that company's compensation committee;

For these purposes, "immediate family member" includes a person's spouse, parent, sibling, child, mother- or father-in-law, son- or daughter-in-law or brother- or sister-in-law or anyone (other than domestic employees) who shares a person's home.⁷

2. is an executive officer or chairman of the board of a tax-exempt entity that within the past 12 months received significant contributions from the Company (revenue of the greater of 2% of the entity's consolidated gross revenues or \$1 million is considered significant); and

3. has any other relationships with the Company or with members of senior management that the Board determines to be material.

[C] Commitment and Limits on Other Activities

Directors are expected to limit the number of other boards (excluding non-profits) on which they serve to between _____ and _____, with the lower limit applying to directors who are engaged

full-time in another business. Directors are asked to advise the Chairman of the Board and the Chairman of the Nominating and Corporate Governance Committee in advance of accepting an invitation to serve on another board.[D]
Term and Age Limits

As an alternative to term limits, the Nominating and Corporate Governance Committee formally reviews each director's continuation on the Board at the expiration of the director's term. The Board also has set an age limit of [_____] for directors.[E] Offer of Resignation Upon a Job Change

When a director's principal occupation or business association changes substantially from the position such director held when originally invited to join the Board, the director shall submit to the Chairman of the Nominating and Corporate Governance Committee an offer to resign. The Committee shall review whether it would be appropriate for the director to continue serving on the Board and recommend to the Board whether, in light of the circumstances, the Board should accept the proposed resignation or request that the director continue to serve.n8 [VI]DIRECTOR ORIENTATION AND CONTINUING EDUCATIONn**

The Board has delegated to the Nominating and Corporate Governance Committee the task of designing, with Company management, an appropriate orientation program for new directors that includes background material, meetings with senior management and visits to Company facilities. The Committee also explores, makes available, and designs and provides continuing education opportunities for directors, from time to time.[VII]DIRECTOR COMPENSATION AND STOCK OWNERSHIPn**

The Nominating and Corporate Governance Committee recommends to the Board for approval general principles for determining the form and amount of director compensation and subject to such principles, evaluates annually the status of Board compensation in relation to comparable U.S. companies (in terms of size, business sector, etc.), reporting its findings and recommendations to the Board for approval.n9

[Expand with a brief description of the components of director compensation, general principles for determining the form and amount of director compensation and any policy on stock ownership.]n10 [VIII]BOARD AGENDA, MATERIALS, INFORMATION AND PRESENTATIONS

The Chairman of the Board, with input from senior members of management and the Lead Director, establishes the agenda for each Board meeting. A schedule of agenda subjects to be discussed for the ensuing year is issued at the beginning of each year (to the degree these can be foreseen). Each director is free to suggest the inclusion of item(s) on the agenda.

Information and data that is important to the Board's understanding of the business is distributed in writing to the Board generally five to seven days before the Board meets, although this is not a strict standard, so as to allow for unusual circumstances. Management should ensure that material is as brief as possible while still providing the desired information.

As a general rule, Board meeting time is reserved for discussion. Presentations on specific subjects are forwarded to the directors in advance so that directors may prepare, Board meeting time may be conserved, and discussion time may be focused. However, it is recognized that there may be occasions when an important issue arises without time for written background materials to circulate or the subject matter is not appropriate for written materials, such that more presentation time will be required.[IX]DIRECTOR ACCESS TO SENIOR MANAGERS AND INDEPENDENT ADVISERSn**

Directors have complete access to senior management and to the Board's advisers. Directors are expected to use good judgment to ensure that this contact is not distracting to the business operation of the Company, and that independent advisers are used efficiently.

The Board welcomes regular attendance of senior managers at Board meetings. Should the Chairman and Chief Executive Officer wish to suggest that a senior manager attend on a regular basis, such suggestion is made to the Board for its concurrence. The Board encourages management to bring managers into Board meetings who: (a) can provide additional insight into the items being discussed because of personal involvement in these areas, and/or (b) have future potential such that management believes the Board should have greater exposure to the individual.[X] **BOARD INTERACTION WITH SHAREHOLDERS AND OTHERS/ANNUAL MEETINGS**

Management, and, in particular, the Chief Executive Officer, speaks for the Company with shareholders, investors, employees, customers, suppliers, the press and others. The Chairman of the Board and, in certain circumstances, the Lead Director, speaks for the Board. Individual directors may, from time to time at the request of management, meet or otherwise communicate with various constituencies. If comments from the Board are appropriate, however, they should, in most circumstances, come from the Chairman. Directors are expected to take special care in all communications concerning the Company, in light of confidentiality requirements and laws prohibiting insider trading, tipping and avoidance of selective disclosure.

It is a policy of the Board that all Directors attend the Annual Meeting of Shareholders absent unusual circumstances. (The Company is required to disclose director attendance at such meeting in the Company's next proxy statement or on the Company's website.)(XI)**STANDING BOARD COMMITTEES**

The Board currently has [three] committees: Audit, Compensation and Nominating and Corporate Governance.n11 Membership on such committees is limited to independent directors. The Board retains discretion to form new committees or disband current committees depending upon the circumstances.

The Nominating and Corporate Governance Committee recommends, after consultation with the Chairman of the Board and Chief Executive Officer, and with consideration of the desires of individual directors, the appointment of directors to various committees and the appointment of committee chairmen, for Board approval.[XII]**ANNUAL BOARD AND COMMITTEE PERFORMANCE EVALUATIONS**n**

The Board conducts an annual self-evaluation of its performance and the performance of its committees. The Nominating and Corporate Governance Committee recommends to the Board and its committees the methodology for such evaluations and oversees its execution.[XIII]**COMMUNICATING WITH THE BOARD**

Shareholders are invited to communicate to the Board or its committees by writing to:_____.n12 [XIV]**CORPORATE GOVERNANCE GUIDELINES**

The Nominating and Corporate Governance Committee reviews these Guidelines periodically and recommends amendments to the Board as necessary.

These Guidelines are posted on the Company's website for communication to the Company's shareholders.n13

FOOTNOTES:

(n2)Footnote *. Provisions included throughout this sample in brackets should be conformed to the Company's particular circumstances.

(n3)Footnote **. The New York Stock Exchange requires listed U.S. companies to address the topics marked with an asterisk in the Company's Corporate Governance Guidelines & Principles. New York Stock Exchange Listed Company Manual § 303A.09.

(n28)Footnote **. The New York Stock Exchange requires listed U.S. companies to address the topics marked

with an asterisk in the Company's Corporate Governance Guidelines & Principles. New York Stock Exchange Listed Company Manual § 303A.09.

(n4)Footnote 1. For companies listed on the New York Stock Exchange ("NYSE"). On November 23, 2005, the NYSE filed with the SEC proposed rule changes to Section 303A of the NYSE Listed Company Manual concerning the standards for determining director independence and related disclosure requirements (File No. SR-NYSE-2005-81). The SEC has not yet published any of these proposed listing standard amendments for comment, which is a pre-requisite for their approval and effectiveness. As proposed, the rules clarify that the "executive session" meetings that it requires be regularly held may be held among only independent directors (and are not required to also include non-independent, non-management directors, but in the directors' discretion may do so, although at least one such meeting each year should include only independent directors). See SEC File No. SR-NYSE-2005-81 (Nov. 23, 2005). Nevertheless, these proposed amendments provide some guidance regarding the NYSE's interpretation of its listing standards and are noted below where relevant.

(n29)Footnote 1. For companies listed on the New York Stock Exchange ("NYSE"). On November 23, 2005, the NYSE filed with the SEC proposed rule changes to Section 303A of the NYSE Listed Company Manual concerning the standards for determining director independence and related disclosure requirements (File No. SR-NYSE-2005-81). The SEC has not yet published any of these proposed listing standard amendments for comment, which is a pre-requisite for their approval and effectiveness. As proposed, the rules clarify that the "executive session" meetings that it requires be regularly held may be held among only independent directors (and are not required to also include non-independent, non-management directors, but in the directors' discretion may do so, although at least one such meeting each year should include only independent directors). See SEC File No. SR-NYSE-2005-81 (Nov. 23, 2005). Nevertheless, these proposed amendments provide some guidance regarding the NYSE's interpretation of its listing standards and are noted below where relevant.

(n5)Footnote 2. Nasdaq does not require that a listed company establish a compensation committee. However, CEO and other executive officer compensation must be determined or recommended to the board for approval by a compensation committee that is composed only of independent directors or, if no such committee exists, by a majority of the independent directors. Nasdaq Marketplace Rules, Rule 4350(c)(3), available at <http://www.nasdaq.com/about/LegalCompliance.stm>.

(n30)Footnote 2. Nasdaq does not require that a listed company establish a compensation committee. However, CEO and other executive officer compensation must be determined or recommended to the board for approval by a compensation committee that is composed only of independent directors or, if no such committee exists, by a majority of the independent directors. Nasdaq Marketplace Rules, Rule 4350(c)(3), available at <http://www.nasdaq.com/about/LegalCompliance.stm>.

(n6)Footnote **. The New York Stock Exchange requires listed U.S. companies to address the topics marked with an asterisk in the Company's Corporate Governance Guidelines & Principles. New York Stock Exchange Listed Company Manual § 303A.09.

(n31)Footnote **. The New York Stock Exchange requires listed U.S. companies to address the topics marked with an asterisk in the Company's Corporate Governance Guidelines & Principles. New York Stock Exchange Listed Company Manual § 303A.09.

(n13)Footnote 3. Nasdaq does not require that a listed company establish a nominating committee, however, listed companies must adopt a committee charter or by board resolution which (i) establishes a process for the selection by the board of directors of nominees for election by the shareholders and (ii) addresses such other matters relating to director nominations as may be required under the federal securities laws (such as a policy regarding the consideration that will be given to candidates for nomination by the board proposed by securityholders, which policy companies are required to disclose in a proxy statement for the election of directors). Nasdaq Marketplace Rules, Rule 4350(c)(4).

(n38)Footnote 3. Nasdaq does not require that a listed company establish a nominating committee, however, listed companies must adopt a committee charter or by board resolution which (i) establishes a process for the selection by the board of directors of nominees for election by the shareholders and (ii) addresses such other matters relating to director nominations as may be required under the federal securities laws (such as a policy regarding the consideration that will be given to candidates for nomination by the board proposed by securityholders, which policy companies are required to disclose in a proxy statement for the election of directors). Nasdaq Marketplace Rules, Rule 4350(c)(4).

(n14)Footnote 4. This provision is not required to be included in Corporate Governance Guidelines. However, in response to increasing shareholder interest in majority voting for director elections, some companies have adopted a policy (in Corporate Governance Guidelines or as a separate policy) that a director will resign from the board if he or she does not receive a majority of votes cast "for" election ("director resignation"). Note that other options available to companies with respect to implementing a majority voting standard for director elections include: amending its Bylaws to include such a director resignation provision; amending its Bylaws to provide that directors shall be elected by a majority of votes cast (a "majority vote standard"); or amending its Certificate of Incorporation to include a majority vote standard.

(n39)Footnote 4. This provision is not required to be included in Corporate Governance Guidelines. However, in response to increasing shareholder interest in majority voting for director elections, some companies have adopted a policy (in Corporate Governance Guidelines or as a separate policy) that a director will resign from the board if he or she does not receive a majority of votes cast "for" election ("director resignation"). Note that other options available to companies with respect to implementing a majority voting standard for director elections include: amending its Bylaws to include such a director resignation provision; amending its Bylaws to provide that directors shall be elected by a majority of votes cast (a "majority vote standard"); or amending its Certificate of Incorporation to include a majority vote standard.

(n15)Footnote 5. This provision is based on, but goes beyond, the NYSE bright-line standards that define when a director may not be considered independent. A board must make an affirmative determination regarding director independence and in doing so must consider whether relationships not addressed by the bright-line standards nonetheless impair independence. Listed companies must identify which directors are independent in their annual meeting proxy statement or, if they do not file an annual meeting proxy statement, in their annual report. If the board has determined that a director has a relationship with the listed company that is immaterial it must also include in the company's annual meeting proxy statement (or annual report) a specific description of the relationship and the basis for the board's determination that the relationship is not material. NYSE Listed Company Manual, § 303A.02. However, note that the NYSE has proposed a change in its listing standards to clarify the required disclosure regarding director independence. As proposed, listed companies will be required to state with respect to each independent director that he or she has no relationships with the listed company, other than his or her service as a director or shareholder, or has only immaterial relationships. If an immaterial relationship exists, that relationship must be specifically described and the board's basis for determining that such relationship is immaterial, unless it may provide such explanation by applying a customized materiality standard, as described below (including with the qualifications on the use of such standards) simultaneously proposed by the NYSE. See SEC File No. SR-NYSE-2005-81 (Nov. 23, 2005). Additionally, the NYSE proposed rule changes note that the board should be aware that concerns regarding directors' independence may be raised when a listed company makes substantial charitable contributions to organizations in which a director is affiliated, or enters into consulting contracts with (or provides other indirect forms of compensation to) a director and that the board should critically evaluate each of these matters when determining the form and amount of director compensation, and the independence of a director. See SEC File No. SR-NYSE-2005-81 (Nov. 23, 2005).

Nasdaq companies should consider adopting a provision based on, but expanding upon, the Nasdaq independence requirements, for example, along the following lines. Listed companies must identify which directors are independent in their annual meeting proxy statement or, if they do not file an annual meeting proxy statement, in their annual report. (Note that Nasdaq recently amended Rule 4200(a)(15) relating to the standards for determining director independence

and its related interpretive memorandum IM-4200, as well as other, incidental rule amendments (SEC File No. SR-NASDAQ-2006-021 (Oct. 6, 2006)):

The Board has a majority of directors who are not officers or employees of the Company or its subsidiaries and who, in each case, the Board has affirmatively determined has no relationship that, in the opinion of the Board, would interfere with the exercise of his or her independent judgment in carrying out the responsibilities of a director.

The Board shall not consider a director to be independent (subject to the interpretative materials of the Nasdaq Stock Market) if he or she:

- is, or at any time during the past three years was, employed by the Company or by any parent or subsidiary of the Company. (Note that Nasdaq has amended IM-4200 interpreting this provision to clarify that payments to a director to provide his or her services as an interim executive officer for a year or less will not be considered employment constituting a per se bar to a finding of independence, but that the board must nevertheless affirmatively determine that such service and the compensation received therefore would not interfere with his or her ability to exercise independent judgment as a director. Nasdaq Marketplace Rules, IM-4200(a)(15)).
- accepted, or has a family member who accepted, any compensation from the Company or any parent or subsidiary of the Company of more than \$60,000 annually during the current or any of the past three fiscal years, other than director compensation or payments under a tax-qualified retirement plan or other non-discretionary compensation for prior services rendered. (Note that Nasdaq has amended this provision and substituted "compensation" for "payments" and has made conforming changes in the wording of IM-4200 interpreting this provision. This amendment clarifies that payments for personal services or political contributions to a candidate will be considered disqualifying compensation. Nasdaq Marketplace Rules, IM-4200(a)(15)). Also note that on November 16, 2006 Nasdaq proposed amending this provision to increase the \$60,000 standard to \$120,000 consistent with the recently adopted amendments to Item 404 of Regulation S-K. This rule change has not yet been published. See SR-NASDAQ-2006-41).
- The following payments will not be considered: (i) compensation for Board or Board committee service; (ii) payments arising solely from investments in the Company's securities; (iii) compensation paid to a family member who is a non-executive employee of the Company or a parent or subsidiary of the Company; (iv) benefits under a tax-qualified retirement plan or non-discretionary compensation; or (v) loans permitted under Section 13(k) of the Securities Exchange Act of 1934, as amended. (In addition, Nasdaq has amended IM-4200 to provide that non-preferential payments by a listed company or its subsidiaries or affiliates to a director or his or her family members made in the ordinary course of such companies' provision of business services will not pose a per se bar to a finding by the board that the director is independent as long as the payments are non-compensatory in nature. Nasdaq Marketplace Rules, IM-4200(a)(15)).
- is a family member of an individual who is, or at any time during the past three years was, an executive officer of the Company or any parent or subsidiary of the Company.
- is, or has a family member who is, a partner in, or a controlling shareholder or an executive officer of, any organization that is considered a significant supplier or customer of the listed company (including charitable organizations) to which the Company made, or from which the Company received, payments

for property or services in the current or any of the past three fiscal years that exceed the greater of five percent (5%) of the recipient's consolidated gross revenues for that year or \$200,000.

- Payments (i) arising solely from investments in the Company's securities, or (ii) under non-discretionary charitable contribution matching programs, will not be considered.

- is, or has a family member who is, an executive officer of another entity where, at any time during the past three years, any of the Company's executive officers served on that entity's compensation committee.

- is, or has a family member who is, a current partner of the Company's outside auditor, or was a partner or employee of the Company's outside auditor who worked on the Company's audit at any time during any of the past three years.

(n40)Footnote 5. This provision is based on, but goes beyond, the NYSE bright-line standards that define when a director may not be considered independent. A board must make an affirmative determination regarding director independence and in doing so must consider whether relationships not addressed by the bright-line standards nonetheless impair independence. Listed companies must identify which directors are independent in their annual meeting proxy statement or, if they do not file an annual meeting proxy statement, in their annual report. If the board has determined that a director has a relationship with the listed company that is immaterial it must also include in the company's annual meeting proxy statement (or annual report) a specific description of the relationship and the basis for the board's determination that the relationship is not material. NYSE Listed Company Manual, § 303A.02. However, note that the NYSE has proposed a change in its listing standards to clarify the required disclosure regarding director independence. As proposed, listed companies will be required to state with respect to each independent director that he or she has no relationships with the listed company, other than his or her service as a director or shareholder, or has only immaterial relationships. If an immaterial relationship exists, that relationship must be specifically described and the board's basis for determining that such relationship is immaterial, unless it may provide such explanation by applying a customized materiality standard, as described below (including with the qualifications on the use of such standards) simultaneously proposed by the NYSE. See SEC File No. SR-NYSE-2005-81 (Nov. 23, 2005). Additionally, the NYSE proposed rule changes note that the board should be aware that concerns regarding directors' independence may be raised when a listed company makes substantial charitable contributions to organizations in which a director is affiliated, or enters into consulting contracts with (or provides other indirect forms of compensation to) a director and that the board should critically evaluate each of these matters when determining the form and amount of director compensation, and the independence of a director. See SEC File No. SR-NYSE-2005-81 (Nov. 23, 2005).

Nasdaq companies should consider adopting a provision based on, but expanding upon, the Nasdaq independence requirements, for example, along the following lines. Listed companies must identify which directors are independent in their annual meeting proxy statement or, if they do not file an annual meeting proxy statement, in their annual report. (Note that Nasdaq recently amended Rule 4200(a)(15) relating to the standards for determining director independence and its related interpretive memorandum IM-4200, as well as other, incidental rule amendments (SEC File No. SR-NASDAQ-2006-021 (Oct. 6, 2006)):

The Board has a majority of directors who are not officers or employees of the Company or its subsidiaries and who, in each case, the Board has affirmatively determined has no relationship that, in the opinion of the Board, would interfere with the exercise of his or her independent judgment in carrying out the responsibilities of a director.

The Board shall not consider a director to be independent (subject to the interpretative materials of

the Nasdaq Stock Market) if he or she:

- is, or at any time during the past three years was, employed by the Company or by any parent or subsidiary of the Company. (Note that Nasdaq has amended IM-4200 interpreting this provision to clarify that payments to a director to provide his or her services as an interim executive officer for a year or less will not be considered employment constituting a per se bar to a finding of independence, but that the board must nevertheless affirmatively determine that such service and the compensation received therefore would not interfere with his or her ability to exercise independent judgment as a director. Nasdaq Marketplace Rules, IM-4200(a)(15)).

- accepted, or has a family member who accepted, any compensation from the Company or any parent or subsidiary of the Company of more than \$60,000 annually during the current or any of the past three fiscal years, other than director compensation or payments under a tax-qualified retirement plan or other non-discretionary compensation for prior services rendered. (Note that Nasdaq has amended this provision and substituted "compensation" for "payments" and has made conforming changes in the wording of IM-4200 interpreting this provision. This amendment clarifies that payments for personal services or political contributions to a candidate will be considered disqualifying compensation. Nasdaq Marketplace Rules, IM-4200(a)(15)). Also note that on November 16, 2006 Nasdaq proposed amending this provision to increase the \$60,000 standard to \$120,000 consistent with the recently adopted amendments to Item 404 of Regulation S-K. This rule change has not yet been published. See SR-NASDAQ-2006-41).

- The following payments will not be considered: (i) compensation for Board or Board committee service; (ii) payments arising solely from investments in the Company's securities; (iii) compensation paid to a family member who is a non-executive employee of the Company or a parent or subsidiary of the Company; (iv) benefits under a tax-qualified retirement plan or non-discretionary compensation; or (v) loans permitted under Section 13(k) of the Securities Exchange Act of 1934, as amended. (In addition, Nasdaq has amended IM-4200 to provide that non-preferential payments by a listed company or its subsidiaries or affiliates to a director or his or her family members made in the ordinary course of such companies' provision of business services will not pose a per se bar to a finding by the board that the director is independent as long as the payments are non-compensatory in nature. Nasdaq Marketplace Rules, IM-4200(a)(15)).

- is a family member of an individual who is, or at any time during the past three years was, an executive officer of the Company or any parent or subsidiary of the Company.

- is, or has a family member who is, a partner in, or a controlling shareholder or an executive officer of, any organization that is considered a significant supplier or customer of the listed company (including charitable organizations) to which the Company made, or from which the Company received, payments for property or services in the current or any of the past three fiscal years that exceed the greater of five percent (5%) of the recipient's consolidated gross revenues for that year or \$200,000.

- Payments (i) arising solely from investments in the Company's securities, or (ii) under non-discretionary charitable contribution matching programs, will not be considered.

- is, or has a family member who is, an executive officer of another entity where, at any time during the past three years, any of the Company's executive officers served on that entity's compensation

committee.

■ is, or has a family member who is, a current partner of the Company's outside auditor, or was a partner or employee of the Company's outside auditor who worked on the Company's audit at any time during any of the past three years.

(n16)Footnote 6. Compensation received (i) for prior service as an interim Chairman, CEO or other executive officer or (ii) by an immediate family member for service as an employee (other than an executive officer) of the listed company is not considered disqualifying for this purpose.

(n41)Footnote 6. Compensation received (i) for prior service as an interim Chairman, CEO or other executive officer or (ii) by an immediate family member for service as an employee (other than an executive officer) of the listed company is not considered disqualifying for this purpose.

(n17)Footnote 7. The NYSE has proposed amending the definition of "immediate family member" to clarify that it does not include stepchildren who do not share a stepparent's home, or the in-laws of such stepchildren. See SEC File No. SR-NYSE-2005-81 (Nov. 23, 2005).

(n42)Footnote 7. The NYSE has proposed amending the definition of "immediate family member" to clarify that it does not include stepchildren who do not share a stepparent's home, or the in-laws of such stepchildren. See SEC File No. SR-NYSE-2005-81 (Nov. 23, 2005).

(n18)Footnote 8. Many companies include a provision in their guidelines and principles requiring each director to tender his or her resignation upon a substantial change in principal occupation or business association, although such a provision is not required. As an alternative, the guidelines and principles could require each director to notify the Chairman of the Nominating and Corporate Governance Committee of any substantial change in principal occupation or business association -- such a provision is also not required.

(n43)Footnote 8. Many companies include a provision in their guidelines and principles requiring each director to tender his or her resignation upon a substantial change in principal occupation or business association, although such a provision is not required. As an alternative, the guidelines and principles could require each director to notify the Chairman of the Nominating and Corporate Governance Committee of any substantial change in principal occupation or business association -- such a provision is also not required.

Appendix 6-B Sample Board & Board Committee Self-Evaluation Form

1-6-B Corporate Governance: Law and Practice [6-B]

[6-B] Sample Board & Board Committee Self-Evaluation Form

Developed by Weil, Gotshal & Manges LLP. Reprinted with permission.

The following sample Board and Board Committee Self-Evaluation Form is intended to comport with corporate governance listing standards of the New York Stock Exchange and generally accepted practices for boards of directors of publicly-traded U.S. companies.

The New York Stock Exchange's listing standards require that a listed company have a set of corporate governance guidelines and principles that address, among other things, board evaluation. The New York Stock Exchange's listing standards also require that the key committee charters provide for annual evaluations of committee operations. The Nasdaq listing standards do not require board or committee evaluations, although many Nasdaq companies perform such evaluations as a "good governance" practice. Note that PCAOB Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements ("AS2") (available at http://www.pcaobus.org/Rules/Rules_of_the_Board/Auditing_Standard_2.pdf) now requires - and, if adopted, the PCAOB's proposed auditing standard AS2 which would supersede current AS2, will require - the independent auditor to evaluate - as part of its broader evaluation of the control environment - the effectiveness of the audit committee's oversight of the financial reporting process and related internal controls. As part of their own evaluation, many independent auditors are inquiring into whether the board has evaluated the audit committee and found it to be effective. Therefore, at minimum, Nasdaq companies should consider evaluating the effectiveness of the audit committee, and all public company boards should pay special attention to such evaluation.

Important Practice Pointer: *There are no specific requirements concerning the content of board and committee evaluations nor any requirement that such evaluations be in writing. Please note that **completed evaluation forms may be discoverable in litigation**. Therefore, some boards are opting for paperless facilitated board and committee discussions as the means of evaluation. (The questions on the attached form can be used as a guide for such facilitated discussions.) Even when written forms are used, they are typically relied on to collect director viewpoints for an oral report that is given to the board on the results - as an opportunity to engage the full board in a discussion of board performance. A board may wish to consider putting in place a policy that the executed forms not be retained once the information is reviewed. (Document retention policies should be reviewed and limits on routine document destruction in the context of an investigation or institution of a lawsuit considered.) An argument can be made for attorney-client communication protection attaching to the completed evaluation forms if they are designed to provide input to counsel,*

who is advising the board on efforts to improve governance processes. **However, the strength of this argument has not been tested, and it is therefore uncertain whether a court will protect from discovery evaluation materials on these grounds.** Nonetheless, should a board or board committee choose to use written evaluation forms to elicit feedback, it may wish to have counsel involved to collect the information, report back to the board and/or committee and serve as the facilitator for board discussion. In such case, consider including a "privileged and confidential; attorney-client communication" legend on each evaluation form, along with a statement to the effect that:

"This form is intended for the communication of information to legal counsel, to enable counsel to advise the Board in the Board's continuous efforts to improve corporate governance."

[Name of Company]

Board and Board Committee Self-Evaluation Form

This form is intended for the communication of information to legal counsel, to enable counsel to advise the Board in the Board's continuous efforts to improve corporate governance.

Please respond to the following questions, on a scale of:

* 1 (room for improvement), to

* 5 (area of considerable strength).

Please provide written comments throughout, including suggestions for improving board and committee structure and process. Your individual responses will be kept confidential, and will be reported back to the Board only in a composite that provides anonymity.

I. THE BOARD OF DIRECTORS

A. Board Size and Composition

- | | | | | | | |
|----|--|---|---|---|---|---|
| 1. | Is the Board the right size? (If not, what size should it be?) | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |
| 2. | Does the Board's composition reflect an appropriate proportion of independent, non-executive and executive directors? (If not, how should the proportions be adjusted?) | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |
| 3. | Does the Board's composition reflect an appropriate mix of skills, experience, backgrounds, and diversity in relation to the needs of the Company? (What characteristics should be represented more/less?) | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |
| 4. | Does the Board make appropriate use of the skills and experience of its members? | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |
| 5. | Is each director contributing to the work of the Board in an effective manner? | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |

B. Board Information & Agenda

- | | | | | | | |
|----|--|---|---|---|---|---|
| 6. | Is the Board actively engaged with management in identify- | 1 | 2 | 3 | 4 | 5 |
|----|--|---|---|---|---|---|

1-6-B Corporate Governance: Law and Practice [6-B]

ing, prioritizing and scheduling issues for Board review and discussion?

Comments:

- | | | | | | | |
|-----|--|---|---|---|---|---|
| 7. | Is the Board actively engaged in identifying and communicating to management the Board's information needs, including information about the competitive environment, risk identification and assessment, and performance benchmarks? | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |
| 8. | Do Board members receive timely and accurate minutes, advance written agendas and meeting notices? | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |
| 9. | Do Board members receive clear, concise and relevant background materials to prepare in advance for meetings? | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |
| 10. | Do Board members stay abreast of issues and trends affecting the company, and use this information to assess and guide the company's performance both year-to-year and in the long term? | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |
| 11. | Do Board members devote time to learn about the company's business and understand it well enough to provide critical oversight? | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |
| 12. | Does the Board regularly monitor company performance with industry comparative data? | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |
| 13. | Is the majority of Board meeting time reserved for Board discussion and consideration rather than management presentations? | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |
| 14. | Do Board members have sufficient access to officers and other members of the management team outside of Board meetings? | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |
| 15. | Are new Board members provided with an appropriate orientation and other relevant information about the company and the Board? | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |
| 16. | Are directors kept well informed of important company matters between Board meetings? | 1 | 2 | 3 | 4 | 5 |
| | Comments: | | | | | |
| 17. | Does the Board devote sufficient attention to: | | | | | |
| | (a) the company's financial statements and processes? | 1 | 2 | 3 | 4 | 5 |
| | (b) the company's annual capital and operating budgets and plans? | 1 | 2 | 3 | 4 | 5 |

1-6-B Corporate Governance: Law and Practice [6-B]

	(c) the company's long-term strategic plans and planning process?	1	2	3	4	5
	(d) the company's standards of governance and conduct?	1	2	3	4	5
	(e) international operations and developments?	1	2	3	4	5
	(f) technological developments?	1	2	3	4	5
	(g) legal and regulatory developments and compliance?	1	2	3	4	5
	(h) management development and succession?	1	2	3	4	5
	(i) periodic review of major completed transactions (integration and shareholder value creation)?	1	2	3	4	5
C.	Accountability					
18.	Has the Board developed with management a common understanding of the company's beliefs, values and philosophy, and is this understanding reflected in the company's mission, its strategic and business plans and key deliberations throughout the year? Comments:	1	2	3	4	5
19.	Does the Board regularly monitor performance against the strategic and business plans? Comments:	1	2	3	4	5
20.	Does the Board adequately consider shareholder value and the protection of shareholder interests in its decision-making? Comments:	1	2	3	4	5
21.	Are Board meetings conducted in a manner that ensures open communication, meaningful participation and timely resolution of issues? Comments:	1	2	3	4	5
22.	Does the Board encourage/ensure an open line of communication:					
	(a) Between the Board and senior management?	1	2	3	4	5
	(b) Between Board members? Comments:	1	2	3	4	5
23.	Are Board goals, expectations, and concerns openly, honestly and constructively communicated to the CEO? Comments:	1	2	3	4	5
24.	Does the Board understand and respect the difference between the Board's role and the CEO/senior management's role? Comments:	1	2	3	4	5
25.	Is the Board regularly and actively engaged in evaluating the performance of the CEO? Comments:	1	2	3	4	5
26.	Does the Board support the CEO/senior management to act realistically, appropriately and responsibly, while holding	1	2	3	4	5

the CEO/senior management accountable for operating results?

Comments:

D. Standards of Conduct

27. Are directors prepared for Board meetings? 1 2 3 4 5

Comments:

28. Do directors ask appropriate questions of management? 1 2 3 4 5

Comments:

29. Do directors and senior management adequately disclose personal interests in matters subject to Board review and abstain from voting where appropriate? 1 2 3 4 5

Comments:

30. Does the Board deal appropriately with conflicts of interest? 1 2 3 4 5

Comments:

E. Meeting Schedule

31. Are Board meetings held at an appropriate time of day? 1 2 3 4 5

Comments:

32. Is the length of Board meetings appropriate? 1 2 3 4 5

Comments:

33. Is the number of Board meetings appropriate? (If not, what number would be optimal?) 1 2 3 4 5

Comments:

II. BOARD COMMITTEES

A. Generally

34. Does the current committee structure (and committee responsibilities as set forth in charters) contribute to Board efficiency and effectiveness? 1 2 3 4 5

Comments:

35. Are the responsibilities of the committees well defined? 1 2 3 4 5

Comments:

36. Are all Board members kept well informed of the deliberations of each committee? 1 2 3 4 5

Comments:

37. Does the Board rely appropriately on the work and the recommendations of the committees? 1 2 3 4 5

Comments:

38. Is the board's method for determining committee membership and leadership appropriate? 1 2 3 4 5

Comments:

39. Is the Audit Committee effective in fulfilling its responsibilities? [You may wish to review and consider the questions set forth in Section B, below.] 1 2 3 4 5

Additional Considerations for Audit Committee Evaluationn2**Organization**

1. Does the Audit Committee charter clearly set forth the nature and scope of committee responsibilities?
2. Has the charter been approved by the Committee and the full Board?
3. Does the Committee's composition meet all regulatory requirements?
4. Was the Board actively involved in considering Audit Committee composition, including the designation of the "Audit Committee financial expert"?
5. Do all members actively participate and contribute to the work of the Committee in an effective manner?

6. Does the Committee exhibit in its actions independence from management, ethical behavior, and concern for the best interests of shareholders?
7. Do meeting packages include the right information and are they received with enough lead time to provide the basis for meaningful discussion?
8. Are meetings well organized, efficient, and effective? Do they occur often enough and are they of sufficient length to allow discussion of relevant issues consistent with the Committee's responsibilities?
9. Are members open, honest, and effective in their communication with management, internal and external auditors, and each other?
10. Does the Committee have access to appropriate internal and external resources?
11. Do the minutes and reports to the full Board reflect the significant activities, actions, and recommendations of the Committee?
12. Is the Committee Chair's leadership effective?

Audit Committee Agenda Setting and Oversight of the Financial Reporting Process

1. Does the Committee help establish the appropriate "tone at the top," including an insistence on integrity and accuracy in financial reporting?
2. Has the Committee achieved the right balance of providing effective oversight, without infringing on management's responsibility?
3. Has the company devoted appropriate internal (and external) resources to ensuring the adequacy of its financial reporting process?
4. Does the Committee set clear expectations and provide feedback concerning the competency of the company's CFO and senior financial management staff?
5. Do the Committee's agenda and deliberations reflect ongoing and appropriate consideration of the company's financial reporting risks and related internal controls?
6. Is the Committee's agenda-setting process thorough and led by the Committee Chair?
7. Does the Committee engage in meaningful discussion and consideration of the company's external financial reporting (including the annual report, quarterly financial filings, and press releases)?
8. Does the Committee review and provide effective oversight concerning related person transactions, including the disclosure of such transactions in the proxy statement and/or financial reports?
9. Is the Committee actively engaged in providing oversight of "whistleblower" procedures? (What involvement does the Committee have in the "whistleblower" communication process?)

Oversight of Audit Processes

1-6-B Corporate Governance: Law and Practice [6-B]

1. Do the Committee's actions demonstrate that it takes direct responsibility for the appointment, compensation, and oversight of the work of the independent auditor?
2. Does the Committee actively consider the audit plan and results of the independent audit?
3. Is the pre-approval process over non-audit services to be provided by the independent auditor effective; is it designed to reinforce the auditor's independence?
4. Is there an effective procedure in place for the evaluation of the independent auditor's qualifications, performance, and independence?
5. Is appropriate consideration given to the management letter and other communications from the independent auditor?
6. Do the internal audit reporting lines and interaction with the Committee foster an environment in which issues that might involve management are likely to be brought to the attention of the Committee? (How does the Committee demonstrate and reinforce its direct responsibility for oversight of the independent auditor?)
7. Does the Committee give appropriate consideration to the internal audit department's plan, resources, and ability?
8. Does the Committee give appropriate consideration to the internal audit department's reports, management's response, and improvement actions?
9. Do the Committee's executive sessions with the internal and independent auditor result in candid discussion of relevant issues?

Continuous Improvement

1. Does the Committee provide effective orientation for new members?
2. Does the Committee provide and encourage ongoing education for members?
3. Is this evaluation process effective?
4. Do any and all matters identified that require follow-through get resolved?

Overall Evaluation

What is your overall assessment of the performance of the Audit Committee?

CHAPTER 7 BOARD STRUCTURE AND PROCESSES

1-7 Corporate Governance: Law and Practice § 7.01

AUTHOR: Robert B. Lamm

§ 7.01 Board Structure

[1] Legal Framework

State corporate law vests the ultimate power and duty to manage the business of the corporation with the board of directorsⁿ¹ and permits the board to delegate tasks and functions to committees.ⁿ² Boards generally have had a great deal of flexibility to organize their structure and operation in a manner that each concluded best enabled it to fulfill its legal duties and responsibilities. In the wake of the corporate scandals that began with Enron, this flexibility has been curtailed. For example, the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act" or "Sarbanes-Oxley")ⁿ³ controls the composition and certain responsibilities of audit committees, and the corporate governance listing standards of the New York Stock Exchange ("NYSE")ⁿ⁴ and NASDAQⁿ⁵ mandate audit, compensation and nominating/corporate governance committees, as well as certain board processes, such as board and committee self-evaluation. Thus, while boards can still choose the means by which they fulfill these various mandates, their structures and operations are more constrained than in the past.

The financial crisis that began in 2007-2008 resulted in renewed efforts to control the structure of boards of directors. For example, the "Shareholder *Bill of Rights* Act", legislation introduced by New York Senator Schumer and Washington Senator Cantwell in May 2009, would effectively require that boards of directors of public companies form committees to assess and manage risks.

[2] Attributes of Board Structure

[a] Size

State corporate law generally does not specify the size of the board, although some jurisdictions require a minimum number of directors.ⁿ⁶ Most state laws leave it to the corporation to specify the size of the board in its certificate of incorporation or its by laws, or in accordance with procedures set out in the certificate of incorporation or bylaws.ⁿ⁷ Common practice is to define the minimum and maximum number of directors in the company's certificate of incorporation and provide that the exact number is to be set in the bylaws or by resolution of the board.ⁿ⁸

The size of boards of directors tends to vary from industry to industry and corporation to corporation.ⁿ⁹ The Business

Roundtable suggests that "[i]n determining board size, directors should consider the nature, size, and complexity of the corporation as well as its stage of development."¹⁰ Other factors that may influence board size include: "the need to maintain a strong community presence, to establish or maintain relationships with large shareholders or other constituencies, or to respond to factors particular to the corporation or the industry in which the corporation operates."¹¹ For example, financial services companies and those operating complex businesses have traditionally had larger boards, with as many as fifteen or more members,¹² which may make it less likely for them to work cohesively.¹³ In fact, there has been a trend toward smaller boards over the last decade, with board size stabilizing at 10.8 directors in recent years.¹⁴ The emerging consensus is that smaller boards (7 to 11 members) function more effectively except for the very largest and most complex corporations.¹⁵

[b] Membership and Composition

The NYSE and NASDAQ¹⁶ corporate governance listing standards require that listed companies have a majority of independent directors, unless they are "controlled companies" (in which a majority of the voting power is held by a person or group).¹⁷ The Business Roundtable goes further and suggests that, as a matter of best practice, a substantial majority of directors of a publicly owned company should be independent of management.¹⁸ In fact, 2007 data indicates that most larger companies meet this standard.¹⁹

The standards for determining a particular director's independence also are governed by the NYSE and NASDAQ listing standards, which contain specific definitions of director independence.²⁰ It is not sufficient, however, for a board of directors to consider only the relationships set forth in these definitions. Both the NYSE and NASDAQ require a company's board of directors to determine that the individuals have no relationship which would, in the judgment of the board, interfere with the exercise of independent judgment, such as a director's service on the board of a charitable organization to which the company makes contributions.²¹ The NYSE requires that the independent directors be identified and that the company disclose the basis for the determination that any relationship between a director and the company is not material. Alternatively, the board may avoid having to disclose the basis for the determination by adopting--and disclosing--"categorical" independence standards and disclosing that the directors meet these standards. Many companies have opted for this approach, although in most cases the categorical standards are substantially the same as the NYSE's definitions.²² In addition, as part of the executive compensation/related party disclosure rules adopted by the SEC in 2006, companies must disclose the relationships, by category or type, that the board considered in finding a director to be independent, even if such relationships are immaterial.²³ Independence determinations generally are made after the solicitation of relevant information from directors via questionnaires, consideration of such information by the nominating/corporate governance committee and a recommendation by this committee to the full board.²⁴

In light of the interest in director independence, some commentators have expressed concern that insufficient attention is being paid to the importance of a director's knowledge concerning the company's business.²⁵ Olson and Adams, for example, assert that "boards of directors may well be more effective when they include inside directors or other non-independent directors who have a business relationship with the corporation, because such directors have a more extensive understanding of the corporation and its business."²⁶ Similarly, Carter and Lorsch believe that a good board requires some members with experience relevant to the industry.²⁷

In addition to considering industry experience, the board and, in particular its nominating/corporate governance committee, should think strategically about the composition of the board on an ongoing basis.²⁸ "The key goal in selecting directors is to build a mix of experience that is appropriate to the board's needs."²⁹ For example, if the company is engaged in geographical expansion, the board may want to add directors who are familiar with the areas in which the company plans to expand. Additionally, there has been increased focus on the need for a board to reflect gender and ethnic diversity. In this regard, the Business Roundtable suggests that "[t]he [corporate governance] committee should consider candidates from a range of backgrounds. Diversity in gender, age, race and perspective all are appropriate considerations. In recent years, corporations have drawn directors from a variety of sources, including

the public sector, educational and charitable institutions, and senior management, in addition to current and former CEOs.ⁿ³⁰ These factors have been reported to have led to increased use of search firms to assist companies to find the most qualified directors. The trend to use search firms may also be growing due to other factors, such as concerns regarding potential liability for board service and the reportedly increasing reluctance of active CEOs to serve on other companies' boards.ⁿ³¹

[c] Tenure and Retirement Age

Board term limits restrict directors from serving more than a certain number of terms. For example, a director at a company with a staggered board (*i.e.*, a three-year term) might be limited to three or four such terms. While there are some advocates of term limits,ⁿ³² commentators generally oppose such limits for several reasons. First, it takes independent directors a long time to learn about their company. Second, term limits can be used as an excuse for not conducting meaningful performance evaluations of directors.ⁿ³³ If, however, there has been no movement on the board for several years, Carter and Lorsch suggest that it may be appropriate to ask a director to leave, as "[b]oards need to be refreshed with new ideas from new blood on a regular basis."ⁿ³⁴ Others, including some institutional owners in the United Kingdom, go further and suggest that after a certain number of years (10-12) a director should no longer be considered independent.ⁿ³⁵

Many boards of directors do have retirement ages, generally ranging from 70 to 72, with some as high as 75.ⁿ³⁶ A clear retirement age provides a means to assure that directors who have long left their careers behind them can be eased off the board and ensures that new blood will be added to the board on an ongoing basis. Another way that some companies achieve this goal is by requiring that directors who change their principal employment offer their resignation to, or at least notify, the nominating/corporate governance committee for its chair, so that the committee can determine whether the director's continued service on the board is appropriate. Some companies also provide that the board can waive the retirement age in appropriate cases to permit directors to remain on the board.ⁿ³⁷

[d] Meetings

There are no statutory, SEC or listing standard requirements with respect to the number of meetings that a board must have on an annual basis, although the NYSE and NASDAQ do require executive sessions of the non-management directors at least once per year.ⁿ³⁸ The number of meetings a board will find necessary varies with the company's size, complexity and culture.ⁿ³⁹ Some boards prefer frequent, shorter meetings, while others, especially those where directors are geographically scattered, may prefer longer, less frequent meetings. The advent of improved technology for telephonic videoconference and virtual board meetings is also impacting practice (although some commentators stress the need for in-person meetings to facilitate discussions--which can be awkward when conducted by teleconference--or to consider body language⁴⁰). Generally, however, "most public company boards schedule six to eight regular meetings each year and hold special meetings as needed."ⁿ⁴¹

[3] Board Leadership

In the United States, most corporations traditionally have had a single individual serving as CEO and Chairman of the Board.ⁿ⁴² While some companies have found it useful to split the roles in times of crisis, as General Motors did early in the 1990s, or to provide continuity of leadership in times of transition, as some companies do when they appoint a new CEO, the general practice has been to combine the roles. The traditional view has been that the combined CEO/Chairman serves as a bridge between management and the board, ensuring that both act with a common purpose.ⁿ⁴³ Moreover, a 2004 study by Booz Allen Hamilton found no evidence that separating the roles of Chairman and CEO benefits stockholders.ⁿ⁴⁴ In fact, the study found that stockholder returns and net income growth were lower at companies that split the position. Nonetheless, more U.S. companies have been separating the positions. In some cases, this action has been taken in response to increased stockholder pressure; in others, it has followed an unexpected termination of the CEO or the resolution of a crisis involving management integrity.

In response to pressure from institutional investors and corporate governance groups calling for a separation of the CEO and Chairman, companies and others developed the concept of a "lead" or "presiding" director to assist the board in overseeing management.ⁿ⁴⁵ Many companies have, in fact, appointed lead or presiding directors,ⁿ⁴⁶ in part to address the NYSE listing requirement that companies appoint a director to preside over the required regular executive sessions of the non-management directors and disclose this person in the proxy statement.ⁿ⁴⁷

Until recently, institutional owners generally accepted the use of a lead or presiding director (subject to concerns about the functions and responsibilities of lead or presiding directors discussed below) and did not appear to prefer or distinguish between the title of "lead" or "presiding" director, although some boards have had strong feelings on the matter. However, in response to the financial crisis that began in 2007-2008, demands by institutional investors and others for separating the positions of Chairman of the Board and CEO have substantially increased, as discussed below, notwithstanding the designation of a lead or presiding director.

There is no uniformity as to the functions that lead or presiding directors perform. Beyond presiding at executive sessions, other responsibilities that lead directors undertake vary greatly but often include: (1) advising the CEO/Chairman on meeting schedules; (2) providing the CEO/Chairman with input on agendas for meetings; (3) chairing executive sessions; (4) overseeing the flow of information to the board; and (5) serving as the principal liaison among the independent directors, between independent directors and the CEO/Chairman, or between directors and other members of management (for example, reinforcing advice from the general counsel that directors should refrain from taking notes at meetings). A lead director also may play a key role in organizing performance evaluations of the CEO and the board and may lead the board in crisis situations.ⁿ⁴⁸ (In some cases, the lead director has taken on the position of non-executive chairman when the CEO who has also served as chairman leaves the company voluntarily or otherwise.) Despite the potential benefits of a flexible approach to the functions of a lead or presiding director, institutional owners and others have urged that the lead or presiding director have a standard "package" of responsibilities, possibly to reduce the likelihood that a company will designate such a director but give that director such limited powers as to make the position ineffectual.

For example, in discussing its voting policy on stockholder proposals to separate the positions of Chairman and CEO, RiskMetrics Group (formerly known as Institutional Shareholder Services) has stated that the duties of a lead or presiding director should, "[a]t include , but are not limited to, the following:

- presides at all meetings of the board at which the chairman is not present, including executive sessions of the independent directors;
- serves as liaison between the chairman and the independent directors;
- approves information sent to the board;
- approves meeting agendas for the board;
- approves meetings schedules to assure that there is sufficient time for discussion of all agenda items;
- has the authority to call meetings of the independent directors; and
- if requested by major shareholders, ensures that he is available for consultation and direct communication."ⁿ⁴⁹

In any event, it can be useful to create a job description for the position to avoid confusion and to include that description in the company's corporate governance principles or guidelines.

As previously noted, the financial crisis that began in 2007-2008 resulted in increased demands for separating the positions of Chairman of the Board and CEO. These demands have generally been in the form of shareholder proposals, including proposals to adopt mandatory by-law amendments to separate the positions. In the 2009 proxy season, these proposals fared better than in previous years, (including a mandatory by-law amendment proposal submitted to Bank of America, which separated the offices almost immediately after the voting results became available⁵⁰). In addition, the "Shareholder Bill of Rights Act" legislation introduced by New York Senator Schumer and Washington Senator Cantwell in May 2009 in response to the ongoing financial crisis would require that all public companies separate the positions.

In addition, the Chairman of the Securities and Exchange Commission ("SEC") has indicated that the SEC will be considering whether companies should provide disclosure as to their reasons for choosing their particular leadership structure, regardless of whether the structure includes an independent chairman, a non-independent chairman or a combined CEO/chairman.⁵¹

[4] Use of Committees

For many years, boards of directors have used committees to address key matters in depth. The use of committees, and the board's ability to rely upon the recommendations and other actions of its committees, are expressly sanctioned by state corporation law. For example, the Delaware General Corporation Law permits a board to create one or more committees and, except for specific matters on which only the board may act, provides that any committee may exercise the full power and authority of the board.⁵² In addition, Delaware law expressly permits a director to rely upon "information, opinions, reports or statements presented ... by committees of the board of directors," so long as the director reasonably believes that the committee is acting within its area of competence and has been selected with reasonable care.⁵³ In other words, if a board acts reasonably in selecting a committee and reasonably believes that the committee is acting properly and knowledgeably, the board should be protected in relying on the committee.⁵⁴

[a] Factors Influencing Committee Types, Structure and Responsibilities

The types and structure of board committees vary from company to company, depending upon a number of factors. These include the company's business, legal and regulatory requirements applicable to the business, the types of transactions in which the company routinely engages, the size of the board and the expertise of its members. The Sarbanes-Oxley Act and rules adopted by the Securities and Exchange Commission ("SEC") under Sarbanes-Oxley govern the composition and responsibilities of the audit committee, and the corporate governance listing standards of the market on which the company's securities are traded control the formation and responsibilities of other board committees, as well as those of the audit committee. Finally, the concerns of institutional investors and others in the governance community also affect the make-up and responsibilities of board committees.

The nature of the company's business, coupled with any regulatory requirements applicable to its business, has a significant impact upon the types and structure of its board committees. For example, a company engaged in a technologically-oriented business may find it necessary or appropriate to form a technology or similar committee to review and recommend to the board appropriate technical goals and projects; this type of committee would ordinarily be comprised of directors who have a higher level of relevant technical expertise than other directors. (An alternative used by some technology companies is the formation of an "advisory" committee, comprised of individuals who may not be directors or officers, with varying degrees of interaction with the board.) Similarly, some companies--such as those in highly regulated industries--may deem it desirable to designate a compliance or similar committee.

The types of transactions in which a company routinely engages also affect the types and structure of its board committees. A company that accesses the capital markets infrequently may well find it desirable to keep its full board of directors informed of the progress and terms (including pricing) of an offering, and to have the offering approved by the

full board. However, a company that routinely engages in public or private offerings to finance its operations may decide that a board committee--such as a finance committee--should be authorized to act on all but the most significant offerings.ⁿ⁵⁵

The number and expertise of directors is another key determinant of committee structure. A company with a small board will ordinarily not find it useful to create numerous board committees, because directors would be called upon to serve on multiple committees, thereby reducing or eliminating the efficiency of operating through committees. A company with a large board of directors, however, may find it useful to divide its work and allocate certain responsibilities to the directors deemed most capable of handling them.

Perhaps most importantly, the Sarbanes-Oxley Act and the corporate governance standards of the market on which a company's securities are traded drive the formation of board committees. In fact, as far back as the 1970s, the NYSE required that every listed company have an audit committee. More recently, Sarbanes-Oxley required public companies listed or traded on a national securities exchange or national securities association to have an audit committee comprised of independent directors, and the NYSE corporate governance standardsⁿ⁵⁶ mandate that every listed company have audit, compensation, and nominating/corporate governance committees, each with specifically delineated responsibilities and each composed entirely of independent directors, subject to certain exceptions.

The board is generally responsible for determining whether and the extent to which it delegates authority to its committees, and for deciding which matters should be handled at the committee level and which should come before the full board. Recently, however, statutory and regulatory requirements have contained specific requirements as to the matters that must be addressed by board committees. For example, Sarbanes-Oxley Section 301 requires that the audit committee be directly responsible for the appointment, compensation and oversight of the independent auditor.ⁿ⁵⁷ Similarly, the NYSE listing standards assign to the compensation committee specific responsibilities with respect to the compensation of the CEO and, to a lesser degree, other senior officers.ⁿ⁵⁸

[b] Types of Committees

As discussed above, the NYSE and NASDAQ listing standards generally require that listed companies have audit, compensation and nominating/corporate governance committees comprised solely of "independent" directors.ⁿ⁵⁹ Sarbanes-Oxley gives the audit committee (to the exclusion of the board) sole responsibility for certain matters, even though the Act refers to the audit committee as a committee of the board.ⁿ⁶⁰ The NYSE and NASDAQ listing standards incorporate these audit committee requirements.ⁿ⁶¹ Both the Sarbanes-Oxley Act and the NYSE assign extensive responsibilities to the audit committee, in addition to its responsibility for the appointment, compensation and oversight of the independent auditor.ⁿ⁶²

The NYSE requires that each listed company have a compensation committeeⁿ⁶³ and a nominating/corporate governance committee.ⁿ⁶⁴ Like the audit committee, these committees also have specifically assigned responsibilities. However, the NYSE listing standards permit a company to allocate the responsibilities of its compensation and nominating/corporate governance committees to "committees of their own denomination, provided the committees are comprised of independent directors."ⁿ⁶⁵ Further, under rules adopted by the SEC in 2003ⁿ⁶⁶ relating to disclosure of the director nominating process, nominating/corporate governance committees have generally implemented specific procedures regarding that process.ⁿ⁶⁷

Corporate boards also frequently form other standing, or permanent, committees, depending upon their companies' industry and other factors. Some examples are as follows:

- *Executive Committee.* Although the functions of an executive committee vary greatly from company to company, in the past, many companies gave the executive committee authority to act between meetings of the board on matters normally requiring board approval, excluding matters reserved to the

board under state corporation law or otherwise.ⁿ⁶⁸ Composition of the executive committee also varied, sometimes including management directors as well as non-management directors, and in some cases consisting entirely of management directors.

In recent years, many companies have moved away from the practice of having executive committees. The plenary authority formerly given to the executive committee has been limited to specified matters or monetary limitations, and some companies that have retained an executive committee have broadened the composition of the committee to include a greater number of non-management directors or even to mirror the composition of the full board in terms of the independence of the directors on the executive committee (*i.e.*, a majority or a substantial majority of the members of the executive committee are independent). These changes in the composition and responsibility of the executive committee have resulted, in part, from institutional investor criticisms that the full board or an independent committee, rather than a management-dominated committee, should address most matters. In addition, advances in conference call and videoconferencing capabilities and the ability to conduct "virtual" meetings have made it easier for companies to convene meetings of the full board, rather than using an executive committee to approve matters in between regular board meetings.

- *Finance Committee.* Again, the structure and duties of a finance committee vary greatly among companies--and many companies do not have such a committee. In general, a finance committee will be charged with overseeing the company's financing requirements, including the sources of funds, private and public borrowings (including approval authority for financing terms), and equity offerings. The composition of this committee is not mandated by law or regulation; consequently, this committee may provide an opportunity for committee service by a director who does not qualify as "independent" for purposes of the audit committee. The use of a finance committee may also relieve some of the burdens placed on audit committees under Sarbanes-Oxley and related implementing SEC regulations. A capital-intensive company might determine to delegate to a finance committee authorization to approve specified levels of capital appropriations; similarly, a company that frequently offers securities to the public might use a finance committee to approve specified terms of the offerings. In both cases, the committee would relieve the board of the burden of having to approve matters that are relatively routine.

- *Public Policy Committee.* Some boards--generally, at companies with a significant presence in their communities or otherwise--form a public policy or similar committee to oversee the company's role in the public sector. Depending on the nature of the company's role, this committee may oversee charitable giving, community relations and activities, lobbying, or other matters.

Other examples of standing committees include those dealing with technology,ⁿ⁶⁹ security, pensions (particularly where a company has a defined benefit plan), and labor relations (in a highly unionized industry). In fact, subject to practical considerations and the risk of "balkanization,"ⁿ⁷⁰ there is no limit to the types of committees that a particular board may decide to form to address the corporation's business and oversight needs.

A board can also form *ad hoc* or special committees, on an as-needed basis. This is often a desirable approach for dealing with a matter that is not likely to recur or to require attention on an ongoing basis. Examples include a committee formed to evaluate claims made in a derivative action; a committee formed to consider whether and to what extent a corporation should indemnify directors and officers against expenses involved in litigation or other claims; a committee formed to oversee an internal investigation; and a committee formed to evaluate or approve the terms of a transaction, particularly one that may involve actual or perceived conflicts of interest, such as a going-private transaction or one in which management may have an interest. The composition of a special committee will largely depend upon the nature of the matter it is overseeing, but such a committee would ordinarily consist of directors who are not only "generally" independent, but also independent with respect to the matter at hand.ⁿ⁷¹

In 2003, in connection with rulemaking under Sarbanes-Oxley concerning attorney conduct, the SEC suggested--but did not mandate--that companies form a Qualified Legal Compliance Committee ("QLCC") that would be responsible for dealing with evidence of "material violations" brought to the company's attention by its attorneys.ⁿ⁷² Among other things, the SEC suggested that the audit committee could serve as a company's QLCC. To date, very few companies have appointed a QLCC, although some commentators have suggested that more companies will form a QLCC if the SEC moves forward with proposed rules requiring attorneys to notify third parties (including the SEC) of material violations.ⁿ⁷³

In May 2009, New York Senator Schumer and Washington Senator Cantwell introduced legislation entitled the "Shareholder *Bill of Rights* Act." This Act would require that boards of public companies form committees to assess and manage risks.

[c] Composition of Committees

The Sarbanes-Oxley Act, SEC implementing rules, and NYSE and NASDAQ listing standards also govern the composition of certain board committees. The audit, compensation and nominating/corporate governance committees must be comprised solely of independent directors. The independence test for audit committee members, set forth in the Sarbanes-Oxley Act, SEC implementing rules and listing standards,ⁿ⁷⁴ is stricter than that for the other two committees. Similarly, the directors on the compensation committee generally must also meet the definition of "outside director" under *Section 162(m) of the Internal Revenue Code* ("IRC") and Internal Revenue Service regulationsⁿ⁷⁵ and the definition of "non-employee director" in Rule 16b-3 under the Securities Exchange Act of 1934 ("1934 Act").ⁿ⁷⁶

SEC rules adopted under the Sarbanes-Oxley Act also call for disclosure as to whether the audit committee includes an "audit committee financial expert."ⁿ⁷⁷ This requirement has caused companies to re-examine the composition of their audit committees to make sure they include a financial expert, rather than disclose that their committees have no such expertise and the reasons for the absence of a financial expert.ⁿ⁷⁸ The NYSE standards also discourage service on a listed company audit committee by anyone already serving on the audit committees of three other public companies.ⁿ⁷⁹

Institutional investors, proxy voting advisory services and corporate governance rating services also influence the composition of board committees. For example, RiskMetrics, which issues both proxy voting recommendations and corporate governance ratings, has its own standards related to director independence.ⁿ⁸⁰ So, too, the California Public Employees Retirement System ("CalPERS"),ⁿ⁸¹ Teachers Insurance and Annuity Association-College Retirement Equities Fund ("TIAA-CREF")ⁿ⁸² and other institutional investors maintain corporate governance principles with their own custom definitions of independence. These definitions tend to be more strict than the NYSE standards. For example, the TIAA-CREF definition provides that a "recent" former employee of a company is not independent,ⁿ⁸³ in contrast to the NYSE three-year standard.ⁿ⁸⁴ Some of these groups have used their own standards of director independence to withhold votes from directors whose boards have found them to be independent under the NYSE listing standards and their own categorical independence standards.ⁿ⁸⁵

In recent years it has become a best practice for committee assignments to be recommended to the board by the nominating and corporate governance committee, since that committee is presumed to be most attuned to the directors' abilities and how those abilities relate to the company's needs. Corporate governance commentators also have discussed the advisability of rotating committee assignments, so that members of a particular committee do not become "stale," and to assure that fresh perspectives are brought to bear on the various committees' responsibilities. In practice, however, rotation may be difficult to implement, primarily because of the specialized knowledge and experience requirements applicable to certain committees (for example, the "financial literacy" and other requirements applicable to audit committee membersⁿ⁸⁶) and because rotation may deprive a committee of historical knowledge and continuity. For this and other reasons, companies may choose to rotate only individual members of a committee, rather than rotating an entire committee at one time.

[d] Formation and Operation of Committees

The board committee is a creature of state corporation laws that permit a board to create and rely upon its committees.ⁿ⁸⁷ These state law provisions are generally incorporated into a corporation's by-laws, which generally set forth the minimum statutory requirements governing the formation of board committees.ⁿ⁸⁸ The by-laws can also specify which types of committees may be formed, and they may contain additional requirements pertaining to committee membership, such as those relating to independence or other skills on the part of committee members. However, mandating a particular type of committee in the by-laws or dictating a committee's composition deprives the board of flexibility. Instead, committee membership requirements and responsibilities are generally left to a committee charter. Finally, by-laws may contain procedural requirements applicable to a committee, such as quorum and attendance requirements; however, by-laws generally deal with these issues by appropriate cross-reference to similar provisions applicable to the full board.

A committee is formed by action of the board, usually in the form of a resolution designating the committee and its members and giving a very brief description of the committee's function. Under the laws of some states (including Delawareⁿ⁸⁹), alternate members of the committee can be designated, as well. Changes in committee composition also require board action.

In conjunction with the formation of a committee, the committee should adopt a committee charter, approved by the full board, specifying the committee's composition and duties in detail. The charter can then be used as a tool to assure that the committee is performing its assigned responsibilities. In conjunction with the charter, it is useful to prepare a detailed annual calendar of the committee's responsibilities to assure that matters are handled in a timely fashion.ⁿ⁹⁰

The formation of a committee, or changes in committee membership, may trigger various notice and disclosure requirements. For example, NYSE-listed companies must notify the NYSE any time a new audit, nominating/corporate governance or compensation committee member is designated, and the notice must confirm the audit committee members' financial literacy.ⁿ⁹¹ Even where notice is not legally required, a company may find it desirable to announce the formation of a committee or the designation of a new member. Companies also frequently list the composition of their board committees on their websites, and these sites should be kept current as committee composition changes.

An NYSE-listed company's nominating/corporate governance, compensation and audit committees must adopt charters,ⁿ⁹² and these charters must be posted on the company's website. Under the SEC's proxy rules, a company must disclose whether a current copy of the applicable committee charter is available on the company's website, and if not, it must be provided to Stockholders once every three years (and in any year materially amended).ⁿ⁹³ The SEC rules regarding disclosure about director nominations also require publication of the nominating/corporate governance committee charter, either in the proxy statement or on a company's website.ⁿ⁹⁴ Increasingly, website posting has become a "best practice" with respect to all committees, although some companies find it useful to append the committee charters to the proxy statement every year, in part so that the proxy statement can provide a complete description of the duties of the board and its committees. Some institutional investors have also suggested that various policies adopted by committees, such as audit committee policies regarding the use of the company's independent auditors to perform audit-related and non-audit services, should be posted on the website.

As noted above,ⁿ⁹⁵ the Sarbanes-Oxley Act gives the audit committee (to the exclusion of the board) sole responsibility for certain matters, generally concerning the relationship with the company's independent auditor.ⁿ⁹⁶ The NYSE listing standards contemplate that the compensation committee may have sole authority to fix the compensation of the CEO.ⁿ⁹⁷

Some have expressed concern that giving a board committee sole authority to deal with a particular matter, or that having too many committees, may cause the board to become "balkanized"--each committee having its own area of responsibility, with limited oversight by the full board, potentially depriving other directors and the board as a whole of

the ability to execute their responsibilities in a meaningful manner.⁹⁸ One way of minimizing or avoiding this problem is to assure that every board committee makes a report on its activities at every regular board meeting. The report is generally given by the committee chair, who summarizes the committee's deliberations and actions since the last board meeting and can answer questions from other directors. The corporate secretary can assist each committee chair by preparing an outline of the committee's deliberations and actions prior to the next board meeting. Another way to keep the full board informed is to provide copies of all committee agendas and minutes to the full board on a regular basis. Some companies also permit or encourage directors who do not serve on a particular committee to attend that committee's meeting. While this practice may be legitimate, it may complicate the logistics of committee meetings. More important, it may also raise concerns regarding a committee's independence, particularly if the non-member in attendance is not an independent director or has a personal interest in any matters under discussion.

(n21)Footnote 21. NYSE Listed Company Manual § 303A.02(a); Nasdaq Rule 4200(a)(15).

(n22)Footnote 22. NYSE Listed Company Manual § 303A.02(a) Commentary. The NYSE has proposed to eliminate these requirements, as well as the "categorical" standards approach, primarily because extensive disclosures regarding director independence are now required under Item 407 of Regulation S-K. Among other things, where a company uses its own independence standards (including in addition to those of the exchange on which its securities are listed), Item 407 requires disclosure of those standards, as well as of the category and type of any transactions considered by the board in determining that a director is independent under those standards.

(n23)Footnote 23. See Regulation S-K Item 407(a)(3), as set forth in Securities and Exchange Commission Release No. 33-8732A/34-54302A.

(n24)Footnote 24. See § 8.03 below.

(n25)Footnote 25. See, e.g., John F. Olson & Michael T. Adams, *Composing a Balanced and Effective Board*, 59 *Bus. Law* 421 (Feb. 2004); Colin B. Carter & Jay W. Lorsch, *Back to the Drawing Board* 121 (2004).

- (n83)Footnote 83. *See* TIAA-CREF Policy Statement on Corporate Governance at V.A.1. ("The definition of independence should not be limited to stock exchange listing standards. At a minimum, we believe that to be independent a director and his or her immediate family members should have no present or recent employment with the company, nor any substantial connection of a personal or financial nature other than ownership of equity in the company. Independence requirements should be interpreted broadly to ensure there is no conflict of interest, in fact or in

appearance, that might compromise a director's objectivity and loyalty to shareholders. An independent director should not provide services to the company or be affiliated with an organization that provides goods or services to the company if a disinterested observer would consider the relationship 'substantial.' Director independence may sometimes be influenced by factors not subject to disclosure. Personal or business relationships, even without a financial component, can compromise independence. Boards should periodically evaluate the independence of each director based on all relevant information and should disclose their findings to shareholders.").

CHAPTER 7 BOARD STRUCTURE AND PROCESSES

1-7 Corporate Governance: Law and Practice § 7.02

AUTHOR: Robert B. Lamm

§ 7.02 Board Delegation of Authority

State corporation law generally provides that the business and affairs of every corporation is managed "by or under the direction of" the corporation's board of directors.ⁿ¹ Thus, a board may delegate its authority to manage the corporation's business and affairs to officers and employees, except where board action is specifically required by statute or a corporation's charter documents. In this regard, state corporation laws generally provide that some or all of the following require board action: changes in charter documents, authorization of dividends, nomination of directors, election of officers, approval of mergers, sales of substantially all the corporation's assets, and corporate liquidation. Some of these events also require shareholder action.ⁿ² In addition, the board has general oversight responsibilities.ⁿ³ Nevertheless, a board has considerable discretion with respect to the level of its involvement in business decisions, and an informed decision by the board to delegate responsibility for a matter or to remain directly involved is protected by the business judgment rule.ⁿ⁴

In practice, "some directors strongly believe that it's management's job to run the business and the board's job to decide whether the outcomes are satisfactory. ... Other directors will prefer to be more involved. They will delegate less to management and want to share responsibility for leading the company and approving key decisions."ⁿ⁵ There is no right or wrong answer in this regard, but the directors and CEO should have a common understanding regarding their respective roles and responsibilities.ⁿ⁶ Similarly, companies' approaches to the formality of delegating specific authority to management varies widely. Some companies have detailed authorization schedules while others operate pursuant to broad resolutions.

In the wake of corporate scandals in 2000-2002, the Sarbanes-Oxley Act and the subsequent focus on internal controls under Section 404 of the Sarbanes-Oxley Act,ⁿ⁷ there is a trend toward greater formality in delegations of authority. What is most important is that "[t]he board and senior management ... have a clear understanding of what level or types of decisions require specific board approval."ⁿ⁸ Boards use a wide variety of approaches to achieve this "clear understanding." Some boards adopt very simple, straightforward delegations specifying that any matter involving more than a certain amount requires board (or possibly committee) approval, and that matters involving lesser amounts can be authorized by management as it sees fit. Others use lengthy, detailed delegations that separately address different aspects of the company's operations and/or specify varying levels of authority for different individuals and/or departments, provide detailed specifications regarding sub-delegation authority, and address numerous other matters.

CHAPTER 7 BOARD STRUCTURE AND PROCESSES

1-7 Corporate Governance: Law and Practice § 7.03

AUTHOR: Robert B. Lamm

§ 7.03 Evaluation of the CEO and Senior Management

One of the board processes and responsibilities that is most critical to the proper functioning of the board and, indeed, of the corporation, is evaluation of the CEO and senior management.

[1] Who Conducts the Evaluation?

Responsibility for evaluating the CEO should be limited to the independent members of the board, due to the conflicts of interest and other difficulties that would be present if management members of the board were to evaluate their superior. Companies may handle the evaluation of management in a variety of ways, but the process should generally involve an independent board committee, typically the compensation committee, which will have been involved in setting specific performance goals for the CEO. The NYSE listing standards require the compensation committee to review and approve corporate goals and objectives relative to CEO compensation and to evaluate the CEO's performance in light of those goals.¹ Members of the nominating/corporate governance committee may also be involved or have this responsibility, and other independent directors are also likely to participate in some manner, formally or informally. In evaluating the CEO, it is advisable for the directors to have some knowledge of or at least access to members of management who report to the CEO, so that the directors conducting the evaluation can assess the CEO's leadership attributes and skills, among other things. In addition, the directors should consider having the CEO present an assessment of his or her performance as against previously established goals.

There are a number of processes by which the board can evaluate members of senior management other than the CEO. Some companies may choose to have this evaluation conducted by the independent directors, or a committee of independent directors, in consultation with the CEO. Other companies may have the CEO present his or her views on direct reports to the board as a first step, with the independent directors making a separate assessment; it may be desirable for this assessment to be made by the compensation committee, given its responsibilities for executive compensation generally, including establishment of the performance goals on which much of that compensation may be based. In still other cases, the CEO may report on other members of senior management without independent review. However, since this evaluation process can be a key component of the board's consideration of management succession (because it affords the directors an opportunity to assess the abilities and limitations of the individuals who report to the CEO), it may be desirable for the board to take a more active role in this process rather than merely accepting the CEO's

opinions. In any event, companies engage in a wide variety of evaluation processes and may experiment with new processes from time to time to determine which ones work best for them.

[2] The Evaluation Process

The CEO should possess a number of critical attributes, among them competence, integrity, leadership, and strategic skills. However, the qualities most desirable in a particular company's CEO will, of necessity, depend upon factors specific to the company, such as its industry, its recent history, and its competitive environment. Thus, the first task of the evaluators should be to determine which qualities are the most desirable in that particular company's CEO, at that time. This task needs to be completed at the beginning of each evaluation cycle, to give the CEO an understanding of the basis on which his or her performance will be judged. Some companies have a job description for the CEO; if so, that should be consulted in launching the evaluation process. Of course, the job description should be up-to-date; therefore, a first step would be to review the description and determine whether it needs to be updated or modified in any way.

Once the critical CEO qualities are determined, the next step should be to review the goals set by the compensation committee in consultation with the CEO,² as well as any other objectives and benchmarks that the CEO is charged with achieving during the evaluation cycle.³ Although every evaluation process will entail some degree of subjectivity, fixing specific goals should help to focus the evaluation and make it more objective. Again, this step needs to be addressed at the beginning of each evaluation cycle.

Assuming that the CEO's critical attributes and benchmarks are clear (and are communicated clearly to the CEO), the actual evaluation process can take many different forms. Some companies use a written checklist that is completed by each independent director and returned to the chair of the committee overseeing the evaluation; depending upon the company's culture and other factors, it may be desirable to have these forms submitted anonymously. In other cases, members of the evaluating committee use a written checklist as the basis for personal interviews with each non-management director to obtain his or her views concerning the CEO's attributes and achievement of the specified objectives. The latter procedure may be desirable to the extent that it does not create a record of potential CEO shortcomings that can later be used in litigation. A similar procedure would be appropriate to learn the views of the CEO's subordinates, who may be uncomfortable creating a written record of any criticisms they may have of the CEO. As previously noted, the process should also include having the CEO present an assessment of his or her performance as against previously established goals.

As indicated, the last critical step in the evaluation is discussing the results with the CEO--giving him or her an opportunity to review the evaluation, ask questions, and, where appropriate, rebut criticisms. In other words, the evaluation should be part of a communication process between the CEO and the independent directors, rather than a one-way, once-a-year, critique. There are various methods by which the independent directors can communicate the results of the evaluation to the CEO. Some companies may choose to have the report made by the chair of the committee conducting the evaluation, or by a non-executive chairman or lead or presiding director. Others may determine that the report should be made by a group of directors; this approach may be desirable where the evaluation generates strong criticism, so that the criticism does not seem to be coming from only one individual. Still other companies may have the report given to the CEO in the presence of all independent directors. Although evaluation reports may be given in writing, most companies choose to deliver the reports orally, primarily to avoid creating records that may be discoverable in litigation.

Similar considerations and procedures apply with respect to the evaluation of other members of senior management, subject to the understanding, discussed above, that the CEO will have a greater role in the evaluation of senior management and may be the one who reports the results of the evaluation to the managers being evaluated. Depending upon the circumstances, it also may be desirable for a limited number of non-employee directors to participate in this process, particularly to the extent that management succession issues are being discussed.

CHAPTER 7 BOARD STRUCTURE AND PROCESSES

1-7 Corporate Governance: Law and Practice § 7.04

AUTHOR: Robert B. Lamm

§ 7.04 Board, Committee and Director Evaluations

When it adopted new listing standards in late 2003, the NYSE mandated what some companies had considered a "best practice" for several years--namely, that the board and its principal committees (nominating/corporate governance, compensation and audit) conduct an annual self-evaluation or self-assessment.ⁿ¹

The NYSE standards discuss the broad goal of the self-assessments: to determine whether the board and its committees "are functioning effectively."ⁿ² The standards, however, do not specify any criteria by which the achievement of this goal is to be measured, nor do they specify the manner in which the self-assessments are to be conducted. Thus, as is the case with respect to evaluations of the CEO and senior management, boards of listed companies are free to select the criteria and procedures that are most appropriate for them.

Many companies rely upon the nominating/corporate governance committee to supervise the assessment of the board as a whole, but the process can be conducted by the full board, by another committee, or by an outside facilitator acting on its own or in conjunction with any of the foregoing. A third-party facilitator, on a periodic basis, can often be helpful in conducting the assessment process, by helping the directors overcome hesitation in criticizing their colleagues, encouraging them to be candid and forthright, and serving as a neutral intermediary.

Self-evaluation procedures range from the use of a questionnaire asking each director to assess the abilities and achievements of the board, to a process conducted orally in its entirety. One of the benefits of following an oral process is that it avoids the creation of a written record that can be used as a "road map" for plaintiffs in any subsequent litigation relating to the board (although some federal and state courts have recognized a privilege of self-critical analysisⁿ³). If a questionnaire or other document is used in the self-evaluation process, it may be advisable, following completion of the process, to destroy all copies containing notes or other information that could be used against the company or the board in subsequent litigation. Regardless of whether the process is conducted orally or in writing, the board needs to decide whether it should be handled on an anonymous basis; if so, the use of a third-party facilitator may be essential to the process. Committee self-assessments generally follow the same pattern, including the use of third-party facilitators.

Companies may want to consider "mixing up" the manner in which board and/or committee evaluations are performed

from time to time. For example, where a company generally uses a questionnaire process on an annual basis, it may be desirable to supplement or substitute this with personal interviews every so often (such as every other year or every three years) and to consider using a facilitator at some point (possibly every five years), in all cases to assure that the evaluation process retains some freshness and vitality. In any case, whatever processes or schedules may be followed, the nature of the questions and topics covered should be reviewed and revised every year to assure that the process addresses regulatory and governance developments.

Board and committee self-evaluations also can be used to effect improvements in a company's governance processes and practices. For example, they may bring to light the need for improvements in the flow of information to the board, the need for amendments to a committee charter, or the need to have additional members of management present at board or committee meetings.

The NYSE listing standards do not require that individual directors be evaluated. However, most boards conduct an individual assessment process--albeit an informal one--as part of the annual process of designating nominees for election as director, when each nominee's strengths and weaknesses are considered in determining whether he or she should stand for election.ⁿ⁴ Some boards also conduct individual assessments on a more formal basis.ⁿ⁵ In addition, some boards conduct evaluations of the non-executive chairman or the lead or presiding director.

CHAPTER 7 BOARD STRUCTURE AND PROCESSES

1-7 Corporate Governance: Law and Practice § 7.05

AUTHOR: Robert B. Lamm

§ 7.05 Succession Planning

Succession planning is another critical responsibility of the board. In fact, the NYSE listing standards require that a company's corporate governance guidelines or principles address management succession,ⁿ¹ and the Business Roundtable states that long-term planning for CEO and senior management development and succession is one of the board's most important functions.ⁿ²

Succession planning encompasses two areas--succession over the near term (including succession emergencies, such as the CEO's severe illness or sudden departure for other reasons), as well as long-term succession plans. Both types of succession planning are critical. Long-term succession planning facilitates the grooming of internal candidates for promotion. Moreover, the succession planning process can be used to weed out managers who are not performing adequately; again, this flows quite naturally out of the evaluation process. Another important component of succession planning is management development--ensuring that internal talent is being nurtured.

The process by which the CEO and other senior managers are evaluated should serve as a precursor of and natural complement to the succession planning process.ⁿ³ First, the evaluation process should help the non-management directors determine the skill sets to be sought in any succession process. Second, it should afford the directors the opportunity to get to know managers below the CEO level, including their strengths and weaknesses.ⁿ⁴ Third, because evaluations should be performed regularly, they provide an opportunity for the board to update both its views as to necessary skill sets and its knowledge of possible successors. In fact, succession planning should ideally be addressed by the directors promptly following each CEO/senior management evaluation.

In any case, the succession planning process should include identifying and periodically updating the qualities and characteristics of an effective CEO, as well as other senior management positions. These qualities and characteristics should be bases for benchmarks and criteria used in conducting the regular evaluations discussed above, and the results of those evaluations should be reviewed with the CEO and other senior managers. This process, however, should not be limited to periodic reviews; directors should use all of the myriad other activities that take place throughout the year to observe potential successors.ⁿ⁵

Of course, evaluation, succession planning and management development are important not only for the CEO and

senior managers, but also for employees at all levels of the company, to assure that critical functions are being handled by the proper people currently and can continue to be handled properly despite ongoing changes in the workforce. Accordingly, the board should receive a presentation at least annually on company-wide management development and succession plans.

CHAPTER 7 BOARD STRUCTURE AND PROCESSES

1-7 Corporate Governance: Law and Practice § 7.06

AUTHOR: Robert B. Lamm

§ 7.06 Strategic Planning and Enterprise Risk Management

The strategic planning process is another key responsibility of the board.ⁿ¹ Many of the factors and procedures discussed above are equally relevant to the directors' role in this process.

As is the case with respect to evaluations and succession planning, the board must work with management on the development of specific strategies and on measuring progress in achieving the goals of those strategies. Also, as with CEO evaluations and succession planning, strategies must be developed with the specifics of the company in mind, including internal factors such as personnel, business processes, culture and ethics, and history, and external factors such as the company's industry, the business and regulatory environment in which it operates, the competitive environment, and its customers and suppliers.

In addition to these factors, strategic planning should include processes to assess and manage risk. The board needs to have management outline areas of vulnerability and concern, as well as plans to address them, including worst-case scenarios and how management would deal with them. In this regard, the NYSE listing standards mandate that the audit committee discuss policies with respect to risk assessment and risk management.ⁿ²

Once the company's specific circumstances and risks are understood, the strategic planning process should consider a broad range of topics, including the best means of growing the business; whether growth should be achieved internally, by acquisition, or by a combination of the two--and, if the latter, in what relative proportions; and whether the company should consider expanding its core businesses and, if so, in what directions. The planning process should also take into account competitive conditions in the industry and actions that might be taken to improve the company's competitiveness, including expanded research and development initiatives. In a highly unionized company, a strategic plan for labor relations would be desirable, including actions that might avoid strikes or other labor disruptions. In a capital-intensive company, plans for capital expansion should be considered. In other words, the specifics of the company outlined above should dictate the planning process.

In considering both risk assessment and strategies, the board must be careful to perform an oversight function, rather than a management function. Particularly in an environment of increased accountability, the board may be inclined to substitute its judgment for that of management. This is not the proper function of the board, however; rather, it should

satisfy itself that management has developed appropriate strategies and is taking appropriate risks (rather than avoiding risk altogether). The board should ask the right questions--including tough ones--and not be satisfied until it gets answers that it can understand. However, the board should not ordinarily substitute its judgment for that of management.ⁿ³

Like CEO and senior manager evaluation and succession planning, strategic planning cannot be done at one meeting; it must be done over time, with objectives being set early in the process. An annual board "retreat" is often a good forum to initiate a detailed discussion of strategic planning. While discussions of these topics require some degree of structure, a retreat can afford a less formal environment, particularly if the retreat takes place away from the company's headquarters and if the board is not faced with other matters that require consideration or approval. The timing of strategy discussions is subject to discretion, but such discussions should ideally take place towards the end of a company's fiscal year, when management and the board have a perspective on the year gone by but are also thinking about the upcoming year. The board should keep in mind, however, that while annual strategy retreats can facilitate deeper discussions, strategic planning is not a "one-shot" affair.ⁿ⁴ Ideally, "the strategy retreat opens up discussion about a number of issues that are progressively dealt with at subsequent board meetings over the ensuing year."ⁿ⁵ A quarterly review of strategic issues may be appropriate, and the strategic objectives should be borne in mind during the year as the board considers adding new directors, management succession, acquisitions and divestitures, and numerous other matters. Further, the board needs to monitor the extent to which management has performed against the strategic plan throughout the year.

Further, the foregoing does not mean that the strategic planning process should only relate to the coming year; longer-range planning is advisable. While there is no template suitable for all companies, many companies develop plans covering one- and three-to-five-year cycles.

Recently, enterprise risk management, or "ERM," has become an important "companion" to the strategic planning process. In general terms, ERM is an integrated process to identify, assess and manage risks of all types across the enterprise. According to the Committee of Sponsoring Organizations of the Treadway Commission (or "COSO"), ERM is designed to: (1) be conducted and applied across the enterprise; (2) be incorporated into the strategic and business planning processes; (3) provide reasonable assurance to management, the board and stakeholders that there is appropriate rigor around risk-related decisions; and (4) optimize the deployment of capital and other resources.ⁿ⁶

Given the above goals of ERM, it can be argued that a strategic planning process cannot be properly conducted unless an ERM process is being conducted on a contemporaneous basis; among other things, how can the strategic plan address the risks facing the company if those risks have not been identified and assessed through an ERM process? For this and other reasons, ERM--including its relevance to the strategic planning process--is generating increased attention within the corporate community and those that follow it. Certain rating agencies have published detailed commentaries on the ERM process and the extent to which the process (or the lack thereof) may have an impact on the financial strength ratings assigned to companies in the insurance and other financial services industries, and ERM may become a factor in debt ratings assigned to companies in other industries. Also, the number of ERM programs being offered by providers of continuing education in the legal, accounting and other fields seems to be growing.

That said, ERM is still a young process, and best practices in ERM are still developing. Consequently, companies are approaching their own ERM processes in different ways. Among the issues to consider is the extent to which one or more committees, and/or the whole board, should oversee the process, and how frequently management should report to the committees and/or the board on the process.ⁿ⁷

In the wake of the financial crisis that began in 2007-2008, many groups, ranging from the media to institutional investors to legislators and regulators, raised concerns that the companies most severely affected by the crisis--*i.e.*, financial services companies--did not have adequate (or in some cases any) risk assessment and management processes. These parties also questioned the extent to which executive compensation policies at these and other companies may

have encouraged excessive or otherwise inappropriate risk-taking. Consequently, the assessment and management of risk, whether through ERM or other practices, is likely to be of increasing interest in the near term. For example, concerns about risk-taking led to the inclusion in the proposed "Shareholder *Bill of Rights* Act," introduced in the U.S. Senate in May 2009, of a proposed requirement that boards of public companies form board committees to assess and manage risks. In addition, the SEC is considering whether greater disclosure is needed concerning how companies and their boards manage risk, both generally and in the context of setting compensation.ⁿ⁸

(n3)Footnote 3. Two commentators suggest that the board define the scope of its strategic involvement and clarify whether its expectations are congruent with the executives who are leading the corporation, especially the CEO. Colin B. Carter & Jay W. Lorsch, *Back to the Drawing Board* 158-159 (2004).

(n4)Footnote 4. Colin B. Carter & Jay W. Lorsch, *Back to the Drawing Board* 159 (2004).

(n5)Footnote 5. Colin B. Carter & Jay W. Lorsch, *Back to the Drawing Board* 159-160(2004). *See also* Business Roundtable, Principles of Corporate Governance 4 (May 2002) ("Once the board reviews a strategic plan, the board should regularly monitor implementation of the plan to determine whether it is being implemented effectively and whether changes are needed.").

(n6)Footnote 6. COSO, Enterprise Risk Management-Integrated Framework, September 2004.

(n7)Footnote 7. In this connection, NYSE Rule 303A.07 and related commentary require the audit committee to exercise oversight of "policies with respect to risk assessment and risk management." This language has led some companies to believe that the ERM process must be overseen by the audit committee, rather than by the board and/or other committees, working in tandem. However, another interpretation is that the audit committee should oversee such policies as they relate to accounting and financial reporting (including internal control), rather than the risk assessment process generally. To date, the NYSE has not expressed its views on the proper interpretation of this rule as it relates to ERM.

CHAPTER 7 BOARD STRUCTURE AND PROCESSES

1-7 Corporate Governance: Law and Practice § 7.07

AUTHOR: Robert B. Lamm

§ 7.07 Information Flow to the Board

The duties of the board and its committees are increasingly broad. Many of these duties will be spelled out in the company's by-laws, the charters of the various board committees, and in the company's corporate governance principles. Increasingly, these and other documents require far more than the minimum actions necessary to comply with law. In any case, particularly in the current environment of enhanced responsibility, a director must do far more than carry out any such minimum obligations. Rather, the director must be knowledgeable and willing to probe until questions are answered satisfactorily.ⁿ¹ Moreover, even though directors are ordinarily entitled, as a matter of law, to rely upon information and assistance provided by management and third parties, a director cannot rely upon others blindly; instead, a director must constantly evaluate the actions and recommendations of others to assure that such reliance is reasonable and appropriate. In other words, the director must do his or her homework, including doing what is necessary to know and understand the company's business and the legal environment in which it operates. Companies should empower their directors to achieve these goals.

Perhaps the most critical path to director empowerment is information. Information must be provided to the board for various purposes and at various times. Directors should be encouraged "to think about the information they need and how it can best be organized in relation to what they want to know."ⁿ² In all cases, information should be provided in a timely manner and in a form that lends itself to director comprehension. The corporate governance committee, in conjunction with the non-executive chairman or the presiding or lead director if there is one, should assume responsibility for information flow to the directors, in consultation with other directors and senior management of the company, as well as the corporate secretary.

One goal of information flow is to provide the board and committee with the proper level of information prior to each meeting or other action. While directors should receive comprehensive information before taking action, too much information can be as inadvisable as too little; a director may not have time to read volumes of information and, if he or she does read it, critical items may be missed when there is too much information to digest. Thus, management needs to carefully prepare and review the information being provided in advance of board and committee meetings. The information should also be comprehensible and balanced, so that directors can understand the issues and reach decisions accordingly, without having to be concerned that they have misunderstood something too technical or have been forced, even inadvertently, to accept management's recommendations without considering all aspects of an issue. Management

can assist the board in achieving this understanding by providing information concerning the alternatives management considered in recommending a particular course of action and its reasons for the recommendation.

Timing of delivery of information is also important. Delivering materials--particularly, voluminous information--at or shortly prior to a meeting may have obvious adverse consequences. However, it can be equally inadvisable to provide directors with information too far in advance of a meeting; directors may forget what they have reviewed, intervening facts may be overlooked, or both. Although there is no "magic" number, delivery of materials five to seven days prior to the meeting should generally suffice. Where information needs to be delivered substantially in advance, it may be desirable to provide a recap or update at a later date. On the other hand, there may be situations--unusual ones--where information cannot be delivered in advance. On these occasions, management should make a special effort to review critical information in detail, and both management and the directors should commit to spend the time necessary to adequately consider this information.

In this regard, the importance of board and committee meeting agendas as information tools should not be underestimated. Agendas and the information they contain (including the order in which items are listed on an agenda) can communicate volumes to the board and committees. The distribution of agendas should be preceded by careful preparation and internal review, as well as circulation of draft agendas at an early stage. Draft committee agendas should be circulated for review and comment to the committee chair and, in the case of the board agenda, to the chairman or lead or presiding director. (Circulation of drafts to all members of a committee or the full board seems unnecessary in the ordinary course and may unduly complicate the agenda preparation process.) Given the importance of the agenda and related materials, management should be flexible and open to suggestions concerning the agenda. As indicated above, even the order in which items are shown on the agenda can have a substantive effect, since items listed toward the end of an agenda generally come up at a late stage of the meeting, when time may be pressed, thus affording less time for discussion and consideration of a particular matter.

A related organizational tool is a calendar listing the various items that must be considered by the board and each committee over the course of a fiscal year. A comprehensive calendar, particularly one that is annotated with references to the corporate governance principles, the committee charter, and/or applicable statutory, regulatory and stock exchange requirements, can help the board or a committee to focus on the matters at hand, rather than taking time to discuss a topic that should more properly be addressed at a different meeting. Like agendas, calendars should be carefully prepared and reviewed internally, circulated for review by the committee chairs (in the case of committee calendars) and the board chairman or lead or presiding director (in the case of the board calendar), and eventually sent to all directors. Consideration should be given to creating a calendar covering all committees and the board, so that members of a particular committee can be kept informed of discussions being conducted by other committees and, where appropriate, consider scheduling joint meetings or less formal discussions among members of two or more committees.

Increasingly, the means of delivering information has become very important. In an environment where directors may be traveling more than they are in their offices, some companies have implemented secure extranet sites or used other technological solutions to provide directors with access to information regardless of where they may be at any time. Other companies have found it useful to stick to the "old fashioned" way of delivering hard copy. As is the case in so many other areas, the composition of the board and the nature of the company and its industry may dictate the appropriate practice. Often, the corporate secretary is the proper person to organize materials being furnished to the board, to review the material to assure that it is comprehensive, comprehensible and balanced, and to make sure that it is delivered to directors in a timely manner.³

Of course, directors today need more than board and committee agendas and related materials. Increasingly, companies keep their directors current on developments in and affecting the company by periodic letters, analyst reports, shareholder lists, trading patterns, and other materials, often by e-mail. As this list of materials suggests, it is important--particularly in an era of shareholder activism--that directors receive not only materials prepared by the

company, but also materials prepared by company outsiders, such as institutional and other investors, rating agencies, and analysts. A concerted effort should be made to assure that directors see both good and bad news; often, directors need to know about unfavorable reports in the media more than they do about "good" news. In addition, when a development is particularly significant, it may be desirable to contact directors by telephone.

Many companies have found it useful in connection with board self-evaluations or otherwise to ask their directors the types of information they would like to receive and the frequency with which they would like to receive it. A partnership between the corporate secretary and the media and investor relations departments, as well as the finance/accounting function (which customarily generates much of the information provided to the board), that takes the directors' preferences into account, can be very effective in assuring that directors get the right information in a timely manner.

CHAPTER 7 BOARD STRUCTURE AND PROCESSES

1-7 Corporate Governance: Law and Practice § 7.08

AUTHOR: Robert B. Lamm

§ 7.08 Executive Sessions

For many years, some boards of directors have provided an opportunity for the non-management directors to meet outside the presence of management in executive sessions. Now, the NYSE corporate governance listing standards require that the non-management directors of each company meet in regularly scheduled executive sessions without management¹ and suggest that "if that group includes directors who are not independent ..., listed companies should at least once a year schedule an executive session including only independent directors."² The NYSE further requires that the director who presides at these sessions be disclosed in the company's annual proxy statement or Form 10-K.³ Alternatively, a company must disclose the procedure by which a presiding director is selected for each executive session.⁴ NASDAQ also requires that independent directors have regularly scheduled meetings at which only independent directors are present, but it does not specify who is to preside at such meetings.⁵

If a company has a non-executive chairman or a lead or presiding director, that individual should chair executive sessions of the board. If no such person has been designated, one director can be designated to chair these sessions, or the responsibility can be rotated among the chairs of the principal board committees or, possibly, other directors (in part depending upon the subjects discussed during the session). However, rotation is not considered a best practice by many institutional investors and others. Governance commentators generally agree, however, that it is preferable for one director--rather than a committee or other group of directors--to chair executive sessions.

The requirement to hold executive sessions is having a significant impact on board dynamics. Many companies are scheduling executive sessions on a more frequent basis than annually--for example, several times per year or at every board meeting.⁶ Some commentators advise that executive sessions "should be scheduled as part of the board's routine so they will not cause undue angst for the CEO and his management team."⁷

In order for these sessions to be effective, feedback should be provided to the CEO.⁸ This can be done by the lead or presiding director or the director that presided over the particular session or by the whole board.

Notwithstanding their limited attendance, the discussion at executive sessions should be reflected in the minutes, albeit in a general manner. The corporate secretary should "debrief" the leader of the session to determine the broad topics that were discussed and any actions taken⁹ (and the minutes should note that the secretary was not present and the person

on whom he/she is relying for the description). However, to assure that the executive session is characterized by the requisite degree of candor, and to preserve the relatively confidential nature of these sessions, the minutes of executive sessions should ordinarily be substantially less detailed than "regular" board minutes, possibly by doing no more than describing the issues discussed and providing only limited details of the discussion. Some commentators have suggested that the minutes should do no more than state that an executive session took place.¹⁰

A related question is the extent to which matters to be covered in the executive session should be listed in the agenda for the meeting. As indicated above with respect to minutes, if a matter to be covered in executive session is particularly sensitive, it may be desirable to omit any reference to it in the agenda (though in that case it may be advisable to informally advise the members of the board or committee that the matter may be discussed, so that they can consider the matter in advance). However, absent concerns as to confidentiality and the like, it can be helpful to list in the agenda the matters to be discussed in executive session; aside from giving the directors a "heads-up" on the matter, doing so can help with the logistics of the executive session, so that the appropriate persons can enter and leave the meeting on a more orderly basis.

CHAPTER 7 BOARD STRUCTURE AND PROCESSES

*1-7 Corporate Governance: Law and Practice § 7.09***AUTHOR:** Robert B. Lamm**§ 7.09 Use of Outside Advisors**

Traditionally, boards and board committees have relied on advice provided by the company's counsel and other experts. Post-Sarbanes-Oxley, however, a small, but growing, number of boards and board committees are seeking independent advice on a more frequent or regular basis. In this regard, Section 301 of the Sarbanes-Oxley Act and related SEC, NYSE and NASDAQ rules¹ require that audit committees have authority to engage independent counsel and other advisers. In addition, the commentary to the NYSE's listing standards states that the compensation committee should have sole authority to retain and terminate consulting firms² and the nominating/corporate governance committee should have sole authority to retain and terminate director search firms.³ While these provisions reinforce the use of outside advisors by independent board members, boards have sought legal counsel and other forms of advice on many occasions in the past. For example, boards have sought independent advice when conducting investigations or when directors find it necessary to educate themselves on a particular topic. In addition, compensation committees have routinely used compensation consultants on an annual or other periodic basis to help evaluate plans and other incentives. However, as a result of the Sarbanes-Oxley Act, the NYSE standards, or otherwise, directors, particularly members of audit committees, are considering the use of outside advisors on a more regular basis.

The availability of outside counsel and other advisors on an "as needed" basis is an important component of director independence; a director who knows that he or she can obtain independent legal or other advice when circumstances warrant--including to resolve uncertainties on the part of the director about his or her own course of action--is less likely to be subject to CEO or other management influence. In some cases, this result can be achieved by having regular outside counsel meet and interact with the board--including by attending meetings--so that the board (rather than merely the CEO or the general counsel) can feel safe in relying upon outside counsel's advice. Depending upon the circumstances, however, the use of full-time "general" advisors by the independent directors or board committees--as distinguished from using advisors for specific, limited purposes (such as serving as a "second set of eyes" to review major SEC filings)--could raise concerns regarding board culture and the relationship between the board and management. First, a board that uses outside advisors on a continuous basis with the goal of constantly testing management's assertions (whatever the specific form of the advisory relationship) may be giving a not so subtle hint that it does not trust management; if that is the case, it may be preferable to change management rather than constantly second-guess it. Second, directors who retain advisors should be aware that doing so does not free the director from responsibility; a director cannot abdicate his or her responsibility merely by bringing in outsiders. However, state law

generally does permit a director to rely upon legal counsel, accountants or other persons as to matters the director reasonably believes to be within the person's professional or expert competence.ⁿ⁴

In addition, institutional owners and others have expressed concerns regarding the independence of compensation consultants and other outside advisors to the board and committees. For example, if a firm that provides consulting advice to a compensation committee is at the same time providing substantial services to management, the willingness of the firm to render independent advice to the committee may be called into question. For that reason, some companies have policies, and provide disclosure, concerning the independence of outside advisors to their boards and committees, and the SEC has stated that it is considering greater disclosure concerning conflicts of interest on the part of compensation consultants.ⁿ⁵

CHAPTER 8 THE NOMINATING AND CORPORATE GOVERNANCE COMMITTEE

1-8 Corporate Governance: Law and Practice § 8.01

AUTHOR: John F. Olson Ashley Wright

§ 8.01 Evolution of the Nominating/Corporate Governance Committee

Historically, the nominating committee of the board of directors had one purpose: to identify, evaluate, and recommend director candidates to the full board. Regarded by some as little more than a "rubber stamp" for director choices submitted by the CEO,ⁿ¹ the traditional nominating committee did not play a central part in other aspects of corporate governance. Over the past decade, however, the nominating committee's responsibilities have broadened significantly so that today, at many companies, the committee has a leadership role in shaping corporate governance.ⁿ² Typically included among the committee's expanded duties are:

- reviewing and making recommendations concerning the structure, composition, independence and functioning of the board and its committees;
- developing a set of corporate governance principles for the company;
- planning for CEO and senior management succession; and
- at some companies, overseeing management evaluations and contributing (with the audit committee) to oversight of legal compliance and risk management.

Both the NYSE and NASDAQ have defined nominating committee responsibilities in their corporate governance listing standards.ⁿ³ The NYSE and NASDAQ requirements for nominating committees are discussed in more detail below.ⁿ⁴

The name of the nominating committee also has changed at many companies, reflecting its additional responsibilities. Names used by companies today include the Nominating and Corporate Governance Committee; the Nominating, Governance and Corporate Responsibility Committee; the Board Policy and Nominating Committee; the Nominating and Directors Committee; the Corporate Governance Committee; and the Board Affairs and Nominating Committee.ⁿ⁵

According to an Institutional Shareholder Services ("ISS") study published in 2007, 98 percent of the S&P Super 1,500 companies surveyed have a board committee charged with nominating responsibilities, up from 74 percent in 2002 and 66 percent in 1999.ⁿ⁶ ISS also found that 95 percent of companies--more than double the number in 2002--have a

committee handling corporate governance matters.ⁿ⁷ As discussed above, most boards combine the nominating and corporate governance functions in a single committee and ISS found that as of 2008, 97 percent of companies report having one of their committees responsible for reviewing the size, composition and performance of the board.ⁿ⁸

CHAPTER 8 THE NOMINATING AND CORPORATE GOVERNANCE COMMITTEE

1-8 Corporate Governance: Law and Practice § 8.02

AUTHOR: John F. Olson Ashley Wright

§ 8.02 Composition of the Nominating/Corporate Governance Committee

Traditionally, it was not unusual for the CEO or other members of management to serve on the nominating committee. As recently as 1990, only 16 percent of large companies surveyed by the Investor Responsibility Research Center barred insiders from sitting on their nominating committees.ⁿ¹ Today, however, far fewer company insiders serve on nominating/corporate governance committees. In fact, companies have made significant efforts in recent years to increase the number of independent directors on nominating/corporate governance committees. According to ISS, the average independence level of nominating committees stood at 94 percent in 2007, up from 93 percent the prior year, with the prevalence of fully independent nominating committees increasing to 87 percent from 82 percent the prior year.ⁿ² Under NYSE and NASDAQ corporate governance listing standards, *all* members of the nominating committee must be independent.ⁿ³

[1] NYSE Independence Criteria for Nominating/Corporate Governance Committee Membership

Under the NYSE's definition of "independent director," no director may qualify as independent unless the board of directors affirmatively determines that the director has no material relationship with the listed company, either directly or as a partner, shareholder or officer of an organization that has a relationship with the company. Under the NYSE's definition of "independent director," no director may qualify as independent unless the board of directors affirmatively determines that the director has no material relationship with the listed company, either directly or as a partner, shareholder or officer of an organization that has a relationship with the company.ⁿ⁴ In addition:

- a director who is an employee, or whose immediate family member is an executive officer of the listed company is not independent until three years after the end of such employment relationship;ⁿ⁵
- a director who receives, or whose immediate family member receives, more than \$120,000 during any 12-month period in direct compensation from the listed company, other than director and committee fees and pension or other deferred compensation for prior service, is not independent until three years after he or she ceases to receive more than \$120,000 in such compensation;ⁿ⁶
- a director who is a current partner or a current employee of the firm that is the company's internal or

external auditor, or whose immediate family member is (1) a current partner of such firm, or (2) a current employee of the firm and personally works on the listed company's audit, is not independent;ⁿ⁷

- a director who was, or whose immediate family member was, within the last three years a partner or employee of the company's internal or external auditor and who worked on the company's audit within that time is not independent;ⁿ⁸

- a director who is employed, or whose immediate family member is employed, as an executive officer of another company where any of the listed company's current executive officers serve on the compensation committee is not independent until three years after the end of such relationship;ⁿ⁹ and

- a director who is an executive officer or an employee, or whose immediate family member is an executive officer, of a company that has made payments to, or received payments from, the listed company for property or services in an amount that, in any of the last three fiscal years, exceeds the greater of \$1 million or 2 percent of such other company's consolidated gross revenues, is not independent.ⁿ¹⁰

Directors who fail to qualify as "independent" under these tests may not serve on a listed company's nominating/corporate governance committee under the NYSE listing standards.

The NYSE has a practice of reviewing, and commenting on, the proxy statements of its listed companies, focusing in particular on directors' biographical information and related-party transactions. If the NYSE believes that a director who is described as independent is not, in fact, "independent" under NYSE standards, or if in the view of NYSE staff a company has not adequately described how its board makes independence determinations, the listed company may receive a call or letter from its NYSE representative.ⁿ¹¹ Unlike SEC reviews, this NYSE review will occur after the proxy statement has been mailed, and requested changes will apply to subsequent years.

[2] NASDAQ Independence Criteria for Nominating/Corporate Governance Committee Membership

NASDAQ's corporate governance listing standards provide that director nominees must be selected, or recommended for the board's selection, either by a majority of independent directors or by a nominations committee composed solely of independent directors.ⁿ¹² The NASDAQ standards define an "independent director" as a person other than an executive officer or employee of the company or any other individual having a relationship that, in the opinion of the board, would interfere with the exercise of independent judgment in carrying out the responsibilities of a director.ⁿ¹³

According to commentary accompanying the NASDAQ standards, the board is responsible for making an "affirmative determination" that individuals serving as independent directors do not have a relationship with the listed company that would impair their independence.ⁿ¹⁴ In this regard, the NASDAQ standards set forth a list of relationships that would preclude a board finding of independence. Under the NASDAQ standards, the following persons would not be considered independent:

- a director who is, or during the past three years was, employed by the company;

- a director who accepted, or who has a family member who accepted, any compensation from the company in excess of \$120,000 during any period of 12 consecutive months within the three years preceding the determination of independence, other than compensation for board or committee service, compensation paid to a family member who is employed by the company (but not as an executive officer), or benefits under a tax-qualified retirement plan or non-discretionary compensation;

- a director whose family member is, or during the past three years was, employed by the company as

an executive officer;

- a director who is, or has a family member who is, a partner in, or a controlling shareholder or an executive officer of, any organization to which the company made, or from which the company received, payments for property or services that exceed 5 percent of the recipient's consolidated gross revenues or \$200,000 (whichever is greater) in the current fiscal year or any of the past three fiscal years, other than payments arising solely from investments in the company's securities or payments under non-discretionary charitable contribution matching programs;

- a director who is, or has a family member who is, employed as an executive officer of another entity where an executive officer of the listed company serves on the compensation committee (or if such relationship existed during the past three years); and

- a director who is, or has a family member who is, a current partner of the listed company's outside auditor, or was a partner or employee of the outside auditor who worked on the company's audit during the past three years.¹⁵

Commentary to the NASDAQ listing standards states that independent director oversight of nominations "enhances investor confidence in the selection of well-qualified director nominees, as well as independent nominees as required by" other NASDAQ listing standards.¹⁶ The commentary also indicates that the NASDAQ standards are "intended to provide flexibility for a company to choose an appropriate board structure and reduce resource burdens, while ensuring that independent directors approve all nominations."¹⁷

Notwithstanding this requirement, the NASDAQ standards permit one non-independent director to serve on the nominating/corporate governance committee for up to two years if:

- (1) the nominating/corporate governance committee is composed of at least three members;
- (2) the director is not a current officer or employee (or a family member of an officer or employee) of the listed company;
- (3) the board, under "exceptional and limited circumstances, determines that [the director's] membership on the committee is required by the best interests of the company and its shareholders"; and
- (4) the board discloses, in the company's next proxy statement, the nature of the relationship and the reasons for the determination.¹⁸

In addition, under both NYSE and NASDAQ listing standards, independent director oversight of director nominations is not required in cases where the right to nominate a director legally belongs to a third party, or where the company is subject to a binding obligation requiring a director nomination structure inconsistent with the standards.¹⁹

CHAPTER 8 THE NOMINATING AND CORPORATE GOVERNANCE COMMITTEE

1-8 Corporate Governance: Law and Practice § 8.03

AUTHOR: John F. Olson Ashley Wright

§ 8.03 Nominating/Corporate Governance Committee Duties and Responsibilities

[1] Identifying, Evaluating and Recommending Candidates for Board Membership

[a] Criteria for Identifying and Evaluating Director Candidates

[i] NYSE and SEC Requirements

One of the nominating/corporate governance committee's primary responsibilities is recommending director candidates to the full board for inclusion in the company's proxy materials or to fill interim vacancies on the board. To perform this function properly, the nominating/corporate governance committee should develop written criteria for identifying and evaluating director candidates.ⁿ¹ In this regard, the NYSE corporate governance listing standards provide that the nominating/corporate governance committee's purpose and responsibilities must include identifying individuals qualified to become board members, "consistent with criteria approved by the board."ⁿ²

Under SEC rules, companies must provide detailed disclosure regarding nominating committees and nominating committee processes, including the committee's minimum criteria for selecting director nominees.ⁿ³ Specifically, the rules require a company to disclose in its proxy statement:ⁿ⁴

- whether it has a separate nominating committee and if not, why not and who determines nominees for director;
- whether the nominating committee has a charter and if so, whether a current copy of the charter is available on the company's website (and the website address);ⁿ⁵
- the name of any nominating committee member who is not independent, as independence is defined by the company in compliance with the listing standards of the relevant national securities market;
- whether the nominating committee has a policy regarding the consideration of director candidates recommended by shareholders and:

- if not, why not; or

- if so, a description of the material elements of the policy, including a statement as to whether the committee will consider director candidates recommended by shareholders and the procedures to be followed by shareholders in submitting recommendations (any material changes to these procedures must be disclosed in the company's periodic reports on Forms 10-Q and 10-K);

- any specific, minimum qualifications that the nominating committee believes must be met by nominating committee-recommended nominees, and any specific qualities or skills that the committee believes are necessary for one or more of the company's directors to possess;
- the nominating committee's process for identifying and evaluating nominees for director, including nominees recommended by shareholders, and any differences in the manner in which the committee evaluates nominees based on whether they are recommended by a shareholder;
- which "category" of person(s) recommended each new nominee approved by the nominating committee (categories include shareholders, non-management directors, the chief executive officer, other executive officers, third-party search firms and other, specified sources);
- if the company pays any third party a fee to assist in identifying or evaluating potential nominees, the function performed by the third party; and
- if the nominating committee received a nominee from a long-term, more than 5-percent shareholder or group of shareholders, the names of the candidate and the shareholder or shareholder group and whether the nominating committee chose to nominate the candidate (provided that no such identification or disclosure is required unless both the shareholder and the candidate consent).

In addition to these disclosures, SEC Chairman Schapiro has stated that, "the Commission will consider whether to enhance disclosure around director nominee experience, qualifications and skills."⁶ And at an open meeting held on July 1, 2009, the Securities and Exchange Commission proposed several rule changes to improve disclosures about compensation and corporate governance matters.⁷ Specifically, the proposed changes would:

- Amend Item 401 of Regulation S-K to require that companies provide disclosure about (1) the experience, qualifications, attributes and skills of directors and director nominees that qualify them to serve as a director and as a member of each committee on which they serve, (2) all public company directorships held by directors and director nominees during the past five years, as opposed to just current directorships (as required under the current rules), and (3) the involvement of directors, director nominees and executive officers in legal proceedings during the prior ten years, as opposed to five years (as required under the current rules); and
- Amend Item 407 of Regulation S-K to require disclosure about a company's board leadership structure and why the structure is appropriate for the company. The proposed disclosure would need to include a discussion of whether the company separates or combines the roles of the chairman and chief executive officer, whether the company has a lead independent director, the board's role in the company's risk-management process and the effects, if any, that this role has on the company's board leadership structure.

Under existing SEC rules, companies generally disclose if they have standing nominating/corporate governance committees and whether such committees will consider director candidates recommended by shareholders. In fact, 93

percent of nominating/corporate governance committees surveyed by Business Roundtable in 2006 reported that they were willing to consider shareholder nominations, up from 85 percent in 2005.ⁿ⁸ Many companies have disclosed that they will consider shareholder-recommended candidates using the same criteria they use for candidates from other sources. Companies have also specified what information shareholders should provide when they recommend director candidates (by, for example, referring to the SEC's proxy disclosure requirements or indicating that shareholders should provide a candidate's name, address, biographical information, resume and consent to serve if elected).

[ii] Key Criteria

Important attributes of an effective corporate director include "strength of character, an inquiring and independent mind, practical wisdom and mature judgment,"ⁿ⁹ as well as candor and the ability--and willingness--to learn about and understand the business of the company.ⁿ¹⁰ Depending on the company's circumstances and needs, director qualifications also may include relevant business and industry experience, technical knowledge and financial literacy or expertise, particularly if the director candidate is slated to become a member of the audit committee.ⁿ¹¹ A candidate's prior success as a manager or director of another company or significant enterprise also may be relevant.

In recent years, some companies have added ethnicity and gender to their list of director considerations,ⁿ¹² and large institutional investors have encouraged the companies in which they invest to recruit more qualified women and minority board candidates and to formalize their commitment to board diversity.ⁿ¹³ A study published by Institutional Shareholder Services ("ISS") in 2007 found a gradual trend in the diversification of boards between 2000 and 2006. In 2008, more than 70 percent of companies surveyed by the ISS included at least one woman on their board, and 37 percent disclosed that they had at least one minority director.ⁿ¹⁴

The nominating/corporate governance committee's criteria for board membership should take into account the composition of the full board, which should reflect a range of abilities, experience and perspectives appropriate to the company's circumstances.ⁿ¹⁵ Directors need not all have the same expertise; those with less knowledge in a certain area should be able to trust the judgment of others with more experience in that area.ⁿ¹⁶ For example, the nominating/corporate governance committee could decide that the board needs to have specified numbers of directors with experience in compliance and legal matters, directors who understand financial reporting and complex accounting issues and directors with experience in managing risk and developing corporate strategy, in addition to CEOs and other senior executives who are familiar with the company's industry and customers.ⁿ¹⁷ Moreover, recently directors' industry experience has become a focus as a result of the upheavals in the banking industry. Banks were criticized for the number of board members serving without finance experience and subsequently, it has been reported that regulators have been strongly urging banks to address this shortcoming in finance experience.ⁿ¹⁸

The committee also should consider the independence of the board and key board committees when developing criteria for board membership. Both the NYSE and NASDAQ require that listed company boards have a majority of independent directors.ⁿ¹⁹ Many commentators have gone further, recommending that public company boards be composed of a "substantial majority" of independent directors,ⁿ²⁰ and many companies have implemented this recommendation. In December 2008, for example, 90 percent of companies surveyed by Business Roundtable reported that their boards were at least 80 percent independent.ⁿ²¹ A broader survey of S&P 1,500 companies found that just over 78 percent of such companies had boards that were at least two-thirds independent in 2007, an almost 7 percent increase from 2006.ⁿ²²

The NYSE and NASDAQ definitions of "independence"ⁿ²³ focus principally on employment, family, and business relationships. As many companies have recognized, however, other kinds of relationships, including charitable donations and personal relationships between directors and senior management, may affect a director's actual or perceived independence.ⁿ²⁴ Moreover, SEC rules now require disclosure, for each) director and nominee for director who is identified as independent, of any transactions, relationships or arrangements that were considered by the board under the applicable independence definitions but were not disclosed pursuant to the SEC's related-party transaction

rules.ⁿ²⁵ Finally, even a director with no visible ties to management is not truly "independent" if he or she is unable or unwilling to consider matters before the board with objectivity and impartiality, exercise independent judgment about management's actions and competence, challenge management's ideas and vote against them when warranted, and commit to review and discuss all proposals of importance to the company.ⁿ²⁶

The nominating/corporate governance committee also should consider the criteria applied by proxy voting advisory services, such as ISS and Glass Lewis & Co., in evaluating director independence. In many ways, these criteria go beyond NYSE and NASDAQ independence standards. For example, ISS looks at directors' employment relationships with "affiliates," which include "sibling companies" in addition to parent companies and subsidiaries, and it treats former executives of the company or its affiliates as *per se* not independent for at least five years after employment ends. In addition, ISS considers relatives of non-executive employees of the company or its affiliates not to be independent under certain circumstances, such as where a director is related to numerous employees, where the company employs relatives of numerous directors, or where a director's relative serves in a key strategic (but not executive) role.ⁿ²⁷ It is important for the nominating/corporate governance committee to take these criteria into account, as ISS will recommend that shareholders withhold votes from or vote against directors who do not meet ISS independence standards and who serve on the company's audit, compensation or nominating committees. Withhold votes for directors have become more significant as more companies have moved from plurality voting to a majority voting standard in director elections or adopted director resignation policies, as discussed below.ⁿ²⁸

This said, the nominating/corporate governance committee should not regard independence as the singular director virtue, to the neglect of other important qualities.ⁿ²⁹ In fact, some boards may be more effective when they include members of management and other non-independent directors who have a more comprehensive understanding of the company and its business, strategy and risks.ⁿ³⁰ The nominating/corporate governance committee should consider the appropriate mix of independent, non-independent and management directors when developing criteria for board membership and selecting director nominees.

[b] Identifying and Recruiting New Candidates

As discussed above, the SEC is considering amendments to Item 401 of Regulation S-K to enhance disclosure requirements for director qualifications. In light of these proposed, enhanced disclosure requirements, the committee will want to focus particularly on identifying, evaluating and recruiting qualified new candidates to the board are key functions of the nominating/corporate governance committee. In this regard, the NYSE's corporate governance listing standards provide that the nominating/corporate governance committee's purpose and responsibilities must include identifying individuals qualified to become board members and selecting, or recommending that the board select, the director nominees for the next annual meeting of shareholders.ⁿ³¹ In addition, as noted above,ⁿ³² SEC rules require detailed disclosure concerning nominating/corporate governance committees and their procedures for selecting director candidates.ⁿ³³ Commonly disclosed procedures for selecting new directors include defining specific qualifications for board membership; accepting recommendations from directors, management, shareholders and others; and retaining executive search firms to identify and recruit new candidates.

When beginning a search for new directors, the nominating/corporate governance committee should focus on its criteria for board membership and any skills or perspectives that the board currently lacks or needs to enhance.ⁿ³⁴ In this regard, the board may find it useful to prepare a matrix of necessary board skills, rating current directors' competencies in each area and identifying the areas in which additional expertise is needed.ⁿ³⁵ After the desired skill set has been identified, the nominating/corporate governance committee can prepare a "job description" to use in evaluating potential candidates.

The committee also should think about the group dynamic of the board, with the goal of selecting individuals who can contribute to the board and enhance that dynamic.ⁿ³⁶ A candidate's ability to work well with the other directors and the CEO will play a major part in determining his or her effectiveness on the board.ⁿ³⁷

The nominating/corporate governance committee should consider candidates with a variety of backgrounds, including the public sector, educational and not-for-profit institutions and senior management in addition to current and former CEOs.ⁿ³⁸ In recent years, some nominating/corporate governance committees have hired executive search firms to assist them in identifying and recruiting new candidates. Using an executive search firm may give the committee a larger, more diverse pool of potential candidates to consider, resulting in greater selectivity. It also may reduce the burden on the company's directors and human resources department to identify and recruit new candidates.ⁿ³⁹ Finally, using an outside firm may decrease bias (or the appearance of bias) by diminishing the influence of management or current directors in the process.

The NYSE's corporate governance listing standards recommend that the nominating/corporate governance committee be given "sole authority to retain and terminate any search firm to be used to identify director candidates, including sole authority to approve the search firm's fees and other retention terms."ⁿ⁴⁰ According to the NYSE, this authority should be set forth in the nominating/corporate governance committee's charter.ⁿ⁴¹

The nominating/corporate governance committee should make the ultimate determination of which candidates to recommend to the board, although all directors, the CEO and management should be encouraged to meet with director candidates and provide input to the committee.ⁿ⁴² The committee also should invite, and seriously consider, suggestions from shareholders regarding board composition and potential board nominees.ⁿ⁴³ The role of shareholders in the nomination process is discussed in more detail below.

Once the board has selected a candidate for nomination, the chair of the nominating/corporate governance committee should contact the candidate and request that he or she accept the nomination. This may be done in conjunction with the CEO, but in order to avoid any appearance that the CEO controls the nomination process, it should not be done by the CEO alone.

[c] Evaluating Incumbent Directors

In addition to identifying and recruiting new director candidates, the nominating/corporate governance committee is responsible for evaluating the contributions of incumbent directors and deciding whether to recommend those directors for re-nomination. This is an important obligation; neither directors nor the nominating/corporate governance committee should regard re-nomination as automatic. On the contrary, directors should serve only so long as they add value to the board, and a director's contributions to the board and the company should be honestly assessed every time he or she is evaluated for re-nomination.ⁿ⁴⁴

As a director's term nears its end, the nominating/corporate governance committee should review and evaluate that director's contributions to the board, as well as the board's criteria for membership and the company's continuing needs.ⁿ⁴⁵ Where all directors are elected annually, this means that the committee should evaluate the performance of each director each year. Individual director evaluations are becoming more common. According to a 2006 Business Roundtable survey, 38 percent of companies surveyed performed individual director evaluations in 2005, and 45 percent were planning to do so in 2006.ⁿ⁴⁶ In addition, nearly every company (98 percent) responding to a 2004 Business Roundtable survey had a procedure in place for reviewing or analyzing incumbent directors in connection with their re-nomination.ⁿ⁴⁷

To assist the nominating/corporate governance committee in the evaluation process, some committees require confidential director self-evaluations and/or peer evaluations.ⁿ⁴⁸ These evaluations, which may be administered by the committee, in-house personnel or a third party, typically ask directors to rate themselves and fellow directors in a number of areas, including meeting attendance, preparation and participation; understanding of the company's business and strategy; contributions to the board's governance responsibilities; support outside of meetings (including assistance in recruiting and retaining key personnel); and willingness to ask difficult questions and challenge management's

assumptions.ⁿ⁴⁹ Other committees prefer a more informal process of discussions led by the board chair, the chair of the nominating/corporate governance committee or an outside facilitator. Individual director evaluations may be combined with board and committee evaluations, discussed below.ⁿ⁵⁰

The nominating/corporate governance committee or its chair should provide appropriate feedback to directors whose performance evaluation raises concerns.ⁿ⁵¹ If the nominating/corporate governance committee decides *not* to recommend an incumbent director for re-nomination, that decision should be conveyed privately to the director to give him or her an opportunity to withdraw from consideration by the board.ⁿ⁵²

[d] Shareholder Participation in the Director Selection Process

[i] Suggesting Candidates to the Nominating/Corporate Governance Committee

The nominating/corporate governance committee should have a process in place for encouraging, and seriously considering, shareholder suggestions for board nominees.ⁿ⁵³ This process should be distinguished from the direct nomination by shareholders of candidates for election at shareholder meetings, where shareholders generally must comply with advance notice and nomination procedures in the company's bylaws.ⁿ⁵⁴

As discussed above,ⁿ⁵⁵ SEC rules require a company to disclose, among other things, whether its nominating/corporate governance committee will consider director candidates recommended by shareholders and whether the committee has rejected candidates put forward by large, long-term shareholders or groups of shareholders.ⁿ⁵⁶ A great many companies (including 91 percent of companies surveyed by the Business Roundtable in March 2006)ⁿ⁵⁷ have a process in place to consider and respond to shareholder nominations of board candidates

[ii] Shareholder Access to Company Proxy Statements

On October 14, 2003, the SEC proposed rules that would significantly change the way corporate directors are nominated and elected by requiring companies to include shareholder nominees for director in company proxy materials under certain circumstances (known as "shareholder access").ⁿ⁵⁸ Under existing rules, shareholders may recommend candidates to the nominating/corporate governance committee, nominate candidates at the annual meeting of shareholders, or conduct election contests by disseminating their own proxy materials,ⁿ⁵⁹ but companies are not required to include shareholder nominees in company proxy materials.

Under the proposed rules, shareholder access would have been available only upon the occurrence of one or both of the following triggers:

- at least one of the company's director nominees received "withhold" votes from more than 35 percent of the votes cast at an annual or special meeting at which directors were elected; or
- a shareholder proposal to activate shareholder access submitted by a shareholder or group of shareholders holding more than 1 percent of the company's voting securities for one year received a majority of the votes cast.ⁿ⁶⁰

The proposed rules generated substantial controversy, with over 13,000 comments submitted to the SEC by January 2004 (the SEC's original deadline for comments was December 22, 2003). On March 10, 2004, the SEC held a public roundtable to discuss the proposed rules, and numerous additional comments were submitted in response to the roundtable discussion. By 2005, however, momentum had moved away from the shareholder access proposal, and it appeared that the SEC would not adopt final rules in this area.

In September 2006, however, the U.S. Court of Appeals for the Second Circuit revived the issue with its decision in

American Federation of State, County and Municipal Employees (AFSCME), Employees Pension Plan v. American International Group Inc. (AIG).ⁿ⁶¹ In this case, the Court considered the SEC's application of SEC Rule 14a-8, which permits companies to exclude from their proxy materials shareholder proposals that "relate to an election." The Court held that the SEC did not provide sufficient reasons for a change in its interpretation of Rule 14a-8 that viewed proposals seeking shareholder access (known as "proxy access" proposals) as "relating to an election" and thus excludable. Accordingly, the Court reinstated a lawsuit by AFSCME, which sought to include a proxy access proposal in AIG's proxy materials.

In response to the Second Circuit decision, the SEC announced that it would consider an amendment to Rule 14a-8 concerning director nominations by shareholders.ⁿ⁶² After nearly a year and several public roundtables,ⁿ⁶³ the SEC ultimately published two alternative proposals.ⁿ⁶⁴ The first proposal would affirm the SEC's historical interpretation of Rule 14a-8, pursuant to which all proxy access shareholder proposals are excludable. The first proposal also reaffirms the SEC historical position that access proposal may be excluded from company proxy statements. The second proposal would permit the *inclusion* of certain proxy access proposals if specified criteria are met. Namely, a proxy access proposal would not be excludable under the alternative proposal if:

- the proposal is binding;
- the proposal seeks to amend the company's bylaws;
- the shareholder(s) submitting the proposal have held more than 5 percent of the company's outstanding shares for at least one year;
- the shareholder(s) submitting the proposal are eligible to, and have, filed a Schedule 13G with respect to the company; and
- the proposal otherwise satisfies the requirements of Rule 14a-8.ⁿ⁶⁵

The proxy access proposal also would require disclosure of additional information by shareholder proponents and companies, including information about the proponents and any previous dealings with the company.

Comments on the SEC's two proposals were due on October 2, 2007. Both proponents and opponents of proxy access were critical of the SEC's access proposal, and, after hearings by the House Financial Services Committee on August 27, 2007, its Chairman Barney Frank, and ten Democratic colleagues, urged the SEC to delay any decision on the issues. In December 2007, the SEC adopted the proposal which sought to amend Rule 14a-8 so that shareholder nomination bylaw proposal could be excluded by a company.ⁿ⁶⁶

In April 2009, the governor of Delaware signed into law a new provision of the Delaware General Corporation Law that would give shareholders "access" to the proxy statement in director elections.ⁿ⁶⁷ This new Section 112, which becomes effective August 1, 2009, will give a Delaware corporation the ability to adopt a bylaw provision that requires the corporation to include in its proxy solicitation materials one or more individuals nominated by a shareholder.ⁿ⁶⁸ The statute allows this requirement to be subject to such procedures or conditions as may be provided in the bylaws, including the following specifically enumerated procedures and conditions:

- a provision requiring a minimum record of beneficial ownership or duration of ownership;
- a provision requiring the submission of specified information regarding the shareholder and the shareholder's nominee;
- a provision conditioning the inclusion of shareholder nominees on the number or proportion of

shareholder nominees;

- a provision precluding shareholder nominees submitted by a shareholder who has acquired or proposes to acquire a certain percentage of voting power within a certain period of time before the election of directors; and
- a provision requiring a shareholder to indemnify the corporation for losses resulting from any false or misleading information submitted in relation to a nomination.

In addition to the changes in Delaware state law, the ABA is actively considering similar shareholder access amendments to the Model Business Corporation Act, which has been adopted at least in part by 30 states.ⁿ⁶⁹

The SEC is once again considering changing its rules to adopt shareholder access. SEC Chairman Mary Schapiro stated in a 2009 speech that "the Commission will consider a proposal to ensure that a company's owners have a meaningful opportunity to nominate directors," and that such consideration will include a review of the 2003 and 2007 proposals as well as a review of the new Section 112 of the Delaware General Corporation Law.ⁿ⁷⁰ This commitment to shareholder access at the SEC is not limited to Chairman Schapiro; SEC Commissioner Aguilar has also expressed his support for "swift and bold action to give shareholders access to their company's proxy statement,"ⁿ⁷¹ and SEC Commissioner Walter has stated her desire that shareholders have "a real say in determining who will oversee management of the companies that they own."ⁿ⁷²

Accordingly, on June 10, 2009, the Securities and Exchange Commission ("SEC") released a proposal to amend the SEC's proxy rules to permit shareholders to nominate directors in a company's proxy materials.ⁿ⁷³ The proposal contains extensive requests for comment, and the SEC Commissioners have urged interested parties to provide feedback on the proposal. If adopted, the proposed rules would (1) establish a federal proxy access right pursuant to proposed Rule 14a-11 and related amendments, and (2) permit proxy access shareholder proposals pursuant to an amendment to Rule 14a-8.

Proposed Rule 14a-11 would create a federal law process for a shareholder or group of shareholders to nominate one or more directors and have those nominees included in a company's proxy materials if the shareholder or group beneficially owned a certain percentage of the company's voting shares for at least one year prior to submitting the nomination. The ownership requirements would vary depending on a company's size:

- at least 1% of voting shares for large accelerated filers and registered investment companies with net assets of \$700 million or more;
- at least 3% of voting shares for accelerated filers and registered investment companies with net assets of \$75 million or more, but less than \$700 million; and
- at least 5% of voting shares for non-accelerated filers and registered investment companies with net assets of less than \$75 million.

Nominating shareholders would be required to file a new Schedule 14N disclosing the percentage of the company's shares beneficially owned, the period of time the shares have been beneficially owned, the shareholders' intent to hold their shares through the date of the meeting and certain other information similar to that currently required in a contested election. Each year, shareholders would be permitted to include in a company's proxy materials the greater of one director nominee or a number of director nominees that equals up to 25% of the company's board. Notably, the proposed rule would not restrict the ability of shareholders to nominate directors with whom they have a relationship, and shareholder nominees would only have to satisfy the objective independence standards in applicable securities market listing standards. In addition, the SEC is proposing an exemption from the proxy rules for communications made

in connection with using proposed Rule 14a-11.

Rule 14a-8(i)(8) currently permits companies to exclude shareholder proposals related to director elections. In 2007, the SEC amended this rule to specifically permit the exclusion of proxy access shareholder proposals. Proposed amendments to Rule 14a-8(i)(8) would eliminate this basis for exclusion and require companies to include in their proxy materials proxy access shareholder proposals. These shareholder proposals would be excludable from company proxy materials if they conflicted with state law or proposed Rule 14a-11; that is, a shareholder proposal could not have the effect of preventing a shareholder or group meeting the requirements of proposed Rule 14a-11 from having its nominee included in a company's proxy materials. In addition, if the proponent of a proxy access shareholder proposal failed to satisfy the current Rule 14a-8 eligibility requirements, the proposal could be excluded.

Although the proposal release does not discuss an effective date for any final proxy access rules, in an October 2009 speech, Commissioner Walter indicated an adopting release may be considered in early 2010, but final rules would not likely be in place at the beginning of the next year's proxy season.ⁿ⁷⁴

In parallel to the push for shareholder access in Delaware and the SEC, Senator Charles Schumer of New York introduced a "Stockholder Bill of Rights" that would include a provision confirming the SEC's authority to grant shareholders proxy access and Congressman Gary Peters introduced a "Shareholder Empowerment Act" containing a similar provision.ⁿ⁷⁵ In addition, in November 2009, the House Financial Services Committee approved the Investor Protection Act of 2009 which includes a proposed amendment that reaffirms the SEC's authority to make and implement rules directed at shareholder proxy access.ⁿ⁷⁶ Also in November 2009, Senator Christopher Dodd circulated a discussion draft of the "Restoring American Financial Stability Act of 2009" which also contains a proxy access proposal.ⁿ⁷⁷

[iii] Majority Voting Standard in Director Elections

Due in large part to dissatisfaction with the complexities of the SEC's 2003 shareholder access proposal and the apparent decision of a majority of the Commission to abandon it, some shareholders and commentators began calling for a move to a majority voting standard in the election of directors.ⁿ⁷⁸ Until recently, almost all companies' directors were elected through a plurality voting structure, whereby a single affirmative vote can lead to a nominee's election--regardless of how many votes are withheld from that nominee.

According to Institutional Shareholder Services ("ISS"), shareholder proposals calling for a majority voting standard in director elections were more numerous than any other type of proposal in 2005, 2006 and 2007 and it continued to be one of the most numerous in 2008.ⁿ⁷⁹ In the 2008 proxy season, ISS tracked 87 such proposals, the vast majority of which were submitted by the United Brotherhood of Carpenters and Joiners.ⁿ⁸⁰ Average stockholder support for majority voting standard proposals in 2006 was 48.5 percent, with 34 companies receiving more than 50 percent support.ⁿ⁸¹ Average support in 2007 was close to 50 percent, with 15 companies receiving more than 50 percent support. Notably, approximately 70 of the over 150 majority voting standard proposals submitted in 2007 were withdrawn by the proponents, primarily because the companies agreed to adopt a majority voting standard.ⁿ⁸² In 2008 average support remained close to 50 percent and the trend of company cooperation over the proposals continued as roughly half of the 90 proposals submitted were withdrawn by the proponents.ⁿ⁸³

Many companies initially addressed shareholder interest in a majority voting standard by adopting director resignation policies, under which a company retains plurality voting but states that a director who is elected by less than a majority of the votes cast must tender his or her resignation. Majority voting standard shareholder proposals have tended to be defeated at companies with director resignation policies, although these proposals have still received significant support.ⁿ⁸⁴ Many shareholders do not view director resignation policies as an adequate substitute for a true majority voting standard.

Beginning with Intel Corporation in January 2006, many companies have adopted a true majority voting standard for uncontested director elections. Most companies have effected this change through bylaw amendments, although some have had to amend their certificates of incorporation (typically to address non-Delaware state law considerations). To address "holdover" directors (*i.e.*, incumbents who were not re-elected by a majority vote), most companies have also adopted a provision, either in their bylaws or as a separate corporate governance policy, requiring any holdover director to tender his or her resignation.ⁿ⁸⁵

By February 2007, over 52 percent of companies in the S&P 500 and over 45 percent of companies in the Fortune 500 had adopted either a director resignation policy or a majority voting standard, compared to just 16 percent of the S&P 500 in March 2006.ⁿ⁸⁶ Although most early adopters favored director resignation policies, the trend since September 2006 has been to adopt true majority voting standards.ⁿ⁸⁷ In addition, New York Senator Schumer's Stockholder Bill of Rights, Congressman Gary Peters' Shareholder Empowerment Act and Senator Dodd's discussion draft of the Restoring American Financial Stability Act of 2009 all include a requirement that the annual election of directors be conducted by majority rather than plurality voting.ⁿ⁸⁸

Importantly, in July 2009 the SEC approved proposed changes to New York Stock Exchange (NYSE) Rule 452 which eliminates discretionary voting by brokers in director elections.ⁿ⁸⁹ Previously, uncontested director elections were considered "routine," meaning that brokers could vote these undirected shares for a company's director nominees. Under amended NYSE Rule 452, however, brokers are no longer permitted to exercise discretionary voting authority in director elections. As a result, brokers are only permitted to vote in director elections if they received express voting instructions from their customers. Particularly for smaller companies or those with significant retail ownership, this could significantly decrease the number of shares voting.

[2] Reviewing the Structure, Composition and Functioning of the Board and Its Committees

[a] Board Independence

As discussed above,ⁿ⁹⁰ both the NYSE and NASDAQ require that listed company boards have a majority of independent directors, and many commentators have recommended that public company boards be composed of a "substantial majority" of independent directors.ⁿ⁹¹ In addition, both the NYSE and NASDAQ require listed companies to disclose the board's independence determinations in their annual proxy statements.ⁿ⁹² Finally, the NYSE requires that an officer of each listed company affirm on an annual basis (on behalf of the company) the company's compliance with NYSE independence requirements.ⁿ⁹³

[b] Recommending Candidates for Board Committees

The nominating/corporate governance committee often is responsible for making recommendations concerning the membership and responsibilities of the board's committees.ⁿ⁹⁴ The nominating/corporate governance committee also may be charged with selecting candidates to serve as committee chairs, if this is not done by the committees themselves. In performing this function, the nominating/corporate governance committee may consider periodic rotation of committee chairs and committee memberships among the directors, in order to provide a fresh perspective and to increase directors' understanding of additional areas of the company's business.ⁿ⁹⁵ In some companies, the board chair or lead independent director also may play a role in determining committee assignments and chairs.

When making recommendations concerning committee membership and responsibilities, the nominating/corporate governance committee should review relevant SEC rules and NYSE or NASDAQ listing standards relating to board committees. For example, Section 407 of the Sarbanes-Oxley Act of 2002 and related SEC rules require that each public company board of directors determine, and disclose in the company's annual report or proxy statement, whether the audit committee has at least one "audit committee financial expert" and, if so, name that person and state whether he or she is independent.ⁿ⁹⁶ Moreover, a NYSE-listed company's audit committee must consist of at least three independent

directors, each of whom must be "financially literate" as interpreted by the board in its business judgment.ⁿ⁹⁷ At least one member of a NYSE-listed company's audit committee must have accounting or related financial management expertise.ⁿ⁹⁸ Also, the NYSE's corporate governance listing standards require listed companies to have entirely independent audit, compensation and nominating/corporate governance committees, with written charters detailing each committee's purpose and responsibilities.ⁿ⁹⁹

NASDAQ requires each listed company to have an audit committee comprised of at least three independent directors, each of whom must be able to read and understand fundamental financial statements, including the company's balance sheet, income statement, and cash flow statement.ⁿ¹⁰⁰ At least one audit committee member must have past employment experience in finance or accounting, requisite professional certification in accounting, or other comparable experience or background which results in that individual's financial sophistication.ⁿ¹⁰¹ Finally, the audit committee must have a written charter specifying certain committee responsibilities.ⁿ¹⁰² NASDAQ's corporate governance listing standards require that decisions relating to executive compensation and director nominations be made either by a majority of independent directors or by compensation and nominating committees composed solely of independent directors.

In addition to SEC, NYSE and NASDAQ requirements for committee composition, the nominating/corporate governance committee should consider "best practices" put forward by investors,ⁿ¹⁰³ business groups,ⁿ¹⁰⁴ directors' associationsⁿ¹⁰⁵ and others. For example, it may not be appropriate for all members of the compensation committee to be former chief executive officers; a diversity of professional backgrounds is important to the effective functioning of that committee.ⁿ¹⁰⁶

When evaluating potential committee chairs, the nominating/corporate governance committee should consider each candidate's leadership abilities, expertise, availability, skill in conducting meetings and familiarity with governance processes, among other things.ⁿ¹⁰⁷

[c] Board Retirement and Tenure Policies

Another matter for the nominating/corporate governance committee to consider is whether to establish retirement and tenure policies for the board of directors.ⁿ¹⁰⁸ Examples of restrictions on director tenure include a mandatory retirement age, term limits, and a requirement that directors who change employment tender a board resignation, giving the nominating/corporate governance committee an opportunity to evaluate their continued service on the board.ⁿ¹⁰⁹

Restrictions on director tenure can provide fresh perspectives to the board and strengthen the board's actual and perceived independence. They also may increase the company's score with corporate governance ratings services and proxy voting advisors, although Institutional Shareholder Services ("ISS") no longer awards points in its corporate governance rating tool (the Corporate Governance Quotient, or CGQ) for having a retirement age or mandatory term limits for directors.ⁿ¹¹⁰ However, in the United Kingdom, some institutional investors consider directors as no longer being independent after more than nine years of service.ⁿ¹¹¹

Rigid limits on director tenure may have some negative consequences. For example, they could result in the premature retirement of experienced directors who can still contribute meaningfully to the board. In addition, independent directors, who often need substantial time to learn about the company and its business, could be removed from the board too soon after they have "gotten up to speed."ⁿ¹¹² Some have argued that restrictions on director tenure also could become an excuse for the board not to perform meaningful evaluations of individual directors.ⁿ¹¹³ Nonetheless, every board should consider how best to assure that the board is periodically enhanced with new directors with fresh perspectives.

Director retirement and tenure policies are discussed in more detail in Chapter 7 above.

[d] Other Directorships

Being a corporate director requires substantial time and attention, and serving on too many other boards may prevent a director from fulfilling his or her obligations to the company.ⁿ¹¹⁴ In this regard, the nominating/corporate governance committee should consider whether to adopt a policy governing directors' service on other boards.ⁿ¹¹⁵ Many companies require directors to notify the chair of the nominating/corporate governance committee before accepting a seat on the board of another company or, in some cases, on the board of a non-profit organization. Others have specific, numerical restrictions on the number of board positions a director may hold. Such policies may be addressed in a company's corporate governance guidelines.ⁿ¹¹⁶

The National Association of Corporate Directors recommended that boards consider the following "guidelines" for limiting the board service of different categories of director candidates:ⁿ¹¹⁷

- CEOs and other senior officers: no more than one or two public company directorships, in addition to membership on their own company's board;
- Other individuals with full-time positions: no more than three or four public company directorships, in addition to membership on their own organization's board; and
- Other individuals: no more than five or six public company directorships.

Moreover, ISS awards additional points under its Corporate Governance Quotient rating tool to companies that limit board service for non-CEO directors to four or five boards. ISS also recommends that investors withhold votes from or vote against directors who sit on more than six public company boards and CEOs who serve on more than two public company boards (in addition to their own company's board). Because many institutional investors follow ISS proxy voting guidelines, nominees who serve on more than the recommended number of boards can expect to receive a high number of "withhold" or "against" votes in director elections.

The nominating/corporate governance committee also should consider whether to adopt specific limits on directorships for members of certain board committees. In this regard, commentary to the NYSE corporate governance listing standards states that "if an audit committee member simultaneously serves on the audit committees of more than three public companies, and the listed company does not limit the number of audit committees on which its audit committee members serve to three or less, then in each case, the board must determine that such simultaneous service would not impair the ability of such member to effectively serve on the listed company's audit committee," and the company must disclose that determination in its proxy statement.ⁿ¹¹⁸

Finally, the nominating/corporate governance committee should review and approve senior officers' service on other boards and consider any legal restrictions on such service.ⁿ¹¹⁹

[e] Board Processes

It is the nominating/corporate governance committee's responsibility to see that the board establishes procedures covering such matters as meeting attendance, conflicts of interest, executive sessions, board access to senior management, director resignation and director interaction with customers, the media and shareholders.ⁿ¹²⁰ With respect to executive sessions, the NYSE's corporate governance listing standards require the non-management directors of each listed company to meet in regularly scheduled executive sessions without management present.ⁿ¹²¹ Similarly, NASDAQ's corporate governance listing standards mandate regularly scheduled meetings at which only the independent directors are present.ⁿ¹²² Business Roundtable's Principles of Corporate Governance 2005 suggest that time for an executive session be placed on the agenda for every regularly scheduled board meeting.ⁿ¹²³

The nominating/corporate governance committee, often in consultation with the lead or presiding director, also is often best suited to examine board policies relating to meeting schedules, meeting agendas, and the presence and participation of management at board and committee meetings.ⁿ¹²⁴

In addition, the nominating/corporate governance committee typically is responsible for assessing "the reporting channels through which the board receives information, and the quality and timeliness of information received, so that the board obtains appropriately detailed information in a timely fashion."ⁿ¹²⁵ In this regard, directors may receive relevant information from a number of sources, including management, board committees, independent advisors, internal and external auditors, and analyst and media reports (both positive and negative) relating to the company, management, the industry and corporate governance issues. Directors should be provided with such information in advance, with adequate time before meetings to reflect on important issues and to request additional materials as necessary.ⁿ¹²⁶ (In cases involving an emergency or highly sensitive information, the company may not be able to provide information in advance.) The nominating/corporate governance committee should assess the board's information flow in connection with the annual evaluation of the board.

[f] Director Orientation and Training

The nominating/corporate governance committee may be responsible for overseeing new director orientation and coordinating director training and education programs on an ongoing basis.ⁿ¹²⁷ Directors must understand the company, its business and the industry in order to be most effective.ⁿ¹²⁸ Orientation programs should involve the provision of information relating to the company and director responsibilities generally and can include discussions with company personnel and visits to company facilities.ⁿ¹²⁹ The nominating/corporate governance committee may want to ask directors (perhaps as part of the board evaluation process) to identify appropriate training programs for the board or particular board committees.ⁿ¹³⁰

Among the materials that may be useful to directors are:

- (1) board policies and codes of conduct;
- (2) board and committee charters;
- (3) the company's mission statement;
- (4) resumes of fellow directors;
- (5) minutes of recent board and committee meetings;
- (6) recent financial statements and proxy materials; and
- (7) a calendar of standing board agenda items.ⁿ¹³¹

Directors also should receive copies of company press releases, all analyst reports about the company, and a fair sampling of press coverage (including any articles that are critical of the company or its management). Some companies now put these materials on private websites, which directors can access with a password. These materials should be kept updated and directors regularly "refreshed" about the company's changing environment and circumstances.ⁿ¹³² Finally, all outside directors should be given the opportunity to visit the company's major facilities and meet with senior management and the company's auditors, counsel, lenders and major investors.ⁿ¹³³

In recent years, business schools, law schools, the national securities markets and private organizations have made efforts to establish training and education programs for corporate directors. Former SEC Chairman William H.

Donaldson stated in 2003 that the SEC would "help in any way possible" to accelerate those efforts.ⁿ¹³⁴ Institutional Shareholder Services ("ISS") maintains a list of "accredited" director education programs and awards Corporate Governance Quotient points to companies whose directors attend these programs.ⁿ¹³⁵

[g] Director Compensation

If the board's compensation committee does not do so, the nominating/corporate governance committee often is responsible for reviewing the company's director compensation program. Director compensation is subject to comprehensive disclosure in company proxy materials and can have a significant impact on the company's ability to attract, motivate and retain qualified board members.ⁿ¹³⁶ The board committee charged with overseeing director compensation should consider, among other things:

- the form and amount of director compensation;
- whether to pay a retainer and/or per-meeting fees;ⁿ¹³⁷
- customary fees for directors in the company's industry and peer group;
- whether to pay additional fees to directors who serve on key committees, as committee chairs, or as the presiding or lead independent director;ⁿ¹³⁸
- whether the company has made any direct or indirect payments to directors for consulting or other services; and
- legal restrictions on compensation of directors, including a statutory prohibition on personal loans to directors and NYSE and NASDAQ listing standards governing payments to "independent" directors (including audit, compensation and nominating/corporate governance committee members).ⁿ¹³⁹

Director compensation generally should include a mix of cash and equity compensation. Including equity as part of directors' compensation may help to align the interests of directors with those of shareholders.ⁿ¹⁴⁰ According to the Business Roundtable, "a meaningful portion of a director's compensation should be in the form of long-term equity."ⁿ¹⁴¹

In addition, companies may want to consider establishing a requirement that, for as long as directors remain on the board, they acquire and hold a meaningful amount of company stock.ⁿ¹⁴² According to a Steven Hall & Partners study, nearly one-third (32 percent) of companies had stock ownership guidelines for their directors in 2006.ⁿ¹⁴³ Among Business Roundtable companies, the number was significantly higher--88 percent of Roundtable companies reported having director stock ownership guidelines or requirements in 2006.ⁿ¹⁴⁴ Requiring directors to retain company stock for the duration of their service on the board provides an incentive for directors to focus on long-term shareholder value.ⁿ¹⁴⁵

In recent years, some investors have argued that stock options may not align the interests of directors with those of shareholders because prior to exercising options, directors do not assume any of the risk associated with a decrease in the company's stock price. For this reason, many companies have supplemented or replaced stock option grants for directors and officers with grants of full-value shares, restricted stock and other forms of equity compensation.ⁿ¹⁴⁶ In fact, a Towers Perrin survey of Fortune 500 companies found that the majority of companies no longer include stock options as part of their director compensation programs.ⁿ¹⁴⁷

[h] Board and Committee Evaluations

Under the NYSE corporate governance listing standards, one of the nominating/corporate governance committee's responsibilities must be to "oversee the evaluation of the board and management."¹⁴⁸ In addition, the committee's charter must address "an annual performance evaluation of the committee."¹⁴⁹

Meaningful board evaluations require an assessment of the effectiveness and contributions of the full board, the board's committees and its individual directors.¹⁵⁰ In overseeing evaluations of the full board (and in developing a set of corporate governance principles for the company¹⁵¹), the nominating/corporate governance committee should consider the following seven "aspirational norms" of board practice identified by former Chief Justice E. Norman Veasey of the Delaware Supreme Court:

- Every board should have a "heavy majority of purely independent directors."
- The board "should be engaged in actual governance, and not merely act as advisors" to the CEO.
- Directors should "meet face-to-face frequently throughout the year and spend substantial time on their homework."
- Directors should "limit to a reasonable number the major boards on which they serve."
- "Independent directors should regularly evaluate the CEO and they should meet with each other alone in executive session on a regular basis. The board should have independent audit, compensation and nominating committees."
- "The board should establish and monitor reasonable law compliance programs."
- The board "should carefully review disclosure documents to ensure that all material information reasonably available is disclosed to the relevant audience."¹⁵²

Board evaluations also may include a review of the board's understanding and role with respect to development of the company's strategy; the board's access to relevant, complete and timely information; the candor of board discussions (both among directors and with management and the company's auditors); and the board's culture, including directors' willingness to work together for the benefit of the company and all of its shareholders.¹⁵³

To evaluate itself, the board (through the nominating/corporate governance committee) may find it useful to compose a description of its duties, goals and objectives, which already may exist in the form of the company's corporate governance principles, and then measure its performance against those objectives.¹⁵⁴ The evaluation may be facilitated by having directors fill out confidential surveys or questionnaires,¹⁵⁵ or by conducting more informal discussions between directors and the nominating/corporate governance committee chair. Some companies use outside parties (such as consultants or outside counsel) to facilitate the evaluation process, compile peer survey responses and provide input on board processes.

By way of example, General Electric Company's Nominating and Corporate Governance Committee Key Practices include a list of issues to be discussed annually with each director with respect to both the full board and each committee on which the director serves. Specifically, GE's process solicits ideas from directors regarding:

- the board's prioritization of issues;
- the quality of information and analysis presented to the board or committee and the effectiveness of board or committee discussions;

- the manner in which issues arising in the past year could have been handled better;
- subjects that the board or committee should discuss in the future; and
- any other matters of importance to board functioning.ⁿ¹⁵⁶

GE directors are asked to provide their comments to an independent corporate governance expert for collating and discussion with the presiding director and committee chairs. The responses are then organized and summarized for discussion at board and committee meetings.ⁿ¹⁵⁷

[3] Developing and Reviewing Corporate Governance Guidelines

The nominating/corporate governance committee should play a central part in shaping the company's corporate governance. In this regard, the NYSE's corporate governance listing standards provide that the nominating/corporate governance committee's responsibilities must include developing and recommending to the board a set of corporate governance guidelines applicable to the company.ⁿ¹⁵⁸ Although many companies already have such guidelines (and have had them for some time), the NYSE standards include a number of subjects that must be addressed in the corporate governance guidelines of NYSE-listed companies:ⁿ¹⁵⁹

- *Director qualification standards.* At a minimum, these standards should reflect the board's independence requirements. They also may address other qualification requirements, including restrictions on the number of other boards on which a director may serve and director tenure and retirement policies.
- *Director responsibilities.* According to the NYSE, these responsibilities should articulate clearly what is expected from directors, including meeting attendance and preparation.
- *Director access to management and, as necessary and appropriate, independent advisors.*
- *Director compensation.* Commentary to the NYSE standards states that director compensation guidelines should include "general principles for determining the form and amount of director compensation," and that the board "should be aware that questions as to directors' independence may be raised when directors' fees and emoluments exceed what is customary."ⁿ¹⁶⁰ Similar concerns may be raised when the company makes substantial charitable contributions to organizations affiliated with a director or enters into consulting or other compensation arrangements with a director. As discussed above, more and more companies are adopting director stock ownership guidelines and including mention of them in their corporate governance guidelines.ⁿ¹⁶¹
- *Director orientation and continuing education.*
- *Management succession.* According to the NYSE, succession planning should include "policies and principles for CEO selection and performance review, as well as policies regarding succession in the event of an emergency or the retirement of the CEO."ⁿ¹⁶²
- *Annual performance evaluation of the board.* Finally, a NYSE listed company's board should conduct a self-evaluation "at least annually to determine whether it and its committees are functioning effectively."ⁿ¹⁶³

Other topics commonly addressed in corporate governance guidelines include board leadership (e.g., whether the CEO and board chair will be separated or combined in a single person, and whether the board has appointed a presiding or

lead independent director), the structure and function of the board's committees, the board's responsibility with respect to strategic planning and the nomination and election of directors,ⁿ¹⁶⁴ and the board's processes for handling communications with shareholders.

Under the NYSE standards, every listed company's website must include its corporate governance guidelines and the charters of its "most important committees," including the audit, compensation and nominating committees.ⁿ¹⁶⁵ Moreover, the listed company's annual proxy statement must state that the required information is available on the company's website and in print to any shareholder who requests it.

For companies not listed on the NYSE, there is no requirement that the nominating/corporate governance committee recommend, and the company adopt, a set of corporate governance guidelines. Nevertheless, many companies have chosen to do so as a matter of good corporate governance.ⁿ¹⁶⁶ Corporate governance rating services consider whether a company has adopted and disclosed corporate governance guidelines, and posting such guidelines on company websites may bolster investor confidence by providing easy access to information regarding corporate governance.

The current practices of the board and its committees may provide the best starting point for developing a set of corporate governance guidelines. In this regard, a company's corporate governance guidelines should reflect its current practices to the extent possible, except when the board recognizes a need to change them.ⁿ¹⁶⁷ Although each company's corporate governance guidelines should take into account its particular circumstances, the nominating/corporate governance committee should benchmark the board's practices against emerging corporate governance trends and best practices. This benchmarking process should include a review of board size, composition and duties; committee structure and membership; director compensation; director retirement and tenure policies; and corporate governance guidelines.ⁿ¹⁶⁸ Using this data, the nominating/corporate governance committee should recommend modifications to the corporate governance guidelines as appropriate.

[4] Reviewing the Company's Succession Plans

Succession planning generally is viewed as "one of the most important aspects of ensuring the future success of any corporation," and planning for the selection of future CEOs and senior managers is a primary function of corporate boards.ⁿ¹⁶⁹ This has been shown particularly true in recent years, as CEO tenures have declined. An IRRC study published in 2005 found that nearly 14 percent of companies had replaced their CEO since 2002ⁿ¹⁷⁰ and another 2005 report noted that two out of five CEOs were failing in their first 18 months on the job.ⁿ¹⁷¹ Despite these warning signs, the National Association of Corporate Directors ("NACD") has reported that almost half of companies with revenue greater than \$500 million have no meaningful CEO succession plan.ⁿ¹⁷² The nominating/corporate governance committee frequently is responsible for working with the CEO to develop and recommend to the board a succession plan to be used at the time of the CEO's retirement or departure.ⁿ¹⁷³ The committee also may be charged with reviewing other changes in the senior management team, although the CEO "should be given considerable discretion in selecting and retaining members of the management team."ⁿ¹⁷⁴

There are two kinds of succession planning:

- (1) Long-term planning for the retirement or departure of the CEO may include comparing potential internal candidates against a list of qualities and characteristics identified by the board as essential (or desirable) for an effective CEOⁿ¹⁷⁵ and performing periodic evaluations of the CEO and senior management, if this is not done by another board committee.ⁿ¹⁷⁶ It also may include becoming familiar with potential outside successors, if necessary.ⁿ¹⁷⁷
- (2) Contingency (or crisis) planning is equally critical and involves reviewing or developing emergency succession plans to deal with the unexpected death, incapacity or departure of the CEO or other senior executives.ⁿ¹⁷⁸

Generally, the nominating/corporate governance committee should keep in mind the following key succession planning principles, as outlined by the NACD's Blue Ribbon Commission on CEO Succession:ⁿ¹⁷⁹

- *The goal of CEO succession is finding the right leader at the right time.* The board should be ready with an understanding of the company's current and future needs and a pool of familiar candidates.ⁿ¹⁸⁰
- *CEO succession is a board-driven, collaborative process.* Although the CEO should be involved in identifying and evaluating potential successors, the board should drive the process.
- *CEO succession is a continuous process.* The board should regularly (as part of its "ordinary course" activities) review the company's succession plans and the development of potential successors.ⁿ¹⁸¹
- *The board should ensure that the CEO builds a talent-rich organization by attracting and developing the right people.* Promising candidates should be identified and tested early in their careers, and directors should create opportunities to meet and personally evaluate the company's rising stars.ⁿ¹⁸²
- *Succession planning should be driven by corporate strategy.* Identifying specific, essential CEO characteristics in advance--rather than in the heat of the moment--is the "best defense against being seduced by a candidate's reputation or personal qualities" when a critical skill is absent.ⁿ¹⁸³

[5] Shared Functions

[a] Management Evaluations

Both the nominating/corporate governance committee and the compensation committee (in addition to the independent directors as a group) may have a role to play in evaluating the performance of the CEO and senior management. Under the NYSE's corporate governance listing standards, for example, the compensation committee is responsible for reviewing and approving corporate goals and objectives relevant to CEO compensation and evaluating the CEO's performance in light of those goals, although the board may allocate the responsibilities of the compensation committee to another committee composed entirely of independent directors.ⁿ¹⁸⁴ Under the NYSE standards, the nominating/corporate governance committee is charged with overseeing the evaluation of management.ⁿ¹⁸⁵

Regardless of which committee is primarily responsible for conducting management evaluations, the CEO's performance should be reviewed on an annual basis, and the non-management directors should participate with the CEO in the evaluation of senior management.ⁿ¹⁸⁶ Moreover, the results of any CEO evaluation should be communicated privately to the CEO by representatives of the non-management directors.ⁿ¹⁸⁷ When evaluating the CEO, the relevant committee(s) should consider the following factors:

- the company's progress toward, or satisfaction of, its strategic objectives during the CEO's tenure;
- the CEO's judgment and integrity;
- the match between the CEO's skills and expertise and the company's current and future needs;
- the CEO's leadership abilities, including his or her relationship with senior management and other employees; and
- the quality of the CEO's relationships with board members, including his or her candor and willingness to answer questions and provide additional information upon request.ⁿ¹⁸⁸

[b] Legal Compliance

Another area in which the nominating/corporate governance committee may share responsibility with other board committees is legal compliance.ⁿ¹⁸⁹ Under the NYSE's corporate governance listing standards, one purpose of the audit committee must be to "assist board oversight" of the company's compliance with legal and regulatory requirements.ⁿ¹⁹⁰ Nevertheless, some companies vest oversight responsibility for legal compliance--or at least non-financial legal compliance--in their nominating/corporate governance committees, recognizing that audit committees have become increasingly burdened by SEC and securities market regulations. For such companies, the audit committee may play a supplemental role in monitoring legal compliance issues.

The directors charged with overseeing legal compliance should ensure that a process is in place to encourage appropriate attention to legal compliance issues (including compliance with contractual obligations) and claims against the corporation, and the timely reporting of significant legal matters to the board or an appropriate board committee.ⁿ¹⁹¹ Directors also should monitor the development and operation of compliance programs governing insider trading, disclosure and communications with shareholders and should meet with the company's general counsel as appropriate to discuss compliance issues.ⁿ¹⁹²

The committee (or committees) overseeing legal compliance also may be responsible for developing and monitoring compliance with a corporate code of conduct.ⁿ¹⁹³ Both the NYSE and NASDAQ require listed companies to adopt and make publicly available a code of conduct applicable to all directors, officers and employees, and both require that any waivers of the code for directors or executive officers be approved by the board or a board committee.ⁿ¹⁹⁴ In addition, SEC rules adopted pursuant to Section 406 of the Sarbanes-Oxley Act require public companies to disclose whether they have adopted a qualifying "code of ethics" covering the CEO and senior financial officers, make that code available to the public, and disclose any amendments to or waivers of specified code provisions relating to the CEO and senior financial officers.ⁿ¹⁹⁵

[c] Risk Assessment and Risk Management

The nominating/corporate governance committee may share responsibility for overseeing the company's policies relating to risk assessment and risk management.ⁿ¹⁹⁶ Although the NYSE's corporate governance listing standards require the audit committee to discuss the company's risk assessment and risk management policies, commentary to the NYSE standards indicates that the audit committee "is not required to be the sole body responsible for risk assessment and management."ⁿ¹⁹⁷ In fact, some boards oversee risk assessment and management through other mechanisms, including the nominating/corporate governance committee. According to the NYSE, these companies' processes "should be reviewed in a general manner by the audit committee, but they need not be replaced by the audit committee."ⁿ¹⁹⁸ In light of the recent financial crisis, additional focus is being placed on the role of the board of directors with respect to the oversight of risk assessment and risk management. In this regard, in September 2009, the SEC proposed new rules to require enhanced disclosure about the board's role in the company's risk-management process and the effects, if any, that this role has on the company's board leadership structure.ⁿ¹⁹⁹ Accordingly, the topic of risk assessment and management and the appropriate board structure to oversee this area has become increasingly important for the board of directors.

(n20)Footnote 20. See, e.g., ABA Corporate Director's Guidebook 83; National Association of Corporate Directors, *The Governance Committee* 6 (2003); Business Roundtable, *Principles of Corporate Governance* 2005, 14 (Nov. 2005).

(n21)Footnote 21. See Business Roundtable, *Business Roundtable Corporate Governance Survey Trends--December 2008*, at www.businessroundtable.org.

(n22)Footnote 22. See Institutional Shareholder Services, *2008 Background Report: The Election of Directors, Board Independence and Related Issues* 5 (2008).

(n23)Footnote 23. See discussion in § 8.02 above.

(n24)Footnote 24. See Business Roundtable, *Principles of Corporate Governance* 2005, 14-15 (Nov. 2005), stating that when considering director independence, "the board should consider not only whether the director has any of the relationships covered by the board's independence standards but also whether the director has any other relationships, either directly or indirectly, with the corporation, senior management or other board members that could affect the director's actual or perceived independence." See also ABA Corporate Director's Guidebook 83. In an October 2003 speech to the National Association of Corporate Directors, former SEC Commissioner Cynthia Glassman stated that in her view, "personal relationships with the CEO--living in the same community, kids at the same school, moving in the same social circle--are just as likely to undercut independence" as financial relationships with the company. Cynthia A. Glassman, *Remarks on Governance Reforms and the Role of Directors before the National Association of Corporate Directors* (Oct. 20, 2003). On the other hand, some commentators argue that personal relationships between directors and members of management can promote more honest dialogue and constructive criticism. See John F. Olson & Michael T. Adams, *Composing a Balanced and Effective Board to Meet New Governance Mandates*, 59 *Bus. Law.* 421, 446 (Feb. 2004). In March 2004, the Delaware Supreme Court affirmed the dismissal of a shareholder derivative action against Martha Stewart because, among other things, the shareholder failed to show that three outside directors of Martha Stewart Living Omnimedia lacked sufficient independence to consider whether to take up the shareholder's claims. See *Beam v. Stewart*, 845 A.2d 1040 (Del. 2004). The Court rejected the shareholder's "'structural bias' argument, which presupposes that the professional and social relationships that naturally develop among members of a board impede independent decision making." *Beam*, 845 A.2d at 1050-51. The Court noted that although personal friendship may be relevant in determining whether a director is independent, "friendship must be accompanied by substantially more in the nature of serious allegations that would lead to a reasonable doubt as to a director's independence" for purposes of assessing whether a presuit demand would be futile. *Beam*, 845 A.2d at 1052. See also *California Public Employees' Retirement System v. Coulter*, CA 19191, 2002 Del. Ch. LEXIS 144, at *29 (Dec. 18, 2002) (stating that personal friendships, without more, are "insufficient to raise a reasonable doubt of a director's ability to exercise independent business judgment"). But see *In re Oracle Corp. Derivative Litig.*, 824 A.2d 917 (Del. Ch. 2003), in which the Delaware Chancery Court concluded that personal ties among the outside directors on a special litigation committee and the directors and officers being investigated negated the committee's independence.

(n78)Footnote 78. Former Delaware Supreme Court Chief Justice E. Norman Veasey, Joseph A. Grundfest and Ira M. Millstein each advocated a move to some form of majority voting in the March 10, 2004 public roundtable on the proposed shareholder access rules. Among the suggestions advanced by these commentators were an "advice and consent" model (creating disincentives for directors to serve against the will of the majority of shareholders), encouraging states to provide for majority voting in director elections, and exempting from the SEC's shareholder access rules (if adopted) issuers that provide for majority voting in director elections.

(n84)Footnote 84. *See* Claudia H. Allen, *Study of Majority Voting in Director Elections*, Feb. 5, 2007.

(n85)Footnote 85. There was initially some uncertainty under Delaware law as to whether a director could be forced to resign if he or she did not receive a majority vote. Recent amendments to the Delaware General Corporation Law, however, provide for the enforceability of advance contingent resignations, triggered only if a director is not elected by a majority vote and subject to the board's discretion as to whether to accept the resignation. *See* Delaware General Corporation Law § 141(b) (2006). The amendments also provide that a shareholder-adopted bylaw amendment that specifies a majority voting standard in director elections may not be further amended or repealed by the board. *See* Delaware General Corporation Law § 216 (2006). This change has led some companies to "get ahead" of shareholder-proposed bylaw amendments by adopting amendments at the board level--thus preserving the board's ability to alter or repeal the provisions if circumstances change. Other states have also amended their corporate laws to address majority voting. For example, California adopted legislation, effective January 1, 2007, that permits certain California-based companies to require that directors be elected by a majority of votes cast. *See California Corporations Code § 708.5* (2007). Ohio also amended its law, effective January 1, 2008, to permit the adoption of non-plurality voting standards in company articles of incorporation. *See Ohio Revised Code § 1701.55(B)* (2008). Washington took a broader approach, not only permitting the adoption of majority voting bylaws but also limiting terms for holdover directors, recognizing the enforceability of advance contingent resignations, and providing that majority voting bylaws adopted by shareholders are presumptively not subject to amendment by the board. *See Washington Revised Code §§ 23B.08.070, 23B.10.205* (2009).

(n133)Footnote 133. See National Association of Corporate Directors, The Governance Committee 8 (2003). As noted above, General Electric mandates that directors visit facilities on a regular basis.

(n134)Footnote 134. William H. Donaldson, Remarks at the 2003 Washington Economic Policy Conference (Mar. 24, 2003).

(n135)Footnote 135. The list of ISS-accredited programs is available at <http://www.isscgq.com/CGQratings.htm>.

(n136)Footnote 136. See Richard F. Kotz, *The Modern Nominating Committee*, 6 Corp. Governance Advisor 4, 5 (1998); ABA Corporate Director's Guidebook 89-90. Issues relating to director compensation are also discussed in § 6.02[5] above and generally in Chapters 15 and 16 below.

(n137)Footnote 137. A 2008 Towers Perrin survey of director compensation at Fortune 500 companies found that

in 2007, "the proportion of companies that pay flat retainers for board and committee service continues to rise, while the number of companies that pay meeting fees continues to decline." Newbury, et al., Towers Perrin Director Compensation Trends-Fortune 500-Fiscal Year 2008 (September 2008). Similarly, a 2006 Institutional Shareholder Services ("ISS") survey found that annual retainers were the most prevalent component of director pay among S&P Super 1,500 companies. See Subodh Mishra, *Director Pay Rises Another 14%*, ISS Governance Weekly (Apr. 2006), at <http://blog.riskmetrics.com>.

(n138)Footnote 138. This is an increasingly common practice, particularly for audit committee members, as these directors' responsibilities grow. Towers Perrin found that audit committee members "often" receive more for their service than members of other committees, and ISS found that audit, compensation and nominating committee chairs receive extra pay 80 percent, 73 percent and 59 percent of the time, respectively. Newbury, et al., Towers Perrin Director Compensation Trends-Fortune 500-Fiscal Year 2008 (September 2008); Subodh Mishra, *Director Pay Rises Another 14%*, ISS Governance Weekly (Apr. 2006), at <http://blog.riskmetrics.com>.

(n139)Footnote 139. See § 8.02 above and Chapters 9 and 10 below. Many of these considerations are included in the discussion of director compensation accompanying the NYSE's corporate governance listing standards. See NYSE Listed Company Manual § 303A.09 Commentary.

(n140)Footnote 140. See Business Roundtable, Principles of Corporate Governance 2005, 25 (Nov. 2005). See also National Association of Corporate Directors, The Governance Committee 35-38 (2003). When equity compensation is used, however, the committee should keep in mind that NYSE and NASDAQ listing standards require shareholder approval of equity compensation plans and arrangements. See Order Approving NYSE and NASDAQ Proposed Rule Changes Relating to Equity Compensation Plans, 1934 Act Release No. 34-48108 (June 30, 2003).

(n141)Footnote 141. Business Roundtable, Principles of Corporate Governance 2005, 25 (Nov. 2005).

(n142)Footnote 142. Business Roundtable, Principles of Corporate Governance 2005, 25 (Nov. 2005).

(n143)Footnote 143. See Steven Hall & Partners, Redesigned Pay for Redefined Responsibilities: Board Remuneration Study (2006).

(n144)Footnote 144. See Business Roundtable, Business Roundtable Corporate Governance Survey Key Findings--March 2006, at www.businessroundtable.org.

(n145)Footnote 145. According to Towers Perrin, the most common form of a director stock ownership guideline is a requirement that directors hold stock with an aggregate market value equal to a designated multiple of compensation. See Newbury, et al., Towers Perrin Director Compensation Trends-Fortune 500-Fiscal Year 2008 (September 2008). For example, Martha Stewart Living Omnimedia's stock ownership guidelines provide that non-management directors are expected to own company shares with a value equal to five times their annual retainer. Of the companies with director stock ownership guidelines in the 2006 Steven Hall & Partners study, most (83 percent) defined the ownership requirement as a multiple of the annual retainer. Alternatively, some companies use a "retention ratio" requiring directors to retain a certain percentage of the net shares acquired through restricted stock vesting or option exercises for some period of time, often until board service ends.

(n146)Footnote 146. See, e.g., Kathryn Kranhold, *Sign of Times: GE Chief Immelt to Receive Stock--Not Options*, Wall St. J., Sept. 18, 2003, at B1; Michael P. Bruno, *Microsoft to Issue Restricted Stock, Not Options*, Institutional Shareholder Services Governance Matters (2003); ABA Corporate Director's Guidebook 74-75. See also § 15.03 below discussing alignment of executive compensation with shareholder interests and § 16.05[2][c] below discussing best practice recommendations regarding equity-based compensation.

(n147)Footnote 147. See Towers Perrin, Directors' Compensation Moves Higher (July 2005). Similarly, a 2006 Steven Hall & Partners study found that only half of companies studied awarded options to directors, as compared to 72

percent awarding full-value shares. *See* Steven Hall & Partners, *Redesigned Pay for Redefined Responsibilities: Board Remuneration Study* (2006). *See also* Newbury, et al., *Towers Perrin Director Compensation Trends-Fortune 500-Fiscal Year 2008* (September 2008).

(n148)Footnote 148. NYSE Listed Company Manual § 303A.04(b)(i). According to a 2004 Institutional Shareholder Services study, 96 percent of S&P 500 companies regularly review their board's performance. *See* Russ Banham, *Finding the Right Board Mix Harder Than It Sounds*, Bowne Securities Connect (June 2005), excerpted from *Boards That Can Shoot Straight* (2005).

1-8-A Corporate Governance: Law and Practice [8-A]

[8-A] Sample Nominating/Corporate Governance Committee Charter

The following nominating/corporate governance committee charter was developed for use by companies listed on the NYSE and incorporates the NYSE's corporate governance listing standards. It is comprehensive and is intended to include all duties and responsibilities that the NYSE listing standards and best practices dictate.

NOMINATING/CORPORATE GOVERNANCE COMMITTEE CHARTER

1. Members. The Board of Directors of _____ (the "Company") appoints a Nominating/Corporate Governance Committee of at least three members, consisting entirely of independent directors, and designates one member as chairperson or delegates the authority to designate a chairperson to the Nominating/Corporate Governance Committee. For purposes hereof, an "independent" director is a director who meets the New York Stock Exchange definition of "independence," as determined by the Board.
2. Purpose, Duties and Responsibilities. The purpose, duties and responsibilities of the Nominating/Corporate Governance Committee will be to identify individuals qualified to become Board members (consistent with criteria approved by the Board); recommend to the Board director candidates for election at the annual meeting of stockholders; develop and recommend to the Board a set of corporate governance principles; and perform a leadership role in shaping the Company's corporate governance. Among its specific duties and responsibilities, the Nominating/Corporate Governance Committee will:
 - (a) Develop and recommend to the Board criteria for identifying and evaluating director candidates.
 - (b) Identify, review the qualifications of, and recruit candidates for election to the Board.
 - (c) Assess the contributions and independence of incumbent directors in determining whether to recommend them for reelection to the Board.
 - (d) Establish a procedure for the consideration of Board candidates recommended by the Company's stockholders.
 - (e) Recommend to the Board candidates for election or reelection to the Board at each annual

stockholders' meeting.

- (f) Recommend to the Board candidates to be elected by the Board as necessary to fill vacancies and newly created directorships.
- (g) Develop and recommend to the Board a set of corporate governance principles and review and recommend changes to these principles as necessary.
- (h) Make recommendations to the Board concerning the structure, composition and functioning of the Board and its committees.
- (i) Recommend to the Board candidates for appointment to Board committees and consider periodically rotating directors among the committees.
- (j) Review and recommend to the Board retirement and other tenure policies for directors.
- (k) Review directorships in other public companies held by or offered to directors and senior officers of the Company.
- (l) Review and assess the channels through which the Board receives information, and the quality and timeliness of information received.
- (m) Review the compensation of directors for service on the Board and its committees and recommend changes in compensation to the Board. ***[May be done by the compensation committee, in whole or in part, at some companies.]***
- (n) Review the Company's succession plans relating to the CEO and other senior officers. ***[May be done by the compensation committee, in whole or in part, at some companies.]***
- (o) Oversee the evaluation of the Board and management. ***[Management evaluation may be done by the compensation committee, in whole or in part, at some companies.]***
- (p) Annually evaluate the performance of the Nominating/Corporate Governance Committee and the adequacy of the committee's charter.

3. Outside advisors. The Nominating/Corporate Governance Committee will have the authority to retain [at the expense of the Company] such outside counsel, experts, and other advisors as it determines appropriate to assist it in the full performance of its functions, including sole authority to retain and terminate any search firm used to identify director candidates, and to approve the search firm's fees and other retention terms.

4. Meetings. The Nominating/Corporate Governance Committee will meet as often as may be deemed necessary or appropriate in its judgment, either in person or telephonically, and at such times and places as the committee determines. The majority of the members of the Nominating/Corporate Governance Committee constitutes a quorum. The Nominating/Corporate Governance Committee will report regularly to the full Board with respect to its activities.

[8-B] Business Roundtable, The Nominating Process and Corporate Governance Committees: Principles and Commentary (April 2004) *

The Nominating Process and Corporate Governance Committees: Principles

1. The corporate governance committee, which should be composed entirely of independent directors, should play a leadership role in shaping a company's corporate governance and overseeing the composition, structure, operation and evaluation of the board and its committees.
2. The corporate governance committee should take responsibility for assuring that a substantial majority of the board meets appropriate standards of independence developed by the committee and approved by the board.
3. The corporate governance committee should develop and recommend to the board a set of corporate governance principles, which the corporation should make publicly available.
4. Director candidates should be identified, evaluated and recommended to the board by the corporate governance committee. The corporate governance committee should consider director candidates recommended by stockholders, as well as suggestions from directors, management and other sources.
5. The corporate governance committee should have an established process for evaluating the independence, contributions and effectiveness of incumbent directors when deciding whether to recommend those directors for re-nomination.
6. The corporate governance committee should be responsible for establishing and overseeing procedures for stockholder communications with directors if the full board or another committee does not do so.
7. The corporate governance committee should assist the board in planning for CEO and senior management development and succession if another committee of independent directors does not do so.

Introduction

Business Roundtable is recognized as an authoritative voice on matters affecting American business corporations and, as such, has a keen interest in improving corporate governance practices. Business Roundtable is an association of chief executive officers of leading corporations with a combined workforce of more than 10 million employees in the United States and \$3.7 trillion in annual revenues. The chief executives are committed to advocating public policies that foster vigorous economic growth, a dynamic global economy, and a well-trained and productive U.S. workforce essential for future competitiveness.

Every publicly owned corporation should have an independent board committee that addresses director nominations and corporate governance issues. An effective corporate governance committee (often combined with, or referred to as, a nominating committee) is central to the functioning of the board. Traditionally, the corporate governance committee's role was to recommend director candidates to the board and the corporation's stockholders. Over the past decade, however, the committee's role has expanded so that today at many corporations it plays a leadership role in shaping corporate governance and overseeing the composition, structure, operation, compensation and evaluation of the board and its committees.

Business Roundtable has developed seven principles to serve as best practices for the nominating process and corporate governance committees. These principles are discussed in more detail in the commentary that follows. While the commentary illustrates ways to implement the principles, other approaches may be appropriate given the circumstances of an individual corporation.

It is critical to have independent director oversight of board nominations and operations. However, references in the principles and commentary to the corporate governance committee are not intended to preclude corporations from allocating responsibility for particular matters to a different committee, to the independent directors as a group or to the full board. (For example, although the principles suggest that the corporate governance committee should assist the board in planning for CEO and senior management succession, at some corporations the compensation committee is charged with this responsibility.) What is important is that key corporate governance issues are addressed effectively by the independent members of the board.

Commentary on Principles

1. The corporate governance committee, which should be composed entirely of independent directors, should play a leadership role in shaping a company's corporate governance and overseeing the composition, structure, operation and evaluation of the board and its committees.

- Members of the corporate governance committee should be independent in both fact and appearance, as determined by the board. They should have the ability to exercise independent judgment free from any relationship or influence that could compromise their ability to approach nominating and governance issues decisively and independently.
- The responsibilities of the corporate governance committee should be set out in a written committee charter that is made publicly available to stockholders and other interested parties.
- The committee's responsibilities should include identifying, evaluating and recommending director candidates to the board; establishing criteria for board and board committee membership; overseeing the evaluation of the board; developing and recommending to the board for public release a set of corporate governance principles; providing direction and oversight for director orientation and continuing education programs; overseeing procedures for stockholder communications with the board; and

1-8-A Corporate Governance: Law and Practice [8-B]

assisting the board and the CEO in planning for CEO and senior management development and succession (or seeing that another committee or the full board addresses these issues).

■ The corporate governance committee should review the board's committee structure and recommend candidates for membership on the board's committees. As the corporation's circumstances change, it may be appropriate for the committee to recommend that the board add or dissolve board committees (other than those required by law, regulation or listing standards).

In recommending committee membership, the corporate governance committee should focus on the strengths that different directors bring to the committees and the needs of the committees.

It is the corporate governance committee's responsibility to see that key board committees, including the audit, compensation and nominating-corporate governance committees, are composed of directors who meet applicable independence and qualification standards.

When evaluating potential committee chairs, the corporate governance committee should consider each candidate's leadership abilities, as well as his or her expertise and availability.

The corporate governance committee, along with the full board, should consider whether periodic rotation of committee membership and chairs would provide fresh perspectives and enhance directors' familiarity with different aspects of the corporation's business.

■ The corporate governance committee should be responsible for overseeing the effective functioning of the board. The committee should review the board's policies relating to meeting schedules, meeting agendas and the participation of management at board and committee meetings.

The committee should evaluate the quality and timeliness of information received by the board and the manner in which it is provided. The board should receive from management in a timely manner appropriately detailed information, and directors should request additional information as necessary.

The board also should be provided with information from sources outside the corporation, including analyst and press reports (both positive and negative) relating to the corporation, management, the industry and corporate governance issues.

The board should have an opportunity to meet with members of management on a regular basis in order to assess their capabilities and to stay apprised of issues facing the company and its industry.

■ The corporate governance committee should oversee evaluation of board and board committees performance and individual director contributions.

1-8-A Corporate Governance: Law and Practice [8-B]

The performance of the full board should be evaluated at least annually.

Companies conduct board evaluations in a variety of ways, including discussions led by the board chair or the chair of the corporate governance committee, annual board self-evaluation questionnaires and the use of third parties.

The committee and the board should assess how directors work as a group and with the CEO and whether changes in the composition of the board or key committees would better serve the corporation's interests.

Evaluation of the board involves a candid assessment of the board's strengths and weaknesses. The committee should report to the board on any weaknesses identified through the evaluation process and, together with the board, should develop and implement plans to address those weaknesses.

The corporate governance committee should conduct its own committee self-evaluation and should assist other board committees with their self-evaluations.

Individual directors' contributions should be evaluated in connection with the re-nomination process, as discussed below.

■ The corporate governance committee should establish procedures for the retirement or replacement of board members. Such procedures may include a mandatory retirement age or term limits. In addition, directors who change primary employment should notify the chair of the corporate governance committee so that the committee may determine whether the director's continued service on the board is appropriate.

■ The corporate governance committee should ask directors and the most senior executive officers to notify the corporate governance committee chair before accepting a position on another for-profit company's board.

■ The corporate governance committee, if the compensation committee does not do so, should review and recommend changes to the corporation's director compensation policies.

A meaningful portion of a director's compensation should be in the form of long-term equity.

The committee should consider establishing a requirement that, for as long as directors remain on the board, they hold a meaningful amount of company stock.

The committee should review the compensation provided to the lead or presiding director (if one has been designated) and key committee chairs to determine whether supplemental compensation, reflecting their additional responsibilities and time commitment, would be appropriate.

2. *The corporate governance committee should take responsibility for assuring that a substantial majority of the board meets appropriate standards of independence developed by the committee and approved by the board.*

- The corporate governance committee should monitor and safeguard the independence of the board and should see that a substantial majority of directors are independent in both fact and appearance, as determined by the board.
- The committee should develop and recommend to the board standards for determining directors' independence, taking into account the requirements of the federal securities laws and applicable securities markets and the views of institutional investors and other relevant groups.
- An independent director should not have relationships with the corporation or its management - whether business, employment, charitable or personal --that could impair his or her ability to exercise independent judgment.
- The committee should have a rigorous screening process to uncover any conflicts of interest or other relationships affecting independence. Director questionnaires are a useful part of this process. The committee also should review information from other sources as necessary.

3. *The corporate governance committee should develop and recommend to the board a set of corporate governance principles, which the corporation should make publicly available.*

- The corporate governance committee should develop, recommend to the board and update as necessary a set of corporate governance principles.
- The corporate governance principles of a public corporation should address, at a minimum, board leadership, qualifications for directors (including independence standards), director responsibilities, the structure and functioning of board committees, the board's access to management and independent advisers, director compensation, director orientation and continuing education, board evaluations, and management succession.
- The corporate governance principles should be made publicly available to the corporation's stockholders and other interested parties.
- The corporate governance committee should conduct regular reviews of corporate governance trends and best practices and should recommend changes to the principles and board practices as appropriate.

4. *Director candidates should be identified, evaluated and recommended to the board by the corporate governance committee. The corporate governance committee should consider director candidates recommended by stockholders, as well as suggestions from directors, management and other sources.*

- A core function of the corporate governance committee is selecting and recommending to the board qualified director candidates for election by the corporation's stockholders. To perform this responsibility properly, the committee should prepare and recommend to the board written criteria for director candidates. Over time, the committee should evaluate whether changes to the board's criteria are appropriate.

In developing criteria and evaluating individual candidates for nomination, the

1-8-A Corporate Governance: Law and Practice [8-B]

corporate governance committee should consider the background and expertise of existing board members and the specific needs of the board.

The composition of the board should reflect a mix of talents, experience, expertise and perspectives appropriate to the corporation's circumstances and strategic challenges, and the corporate governance committee should plan ahead for changes in board composition.

The committee should consider candidates from a range of backgrounds. Diversity in gender, age, race and perspective all are appropriate considerations. In recent years, corporations have drawn directors from a variety of sources, including the public sector, educational and charitable institutions, and senior management in addition to current and former CEOs.

Important criteria for directors include integrity, candor, good judgment, commitment and willingness to consider matters before the board with objectivity and impartiality. In addition, the committee should consider whether candidates have the requisite knowledge, skills and experience to understand the business of the corporation. A candidate's prior success as a manager or director of another corporation or significant enterprise also may be relevant.

The board's membership criteria should be disclosed to the corporation's stockholders and included in its corporate governance principles. As the board's needs change, the corporate governance committee should update its criteria for membership.

● Many corporate governance committees use executive search firms to assist them in identifying and recruiting qualified board candidates. Any such outside firm should be retained by, and report directly to, the corporate governance committee.

● The corporate governance committee should encourage stockholder suggestions regarding board composition and should consider director candidates recommended by stockholders.

The corporation should disclose publicly how and when stockholders may recommend director candidates to the corporate governance committee for consideration and should indicate the information that must be provided so that those candidates can be considered by the committee. The corporation should update this information as necessary.

The committee should evaluate stockholder candidates for director using the same criteria it uses to evaluate candidates recommended by other sources.

The committee should consider the candidate's ability to act in the best interests of the corporation and all of its stockholders.

The committee should communicate with any stockholder who recommends a

candidate to the committee, informing him or her of the receipt and status of the recommendation and the committee's determination regarding the candidate.

- Although it is appropriate for the CEO to meet with board candidates, final responsibility for selecting director nominees should rest with the corporate governance committee and the board.

5. *The corporate governance committee should have an established process for evaluating the independence, contributions and effectiveness of incumbent directors when deciding whether to recommend those directors for re-nomination.*

- Board positions should not be regarded as permanent. Directors should serve only so long as they add value to the board and act in the best interests of stockholders. The corporate governance committee should have a rigorous process for evaluating whether incumbent directors continue to have the appropriate skills and experience to contribute to the board.

In assessing a director's contributions, the following should be considered: his or her attendance, preparation and active participation at board and committee meetings; input from the CEO; the board's criteria for membership; and current needs for particular background and expertise.

The committee should evaluate a director's availability and commitment going forward.

- Corporate governance committees use a variety of means to assess directors' contributions, including discussions led by the board chair or the chair of the corporate governance committee, confidential self-evaluations or peer evaluations.

6. *The corporate governance committee should be responsible for establishing and overseeing procedures for stockholder communications with directors if the full board or another committee does not do so.*

- Every publicly owned corporation should have effective and meaningful procedures for stockholders to communicate with the board and for directors to respond to stockholder concerns.

Such procedures may include a mailing address, telephone number or electronic-mail address for stockholders to register concerns or questions with the board as a whole, the independent directors or key committee chairs.

The board, the corporate governance committee or members of management should consider meeting with stockholders regarding issues of concern.

The corporate governance committee, another committee or the full board should oversee the corporation's response to proposals submitted by stockholders. It may be appropriate for members of the board to meet with stockholders regarding specific proposals. In addition, the corporation should communicate its response to stockholder proposals that receive a majority vote.

- Directors should attend the corporation's annual meeting of stockholders and have a process for

responding to stockholder questions concerning the corporation. At the annual meeting, committee chairs may wish to make presentations on certain issues.

7. *The corporate governance committee should assist the board in planning for CEO and senior management development and succession if another committee of independent directors does not do so.*

■ Long-term planning for CEO and senior management development and succession is one of the board's most important functions. The corporate governance committee should assist the board in identifying and regularly updating the qualities necessary for an effective CEO of the corporation.

The board or the committee should monitor the development and progression of potential internal candidates using these standards.

The board or the committee should review with the CEO what is being done to prepare potential candidates for succession.

■ Emergency succession planning is equally critical. Working with the CEO, the board should assure that the corporation has a plan to deal with unexpected events, such as the sudden departure, death or disability of the CEO or other senior managers.

CHAPTER 9 THE AUDIT COMMITTEE

1-9 Corporate Governance: Law and Practice § 9.01

AUTHOR: Bart Schwartz

§ 9.01 Importance of the Audit Committee

In responding to Enron and other corporate governance debacles of the new millennium, policymakers focused largely on the responsibilities of the independent directors, including, especially, the board audit committee. Under the rules already in effect, every company with shares listed on the New York Stock Exchange ("NYSE"), the NASDAQn1 or the American Stock Exchange ("Amex") (collectively, the "SROs" (self-regulatory organizations)) was required to have an audit committee comprised solely of independent directors (subject only to certain very limited exceptions) with a formal audit committee charter.n2

In the post-Enron reforms, lawmakers adopted a plethora of new rules governing and assigning responsibilities to public company audit committees:

- Several sections of the Sarbanes-Oxley Act of 2002n3 (the "Sarbanes-Oxley Act" or "Sarbanes-Oxley") bear directly or indirectly on the composition and functioning of public company audit committees;n4
- the Securities and Exchange Commission (the "SEC" or the "Commission") adopted rules relating to board audit committees of SEC registrants;n5 and
- the SROs proposed and the SEC approved new corporate governance listing standards dealing specifically with audit committee charters, composition, procedures, duties and responsibilities.n6

Due to the renewed and intensified focus on the board audit committee in the post-Enron era, that committee has become the workhorse of U.S. public companies. Policymakers have assigned to the audit committee a number of required tasks designed to promote not only the integrity and fairness of the company's public disclosure and reporting but also compliance with law and regulations generally. As a result, audit committee members are required to take on some of the most critical, extensive, and time-consuming responsibilities of all directors.

CHAPTER 9 THE AUDIT COMMITTEE

1-9 Corporate Governance: Law and Practice § 9.02

AUTHOR: Bart Schwartz

§ 9.02 Audit Committee Charter, Scope and Purpose

[1] NYSE Requirements for Audit Committee Charter

The audit committee of a company with securities listed on the NYSE must have a formal written charter including at least the elements enumerated below.ⁿ¹

The audit committee's charter must address the committee's purpose, including, at least, the following:ⁿ²

(A) [to] assist board oversight of (1) the integrity of the listed company's financial statements, (2) the listed company's compliance with legal and regulatory requirements, (3) the independent auditor's qualifications and independence, and (4) the performance of the listed company's internal audit function and independent auditors; and

(B) [to] prepare an audit committee report as required by the SEC to be included in the listed company's annual proxy statement

While most of these required purposes are statements of either the traditional roles of the audit committee or of responsibilities already required by other rules, the requirement that a purpose of the audit committee be to "assist board oversight of ... the company's compliance with legal and regulatory requirements" added a significant mandatory dimension to the purpose of the audit committee. The board's "duty of oversight" became the subject of widespread attention and comment following Chancellor Allen's now-famous decision in the *Caremark* case.ⁿ³ Following *Caremark*, there was much scholarly debate about the legal status (holding or dictum) of Chancellor Allen's discussion of the "duty of oversight" and whether there is, strictly speaking, such a separate duty (as opposed to the duty of care, explained in different way) under Delaware law. By now, the debate is purely academic. All U.S. public corporations are well-advised to act as though there is a separate duty of oversight, to comply both with state law requirements on the fiduciary duties of directors and with the applicable SRO corporate governance listing standards adopted after passage of the Sarbanes-Oxley Act.ⁿ⁴

The 2003 NYSE corporate governance listing standard quoted above not only explicitly requires the board to take responsibility for overseeing the company's compliance with legal and regulatory compliance (for any company with

securities listed on the NYSE), but it also mandates that the audit committee assist the board with its compliance-oversight role. This requirement, along with a chorus of best practices recommendations from influential groups to the same effect,ⁿ⁵ has significant implications for the agenda and procedures of the audit committee.ⁿ⁶

The 2003 NYSE corporate governance listing standards also mandate that, except in certain specially exempted cases,ⁿ⁷ the audit committee's charter assign to the audit committee at least the duties and responsibilities to:ⁿ⁸

- (i) directly be responsible for the appointment, compensation, retention and oversight of the work of the company's independent auditors (subject, if applicable, to shareholder ratification) and such independent auditors must report directly to the audit committee;
- (ii) establish procedures for the receipt, retention and treatment of complaints from listed company employees on accounting, internal accounting controls or auditing matters, as well as for confidential, anonymous submissions by listed company employees of concerns regarding questionable accounting or auditing matters;
- (iii) obtain advice and assistance from outside legal, accounting or other advisors as the audit committee deems necessary to carry out its duties;
- (iv) receive appropriate funding, as determined by the audit committee, from the listed company for payment of compensation to the outside legal, accounting or other advisors employed by the audit committee and ordinary administrative expenses that are necessary or appropriate in carrying out its duties;
- (v) at least annually, obtain and review a report by the independent auditor describing: the firm's internal quality-control procedures; any material issues raised by the most recent internal quality-control review, or peer review, of the firm, or by any inquiry or investigation by governmental or professional authorities, within the preceding five years, respecting one or more independent audits carried out by the firm, and any steps taken to deal with any such issues; and (to assess the auditor's independence) all relationships between the independent auditor and the listed company;
- (vi) meet to review and discuss the listed company's annual audited financial statements and quarterly financial statements with management and the independent auditor, including the company's disclosures under "Management's Discussion and Analysis of Financial Condition and Results of Operations";
- (vii) discuss earnings press releases, as well as financial information and earnings guidance provided to analysts and rating agencies;
- (viii) discuss policies with respect to risk assessment and risk management;
- (ix) meet separately, periodically, with management, with internal auditors (or other personnel responsible for the internal audit function) and with independent auditors;
- (x) review with the independent auditor any audit problems or difficulties and management's response;
- (xi) set clear hiring policies for employees or former employees of the independent auditors; and
- (xii) report regularly to the board of directors.

Finally, the audit committee charter for a NYSE-listed company must require the committee to undergo an annual

performance evaluation.ⁿ⁹

A sample charter for the audit committee of a NYSE-listed company is reproduced in Appendix 9-A to this chapter.

[2] NASDAQ Requirements for Audit Committee Charterⁿ¹⁰

The charter for a NASDAQ-listed company audit committee must address at least:ⁿ¹¹

(A) the scope of the audit committee's responsibilities, and how it carries out those responsibilities, including structure, processes, and membership requirements;

(B) the audit committee's responsibility for ensuring its receipt from the outside auditors of a formal written statement delineating all relationships between the auditor and the company, consistent with Independence Standards Board Standard 1, and the audit committee's responsibility for actively engaging in a dialogue with the auditor with respect to any disclosed relationships or services that may impact the objectivity and independence of the auditor and for taking, or recommending that the full board take, appropriate action to oversee the independence of the outside auditor;

(C) the committee's purpose of overseeing the accounting and financial reporting processes of the company and the audits of the financial statements of the company;

(D) the following specific audit committee responsibilities and authority necessary to:

(i) directly be responsible for the appointment, compensation, retention and oversight of the work of the company's independent auditors (subject, if applicable, to shareholder ratification) and such independent auditors must report directly to the audit committee;

(ii) establish procedures for the receipt, retention and treatment of complaints from listed company employees on accounting, internal accounting controls or auditing matters, as well as for confidential, anonymous submissions by listed company employees of concerns regarding questionable accounting or auditing matters;

(iii) obtain advice and assistance from outside legal, accounting or other advisors as the audit committee deems necessary to carry out its duties; and

receive appropriate funding, as determined by the audit committee, from the listed company for payment of compensation to the outside legal, accounting or other advisors employed by the audit committee and ordinary administrative expenses that are necessary or appropriate in carrying out its duties

CHAPTER 9 THE AUDIT COMMITTEE

1-9 Corporate Governance: Law and Practice § 9.03

AUTHOR: Bart Schwartz

§ 9.03 Audit Committee Composition

[1] Audit Committee Size and Independence

For companies with securities listed on the NYSE, the NASDAQ or the Amex, the boards of directors must have an audit committee consisting of at least three independent directors,ⁿ¹ and the board should make an affirmative determination of the independence of each member of the audit committee.ⁿ²

[a] Audit Committee Independence Standards for All SEC Registrants

[i] General Independence Standards for All SEC Registrants

In addition, for any SEC registrant, no member of an audit committee may:ⁿ³

- directly or indirectly accept any consulting, advisory or other compensatory fee from the issuer or any of its subsidiaries (other than board and committee fees); or
- be an "affiliated person" of the company or any of its subsidiaries.

Indirect acceptance of a consulting, advisory or other compensatory fee includes acceptance of such fee by:ⁿ⁴

- a spouse, a minor child or stepchild or a child or stepchild sharing a home with the audit committee member; or
- an entity in which the audit committee member is a partner, member or executive officer, or occupies a similar position (except limited partners, non-managing members and those occupying similar positions who, in each case, have no active role in providing services to the entity) and which provides accounting, consulting, legal, investment banking or financial advisory services to the issuer or any subsidiary of the issuer.

For purposes of audit committee independence, an "affiliated person" is someone who directly, or indirectly through

one or more intermediaries, controls, or is controlled by, or is under common control with, the company,ⁿ⁵ including any executive officer of an affiliate, any director who is also an employee of an affiliate, any general partner of an affiliate and any managing member of an affiliate.ⁿ⁶

A person who, directly or indirectly, owns 10 percent or less of any class of the voting securities--and is not an executive officer--of a company does not "control" that entity for purposes of the audit committee independence test.ⁿ⁷ Nevertheless, this safe-harbor does not create a presumption that a more-than-10-percent owner is a controlling person or an affiliate.ⁿ⁸

[ii] Exemptions From Independence Requirements

An audit committee member who sits on the boards of directors of both a listed issuer and an affiliate of the listed issuer is exempt from the prohibition against audit committee members' being affiliated persons of the company or its subsidiaries if that director otherwise meets the independence requirements, including the requirement that independent directors receive only ordinary-course compensation for serving as member of the board of directors, audit committee or other board committee.ⁿ⁹

After an initial public offering (preceding which the issuer was not an SEC reporting company):ⁿ¹⁰

- all but one of the members of the issuer's audit committee may be exempt from the independence requirements for 90 days following the effective date of the registration statement, and
- a minority of the members of the issuer's audit committee may be exempt from the independence requirements for one year following the effective date of the registration statement.

[iii] Special Independence Requirement Exemptions for Foreign Private Issuers

There are also special exemptions for foreign private issuers. An employee of a foreign private issuer who is not an executive officer of the foreign private issuer is exempt from the independence requirements if the employee is elected or named to the board of directors or audit committee of the foreign private issuer pursuant to the issuer's governing law or documents, an employee collective bargaining or similar agreement or other home country legal or listing requirements.ⁿ¹¹

In addition, an audit committee member of a foreign private issuer may be exempt from the independence requirements if:

(1)ⁿ¹²

- (a) the member is an affiliate of the foreign private issuer or a representative of such an affiliate;
 - (b) the member has only observer status on, and is not a voting member or the chair of, the audit committee; and
 - (c) neither the member nor the affiliate is an executive officer of the foreign private issuer;
- or

(2)ⁿ¹³

- (a) the member is a representative or designee of a foreign government or foreign governmental entity that is an affiliate of the foreign private issuer; and

(b) the member is not an executive officer of the foreign private issuer.

[b] Audit Committee Independence Standards for NYSE Companies

In addition to the specific requirements for the independence of members of audit committees of all SEC registrants, for audit committees of companies with securities listed on the NYSE, the following general director independence rules apply:¹⁴

(i) A director who, in the past three years, has been an employee, or has had an immediate family member who has been an executive officer, of the listed company is not independent.

(ii) A director is not independent if, in any 12-month period within the last three years, he or she has received, or has had an immediate family member who has received, more than \$120,000 in direct compensation from the listed company, other than director and committee fees and pension or other forms of deferred compensation for prior service (provided such compensation is not contingent in any way on continued service).¹⁵

(iii) A director is not independent if he or she (A) is a current partner or employee of a firm that is the company's internal or external auditor; (B) has an immediate family member who is a current partner of such a firm; (C) has an immediate family member who is a current employee of such a firm and personally works on the listed company's audit; or (D) was, or an immediate family member was, within the last three years a partner or employee of such a firm and personally worked on the listed company's audit within that time

(iv) A director is not independent if, within the last three years, he or she has been employed, or has had an immediate family member who has been employed, as an executive officer of another company where any of the listed company's present executive officers at the same time serves or served on that company's compensation committee.

(v) A director is not independent if he or she is a current employee, or has an immediate family member who is a current executive officer, of a company that has, in any of the last three fiscal years, made payments to, or received payments from, the listed company for property or services in an amount which, in any such year, exceeded the greater of \$1 million or 2 percent of such other company's consolidated gross revenues.

For purposes of these rules, an "immediate family member" includes a person's spouse, parents, children, siblings, mothers- and fathers-in-law, sons- and daughters-in-law, brothers- and sisters-in-law, and anyone (other than domestic employees) who shares such person's home. In addition, when applying the look-back provisions of these rules, listed companies need not consider individuals who are no longer immediate family members as a result of legal separation or divorce, or those who have died or become incapacitated.¹⁶

[c] Audit Committee Independence Standards for NASDAQ Companies

In addition to meeting the specific requirements for the independence of the members of audit committees of all SEC registrants, members of audit committees of companies with securities listed on the NASDAQ may not:¹⁷

- be, or in the past three years have been, employed by the company or any parent or subsidiary of the company;

- have, or have a family member who has, accepted any compensation from the company or any parent or subsidiary of the company in excess of \$120,000 during any period of twelve consecutive months within the three years preceding the determination of independence, other than:n18

- compensation for board or board committee service;

- compensation paid to a family member who is a non-executive employee of the company or a parent or subsidiary of the company; or

- benefits under a tax-qualified retirement plan, or non-discretionary compensation;

- be a family member of a person who is, or in any of the past three years has been, employed by the corporation or any parent or subsidiary of the company as an executive officer;

- be, or have a family member who is, a partner in, or a controlling shareholder or an executive officer of, any organization to which the company or any parent or subsidiary of the company made, or from which the company or any parent or subsidiary of the company received, payments for property or services in the current year or any of the past three fiscal years that exceed 5 percent of the recipient's consolidated gross revenues for that year, or \$200,000, whichever is more, other than

- payments arising solely from investments in the corporation's securities; or

- payments under non-discretionary charitable contribution matching programs;

- be or have been, or have a family member who is or has been employed as an executive officer of another entity where at any time during the past three years any of the listed company's executives officers serve on the compensation committee of such other entity; or

- be, or have a family member who is, a current partner of the company's outside auditor, or was a partner or employee of the company's outside auditor who worked on the company's audit at any time during any of the past three years.n19

For purposes of these rules, "family members" include spouses, parents, children, and siblings, whether by blood marriage or adoption, and anyone else residing in the director's home.n20

[2] Other Attributes for Audit Committee Membership

[a] Audit Committee Financial Expert

Pursuant to an SEC rule implementing Sarbanes-Oxley Section 407, in their annual reports issuers must disclose that they have at least one "financial expert" on their audit committees or, otherwise, explain why they do not.n21

The rule requires each registrant to disclose that its board of directors has determined that its audit committee has *or does not have* at least one audit committee financial expert. Thus, an affirmative determination of the board is required. In this sense, the rule has substantive corporate governance implications--it effectively requires that the question of "financial expertise" on the audit committee be referred to the full board. It would not be sufficient, for example, simply to state that the company has not determined that it has an audit committee financial expert on its audit committee.

Nevertheless, beyond this, like most SEC rules, the rule on audit committee financial experts is a disclosure requirement. It does not require registrants to have financial experts on their audit committees, but only to disclose the board's determination that the audit committee does or does not include such a director and, if not, why not. If the board has determined that its audit committee includes at least one financial expert, it must disclose that person's name and whether he or she is independent, as "independence" is defined in SRO listing standards applicable to the issuer.ⁿ²² If the board determines that it has more than one financial expert on its audit committee, it may (but is not required to) disclose the same information for each such financial expert. If the board determines that a member of the audit committee is a financial expert by reason of that person's "other relevant experience," the registrant must provide a brief listing of such experience, as discussed below.

Under the rule, to qualify as a financial expert, the director must have five attributes acquired in one of four ways. The five attributes are:ⁿ²³

- (i) an understanding of generally accepted accounting principles and financial statements;
- (ii) the ability to assess the general application of such principles in connection with the accounting for estimates, accruals and reserves;
- (iii) experience preparing, auditing, *analyzing or evaluating* financial statements that present a breadth and level of complexity of *accounting issues* that are *generally comparable to the breadth and complexity of issues that can reasonably be expected to be raised by the registrant's financial statements, or experience actively supervising one or more persons engaged in such activities*;
- (iv) an understanding of internal control over financial reporting; and
- (v) an understanding of audit committee functions.

These attributes may be acquired through one or more of the following:ⁿ²⁴

- (i) education and experience as a principal financial officer, principal accounting officer, controller, public accountant or auditor or experience in one or more positions that involve the performance of similar functions;
- (ii) *experience actively supervising* a principal financial officer, principal accounting officer, controller, public accountant, auditor or person performing similar functions;
- (iii) experience overseeing or assessing the performance of companies or public accountants with respect to the preparation, auditing or evaluation of financial statements; or
- (iv) *other relevant experience*.

Certain language in the two lists given above is set in bold to emphasize the more flexible aspects of the rule and the degree of latitude that boards have in finding "financial experts" on their audit committees. To understand the degree of flexibility afforded under the rule, it is useful to compare it with the SEC's originally proposed "financial expert" rule, which would have required the director so designated to have experience "*preparing or auditing financial statements* that present accounting issues that are *generally comparable to those raised by the issuer's financial statements*."ⁿ²⁵ The SEC's original proposal would also have stipulated that this (and the other required attributes) be gained "through education and experience as a public accountant or auditor, or a principal financial officer, controller or principal accounting officer" of a 1934 Act reporting company (or through experience in positions involving "the performance of similar functions" or resulting, in the board's judgment, in "the person's having similar experience and expertise").ⁿ²⁶

In contrast, the final "financial expert" disclosure rule, quoted above, allows the board to give equal credit for "analyzing or evaluating" financial statements presenting accounting *issues generally comparable in breadth and complexity* to those expected to be raised by the registrant's financial statements, or for "actively supervising" a person with these responsibilities. Thus, the rule leaves room for a board to designate a former or sitting CEO as a "financial expert" on its audit committee.

At first blush, the SEC's comments in the final rule release might seem to raise some doubt about this conclusion:ⁿ²⁷

The term "active supervision" means more than the mere existence of a traditional hierarchical reporting relationship Rather, we mean that a person engaged in active supervision participates in, and contributes to, the process of addressing, albeit at a supervisory level, the same general types of issues regarding preparation, auditing, analysis or evaluation of financial statements as those addressed by the person or persons being supervised. We also mean that the supervisor should have experience that has contributed to the general expertise necessary to prepare, audit, analyze or evaluate financial statements that is at least comparable to the general expertise of those being supervised. A principle [sic] executive officer should not be presumed to qualify Active participation in, and contribution ... that demonstrates a general expertise in the area would be necessary.

Nevertheless, read together and in context, the text of the rule and the SEC's comments should be interpreted to leave it to the discretion of the board to determine, in its business judgment, whether, for example, a former or sitting CEO of another company, who was never a CPA or a CFO, but to whom CFOs or other financial professionals have reported, has been sufficiently "active" in addressing the necessary sorts of accounting issues and has made a sufficient "contribution" to demonstrate "general expertise in the area" so as to allow the board to conclude that he or she is a financial expert. It should be noted, however, that, in the wake of the accounting scandals of the early part of the millennium, there has been a premium on the recruitment of board members with traditional financial accounting backgrounds to fill the role of the audit committee financial expert.

[b] "Financial Literacy"

In the case of companies with NYSE-listed securities, except foreign private issuers, each member of the audit committee must be "financially literate, as such qualification is interpreted by the listed company's board in its business judgment, or must become financially literate within a reasonable period of time after his or her appointment to the audit committee. In addition, at least one member of the audit committee must have accounting or related financial management expertise, as the listed company's board interprets such qualification in its business judgment"; however, a board may presume that a person who satisfies the definition of audit committee financial expert set out in Item 407(d)(5)(ii) of Regulation S-K has accounting or related financial management expertise.ⁿ²⁸

Similarly, in the case of companies with securities listed on NASDAQ, each member of the audit committee must:

be able to read and understand fundamental financial statements, including a Company's balance sheet, income statement, and cash flow statement. Additionally, each Company must certify that it has, and will continue to have, at least one member of the audit committee who has past employment experience in finance or accounting, requisite professional certification in accounting, or any other comparable experience or background which results in the individual's financial sophistication, including being or having been a chief executive officer, chief financial officer or other senior officer with financial oversight responsibilities.ⁿ²⁹

[c] Service on No More Than Three Audit Committees

If an audit committee member serves on more than three public company audit committees, at least one of which is a

NYSE company, and if the NYSE company does not limit the number of public company audit committees on which its members may serve to three or fewer, then the board of each such NYSE company must determine that such simultaneous service does not impair the ability of the audit committee member effectively to serve on its audit committee and must disclose that determination in the company's proxy statement (or, if the company does not file a proxy statement, in the company's annual report on Form 10-K).n30

(n17)Footnote 17. Nasdaq Rule 5605(a)(2)(A)-(F). Nasdaq Rule 5605 is reproduced in Appendix C to this treatise.

(n18)Footnote 18. This prong of the rule is generally intended to capture situations where compensation is made directly to, or for the benefit of, the director or family member. Payments made by a company for the benefit of a director, such as political contributions to the campaign of a director or director's family member, would be considered indirect compensation for purposes of this standard. Non-preferential payments made in the ordinary course of providing business services (such as payments of interest or proceeds related to banking services or loans by a company that is a financial institution or payment of claims on a policy by a company that is an insurance company), payments arising solely from investments in the company's securities and loans permitted under Sarbanes-Oxley do not preclude a finding of independence as long as the payments are non-compensatory in nature. Depending on the circumstances, a loan or payment could be compensatory if it is not on terms generally available to the public. *See* Nasdaq IM 5605 (Definition of Independence - Rule 5605(a)(2)).

(n19)Footnote 19. In the case of investment companies, the foregoing independence rules for audit committee members do not apply; instead, no audit committee member may be an "interested" person as defined in Section 2(a)(19) of the Investment Company Act of 1940, other than in his or her capacity as a member of the board of directors or any board committee. Nasdaq Rule 5605(a)(2)(G).

CHAPTER 9 THE AUDIT COMMITTEE

1-9 Corporate Governance: Law and Practice § 9.04

AUTHOR: Bart Schwartz

§ 9.04 Audit Committee Process and Procedure

[1] General Considerations--Business Judgment Rule

Especially since Enron and the other accounting scandals of the early part of the new millennium, there has been increasing focus and attention on the work of the audit committee. Yet, while there are many new rules relating to audit committees, the fundamental legal duties of audit committee members remain the same. Like other directors, under state law they have a duty of care and a duty of loyalty and, for their decisions to be entitled to the protection of the business judgment rule, they must fulfill both duties.¹ Thus, for example, audit committee members should:

- sufficiently in advance of each meeting to permit careful review, receive all materials relating to the issues to be brought before the committee;
- satisfy themselves that they have all information reasonably available and necessary for careful and thorough consideration of the issues on their agenda;
- take ample time to thoroughly consider all the issues that come before them; and
- when appropriate, seek the advice of experts--including, when necessary, experts who are independent of company management.

[2] Specifically Required Procedures

U.S. public companies have quarterly and annual reporting cycles, and foreign private issuers have at least annual (and sometimes semi-annual or quarterly) reporting cycles, as well. In connection with the public release of earnings and the filing of SEC disclosure documents tied to the regular reporting cycle, it has become customary for each of the participants in the process (including, principally, internal accounting and finance departments, internal audit departments, company management, and outside auditors) to play a prescribed role and to follow certain procedures. Many of these procedures are covered by rules of various bodies with governmental, self-regulatory or professional authority over their constituents--notably, the SEC, the SROs (including principally the NYSE and FINRA) and the American Institute of Certified Public Accountants (the "AICPA") (and its predecessor, the Accounting Standards

Board).

The following discussion will address audit committee procedures, first in connection with the company's regular reporting cycles and then in terms of other procedures required by more recent developments in corporate governance practice and legal and regulatory developments.

[a] Annual Procedures

[i] *Retention of Auditors*

The SEC rules emphasize that the audit committee itself must hire, fire and supervise the outside auditors.ⁿ² As a practical matter, this means that the audit committee should, among other things:

- decide whether to retain the incumbent auditors or to consider other audit firms;
- if a new audit firm is being considered, interview alternative candidates for the assignment and make the final selection (although, in this process, the committee may certainly seek and consider management's input);
- negotiate or review the auditors' fee and the terms of engagement;
- maintain a direct, open line of communication with the auditors (perhaps through the audit committee chair);
- receive the auditors' reports (by following the procedures described below);
- monitor the auditors' performance; and
- make final determinations concerning issues that arise during the course of the audit.

[ii] *Review of Auditor Independence and Quality Control*

Each year, the audit committee must disclose whether it has received the written disclosures and the letter from the independent accountants required by applicable requirements of the Public Company Accounting Oversight Board ("PCAOB").ⁿ³ The current standard requires, at least annually and prior to accepting an initial engagement, that the independent auditors:ⁿ⁴

- a. describe, in writing, to the audit committee of the issuer, all relationships between the registered public accounting firm or any affiliates of the firm and the issuer or persons in financial reporting oversight roles at the issuer that, as of the date of the communication, may reasonably be thought to bear on independence;
- b. discuss with the audit committee of the issuer the potential effects of the relationships described in subparagraph (a) above on the independence of the registered public accounting firm;
- c. affirm to the audit committee of the issuer, in writing, that, as of the date of the communication, the registered public accounting firm is independent in compliance with PCAOB Rule 3520; and
- d. document the substance of its discussion with the audit committee of the issuer.

In addition, for NYSE companies, the audit committee must:

at least annually, obtain and review a report by the independent auditor describing: the firm's internal quality-control procedures; any material issues raised by the most recent internal quality-control review, or peer review, of the firm, or by any inquiry or investigation by governmental or professional authorities, within the preceding five years, respecting one or more independent audits carried out by the firm, and any steps taken to deal with any such issues; and (to assess the auditor's independence) all relationships between the independent auditor and the listed company.ⁿ⁵

[iii] Review of Financial Statements and Disclosures

One of the key responsibilities of the audit committee is to review the periodic (including annual) financial statements. In this regard, the charter of a NYSE company must enumerate the audit committee's responsibility to:

meet to review and discuss the listed company's annual audited financial statements and quarterly financial statements with management and the independent auditor, including reviewing the company's specific disclosures under "Management's Discussion and Analysis of Financial Condition and Results of Operations" ...ⁿ⁶

For a NASDAQ company, the audit committee charter must specify "the committee's purpose of overseeing the accounting and financial reporting processes of the Company and the audits of the financial statements of the Company."ⁿ⁷ It is difficult to see how an audit committee could fulfill this purpose without meeting with management and with the outside auditors to review and discuss the quarterly and annual financial statements before they are issued. Moreover, annually, the audit committee of every SEC registrant must disclose whether it has "reviewed and discussed the audited financial statements with management."ⁿ⁸

The normal and customary process is for a draft of the Annual Report on Form 10-K to be distributed to the audit committee members in advance of the meeting to enable them to review it carefully. At the meeting, which ordinarily takes place sufficiently close to the filing deadline that the document is essentially in final form (subject to any committee comments), the CFO, controller or chief accountant, sometimes the CEO, and sometimes other invited participants (such as major business unit heads), go through the major elements of the financial statements and the MD&A disclosures. The committee discussion then proceeds in open session with management, in executive session with the chief internal auditor, and in executive session with only the outside auditors.ⁿ⁹

Of course, in these discussions, the audit committee members should raise any pertinent questions and, if appropriate, discuss the possibility of changes or alternative treatments. It is in connection with this sort of probing of the numbers, choices of accounting policies, accounting estimates and textual disclosures in the MD&A that the audit committee plays one of its most critical roles. This aspect of the process has become the subject of a number of overlapping rules and pronouncements.ⁿ¹⁰

Because a majority of the directors must sign the Annual Report on Form 10-K, and to enable the board to fulfill its overall role, the Form 10-K is normally distributed, in close-to-final form, to all directors, and a second review of the financial statements and of the MD&A is conducted in a meeting of the full board following the audit committee meeting (often the next day). In that meeting, the outside directors who are not on the audit committee are entitled to place some reliance on the fact that the audit committee has gone through a thorough review of these matters.ⁿ¹¹

[iv] Review of Accounting Policies, Alternative Treatments and Written Communications Between Management and the Auditors

While, strictly speaking, it governs the duties of registered auditors, rather than audit committees, one SEC rule adopted pursuant to the Sarbanes-Oxley Act has important implications for the agenda of the audit committee's annual

discussion of the Form 10-K, including the company's audited financial statements and the MD&A. It provides that any registered public accounting firm that performs an audit for an issuer must annually report to the audit committee (and, if the annual report--which may be written or oral--is not within 90 days prior to the pertinent SEC filing, must provide an update, within that 90 day period, of any changes to previously reported information) the following items:¹²

- (1) all critical accounting policies and practices to be used;
- (2) all alternative treatments within Generally Accepted Accounting Principles for policies and practices related to material items that have been discussed with management of the issuer or registered investment company, including:
 - (a) ramifications of the use of such alternative disclosures and treatments; and
 - (b) the treatment preferred by the registered public accounting firm;
- (3) other material written communications between the registered public accounting firm and the management of the issuer or registered investment company, such as any management letter or schedule of unadjusted differences;
- (4) if the audit client is an investment company, all non-audit services provided to any entity in an investment company complex, as defined in *17 CFR § 210.2-01(f)(14)*, that were not pre-approved by the registered investment company's audit committee pursuant to *17 CFR § 210.2-01(c)(7)*.

This list overlaps, but does not strictly track, the auditor's responsibility under Statement on Auditing Standards No. 114 ("SAS 114")¹³ Since, in addition, the company is required to disclose whether the audit committee has discussed with the independent auditors the matters required to be discussed by SAS 114,¹⁴ in effect the SAS 114 items are required discussion topics for the audit committee.¹⁵ In addition to the topics required to be addressed under the SEC rule discussed above, the SAS 114 topics include:

- the auditor's views about qualitative aspects of the entity's significant accounting practices, including accounting policies, accounting estimates, and financial statement disclosures [normally taken to mean where they fall on the spectrum of aggressive to conservative];
- significant difficulties, if any, encountered during the audit;
- uncorrected misstatements, other than those the auditor believes are trivial, if any;
- disagreements with management, if any;
- other findings or issues, if any, arising from the audit that are, in the auditor's professional judgment, significant and relevant to those charged with governance regarding their oversight of the financial reporting process;
- material, corrected misstatements that were brought to the attention of management as a result of audit procedures;
- representations the auditor is requesting from management
- management's consultations with other accountants;

- significant issues, if any, arising from the audit that were discussed, or the subject of correspondence, with management; and
- significant difficulties encountered in dealing with management related to the performance of the audit, such as:
 - significant management delays in providing required information;
 - unnecessary time constraints on the completion of the audit;
 - extensive unexpected effort required to obtain sufficient appropriate audit evidence;
 - unavailability of expected information;
 - management-imposed restrictions on the auditors; or
 - management's unwillingness to provide information about management's plans for dealing with the adverse effects of the conditions or events that lead the auditor to believe there is substantial doubt about the entity's ability to continue as a going concern.

The normal practice among major public accounting firms acting as independent auditors to U.S. public companies is to produce a written document covering all such required communications, and to discuss at length with the audit committee any issues that merit special attention.

[v] *Audit Committee's Role in Annual Internal Control Review and in Disclosure Control Review*

Under Sarbanes-Oxley Section 404 and the SEC regulations thereunder, each annual report filed required by Section 13(a) or 15(d) of the 1934 Act must contain an internal control report that:¹⁶

- (1) states the responsibility of management for establishing and maintaining an adequate internal control structure and procedures for financial reporting; and
- (2) contains an assessment, as of the end of the most recent fiscal year of the issuer, of the effectiveness of the internal control structure and procedures of the issuer for financial reporting.

In addition, each registered accounting firm that prepares or issues the audit report for the issuer must "attest to, and report on, the assessment made by the management for the issuer."¹⁷

While neither the statute nor the regulations assign any specifically required role to the audit committee in connection with the annual internal control assessment and attestation, in the adopting release the SEC stated that, "[t]he preparation of the management report on internal control over financial reporting will likely involve multiple parties, including senior management, internal auditors, in-house counsel, outside counsel and audit committee members."¹⁸ Given the audit committee's overall role and responsibilities, it is likely that most audit committees will take a significant interest in reviewing the annual Section 404 management internal control assessment, the auditor's attestation, and the process by which both were arrived at. As a result, presentations by management and the attesting independent auditors on the Section 404 internal control report and attestation are appropriate annual audit committee agenda items--and are likely to become the norm--for the meeting preceding the filing of the Company's Annual Report on Form 10-K (or its equivalent for foreign private issuers or Canadian issuers--the Annual Report on Form 20-F or 40-F).

Similarly, under Sarbanes-Oxley Section 302 and its implementing regulations,ⁿ¹⁹ issuers are required to maintain disclosure controls and procedures and, with the filing of each annual or quarterly report under the 1934 Act, the principal executive officer and the principal financial officer (or persons performing similar functions) must certify, among other things, that:

- they are responsible for establishing disclosure controls and procedures;
- they have evaluated the effectiveness of the company's disclosure controls and procedures within the preceding 90 days; and
- they have presented, in the report, their conclusions about the effectiveness of the company's disclosure controls and procedures.

"Disclosure controls and procedures" are defined to include controls and procedures to ensure that the information required to be disclosed in the issuer's reports filed under the 1934 Act is "recorded, processed, summarized and reported" within the prescribed time periods, including "controls and procedures designed to ensure that ... [such information] is accumulated and communicated to the issuer's management, including its principal executive officer ... and its principal financial officer" in a timely manner.ⁿ²⁰ While there is no required role for the audit committee in the review of disclosure controls and procedures, it is appropriate for the CEO and the CFO to report to the audit committee periodically on the company's disclosure controls and procedures. As a matter of internal policy, companies may wish to include in the audit committee charter some role for the committee in reviewing disclosure controls and procedures.

[vi] Audit Committee Performance Evaluation

Like the board as a whole and the other board committees required to be comprised entirely of independent directors, the audit committee of a NYSE company is required, in its charter, to provide for an annual evaluation of the committee's performance.ⁿ²¹ Although the NYSE corporate governance rules do not specify what body must conduct the evaluation, the possibilities include the audit committee itself, the corporate governance and nominating committee, the board as a whole, the non-management directors, or even an outside advisor (such as a law firm or accounting firm--although, in the latter instance, it should not be the company's regular outside independent audit firm, as that would raise independence issues--brought in to review and report on the audit committee's performance over the previous year). The Conference Board recommends that the annual evaluation be conducted by the audit committee itself.ⁿ²²

There is no set formula for the performance evaluation. Some companies require each audit committee member annually to complete a questionnaire assessing the committee's performance on specified tasks and responsibilities while others conduct the evaluation orally.ⁿ²³ When written questionnaires are used, the questionnaires are collected and the responses are reviewed and discussed at an audit committee meeting. Alternatively, or in addition, the responses can be provided to the corporate governance and nominating committee for review and discussion of the audit committee's performance.

[b] Quarterly Procedures

Prior to being filed with the SEC, interim financial statements included in quarterly reports on Form 10-Q must be reviewed by an independent public accountant using professional standards and procedures for conducting such reviews.ⁿ²⁴ While this requirement does not directly implicate any audit committee process, it does so indirectly, since the professional standards under which auditors conduct such reviews--set forth in Statement on Auditing Standards No. 100 ("SAS 100")ⁿ²⁵ (since December 15, 2002; and SAS 71 before that date)--require the independent auditors to discuss certain matters with the audit committee (discussed below). In addition, the charter of each NYSE-listed company must specify the committee's responsibility to "meet to review and discuss the listed company's annual audited

financial statements and quarterly financial statements with management and the independent auditor, including reviewing the company's specific disclosures under 'Management's Discussion and Analysis of Financial Condition and Results of Operations'"n26

The accounting industry's professional standards require auditors conducting a review of interim financial information to report to the audit committee:

- (a) material modifications required to bring the interim financial information into conformance with generally accepted accounting principles (if they have brought these issues to the attention of management and management has not responded appropriately within a reasonable time);n27
- (b) the filing of a Form 10-Q or Form 10-QSB before the completion of the review (if they have brought this circumstance to the attention of management and management has not responded appropriately within a reasonable time);n28
- (c) frauds involving senior management or resulting in a material misstatement of the financial statements;n29
- (d) possible illegal acts, unless the matter is clearly inconsequential;n30 and
- (e) matters that, in their judgment, represent significant deficiencies in the design or operation of internal controls that could adversely affect the organization's ability to initiate, record, summarize, and report financial data consistent with management's assertions in the interim financial information ("reportable conditions").n31

In addition, in conducting a review of interim financial information, the accountant is required to communicate with the audit committee, or be satisfied through discussion with the audit committee that management has discussed with the audit committee, those items described in SAS 114 (superseding SAS 61) as they relate to the interim financial information (such as, for example, selection of or changes in significant accounting policies, accounting for unusual transactions, the effect of significant accounting policies in controversial or emerging areas, sensitive accounting estimates, adjustments arising from the audit that could, in the auditor's judgment, create disagreements between the auditors and management, major issues discussed by the auditors and management prior to retention including discussions regarding the application of accounting principles and auditing standards).n32

[c] Approval of Auditor Services

Sarbanes-Oxley and the SEC regulations issued thereunder added detailed requirements for audit committee pre-approval of audit services and permissible non-audit services.n33 Under the regulations, an accountant is not considered independent of an issuer or registered investment company (as the case may be) unless either:n34

- (A) before the accountant is engaged to render audit or permissible non-audit services,n35 the engagement is approved by the audit committee;
- (B) the engagement to render the service is entered into pursuant to pre-approval policies and procedures established by the audit committee, as long as (1) the policies and procedures are detailed as to the particular service, (2) the audit committee is informed of each service, and (3) such policies and procedures do not include delegation to management of the statutory responsibilities of the audit committee; or
- (C) the engagement satisfies a very narrow *de minimis* exception (discussed below) relating to certain

services provided by the independent accountant.

The exception (mentioned in (B), above) for services entered into pursuant to pre-approval policies and procedures established by the audit committee must be read in conjunction with Sarbanes-Oxley Act Section 202, which provides, in addition, that the audit committee may delegate the pre-approval requirement to one or more designated audit committee members who are independent directors, but goes on to specify that "the decisions of any member to whom authority is delegated under this paragraph to pre-approve an activity ... shall be presented to the full audit committee at each of its scheduled meetings."³⁶

If the audit committee elects to adopt pre-approval policies and procedures governing the services that may be provided by the outside auditor, rather than approving these services on a case-by-case basis, there are several important issues for the committee to consider:

(1) The pre-approval policies and procedures must be sufficiently "detailed as to the particular service" to be performed by the outside auditor. To incorporate the necessary detail into the policy, the audit committee should be informed of the types of services that the outside auditor has provided to the company in the past and the types of services that management anticipates the outside auditor may be engaged to provide in the coming year. The audit committee can then use this information to determine and specify in the policy which services it will pre-approve. In the pre-approval policy, the pre-approved services should be described in sufficient narrative detail to allow an otherwise uninitiated third-party reader to determine whether any particular service has, in fact, been pre-approved.

(2) In their pre-approval policies, some audit committees also include monetary thresholds to aid in their oversight of the relationship with the outside auditor. An audit committee could establish a cap for each category of service, or it could set an aggregate threshold that applied to all services provided by the outside auditor; for any services that exceed the established thresholds, management would be required to go back to the audit committee for specific pre-approval before the outside auditor could be engaged to perform the service.

(3) The pre-approval policy and procedures should specify the time frame within which the services will be deemed to have been pre-approved. In this regard, unless a specific service that is scheduled to continue for several years is specifically pre-approved, the policy should note that the services to be provided by the outside auditor have been pre-approved by the audit committee only to the extent that they are provided within the company's next fiscal year.

(4) The pre-approval procedures should specify whether management should turn to the entire audit committee or just an individual member of the audit committee (such as the audit committee chairperson) if a service that falls outside the scope of the policy needs to be pre-approved. If the policy designates an individual member of the audit committee to pre-approve specific services, then he or she must report back to the entire audit committee at the next scheduled meeting on the specific services approved between meetings.

The *de minimis* exception (mentioned in (C), above) is extremely narrow. The most restrictive element of the exception, and the one that will make its applicability rare, is the requirement that the issuer (or registered investment company) not have recognized at the time of the engagement that the services in question were non-audit services.³⁷ In addition:³⁸

(1) the aggregate amount of all such services provided may constitute no more than five percent of the company's total payments to the independent accountant during the fiscal year in which such services are provided; and

(2) such services must promptly be brought to the attention of the audit committee and must be approved before the completion of the [presumably, ongoing or next] audit by the committee or one or more of its members to whom the committee has delegated the authority to grant such approvals.

In addition, the PCAOB has adopted a rule requiring that, for a public company's outside auditors to be considered independent, audit committees follow certain procedures in connection with the retention of such auditors for tax-related services.ⁿ³⁹ The rule provides that, in seeking audit committee pre-approval to perform a permissible tax service, a registered public accounting firm shall:

(a) describe, in writing, to the audit committee of the issuer --

(1) the scope of the proposed service, the fee structure for the engagement, and any side letter, other amendment to the engagement letter, or other agreement (whether oral, written, or otherwise) between the firm and the audit client, relating to the service; and

(2) any compensation arrangement or other agreement, such as a referral agreement, a referral fee or fee-sharing arrangement, between the registered public accounting firm (or an affiliate of the firm) and any person (other than the audit client) with respect to the promoting, marketing, or recommending of a transaction covered by the service;

(b) discuss with the audit committee the potential effects of the services on the independence of the firm; and

(c) document the substance of its discussion with the audit committee.

[d] Approval of Related-Party Transactions

In 2006, the Securities and Exchange Commissions adopted amendments to its rule for public companies' disclosures of related party transactions.ⁿ⁴⁰ One of the 2006 reforms was the requirement that every public company disclose its policies and procedures for review, approval or ratification of related-party transactions of the sort that are required to be disclosed in the company's annual disclosure documents.ⁿ⁴¹ While no particular approval policies or procedures are required under the SEC's rules, both for protection under state lawⁿ⁴² and to have a process that is appropriate and can be disclosed without risk of criticism under the federal securities laws, companies are well-advised to have a policy that all related-party transactions must be approved in advance by a committee of non-management directors (without the participation or vote of any director who may have an interest in the transaction). The Audit Committee is sometimes the choice for this assignment; however, the governance committee may be the appropriate choice for this assignment because it generally makes recommendations with respect to whether the directors meet the applicable independence standards.

[e] Responsibilities in Connection with Press Releases and Analyst Guidance

While the charter of every NYSE-listed company must specify the committee's duty to discuss earnings press releases, financial information and earnings guidance provided to analysts and rating agencies, the committee may do so generally (by discussing the types of information to be disclosed and the type of presentation to be made). The audit committee is not required to have a discussion in advance of each earnings release or each instance in which a company may provide earnings guidance.ⁿ⁴³ Nevertheless, as to earnings releases, it is good practice, and is common, for the audit committee to review a draft of the press release along with the quarterly or annual report.

[f] Receipt, Retention and Processing of Complaints

Under the Sarbanes-Oxley Act and the SEC's implementing rules, each public company audit committee must establish procedures for:ⁿ⁴⁴

- (i) the receipt, retention, and treatment of complaints received by the listed issuer regarding accounting, internal accounting controls, or auditing matters; and
- (ii) the confidential, anonymous submission by employees of the listed issuer of concerns regarding questionable accounting or auditing matters.

Companies have adopted various approaches to fulfilling this requirement. Some companies have set up areas of their websites with the necessary security measures to allow employees or any other interested parties to submit concerns anonymously, and with links allowing such concerns to be transmitted to all non-management directors or to the members of the audit committee only. In this manner, an integrated procedure may be used to satisfy both the requirement that the audit committee establish whistle-blower procedures and the requirement that the company establish a method (which must be disclosed in the annual proxy statement or, for companies that do not file a proxy statement, the Form 10-K) for interested parties to make their concerns known to the presiding director or the non-management directors as a group.ⁿ⁴⁵ In addition, for a fee, a number of independent service providers will set up a 1-800 "hot line" (with the number being communicated to employees and others by means of the company's intranet and website, among other communications) and staff it with trained employees who are available to receive, record and transmit to the appropriate recipients (including outside directors or the members of the audit committee, when appropriate) complaints or concerns from employees or other parties.

In either case, to fulfill the first prong of the audit committee requirement set forth above, the audit committee must ensure that there are proper procedures in place for the retention and treatment of such complaints and concerns, including for the initiation and completion of an appropriate investigation. As part of this process, audit committees often are provided with a list or summary of the complaints and concerns on a quarterly basis.

When the committee considers to whom such complaints and concerns should be referred in the first instance for investigation, the answer may depend on the nature of the issue. The audit committee may wish to refer complaints or concerns that do not implicate any wrongdoing on the part of senior management to the office of the general counsel, the chief compliance officer or chief internal auditor to investigate and report back to the committee. For complaints and concerns that implicate wrongdoing on the part of senior management, it may be appropriate for the audit committee to engage independent counsel (other than a law firm with which the company has an ongoing relationship) to conduct an investigation. For U.S. companies, one advantage of having counsel (in-house or outside, as the case may be), rather than the internal audit staff, conduct the investigation and report to the committee is that the report, as well as the notes of counsel, can potentially be protected from discovery under the attorney-client privilege and the attorney work-product doctrine.ⁿ⁴⁶ Because local law varies on questions of privilege (and because, for example, in some non-U.S. jurisdictions there is no attorney-client privilege for in-house counsel at all), the audit committee should consult with counsel on the effect on privilege and confidentiality of assigning the investigation to various parties (under either attorney-client privilege or the self-evaluative privilege available in some states) before settling on the prescribed procedure for an investigation to be conducted in a particular jurisdiction.

As far as retention of complaints and concerns, the regulations do not provide any specific guidance. In the absence of such guidance it may be prudent for companies to retain such complaints and concerns (in either paper or electronic format) verbatim and indefinitely.

In light of the whistle-blower-protection provisions of Sarbanes-Oxley,ⁿ⁴⁷ the procedures that audit committees establish for treatment of such complaints and concerns should include a clear statement that no employee may be discharged, demoted, suspended, threatened, harassed or otherwise discriminated against in the terms and conditions of

employment because of any information, complaint or concern regarding questionable accounting or auditing matters he or she has submitted, directly or indirectly, to the audit committee, to any representative or agent of the company, to any government regulatory or law enforcement authority, or to any member of Congress or any committee of Congress.

When complaints and concerns are submitted anonymously (including to any intermediary operating a hot line), the investigator will be unable to follow up directly with the person who submitted the complaint or concern. For this reason, it is advisable at least to provide an option (though not a requirement) for those who submit complaints or concerns to give their names and telephone numbers or e-mail addresses, with assurances that there will be no adverse consequences as a result of providing such information. Alternatively (or in addition), some third-party intermediaries (such as hot-line providers) also provide investigation services and give assurance to the person submitting the complaint or concern that his or her identity will not be revealed to the company. Another procedure often employed when a caller wishes to remain anonymous and when the hot-line operator refers the anonymous complaint to the company for investigation is for the hot-line operator to assign a case number and to invite the caller to call back at an appointed time to receive a report on the results of the company's investigation.

Finally, audit committees may wish to establish a policy concerning categories of complaints that must be reported to the chair of the audit committee promptly (*e.g.*, within two business days). Such categories might include:

- (1) allegations of alleged wrongdoing on the part of executive officers concerning accounting, internal controls or auditing matters;
- (2) allegations concerning false and misleading book entries, financial misstatements or errors, if they could materially affect the accuracy or completeness of the company's financial statements or if there is credible evidence that any such falsifications were deliberate and involved executive officers or employees with significant involvement in internal controls;
- (3) allegations of an intentional fraud or breach of law involving financial reporting; and
- (4) allegations of intentional wrongdoing asserted as part of a wrongful discharge or "whistleblower" claim by an employee, former employee or his or her attorney.

[g] Counsel and Consultants

For SEC registrants, each audit committee must have the authority to engage independent counsel and other advisers, as it determines necessary to carry out its duties.ⁿ⁴⁸ In turn, each listed issuer must provide for appropriate funding, as determined by the audit committee, for payment of:ⁿ⁴⁹

- (i) compensation to any registered public accounting firm engaged for the purpose of preparing or issuing an audit report or performing other audit, review or attest services for the listed issuer;
- (ii) compensation to any independent counsel and other advisers engaged by the audit committee; and
- (iii) ordinary administrative expenses of the audit committee that are necessary or appropriate in carrying out its duties.ⁿ⁵⁰

It is not common for audit committees routinely to retain their own counsel absent special circumstances, although some have done so.ⁿ⁵¹

[h] CEO and CFO's Duties to Discuss Fraud and Material Control Weaknesses

Under the Sarbanes-Oxley statutory and regulatory certification requirements, every registrant's CEO and CFO must, with the submission of each annual and quarterly periodic financial report filed with the SEC (*e.g.*, Forms 10-K and 10-Q), certify, among other things, that they have disclosed to the company's independent auditors and its board audit committee (or persons performing the equivalent functions):ⁿ⁵²

- (i) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize, and report financial information; and
- (ii) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

While these requirements are couched in terms of the disclosure requirements in the certification of the CEO and CFO to be included as an exhibit to each applicable periodic report, they imply a reciprocal duty of the audit committee to discuss these matters, as applicable in any period, with the CEO and CFO. It is therefore good practice to include on the agenda of the audit committee for each meeting at which the committee reviews a periodic report to be filed with the SEC--perhaps during the committee's executive session with the CEO and CFO--a standard item covering whether these officers have any knowledge of (i) significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting that could adversely affect the registrant's ability to record, process, summarize, and report financial information, or (ii) any fraud, whether or not material, involving management or other employees with a significant role in the company's internal control over financial reporting.

[i] Oversight of Compliance and Risk Management

[i] *Audit Committee's Role in Compliance Oversight*

As noted above, the 2003 NYSE corporate governance rules represented the first attempt of any government agency or (in this case) SRO to codify the role of the audit committee in assisting with "board oversight of ... the company's compliance with legal and regulatory requirements" ⁿ⁵³

There are no regulations or SRO rules specifying how the audit committee should carry out this responsibility. Adhering to some of the other procedural requirements (such as the duty of the CEO and CFO to report to the audit committee significant deficiencies and material weaknesses in internal control over financial reporting and frauds involving management or others with a significant role in internal control over financial reporting, and the audit committee's responsibility to establish procedures for receipt, retention and treatment of complaints and concerns relating to accounting, internal controls or auditing matters) should at least partially satisfy the audit committee's duty of oversight. Nevertheless, no rule defines what more is required to satisfy the audit committee's role in assisting board oversight of compliance with legal requirements. ⁿ⁵⁴

In some companies, the chief compliance officer reports directly to the audit committee, with a dotted line to the CEO. Whatever the reporting relationship, the audit committee should hear periodically from the company's head of internal audit, chief compliance officer (if any) and the chief legal officer concerning the company's policies and procedures to promote compliance with applicable laws and regulations and to detect and remedy any violations. ⁿ⁵⁵

In addition, it is customary and appropriate for the company's chief legal officer to brief the board (as a whole, rather than the audit committee) on major legal, regulatory and compliance issues. The directors should be satisfied that the company is addressing these issues responsibly. ⁿ⁵⁶

Before the corporate governance reforms of 2002 and 2003, it had not been traditional in U.S. companies for the audit committee to meet separately and privately with the chief legal officer. Nevertheless, in the post-Enron era, doing so has

become a recommended best practice.ⁿ⁵⁷

[ii] Relationship of Attorney-Conduct Rules to Audit Committee's Role

In considering the audit committee's role in compliance oversight, it is also useful to consider the SEC's 2003 attorney-conduct rules, adopted pursuant to Section 307 of Sarbanes-Oxley, including the "qualified legal compliance committee" procedure under those rules.ⁿ⁵⁸

Under the attorney-conduct rules, when a lawyer appearing and practicing before the Commissionⁿ⁵⁹ in the representation of an issuer becomes aware of evidence of a material violationⁿ⁶⁰ by the issuer or its officers, directors, employees or agents, the lawyer must report the evidence to the issuer's chief legal officer ("CLO") or to both the CLO and the CEO. The CLO must inquire into the evidence that he or she reasonably believes is appropriate to determine if the material violation described in the attorney's report has occurred, is ongoing, or is about to occur.

If the CLO determines no material violation has occurred, is ongoing, or is about to occur, the CLO must notify the reporting attorney and advise the reporting attorney of the basis for the determination. If the CLO in a company without a qualified legal compliance committee (a "QLCC") believes that a material violation has occurred, is ongoing or is about to occur, the CLO must take all reasonable steps to cause the issuer to respond appropriately and must advise the reporting attorney; if the issuer has created a QLCC before a material violation has been reported, the CLO may refer the request to the QLCC, rather than taking ongoing responsibility for the inquiry.ⁿ⁶¹

After an attorney reports a material violation to a CLO in a company without a QLCC, if the CLO or CEO provides an appropriate and timely response the reporting attorney's duties under the attorney-conduct rules are satisfied. If the reporting attorney does not reasonably believe the response is appropriate and reasonably timely, though, he or she must report the material violation "up the ladder":

- (i) to the audit committee of the issuer's board of directors;
- (ii) if the issuer's board of directors does not have an audit committee, to another committee of the issuer's board of directors consisting solely of outside directors; or
- (iii) if the issuer's board of directors does not have a committee consisting solely of non-employee directors, to the issuer's board of directors.

A duly qualified QLCC is a committee (which also may be an audit or other committee)ⁿ⁶² consisting of at least one member of the issuer's audit committee (or if the issuer has no audit committee, one member from an equivalent committee of independent directors) and two or more additional outside directors that meets certain procedural requirements.ⁿ⁶³

Thus, one way or the other, the audit committee may become involved in issues arising as a result of the SEC attorney-conduct rules: some companies may designate the audit committee as a QLCC (and, even if a company decides to establish a separate committee, at least one audit committee member may be on it) or else the audit committee may become the recipient of "up-the-ladder" reports of evidence of material violations that are not timely and satisfactorily handled at a lower level.

[iii] Audit Committee's Role in Risk Management

The audit committee also has oversight responsibility in the area of risk management, broadly defined. The NYSE 2003 corporate governance rules require audit committees to "discuss policies with respect to risk assessment and risk management ...".ⁿ⁶⁴ The NYSE's commentary goes on to explain:

While it is the job of the CEO and senior management to assess and manage the listed company's exposure to risk, the audit committee must discuss guidelines and policies to govern the process by which this is handled. The audit committee should discuss the listed company's major financial risk exposures and the steps management has taken to monitor and control such exposures. The audit committee is not required to be the sole body responsible for risk assessment and management, but, as stated above, the committee must discuss guidelines and policies to govern the process by which risk assessment and management is undertaken. Many companies, particularly financial companies, manage and assess their risk through mechanisms other than the audit committee. The processes these companies have in place should be reviewed in a general manner by the audit committee, but they need not be replaced by the audit committee.n65

This is a broad mandate, since risk has many dimensions. In its narrowest sense, the field of risk management has traditionally been understood to encompass the activity of purchasing insurance and managing the company's insurance program to protect the company's assets and the value of the company's business against the economic consequences of fortuitous catastrophic losses and liabilities. More recently, particularly in the wake of the financial crisis that unfolded in 2008, the field of risk management has been viewed in a broader perspective as the process of identifying and managing all major risks to the company--not only traditional catastrophic risk but, for example, financial and even reputational risks, as well, and not only through the purchase of insurance.n66

At a minimum the audit committee's mandate to understand the company's risks and oversee risk management implies that, in companies with professional risk managers (as there are in many large companies these days), the risk manager should meet periodically with the audit committee to review the company's total risk profile and risk management program. In companies without professional risk managers, the issue of risk management should be at least a periodic (for example, annual) agenda item for the audit committee. Members of management (such as the CFO or the head of internal audit) may make their own risk management presentations to the audit committee and they may also wish to bring in outside risk management consultants to address the committee. Although the audit committee has an integral role to play in overseeing risk management, it performs this responsibility in close coordination with the company's professional risk managers, if any, and the company's management, other board committees (*e.g.*, a separate risk committee if the company has one) and the full board. Steps that the audit committee, another appropriate committee or the full board can take to assess risk and satisfy itself that the company's management has conducted an appropriate risk analysis include:

- determining whether the audit committee or the board possesses the expertise needed to understand risks facing the company;
- confirming that management is providing the audit committee and the board with the information it needs to evaluate management's handling of risk;
- confirming that management has an effective process in place to identify, manage, and assess risks;
- confirming that any guidance given to management is aligned with the company's strategy and risk appetite;
- meeting privately with chief risk officer, if any, chief compliance officer, and other senior managers who have insight into the risks facing the company;
- evaluating management's assessment of the risk implications of any new corporate undertaking,

such as an acquisition or a new line of business, and the steps they are proposing to address those risks;

- evaluating with management whether the audit committee or the board is comfortable with the level of risk that management is taking;
- assessing the company's credit and counterparty risks and liquidity risks; and
- treating risk assessment and risk management as an ongoing responsibility and continuously look for warning signs.

[iv] Audit Committee Disclosure Requirements

A U.S. public company must include certain information relating to the audit committee in its annual proxy statement.ⁿ⁶⁷

The company must state in its annual proxy statement whether it has a separately-designated standing audit committee established in accordance with the Exchange Act, or a committee performing similar functions, and it must identify each member of such committee, state the number of meetings it held during the last fiscal year and briefly describe its functions.ⁿ⁶⁸ The company must also state whether or not the audit committee has a charter and, if so, provide the web address where it may be accessed online or include a copy as an appendix to the proxy statement, unless a copy has been included as an appendix to the registrant's proxy statement within the registrant's past three fiscal years.ⁿ⁶⁹

If the listing standards applicable to the company contain independence requirements for audit committees, then the company must identify each member of the audit committee that is not independent under such standards, disclose the nature of the relationship that makes such individual not independent and the reasons such person was nonetheless appointed to the audit committee.ⁿ⁷⁰

The company must also state that the board has made a determination as to whether the audit committee does or does not have at least one financial expert.ⁿ⁷¹ If it states that the audit committee *does* have a financial expert, the company must disclose the name of such expert and whether or not that person is independent (as independence is defined in the listing standards applicable to the company). If it states that the audit committee *does not* have a financial expert, the company must explain why this is the case.ⁿ⁷²

In the annual proxy statement, the audit committee must state:ⁿ⁷³

- (1) whether the audit committee has reviewed and discussed the audited financial statements with management;
- (2) whether the audit committee has discussed with the independent auditors the matters required to be discussed by SAS 61 (Codification of Statements on Auditing Standards, AU § 380), as amended;ⁿ⁷⁴
- (3) whether the audit committee has received the written disclosures and the letter from the independent accountants required the Public Company Accounting Oversight Board and has discussed with the independent accountant the independent accountant's independence; and
- (4) whether, based on the review and discussions referred to above, the audit committee recommended to the Board of Directors that the audited financial statements be included in the company's Annual Report on Form 10-K (or, for registered closed-end investment companies, the annual report to shareholders required by Section 30(e) of the Investment Company Act of 1940) for the last fiscal year for filing with

the Commission.

The name of each member of the company's audit committee (or, in the absence of an audit committee, the board committee performing equivalent functions or the entire board of directors) must appear below the body of the report.ⁿ⁷⁵

Investment companies registered under the Investment Company Act of 1940,ⁿ⁷⁶ need not provide the information listed above but must furnish the information required by Item 22(b) of Schedule 14A.ⁿ⁷⁷

In addition, the issuer is required to make a series of disclosures in its proxy statement relating to fees paid to independent accountants for various classes of services and audit committee approval of audit and non-audit services provided by independent accountants. In particular, the issuer is required to:

(1) disclose, under the caption "Audit Fees," the aggregate fees billed by the principal accountant for each of the last two fiscal years for the audit of the registrant's annual financial statements and review of quarterly financial statements included in the registrant's Form 10-Q or 10-QSB or services normally provided by the accountant in connection with statutory and regulatory filings or engagements for those fiscal years;ⁿ⁷⁸

(2) disclose, under the caption "Audit-Related Fees," the aggregate fees billed by the principal accountant in each of the last two fiscal years for assurance and services that are reasonably related to the performance of the audit or review of the registrant's financial statements and are not reported under "Audit Fees," and a description of the nature of such services;ⁿ⁷⁹

(3) disclose, under the caption "Tax Fees," the aggregate fees billed by the principal accountant in each of the last two fiscal years for professional services rendered for tax compliance, tax advice, and tax planning, and a description of the nature of such services;ⁿ⁸⁰

(4) disclose, under the caption "All Other Fees," the aggregate fees billed in each of the last two fiscal years for products and services provided by the principal accountant, other than the services reported under the captions mentioned in [subparagraphs (1)-(3), above], and a description of the nature of such services;ⁿ⁸¹

(5) disclose the audit committee's pre-approval policies and procedures;ⁿ⁸²

(6) disclose the percentage of services described in each of [subparagraphs (2) through (4) above] that were approved by the audit committee pursuant to *17 CFR 210.2-01(c)(7)(i)(C)*;ⁿ⁸³

(7) if greater than 50 percent, disclose the percentage of hours expended on the principal accountant's engagement to audit the registrant's financial statements for the most recent fiscal year that were attributed to work performed by persons other than the principal accountant's full-time, permanent employees;ⁿ⁸⁴

(8) if the registrant is an investment company, disclose the aggregate non-audit fees billed by the registrant's accountant for services rendered to the registrant, and to the registrant's investment adviser (not including any subadviser whose role is primarily portfolio management and is subcontracted with or overseen by another investment adviser), and any entity controlling, controlled by, or under common control with the adviser that provides ongoing services to the registrant for each of the last two fiscal years of the registrant;ⁿ⁸⁵ and

(9) if the registrant is an investment company, disclose whether the audit committee of the board of directors has considered whether the provision of non-audit services that were rendered to the registrant's investment adviser (not including any subadviser whose role is primarily portfolio management and is subcontracted with or overseen by another investment adviser), and any entity controlling, controlled by, or under common control with the investment adviser that provides ongoing services to the registrant that were not pre-approved pursuant to *17 CFR 210.2-01(c)(7)(ii)* is compatible with maintaining the principal accountant's independence.ⁿ⁸⁶

In its annual report on Form 10-K, the company must disclose "(i) ... the audit committee's pre-approval policies and procedures described in paragraph (c)(7)(i) of Rule 2-01 of Regulation S-X ... [and (ii)] the percentage of services described in each of Items 9(e)(2) through 9(e)(4) of Schedule 14A that were approved by the audit committee pursuant to paragraph (c)(7)(i)(C) of Rule 2-01 of Regulation S-X."ⁿ⁸⁷

[3] Other Audit Committee Best Practices Recommendations

[a] Initial Orientation and Continuing Education

Especially in view of the increase in audit committee responsibilities brought about by the 2003 corporate governance reforms, influential business groups and others have emphasized the importance of both a formal initial orientation and continuing education for audit committee members.ⁿ⁸⁸ There are a number of commercial and not-for-profit organizations that offer seminars for audit committee members. In addition, several vendors now offer online training modules for audit committee members.

[b] Audit Committee Agenda and Meetings

There is no rule or best practice standard prescribing a specific number of audit committee meetings required, but the minimum number necessary to discharge the audit committee's responsibilities in U.S. companies is generally four (at least one in connection with each quarterly SEC filing and earnings announcement) with most audit committees holding between six and eight meetings per year.ⁿ⁸⁹

The Audit Committee Responsibilities Calendar and Checklist, reproduced in Appendix 9-B to this chapter, is a useful tool for preparing audit committee meeting agendas and allocating the audit committee's responsibilities throughout the year. A typical calendar and/or checklist addresses the items that the audit committee expects to address throughout the year and the frequency with which it expects to address them. While drawn from the audit committee charter, the responsibilities included in a calendar/checklist typically provide additional detail beyond that included in the charter, including in some instances, best-practices recommendations. The Calendar and Checklist can be used to plan the number of audit committee meetings suitable for the user's purposes and to compile the agendas for each meeting. At the same time, it also serves as a checklist to ensure that the duties and responsibilities set forth in the audit committee's charter will be covered at the committee meetings scheduled throughout the year.

It has become accepted practice for audit committees to meet separately, in executive session, with the head of internal audit and with the external auditors.ⁿ⁹⁰ Indeed, audit committees of NYSE-listed companies are required to "meet separately, periodically, with management, with internal auditors (or other personnel responsible for the internal audit function) and with independent auditors" and to "review with the independent auditor any audit problems or difficulties and management's response."ⁿ⁹¹ In addition, the ABA Task Force on Corporate Responsibility recommends that the general counsel meet separately in executive session with outside directorsⁿ⁹² and, for many companies, the audit committee meeting may be a logical forum for such executive sessions.ⁿ⁹³

[c] Time Commitment and Audit Committee Compensation

With the requirements added (in some cases) and clarified and made explicit (in other cases) by the corporate

governance reforms of 2003 (including the SEC rules relating to audit committees and the SRO corporate governance listing requirements), it is clearer than ever that, to discharge their duties properly, audit committee members must make a significant time commitment.ⁿ⁹⁴ The NYSE cautions that, "[b]ecause of the audit committee's demanding role and responsibilities, and the time commitment attendant to committee membership, each prospective audit committee member should evaluate carefully the existing demands on his or her time before accepting this important assignment."ⁿ⁹⁵

The NYSE endorsed the payment of "additional directors' fees to compensate audit committee members for the significant time and effort they expend to fulfill their duties as audit committee members" ⁿ⁹⁶ Since the new audit committee requirements came into effect, audit committee meeting fees have risen considerably, and now tend to be significantly higher than fees for other board committee meetings.ⁿ⁹⁷

(n10)Footnote 10. *See, e.g.*, Sarbanes-Oxley § 204, adding Section 10A(k) to the 1934 Act, 15 U.S.C. § 78j-1; 17 CFR § 210.2-07; NYSE Listed Company Manual § 303A.07(c)(iii)(B); AICPA, Statement on Auditing Standards Nos. 61, 90. These rules are discussed in detail in § 9.04[2][a][iv] below.

(n11)Footnote 11. Even before the advent of the new certification requirements under Sarbanes-Oxley, directors who signed materially false or misleading SEC filings on which investors relied were liable under Section 10(b) of the 1934 Act and *Rule 10b-5* thereunder. *See, e.g.*, Howard v. Everex Systems, Inc., 228 F.3d 1057, 1061 (9th Cir. 2000) (citing *AUSA Life Ins. Co. v. Dwyer*, 928 F. Supp. 1239 (S.D.N.Y. 1996) for the proposition that a director, acting with the requisite level of scienter, who signs a fraudulent Form 10-K can be liable as a primary violator of Section 10(b) of the 1934 Act for making a false statement; reasonable reliance on others with primary responsibility for reviewing and ensuring the integrity of the financial statements could make it more difficult for a plaintiff to establish scienter on the part of directors who signed the Annual Report on Form 10-K).

(n12)Footnote 12. 17 CFR § 210.2-07. This rule does not apply to Asset-Backed Issuers, as defined in 17 CFR §§ 240.13a-14(g) and 240.15d-14(g), or investment companies registered under Section 8 of the Investment Company Act of 1940, 15 U.S.C. § 80a-8, other than a unit investment trust as defined by Section 4(2) of the Investment Company Act of 1940, 15 U.S.C. § 80a-4(2).

(n13)Footnote 13. Auditing Standards Board, AICPA, Statement on Auditing Standards No. 114, The Auditor's Communication with Those Charged with Governance (superseding Statement on Auditing Standards 61).

(n14)Footnote 14. 17 CFR § 229.407(d)(3)(B). Note that, as of the date of this writing, this section of the regulations has not been updated to reflect the replacement of Statement on Auditing Standards 61 with Statement on Auditing Standards 114, but must now be interpreted to refer to the latter.

(n15)Footnote 15. When, at the end of 2006, to follow newly emerging international standards, the AICPA replaced Statement on Auditing Standards 61 with SAS 114, it changed the required recipient of such communications from the audit committee to "those charged with governance." For a U.S. public company, of which the board audit committee must be comprised entirely of independent directors, "those charged with governance" for purposes of the SAS 114 communications will normally remain the board audit committee.

(n34)Footnote 34. *17 CFR § 210.2-01(c)(7)(i)(A)-(C)*.

(n35)Footnote 35. Sarbanes-Oxley and the regulations thereunder include a specific list of non-audit services that an outside accountant may not provide to the issuer and still remain independent. These are:

(i) bookkeeping or other services related to the accounting records or financial statements of the audit client;

(ii) financial information systems design and implementation;

(iii) appraisal or valuation services, fairness opinions, or contribution-in-kind reports;

(iv) actuarial services (unless it is reasonable to conclude that the results of these services will not be subject to audit procedures during an audit of the audit client's financial statements);

(v) internal audit outsourcing services;

(vi) management functions (including acting, temporarily or permanently, as a director, officer, or employee of an audit client, or performing any decision-making, supervisory, or ongoing monitoring function for the audit client);

(vii) human resources services (including recruiting, testing, reference-checking, negotiating terms or conditions of employment and recommending, or advising the audit client to hire, a specific candidate for a specific job (except that an accounting firm may, upon request by the audit client, interview candidates and advise the audit client on the candidate's competence for financial accounting, administrative, or control positions);

(viii) broker-dealer, investment adviser, or investment banking services;

(ix) legal services; and

(x) expert services unrelated to the audit (such as expert witnessing).

17 CFR § 210.2-01(c)(4).

(n36)Footnote 36. Sarbanes-Oxley Act § 202, adding 1934 Act § 10A(i)(3), 15 U.S.C. § 78-j-1(i)(3).

(n37)Footnote 37. *17 CFR § 210.2-01(c)(7)(i)(C)(2).*

(n38)Footnote 38. *17 CFR § 210.2-01(c)(7)(i)(C)(1)*, (3). The non-audit engagements of the independent accountants for a registered investment company must be pre-approved not only by its audit committee but also by the registered investment company's investment adviser (not including a sub-adviser whose role is primarily portfolio management and is sub-contracted or overseen by another investment adviser) and any entity controlling, controlled by, or under common control with the investment adviser that provides ongoing audit or non-audit services to the registered investment company, if the engagement relates directly to the operations and financial reporting of the registered investment company. In connection with such an engagement, the *de minimis* exception to the pre-approval requirement applies only if, during the fiscal year in which the services are provided, the payments for all services provided amount to no more than five percent of the total payments to the registered investment company's accountant by the registered investment company, its investment adviser and any entity controlling, controlled by, or under common control with the investment adviser that provides ongoing services to the registered investment company that would have to be pre-approved by the registered investment company's audit committee pursuant to *17 CFR § 210.2-01* (and only if the engagement meets the other two requirements of the *de minimis* exception, as well). *17 CFR § 210.2-01(c)(7)(ii).*

(n39)Footnote 39. PCAOB Rule 3524, "Audit Committee Pre-Approval of Certain Tax Services," available at http://www.pcaobus.org/Rules/Rules_of_the_Board/index.aspx. For audit committees that pre-approve non-audit services pursuant to policies and procedures, this rule does not apply to any such tax service commenced on or before April 19, 2007. See Order Approving Proposed Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees and Notice of Filing and Order Granting Accelerated Approval of the Amendment Delaying Implementation of Certain of these Rules, SEC Release 34-53677, April 19, 2006, available at <http://www.sec.gov/rules/pcaob.shtml>, at pp. 10-11.

NYSE Listed Company Manual § 303A.07(c)(i)(A); see also Business Roundtable, Principles of Corporate Governance 18 (May 2002), available at <http://www.businessroundtable.org/pdf/704.pdf> and reproduced in Appendix A to this treatise ("Unless the full board or another committee does so, the audit committee should review the corporation's procedures addressing compliance with the law and important corporate policies, including the corporation's code of ethics or code of conduct.").

(n54)Footnote 54. But see § 13.02[2][b][iii] below for discussion of federal sentencing guidelines definition of an effective compliance program.

(n55)Footnote 55. See ABA Task Force Corporate Responsibility Report, Recommended Corporate Governance Practice VI.9., at 70-71, *59 Bus. Law. 145, 184-85 (2003)* ("The board of directors should charge a committee composed exclusively of independent directors (such as an audit committee or a legal compliance committee) with responsibility to obtain and evaluate regular reports from the corporate officers responsible for implementing the corporation's internal controls, codes of ethics and compliance policies, including general counsel, the chief financial officer, the chief internal auditor and the chief compliance officer, on legal and compliance affairs of the corporation, including, at a minimum, information about violations or potential violations of law and breaches of fiduciary duty by an executive officer or director that could have a material adverse effect on the corporation."); see also Business Roundtable, Principles of Corporate Governance 19 (May 2002) ("[T]he audit committee should provide a channel of communication to the board for the outside auditor and internal auditors and may also meet with and receive reports from finance officers, compliance officers and the general counsel."); The Conference Board, Commission on Public Trust and Private Enterprise, Findings and Recommendations, Part 3 Audit and Accounting, Principle III, Specific Best Practice Suggestion No. 3, at 39 (Jan. 9, 2003) ("The internal auditor should have a direct line of communication and

reporting responsibility to the audit committee, and he or she should attend all regularly scheduled audit committee meetings ... and meet with the audit committee in executive session.").

(n56)Footnote 56. *See* § 13.02[2][c] below for discussion of the *Caremark* decision, which considered the responsibility of directors with respect to the oversight of legal and regulatory compliance systems.

(n57)Footnote 57. *See, e.g.,* ABA Task Force Corporate Responsibility Report, Recommended Corporate Governance Policy IV.7.b., at 32, *59 Bus. Law. 145, 161 (2003)* (recommending that public company boards provide for regular meetings in executive session of a committee of independent directors and the general counsel "to communicate concerns regarding legal compliance matters, including potential or ongoing material violations of law by, and breaches of fiduciary duty to, the corporation"). While the ABA Task Force recommendation does not specify that the committee of independent directors that meets with the general counsel in executive session must be the audit committee, that would be a sensible allocation of responsibility, in view of the audit committee's responsibility to assist with board oversight of compliance with legal and regulatory requirements. *See also* ABA Task Force Corporate Responsibility Report, Recommended Corporate Governance Practice VI.9., at 70-71, *59 Bus. Law. 145, 184-85 (2003)* ("The board of directors should charge a committee composed exclusively of independent directors (such as an audit committee or a legal compliance committee) with responsibility to obtain and evaluate regular reports from the corporate officers responsible for implementing the corporation's internal controls, codes of ethics and compliance policies, including general counsel ...").

(n58)Footnote 58. *See* § 14.07[3] below, discussing the attorney-conduct rules at greater length.

(n59)Footnote 59. "Appearing and practicing before the Commission" includes: transacting any business with the Commission, including communications in any form; representing an issuer in an SEC administrative proceeding or in connection with an SEC investigation, inquiry, information request, or subpoena; providing advice on U.S. securities laws or SEC rules and regulations regarding documents that the attorney has notice will be filed, submitted or incorporated by reference into a filing with the SEC; or advising an issuer regarding whether information or a statement, opinion or other writing is required under U.S. securities laws or SEC rules and regulations. *17 CFR § 205.2*.

(n60)Footnote 60. "Evidence of a material violation" means credible evidence, based upon which it would be unreasonable, under the circumstances, for a prudent and competent attorney not to conclude that it is reasonably likely that a material violation has occurred, is ongoing, or is about to occur; this includes material violations of federal or state securities laws, a material breach of fiduciary duty arising under U.S. federal or state law, or a similar material violation of any federal or state law. *17 CFR § 205.2*.

(n61)Footnote 61. *17 CFR § 205.3*.

(n62)Footnote 62. Very few companies, however, have designated the audit committee as a QLCC.

(n63)Footnote 63. The QLCC must have adopted written procedures for the confidential receipt, retention, and consideration of any report of evidence of a material violation under the new rules. In addition, the committee must have been duly established by the board of directors, with the authority and responsibility: (i) to inform the issuer's CLO and CEO of any report of evidence of a material violation; (ii) to determine whether an investigation is necessary regarding any report of evidence of a material violation by the issuer, its officers, directors, employees or agents and, (iii) if it determines an investigation is necessary or appropriate, to pursue any of the following courses of action:

- notifying the audit committee or the full board of directors;
- initiating an investigation, which may be conducted either by the CLO (or the equivalent thereof) or by outside attorneys;

- retaining such additional expert personnel as the committee deems necessary.

The QLCC must also be authorized, at the conclusion of any such investigation, to

- recommend, by majority vote, that the issuer implement an appropriate response to evidence of a material violation; and
- inform the CLO and the CEO and the board of directors of the results of any investigation and the appropriate remedial measures to be adopted.

Finally, the QLCC must have the authority and responsibility, acting by majority vote, to take all other appropriate action, including the authority to notify the SEC in the event that the issuer fails in any material respect to implement an appropriate response that the QLCC has recommended to the issuer. *17 CFR § 205.2(k)*.

[9-A] Sample Audit Committee Charter for New York Stock Exchange Company

AUDIT COMMITTEE CHARTER

[Note: This is a comprehensive draft that is intended to include all duties and responsibilities that best practices dictate.]

1. *Members.* The Board of Directors appoints an Audit Committee of at least three members, consisting entirely of independent directors and designates one member as chairperson or delegates the authority to designate a chairperson to the Audit Committee. Members of the Audit Committee are appointed by the Board of Directors upon the recommendation of the Nominating and Corporate Governance Committee. For purposes hereof, the term "independent" shall mean a director who meets the New York Stock Exchange ("NYSE") standards of independence for directors and audit committee members, as determined by the Board.

Each member of the Audit Committee must be financially literate, as determined by the Board. [In addition, at least one member of the Committee must be an "audit committee financial expert," as determined by the Board in accordance with Securities and Exchange Commission ("SEC") rules]. **OR** [In addition, at least one member of the Committee must have accounting or related financial management expertise, as determined by the Board].

2. *Purpose, Duties, and Responsibilities.*

The purpose of the Audit Committee, at a minimum, must be to:

- represent and assist the Board of Directors in discharging its oversight responsibility relating to: (i) the accounting, reporting, and financial practices of the Company and its subsidiaries, including the integrity of the Company's financial statements; (ii) the surveillance of administration and financial controls and the Company's compliance with legal and regulatory requirements; (iii) the outside auditor's qualifications and independence; and (iv) the performance of the Company's internal audit function and the Company's outside auditor; and
- prepare the report required by the rules of the SEC to be included in the Company's annual proxy statement.

Among its specific duties and responsibilities, the Audit Committee shall:

(i) Be directly responsible, in its capacity as a committee of the Board, for the appointment, compensation, retention and oversight of the work of the outside auditor. In this regard, the Audit Committee shall appoint and retain, [subject to ratification by the Company's stockholders], compensate, evaluate, and terminate, when appropriate, the outside auditor, which shall report directly to the Audit Committee.

(ii) Obtain and review, at least annually, a report by the outside auditor describing: (A) the outside auditor's internal quality-control procedures; and (B) any material issues raised by the most recent internal quality-control review, or peer review, or by any inquiry or investigation by governmental or professional authorities, within the preceding five years, respecting one or more independent audits carried out by the outside auditor, and any steps taken to deal with any such issues.

(iii) Approve in advance all audit and permissible non-audit services to be provided by the outside auditor, and establish policies and procedures for the pre-approval of audit and permissible non-audit services to be provided by the outside auditor.

(iv) Consider, at least annually, the independence of the outside auditor, including whether the outside auditor's performance of permissible non-audit services is compatible with the auditor's independence, and obtain and review a report by the outside auditor describing any relationships between the outside auditor and the Company and any other relationships that may adversely affect the independence of the auditor.

(v) Review and discuss with the outside auditor: (A) the scope of the audit, the results of the annual audit examination by the auditor, and any problems or difficulties the auditor encountered in the course of its audit work and management's response; and (B) any reports of the outside auditor with respect to interim periods.

(vi) Review and discuss with management and the outside auditor the annual audited and quarterly financial statements of the Company, including: (A) an analysis of the auditor's judgment as to the quality of the Company's accounting principles, setting forth significant financial reporting issues and judgments made in connection with the preparation of the financial statements; (B) the Company's disclosures under "Management's Discussion and Analysis of Financial Condition and Results of Operations," including accounting policies that may be regarded as critical; and (C) major issues regarding the Company's accounting principles and financial statement presentations, including any significant changes in the Company's selection or application of accounting principles and financial statement presentations.

(vii) Recommend to the Board based on the review and discussion described in paragraphs (iv) - (vi) above, whether the financial statements should be included in the Annual Report on Form 10-K.

(viii) Receive reports from the outside auditor and management regarding, and review and discuss the adequacy and effectiveness of, the Company's internal controls, including any significant deficiencies in internal controls and significant changes in internal controls reported to the Audit Committee by the outside auditor or management.

(ix) Receive reports from management regarding, and review and discuss the adequacy and effectiveness of, the Company's disclosure controls and procedures.

(x) Review and discuss with the principal internal auditor of the Company the scope and results of

the internal audit program.

(xi) Review and discuss earnings press releases, and corporate practices with respect to earnings press releases and financial information and earnings guidance provided to analysts and ratings agencies.

(xii) Review and discuss the Company's practices with respect to risk assessment and risk management.

(xiii) Oversee the Company's compliance systems with respect to legal and regulatory requirements and review the Company's codes of conduct and programs to monitor compliance with such codes.

(xiv) Establish procedures for handling complaints regarding accounting, internal accounting controls and auditing matters, including procedures for confidential, anonymous submission of concerns by employees regarding accounting and auditing matters.

(xv) Establish policies for the hiring of employees and former employees of the outside auditor.

(xvi) Annually evaluate the performance of the Audit Committee and assess the adequacy of the Audit Committee charter.

3. *Outside Advisors.* The Audit Committee shall have the authority to retain such outside counsel, accountants, experts and other advisors as it determines appropriate to assist it in the performance of its functions and shall receive appropriate funding, as determined by the Audit Committee, from the Company for payment of compensation to any such advisors.

4. *Meetings.* The Audit Committee shall meet at least four times per year, either in person or telephonically, and at such times and places as the Audit Committee shall determine. The Audit Committee shall meet separately in executive session, periodically, with each of management, the principal internal auditor of the Company, [and] the outside auditor [and the general counsel]. The Audit Committee shall report regularly to the full Board of Directors with respect to its activities. The majority of the members of the Audit Committee shall constitute a quorum.

CHAPTER 10 THE COMPENSATION COMMITTEE *

1-10 Corporate Governance: Law and Practice § 10.01

AUTHOR: Bart SchwartzAmy GoodmanSean Feller

§ 10.01 Rise of the Compensation Committee

The role of board compensation committees has featured in reported cases concerning the propriety of corporate transactions at least since the early 1960s.ⁿ¹ Throughout the 1970s and 1980s, compensation committee issues were repeatedly litigated in shareholder derivative actions and other lawsuits claiming waste of corporate assets, management entrenchment, securities law violations and breaches of fiduciary duties.ⁿ²

In the early 1990s, the role of the compensation committee took on added and more formal legal significance, largely as a result of two developments:

- the adoption in 1992 of federal securities regulations requiring new proxy statement disclosures about executive compensation and the compensation committee;ⁿ³ and
- the enactment in 1993 of *Section 162(m) of the Internal Revenue Code* ("IRC"), eliminating the corporate income tax deduction for compensation over \$1 million paid to the chief executive officer and the other four most highly compensated executive officers whose compensation is required to be disclosed under the Securities Exchange Act of 1934 (the "1934 Act" or the "Exchange Act"), with certain important exceptions.

The first set of these regulations dealt with disclosure obligations and made the work of the compensation committee highly visible to the investing public (and others); the second set--dealing with tax deductibility to the employer of certain executive compensation--had considerable substantive significance for the composition and proceedings of compensation committees, as discussed *below*.

In 2003, the composition and proceedings of the compensation committee became the subject of new corporate governance listing standards of the New York Stock Exchange (the "NYSE"), the NYSE Amex (previously the American Stock Exchange (the "Amex") and the NASDAQ Stock Market (the "NASDAQ" and collectively with the NYSE and the Amex, the "SROs"), and of new best practice guidelines published by a number of influential organizations. Starting the same year, the work of the compensation committee came under intense public and judicial scrutiny in several highly publicized cases.

In 2006, the SEC adopted comprehensive new regulations prescribing extensive and detailed requirements for the disclosure not only of executive compensation and related-party transactions but of the processes of board compensation committees and of companies' procedures for approval of related-party transactions.ⁿ⁴

In October 2008, the U.S. government passed the Emergency Economic Stabilization Act of 2008 ("EESA") and the Troubled Asset Relief Program ("TARP") thereunder (Public Law No: 110-343), and in February 2009, the U.S. government passed the American Recovery and Reinvestment Act of 2009 (Public Law No: 111-5) ("ARRA," and together with EESA, TARP, and the guidance issued in connection therewith, the "Stimulus Programs") as a part of the government's efforts to address the U.S financial crisis. The Stimulus Programs impose new requirements on the compensation committees of participating companies.

§ 10.02 Nature of Legal Requirements for Board Compensation Committees

As a result of the developments mentioned above, the stock exchange rules now provide specific structural and procedural requirements for board compensation committees of listed companies. In addition, partly as a result of corporate governance ratings and scores that became popular after the enactment of the Sarbanes-Oxley Act of 2002ⁿ¹ (the "Sarbanes-Oxley Act" or "Sarbanes-Oxley"), companies have become increasingly aware of and attuned to best-practices recommendations and guidelines for board compensation committees.

Post-Enron judicial decisions tend to reinforce the basic duties of board compensation committees, which are no different from the basic duties of other directors. Nevertheless, along with other developments described in this chapter, they also tend to make the work of compensation committees more visible than they had been in the past and they hold up "best practices" standards for such committees. The fundamental duties of loyalty and due care apply to board compensation committee members as they do to other directors, and the business judgment rule plays the same role in the defense of challenged actions of board compensation committees as it does in connection with other board decisions.ⁿ² Nevertheless, the scrutiny with which courts have examined issues of compensation committee independence and procedure has become more intense, resulting in increased pressures on board compensation committees and making good order and procedure for board compensation committees more important than ever before.

§ 10.03 Scrutiny of Compensation Committee Proceedings

[1] Cases Focusing on Compensation Committee Proceedings

After the passage of Sarbanes-Oxley, influential jurists began to signal their intent to look more closely at the proceedings of board compensation committees. In a January 2003 panel discussion (moderated by Charles M. Elson, the head of the University of Delaware's Center for Corporate Governance), Delaware Chief Justice E. Norman Veasey presaged the coming shift in the approach of the Delaware courts generally in cases involving challenged actions of public company directors and specifically with regard to the proceedings of board compensation committees:

Elson: "One regulatory body that has existed forever is the courts. Should we be looking to the courts for guidance on these issues? Chief Justice Veasey "I do think the changes in corporate governance that we're seeing through the voluntary best practices codes, for example, or through the New York Stock Exchange listing requirements have created a new set of expectations for directors. And that is changing how courts look at these issues. In particular, I urge you to read our opinion in the Disney case, which ties in with some of the things that have been said here

... .

[I]f directors claim to be independent by saying, for example, that they base decisions on some performance measure and don't do so, or if they are disingenuous or dishonest about it, it seems to me that the courts in some circumstances could treat their behavior as a breach of the fiduciary duty of good faith. I would urge boards of directors to demonstrate their independence, hold executive sessions, and follow governance procedures sincerely and effectively, not only as a guard against the intrusion of the federal government but as a guard against anything that might happen to them in court from a properly presented complaint. Compensation committees should have their own advisers and lawyers. Directors who are supposed to be independent should have the guts to be a pain in the neck and act independently."n1

Chief Justice Veasey was referring to a case challenging severance compensation paid to Michael Ovitz, the former president of the Walt Disney Company. Plaintiffs had brought a shareholders' derivative action for breach of fiduciary

duties, waste of corporate assets and other claims challenging the decisions of the board of directors of the Walt Disney Company (1) to approve the hiring of Michael Ovitz as president of the company under a contract providing severance terms that turned out to be extremely lucrative (as well as other terms and conditions that the plaintiffs criticized as being inimical to the company's best interests), and (2) later (after the board was reconstituted) to agree to a "no-fault" termination of Ovitz's employment, triggering total severance payments allegedly amounting to over \$140 million (including gains on stock options).

In the early stages of the litigation, the chancery court had granted defendants' motion to dismiss the shareholders' derivative complaint for lack of a pre-suit demand on the Disney board of directors, rejecting plaintiffs' argument of demand futility. Reviewing the ruling *de novo*, the Delaware Supreme Court (in a decision that will be referred to here as "*Disney I*") affirmed the dismissal in part but remanded the case to permit the plaintiffs to file an amended complaint. The Delaware Supreme Court took the opportunity to express its concerns about the merits of the challenged decisions and to criticize the proceedings of the Disney's board:

This is potentially a very troubling case on the merits. On the one hand, it appears from the Complaint that: (a) the compensation and termination payout for Ovitz were exceedingly lucrative, if not luxurious, compared to Ovitz' value to the Company; and (b) the processes of the boards of directors in dealing with the approval and termination of the Ovitz Employment Agreement were casual, if not sloppy and perfunctory From what we can ferret out of this deficient pleading, the processes of the Old Board and the New Board were hardly paradigms of good corporate governance practices. Moreover, the sheer size of the payout to Ovitz, as alleged, pushes the envelope of judicial respect for the business judgment of directors in making compensation decisions

But our concerns about lavish executive compensation and our institutional aspirations that boards of directors of Delaware corporations live up to the highest standards of good corporate practices do not translate into a holding that these plaintiffs have set forth particularized facts excusing a pre-suit demand under our law and our pleading requirements.ⁿ²

The court explained that the gravamen of the claim that the Disney board had breached its duty of care, thereby excusing pre-suit demand, was the allegation that the board had failed to inform itself of material facts:

The Complaint ... alleges that the Old Board failed properly to inform itself about the total costs and incentives of the Ovitz Employment Agreement, especially the severance package. This is the key allegation related to this issue on appeal The Complaint alleges, however, that the Old Board had been advised by a corporate compensation expert, Graef Crystal, in connection with its decision to approve the Ovitz Employment Agreement

... One of the charging paragraphs of the Complaint concludes:

"57. As has been conceded by Graef Crystal, the executive compensation consultant who advised the Old Board with respect to the Ovitz Employment Agreement, the Old Board *never* considered the costs that would be incurred by Disney in the event Ovitz was terminated from the Company for a reason other than cause prior to the natural expiration of the Ovitz Employment Agreement."ⁿ³

Before addressing whether the well-pleaded allegations of the complaint overcame the presumptive protection of the business judgment rule, thereby excusing pre-suit demand, the Delaware Supreme Court was careful to distinguish (a) the board's apparent failure to follow good corporate governance practices, from (b) alleged breaches of directors' fiduciary duties:

This is a case about whether there should be personal liability of the directors of a Delaware corporation to the corporation for lack of due care in the decision-making process and for waste of

corporate assets. This case is not about the failure of the directors to establish and carry out ideal corporate governance practices.

All good corporate governance practices include compliance with statutory law and case law establishing fiduciary duties. But the law of corporate fiduciary duties and remedies for violation of those duties are distinct from the aspirational goals of ideal corporate governance practices. Aspirational ideals of good corporate governance practices for boards of directors that go beyond the minimal legal requirements of the corporation law are highly desirable, often tend to benefit stockholders, sometimes reduce litigation and can usually help directors avoid liability. But they are not required by the corporation law and do not define standards of liability.ⁿ⁴

Noting that the board was entitled to rely on the opinion of its compensation consultant that the contract was proper, despite his later after-the-fact criticism of the contract and of his own performance, the Delaware Supreme Court rejected the argument that the complaint sufficiently alleged that the Disney board had breached its duty of care by failing to inform itself of all reasonably available material facts.ⁿ⁵

More than three years later, on May 28, 2003 (in a decision that will be referred to here as "*Disney II*"), Chancellor Chandler ruled on a motion to dismiss the second amended complaint in the same case.ⁿ⁶ This time, on a more developed factual record, the court concluded that the allegations of the complaint were sufficient to withstand a motion to dismiss the derivative litigation. Some commentators, including this one, later argued that *Disney II* represented a decisive shift in the Delaware courts' approach.

In *Disney II*, if the allegations in the amended complaint had been sufficient to state a claim only for a breach of the directors' duty of care, the complaint could not have withstood a motion to dismiss, since the directors would have been entitled to the benefit of Disney's charter provision--adopted pursuant to Delaware General Corporation Law Section 102(b)(7)ⁿ⁷-- protecting them from liability for damages for breach of their duty of care. Nevertheless, the court found that the facts pleaded went beyond allegations of simple (or even gross) negligence and raised "cognizable questions whether the defendant directors ... should be held personally liable to the corporation for a knowing or intentional lack of due care in the company's decision- making process regarding Ovitz's employment and termination" The court went on to explain:

It is rare when a court imposes liability on directors of a corporation for breach of the duty of care, and this Court is hesitant to second-guess the business judgment of a disinterested and independent board of directors. But the facts alleged in the new complaint do not implicate merely negligent or grossly negligent decision making by corporate directors. Quite the contrary; plaintiffs' new complaint suggests that the Disney directors failed to exercise *any* business judgment and failed to make *any* good faith attempt to fulfill their fiduciary duties to Disney and its stockholders.ⁿ⁸

Nevertheless, in August 2004, after a full trial on the merits, Chancellor Chandler held (in a decision that will be referred to here as "*Disney III*") that none of the defendant directors had breached his fiduciary duties or committed waste.ⁿ⁹ As the Delaware Supreme Court had done in *Disney I*, Chancellor Chandler distinguished between corporate governance "best practices" and legal duties:

As I will explain in painful detail hereafter, there are many aspects of defendants' conduct that fell significantly short of the best practices of ideal corporate governance ...

Unlike ideals of corporate governance, a fiduciary's duties do not change over time ... This Court strongly encourages directors and officers to employ best practices, as those practices are understood at the time a corporate decision is taken. But Delaware law does not--indeed, the common law cannot--hold fiduciaries liable for a failure to comply with the aspirational ideal of best practices, any more than a common-law court deciding a medical malpractice dispute can impose a standard of liability based on

ideal--rather than competent or standard--medical treatment practices, lest the average medical practitioner be found inevitably derelict.ⁿ¹⁰

Echoing *Disney II*, Chancellor Chandler further observed that "the concept of *intentional dereliction of duty, a conscious disregard for one's responsibilities*, is an appropriate (although not the only) standard for determining whether fiduciaries have acted in good faith."ⁿ¹¹ However, analyzing separately the behavior of each of the key directors (those involved in the negotiation, review and approval of the Ovitz employment agreement and of the termination of Ovitz's employment, including the Chairman and other members of the Compensation Committee of the Disney Board of Directors), Chancellor Chandler found that, while none did a perfect job, each director had done at least the minimum required to satisfy his legal duties.

Particularly instructive for members of compensation committees is the court's distinction between the behavior of the board of directors of Trans Union Corporation in approving the merger at issue in the famous case of *Smith v. Van Gorkom*,ⁿ¹² on the one hand, and the behavior of certain members of the Compensation Committee of the Disney Board in the case before it, on the other hand. First, the court noted that the merger in *Van Gorkom* was "orders of magnitude more important ... than the transaction at issue here."ⁿ¹³

Second, the court contrasted the two hours that the Trans Union board had spent deliberating and discussing "this monumental transaction in the Life of Trans Union" with the time (less than one hour, which was the approximate length of the entire meeting) that the Disney Compensation Committee had spent on the Ovitz contract:

I am persuaded ... that the ... [Ovitz contract] was discussed for a not insignificant length of time. Is that length of time markedly less than the attention given by the Trans Union board to the merger agreement they were statutorily charged with approving or rejecting? Yes. Is that difference probative on the issue of whether the compensation committee adequately discussed the ... [Ovitz contract]? Not in the least. When the Trans Union board met for those two hours, it was the very first time any of those directors had discussed a sale of the company. Here, all the members of the committee were aware in advance that Ovitz's hiring would be discussed, and the members of the committee had also previously had more than minimal informal discussions amongst themselves as to the *bona fides* of the ... [Ovitz contract] before the meeting ever occurred. Furthermore, as mentioned above, the nature and scope of the transactions are fundamentally different.ⁿ¹⁴

Third, the court contrasted the complete absence of documentation before the Trans Union board in the *Van Gorkom* case with the term sheet that was put before the Disney Compensation Committee when it was asked to approve the Ovitz contract:

[T]he Trans Union board had absolutely no documentation before it when it considered the merger agreement. The board was completely reliant on the misleading and uninformed presentations given by Trans Union's officers (Van Gorkom and Romans). In contrast, the compensation committee was provided with a term sheet of the key terms of the ... [Ovitz contract] and a presentation was made by Russell [the chairman of Disney's Compensation Committee] (assisted by Watson [another member of the Compensation Committee and a past chairman of Disney's Board of Directors]), who had personal knowledge of the relevant information by virtue of his negotiations with Ovitz and discussions with Crystal [the committee's executive compensation consultant] ... It is true that the compensation committee did not review and discuss the then-existing draft of the full text of the ... [Ovitz contract]. This, however, is not required. Nor is it necessary for an expert to make a formal presentation at the committee meeting in order for the board to rely on that expert's analysis, although that certainly would have been the better course of action. Furthermore, the Company's compensation committee reasonably and wisely left the task of negotiating and drafting the actual text of the ... [Ovitz contract] in the hands of the Company's counsel.ⁿ¹⁵

Fourth, Chancellor Chandler noted that, in *Van Gorkom*, members of the company's senior management had opposed the merger at issue whereas, in the case before it, "the Company's senior management generally saw Ovitz's hiring as a boon for the Company ..."n16

On the subject of the Compensation Committee's reliance on the allegedly flawed analysis of the committee's executive compensation consultant, the court concluded that, despite the subsequent criticism of that analysis, "nothing in the record leads me to conclude that any member of the Compensation Committee had actual knowledge that would lead them to believe ... that Crystal's analysis was inaccurate or incomplete. Without that knowledge, I conclude the compensation committee acted in good faith and relied on Crystal in good faith, and that the fault for errors or omissions in Crystal's analysis must be laid at his feet, and not upon the compensation committee."n17

The court concluded this section of the analysis where it had begun--by distinguishing between corporate governance best practices, on the one hand, and the requirements of Delaware law, on the other hand:

Are there many aspects of Ovitz's hiring that reflect the absence of ideal corporate governance? Certainly, and I hope that this case will serve to inform stockholders, directors and officers of how the Company's fiduciaries underperformed. As I stated earlier, however, the standards used to measure the conduct of fiduciaries under Delaware law are not the same standards used in determining good corporate governance. For all the foregoing reasons, I conclude that none of the defendants breached their fiduciary duties or acted in anything other than good faith in connection with Ovitz's hiring, the approval of the ... [Ovitz contract], or his election to the Company's presidency.n18

The Delaware Supreme Court upheld the *Disney III* in a decision that will be referred to here as *Disney IV*.n19 Like the trial court, in *Disney IV* the Delaware Supreme Court distinguished between "best practices" and the minimum requirements for due care under the business judgment rule. While the Court observed, as had the trial court, that a better process would have provided the compensation committee with more neatly packaged information about the potential severance payments that Ovitz might receive in the event of a no-fault termination, it accepted the trial court's finding that the compensation committee had the minimum information required to exercise its duty of due care.n20:

In our view, a helpful approach is to compare what actually happened here to what would have occurred had the committee followed a 'best practices' (or 'best case') scenario, from a process standpoint. In a 'best case' scenario, all committee members would have received, before or at the committee's first meeting on September 26, 1995, a spreadsheet or similar document prepared by (or with the assistance of) a compensation expert (in this case, Graef Crystal). Making different, alternative assumptions, the spreadsheet would disclose the amounts that Ovitz could receive under the O[vitz] E[mployment] A[greement] in each circumstance that might foreseeably arise The contents of the spreadsheet would be explained to the committee members, either by the expert who prepared it or by a fellow committee member similarly knowledgeable about the subject. That spreadsheet, which ultimately would become an exhibit to the minutes of the compensation committee meeting, would form the basis of the committee's deliberations and decision. Had that scenario been followed, there would be no dispute (and no basis for litigation) over what information was furnished to the committee members or when it was furnished. Regrettably, the committee's informational and decision making process used here was not so tidy. That is one reason why the Chancellor found that although the committee's process did not fall below the level required for a proper exercise of due care, it did fall short of what best practices would have counseled.

....

[T]he issue may be framed as whether the compensation committee members knew, at the time they approved the OEA, that the value of the option component of the severance package could reach the \$92 million order of magnitude if they terminated Ovitz without cause after one year. The evidentiary record

shows that the committee members were so informed. On this question the documentation is far less than what best practices would have dictated. There is no exhibit to the minutes that discloses, in a single document, the estimated value of the accelerated options in the event of a[n] N[o] F[ault] T[ermination] ... after one year. The information imparted to the committee members on that subject is, however, supported by other evidence, most notably the trial testimony of various witnesses about spreadsheets that were prepared for the compensation committee meetings.

... .

It is on this record that the Chancellor found that the compensation committee was informed of the material facts relating to an NFT payout. If measured in terms of the documentation that would have been generated if 'best practices' had been followed, that record leaves much to be desired. The Chancellor acknowledged that, and so do we. But, the Chancellor also found that despite its imperfections, the evidentiary record was sufficient to support the conclusion that the compensation committee had adequately informed itself of the potential magnitude of the entire severance package, including the options, that Ovitz would receive in the event of an early NFT.

Under these circumstances, the Delaware Supreme Court upheld the trial court's ruling that the decisions of the Disney directors regarding Michael Ovitz's compensation and termination of employment were consistent not only with their duty of due care, but also with their duties of loyalty and good faith, and therefore protected by the business judgment rule.ⁿ²¹

In *In re Viacom Inc. Shareholders' Litigation*,ⁿ²² the court denied a motion to dismiss a shareholders' derivative action seeking, among other things, to recover compensation allegedly wrongfully paid to senior executive officers. Finding that the plaintiff had raised sufficient questions of fact about the independence of the members of the compensation committee to avoid dismissal on the basis of the business-judgment rule, the court held that the board's challenged decision to award the compensation in question should be tested under the "entire fairness" doctrine.ⁿ²³ The *Viacom* case is discussed at *section 16.01[4]*, below.

In *People v. Grasso*,ⁿ²⁴ the New York Attorney General sued Richard Grasso, the former Chairman of the Board and Chief Executive Officer of the New York Stock Exchange, as well as Kenneth Langone, the former chairman of its board compensation committee, for allegedly excessive compensation paid to Mr. Grasso. While the main claims in the case were brought under the New York not-for-profit corporation law, and therefore included some features not found in cases involving the compensation of executive officers of for-profit corporations, the case included breach-of-fiduciary-duty claims against Messrs. Grasso and Langone and called into question the independence of the compensation committee chairman, the information provided to the committee, and the adequacy and soundness of its proceedings.

What, then, are the lessons of the *Disney* derivative litigation for corporate secretaries, board counselors, directors in general and compensation committee members in particular? There are two main lessons:

1. Service on the board or the compensation committee of the board of a public corporation should not be considered an unduly risky proposition as long as the director acts in good faith and the director and the corporate secretary follow certain basic procedures, including:
 - (for the corporate secretary) giving sufficient advance notification of board and committee meetings and of the agenda for each meeting;
 - providing (in the case of the corporate secretary) and reviewing (in the case of the director), in advance of the meeting, adequate information, including written materials,

relating to major issues to come before the board or board committee (with greater detail and more information required as the importance to the overall corporation of the transaction in question increases);

- when appropriate, relying in good faith on reputable experts, retained independently by the board or board committee, with an appropriate amount of interaction with and questioning of each such expert, to be followed by further action with respect to the expert if the directors come to have actual knowledge that the expert's report or analysis is incomplete or misleading (a circumstance that should be rare); and

- allowing an appropriate amount of time for an active and complete discussion (during one or more board or committee meetings, depending on the complexity and overall materiality of the transaction to be considered) before the board or committee votes to authorize or ratify the transaction in question.

2. Notwithstanding the lower threshold for fulfillment of directors' fiduciary duties, no board or compensation committee will want to be criticized, or to expose the company to criticism, for failure to follow best practices in corporate governance, at least when there is some consensus about what those practices are.ⁿ²⁵

[2] 2006 Revisions to the SEC Compensation Disclosure Rules

In August 2006, the SEC revised its disclosure rules related to executive compensation and related-party transactions.ⁿ²⁶ In addition to adding extensive new disclosure requirements on executive compensation and related-party transactions, the new rules also prescribed annual disclosures relating to compensation committee proceedings.ⁿ²⁷ The revised disclosure rules require SEC registrants annually to disclose the following information:

(1) if the registrant does not have a standing compensation committee or committee performing similar functions, the basis of the board of directors' view that it is appropriate not to have a committee and the name of each director who participates in the consideration of executive officer and director compensation;

(2) whether the compensation committee has a charter and, if so, whether a current copy of the charter is available on the registrant's web site (and, (i) if so, the web site address must be provided, or (ii) if not, the charter must be included as an appendix to the registrant's proxy statement or information statement provided to security holders at least once every three fiscal years or whenever it has been amended since the beginning of the most recent fiscal year, and the fiscal year in which it was last so included in satisfaction of this requirement must be identified);

(3) a narrative description of the registrant's processes and procedures for consideration and determination of executive compensation, including

- (i) (A) the scope and authority of the compensation committee or persons performing similar functions, and (B) the extent to which the compensation committee may delegate its authority to other persons, identifying such other persons and the authority that may be delegated;

- (ii) any role of executive officers in determining or recommending the form or amount of executive and director compensation; and

(iii) any role of compensation consultants in determining or recommending the amount or form of executive and director compensation, identifying such consultants, stating whether they are retained directly by the compensation committee (or persons performing similar functions), the nature and scope of their assignment, and the material elements of the instructions or directions given to them;

(4) under the caption "Compensation Committee Interlocks":

(i) if the registrant had a board compensation committee (or other board committee performing similar functions), the identity of each person who was a member of that committee during the last completed fiscal year and whether each such member (A) was an employee of the registrant, (B) was formerly an employee of the registrant, or (C) had any relationship requiring disclosure under Item 404 of Regulation S-K (on related-party transactions), or

(ii) if the registrant had no such committee, the identity of each officer or employee and any former officer who, during the last completed fiscal year, participated in board deliberations concerning executive compensation; and

(iii) the existence, and a description, of any of the following relationships during the last completed fiscal year:

(A) an executive officer's service as a member of the compensation committee (or other board committee performing equivalent functions or, in the absence of such a committee, the entire board of directors) of another entity, one of whose executive officers was on the compensation committee (or other board committee performing equivalent functions or, in the absence of such a committee, the entire board of directors) of the registrant;

(B) an executive officer's service as a director of another entity, one of whose executive officers was on the compensation committee (or other board committee performing equivalent functions or, in the absence of such a committee, the entire board of directors) of the registrant; and

(C) an executive officer's service as a member of the compensation committee (or other board committee performing equivalent functions or, in the absence of such a committee, the entire board of directors) of another entity, one of whose executive officers served as a director of the registrant.

(5) Under the caption "Compensation Committee Report":

(i) The compensation committee must disclose whether:

(A) it has reviewed and discussed with management the registrant's Compensation Discussion and Analysis (the registered company's annual executive compensation discussion required under the 2006 rules); and

(B) on the basis of that review and discussion, the committee recommended to the board of directors that the Compensation Discussion and Analysis be included in the company's annual disclosure document (the Annual Report on Form 10-K, proxy statement, or information statement to security holders); and

(ii) the name of each member of the registrant's compensation committee (or other board committee performing equivalent functions or, in the absence of such a committee, the entire board of directors), appearing below the disclosures described in subparagraph (5)(i), *above*.

CHAPTER 10 THE COMPENSATION COMMITTEE *

1-10 Corporate Governance: Law and Practice § 10.04

AUTHOR: Bart Schwartz Amy Goodman Sean Feller

§ 10.04 Compensation Committee Charter, Scope and Purpose

[1] NYSE Requirements for Compensation Committee Charter

In November and December, 2003, the Securities and Exchange Commission (the "SEC") approved new corporate governance rules for the NYSE, the NASDAQ and the Amex.ⁿ¹ Section 303A.05 of the NYSE corporate governance standards deals with compensation committees of listed companies.ⁿ² Section 303.05(a) deals with the independence of compensation committee members, a subject that will be treated in detail elsewhere in this chapter.ⁿ³ Section 303.05(b) deals with compensation committee charters.

Like other provisions of the NYSE corporate governance rules, the rules on compensation committees include both mandatory requirements (which must be followed by all NYSE-listed companies, on pain of delisting) and best practices recommendations.ⁿ⁴ Both the mandatory requirements and the best-practices recommendations of the NYSE rules for compensation committee charters are reflected in the sample charter annexed as Appendix 10-A to this chapter.

The most basic NYSE compensation committee requirements are that each listed company have a compensation committee consisting of independent directors and that each such committee have a written charter. The charter must include provisions addressing the compensation committee's purpose and responsibilities and providing for an annual performance evaluation of the committee.ⁿ⁵ The committee's purposes and responsibilities, at a minimum, must include direct responsibility to:ⁿ⁶

(A) review and approve corporate goals and objectives relevant to CEO compensation, evaluate the CEO's performance in light of those goals and objectives, and, either as a committee or together with the other independent directors (as directed by the board), determine and approve the CEO's compensation level based on this evaluation; and

(B) make recommendations to the board with respect to non-CEO executive officer compensation, and incentive-compensation and equity-based plans that are subject to board approval; and

(C) produce a compensation committee report on executive compensation as required by the SEC to be included in the company's annual proxy statement or annual report on Form 10-K filed with the SEC.

It is worth noting the extent to which the NYSE corporate governance rules expand on the role that public companies' compensation committees had typically played before their adoption. Read literally, subsection (b)(i)(A) of Section 303A.05 suggests that the compensation committee should measure *all* of the CEO's compensation (including base salary) according to the committee's assessment of the CEO's performance against pre-determined performance objectives. Surely, the adoption of this requirement does not preclude compensation committees from giving substantial weight to competitive considerations (as, in fact, the NYSE recognizes in its commentary to the rule⁷), but it underscores policymakers' increasing emphasis on performance-based CEO compensation.

In addition to emphasizing the trend toward more performance-based compensation for CEOs, subsection 303A.05(b)(i)(A) also mandates a larger role for the compensation committee in the area of overall objective-setting for CEOs (in this way, too, reinforcing the link between company performance and CEO compensation). The rule *requires* the compensation committee to "review and approve performance goals and objectives relevant to CEO compensation" (again, not only in connection with qualified performance-based compensation under *IRC Section 162(m)*). Board compensation committees had long passed on CEOs' base salaries, as well as bonuses, of course, but subsection 303A.05(b)(i)(A) further highlights the compensation committee's central role in determining the CEO's overall agenda for the coming year. As a fundamental corporate governance matter, this directive emphasizes the link between CEO compensation and the advancement of corporate objectives, as mediated by the board compensation committee.

The directive of subsection 303A.05(b)(i)(A), of course, leaves open a wide variety of possibilities for how the compensation committee interacts with other board committees and with the board as a whole in the area of CEO objective-setting and performance assessment, but it certainly suggests that the compensation committee has an important role in this process, beyond *IRC Section 162(m)* qualified performance-based compensation (which base salary never is). Directors, as well as corporate secretaries and general counsels, should give careful consideration to the allocation of responsibilities among the board committees and the board as a whole with regard to setting CEO performance objectives and evaluating the CEO's performance against those objectives at the end of the year.⁸

In its commentary to subsection 303A.05(b)(i)(A) of the corporate governance rules, the NYSE suggests (but does not mandate) that the compensation committee charter also address:

- committee member qualifications;
- committee member appointment and removal;
- committee structure and operations (including authority to delegate to subcommittees); and
- committee reporting to the board.

The NYSE also suggested that the committee have the sole authority to hire, set the compensation and other terms of engagement of, and fire any compensation consultant who assists in the evaluation of director, CEO or senior executive compensation. While the direct retention and control of compensation consultants is not a legal requirement or even a mandatory SRO listing standard, it has become the recognized best practice and is increasingly the norm, as discussed below.⁹

The NYSE corporate governance rules mandate only that the compensation committee take direct responsibility ("either as a committee or directly with other independent directors") for CEO compensation and "make recommendations to the board with respect to non-CEO compensation."¹⁰ Because of the application of *IRC Section 162(m)* to the "Named Executive Officers" (that is, the CEO and the other four most highly compensated executive officers, other than the chief financial officer), and because plans designed to comply with Section 162(m)'s exception for performance-based compensation are normally administered by the compensation committee, it is the practice in many companies to have

the compensation committee review and approve the overall compensation, and its various elements (including base salary as well as performance-based incentive plan awards), for all Named Executive Officers, but there is no law, regulation or listing rule requiring that compensation committees of NYSE-listed companies be directly responsible for the compensation of anyone other than the CEO.

Finally, as in the case of the other independent board committees and the board as a whole, the charter for the compensation committee of a NYSE-listed company must provide for an annual performance evaluation.ⁿ¹¹ The NYSE listing requirements do not prescribe any particular format or procedure for the performance evaluation. Some companies have implemented an annual self-evaluation procedure for the compensation committee members; others assign responsibility for the evaluation to other independent members of the board, such as the corporate governance and nominating committee. A form of compensation committee self-assessment questionnaire is annexed to this chapter as Appendix 10-B.

[2] Compensation Committee Responsibilities for NASDAQ- and Amex-Listed Companies

The NASDAQ and Amex corporate governance rules mandate that decisions about both CEO compensation and compensation of "all other executive officers"ⁿ¹² be determined either by

- (a) the compensation committee composed of independent directors, or
- (b) the independent directors of the board.ⁿ¹³

CHAPTER 10 THE COMPENSATION COMMITTEE *

1-10 Corporate Governance: Law and Practice § 10.05

AUTHOR: Bart SchwartzAmy GoodmanSean Feller

§ 10.05 Compensation Committee Composition

[1] Compensation Committee Independence

There are three major sets of independence requirements that apply to compensation committees of public company boards:

- the *IRC Section 162(m)* requirements;
- the 1934 Act Rule 16b-4 requirements;ⁿ¹ and
- the NYSE, Amex and NASDAQ corporate governance rules.ⁿ²

Further, on July 16, 2009, the U.S. Treasury introduced legislation that, if passed, would impose additional independence standards on compensation committees.ⁿ³ The proposed legislation would require that members of compensation committees meet new independence standards, as Sarbanes-Oxley did for member of audit committees. Under the proposed legislation, a member of the compensation committee of a company may not, other than in his or her capacity as a member of the compensation committee, the board of directors or any other board committee: (i) accept any consulting, advisory, or other compensatory fee from the company, or (ii) be an affiliated person of the company or any of its subsidiaries. The proposed legislation would further require that compensation committees be given the authority and funding to hire independent compensation consultants, outside counsel and other advisors and that any compensation consultants and legal counsel hired by compensation committees be independent of management.

In addition, several sets of corporate governance "best practices" guidelines address the independence of the compensation committee, as well.ⁿ⁴

[a] IRC Section 162(m) Independence Requirements

The regulations under Section 162(m), with which companies must comply to be eligible for the federal income tax deduction of compensation over \$1 million paid to "Named Executive Officers" (other than the chief financial officer)

under the qualified performance-based compensation exception,ⁿ⁵ include detailed independence requirements. Under the Section 162(m) regulations, the qualified performance-based compensation exception is available only if the compensation is paid solely on account of the attainment of one or more pre-established objective performance goals,ⁿ⁶ which must be set by a committee of two or more "outside directors."ⁿ⁷

To qualify as an outside director for Section 162(m) purposes, a board member must not:ⁿ⁸

- (A) be a current employee of the company;
- (B) be a former employee who, during the taxable year, receives compensation from the company for prior services (except under a tax-qualified retirement plan);
- (C) have been an officer of the company; or
- (D) receive remuneration from the company, directly or indirectly, other than as a director. This includes any payment for goods or services.

[b] 1934 Act Rule 16b-3 Independence Requirements

1934 Act Rule 16b-3 allows the board as a whole or a committee of two or more "Non-Employee Directors," by approving non-discretionary equity grants from the issuer to Section 16(b) insiders, to exempt such transactions from the short-swing trading rules under 1934 Act Section 16(b). While there is no requirement that the board compensation committee fulfill this role--and it is entirely acceptable, for example, for the board to constitute an *ad hoc* committee of two or more Non-Employee Directors for purposes of approving a stock grant pursuant to Rule 16b-3--often it will be convenient (and it is certainly logical) for the board compensation committee to act as the committee of Non-Employee Directors under Rule 16b-3. Therefore, many public companies constitute their compensation committees in a manner that will allow them to perform this duty, as well.

To a certain extent, the Rule 16b-3 requirements for Non-Employee Directors overlap with the "outside director" rules under *IRC Section 162(m)*.ⁿ⁹ Nevertheless, in certain respects, the Rule 16b-3 requirements add other, distinct factors that disqualify a director as a Non-Employee Director. Under Rule 16b-3, a Non-Employee Director may not (1) receive compensation, either directly or indirectly, from the issuer or a parent or subsidiary of the issuer, for services rendered as a consultant or in any capacity other than as a director, except for an amount that does not exceed the dollar amount for which disclosure would be required pursuant to Item 404(a) of Regulation S-K, *17 CFR § 229.404(a)* (generally, \$120,000); or (2) have an interest in any other transaction for which disclosure would be required pursuant to Item 404(a) (any transaction over \$120,000 in which the director would have a direct or indirect material interest).ⁿ¹⁰

[c] SRO Independence Requirements; Putting It All Together

[i] All-Purpose Compensation Committee Independence for NYSE-Listed Companies

In addition to adhering to the rules under *IRC Section 162(m)* and 1934 Act Rule 16b-3 for the purposes of that section and rule, respectively, NYSE-, Amex- or NASDAQ-listed companies must also comply with the general independence requirements under the SRO corporate governance rules. These requirements apply to all three key board committees, including the compensation committee.

Thus, for a member of a NYSE-listed company's board compensation committee, the board of directors as a whole must affirmatively determine that the committee members have no material relationship with the listed company other than as directorsⁿ¹¹ and the following general director independence criteria must be met:ⁿ¹²

- (i) A director who, in the past three years, has been an employee, or has had an immediate family member who has been an executive officer, of the listed company is not independent.
- (ii) A director is not independent if, in any 12-month period within the last three years, he or she has received, or has had an immediate family member who has received, more than \$120,000 per year in direct compensation from the listed company, other than director and committee fees and pension or other forms of deferred compensation for prior service (provided such compensation is not contingent in any way on continued service).ⁿ¹³
- (iii) A director is not independent if he or she (A) is or has an immediate family member who is a current partner of a firm that is the company's internal or external auditor or (B) is a current employee of such a firm, or (C) has an immediate family member who is a current employee of such a firm and who participates in the firm's audit, or (D) has been or who has had an immediate family member who has been, within the last three years (but is no longer), a partner or employee of such a firm who personally worked on the listed company's audit.
- (iv) A director is not independent if, within the last three years, he or she has been employed, or has had an immediate family member who has been employed as an executive officer of another company where any of the listed company's present executives concurrently served on that company's compensation committee.
- (v) A director is not independent if he or she is a current employee, or has an immediate family member who is a current executive officer, of a company that has, in any of the last three fiscal years, made payments to, or received payments from, the listed company for property or services in an amount which, in any such year, exceeded the greater of \$1 million or 2 percent of such other company's consolidated gross revenues.

In addition, to be able (a) to take those actions necessary to preserve the federal income tax deductibility of "qualified performance-based compensation" when total compensation for named executive officers exceeds \$1 million, and (b) to approve equity grants to Section 16 insiders, thus exempting such transactions from the short-swing trading rules of Section 16(b), directors serving on compensation committees of NYSE-listed companies must not:ⁿ¹⁴

- (a) receive any compensation for prior services as an employee of the company (even if the employment ended more than three years before), except under a tax-qualified retirement plan;
- (b) have been an officer of the company (at any time);
- (c) receive any remuneration from the company, directly or indirectly, other than as a director; or
- (d) have an interest in any other transaction for which disclosure would be required pursuant to Item 404(a) of Regulation S-K, *17 CFR § 229.404(a)* (any transaction over \$120,000 in which the director would have a direct or indirect material interest).

[ii] *All-Purpose Compensation Committee Independence for NASDAQ- and Amex-Listed Companies*

For NASDAQ- or Amex-listed companies, compensation committee members must not have any relationship with the listed company that, in the opinion of the board, would interfere with the exercise of their independent judgment in carrying out their responsibilities as directors.ⁿ¹⁵ For NASDAQ- and Amex-listed companies:

- (i) in the past three years, no committee member may have been employed by the company or any of its

parents or subsidiaries (except, in the case of Amex companies, for prior employment as an executive officer and not for more than 1 year);ⁿ¹⁶

(ii) no committee member, or family member of a committee member, may in any period of twelve consecutive months within the three years preceding the determination of independence, have accepted payments from the company or any of its parents or subsidiaries in excess of \$120,000, except;

(a) compensation for board or board committee service;

(b) for Amex only, compensation received for former service as an interim executive officer (provided the interim employment did not last longer than one year)

(c) compensation paid to a family member who is an employee--but not an executive--of the company or any of its parents or subsidiaries; or

(d) benefits under a tax-qualified retirement plan; or

(e) non-discretionary compensation;

(iii) in the past three years, no or family member of a committee member may have been employed by the company or any of its parents or subsidiaries as an executive officer;ⁿ¹⁷

(iv) in the current fiscal year or any of the past three fiscal years (in the case of NASDAQ-listed companies) or in any of the most recent three fiscal years (in the case of Amex-listed companies), no committee member or family member of a committee member may have been a partner in, or controlling shareholder or executive officer of, any organization to which the company made, or from which the company received, payments (other than payments arising solely from investments in the company's securities) that exceed five percent of the recipient's (in the case of NASDAQ-listed company's) or the organization's (in the case of Amex-listed companies) consolidated gross revenues for that year or \$200,000, whichever is greater, except:

(a) payments arising solely from investments in the company's securities; or

(b) payments under non-discretionary charitable contribution matching programs;ⁿ¹⁸

(v) during the past three years (in the case of NASDAQ-listed companies) or the most recent three fiscal years (in the case of Amex-listed companies), no committee member or family member of a committee member may have been an executive officer of another entity whose board compensation committee has included any of the executive officers of the listed company;ⁿ¹⁹ and

(vi) no committee member or family member of a committee member may be a current partner of the company's outside auditor, or, during the past three years, have been a partner or employee of the company's outside auditor who worked on the company's audit.ⁿ²⁰

For NASDAQ-listed companies, in each of these cases, a family member is a committee member's spouse, parent, child or sibling, whether by blood, marriage or adoption, or anyone residing in the committee member's home.ⁿ²¹ In each of the rules referring to a "family member" in the foregoing summary, the Amex rules use the term "immediate family member," which is defined similarly to mean "a person's spouse, parent, children, siblings, mother-in-law, father-in-law, brother-in-law, sister-in-law, son-in-law, daughter-in-law and anyone who resides in such person's home (other than domestic employees)."ⁿ²² In the case of an investment company, both the NASDAQ rules and the Amex rules preclude

any "interested person" as defined under Section 29(a)(19) of the Investment Company Act of 1940 (other than in his or her capacity as a member of the board of directors or any board committee) from qualifying as independent and substitute that prohibition for the independence rules set forth above.ⁿ²³

Both the NASDAQ rules and the Amex rules allow companies to make an exception for one non-independent member of a compensation committee consisting of at least three directors as long as that director is not a current officer or employee or family member of a current officer or employee "if the board, under exceptional and limited circumstances, determines that such individual's membership on the committee is required by the best interests of the company and its shareholders and the board discloses, in the next annual meeting proxy statement subsequent to such determination, the nature of the relationship and the reasons for the determination." Such non-independent director, however, may serve for no longer than two years.ⁿ²⁴ The narrowness of the exception makes it unlikely that it will often be invoked.

In addition, to be able (a) to take those actions necessary to preserve the federal income tax deductibility of "qualified performance-based compensation" for named executive officers whose total compensation exceeds \$1 million, and (b) to approve equity grants to Section 16 insiders, thus exempting such transactions from the short-swing trading rules of Section 16, members of compensation committees of NASDAQ- and Amex-listed companies must not:ⁿ²⁵

- (a) receive any compensation for prior services as an employee of the company (even if the employment ended more than three years before), except under a tax-qualified retirement plan;
- (b) have been an officer of the company (at any time);
- (c) receive any remuneration from the company, directly or indirectly, other than as a director; or
- (d) have an interest in any other transaction for which disclosure would be required pursuant to Item 404(a) of Regulation S-K, *17 CFR § 229.404(a)* (any transaction over \$120,000 in which the director would have a direct or indirect material interest).

[2] Other Attributes for Compensation Committee Membership

Unlike in the case of the audit committee, no rule or listing standard absolutely requires that compensation committee members have backgrounds in executive compensation issues or any other prescribed expertise. Nevertheless, best practices guidelines recommend special or continuing education for committee members in compensation-related issues.ⁿ²⁶

CHAPTER 10 THE COMPENSATION COMMITTEE *

1-10 Corporate Governance: Law and Practice § 10.06

AUTHOR: Bart SchwartzAmy GoodmanSean Feller

§ 10.06 Compensation Committee Process and Procedure

[1] Applicability of the Business Judgment Rule to Compensation Committee Decisions

Assuming that the compensation committee is constituted to meet the SRO independence requirements, and perhaps the *IRC Section 162(m)* and 1934 Act Rule 16b-3 independence rules, as well, any decision of the committee will be made by a group of outside directors duly authorized to make the decision. Thus, the compensation committee will already have a leg up on protecting its decisions under the business judgment rule.ⁿ¹

Nevertheless, in one case, the independence of outside board members was successfully attacked on the ground that the directors were motivated to entrench themselves through the adoption of change-in-control contracts under which large payments would be made to company executives upon the failure to re-elect a majority of the incumbent directors (or their designees).ⁿ² Thus, even when the transaction in question confers no monetary benefit on the outside directors, if it arguably tends to perpetuate their tenure in office, then its approval by a committee composed entirely of outside directors may not insulate it from attack under the business judgment rule.

Even when the transaction in question is approved by a committee of independent directors and cannot be plausibly argued to entrench them, the committee must proceed with care to maximize the likelihood that a court will respect their decision under the business judgment rule, without re-examining the decision on the merits. To accomplish this, it is necessary not only that the directors act in good faith but that they act with due care. In *Disney IV*, the Delaware Supreme Court rejected the plaintiff's attempt to "conflate" the duty of good faith with the duty of due care (by arguing that, by failing adequately to inform themselves, the directors had acted in bad faith).ⁿ³ While the court observed that, in view of its earlier finding that the Disney directors had acted on adequate information, the argument would have failed in any event, it nevertheless went on to expound on the duty of good faith,ⁿ⁴ enumerating three different categories of behavior that "are candidates for the 'bad faith' pejorative label."ⁿ⁵ The first category, the court observed, involves subjective bad faith--an actual intent to do harm. The second category that the court considered--"which is at the opposite end of the spectrum"--is gross negligence without malevolent intent. The court concluded that such gross negligence ("including a failure to inform one's self [sic] of material available facts"), without more, cannot constitute bad faith under Delaware law.ⁿ⁶

The "third category of fiduciary conduct, the court noted, falls between the first two categories" - "intentional dereliction of duties, a conscious disregard for one's duties"n7 The court stated that such conduct is "a non-exculpable, non-indemnifiable violation of the duty to act in good faith" but did not find that it had any application to the behavior of the Disney directors in the case before it.n8 On the facts before it, the court sustained the trial court's finding that the Disney directors had acted in good faith in approving the Ovitz employment agreement.n9

In a more recent case, the Delaware Supreme Court held that the duty of good faith is an aspect of the duty of loyalty, rather than an independent duty.n10 In that case, the Court cited approvingly its own decision in *Disney IV*, which remains instructive on the distinction between a breach of the duty of care, on the one hand, and a breach of the duty of good faith (an aspect of the duty of loyalty), on the other hand.

To pass muster under the business judgment rule, the directors must have taken the challenged actions not only in good faith, but with due care. They must have ample information (including, when necessary, advice from independent experts) and sufficient time to study it in advance of the meeting, and there must be a full and adequate discussion of the issues.n11 In addition, following the recommended best practices described in the following section should bolster the factual record that the committee acted with due care and upon adequate information, further supporting the argument for the application of the business judgment rule.

[2] Recommended Compensation Committee Practices

[a] Compensation Committee Independence--Beyond the Rules

At the heart of the business judgment rule, the SRO rules governing compensation committees of listed companies and influential best practices recommendations for compensation committees is the matter of independence. Nowhere is the "agency problem" that has resulted from the separation of ownership and management in the public company so apparent as it is in the area of executive compensation. Specifically, it is in the economic self-interest of the company's executives to maximize their own wealth, whether from participation in the equity of the company, from cash compensation (salary and cash bonuses under both annual plans and long-terms plans) or from benefits and perquisites. In contrast, it is in the interest of the company and the shareholders (to whom the compensation committee members owe the duty of loyalty) that the compensation of the company's executive officers be such as to maximize the wealth of the company, taking into account (a) the direct cost of compensation, as well as (b) the (ultimately unmeasurable) value produced by attracting and retaining the most effective executive team. In view of these divergent interests, ensuring board and committee independence from management is perhaps more clearly necessary in the area of executive compensation than in any other area.

The applicable "black letter" rules and listing standards for testing the independence of compensation committee members are discussed at length, above. In addition, in the post-Enron era, influential jurists, both in scholarly commentary and in recent decisions, have taken a more stringent view of independence than the courts had done before.n12

In view of the cases and the expressed views of influential jurists discussed above, to maximize the likelihood that the compensation committee's decisions will be protected under the business judgment rule (for example, in a shareholder derivative suit for waste of corporate assets), boards of directors should give careful consideration not only to any economic relations between compensation committee members and the company (which are covered in the formal rules), but also to social and community ties between compensation committee members and the company's senior executive management, in general, and the CEO, in particular.

Compensation committee members should be selected for nomination by a careful process run by an entirely independent board nominating (or corporate governance and nominating) committee,n13 without undue influence. Any connections between the prospective compensation committee member and the CEO (such as common schools, clubs,

participation in political, religious and social organizations, other fund-raising, and outside friendships) should be disclosed by the prospective board member and the CEO and should be carefully considered by the nominating committee in selecting candidates for nomination to the board and in appointing directors to the compensation committee.ⁿ¹⁴ While common interests and points of contact in community, charitable and political organizations between CEOs and directors of major companies are frequent and should not be considered disqualifying in and of themselves, in the post-Enron environment boards should be aware of and carefully weigh the totality of a director's relationships with the company and with the CEO in making a determination of independence.ⁿ¹⁵

In addition to formal, structural independence, compensation committee best practices stress the less objectively determinable but equally important quality of independence in fact in committee deliberations and decision-making processes.ⁿ¹⁶ While, unlike formal independence, behavioral independence is difficult to define and even more difficult to measure, one meaningful way of encouraging a culture of independent minded deliberation and decision-making is to make this a dimension of the committee's annual evaluation and to require compensation committee members (in companies where the committee does a self-evaluation) or other independent directors (to whom the responsibility for the annual evaluation of the compensation committee's performance is assigned in other companies) to give specific examples in support of their assessment of the compensation committee's behavioral independence.

[b] Compensation Committee Agendas and Meetings; Role at Annual Meeting of Shareholders

The chairman of the compensation committee, rather than the CEO or a member of the CEO's staff (such as the corporate secretary or head of human resources), should set the committee's agenda for the year and for each meeting. Certainly, in setting the agenda, it is appropriate for the committee chairman to consider suggestions from the CEO, the corporate secretary, the general counsel, the head of human resources, as well as outside advisors and other committee members. Nevertheless, the committee chairman should retain ultimate control over the content of the committee agendas and should be satisfied with the agenda before it is distributed to the entire committee, along with other materials, in preparation for each meeting.ⁿ¹⁷

In preparing the compensation committee agendas for the various committee meetings during the course of the year, it is helpful to start with a checklist of the regular duties that the compensation committee must discharge each year under its charter, company practice and applicable legal and listing requirements. The normal duties of the compensation committee (which vary somewhat depending on the nature of the company and on which exchange it is listed, as explained in the balance of this chapterⁿ¹⁸ include:

- reviewing and approving performance goals for the year (and for any multi-year cycles under long term incentive plans) relevant to the compensation of the CEO (perhaps in conjunction with another independent board committee--such as the corporate governance and nominating committee, or the non-management directors as a group);
- assessing the CEO's performance for the previous year (and for any multi-year cycles under long term incentive plans) against pre-established goals;
- determining (either alone or in conjunction with other independent directors or committees) the CEO's compensation level, on the basis of the committee's assessment of the CEO's performance and other factors (such as competitive pay levels in peer companies);
- in the case of incentive compensation intended to qualify as "qualified incentive-based compensation under *IRC Section 162(m)*"ⁿ¹⁹ reviewing performance against pre-established goals on the basis of objective measurements and certifying the extent to which such goals have been achieved;
- determining, or making recommendations (to the full board, the non-management directors as a

group), concerning (a) incentive-based compensation plans and equity-based plans in which senior officers other than the CEO may participate, and (b) base salary and bonuses for senior officers of the company other than the CEO;

- preparing, or reviewing and approving, the required compensation committee report in the annual proxy statement;
- administering company compensation plans (for example, where the compensation committee is the body vested with discretion to make stock option and restricted stock awards, not only as a matter of the regular annual compensation cycle but also in connection with inducement awards for new hires and awards in connections with mid-year promotions); and
- providing for an annual evaluation of the compensation committee's own performance.

In addition to the express duties assigned to the Compensation Committee, a rule adopted by the SEC in 2006 also requires compensation committees to approve the compensation of Executive Officers, including those who are not named executive officers in the proxy statement, or to disclose their compensation.ⁿ²⁰ Since few, if any, companies will choose to disclose the compensation of all executive officers whose compensation is not otherwise required to be disclosed in the proxy statement, compensation committees (or a committee of independent directors performing similar functions) will have to approve the compensation of such executive officers annually. For companies choosing to take advantage of this exception to the disclosure rule (as virtually every public company will do), an annual review and approval of total compensation of all executive officers should be planned and carried out as part of the regular compensation cycle (normally, for calendar-year companies, in the first quarter).

There is no legal or listing requirement that all compensation committee meetings be held entirely in executive session, outside the presence of the CEO or other company executives. Nevertheless, it is sound practice to have regularly scheduled executive sessions of the compensation committee. In addition, of course, discussion of the CEO's compensation should take place outside the presence of the CEO.ⁿ²¹ Likewise, discussion of compensation for other executive officers should take place outside their presence.

The Conference Board stresses the importance of the compensation committee's direct accountability to the shareholders, stipulating that the "Chair of the Compensation Committee should 'take ownership' of the Compensation Committee's activities and be available at shareholders' meetings to respond directly to questions about executive compensation."ⁿ²²

[c] Compensation Committee Information and Resources

The compensation committee must have the resources to acquire adequate relevant information to inform the decisions it makes. For most compensation committees, most of the time, such information will come from the company and also from retained experts.

In terms of information from the company, the committee should have complete and unfettered access to both records and personnel, as necessary for informed decision-making. The records to which the committee is most likely to require access are performance evaluations of executive officers below the CEO level, information relevant to company and unit performance (including financial measures and other relevant data), and salary and employment histories. The company personnel most likely to be able to provide such information to the committee, and to supplement the written records with their own informed and relevant perspectives, are the CEO, the head of human resources and, in some cases, the general counsel and chief compliance officer.

Like other board committees, the compensation committee should be able to retain independent experts of its own at the

company's expense. The NYSE listing standards do not require, but recommend, that the compensation committee charter give the compensation committee "sole authority to retain and terminate [the engagement of] the consulting firm, including sole authority to approve the firm's fees and other retention terms."ⁿ²³ Direct hiring of independent consultants by the board or the board compensation has become the commonly recognized best practice.ⁿ²⁴

[d] Tally Sheets

One specific technique for ensuring that the compensation committee has the required information has become a recognized best practice. It is the use of so-called tally sheets for senior executive officers.

A tally sheet is simply a schedule that summarizes and totals the value of the various elements of an executive's compensation, pension benefits and perquisites. While the exact components and how they are valued varies, many compensation directors and compensation consultants present the compensation committee with tally sheets that take account of salary, cash bonuses, cash long-term incentive compensation awards, restricted stock awards, stock option awards, perquisites, and company pension contributions (or, alternatively, increase in actuarial present value of pension).

Some consultants recommend that the compensation committee be presented, annually, with tally sheets not only for named executive officers whose compensation is required to be disclosed in the proxy statement but also for the members of a broader senior executive group. Depending on the size of the company, such a group might include 15 or 20 of the most highly compensated senior executives.

In addition, especially in light of the *Disney* case and the increased scrutiny of change-in-control arrangements, companies are well-advised to prepare, and to present their compensation committees with, tally sheets showing and summing the various elements of value that senior executive officers are eligible to receive upon a change in control of the company. Such tally sheets should take account not only of the payments and benefits to be provided under change-in-control agreements but also accelerated vesting and payouts upon a change-in-control under long-term incentive plans, stock option and restricted stock award agreements.

[e] Overall Thoroughness and Completeness of Compensation Committee Process

At the most general level, the message of recent cases and best practices recommendations regarding compensation committees is that, before making any decision relating to the compensation of a senior executive officer (especially the CEO), the compensation committee should go to the trouble and take the time to understand the following:

- (a) the total potential expense to the company-and value to the executive-of the compensation it is being asked to approve;
- (b) how the executive's proposed compensation compares with that of similarly situated executives in comparable companies; and
- (c) the relationship between the executive's proposed compensation and the company's performance for the relevant period.

In *Disney II*,ⁿ²⁵ the court had lambasted the compensation committee for utterly failing to understand the terms or the potential cost to the company of the Michael Ovitz employment agreement before approving it. Similarly, in his lawsuit against, among others, a former chairman of the NYSE board compensation committee for the payment of allegedly excessive compensation to former NYSE CEO Richard Grasso, New York's attorney general charged that the compensation committee "wholly disregarded" available information about how Mr. Grasso's compensation compared to "benchmark" compensation figures that the NYSE's human resources staff and compensation consultants had calculated

to take account of (a) the median compensation paid to chief executive officers of a comparator group and (b) an assessment of the NYSE's performance for each relevant period.ⁿ²⁶ To avoid these sorts of charges, compensation committees should review and understand, and make their decisions about executive compensation in light of, complete and accurate information about (i) the proposed compensation arrangements before them, (ii) compensation paid to similarly situated executives in comparable companies, and (iii) the relationship between the proposed compensation and the company's performance for the period in question.

[3] Review and Discussion with Management of Compensation Disclosure and Analysis

Under the disclosure rules for executive compensation and related-party transactions adopted by the Securities and Exchange Commission in August of 2006, companies must include, in their annual disclosure documents, a detailed compensation discussion and analysis ("CD&A"). The CD&A is management's disclosure, rather than the compensation committee's disclosure, the detailed content of which is outside the scope of this work.

Under the 2006 rules, the compensation committee is required to include in the company's annual disclosure documents (normally, the proxy statement) a Compensation Committee Report, which must state (a) whether the compensation committee has reviewed and discussed the CD&A with management, and (b) whether, on the basis of that review and analysis, the compensation committee recommended to the board of directors that the CD&A be included in the Company's annual disclosure documents.ⁿ²⁷

Like many other rules adopted by the SEC since the passage of the Sarbanes-Oxley Act, in practical effect the August 2006 rules go considerably beyond disclosure. Although they do not expressly require that the compensation committee review and discuss the CD&A with management, few, if any, committees will want to disclose that they have not reviewed and discussed the CD&A with management. In practice, therefore, the Compensation Committee Report requirement amounts to an implied procedural mandate that the Committee review and discuss the CD&A with management.

This means that most compensation committees will want to build into their schedules, in the run-up to the meeting at which the Compensation Committee Report and the balance of the proxy statement are reviewed and approved (usually in the first or early second quarter for calendar-year filers), an adequate opportunity for senior executives (typically, the CEO and the head of HR, perhaps with the senior manager responsible for compensation matters) to present the CD&A to, and discuss it with, the compensation committee. Companies should consider whether this review and discussion should take place in a single meeting of the compensation committee in which the final CD&A will be discussed, reviewed and approved for inclusion in the proxy statement or, alternatively, whether the discussion and review should span two or more meetings.ⁿ²⁸

[4] IRC Section 162(m) Procedures

[a] Importance of IRC Section 162(m), Generally

The express legislative intent behind the adoption of *IRC Section 162(m)* was to reduce the level of senior executive compensation in public companies--a level that had become "the subject of scrutiny and criticism."ⁿ²⁹ To this end, Section 162(m) precludes public companies from deducting from income, for federal income tax purposes, the expense of any compensation of "covered employees" in excess of \$1 million in any taxable year, with certain important exceptions.ⁿ³⁰ The "covered employees" are the CEO (or acting CEO) and the four other most highly compensated officers (excluding the chief financial officer)ⁿ³¹ whose compensation is required to be disclosed under the 1934 Act.ⁿ³²

Despite the express legislative purpose of reducing executive compensation, the actual effect of Section 162(m) has been, rather, to steer executive compensation in a particular direction, indicated by one of the exceptions to the general

rule of non-deductibility--an exception that requires the compensation committee to be comprised in a particular way and to follow specified procedures. The compensation is deductible as long as it is payable "solely on account of the attainment of one or more performance goals," if three general conditions are met:³³

- (i) the performance goals are determined by a compensation committee of the board of directors of the taxpayer which is comprised solely of 2 or more outside directors,
- (ii) the material terms under which the remuneration is to be paid, including the performance goals, are disclosed to shareholders and approved by a majority of the vote in a separate shareholder vote before the payment of such remuneration, and
- (iii) before any payment of such remuneration, the compensation committee referred to in clause (i) certifies that the performance goals and any other material terms were in fact satisfied.

This is often referred to as the "qualified performance-based compensation exception." The IRS regulations under Section 162(m), which provide detailed guidance on the specific procedures that must be followed to meet these requirements, are discussed below.

Starting with a pilot program in 2003, in examining the tax returns of public corporations the Internal Revenue Service has focused on, among other things, deductions for expenses of executive compensation, including the deductibility of compensation over \$1 million for each of the named executive officers listed in public companies' proxy statements.³⁴ The regulations under Section 162(m) are lengthy, detailed and specific. It would behoove any lawyer or corporate secretary assisting the board in connection with compensation intended to be eligible for the tax deduction for qualified performance-based compensation to read those regulations in their entirety. They are reproduced in full in Appendix 10-C to this chapter.

In general, the compensation committee should be involved in the process of designing and implementing Section 162(m)-compliant performance-based compensation plans at three critical junctures:

- (a) at the outset of the process, when the plan is prepared and submitted to a vote of the shareholders;
- (b) on an annual or other periodic basis, when the performance goals are set and awards are made under the plan; and
- (c) at the end of each performance period, when it is time to determine whether the goals have been met and what payouts are owing to named executive officers.

There are exacting regulatory standards governing each stage of the process. Because the design, implementation and administration of Section 162(m)-compliant incentive compensation plans tends to comprise a large part of the work of any public company compensation committee--and because the work of the compensation committee in this regard is governed by some of the most detailed and specific corporate governance rules on the books (albeit under the tax laws)--the following subsections will highlight the basic Section 162(m) requirements to which the compensation committee and its counselor should attend at each stage of the process.

[b] Step I: Preparing the Plan and Seeking Shareholder Approval

[i] *Shareholder Approval of Material Terms*

As a practical matter, the plan will be approved (for recommendation to the shareholders) by the compensation committee, but is normally prepared by counsel. Counselors to the compensation committee must be prepared to explain

the requirements for a Section 162(m)-compliant plan (outlined *above*) and to prepare a properly drafted plan for the committee to review and recommend to the shareholders (or to the board for approval and recommendation to the shareholders).

Once the compensation committee approves the plan, its material terms must be submitted to a vote of the shareholders for approval. Although the narrow legal requirement is that only the "material terms" of the plan must be approved by the shareholders before the compensation is paid,ⁿ³⁵ in practice, it is a good idea to summarize the material terms in the body of the proxy statement seeking shareholder approval for the plan and to reproduce the full plan as an exhibit. That way, there can be no question about full disclosure, for purposes of Section 162(m) or under the securities laws.

The material terms include:ⁿ³⁶

- (i) the employees eligible to receive compensation (not necessarily by name, but at least by title or class of employeeⁿ³⁷);
- (ii) a description of the business criteria on which the performance goal is based; and
- (iii) either (a) the maximum compensation that may be paid to any employee, or (b) the specific formula used to calculate the amount of compensation to be paid if the performance goal is attained (except that, if the formula is based, in whole or part, on a percentage of salary of base pay, the disclosure *must* include the maximum amount of compensation that may be paid to the employee).

[ii] Disclosure of Business Criteria

The disclosure of the business criteria on which the performance goal is based may include the general measure (for example, return on shareholders' equity), rather than the specific goal (such as return on shareholders' equity of at least 10 percent in a particular fiscal year).ⁿ³⁸ Moreover, it has become common practice to include a list of criteria from which the compensation committee may choose, such as the following:

The business criteria on which the performance goal may be based will be one or any combination of the following, for the Company or any identified business unit, as determined by the Committee:

- (i) net income,
- (ii) pretax operating income,
- (iii) earnings before income taxes,
- (iv) earnings before interest, taxes, depreciation and amortization,
- (v) earnings per share,
- (vi) return on shareholders' equity,
- (vii) change in identified expense levels,
- (viii) profitability of an identifiable business unit or product,
- (ix) change in revenues,

(x) stock price appreciation,

(xi) total shareholder return,

any of which or combination of which may be used on an absolute basis or relative to an identified index or peer group as specified by the Committee.

There is an exception to the requirement that the material terms be disclosed and approved by the shareholders if "information that would otherwise be a material term of a performance goal" is confidential business information, the disclosure of which would have an adverse effect on the public company, in the determination of the Committee.ⁿ³⁹ Any such determination must be disclosed and, in any event, both the maximum compensation payable to an individual and the identities or classes of eligible executives must still be disclosed.

In this regard, practitioners should note that, in the Compensation Discussion and Analysis section of their annual disclosure documents registrants are required to disclose how the amount of each element of compensation is determined for each of the named executive officers. The SEC requires registrants to disclose specific performance targets used to determine annual or long-term incentive awards unless the information concerned is a confidential trade secret or confidential commercial or financial information, the disclosure of which would result in competitive harm to the company. Even in that case, registrants are required to discuss how difficult it will be for the executive or how likely it will be for the registrant to achieve the undisclosed target levels.ⁿ⁴⁰ It remains to be seen whether "competitive harm to the company" under the 2006 SEC disclosure regulations is the same as "adverse effect on the publicly held corporation" under the Section 162(m) regulations; one of the factors in the rule-making record before the SEC was the argument, advanced by a number of parties, that companies had abused what they characterized as the non-disclosure loophole in the Section 162(m) regulations and that the SEC should adopt more stringent requirements for disclosure of specific targets used to determine executive compensation.

[iii] Plans Providing for Stock Options or Stock Appreciation Rights, or for Vesting upon Death, Disability or Change in Control

In the case of a plan providing for awards of "at-the-money" stock options or stock appreciation rights, the disclosure of business criteria may be omitted, since the value that grantees derive from such awards is purely a function of stock price appreciation.ⁿ⁴¹ Nevertheless, even in the case of stock options or stock appreciation rights, to be eligible for the Section 162(m) deduction for performance-based compensation the plan must state the maximum number of shares under options or rights that may be granted during a specified period to any employee.ⁿ⁴² With the advent of the SRO rules requiring most equity-based compensation plans to be submitted to and approved by the shareholders,ⁿ⁴³ the issue of disclosure of the terms of equity based plans is essentially moot, since such terms will be disclosed in any event when the plan is submitted to shareholders for approval.

In addition, while the very essence of a Section 162(m) plan is that it provide for payments to be tied to pre-determined performance goals, the plan may also provide for accelerated (and otherwise unconditional) vesting and payment upon death, disability or change in control.ⁿ⁴⁴ Although the plan may contain such a provision without disqualifying the deductibility of performance-based payments made upon the attainment of pre-determined goals, any payments made by reason of death, disability or change-in-control will not be deductible as qualified performance based compensation under Section 162(m).ⁿ⁴⁵

[iv] Disclosure of Compensation Payable Under the Plan

The disclosure of the compensation payable must be sufficiently specific that a shareholder can determine the maximum payout for any given period.ⁿ⁴⁶ If the specific formula is not disclosed, then the dollar maximum payout must be disclosed (and vice versa).ⁿ⁴⁷ Therefore, even in the case of stock options (the economic value of which to the

executive is readily apparent--the spread between the strike price and the market price on the date of exercise), the maximum number of shares that may be granted to any executive and the strike price must be disclosed.ⁿ⁴⁸

[v] *Periodic Re-Approval*

If the compensation committee is authorized to change the targets under a performance goal after initial shareholder approval, the material terms of the performance goal must be disclosed to and re-approved by the shareholders no later than the first shareholder meeting in the fifth year following the year in which shareholders previously approved the performance goal.ⁿ⁴⁹

[c] Step II: Setting the Performance Goals and Making the Grants

It is in the setting of the performance goals that the work of the compensation committee in connection with Section 162(m)-compliant performance-based compensation plans becomes more involved. As a general matter, "[q]ualified performance-based compensation must be paid solely on account of the attainment of one or more preestablished, objective performance goals"ⁿ⁵⁰ and it is up to the committee to set those goals at the proper time and in accordance with the required specifications, and to reflect those goals in the necessary documentation.

[i] *Time for Setting of Performance Goals*

A performance goal is considered "preestablished" for Section 162(m) purposes only if it is finally and irrevocably documented no later than 90 days after the commencement of the period of service to which the goal relates and, in any event, no later than by the time 25 percent of the period of service has elapsed.ⁿ⁵¹ In addition, the outcome must be "substantially uncertain" at the time the goal is set.ⁿ⁵² Courts have applied the timing restrictions strictly, with one court going so far as to suggest that performance periods of less than one year are inherently suspect under Section 162(m).ⁿ⁵³

Thus, for example, if the performance goals relate to the current fiscal year (which is also the year of service for which the executive is eligible to earn a performance-based bonus), it must be established by March 30 (a date that is both within the first 90 days and no later than at the end of the first 25 percent of the service period). If the performance period is longer--for example, a three-year cycle under a long-term incentive plan--the goal must still be established by March 30 of the first year. If the service period is shorter than one year, the 25 percent rule will be the gating factor. Thus, for example, in the case of a bonus payable for first-quarter results (an unusual arrangement), then the goal must be established in the first 22.5 days.ⁿ⁵⁴

As far as the substantial uncertainty test, the regulations state, by way of example, that a bonus that is based on a specified percentage of sales is not "substantially uncertain" because the corporation "is virtually certain to have *some* sales for the fiscal year."ⁿ⁵⁵ Yet a bonus that is based on a percentage of profits meets the test (if the performance goal is timely established), since "it is substantially uncertain whether a company will have profits for a specified future period even if a company has a history of profitability."ⁿ⁵⁶

Many other questions can be raised, and have not been addressed in any reported decision, technical advice memorandum or private letter ruling, regarding "substantial uncertainty." For example, this commentator would argue that a goal that the company's stock will be trading at \$10 or higher by a certain date is substantially uncertain even if the stock is trading at \$10 (or even \$12) when the goal is set. Stock prices can go up or down and, as the regulations make clear, a "performance goal need not ...be based upon an increase or positive result under a business criterion and could include, for example, maintaining the status quo or limiting economic losses (measured, in each case, by reference to a specific business criterion)."ⁿ⁵⁷

[ii] *Criteria for Performance Goals*

Section 162(m)-compliant performance goals must be objective and predetermined, in writing, and sufficiently clear that a third-person looking back at the end of the performance period, with the pertinent performance data in hand, need nothing more than the written record of the original setting of the performance goals and the relevant performance data, which should be available in the normal course (either as part of the company's regular record-keeping or financial reporting or from outside sources), to determine the maximum amount the Named Executive Officers can be paid for that period under the plan. The committee is permitted to exercise "negative discretion" to reduce the award otherwise indicated, but may not have the discretion to increase it.ⁿ⁵⁸ There should be no need for interpretation or subjective judgments of any kind.ⁿ⁵⁹

"Performance goals can be based on one or more business criteria that apply to the individual, a business unit, or the corporation as a whole A performance goal does not include the mere continued employment of the covered employee."ⁿ⁶⁰ The record of the compensation committee at the time of goal-setting must identify the individual employee or the class of employee entitled to participate in the incentive compensation payments.ⁿ⁶¹

[iii] Discretion

The performance goals must be set in a way that precludes committee discretion to increase the amount of an award indicated by the application of measurable performance results to the pre-determined formula, but the committee may retain the discretion to *decrease* the objectively determined awards.ⁿ⁶² The regulations refer to a permissible exercise of "negative discretion" and this term has come to be used in practice.

If the payment is to be determined as a percentage of salary or base compensation upon the achievement of the pre-determined performance goal, the mere fact that the executive's future compensation, on which the payment will be based, is not determined at the time the goal is set will not disqualify the payment as discretionary under Section 162(m) if the maximum dollar amount to be paid is fixed at that time.ⁿ⁶³
