The most significant difference between the regulation of registered broker-dealers under Section 15 and government securities brokers and government securities dealers under Section 15C is that the former are subject to the Uniform Net Capital Rule n78 and the latter are subject to a different set of regulations, promulgated by the Secretary of the Treasury and referred to as the "Liquid Capital Rule," with respect to financial responsibility. n79 These rules apply to all government securities brokers and government securities dealers, whether required to register under Section 15C(a)(1)(A), or to give notice under Section 15C(a)(1)(B). The rules do not apply to registered broker-dealers, n80 financial institutions that are subject to the rules and regulations of their appropriate regulatory agency concerning capital requirements, n81 branches or agencies of foreign banks subject to regulation, supervision, and examination by state or federal authorities having regulatory or supervisory authority over commercial banks and trust companies, n82 and futures commission merchants that are not registered brokers or dealers if they meet the capital requirements of the CFTC or the SEC, whichever is greater. n83 In addition, a "government securities interdealer broker" n84 may elect not to be subject to the Treasury's capital rules but rather to be subject to the SEC's net capital rule, 15c3-1, n85 in which case it must maintain net capital, as defined therein. n86 Effective August 20, 2004, the Commission adopted alternative net capital requirements for brokers-dealers that are part of consolidated supervised entities. n87 Included in these changes were new net capital requirements and additional reporting and supervision requirements. The Treasury has provided for certain modifications and adjustments of the net capital rule as applied to interdealer brokers. n88

The Treasury's capital requirements for government securities dealers and brokers registered under Section 15C require minimum capital requirements. For introducing brokers, the rules require a minimum liquid capital requirement of \$50,000, after haircuts under the Treasury's own haircut provision. n89 This provision resembles Rule 15c3-1(a)(2), to which it refers for definition of the term "introducing broker." The concept of "liquid capital" is substantially the same as "net capital" in Rule 15c3-1(c)(2). However, instead of the deductions on contracts failed to deliver, (pursuant to Rule 15c3-1(c)(2)(ix)) and the haircuts (pursuant to Rule 15c3-1(c)(2)(vi)(B)), the firm must take a deduction pursuant to the "net position haircut factors," n90 if the instrument underlying the contract is a "Treasury market risk instrument." n91

The following deductions required by Rule 15c3-1 are omitted from the Liquid Capital Rule:

- Securities haircuts--subparagraph (c)(2)(vi); n92
- haircuts on open contractual commitments--subparagraph (c)(2)(iii); n93
- deductions required by subparagraph (c)(2)(iv)(F)(3)(i) relating to repurchase agreement deficits;

n94

- deductions from net worth on options and commodities positions--Appendices A and B; n95
- net pair-off receivables and money differences outstanding no more than one business day and give-up receivables outstanding no more than 30 days from the billing date, which must be no later than the last day of the month in which they arise, need not be deducted as would be required by subparagraph (c)(2)(iv)(B); n96 and
- loans to commercial banks for one business day or immediately available funds held by the government securities broker or dealer in connection with the clearance of securities on the day the loan is made. n97

Unlisted options that are Treasury market risk instruments are valued in the same way as listed options under subparagraph (c)(2)(i)(B)(1). n98

For non-introducing brokers, the minimum liquid capital maintenance requirement is \$250,000 after haircuts under the Treasury's own haircut provisions. n99 The rules also require maintenance of liquid capital equal to 120 percent of total haircuts for all government securities brokers and government securities dealers. n100

[5] Treasury Haircut Rules

The Treasury has deliberately taken a different approach to haircuts than the SEC's formula under Rule 15c3-1. In its initial announcement of proposed rules under the GSA it noted that it had "consulted extensively with the SEC and the federal supervisory agencies for financial institutions, and with the Federal Reserve Bank of New York ("FRBNY"), which has developed and published a voluntary capital adequacy guideline for brokers and dealers in government securities." n101 Although the Treasury decided to adopt most of the regulations under Sections 15 and 17 of the Exchange Act, with minor modifications, "in the area of financial responsibility [it] determined that the capital adequacy model designed by the FRBNY, which effectively recognizes certain types of risks as well as risk-mitigating hedging techniques is, with modifications, better suited for brokers and dealers transacting business solely in government securities, other exempted securities, and CFTC-regulated commodity interests than SEC Rule 15c3-1." n102

The Treasury has noted that its methodology is in some instances more generous, and in others less generous, than the SEC methodology. n103 "The major innovation and element of complexity is the haircut calculation. However, the haircut calculation is in fact simpler than it appears on the surface, and it is relatively simple to write a computer program to calculate the numbers." n104

The Treasury rule classifies all non-zero coupon and zero-coupon Treasury market risk instruments into the following "haircut categories": n105

Category	Term or type for non-zero coupon instruments	Term or type for zero coupon instruments
_____	_____	_____
—		
A	Less than 45 days	Less than 45 days
B	At least 45 days but less than 135 days	At least 45 days but less than 135 days
C	At least 135 days but less than 9 months	At least 135 days but less than 9 months

1-3 Federal Securities Exchange Act of 1934 § 3.07

D	At least 9 months but less than 1 year, 6 months	At least 9 months but less than 1 year, 6 months
E	At least 1 year, 6 months but less than 3 years, 6 months	At least 1 year, 6 months but less than 3 years
F	At least 3 years, 6 months but less than 7 years, 6 months	At least 3 years but less than 5 years, 6 months
G	At least 7 years, 6 months but less than 15 years	At least 5 years, 6 months but less than 9 years
H	15 years and over	At least 9 years but less than 12 years
I		At least 12 years but less than 21 years
J		21 years and over
WB	All fixed rate mortgage-backed securities that are Treasury market risk instruments.	
AR	AR All adjustable rate mortgage-backed securities that are Treasury market risk instruments.	

The rule also establishes "haircut" factors for the various haircut categories, n106 as follows:

Category	Net position haircuts (percent)	Hair cut Fact ors Offsets (percent)
A	None	None
B	0.12	0.02
C	0.20	0.03
D	0.45	0.07
E	1.10	0.22
F	2.20	0.44
G	3.30	0.50
H	4.50	0.90
I	7.75	1.55
J	11.25	3.38
MB	3.30	0.66
AR	1.10	0.22

The rule also establishes "Category pair hedging disallowance haircut factors," n107 as follows:

Percent Disallowed									
Category	C	D	E	F	G	H	I	J	MB
B	30	40							

1-3 Federal Securities Exchange Act of 1934 § 3.07

C	20	30					
D		20	30	40			
E			20	30	40		
F				20	30	40	30
G					20	30	30
H						20	40
I							40

Then it identifies "total haircuts" as the sum of "credit risk haircuts" and "market risk haircuts." n108

A Credit Risk Haircut is the sum of total counterparty exposure haircut, total concentration of credit haircut, and credit volatility haircut. n109

A total counterparty exposure haircut is the computation of the "net credit exposure" to each counterparty. The net credit exposure is the excess, if any, of the amount the firm would lose if the counterparty defaults, over the amount of certain offsets the firm has against the counterparty, n110 multiplied by a factor of 5% (to the extent that the net credit exposure to that counterparty does not represent more than 15% of the firm's liquid capital). The total counterparty of exposure haircut is the sum of all of these counterparty haircuts.

If the net credit exposure to any counterparty exceeds 15% of the firm's liquid capital, the amount of such excess is multiplied by a "concentration of credit haircut factor" of 25%, to give the concentration of credit haircut for that counterparty. The sum of all of the concentration of credit haircut for all counterparties is the "total concentration of credit haircut." n111

To arrive at the credit volatility haircut, the firm must determine its gross long and gross short positions in certificates of deposit, bankers acceptances and commercial paper that come within the definition of Treasury market risk instruments and that have a term to maturity greater than 44 days, including futures and forwards thereon, settled on a cash or delivery basis. In each case, it must compute 0.15% of the dollar amount of the larger of the gross long or gross short position. n112

The Market Risk Haircut is the other component of total haircuts. It is computed in accordance with Appendix A to the Treasury's Liquid Capital Rule and is the sum of (a) the "Treasury market risk haircut" and (b) the "other securities risk haircut." n113

The calculation of Treasury market risk haircut involves use of the haircut categories in 17 C.F.R. § 402.2(f). n114 It is the sum of four separate calculations: the "total governments offset portion haircut"; the "total futures and options offset haircut"; the "total hedging disallowance haircut"; and the "residual net positions haircut." n115

To calculate the total governments offset portion haircut portion, the firm must first determine its "gross long immediate position" and its "gross short immediate position" in each haircut category listed in subparagraph (f)(1). n116 The firm must identify the smaller of these two factors for each category in subparagraph (f)(1) and, for each category, multiply it by the offset haircut factor for that category, as listed in subparagraph (f)(2). n117 The sum of the government offset haircuts, as so computed, for all categories is the total government offset haircut.

To calculate the total futures and options offset haircut portion of the haircuts, the firm must first determine the positive and negative aggregate interim haircuts for each of the 10 categories in subparagraph (f)(1). n118 To do this, for each category the firm must compute:

- the "positive net immediate position interim haircut";
- the "gross long futures and forward interim haircut"; and
- the "positive gross options interim haircut." n119

These figures are then totaled.

The total hedging disallowance is the sum of the product of the net of each pair of categories covered in subparagraph (f)(3) multiplied by the percent of disallowance shown for that pair of categories in subparagraph (f)(3). n120 The residual net positions haircut is the sum of the absolute values of all haircuts remaining after the calculation of permissible nettings to arrive at the Total Hedging Disallowance. n121

The sum of the results of these four calculations is the Treasury market risk haircut. To that is added the "other securities haircut," which is the sum of the deductions specified in paragraphs (c)(2)(vi) (haircuts), (c)(2)(viii) (open contractual commitments), Appendix A (relating to options), and Appendix B (relating to commodities transactions) for all long and short positions in securities, future contracts, options, and other inventory which are not Treasury market risk instruments. n122 The total of the Treasury market risk haircut and the other securities haircut is the market risk haircut, which is added to the credit risk haircut to get the total haircuts. n123

Thus, the total haircut includes elements addressing the risk of doing business with a particular counterparty and elements (to a great extent offsetting long and short positions) reflecting an estimation of the risk of holding various kinds of inventory.

The Treasury rules also contain a debt-equity requirement, which is based on the similar Appendix D to the SEC Rule 15c3-1, as modified by Appendix D to the Treasury rule. n124 In addition, the rules limit the withdrawal of equity capital, n125 if, as a result of such withdrawal, a firm's ratio of liquid capital to total haircuts would be less than 150%; n126 or liquid capital minus total haircuts would be less than 120% of the required minimum; n127 or debt capital would exceed 70% of the debt equity total as defined in Rule 15c3-1(d).

[6] Protection of Customer Securities and Credit Balances

The Treasury's rules for the protection of customer securities and credit balances are substantially based on the Commission's rules in this area. Registered broker-dealers n128 are deemed to be in compliance with the Treasury's rules if they comply with the Commission's hypothecation Rules 8c-1 and 15c2-1, Rule 15c3-2 with respect to use of customers' free credit balances, and 15c3-3 with respect to custody of securities and establishment of reserve accounts, with minor modifications to make those rules clearly applicable to government securities brokers and dealers. n129 The same rules are made applicable to all registered government securities broker-dealers. n130 The principal modifications of the Commission rules are as follows. Rule 8c-1(d), which exempts certain liens of a clearing corporation, is expanded to include liens of a clearing bank, but limited to liens arising from loans to acquire the securities subject to the lien. n131 For purposes of Rule 15c3-3, the term "fully paid securities" is defined as all securities held for a customer who has made full payment therefore. n132 "Margin securities" are defined as securities which have not been paid for in full and as to which the government securities broker or dealer has made an extension of credit. n133 The phrase "excess margin securities" means all margin securities having a market value in excess of 140% of the customers' debit balances. n134

In addition, paragraph (b)(4) is added to Rule 15c3-3, to require government securities brokers or dealers that have custody of securities that are the subject of a repurchase agreement with a public customer n135 to: obtain the repurchase agreement in writing; confirm in writing the specific securities that are the subject of the repurchase

agreement at the end of the day the transaction is initiated and each day that there is a substitution of different securities; in the case of a registered broker-dealer, advise the customer that the Securities Investor Protection Corporation n136 has taken the position that the Securities Investor Protection Act does not protect the customer with respect to the repurchase agreement; and maintain possession or control of the subject securities. For purposes of this last requirement, the only acceptable control locations are a clearing corporation or custodian bank in connection with the clearance process; n137 a bank which acknowledges that it has no lien on the securities; n138 or in transit between the firm's offices or in a suitable corporate subsidiary of the firm. n139 The requirement of maintaining custody does not preclude substitution of securities subject to certain recordkeeping requirements and the requirement of an express written disclosure. n140

[7] Custody Requirements for Financial Institutions Not Registered with the Commission

Section 403.5 of the Treasury rules n141 sets forth the requirements for custody of customer securities that are applicable to government securities brokers or dealers that are financial institutions, *i.e.*, those not required to register with the Commission under Section 15, 15B or 15C. As noted in the Treasury's Release publishing the proposed rules for comment:

As a general rule, these financial institutions are directed to comply with [17 C.F.R.] Part 450 with respect to custody of securities held for customers or counterparties. For securities that are held for others by the financial institution in its capacity as a government securities broker or dealer, certain additional requirements are imposed that generally parallel the requirements of SEC Rule 15c3-3.

For example, a financial institution that is a government securities broker or dealer that engages in repurchase transactions is required to comply with provisions that parallel the requirements of § 403.3(e). In addition, the financial institution is required to make daily determinations of the amount of shortfall, if any, of securities required to be in its possession or control and to take steps to obtain securities to cover a shortfall. Section 403.5 does not, however, contain any provisions similar to the requirements of SEC Rule 15c3-2 concerning use of customer funds or SEC Rule 15c3-3 concerning a special reserve bank account for holding customer balances. Rule 15c3-2, by its terms, does not apply to supervised banking institutions and the [Treasury] Department concluded that the exemption should be extended to all supervised financial institutions that are government securities brokers or dealers. Furthermore, because financial institutions generally maintain customer funds as a fundamental part of their business, and because they are supervised in large part to protect their deposits, the Department concluded that it would serve no useful investor protection purpose to impose the added requirement of Rule 15c3-3(e) to require a financial institution to establish a special account for customer funds at another financial institution.

A separate rule was drafted for financial institutions that are government securities brokers or dealers primarily because neither financial institutions nor their regulatory agencies are familiar with Rule 15c3-3. However, the proposed rule is intended to parallel the relevant requirements of Rule 15c3-3. Although the requirements of the proposed rule are stated in less detail than is found in Rule 15c3-3, it is anticipated that its enforcement by the financial institutions supervisory agencies will follow, in practical effect, the Commission's rule. n142

Significant exceptions exist to the rules for other government securities brokers and government securities dealers made applicable to financial institutions. For example, to ensure that a financial institution makes a good faith effort to obtain a security sold to a customer, Section 403.5(b) n143 142 requires that if the purchase of the security has not been initiated by the close of the next business day after receipt of the customer's funds, the institution is required to place the funds in a deposit account belonging to such customer. This provision was inserted because such institutions are not subject to Rule 15c3-3 requiring the setting aside of funds in a Reserve Account.

The required disclosure to be given if the institution has the right to substitute securities under repurchase agreement is the same as for registered government securities brokers and government securities dealers, n144 except that it refers to potential liens of "third persons" instead of to the seller's clearing bank. n145 Branches and agencies of foreign banks that do not qualify for the exemption in Section 401.6 n146 must, in addition to other requirements, pledge assets at an insured bank n147 equal to the net amounts relating to government securities owed to customers, computed in accordance with Rule 15c3-3(e) and Exhibit A thereto. n148

Section 403.6 of the Treasury rules n149 makes it clear that a futures commission merchant that is also a government securities broker or dealer must comply with 17 C.F.R. Part 403, except to the extent that its custody of customer's securities is incidental to its futures business. n150

[8] Recordkeeping and Record Preservation

As in the case of capital requirements, compliance with the SEC's recordkeeping requirements n151 by registered broker-dealers is sufficient to satisfy the Treasury's rules. n152 These requirements have been adopted for government securities brokers and dealers registered under Section 15C with some modifications. Significant among the requirements is the requirement that a ledger account of repurchase and reverse repurchase agreements with customers must be maintained, and these positions must be reflected in the security position ledgers and confirmations. n153 In addition, the requirement of Rule 17a-3(a)(11) to make trial balances is modified to require the balances to reflect computations under the appropriate capital responsibility requirements for government securities brokers and dealers. n154

No records are required with respect to the sale and redemption of U.S. Savings Bonds, Notes and Stamps. n155 Similarly, the record retention rule has been somewhat modified by the Treasury rules to refer to special provisions applicable to government securities brokers and government securities dealers with respect to capital requirements and possession and custody of customers' assets. n156

Government securities brokers and dealers that are financial institutions, and thus required only to give notice to their appropriate regulatory authority under Section 15C(a)(1)(B), are subject to the same record keeping and retention requirements as registered government securities brokers and government securities dealers, except those exempted pursuant to section 401 of the Treasury regulations. n157 In addition, national and state banks, and certain branches or agencies of foreign banks subject to specified federal bank regulations (provided that those regulations are complied with without regard for exemptions therein for government securities transactions) n158 are exempted if they make and keep current the following additional records:

- a securities ledger, which also covers repurchase and reverse-repurchase positions, complying with Rule 17a-3(a)(5); n159 and
- a Form MSD-4, or G-FIN-4, for each associated person, a Form U-5, MSD-5 or G-FIN-5 for each terminated associated person, n160 and Form G-FIN and, if applicable, G-FINW, for the firm. n161

[9] Securities Counts

Registered government securities brokers and government securities dealers must comply with Rule 17a-13, with respect to securities counts, as modified by the Treasury regulations expressly to include repurchase and reverse-repurchase agreements. n162

[10] Reporting Requirements

Compliance by registered broker-dealers with SEC Rules 17a-5 (financial reporting) and 17a-11 (supplemental

reporting of financial or record keeping problems) constitutes compliance with the Treasury regulations on these matters. n163

Registered government securities brokers and government securities dealers are generally required to make the same kinds of reports. However, significant modifications exist. Instead of Form X-17A-5 (the FOCUS Report), the Treasury has promulgated Form G-405 for reporting financial condition. n164 163 The format of Form G-405 is similar to the FOCUS Report, but it has been designed to relate to the government securities broker or dealers' computation of liquid capital instead of the net capital computation under Rule 15c3-1. n165

Adjustments have been made in Rule 17a-5 to make the Treasury reporting requirement relate to requirements applicable to government securities brokers and government securities dealers with respect to custody and control of customer securities n166 and liquid capital n167 and to delete reference to the Securities Investor Protection Act. n168 Similar modifications in the SEC rule have been made for government securities interdealer brokers n169 and government securities brokers and government securities dealers that are futures commission merchants. n170

Most of the provisions of Rule 17a-11, which relates to supplemental reports when a firm's capital falls below specified levels or it discovers a material inadequacy in its recordkeeping system, have been made applicable to government securities brokers and government securities dealers with minor modifications to substitute the relevant references to the Treasury regulations with respect to liquid capital, recordkeeping and audit requirements. n171

[11] Forms

The Treasury has promulgated several filing and reporting forms, which follow the pattern of SEC forms. These are:

- Form G-FIN--Similar to Form BD--for notification of states by a government securities broker or dealer under Section 15C(a)(1)(B). n172
- Form G-FINW--Similar to Form BDW--for notification of cessation of status as a government securities broker or dealer under Section 15C(a)(1)(B). n173
- Form G-FIN-4--Similar to Form U-4--for notification by persons associated with a government securities broker or dealer under Section 15C(a)(1)(B). n174
- Form G-FIN-5--Similar to Form U-5, for notification of termination of affiliated person status under Section 15C(a)(1)(B). n175
- Form G-405--Similar to Form X-17A-5--the FOCUS Report--for reporting financial condition of government securities brokers and government securities dealers. n176

(n19)Footnote 19. Rule 3a43-1(b)(2)(i).

(n20)Footnote 20. Rule 3a43-1(b)(2)(ii).

(n21)Footnote 21. Rule 3a43-1(b)(2)(iii).

(n22)Footnote 22. Rule 3a43-1(b)(3).

(n23)Footnote 23. A "CFTC-regulated person" is a person registered with the CFTC, a contract market designated

by the CFTC, an affiliated clearing organization of such a contract market, or a floor trader on such a contract market. Rule 3a44-1(a).

(n24)Footnote 24. Rule 3a44-1(b). *Compare* text accompanying n.16 *supra*.

(n25)Footnote 25. Rule 3a44-1(b)(1).

(n26)Footnote 26. Rule 3a44-1(b)(2).

(n27)Footnote 27. Rule 3a44-1(b)(3).

(n28)Footnote 28. Rule 3a44-1(b)(4).

(n29)Footnote 29. Rule 3a44-1(b)(5).

(n30)Footnote 30. Rule 3a44-1(b)(6).

(n31)Footnote 31. Section 15C(a)(5).

(n32)Footnote 32. 17 C.F.R. § 401.1.

(n33)Footnote 33. 17 C.F.R. § 401.2. Such depository institutions would nevertheless be subject to 17 C.F.R. § 450, concerning custodial holdings of government securities.

(n34)Footnote 34. 17 C.F.R. § 401.3. Such institutions would nevertheless be subject to 17 C.F.R. § 450, concerning custodial holdings of government securities.

The exemption for financial institutions that do not hold themselves out as a government securities broker is independent of the 500-transaction and networking exemptions. However, in adopting this exemption, the Treasury noted that "even though inclusion of brokerage services on a summary list of services available to customers would not be considered 'holding out,' any financial institution that performs substantially more than 500 such transactions per year may wish to analyze carefully whether it is in fact actively soliciting such transactions." 17 C.F.R. ch. IV, Part B(3), May 26, 1987. The 500-transaction exemption includes the networking exemption. Any networking transactions count against the 500-transaction limitation. *Id.* However, transactions exempt under 17 C.F.R. §§ 401.1 and 401.2 do not count against the 500-transaction limitation. The exemption expressly applies to insured federal credit unions, 17 C.F.R. § 401.3(c), but not to registered broker-dealers and branches or agencies of a foreign bank. In addition, the exemption applies only insofar as the firm acts as a broker, not as a dealer. The Treasury has noted that it may be difficult to distinguish between activities as a broker and as a dealer, particularly in a book-entry environment where all customer securities must be held on the books of another entity. Two major characteristics of an agency transaction are that the transacting broker does not sell from, or purchase for, his own inventory and that an explicit, transaction-based fee or commission is charged. Transactions in a fiduciary capacity which are initiated by the fiduciary rather than the customer are generally not brokerage transactions but reflect the financial institution acting as investor. *See* n.33 *supra*.

(n35)Footnote 35. 17 C.F.R. § 401.4. This exemption, like 17 C.F.R. § 401.3, is not available to registered broker-dealers or branches or agencies of foreign banks but is expressly available to insured credit unions. 17 C.F.R. § 401.4(c). Financial institutions relying on this exemption must comply with 17 C.F.R. § 450, with respect to custodial holdings of government securities, and 17 C.F.R. § 403.5(d), concerning repurchase transactions with customers. In addition, 17 C.F.R. § 401.4(a)(3) also contemplates exemption for "such other activities as have been exempted by regulation under this subchapter."

The Treasury has noted that in adopting these exemptions for activities as a "dealer," it has not identified the line of demarcation between an investor or trader, who would not be required to register, and a dealer, who would. It referred

to the SEC staff's no-action position that an entity may be regarded as a trader even if it buys and sells a high volume of government securities on a fairly regular basis, as long as the transactions are done by the entity as principal and not directly or indirectly for or at the request of customers, and the entity does not hold itself out or otherwise act as a dealer. The Treasury recommended that institutions that have concerns about their status as traders or dealers should address these concerns to the Chief Counsel of the SEC's Division of Market Regulation under SEC staff no-action procedures. 17 C.F.R. ch. IV, Part B(4), May 26, 1987.

(n36)Footnote 36. 17 C.F.R. § 401.5. Such credit unions would be subject to 17 C.F.R. § 450 with respect to custodial holdings of government securities and 17 C.F.R. § 403.5(d) concerning repurchase transactions with customers.

(n37)Footnote 37. 17 C.F.R. § 401.6. Such foreign bank agencies or branches would be subject to 17 C.F.R. § 450 with respect to custodial holdings of government securities.

(n68)Footnote 68. Section 15C(a)(5).

(n69)Footnote 69. Section 15C(b):

(1) The Secretary [of the Treasury] shall propose and adopt rules to effect the purposes of this chapter with respect to transactions in government securities effected by government securities brokers and government securities dealers as follows:

(A) Such rules shall provide safeguards with respect to the financial responsibility and related practices of government securities brokers and government securities dealers including, but not limited to, capital adequacy standards, the acceptance of custody and use of customers' securities, the carrying and use of customers' deposits or credit balances, and the transfer and control of government securities subject to repurchase agreements and in similar transactions.

(B) Such rules shall require every government securities broker and government securities dealer to make reports to and furnish copies of records to the appropriate regulatory agency, and to file with the appropriate regulatory agency, annually or more frequently, a balance sheet and income statement certified by an independent public accountant, prepared on a calendar or fiscal year basis, and such other financial statements (which shall, as the Secretary specifies, be certified) and information concerning its financial condition as required by such rules.

(C) Such rules shall require records to be made and kept by government securities brokers and government securities dealers and shall specify the periods for which such records shall be preserved.

* * *

(4) Rules promulgated and orders issued under this section shall--

(A) be designated to prevent fraudulent and manipulative acts and practices and to protect the integrity, liquidity, and efficiency of the market for government securities, investors, and the public interest; and

(B) not be designated to permit unfair discrimination between customers, issuers, government securities brokers, or dealers, or to impose any burden on competition not necessary or appropriate in furtherance of the purposes of this title.

(5) In promulgating rules and issuing orders under this section, the Secretary--

(A) may appropriately classify government securities brokers and government securities dealers (taking into account relevant matters, including types of business done, nature of securities other than government securities purchased or sold, and character of business organization) and persons associated with government securities brokers and government securities dealers;

(B) may determine, to the extent consistent with paragraph (2) of this subsection and with the public interest, the protection of investors, and the purposes of this chapter, not to apply, in whole or in part, certain rules under this section, or to apply greater, lesser, or different standards, to certain classes of government securities brokers, government securities dealers, or persons associated with government securities brokers or dealers;

(C) shall consider the sufficiency and appropriateness of then existing laws and rules applicable to government securities brokers, government securities dealers, and persons associated with government securities brokers and government securities dealers; and

(D) shall consult with and consider the views of the Commission and the Board of Governors of the Federal Reserve System, except where the Secretary determines that an emergency exists requiring expeditious or summary action and publishes its reasons for such determination.

(6) If the Commission or the Board of Governors of the Federal Reserve System comments in writing on a proposed rule of the Secretary that has been published for comment, the Secretary shall respond in writing to such written comment before approving the proposed rule.

(7) No government securities broker or dealer shall make use of the mails or any means or

instrumentality of interstate commerce to effect any transaction in, or to induce or attempt to induce the purchase or sale of, any government security in contravention of any rule under this section.

In October 1993, the House passed H.R. 618 to reauthorize permanently the Secretary of the Treasury's rulemaking authority under the Government Securities Act of 1986. 1993 SEC Ann. Rep. 27.

(n70)Footnote 70. Section 15C(g)(2).

(n71)Footnote 71. 17 C.F.R. § 400.2(d).

(n72)Footnote 72. See Section 15(b)(8), which was amended by the Government Securities Act of 1986 to extend its scope to brokers and dealers in government securities.

(n73)Footnote 73. Section 15C(e)(1). The SEC, after consultation with the Secretary of the Treasury, can exempt any government securities brokers or dealers from this requirement. Section 15(C)(e)(2).

(n74)Footnote 74. See § 3.05 *supra*.

(n75)Footnote 75. NASD Manual (CCH) P 2195. See NASD Notice to Members No. 87-24 (Apr. 14, 1987), proposing amendments of subparagraphs (4), (5), (7) and (9) of Section 35(c).

(n76)Footnote 76. NASD Notice to Members No. 87-33 (June 30 1987); NASD Q & A Report, vol. 7, No. 5 (June 30, 1987).

(n77)Footnote 77. NASD Notice to Members No. 87-33 (June 30, 1987). See n.75 *supra* (with respect to filing Form BD with NASD).

(n78)Footnote 78. Rule 15c3-1. See § 3.03[4] *supra*.

(n79)Footnote 79. The Liquid Capital Rule is codified at 17 C.F.R. §§ 402.1, 402.2.

(n80)Footnote 80. 17 C.F.R. § 402.1(b). This means registered under Section 15 or Section 15B. See Section 3(a)(48).

(n81)Footnote 81. 17 C.F.R. § 402.1(c)(1). See Section 3(a)(34) for the definition of "appropriate regulatory agency." This exception does not apply to any government securities broker or dealer required to register under Section 15C(a)(1)(A); the rule is intended to apply only to those not regulated before the effectiveness of the GSA. See 17 C.F.R. ch. IV (II)(c), February 19, 1987. This was done to avoid the imposition on adequately regulated entities of potentially conflicting and unduly burdensome regulations. The Treasury has cited the following kinds of financial institutions as being "adequately regulated": banks and bank holding companies that are subject to supervision of the Federal Reserve Board, Comptroller of the Currency, and Federal Deposit Insurance Corporation, and thrift institutions insured through the Federal Savings and Loan Corporation or the Federal Deposit Insurance Corporation. However, government securities brokers and government securities dealers which are subsidiaries and affiliates of such companies would not be exempt unless they are also directly subject to capital regulations of an appropriate regulatory authority. *Id.*

(n82)Footnote 82. 17 C.F.R. § 402.1(c)(2).

(n83)Footnote 83. 17 C.F.R. § 402.1(d). The CFTC capital requirements are in 17 C.F.R. § 1.17; the SEC capital requirement is in Rule 15c3-1.

(n84)Footnote 84. "Government securities interdealer broker" means an entity engaged exclusively in business as a

broker effecting transactions in government securities, on a fully disclosed or partially disclosed basis, for counterparties that are government securities brokers or dealers that have registered or given notice under Section 15C(a)(1), and that promptly transmits all funds and delivers all securities received in connection with these activities and does not otherwise hold funds or securities for or owe money or securities to its counterparties, and (except as provided in 17 C.F.R. § 402.1(e)(2)(ii)) does not have or maintain any government securities in its proprietary or other accounts. 17 C.F.R. § 402.1(e)(2)(i).

In transactions effected on a "fully disclosed basis," the firm knows the identity of its counterparty for which the transaction is effected. In transactions effected on a "partially disclosed basis," the counterparties, if not aware of the exact identity of each other, have the right to obtain such information, or are aware and have consented to the identity of a specific group of entities from which the counterparty is chosen. *Id.*

The kinds of proprietary positions which can be maintained pursuant to 17 C.F.R. § 402.1(e)(2)(ii) are:

- overnight reverse repurchase or securities borrowed transactions solely for the purpose of facilitating, or deducting its financing expense in connection with, clearance of government securities transactions;
- subordinated loans pursuant to the Uniform Net Capital Rule 15c3-1(d);
- compliance with collateral or depository requirements of a clearing corporation with which it participates for clearance of government securities transactions; and
- investment of excess cash.

The maturities of the government securities held for these purposes (except overnight reverse repurchase or securities loaned transactions) must be not more than one year.

(n85)Footnote 85. 17 C.F.R. § 402.1(e)(2)(i).

(n86)Footnote 86. 17 C.F.R. § 402.1(e)(3).

(n87)Footnote 87. See Exch. Act Rel. No. 34-49830, and amendments to 17 C.F.R. §§ 200, 240.

(n88)Footnote 88. 17 C.F.R. § 402.1(e)(4)-(8).

(n89)Footnote 89. 17 C.F.R. § 402.2(c). See § 3.07[5] *infra*.

(n90)Footnote 90. See 17 C.F.R. § 402.2(f)(2). See also § 3.07[5] *infra*.

(n91)Footnote 91. 17 C.F.R. § 402.2(d)(1) and (2). A "Treasury market risk instrument" is defined to mean the following dollar denominated securities, debt instruments and derivative instruments:

- (i) government securities, except equity securities and mortgage-backed securities that do not pass through to security holders a pro-rata portion of monthly payments of principal and interest;
- (ii) zero-coupon receipts or certificates based on marketable Treasury notes or bonds;
- (iii) certificates of deposit of no more than one year to maturity;

(iv) bankers acceptances;

(v) commercial paper of no more than one year to maturity, rated in one of the three highest categories by at least two nationally recognized standard rating services; and

(vi) futures (and options thereon), forwards, and options on any of the instruments in paragraphs (i) through (v), or on time deposits whose changes in yield are closely correlated with certificates of deposit described in paragraph (iii), transactions in which are settled on a cash or delivery basis.

(n140)Footnote 140. The disclosure, which must be prominently displayed, must read as follows:

REQUIRED DISCLOSURE

The [seller] is not permitted to substitute other securities for those subject to this agreement and therefore must keep the [buyer's] securities segregated at all times, unless in this agreement the [buyer] grants the [seller] the right to substitute other securities. If the [buyer] grants the right to substitute, this means that the [buyer's] securities will likely be commingled with the [seller's] own securities during the trading day. The [buyer] is advised that, during any trading day that the [buyer's] securities are commingled with the [seller's] securities, they will be subject to liens granted by the [seller] to its clearing bank and may be used by the [seller] for deliveries on other securities transactions. Whenever the securities are commingled, the [seller's] ability to resegment substitute securities for the [buyer] will be subject to the [seller's] ability to satisfy the clearing lien or to obtain substitute securities.

AUTHOR: W. Reece Bader

§ 3.08 Protection of Customers' Assets

[1] Background

Safeguards for the protection of customers from some of the risks inherent in trading in a highly-volatile market in which assets and purchases are often held by their brokers or dealer for extended periods of time are most easily thought of in two dimensions: protection during broker-dealers' normal operating periods; and protection during periods of broker-dealer financial difficulty or insolvency. Both types of protection stem from the Securities Investor Protection Act of 1970 ("SIPA"), n1 a comprehensive reform of the securities market enacted by Congress at the height of a period of liquidations, failures and mergers of broker-dealer firms which resulted in heavy customer losses. n2

The backdrop for the troubled situation prompting SIPA began with Wall Street's unprecedented "boom" in trading volume between 1965 and 1968. n3 The rapid increase in volume brought about rapid and unstructured expansion in the size and number of brokerage houses, but without an accompanying increase in systems, procedures, and skilled personnel to accommodate the massive growth. n4

As a result, a sharp reduction in the traffic in and market for securities occurred between 1968 and 1970, prompted in large part by the inability of the expanded brokerage houses to accommodate customer needs during the high growth period. n5 The resulting problems, decreases in commissions and decreased value of securities, caused the failure, merger, and involuntary acquisition of nearly 100 brokerage houses which were members of the New York Stock Exchange. n6 The circumstances led Congress to enact SIPA. The original purpose of SIPA was to provide replacement funds to customers facing losses from such failures. This led to the creation of the Federal Deposit Insurance Corporation and the now-defunct Federal Savings and Loan Insurance Corporation, which maintained funds to insure customer assets in the face of federal financial institution failures. n7

The primary function of SIPA was the creation of the Securities Investor Protection Corporation ("SIPC"). SIPC is a public corporation which establishes and administers a fund to secure the assets of securities customers, and conducts liquidation proceedings of member brokerages facing financial difficulties. n8

SIPA also provided for the promulgation of Rule 15c3-3, the "Customer Protection Rule." Rule 15c3-3 installs controls

intended to safeguard customers' assets prior to broker-dealer financial difficulty. The rule first requires that broker-dealers deposit sufficient reserves of cash or cash equivalent to equal their customers' secured cash balances in order to protect these funds against potential losses arising from the broker-dealers' own transactions. The rule also imposes restrictions which preclude the broker-dealers' use of customer's fully paid and excess margin securities.

[2] Regulations in Force Prior to Broker-Dealer Financial Difficulty

Several provisions of the Exchange Act and the rules promulgated thereunder are designed to govern how customer assets are handled by a broker or dealer during periods of normal operation.

The primary mechanism in place to protect customers is found in the Customer Protection Rule, Rule 15c3-3. n9 The Commission promulgated Rule 15c3-3 in response to the problems which eventually led to SIPA's enactment, in particular, brokers' use of customer assets to finance their own transactions. n10 The rule serves two purposes. First, it prohibits the use of customers' excess or fully-paid margin securities for a broker-dealer's own transactions. Second, it requires that customers' credit balances be secured by the segregation of sufficient cash or assets to cover the broker-dealers' net liabilities to his customers, to allow the immediate satisfaction of any claims made against customers funds or securities. n11 The Commission amended the customer protection rule in April of 2003, such that by order of the Director of the Division of Market Regulations, the Commission could expand the categories of permissible collateral. n12

Another mechanism placed for customer asset protection is the net capital requirements found in Rule 15c3-1, n13 which ensures that a broker-dealer's aggregate indebtedness does not exceed its net capital by more than 15 times. n14 Sufficient capitalization is thought to provide some security against insolvency or broker failure. However, this approach has been less than completely adequate in achieving this goal. n15 It is for this reason that the stringent requirements for protection of customer assets *after* insolvency or financial difficulty were put in place. n16 The following is an overview of the regulations, intended to safeguard customer assets under the Exchange Act, imposed on broker-dealers prior to financial difficulty. The hypothecation of customers' securities by exchange members and other brokers and dealers are governed by Section 8(b) (and Rule 8c-1 adopted pursuant thereto) n17 and Rule 15c2-1 (adopted pursuant to Section 15(c)(2)). n18 Lending of customers' securities is governed by Section 8(c). n19 Regulatory safeguards which protect customers' funds and securities held by brokers and dealers are set forth in Section 15(c)(3) and Rule 15c3-3 which is promulgated thereunder. n20 Comprehensive net capital standards for the securities industry are set forth in Rule 15c3-1, which was adopted pursuant to Section 15(c)(3). Borrowing by exchange members and other brokers and dealers is controlled by Section 8(a). n21 Credit regulation is governed by Sections 7 and 11(d)(1). n22 Rules relating to the Commission's inspection of records of brokers and dealers and broker-dealer reports to customers and the Commission are set forth in Section 17 and Rule 17a-5 adopted thereunder. n23 The requirements for reporting and making inquiries regarding missing, lost, counterfeit, or stolen securities are described in Section 17(f)(1) and related Form X-17F-1A and Rule 17f-1. n24

[a] Net Capital Requirements and Alternative Net Capital Requirements

[i] Net Capital Requirements. Protecting the assets of securities investors has always been of paramount concern to the Commission. The early approach to this problem was found in original Section 8(d) of the Exchange Act, in which a limitation was placed on the aggregate indebtedness, in relation to net capital, of all broker-dealers who were members of national exchanges. n25 The Commission's promulgation of Rule 15c3-1 extended the protection of the Act's net capital scheme to all broker-dealers regardless of exchange affiliation. n26

In its present form, Rule 15c3-1 requires that a broker or dealer's aggregate indebtedness not exceed fifteen times its net capital. n27 Net capital is adjudged after eliminating non-liquid assets as well as any appropriate "haircuts" for the broker or dealer's securities held for its own account. Further, broker-dealers must maintain minimum net capital of \$100,000. n28

In December 1997, the SEC began considering whether or not to modify the Net Capital Rule. Specifically, the SEC issued a concept release seeking comments regarding how net capital requirements for broker-dealers should be determined. The release queried commenters as to whether the current "haircut" approach should be modified, and if so, whether risk management statistical models should be employed. n29 At the same time that the SEC issued the comment release, the SEC proposed amendments to Rule 15c3-1 to alter the computation method of "haircuts" to more accurately take into account the risk involved with specific types of securities. n30 Finally, later in December 1997, the SEC proposed an amendment that would formally define the term "nationally recognized statistical rating organization" ("NRSRO"). NRSROs are important organizations in terms of the Net Capital Rule because the SEC utilizes their evaluations of particular securities to determine whether a broker-dealer can reduce its "haircut." The SEC began utilizing NRSROs in 1975, but in 1997, the SEC proposed to officially define the term because of concerns regarding arbitrariness in the current procedure for designating NRSRO status. n31 In June 2003, the Commission issued a concept release and request for comment on credit rating agencies, the appropriate agencies for inclusion, and supervision thereof. n32 No definitive action had been taken as of June 2004.

[iii] Alternative Net Capital Requirements. As an alternative to the foregoing requirements, the Commission established a standard which requires broker-dealers to prevent net capital from falling below the greater of either \$250,000, or 2 percent of aggregate debit items. The debit items that are permissibly calculated toward this are the same as those used in ascertaining the cash deposit required of broker-dealers under Rule 15c3-3. n33

The Net Capital Requirements provide one form of protection for investors against financial problems arising from undercapitalization. The most aggressive safeguards, those found in Rule 15c3-3, are described in the following sections.

On August 20, 2004, the Commission adopted amendments to the net capital rule under the Exchange Act to establish a voluntary, alternative method of computing market and credit deductions for certain broker-dealers. Under the amended Rule, a broker-dealer that maintains \$1 billion of tentative net capital and \$500,000,000 of net capital may apply to the Commission for a conditional exemption from the net capital rule that would permit the broker-dealer to use an alternative, risk-based method of calculating deductions from net capital for market and derivatives-related credit risk. As conditions for the exemption, the broker-dealer must comply with a number of specific requirements. In addition, the broker-dealer's holding company and affiliates must consent to group-wide Commission supervision and comply with certain requirements. n34

[b] Hypothecation and Loan of Customers' Securities.

Prior to 1941, most customer agreements permitted brokers or dealers to commingle customers' securities with their own as collateral for loans used by the firm in its business as a dealer or trader for its own account. n35 Further, such agreements also typically provided that a broker or dealer could borrow more against customers' securities than the customers actually owed. n36 Under the type of loan agreement customarily used between a broker-dealer and a bank or other lender, the lender held a specific lien against the particular securities earmarked for each loan. n37 Additionally, the lender often held a general lien for the total amount of all of the broker-dealer's loans, some of which represented borrowings on the broker-dealer's own securities to finance its own trading activities. n38 A general lien runs against all securities deposited as collateral, even though customers' securities are included among them. n39 The danger in the practice of pledging all securities (including customers' securities) under a single lien was that if a firm experienced financial difficulties, the customers' securities were equally at risk and faced the same losses. n40

Even though customer's agreements and the practices of banks and other lenders in the making and handling of broker-dealers' loans are subject to the antifraud provisions of the federal securities laws, financial difficulties not encompassed in these provisions significantly increased the customer's risk of loss. Additional protection for customers was critically necessary in order to prevent losses that could result from brokerage failures. Accordingly, Section 8 of

the Exchange Act represented an attempt by Congress to limit the exposure of customers to any impairment of a broker-dealer's solvency by making it unlawful for any broker or dealer to risk the securities of its customers as collateral to finance its own trading, speculating, or underwriting ventures. n41

The National Securities Markets Improvement Act of 1996 brought a significant change to this philosophy. That legislation greatly increased the options available to broker-dealers to finance their business operations. Section 104(b) of the 1996 Act eliminated Section 8(a) of the Exchange Act, and renumbered subsections (b) and (c) as (a) and (b). n42 Congress also amended Section 7. n43

Redesignated Section 8(a) of the Exchange Act prohibits the pledge without delivery of title or possession to the pledgee, or any arrangement for the hypothecation of customers' securities by a registered broker or dealer, an exchange member, or a broker or dealer transacting securities business through the medium of an exchange member, in contravention of such rules and regulations as the Commission shall prescribe for the protection of investors, if the hypothecation will, directly or indirectly:

- permit the commingling of a customer's securities without the customer's written consent with the securities of other customers;
- permit the customer's securities to be commingled with the securities of any person other than a bona fide customer; or
- permit liens or claims of pledges on customers' securities to exceed the aggregate indebtedness of all the broker-dealer's customers in respect of securities carried for their accounts. n44

Redesignated Section 8(b) precludes any registered broker or dealer, exchange member, or broker or dealer transacting business through the medium of an exchange member from lending or arranging for the lending of securities carried for the account of any customer without the customer's written consent *or* in violation of Commission rules and regulations prescribed for investor protection. n45

The Commission adopted Rules 8c-1 and 15c2-1 to provide uniformity of regulation for all branches of the brokerage industry, irrespective of whether those subject to the rules are exchange members, brokers or dealers doing business in securities through the medium of an exchange member, or over-the-counter brokers or dealers not transacting business through the medium of an exchange member. n46 Specifically, Rule 8c-1 applies to all exchange members and all brokers and dealers transacting securities business through the medium of an exchange member. n47 Rule 15c2-1 applies to all brokers or dealers regardless of whether they are exchange members or transact business through the medium of an exchange member. Rule 15c2-1 defines a "fraudulent, deceptive, or manipulative act or practice" as used in Section 15(c)(2) to mean any direct or indirect hypothecation of customers' securities under the same circumstances specified by Rule 8c-1. Compliance with Rule 8c-1 will, thus, automatically constitute compliance with Rule 15c2-1, and *vice-versa*. n48

[i] The Hypothecation Rules. Rules 8c-1 and 15c2-1, the "hypothecation rules," n49 are similar in scope and text and contain, with some exceptions, n50 three prohibitions that coincide with the principles established in redesignated Section 8(a). n51 The hypothecation rules provide that no registered broker or dealer, exchange member, or broker or dealer transacting a business in securities through the medium of an exchange member may:

- hypothecate his customers' n52 securities in such a way as to permit the commingling of securities carried for the account of any such customer n53 with securities of other customers, unless he first obtains the written consent of each customer; n54

- hypothecate his customers' securities under a lien for a loan made to him that will permit the securities to be commingled with the securities of any person other than a bona fide customer of the exchange member or applicable broker-dealer under a lien for a loan made to such member, broker or dealer; n55 and
- hypothecate his customers' securities so as to permit the liens or claims thereon to exceed the aggregate indebtedness of all his customers in respect of securities carried for their accounts. n56

A broker or dealer, an exchange member, and a broker or dealer transacting business through the medium of an exchange member cannot hypothecate customers' securities unless, at or prior to the hypothecation, he gives written notice to the pledgee that the security pledged is carried for the account of a customer and that the hypothecation does not contravene Rule 8c-1 or Rule 15c2-1. n57 However, different rules apply in the case of an omnibus account, n58 where written notice to the exchange member or broker-dealer carrying the account is not feasible before each transaction that results in a pledging of securities bought for the account. In these instances, the broker or dealer for whom the account is carried need only furnish a signed statement to the person carrying the omnibus account that all securities in the account will be customers' securities and that hypothecation thereof will not contravene the hypothecation rules. Day loans secured by hypothecated securities under lien or claim of a pledgee made and to be repaid on the same calendar day are exempt from the notice requirements. n59

Commingling of securities in violation of paragraphs (a)(1) or (a)(2) of the hypothecation rules will not be found because the securities carried for the accounts of both customers and non-customers are represented by one or more certificates in the custody of a clearing corporation or other subsidiary organization of an exchange or the FINRA, or a custodian bank under an established system for the central handling of securities. In addition, pursuant to the system for the central handling of securities, the hypothecation is effected by bookkeeping entries without physical delivery of the securities. n60

[iii] Exemptions from the Hypothecation Rules. There is a limited exemption from the requirements of paragraph (a)(1) of Rules 8c-1 and 15c2-1 for securities carried for the account of a customer in a special cash account within the meaning of Section 4(c) of Regulation T of the Board of Governors of the Federal Reserve System. n61

Any lien or claim of a clearing corporation or similar department or association of a national securities exchange or the FINRA for a loan made and to be repaid on the same calendar day is exempt from the operation of paragraphs (a)(2), (a)(3), and (f) (notice and certification requirements) of Rules 8c-1 and 15c2-1, if the lien is incidental to the clearing of securities or loans through the clearing house. n62

The prohibition against commingling customers' securities with non-customers' securities under a lien for a loan to the broker or dealer n63 does not bar the broker or dealer from permitting securities not carried for the account of a customer to be subjected to a lien for a loan made against securities carried for the account of customers or a lien for a loan made and to be repaid on the same calendar day. n64

[c] Cash Reserves and Custody of Securities--Rule 15c3-3.

Following the financial crisis in the securities industry from 1968 through 1970, Congress enacted SIPA n65 to protect investors in the event that their brokers or dealers encounter financial troubles. n66 Section 7(d) of SIPA amended Section 15(c)(3) of the Exchange Act. As amended, the section authorizes the Commission to: regulate brokers and dealers as to the acceptance, custody, carrying, and use of customers' securities, deposits, or credit balances; and require brokers and dealers to establish and maintain reserves against customers' deposits and credit balances. n67

To effectuate these goals, the Commission adopted Rule 15c3-3, the "Customer Protection Rule," n68 in 1972. The rule has several facets. Most significantly, it obliges brokers and dealers to promptly obtain physical possession or control

over fully-paid n69 or excess margin securities n70 carried for the account of customers, n71 or to act within specified time periods where possession or control has not been established. In addition, it requires brokers and dealers, through the Formula for Determination of Reserve Requirements of Brokers and Dealers ("the Reserve Formula"), n72 to maintain cash reserves with respect to customers' funds and funds realized through the use of customers' securities.

Rule 15c3-3 is designed to:

- ensure that customers' funds held by a broker or dealer are used only in safe areas of a broker-dealer's business relating to the servicing of customers, or deposited in a reserve bank account;
- accomplish a separation of the brokerage operation of a firm's business from other firm activities such as underwriting and trading;
- require the maintenance of current records, including a daily determination of security locations and periodic computations of reserves;
- motivate brokers and dealers to process securities transactions expeditiously;
- inhibit unwarranted expansion of a broker-dealer's business through the use of customers' funds;
- ensure that all fully-paid and excess margin securities in the possession or control of a broker or dealer will constitute property of customers entitled thereto, as evidenced by the broker-dealer's records or as otherwise established;
- augment a broad program of financial responsibility for brokers and dealers; and
- facilitate the liquidation of insolvent brokers and dealers and protect customer assets during SIPC liquidation through a clear delineation of specifically identifiable property of the customer in Rule 15c3-3. n73

The Securities Acts Amendments of 1975 amended Section 15(c)(3) to require the Commission to adopt minimum financial responsibility standards for all brokers and dealers. n74 As a result of these amendments, the Commission amended the uniform net capital rule, Rule 15c3-1, n75 that, while preserving the traditional aggregate indebtedness concept, added an alternative net capital requirement (Rule 15c3-1(f)) n76 based on the aggregate debit items in the Reserve Formula as well. n77

The adoption and implementation of the financial responsibility standards necessitated further amendments to the net capital rule and the Reserve Formula. Accordingly, the Commission amended Rules 15c3-1 and 15c3-3 to, *inter alia*:

- require brokers and dealers to reflect the risk to customers' funds and securities that results from the regular maintenance for extended periods short security positions in fail to receive or stock loan accounts and in omnibus accounts established under Section 4(b) of Regulation T n78 or otherwise in the computation of net capital, or mark to the market the short positions;
- clearly reflect the risks associated with transactions in options; and
- add an optional financial responsibility standard (Rule 15c3-1(a)(6)) for certain dealers. n79

[i] Physical Possession or Control of Fully Paid and Excess Margin Securities.

Before discussing the physical possession or control requirements of Rule 15c3-3, it should be noted that a customer's account with a broker or dealer is either a cash account or a margin account. A margin transaction occurs when the broker-dealer extends credit to the customer purchasing the securities. n80 A margin transaction creates a debit balance in the customer's account in the amount of the loan on which the customer pays interest. n81 When a broker-dealer participates in his customer's trading with a margin account, the broker is a creditor of his customer and, if applicable, a debtor of the financier of the transaction. n82 The securities in a margin account are collateral for the customer's indebtedness and may have been pledged by the broker-dealer as collateral to raise the amount of margin extended to the customer. n83

A broker or dealer must promptly obtain and maintain the physical possession or control of all fully-paid n84 and excess margin securities n85 carried for the account of customers. n86 However, temporary lags between the time a customer's fully-paid or excess margin security is required to be in the broker-dealer's possession or control and the time of actual possession or control, occurring solely as a result of normal business operations, will not be deemed to violate the physical possession or control requirement of Rule 15c3-3. This is applicable only as long as the broker or dealer takes timely steps in good faith to establish prompt physical possession or control. n87

The burden of proof is on the broker or dealer to show that the failure to secure physical possession or control of customers' fully-paid or excess margin securities in accordance with Rule 15c3-3(b)(1) is temporary and solely a result of normal business operations, including same day receipt and redelivery (turnaround), and that he has taken timely steps in good faith to establish physical possession or control. n88

Rule 15c3-3(b)(3) provides that a broker or dealer will not be in violation of the rule with respect to physical possession or control of fully-paid or margin securities borrowed from any person if the broker or dealer and the lender enter a written agreement, at or before the time of the loan, that at a minimum sets forth in a separate schedule the basis of compensation for any loan and the rights and liabilities of the parties and provides that the lender will be given a schedule of the securities actually borrowed at the time of borrowing. In addition, the agreement must specify that the broker or dealer must provide the lender collateral pursuant to the rule, *i.e.*, cash or Treasury bills and notes or irrevocable letters of credit issued by a bank, fully securing the loan, and must mark the loan to the market not less than daily so that the loan remains fully collateralized. Finally, the agreement must set forth that the lender of the securities may not be protected by the Securities Investor Protection Act and that any collateral received by the lender may be its sole source of protection in the event of default. n89

Rule 15(c)3-3(b)(4) enumerates procedures which are applicable to broker-dealers when they retain custody of securities that are the subject of a repurchase agreement between the broker-dealer and a counterparty. These procedures include obtaining a written copy of the repurchase agreement; providing a written confirmation of the securities which are the subject of the repurchase agreement pursuant to such agreement at the end of the trading day on which the transaction is initiated or the end of any other day during which the securities are substituted if change in issuer, maturity date, par amount or coupon rate occurs; advising the counterparty that the SIPA does not protect it with respect to the repurchase agreement; and maintaining possession or control of securities that are the subject of the agreement. n90

[A] Control of Securities. Under Rule 15c3-3 a broker or dealer is deemed to have sufficient control over any securities under several circumstances. First, control is found where the securities are represented by one or more certificates in the custody or control of a clearing corporation or other subsidiary organization of either an exchange, a national securities association, or a custodian bank under a Rule 8c-1(g) or Rule 15c2-1(g) system for central handling of securities. In addition, the delivery of the certificates to the broker or dealer must not require the payment of money or value, and the books or records of the broker or dealer must identify the customers entitled to receive the securities. n91 Second, sufficient control is found where the securities are customer securities carried in a special omnibus account n92 by one broker or dealer in the name of another broker or dealer in compliance with Section 4(b) of Regulation T

n93 and the carrying broker or dealer has been instructed to maintain physical possession or control of the securities free of any charge, lien, or claim of any kind in favor of the carrying broker, dealer, or persons claiming through the carrying broker or dealer. n94

The third circumstance in which a broker or dealer is deemed to have sufficient control under Rule 15c3-3 is where the securities are the subject of bona fide items of transfer within 40 calendar days. n95 However, a written confirmation of the items of transfer must be obtained within 40 calendar days. n96 No reconfirmation is required, however, after the first 40 day period to continue the item's status as an item under the broker-dealer's control. n97 Sufficient control is also found where the securities are in custody in a foreign location, including a foreign depository, foreign clearing agency, or foreign custodian bank that the Commission, upon application by a broker, dealer, registered exchange, or the FINRA, or upon its own motion, designates as a satisfactory control location for securities. n98 The securities are held in the custody or control of a bank (as defined in Section 3(a)(6)), subject to no right, charge, security interest, lien or claim of any kind, and must be delivered to the broker or dealer upon demand without payment of money or other value. n99

Sufficient control is deemed to exist under Rule 15c3-3 where the securities are held by a branch office or are in transit between offices of the broker or dealer, or are held by a guaranteed corporate subsidiary under the control of and operated as a branch office of the broker or dealer. n100 Finally, a broker or dealer is deemed to have sufficient control over securities that are held in locations that the Commission, upon application by a broker or dealer, finds and designates as adequate for the protection of customer securities. n101

[B] Requirement to Reduce Securities to Possession or Control. Paragraph (d) of Rule 15c3-3 requires a daily determination from a broker-dealer's books or records of the quantity of fully-paid and excess margin securities in the possession or control of the broker or dealer and the quantity not in his possession or control. A determination of inactive margin accounts (accounts having no activity by reason of purchase or sale of securities, receipt or delivery of cash or securities or similar type events) may be computed at least weekly.

If the records indicate that a customer's fully-paid or excess margin security has not been reduced to the possession or control of the broker or dealer in compliance with Rule 15c3-3(d), and that there are securities of the same issue and class with a broker or dealer or a clearing corporation, then the broker or dealer must promptly issue instructions for the release or return of a security of the same class that is subject to a lien securing moneys borrowed by the broker or dealer. In addition, the security must be released from the lien within two business days after the date the instructions are issued, n102 or has been loaned to another broker-dealer or a clearing corporation and the security must be returned within five business days after the date the instructions issued. n103 If a security of the same class not reduced to possession or control is included in the books or records as failed to receive over 30 days, prompt steps must be taken to buy-in or otherwise acquire the security. n104

If a security of the same class is receivable by the broker or dealer as stock dividend, stock split, or similar distribution for more than 45 days, prompt steps must similarly be taken to obtain physical possession or control of the security through a buy-in procedure or otherwise. n105

A broker or dealer subject to the Rule 15c3-3 physical possession or control requirements must prepare and maintain a current and detailed description of the procedures used to obtain physical possession or control of customers' fully-paid and excess margin securities. The records must be made available, upon request by the Commission and the designated examining authority for the broker or dealer. n106

[C] Buy-in of Short Security Differences. A broker or dealer must, within 45 calendar days after the date of the examination, count, verify, and compare securities, pursuant to Rule 17a-13 n107 or to the annual report of financial condition in accordance with Rule 17a-5, n108 buy-in all short security differences not resolved during the 45-day period. n109

[D] Delivery of Securities. Paragraph (1) of Rule 15c3-3 delineates the right of a customer of a broker or dealer to the physical delivery of certificates for fully-paid and excess margin securities. n110 However, a broker or dealer has the right under Section 7(b) n111 of Regulation T to retain collateral for his own protection beyond the requirements of Regulation T for excess margin securities not reasonably required to collateralize the customer's indebtedness to the broker or dealer. n112

[E] Completion of Sell Orders on Behalf of Customers. If a broker or dealer executes a sell order but does not obtain possession of the securities from the customer within 10 business days n113 after the settlement date, the broker or dealer must immediately purchase securities of like kind and quantity to close the transaction. n114 For purposes of the 10 business day limitation, a broker or dealer who maintains a special omnibus account with another broker or dealer in compliance with Section 11 of Regulation T n115 is not deemed a customer of the other broker or dealer. n116

[F] Extension of Time. A broker or dealer may apply to a registered securities exchange or the FINRA for an extension of any period specified in paragraphs (d)(2) (securities listed as failed to receive over 30 calendar days), (d)(3) (security dividend receivable, stock split or similar distribution for more than 45 calendar days), (h) (short security differences not resolved within 45 calendar days pursuant to Rule 17a-5 or Rule 17a-13), and (m) (customer must promptly deposit with the broker or dealer the securities sold within 10 business days) of Rule 15c3-3 relating to the period of time a broker or dealer is required to buy-in a security.

The exchange or the FINRA may grant the extension for one or more limited periods commensurate with the circumstances, if it is satisfied that the broker or dealer has acted in good faith in making the application and that exceptional circumstances warrant the action. n117 Any extension granted, together with the justification therefor, must be recorded and preserved for at least three years by the exchange or the FINRA. n118

[ii] Special Reserve Bank Account for the Exclusive Benefit of Customers.

Paragraph (e)(1) of Rule 15c3-3 requires every broker or dealer to maintain, at all times, with a bank, a "Special Reserve Bank Account for the Exclusive Benefit of Customers" ("Reserve Bank Account"), separate from any other bank account of the broker or dealer, into which must be deposited all cash and qualified securities n119 in amounts computed in accordance with the Reserve Formula. n120

No broker or dealer may accept or use any of the amounts under items comprising Total Credits under the Reserve Formula except for the purposes specified under items comprising Total Debits under the formula. n121 To the extent that Total Credits exceed Total Debits under the formula, at least the net amount of the excess must be maintained in the Reserve Bank Account. n122

The broker or dealer must compute the net amount weekly at the close of the last business day of the week and deposit it in the Reserve Bank Account no later than one hour after the opening of banking business on the second following business day. n123

[A] Notification of Banks. A broker or dealer required to maintain a Reserve Bank Account or who maintains a Special Account referred to in paragraph (k) of Rule 15c3-3 must obtain from each bank in which he has a Reserve Bank Account or Special Account a written notification that the bank was informed that all cash and qualified securities so deposited are being held for the exclusive benefit of the broker-dealer's customers in accordance with Commission regulations, and are being kept separate from any other accounts maintained by the broker or dealer with the bank. n124 In addition, the broker or dealer must contract in writing with the bank that the cash and qualified securities will never be used directly or indirectly as security for a loan made by the bank to the broker or dealer, and will not be subject to any right, charge, security interest, lien, or claim of any kind in favor of the bank or any person claiming through the bank. n125

[B] Withdrawals from the Reserve Bank Account. A broker or dealer may make withdrawals from the Reserve

Bank Account provided, at the time of withdrawal, the amount remaining in the account is not less than the amount then required by paragraph (e) of Rule 15c3-3. n126 The bank may presume that a request for withdrawal conforms with Rule 15c3-3. n127 The broker or dealer must, on the day of the withdrawal, record the computation that is the basis for the withdrawal and preserve the computation in accordance with Rule 17a-4, which provides for record preservation. n128

[C] Notification of Failure to Make a Required Deposit. If a broker or dealer fails to make a deposit in the Reserve Bank Account or Special Account as required by Rule 15c3-3, he must immediately send notice to the Commission and the regulatory authority that examines the broker or dealer as to financial responsibility, to report the failure. n129 The broker or dealer must promptly issue a written confirmation of the notice. n130 In addition, in January of 2004, the Commission adopted a new rule requiring every transfer agent to establish and implement written procedures for the cancellation, storage, transportation, destruction, or other disposition of securities. n131

[D] Formula for Determination of Reserve Requirement--Exhibit A. The formula contained in Rule 15c3-3a for the determination of the reserve requirement for brokers and dealers contains 14 Items and six Notes. Items 1 through 9 are the Credits under the Reserve Formula; Items 10 through 13 are the Debits. Item 14 is the excess of total Credits (sum of Items 1 through 9) over total Debits (sum of Items 10 through 13) that must be deposited n132 in the Reserve Bank Account according to paragraph (e) of the Rule. n133

The formula in Exhibit A to Rule 15c3-3 counts as Credits those funds for which the broker-dealer must be accountable, and regards as Debits those permissible areas where the funds may be freely deployed. The excess of total Credits over total Debits n134 must be deposited in a Special Reserve Bank Account. n135

The following nine Items constitute the Credits portion of the Reserve Formula:

- free credit balances n136 and other credit balances in customers' security accounts; n137
- monies borrowed that are collateralized by securities carried for the accounts of customers; n138
- monies payable against customers' securities loaned; n139
- customers' securities failed to receive; n140
- credit balances in firm accounts attributable to principal sales to customers;
- market value of stock dividends, stock splits, and similar distributions receivable outstanding over 30 calendar days;
- market value of short security count differences over 30 calendar days old;
- market value of short securities and credits (not to be offset by longs or by debits) in all suspense accounts over 30 calendar days; and
- market value of securities that are in transfer in excess of 40 calendar days and have not been confirmed to be in transfer by the transfer agent or the issuer during the last 40 days.

Items which constitute Debits under the Reserve Formula are:

- debit balances in customers' cash and margin accounts excluding unsecured accounts and accounts doubtful of collection; n141

- securities borrowed to effectuate short sales by customers and securities borrowed to make delivery on customers' securities failed to deliver;
- undelivered customers' securities not older than 30 calendar days; and
- margins required and on deposit with the Options Clearing Corporation for all option contracts written or purchased in customer accounts. n142

[iii] Exemptions. Paragraph (k) of Rule 15c3-3 exempts, from the provisions of the rule, a broker or dealer meeting *all* of the following three conditions. First, the broker or dealer's transactions as principal for his own account are limited to the purchase, sale, and redemption of redeemable securities of registered investment companies or of interests or participations in an insurance company separate account. n143 However, a broker or dealer transacting business as a sole proprietor may also effect occasional transactions in other securities for his own account with or through another registered broker or dealer. n144 Second, the broker or dealer's transactions as a broker (agent) are limited to: the sale and redemption of redeemable securities of registered investment companies or of interests or participations in an insurance company separate account; the solicitation of share accounts for insured savings and loan associations; and the sale of securities for the account of a customer to obtain funds for immediate reinvestment in redeemable securities of registered investment companies. n145 Third, the broker or dealer must promptly transmit all funds and deliver all securities received while acting as a broker or dealer, and hold no funds, or securities for, or owe money or securities to, customers. n146

An additional exemption from Rule 15c3-3 applies to a broker or dealer satisfying *either* of the following two conditions. First, the broker or dealer must: carry no margin accounts; promptly transmit all customer funds and deliver all customer securities received as part of his broker-dealer activities; not otherwise hold funds or securities for, or owe money or securities to, customers; and effect all financial transactions with customers through one or more bank accounts, each designated as "Special Reserve Account for the Exclusive Benefit of Customers." n147 Second, the broker or dealer's transactions with customers must consist exclusively of acting as an introducing broker-dealer to a clearing broker-dealer on a fully disclosed basis. The broker or dealer must promptly transmit all customer funds and securities to the clearing broker-dealer who, in turn, carries all the accounts of the customers and customarily maintains and preserves the books and records pertaining thereto in accordance with Rules 17a-3 and 17a-4. n148

The exemptions afforded by paragraphs k(1) and k(2) are parallel to the provisions of paragraphs (a)(2) and (a)(3) of Rule 15c3-1, which authorizes broker-dealers engaging only in specified business activities involving relatively little risk of default on obligations to public customers, to maintain lower (\$5000 or \$2500) amounts of net capital.

In addition, a broker or dealer may apply in writing to the Commission for an exemption from a portion or all of Rule 15c3-3. The Commission may grant the exemption if the broker or dealer demonstrates to the satisfaction of the Commission that he has established procedures for the safeguarding of customer funds and securities comparable with the prescribed safeguards under Rule 15c3-3, and that the public interest or investor protection do not require him to be subject to the Rule. n149

[d] Program for Missing, Lost, Counterfeit, or Stolen Securities.

A long-standing problem in the securities business concerns missing, lost, counterfeit, or stolen securities. In a 1971 *House Report entitled Study of Unsafe and Unsound Practices of Brokers and Dealers*, a list of contributing factors to the missing securities problem included: failure to identify losses; failure to report losses; failure to identify stolen securities; failure to identify security-risk employees; and failure to uncover and eliminate channels for the disposition of stolen securities. n150

The Securities Acts Amendments of 1975 indicated a congressional determination to create a centralized scheme for dealing with the disruptive effects of the loss, theft, or counterfeiting of securities. Section 17(f)(1), added to the Exchange Act in 1975, directed the Commission to establish a program for the reporting of missing, lost, counterfeit and stolen securities and to adopt rules for making inquiry concerning securities coming into the possession or control of certain financial institutions, securities professionals, the FINRA, exchanges, and others including most banks, n151 to determine whether the securities have been reported as missing, lost, counterfeit, or stolen. Congress directed the Commission to balance the benefits of mandating inquiry in any specific situation against the cost and effect on efficient business practices, and to avoid imposing requirements that may affect the legal status of bona fide purchasers in a manner unjustifiably disruptive of normal commercial transactions. n152

In December 1976, the Commission adopted Rule 17f-1 pursuant to Section 17(f)(1) requiring enumerated person, known as reporting institutions, to report all incidents of missing, lost, counterfeit, or stolen securities to an appropriate instrumentality. n153 The Federal Reserve Bank, or any of its branch[es], is the appropriate instrumentality with respect to United States government securities or securities issued by an agency of the United States (such as the Small Business Administration) and the Commission is the appropriate instrumentality for all other securities. n154

To implement Rule 17f-1, the Commission instituted a pilot lost and stolen securities program to monitor the effectiveness of the rule, and initially designated the Securities Information Center, Inc. ("SIC") of Wellesley Hills, Massachusetts n155 to establish and operate a database for receiving reports and inquiries concerning the loss, counterfeit or theft of securities for which the Commission is the appropriate instrumentality for a one-year period ending December 31, 1978. n156 The SIC continues to operate this program for the Commission. n157

In 1979, the Commission abandoned the concept of dual appropriate instrumentalities by deleting the definition of that term from Rule 17f-1, established registration requirements n158 for all reporting institutions subject to Section 17(f)(1) with certain exceptions, n159 created a central database of reported securities thefts and losses through a merger of the SIC and the Federal Reserve Board data bases, and adopted modifications to Form X-17F-1A for reporting missing, lost, counterfeit, or stolen securities. n160

The various self-regulatory organizations have fidelity bonding requirements for their members covering, among other things, misplacement, forgery and alteration, and fraudulent trading of securities.

[i] Registration in the Lost and Stolen Securities Program. Rule 17f-1 requires every reporting institution, including every national securities exchange, exchange member, registered securities association (*i.e.*, the FINRA), broker, dealer, municipal securities dealer, registered transfer agent, registered clearing agency, participant therein, Federal Reserve System member, and bank whose deposits are insured by the Federal Deposit Insurance Corporation to register with the Commission or its designee in accordance with instructions issued by the Commission concerning the lost and stolen securities program. n161

An exchange member who transacts business exclusively on the floor of the exchange solely for other members and does not receive or hold customers' securities need not register. n162 Exemptions exist for brokers or dealers that limit their activities to bond coupons, uncertificated securities, global securities issues, and any securities issue for which neither record nor beneficial owners can obtain a negotiable securities certificate. n163

Registration in the lost and stolen securities program is accomplished by filing a registration form with the SIC, Inc., which the Commission has designated to handle the lost and stolen securities program. Proof of SIC filing is a prerequisite to approval as a member firm of the FINRA and national securities exchanges. A reporting institution may register as a "direct inquirer," or, if its securities transactions are cleared by a direct inquirer, it may register as an "indirect inquirer." n164

[ii] Reporting of Missing, Lost, Counterfeit, or Stolen Securities.

In general, a reporting institution must report securities missing, lost, or stolen from its possession or control and, if the securities have not been reported by another reporting institution, securities missing, lost, or stolen from the possession or control of a person not a reporting institution. n165

For example, if securities are missing from the control of a broker, the broker is required to report pursuant to Rule 17f-1. The transfer agent who receives a copy of Form X-17F-1A concerning the securities need not make a report. n166 By contrast, where a loss of securities is communicated to a transfer agent by a non-reporting entity, such as an individual, the transfer agent must make a report when it receives the information. n167

Section 17(f)(1) requires reports to be made in such form and within such time as the Commission determines by rule as necessary or appropriate in the public interest or for the protection of investors. Information contained in reports about missing, lost, counterfeit, or stolen securities may be obtained on request for a reasonable fee by every reporting institution and other persons as the Commission may designate by rule. n168

[A] Stolen Securities. All reporting institutions are required to report, to the SIC on Form X-17F-1A and to a registered transfer agent for the issue, the discovery of the theft or loss of any security where criminal activity is suspected. n169 The report must be made within one business day of the discovery; the certificate numbers, if known, must be promptly reported. n170 The Federal Bureau of Investigation must be promptly informed of the circumstances of the theft, including the basis for believing that the loss involved criminal activity. n171

[B] Missing or Lost Securities. All reporting institutions must report, to the SIC on Form X-17F-1A and to a registered transfer agent for the issue, the discovery of the loss of any security where no criminal activity is suspected when the security has been missing or lost for two business days. n172 The report must be made within one business day after the end of the two-day period, except that securities lost in transit to customers, transfers agents, banks, brokers, or dealers must be reported by the delivering institution not later than two business days after notice or nonreceipt, or as soon after the notice of nonreceipt as the certificate numbers are known. n173

Securities considered lost or missing following securities counts or verifications required by rule, regulation, or otherwise (such as firm policy or internal audit function report) must be reported not later than ten business days after completion of the count or verification or as soon thereafter as the certificate numbers of the securities can be ascertained. n174

Where securities being delivered through a clearing agency are not received, the delivering institution must supply the receiving institution with the certificate numbers of the securities within two business days from the date of request by the receiving institution. n175 The receiving institution must report the facts within one business day after notification of the certificate numbers to the SIC. n176

Where securities being delivered over the window are not received and the delivering institution has a receipt, the delivering institution must supply the receiving institution with the certificate numbers of the securities within two business days from the date of request by the receiving institution. The receiving institution must report the facts to the SIC within one business day after notification of nonreceipt of the certificate numbers. n177 Where delivery over the window is not received and the delivering institution has no receipt, the delivering institution must report the nonreceipt of the securities to the SIC within two business days after notification of nonreceipt by the receiving institution. n178

Finally, where securities are delivered by mail, or via draft, and payment is not received within ten business days, the delivering institution must confirm with the receiving institution whether the securities were delivered. If the nonreceipt of the securities is confirmed, the delivering institution must report the facts concerning the securities believed missing within two business days after the confirmation to the SIC. n179

[C] Counterfeit Securities. The discovery of any counterfeit security must be reported within one business day of the discovery to the SIC on Form X-17F-1A, to the registered transfer agent for the issue, and to the appropriate law enforcement agency. n180

[D] Recovery of Previously Reported Security. If any security previously reported to be missing, lost, or stolen is recovered or found, it must be reported to the SIC and to a registered transfer agent for the issue on Form X-17F-1A within one business day of the recovery. n181 If a report of loss was previously made to the FBI, recovery of the missing securities must be so reported as well. n182

Recovery must be reported by the institution that reported the security as missing, lost or stolen. However, a report of recovery may be made by a successor institution, trustee, or the recovering institution where the reporting institution no longer exists.

[E] Information to be Reported. All reports made pursuant to Rule 17f-1 on Form X-17F-1A must include, if applicable and available, the following information concerning each security:

- the issuer;
- type of security and series;
- date of issue;
- maturity date;
- denomination;
- interest rate;
- certificate number including prefix or suffix;
- name in which registered;
- distinguishing characteristics, if counterfeit;
- date of discovery of loss or recovery;
- CUSIP number;
- FINS number; and
- type of loss. n183

[iii] Required Inquiries of the SIC. Every reporting institution other than a registered transfer agent must inquire of the SIC whether securities which come into the possession or control of the reporting institution for which it is responsible, or in which the reporting institution is effecting, clearing, or settling a transaction, have been reported as missing, lost, counterfeit or stolen. n184 An inquiry must be made whenever securities certificates are received, whether by pledge, transfer, or in some other manner, unless:

- they are received directly from the issuer or issuing agent on original issue; n185

1-3 Federal Securities Exchange Act of 1934 § 3.08

- they are received from another reporting institution or a Federal Reserve Bank or branch thereof; n186
- they are received from a customer and the securities are registered in the name of the customer or his nominee or were previously sold to the customer, as verified by the internal records of the reporting institution; n187
- they are part of a transaction having an aggregate face value of \$10,000 or less in the case of bonds, or market value of \$10,000 or less in the case of stocks; n188 or
- they are received directly from a drop affiliated with a reporting institution for the purposes of receiving and delivering certificates on behalf of the reporting institution. n189

Inquiries must be made in the manner prescribed by the Commission or its designee. n190

[iv] Permissive Reports and Inquiries. A reporting institution may report or inquire of the SIC about any security not otherwise required by Rule 17f-1 to be the subject of a report or inquiry. n191 The Commission on written request or on its own motion may permit reports and inquiries by any other person or entity on such terms and conditions deemed appropriate and necessary in the public interest and for the protection of investors. n192

[v] Exempt Securities. The following securities are exempt from the reporting and mandatory inquiry requirements of the lost and stolen securities program:

- security issues not assigned CUSIP numbers;
- bond coupons;
- uncertificated securities;
- global securities issues;
- any securities issue for which neither the record nor beneficial owners can obtain a negotiable securities certificate. n193

[vi] Recordkeeping Requirement. Every reporting institution must maintain and preserve, in an easily accessible place for three years, all reports of missing, lost, stolen, or counterfeit securities on Form X-17F-1A filed pursuant to Rule 17f-1, agreements between reporting institutions regarding any aspect of the lost and stolen securities program, and all information received from the Commission or the SIC as a result of inquiry. n194

[vii] Form X-17F-1A. All reports pursuant to Rule 17f-1 are made on Form X-17F-1A. The form contains 23 Items. In addition to the list of information to be reported under paragraph (c)(6) of Rule 17f-1 with respect to each security, n195 there must be reported:

- the name, address, telephone number, and the FINS number with the SIC identifier number of the reporting institution in response to Item 1;
- the type of report, including whether it is a new report (Loss), a report of recovery of previously reported loss (Recovery), or a correction of a report other than a recovery (Update) in response to Item 2;
- the type of loss; whether through the mail, during delivery, on premises of the reporting institution, during clearance or other (Item 4);

- whether the document is a bearer security; and the full name of the registered holder (Item 10);
- whether additional pages are attached (Item 14);
- total current market value for stocks, rights, and warrants; total current face value for bonds (Item 15);
- if reporting a loss, whether a substantial belief of criminality is indicated (Item 17);
- indicate whether a report is filed as required with the FBI (Item 18) or with local police (Item 19);
- identity of a transfer or pay agent to whom a copy of the report is sent (Item 20);
- identity of insurance company to which a copy of the report is sent (Item 21);
- authorized signature (Item 22); and
- date when the form is signed (Item 23).

Form X-17F-1A, "Missing, Lost, Stolen, Counterfeit Securities Report" should be sent to the SIC, the Commission's designee. n196

[3] Procedures Applicable when Broker-Dealer Faces Financial Difficulty

The following summarizes the securities market conditions which prompted the regulatory measures which now govern financially-troubled broker-dealers:

The aftermath of the 1968-70 crisis in the securities industry brought home to the investing public the need for protective measures to safeguard their assets from the claims of other creditors of broker-dealers. The crisis was induced by the two-fold assault of a paper crunch, created by a sudden increase in trading activities, followed by financial overextension during a subsequent market decline. As a result, many broker-dealers were forced to merge, to seek outside financial support and, in all too many cases, to liquidate and go out of business.

The causes of such failures of broker-dealers have been analyzed as being primarily: (1) inadequacies of management; (2) deplorable bookkeeping methods and recording of trades; (3) excessive trading and a concentration on sales rather than service to the customer; and, most importantly, (4) a weakness in the capital structure of the broker-dealer. n197

Prior to 1971, the New York Stock Exchange, the American Stock Exchange, and most of the regional exchanges assumed liability for the customer obligations of insolvent member firms and established guaranty funds to cover these debts at the discretion of the exchanges on the usage of such funds. This created an anomalous situation in which the customers of insolvent nonmember firms were not protected, and affected customers did not have a cognizable legal theory by which to sue an exchange directly to recover from its guaranty fund. n198

As the result of this situation, and following some very substantial failures among both member and nonmember firms, Congress enacted the SIPA n199 in December 1970, and thereby established the SIPC. The SIPC is a nonprofit membership corporation, which, *inter alia*, facilitates the liquidation of financially-troubled broker-dealers n200 and maintains a fund which secures, to a statutory limit, qualifying customer funds in the event of broker-dealer failure.

n201 Since SIPA does not confer upon customers or creditors a private right of action, n202 SIPC initiates liquidation proceedings in federal district court on behalf of aggrieved customers or creditors. n203 Thereafter, if the court determines that protection is appropriate and necessary, a trustee and trustee's counsel is appointed and the matter proceeds as a liquidation overseen by the United States Bankruptcy Court. n204 The SIPC is authorized to protect qualifying customer funds in an amount not to exceed \$500,000 to compensate the amount by which the net equity of each customer exceeds his ratable share of customer property. n205 SIPA's enactment virtually eliminated broker-dealer self-regulation once financial difficulties arise. n206

SIPA was amended in 1978 n207 to boost investor confidence in the securities markets by enhancing SIPA to resolve certain shortcomings that prevented it from being fully effective in its original form. n208 In particular, Congress intended to improve the SIPC's efficiency in liquidating claims by streamlining the procedures to lessen the amount of time during which customers with claims against a failed broker-dealer were unable to proceed with investment activity because their assets were tied up in liquidation proceedings. n209

Specific areas enhanced by the amendments include delaying liquidation proceedings to allow trustees to transfer customer accounts to a solvent broker-dealer, as promptly as possible, redefining SIPA's definition of customer property to include a broader range of protected assets, and increasing available funds per individual claim. n210

[a] The Securities Investor Protection Corporation. The SIPC is a non-profit corporation comprised of a general membership and a Board of Directors. Its membership is comprised of all broker-dealers (on a compulsory basis) who are registered with the Commission. n211 The SIPC's membership is assessed annually to maintain the SIPC's fund which secures certain customer assets in the event of broker-dealer difficulty.

The SIPC's administrative affairs are handled by its seven-member Board of Directors consisting of five Presidential appointees, one appointed by the Secretary of the Treasury, and one by the Federal Reserve Board. n212 Two of the Presidential appointees, who are designated chairman and vice chairman of the SIPC, are members of the general public. The other three represent the securities industry and must be from different regions of the country. n213

The SIPC may, through its Board of Directors, sue and be sued and adopt by-laws as necessary to, *inter alia*, carry out its business; indemnify its directors, officers, employees, and trustees from liability arising from defense or settlement of an action or suit; n214 promulgate rules which define terms used in SIPA, n215 the procedures for liquidating member firms and establishing direct payment procedures, and procedures for the adoption, amendment, and repeal of the SIPC bylaws and rules. n216

Although established pursuant to federal law, the SIPC is neither an agency nor an office of the United States Government. n217 However, the Commission does play a crucial role in the SIPC's operation. For instance, the Commission has oversight powers over any proposed rule changes by the SIPC and thus may require the SIPC to adopt, amend, or repeal any SIPC bylaw or rule. n218 The Commission is also empowered to make loans to the SIPC Fund if it appears insufficient n219 and to participate as a party in any proceeding under SIPA.

[b] The SIPC Fund. Initially, the SIPC Fund balance was to be maintained at a minimum level of \$75 million. n220 Assessments of each member in the amount of one-eighth of one percent of their gross revenues from the securities business was collected shortly after the 1970 enactment of the enabling legislation to form this initial capital. n221

The SIPC Fund balance is now comprised of the assessments collected from SIPC members, n222 in addition to interest earned on investments in United States Government securities, and confirmed lines of credit. n223 The SIPC Board is authorized to borrow money from private capital markets and evidence such funds by the issuing of bonds, notes, or other evidences of indebtedness. n224 As of September 1994, the SIPC has a billion-dollar line of credit from a consortium of private banking and lending institutions. n225

The Commission is authorized to lend the SIPC up to \$1 billion, which the Commission, in turn, is authorized to borrow from the United States Treasury, if the Commission determines that the loan is necessary for the protection of customers of brokers or dealers and the maintenance of confidence in the United States securities markets, and that the SIPC has a plan that reasonably assures prompt repayment of the loan. n226 The SIPC has not yet needed to borrow in this manner. n227 The fund also increases due to interest earned on government securities it holds. n228

The SIPC Board convened a task force in April 1991 to assess the Fund's needs for the future and to establish a target annual growth rate. A target of \$1 billion was set for April 1997, and ten percent was established as the annual growth rate goal. n229

[c] Responsibility for Assessments. All persons registered as brokers or dealers under Section 15(b) of the Exchange Act are required to become SIPC members except:

- persons whose principal business, in the SIPC's determination, is conducted outside the United States; n230 and
- persons whose business as a broker or dealer consists exclusively of the distribution of shares of registered open end investment companies or unit investment trusts; the sale of variable annuities; the business of insurance; or rendering investment advisory services to registered investment companies or insurance company separate accounts. n231

Membership in the SIPC is optional for the exempt classes of brokers and dealers.

Section 4(c)(2) of SIPA empowers the SIPC, by bylaw, to impose on its members assessments as, after consultation with self-regulatory organizations, the SIPC deems necessary and appropriate to maintain the SIPC Fund and repay any borrowings by the SIPC. The assessments may be based upon gross revenues from the securities business n232 or the amount or composition of gross revenues from securities business, dollar volume of transactions, number of customer accounts maintained or amounts of cash and securities in customer accounts, net capital, nature of activities (whether securities business or otherwise) and consequent risks, and other relevant factors. n233

An assessment may not include any charge based on a SIPC member's activities in: the distribution of shares of registered open-end investment companies or unit investment trusts; the sale of variable annuities; the business of insurance; or the business of rendering investment advisory services to one or more registered investment companies or insurance company separate accounts. n234

An assessment pursuant to Section 4(c)(2) at a rate exceeding one-half of one percent during any twelve-month period may be made if the SIPC determines that the assessment will not have a material adverse effect on the financial condition of its members and their customers. n235 A maximum assessment on SIPC members for any twelve-month period may not exceed in the aggregate one percent of a member's gross revenues from the securities business for such period. n236 In addition to the limitations on assessments described above, the SIPC may not impose any assessment other than those described pursuant to its general assessment authority. n237

Presently, SIPC member assessments are calculated by multiplying the member's net operating revenues from the securities business for the fiscal year by an assessment rate established by the SIPC for that fiscal year. n238 The assessment rate is arrived at by deducting the SIPC's projected Fund balance from the target balance for the following year. Annual target balances are based on a net annual growth rate of 10 percent set in 1991 by the SIPC Task Force. n239 The projected Fund amount is determined by taking the Fund balance as of September 30 and adjusting it as follows:

- deducting the SIPC's assessment collections for the period from the prior April to September 30;
- adding the amount of the SIPC's estimated interest income from that September 30 through the end of the following March; and
- deducting the SIPC's estimated liquidation costs and operating expenses from that September 30 through the end of the following March. n240

Once these deductions are made, the assessment rate will equal the amount of needed assessment income divided by the projected assessable revenues of NYSE members. n241 In any event, all members are subject to a minimum annual assessment of \$150. n242 The national securities exchanges and FINRA are the authorized agents for collecting the SIPC Fund assessments. Failure to pay assessments after notice results in the member being barred from engaging in business as a broker or dealer, unless specifically authorized by the Commission. n243

[d] Customer Protection.

SIPA's objective is the protection of members of the investing public, rather than troubled broker-dealers. Congress did not intend SIPA as a "bail-out" of the securities industry, n244 despite the industry's mounting problems in the 1960s-1970s. The Congressional intent is evident from the absence of procedures to reorganize or rehabilitate troubled brokers or dealers who have been subject to a SIPA liquidation proceeding. The sole emphasis is on satisfying qualifying customer claims to the extent possible. n245

[i] Determination of Need and Court Action under Section 5 of SIPA. Section 5(a)(1) of SIPA requires the Commission or any self-regulatory organization to notify n246 the SIPC immediately after the discovery of facts indicating that a broker or dealer subject to its regulation is in or is approaching financial difficulty. n247 Once a referral is received, the SIPC determines whether liquidation proceedings are appropriate. n248 Potential subjects of an SIPC liquidation proceeding include only current members of the SIPC or persons who have been members within the past 180 days.

A member of the SIPC who is the subject of a "5(a) referral" may reduce or terminate his or her securities business voluntarily or under the direction of a self-regulatory organization. n249 A self-regulatory organization may assist or oversee the business reduction or self-liquidation by a member in financial difficulty without being deemed to have assumed any of the member's obligations or liabilities to customers, other creditors, shareholders, or partners of the debtor broker or dealer. n250 Additionally, the self-regulatory organization's participation in the business reduction or self-liquidation, to the extent the self-regulatory organization considers it necessary in order to protect customers, may obviate the need for an SIPC liquidation proceeding. n251 However, the self-regulatory's participation does not necessarily preclude subsequent action by the SIPC.

Before initiating a liquidation proceeding, the SIPC must determine that a member has failed or is in danger of failing to meet its obligations to customers n252 and that any one or more of the following four conditions specified in Section 5(b)(1) of SIPA exist:

- the member is insolvent within the meaning of the Bankruptcy Code, *11 U.S.C. § 101*, or is unable to meet his obligations as they mature;
- the member is the subject of a proceeding pending in any court or before any agency of the United States or any State in which a receiver, trustee, or liquidator for the member has been appointed;
- the member is not in compliance with the financial responsibility n253 or hypothecation rules of the Commission or any self-regulatory organization or the applicable provisions of the Exchange Act; n254

or

- the member is unable to make computations required to comply with the financial responsibility or hypothecation rules. n255

If the SIPC determines that customers of a member need protection under SIPA, it may follow one of three alternatives. If the member to be liquidated has 500 or more customers and obligations to general creditors and subordinated lenders are \$750,000 or more, a trustee other than the SIPC or an employee of the SIPC must be designated by the SIPC. n256 If the member to be liquidated has less than 500 customers and obligations to general creditors and subordinated lenders are less than \$750,000, the SIPC or an SIPC employee may be designated as trustee. n257 Finally, the SIPC may employ the Direct Payment Procedure under Section 10 of SIPA if it determines that the claims of all customers of the member aggregate less than \$250,000, n258 and the claim of each customer is within the limits of protection provided in Section 9(a) (which are \$500,000 per customer, not more than \$100,000 of which may be for cash). n259 In addition, the SIPC may employ the Direct Payment Procedure if the SIPC's cost of satisfying customer claims will be less than the cost of a court-supervised liquidation proceeding n260 and the member's registration as a broker or dealer under Exchange Act Section 15(b) has been terminated or the member has consented to the SIPC's use of the Direct Payment Procedure. n261

[ii] Appointment of Trustee and Attorney. Once the SIPC determines that a member's customers need protection, it may, upon notice to the member, apply to a federal district court for a protective order. n262 Usually, the SIPC files an application for a protective decree at the same time that the Commission seeks an injunction against a broker or dealer for violation of the net capital or recordkeeping rules. If the protective decree is granted, the court will then appoint as trustee and counsel to the trustee such individuals as recommended by the SIPC. n263 The trustee and his counsel may be associated with the same law firm. n264

A person may not be appointed a trustee or attorney for the trustee if he is not disinterested within the meaning of Section 5(b) of SIPA. n265 An attorney who is not disinterested may, with the approval of the SIPC and the court, be employed by the trustee for any purpose other than to represent the trustee in conducting a liquidation proceeding. n266

A hearing on the question of disinterestedness must be promptly held after the appointment of a trustee. Due notice must be given to all persons appearing from the debtor's books and records to have been the debtor's customers with open accounts within the last 12 months, creditors, stockholders, the SIPC, and such other persons as a court may designate. n267

The SIPC is deemed to be a party in interest in any liquidation proceeding. n268 The Commission may participate in the proceeding if it, on its own motion, files a notice of appearance. Thereafter, the Commission may participate as a party. n269 Only the SIPC, not aggrieved customers, may initiate customer protection proceedings under SIPA. n270

SIPA gives the court exclusive jurisdiction of: the debtor and its property, including property located outside the territorial limits of the court and property held as security for a debt or subject to a lien; n271 and any action against the trustee with respect to the liquidation proceedings. n272

In addition, except where inconsistent with SIPA, the court has jurisdiction, powers, and duties conferred on federal courts under the Bankruptcy Code, as well as such other powers and duties as are prescribed by SIPA. n273

The court may stay: any pending bankruptcy, mortgage foreclosure, equity receivership, or other proceeding to reorganize, conserve, or liquidate the debtor or its property, and continue the stay on appointment of a trustee; any proceeding to enforce a lien against the debtor; n274 and the enforcement of, and, upon appointment of a trustee, may continue the stay for an appropriate period, but not abrogate, any right of setoff (except to the extent the right is affected under *Section 553 of The Bankruptcy Code*) and the right to enforce a valid, nonpreferential lien or pledge against the

debtor's property. n275

Provisions exist for removal of all or part of a liquidation proceeding to a referee in bankruptcy to expedite the proceeding n276 and for appointment of a temporary receiver. n277

[iii] Powers and Duties of a Trustee. Section 7(a) gives the trustee the same powers and title with respect to the debtor n278 and his property, and the same rights to avoid preferences, as a trustee in bankruptcy. n279 In addition, the trustee may, with SIPC approval, hire and fix the compensation for all personnel and accountants or other persons needed in connection with the liquidation proceeding. n280 The use of the SIPC employees to aid the trustee is specifically authorized. n281 The trustee may also maintain customer accounts of the debtor to facilitate prompt transfer of accounts to other brokers or dealers pursuant to Section 8(f) of SIPA. n282

A trustee is subject to the same duties as a trustee under the Bankruptcy Code, plus special duties relating to the satisfaction of customer claims for securities by the distribution of securities to the maximum extent possible. n283 The trustee must, with SIPC approval, pay or guarantee loans from banks or other lenders collateralized by securities if the indebtedness does not appear to be greater than the aggregate market value of the securities. n284

The trustee must conduct an investigation to ascertain facts concerning the debtor's fraud, misconduct, mismanagement, irregularities and any causes of action available to the estate, and report to the court and the SIPC in accordance with Chapter 7 of the Bankruptcy Code. n285

[iv] Special Provisions for Liquidation Proceedings.

SIPA requires trustees to notify customers of the commencement of proceedings and to publish notice in one or more newspapers of general circulation. n286 The duty to give notice of his or her appointment to customers applies only to customers who appear to have had an open account with the debtor within 12 months preceding the filing date. n287 Notice to creditors other than customers is the same as that required by the Bankruptcy Code, except that the notice is given by the trustee rather than by the court. n288

A customer must file a written statement of claim within six months after the date of publication of the notice of commencement of liquidation proceeding. n289 A court may, upon application within the six-month period and for good cause shown, extend the time for the filing of a claim by the United States, a state or political subdivision thereof, or an infant or incompetent without a guardian. n290 A trustee is authorized to satisfy claims of a customer for net equity n291 in the most economical and efficient way (*i.e.*, the trustee may decide not to settle all claims from customer property but can use SIPC-advanced monies, cash, securities, or both, at his discretion.) n292 The claims must be received after the expiration of a period of time fixed by a court, not exceeding 60 days after the date of publication of notice.

Section 8(b) requires the trustee to promptly discharge all customer claims relating to, or net equity claims based on, securities or cash that may be ascertained from the debtor's books and records or are established to the trustee's satisfaction. Such claims may be discharged by the delivery of securities to a customer or the making of payments for or to the account of a customer. n293

In 1983, the Commission adopted SIPC Rule 400, "Claims for Standardized Options." The rule provides a uniform procedure for determining what customers may receive in a liquidation proceeding or a direct payment procedure in satisfaction of a claim based upon standardized options positions for purposes of SIPA Sections 7(b)(1), 8(d), and 16(11).

Rule 400, which is still in force in its original form, states that liquidation of all standardized options positions should occur as promptly as practicable after initiation of proceedings. n294 Upon liquidation the dollar amount of all

standardized options positions should be calculated in accordance with Section 16(11) and then credited or debited accordingly to the customer's account. n295 Notwithstanding Rule 400(b), there is no requirement for liquidation of any short position in standardized options covered by the deposit of the underlying securities, in the case of a call option, or treasury bills, in the case of a put option. Any position not liquidated is excluded from the Rule 400(c) calculation. n296 No standardized options positions will be delivered to customers in satisfaction of Section 7(b)(1) claims, or purchased for delivery to customers pursuant to Section 8(d). n297 The rule is not a restriction of any rights of a broker or registered clearing agency to liquidate standardized options positions. n298 The term "standardized options" refers to options traded on a national securities exchange, an automated quotation system of a registered securities association, or a foreign exchange. n299

[A] Customer Related Property. Section 8(c) establishes the priority in which customer property of the debtor may be allocated. First, the SIPC must be reimbursed for discretionary advances made to recover securities through the payment or guarantee of any indebtedness of the debtor to a bank, lender or other person to the extent the securities are apportioned to customer property under Section 6(d) of SIPA. n300

Second, remaining customer property is allocated ratably among customers to satisfy their respective net equity claims. n301 To the extent that a customer's net equity claim is not satisfied by customer property, the customer is entitled to an advance of funds from the SIPC up to \$100,000. n302

Third, the SIPC must then be reimbursed as subrogee for claims of customers that it has satisfied with its own funds. n303 Finally, the SIPC must be reimbursed for any advances made to guarantee or secure any indemnity pursuant to Section 9(c)(2) of SIPA. n304 Any customer property remaining after the satisfaction of customer and SIPC claims becomes part of the general estate.

Section 8(c)(2) requires the trustee to deliver customer name securities n305 to customers if the customers are not indebted to the debtor. If a customer has an outstanding indebtedness, he or she may pay the trustee, and, with the trustee's approval, reclaim customer name securities within a period set by the trustee. n306 If a customer fails to liquidate any existing indebtedness, the trustee may net the customer's account and pay to the customer his net equity on the filing date. n307 Transfers that are void or voidable under the Bankruptcy Code and those that have the effect of granting preferential treatment to individual customers are recoverable claims under SIPA. n308

To restore customer accounts to their filing date positions, Section 8(d) authorizes the trustee to purchase securities in the open market or otherwise obtain them to satisfy customer claims for net equities based on securities n309 and for the transfer of customer accounts. n310 Customer property and moneys advanced by the SIPC may be used by the trustee to pay for securities so purchased. n311

[B] Closeouts. Section 8(e) provides for the closing out or completion of contracts with other brokers or dealers left open by the insolvency of the debtor. n312 If the other broker or dealer closes-out the contract pursuant to Section 8(e) and derives a net profit, he must pay it to the trustee. n313 If he realizes a net loss, he may file a claim against the debtor with the trustee for the loss. To the extent that the loss of the broker or dealer arises from contracts in which he was acting for a customer, he is entitled to SIPC advances up to \$40,000 per customer to cover the loss. n314 Any losses suffered by a broker or dealer not acting for a customer constitutes a claim against the general estate not payable from SIPC advances. n315

The closeout provisions under Section 8(e) are not applicable to a registered clearing agency that has its own rules on close-outs for its members or to participants in the clearing agency, to the extent their claims may be processed within the clearing agency, unless the SIPC specifically rules otherwise. n316 If the registered clearing agency or a participant suffers a loss, it may claim such loss against the general estate only and may not be paid from SIPC funds. n317

Section 8(f) permits the trustee, subject to SIPC approval, to sell or otherwise transfer all or part of a customer's account

of the debtor to another broker or dealer without the customer's consent.

[v] SIPC Advances. To accelerate the payment of net equity claims of the debtor's customers, Section 9 permits the SIPC to advance to the trustee monies to satisfy customer claims for the excess of net equity of each customer over the customer's ratable share of customer property, up to \$500,000. If all or any portion of the excess is a claim for cash, the amount of the SIPC advance may not exceed \$100,000 for such cash claim of each customer. n318 A customer who holds accounts with the debtor in *bona fide* separate capacities is deemed a different customer in each capacity. n319

No advance may be made by the SIPC to satisfy, directly or indirectly, net equity claims of a customer who is: a general partner, officer, or director of the debtor; a beneficial owner of five percent or more of any equity security of the debtor (other than a nonconvertible stock having fixed preferential dividend and liquidation rights); a limited partner with a participation of five percent or more in the net assets or net profits of the debtor; or a person who, directly or indirectly, and through agreement or otherwise, exercised or had the power to exercise a controlling influence over the management or policies of the debtor. n320

In addition, the SIPC may not advance funds to satisfy the net equity claims of a customer who is a broker, dealer, or bank unless the net equity claims, as established from the books and records of the debtor, broker, dealer, bank, or otherwise to the satisfaction of the trustee, arose out of transactions for customers n321 of the broker, dealer or bank. n322 In that event, each customer is deemed a separate customer of the debtor. n323

To the extent that monies are advanced to the trustee by the SIPC to satisfy customers' claims, the SIPC is subrogated to the claims with rights and priorities provided under SIPA. n324 The SIPC may not assert as subrogee any claim against customer property until the *pro rata* share of customer property has been allocated to all net equity claimants under Section 8(c). n325

[vi] Direct Payment Procedure. The "Direct Payment Procedure" approved in 1978 was intended to shorten delays incident to a liquidation by eliminating the requirement of judicial supervision under certain limited circumstances. To use the direct payment procedure, the SIPC must determine, in addition to the factors previously listed, n326 that the member has failed or is in danger of failing to meet his obligations to customers, n327 and that one or more of the conditions specified in Section 5(b)(1) n328 exist with respect to the member. n329

If the enumerated conditions exist, a decision to institute the direct payment procedure is within the SIPC's discretion. n330 The direct payment procedure, however, is available only where the member's registration as a broker or dealer under Exchange Act Section 15(b) has been terminated or where the member has consented to the use of the procedure. n331

Section 10(b) requires the SIPC to give notice to customers that the direct payment procedure is to be used for them. Notice of the direct payment procedure must also be published in one or more newspapers of general circulation. The SIPC's duty to give notice of the direct payment plan to customers applies only to customers who appear, from the books and records of the SIPC member, to have had an open account with the member within the last 12 months. n332 Claims filed more than six months after publication of notice of the direct payment procedure are barred, except for certain claims by the United States, one of the states or its political subdivision, or an infant or incompetent. n333

The SIPC must seek to discharge promptly all obligations of the member to customers relating to securities or cash to the extent the obligations may be established from the books and records of the member. n334

There is provision for judicial resolution of contested claims. n335 In addition, there is provision for the discontinuance of the direct payment procedure if the SIPC determines that it is no longer appropriate. n336

[vii] Prohibited Acts. A broker or dealer for whom a trustee has been appointed or a direct payment procedure has

been initiated may not engage in business as a broker or dealer unless the Commission otherwise determines it to be in the public interest. n337 The Commission may, by order, after notice and opportunity for hearing, ban or suspend for any period any officer, director, general partner, owner of 10 percent or more of voting securities, or controlling person of any broker or dealer for whom a trustee has been appointed or a direct payment procedure has been initiated, from association with a broker or dealer. n338

A person may be fined not more than \$50,000 or imprisoned for not more than five years, or both, if he, directly or indirectly, in connection with a liquidation proceeding or direct payment procedure employs any device, scheme or artifice to defraud; n339 or engages in any act, practice, or course of business that operates as a fraud or deceit on any person. n340 The criminal penalties are also imposed if the person, fraudulently or with intent to defeat SIPA:

- conceals or transfers any property belonging to the estate of a debtor;
- makes a false statement or account;
- presents or uses any false claim for proof against the estate of a debtor;
- receives any material amount of property from a debtor; gives, offers, receives, transfers, or obtains any money or property, remuneration, compensation, reward, advantage, other consideration, or promise thereof, for acting or failing to act;
- conceals, destroys, mutilates, falsifies, makes a false entry in, or otherwise falsifies any document affecting or relating to the property or affairs of a debtor;
- withholds from any person entitled to its possession any document affecting or relating to the property or affairs of a debtor; n341 or
- steals, embezzles, or converts to his own use or to the use of another any of the monies, securities, or other assets of the SIPC, or otherwise defrauds or attempts to defraud the SIPC or a trustee by any means. n342

[e] Relation to Bankruptcy Code. Chapter 2 (Subchapter III) of the Bankruptcy Code contains special provisions for the liquidation of stockbrokerage firms. n343 However, if the SIPC files an application for a protective decree under the SIPC, n344 the pending bankruptcy liquidation is suspended and the SIPC takes charge of the liquidation. n345 The liquidation proceeds under SIPA with the SIPC acting to protect the customers of the broker-dealer by giving the customers preference over general creditors and allowing customers' claims to be satisfied by funds advanced by the SIPC. n346

The provisions of the Bankruptcy Code control a liquidation proceeding under SIPA only to the extent that the Code provisions are consistent with SIPA. n347 If the SIPC completes the liquidation, then the case under the Bankruptcy Code is dismissed. n348

Since most broker-dealers are members of the SIPC n349 virtually all stockbroker liquidations will be conducted under SIPA. n350 However, members of the SIPC may be liquidated under the Bankruptcy Code provisions governing stockbroker liquidation if the SIPC does not file an application in a pending bankruptcy case, or the court finds the customers of the SIPC member not in need of protection under SIPA. n351

FOOTNOTES:

(n1)Footnote 1. 15 U.S.C. § 78aaa-III. SIPA was amended by the Bankruptcy Reform Act of 1978, Pub. L. 95-598, 92 Stat. 2549 (1978), in order to conform the cross-references in SIPA with the Bankruptcy Code. See S. Rep. No. 589,

95th Cong., 2d Sess. 197 at 161. SIPA, and the rules and forms under SIPA, are reprinted in the Securities Primary Law Sourcebook, Volume D, Section R (Matthew Bender).

(n2)Footnote 2. The legislative history of SIPA provides a summary of the grave situation prompting its enactment.

The serious and persistent financial problems besetting the securities industry in recent months have led to the voluntary liquidations, mergers, receiverships or, less frequently, bankruptcies of a substantial number of brokerage houses. Such failures may lead to loss of customers' funds and securities with an inevitable weakening of confidence in the U.S. Securities markets. Such lessened confidence has an effect on the entire economy.

H.R. Rep. 1613, 91st Cong., 2d Sess. (1970), *reprinted in* 1970 U.S.C.C.A.N. 5254, 5254-55 [hereinafter "HR 1613"].

(n14)Footnote 14. 17 C.F.R. § 240.15c3-1 (a)(1)(i).

(n15)Footnote 15. *See* § 3.08[2][a] *infra* for a discussion of the net capital rule.

(n16)Footnote 16. *See* § 3.08[3] *infra*.

(n17)Footnote 17. Note that the Securities Acts Amendments of 1975, Pub. L. 94-29, 89 Stat. 97, repealed old Section 8(b) of the Exchange Act, and redesignated former Sections 8(c) and 8(d) as present Sections 8(b) and 8(c) respectively.

(n18)Footnote 18. Section 8(b), reprinted in the Securities Primary Law Sourcebook, Volume B, Section F (Matthew Bender); Rule 8c-1, and Rule 15c2-1, reprinted in the Securities Primary Law Sourcebook, Volume B,

Section G (Matthew Bender), are discussed in § 3.08[2][b] *infra*.

(n19)Footnote 19. Section 8(c) is discussed in § 3.08[2][b] *infra*.

(n20)Footnote 20. Section 15(c)(3) and Rule 15c3-3 promulgated thereunder are discussed in § 3.08[2][a] *infra*.

(n21)Footnote 21. Section 8(a) is discussed in § 3.08[2] *infra*.

(n22)Footnote 22. Regulation of credit is discussed in Ch. 3A *infra*.

(n23)Footnote 23. The Commission's examination of broker-dealer records pursuant to Section 17(b) is discussed in § 3.04[3] *supra*.

Broker-dealer reports to the Commission pursuant to Sections 17(a) and (e) are discussed in § 3.04[4] *supra*.

Included within the distribution of reports to customers is information designed to enable them to formulate their own opinion as to the financial stability of the broker-dealer.

(n24)Footnote 24. Section 17(f)(1) and related Form X-17F-1A and Rule 17f-1 are discussed in § 3.08[2][d] *infra*.

(n25)Footnote 25. *See* Act of June 6, 1934, Ch. 404, § (d), 48 Stat. 888 (1934). The Commission, however, never regarded Section 8(d) as wholly successful because it did not reach over-the-counter brokers, nor did it apply to debts incurred outside of the normal broker-dealer course of business. *See* Hearings Before the Subcommittee of the Senate Committee on Banking and Currency on S.1178, S.1179, S.1180, S.1181, and S.1182, 86th Cong., 1st Sess. (1952).

(n26)Footnote 26. *See* *Exch. Act Rel. No. 34-3323*, 3 *Fed. Sec. L. Rep. (CCH)* P 25,126 (Oct. 29, 1942).

(n27)Footnote 27. 17 *C.F.R.* § 240.15c3-1.

(n28)Footnote 28. For purposes of this rule, the brokers and dealers subject to this requirement include those that endorse or write options otherwise than on a registered national securities exchange, or an associated facility of such exchange, and those who effect more than ten transactions in any one year for its own investment accounts. *See* 17 *C.F.R.* § 240.15c3-1(a)(2)(iii)(A)-(B).

The rule sets forth other minimum requirements for particular brokers and dealers. Brokers and dealers that carry customer accounts must maintain a net capital of \$250,000. A broker-dealer is said to "carry" customer accounts if it receives or holds funds or securities for customers or broker-dealers. 17 *C.F.R.* § 240.15c3-1(a)(2)(i).

Brokers and dealers who introduce transactions and accounts of customers or other brokers or dealers to another registered broker or dealer that carries such accounts on a fully disclosed basis, and receives, but does not hold, customer or other broker-dealer securities must maintain net capital of not less than \$50,000. 17 *C.F.R.* § 240.15c3-1(a)(2)(iv).

Brokers and dealers who qualify as "market makers" are subject to the steep net capital requirement of \$1,000,000. "Market makers" are those brokers and dealers that: regularly publish bona fide, competitive bids and offer quotations in a recognized inter-dealer quotation systems; furnish bona fide competitive bid and offer quotations on request; and are ready, willing and able to effect transactions in reasonable quantities at their quoted prices with other brokers or dealers. *See* *Exch. Act Rel. No. 31,511*, [1992 Transfer Binder] *Fed. Sec. L. Rep. (CCH)* P 85,064 (Nov. 24, 1992).

Broker-dealers who are engaged in the sale of redeemable shares of registered investment companies or of interest or participations in an insurance company's separate account that are directly from or to the issuer other than on a subscription basis must maintain net capital of at least \$25,000.

Municipal securities brokers and dealers must maintain minimum net capital of \$150,000. Broker-dealers so qualifying are those who act exclusively as an undisclosed agent in the purchase or sale of municipal securities for a registered broker, dealer or municipal securities dealer, who does not have their own customers, and who do not have or maintain any municipal securities in their proprietary or other accounts.

Broker-dealers who do not either directly or indirectly receive, or hold funds or securities (or owe funds or securities to) for customers and do not carry accounts for customers require minimum net capitalization of only \$5,000.

The rule also describes special capitalization requirements for self-clearing options specialists, 17 C.F.R. § 240.15c3-1(a)(7), and for brokers or dealers engaging in reverse repurchase agreements, 17 C.F.R. § 240.15c3-1 (a)(9).

(n29)Footnote 29. See Exch. Act Rel. No. 34-39,456; File No. S7-32-97 (Dec. 17, 1997).

(n30)Footnote 30. See Exch. Act Rel. No. 34-39,455; File No. S7-31-97 (Dec. 17, 1997).

(n31)Footnote 31. See Exch. Act Rel. No. 34-39,457; File No. S7-33-97 (Dec. 30, 1997).

(n32)Footnote 32. Sec. Act Rel. Nos. 33,8236, 34,47972.

(n33)Footnote 33. Rule 15c3-3. See § 3.08[2][c] *infra*. Certain adjustments to this reserve account formula are made for the alternative net capital calculation. These adjustments include a reduction of aggregate debit items by 3 percent, rather than 1 percent as required in the reserve account calculation; a requirement that the market value of short securities and credits and short security count differences more than seven days old, rather than 30 days old, be included in the formula; the exclusion of credit balances in accounts representing amounts payable for securities not yet received from the issuer or agent; and deductions of 1 percent of the contract value of all undelivered contracts or securities. 17 C.F.R. § 240.15c3-1(a)(1)(ii).

(n34)Footnote 34. See Exch. Act Rel. No. 34-49830 (June 8, 2004). The amended Rules amend the net capital rule and add to the rule new Appendix E, Deductions for Market and Credit Risk for Certain Brokers and Dealers, 17 C.F.R. § 240.15c3-1e, and new Appendix G, Conditions for Ultimate Holding Companies of Certain Brokers or Dealers, 17 C.F.R. § 240.15c3-1g. The amended Rules also amend Exchange Act Rules 17a-4, Records To Be Preserved by Certain Exchange Members, Brokers and Dealers, 17 C.F.R. § 240.17a-4; 17a-5, Reports To Be Made by Certain Brokers and Dealers, 17 C.F.R. § 240-17a-11; 17h-1T, Risk Assessment Recordkeeping Requirements for Associated Persons of Brokers and Dealers, 17 C.F.R. § 240.17h-1T; and 17h-2T, Risk Assessment Reporting Requirements for Brokers and Dealers, 17 C.F.R. § 240.17h-2T.

(n35)Footnote 35. See Exch. Act Rel. No. 34-2690 [1940 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 22,423 (November 15, 1940) [hereinafter "Exch. Act Rel. No. 2690"].

(n36)Footnote 36. See *id.*

(n37)Footnote 37. See *id.*

(n38)Footnote 38. See *id.*

(n39)Footnote 39. See *id.*

(n40)Footnote 40. See *id.*

(n41)Footnote 41. H.R. Rep. No. 1383, 73 Cong., 2d Sess. (1934), reprinted in the Securities Primary Law Sourcebook, Volume C, Section I (Matthew Bender).

(n42)Footnote 42. Section 8(a) prohibited borrowing by any broker dealer who transacted securities business through an exchange, thus giving banks a monopoly on lending money to broker-dealers. The repeal should expand the field of lenders and make it easier to borrow for capital market activities such as underwriting and market making.

(n43)Footnote 43. See Ch. 3A, *infra*.

(n44)Footnote 44. See 15 U.S.C. § 78h(a).

(n45)Footnote 45. See 15 U.S.C. § 78h(b). The Securities Acts Amendments of 1975, Pub. L. 94-29, 89 Stat. 97 (1975), added at the end of prior Section 8(c) the phrase "or in contravention of such rules and regulations as the Commission shall prescribe for the protection of investors." The Securities Industry Study Report pointed out that a loophole existed in the law, in that hypothecation of customers' securities was subject to appropriate regulation, but lending was not. The provision authorizing the Commission to promulgate rules concerning the lending by brokers and dealers of securities carried for the accounts of their customers closed that loophole. H.R. Rep. No. 123, 94th Cong., 1st Sess. (1975), reprinted in the Securities Primary Law Sourcebook, Volume C, Section I (Matthew Bender).

(n46)Footnote 46. The adoption of Rules 8c-1 and 15c2-1 was announced in Exch. Act Rel. No. 34-2690. The FINRA has adopted a Conduct Rule governing customer's securities and funds. See Rule 2330, NASD Manual (CCH).

(n47)Footnote 47. Rule 8c-1 was adopted pursuant to former Section 8(c), which was originally redesignated Section 8(b) pursuant to the Securities Acts Amendment of 1975, Pub. L. 94-29, 89 Stat. 97 (1975), and is now redesignated as 8(a). The Commission proposed amendments to Rule 8c-1 to expand the scope of paragraph (a) of the rule to include the direct or indirect hypothecation, loan, or borrowing by a broker or dealer, or his arranging for or permitting, directly or indirectly, the continued hypothecation or loan of customers' securities where, *inter alia*: the loan or hypothecation includes more of the securities than is fair and reasonable in light of the customer's indebtedness to the broker or dealer with respect to the securities; and the securities loaned, borrowed, or hypothecated are fully paid securities or excess margin securities, unless the broker or dealer first obtains for fair and adequate consideration the specific authorization of the customer in writing, designating the particular securities to be loaned or borrowed and specifying the terms and conditions under which the securities may be loaned or borrowed. See Exch. Act Rel. No. 34-9388, Special Report No. 395 (CCH) at 6-7 (Nov. 8, 1971) [hereinafter "Exch. Act Rel. No. 34-9388"].

The Commission also proposed the addition of a new paragraph (5) to Rule 8c-1(b) that would define the term "lien" to include the possession of securities borrowed from a broker or dealer if the borrower has deposited cash with the broker or dealer to be returned to the borrower on his return of the borrowed security to the broker or dealer. *Id.*

(n48)Footnote 48. See Exch. Act Rel. No. 34-2690. The Commission proposed to amend Rule 15c2-1(a) to broadly define the phrase "fraudulent, deceptive, or manipulative act or practice," as used in Section 15(c)(2) of the Exchange Act, to include the direct or indirect hypothecation, loan, or borrowing of customers' securities as specified in proposed Rule 8c-1. See Exch. Act Rel. No. 9388, at 6.

(n49)Footnote 49. For a discussion of the hypothecation rules, see § 3.08[2][b] *supra*.

(n50)Footnote 50. For discussion of exemptions from the hypothecation rules, see § 3.08[2][b][ii] *infra*.

(n51)Footnote 51. See § 3.08[2][b] *supra* for the three prohibitions enumerated in redesignated Section 8(a).

(n52)Footnote 52. The term "customer" does not include general or special partners, directors or officers of the broker-dealer, or any participant as such in any joint, group or syndicate account with the broker-dealer or with any partner, director or officer thereof. See Rules 8c-1(b)(1); 15c2-1(b)(1). The term, however, includes other exchange members, brokers or dealers. See Exch. Act Rel. No. 34-2690, at 22,427. By excluding from the term "customer" any participants in joint, group or syndicate accounts with a broker or any partner, officer or director of the broker, Rules 8c-1(b)(1) and 15c2-1(b)(1) permit the broker-dealer or any partner, director or officer thereof to participate with others

in such accounts. *Id.*

(n53)Footnote 53. The phrase "securities carried for the account of any customer" means: securities received by or on behalf of the broker or dealer for the account of any customer; securities sold and earmarked or otherwise appropriated to a customer (if the securities were subject to a lien when appropriated to a customer, they are not deemed to be "securities carried for the account of any customer" pending their release from the lien as promptly as practicable); and securities sold, but not appropriated by a broker-dealer to a customer who has made any payment for the securities, to the extent that the broker-dealer owns and has received similar securities. However, if the securities are sold to a customer and are subject to a lien when payment was made, they do not become "securities carried for the account of any customer" pending their release from the lien as promptly as possible. Rules 8c-1(b)(2)(i)-(iii); 15c2-1(b)(2)(i)-(iii).

Securities that are not "carried for the account of customers," of course, are not subject to Rules 8c-1 and 15c2-1.

Cf. United States v. Schwartz, 464 F.2d 499, 507-08 (2d Cir. 1972) , in which the court found that where some of stock underwriter pledged to lender to obtain funds to pay issuer had been sold to and paid for by underwriter's customers, the stock was "securities carried for the account of any customer" at the time of the pledge within the meaning of old Section 8(c) (presently Section 8(b)), notwithstanding the fact that all of the stock was not sold); see *In re Cortlandt Investing Corp.*, Exch. Act Rel. No. 34-7682 [1964-1966 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 77,273 (Aug. 24, 1965), upholding expulsion of a firm by FINRA in part for two violations of Rule 15c2-1, even though violations were found inadvertent.

(n54)Footnote 54. Rules 8c-1(a)(1); 15c2-1(a)(1).

(n55)Footnote 55. Rules 8c-1(a)(2); 15c2-1(a)(2). Even with customer consent, brokers and dealers are forbidden under Rule 8c-1 and Rule 15c2-1 to pledge customers' securities with those of persons who are not customers. See H.R. Rep. No. 1383, 73 Cong., 2d Sess. (1934), reprinted in the Primary Law Sourcebook, Volume C, Section I (Matthew Bender).

In addition, paragraph (a)(2) of Rules 8c-1 and 15c2-1 prohibit pledging customers' securities under a general lien if the broker-dealer's securities are also pledged under the same lien to obtain or increase the loan or as substituted collateral for customers' securities. See Exch. Act Rel. No. 34-2690, at P 22,433.

(n56)Footnote 56. See Rules 8c-1(a)(3); 15c2-1(a)(3). Good brokerage practice requires the broker-dealer to maintain a "cushion" of his own capital between the amount of customers' debits and the amount of his bank loans on customers' securities. This cushion must be sufficient to offset any reasonably anticipated reductions in customers' indebtedness. In the exceptional situation where customers' indebtedness is paid off in an amount which depletes the cushion and reduces the total of customers' debit balances below the broker-dealer's current borrowings on customers' securities, the rule contains the following exemption. Paragraph (a)(3) of Rule 8c-1 and of Rule 15c2-1 will not be considered as violated if, as a result of reductions in the aggregate indebtedness of customers on any day, the amount of liens to which customers' securities are subject during that day exceeds the total indebtedness of customers in respect of securities carried for their accounts. Rules 8c-1(a)(3); 15c2-1(a)(3). A payment by a customer on any day that reduces the amount the customer would owe the broker-dealer on that day had the payment not been made is regarded as a reduction of indebtedness on that day within the meaning of the rules. See Exch. Act Rel. No. 34-2690, at 22,439.

The exemption is applicable only if funds or securities in an amount sufficient to eliminate the excess of the liens or claims to which customers' securities are subject over the aggregate indebtedness are paid or placed in transfer to pledgees to reduce the sum of the liens or claims to which customers' securities are subject as promptly as practicable after the reduction occurs. See Rules 8c-1(a)(3); 15c2-1(a)(3).

However, if it is not practicable to eliminate the excess of liens over customers' indebtedness on the day the excess occurs, funds sufficient to eliminate the excess must be paid or placed in transfer to pledgees either before one-half hour

after the commencement of banking hours on the next banking day at the place where the exchange member, broker, or dealer carries his largest principal amount of loans or before the exchange member, broker, or dealer obtains or increases any bank loan collateralized by customers' securities, whichever is earlier. *See id.*

In computing the sum of liens or claims to which customers' securities are subject, the broker or dealer may disregard any rehypothecation thereof by another broker also subject to either Rule 8c-1 or Rule 15c2-1. *See* Rules 8c-1(b)(4) and 15c2-1(b)(4).

See United States v. Eucker, 537 F.2d 718, 718 (2d Cir. 1976) (defendant unlawfully, willfully and knowingly hypothecated fully-paid securities carried for the account of customers under circumstances that permitted securities to be subjected to liens of up to \$7 million in violation of Rule 8c-1); *SEC v. Charles Plohn & Co.*, 433 F.2d 376, 379 (2d Cir. 1970) (appointment of a receiver was justified by, among other things, evidence that defendant broker-dealer was fined for illegal hypothecation of customers' securities and suspended from stock exchange for failure to rectify hypothecation problem).

(n57)Footnote 57. *See* Rules 8c-1(f); 15c2-1(f).

(n58)Footnote 58. *Id.* An omnibus account is a special account that a broker-dealer may establish to effect and finance transactions for another broker or dealer registered under Section 15 from whom the person establishing the account receives written notice pursuant to the hypothecation rules that all securities carried in the account are carried for customers of the broker or dealer and written notice that any short sales in the account will be made on behalf of the customers of the broker or dealer other than his partners. *See* Regulation T, 12 C.F.R. § 220.10.

Regulation T and the accounts established thereunder are discussed in § 3A.02[1][a] *infra*.

(n59)Footnote 59. Rules 8c-1(f); 15c2-1(f).

(n60)Footnote 60. *See* Rules 8c-1(g); 15c2-1(g). However, any custodian must agree that it will not for any reason, including the assertion of any claim, right or lien, refuse or refrain from promptly delivering any securities (other than securities hypothecated in accordance with the established system) to the clearing corporation or other subsidiary organization or as directed by the corporation or organization. *Id.* Nothing in the agreement may be deemed to require a custodian to deliver securities in violation of any notice of levy, seizure or similar notice, order, or judgment issued by a governmental agency, court, or officer thereof with competent jurisdiction over the custodian, which on its face affects the securities. *Id.*

Furthermore, there must be safeguards under the system for handling, transfer and delivery of securities, including fidelity bonding requirements for employees and agents of, and periodic examinations by independent public accountants of, the clearing corporation or other subsidiary organization. A particular system for the central handling of securities will not be deemed effective unless compliance with the requirements for the agreement and safeguards discussed above are deemed adequate by the Commission for the protection of investors. *Id.*

(n61)Footnote 61. *See* Rules 8c-1(c); 15c2-1(c). The provisions of Section 4(c) of Regulation T which relate to special cash accounts are in 12 C.F.R. § 220.8. *See* Complete Revision and Simplification of Regulation T, [1982-1983 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,352, at 85,953 (May 16, 1983).

Generally, a special cash account is one in which an exchange member or a broker or dealer purchases securities for, or sells securities to, a customer only if funds sufficient for the purpose are already held in the customer's account or if the purchase or sale is effected in reliance on an agreement, accepted in good faith, that the customer will promptly make full cash payment for the securities. *See* Exch. Act Rel. No. 34-2690, at 22,431. Credit is not extended by the broker-dealer to the customer for these transactions.

The exemption under Rules 8c-1(c) and 15c2-1(c) is subject to the condition that at or before the completion of the transaction of the purchase of the securities for, or the sale of the securities to, the customer, written notice is given or sent to the customer disclosing that the securities are or may be hypothecated under circumstances that will permit the commingling of the securities with securities of other customers. Rules 8c-1(c); 15c2-1(c). The phrase "the completion of the transaction" has the same meaning as in Rule 15c1-1(b). Special cash accounts under Regulation T are discussed in § 3A.02[1][a][ii] *infra*.

(n62)Footnote 62. Rules 8c-1(d); 15c2-1(d). For all practical purposes, a broker or dealer operating under paragraphs (a)(2) and (a)(3) or Rules 8c-1 and 15c2-1 may disregard his pledges of customers' securities under clearing house liens. Exch. Act Rel. No. 34-2690, at 22,432 (1941). However, in computing aggregate indebtedness, he must also disregard any securities subject to a clearing house lien exempted by paragraph (d) of Rules 8c-1 and 15c2-1.

See National Clearing Corporation, [1971-1972 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 78,652 (Jan. 31, 1972).

(n63)Footnote 63. See n.52 and accompanying text *supra* for a similar prohibition in the hypothecation rules.

(n64)Footnote 64. Rules 8c-1(e); 15c2-1(e). For the purpose of the exemption, a loan is deemed to be "made against securities carried for the account of customers" if only securities carried for the account of customers are used to obtain or increase the loan or as substitutes for other securities carried for the account of customers. *Id*.

(n65)Footnote 65. Pub. L. 91-598, 84 Stat. 1636 (1970).

(n66)Footnote 66. For the legislative history of SIPA, see S. Rep. No. 1218, 91st Cong., 2d Sess. 1970; H.R. Rep. No. 1613, 91st Cong., 2d Sess. (1970), reprinted in the Securities Primary Law Sourcebook, Volume C, Section I (Matthew Bender).

(n67)Footnote 67. 15 U.S.C. § 78o(c)(3).

(n68)Footnote 68. The adoption of Rule 15c3-3 pursuant to Section 15(c)(3), as it existed prior to the Securities Acts Amendments of 1975, was announced in Adoption of Rule 15c3-3 under the Securities Exchange Act of 1934, Exch. Act Rel. No. 34-9856, [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,083 (Nov. 10, 1972).

(n69)Footnote 69. The phrase "fully-paid securities" refers to all securities carried for the account of a customer in a special cash account as defined in Regulation T, as well as margin equity securities within the meaning of Regulation T that are carried for the account of a customer in a general account or any special account under Regulation T during any period for which Section 8 of Regulation T specifies that margin equity securities must have no loan value in a general account or special convertible debt security account and all the margin equity securities in the account if fully paid. See § 3A.02[1][a][ii] *infra*. However, the phrase "fully-paid securities" does not refer to any securities purchased in transactions for which the customer has not made full payment. See Rule 15c3-3(a)(3).

A customer may opt to keep fully paid securities in the possession of his broker to save time in disposing of the securities and to avoid the cost of safety-deposit rental. See Guttman, *Broker-Dealer Bankruptcies*, 48 N.Y.U. L. Rev. 887, 891 (1973) [hereinafter *Broker-Dealer Bankruptcies*]. Broker-dealers like the customer to keep fully paid securities with them because, if the customer decided to sell the securities, the customer is most likely to do so through the broker holding the securities. *Id*.

(n70)Footnote 70. The phrase "excess margin securities" means margin securities carried for the account of a customer in a general account as defined in Regulation T, as well as securities carried in any special account other than fully paid securities, having a market value in excess of 140 percent of the total of the debit balances in the customer's account or accounts encompassed by Rule 15c3-3(a)(4) (includes both general and special accounts) that the broker or dealer identifies as not constituting margin securities. Rule 15c3-3(a)(5).

The term "margin securities" refers to securities which are carried for the account of a customer in a general account as defined in Regulation T, as well as securities carried in any special account (such general or special accounts hereinafter referred to as "margin accounts") other than fully paid securities as defined in Rule 15c3-3(a)(3). *See* note 66 *supra*; Rule 15c3-3(a)(4).

(n71)Footnote 71. The phrase "securities carried for the account of a customer" or "customer securities" means: securities received by or on behalf of a broker or dealer for the account of any customer and securities carried long by a broker or dealer for the account of any customer; and securities sold to, or bought for, a customer by a broker or dealer. Rule 15c3-3(a)(2)(i)-(ii).

(n72)Footnote 72. The Reserve Formula, which is set forth in Exhibit A to Rule 15c3-3, is discussed in § 3.08[2][c][ii][D] *infra*.

(n73)Footnote 73. *See, e.g.*, Exch. Act Rel. No. 34-9622 [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 78,801 (May 31, 1972).

(n74)Footnote 74. H.R. Conf. Rep. No. 229, 94th Cong., 1st Sess. (1975), reprinted in the Securities Primary Law Sourcebook, Volume C, Section I (Matthew Bender).

(n75)Footnote 75. The net capital requirements are discussed in detail in § 3.08[2][a] *infra*.

(n76)Footnote 76. Brokers or dealers operating under paragraph (f) of Rule 15c3-1 determine their net capital requirement based on the aggregate debit items computed pursuant to the Formula for Determination of Reserve Requirement of Brokers and Dealers as set forth in Rule 15c3-3a, discussed in § 3.08[2][c][ii][D] *infra*.

For a discussion of the alternative net capital requirement, *see* § 3.08[2][a].

(n77)Footnote 77. *See* Exch. Act Rel. No. 34-11497 [1975-1976 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,212 (June 26, 1975).

(n104)Footnote 104. Rule 15c3-3(d)(2).

(n105)Footnote 105. Rule 15c3-3(d)(3).

(n106)Footnote 106. Rule 15c3-3(d)(4).

(n107)Footnote 107. For a discussion of quarterly security counts pursuant to Rule 17a-13, see § 3.04[5][c] *supra*.

(n108)Footnote 108. For discussion of the annual report of financial condition of brokers and dealers under Section

17(a), reprinted in the Primary Law Sourcebook, Volume B, Section F (Matthew Bender), and Rule 17a-5 promulgated thereunder, reprinted in the Securities Primary Law Sourcebook, Volume B, Section G (Matthew Bender), see § 3.04[4][d] *supra*.

(n109)Footnote 109. Rule 15c3-3(h).

(n110)Footnote 110. See Exch. Act Rel. No. 34-9856 [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,083, at 82,344 (Nov. 10, 1972).

(n111)Footnote 111. This provision of Regulation T is set forth in 12 C.F.R. § 220.3(c).

(n112)Footnote 112. Rule 15c3-3(l)(2). Section 220.3(c) of Regulation T permits a creditor (in this case, a broker or dealer) to maintain credit initially extended regardless of, *inter alia*, a reduction in the customer's equity caused by a change in the market price of the securities of the customer. In maintaining this credit, the broker-dealer may either accept or retain for his own protection additional collateral, including nonmargin securities. 12 C.F.R. § 220.3(c).

The maintenance and other margin requirements permitted by former Section 7(b) of Regulation T must be imposed "equitably and reasonably." Exch. Act Rel. No. 34-9856 [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,083 (Nov. 10, 1972).

(n113)Footnote 113. An amendment to Rule 15c3-3(m) proposed on June 7, 1987, would extend this time to 30 calendar days for mortgage-backed securities. See Exch. Act Rel. No. 34-24,554, [1987 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 84,133 at 88,718 (June 4, 1987). This proposal was never adopted.

(n114)Footnote 114. Rule 15c3-3(m). Paragraph (m) does not apply to orders which execute sales of securities that the seller does not own. *Id.*

Paragraph (m) of Rule 15c3-3 has been suspended indefinitely with respect to exempted securities because of possible operational hardships that could result from attempts to buy in exempted securities, particularly municipal obligations. See Exch. Act Rel. No. 34-10,093 [1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,310 (Apr. 10, 1973).

(n115)Footnote 115. For a discussion of omnibus accounts under Section 4(11) of Regulation T, see n.55 *supra*.

(n116)Footnote 116. Rule 15c3-3(m). Regulation T requires a customer who sells securities to "promptly deposit" the securities in the special cash account. 12 C.F.R. § 220.4(c)(1)(ii). Paragraph (m) of Rule 15c3-3 defines the period within which the broker or dealer must act if the customer fails to immediately deliver the securities as required by Regulation T. The Commission staff is of the view that paragraph (m) of Rule 15c3-3 does not place brokers or dealers in a position of additional loss exposure as a result of the cancellation provision in Section 4(c)(2) of Regulation T; Rule 15c3-3(m) merely defines "promptly deposit" as used in Section 4(c)(1)(ii) of Regulation T. See Wheat First Securities, Inc., [1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,345 (Mar. 18, 1973).

See § 3A.02[1][a][ii] for a discussion of special cash accounts under Section 4(c) of Regulation T.

(n117)Footnote 117. Rule 15c3n-3(n).

(n118)Footnote 118. *Id.*

(n119)Footnote 119. The term "qualified security" means a security issued by the United States or a security in respect of which the principal and interest are guaranteed by the United States. Rule 15c3-3(a)(6).

(n120)Footnote 120. For a discussion of the Reserve Formula, see § 3.08[2][c][ii][D] *infra*.

(n121)Footnote 121. Rule 15c3-3(e)(2).

(n122)Footnote 122. *Id.*

(n123)Footnote 123. Rule 15c3-3(e)(3). If a broker or dealer has aggregate indebtedness not exceeding 800 percent of net capital and carries aggregate customer funds not exceeding \$1 million, he may, in the alternative, compute the net amount monthly at the close of the last business day of the month. *Id.* Not less than 105 percent of the net amount must be deposited in the account within one hour after the opening of banking business on the second following business day. *Id.*

If the aggregate indebtedness of a broker or dealer required to compute on a monthly basis exceeds 800 percent of net capital, he must thereafter compute the net amount weekly until four successive weekly computations are made, none of which are made when aggregate indebtedness exceeds 800 percent of his net capital. *Id.*

A broker or dealer may make computations in addition to the computations required by subparagraph (e)(3) of Rule 15c3-3 at the close of any other business day and deposit the net amount within one hour after the opening of banking business on the second following business day. *Id.*

The broker or dealer must make and maintain a record of each computation made under subparagraph (e)(3) of Rule 15c3-3 or otherwise, and preserve the record in accordance with Rule 17a-4, discussed in § 3.04 *supra*.

The calculation of aggregate indebtedness and net capital is discussed in § 3.08[2] *supra*.

(n124)Footnote 124. Rule 15c3-3(f). The notification must be preserved in accordance with Rule 17a-4. Subparagraph (k) of Rule 15c3-3 concerning exemptions is discussed in § 3.08[2][c][iii] *infra*.

(n125)Footnote 125. Rule 15c3-3(f).

(n126)Footnote 126. Rule 15c3-3(g). The amount required by paragraph (e) is the amount computed in accordance with the reserve formula in Exhibit A to Rule 15c3-3.

(n127)Footnote 127. Rule 15c3-3(g).

(n128)Footnote 128. *Id.*

(n129)Footnote 129. Rule 15c3-3(i). *See In Re G.C. George Securities, Inc.*, [1983-1984 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,498 (Feb. 7, 1984) (finding that failure to deposit sufficient funds in Special Reserve Account is willful violation of Rule 15c3-3).

(n130)Footnote 130. *See Exch. Act Rel. No. 34-16,847* [1980 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 82,603 (May 28, 1980).

(n131)Footnote 131. *See Exch. Act Rel. No. 34-48931.*

(n132)Footnote 132. In the case of firms permitted to make this computation monthly, 105% of the excess of total Credits over total Debits must be deposited.

(n133)Footnote 133. The requirements for a Special Reserve Bank account are discussed in § 3.08[2][c][ii] *supra*.

(n134)Footnote 134. *See n.128 supra*.

(n135)Footnote 135. *See Exch. Act Rel. No. 34-9856*, [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,083 (Nov. 13, 1972). The total Debits comprise those areas of the broker-dealer's business relating to customer

service that the Commission considers safe and for which the broker or dealer may use any of the amounts that constitute total Credits. See *Broker-Dealer Bankruptcies*, n.66 *supra*, at 900-901.

(n136)Footnote 136. A "free credit balance" occurs when a broker-dealer holds cash, available to the customer on demand, in a customer's account. A free credit balance arises in the normal course of a broker-dealer's business, often from the sale of the customer's securities or receipt of dividends due the customer. See *Broker-Dealer Bankruptcies*, n.66 *supra*, at 890.

(n137)Footnote 137. All outstanding drafts payable to customers that have been applied against free credit balances or other credit balances and checks drawn in excess of bank balances indicated in the records of the broker or dealer must be included in Item 1. Rule 15c3-3a, Note A.

(n138)Footnote 138. The amount of Letters of Credit obtained by members of Options Clearing Corporation that are collateralized by customers' securities to the extent of the member's margin requirement at OCC, must be included in Item 2. Rule 15c3-3a, Note B.

(n139)Footnote 139. In addition to monies payable against customer's securities loaned, the amount by which the market value of securities loaned exceeds the value of the collateral value received from the borrower of securities must be included in Item 3. Rule 15c-3a, Note C.

(n140)Footnote 140. The amount by which the market value of securities not received and outstanding more than 30 calendar days exceeds their contract value must be included in Item 4 in addition to the amount of customers' securities failed to receive. Rule 15c-3a, Note D.

(n141)Footnote 141. Debit balances in margin accounts must be reduced by the amount by which a specific security (other than an exempted security) that is collateral for margin accounts exceeds in aggregate value 15 percent of all securities that collateralize all margin accounts receivable. Rule 15c3-3a, Note E(1). However, this reduction of debit balances may not exceed the Debits that must be excluded by Item (10) of Exhibit A (unsecured accounts and doubtful accounts). *Id.*

A specified security is deemed to be collateral for a margin account insofar as its value is not more than 140 percent of the customer debit balance in a margin account. *Id.*

Debit balances in special omnibus accounts, maintained under Section 4(b) (now Sec. 11) of Regulation T, or similar accounts carried on behalf of another broker or dealer, must be reduced by any deficits in the accounts (or increased, in the case of a credit) less any calls for margin, marks to the market, or other required deposits outstanding 5 business days or less. Rule 15c3-3a, Note E(2).

Debit balances in customers' cash and margin accounts included in the formula under Item 10 must be reduced by an amount equal to 1 percent of their aggregate value. Rule 15c3-3a, Note E(3).

In 1985, in light of two recent failures of broker-dealers, the Commission added the following paragraphs to Note E:

(4) Debit balances in cash and margin accounts of household members and other persons related to principals of the broker-dealer are excluded, unless such debit balances are demonstrably related to credit items in the formula.

(5) If any single customer's debit balance exceeds the greater of \$50,000 or 25% of the broker-dealer's tentative net capital, the amount of such excess is excluded from the debit side of the Special Reserve Formula, unless the debit is directly related to credit items included in the Formula. Accounts related to each other are aggregated under this provision, and exceptions can be granted by the

broker-dealer's examining authority.

When a non-customer and a customer are joint participants in an account (*e.g.*, an account for a limited partnership) specified percentages of the debit balance of the joint account would be excluded, depending on the level of participation by the non-customer. Exch. Act Rel. No. 34-22499, [1985-1986 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,921, at 87,832 (Oct. 3, 1985).

(n142)Footnote 142. The amount of margin deposited with the Options Clearing Corporation represented by cash, proprietary qualified securities, and letters of credit collateralized by customers' securities must be included in Item 13. *See* Rule 15c3-3a, note F.

A "qualified security" is a security issued, or guaranteed as to principal and interest, by the United States. Rule 15c3-3(a)(6).

(n143)Footnote 143. Rule 15c3-3(k)(1)(i).

(n144)Footnote 144. *Id.*

(n145)Footnote 145. Rule 15c3-3(k)(1)(ii).

(n146)Footnote 146. Rule 15c3-3(k)(1)(iii). Notwithstanding the provisions of paragraphs (k)(1)(i)-(iii) Rule 15c3-3 does not apply to an insurance company that is a registered broker or dealer, and that otherwise meets all the conditions in paragraphs (k)(1)(i)-(iii) of the rule, solely by reason of its participation in transactions that are part of the business of insurance, including the purchasing, selling, or holding of securities for or on behalf of the insurance company's general and separate accounts. *Id.*

(n147)Footnote 147. Rule 15c3-3(k)(2)(i). As with the Reserve Bank Accounts, a broker or dealer maintaining a Special Account must receive and preserve a notification from the bank that the deposits are for the exclusive benefit of the broker-dealer's customers and are not subject to any lien or charge in favor of the bank or any person claiming through the bank, *see supra* § 3.08[2][c][ii][A]. *See* Exch. Act Rel. No. 34-9856 [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,083, at 82,344 (Nov. 10, 1972).

(n148)Footnote 148. Rule 15c3-3(k)(2)(ii). The recordkeeping and preservation requirements of Rules 17-a and 17a-4 are discussed in § 3.04[1], [2] *supra*.

The exemption in paragraph (k)(2), discussed in the text of ns. 139-140 *supra*, is designed to alleviate the difficulty many small and medium brokers and dealers may have in complying with Rule 15c3-3, achieving the complete separation of customer funds and property, and affording customer assets protection comparable with that attainable under the rule. *See* Exch. Act Rel. No. 34-9856 [1972-1973 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 79,083, at 82,344 (Nov. 10, 1972). The procedures outlined in the paragraph (k)(2) exemption are consistent with one of the principal objectives of the SIPA that customer funds and securities must not be exposed to risk of loss through the insolvency of a broker or dealer. *Id.*

(n149)Footnote 149. Rule 15c3-3(k)(3).

(n150)Footnote 150. H.R. Doc. No. 231, 92d Cong., 1st Sess. (1971), at 145-150 (prepared pursuant to Section 11(h) of the Securities Investor Protection Act of 1970).

(n151)Footnote 151. The persons, financial institutions, and organizations covered by the program are listed as reporting institutions required to register under Rule 17f-1. *See* § 3.08[2][d][i] *infra*.

(n152)Footnote 152. H.R. Rep. No. 229, 94th Cong., 1st Sess. (1975), reprinted in the Securities Primary Law Sourcebook, Volume C, Section I (Matthew Bender).

In exercising its rulemaking authority with respect to the duty to inquire as to lost, stolen or counterfeit securities, the Commission is expected to focus on those instances where the circumstances are or appear to be suspicious and where, in the exercise of good judgment, appropriate inquiry should be made. *Id.*

Sections 17(f)(2)-(5) were also added in 1975. Section 17(f)(2) requires that partners, directors, officers, and employees of exchange members, brokers, dealers, transfer agents, and clearing agencies be fingerprinted and that the fingerprints be submitted to the Attorney General. The fingerprinting requirements of Section 17(f)(2) are discussed in § 3.03 *supra*.

Section 17(f)(3) authorizes the Commission to enter into an agreement with the Attorney General to use the services of the National Crime Information Center. The Government Securities Act of 1986, P.L. 99-571, 100 Stat. 3208 (Oct. 28, 1986) authorized the Commission to enter into an agreement with the Secretary of the Treasury to receive, store and disseminate information generated by the Department of the Treasury in regard to missing, lost, counterfeit or stolen securities.

Section 17(f)(4) authorizes the Commission to delegate its authority under paragraphs (1)-(3) of Section 17(f) with respect to any bank or member of the Federal Reserve System to the federal bank regulatory agencies. Section 17(f)(5) requires the Commission to encourage insurance companies to require persons insured by them to promptly report missing, lost, counterfeit or stolen securities to the Commission or other person designated by the Commission.

(n153)Footnote 153. See Exch. Act Rel. No. 34-13,053, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 80,829 at 87,179 (Dec. 10, 1976).

(n220)Footnote 220. *Id.* at § 78ddd(b).

(n221)Footnote 221. *Id.* at § 78ddd(c)(1).

(n222)Footnote 222. *Id.* at § 78 ddd(a)(2). The amount of confirmed lines of credit that the SIPC may maintain at any time is the aggregate amount that the SIPC has the right to borrow from banks and other financial institutions under confirmed lines of credit or other written agreements and that are repayable not less than one year from the time of the borrowings (including, for purposes of determining when the amounts are repayable, all rights of extension, refunding, or renewal at the election of the SIPC). *Id.* at § 78ddd(a)(3).

The SIPC may maintain such other confirmed lines of credit separate from the fund as it considers necessary or appropriate and, thereby, diminish its need to borrow from the United States Treasury. Money from the lines of credit may be disbursed as though the amounts were part of the general fund. *Id.* at § 78ddd(a)(4).

Confirmed lines of credit must not constitute more than \$50 million of the balance of the SIPC Fund. *Id.* at § 78ddd (d)(2)(A). When the balance of the SIPC Fund aggregates \$150 million, the SIPC must phase out all confirmed lines of credit. *Id.* at § 78ddd(d)(2)(B).

(n223)Footnote 223. During 1993, the SIPC initiated liquidation proceedings against three members, a record low over the average 9-10 liquidations annually over the previous ten years. As of September 1994, liquidation proceedings had been initiated against only one member. Telephone Interview with Joseph F. Marino, SIPC Vice President of Operations and Finance and Chair of Former SIPC Task Force on Assessments (September 20, 1994) [hereinafter Marino Interview].

(n224)Footnote 224. 15 U.S.C. § 78ddd(f).

(n225)Footnote 225. *Id.* This credit line is as yet untapped.

(n226)Footnote 226. *Id.* at § 78ddd(g)-(h).

(n227)Footnote 227. *Id.*

(n228)Footnote 228. As of September 15, 1994, the Fund had earned approximately \$48 million in interest on government securities. Telephone Interview with Stephen Harbeck, Senior Associate General Counsel, SIPC (Sept. 19, 1994) [hereinafter Harbeck Interview].

(n229)Footnote 229. *Marino Interview, n.219 supra. See also* SIPA Rel. No. 157, 50 SEC Dkt. No. 4 at 386 (Nov. 20, 1991) [hereinafter SIPA Rel No. 157]. The Task Force, comprised of SIPC officials, SEC members, and representatives from private securities firms, presented their recommendations to the SIPC Board on September 26, 1991. *Id. See also Marino Interview, n.219 supra.*

(n230)Footnote 230. The Commission may review the SIPC's determination that a person's principal business is conducted outside the United States and its territories and possessions. 15 U.S.C. § 78ccc(a)(2)(B).

(n231)Footnote 231. 15 U.S.C. § 78ccc(a)(2)(A)(ii).

(n232)Footnote 232. *Id.* at § 78ddd(c)(2). 15 U.S.C. § 78lll(9) defines the phrase "gross revenues from the securities business":

The term "gross revenues from the securities business" means the sum of (but without duplication)--

1-3 Federal Securities Exchange Act of 1934 § 3.08

- (A) commissions earned from securities transactions effected for customers as agent (net of commissions paid to other brokers and dealers in connection with such transactions) and markups with respect to purchases or sales of securities as principal;
- (B) charges for executing or clearing transactions;
- (C) net realized gain, if any, from principal transactions in securities in trading accounts;
- (D) net profit, if any, from the management of or participation in the underwriting or distribution of securities;
- (E) interest earned on customers' securities accounts;
- (F) fees for investment advisory services (except when rendered to one or more registered investment companies or insurance company separate accounts) or account supervision of securities;
- (G) fees for proxy solicitation with respect to, or tenders or exchanges of, securities;
- (H) income from service charges or other surcharges with respect to securities;
- (I) except as otherwise provided by Commission rule, dividends and interest received on securities in investment accounts of the broker or dealer;
- (J) fees in connection with put, call, and other option transactions in securities;
- (K) commissions earned from certificates of deposit and Treasury bills, bankers acceptances, or commercial paper having a maturity at issuance of not exceeding nine months (except that the SIPC may by bylaw include in the aggregate of gross revenues only an appropriate percentage of commissions based on SIPC's loss experience over at least the preceding five years with respect to such instruments); and
- (L) fees and other income from such other categories of the securities business as the SIPC may provide by bylaw.

The phrase does not include revenues received by a broker or dealer in connection with distribution of shares of a registered open end investment company or unit investment trust or revenues derived from the sale of variable annuities or the business of insurance.

Gross revenues from the securities business of SIPC members may be computed on a consolidated basis for the members and any subsidiaries. *15 U.S.C. § 78ddd(i)*. Consolidation includes the operations of any business to which the member has succeeded but excludes foreign subsidiaries. *Id.*

(n233)Footnote 233. *15 U.S.C. § 78ddd(c)(2)*.

(n234)Footnote 234. *15 U.S.C. § 78ddd(c)(3)(C)*.

(n235)Footnote 235. *15 U.S.C. § 78ddd(c)(3)(B)*.

(n236)Footnote 236. *Id.*

(n237)Footnote 237. 15 U.S.C. § 78ddd(c)(3)(A).

(n238)Footnote 238. See SIPA Rel. No. 157, n.225 *supra* at 387.

(n239)Footnote 239. *Id.* The projected Fund balance for 1995 is \$890,000,000. *Harbeck Interview*, n.224 *supra*.

(n240)Footnote 240. *Id.* See SIPA Rel. No. 157, n.225 *supra* at 388.

(n241)Footnote 241. *Id.* However, if a member's assessment as determined by this formula exceeds one-half of one percent of its gross revenues from the securities business, the assessment shall be half of one percent of that member's gross revenues from the securities business. *Id.*

(n242)Footnote 242. *Id.*

(n243)Footnote 243. 15 U.S.C. § 78jjj(a).

(n244)Footnote 244. See S. Res. 1218, 91st Cong., 2d Sess. 4 (1970). See also *SEC v. Packer, Wilbur & Co.*, 498 F.2d 978, 984 (2d Cir. 1974) .

(n245)Footnote 245. *Packer, Wilbur & Co.*, 498 F.2d at 984 .

(n246)Footnote 246. The purpose of the notice known as a "5(a) referral," is to afford the SIPC ample time to prepare for the selection of a trustee and supporting personnel capable of handling the problems of a particular case and to prepare to assume the financial burden that it be required in order to satisfy customer claims. See SIPC, *SIPC: A History and Explanation of Operations* 9 (2d ed. 1980).

(n247)Footnote 247. Interestingly, the statute does not define "financial difficulty." However, because Congress did delineate factors by which SIPC should adjudge the necessity of a liquidation proceeding, it is usually the case that the same factors should serve as indicia that referral of broker-dealers to the SIPC is warranted by the Commission or a self-regulatory organization. *Harbeck Interview*, n.224 *supra*.

(n248)Footnote 248. 15 U.S.C. § 78eee(a)(3).

(n249)Footnote 249. 15 U.S.C. § 78eee(a)(2).

(n250)Footnote 250. *Id.*

(n251)Footnote 251. The term "liquidation proceeding" means any proceeding for the liquidation of a debtor under SIPA in which a trustee has been appointed. 15 U.S.C. § 78lll(10).

(n252)Footnote 252. The term "customer" of a debtor means any person (including a person with whom the debtor deals as principal or agent) who has a claim on account of securities received, acquired or held by the debtor in the ordinary course of his business as a broker or dealer from or for the securities accounts of the person for safekeeping, with a view to sale, to cover consummated sales, pursuant to purchases, as collateral security, or to effect transfer. 15 U.S.C. § 78lll(2).

The term "customer" also includes any person who has a claim against the debtor arising out of sales or conversions of the securities, and any person who has deposited cash with the debtor for purchasing securities, but does not include: any person whose claims arise out of transactions with a foreign subsidiary of an SIPC member; or any person who has a claim for cash or securities that by contract, agreement, understanding, or operation of law, is part of the capital of the debtor or is subordinated to the claims of any or all creditors of the debtor, notwithstanding that some ground exists for declaring the contract, agreement, or understanding void or voidable in an action between the claimant and the debtor. *Id.*

Various cases have construed these provisions to determine who qualifies as a "customer" and is thereby entitled to protection. *See, e.g., In re Brentwood Secs., Inc.*, 96 B.R. 1002 (9th Cir. 1989) ; *aff'd in part and rev'd in part* 925 F.2d 325 (9th Cir. 1991) ("customer" status must be established for each transaction in order to qualify for SIPA protection); *SEC v. Ambassador Church Finance/Development Group, Inc.*, 679 F.2d 608 (6th Cir. 1982) ; *cert. denied*, 479 U.S. 850 (1986) (a church, unsophisticated in financial affairs, which entrusted bonds issued by itself to a broker-dealer for sale to the public qualified as a "customer").

(n253)Footnote 253. The term "financial responsibility rules" under SIPA includes:

- (a) Any rule adopted by the Commission pursuant to sections 8, 15(c)(3), 17(a), or 17(e)(1)(A) of the Securities Exchange Act of 1934;
- (b) Any rule adopted by the Commission relating to hypothecation or lending of customer securities;
- (c) Any rule adopted by any self-regulatory organization relating to capital, margin, recordkeeping, hypothecation, or lending requirements; and
- (d) Any other rule adopted by the Commission or any self-regulatory organization relating to protection of funds or securities.

Exchange Act Rule 3a40-1.

(n254)Footnote 254. 15 U.S.C. § 78eee(b)(1)(A)-(D).

(n255)Footnote 255. 15 U.S.C. § 78eee(a)(3)(A)-(B); 15 U.S.C. § 78eee(b)(1)(A)-(D).

(n256)Footnote 256. 15 U.S.C. § 78eee(b)(3).

(n257)Footnote 257. *Id.*

(n258)Footnote 258. 15 U.S.C. § 78fff-4(a)(4). The Commission has cautioned broker-dealers against soliciting customers to deposit or leave funds with a broker-dealer solely for the purpose of creating or maintaining cash balances to earn interest. *See Exch. Act Rel. No. 18262, 4 Fed. Sec. L. Rep. (CCH) P 25,134B (November 17, 1981)* . Although SIPA protects customers' cash claims of up to \$100,000, that protection is available only if the cash is in an account for the purpose of purchasing securities or as a result of a sale of securities. Cash balances created or maintained solely for the purpose of earning interest are not protected by SIPA. Accordingly, broker-dealers that pay interest on cash balances should review their procedures to ensure that they are not misleading their customers as to the existence of SIPA coverage. *Id.*

(n259)Footnote 259. 15 U.S.C. § 78fff-4(a)(3).

(n260)Footnote 260. 15 U.S.C. § 78fff-4(a)(5).

The direct payment procedure is discussed further in § 3.08[3][d][vi] *infra* .

(n261)Footnote 261. 15 U.S.C. § 78fff-4(a)(6).

(n262)Footnote 262. 15 U.S.C. § 78eee(b)(1).

(n263)Footnote 263. 15 U.S.C. § 78eee(b)(3).

(n264)Footnote 264. 15 U.S.C. § 78eee(b)(3).

(n265)Footnote 265. A person is considered not disinterested if:

- (i) such person is a creditor (including a customer), stockholder, or partner of the debtor;
- (ii) such person is or was an underwriter of any of the outstanding securities of the debtor or, within five years prior to the filing date, was the underwriter of any securities of the debtor;
- (iii) such person is, or was within two years prior to the filing date, a director, partner, officer, or employee of the debtor or such an underwriter, or an attorney for the debtor of such an underwriter; or
- (iv) it appears that such person has, by reason of any other direct or indirect relationship to, connection with, or interest in the debtor or underwriter, or for any other reason, an interest materially adverse to the interests of any class of creditors (including customers) or stockholders, except that SIPC shall in all cases be deemed disinterested, and an employee of the SIPC may be deemed disinterested if he would, except for his association with the SIPC, meet the standards set forth in this subparagraph.

15 U.S.C. § 78eee(b)(6)(A).

(n266)Footnote 266. 15 U.S.C. § 78eee(b)(3).

(n267)Footnote 267. 15 U.S.C. § 78eee(b)(6)(B).

(n268)Footnote 268. 15 U.S.C. § 78eee(d).

(n269)Footnote 269. 15 U.S.C. § 78eee(c).

(n270)Footnote 270. See n.199 *supra* and accompanying text.

(n271)Footnote 271. SIPA gives the court authority to protect property located outside the territorial limits of the court but within the actual or constructive possession of the debtor. 15 U.S.C. § 78eee(b)(2)(A)(i).

(n272)Footnote 272. *Id.*

(n273)Footnote 273. 15 U.S.C. § 78eee(b)(2)(A)(iii).

(n274)Footnote 274. This includes suits by stockholders of the debtor that may interfere with prosecution by the trustee of claims against former directors, officers, or employees of the debtor. 15 U.S.C. § 78eee(b)(2)(B)(ii).

(n275)Footnote 275. 15 U.S.C. § 78eee(b)(2)(B)(iii).

(n276)Footnote 276. 15 U.S.C. § 78eee(b)(4).

(n277)Footnote 277. 15 U.S.C. § 78eee(b)(3).

(n278)Footnote 278. The troubled SIPC member thus becomes a "debtor" as construed by the Bankruptcy Code. In *SEC v. ChristianPaine & Co., Inc.*, [1984-1985 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 91,959 (3d Cir. 1985), it was held that an SIPA trustee has general authority under the Act to conduct a debtor's examination about property in the hands of a third party by applying the same powers as a bankruptcy trustee. Trustees may also obtain release of grand jury testimony relevant to their role of protecting investors. See *In re Application of Executive Secs. Corp.*, 702 F.2d 406 (2d Cir. 1983) ; *cert. denied*, 464 U.S. 818 (1983) .

(n279)Footnote 279. 15 U.S.C. § 78fff-1(a)(1).

(n280)Footnote 280. 15 U.S.C. § 78fff-1(a).

(n281)Footnote 281. 15 U.S.C. § 78fff-1(a)(2).

(n282)Footnote 282. 15 U.S.C. § 78fff-1(a)(3).

(n283)Footnote 283. 15 U.S.C. § 78fff-1(b)(1).

(n284)Footnote 284. 15 U.S.C. § 78fff-1(b)(2).

(n285)Footnote 285. 15 U.S.C. § 78fff-1(c), (d)(1)-(4).

(n286)Footnote 286. 15 U.S.C. § 78fff-2(a)(1). For the definition of "customer" under Section 16(2) of SIPA, see n.248 *supra*.

(n287)Footnote 287. The "filing date" is the date on which an application for a protective decree is filed; the date on which notice of the direct payment procedure was published; the date on which a bankruptcy petition was filed; or the date on which a proceeding pending in any court or before any federal or state agency in which a receiver, trustee, or liquidator for the debtor has been appointed, was commenced. 15 U.S.C. § 78lll(7).

(n288)Footnote 288. 15 U.S.C. § 78fff-2(a)(1).

(n289)Footnote 289. 15 U.S.C. § 78fff-2(a)(2).

(n290)Footnote 290. 15 U.S.C. § 78fff-2(a)(3).

(n291)Footnote 291. The term "net equity" means the dollar amount of the account or accounts of a customer, to be determined by:

(A) calculating the sum the debtor would have owed to the customer if the debtor had liquidated, by sale or purchase on the filing date, all securities positions of the customer (other than customer name securities reclaimed by the customer); minus

(B) any outstanding indebtedness of the customer to the debtor on the filing date; plus

(C) any payment by the customer of the indebtedness to the debtor made with the trustee's approval and within such period as the trustee may determine (but in no event more than 60 days after the publication of notice under section 78fff-2(a).

In determining net equity under this paragraph, accounts held by a customer in separate capacities are deemed to be accounts of separate customers.

15 U.S.C. § 78lll(11).

(n292)Footnote 292. 15 U.S.C. § 78fff-2(a)(3). This provision is designed to protect the SIPC against speculation by customers who might otherwise withhold their claims to see if a change in the market might increase the value of what they receive from the estate. See S. Rep. No. 763, 95th Cong., 2d Sess. (1978).

The customer claim must be received by the trustee within six months after the date of publication of the notice of commencement of the liquidation proceeding.

(n293)Footnote 293. 15 U.S.C. § 78fff-2(b).

(n294)Footnote 294. See SIPA Rel. No. 113, [1983-1984 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 83,441 (Oct. 21, 1983).

(n295)Footnote 295. Rule 400(b), reprinted in the Securities Primary Law Sourcebook, Volume D, Section R (Matthew Bender).

(n296)Footnote 296. Rule 400(c).

(n297)Footnote 297. Rule 400(d).

(n298)Footnote 298. Rule 400(e), (f).

(n299)Footnote 299. Rule 400(g).

(n300)Footnote 300. Rule 400(h). See 15 U.S.C. § 78fff-2(c)(1)(A).

(n301)Footnote 301. 15 U.S.C. § 78fff-2(c)(1)(B). Net equity claims are settled in the following manner. "Customer name securities" are distributed first. See 15 U.S.C. § 78lll(3) for the definition of "customer name securities." SIPA's protections apply to most types of securities, such as notes, stocks, bonds, debentures and certificates of deposit, but excludes specifically unregistered investment contracts or for any interest in a commodity contract, or commodity options. 15 U.S.C. § 78lll(14). Next, the customer's "net equity" is computed for those whose claims were not completely satisfied by the distribution of customer name securities. "Net equity" is the filing date value of securities and cash the debtor owes the customer less any amount the customer owes the debtor. 15 U.S.C. § 78lll(11).

Customers who have debit balances may, with the trustee's approval and within a time period determined by the trustee, pay the debit balance in order to have a claim for the securities in the account. 15 U.S.C. § 78fff-2(c)(2).

Once calculated, net equity claims are satisfied, to the extent possible, by allocating "customer property" to the claimants. "Customer property" means cash and securities (except "customer name securities" at any time received, acquired, or held by or for the account of a debtor from or for the securities accounts of a customer. 15 U.S.C. § 78lll(4). This includes the proceeds of any property transferred by the debtor, including property unlawfully converted. 15 U.S.C. § 78fff-2(c)(3).

If there are insufficient securities to satisfy claims from "customer property," the trustee is obliged to purchase other securities from the open market if it is "fair and orderly." If that cannot be done, the trustee allocates the available securities pro-rata and makes up the shortage by paying customers cash instead. The amount paid is based on the value of the securities on the filing date. 15 U.S.C. § 78fff-2(d).

If the customer's remaining net equity reflects a long securities position and/or a credit balance, the trustee is obliged to satisfy the claim by making SIPC advances up to a maximum of \$500,000. Claims for cash are limited to \$100,000. 15 U.S.C. § 78fff-3(a).

Once customer name securities have been returned, customer property distributed *pro rata* and SIPC advances have been provided up to the limits, remaining customer claims may be satisfied against the general estate of the debtor. 15 U.S.C. § 78fff-2(c). Additionally, the trustee has the option, with SIPC approval, of selling or otherwise transferring all or any part of a customer's account to another SIPC member instead of applying the previous steps. The trustee may enter into an agreement to indemnify the member receiving the accounts against shortages of cash or securities in the accounts being sold or transferred. SIPC funds may be made available to guarantee or secure the indemnification. 15 U.S.C. § 78fff-2(f).

Once a brokerage firm has been liquidated, the SIPC may sue any party liable for the losses it reimbursed, including individual broker-dealers, in a subsequent civil action. Thus, in *SIPC v. Vigman*, [1986-1987 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 92,983 (9th Cir. 1986), the court stated that the SIPC could recover under *Rule 10b-5* against a liquidating broker-dealer and certain of its officers and employees for losses reimbursed to customers which arose from the unauthorized defendants' use of customers' assets to purchase securities.

(n302)Footnote 302. 15 U.S.C. § 78fff-2; § 78fff-3.

(n303)Footnote 303. 15 U.S.C. § 78fff-2. In *SIPC v. Poirer*, [1986-1987 Transfer Binder] Fed. Sec. L. Rep (CCH) P 92,752 (D. Or. 1986), it was held that the SIPC is a proper plaintiff in a securities fraud action brought against third parties on behalf of the debtor estate, since as an insurer it is subrogated to the rights of the debtor against third parties.

(n304)Footnote 304. 15 U.S.C. § 78fff-2(c)(1)(D).

(n305)Footnote 305. See n.297 for the definition of "customer name securities."

(n306)Footnote 306. 15 U.S.C. § 78fff-2(c)(2).

(n307)Footnote 307. S. Rep. No. 763, 95th Cong., 2d Sess. (1978).

(n308)Footnote 308. 15 U.S.C. § 78fff-2(c)(3).

(n309)Footnote 309. See n.287 *supra*.

(n310)Footnote 310. *Id.*

(n311)Footnote 311. Monies advanced by SIPC for each account of a separate customer may not be used to purchase securities to the extent that the aggregate value of the securities on the filing date exceeded the amount permitted to be advanced by SIPC under SIPA. 15 U.S.C. § 78fff-2(d), reprinted in the Primary Law Sourcebook, Volume D, Section R (Matthew Bender).

(n312)Footnote 312. The 1978 amendments to SIPA authorized SIPC to adopt rules concerning the close-out of open contractual commitments. 15 U.S.C. § 78fff-2(e)(1).

The requirements and procedures for closing out or completing open contractual commitments for the purchase or sale of securities between an SIPC member undergoing liquidation and other brokers and dealers are set forth in SIPA Rel. No. 113 [1983- 1984 Transfer Binder], Fed. Sec. L. Rep. (CCH) P 83,441 (Oct. 21, 1983).

Form 300-A must be filed with the trustee in a proceeding under Section 5 of the SIPA by a broker or dealer who executed transactions leading to open contractual commitments as defined under Rule 300(e) of the SIPC.

The Commission approved Series 100 Rules (Accounts of "Separate" Customers of SIPC members) and Series 200 Rules (Accounts Introduced by Other Brokers or Dealers) in SIPA Rel. No. 83 [1979 Transfer Binder], Fed. Sec. L. Rep. (CCH) P 81,920 (Jan. 17, 1979); Form 300-B for the reporting of all fails to deliver, and Form 300-C, for the reporting of all fails to receive, in SIPA Rel. No. 87, Fed. Sec. L. Rep. (CCH) P 82,039 (March 30, 1979).

(n313)Footnote 313. 15 U.S.C. § 78fff-2(e)(2)(A).

(n314)Footnote 314. 15 U.S.C. § 78fff-2(e)(2)(B).

(n315)Footnote 315. *Id.* In addition, persons with contracts not wholly executory may claim any losses against the general estate. S. Rep. No. 763, 95th Cong., 2d Sess. (1978). Closeouts must be for the benefit of a "customer," and

need not be performed if this would result in furtherance of a fraud. See SEC v. Havener Securities Corp., [1981 Transfer Binder], Fed. Sec. L. Rep. (CCH) P 97,958 (S.D.N.Y. 1980).

(n316)Footnote 316. 15 U.S.C. § 78fff-2(e)(3).

(n317)Footnote 317. 15 U.S.C. § 78fff-2(e).

(n318)Footnote 318. *Id.*

(n319)Footnote 319. 15 U.S.C. § 78fff-3(a)(2). See 17 C.F.R. §§ 300.100-300.105, which sets forth the procedure for determining which accounts maintained by a customer with a SIPC member will be deemed "separate" customer accounts for SIPC protection.

(n320)Footnote 320. 15 U.S.C. § 78fff-3(a)(4).

(n321)Footnote 321. The customers themselves cannot be brokers, dealers or banks. 15 U.S.C. § 78fff-3(a)(5).

(n322)Footnote 322. *Id.*

(n323)Footnote 323. *Id.*

CHAPTER 3A Regulation of Credit

1-3A Federal Securities Exchange Act of 1934 § 3A.01

AUTHOR: W. Reece Bader

§ 3A.01 Introduction

At the time of the calamitous stock-market crash of October 1929, a very large number of shares of stock were held by brokers in margin accounts. The amount of cash which many customers had paid was relatively small, some of the brokers carrying accounts with as little as 10 percent equity. When market prices began to decline, these slim equities were quickly wiped out, resulting in heavy margin calls which many customers were unable to meet; the brokers were then forced to sell out. These distress sales further depressed market prices, touching off a new series of margin calls, and so on. Furthermore, the high rate being paid for call money had attracted a large share of the country's available free credit for use in these operations. In fact, the necessity for regulation of the use of credit in securities transactions was cited in the Securities Exchange Act of 1934 ("Exchange Act") as being one of the reasons for its enactment. n1

One case stated: n2

Having in mind the 1929 collapse of the stock market and the depression years which followed, Congress was anxious to use credit control to prevent undue fluctuations in the securities market. At the same time, Congress hoped to protect the investor, especially the small investor, by making it impossible to buy securities on too small, or 'thin,' a margin.

Section 7 of the Exchange Act regulates the amount of credit that may be extended on any non-exempted security and authorizes the Board of Governors of the Federal Reserve System ("Federal Reserve Board" or "Board") to make rules implementing its provisions. To that purpose, the Board of Governors adopted Regulations T, U, G, n3 and X. Brokers and dealers are required to satisfy these regulations as to both the extension and maintenance of credit.

Regulation T governs the extension of credit by and to brokers and dealers. Regulation U imposes credit restrictions upon both bank lenders and non-bank lenders that extend credit for the purpose of buying or carrying margin stock. Former Regulation G, related to credit restrictions for persons other than brokers, dealers, and banks, was merged into, and is now covered by, Regulation U. Regulation X prohibits borrowers from obtaining credit from brokers, dealers, and banks for the purposes of purchasing or carrying securities except in compliance with Regulations T and U.

Sections 11(d)(1) and Rule 10b-16 are corollaries to the credit restrictions contained in Section 7. Section 11(d)(1)

generally prohibits broker-dealers from making sales on credit of issues for which the broker-dealer is acting as underwriter. Under Rule 10b-16, broker-dealers must disclose to borrowers the terms of the loans extended to them.

Between 1996 and 1998 significant changes occurred with respect to credit controls. The National Securities Markets Improvement Act of 1996ⁿ⁴ repealed Section 8(a) and exempted the extension of credit to certain broker-dealers from the Board's margin regulations. As a result, changes were made to Regulations G, T and U.ⁿ⁵

The New York Stock Exchange and The Financial Industry Regulatory Authority ("FINRA") also are components of the credit regulation over broker-dealers. New York Stock Exchange Rule 431 and NASD Conduct Rule 2520 regulate "maintenance" margin, i.e., whether a customer has sufficient margin on a continuing basis, since the federal regulations deal principally in borrowing limitations on the initial transaction.

As previously noted, the federal margin rules were adopted to prevent investor leverage from inflating the stock market. The SRO rules have a different purpose. They are intended to protect the broker-dealer from over-extending credit to customers, and significant effort is made to insure consistency between the SRO rules regarding maintenance margin.
ⁿ⁶

The federal and SRO rules relating to margin also impact the broker-dealer's net capital position under SEC Rule 15c3-1ⁿ⁷ as well as the broker-dealers FOCUS reports. SEC Rule 15c3-1 imposes complex, detailed obligations on broker-dealers in determining their net capital. These obligations are constantly impacted by the margin rules, requiring regular and updated filings.

FOOTNOTES:

(n1)Footnote 1. Section 2(1)(d).

See Robert G. Lane, *Securities Exchange Act of 1934-Civil Remedies Based Upon Illegal Extension of Credit in Violation of Regulation T*, 61 Mich. L. Rev. 940, 945-946 (1963):

Three primary objectives were advanced during the legislative hearings as being the basic purposes for the enactment of legislation governing margin requirements. First, it was advocated that the principal objective should be the protection of the margin trader, sometimes referred to as the "innocent lamb," in contra-distinction to the protection of the broker-dealer afforded by the exchange and private margin requirements. The Senate report asserted that the main objective of the margin regulations was to protect the margin trader by making it impossible for him to buy on too thin a margin, since in the event of unfavorable developments in the financial world such loans are promptly called and may result in the forced sale of the margin trader's securities. Indeed, margin traders are frequently sold out near the bottom of a market decline, thereby maximizing their losses. Secondly, the opinion was expressed that margin regulations should be instruments of credit policy designed to stabilize stock market fluctuations and thus contribute to business stability. In theory, when security prices rise the margin trader has more available credit to buy more securities on margin, and, in addition, more investors may be induced to buy on margin. Such purchases, in turn, tend to raise prices further and so increase again the ability of the margin trader to borrow, whereas a decline in security prices frequently results in forced selling to meet margin calls which, in turn, increases the volume of sell orders and intensifies the decline in prices. Finally, the House committee took the position that the margin regulations were to be designed as selective credit controls to regulate the aggregate amount of credit which could be directed into the stock market and out of the more productive uses of commerce and industry. There was a desire to prevent a recurrence of the pre-crash situation where capital which would have otherwise been available to supply the needs of commerce, industry and agriculture was attracted by the high interest rates in the stock market. (footnotes omitted)

(n2)Footnote 2. *United States v. Weisscredit Banca Commerciale E D'Investimenti*, 325 F. Supp. 1384, 1388 (S.D.N.Y. 1971) .

(n3)Footnote 3. Former Regulation G imposed credit restrictions upon persons other than brokers, dealers and banks. That regulation was later repealed and Regulation G currently is an implementation of the Gramm-Leach-Bliley Act provisions regarding disclosure and reporting of agreements related to the Community Reinvestment Act.

(n4)Footnote 4. Pub. L. No. 104-290, 110 Stat. 3416 (1996).

(n5)Footnote 5. The changes are all set forth in the final rule report, 63 FR 2806 (Jan. 16, 1998). Following the amendments to Regulations T and U, various self-regulatory organizations filed proposed changes to their rules concerning margin requirements. *See* 64 FR 48882 (Sept. 8, 1999) (American Stock Exchange); 63 FR 24580 (May 4, 1998) (Chicago Board Options Exchange); 65 FR 70854 (Nov. 28, 2000) (National Association of Securities Dealers); 64 FR 13620 (Mar. 19, 1999) (New York Stock Exchange).

(n6)Footnote 6. In 2005, the SEC approved plot programs proposed by the NASD and NYSE under which "portfolio margin," based upon mathematical models, would be used for equity securities based portfolios consisting of listed market index options, index warrants, futures, futures options and exchange traded funds. This historic change in the leveraging of securities purchasing was still in its pilot stage through mid-2008. *See* SR NASD 2007-045. And, with the United States' economy faced with crises such as the subprime meltdown, SEC support for the proposal could diminish.

CHAPTER 3A Regulation of Credit

1-3A Federal Securities Exchange Act of 1934 § 3A.02

AUTHOR: W. Reece Bader

§ 3A.02 Controls on Credit

[1] Margin Requirements--Section 7

Section 7 basically sets forth rules relating to margin requirements, *i.e.*, the amount of credit that may be extended on any security. n1 In Section 7(a) the Federal Reserve Board is directed to prescribe rules governing the amount of credit initially extended and subsequently maintained on any nonexempt security. The initial minimum requirements are specifically described in Section 7(a), while Section 7(b) gives the Board power to raise or lower these requirements from time to time.

Section 7(c) makes it unlawful for any broker, dealer, or member of a national securities exchange to extend or arrange for credit in contravention of Board rules. n2 Persons not subject to Section 7(c) are forbidden by Section 7(d) from violating Board rules adopted "to prevent the excessive use of credit for the purchasing or carrying of or trading in securities in contravention of the other provisions of this section." Section 7(d) does not apply to (1) loans made not in the ordinary course of business; (2) loans on an exempted security; (3) loans made to a dealer to finance its activities as a market maker or underwriter; (4) bank loans on non-equity securities; and (5) loans conditionally or unconditionally, exempted by the Federal Reserve Board. Section 7(f), added in 1970, n3 makes it unlawful to enjoy the beneficial use of a loan made to purchase or carry securities in violation of Section 7 or the rules thereunder, thereby applying Section 7 to customers as well as to brokers and other lenders. n4 Thus, customers could no longer freely borrow from foreign lenders not subject to United States jurisdiction. As originally enacted, Section 7 applied only to listed securities. Thus, brokers could originally extend credit only on securities traded on a national securities exchange. As amended in 1968, n5 the power of the Federal Reserve Board was extended to cover all non-exempt securities, including the over-the-counter market.

Effective January 1, 1999, all Nasdaq securities are marginable. Since that date, the Federal Reserve Board has ceased publication of its "OTC Margin Stock List" that formerly included all OTC securities covered by Section 7. n6 To be included on this list prior to 1999, a stock must have met certain criteria designed to determine if it had a sufficiently strong market. n7

The 1996 amendments also created status exemption for all borrowing by broker-dealers "a substantial portion of whose

business consists of transactions with persons other than brokers or dealers." n8 The exemption applies to borrowers although the margin regulations generally apply to lenders. Safe harbor tests have been established to provide guidance for lenders as to what broker-dealers qualify for exempt status. n9 Another exemption is now provided for broker-dealers whose non-proprietary business is limited to transactions with market makers and specialists. n10 Since this exemption is described in Regulation U, broker-dealers who qualify for the exemption will not be limited by the margin regulations if they borrow from a lender other than a broker-dealer, but borrowings from broker-dealers will be subject to Regulation T.

Finally, because the 1996 legislation repealed Section 8, which had mandated a distinction between bank and nonbank lenders, Regulations G and U have become merged into a revised Regulation U. Lenders under Regulation G, formerly known as "nonbank lenders" are now simply "lenders" under Regulation U. Other changes are detailed elsewhere in this chapter.

[a] Regulation T.

Pursuant to the requirements of Section 7(c), the Board of Governors adopted Regulation T. n11 Pursuant to the rules under Regulation T, accounts are set up for recording all transactions between a broker-dealer and a customer. Purchases by customers for cash are recorded in cash accounts; credit purchases are made in margin accounts. A series of special purpose accounts are set up for accounting of certain other transactions. n12

Every extension of credit on a nonexempt security is presumed to be for the purpose of trading in securities and, consequently, subject to Regulation T. However, this presumption may be overcome by the filing of an appropriate representation; the creditor may, in the absence of bad faith, rely upon such representation. n13 The broker-dealer can follow his customer's instructions, but may not be involved in any other way in a loan not in accordance with Regulation T. n14 A broker who violates Regulation T by means of an accidental miscalculation will be excused if, upon discovery of the error, the broker acts promptly to remedy the situation. n15

[i] General Accounts.

Regulation T forbids a broker to effect any transaction in a customer's general margin account that, with other transactions effected in the account on the same day, creates an excess of the debit balance of such account over the maximum loan value of the securities in such account, or increases any such excess. n16 The "debit balance" is the amount the customer owes the broker and can include such things as communication, shipping, and service charges, in addition to the amount owed for securities. n17 The "maximum loan value" is periodically determined by the Federal Reserve Board.

To qualify as a margin security, a security must be registered; as of January 1, 1999, the following securities will qualify: any Nasdaq listed securities; non-equity securities; securities issued by open-end investment companies or unit investment trusts; foreign margin stock; and any debt securities that are convertible to margin securities. n18 A "registered security" is any security registered on a national securities exchange or deemed to be so registered by Section 12(f) of the Act because that security has unlisted trading privileges on a national exchange. n19

Pursuant to Regulation T, a margin call must be satisfied within one payment period after the margin deficiency was created or increased. n20 The additional amount may be satisfied by a transfer from the special memorandum account, deposit of cash, margin securities, or exempted securities, or any combination thereof. n21 The payment period may be extended for one or more limited periods upon a creditor's application to the examining authority prior to the end of a payment period or extension. n22 Extensions will be granted except where the organization or association examining the application believes that the creditor is not acting in good faith, or has not demonstrated circumstances warranting an extension. n23

An extension can only be given in exceptional circumstances and can not last longer than those circumstances require. The New York Stock Exchange has stated it will not grant an extension if the customer has asked for extensions five times within a one year period. n24 If the deposit is not made within the required time, the broker must sell enough of the customer's securities (usually those just purchased) to eliminate any margin deficiency. n25

If credit is initially established with adequate margin, Regulation T does not require additional margin because of a subsequent decrease in the market price of the margin stock or a subsequent change in the margin requirements. n26 However, the rules of the self-regulatory organizations require customers to put up additional collateral under such circumstances, and broker-dealers are also permitted to have their own internal margin maintenance requirements. n27

A customer can withdraw securities or cash from the general account except if additional cash or securities are required to be deposited into the account for a transaction on the same or a previous day or if the withdrawal, together with other transactions, would create or increase a margin deficiency. n28 Margin excess may be withdrawn. Margin excess also may be transferred to the special memorandum account by making a single entry to that account representing a debit to the margin account and a credit to the special memorandum account. n29

Normally, a customer can, on the same day, sell securities and use the margin released to acquire new securities with the same maximum loan value. Such transactions can not violate the margin account requirements of Section 4 of Regulation T because the customer's indebtedness and the loan value of the securities in the account have remained the same for that day. Rule 4(c) gauges the net effect on the customer's account of all transactions on a single day; it does not treat the transactions individually. n30 Thus no new excess indebtedness has been created in the customer's account.

[iii] Special Accounts.

The special accounts authorized by Regulation T cover transactions not falling within the intent of Section 7, such as arbitrage transactions, specialist transactions, transactions in commodities and foreign exchange, and other arrangements involving special circumstances.

The most significant special account is the cash account designed for cash purchases of securities where no credit is to be extended to the customer. n31 If the funds in the account are insufficient to cover a purchase, the customer has a certain number of business days after the purchase, plus delivery time, n32 within which to pay for the security. n33 If the security is not immediately available because it is to be issued later, or distributed later in accordance with a published plan, the period starts to run when the security is made available by the issuer for delivery to purchasers, or when the security is distributed under the plan. n34 If the customer is to pay the broker upon the delivery of the securities, the payment period does not apply. Instead the customer must pay on the earlier of the following two dates: (1) the delivery date of the security or 2) thirty-five calendar days after the date the security is purchased. n35

On application of the creditor, an appropriate committee of either a national securities exchange or a self-regulatory organization may, under exceptional circumstances, extend the applicable payment period. n36 The committee must be satisfied that the application is in good faith and that exceptional circumstances warrant the extension.

If the customer cannot pay within the time allowed, the broker must cancel the transaction and sell the securities. n37 However, the broker has the option to disregard any debt that does not exceed \$1,000. n38 There is authority that holds that if a broker is forced to sell the securities, he may keep any profits he makes if the customer could not have reasonably expected to raise the money needed within the requisite time period. n39

A customer may sell securities from a cash account if he holds such securities in his account. n40 Securities not held in the customer's account may be sold if the broker has a good faith belief that the customer owns the securities and will promptly deposit them in the account. n41 *Naftalin & Co. v. Merrill Lynch, Pierce, Fenner & Smith, Inc.* n42 held that the term "promptly" could not be read to require delivery of the securities within any specific time period, n43 but that

if delivery is slow, the broker must "buy-in" the transaction (i.e., cover the customer's short position) if the customer can not reasonably explain the delay. n44 About the same time *Naftalin* was decided, the Commission adopted Rule 15c3-3(m) that requires a broker to buy-in a transaction if for any reason he has not obtained the securities from the customer within ten days of the settlement date. n45 The Commission has suspended this rule with respect to exempted securities (as defined in Section 3(a)(12) of the Exchange Act). n46 A broker can recover from a customer for buying in at a loss, although the broker's damages may be limited if he waits too long to buy into a rising market. n47

"Free riding" is a practice where the customer purchases securities in a cash account, does not immediately pay for them, and sells them within the payment period if their price goes up, using the proceeds to pay the broker for the initial purchase. Thus, the customer can make a profit without using any of his own money. To prevent this, Regulation T provides that if the customer sells a non-exempt security out of his account, or delivers the security to another broker or dealer, or cancels a transaction without having first made full payment for the security, that customer, for the next ninety days, cannot purchase any non-exempt security in his special cash account, unless sufficient funds for the purchase are already in the account. n48 On application of the broker, an appropriate committee of either a national securities exchange or a self-regulatory organization may waive this rule if the committee is satisfied that both creditor and customer are acting in good faith and that circumstances warrant such authorization. n49 Exceptions to the "ninety day rule" are allowed where a customer sells securities without full prior payment, but pays for securities within the time allowed (usually seven days) without withdrawing from the account the proceeds of the sale, and where a customer delivers the purchased security to another broker or dealer for deposit in a cash account in which sufficient funds to pay for the security are held.

The Board strictly interprets this exception to insure that the proceeds of the sale do not pay for the purchase. n50

[iii] Portfolio Margining.

On July 14, 2005 the Commission approved, n51 on a pilot basis expiring July 31, 2007, amendments to NYSE Rule 431 to permit the application of a prescribed risk-based margin requirement, portfolio manager, to certain eligible products (including listed broad-based securities index options, warrants, futures, futures options and related exchange treated funds) as an alternative to strategy-based margin requirements. n52 Subsequently, on July 11, 2006, the Commission approved additional amendments to Rule 431 that: (1) expanded the scope of products eligible for portfolio margining and cross-margining; (2) conform customer disclosure requirements under Rule 726 to comply with this expansion; and (3) modify certain net capital requirements in connection with the maintenance of portfolio margin accounts. n53

Similarly, on February 2, 2006, the Chicago Board of Options Exchange, Incorporated ("CBOE") filed with the Commission a proposed rule change to allow portfolio margining of listed equity options, narrow-based index options and securities futures, as well as certain OTC instruments. n54

Assuming the Commission ultimately gives its approval, the proposed rule change would dramatically reduce collateral requirement on accounts holding equities, options and single stock futures because while today investors must meet Regulation T's collateral requirement of 50% the first day that equities are held in an account, and 25% thereafter maintenance requirements imposed by the SROs, the proposed portfolio margining rule will drop that requirement to a maximum of 15% starting day one.

[b] Regulation U.

In January 1998, the Federal Reserve adopted amendments to Regulation U. n55 The regulation, adopted by the Federal Reserve Board under Section 7(d) of the Exchange Act, imposes limitations on both bank and non-bank lenders that extend credit for the purpose of buying or carrying margin stock. Where a loan is secured directly or indirectly n56 by margin stock the lender may not extend more than 50% of the current market value of the stock. n57 Where a loan made

to purchase or carry margin stock is secured by collateral other than stock, the lender may determine the loan value of the collateral in good faith. n58

Margin stock includes securities registered on a national securities exchange, any listed Nasdaq security, n59 debt securities convertible into margin stock, rights or warrants to acquire margin stock, and certain investment securities. n60 Regulation U does not apply to credit extended on stock for a purpose other than purchasing or carrying margin securities.

When making a loan secured by margin stock in an amount exceeding \$100,000, the lender has the responsibility of determining the purpose of the loan. The lender is entitled to rely in good faith on the "purpose statement," in Form F.R. U-1, which the customer must sign to receive the loan. n61 As under Regulation T, Regulation U restricts the right to withdraw collateral where such withdrawal would cause the credit to exceed, or increase the amount by which the credit exceeds, the maximum loan value of the collateral. n62

There are a number of exceptions to Regulation U. Most allow lenders to extend credit to broker-dealers for a variety of purposes. n63 Also, excepted is credit extended outside the United States, credit extended to any foreign banking institution, and credit extended to any bank. n64 Loan renewals or extensions are not subject to Regulation U. n65

[c] Amendments to Regulation A.

As amended effective January 9, 2003, Regulation A now provides that adjustment credit, previously extended at a below-market rate, be replaced by primary credit, a type of discount window credit which will be available for short terms as a backup liquidity source for depository institutions deemed by the Federal Reserve Bank to be in sound financial condition. Primary credit will be extended at a rate above the federal funds rate, and will be established at least every two weeks by the same procedure used to set the adjustment credit rate. Where institutions fail to qualify for primary credit, a secondary credit program is available.

Regulation A was further amended, effective July 10, 2003, to decrease the primary credit rate at each Federal Reserve Bank. The secondary credit rates at such banks decreased automatically as a result of the action.

[d] Amendments to Regulation B.

In February 2003, the Federal Reserve Board approved amendments to Regulation B. The regulation implements the Equal Credit Opportunity Act which prohibits discrimination by creditors on the basis of an applicant's national origin, marital status, religion, color, sex, race, age, receipt of public assistance benefits, or the exercise of rights under the Consumer Credit Protection Act. n66 As amended, the rule retains prohibitions on inquiries or notations about applicant characteristics for non-mortgage transactions, while creating an exceptions for data collected for the purpose of self-tests. The amendment also provides that creditors must maintain records for prescreened candidates for a period of 25 months. The amendment became effective April 15, 2003, with a mandatory compliance date of April 15, 2004.

[2] Selling New Issues on Credit -- Section 11(d)(1).

Among the problems presented by the activities of securities firms acting sometimes as dealers and sometimes as brokers, is the sale to customers on credit of issues for which the broker-dealers are also acting as underwriters. The possible conflict in such a situation is fairly obvious, and Congress met it by adopting Section 11(d)(1), which makes unlawful the extension or maintenance of credit to a customer on a nonexempt new issue by a broker-dealer who within the past thirty days participated in the distribution of that security. n67 Delayed payment by the customer up to thirty-five days after the purchase because of delayed delivery of the stock is not an extension of credit within Section 11(d)(1).

Rule 11d1-1 states that Section 11(d)(1) does not apply where: (1) the broker-dealer does not sell the security to the customer; (2) the issuer exchanges an old security on which credit was lawfully maintained for a new security; (3) the customer is a broker or dealer or bank; (4) the customer exercises stock purchase rights that he received because he is a shareholder in the issuing company; (5) the distribution is a new issue of an old security where the newly issued shares will make up less than half of all the outstanding securities in that class when the distribution is complete, and the broker-dealer sells the security on a day when he is not participating in the distribution. n68

There are many parallels between life insurance and mutual funds, and there have been some attempts to combine the two in a program for investors. Such efforts, however, create problems under Section 11(d)(1), since sellers of mutual fund shares are constantly engaged in a distribution, and since the proposals for combination have contemplated the funding of life insurance premiums by loans collateralized by the mutual fund shares. n69 It appears, however, that these difficulties can be avoided by careful segregation of functions and accounts to comply with the intent of Congress in enacting Section 11(d)(1). n70

Funding the purchase of life insurance with loans collateralized by the mutual fund shares may violate Regulation T. Consequently, the SEC has adopted Rule 15c2-5 n71 which, while general in terms, was aimed at the insurance premium funding device. n72 The rule allows the use of this device and requires the broker-dealer to disclose in writing to the customer all the terms of such a loan arrangement, all risks involved, and all commissions to be received. The broker-dealer must also become familiar with the customer's financial condition, decide that the transaction is suitable for the customer, and deliver to the customer a statement of the reasons for the decision. Rule 15c2-5 does not apply to a loan made by a broker or dealer in compliance with Regulation T. n73

[3] Disclosure of Credit Terms in Margin Transactions

Rule 10b-16 requires a broker or dealer before opening a general account n74 to disclose the terms under which credit will be extended. In adopting this rule, the Commission stated: n75

The initial disclosure is designed to insure that the investor, before his account is opened, understands the terms and conditions under which credit charges will be made. This will enable him to compare the various credit terms available to him and to understand the methods used in computing the actual credit charges.

Rule 10b-16 requires the following disclosure:

(i) the conditions under which an interest charge will be imposed; (ii) the annual rate or rates of interest that can be imposed; (iii) the method of computing interest; (iv) if rates of interest are subject to change without prior notice, the specific conditions under which they can be changed; (v) the method of determining the debit balance or balances on which interest is to be charged and whether credit is to be given for credit balances in cash accounts; (vi) what other charges resulting from the extension of credit, if any, will be made and under what conditions; and (vii) the nature of any interest or lien retained by the broker or dealer in the security or other property held as collateral and the conditions under which additional collateral can be required. ... n76

Liang v. Dean Witter & Co., Inc. n77 held that if a firm has no internal guidelines for when additional collateral will be required, it need only disclose "that discretion is its sole guide" for margin calls. If such guidelines do exist, they must be disclosed. *Stephens v. Reynolds Securities, Inc.* n78 held that disclosures that the interest rate charged on a customer's debit balance was to be at least 0.5% higher than the broker's call money rate in New York City, and that daily interest would be computed on a 360 day year, were sufficient under Rule 10b-16.

The initial disclosure must be in writing and given or sent at the time the account is opened, except that if the account is

opened by telephone, the required information may be orally communicated to the customer at that time, provided a written statement is sent to the customer immediately thereafter. n79

Rule 10b-16(a)(2) requires a broker to provide a customer using credit with a written statement, at least quarterly, disclosing: (i) the balance at the beginning of the period; the date, amount and a brief description of each credit and debit entered during such period; n80 (ii) the total interest charge for the period during which interest is charged, and the dates on which such period began and ended and the annual rate of interest charged; n81 and (iii) all other charges resulting from the extension of credit in that account.

A broker-dealer is prohibited by Rule 10b-16(b) from changing any terms under which credit charges will be made, unless the customer has been given thirty days written notice of such changes. However, where the change would result in a lower interest charge to the customer, notice of the change may be given within a reasonable time after the effective date of the change.

Courts are split on whether a private right of action exists under Rule 10b-16; such a right has been recognized in several cases. n82 However, other cases have denied that such a cause of action exists. n83

FOOTNOTES:

(n1)Footnote 1. *See Note, Federal Margin Requirements as a Basis for Civil Liability*, 66 *Colum. L. Rev.* 1462, 1462-1463 (1966):

Margin trading--the purchase or short sale of securities with borrowed funds--is usually conducted in one of two ways. Typically, the investor deposits with his broker a percentage of the purchase price--the initial margin--pursuant to an agreement with the broker setting up a margin account. The broker lends the customer the balance, and usually finances this loan by borrowing in turn from a third party while pledging the purchased shares as security. The broker retains the stock as collateral and is given the right to dispose of it if the customer fails to maintain in his account an amount sufficient to assure that his equity in the stock exceeds a defined percentage of the current market value; this mandatory account balance is called the maintenance margin. Alternatively, the investor may borrow directly from a bank or finance company. In this case, no formal margin account need be maintained, although the broker may make the arrangements for the loan. (footnotes omitted)

(n2)Footnote 2. Section 7(c) provides:

It shall be unlawful for any member of a national securities exchange or any broker or dealer, directly or indirectly, to extend or maintain credit or arrange for the extension or maintenance of credit to or for any customer--

(A) On any security (other than an exempted security), except as provided in paragraph (2), in contravention of the rules and regulations which the Board of Governors of the Federal Reserve System [] shall prescribe under subsections (a) and (b) of this section; and

(B) Without collateral or on any collateral other than securities, except in accordance with such rules and regulations as the Board may prescribe (i) to permit under specified conditions and for a limited period any such member, broker, or dealer to maintain a credit initially extended in conformity with the rules and regulations of the Board; and (ii) to permit the extension or maintenance of credit in cases where the extension or maintenance of credit is not for the purpose of purchasing or carrying securities or of evading or circumventing the provisions of subparagraph (A).

1-3A Federal Securities Exchange Act of 1934 § 3A.02

(n3)Footnote 3. Federal Deposit Insurance Act, Pub. L. No. 91-508, 84 Stat. 1114 (codified as amended at 12 U.S.C. §§ 1829b, 1830, 1831 (2006)).

(n4)Footnote 4. Section 7(f) has had an adverse impact on the development of a private right of action under Section 7. *See* § 3A.03 *infra*.

(n5)Footnote 5. Pub. L. No. 90-437, 82 Stat. 452 (codified as amended at 15 U.S.C. § 78g (2006)).

(n6)Footnote 6. A last version of this list is published at Fed. Banking L. Rep. (CCH) P 69,871.

(n7)Footnote 7. *E.g.*, Reg. T, § 17(a)(1)-(9).

(n8)Footnote 8. Exchange Act, § 7.

(n9)Footnote 9. Three alternative tests are now used: (1) 1,000 active accounts with non broker-dealers; or (2) \$10,000,000 in annual revenues from transactions with such persons; or (3) 10% of annual gross revenues derived from such transactions. Reg. T, § 2; Reg. U, § 2.

(n10)Footnote 10. Reg. U, § 5(c)(10).

(n11)Footnote 11. 12 C.F.R. § 220.

(n12)Footnote 12. The four special accounts are described in Regulation T, Section 8 and include: (1) special memorandum accounts (12 C.F.R. § 220.5), (2) good faith accounts (12 C.F.R. § 220.6), (3) broker-dealer credit accounts (12 C.F.R. § 220.7), and (4) cash accounts (12 C.F.R. § 220.8).

(n13)Footnote 13. Reg. T, § 6(e)(iii)(2).

(n14)Footnote 14. *In re Sutro Bros. & Co.*, 41 S.E.C. 443 (1963) ; Russell L. Irish, Exch. Act Rel. No. 34-7718 (1965).

(n15)Footnote 15. Reg. T, § 3(h).

(n16)Footnote 16. Reg. T, § 4(c)(1).

(n17)Footnote 17. Reg. T, § 4(f)(1).

(n18)Footnote 18. Reg. T, § 2.

(n19)Footnote 19. Reg. T, § 2.

(n20)Footnote 20. Reg. T, § 4(c)(3)(i).

(n21)Footnote 21. Reg. T, § 4(c)(2).

(n22)Footnote 22. Reg. T, § 4(c)(3)(ii).

(n23)Footnote 23. Reg. T, § 4(c)(3)(ii).

(n24)Footnote 24. 151 Sec. Reg. & L.Rep. A-4 (BNA May 10, 1972).

(n25)Footnote 25. Reg. T, § 4(d). No action need be taken by the creditor if the margin deficiency created or increased is \$1,000 or less.

(n26)Footnote 26. Reg. T, § 3(c).

(n27)Footnote 27. NYSE Rule 431(b) addresses the requisite margin requirements for margin accounts. The Rule was amended in 2002 resulting in lower customer maintenance margin requirements for certain non-equity securities and allowing good faith margin treatment for certain non-equity securities held in "exempt accounts. In addition, several broker-dealers have instituted increased margin maintenance requirements for certain volatile technology and internet securities.

(n28)Footnote 28. Reg. T, § 4(e)(1).

(n29)Footnote 29. Reg. T, § 4(e)(2). A special memorandum account may be maintained in conjunction with a margin account. A single entry amount is used to represent a credit to the special memorandum account and a simultaneous debit to the margin account. A transfer between the two accounts is effected by an increase or a reduction in the entry. Likewise, a payment to the customer or a transfer to another of the customer's accounts from the special memorandum account reduces the single entry amount. Reg. T, § 6(a).

(n30)Footnote 30. Reg. T, § 4(c)(1).

(n31)Footnote 31. Reg. T, § 8(a)(1).

(n32)Footnote 32. Reg. T, § 8(b)(3) states:

If any shipment of securities is incidental to consummation of a transaction, a creditor may extend the payment period by the number of days required for shipment, but not more than one additional payment period.

(n33)Footnote 33. Reg. T, § 8(b)(1)(i); 8(b)(4).

(n34)Footnote 34. Reg. T, § 8(b)(1)(i)(B),(C).

(n35)Footnote 35. Reg. T, § 8(b)(2).

(n36)Footnote 36. Reg. T, § 8(d)(1)(i).

(n37)Footnote 37. Reg. T, § 8(b)(4).

(n38)Footnote 38. *Id.*

(n39)Footnote 39. *Surgil v. Kidder, Peabody & Co.*, 69 Misc. 2d 213, 215, 329 N.Y.S. 2d 993, 995 (N.Y. App. Term 1971) .

(n40)Footnote 40. Reg. T, § 8(a)(2)(i).

(n41)Footnote 41. Reg. T, § 8(a)(2)(ii).

(n42)Footnote 42. 469 F.2d 1166 (8th Cir. 1972) .

(n43)Footnote 43. The court specifically rejected the idea that the period allowed for payment in cash account should also apply to the delivery of the securities:

We are persuaded, however, that the 1939 amendment's elimination of the seven-day delivery requirement on the sale side demonstrates an obvious intention to treat sales transactions in special cash accounts differently from purchase transactions. There are, moreover, valid reasons for the different

treatment. In purchase transactions the customer's only obligation is to pay for the securities in cash--the availability of which is generally within the customer's realm of control. Whereas, on the other side of the transaction, because of the mechanics of the securities industry over which the customer ordinarily has no control, he may not be able on all occasions to obtain physical possession of securities which he owns and intends to deliver within a specified period of time, such as seven days. *Naftalin*, 469 F.2d 166 at 1177. (Footnote omitted.)

(n44)Footnote 44. *Naftalin*, 469 F.2d at 1177.

The rejection of a specific delivery date requirement does not, however, mean that Regulation T may be read as sanctioning unnecessary or avoidable delays. Section [8(a)(2)(ii)] places determinative emphasis upon the broker/dealer's good faith, and in the absence of an absolute liquidation requirement we must focus on that good faith as the test of compliance. The good faith of a broker/dealer who has originally executed a sell order in compliance with Regulation T must gradually dissipate as time passes without delivery of the securities. The time comes when the good faith standard of section [8(a)(2)(ii)] requires the broker/dealer to make inquiry concerning the reason for delay and to act accordingly. If, upon inquiry, the broker/dealer ascertains that the slow delivery is unavoidable and out of his customer's control, he may indulge a reasonable delay commensurate with the circumstances without any impairment of good faith. If no credible explanation for the delay is forthcoming, the transaction must be bought-in immediately. (Footnote omitted.)

(n45)Footnote 45. Rule 15c3-3(n) permits an extension of this ten day limit. For further discussion of Rule 15c3-3(m) and a broker's obligation to cover a customer's short position, see § 6.02[3] *infra*.

(n46)Footnote 46. Exch. Act Rel. No. 34-10,093, *Fed. Sec. L. Rep. (CCH) P 79,310* (1973).

(n47)Footnote 47. See § 3A.03[2] *infra*.

(n48)Footnote 48. Reg. T, § 8(c).

(n49)Footnote 49. Reg. T, § 8(d)(iii).

(n50)Footnote 50. Reg. T, § 8(c)(ii). The original broker or dealer may rely on a written statement accepted in good faith from the other broker or dealer that sufficient funds are held in the other cash account. *Id.*

(n51)Footnote 51. See Exch. Rel. No. 34-52031 (July 14, 2005).

(n52)Footnote 52. Prior to these amendments, member organizations were subject exclusively to strategy or position-based margin requirements which apply specific margin percentage requirements in Rule 431 to each security position or strategy, either long or short, held in a customer's account -- irrespective of whether changes in the price of a given security (e.g., an equity option) are proportionate (in percentage terms) with changes in the price of the underlying security (e.g., the equity). When utilizing a portfolio margin methodology offsets are fully realized, whereas under a strategy or position-based methodology, security positions and/or groups of security positions comprising a single strategy are margined independently of each other and offsets between them do not efficiently impact the total margin requirement.

(n53)Footnote 53. See Exch. Rel. No. 34-54125 (July 11, 2006).

(n54)Footnote 54. See Exch. Rel. No. 34-53576 (March 30, 2006). On August 9, 2006, the CBOE filed an amendment to the proposed rule change. See Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change

by the Chicago Board Options Exchange, Incorporated Relating to Customer Portfolio Margining Requirements, available at <http://www.cboe.org/publish/RuleFilingsSEC/SR-CBOE-2006-014.a1.pdf>.

(n55)Footnote 55. *See 63 FR 2806 (Jan. 16, 1998)*. Under the amendments, as of April 1, 1998, Regulation U was extended to cover lenders previously covered under Regulation G. As a result, Regulation G was eliminated. With these amendments, the Federal Reserve eliminated the distinction between bank lenders and non-bank lenders. Previously, Section 8(a) of the Securities Exchange Act of 1934 mandated that distinction. However, the repeal of Section 8(a) allowed for the merging of Regulations G and U.

(n56)Footnote 56. Reg. U, § 2 states: "Indirectly secured."

(1) Includes any arrangement with the customer under which:

(i) The customer's right or ability to sell, pledge, or otherwise dispose of margin stock owned by the customer is in any way restricted while the credit remains outstanding; or

(ii) The exercise of such right is or may be cause for accelerating the maturity of the credit.

(2) Does not include such an arrangement if:

(i) After applying the proceeds of the credit, not more than 25 percent of the value (as determined by any reasonable method) of the assets subject to the arrangement is represented by margin stock;

(ii) It is a lending arrangement that permits accelerating the maturity of the credit as a result of a default or renegotiation of another credit to the customer by another lender that is not an affiliate of the lender;

(iii) The lender holds the margin stock only in the capacity of custodian, depositary, or trustee, or under similar circumstances, and, in good faith, has not relied upon the margin stock as collateral; or

(iv) The lender, in good faith, has not relied upon the margin stock as collateral in extending or maintaining the particular credit.

(n58)Footnote 58. Reg. U, § 2.

(n59)Footnote 59. Reg. U, § 2.

(n60)Footnote 60. Reg. U, § 2.

(n61)Footnote 61. "Good faith" with respect to: Making a determination or accepting a statement concerning a borrower means that the lender or its duly authorized representative is alert to the circumstances surrounding the credit, and if in possession of information that would cause a prudent person not to make the determination or accept the notice or certification without inquiry, investigates and is satisfied that it is correct.

A broker-dealer who conspires with the customer to file false purpose statements is subject to disciplinary proceedings. *In re Gilbert Parker*, 34 S.E.C. 385, 386 (1952); *Copley & Co.*, Exch. Act Rel. No. 7679 (1965).

(n62)Footnote 62. Reg. U, § 3(f).

(n63)Footnote 63. Reg. U, § 5, which details the types of special purpose credit that allows lenders to extend to

broker-dealers on a good faith basis. They include: hypothecation loans; temporary advances for payment-against-delivery transactions; loans for securities in transit or transfer; intra day loans, to be repaid on the same day; certain arbitrage loans; market maker and specialist loans; underwriter loans; emergency loans; capital contribution loans; and credit to clearing brokers or dealers.

(n64)Footnote 64. Reg. U, § 6(a)-(c).

(n65)Footnote 65. Reg. U, § 3(h); *See Wyshak v. City Nat'l Bank*, 607 F.2d 824, 826 (9th Cir. 1979) .

(n66)Footnote 66. **15 U.S.C. § 1601 et seq.**

(n67)Footnote 67. Section 11(d)(1).

Section 11(d)(1) is not applicable to secondary offerings by insiders who have held the securities for long enough to indicate clearly that there is no connection between the purchase and the sale. *Lubrizol Corp., SEC No-Action Letter, Fed. Sec. L. Rep. (CCH) P 78,061* (Div. Tding. & Mkts. 1971).

(n68)Footnote 68. Rule 11d1-1(e) states:

A broker-dealer shall be deemed to be participating in a distribution of a new issue if (1) he owns, directly or indirectly, any undistributed security of such issue, or (2) he is engaged in any stabilizing activities to facilitate a distribution of such issue, or (3) he is a party to any syndicate agreement under which such stabilizing activities are being or may be undertaken, or (4) he is a party to an executory agreement to purchase or distribute such issue.

(n69)Footnote 69. The plan may also involve questions under Regulation T. The plan itself is subject to the registration requirements of the Securities Act of 1933 and may be subject to regulation under the Investment Company Act of 1940. The industry was put on notice in 1962 of the difficulties involved. *See Exch. Act Rel. No. 34-6726, Fed. Sec. L. Rep. (CCH) P 22,833* (Feb. 8, 1962).

(n70)Footnote 70. *See letter of Director of Division of Trading and Exchanges, Fed. Sec. L. Rep. (CCH) P 76,840* (Mar. 5, 1962). This was not reproduced in a release.

(n71)Footnote 71. *17 C.F.R. § 240.15c2-5*.

(n72)Footnote 72. *Exch. Act Rel. Nos. 34-6809* (proposed), *Fed. Sec. L. Rep. (CCH) P 76, 848* (May 22, 1962), 6851 (adopted), *Fed. Sec. L. Rep. (CCH) P 76,852* (July 17, 1962). Special guidelines have been adopted for use in the preparation of registration statements governing the offering of such securities. *See Guide 57* under the Securities Act of 1933.

(n73)Footnote 73. *17 C.F.R. § 240.15c2-5(b)*.

(n74)Footnote 74. *See § 3A.02[1][a][i] supra*

(n75)Footnote 75. *Exch. Act Rel. No. 34-8773 [1969-1970 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 77,765* (1969). This is also the stated purpose of the Truth-in-Lending Act, **15 U.S.C.A. § 1601** , which specifically exempted brokers' margin loans to customers with the expectation that the Commission would act in this area: "In recommending an exemption for stockbroker margin loans in the bill, the committee intends for the SEC to require substantially similar disclosure by regulation as soon as it is possible to issue such regulations." *S. Rep. No. 392, 90th Cong. 1st Sess. 9* (1967).

(n76)Footnote 76. *17 C.F.R. § 240.10b-16(a)(1)*. Further, pursuant to NYSE Rule 726, for those members who

participate in the pilot program for portfolio margining, member organizations must furnish eligible pilot program participants with a special written disclosure statement describing the nature of, and risks associated with, portfolio margining. Eligible participants are required to sign and acknowledge that they have read and understand the disclosure statement and agree to the terms of maintaining a portfolio margin account. See Exch. Rel. No. 34-54125 (July 11, 2006).

(n77)Footnote 77. 540 F.2d 1107, 1112 (D.C. Cir. 1976) .

Note, *SEC Rule 10b-16 and the Regulation of Margin Credit*, 87 Yale L.J. 372 (1977), argues that Rule 10b-16 is inadequate because it does not require specific information about when a discretionary margin call will be made. The article suggests repealing Rule 10b-16, transferring margin credit regulation to the Truth-in-Lending Act, and using Rule 10b-5 as a remedy for abuses in connection with margin transactions.

(n78)Footnote 78. 413 F. Supp. 50, 51 (N.D. Ala. 1976) ; *aff'd by Stephens v. Reynolds Securities, Inc.*, 532 F.2d 1053 (5th Cir. 1976) .

(n79)Footnote 79. 17 C.F.R. § 240.10b-16(a)(1).

(n80)Footnote 80. If interest is charged for a period different from the period covered by the statement, Rule 10b-16(a)(2)(i) requires that the balance as of the last day of the interest period must also be disclosed.

(n81)Footnote 81. If interest is charged separately for separate accounts, then the information required by Rule 10b-16(a)(2)(ii) must be provided separately with respect to all accounts.

(n82)Footnote 82. See *GFL Advantage Fund, Ltd. v. Colkitt*, 272 F.3d 189 (3d Cir. 2001) (recognizing private right of action); *Baden v. Craig-Hallum, Inc.*, 646 F. Supp. 483, 490 (D. Minn. 1986) ; *Finne v. Dain Bosworth Inc.*, 648 F. Supp. 337, 345 (D. Minn. 1986) ; *Greenblatt v. Drexel Burnham Lambert, Inc.*, 763 F.2d 1352 (11th Cir. 1985) ; see also *Liang*, 540 F.2d at 1113 n.25:

It may safely be assumed that noncompliance with Rule 10b-16 provides the basis for a private cause of action. It is already established that a violation of Rule 10b-5, a rule of disclosure analogous to Rule 10b-16, implies a civil remedy. *Supt. of Insurance v. Bankers Life & Cas. Co.*, 404 U.S. 6, 13 n. 9, 92 S.Ct. 165, 30 L.Ed.2d 128 (1971) . Our recognition here accords with the view that "private enforcement of Commission rules may '[provide] a necessary supplement to Commission action.'" *Blue Chip Stamps v. Manor Drug Stores*, 421 U.S. 723, 730, 95 S.Ct. 1917, 1923, 44 L.Ed.2d 539 (1975) , quoting *J. I. Case Co. v. Borak*, 377 U.S. 426, 432, 84 S.Ct. 1555, 12 L.Ed.2d 423 (1964) .

Still remaining, however, is the determination of whether recovery under Rule 10b-16 requires that the wrongdoer have acted with 'scienter,' *Ernst & Ernst v. Hochfelder*, 425 U.S. 185, 96 S.Ct. 1375, 47 L.Ed.2d 668 (1976) ("scienter" a necessary element for damages under Rule 10b-5), or with some lesser degree of error, cf. *Haynes v. Logan Furniture Mart, Inc.*, 503 F.2d 1161 (7th Cir. 1974) (mistake of law not adequate bar to civil liability under Truth in Lending Act). Whatever it determines to be the requisite standard of error for recovery, the trial court, of course, must also find either that the appellants have adequately alleged in their complaint or that the complaint may appropriately be amended to allege it.

See also *Slomiak v. Bear Stearns & Co.*, Fed. Sec. L. Rep. (CCH) P 91,590 (S.D.N.Y. 1984), in which the court held that an implied private right of action exists under Rule 10b-16.

See also *Haynes*, 503 F.2d 1161 , superseded by statute as stated in *Marshall v. Security State Bank*, 121 B.R. 814 (Bankr. C.D. Ill. 1990) . (Rule 10b-16 found to be the securities analogue of the Truth in Lending Act of 1968, Pub. L. 90-321, 82 Stat. 146, 15 U.S.C. §§ 1601 et seq. , requiring adequate disclosure of the costs of credit and containing an express private remedy; an implied private cause of action for damages held to exist under Rule 10b-16 for

noncompliance with the Rule); *Saunders v. Oppenheimer Government Securities, Inc.*, *Fed. Sec. L. Rep. (CCH) P 98,318* (D. Ore. 1981) (court relies on *Haynes* to hold that an implied private right of action exists under Rule 10b-16).

Scienter is not an element of a private right of action under Rule 10b-16. *Id.*

If a broker violates Rule 10b-16, the investor may rescind the sales contract pursuant to Section 29(b), discussed in § 3A.03[2] *infra*. *Id.*

But see Robertson v. Dean Witter Reynolds, Inc., *Fed. Sec. L. Rep. (CCH) P 91,868* (9th Cir. 1984), in which the court acknowledged the existence of a private right of action under Rule 10b-16, but held that scienter is an essential element of such action. The court reasoned that the Commission's authority to issue Rule 10b-16 derived from Section 10(b), not the *Truth in Lending Act*, and the Supreme Court in *Ernst & Ernst v. Hochfelder*, *Fed. Sec. L. Rep. (CCH) 95,479*, 425 U.S. 185, 193, 96 S. Ct. 1375, 1381, 47 L. Ed. 2d 668, 676 (1976), held that proof of scienter was a requirement in proving a violation of that section.

In *Steinberg v. Shearson Hayden Stone, Inc.*, *Fed. Sec. L. Rep. (CCH) 98,868*, 546 F. Supp. 699, 701 (D. Del. 1982), the court held that the existence of an express cause of action under Rule 10b-16 does not preclude an implied right of action under *Rule 10b-5* and allowed a customer's claim against a broker-dealer for fraudulently misstating the credit terms in the broker-dealer's customer margin accounts to be asserted as a *Rule 10b-5* violation.

See also Angelastro v. Prudential Bache Securities, Inc., 575 F. Supp. 270, modified, 764 F.2d 939 (3d Cir. 1985) (violation of Rule 10b-16 provides the basis for a private right of action).

(n83)Footnote 83. *Establissement Tomis v. Shearson Hayden Stone*, 459 F. Supp. 1355, 1361 (S.D.N.Y. 1978) stated: "... Tomis has cited no case (and the court is aware of none) holding that a plaintiff may possess a private right of action for damages under Rule 10b-16. Therefore the first claim will only be treated from a section 10(b) and *Rule 10b-5* standpoint."

See also Furer v. Paine, Webber, Jackson & Curtis, Inc., *Fed. Sec. L. Rep. (CCH) 98,701*, 1982 U.S. Dist. LEXIS 13021 (C.D. Cal. 1982) (no private right of action under Rule 10b-16 since no clear and unambiguous showing that Congress intended the creation of a private remedy).

CHAPTER 3A Regulation of Credit

1-3A Federal Securities Exchange Act of 1934 § 3A.03

AUTHOR: W. Reece Bader

§ 3A.03 Private Remedies for Violation of Margin Requirements

[1] Damage Actions

Prior to the passage of Section 7(f) in 1970, many cases held that a customer had an implied private right of action if his broker caused him a loss through violation of the margin requirements. n1 In the leading case of *Pearlstein v. Scudder & German*, n2 the Second Circuit held that a customer's private right of action under Section 7 was a necessary and effective way of enforcing the margin requirements, even where the plaintiff was aware of the violation at the time it was committed:

However, our holding does not turn on Pearlstein's subjective knowledge of the law. In our view the danger of permitting a windfall to an unscrupulous investor is outweighed by the salutary policing effect which the threat of private suits for compensatory damages can have upon brokers and dealers above and beyond the threats of governmental action by the Securities and Exchange Commission. n3

Section 7(f) makes it unlawful for a customer to obtain credit in violation of the margin regulations. Regulation X, adopted in 1971, states that a borrower cannot obtain credit from a bank, broker-dealer, or other lender for the purpose of purchasing or carrying securities unless he does so in compliance with the rules contained in Regulations T and U.

The passage of Section 7(f) and the adoption of Regulation X, when considered in light of the *Cort v. Ash* n4 standards for implying a private right of action, has led most courts to conclude that a private right of action under Section 7 no longer exists. n5 The Second Circuit has conceded that its decision in *Pearlstein* may no longer be viable. n6 Perhaps the most detailed judicial consideration of this issue took place in *Stern v. Merrill Lynch, Pierce, Fenner & Smith, Inc.* n7 There, the Fourth Circuit noted that earlier cases considered "establishment of the investor as an intended beneficiary of the statute ... an absolutely essential element in finding any right of action in the investor's favor." n8 Although such cases recognized that the primary purpose of Section 7 was to prevent excessive speculation, they also found an "incidental purpose" of protecting individual investors, thereby making them intended beneficiaries of the statute. Such a purpose could be inferred because the statute applied only to the broker (or other lender) and not the customer. The *Stern* court said: n9

The very fact that the investor was not included in the prohibition was taken as a legislative

expression of the intent of the statute to protect him against the broker. However, this reasoning lost all weight when Section 7(f) was added to the statute. That amendment, with its drastic change in the status of the investor under the statute, was entirely inconsistent with any notion that the statute was intended for the investor's protection. No longer could it be fairly inferred that investor could qualify as a statutory beneficiary of Section 7, entitled to invoke the statute as a basis for a private action in damages in his favor.

The court also noted the Supreme Court's statement in *Piper v. Chris-Craft Industries, Inc.* n10 that a person regulated by a statute "can scarcely lay claim to the status of 'beneficiary' whom Congress considered in need of protection." n11 Thus, Section 7 affords no private action under either the standards of the prior cases allowing a private right of action under Section 7 or under the *Cort v. Ash* requirement that the plaintiff be a member of a class for whose special benefit the statute was enacted.

Another reason offered by *Stern* for denying a private right of action is that such actions may not be necessary to supplement Commission enforcement of the margin rules, because numerous and widespread violations would be needed to contravene the purpose of the statute, i.e. to control national credit policy. Large scale violations could be controlled much better by the Commission than by individual actions. In any event, private actions are a questionable deterrent: "Any deterrent effect of threatened liability on the broker may well be more than offset by the inducement to violations inherent in the prospect of a free ride for the customer who ... is placed in the enviable position of 'heads-I-win tails-you-lose.'" n12

Some cases, however, support a limited private right of action under Section 7. *Palmer v. Thomson & McKinnon Auchincloss, Inc.* n13 held that since Regulation X does not cover investors who make innocent mistakes that are promptly corrected upon their discovery, such investors may sue under Section 7. *Utah State University v. Bear, Sterns & Co.*, criticized this reasoning:

Under Regulation X, the broker is subject to criminal penalties and the customer is not, if the credit is obtained innocently and, if upon learning of the violation, he makes payment. This difference in criminal penalties is no reason for imposing civil liability on the broker. n14

[2] Rescission of Purchases Made in Violation of Section 7

Section 29(b) of the Exchange Act states that every contract made in violation of any provision of the Act, or any rules or regulations thereunder, shall be void. Section 29 states that Section 29(b) does not affect the validity of a loan unless at the time the loan is made, the person making it had actual knowledge that the loan was in violation of the Act or a rule or regulation thereunder.

Some cases have allowed investors to rescind stock purchases under Section 29(b), because the purchases were made with illegal extensions of credit. n15 However, the Supreme Court ruled in *Mills v. Electric Auto Lite Co.* n16 that Section 29(b) does not automatically make a contract void, but makes it voidable at the option of the innocent party. Under Section 7(f) the customer is no longer innocent when he accepts a loan that violates the margin requirement. Thus, those courts unwilling to recognize a damage action under Section 7 will very likely not allow a customer to repudiate a securities purchase made in violation of Section 7. n17 In *Shearson Lehman Bros. Inc. v. M&L Inv.*, n18 the district court held that the client could not recover damages under Regulation T where the client knowingly enjoyed the beneficial use of the illegal extension of credit.

Some customers have attempted to use violation of Regulation T as a defense to contract actions by their brokers. n19 This usually occurs where the customer has effected an undisclosed short sale through the broker, and the broker has been forced to "buy-in" the transaction at a loss when the customer does not deliver the security. Failure to buy-in the transaction once the broker realizes that the customer cannot deliver the security is a violation of Regulation T. n20 The

leading case of *n21* held that if a broker is tardy in buying-in the transaction, his damages will be limited to the difference between the price of the short sale and the price at which the securities could have been bought at the time the buy-in should have been effected.

Rule 15c3-3(m) requires a transaction (other than a bona fide short sale) to be bought-in if delivery of the securities is not made within ten days after the trade. *n22* Extensions of the ten day period are permitted. *n23* *Chicago Corp. v. Jordan* *n24* held that under *Naftalin* and Rule 15c3-3(m), if a broker does not buy-in a transaction within the ten day period (plus any extensions), damages must be based on the market price of the security on the eleventh day (plus any extensions) after the trade.

If a customer makes a purchase from a special cash account, and can not pay for it within the time required (usually seven days), *n25* the broker must promptly sell those securities, and can recover any difference from his customer. *n26* *Chicago Corp. v. Jordan* held that if the broker is late in selling such securities, his damages must be based on the market price of the securities at the time they should have been sold.

(n1)Footnote 1. *Remar v. Clayton Securities Corp.*, 81 F. Supp. 1014 (D. Mass. 1949) , superseded by statute, 603 F.2d 1073 (4th Cir. 1979) ; *Glickman v. Schweickart & Co.*, 242 F. Supp. 670 (S.D.N.Y. 1965) ; *McCormick v. Esposito*, 500 F.2d 620 (5th Cir. 1974) , cert. denied, 420 U.S. 912 (1975) ; *Spoon v. Walston & Co.*, 478 F.2d 246 (6th Cir. 1973) ; *Landry v. Hemphill & Noyes & Co.*, 473 F.2d 365 (1st Cir.) , cert. denied, 414 U.S. 1002 (1973) . The post-1970 cases cited here involved transactions occurring prior to the passage of Section 7(f).

(n2)Footnote 2. 429 F.2d 1136 (2d Cir. 1970) .

(n3)Footnote 3. *Pearlstein*, 429 F.2d at 1141. (Footnote omitted.)

(n4)Footnote 4. 422 U.S. 66, 95 S. Ct. 2080, 45 L. Ed.2d 26 (1975) . These standards are reprinted at § 5.01 *infra* . In part, they examine whether a private right of action is necessary to further the statutory purpose and whether the statute was enacted for the especial benefit of member's of the plaintiff's class.

Whether *Cort v. Ash* remains viable is the subject of disagreement in the lower courts. See, e.g., *Park Nat'l Bank v. Michael Oil Co.*, 702 F. Supp. 703 (N.D. Ill. 1989) ; *24 Hour Fuel Oil Co. v. Long Island R.R. Co.*, 903 F. Supp. 393 (E.D.N.Y. 1995) ; *Ryan v. Illinois*, 1996 U.S. Dist. LEXIS 5160 (N.D. Ill. Apr. 17, 1996) .

Justices Scalia and O'Connor in their concurrence to *Thompson v. Thompson*, 484 U.S. 174, 189 (1988) , stated that *Touche Ross v. Redington*, 442 U.S. 560 (1979) , "effectively overruled the *Cort v. Ash* analysis," in holding that unless the legislative intent can be inferred from the language of the statute, or some other source, a private remedy will not be implied. Nonetheless, the district court in *24 Hour Fuel Oil* held that the four criteria of *Cort v. Ash* "continue to dictate the manner in which private rights of action are reviewed." *24 Hour Fuel Oil Corp. v. Long Island R.R. Co.*, 903 F. Supp. at 397 .

(n5)Footnote 5. See *Gargallo v. Merrill Lynch, Pierce, Fenner & Smith, Inc.*, 1992 U.S. App. LEXIS 11386, at *6 (6[th] Cir. May 12, 1992) , cert. denied, 506 U.S. 1008 (1992) ; *Useden v. Acker*, 947 F.2d 1563, 1582 (11[th] Cir. 1991) , cert. denied, 508 U.S. 959 (1993) ; *Utah State Univ. v. Bear, Stearns & Co.*, 549 F.2d 164, 170 (10th Cir.) , cert. denied, 434 U.S. 890 (1977) ; *Birotte v. Merrill Lynch, Pierce, Fenner & Smith, Inc.*, 468 F. Supp. 1172, 1187 (D.N.J. 1979) ; *Siedman v. Merrill, Lynch, Pierce, Fenner & Smith, Inc.*, 465 F. Supp. 1233, 1239 (S.D.N.Y. 1979) ; *Ettablissement Tomis v. Shearson Hayden Stone, Inc.*, 459 F. Supp. 1355, 1361 (S.D.N.Y. 1978) ; *Gluck v. Frankel*, 440 F. Supp. 1143, 1146 (S.D.N.Y. 1977) ; *Theoharous v. Bache & Co., Inc.*, Fed. Sec. L. Rep. (CCH) P 96,281, at *11 (D. Conn. 1977) . One case allowing a private right of action did so because of precedent rather than the merit of plaintiff's position. See *Nussbacher v. Chase Manhattan Bank (N.A.)*, 444 F. Supp. 973, 980 (S.D.N.Y. 1977) .

(n6)Footnote 6. *Bennett v. U.S. Trust Co.*, 770 F.2d 308, 311 (2d Cir.) , cert. denied, 474 U.S. 1058 (1985) .

(n7)Footnote 7. 603 F.2d 1073 (4th Cir. 1979) .

(n8)Footnote 8. *Stern*, 603 F.2d at 1079.

(n9)Footnote 9. *Stern*, 603 F.2d at 1080-81. Judge Butzner, dissenting from this case, stated:

I think the passage of a § 7(f) in 1970 provides a fair indication of Congress' implicit intention to recognize the legitimacy of private suits. By enacting § 7(f) Congress dealt with the obligation of investors to abide by margin restrictions against a background of case law that for nearly 20 years had established the right of investors to sue their brokers for violation of these restrictions. Nevertheless, Congress did not expressly proscribe private suits by innocent investors when it passed § 7(f). Nor does the legislative history of § 7(f) refer to any intention to prohibit an implied private cause of action on the part of investors. The inference that can be drawn justifiably from such action was recently illustrated in *Cannon v. University of Chicago*, 441 U.S. 677, 99 S. Ct. 1946, 60 L. Ed.2d 560 (1979) . That case raised the question of whether a private cause of action may be implied under Title IX of the Education Amendments of 1972. Pointing to the similarity between Title IX and Title VI of the Civil Rights Act of 1964 and the well recognized implied private remedy under Title VI, Mr. Justice Stevens said:

It is always appropriate to assume that our elected representatives, like other citizens, know the law; in this case, because of their repeated references to Title VI and its modes of enforcement, we are especially justified in presuming both that those representatives were aware of the prior interpretation of Title IV and that that interpretation reflects their intent with respect to Title IX. *Id.* at 1099-1100. (Footnote omitted)

(n10)Footnote 10. 430 U.S. 1, 97 S.Ct. 926, 51 L. Ed. 2d 124 (1977) .

(n11)Footnote 11. *Stern*, 603 F.2d at 1081, quoting 430 U.S. 1, 37, 97 S. Ct. 926, 947, 51 L. Ed.2d 124, 151 (1977) .

(n12)Footnote 12. *Stern*, 603 F.2d at 1092, quoting *Gordon v. duPont Glove Forgan, Inc.*, 487 F.2d 1260, 1263 (5th Cir. 1973) , paraphrasing Judge Friendly's dissent in *Pearlstein v. Scudder & German*, n.2 *supra* at 1148. Judge Butzner's dissent said:

In amici briefs, both the Board of Governors of the Federal Reserve System and the Securities and Exchange Commission, the agencies primarily charged with regulation of the securities market and the nation's resources of credit, have told us that private suits are necessary to effectuate the margin regulations.

Without belaboring this point, it is sufficient to note that no sound reasons have been advanced for doubting this advice. *Id.* at 1100 .

(n13)Footnote 13. 427 F. Supp. 915, 921 (D. Conn. 1977) .

(n14)Footnote 14. 549 F.2d 164, 170 (10th Cir. 1977) . The *Palmer* case was also criticized by *Stern*, n.7 *supra* , for holding that a private right of action was consistent with *Cort v. Ash*, even though it conceded that investor protection was a "byproduct" of the statute's main purpose.

CHAPTER 4 Exchange Act Registration and Reporting Requirements

1-4 Federal Securities Exchange Act of 1934 4.syn

AUTHOR: Brandon C. Parris, Andrew D. Thorpe

§ 4.syn Synopsis to Chapter 4: Exchange Act Registration and Reporting Requirements

Scope

§ 4.01 Registration of Securities Under the Securities Exchange Act of 1934

[1] Registration of Listed Securities--Section 12(b)

[2] Registration of Unlisted Equity Securities -- Section 12(g)

[a] Application of Section 12(g)

[i] Number of Stockholders.

[ii] Deregistration.

[iii] Asset Requirements.

[iv] Exemptions.

[v] Voluntary Registration.

[vi] Foreign Private Issuers.

[3] Form 10--General Form of Registration Statement Under Exchange Act Section 12(b) or 12(g)

[a] Item 1. Business.

[b] Item 1A. Risk Factors.

[c] Item 2. Financial Information.

[d] Item 3. Properties.

[e] Item 4. Security Ownership of Certain Beneficial Owners and Management.

[f] Item 5. Directors and Executive Officers.

[g] Item 6. Executive Compensation.

[h] Item 7. Certain Relationships and Related Transactions, and Director Independence.

[i] Item 8. Legal Proceedings.

[j] Item 9. Market Price of and Dividends on the Registrant's Common Equity and Related Stockholder Matters.

[k] Item 10. Recent Sales of Unregistered Securities.

[l] Item 11. Description of Registrant's Securities to Be Registered.

[m] Item 12. Indemnification of Directors and Officers.

[n] Item 13. Financial Statements and Supplementary Data.

[o] Item 14. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

[p] Item 15. Financial Statements and Exhibits.

[4] Form 8-A--Form for Registration of Certain Classes of Securities Pursuant to Section 12(b) or 12(g)

[a] Item 1. Description of the Registrant's Securities to be Registered.

[b] Item 2. Exhibits.

[5] Unlisted Trading Privileges

[6] Delisting of Securities Registered under Section 12(b)

[7] Reporting Requirements Applicable to Non-Registered Companies Under Section 15(d)

§ 4.02 Periodic and Current Reporting Requirements

[1] Form 10-K--Annual Report Pursuant to Section 13 or 15(d)

[a] Filing and Other General Instructions.

[b] Facing Sheet.

[c] Part I--Business, Properties, Legal Proceedings, and Submission of Matters to a Vote of Security Holders.

[i] Item 1. Business.

[ii] Item 1A. Risk Factors.

[iii] Item 1B. Unresolved Staff Comments.

[iv] Item 2. Properties.

[v] Item 3. Legal Proceedings.

[vi] Item 4. Submission of Matters to a Vote of Security Holders.

[d] Part II--Market and Financial Data

[i] Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

[ii] Item 6. Selected Financial Data.

[iii] Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

[iv] Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

[v] Item 8. Financial Statements and Supplementary Data.

[vi] Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure.

[vii] Item 9A. Controls and Procedures.

[viii] Item 9B. Other Information.

[e] Part III--Traditional Proxy Disclosure Information

[i] Item 10. Directors, Executive Officers and Corporate Governance.

[ii] Item 11. Executive Compensation.

[iii] Item 12. Security Ownership of Certain Beneficial Owners and Management.

[iv] Item 13. Certain Relationships and Related Transactions, and Director Independence.

[v] Item 14. Principal Accountant Fees and Services.

[f] Part IV -- Item 15. Exhibits and Financial Statement Schedules.

[g] Certification Requirements.

[h] Supplemental Information by Registrants Subject to Section 15(d).

[2] Form 10-Q--Quarterly Report Under Section 13 or 15(d)

[a] General Filing Instructions.

[b] Facing Sheet.

[c] Part I. Financial Information

[i] Item 1. Financial Statements.

[ii] Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

[iii] Item 3. Quantitative and Qualitative Disclosures About Market Risk.

[iv] Item 4. Controls and Procedures.

[d] Part II--Other Information

[i] Item 1. Legal Proceedings.

[ii] Item 1A. Risk Factors.

[iii] Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

[iv] Item 3. Defaults Upon Senior Securities.

[v] Item 4. Submission of Matters to a Vote of Security Holders.

[vi] Item 5. Other Information.

[vii] Item 6. Exhibits.

[3] Form 8-K--Current Report Pursuant to Section 13 or 15(d)

[a] General Filing Instructions

[b] Section 1. Registrant's Business and Operations

[c] Section 2. Financial Information

[d] Section 3. Securities and Trading Markets

[e] Section 4. Matters Related to Accountants and Financial Statements

[f] Section 5. Corporate Governance and Management

[g] Section 6. Asset-Backed Securities

[h] Section 7. Regulation FD

[i] Section 8. Other Events

[j] Section 9. Financial Statements and Exhibits

[4] Interactive Date For Financial Reporting

§ 4.03 Integrated Disclosure--Regulation S-K

[1] General

[a] Application of Regulation S-K.

[b] Commission Policy on Projections.

[c] Commission Policy on Security Ratings.

[d] Incorporation by Reference.

[e] Use of Non-GAAP Financial Measures in Commission Filings.

[f] Smaller Reporting Companies.

[2] Business

[a] Item 101. Description of Business.

[i] General Development of Business.

[ii] Financial Information About Segments.

[iii] Narrative Description of Business.

[iv] Financial Information About Geographic Areas.

[v] Available Information.

[vi] Reports to Security Holders.

[vii] Enforceability of Civil Liabilities Against Foreign Persons.

[viii] Smaller Reporting Companies.

[b] Item 102. Description of Property.

[c] Item 103. Legal Proceedings.

[3] Securities of the Registrant

[a] Item 201. Market Price of and Dividends on the Registrant's Common Equity and Related Stockholder Matters.

[i] Market Information.

[ii] Holders.

[iii] Dividends.

[iv] Securities Authorized for Issuance Under Equity Compensation Plans.

[v] Performance Graph.

[b] Item 202. Description of Registrant's Securities.

[i] Capital Stock.

[ii] Debt Securities.

[iii] Warrants and Rights.

[iv] Other Securities.

[v] Market Information for Securities Other Than Common Equity.

[vi] American Depositary Receipts.

[4] Financial Information

[a] Item 301. Selected Financial Data.

[b] Item 302. Supplementary Financial Information.

[i] Selected Quarterly Financial Data.

[ii] Information About Oil and Gas Producing Activities.

[c] Item 303. Management's Discussion and Analysis of Financial Condition and Results of Operations.

[i] Full Fiscal Years.

[A] Liquidity.

[B] Capital Resources.

[C] Results of Operations.

[D] Off-Balance Sheet Arrangements.

[E] Tabular Disclosure of Contractual Obligations.

[ii] Interim Periods.

[iii] Safe Harbor.

[d] Item 304. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

[e] Item 305. Quantitative and Qualitative Disclosures About Market Risk.

[f] Item 307. Disclosure Controls and Procedures.

[g] Item 308. Internal Control Over Financial Reporting.

[5] Management and Certain Security Holders

[a] Item 401. Directors Executive Officers, Promoters, and Control Persons.

[i] Identification of Directors.

[ii] Identification of Executive Officers.

[iii] Identification of Certain Significant Employees.

[iv] Family Relationships.

[v] Business Experience.

[vi] Involvement in Certain Legal Proceedings.

[vii] Promoters and Control Persons.

[b] Item 402. Executive Compensation.

[i] General.

[A] Specific Issuers.

[B] Compensation Covered.

[C] Persons Covered.

[D] Omission of Tables or Columns.

CHAPTER 4 Exchange Act Registration and Reporting Requirements

1-4 Federal Securities Exchange Act of 1934

AUTHOR: Brandon C. Parris, Andrew D. Thorpe

SUMMARY OF THIS CHAPTER

Section 12 of the Exchange Act of 1934, as amended (the "Exchange Act"), calls for registration under the Exchange Act of one or more classes of an issuer's securities which meet the requirements of Section 12(b) or Section 12(g). A nonexempt security cannot be traded on a national securities exchange until it is registered under Section 12(b). If the security meets the listing requirements of the particular exchange, the issuer may register it on the exchange by filing with the Securities and Exchange Commission (the "Commission" or "SEC") and the exchange a registration statement that discloses pertinent information about the issuer and its affairs.

Unless an exemption is available, Section 12(g) requires an issuer to register any class of unlisted or "over-the-counter" equity securities with the Commission if the issuer is engaged in interstate commerce and meets specified asset and stockholder criteria. Section 12(g)(1) permits voluntary registration of any equity security by its issuer.

Upon registration of any class of its securities under Section 12(b) or Section 12(g), the issuer becomes subject to the periodic reporting requirements of the Exchange Act. In the case of a registered class of equity securities, the issuer also becomes subject to the Exchange Act's proxy statement and tender offer rules in addition to the tender offer rules that apply to all securities, and its significant stockholders and insiders also become subject to the beneficial ownership reporting requirements of Section 13(d) of the Exchange Act and the reporting and short-swing liability of Section 16 of the Exchange Act.

Form 10 is the general form for both registration of securities for listing on a national securities exchange under Section 12(b) and registration of unlisted or "over-the-counter" securities under Section 12(g). The form directs the registrant to Regulation S-K and Regulation S-X for the content requirements of the various items of information, documents, and financial statements which are to be included in the registration statement.

Form 8-A is a simplified form for the registration of securities by certain issuers that are already required to file periodic reports under Section 13 or Section 15(d) of the Exchange Act, or that are registering the securities concurrently with an offering of securities registered under the Securities Act of 1933, as amended (the "Securities Act"), including in

1-4 Federal Securities Exchange Act of 1934

connection with initial public offerings.

A security listed on an exchange may be admitted to unlisted trading privileges on another exchange upon application to the Commission by the other exchange pursuant to Section 12(f).

A security listed on an exchange is subject to suspension or withdrawal. The Commission may suspend or strike the registration of a security on an exchange if after a hearing it finds such action necessary or appropriate for the protection of investors. The issuer may file an application for withdrawal of its security from listing and registration on an exchange in accordance with the rules of the exchange. See § 4.01 *infra*.

Section 13 requires issuers of securities registered under Sections 12(b) and (g) to file periodic and current reports to keep current the information contained in the original Exchange Act registration application or statement. Similar reports are required under Section 15(d) of certain issuers not subject to Section 13 but whose registration statements under the Securities Act have become effective. An issuer complies with the periodic reporting requirements by filing current, quarterly, and annual reports with the Commission. Form 10-K is the general form for filing annual reports under Section 13 or 15(d), except where a specific form is prescribed, and contains a basic information package to investors including audited financial statements of the issuer. Form 10-Q is the form for filing quarterly reports under Section 13 or 15(d) and must be filed for each of the first three fiscal quarters of each fiscal year of the issuer. Current reports are required to be filed on Form 8-K after the occurrence specified events required to be reported. See § 4.02 *infra*.

Regulation S-K contains the disclosure requirements for the majority of documents filed with the Commission under the Securities Act and the Exchange Act. Regulation S-K requires registrants, in the preparation of registration statements, periodic reports, and proxy or information statements, to present all substantive disclosure requirements in accordance with the provisions of the applicable items of the Regulation. Regulation S-K is divided into ten major sections: general, business, securities of the registrant, financial information, management and certain security holders, registration statement and prospectus provisions, exhibits, miscellaneous, list of industry guides, and roll-up transactions. See § 4.03 *infra*.

Rule 3b-6 under the Exchange Act contains a limited safe harbor for forward-looking statements in filings with the Commission and annual reports to stockholders. The Private Securities Litigation Reform Act of 1995 creates a statutory safe harbor for forward-looking statements. The two-pronged safe harbor protects forward-looking written or oral statements from liability if they are identified as forward-looking statements and accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ from those projected. The second prong of the safe harbor protects forward-looking statements if the person or business entity making the statement did not have actual knowledge that it was false or misleading. See § 4.04 *infra*.

All domestic registrants filing reports with the Commission are required to make, with limited exceptions, their Securities Act and Exchange Act filings electronically through the Electronic Data Gathering, Analysis and Retrieval ("EDGAR") system and most filings made by foreign registrants are required to be filed electronically. See § 4.05 *infra*.

CHAPTER 4 Exchange Act Registration and Reporting Requirements

1-4 Federal Securities Exchange Act of 1934 § 4.01

AUTHOR: Brandon C. Parris, Andrew D. Thorpe

§ 4.01 Registration of Securities Under the Securities Exchange Act of 1934

Section 12 of the Exchange Act generally requires registration with the Commission of:

- any security (equity or debt) listed for trading on a national securities exchange, n1 and
- any equity security of an issuer traded in the over-the-counter ("OTC") market if such issuer is engaged in interstate commerce, has total assets in excess of \$1 million, and the class of equity security is held of record by 500 or more persons. n2

Section 12 calls for registration of classes of securities, as opposed to registration of a fixed amount of securities offered to the public, which is required under the Securities Act. Registration, once effective, covers not only all outstanding shares of the class so registered, but additional securities of the same class upon issuance. This contrasts to the approach under the Securities Act in which the registration requirements apply to a discrete number or dollar amount of securities related to a particular transaction or transactions. As opposed to the transaction-oriented focus of registration under the Securities Act, Exchange Act registration begins the process of continuing periodic disclosures of information from the registrant to its stockholders and the securities marketplace.

The registration requirements do not apply to "exempted securities," n3 as defined in Section 3(a)(12), or to other securities exempted by rules and regulations promulgated by the Commission. As in the case of the Securities Act, the terms "security" and "equity security" are broadly defined. n4

The general form for registration on a national securities exchange n5 of any security pursuant to Section 12(b) and of any unlisted equity security pursuant to Section 12(g) is Form 10. n6 If the issuer is already subject to the issuer reporting requirements of Exchange Act Section 13 or 15(d), or is currently registering a class of securities under the Securities Act in connection with the issuer's initial public offering, Form 8-A, n7 a simplified form incorporating much of the required information by reference, may be used.

In January 2006, the SEC approved the registration of The NASDAQ Stock Market LLC as a national securities

exchange. n8 In October 2008, the parent company of the New York Stock Exchange acquired the American Stock Exchange LLC. In connection with the acquisition, the American Stock Exchange was renamed "NYSE Amex."

Registration of a class of securities under either Section 12(b) or 12(g) subjects the issuer to the Section 13 requirement that the issuer file annual, quarterly, and current reports n9 with the Commission and with the securities exchange on which the security is listed. n10 In addition, in the case of a registered equity security, the issuer becomes subject to (1) the proxy solicitation, proxy statement, and information statement requirements of Section 14 n11 and (2) the rules relating to tender offers and "going private" transactions by the issuer and its affiliates. Additionally, upon effectiveness of registration, beneficial owners of five percent or more of a class of registered equity securities become subject to the beneficial ownership disclosure requirements under Section 13(d) of the Exchange Act, n12 and the directors and executive officers of the issuer, and any beneficial owner of more than ten percent of registered equity securities, become subject to the "insider" reporting requirements concerning holdings of, and transactions in, equity securities of the issuer and to civil liability for "short-swing" (less than six months) trading in any of the issuer's equity securities. n13 Exchange Act Release No. 42,054, Fed. Sec. L. Rep. (CCH) P 86,214 (1999).

[1] Registration of Listed Securities--Section 12(b)

A security (other than an exempted security) may not be traded on a national securities exchange unless it has been registered in the manner prescribed by Section 12(b) of the Exchange Act, with certain exceptions concerning unlisted trading privileges. n14 To register a security on a national securities exchange, the issuer must file a registration statement n15 with the exchange and the Commission. The exchange itself will also require the issuer to: submit a listing application containing information beyond that called for in the registration form; n16 enter into a listing agreement under which it agrees to abide by a stated code of conduct; n17 and pay required fees.

Registration under Section 12(b) becomes effective upon receipt by the Commission of certification from the national securities exchange or the filing of the Form 8-A with the Commission, if the class of securities is not being currently registered under the Securities Act, or upon the later of the filing of the Form 8-A with the Commission, receipt by the Commission of certification from the national securities exchange or effectiveness of the Securities Act registration statement relating thereto, if the class of securities is being concurrently registered under the Securities Act. n18

Since an application for registration of a security on an exchange pursuant to Section 12(b) covers the entire class of the security, registration becomes effective as to the shares or amounts then issued and, without further application for registration, upon issuance as to additional shares or amounts then or thereafter authorized. n19 However, if a class of securities is issuable in two or more series with different terms, as is frequently the case with preferred stocks, each series will be regarded as a different class for registration purposes. n20 Notwithstanding the fact that the entire class, including subsequently authorized shares or other units, are deemed registered by single registration under Section 12(b), the exchange itself may require approval of an additional listing application and payment of fees for the additional shares or units. n21

The Commission has eliminated the registration requirement under Section 12(b) of the Exchange Act for American Depositary Receipts ("ADRs"), registered on Form F-6 under the Securities Act. The Section 12(b) registration requirements will continue to apply to the class of securities underlying the ADRs. n22

[2] Registration of Unlisted Equity Securities -- Section 12(g)

Section 12(g)(1) n23 of the Exchange Act generally requires registration by an issuer of any unlisted or "over-the-counter" equity security (other than exempted securities) with the Commission within 120 days after the last day of any fiscal year if:

- the issuer has total assets in excess of \$1 million; n24

- the class of equity security is held of record by 500 or more persons; and
- the issuer is engaged in interstate commerce, or in a business affecting interstate commerce, or if its securities are traded by use of the mails or any means of interstate commerce. It is doubtful that many domestic issuers meeting the total assets and number of stockholders tests of Section 12(g)(1) also would not fall within these jurisdictional grounds. n25

Registration becomes effective sixty days after filing a registration statement with the Commission, or such shorter period as the Commission may determine. n26 A registration statement is not deemed "filed" for the purposes of Section 18 of the Exchange Act (civil liability for false or misleading statements) until it becomes effective. n27

[a] Application of Section 12(g)

[i] Number of Stockholders. The minimum of 500 stockholders set forth in Section 12(g)(1) applies to "a class of equity securities." The term "class" includes all securities of an issuer that are of substantially similar character and the holders of which enjoy substantially similar rights and privileges. n28 An "equity security" is defined so broadly that it includes practically anything except a straight nonconvertible debt security. n29 Since Section 12(g) calls for a registration of classes of equity securities, if an issuer has more than 500 holders of preferred stock, but not more than 500 holders of its common stock, the latter need not be registered.

While the Exchange Act does not define the term "held of record," the Commission, pursuant to the authority given in Section 12(g)(5), has defined the term in Rule 12g5-1 as referring to the persons appearing in the corporate stock books, except that a corporation, partnership, trust, or joint holder is counted as one holder, as is a person holding under slightly different names, but who is obviously only one person. n30 Each outstanding unregistered or bearer certificate is considered as being held by a separate holder unless otherwise proved. The holders of voting trust certificates are considered to be holders of the underlying shares. The issuer may rely upon the certification of an unaffiliated voting trustee as to the number of such holders. Redeemable shares of institutions, such as savings and loan or building and loan, homestead association or cooperative banks, issued as qualifying shares at the time of a loan and to be redeemed on repayment are not counted. Where securities are identified on the company's books as being owned by a person acting as custodian pursuant to a number of separate accounts, the securities will be deemed to be "held of record" by each of the separate accounts. n31 Accordingly, if securities are held in "street name" or in "book-entry" form, the registrant must look through the custodian and count each participant of the custodian (e.g., banks, broker-dealers, and other financial intermediaries) as one holder of record. The registrant does not look through the participants (e.g., the broker-dealer) to the individual investor. There is a catchall provision designed to prevent any circumvention of the Exchange Act which provides that beneficial owners will be considered record owners where the issuers know or have reason to know that the form of their record ownership is being used primarily to circumvent Section 12(g) or 15(d) of the Exchange Act. In addition, where the records of security holders have not been maintained in accordance with accepted practice, any additional person who would be identified as a record owner if the records had been properly maintained is included as an owner of record. This provision is aimed at deterring the formation of trusts, holding companies, subsidiaries and similar entities for the principal purpose of avoiding registration. n32

[ii] Deregistration. Registration of an equity security under Section 12(g) may be terminated within ninety days, or such shorter period as may be determined by the Commission, after the issuer certifies to the Commission on Form 15 that:

- the number of record holders of that class of securities is less than 300; or
- the number of record holders of that class of securities is less than 500 and the total assets of the issuer have not exceeded \$10 million on the last day of each of the issuer's three most recent fiscal years.

n33

The Commission may deny termination if it finds after notice and opportunity for hearing that the facts do not support the certification. n34 The Commission may defer termination of registration pending final determination as to whether the application should be denied. The issuer's duty to file reports due under Section 13(a) is suspended immediately upon filing a Form 15, but if the termination is not approved the issuer must file all reports otherwise due during the suspension within sixty days. n35 Any class of securities for which registration has been terminated will again be subject to registration under Section 12(g) if the requirements for registration are met by the issuer on the last day of any fiscal year.

[iii] Asset Requirements. The Commission has defined the term "total assets" n36 to include the total assets shown on the issuer's balance sheet, or the balance sheet of the issuer and its subsidiaries consolidated, whichever is greater determined in accordance with the Commission's accounting Regulation S-X. n37 If the security is a certificate of deposit, voting trust certificate, or other evidence of interest in a similar trust or agreement, the "total assets" of the issuer of the security held under the trust or agreement are deemed to be the "total assets" of the issuer of the certificate or evidence of interest. n38 Special note should be taken that the statute uses the term "total assets" rather than "net assets," since it is possible that an insolvent company may still be subject to the registration requirements if its total assets exceed the assets threshold.

[iv] Exemptions. Rule 12g-1, adopted by the Commission as part of a classification scheme for exempting small issuers from the reporting requirements of the Exchange Act, n39 exempts an issuer from the registration requirements of Section 12(g) until it has total assets of at least \$10 million on the last day of its most recent fiscal year and, if the issuer is a foreign private issuer, the securities are quoted in an automated interdealer quotation system. As discussed earlier, the effect of Rule 12g-1 is to increase for most issuers the "total assets" test of Section 12(g) from \$1 million to \$10 million.

Section 12(g)(2) exempts from the registration requirements Section 12(g) securities listed and registered on a national securities exchange pursuant to Section 12(b); securities issued by a registered investment company (registered pursuant to Section 8 of the Investment Company Act of 1940); securities (other than nonwithdrawable capital) of savings and loans associations and similar institutions supervised and examined by federal or state authorities; n40 securities of certain nonprofit mutual or cooperative organizations (if certain conditions have been met); n41 securities issued by certain religious and charitable organizations; n42 securities of certain cooperative associations; n43 securities of an insurance company (if certain conditions have been met by the company's domiciliary state); n44 and interests or participations in collective trust funds maintained by banks or separate accounts of insurance companies where the interests or participations are issued for specific purposes. n45 Securities of a foreign private issuer are exempt if the issuer, or a governmental official or agency of the issuer's domicile in which it is organized, furnishes the Commission with information made public under the laws of its domicile, filed with a stock exchange, or distributed to stockholders, along with certain additional information. n46

In addition, the Commission has exempted other securities by Rule 12h-1. n47 The Commission has exercised this power to exempt interests in common trust funds and interests in employee stock purchase, stock bonus, profit sharing, pension, retirement, incentive, thrift, savings, and similar plans. The Commission staff has also issued Rule 12h-1 exemptions or granted no-action letter relief (as opposed to exemptions under Section 12(h)) permitting private companies in limited circumstances to forego Section 12(g) registration of nontransferable options or limited partnership interests and other restricted securities held by more than 500 persons until such time as the issuer otherwise becomes a reporting company under the Exchange Act. The staff of the Commission has indicated that it will not recommend enforcement action in certain limited instances where the number of stockholders exceeds 500 persons solely because of holders of employee stock options which are not exercisable. n48 In addition, the Division of Corporation Finance's Compliance and Disclosure Interpretation 116.01 on Exchange Act Sections provides that stock options will be treated as a separate class of equity securities.

The Commission has also granted subsidiaries relief from complying as separate registrants with the information and reporting requirements of Exchange Act Sections 13 and 15(d) when a subsidiary of a reporting company (a) issues registered debt securities guaranteed by the parent or (b) guarantees registered debt securities issued by the parent. n49

As previously mentioned, a security that normally would have been subject to registration under Section 12(g) is exempt from registration if it is registered on a national securities exchange pursuant to Section 12(b), n50 or if issued by a registered investment company. Such security is deemed registered under Section 12(g) without filing an additional registration statement upon termination of the Section 12(b) registration or termination of registration as an investment company if then held of record by 300 or more persons. n51

Where, for the purpose of effecting a succession by merger, consolidation, exchange of securities, or acquisition of assets, equity securities of an issuer not previously registered under Section 12 are issued to the holders of equity securities of another issuer registered under Section 12(b) or 12(g), the class of equity securities so issued is deemed registered under Section 12(b) or 12(g), as applicable, unless, upon consummation of the succession, the class of equity securities is exempt from such registration (other than by Rule 12g3-2, dealing with certain foreign private issuers), or is held of record by less than 300 persons. n52

Similarly, if the acquired issuer was required to register a class of equity securities under Section 12(g) but has not complied therewith, the duty to register is assumed by the successor, unless, upon consummation of the merger or consolidation, the class of equity securities is exempt from such registration (other than by Rule 12g-3(2)) or is held of record by less than 300 persons. n53

Rule 12g-3 was amended in 1997 to include transactions such as the successor of a non-reporting issuer to more than one reporting issuer, either through consolidation into a new entity or a holding company formation. The securities of such successor issuers are deemed automatically registered under Section 12 of the Exchange Act. n54

If the classes of securities issued by each of the predecessor issuers are registered under the same paragraph of Section 12, the class of securities issued by the successor issuer will be deemed registered under the same paragraph of Section 12. If the classes of securities issued by the predecessor issuers each are registered under different paragraphs of Section 12, then the class of securities issued by the successor issuer will be deemed registered under Section 12(g).

[v] Voluntary Registration. Issuers exempt from Section 12(g) registration requirements, n55 or not otherwise subject to registration, may voluntarily register with the Commission. This alternative is provided for in Section 12(g)(1), that provides in part: "Any issuer may register any class of equity security not required to be registered by filing a registration statement pursuant to the provisions of this paragraph."

The decision of an issuer to voluntarily register an equity security under Section 12 may be motivated by such factors as a desire to facilitate sales, pursuant to Rule 144 under the Securities Act, of privately placed securities or securities sold on behalf of "control persons" of the issuer; or, to make the Exchange Act provisions concerning proxy contests, tender offers, and acquisitions by any person holding more than five percent of the registered class applicable to the security, so that, in the case of an internal conflict, such as a proxy contest, the Commission would regulate the conflict. n56

[vi] Foreign Private Issuers. On March 21, 2007, the SEC adopted amendments to the rules governing when a foreign private issuer n57 may deregister its securities under the Exchange Act. These new rules significantly ease the deregistration process.

Generally, a foreign private issuer becomes subject to SEC registration and reporting under the Exchange Act if the issuer has securities listed on a U.S. national securities exchange, offers securities publicly in the U.S., or has more than a specified number of stockholders in the U.S.

Under the prior Exchange Act rules, terminating Exchange Act registration and associated reporting obligations could be a long and complicated process for a foreign private issuer. A foreign private issuer could exit the Exchange Act reporting regime only when its securities are neither listed on any U.S. national securities exchange nor held by more than 300 U.S. residents. To determine whether 300 U.S. residents are stockholders, the foreign private issuer had to look through the record ownership of institutional and nominee holders on a worldwide basis which was often a difficult and costly proposition. Also, the 300-holder threshold was difficult to avoid in today's global securities markets, even for companies that have little U.S. investor interest relative to their overall stockholder base. Furthermore, under the prior rules a foreign private issuer could only suspend, and not terminate, its Exchange Act reporting obligations.

New Exchange Act Rule 12h-6 now permits foreign private issuers to terminate their reporting obligations regarding a class of equity securities based solely on an U.S. average daily trading volume, or ADTV, test. Alternatively, foreign private issuers may continue to rely on a 300 security holder test that is similar to the test under the prior rules.

A foreign private issuer's equity securities are eligible for deregistration if the ADTV of the securities in the U.S. (including off-exchange trading) represents 5% or less of the ADTV of those securities worldwide during the 12 month period ending within 60 days of an application for deregistration. This new benchmark allows a foreign private issuer to terminate its Exchange Act obligations regardless of the number of U.S. residents holding that security.

In order to take advantage of the new ADTV test, a foreign private issuer must wait 12 months from the date that it has either (i) delisted its securities from a U.S. exchange or (ii) terminated a sponsored American Depositary Receipt ("ADR") facility if, during the 12 months preceding the delisting or facility terminate, its U.S. ADTV exceeds 5% of its worldwide ADTV. The waiting period will not apply to issuers that delisted or terminated their ADR programs within the 12 months preceding the adoption of the rules.

As an alternative to the ADTV benchmark and as long as the issuer meets certain other obligations under Rule 12h-6, a foreign private issuer may terminate its Exchange Act reporting obligations regarding a class of equity securities if it has fewer than 300 record holders on a worldwide basis or who are U.S. residents.

The new rules modify the method for determining the number of U.S. resident security holders by allowing issuers to limit their "look-through" inquiries to brokers, banks and other nominees located in the U.S., the issuer's jurisdiction of organization and the jurisdiction of its primary trading market. If after reasonable diligence, the issuer is unable without unreasonable effort to obtain information about the identity and residence of the underlying security holders, the issuer may assume that the security holders reside in the jurisdiction where the nominees have its principal place of business. Issuers may also rely on good faith on data from third-party providers that specialize in collecting security holder information.

A foreign private issuer intending to deregister and terminate its Exchange Act reporting obligations for equity securities must also meeting the following conditions:

- the issuer must have been a reporting company for at least one year, have filed or submitted all required reports during that year and have filed at least one annual report;
- the securities of the issuer must not have been sold in an offering in the U.S. that is registered under the Securities Act of 1933, as amended, during the preceding 12 months, except for certain types of offerings including offerings pursuant to option plans, selling security holder resales, rights offerings and conversions of outstanding securities;
- the issuer must have maintained a listing for at least a year in a non-U.S. jurisdiction that, either alone or together with one other non-U.S. jurisdiction, constitutes the primary trading market for the

subject class of securities; and

- the issuer makes a public announcement of intention to deregister, and files such announcement with the SEC under cover of Form 6-K or as an exhibit to its deregistration on Form 15F (discussed below), on or prior to the date it files with the SEC to do so.

The new rules also permit a foreign private issuer to terminate its Exchange Act reporting obligations with respect to a class of debt security where:

- the issuer has filed or furnished all required reports under the Exchange Act, including at least one Exchange Act annual report; and
- the debt securities are held of record by either fewer than 300 holders on a worldwide basis or fewer than 300 persons residing in the U.S. (using a counting method similar to the one for equity holders described above).

An issuer that succeeds to Exchange Act requirements as a result of a business combination will be able to use the new rules immediately after succession so long as it meets the foreign listing and quantitative standards of Rule 12h-6 itself, and so long as the acquired company met the one-year reporting requirement. However, if such an issuer effected the business combination through its own U.S.-registered offering, a new one-year reporting period would be triggered, so the issuer would not be able to use the successor provision.

The availability of the exemption from Exchange Act registration and reporting under Rule 12g3-2(b) promulgated under the Exchange Act is significantly extended under the new rules. This exemption allows foreign private issuers, regardless of the number of their U.S. stockholders, to avoid Exchange Act registration so long as they are not listed on a U.S. exchange and provide home-market disclosures to the SEC in English (in certain cases in summary form where the source material is not in English).

The new rules allow immediate and automatic use of 12g3-2(b) after deregistration, so long as the issuer publishes English disclosures required under 12g3-2(b) electronically rather than simply furnishing them to the SEC.

In order to deregister its securities, a foreign private issuer is required to file a Form 15F with the SEC certifying that at the date of filing it meets the conditions for terminating its Exchange Act registration and reporting obligations. Filing of the Form 15F automatically suspends an issuer's reporting obligations regarding the class of security in question. If the SEC does not object within 90 days of the filing of the Form 15F, the suspension becomes a permanent termination. If the SEC were to reject the Form 15F, the issuer would have 60 days to file or submit all reports that would have been required had the Form 15F not been filed. The issuer is under no duty to monitor its eligibility for deregistration during the 90-day waiting period, but if it obtains actual knowledge of information that causes it reasonably to believe it was not eligible for deregistration at the time of filing its Form 15F it must withdraw the Form 15F before effectiveness.

An issuer that deregistered under the prior rules is eligible to use Form 15F to terminate its Exchange Act obligations permanently, so long as it does not have any current Exchange Act registration or reporting requirements and meets the 12-month foreign listing requirement that applies to first-time deregistrants on Form 15F.

[3] Form 10--General Form of Registration Statement Under Exchange Act Section 12(b) or 12(g)

Form 10 is the general form for registering a security under the Exchange Act both in the case of registration for listing on a national securities exchange under Section 12(b) and registration of unlisted equity securities under Section 12(g). n58 Reference must be made to Form 10 itself for the specific information requirements.

Prior to preparation of any registration statement or report under the Exchange Act, the person preparing the document should become familiar with Regulation 12B (Rules 12b-1 through 12b-36), which contains rules governing all registration statements under Section 12 and reports under Sections 13 and 15(d) of the Exchange Act. Careful note should be taken of the definitions in Rule 12b-2, which include such essential terms as "affiliate," "associate," "control," "material," "parent," "subsidiary," "voting securities," and others. In addition, Regulation S-T, which governs the preparation and submission of documents in electronic format, should be consulted. Many of the provisions of Regulation 12B relating to the preparation and submission of documentation in paper format are superseded by the provisions of Regulation S-T concerning documents required to be filed in electronic format. n59

[a] Item 1. Business. Item 1 of Form 10 requires a description of the business of the registrant in accordance with the information required by Item 101 of Regulation S-K. n60

[b] Item 1A. Risk Factors. Item 1A of Form 10 requires, under the caption "Risk Factors," a discussion of risk factors as described in Item 503(c) of Regulation S-K.

[c] Item 2. Financial Information. Item 2 of Form 10 requires the selected financial data, the management's discussion and analysis of the financial condition and results of operations of the registrant, and quantitative and qualitative disclosures about market risk, which are called for by Items 301, 303, and 305 of Regulation S-K. n61

[d] Item 3. Properties. Item 3 of Form 10 requires information relating to properties in accordance with the provisions of Item 102 of Regulation S-K. n62

[e] Item 4. Security Ownership of Certain Beneficial Owners and Management. Item 4 of Form 10 requires the information called for by Item 403 of Regulation S-K, relating to the security ownership of certain beneficial owners and management of the registrant. n63

[f] Item 5. Directors and Executive Officers. Item 5 of Form 10 requires the registrant to describe directors and executive officers and include in the description the information required by Item 401 of Regulation S-K. n64

[g] Item 6. Executive Compensation. Item 6 of Form 10 requires a description of remuneration of directors and officers that includes the information required by Item 402 and paragraph(e)(4) of Item 407 of Regulation S-K. n65

[h] Item 7. Certain Relationships and Related Transactions, and Director Independence. Item 7 of Form 10 requires a description of various kinds of relationships and related transactions with the registrant as specified in Item 404 and matters related to director independence as specified in Item 407(a) of Regulation S-K. n66

[i] Item 8. Legal Proceedings. Item 8 of Form 10 requires a description of legal proceedings that must include the information required by Item 103 of Regulation S-K. n67

[j] Item 9. Market Price of and Dividends on the Registrant's Common Equity and Related Stockholder Matters. Item 9 of Form 10 requires information relating to the market for the registrant's common stock and other related matters as specified in Item 201 of Regulation S-K. n68

[k] Item 10. Recent Sales of Unregistered Securities. Item 10 of Form 10 requires information relating to recent sales of the registrant's securities and use of proceeds from sales of registered securities to be furnished in accordance with Item 701 of Regulation S-K. n69

[l] Item 11. Description of Registrant's Securities to Be Registered. Item 11 of Form 10 requires a description of the registrant's securities to be furnished in accordance with the provisions of Item 202 of Regulation S-K. n70

[m] Item 12. Indemnification of Directors and Officers. Item 12 of Form 10 requires that the information regarding indemnification of directors and officers specified in Item 702 of Regulation S-K be furnished. n71

[n] Item 13. Financial Statements and Supplementary Data. Item 13 of Form 10 requires that the financial statements required by Regulation S-X n72 and the supplementary financial information required by Item 302 of Regulation S-K be furnished. n73

[o] Item 14. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure. Item 14 of Form 10 requires that the information specified in Item 304 of Regulation S-K regarding changes in and disagreements with accountants be furnished. n74

[p] Item 15. Financial Statements and Exhibits. Item 15 of Form 10 requires a separate list of all of the financial statements filed as part of the registration statement and also requires that the exhibits called for by Item 601 of Regulation S-K be provided. n75

[4] Form 8-A--Form for Registration of Certain Classes of Securities Pursuant to Section 12(b) or 12(g)

Form 8-A, a simplified form for registration of any class of securities under Exchange Act Section 12(b) or (g), is available to certain issuers required to file reports pursuant to Sections 13 and 15(d) or pursuant to an order exempting the exchange on which the issuer has securities listed from registration as a national securities exchange. n76 Form 8-A can also be used to list a class of securities that is currently being registered under the Securities Act in connection with an issuer's initial public offering, even though it will not be subject to reporting requirements until after the effectiveness of the Securities Act registration. n77 As opposed to Form 10, the Form 8-A requires only a description of securities being registered and exhibits (either filed or incorporated by reference).

The registrant's name, state of incorporation or organization, IRS employer identification number, and the address of its principal executive offices, including zip code must be stated on the Form 8-A. For securities to be registered under Exchange Act Section 12(b), the registrant must furnish the title of each class of those securities and the name of each exchange on which each class is to be registered. Only the title of each class of securities to be registered under Section 12(g) need be given.

All registration statements made on Form 8-A are automatically effective upon the later of filing the Form 8-A, receipt of certification from the exchange, if applicable, and effectiveness of the relevant Securities Act registration statement, if applicable. n78

As in the case of Form 10, n79 the registrant preparing any registration statement on Form 8-A should become familiar with Regulation 12B (Rules 12b-1 through 12b-36) and Regulation S-T which contain rules governing all registration statements under Section 12 and reports under Sections 13 and 15(d) of the Exchange Act. Careful note should be taken of the definitions of essential terms in Rule 12b-2.

[a] Item 1. Description of the Registrant's Securities to be Registered. The registrant must furnish in the Form 8-A registration statement the information concerning capital stock, debt securities, warrants and rights, other securities, market information for securities other than common equity, and ADRs required by Item 202 of Regulation S-K. n80

If a description of the class of securities comparable to that required by the Form 8-A is contained in any other filing with the Commission, the description may be incorporated by reference to such other filing in response to Item 1. n81 If the securities are to be registered on a national securities exchange and the description has not previously been filed with the exchange, copies of the description should be filed with copies of the application filed with the exchange.

[b] Item 2. Exhibits. There must be set forth a list of all exhibits to the registration statement, including those incorporated by reference. If the securities are to be registered on an exchange on which other securities of the registrant are registered or are to be registered pursuant to Exchange Act Section 12(g), copies of all constituent instruments defining the rights of holders of each class of securities, including any contracts or other documents limiting or qualifying such rights, must be filed as exhibits or incorporated by reference.

[5] Unlisted Trading Privileges

Section 12(f)(1) of the Exchange Act permits any national securities exchange, upon application to and approval by the Commission, to extend unlisted trading privileges n82 to the following securities:

- any securities admitted to unlisted trading on a national securities exchange prior to July 1, 1964;
- any security listed and registered on a national securities exchange (except during a specified period during the initial public offering of such security); and
- any security that is otherwise registered pursuant to this section, or that would be required to be so registered except for the exemption relating to certain investment companies and insurance companies traded over-the-counter and registered under Section 12(g) of the Exchange Act, or that would be required to be so registered except for the exemptions from registration provided in Section 12(g)(2)(B) (security issued by an investment company) and in Section 12(g)(2)(G) (securities of certain insurance companies). n83

An exchange may continue to extend unlisted trading privileges only if the exchange and subject security continue to satisfy the requirements for eligibility. n84

[6] Delisting of Securities Registered under Section 12(b)

A listing of a security on a national securities exchange is subject to suspension or withdrawal by the exchange itself in accordance with its rules n85 or by the Commission, upon application of the issuer or exchange. n86 The exchange is required to notify the Commission of any suspension of trading and any restoration of trading. n87 A suspension does not terminate a registration. n88

An application to strike a security from listing and registration must be made to the Commission by the exchange if:

- the security has been paid off;
- the security is to be paid off and the necessary funds have been made available;
- the security has been superseded by another; or
- all rights pertaining to the security have been extinguished. n89

Primary jurisdiction over delisting procedures is vested in the Commission, from which an appeal lies to the appropriate circuit court of appeals. n90

When a company whose securities are listed and registered on an exchange disseminates false corporate information and files misleading reports, the Commission has grounds for issuing an order granting the exchange the right to strike the securities from listing and registration. n91

An exchange rule may call for delisting when a security is listed on another national securities exchange, and the security may be so delisted when listing and registration have become effective on such other exchange, provided that notice of the action is given to the Commission within three days. n92 Other delistings are made by application of the exchange to the Commission and pursuant to a Commission order, which may be after hearing and on terms designed for investor protection. n93

The issuer may file an application for withdrawal of its security from listing and registration on an exchange in accordance with the rules of the exchange. An application to withdraw listing on an exchange will be effective 10 days after Form 25 is filed with the Commission. An application to deregister a class of securities under Section 12(b) will be effective 90 days, or such shorter period as the Commission may determine, after filing with the Commission. n94 The issuer may not withdraw its registration and listing if the Commission overrules an application for confidential treatment of any material required to be reported. n95

The delisting of a class of securities, with the attendant effect of terminating registration of the securities under Section 12(b), may not deregister the security under other provisions of Section 12. Securities whose registration under Section 12(b) is terminated are deemed to be registered under Section 12(g) unless the securities are held by fewer than 300 holders of record. n96 The 1964 amendments to the Exchange Act, which extended the reporting, proxy, and insider trading provisions of the Exchange Act to unlisted securities, n97 would seem to render more or less academic the procedures for delisting by the issuer, unless the issuer fails to qualify for registration under Section 12(g). There is no longer any particular advantage to be gained in withdrawing the listing as far as the reporting, proxy, and insider trading provisions are concerned.

If the Commission finds that the exchange has complied with the exchange's own rules, n98 then the Commission has no power under Exchange Act Section 12(d) flatly to refuse a delisting application, n99 although it may attach such terms as it considers to be necessary for the protection of investors. n100 If the Commission provides for notices to be sent to stockholders, it may refuse the application if the notice is incomplete or misleading. n101

The Commission is authorized to suspend or strike the registration of a security on an exchange if, after notice and opportunity for hearing, it finds such action to be necessary or appropriate for the protection of investors. n102 Such proceedings have resulted in delisting orders. n103

The Commission is also authorized under Section 12(k) of the Exchange Act summarily to suspend trading in any nonexempt security for a period not exceeding ten business days, if necessary or proper in the public interest and for the protection of investors. The suspension is terminated when adequate information or clarification is filed or published. n104

[7] Reporting Requirements Applicable to Non-Registered Companies Under Section 15(d)

Section 15(d) of the Exchange Act requires each issuer that has filed a registration statement which has become effective under the Securities Act to file with the Commission such supplementary and periodic information, documents and reports as may be required pursuant to Section 13 of the Exchange Act.

Under Section 15(d), an issuer filing a registration statement under the Securities Act is required to file all reports under Section 13(a) for the fiscal year in which the registration statement becomes effective. This reporting obligation continues for subsequent fiscal years unless the issuer's reporting obligations under Section 15(d) are suspended. n105 The duty to file under Section 15(d) is automatically suspended if, and so long as, any class of securities is registered pursuant to Section 12 of the Exchange Act. In addition, Exchange Act Rule 12h-3 permits an immediate suspension of the issuer's filing obligations under Section 15(d) upon filing of a Form 15 n106 if the issuer has filed all reports required under Section 13(a) for the shorter of its most recent three fiscal years and the portion of the current year preceding the filing, or the period since the issuer became subject to such reporting obligation. Securities eligible for this suspension are any class of securities held of record by less than 300 persons or by less than 500 record holders of the securities in question and with total assets of \$10 million or less. n107 Although Rule 12h-3(c) provides that it is unavailable for any class of securities for a fiscal year in which a registration statement covering that class of securities became effective under the Securities Act, the Commission staff has granted a number of exceptions, including in cases of aborted offerings or acquisitions of the issuer. n108

The Rule 12h-3 suspension of the duty to report under Section 15(d) is no longer effective if, on the first day of any fiscal year following such suspension, the issuer ceases to meet the eligibility criteria for suspension described above. In that case, the issuer must resume periodic reporting by filing an annual report on Form 10-K for its preceding fiscal year, not later than 120 days after the end of such fiscal year. n109 Although an issuer subject to Section 15(d) is required to file the same reports under Section 13 as issuers having a class of securities registered under Section 12(b) or Section 12(g) of the Exchange Act, an issuer required to file pursuant to Section 15(d) is not subject to provisions of the Exchange Act that are applicable only to Section 12 registered companies, including the proxy solicitation, beneficial ownership and reporting and tender offer provisions of Sections 13 and 14, and the insider reporting and trading prohibitions of Section 16. n110

FOOTNOTES:

(n1)Footnote 1. Section 12(b).

(n2)Footnote 2. Section 12(g). Although Section 12(g)(1) provides for a total asset threshold of \$1 million, the Commission, through its Rule 12g-1 exemption, has raised the total assets test for most corporations from \$1 million to \$10 million. *See* § 4.01[2][a][iv]. Exchange Act Release No. 37,157, Fed. Sec. L. Rep. (CCH) P 85,801 (1996).

The over-the-counter market is discussed in § 2.01[2] *supra*.

(n3)Footnote 3. "Exempted securities" are listed in Section 3(a)(12) and consist principally of direct obligations of federal, state, and local governments or obligations they have guaranteed and obligations of certain instrumentalities of those governments, interests or participations in a single trust fund or a collective trust fund maintained by a bank exclusively for investment of assets contributed by the bank in designated fiduciary capacities and any security arising out of a contract issued by an insurance company if the interest or participation is issued in connection with a stock bonus, pension, profit-sharing, or annuity plan meeting specified requirements of the Internal Revenue Code of 1986, as amended.

The Commission is given the power to make rules and regulations exempting other securities if such exemptions are consistent with both the public interest and the protection of investors. Section 3(a)(12)(v). The Commission has issued Rules 12a-4 through 12a-7 exempting certain exchange-listed securities from registration under the Exchange Act.

Rule 12a-4 under the Exchange Act, reprinted in the Primary Law Sourcebook, Volume B, Section G, exempts, under certain specified conditions, issued or unissued warrants granted to the holders of a security admitted to dealing on a national securities exchange. Rule 12a-5 temporarily exempts substituted or additional securities, under certain circumstances, whenever the holders of a security admitted to trading on a national securities exchange obtain the right to acquire substituted or additional securities. Rule 12a-6 exempts any underlying security, *i.e.*, one that relates to or is the subject of an option, if the three conditions in Rule 12a-6(b)(1)-(3) are met. Rule 12a-7 exempts the components of certain standardized market baskets, solely for the purpose of inclusion in such basket, if the conditions are met. Section 12(f)(1) concerns the continuation and extension of unlisted trading privileges. *See* § 4.01[5] *infra*. The Rules under the

Exchange Act are reprinted in Primary Law Sourcebook, Volume B, Section G *infra*.

For exemptions from Section 12(g) registration requirements, see § 4.01[2][a][iv] *infra*. Under Rule 3a12-7 any over-the-counter options on government securities traded exclusively otherwise than on a national securities exchange and for which quotations are not disseminated through an automated quotation system are exempt securities pursuant to Section 3(a)(12) of the Exchange Act, provided that the underlying securities represent an obligation equal to or exceeding \$250,000 principal amount. See Exchange Act Release No. 20,625, Fed. Sec. L. Rep. (CCH) P 83,488 (1984).

(n4)Footnote 4. Exchange Act Section 3(a)(10) provides:

The term "security" means any note, stock, treasury stock, security future, bond, debenture, certificate of interest or participation in any profit sharing agreement or in any oil, gas, or other mineral royalty or lease, any collateral-trust certificate, pre-organization certificate or subscription, transferable share, investment contract, voting-trust certificate, certificate of deposit for a security, any put, call, straddle, option, or privilege on any security, certificate of deposit, or group or index of securities (including any interest therein or based on the value thereof) or any put, call, straddle, option, or privilege entered into on a national securities exchange relating to foreign currency, or in general, any instrument commonly known as a "security"; or any certificate of interest or participation in, temporary or interim certificate for, receipt for, or warrant or right to subscribe to or purchase, any of the foregoing; but shall not include currency or any note, draft, bill of exchange, or banker's acceptance which has a maturity at the time of issuance of not exceeding nine months, exclusive of days of grace, or any renewal thereof the maturity of which is likewise limited.

Exchange Act Section 3(a)(11) provides:

The term "equity security" means any stock or similar security; or any security future on any such security; or any security convertible, with or without consideration, into such a security, or carrying any warrant or right to subscribe to or purchase such a security; or any such warrant or right; or any other security which the Commission shall deem to be of a similar nature and consider necessary or appropriate, by such rules and regulations as it may prescribe in the public interest or for the protection of investors, to treat as an equity security.

Rule 3a11-1 provides:

The term "equity security" is hereby defined to include any stock or similar security, certificate of interest or participation in any profit sharing agreement, preorganization certificate or subscription, transferable share, voting trust certificate or certificate of deposit for an equity security, limited partnership interest, interest in a joint venture, or certificate of interest in a business trust; any security future on any such security; or any security convertible, with or without consideration into such a security, or carrying any warrant or right to subscribe to or purchase such a security; or any such warrant or right; or any put, call, straddle, or other option or privilege of buying such a security from or selling such a security to another without being bound to do so.

(n5)Footnote 5. "National securities exchange" means an exchange registered with the Commission pursuant to Exchange Act Section 6(a). Registration of exchanges as national securities exchanges is discussed in § 2.02 *supra*.

Certain exchanges may be exempted from registration by means of the provisions of Section 5 of the Exchange Act,

which permit exemption by the Commission based upon the limited volume of transactions on the exchange.

(n6)Footnote 6. *See § 4.01[3] infra* for discussion of the information required by Form 10 under the Exchange Act, reprinted in the Primary Law Sourcebook, Volume B, Section H.

(n7)Footnote 7. *See § 4.01[4] infra* for discussion of the information required by Form 8-A.

(n8)Footnote 8. Release No. 34-53128 (January 2006)

(n9)Footnote 9. *See § 4.02 infra*. As result of the adoption of the multijurisdictional disclosure system within Canada, certain Canadian companies may use their home disclosure documents to satisfy the Commission's periodic disclosure requirements and tender offer regulations. Exchange Act Release No. 29,354, Fed. Sec. L. Rep. (CCH) P 84,812 (1991).

(n10)Footnote 10. Many exchanges do not require listed issuers to file reports with the exchanges if they are filed with the Commission and available on EDGAR.

(n11)Footnote 11. *See ch.7 infra*.

(n12)Footnote 12. *See* Exchange Act Release No. 39,538, Fed. Sec. L. Rep. (CCH) P 86,002 (1998).

(n13)Footnote 13. *See ch.8 infra*. Securities registered under Section 12 are also subject to the margin requirements of Section 7 of the Exchange Act. *See ch.3A supra*. Securities of a "foreign private issuer" (as defined in Rule 3b-4(c) under the Exchange Act) are exempted from the Exchange Act's proxy rules and the reporting and short-swing liability provisions of Section 16. *See* Rule 3a12-3.

Rule 3a12-11 exempts debt securities registered under Section 12(b) of the Exchange Act from Section 8(a)'s restrictions on borrowing by broker-dealers and from most of the proxy and information statement rules under Regulation 14A. *See Exchange Act Release No. 34,922, Fed. Sec. L. Rep. (CCH) P 85,450 (1994)*. Prior to Rule 3a12-11, debt securities registered under Section 12(b) were subject to Section 8(a)'s restrictions on borrowing and all of the proxy and information requirements of Section 14. In contrast, debt securities traded in the over-the-counter market are not required to be registered under the Exchange Act and are therefore not subject to the restrictions on borrowing or proxy statement and information statement regulation. Although Rule 3a12-11 has the effect of eliminating most of these distinctions between debt securities listed on a national securities exchange and over-the-counter traded debt securities, exchange listed debt securities remain subject to the antifraud proscriptions of Regulation 14A (Rules 14a-9 and 14c-6) and Regulations 14A's rules governing the transmission to beneficial owners of proxy and consent materials and information statements (Rules 14a-13, 14b-1, 14b-2 and 14c-7).

The Commission has also adopted exemptive rules intended to encourage issuers and bidders to extend tender and exchange offers, rights offerings, and business combinations to the U.S. security holder of foreign private issuers. The exemptions relieve tender offers relating to foreign private issuers from most provisions of the Exchange Act and certain provisions of the Securities Act. Exchange Act Release No. 42,054, Fed. Sec. L. Rep. (CCH) P 86,214 (1999).

(n14)Footnote 14. A security that is listed on an exchange may be admitted to unlisted trading privileges on another exchange upon application to the Commission by the other exchange pursuant to Section 12(f), *see § 4.01[5] infra*. *See also* NYSE Amex Company Guide § 950, regarding the difference between listed and unlisted trading privileges.

Unlisted trading privileges may, however, be sought by a regional exchange in order to permit their members to trade in a security listed on another exchange, such as one of the New York exchanges. Although companies having securities admitted to unlisted trading privileges on the NYSE Amex are not subject to any listing agreements with the NYSE Amex, "the Exchange expects both listed and unlisted companies to adhere to high standards in the conduct of their

businesses and the relations with their stockholders." NYSE Amex Company Guide § 950.

(n15)Footnote 15. The registration statement must include the information concerning the issuer and its controlling or controlled persons specified in Section 12(b)(1), the issuer's articles, bylaws and other documents described in Section 12(b)(2), and the material contracts described in Section 12(b)(3) of the Exchange Act. In connection with Nasdaq's change of status from an automated inter-dealer quotation service to a national securities exchange, effective as of August 1, 2006, all Nasdaq-listed companies that had previously been registered with the SEC under Section 12(g) of the Exchange Act are now automatically registered pursuant to Section 12(b). *See n.x, infra.*

(n16)Footnote 16. In general, a company applying for initial listing on the NYSE Amex, other than member corporations or foreign issuers, must satisfy one of four listing standards or an alternative listing standard to apply for listing.

The four alternative listing standards require a minimum public distribution of 500,000 unaffiliated shares and a minimum of 800 public holders; or a minimum public distribution of 1 million shares, a minimum of 400 public holders; or a minimum public distribution of 500,000 shares, a minimum of 400 public holders, and an average daily volume of 2,000 shares for the six months preceding the date of application as well as:

Alternative One

1. stockholders' equity of at least \$4 million;
2. pretax income of at least \$750,000 in its last fiscal year, or in two of its last three fiscal years; and
3. an aggregate minimum market value for publicly-held shares of \$3 million with a minimum market price of \$3 per share for a reasonable period prior to filing the listing application.

Alternative Two

1. two years of operations;
2. stockholders' equity of at least \$4 million;
3. aggregate market value of publicly held shares of \$15 million; and
4. minimum market price of \$3 per share.

Alternative Three

1. stockholders' equity of at least \$4 million;
2. total value of market capitalization of \$50 million;
3. aggregate market value of publicly held shares of \$15 million; and
4. minimum market price of \$2 per share.

Alternative Four

1. total value of market capitalization of \$75 million; or total assets and total revenue of \$75 million each in its last

fiscal year, or in two if its last three fiscal years;

2. aggregate market value of publicly held shares of \$20 million; and

3. minimum market price of \$3 per share.

Alternative Listing Standards

Certain issuers that do not satisfy any of the above listing standards may be eligible for initial listing pursuant to the appeal procedure, which requires the satisfaction of a minimum numerical Alternative Listings Standard and consideration of the following factors:

1. the nature of the applicant's business and market for its products;

2. the reputation of management;

3. the historical record and pattern of growth; and

4. the financial integrity, demonstrated earning power and future outlook.

Domestic listing requirements on the NYSE call for minimum distribution of a company's shares within the U.S. as well as minimum financial criteria. In general, there are four alternatives for listing on the NYSE:

The four alternative listing standards require a minimum distribution and size criteria of at least 400 U.S. round-lot holders; at least 1,100,000 public shares outstanding; and a market value of public shares of at least \$60 million for IPOs (and \$100 million for other listings). All issuers must have a \$4 stock price at the time of listing.

Financial Criteria

Must meet 1 of the following standards:

Alternative #1 -- Earnings Test

Aggregate pre-tax income for the last 3 years of \$10 million
Minimum in each of the 2 most recent years
of \$2 million
Third year must be positive

OR

Aggregate pre-tax income for the last 3 years of \$12 million
Minimum in the most recent year of \$5 million
Minimum in the next most recent year of \$2 million

Alternative #2a -- Valuation with Cash Flow

Global Market Capitalization of \$500 million
Revenues (most recent 12-month period) of \$100 million
Adjusted Cash Flow:

Aggregate for the last 3 years of \$25 million

All 3 years must be positive

1-4 Federal Securities Exchange Act of 1934 § 4.01

Alternative #2b -- Pure Valuation with Revenues

Global Market Capitalization of \$750 million Revenues (most recent fiscal year) of \$75 million

Alternative #3 -- Affiliated Company

For new entities with a parent or affiliated company listed on the NYSE

Global Market Capitalization of \$500 million Operating History of 12 months Parent or affiliate is a listed company in good standing Company's parent or affiliated company retains control of the entity or is under common control with the entity

Alternative #4 -- Assets and Equity

Global Market Capitalization of \$150 million Total Assets of \$75 million Stockholders' Equity of \$50 million

On January 13, 2006, the SEC approved Nasdaq's application to register The NASDAQ Stock Market as a "national securities exchange" under Section 6 of the 1934 Act. Previously, Nasdaq was considered an automated inter-dealer quotation system of a national securities association registered pursuant to Section 15A of the 1934 Act. In connection with becoming a national securities exchange, Nasdaq changed the names of the NASDAQ National Market to the "NASDAQ Global Market" and the name of the NASDAQ Small Cap Market to the "NASDAQ Capital Market." Nasdaq has also created a new top tier market classification called the "NASDAQ Global Select Market." Nasdaq's transition to a national securities exchange became effective August 1, 2006, and covers both the NASDAQ National Market and the NASDAQ Capital Market.

NASDAQ Global Select Market initial listing requires satisfying the specific financial and liquidity requirements. All listing standards require a high standard of corporate governance, as outlined in the NASDAQ Marketplace Rules. Companies must meet one of three standards of financial requirements.

Standard One

1. Aggregate pre-tax earning in prior three fiscal years of \$11 million, pre-tax earnings in each of the two most recent fiscal years of \$2.2 million and pre-tax earnings in each of the prior three fiscal years at or greater than \$0.

2. Bid price of \$4.00 per share.

3. At least three or four registered and active market makers.

Standard Two

1. Aggregate cash flow in prior three fiscal years of \$27.5 million and cash flow at or greater than \$0 in each of the prior three fiscal years.

2. Average market capitalization of \$550 million over the prior twelve months.

3. Revenue for the previous fiscal year of \$110 million.

4. Bid price of \$4.00 per share.

5. At least three or four registered and active market makers.

Standard Three

1. Average market capitalization of \$850 million over the prior twelve months.
2. Revenue for the previous fiscal year of \$90 million.
3. Bid price of \$4.00 per share.
4. At least three or four registered and active market makers.

New company listings must also satisfy the appropriate liquidity requirements:

Initial public offerings and spin-off companies and affiliated companies (companies affiliated with another company listed on The NASDAQ Global Select Market) are required to have 2,200 beneficial stockholders (450 for affiliated companies); 1.25 million publicly held shares; and either a market value of publicly held shares or a market value of publicly held shares and stockholders' equity of \$70 million. Companies emerging from bankruptcy are required to have 450 beneficial stockholders; 1.25 million publicly held shares; and a market value of publicly held shares at \$110 million or both market value of publicly held shares at \$100 million and stockholders' equity at \$110 million.

NASDAQ Global Market companies must satisfy all requirements of one of three initial listing financial standards. All listing standards require a high standard of corporate governance, as outlined in the NASDAQ Marketplace Rules.

Standard One

1. Stockholders' equity of \$15 million.
2. Income from continuing operations before income tax (in latest fiscal year or in 2 of 3 fiscal years) of \$1 million.
3. 1.1 million publicly held shares.
4. Market value of publicly held shares of \$8 million.
5. Bid price of \$4.00 per share.
6. At least 400 stockholders.
7. At least three registered and active market makers.

Standard Two

1. Stockholders' equity of \$30 million.
2. 1.1 million publicly held shares.
3. Market value of publicly held shares of \$18 million.
4. Bid price of \$4.00 per share.

1-4 Federal Securities Exchange Act of 1934 § 4.01

5. At least 400 stockholders.
6. At least three registered and active market makers.
7. At least two years of operating history.

Standard Three

1. Market value of listed securities of \$75 million; or both \$75 million in total assets and \$75 million in total revenue.
2. 1.1 million publicly held shares.
3. Market value of publicly held shares of \$20 million.
4. Bid price of \$4.00 per share.
5. At least 400 stockholders.
6. At least four registered and active market makers.

NASDAQ Capital Market companies must satisfy the following initial listing requirements (as well as a high standard of corporate governance):

Standard One

1. Stockholders equity of \$5 million and a market value of publicly held shares of \$15 million.
2. 1.0 million publicly held shares.
3. Bid price of \$4 per share.
4. At least 300 stockholders.
5. At least three registered and active market makers.
6. Two years of operating history.

Standard Two

1. Stockholders' equity of \$4 million and a market value of publicly held shares of \$15 million.
2. Market value of listed securities of \$50 million.
3. Minimum bid price of \$4.00 per share.
4. 1.0 million publicly held shares.
5. At least 300 stockholders.
6. At least three registered and active market makers.

Standard Three

1. Stockholders' equity of \$4 million and a market value of publicly held shares of \$5 million.
2. Net income from continuing operations (in the latest fiscal year or in two of the last three fiscal years) of \$750,000.
3. Minimum bid price of \$4.00 per share.
4. 1.0 million publicly held shares.
5. At least 300 stockholders.
6. At least three registered and active market makers.

(n17)Footnote 17. The current forms of listing agreements of the New York Stock Exchange are found in Section 901 of its Listed Company Manual or at its website: <http://www.nyse.com>. The various listing agreements of the NYSE Amex are found in the NYSE Amex Company Guide, Appendix 1 or at its website: <http://www.nyse.com>.

(n18)Footnote 18. Section 12(d); Rules 12d-13 and 12d-14. See *Exchange Act Release No. 38,850, Fed. Sec. L. Rep. (CCH) P 85,953 (1997)*.

(n19)Footnote 19. Rule 12d1-1(a) (2) under the Exchange Act, reprinted in the Primary Law Sourcebook, Volume B, Section G.

(n20)Footnote 20. Rule 12d1-1(d).

(n21)Footnote 21. Rule 12d1-1(c); New York Stock Exchange Listed Company Manual Section 703.00; NYSE Amex Company Guide §§ 301, *et seq.*

(n22)Footnote 22. Exchange Act Release No. 38,850, Fed. Sec. L. Rep. (CCH) P 85,953 (1997).

(n23)Footnote 23. Until 1964, equity securities which were not listed on a national securities exchange were not required to be registered under the Exchange Act. The Securities Acts Amendments of 1964 added Section 12(g) to the Exchange Act, requiring registration of "over-the-counter" equity securities. The Senate Report explained the basis of the provision thus:

There is no convincing reason why the comprehensive scheme of disclosure that affords protection to investors in the exchange markets should not also apply in the over-the-counter market. Nothing in the nature of the securities traded in that market make any less necessary the disclosure of basic information. On the contrary, because the over-the-counter market includes not only securities of widely known and seasoned companies but also those of relatively unknown and insubstantial ones, the need of investors for accurate information is at least as great, if not greater than in the exchange markets. ... Moreover, the disparity between the disclosure requirements of the exchanges and the over-the-counter markets itself stands as an undesirable artificial factor in the allocation of securities between the two markets. ... The public should not be asked to buy and sell in darkness. ...

S. Rep. No. 379, 88th Cong., 1st Sess. 910 (1963) reprinted in the Primary Law Sourcebook, Volume C, Section I. The over-the-counter market is discussed in § 2.04 *supra*.

The Securities Acts Amendments of 1975 amended Section 12(f) of the Exchange Act to permit exchanges to begin

unlisted trading in any securities that are registered under Section 12(g).

(n24)Footnote 24. *See* n.2 *supra*. The Commission, through its Rule 12g-1 exemption, has effectively raised the total assets test to \$10 million for most issuers. *See* § 4.01[2][a][iv] *infra*.

(n25)Footnote 25. The Securities Acts Amendments of 1975 amended the definition of "interstate commerce" in Section 3(a)(17) of the Exchange Act to include intrastate use of any facility of a national securities exchange or of a telephone or other interstate means of communication, or any other interstate instrumentality.

(n26)Footnote 26. Section 12(g)(1) of the Exchange Act, reprinted in the Primary Law Sourcebook, Volume B, Section F. While the Commission has not adopted any similar statement of policy applicable to Section 12(g) companies, it is probable that it would apply the policy (so far as pertinent) set out in Exchange Act Release No. 3,085, *Fed. Sec. L. Rep. (CCH) P 23,081* (1941).

(n27)Footnote 27. Section 12(g)(1).

(n28)Footnote 28. Section 12(g)(5).

(n29)Footnote 29. *See* n.4 *supra* for the broad definitions of "equity security" contained in Exchange Act Section 3(a)(11) and Rule 3a11-1.

(n30)Footnote 30. However, if the corporate stock books show the securities as being held by the same person but in different capacities (*e.g.*, as an individual in one case and as a joint tenant in another), the securities will be deemed to be "held of record" by the number of separate stockholder registrations. *See* *Techne Corporation* (available Sept. 20, 1988).

(n31)Footnote 31. *Id.*

(n35)Footnote 35. *Id.*, Rule 12g-4.

(n36)Footnote 36. Rule 12g5-2.

(n37)Footnote 37. *Id.* Regulation S-X is codified at 17 C.F.R. Part 210.

(n38)Footnote 38. Rule 12g5-2.

(n39)Footnote 39. *Exchange Act Release No. 18,647, Fed. Sec. L. Rep. (CCH) P 83,204* (1982). *See also* *Exchange Act Release No. 35,895, Fed. Sec. L. Rep. (CCH) P 85,637* (1995).

(n40)Footnote 40. Section 12(g)(2)(C). While banks are not exempt from the securities laws, the enforcement of Sections 12, 13, 14(a), 14(c), 14(d), 14(f), and 16 is vested in the Comptroller of the Currency with respect to national banks, the Federal Reserve Board as to member banks in the Federal Reserve System, and the Federal Deposit Insurance Corporation as to all other insured banks. Section 12(i). Banks that are subject to the Exchange Act's reporting requirements submit their reports to the appropriate banking authority, not the Commission.

1-4 Federal Securities Exchange Act of 1934 § 4.01

(n41)Footnote 41. Section 12(g)(2)(F). Securities of nonprofit mutual or cooperative organizations are exempted only if they are part of a class issuable only to members who purchase commodities or services from the issuer, the securities are transferable only to a successor in interest or occupancy of premises serviced or to be serviced by the issuer, and no dividends are payable to holders of such securities. *Id.*

(n42)Footnote 42. Section 12(g)(2)(D).

(n43)Footnote 43. Section 12(g)(2)(E).

(n44)Footnote 44. Section 12(g)(2)(G). If an insurance company is subject to Section 15(d), discussed in § 4.02 *infra*, it must file reports required by that section. If it has registered a security pursuant to Section 12(b), it remains subject to Sections 13, 14 and 16.

All fifty states, the District of Columbia, and Puerto Rico have statutes or rules which qualify their insurance companies for exemption, *see 3 Fed. Sec. L. Rep. (CCH) P 23,310*. But *see Reserve Life Insurance Co. v. Provident Life Insurance Co.*, 499 F.2d 715 (8th Cir. 1974), where the court held that the § 12(g)(2) exemption for securities issued by an insurance company did not exempt from registration a voting trust holding an insurance company's stock.

(n45)Footnote 45. Section 12(g)(2)(H).

(n46)Footnote 46. *See* Rule 12g3-2.

(n47)Footnote 47. The Rule 12h-1 exemptions from Exchange Act Section 12(g) were issued pursuant to authority granted to the Commission by Exchange Act Section 12(h): "if the Commission finds... that such action is not inconsistent with the public interest or the protection of investors." *See, e.g.*, Exchange Act Release Nos. 29,124 (1991), 29,020 (1991) and 22,904 (1986); *see also* Superior Services Inc. (available March 18, 1994), Montgomery Watson, Inc. (available Nov. 2, 1995), Convenience Store Investments (available October 17, 1995) and Parsons Brinckerhoff Inc. (available June 21, 1995) (based on representations that holders were officers and employees, with no public investors and adequate disclosure).

This rule essentially codifies prior no-action letter relief. *Cf.* Staff Accounting Bulletin No. 53, Topic 1G and H; Communications & Power Industries Holding Company (available March 15, 1996); Geotek Communications, Inc. (available Feb. 22, 1996); Career Horizons, Inc. (available Feb. 15, 1996); Aetna Life and Casualty Company (available March 13, 1995) (preferred securities); WymanGordon Company (available May 28, 1993); and Kendal International, Inc. (available July 30, 1993).

(n50)Footnote 50. Section 12(g)(2)(A).

(n51)Footnote 51. Rule 12g-2. NASDAQ-listed companies are required to file for deregistration using both Form 15 and Form 25 (under which companies listed on national securities exchanges file for deregistration). The deregistration process for NASDAQ-listed companies will be similar to the deregistration procedures currently required of companies listed on other national securities exchanges. Note that because all NASDAQ-listed companies previously were registered under Section 12(g) before they were registered under Section 12(b), their Section 12(g) registration, and possibly reporting obligations under Section 15(d), automatically would revive. The termination of either or both would require filing a Form 15. SEC Release No. 34-54240 (July 2006).

(n52)Footnote 52. Rule 12g-3(a).

(n53)Footnote 53. Rule 12g-3(b). If an issuer fails to register an equity security as required by Section 12, the Commission may, after notice and opportunity for hearing, issue an order requiring compliance. If the issuer fails to obey such an order, the Commission may issue a cease and desist order or apply to a federal district court for an injunction compelling the issuer to comply with the order. Sections 21(d) and (e). The Commission may seek any equitable relief that may be appropriate or necessary for the benefit of investors. Civil and criminal penalties could also be imposed in an appropriate case. Section 21(d)(3), Section 21(d)(5) and Section 32(a).

(n54)Footnote 54. *See e.g.*, First Mutual Savings Bank (available October 8, 1999). Note that the Commission has special rules relating to "back-door" registrations. *See* <http://www.otcbb.com/news/EligibilityRule/8Kreg.stm#SECLetter> (letter of Commission dated April 7, 2000).

(n55)Footnote 55. Section 12(g)(2).

(n56)Footnote 56. A company cannot voluntarily withdraw its registration even though the registration was voluntary. Termination of registration depends upon whether the number of stockholders falls below 300 persons. Section 12(g)(4). *See* § 4.01[2][a][ii] *supra*.

(n57)Footnote 57. A "foreign private issuer" is an issuer incorporated or organized under the laws of a non-U.S. jurisdiction that either (i) has 50% or less of its outstanding voting securities held of record by U.S. residents or (ii) has more than 50% of its outstanding voting securities held by U.S. residents and has (a) a majority of its executive officers or directors be non-U.S. citizens or residents; (b) 50% or more of its assets located outside the U.S. and (c) its business administered principally outside the U.S.

(n58)Footnote 58. Form 10, General Instruction A under the Exchange Act, reprinted in the Primary Law Sourcebook, Volume B, Section H. Issuers already subject to the reporting requirements of Sections 13 or 15(d), including those concurrently effecting initial public offerings, may use Form 8-A, a simplified form incorporating much of the required information by reference. *See* § 4.01[4] *infra*.

The prototype of the issuer required to file Form 10 is one which, over the years, through private or exempt intrastate offerings, employee stock plans, and bequests and inheritance, has accumulated the requisite number of stockholders. In addition, Form 10 would be used for issuers whose Exchange Act reporting obligations formerly were terminated because its stockholders dropped below the 300 minimum level but which later attain a 500 stockholder minimum requiring it again to register under Section 12(g).

See § 4.01[2][a][iii] *supra*. Form 10 would also be used by entities that are spun off to the public without registration under the Securities Act.

Foreign private issuers may use Form 20-F to register their securities under the Exchange Act. Certain Canadian issuers may use Form 40-F to register their securities under the Exchange Act. Form 40-F is used as a wraparound for the filing of home jurisdiction documentation that the issuer has made public, filed with a stock exchange, or distributed to security holders. For purposes of Exchange Act registration, Form 40-F requires the issuer to file that part of its home jurisdiction documentation containing a description of the securities being registered. *Exchange Act Release No. 29354, Fed. Sec. L. Rep. (CCH) P 84,812 (1991)*.

For a discussion of voluntary disclosure of projected financial information in filings with the Commission, *see* § 4.04 *infra*.

(n73)Footnote 73. Item 302 of Regulation S-K is discussed in § 4.03[4][b] *infra*.

(n74)Footnote 74. Item 304 of Regulation S-K is discussed in § 4.03[4][d] *infra*.

(n75)Footnote 75. Item 601 of Regulation S-K is discussed in § 4.03[7][a] *infra*.

(n76)Footnote 76. The Commission's Division of Corporate Finance has stated that it will not recommend enforcement action to the Commission for failure to comply with the registration requirements of Section 12(b) of the Exchange Act if issuers register debt securities listed on the New York Stock Exchange using a modified Form 8-A. New York Stock Exchange (available Aug. 12, 1998). The modified Form 8-A may be used only in connection with a debt security of an issuer that has on-going Exchange Act reporting obligations.

(n77)Footnote 77. General Instruction A(a), Form 8-A. Since most issuers that have a class of equity securities held of record by a sufficient number of persons so as to require registration under § 12(g), or to make listing on an exchange worthwhile, will have at some point filed a registration statement under the Securities Act and, as a result, will be required to file reports under Exchange Act § 15(d), Form 8-A will be available for most registrations under Section 12(b) or 12(g) of the Exchange Act. An issuer required to file an annual report under Section 15(d) of the Exchange Act for its last fiscal year must timely file an annual report for that fiscal year pursuant to that section within the period specified in the appropriate annual report form, even if the registration statement on Form 8-A will become effective before the report is required to be filed. General Instruction A(b), Form 8-A.

(n78)Footnote 78. *Exchange Act Release No. 38,850, Fed. Sec. L. Rep. (CCH) P 85,953* (1997). See also, *Exchange Act Release No. 34,922, Fed. Sec. L. Rep. (CCH) P 85,450* (1994) (making certain debt registrations immediately effective). This release also eliminated the \$250 filing fee under Rule 12b-7 for debt securities.

(n79)Footnote 79. Form 10 under the Exchange Act, reprinted in the Primary Law Sourcebook, Volume B, Section H is discussed in § 4.01[3] *supra*.

(n80)Footnote 80. Item 202 of Regulation S-K, "Description of Registrant's Securities" is discussed in § 4.03[3][b] *infra*.

(n81)Footnote 81. Instruction, Item 1, Form 8-A.

(n82)Footnote 82. For the difference between listed and unlisted trading privileges *see* n.13 *supra*.

Prior to the 1975 Amendments, Section 12(f) of the Exchange Act provided that a national securities exchange might, upon application to and approval by the Commission, extend unlisted trading privileges to any security listed and registered on another national securities exchange. The Securities Acts Amendments of 1975 broadened that provision to encompass securities not listed on any other exchange; other textual changes reflected Congressional concern over the impact of unlisted trading on the development of a national market system and clarified that such applications may not be granted if the effect would be to restrict competition.

43 SEC Ann. Rep. 128129 (1977). (Footnote omitted). *See* S. Rep. No. 9475, 94th Cong. 1st Sess. p. 106 (1975); H. R. Rep. No. 94229, 94th Cong. 1st Sess. p. 95 (1975). The Unlisted Trading Privileges Act authorized the Commission to prescribe additional rules regarding unlisted trading privileges. *See Exchange Act Release No. 35,637, Fed. Sec. L. Rep. (CCH) P 85,615 (1995)*.

For discussion of the Nasdaq Stock Market, *see* § 2.05 *supra*.

(n83)Footnote 83. Section 12(f)(1)(A)(ii). *Exchange Act Release No. 29,285, Fed. Sec. L. Rep. (CCH) P 84,809 (1991)* adopted Rule 12a-7 providing an exemption for securities underlying market baskets from registration under Section 12(a).

Management retains the right under Section 12(f)(4) to petition the Commission to suspend unlisted trading privileges if the Commission finds this "necessary or appropriate in the public interest or for the protection of investors." S. Rep. No. 9475, 9th Cong. 1st Sess. p. 19 (1975).

Exchanges have to wait until before extending unlisted trading privileges to any listed initial public offering until second trading day. The rules also require exchanges to have rules and oversight mechanisms in place to ensure fair and orderly markets and the protection of investors with respect to unlisted trading privileges. *Exchange Act Release No. 35,637, Fed. Sec. L. Rep. (CCH) P 85,615 (1995)*. An exchange may extend unlisted trading privileges to a listed initial public offering security when (1) at least one transaction in the security has been effected on the listing exchange and (2) the transaction has been reported under an effective transaction reporting plan. *Exchange Act Release No. 43,217, Fed. Sec. L. Rep. (CCH) P 86,321 (2000)*.

Section 12(f)(1)(E) prohibits extension of unlisted trading privileges in securities that are registered under Section 12(g) of the Exchange Act (OTC securities), except pursuant to a rule, regulation or order of the Commission approving such extension. The Commission's order approving the ongoing pilot program, including all limitations and conditions therein, is deemed such an order. *Exchange Act Release No. 34,371 (1994); Exchange Act Release No. 35,637, Fed. Sec. L. Rep. (CCH) P 85,615 (1995)*.

(n84)Footnote 84. Section 12(f)(1)(F) of the Exchange Act, reprinted in the Primary Law Sourcebook, Volume B, Section F.

(n85)Footnote 85. The rules to be followed are those in effect at the time the delisting application is filed. The regional exchanges generally have no specific rules, but the New York and NYSE Amex Stock Exchanges and Nasdaq set forth criteria used for delisting by the exchange, *See* New York Stock Exchange Listed Company Manual § 8; NYSE Amex Company Guide §§ 1001-1011; Nasdaq Marketplace Rules 5100 et seq. These criteria may be changed at any time. That such a change may have a retroactive effect on the issuer does not invalidate the change. *Atlas Tack Corp. v. New York Stock Exchange*, 246 F.2d 311 (1st Cir. 1957) .

The New York Stock Exchange will normally give consideration to delisting a security of a company when the number of holders of 100 shares or more (or a unit trading if less than 100 shares) is less than 1,200; when the number of publicly held shares becomes less than 600,000 or their average monthly trading volume is less than 100,000 shares for the most recent twelve months; when the total global market capitalization is less than \$50 million; or when for other reasons the New York Stock Exchange believes that further dealings in the security are not advisable.

Other examples under which suspension or delisting may be considered include situations where liquidation of the company has begun or substantially all of the company's assets have been sold. Delisting of a common stock will also be considered if the issuing company has violated its agreements with the exchange, if a class of nonvoting common stock is created (excluding stock which in the opinion of the exchange entitles it to be regarded as preferred stock), or the company's Exchange Act registration or exemption is no longer effective. Other examples are given. *See* Section 802.00 of the New York Stock Exchange Listed Company Manual.

The New York Stock Exchange provides for delisting of a security following receipt of certified board resolutions approving the removal from listing. New York Stock Exchange Listed Company Manual Section 806.00.

The NYSE Amex also provides for application by a company to remove a security from listing on the NYSE Amex. *See* NYSE Amex Company Guide § 1011.

Rules 5815(a)(2), 5815(d)(2), 5820(e)(6) and 5825(d) provide that Nasdaq will delist an issuer in certain circumstances, following Nasdaq's determination that the issuer no longer meets the requirements for continued listing and after the issuer has received notice of that determination and an opportunity to appeal the determination pursuant to the Rule 5800 Series.

Consistent with Exchange Act Rule 12d2-2, to effect a delisting, Nasdaq will provide public notice of its final determination to remove a security from listing by issuing a press release and posting notice on its web site. This public notice will be disseminated no fewer than 10 days before the delisting becomes effective and will remain posted until the delisting is effective. Following such public notification, Nasdaq will file an application on Form 25 with the Commission to delist the security, and will promptly provide a copy of that Form 25 to the issuer. The Form 25, and the delisting of the security, will become effective 10 days after it is filed pursuant to Exchange Act Rule 12d2-2(d)(1), unless the Commission postpones such delisting pursuant to Rule 12d2-2(d)(3). Nasdaq Marketplace Rule 5830.

(n86)Footnote 86. Section 12(d) reads in part as follows:

A security registered with a national securities exchange may be withdrawn or stricken from listing and registration in accordance with the rules of the exchange and, upon such terms as the Commission may deem necessary to impose for the protection of investors, upon application by the issuer or the exchange to the Commission.

Typical reasons for an exchange application are a consummated exchange, a liquidation, an absence of public interest, the disappearance of substantial value, the failure to maintain a transfer agent or registrar, or the failure to file the requisite reports. 25 SEC Ann. Rep. 68 (1959). The statutory procedures are exclusive and a state court has no

jurisdiction to stay the delisting. *Fifth Avenue Coach Lines, Inc. v. New York Stock Exch.*, 270 N.Y.S.2d 852 (App. Div. 1966) .

The action of an exchange in delisting a stock on the basis of its unacceptably low trading price may not be attacked by a stockholder under the antitrust laws. *Harding v. American Stock Exchange*, 527 F.2d 1366 (5th Cir. 1976) . *Harding* is discussed in connection with the effect of antitrust laws upon collective action by an exchange, see § 2.03[3] *supra*.

Allegations that the exchange has not observed due process requirements with respect to the delisting may be raised in an appeal from the Commission's delisting order under Section 25. *Intercontinental Industries, Inc. v. American Stock Exchange*, 452 F.2d 935 (5th Cir. 1971) , *cert. denied*, 409 U.S. 842 (1972) ; *Harding*, 527 F.2d 1366 .

(n88)Footnote 88. *Id.*

(n89)Footnote 89. Rule 12d2-2(a). The exchange must file with the Commission an application on Form 25 to withdraw the security from listing and registration within a reasonable time after the exchange finds that any of the conditions exist. *Id.* Form 25 is reprinted in the Primary Law Sourcebook, Vol. B, Section H.

(n90)Footnote 90. See *Winkelman v. New York Stock Exchange*, 445 F.2d 786, 790 (3d Cir. 1971) . Appeal from Commission orders under Section 25 is discussed in § 9.02[2][c] *infra*.

(n91)Footnote 91. See *Intercontinental Industries, Inc. (INI) v. American Stock Exchange*, 452 F.2d 935 (5th Cir. 1971) , *cert. denied*, 409 U.S. 842 (1972) .

(n92)Footnote 92. Rule 12d2-2(b).

(n93)Footnote 93. Rule 12d2-2(c). Such applications may be based on a radical change in the operations of the issuer as the result of which it would no longer qualify for listing. *Fifth Ave. Indus. Corp.*, Exchange Act Release No. 7,977, *Fed. Sec. L. Rep. (CCH) P 23,191 .31* (1966). "However, while delisting may have adverse effects on present investors, such effects are outweighed by the protection afforded future purchasers by removing from Exchange trading securities not possessing the applicable qualifications." *Acme Missiles Constr. Corp.*, Exchange Act Release No. 8,161 p. 4 (1967). See also *Fotochrome Inc.*, Exchange Act Release No. 7,985 (1966); *Magic Marker Corp.*, Exchange Act Release No. 8,163, *Fed. Sec. L. Rep. (CCH) P 23,191 .32* (1967).

"Delisting is designed to protect investors by removing from exchange trading securities which if listed, indicate that they 'meet the qualifications which such listings suggest.' " *The Stephens Co.*, Exchange Act Release No. 8,452, *Fed. Sec. L. Rep. (CCH) P 23,191 .22* at p. 3 (1968). The delisting procedure is not so much for the protection of existing stockholders as it is to avoid the inference that the stock complies with the exchange rules. *Langley Corporation*, Exchange Act Release No. 9,729 at p. 3 (1972); *American Electronics, Inc.*, Exchange Act Release No. 8,244 (1968); *Polorad Electronics Corp.*, Exchange Act Release No. 9,419 (1971).

The establishment of named criteria for delisting under a general statement of policy is not exclusive and other criteria may be used. *American Electronics, Inc. supra*.

The fact that the exchange has not taken similar action against other issuers who are in the same position is no defense. *Fotochrome, Inc.*, Exchange Act Release No. 8,013 (1966); *General Contracting Corp.*, Exchange Act Release No. 8,210, *Fed. Sec. L. Rep. (CCH) P 23,191 .32* (1967); *Lee Motor Prods., Inc.*, Exchange Act Release No. 8,672, *Fed. Sec. L. Rep. (CCH) P 23,191 .44* (1969). When a listing is terminated, the company is required to be eligible for an

original listing in order to be reinstated. *F. L. Jacobs & Co.*, Exchange Act Release No. 8,314, *Fed. Sec. L. Rep. (CCH) P 23,191* .31 (1968).

In the absence of fraud, the decision to delist for failure to have a substantial number of stockholders is a matter within the discretion of the directors. *St. Enterprises, Inc. v. American Export Isbrandtsen Co., Inc.*, *Fed. Sec. L. Rep. (CCH) P 92,711* (1970). *See Shawmut Asso. v. SEC*, 146 F.2d 791 (1st Cir. 1945) . *See also Atlas Tack Corp. v. New York Stock Exchange*, 246 F.2d 311, 315 (1st Cir. 1957) :

Section 12(d) expressly provides that a security registered with a national securities exchange may be stricken from listing and registration in accordance with the rules of the exchange and with such terms as the Commission may deem necessary for the protection of investors, upon application by the exchange to the Commission. Thus, it has been held that, in considering applications to delist under Section 12(d), the Commission has two functions to perform:

(1) To determine whether the rules of the exchange, effective at the time the application is filed, have been complied with; and

(2) To determine what terms, if any, are necessary for the protection of investors.

See The Torrington Company, 19 S.E.C. 39 (1945) ; *Fuller Manufacturing Company*, 14 S.E.C. 895 (1943) ; *The Troxel Manufacturing Company*, 9 S.E.C. 665 (1941) ; *National Union Radio Corporation*, 5 S.E.C. 397 (1939) ; *Application of the New York Stock Exchange, etc.*, 5 S.E.C. 449 (1939) . This has been the consistent administrative construction and is in accord with the normal meaning of the statutory language.

(n94)Footnote 94. Rule 12d2-2(d). The SEC has streamlined the procedures for removing from listing, and withdrawing from registration, securities under Section 12(b) of the Exchange Act. The rules adopted in 2005 require all issuers and national securities exchanges seeking to delist and/or deregister a security in accordance with the rules of any exchange and the SEC to file the amended Form 25 in an electronic format with the SEC on the EDGAR database. The rules also provide that the Form 25 serves as an exchange's notice to the SEC under Section 19(d) of the Exchange Act. Rule 12d2-2(c). Previously the issuer completed a paper filing and the SEC issued an order to remove the security from listing or registration on a national securities exchange. The rule also exempts, on a permanent basis, standardized options and security futures products traded on a national securities exchange from Section 12(d) of the Exchange Act. Release No. 34-52029.

Applications by the issuer for withdrawal are fairly infrequent. The usual reason is inordinate expense. *TechHughes Gold Mines. Ltd.*, 3 S.E.C. 462 (1938) ; *Capitol City Prods. Co.*, 5 S.E.C. 721 (1939) .

(n95)Footnote 95. Rule 24b-2(h), that had allowed such withdrawal, was rescinded in *Exchange Act Release No. 11,774*, *Fed. Sec. L. Rep. (CCH) P 80,319* (1975). A new Rule 24b-2 was promulgated in *Exchange Act Release No. 12,386*, *Fed. Sec. L. Rep. (CCH) P 80,481* (1976). The new rule provides that information will be entitled to confidential treatment only if it is exempt from disclosure under the Commission's rules and regulations adopted under the Freedom of Information Act (17 C.F.R. § 200.80).

(n96)Footnote 96. Rule 12g-2. Rule 12g-2 provides that such registration under Section 12(g) is effective without the filing of an additional Exchange Act registration statement. Notwithstanding that securities deregistered under Section 12(d) of the Exchange Act may be held by fewer than 300 holders of record, the issuer of such securities must file a Form 15 with the Commission to suspend its obligation to file reports under Section 15(d). *See* Rule 12h-3.

(n97)Footnote 97. *See* n.22 *supra*.

(n98)Footnote 98. The question of compliance with exchange rules may have been modified by the amendments to

Section 19 by the Securities Act Amendments of 1975, which grant the Commission unequivocal power over the rules of any self-regulatory organization, including an exchange. Commission oversight powers with respect to exchange rules are discussed in § 2.03[2] *supra*.

(n99)Footnote 99. *Atlas Tack Corp. v. New York Stock Exchange*, 246 F.2d 311, 316 (1st Cir. 1957) :

The Commission having found that the Exchange had complied with its rules, had no power to deny the Exchange's application for delisting under Section 12(d) even "if for some acceptable reason" it believed that trading in Atlas' stock should be continued. *Allen Industries, Inc.*, 2 S.E.C. 14, 17 (1937) . Section 12(d) has been construed, and we believe properly so, as making it mandatory upon the Commission to grant applications for delisting if the rules of the exchange have been followed. *Application of the New York Stock Exchange, etc.*, 4 S.E.C. 723 (1939) . Once the Commission finds the aforementioned compliance its "sole remaining function is to determine whether delisting should be accompanied with any terms necessary for the protection of investors." *Application of the New York Stock Exchange, etc. supra* [5 S.E.C.] at 455 .

(n100)Footnote 100. See *Atlas Tack*, 246 F.2d 311 .

A requirement that the delisting application have the approval of a stated percentage of the outstanding shares is a valid condition. *Shawmut Associates v. S.E.C.*, 146 F.2d 791 (D. Mass. 1947) ; *Suburban Elec. Sec.*, 23 S.E.C. 5 (1946) ; *Torrington Co.*, 19 S.E.C. 39 (1945) . An exchange rule making such a requirement is valid and enforceable. *Fostoria Pressed Steel Corp.*, 8 S.E.C. 476 (1941) .

(n101)Footnote 101. *Capital City Prods. Co.*, 5 S.E.C. 721 (1939) ; *Troxel Mfg. Co.*, 6 S.E.C. 995 (1940) ; *Joslyn Mfg. Co.*, 10 S.E.C. 311 (1941) .

(n102)Footnote 102. Section 12(j) of the Exchange Act, reprinted in the Primary Law Sourcebook, Volume B, Section F, authorizes the Commission to deny, suspend the effective date of, suspend for not more than twelve months, or revoke a security registration for failure to comply with the Exchange Act or the rules and regulations thereunder. Under the provision, when the Commission suspends or revokes the registration of a security, "no broker or dealer shall make use of the mails or any means or instrumentality of interstate commerce to effect any transaction in, or to induce the purchase or sale of, any security the registration of which has been and is suspended or revoked pursuant to the preceding sentence." Section 12(j).

The Commission is also authorized to summarily suspend trading in a security "for a period not exceeding ten business days" by Section 12(k).

No exchange member, broker, or dealer may effect or induce a transaction in a security while trading is suspended or its registration is suspended or revoked pursuant to Section 12(j) or (k).

Suspension or revocation has adverse effects on investors. While they may be used quite effectively to compel issuers to meet their disclosure obligations under the Exchange Act, thereby benefiting investors, they can have severely adverse effects on holders of the securities involved by forcing them to hold what may be a very undesirable investment during the period in which trading is prohibited. The Second Circuit has indicated that a security holder has standing to attack a summary suspension. *See Sloan v. S.E.C.*, 527 F.2d 11 (2d Cir. 1975), *aff'd sub nom. S.E.C. v. Sloan*, 436 U.S. 103, (1978). In affirming, the court voided the Commission's practice of consecutive trading suspensions, holding that the Commission lacked the authority under Section 12(k) of the Exchange Act to indefinitely issue ten-day suspensions of trading in securities based upon a single set of circumstances, even though the Commission periodically redetermined every ten days that suspension of trading in the security in question was required by the public interest and for the protection of investors. The issue of a series of summary suspension orders under Section 12(k) is permissible if each trading suspension order is based upon a separate set of unrelated circumstances.

The prohibition against trading while a suspension is in effect applies to exchange members, brokers, and dealers, but not private persons. *See Douglas R. Graham, Fed. Sec. L. Rep. (CCH) P 80,232* (Div. Mkt. Reg. 1975). Mr. Graham had sold "short" 500 warrants for Equity Funding shares prior to a twenty-five month suspension. He desired to advertise for and purchase 500 warrants to "cover" the short position without using a broker or dealer for the purchase. The staff took a no-action position, but cautioned against involvement of a broker or dealer and pointed out that adequate disclosure must be made to the seller.

(n103)Footnote 103. *See, e.g., Great Sweet Grass Oils, Ltd.*, 37 S.E.C. 683 (1957), *aff'd sub nom. Great Sweet Grass Oils, Ltd., v. SEC*, 256 F.2d 893 (D.C. Cir. 1958); *Cornucopia Gold Mines*, 40 S.E.C. 177 (1960).

CHAPTER 4 Exchange Act Registration and Reporting Requirements

1-4 Federal Securities Exchange Act of 1934 § 4.02

AUTHOR: Brandon C. Parris, Andrew D. Thorpe

§ 4.02 Periodic and Current Reporting Requirements

On July 30, 2002, President Bush signed into law comprehensive corporate governance and accounting reform legislation known as the Sarbanes-Oxley Act of 2002 n1 (the "Sarbanes-Oxley Act"). The Sarbanes-Oxley Act n2 represents a significant restructuring of the regulatory system governing the capital markets and has broad implications for public companies. n3 More specifically, to improve the delivery and flow of reliable information to investors, the Commission adopted amendments to its rules and forms to accelerate the filing of quarterly and annual reports by issuers deemed "large accelerated filers" and "accelerated filers." n4

As previously discussed, n5 an issuer is required to file a registration statement containing comprehensive, detailed information concerning itself and its securities at the time a class of its securities is registered under Section 12. n6 Thereafter, to keep the registration statement "reasonably current," the initial disclosure must be updated and supplemented by annual, quarterly, and current reports filed by the issuer pursuant to Section 13. n7

Under the Sarbanes-Oxley Act, the Commission is required to review the disclosures (including financial statements) by issuers with securities listed on an exchange or traded on Nasdaq on a "regular and systematic" basis, but in no event less than once every three years. n8 In scheduling these reviews, the Commission is directed to consider, among other factors, (i) issuers that have had material restatements of financial results, (ii) issuers experiencing significant volatility in their stock price, (iii) issuers with the largest market capitalization, (iv) emerging companies with disparities in price to earnings ratios, (v) issuers whose operations significantly affect any material sector of the economy, and (vi) any other factors that the Commission considers relevant. n9

An issuer that is not subject to Section 13, but whose registration statement has become effective under the Securities Act must file essentially the same periodic reports under Section 15(d). If information required to be included in any report is unknown or not reasonably available, the issuer must furnish such information as it can, and show either why the expense of obtaining the information would be unreasonably great or that the sole source of the information is an unaffiliated person who has refused a request to furnish it. n10

One of the primary purposes of the Exchange Act is to insure the timely disclosure of accurate information concerning publicly-held securities. n11 Making available to investors adequate financial and other information about securities in

which they might invest or have invested was determined by the drafters of the Exchange Act to be the best means of enabling them to make intelligent investment decisions and of protecting them against securities fraud. n12

The Sarbanes-Oxley Act requires each issuer to disclose to the public "on a rapid and current basis such additional information concerning material changes in the financial condition or operations of the issuer" as the Commission determines appropriate. n13 In response to these directives, in March 2004, the Commission adopted amendments to Form 8-K that significantly shortened filing deadlines and expanded the disclosure items. n14

Section 13 of the Exchange Act authorizes the Commission to require issuers of securities registered under Section 12 n15 to file current, annual, and quarterly reports with the Commission and, if the security is listed on a national securities exchange, with the exchange. In addition, under Section 15(d) of the Exchange Act issuers whose registration statements have become effective under the Securities Act are required to file essentially the same periodic reports. The rules applicable to filings under Section 15(d) are similar to those that apply to reports of issuers of securities registered pursuant to Section 12. n16 An issuer's duty to file reports under Section 15(d) is suspended while it has a class of securities registered under Section 12. n17

Successors to issuers subject to Section 15(d) assume the predecessor's duty to file reports under that section, unless the successor is exempt or the duty to file has been suspended. n18 An extension of time for filing any report for fifteen days (in the case of annual Forms 10-K and 20-F) and five days (in the case of quarterly or transition reports like Form 10-Q) may be obtained after filing an application on Form 12b-25 in those cases where the registrant cannot timely file the report without unreasonable effort or expense. n19

The reporting requirements of Section 13 are terminated upon termination of the Section 12 registration. The reporting requirements of Section 15(d) are suspended if and so long as a security of the issuer is registered pursuant to Section 12(2) as to any fiscal year (except the fiscal year in which the Securities Act registration statement became effective), if at the beginning of the year, the class of securities to which the registration statement relates is held of record by fewer than 300 persons. n20 The issuer's reporting obligations under Section 15(d) can also be suspended after the second fiscal year following the fiscal year in which the registration statement became effective if, as of the last day of each of the three most recent fiscal years, the issuer had fewer than 500 record holders of such class of securities and not more than \$10 million in total assets.

Reports filed pursuant to Section 13 or 15(d) are subject to the civil liability provisions of Section 18 for false or misleading statements. n21 However, the Commission is authorized by Sections 21(d) and (e) to obtain injunctions prohibiting violations of, or compelling compliance with, the reporting requirements. The Commission has also been granted cease and desist authority and the authority to impose civil penalties for violations of the Exchange Act's reporting requirements or violations of a cease and desist order of the Commission. n22

Section 21(d)(3) of the Exchange Act authorizes the Commission to impose civil penalties for violations of the Exchange Act or any cease and desist order entered by the Commission pursuant to Section 21C. The penalties are tiered as follows: (i) up to \$5,000 per violation for individuals and \$50,000 for corporations and other entities for most violations, (ii) up to \$50,000 for individuals and \$250,000 for corporations and other entities for violations involving fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement, and (iii) up to \$100,000 per violation for individuals and \$500,000 for corporations and other entities for violations involving fraud, deceit, manipulation, or deliberate or reckless disregard of a regulatory requirement where such violations, directly or indirectly, resulted in substantial losses or created a significant risk of substantial losses to other persons. n23 In any action or proceeding brought or instituted by the Commission under any provision of the securities laws, the Commission may seek, and any federal court may grant, any equitable relief that may be appropriate or necessary for the benefit of investors. n24 In the case of a violation of a cease and desist order, each separate violation of such order is a separate offense for Section 21(d)(3) purposes, except that in the case of a continuing failure to comply with the order, each day of the failure to comply is deemed a separate offense. n25 A willful violation may give rise to criminal

prosecution under Section 32. Moreover, the ubiquitous *Rule 10b-5* must not be overlooked. n26

[1] Form 10-K--Annual Report Pursuant to Section 13 or 15(d)

Issuers subject to Section 13 or 15(d) are required to file an annual report on Form 10-K, the applicable form for the vast majority of domestic corporations where none of the special purpose forms is available or required. n27

In 1980, the Commission adopted amendments to Form 10-K and to a number of related rules, regulations, forms, and guides, effective for all filings and reports filed under the Securities and Exchange Acts. n28 These amendments were part of a series of changes and proposals designed to:

- improve disclosures made to investors and other users of financial information;
- reduce some of the burdens of disclosure by eliminating obsolete or duplicative requirements, and by combining informal security holder communications, such as annual reports to security holders, with official Commission filings; and
- facilitate the integration of filings made under the Securities Act and the Exchange Act. n29

The Commission has developed minimum disclosure requirements for the Form 10-K and the annual report to security holders and changed the format and content of both reports to reflect this development. n30 Since the disclosure requirements have common elements, the Commission has made it easier for registrants to voluntarily incorporate material from the annual report to stockholders into the Form 10-K by reference. n31

However, because the Commission believes that the annual report to security holders and the Form 10-K are not necessarily used in an identical manner, the Commission has determined that only portions of the two reports have equivalent disclosure. n32 Disclosure requirements in annual reports to stockholders have been developed in the context of stockholders making voting decisions. The Form 10-K confirms information previously delivered to investors and others making investment decisions about the issuer and, consequently, is more detailed than the annual report to stockholders. n33

The Form 10-K disclosure requirements are based on the Commission's premise that there is a basic information package that most investors expect to be furnished, whether to support the current information requirements of an active trading market or to accompany the registration and sale of newly issued securities under the Securities Act. n34 The essential content of the basic information package includes (1) audited financial statements, (2) a summary of selected financial data appropriate for trend analysis, and (3) a meaningful description of the registrant's business and financial condition. n35

The Form 10-K is designed to segregate the basic information package contained in the Form 10-K from proxy related and supplemental information. The Form 10-K is structured in four parts, to segregate the basic package.

Part I (Items 1-4) contains the detailed disclosure requirements relating to business, properties, legal proceedings, and matters voted upon by security holders. Part II (Items 5-9B) contains market information, selected financial data, management's discussion and analysis of financial condition and results of operations, quantitative and qualitative disclosures about market risk, financial statements and supplementary data, a description of changes in and disagreements with accountants on accounting and financial disclosure, controls and procedures and other information. Part III (Items 10-14) consists of the proxy disclosure information that relates to directors and executive officers, management remuneration, beneficial ownership of securities, related party transactions and principal accountants' fees and services and other information. n36 Part IV (Item 15, signatures and supplemental information) contains

requirements for financial statement schedules and standardized requirements for exhibits. n37

At the registrant's option, the information required by the first two parts (or any portion thereof) of Form 10-K may be supplied by incorporating the information from the registrant's annual report to security holders that is furnished to the Commission pursuant to Rule 14a-3(b), Rule 14c-3(b), or Rule 14c-3(a), or from an annual report to stockholders not furnished to the Commission but containing the information required by Rule 14a-3. However, the material incorporated from the annual report to stockholders to fulfill the requirements of Part I of Form 10-K must contain the information required by Items 1-3 of Part I of Form 10-K to the extent applicable. n38 In addition, if any information required by Part I or II is incorporated by reference into an electronic format document from the annual report to security holders, any such incorporated portion must be filed as an exhibit in electronic format. n39 The information required by Part III of Form 10-K may be supplied by incorporating by reference from the proxy or information statement involving the election of directors, if filed within 120 days of the end of the fiscal year. n40

[a] Filing and Other General Instructions. In 2002, as further modified by rules adopted in 2005, the Commission adopted rule changes that, in phases, shorten the Form 10-K filing deadline from ninety days after an issuer's fiscal year end to sixty days for certain issuers designated as "large accelerated filers" and seventy five days for certain issuers designated as "accelerated filers" as defined in Exchange Act Rule 12b-2. n41 The Commission adopted these rule changes on the belief that the information being supplied in periodic reports filed under the current scheme is often stale and that significant technological advances are increasing investor demand for more timely disclosure and improving registrants' ability to capture, process and disseminate the required information. The new rules also require large accelerated filers and accelerated filers to disclose in their Form 10-K the Internet address of their corporate website and whether they make their periodic and current reports available, free of charge, on their corporate websites as soon as reasonably practicable after such material is filed electronically with the Commission, and if not, the reasons why the issuer does not do so and whether the issuer will provide electronic or paper copies of such reports free of charge upon request. n42

For non-accelerated filers, the instructions to Form 10-K require that it be filed within ninety days n43 after the end of the fiscal year covered by the report, except for schedules required by Article 12 of Regulation S-X which may, at the option of the registrant, be filed as an amendment to the report not later than thirty days after the applicable due date of the report. n44

As with all Commission filings, where the due date is a weekend or holiday, the report must be filed by the end of the next business day. n45

Amendments to Exchange Act filings are designated by adding the letter "A" after the title of the form being amended (e.g., "Form 10-K/A"). n46 An issuer subject to Section 13 must file an annual report with the Commission for each year after the last fiscal year for which financial statements were filed in its Section 12 registration statement. n47 An issuer subject to Section 15(d) must file an annual report for the fiscal year in which the Securities Act registration statement became effective and for each fiscal year thereafter. n48 Pursuant to Rule 15d-2(a), a special financial report is required if the Securities Act registration statement did not contain certified financial statements for the full fiscal year (or the life of the registrant if less than a full fiscal year) preceding the fiscal year in which the registration statement becomes effective. Registrants are permitted to combine and file annual reports to security holders with the required information on Form 10-K. n49

If an issuer subject to Section 13 or 15(d) changes its fiscal year, it must file an interim report. n50 At least one manually signed complete copy of the annual report must be filed with each exchange on which any class of securities of the issuer is registered. n51

Successor issuers are required to file reports upon succession by merger, consolidation, exchange of securities, or acquisition of assets of an issuer required to file, unless the successor is exempt or the duty to file has been suspended.

n52

Sanctions for failure to file an annual report may include a temporary suspension of trading in the nonexempt securities of the issuer. n53

To assure that the most senior officers of public companies are actively involved in the process of preparing periodic reports n54 filed with the Commission and maintain an awareness of their accountability for these reports, the Sarbanes-Oxley Act added two separate certification requirements for periodic reports filed by public companies. n55 Section 906 of the Sarbanes-Oxley Act requires that each periodic report containing financial statements filed with the Commission be accompanied by a certification of the chief executive officer and chief financial officer (or equivalent officers) that the periodic report fully complies with the requirements of Section 13(a) or 15(d) of the Exchange Act and that the information contained in the report fairly presents, in all material respects, the financial condition and results of operations of the company. The Section 906 certification requirement carries criminal penalties for "knowingly" or "willfully" making false certifications. n56

The second certification requirement of the Sarbanes-Oxley Act, Section 302, requires the principal executive officer and the principal financial officer to make a more comprehensive certification in each annual or quarterly report filed with the Commission. Such certification must be filed as an exhibit to these reports. n57 Rules 13a-14 and 15d-14 under the Exchange Act require each of these officers to certify that he or she has reviewed the report and, based on the officer's knowledge, the report does not contain any untrue statement of material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report and that the financial statements and other financial information included in the report fairly present n58 in all material respects the financial condition, results of operations and cash flows of the company as of, and for, the periods presented in the report.

In addition, the officers must make representations regarding the adequacy of the Company's disclosure controls and procedures and their disclosure of deficiencies in internal controls and certain instances of fraud to the audit committee of the board of directors. Finally, the officers must indicate whether there were significant changes in internal controls subsequent to the recent evaluation and any corrective actions.

Rules 13a-15 and 15d-15 also require reporting companies to establish and maintain disclosure controls and procedures and internal control over financial reporting that are adequate to meet the company's reporting obligations under the Exchange Act. These rules are intended to complement existing requirements for reporting companies to establish and maintain systems of internal controls with respect to their financial reporting obligations.

Issuers reporting on Form 10-K should also comply with the provisions of Regulation S-T for documents required to be filed in electronic format. n59 In the limited circumstances involving paper filing, Regulation 12B contains general requirements for such matters as the kind and size of paper to be used, the legibility of the report, the information to be given whenever the title of securities must be stated, and the filing of the report. n60 Particular attention is also directed to Rule 12b-20, which states: "In addition to the information expressly required to be included in a statement or report, there shall be added such further material information, if any, as may be necessary to make the required statements, in the light of the circumstances under which they are made, not misleading."

At least one complete copy must be manually signed by the registrant, and on behalf of the registrant by its principal executive officer or officers, its principal financial officer, its controller or principal accounting officer, and by at least a majority of the board of directors or persons performing similar functions and retained in its files for five years. n61 Duplicated or facsimile signatures will satisfy this requirement so long as the registrant retains the original manually signed document for five years and makes it available to the Commission upon request. n62 For registrants not filing electronically, three complete copies of the report and five additional copies that need not include exhibits must be filed with the Commission. n63 In addition, at least one complete, manually signed copy (including exhibits) must be filed

with each exchange on which any class of securities of the registrant is registered, although NASDAQ and the New York Stock Exchange no longer require copies of documents filed electronically. The transmittal letter for Form 10-K must indicate whether the financial statements in the report to security holders furnished to the Commission reflect a change from the previous year in any accounting principles, practices, or in the method of applying such principles. n64

In completing the Form 10-K, any information required by an item or other requirement with respect to any foreign subsidiary, except for financial statements and other financial schedules, may be omitted to the extent that the required disclosure would be detrimental to the registrant. n65

The registrant may be able to furnish abbreviated narrative disclosure if, on the date of filing its Form 10-K:

- all of the registrant's equity securities are owned, either directly or indirectly, by a single person, which is a reporting company that has filed all the material required to be filed under Section 13, 14 or 15(d), as applicable, and which is named in conjunction with the registrant's description of its business;
- neither the registrant nor its subsidiaries during the preceding thirty-six calendar months and any subsequent period of days has been in material default in the payment of principal, interest, a sinking or purchase fund installment, or any other material default not cured within thirty days with respect to any indebtedness or has been in any material default in the payment of rentals under material long-term leases;
- on the cover page of the Form 10-K the registrant has prominently set forth a statement that it meets the conditions contained in the prior two bullet paragraphs above, and that it is therefore filing the Form 10-K with the reduced disclosure format; and n66
- the registrant is not an asset-backed issuer.

This reduced disclosure format permits the registrant to omit the information called for by Item 6, Selected Financial Data, and Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, if the registrant includes in its Form 10-K a management's narrative analysis of the results of operations that explains the reasons for material changes in the amount of revenue and expense items between the most recent fiscal year presented and the one immediately preceding it. n67 The registrant may also omit the list of subsidiaries exhibit called for by Item 601 of Regulation S-K. n68 Moreover, registrants qualified to file under the reduced disclosure format may omit the items called for by: Item 4, Submission of Matters to a Vote of Security Holders; Item 10, Directors and Executive Officers of the Registrant; Item 11, Executive Compensation; Item 12, Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters; and Item 13, Certain Relationships and Related Transactions. n69 In response to Item 1, Business, the registrant only need furnish a brief description of the business done by the registrant and its subsidiaries during the most recent fiscal year that will, in management's opinion, indicate the general nature and scope of the business of the registrant and its subsidiaries. n70 In response to Item 2, Properties, the registrant only need furnish a brief description of the material properties of the registrant and its subsidiaries that in management's opinion will be necessary to an understanding of the business done by the registrant and its subsidiaries. n71

[b] Facing Sheet. The facing sheet of Form 10-K requires a statement of the fiscal year for which it is being filed, the registrant's Commission file number, and the registrant's name and state of incorporation, address, telephone number and I.R.S. employer identification number. The securities registered under Section 12 of the Exchange Act must also be listed and, if registered pursuant to Section 12(b) of the Securities Act, the name of the securities exchange on which they are registered. The facing page must also indicate (by checking one of two boxes) whether the report is the normal annual report required to be filed under Section 13 or 15(d) or whether the report is a "transition report" relating to a change in the registrant's fiscal year or where a successor to the registrant has a different fiscal year. n72 To facilitate

sales under Rule 144, the registrant must indicate, by checking the appropriate yes/no item, whether it has filed all required reports under Sections 13 and 15(d) of the Exchange Act during the past twelve months and whether it has been subject to those requirements for the past ninety days. If no disclosure is required to be described in the report under Item 405 of Regulation S-K, regarding delinquent Section 16 reports, the registrant is instructed to so indicate by checking the designated box on the facing sheet. n73 The registrant must indicate on the facing sheet whether it is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company as defined in Rule 12b-2 of the Exchange Act. The registrant must also indicate whether it is a "well-known seasoned issuer" as defined by Rule 405 of the Securities Act, n74 and indicate if it is a shell company as defined by Rule 12b-2 of the Exchange Act. Last, the registrant must indicate (by checking one of two boxes) whether it has submitted electronically and posted on its website every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding twelve months. n75

The number of outstanding shares of each class of common stock as of the latest practicable date, and the aggregate market value of the voting stock held by nonaffiliates of the registrant as of the last business day of the registrant's most recently completed second fiscal quarter must also be stated on the facing sheet. n76 Furthermore, if the registrant has been involved in bankruptcy proceedings during the preceding five years, the registrant must indicate whether it has filed all documents and reports required to be filed by Sections 12, 13, or 15(d) of the Exchange Act subsequent to the distribution of securities under a plan confirmed by a court. The registrant is also required to list any annual report to security holders, proxy or information statement, or prospectus filed pursuant to Securities Act Rule 424(b) or (c) that is incorporated by reference and the part of the Form 10-K (e.g., Part I, Part II, etc.) into which the document is incorporated.

[c] Part I--Business, Properties, Legal Proceedings, and Submission of Matters to a Vote of Security Holders.

[i] Item 1. Business. Item 1 of Form 10-K requires a description of the registrant's business in accordance with information required by Item 101 of Regulation S-K (17 C.F.R. Part 229); however, the discussion of the development of the business need only include developments since the beginning of the fiscal year for which the Form 10-K is filed. n77

[ii] Item 1A. Risk Factors. This item requires a description under the heading "Risk Factors" of the risk factors described in Item 503(c) of Regulation S-K that are applicable to the registrant. The discussion of risk factors is to be in plain English in accordance with Rule 421(d) of the Securities Act.

[iii] Item 1B. Unresolved Staff Comments. A registrant that is an accelerated filer, a large accelerated filer n78 or a well-known seasoned issuer n79 must disclose the substance of any comments received from the Commission staff not less than 180 days before the end of the registrant's fiscal year that remain unresolved.

[iv] Item 2. Properties. Item 2 of Form 10-K requires a brief description of properties of the registrant, in accordance with the information required by Item 102 of Regulation S-K. n80

[v] Item 3. Legal Proceedings. This item requires a description of legal proceedings in accordance with the information required by Item 103 of Regulation S-K. n81 Item 3 of Form 10-K also requires that information similar to that required by Item 103 of Regulation S-K be furnished as to any legal proceeding terminated during the fourth quarter of the fiscal year covered by the Form 10-K, including the date of termination and a description of the disposition of the proceeding with respect to the registrant and its subsidiaries. n82

[vi] Item 4. Submission of Matters to a Vote of Security Holders. This item requires that if any matter was submitted during the fourth quarter of the fiscal year covered by the Form 10-K to a vote of security holders, through the solicitation of proxies or otherwise, the following information must be furnished, as applicable:

- (1) the date of the meeting and whether the meeting was an annual or special meeting;
- (2) if the meeting involved the election of directors, the name of each director elected at the meeting and the name of each other director whose term of office as a director continued after the meeting, unless: (a) proxies for the meeting were solicited pursuant to Regulation 14A; there was no solicitation in opposition to the management's nominees as listed in the proxy statement; and all of management's nominees were elected; or (b) the registrant did not solicit proxies and the board of directors as previously reported to the Commission was reelected in its entirety, in which event a statement to that effect is required;
- (3) a brief description of each matter voted upon at the meeting and the number of votes cast for, against or withheld, as well as the number of abstentions and broker nonvotes as to each other matter, including a separate tabulation with respect to each nominee for office; n83
- (4) a description of the terms of any settlement between the registrant and any other participant terminating any solicitation subject to Rule 14a-11, including the cost or anticipated cost to the registrant (this information, however, may be presented by referring to proxy soliciting material containing the information that has been previously furnished to security holders). n84

Corresponding information for any solicitation or other vote of security holders not taken at a meeting must also be furnished.

[d] Part II--Market and Financial Data

[i] Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities. This item requires registrants to furnish the information required by Items 201 and 701 of Regulation S-K as to all equity securities of the registrant sold by the registrant during the period covered by the report that were not registered under the Securities Act. n85 If the Item 701 information has been included in a quarterly report on Form 10-Q, or in a current report on Form 8-K, then the registrant does not need to furnish such information. n86 In addition, if required pursuant to Rule 463 of the Securities Act, the registrant must furnish the information relating to use of proceeds required by Item 701(f) of Registration S-K. n87 The registrant must also furnish the information required by Item 703 of Regulation S-K for any repurchase of its equity securities made in a month within the fourth quarter of the fiscal year covered by the report.

[ii] Item 6. Selected Financial Data. In response to this item, the registrant is required to furnish the financial information called for by Item 301 of Regulation S-K. n88

[iii] Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. This item requires the registrant to furnish the information required by Item 303 of Regulation S-K. n89

[iv] Item 7A. Quantitative and Qualitative Disclosures About Market Risk. This item requires the registrant to furnish the information required by Item 305 of Regulation S-K. n90

[v] Item 8. Financial Statements and Supplementary Data. This item requires the registrant to file financial statements meeting the requirements of Regulation S-X n91 and the supplementary financial information required by Item 302 of Regulation S-K. n92 In addition, financial statements of the registrant and its subsidiaries consolidated, as required by Rule 14a-3(b) governing the annual report to security holders, are filed in response to Item 8 of Form 10-K.

The General Instructions as to Financial Statements in Article 3 of Regulation S-X require audited balance sheets to be filed with the Form 10-K for the registrant and its subsidiaries on a consolidated basis as of the end of each of the two most recent fiscal years. n93 Consolidated, audited statements of income and changes in financial position must be filed

for the registrant and its subsidiaries with the Form 10-K for each of the three fiscal years preceding the date of the most recent audited balance sheet being filed. n94 The same requirement applies to audited statements of income and changes in financial position of the registrant and its predecessors. n95 If, however, the registrant qualifies as a "smaller reporting company," then pursuant to Article 8 of Regulation S-K, the registrant is required to file an audited balance sheet as of the end of each of the most recent two fiscal years and audited statements of income, cash flows and changes in stockholders' equity for each of the two fiscal years preceding the date of the most recent audited balance sheet. n96

[vi] Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure. This item requires the registrant to furnish the information required by Item 304(b) of Regulation S-K. n97

[vii] Item 9A. Controls and Procedures. Item 9A of Form 10-K requires the registrant to furnish the information required by Items 307 and 308 of Regulation S-K. n98

[viii] Item 9B. Other Information. Item 9B of Form 10-K requires the registrant to disclose any information required to be disclosed in a report on Form 8-K during the fourth quarter of the year covered by the Form 10-K, but not reported, whether or not otherwise required by the Form 10-K. If disclosure of such information is made under Item 9B, the information need not be repeated in a report on Form 8-K which would otherwise be required to be filed with respect to such information or in a subsequent report on Form 10-K. n99

[e] Part III--Traditional Proxy Disclosure Information

[i] Item 10. Directors, Executive Officers and Corporate Governance. Item 10 discloses the description of directors and executive officers of the registrant, details regarding the filing of Forms 3, 4 and 5 and certain corporate governance information, as required under Items 401, 405, 406, and 407(c)(3), (d)(4) and (d)(5) of Regulation S-K. The corporate governance disclosure includes (i) the description of any material changes to the procedures by which security holders recommend nominees; (ii) information regarding the registrant's audit committee and audit committee financial expert; and (iii) details of the registrant's code of ethics, including an explanation for the absence thereof, if applicable. The registrant is permitted to incorporate this information by reference to its proxy statement. n100

[ii] Item 11. Executive Compensation. Item 11 discloses all remuneration of named executive officers as well as certain information regarding the registrant's compensation committee (or equivalent), as required by Item 402 and Item 407(e)(4) and (e)(5) of Regulation S-K. Substantial amendments were made to Item 402 and other executive compensation and related person disclosure rules in 2006. n101 Item 11 now includes a Compensation Discussion and Analysis section that holistically discusses compensation practices. Item 11 also includes, under the caption "Compensation Committee Interlocks and Insider Participation," relevant relationships involving compensation committee members. Under the caption "Compensation Committee Report," the compensation committee (or equivalent) must state whether it has reviewed and discussed the Compensation Discussion and Analysis (as required by Item 402(b) of Regulation S-K) with management and, based upon review and discussions, whether or not the compensation committee recommended to the board of directors that the Compensation Discussion and Analysis be included in the registrant's annual report on Form 10-K. The names of the compensation committee (or equivalent) members must appear below this disclosure. The registrant is permitted to incorporate this information by reference to its proxy statement. n102

[iii] Item 12. Security Ownership of Certain Beneficial Owners and Management. This Item requires the registrant to furnish the information required by Items 201(d) and 403 of Regulation S-K. n103 The registrant is permitted to incorporate this information by reference to its proxy statement. n104

[iv] Item 13. Certain Relationships and Related Transactions, and Director Independence. Item 13 requires the registrant to furnish information regarding related person transactions and director independence, as required by Item 404 and Item 407(a) of Regulation S-K. The registrant is permitted to incorporate this information by reference to its proxy statement. n105

[v] Item 14. Principal Accountant Fees and Services. This Item requires the registrant to furnish the information required by Item 9(e) of Schedule 14A. The registrant is permitted to incorporate this information by reference to its proxy statement. n106 See General Instruction G to Form 10-K. The ability to incorporate by reference is discussed in § 4.02[1] supra.

[f] Part IV -- Item 15. Exhibits and Financial Statement Schedules. All financial statements, the financial statement schedules n107 required to be filed by Item 8 of Form 10-K, n108 and the exhibits required to be filed by Item 601 of Regulation S-K n109 must be listed in response to paragraph (a) of Item 15 of Form 10-K. n110

The exhibits required by Item 601, "Exhibits," of Regulation S-K must be filed in response to paragraph (b) of Item 15. In addition, the list of such exhibits must identify each management contract, compensatory plan, or arrangement required to be filed as an exhibit. n111

Registrants must also file, as financial statements schedules to Form 10-K, the financial statements required by Regulation S-X that are excluded from the annual report to stockholders by Rule 14a-3(b), n112 including separate financial statements of:

- subsidiaries not consolidated and fifty percent or less owned persons;
- affiliates whose securities are pledged as collateral; and
- schedules. n113

[g] Certification Requirements. To assure that the most senior officers of public companies are actively involved in the process of preparing periodic reports n114 filed with the Commission and maintain an awareness of their accountability for these reports, the Sarbanes-Oxley Act added two separate certification requirements for periodic reports filed by public companies. Section 906 of the Sarbanes-Oxley Act requires that each periodic report containing financial statements filed with the Commission be accompanied by a certification of the chief executive officer and chief financial officer (or equivalent officers) that the periodic report fully complies with the requirements of Section 13(a) or 15(d) of the Exchange Act and that the information contained in the report fairly presents, in all material respects, the financial condition and results of operations of the company. The Section 906 certification requirement carries criminal penalties for "knowingly" or "willfully" making false certifications. n115

The second certification requirement of the Sarbanes-Oxley Act (the Section 302 Certification) requires the principal executive officer and the principal financial officer to make a more comprehensive certification in n116 each annual or quarterly report filed with the Commission. The Section 302 Certification, which appears as Exhibit 31 of Item 601 of Regulation S-K, requires each of these officers to certify that he or she has reviewed the report and, based on the officer's knowledge, does not contain any untrue statement of material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by the report and that the financial statements and other financial information included in the report fairly present n117 in all material respects the financial condition, results of operations and cash flows of the company as of, and for, the periods presented in the report. In addition, the officers must make representations regarding the adequacy of the company's disclosure controls and procedures and its disclosure of deficiencies in internal controls and certain instances of fraud to the audit committee of its board of directors. Finally, the officers must indicate whether there were significant changes in internal controls subsequent to the recent evaluation and any corrective actions.

In connection with its adoption of the rules requiring this certification, the Commission also adopted Rules 13a-15 and 15d-15, which require reporting companies to establish and maintain disclosure controls and procedures and internal control over financial reporting that are adequate to meet the company's reporting obligations under the Exchange Act. These rules are intended to complement existing requirements for reporting companies to establish and maintain

systems of internal controls with respect to their financial reporting obligations.

[h] Supplemental Information by Registrants Subject to Section 15(d). Every registrant that files an annual report on Form 10-K pursuant to Section 15(d), that does not otherwise have securities registered pursuant to Section 12, must furnish to the Commission, at the time of filing its annual report, four copies of:

- any annual report to security holders covering the registrant's last fiscal year; and
- every proxy statement, form of proxy or other proxy soliciting material concerning any annual or other meeting of security holders, that is sent to more than ten of the registrant's security holders. The registrant need not furnish this information, however, to the extent that the information is specifically incorporated into the Form 10-K by reference. n118

If the registrant has not sent an annual report or proxy material to security holders, a statement to that effect must be included under the supplemental information caption. If after the filing of the annual report on the Form 10-K the annual report or proxy material is to be furnished to security holders, the registrant must so state under the supplemental information caption and must furnish copies of that material to the Commission when it is sent to security holders.

The foregoing supplemental material required by the Form 10-K to be furnished to the Commission is not deemed "filed" with the Commission or otherwise subject to the liabilities of Exchange Act Section 18, except to the extent that the registrant specifically incorporates it in its annual report on Form 10-K by reference.

The "Supplemental Information" requirement of Form 10-K was amended as part of the Commission's integrated disclosure amendments to make it clear that all materials furnished to the Commission by incorporation by reference into the Form 10-K need not be supplied again in the Form 10-K. n119

[2] Form 10-Q--Quarterly Report Under Section 13 or 15(d)

Issuers subject to Section 13 or 15(d) of the Exchange Act are, with certain exceptions, required to file a quarterly report on Form 10-Q for each of the first three fiscal quarters of each fiscal year of the issuer, commencing with the first fiscal quarter ending after the relevant registration. n120 For most filers, a report on Form 10-Q must be filed with the Commission within forty-five days after the end of each of the first three fiscal quarters of the year; n121 none is filed for the fourth quarter. n122 The filing deadline is shortened for certain companies from forty-five days after a registrant's quarter end to forty days for certain registrants designated as "large accelerated filers" and "accelerated filers." n123

Form 10-Q n124 is part of the integrated disclosure requirements of the Securities Act and the Exchange Act. Under this integrated disclosure system, registrants may incorporate their informal annual and quarterly reports to stockholders to satisfy the reporting requirements of the Exchange Act to the extent that the informal reports contain the information required to be filed. n125

The structure of Form 10-Q is divided into two parts. Part I requires disclosure of financial statements, management's discussion and analysis of financial condition and results of operations, certain quantitative and qualitative disclosures about market risk, and disclosure controls and procedures. Part II contains six items. However, if substantially the same information has been previously reported n126 by the registrant, an additional report of information on Form 10-Q need not be made. If information called for in Part II has already been disclosed in the financial information provided in Part I, that information need not be presented again in Part II if it is incorporated by reference into Part II by a statement specifically identifying the incorporated information.

[a] General Filing Instructions. Issuers should refer to the provisions of Regulation S-T for documents required

to be filed in electronic format. n127 Issuers reporting on Form 10-Q should also be familiar with Regulation 12B, which contains general requirements for such matters as the kind and size of paper to be used, the legibility of the report, the information to be given whenever the title of securities is required to be stated, and the filing of the report, although many of its provisions are no longer applicable under EDGAR with electronic filer. The definitions contained in Rule 12b-2 n128 should be especially noted. n129

If not filed electronically, pursuant to a hardship exemption from electronic filing, three complete copies of the report, including any financial statements, exhibits or other papers or documents filed as a part of the report, and five additional copies that need not include exhibits, must be filed with the Commission. n130 In addition, at least one completed copy of the report, including any financial statements, exhibits or other papers or documents filed as part of the report, must be filed on each exchange on which any class of securities of the registrant is registered. n131 Forms filed electronically are not required to be separately delivered to The Nasdaq Stock Market or the New York Stock Exchange.

Electronic filers must retain a manually signed original for five years. n132 In addition, the Form 10-Q must be accompanied by the required certifications. n133 For paper filers, at least one of the complete copies that is filed with the Commission and each exchange must be manually signed on the registrant's behalf by a duly authorized officer of the registrant and by the principal financial or chief accounting officer of the registrant. Copies not manually signed must bear typed or printed signatures. Duplicated or facsimile signatures are permitted if the original is retained for five years.

The information contained in Items 1, 2 and 3 of Part I of Form 10-Q, whether included directly on Form 10-Q or incorporated by reference from a report, document, or statement filed as an exhibit to Part I, included in integrated reports to security holders, or contained in a statement regarding computation of per share earnings or a letter regarding a change in accounting principles filed as an exhibit to Part I pursuant to Item 601 of Regulation S-K, n134 is not deemed filed for the purpose of, or subject to the liabilities of Exchange Act Section 18. However, information presented in satisfaction of the requirements of this form other than those of Items 1, 2 and 3 of Part I are deemed filed for the purpose of Section 18 of the Act; except that, where information presented in response to Item 1 or 2 of Part I (or as an exhibit thereto) is also used to satisfy Part II requirements through incorporation by reference, only that portion of Part I (or exhibit thereto) consisting of the information required by Part II is deemed so filed. n135

The registrant may be able to furnish abbreviated narrative disclosure if, on the date of filing its Form 10-Q:

- all of the registrant's equity securities are owned, either directly or indirectly, by a single person that is a reporting company that has filed all the material required to be filed under Section 13, 14, or 15(d), as applicable;
- neither the registrant nor its subsidiaries, during the preceding thirty-six calendar months and any subsequent period of days, has been in material default in the payment of principal, interest, a sinking or purchase fund installment, or any other material default not cured within thirty days with respect to any indebtedness or has been in any material default in the payment of rentals under material long-term leases; and
- on the cover page of the Form 10-Q the registrant prominently sets forth a statement that it meets the conditions set forth above and that it is therefore filing the Form 10-Q with the reduced disclosure format. n136

This reduced disclosure format for certain wholly-owned subsidiaries permits the registrant to omit the information called for by Item 2 of Part I, Management's Discussion and Analysis of Financial Condition and Results of Operations, as long as the registrant includes a management's narrative analysis of the results of operations that explains the reasons for material changes in the amount of revenue and expense items between the most recent fiscal year-to-date period

presented and the corresponding year-to-date period in the preceding fiscal year. n137 The analysis should also include an explanation of any material effect that changes in accounting principles and practices or method of application has on net income as reported. n138

Registrants qualified to file under the reduced disclosure format may also omit the information called for by Item 3 of Part I, Quantitative and Qualitative Disclosures About Market Risk and in Part II, Item 2, Changes in Securities; Item 3, Defaults Upon Senior Securities; and Item 4, Submission of Matters to a Vote of Security Holders. n139

[b] Facing Sheet. The facing sheet of Form 10-Q requires a statement of the quarter for which it is being filed, the registrant's Commission file number, the registrant's name, the address of its principal executive offices, including zip code, and its telephone number, including area code (and its former name, former address, and former fiscal year, if changed since the registrant's last report), I.R.S. employer identification number, and the state or other jurisdiction of organization. The registrant must indicate whether it has or filed all required reports under Section 13 or 15(d) of the Exchange Act during the past twelve months and whether it has been subject to those requirements for the past ninety days. The registrant must also indicate whether it is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company as defined in Rule 12b-2 of the Exchange Act. The registrant must indicate if it is a shell company as defined in Rule 12b-2 of the Exchange Act. If the registrant has been involved in bankruptcy proceedings during the preceding five years, the registrant must indicate whether it has filed all documents and reports required to be filed by Sections 12, 13, or 15(d) of the Exchange Act subsequent to the distribution of securities under a plan confirmed by a court. n140 The facing page must also indicate (by checking one of two boxes) whether the report is the normal quarterly report required to be filed under Section 13 or 15(d) or whether the report is a "transition report" relating to a change in the registrant's fiscal year or where a successor to the registrant has a different fiscal year. n141 The number of outstanding shares of each class of the registrant's common stock as of the latest practicable date must also be stated. n142 Last, the registrant must indicate (by checking one of two boxes) whether it has submitted electronically and posted on its website every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding twelve months. n143

[c] Part I. Financial Information

[i] Item 1. Financial Statements. Item 1 of Form 10-Q requires the registrant to furnish the information required by Rule 10-01 of Regulation S-X. n144 Rule 10-01 of Regulation S-X contains uniform instructions as to the form and content of interim financial statements and the rules governing the periods to be covered by financial statements in Form 10-Q. n145

Under Rule 10-01, interim financial statements need only be provided as to the registrant and its consolidated subsidiaries and may be unaudited. n146 Registrants may presume that users of the interim financial information have read or have access to the audited financial statements for the preceding fiscal year. n147 Thus, footnote disclosure that would substantially duplicate the disclosure contained in the most recent annual report to security holders or latest audited financial statements, e.g., a statement of significant accounting policies and practices, may be omitted. n148 However, events that have occurred subsequent to the end of the most recently completed fiscal year and that have had a material effect on the registrant must be disclosed. n149

In preparing the interim financial statements, summarized income statement information should be given separately as to each subsidiary not consolidated or fifty percent or less owned persons, or as to each group of such subsidiaries or fifty percent or less owned persons for which separate individual or group statements would otherwise be required for annual periods, as long as the unconsolidated subsidiary or person would be required to file quarterly financial information with the Commission if it were a registrant. n150 In addition, the registrant must include the date of any material accounting change and the reason for making it and any material retroactive prior period adjustment made during any period covered by the interim financial statements together with its effect upon net income -- total and per share -- of any prior period included and upon the balance of retained earnings. n151

Rule 10-01(b) also describes the preparation of interim financial statements:

- if the registrant or any of its consolidated subsidiaries entered into a business combination treated for accounting purposes as a pooling of interests;
- where a material business combination accounted for as a purchase has occurred during the current fiscal year; and
- where the registrant has disposed of any significant segment of its business during any of the periods covered by the interim financial statements. n152

Under Rule 10-01(c) the following interim financial statements must be filed on Form 10-Q:

- an interim balance sheet as of the end of the most recent fiscal quarter and a balance sheet as of the end of the preceding fiscal year;
- interim statements of income for the most recent fiscal quarter, for the period between the end of the preceding fiscal year and the end of the most recent fiscal quarter, and for the corresponding periods of the preceding fiscal year; and
- interim statements of cash flows for the period between the end of the preceding fiscal year and the end of the most recent fiscal quarter, and for the corresponding preceding period. n153

The interim financial information included in filings must be reviewed by an independent public accountant and the procedures for conducting such reviews must be in compliance with generally accepted auditing standards. n154

Upon the informal written request of the registrant, the Commission may permit the omission of any interim financial information required or the filing in substitution thereof of appropriate information of corporate character, if permitting such omission is consistent with the protection of investors. n155 The Commission may also require, by informal written notice, the filing of other information in addition to, or in substitution for, the information required. n156

[ii] Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations. This item requires the registrant to furnish the information required by Item 303 of Regulation S-K. n157

[iii] Item 3. Quantitative and Qualitative Disclosures About Market Risk. This item requires the registrant to furnish the information required by Item 305 of Regulation S-K. n158

[iv] Item 4. Controls and Procedures. This item requires the registrant to furnish the information required by Item 307 of Regulation S-K and Item 308(c) of Regulation S-K. n159

[d] Part II--Other Information

[i] Item 1. Legal Proceedings. Item 1 of Form 10-Q, Part I requires registrants to include the information required by Item 103 of Regulation S-K regarding legal proceedings. n160 In addition, similar information must be provided concerning proceedings that have been terminated during the period covered by the report, including the date of termination and a description of the disposition thereof with respect to the registrant and its subsidiaries. A legal proceeding, however, need only be reported on the Form 10-Q filed for the quarter in which it first became a reportable event and in subsequent quarters in which there have been material developments. n161

[ii] Item 1A. Risk Factors. The registrant is required to update the risk factor disclosure made in its Form 10-K, as

required by Item 503(c) of Regulation S-K, to reflect any material changes. Smaller reporting companies are not required to provide the information required by this item. n162

[iii] Item 2. Unregistered Sales of Equity Securities and Use of Proceeds. This item requires a brief statement of the general effect of any material modification of the constituent instruments defining the rights of the holders of any class of registered securities.

Pursuant to Item 2(a), the registrant must provide the information required by Item 701 of Regulation S-K as to all equity securities of the registrant sold by the registrant during the period covered by the report that were not registered under the Securities Act. n163 In addition, Item 2(b) provides that if required pursuant to Rule 463 of the Securities Act, the registrant must furnish the information regarding use of proceeds required by Item 701(f) of Regulation S-K. n164 Under Item 2(c), the registrant must furnish the information required by Item 703 of Regulation S-K for any repurchase made in the quarter covered by the report. Disclosures must be provided covering repurchases made on a monthly basis. For example, if the quarter began on January 16 and ended on April 15, the registrant would include a chart disclosing repurchases for the months from January 16 through February 15, February 16 through March 15, and March 16 through April 15. n165

[iv] Item 3. Defaults Upon Senior Securities. Item 3(a) applies to any material default in payment of principal, interest, a sinking or purchase fund installment, or any other material default not cured within thirty days if the amount of the default exceeds five percent of the total assets of the registrant and its consolidated subsidiaries, in which case the indebtedness must be identified and the nature of the default stated. The amount of the default and the total arrearage on the date the quarterly report is filed must be stated in the case of a default in the payment of principal, interest, or a sinking or purchase fund installment. Item 3(a), however, only refers to events that have become defaults under the governing instruments, *i.e.*, after the expiration of any period of grace and compliance with any notice requirements. n166

Item 3(b) requires disclosure of the title of the class and nature of the arrearage or delinquency if there is a material arrearage in the payment of dividends or any other material delinquency not cured within thirty days with respect to any registered class of preferred stock of the registrant, any class of preferred stock of the registrant that ranks prior to any class of registered securities, or any class of preferred stock of any significant subsidiary of the registrant. In the case of an arrearage in the payment of dividends, the amount and the total arrearage as of the date of filing of the report must be stated.

Item 3 need not be answered, however, concerning any default or arrearage with respect to any class of securities all of which is held by, or for the account of, the registrant or its totally held subsidiaries. n167 Moreover, the information required by Item 3 need not be made if previously disclosed on a report on Form 8-K. n168

[v] Item 4. Submission of Matters to a Vote of Security Holders. This item applies to any matter submitted to a vote of security holders, by proxy or otherwise, and requires the registrant to furnish information as to:

- the date of the meeting and whether it was an annual or special meeting;
- if there was an election of directors at the meeting, the name of (a) each director elected and (b) each other director whose term of office as a director continued after the meeting; n169
- a brief description of each other matter voted upon at the meeting with the number of votes cast for, against, or withheld, as well as the number of abstentions or broker non-votes, as to each matter, including a separate tabulation with respect to each nominee for office; n170 and
- a description of the settlement terms between the registrant and any other participant n171

terminating any solicitation subject to Rule 14a-11, including the anticipated cost to the registrant. n172

[vi] Item 5. Other Information. This item allows the registrant to report, any information required to be disclosed but not previously reported on Form 8-K during the period covered by this Form 10-Q whether or not otherwise called for by Form 10-Q. n173

The registrant must also disclose any material changes to the procedures by which security holders may recommend nominees to the registrant's board of directors, as required by Item 407(c)(3) of Regulation S-K.

[vii] Item 6. Exhibits. This item requires the registrant to furnish the exhibits in accordance with the provisions of Item 601 of Regulation S-K. n174

[3] Form 8-K--Current Report Pursuant to Section 13 or 15(d)

[a] General Filing Instructions n175 With certain exceptions, n176 every issuer subject to Sections 13 and 15(d) of the Exchange Act must file a current report on Form 8-K upon the occurrence of certain events. n177 The Commission substantially amended Form 8-K in 1977. n178 In addition, in 2004 the Commission substantially expanded Form 8-K by adding eight new items to Form 8-K, transferring two items from the periodic reports, expanding disclosures under two existing Form 8-K items, reorganizing the Form 8-K items into topical categories and shortening the Form 8-K filing deadline for most items to four business days. n179 By checking the appropriate box at the front of Form 8-K the registrant may indicate an intention to simultaneously satisfy its filing obligation pursuant to Rule 425 under the Securities Act, n180 Rule 14a-12(b) under the Exchange Act n181 or Rule 14d-2(b) under the Exchange Act. n182 In March 2004, the Commission adopted a limited safe harbor from liability under Section 10(b) of the Exchange Act and *Rule 10b-5* thereunder for failure to timely file reports required by Form 8-K Items 1.01, 1.02, 2.03, 2.04, 2.05, 2.06 and 4.02(a). The safe harbor applies until the filing due date of the registrant's quarterly or annual report for the period in question. Effective November 7, 2006, the Commission made further amendments regarding executive compensation, augmenting disclosure requirements and rearranging disclosure items so that Item 5.02 would encompass all executive compensation disclosure. A plain English requirement was also added. n183 The limited safe harbor for failure to make timely reports was also extended to cover new Item 5.02(e). n184

Unless otherwise specified, a report is to be filed or furnished within four business days after the occurrence of any one or more of the events specified in Sections 1-6 and 9 of Form 8-K. Since reports under Item 8.01 ("Other Events") are optional, there is no specific filing period required. However, registrants furnishing reports under Item 7.01 ("Regulation FD Disclosure") or electing to file a report on Form 8-K under item 8.01 solely to satisfy its obligations under Regulation FD n185 Rules 100 and 101, must furnish such reports in accordance with Regulation FD disclosure requirements. n186 Moreover, if substantially the same information has been previously reported n187 by the registrant, an additional report of the information on Form 8-K need not be made. n188 Copies of documents or instruments required to be filed pursuant to Form 8-K are not required to be filed or furnished as exhibits to the Form 8-K unless specifically required to be filed or furnished by the applicable Item. n189 For reports not filed electronically, a total of eight complete copies of Form 8-K must be filed with the Commission, five of which need not include exhibits. In addition, at least one complete copy must be filed with each exchange on which any class of securities of the registrant is registered. n190 The Nasdaq Stock Market and the New York Stock Exchange do not require copies of reports filed electronically.

[b] Section 1. Registrant's Business and Operations

Item 1.01 Entry into a Material Definitive Agreement. Item 1.01(a) requires the disclosure of the following, where the registrant has entered into a material definitive agreement not in the ordinary course of business of the registrant, n191 or into any amendment of such agreement that is material to the registrant: n192

- the date on which the agreement was entered into or amended, the identity of the parties to the

agreement or amendment and a brief description of any other material relationship between the registrant or its affiliates and any of the parties; and

- a brief description of the terms and conditions of the agreement or amendment that are material to the registrant.

Item 1.02 Termination of a Material Definitive Agreement. Item 1.02(a) requires the disclosure of the following, where a material definitive agreement n193 which was not made in the ordinary course of business of the registrant and to which the registrant is a party is terminated otherwise than by expiration of the agreement on its stated termination date, or as a result of all parties completing their obligations under such agreement, and such termination of the agreement is material to the registrant: n194

- the date of the termination of the material definitive agreement, the identity of the parties to the agreement or amendment and a brief description of any other material relationship between the registrant or its affiliates and any of the parties;
- a brief description of the terms and conditions of the agreement that are material to the registrant;
- a brief description of the material circumstances surrounding the termination; and
- any material early termination penalties incurred by the registrant.

Item 1.03 Bankruptcy or Receivership. n195 Item 1.03(a) requires the disclosure of the following, where a receiver, fiscal agent or similar officer has been appointed for a registrant or its parent, in a proceeding under the Bankruptcy Act or in any other proceeding under state or federal law in which a court or governmental authority has assumed jurisdiction over substantially all of the assets or business of the registrant or its parent, or where existing directors and officers are subject to the supervision and orders of a court or governmental authority:

- the name or other identification of the proceeding;
- the identity of the court or governmental authority;
- the date that jurisdiction was assumed; and
- the identity of the receiver, fiscal agent or similar officer and the date of his or her appointment.

Item 1.03(b) n196 requires the disclosure of the following, where the court or governmental authority holding jurisdiction has entered an order confirming a plan of reorganization, arrangement or liquidation:

- the identity of the court or governmental authority;
- the date that the order confirming the plan was entered by the court or governmental authority;
- a summary of the material features of the plan and pursuant to Item 9.01 ("Financial Statements and Exhibits") a copy of the plan as confirmed;
- the number of shares or other units of the registrant or its parent issued and outstanding, the number reserved for future issuance in respect of claims and interests filed and allowed under the plan, and the aggregate total of such numbers; and

- information as to the assets and liabilities of the registrant or its parent as of the date that the order confirming the plan was entered, or a date as close thereto as practicable.

[c] Section 2. Financial Information

Item 2.01 Completion of Acquisition or Disposition of Assets. n197 Item 2.01 requires the disclosure of the following, where the registrant or any of its majority owned subsidiaries has completed the acquisition or disposition n198 of a significant amount of assets n199 other than in the ordinary course of business:

- the date of the completion of the transaction;
- a brief description of the assets involved;
- the identity of the person(s) from whom the assets were acquired or to whom they were sold and the nature of any other material relationship between the parties or any of the registrant's affiliates, directors, officers or any associate of any such director or officer;
- the nature and amount of the consideration given or received for the assets and, if any material relationship is disclosed, the formula or principle followed in determining the amount of such consideration; and
- if the transaction is an acquisition and if a material relationship exists between the registrant or any of its affiliates and the source(s) of the funds used in the acquisition, disclose, the source(s) of the funds used unless all or any part of the consideration used is a loan made in the ordinary course of a business by a bank as defined by Section 3(a)(6) of the Act, in which case the identity of such bank may be omitted if the registrant has made a confidentiality request n200 and states in the report that the identity of the bank has been omitted and filed separately with the Commission.

Item 2.02 Results of Operations and Financial Condition. The following information must be furnished if the registrant, or any person acting on its behalf, makes any public announcement or release (including updates) disclosing material non-public information regarding the registrant's results of operations or financial condition for a completed quarterly or annual fiscal period: n201

- the date of the announcement or release; and
- a brief identification of the announcement and the text of that announcement or release as an exhibit.

No disclosure is required for oral, telephonic, webcast or broadcast communications (or similar means) if:

- the information is part of a presentation that is complementary to, and initially occurs within 48 hours after, a related, written announcement or release that has been furnished on Form 8-K pursuant to Item 2.02 prior to the presentation;
- the presentation is broadly accessible to the public by dial-in conference call, by webcast, by broadcast or by similar means;
- the financial and other statistical information contained in the presentation is provided on the registrant's website together with any information that would be required under 17 C.F.R. § 244.100 of Regulation G; n202 and

- the presentation was announced by a widely disseminated press release, that included instructions as to when and how to access the presentation and the location on the registrant's web site where the information would be available.

Item 2.03 Creation of a Direct Financial Obligation or an Obligation Under an Off-Balance Sheet Arrangement of a Registrant. n203 The following information must be furnished if the registrant becomes obligated on a direct financial obligation that is material to the registrant: n204

- the date on which the obligation is created and a brief description of the transaction or agreement creating the obligation;
- the amount and terms of the obligation and its payment, the material terms, if any, that may accelerate or increase the obligation and any recourse provisions that would enable the registrant to recover from third parties;
- any other material terms and conditions.

The following information must be furnished if the registrant becomes directly or contingently liable for an obligation that is material to the registrant arising out of an off-balance sheet arrangement:

- the date on which the registrant becomes liable and a brief description of the underlying transaction or agreement;
- the nature and amount of the obligation, including the material terms, if any, whereby it may become a direct obligation, or may be accelerated or increased, and any recourse provisions that would enable the registrant to recover from third parties;
- the maximum potential amount of future payments (undiscounted) that the registrant may be required to make, if different (2.03(b)(3)); n205 and
- any other material terms or conditions.

Item 2.04 Triggering Events That Accelerate or Increase a Direct Financial Obligation or an Obligation Under an Off-Balance Sheet Arrangement. n206 Item 2.04(a) requires the disclosure of the following, where a triggering event causing the increase or acceleration of a direct financial obligation of the registrant occurs and the consequences are material to the registrant:

- the date of the triggering event and a brief description of the underlying agreement or transaction;
- a brief description of the triggering event;
- the nature and amount of the direct financial obligation, as increased if applicable, and the applicable terms of payment or acceleration; and
- any other material obligation that may arise, increase, be accelerated, or become direct financial obligations as a result of the triggering event or the increase or acceleration of the obligation.

Item 2.04(b) requires the disclosure of the following, where a triggering event causing the increase or acceleration of a direct financial obligation of the registrant under an off-balance sheet arrangement occurs and the consequences are material to the registrant:

- the date of the triggering event and a brief description of the underlying agreement or transaction;
- a brief description of the triggering event;
- the amount of the direct financial obligation, as increased if applicable, and the applicable terms of payment or acceleration; and
- any other material obligation that may arise, increase, be accelerated, or become direct financial obligations as a result of the triggering event or the increase or acceleration of the off-balance sheet obligation or its becoming a direct financial obligation.

Item 2.05 Costs Associated With Exit or Disposal Activities. Item 2.05 requires the disclosure of the following, where the registrant's board of directors, a committee of the board of directors or the officer or officers of the registrant authorized to take such action, commits the registrant to an exit or disposal plan, or otherwise disposes of a long-lived asset or terminates employees under a plan of termination (paragraph 8 of FASB Statement of Financial Accounting Standards No. 146 *Accounting for Costs Associated with Exit or Disposal Activities* (SFAS No. 146)), under which material charges will be incurred under applicable generally accepted accounting principles:

- the date and description of the commitment, including the facts and circumstances leading to the expected action, and the expected completion date;
- for each major type of cost associated with the course of action, an estimate of the total amount or range of amounts expected to be incurred in connection with the action (2.05(b));
- an estimate of the total amount or range of amounts expected to be incurred in connection with the action (2.05(c)); and
- the registrant's estimate of the amount or range of amounts of the charge that will result in future cash expenditures, provided, however, that if the registrant determines that at the time of the filing it is unable in good faith to determine an estimate required by (b), (c) or (d) of Item 2.05, no disclosure of such estimate shall be required; however, the registrant must file an amended report on Form 8-K under Item 2.05 within four business days after it makes a determination of such estimate or range of estimates (2.05(d)).

Item 2.06 Material Impairments. The following information must be furnished if the registrant's board of directors, a committee of the board of directors or the officer or officers of the registrant authorized to take such action, concludes that a material charge for impairment to one or more of its assets, including, without limitation, impairments of securities or goodwill, is required under applicable generally accepted accounting principles: n207

- the date of the conclusion and a description of the impaired asset(s) and the facts and circumstances leading to the conclusions that the charge is required (2.06(a));
- the registrant's estimate of the amount or range of amounts of the impairment charge (2.06(b)); and
- the registrant's estimate of the amount or range of amounts of the impairment charge that will result in future cash expenditures, provided, however, that if the registrant determines that at the time of filing it is unable in good faith to make a determination of an estimate required by paragraphs (b) or (c) of Item 2.06, no disclosure of such estimate is required; however, the registrant must file an amended report on Form 8-K under item 2.06 within four business days after it makes a determination of such estimate(s)

(2.06(c)).

[d] Section 3. Securities and Trading Markets

Item 3.01 Notice of Delisting or Failure To Satisfy a Continued Listing Rule or Standard; Transfer of Listing.

n208 The following information must be furnished if the registrant has received notice from the national securities exchange or national securities association (or a facility thereof) that maintains the principal listing of any class of the registrant's common equity (as defined by 17 C.F.R. § 240.12b-2) that the registrant or such class of the registrant's securities does not satisfy a rule or standard for continued listing on the exchange or association, that the exchange has submitted an application under 17 C.F.R. § 240.12d2-2 to the Commission to delist such class of registrant's securities, or that the association has taken all necessary steps under its rules to delist the security from its automated inter-dealer quotation system (3.01(a)): n209

- the date that the registrant received notice;
- the rule or standard for continued listing on the national securities exchange or association that the registrant fails, or has failed to, satisfy; and
- any action or response that, at the time of filing, the registrant has determined to take in response to the notice.

The following information must be furnished if the registrant has notified the national securities exchange or national securities association (or a facility thereof) that maintains the principal listing for any class of the registrant's common equity (as defined in 17 C.F.R. § 240.12b-2) that the registrant is aware of any material noncompliance with a rule or standard for continued listing on the exchange or association (3.01(b)):

- the date that the registrant provided such notice;
- the applicable rule or standard for continued listing on the exchange or association; and
- any action or response that, at the time of filing, the registrant has determined to take regarding its noncompliance.

If the national securities exchange or national securities association (or a facility thereof) that maintains the principal listing for any class of the registrant's common equity (as defined in 17 C.F.R. § 240.12b-2), in lieu of suspending trading in or delisting such class of registrant's securities, issues a public reprimand letter or similar communication, the registrant must state the date, and summarize the contents of the letter or communication (3.01(c)).

If the registrant's board of directors, a committee of the board of directors or the officer or officers of the registrant authorized to take such action, has taken a definitive action to cause the listing of a class of its common equity to be withdrawn from the national securities exchange or terminated from the automated inter-dealer quotation system of a registered national association, where such exchange or association maintains the principal listing for such class of securities, including by reason of a transfer of the listing or quotation to another securities exchange or quotation system, the registrant must describe the action taken and state the date of the action.

Item 3.02 Unregistered Sales of Equity Securities. If the registrant sells equity securities in a transaction that is not registered under the Securities Act, the registrant must furnish the information set forth in paragraphs (a) and (c) through (e) of Item 701 of Regulation S-K (17 C.F.R. § 229.701(a) and (c) through (e)). n210

Disclosure is not mandatory under Item 3.02 if the equity securities sold, in the aggregate since its last report filed under

Item 3.01 or its last periodic report (whichever is more recent), constitute less than 1% of the number of shares outstanding n211 of the class of equity securities sold. For smaller reporting companies, n212 no report is required if the equity securities sold, in the aggregate since its last report filed under Item 3.01 or its last periodic report (whichever is more recent), constitute less than 5% of the number of shares outstanding of the class of equity securities sold.

Item 3.03 Material Modification to Rights of Security Holders. n213 The following information must be disclosed if the constituent instruments, defining the rights of the holders of any class of registered securities of the registrant have been materially modified:

- the date of the modification;
- the title of the class of securities involved; and
- a brief description of the general effect of such modification upon the rights of holders of such securities.

The following information must be disclosed if the rights evidenced by any class of registered securities have been materially limited or qualified by the issuance or modification of any other class of securities by the registrant:

- the date of the issuance or modification; and
- the general effect of the issuance or modification of such other class of securities upon the rights of the holders of the registered securities.

[e] Section 4. Matters Related to Accountants and Financial Statements

Item 4.01 Changes in Registrant's Certifying Accountant. If an independent accountant who was previously engaged as the principal accountant to audit the registrant's financial statements, or an independent accountant upon whom the principal accountant expressed reliance in its report regarding a significant subsidiary, resigns or indicates that it declines to stand for re-appointment or is dismissed, the registrant must disclose the information required by Regulation S-K n214 under 17 C.F.R. § 229.304(a)(1) and (a)(3).

If a new independent accountant has been engaged as either the principal accountant to audit the registrant's financial statements or as an independent accountant on whom the principal accountant is expected to express reliance in its report regarding a significant subsidiary, the registrant must disclose the information required by Regulation S-K under 17 C.F.R. § 229.304(a)(2). n215

Item 4.02 Non-Reliance on Previously Issued Financial Statements or a Related Audit Report or Completed Interim Review. Item 4.02(a) requires the disclosure of the following, where the registrant's board of directors, a committee of the board of directors or the officer or officers of the registrant authorized to take such action, concludes that any previously issued financial statements, covering one or more years or interim periods for which the registrant is required to provide financial statements under Regulation S-X (17 C.F.R. part 210), n216 should no longer be relied upon because of an error in such financial statements as addressed in Accounting Principles Board Opinion No. 20, as may be modified, supplemented or succeeded:

- the date of the conclusion regarding the non-reliance and an identification of the financial statements and years or periods covered that should no longer be relied upon;
- a brief description of the facts underlying the conclusion to the extent known to the registrant; and

1-4 Federal Securities Exchange Act of 1934 § 4.02

- a statement of whether the audit committee, or the board of directors in the absence of an audit committee, or authorized officer or officers, discussed with the registrant's independent accountant the matters disclosed in the filing pursuant to Item 4.02(a).

Item 4.02(b) requires the disclosure of the following, where the registrant is advised by, or receives notice from, its independent accountant that disclosure should be made or action should be taken to prevent future reliance on a previously issued audit report or completed interim review related to previously issued financial statements:

- the date on which the registrant was so advised or notified;
- identification of the financial statements that should no longer be relied upon;
- a brief description of the information provided by the accountant; and
- a statement of whether the audit committee, or the board of directors in the absence of an audit committee, or authorized officer or officers, discussed with the registrant's independent accountant the matters disclosed in the filing pursuant to Item 4.02(b).

Item 4.02(c) requires the following actions, where the registrant receives advisement or notice from its independent accountant requiring disclosure under paragraph (b) of Item 4.02:

- provide the independent accountant with a copy of the disclosures it is making in response to this Item 4.02 no later than the day that the disclosures are filed with the Commission;
- request the independent accountant to furnish to the registrant as promptly as possible a letter addressed to the Commission stating whether the independent accountant agrees with the statements made by the registrant in response to this Item 4.02 and, if not, stating the respects in which it does not agree; and
- amend the registrant's previously filed Form 8-K by filing the independent accountant's letter as an exhibit to the filed Form 8-K no later than two business days after the registrant's receipt of the letter.

[f] Section 5. Corporate Governance and Management

Item 5.01 Changes in Control of Registrant. Item 5.01(a) requires the disclosure of the following, where to the knowledge of the registrant's board of directors, a committee of the board of directors or authorized officer or officers of the registrant, a change in control of the registrant has occurred: n217

- the identity of the person(s) who acquired such control;
- the date and a description of the transaction(s) which resulted in the change in control;
- the basis of the control, including the percentage of the voting securities of the registrant now beneficially owned n218 directly or indirectly by the person(s) who acquired control;
- the amount of the consideration used by such person(s);
- the source of the funds used by the person(s), unless all or any part of the consideration used is a loan made in the ordinary course of business by a bank as defined by Section 3(a)(6) of the Act, in which case the identity of such bank may be omitted provided the person who acquired control:

- has made a request for confidentiality pursuant to Section 13(d)(1)(B) of the Act; and
- states in the report that the identity of the bank has been so omitted and filed separately with the Commission.
- the identity of the person(s) from whom control was assumed; and
- any arrangements or understandings among members of both the former and new control groups and their associates with respect to the election of directors or other matters.

Item 5.01(b) requires the registrant to furnish the information required by Item 403(c) of Regulation S-K n219 (17 C.F.R. § 229.403(c)).

Item 5.02 Departure of Directors or Principal Officers; Election of Directors; Appointment of Principal Officers.

n220 Item 5.02(a)(1) requires the disclosure of the following, where, a director has resigned or refuses to stand for re-election to the board of directors since the date of the last annual meeting of the shareholders because of a disagreement with the registrant, known to an executive officer of the registrant, as defined in 17 C.F.R. § 240.3b-7, on any matter relating to the registrant's operations, policies, or practices, or if a director has been removed for cause from the board of directors:

- the date of such resignation, refusal to stand for re-election or removal;
- any positions held by the director on any committee of the board of directors at the time of the director's resignation, refusal to stand for re-election or removal; and
- a brief description of the circumstances representing the disagreement that the registrant believes caused, in whole or in part, the director's resignation, refusal to stand for re-election or removal.

Item 5.02(a)(2) requires that the registrant file a copy of any written correspondence furnished to the registrant by the director concerning the circumstances surrounding his or her resignation, refusal or removal as an exhibit to the report on Form 8-K.

Item 5.02(a)(3) requires that the registrant must also:

- provide the director with a copy of the disclosures it is making in response to Item 5.02 no later than the day the registrant files the disclosures with the Commission;
- provide the director with the opportunity to furnish the registrant as promptly as possible with a letter addressed to the registrant stating whether he or she agrees with the statements made by the registrant in response to Item 5.02 and, if not, stating the respects in which he or she does not agree; and
- file any letter received by the registrant from the director with the Commission as an exhibit by amendment to the previously filed Form 8-K within two business days after receipt by the registrant.

Item 5.02(b) requires that if the registrant's principal executive officer, president, principal financial officer, principal accounting officer, principal operating officer, or any person performing similar functions, or any other person who is a named executive officer n221 retires, resigns or is terminated from that position, or if a director retires, resigns, is removed, or refuses to stand for re-election (except in circumstances described in Item 5.02(a)), the registrant must disclose the fact that the event has occurred and the date of that event.

Item 5.02(c) requires the disclosure of the following, where the registrant appoints a new principal executive officer, president, principal financial officer, principal accounting officer, principal operating officer or any person performing similar functions: n222

- the name and position of the newly appointed officer and the date of the appointment;
- the information required by Items 401(b),(d), (e) and Item 404(a) of Regulation S-K n223; and
- a brief description of the any material plan, contract or arrangement (whether or not written) to which a covered officer is a party or in which he or she participates that is entered into or material amendment in connection with the triggering event or any grant or award to any such covered person or modification thereto, under any such plan, contract or arrangement in connection with any such event. n224 (5.02(c)(3)).

Item 5.02(d) requires the disclosure of the following, where the registrant elects a new director, except by a vote of security holders at an annual meeting or special meeting convened for such purpose:

- the name of the director and the date of election;
- a brief description of any arrangement or understanding between the director and any other persons, naming such person, pursuant to which such director was selected as a director;
- the committee of the board of directors to which the new director has been, or at the time of this disclosure is expected to be, named (5.02(d)(3));
- the information required by Item 404(a) of Regulation S-K or Item 404(a) of Regulation S-B, as applicable (Item 5.02(d)(4)); n225 and
- a brief description of any material plan, contract or arrangement (whether or not written) to which a covered officer is a party or in which he or she participates that is entered into or material amendment in connection with the triggering event or any grant or award to any such covered person or modification thereto, under any such plan, contract or arrangement in connection with any such event. (Item 5.20(d)(5)). n226

Item 5.02(e) requires disclosure where the registrant enters into, adopts, or otherwise commences a material compensatory plan, contract or arrangement (whether or not written), as to which the registrant's principal executive officer, principal financial officer, or a named executive officer participates or is a party. If there is a material amendment or modification, or a material grant or award under any such plan, contract or arrangement to any such person is made or materially modified, then the registrant must provide a brief description of the terms and conditions of the plan, contract or arrangement and the amounts payable to the officer thereunder. n227

Item 5.02(f) requires updated disclosure of the total compensation figure of a named executive officer to reflect recently available figures regarding salary or bonus payments. n228

Item 5.03 Amendments to Articles of Incorporation or Bylaws; Change in Fiscal Year. n229 If a registrant with a class of equity securities registered under Section 12 of the Exchange Act n230 amends its articles of incorporation or bylaws and a proposal for the amendment was not disclosed in a proxy statement or information statement filed by the registrant, the registrant must disclose the following information: n231

- the effective date of the amendment; and
- a description of the provision adopted or changed by amendment and, if applicable, the previous provision.

Item 5.03(b) requires that if a registrant determines to change the fiscal year from that used in its most recent filing with the Commission other than by means of a submission to a vote of security holders through the solicitation of proxies or otherwise, or an amendment to its articles of incorporation or bylaws, the following information must be disclosed:

- the date of such determination;
- the date of the new fiscal year end; and
- the form (e.g., Form 10-K or Form 10-Q) on which the report covering the transition period will be filed. n232.

Item 5.04 Temporary Suspension of Trading Under Registrant's Employee Benefit Plan. Under 5.04(a), no later than the fourth business day after which the registrant receives the notice required by section 101(i)(2)(E) of the Employment Retirement Income Security Act of 1974 n233, or, if such notice is not received by the registrant, on the same date by which the registrant transmits a timely notice to an affected officer or director within the time period prescribed by Rule 104(b)(2)(i)(B) or 104(b)(2)(ii) of Regulation BTR (*17 C.F.R. § 245.104(b)(2)(i)(B)* or *17 C.F.R. § 245.104(b)(2)(ii)*), the registrant must provide the information specified in Rule 104(b) (*17 C.F.R. § 245.104(b)*) and the date the registrant received the notice required by section 101(i)(2)(E) of the Employment Retirement Income Security Act of 1974 (*29 U.S.C. § 1021(i)(2)(E)*), if applicable.

Under 5.04(b), on the same date by which the registrant transmits a timely updated notice to an affected officer or director, as required by the time period under Rule 104(b)(2)(iii) of Regulation BTR (*17 C.F.R. § 245.104(b)(2)(iii)*), the registrant must provide the information specified in Rule 104(b)(3)(iii) (*17 C.F.R. § 245.104(b)(2)(iii)*).

Item 5.05 Amendments to the Registrant's Code of Ethics, or Waiver of Provision of the Code of Ethics. Item 5.05 requires that the registrant briefly describe the date and nature of any amendments made to, or waivers n234 granted from, its code of ethics n235 that apply to its principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. n236 The disclosure must briefly describe the date and nature of the amendment or waiver, and in the case of a waiver, the name of the person to whom the waiver was granted and the date of the waiver. n237

The registrant need not provide any information pursuant to Item 5.05 if it discloses the required information on its Internet website within four business days following the date of the amendment or waiver and the registrant has disclosed in its most recently filed annual report its Internet address and intention to provide disclosure in this manner. n238 Such information must remain on the website for at least a 12-month period and must be retained by the registrant for a period of not less than five years.

[g] Section 6. Asset-Backed Securities n239

Item 6.01 ABS Informational and Computational Material. The registrant must report under this Item any ABS informational and computation material n240 filed in, or as an exhibit to, the report.

Item 6.02 Change of Servicer or Trustee. If a servicer contemplated by Item 1108(a)(2) or (3) of Regulation AB (*17 CFR 229.1108(a)(2)*) n241 or a trustee has resigned or been removed, replaced, substituted or appointed, Item 6.02 instructs as to various required disclosures.

Item 6.03 Change in Credit Enhancement or Other External Support. The loss of an existing enhancement or support, except where the termination occurs through expiration of, or fulfillment of all obligations under, the contract requires certain disclosures, including a description of the termination, the circumstances surrounding the termination and any penalties must be described. Certain disclosures are also required under this section for the addition of or material changes to an enhancement or support.

Item 6.04 Failure to Make a Required Distribution. If a required distribution to holders of the asset-backed securities is not made as of the required distribution date under the transaction documents, and such failure is material, the registrant must identify the failure and state the nature of the failure to make the timely distribution.

Item 6.05. Securities Act Updating Disclosure. Regarding an offering of asset-backed securities registered on Form S-3, if any material pool characteristic of the actual asset pool differs by more than 5% from the asset pool described in the prospectus, then disclosures as to the actual asset pool are required under this section.

[h] Section 7. Regulation FD

Item 7.01 Regulation FD Disclosure. Pursuant to Regulation FD, Item 7.01 allows the registrant to use Form 8-K to publicly disclose information required under Regulation FD Rules 100 and 101.

In its release adopting Regulation FD, the Commission included a non-exhaustive list of some types of information or events that should be reviewed carefully to determine whether they are material: (1) earnings information; (2) mergers, acquisitions, tender offers, joint ventures, or changes in assets; (3) new products or discoveries, or developments regarding customers or suppliers (*e.g.*, the acquisition or loss of a contract); (4) changes in control or in management; (5) changes in auditors or auditor notification that the issuer may no longer rely on an auditor's audit report; (6) events regarding the issuer's securities—such as defaults on senior securities, calls of securities for redemption, repurchase plans, stock splits or changes in dividends, changes to the rights of security holders, public or private sales of additional securities; and (7) bankruptcies or receiverships. The Commission did not imply that each of these items is *per se* material. The information and events on this list still require determinations as to their materiality, although some determinations will be reached more easily than others. For example, some new products or contracts may clearly be material to a particular company, but that does not mean that every product development or contract will be material. n242. In July 2002, the Sarbanes-Oxley Act of 2002 added Section 13(1) to the Exchange Act, requiring public companies to disclose material information as determined by Commission regulation, "to the public on a rapid and current basis."

If the registrant chooses to make the disclosure under Item 7.01, such information will not be deemed filed for purposes of Section 18 of the Exchange Act or otherwise subject to the liabilities of that section, except if the registrant specifically states that the information is to be considered filed under the Exchange Act or incorporates it by reference into a filing under the Securities Act or the Exchange Act. A registrant may choose to make the Form 8-K Regulation FD disclosure under Item 8.01 of the Form 8-K, in which case the disclosure is deemed to be filed under the Exchange Act. n243

[i] Section 8. Other Events

Item 8.01 Other Events. The registrant may report any events that the registrant deems of importance to security holders n244 and with respect to which information is not otherwise called for on Form 8-K. The registrant, may at its option, report under Item 8.01, as opposed to Item 7.01, any previous nonpublic material information that the registrant desires to disclose in the Form 8-K to satisfy the public disclosure requirements of Regulation FD n245. The Commission advises registrants, when considering reporting on Form 8-K, particularly of other events of material importance pursuant to Item 7.01 and Item 8.01, to have due regard for the accuracy, completeness, and currency of the

information, in registration statements filed under the Securities Act which incorporate by reference information in reports filed pursuant to the Exchange Act, including reports on the Form 8-K. n246

[j] Section 9. Financial Statements and Exhibits

Item 9.01 Financial Statements and Exhibits. n247 Item 9.01(a) requires the filing of financial statements of businesses acquired that are required to be described in answer to Item 2.01. n248

The registrant may file Form 8-K without audited financial statements for acquired businesses, if the registrant files the omitted statements within seventy-one calendar days after the date that the initial report on Form 8-K must be filed. n249

The registrant may, at its option, include unaudited financial statements in its initial report. n250 During the period after a registrant has reported a business combination pursuant to Item 2.01 until the date on which the financial statements specified in Item 9.01 must be filed, registrants are deemed current in their reporting obligations, but registration statements and post-effective amendments to registration statements under the Securities Act will not be declared effective unless financial statements meeting the requirements of Rule 3-05 of Regulation S-X are provided. In addition, offerings shall not be made pursuant to effective registration statements or pursuant to Rules 505 and 506 of Regulation D, where any purchasers are not accredited investors, until the audited financial statements are filed. Provided, however, that the following offerings or sales of securities may proceed notwithstanding that financial statements of the acquired business have not been filed: offerings or sales of securities upon the conversion of outstanding convertible securities or upon the exercise of outstanding warrants or rights; dividend or interest investment plans; employee benefit plans; transactions involving secondary offerings; or sales of securities pursuant to Rule 144. n251

Item 9.01(b) requires the registrant to provide pro forma financial information for any transaction required to be described in answer to Item 2.01. The information provided must meet the requirements of Article 11 of Regulation S-X or Rule 8-05 of Regulation S-X for smaller reporting companies. n252

The exhibits shall be deemed to be filed or furnished depending on the relevant item requiring such exhibit, in accordance with the provisions of Item 601 of Regulation S-K and Instruction B(2) of Form 8-K. n253

[4] Interactive Date For Financial Reporting

In January 2009, the Commission adopted regulations that require companies to provide their financial statements in interactive data format using eXtensible Business Reporting Language (XBRL) by submitting them to the Commission and posting them on their corporate web sites. n254 The regulations amended Item 601(b)(101) of Regulation S-K (i.e., the form exhibit requirements), Rules 405 and 406T of Regulation S-T and the EDGAR Filer Manual. n255

The disclosure in interactive data format will be in addition to, rather than instead of, disclosure in the traditional electronic filing formats. Financial statements will continue to be required to be submitted to the Commission in traditional format under existing requirements. n256 The Commission's primary purpose of the amendments is to make financial information easier for investors to analyze and to assist companies in automating regulatory filings and business information processing. n257

Companies, other than investment companies, will become subject to the interactive data requirements in three groups. Smaller reporting companies will be in the last group. n258

The phase-in schedule of the interactive data requirements will apply to three groups of companies, as follows: n259

Year 1 --

1-4 Federal Securities Exchange Act of 1934 § 4.02

- Domestic and foreign companies that are large accelerated filers under Exchange Act Rule 12b-2, use U.S. Generally Accepted Accounting Principles (U.S. GAAP) and have non-affiliate held equity securities valued at more than \$5 billion (about 500 companies).

- Requirements begin for the first quarterly report on Form 10-Q or annual report on Form 20-F or 40-F, as applicable, that contains financial statements for a period ending on or after June 15, 2009.

Year 2 --

- All other domestic and foreign companies that are large accelerated filers and use U.S. GAAP.

- Requirements begin for the first quarterly report on Form 10-Q or annual report on Form 20-F or 40-F, as applicable, that contains financial statements for a period ending on or after June 15, 2010.

Year 3 --

- All other domestic and foreign companies that use U.S. GAAP and foreign companies that use International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS/IASB).

- Requirements begin for the first quarterly report on Form 10-Q or annual report on Form 20-F or 40-F, as applicable, that contains financial statements for a period ending on or after June 15, 2011.

A company will be required to tag the face of its financial statements in its initial year of interactive data reporting. A company also will be required to tag its financial statement footnotes and financial statement schedules in its initial year, but only as blocks of text. After the first year of such tagging, a company also will be required to tag the detailed quantitative disclosures within the footnotes and schedules. Following Year 3 of the phase-in period for the interactive data requirements, new public companies will become subject to the interactive data requirements for the first quarterly report on Form 10-Q or annual report on Form 20-F or 40-F, as applicable, due after they become public companies.

FOOTNOTES:

(n1)Footnote 1. Sarbanes-Oxley Act of 2002, Pub. L. No. 107-204, 116 Stat. 2002 (H.R. 3763).

(n2)Footnote 2. The provisions of the Sarbanes-Oxley Act revise corporate governance standards, bolster disclosure and reporting requirements, create new federal crimes related to securities fraud, set up a new public auditor oversight board, and increase the criminal penalties for securities law violations.

(n3)Footnote 3. The Sarbanes-Oxley Act covers not only U.S. public companies, but also foreign companies that file or are required to file periodic reports under the Exchange Act. In addition, many provisions of the new law apply to

any company that has filed a registration statement under the Securities Act that has not yet become effective and has not been withdrawn. Sarbanes-Oxley Act § 2(a)(7).

(n4)Footnote 4. Rule 12b-2 defines both the "large accelerated filer" and the "accelerated filer" as an issuer meeting the following criteria as of the end of its fiscal year:

- it has been subject to the requirements of Section 13(a) or 15(d) of the Exchange Act for a period of at least twelve calendar months;
- it has filed at least one annual report pursuant to Section 13(a) or 15(d) of the Exchange Act; and
- it is not eligible to use the requirements for smaller reporting companies for its annual and quarterly reports.

The "large accelerated filer" has an aggregate worldwide market value of voting and non-voting common equity held by non-affiliates of the issuer of \$700 million or more, as of the last business day of the issuer's most recently completed second fiscal quarter and the "accelerated filer" has a public float of \$75 million or more, but less than \$700 million. Rule 12b-2.

(n11)Footnote 11. *See the House Report, H.R. Rep. No. 1383, 73d Cong. 2d Sess. (1934), reprinted in the Primary Law Sourcebook, Volume C, Section I.*

No investor, no speculator, can safely buy and sell securities upon the exchanges without having an intelligent basis for forming his judgment as to the value of the securities he buys or sells. The idea of a free and open public market is built upon the theory that competing judgments of buyers and sellers as to the fair price of a security brings about a situation where the market price reflects as nearly as possible a just price. Just as artificial manipulation tends to upset the true function of an open market, so the hiding and secreting of important information obstructs the operation of the markets as indices of real value. There cannot be honest markets without honest publicity. Manipulation and dishonest practices of the market place thrive upon mystery and secrecy. The disclosure of information materially important to investors may not instantaneously be reflected in market value, but despite the intricacies of security values truth does find relatively quick acceptance on the market. That is why in many cases it is so carefully guarded. Delayed, inaccurate, and misleading reports are the tools of the unconscionable market operator and the recreant corporate official who speculate on inside information. Despite the tug of conflicting interests and the influence of powerful groups, responsible officials of the leading exchanges have unqualifiedly recognized, in theory at least, the vital importance of true and accurate corporate reporting as an essential cog in the proper functioning of the public exchanges. Their efforts to

bring about more adequate and prompt publicity have been handicapped by the lack of legal power and by the failure of certain banking and business groups to appreciate that a business that gathers its capital from the investing public has not the same right to secrecy as a small privately owned and managed business. It is only a few decades since men believed that the disclosure of a balance sheet was a disclosure of a trade secret. Today few people would admit the right of any company to solicit public funds without the disclosure of a balance sheet.

The Exchange Act's disclosure requirements were imposed in light of the information concerning abuses developed by the "Pecora Committee," a subcommittee of the Senate Committee on Banking and Currency that was appropriately named after its able general counsel, Ferdinand Pecora, Esq. The Committee Report summarizing its investigation stressed the importance of timely accurate disclosure by publicly held issuers:

Responsible officials of the leading exchanges have unqualifiedly recognized in public utterances the vital importance of furnishing to the public complete, accurate, and current information regarding the financial condition of corporations with securities listed on the exchanges. The Securities Exchange Act of 1934 supplements the Securities Act of 1933, which requires information to be filed only as to the situation existing at the time the security is issued. Under the Securities Exchange Act of 1934, it is made unlawful for a member, broker, or dealer to effect any transaction in any security on a national securities exchange unless a registration is effective as to such security in accordance with the provisions of the act. The security may be registered on a national securities exchange only after the issuer has filed an application with the Securities and Exchange Commission together with such information in such detail as the Commission may by rules and regulations require as necessary or appropriate in the public interest or for the protection of investors. It is anticipated that the information filed by a corporation as a condition precedent to registration will be so complete as to present to the stockholder, or the prospective stockholder, a picture of the corporation's financial condition which will enable him intelligently to evaluate its securities.

S. Rep. No. 1455, 73d Cong. 2d Sess. (1934).

(n12)Footnote 12. See Report of Special Study of Security Markets by the Securities and Exchange Commission, House Document No. 95, 88th Cong. 1st Sess., Part 3, p. 1 (1963).

(n13)Footnote 13. Sarbanes-Oxley Act § 409, Section 13(1).

(n14)Footnote 14. See Exchange Act Release No. 49424 (2004).

(n15)Footnote 15. Registration pursuant to Section 12 is discussed in § 4.01 *supra*.

(n16)Footnote 16. See § 4.01[7] *supra*. Compare Rules 15d-1, 15d-11 and 15d-13 with Rules 13a-1, 13a-11 and 13a-13.

(n17)Footnote 17. A Section 15(d) company whose number of record stockholders falls to fewer than 300 must file with the SEC a notice on Form 15 in order to take advantage of the reporting suspension provision of Section 15(d). See Rule 15d-6 and discussion at § 4.01[7] *supra*. Section 12(g) registration requirements are discussed in § 4.01[2] *supra*.

(n18)Footnote 18. Rule 15d-5. Copies of all reports filed with the Commission are available for viewing and inspection at the Commission's Public Reference Room in Washington, D.C., and reproductions may be made. See 17 C.F.R. § 200.80. Documents can also be accessed on the Commission's site located at <http://www.sec.gov>.

Rule 15d-5 provides that an issuer deemed to be a successor issuer under Rule 15d-5(a) should file reports on the

same forms as the predecessor issuer except that:

- (1) an issuer that is not a foreign issuer is ineligible to file Form 20-F; and
- (2) a foreign private issuer is eligible to file Form 20-F. Rule 15d-5(b)(1) and (2).

(n19)Footnote 19. Rule 12b-25. Under 12b-25 the registrant, no later than one business day after the end of the specified period when the report is due, must file with the Commission a notification on Form 12b-25 that identifies the report or portion thereof that will be delayed and gives reasons for the filing delay. General Instruction A, Form 10-K. Form 12b-25, as a disclosure document, will be placed in the public files. The procedure requires only notification and does not necessitate any responsive staff action. However, with the increased number of Form 12b-25 filings as issuers tried to achieve compliance with new requirements following the adoption of the Sarbanes-Oxley Act, the SEC staff has similarly incurred its oversight of these filings.

Under Rule 12b-25, an annual or quarterly report, or portion thereof, that is filed on or before the fifteenth or fifth day, respectively, after the prescribed due date, will be deemed to have been filed timely if the issuer: (1) indicates that the reasons causing the inability to file timely could not have been eliminated without unreasonable effort or expense; (2) makes an undertaking in Form 12b-25 that the annual or quarterly report or portion thereof will be filed no later than the fifteenth or fifth calendar day, respectively, following the prescribed due date; (3) attaches an exhibit to Form 12b-25 containing a statement from any person other than the registrant (e.g., the independent auditor), whose inability to furnish any required opinion, report, or certification was the reason the annual or quarterly report could not be timely filed without unreasonable effort or expense; and (4) files the annual or quarterly report within the represented time period. *Id.*

If only a portion of a report is filed late, the registrant must indicate which items are omitted on the cover page of that portion of the report that is timely filed. When the missing items are filed, the registrant must file an amendment and must include the following statement: "The following items were the subject of a Form 12b-25 and are included herein:" The statement must then list the late-filed items submitted with the amendment.

If a report is required to be filed in electronic format and the sole reason the registrant is unable to file a report within the prescribed time period is difficulties with electronic filing, the provisions of Rule 12b-25 will not apply and the registrant should refer to the applicable rules under Regulation S-T. *See § 4.05 infra.*

(n20)Footnote 20. Section 15(d). Notice that the number of record holders is fewer than 300 persons must be given to the Commission on Form 15. Rule 15d-6.

(n21)Footnote 21. Section 18(a), discussed in § 5.03[2] *infra*, is the exclusive remedy for alleged violations of Section 13(a). Therefore, no implied private right of action exists under Section 13(a). *In re Penn Central Securities Litigation*, 494 F.2d 528 (3d Cir. 1974) ; *Phillips v. TPC Communications, Inc.*, 532 F. Supp. 696 (W.D. Pa. 1982) . However, the presence of a Section 18 remedy does not preclude implied remedies under Section 10(b) or Section 14. *See e.g.*, *Ross v. A.H. Robins Co., Ins.*, 607 F.2d 545 (2d Cir. 1979) , *cert. denied*, 446 U.S. 946 (1980) and *Gould v. American Hawaiian Steamship Co.*, 351 F.Supp. 853 (D. Del 1972) .

(n22)Footnote 22. The Securities Law Enforcement Remedies and Penny Stock Reform Act of 1990 (the "Remedies Act"), Pub. L. No. 89110, Fed. Sec. L. Rep. (CCH) No. 1416, Part II (October 10, 1990) among other things added Section 21C to the Exchange Act. Section 21C(a) gives the Commission permanent cease and desist authority to address past, current, or threatened violations of the Exchange Act or any rules or regulations promulgated thereunder. In such cease and desist proceedings, the Commission is permitted to order that a respondent cease and desist from violations of the Exchange Act and to cause the respondent to take affirmative steps to comply or effect compliance with the applicable Exchange Act provisions, including steps to ensure future compliance under Section 21C(c). The Commission also is empowered to issue temporary cease and desist orders whenever it determines that the alleged

violation or threatened violation which is the subject of a permanent cease and desist proceeding under Section 21C(a) presents a danger of dissipation or conversion of assets, significant harm to investors, or substantial harm to the public interest. In addition, in any cease-and-desist proceeding, the Commission has the authority under Section 21C(e) to enter an order requiring an accounting and disgorgement and to prohibit persons from serving as officers or directors under Section 21(C)(f).

(n23)Footnote 23. Section 21(d)(3)(B).

(n24)Footnote 24. Section 21(d)(5).

(n25)Footnote 25. Section 21(d)(3)(D).

(n26)Footnote 26. *See § 5.04 infra*. Under Section 21(d)(2) of the Exchange Act, which was also added by the Remedies Act, a court is empowered, in any civil injunctive actions brought under Section 21(d)(1), to bar an individual who has violated Section 10(b) of the Exchange Act or any of the rules or regulations thereunder (including *Rule 10b-5*) from acting as an officer or director of any company that is required to file reports under Section 15(d) or has a class of securities registered pursuant to Section 12 of the Exchange Act if the individual's conduct demonstrates unfitness to serve as an officer or director of such issuer.

(n27)Footnote 27. Special purpose forms for annual reports are: Form 11-K for employee stock purchase, savings, and similar plan interests in which securities are registered under the Securities Act; Form 18-K for foreign governments and their political subdivisions; and Form 20-F for foreign private issuers. Form 40-F is available to certain Canadian issuers under the multi-jurisdictional disclosure system with Canada adopted by the Commission in 1991. *See also* General Instruction A, Form 10-K.

(n28)Footnote 28. *Exchange Act Release No. 17,114, Fed. Sec. L. Rep. (CCH) P 72,301 (1980)*.

(n29)Footnote 29. *Id.* Concurrent with the adoption of amendments to Form 10-K, the Commission issued three other releases adopting changes related to: uniform financial statement instructions required for certain forms and reports pursuant to the Securities Act and Exchange Act, *see § 4.02[2][a] infra*; Regulation S-X (17 C.F.R. Part 210) designed to achieve uniformity, to the extent possible, between the requirements of generally accepted accounting principles and those of Regulation S-X, *see § 4A.01[3][a][i] infra*; and a simplified Form S-15, since rescinded and supplemented with Form S-4, for the registration of securities under the Securities Act issued in certain merger and reorganization transactions.

These revisions were prompted by the work of the Advisory Committee on Corporate Disclosure which had recommended a comprehensive revision of the disclosure requirement under the Securities Act and Exchange Act to achieve a simplified and uniform disclosure system. *Report of the Advisory Committee on Corporate Disclosure to the Securities and Exchange Commission* 481 (November 3, 1977), 95th Cong. 1st Sess., Committee Print No. 9529 House Committee on Interstate and Foreign Commerce.

(n30)Footnote 30. *Exchange Act Release No. 17,114, Fed. Sec. L. Rep. (CCH) P 72,301 (1980)*.

(n31)Footnote 31. *Id.* *See* General Instruction G(2), Form 10-K.

(n32)Footnote 32. The principal effort in the case of the annual report to stockholders has been to standardize disclosure items to make them consistent with similar requirements in Commission filings, especially to provide uniformity in form, content, and timing of financial disclosure in the stockholders' report. *Exchange Act Release No. 17,114, Fed. Sec. L. Rep. (CCH) § 72,301 (1980)*.

(n33)Footnote 33. *Id.* The most frequent users of the annual report on Form 10-K have been institutional investors, professional security analysts, and individual investors.

(n34)Footnote 34. *Id.*

(n35)Footnote 35. *Id.*

(n36)Footnote 36. Items 5, 9 and 15 were effective August 23, 2004.

(n37)Footnote 37. *Exchange Act Release No. 17,095, Fed. Sec. L. Rep. (CCH) P 82,642* (1970), in which the Commission standardized its requirements on the filing of exhibits by deleting certain exhibits and by revising and making uniform other exhibit requirements. These exhibit requirements have been adopted in Item 601 of Regulation S-K, reprinted in the Primary Law sourcebook, Volume D, Section K *see* § 4.03[7] *infra.*, and were amended in *Exchange Act Release No. 18,524, Fed. Sec. L. Rep. (CCH) P 72,328* (1982).

(n38)Footnote 38. *See* Note, General Instruction G(2), Form 10-K. For discussion of Rule 14a-3(b), *see* § 7.03 *infra.*

(n39)Footnote 39. *Id. See also* § 4.05 *supra.*

(n40)Footnote 40. *Exchange Act Release No. 17,114, Fed. Sec. L. Rep. (CCH) P 72,301* (1980); General Instruction G(3), Form 10-K. If the proxy or information statement is not filed within 120 days after the end of the fiscal year covered by the Form 10-K, then Items 10-13 (Part III) must be filed as part of the Form 10-K or as an amendment to the Form 10-K not later than the end of the 120 day period. General Instruction G(3), Form 10-K.

(n41)Footnote 41. General Instruction A, Form 10-K and Exchange Act Rules 13a-10 and 15d-10. The accelerated filing deadlines were amended and the category of large accelerated filer was created. The "large accelerated filer" will have a deadline for filing Form 10-K annual reports of sixty days, beginning with the annual report filed for its first fiscal year ending on or after December 15, 2006. With the creation of the "large accelerated filer" category, "accelerated filers" were carved out of the sixty day deadline and the deadline for filing Form 10-K annual reports for "accelerated filers" is scheduled for no further reduction than to the seventy-five day annual report deadline.

(n42)Footnote 42. The requirement for disclosure regarding website posting of Commission reports was effective beginning with fiscal years ending on or after December 15, 2002.

(n43)Footnote 43. Any company with voting or non-voting common securities listed on the New York Stock Exchange that is required to file with the SEC an annual report that includes audited financial statements is required to simultaneously make such annual report available to stockholders of such securities on or through the company's website. Listed Company Manual § 203.01. Since all listed companies are required to file their periodic and current reports, as well as other materials, through the SEC's Electronic Data Gathering Analysis and Retrieval (EDGAR) system, the New York Stock Exchange does not require a listed company to file hard copies of most SEC filing with the New York Stock Exchange.

(n44)Footnote 44. General Instruction A, Form 10-K. If a company does not timely file its Form 10-K, notice will be given by the New York Stock Exchange to (i) contact the exchange and explain the delay; and (ii) issue a press release disclosing the reason and status of the delay as well as giving the anticipated filing date, if known. Listed Company Manual § 203.01.

(n45)Footnote 45. Exchange Act Rule 0-3(a).

(n46)Footnote 46. *Exchange Act Release No. 31,905, Fed. Sec. L. Rep. (CCH) P 85,111* (1993).

(n47)Footnote 47. Rule 13a-1. Registration pursuant to Section 12 is discussed in § 4.01 *supra.*

(n48)Footnote 48. Rule 15d-1 under the Exchange Act, reprinted in the Primary Law Sourcebook, Volume B, Section G. *See* § 4.01[7] *supra.*

(n49)Footnote 49. General Instruction H, Form 10-K. Combined documents must contain full and complete answers to all Form 10-K items, the cover page, and the required signatures. Any such portions filed on behalf of electronic filers must be made in electronic format. *Id.*

(n50)Footnote 50. Rules 13a-10, 15d-10. In 1989, the Commission adopted significant changes in the Exchange Act reporting requirements when an issuer changes its fiscal year, or where a successor to an issuer has a different fiscal year than the issuer. Transition reports on either Form 10-K or Form 10-Q are required to be filed for interim periods between the end of an old fiscal year and the opening date of a new one. *Exchange Act Release No. 26,589, Fed. Sec. L. Rep. (CCH) P 72,435* (1989). Issuers must file a transition report on the annual reporting form, usually Form 10-K, including audited financial statements, for transition periods of six or more months. For a transition period shorter than six months, issuers have the option of filing a transition report on either Form 10-Q, including unaudited financial statements, or Form 10-K, including audited financial statements. Information for a transition period of one month or less may be included in the issuer's report on Form 10-Q for the first quarter of the newly adopted fiscal year that ends after the date on which the issuer determined to change its fiscal year, if separate audited statements of income and cash flows covering the transition period are filed with the first annual report for the newly adopted fiscal year. If the issuer's next report is the first annual report for the newly adopted fiscal year, instead of a quarterly report, a transition period of one month or less may be covered in that annual report. *Id.*

A number of issues related to transition reports are discussed in the Commission's "Compliance and Disclosure Interpretations," which is compiled and regularly updated by The Office of Chief Counsel and available on the Commission's website at <http://www.sec.gov>.

For non-accelerated filers, the filing period for transition reports on Form 10-K is ninety days after the close of the transition period or the date of the determination to change the fiscal year, whichever is later, and for transition reports on Form 10-Q, forty-five days after the later of those two events. *Id.* The timeframe for filing transition reports for accelerated filers has been reduced to conform to the periodic reporting timeframe for accelerated filers. Exchange Act Rules 13a-10 and 15d-10.

Issuers have the option of filing quarterly reports for the transition period on the basis of either the old or new fiscal year. Also, issuers, in most cases, will continue to be required to file a quarterly report for any quarter of the old fiscal year that ended before the date of the issuer's determination to change its year end. The requirement to file quarterly reports on the new basis begins with the first quarter in the new fiscal year that ends after the issuer determined to change its year end.

(n51)Footnote 51. General Instruction D(1), Form 10-K. For discussion of Rule 14a-3(b), see § 7.03 *infra*. NASDAQ and the New York Stock Exchange no longer require copies of reports filed electronically via EDGAR.

(n52)Footnote 52. Rules 12g-3, 15d-5. Rule 12g-3 clarifies the application of the periodic reporting requirements to issuers that acquire reporting issuers by the issuance of securities. See § 4.01[2] *supra*, and Rule 15d-5 clarifies when an issuer deemed to be a successor issuer should file reports on the same form as the predecessor issuer. Under Rules 13a-10 and 15d-10 transition reporting is required for successor issuers which have a different fiscal year end from that of the predecessor issuer. Successor issuers are required to file a transition report concerning the predecessor issuer for any transition period between the close of the fiscal year covered by the last annual report of the predecessor issuer and the date of succession. For a transition period of six or more months, the successor issuer must file the transition report on Form 10-K, including audited financial statements. For a transition period of less than six months, the successor issuer may opt instead to file the transition report on Form 10-Q, including unaudited financial statements. Where the transition period is one month or less, the successor issuer need not file a separate transition report, provided that the required information for the transition period is contained in a subsequent quarterly report, or, if the next report is an annual report, in that annual report.

(n53)Footnote 53. Summary suspension of trading pursuant to Section 12(k) is discussed in § 4.01[6] *supra*.

1-4 Federal Securities Exchange Act of 1934 § 4.02

(n54)Footnote 54. The certification requirement applies to annual reports on Forms 10-K, 10-KSB, 20-F and 40-F; quarterly reports on Forms 10-Q and 10-QSB; and any amendments to those forms.

(n55)Footnote 55. Issuers must provide the certifications mandated by the Sarbanes-Oxley Act as exhibits to their filings on Forms 10-Q and 10-K. *See* Exchange Act Release No. 47,986 (2003). Item 601 of Regulation S-K provides that the Section 302 Certification is Exhibit 31 and the Section 906 Certification is Exhibit 32.

(n56)Footnote 56. An officer who files a certification to the Commission knowing that the report does not comply with the Section 906 requirements is subject to a fine of up to \$1 million or imprisonment for up to ten years, or both. A "willful" violation is punishable by a fine of up to \$5 million or up to twenty years in prison, or both. Sarbanes-Oxley Act § 906(c). While there is no penalty specified for a failure to provide the Section 906 certification, it seems clear that the officers could be subjected to civil and criminal liability under the Exchange Act, particularly given that Section 3(a) of the Sarbanes-Oxley Act provides that a violation of the Sarbanes-Oxley Act or any rule or regulation thereunder will be treated as a violation of the Exchange Act.

(n57)Footnote 57. *See* Sarbanes-Oxley Act § 302. On August 27, 2002, the Commission adopted rules implementing the Section 302 certification.

(n58)Footnote 58. In the Commission's view:

A "fair presentation" of an issuer's financial condition, results of operations and cash flows encompasses the selection of appropriate accounting policies, disclosure of financial information that is informative and reasonably reflects the underlying transactions and events and the inclusion of any additional disclosure necessary to provide investors with a materially accurate and complete picture of an issuer's financial condition, results of operations and cash flows.

(n59)Footnote 59. *See* § 4.05 *infra*.

(n60)Footnote 60. General Instruction B(2), Form 10-K.

(n61)Footnote 61. The requirement that a majority of the registrant's directors sign the annual report on Form 10-K was adopted in 1980. *Exchange Act Release No. 17,114, Fed. Sec. L. Rep. (CCH) P 72,301* (1980). The directors' signature requirement was added to the Form 10-K to focus the attention of directors on Exchange Act filings (just as the Commission's Division of Corporation Finance was shifting its focus to periodic disclosure under the Exchange Act). *Id.* The Commission anticipated that requiring a majority of the directors to sign the Form 10-K would encourage directors to devote the necessary attention to reviewing the Form 10-K and to seek the involvement of other professionals to the degree necessary to satisfy the directors. *Id.* The directors' signature requirement reflects the Commission's belief that the added involvement of the directors in the annual report on Form 10-K is vital to disclosure under the federal securities laws and outweighs any potential legal liability caused by the added signature requirement. *Id.* For a discussion of the level of oversight expected by the Commission, see *In the Matter of W.R. Grace & Co.*, Exchange Act Release Nos. 39,156 and 39,157, *Fed. Sec. L. Rep. (CCH) P 85,963* (1997). A person who signs a filing has made a "statement" of the information contained therein for purposes of Section 10(b) of the Exchange Act and Rule 10b-5 thereunder. *Howard v. Everex Systems, Inc.*, 228 F.3d 1057 (9th Cir. 2000).

(n62)Footnote 62. *See* Rule 12b-11(d) which provides that:

Duplicated or facsimile versions of manual signatures of persons required to sign any registration statement pursuant to Sections 12(b) and 12(g) of the [Exchange] Act, any report or schedule filed pursuant to Sections 13 or 15(d) of the [Exchange] Act, or any amendment or exhibit to such registration statement, report or schedule, that are filed or submitted to the Commission under the [Exchange] Act, shall be considered manual signatures for the purposes of the [Exchange] Act and rules and regulations

thereunder; provided that, the original signed document is retained by the files for a period of five years and, upon request, the filer furnishes to the Commission or the staff the original manually-signed document.

(n63)Footnote 63. General Instruction D, Form 10-K.

(n64)Footnote 64. General Instruction D(3), Form 10-K. This requirement was previously under the Instructions for the annual report to stockholders furnished to the *Commission. Exchange Act Release No. 31,905, Fed. Sec. L. Rep. (CCH) P 85,111* (1993).

(n65)Footnote 65. General Instruction E, Form 10-K. If information is omitted, a statement to that effect must be made and the names of the subsidiaries involved must be furnished separately to the Commission. The Commission may, in its discretion, require justification that the required disclosure would be detrimental. *Id.*

(n66)Footnote 66. General Instruction I(1), Form 10-K. The Commission has granted no-action relief to a non wholly-owned subsidiary in certain cases. *See American Standard* (available March 23, 1995).

(n67)Footnote 67. *Id.*, General Instruction I(2)(a). The registrant, in explaining the material changes as part of the management's narrative analysis, should include changes in the various elements that determine revenue and expense levels such as unit sales volume, prices charged and paid, production levels, production cost variances, labor costs, and discretionary spending programs. The analysis should also include an explanation of the effect of any changes in accounting principles or practices, or method of application that have a material effect on net income as reported. *Id.*

(n68)Footnote 68. *Id.*, General Instruction I(2)(b).

(n69)Footnote 69. *Id.*, General Instruction I(2)(c).

(n70)Footnote 70. *Id.*, General Instruction I(2)(d).

(n71)Footnote 71. *Id.*

(n72)Footnote 72. For a discussion of the transition period reporting requirements applicable to Form 10-K and Form 10-Q filings, *see* § 4.02[1][a] *supra*.

(n73)Footnote 73. *Exchange Act Release No. 28,869, Fed. Sec. L. Rep. (CCH) P 84,709* (1991). This is intended to facilitate form processing and review. Failure to provide such indication will not create liability for violation of federal securities laws. Instruction to Item 10, Form 10-K.

(n74)Footnote 74. Rule 405 defines a well-known seasoned issuer as an issuer that meets all of the registrant requirements of General Instructions I.A. on Form S-3 or Form F-3 and (i) that, within 60 days of the determination date, has a public float of \$700 million or more; or (ii) that, within 60 days of the determination date, has issued at least \$1 billion aggregate principal amount of non-convertible securities, other than common equity, in primary offerings for cash in the last three years and will register only non-convertible securities, other than common equity, and full and unconditional guarantees, other than common equity. The definition of a well-known seasoned issuer also includes issuers that meet the Form S-3 and Form F-3 registrant requirements and are a majority-owned subsidiary of a parent that is a well-known seasoned issuer and the parent provides a full and unconditional guarantee of the payment obligations on the subsidiary's securities and the securities are (or are guarantees of) non-convertible securities, other than common equity. The securities of the subsidiary are guarantees of non-convertible securities, other than common equity, of the parent being registered or are non-convertible securities, other than common equity, of another majority-owned subsidiary being registered where there is a full and unconditional guarantee of such non-convertible securities by the parent.

The determination date is the latest of (a) the time of filing of its most recent shelf registration statement; or (b) its most recent amendment to a shelf registration; or (c) if the issuer has not filed a shelf registration statement or amendment thereto for the purposes of complying with Section 10(a)(3) of the Securities Act for sixteen months, the time of filing of the issuer's most recent annual report on Form 10-K or Form 20-F.

(n75)Footnote 75. See Form 10-K. In its Compliance and Disclosure Interpretations, the Commission Staff confirmed that until an issuer is required to submit Interactive Data Files, it should leave the boxes on the Form 10-K and Form 10-Q unchecked. For a discussion regarding the requirements and the applicable phase-in periods for Interactive Data files see § 4.02[4] *infra*.

(n76)Footnote 76. Although the Division of Corporation Finance does not expect the requirement that a registrant state the aggregate market value of voting stock held by nonaffiliates to be unduly burdensome, if the determination of affiliate status cannot be made without incurring inordinate time and expense, a registrant may fulfill the requirement by indicating that the amount has been calculated based on certain assumptions, which should be set forth in the Form 10-K. See Note to instructions to cover page of Form 10-K.

(n77)Footnote 77. Item 101 of Regulation S-K, reprinted in the Primary Law Sourcebook, Volume D, Section K is discussed in § 4.03[2][a] *infra*.

(n78)Footnote 78. Accelerated filer and large accelerated filer are defined in Rule 12b-2 of the Exchange Act and discussed in § 4.02[1][a] *supra*.

(n79)Footnote 79. Well-known seasoned issuer is defined in Rule 405 of the Securities Act. See § 4.02[1][a] *supra*.

(n85)Footnote 85. Disclosure of information relating to unregistered sales made in reliance on Regulation S must be furnished under Item 5 as of January 1, 1999. *Exchange Act Release No. 39,668, Fed. Sec. L. Rep. (CCH) P 86,006 (1998)*.

(n86)Footnote 86. *Exchange Act Release No. 39,668, Fed. Sec. L. Rep. (CCH) P 86,006 (1998)*.

(n87)Footnote 87. *Exchange Act Release No. 38,850, Fed. Sec. L. Rep. (CCH) P 85,953 (1997)*.

(n88)Footnote 88. Item 301 of Regulation S-K is discussed in § 4.03[4][a] *infra*.

(n89)Footnote 89. Item 303 of Regulation S-K is discussed in § 4.03[4][c] *infra*.

(n90)Footnote 90. Item 305 of Regulation S-K is discussed in § 4.03[4][e] *infra*. This disclosure was added in 1997. *Exchange Act Release No. 38,223, Fed. Sec. L. Rep. (CCH) P 72,448 (1997)*.

(n91)Footnote 91. For discussion of Regulation S-X, *see* § 4A.01[2][a] *infra*.

(n92)Footnote 92. Item 302 of Regulation S-K is discussed in § 4.03[4][b] *infra*. Item 8 of Form 10-K was amended, effective September 30, 1982, to provide that the registrant furnish financial statements meeting the requirements of Regulation S-X, except for Rule 3-05 and Article 11.

(n93)Footnote 93. Rule 301, Regulation S-X.

(n94)Footnote 94. Rule 302, Regulation S-X.

(n95)Footnote 95. *Id.*

(n96)Footnote 96. Article 8 of Regulation S-X. Article 8 of Regulation S-X replaces Item 310 of Regulation S-B for a smaller reporting company's financial statement requirements. Smaller reporting companies are discussed in § 4.03[12] *infra*.

(n97)Footnote 97. Item 304 of Regulation S-K is discussed in § 4.03[4][d] *infra*.

(n98)Footnote 98. Items 307 and 308 of Regulation S-K are discussed in § 4.03[4][g] and § 4.03[4][h] *infra*. If the registrant is neither a large accelerated file nor an accelerated filer, then pursuant to Item 9A(T) of Form 10-K, the registrant is required to furnish the information required by Items 307 and 308T of Regulation S-K for annual reports filed for fiscal years ending on or after December 15, 2007 but before December 15, 2009. Item 9A(T) of Form 10-K is scheduled to expire on June 30, 2010.

(n99)Footnote 99. *See* Exchange Act Release No. 49424 (2004).

(n100)Footnote 100. *See* General Instruction G to Form 10-K. The ability to incorporate by reference is discussed in § 4.02[1] *infra*.

(n101)Footnote 101. *See* SEC Release 33-8732A; 34-54302A; IC-27444A; August 29, 2006.

On January 27, 2006, the Commission proposed revisions to the rules governing disclosure of executive compensation, director compensation, related party transactions, director independence and other corporate governance matters, current reporting regarding compensation arrangements and beneficial ownership. *Release No. 33-8566 (Jan. 27, 2006) [71 FR 6542]*. The final rules were released August 29, 2006, with an effective date of November 7, 2006. Companies were required to comply with the disclosure requirements in Forms 8-K for triggering events that occur on or after November 7, 2006, and in Forms 10-K and 10-KSB for fiscal years ending on or after December 15, 2006. Compliance is required for any proxy or information statement filed on or after December 15, 2006, where the filing is required to include Item 402 and 404 disclosure for fiscal years ending on or after December 15, 2006.

The amendments to the compensation disclosure rules are intended to provide investors with a "clearer and more complete picture of compensation" to principal executive officers, principal financial officers, the other highest paid executive officers and directors. Exchange Act Release No. 54302A (2006). The final rules also affect disclosure regarding related party transactions, director independence and board committee functions.

Compensation disclosure begins with a narrative providing a general overview, the Compensation Discussion and Analysis, similar to MD&A, discussing the material factors underlying compensation policies and decisions reflected in the data presented in the tables. This includes a separate report of the compensation committee, similar to the report required of the audit committee, which is considered furnished and not filed. Following the Compensation Discussion and Analysis, the executive compensation disclosure is divided into three broad categories: (1) compensation with respect to the last fiscal year (and the two preceding fiscal years); (2) holdings of equity-related interests that relate to compensation or are potential sources of future gains; and (3) retirement and other post-employment compensation. The

new rules also require a director compensation table similar to the amended Summary Compensation Table.

(n102)Footnote 102. See General Instruction G to Form 10-K. The ability to incorporate by reference is discussed in § 4.02[1] *supra*.

(n103)Footnote 103. Item 201 of Regulation S-K is discussed in § 4.03[3][a] *infra*. Item 403 of Regulation S-K is discussed in § 4.03[5][c] *infra*.

(n104)Footnote 104. See General Instruction G to Form 10-K. The ability to incorporate by reference is discussed in § 4.02[1] *supra*.

(n105)Footnote 105. See General Instruction G to Form 10-K. The ability to incorporate by reference is discussed in § 4.02[1] *supra*.

(n106)Footnote 106. See General Instruction G to Form 10-K. The ability to incorporate by reference is discussed in § 4.02[1] *supra*.

(n107)Footnote 107. The financial statements and schedules that are filed in Part IV of the Form 10-K but are not required in the annual report to security holders pursuant to Rule 14a-3 or 14c-3 are labeled "financial statement schedules."

The reason for the term "financial statement schedules" is to distinguish such documents from the other exhibits filed as part of Form 10-K for purposes of Form 10-K mailings to security holders and for microfiche processing, among others. For example, security holders requesting a copy of the Form 10-K from the registrant will receive, at no charge, copies of the financial statement schedules but will not receive copies of any exhibits.

Exchange Act Release No. 17,114, Fed. Sec. L. Rep. (CCH) P 72,301 (1980).

(n108)Footnote 108. For a discussion of Item 8 of Form 10-K, see § 4.02[1][d][v] *supra*.

(n109)Footnote 109. For a discussion of Item 601 of Regulation S-K, see § 4.03[7] *infra*.

(n110)Footnote 110. The list in response to paragraph (a) of Item 15 must contain the incorporation by reference of any financial statement, financial statement schedule, or exhibit. A financial statement schedule constitutes an "exhibit" for purposes of all rules concerning incorporation by reference. See Rule 12b-23; Item 15(a)(3), Form 10-K, reprinted in the Primary Law Sourcebook, Volume B, Section H.

(n111)Footnote 111. *Exchange Act Release No. 31,327, Fed. Sec. L. Rep. (CCH) P 85,056 (1992).* See Item 14(a)(3).

(n112)Footnote 112. See Rule 14a-3(b).

(n113)Footnote 113. Item 15(d), Form 10-K.

(n114)Footnote 114. The certification requirement applies to annual reports on Forms 10-K, 20-F and 40-F; quarterly reports on Form 10-Q; and any amendments to, and transition reports on, any of the foregoing reports.

(n115)Footnote 115. An officer who files a certification knowing that the report does not comply with the Section 906 requirements is subject to a fine of up to \$1 million or imprisonment for up to ten years, or both. A "willful" violation is punishable by a fine of up to \$5 million or up to twenty years in prison, or both. Sarbanes-Oxley Act § 906(c). While there is no penalty specified for a failure to provide the Section 906 certification, it seems clear that the

officers could be subjected to civil and criminal liability under the Exchange Act, particularly given that Section 3(b) of the Sarbanes-Oxley Act provides that a violation of the Sarbanes-Oxley Act or any rule or regulation thereunder will be treated as a violation of the Exchange Act.

(n116)Footnote 116. See Sarbanes-Oxley Act § 302. On August 27, 2002, the Commission adopted rules implementing the Section 302 Certification.

(n117)Footnote 117. In the Commission's view:

A "fair presentation" of an issuer's financial condition, results of operations and cash flows encompasses the selection of appropriate accounting policies, disclosure of financial information that is informative and reasonably reflects the underlying transactions and events and the inclusion of any additional disclosure necessary to provide investors with a materially accurate and complete picture of an issuer's financial condition, results of operations and cash flows.

(n118)Footnote 118. If the information is specifically incorporated into the Form 10-K by reference, copies of the specific materials must be filed as an exhibit and are deemed to be filed with the Commission. Rule 12b-23(b).

(n119)Footnote 119. *Exchange Act Release No. 17,114, Fed. Sec. L. Rep. (CCH) P 72,301* (1980).

(n120)Footnote 120. Rules 13a-13 and 15d-13. Issuers with securities registered under Section 12 that file annual reports on Form 10-K are required to file their quarterly reports on Form 10-Q. The exceptions are investment companies and foreign issuers required to file reports on Form 6-K by Rule 13a-16 or 15d-16. In addition, Part I of Form 10-Q need not be filed by life insurance companies and holding companies having only life insurance subsidiaries, mutual life insurance companies, and mining companies engaged primarily in the exploration or development (but not the production) of mineral deposits other than oil, gas, or coal. Rules 13a-13(b) and 15d-13(b).

(n121)Footnote 121. General Instruction A, Form 10-Q.

(n122)Footnote 122. Under Rule 12b-25, a registrant is required to notify the Commission on Form 12b-25 if the registrant is unable to file timely all or any portion of an annual report on Form 10-K, 20-F, or 11-K or a quarterly report on Form 10-Q. See n.46 *supra*, for a discussion of Rule 12b-25's requirements and procedure.

If a report is required to be filed in electronic format and the sole reason the registrant is unable to file a report within the prescribed time period is difficulties with electronic filing, the provisions of Rule 12b-25 will not apply and the registrant should refer to the applicable rules under Regulation S-T.

(n123)Footnote 123. Changes to the Form 10-Q deadlines originally followed a phase-in period that would ultimately have required accelerated filers (and probably large accelerated filers, that category not yet created at the time of the original deadline adjustments) to step-down their deadlines to thirty-five days after the end of the first three fiscal quarters. The Commission amended the deadline so that it would not be less than forty days.

(n124)Footnote 124. The Commission deleted from Form 10-Q items that required disclosure of changes in security for registered securities; increases in amount outstanding of securities or indebtedness; and decreases in amount outstanding of securities or indebtedness, in the belief that those items would be contained in footnotes to the registrant's financial statements to the extent that the information is significant. *Exchange Act Release No. 17,524, Fed. Sec. L. Rep. (CCH) P 72,308* (1981).

(n125)Footnote 125. *Exchange Act Release No. 17,524, Fed. Sec. L. Rep. (CCH) P 72,308* (1981). The Commission encourages companies to publish readable and understandable reports to stockholders and believes that by so doing companies can reduce their reporting burdens by taking advantage of the opportunity to incorporate by

reference from their informal reports in partial or full satisfaction of their quarterly reporting obligations. *Id.* See General Instruction D, Form 10-Q.

(n126)Footnote 126. The term "previously reported" is defined in Rule 12b-2:

The terms "previously filed" and "previously reported" mean previously filed with, or reported in, a statement under Section 12, a report under Section 13 or 15(d), a definitive proxy statement or information statement under Section 14 of the Act, or a registration statement under the Securities Act of 1933; *provided, that information contained in any such document shall be deemed to have been previously filed with, or reported to, an exchange only if such document is filed with such exchange.*

It should be noted, however, that if any information is incorporated by reference into an electronic format document, any portion so incorporated shall be filed as an exhibit in electronic format.

General Instruction D(3), Form 10-Q.

(n127)Footnote 127. See § 4.05 *infra*.

(n128)Footnote 128. 17 C.F.R. § 240.12b-2.

(n129)Footnote 129. General Instruction B, Form 10-Q.

(n130)Footnote 130. General Instruction G, Form 10-Q.

(n131)Footnote 131. *Id.*

(n132)Footnote 132. Rule 12b-11 under the Exchange Act, reprinted in the Primary Law Sourcebook, Volume B, Section G, will permit the use of duplicated or facsimile signatures. *Id.* See n.63 *supra*. If the principal financial officer or chief accounting officer is also duly authorized to sign on behalf of the registrant, one signature is permissible as long as the dual responsibilities of the person so signing are clearly indicated. General Instruction G, Form 10-Q.

(n133)Footnote 133. For a discussion of the required certifications, see § 4.02[1][g] *supra*.

(n134)Footnote 134. See § 4.03[7] *infra*.

(n135)Footnote 135. General Instruction F(1), Form 10-Q.

(n136)Footnote 136. General Instruction H(1), Form 10-Q.

(n137)Footnote 137. General Instruction H(2)(a), Form 10-Q. Explanations of material changes should include changes in those elements that determine revenue and expense levels, e.g., unit sales volume, prices charged and paid, production levels, production cost variances, labor costs, and discretionary spending programs. *Id.*

(n138)Footnote 138. *Id.*

(n139)Footnote 139. General Instruction H(2)(b) and (c), Form 10-Q.

(n140)Footnote 140. The Form 10-Q facing sheet is similar to that of the Form 10-K. See § 4.02[1][b] *supra*.

(n141)Footnote 141. For a discussions of the transition period reporting requirements applicable to Form 10-K and Form 10-Q filings; see n.51 *supra*.

(n142)Footnote 142. This requirement is applicable only to corporate issuers. *Exchange Act Release No. 12,521,*

Fed. Sec. L. Rep. (CCH) P 80,601 (1976), as amended by *Exchange Act Release No. 17,524, Fed. Sec. L. Rep. (CCH) P 72,308* (1981).

(n143)Footnote 143. See Form 10-Q. In its Compliance and Disclosure Interpretations, the Commission Staff confirmed that until an issuer is required to submit Interactive Data Files, it should leave the boxes on the Form 10-K and Form 10-Q unchecked. For a discussion regarding the requirements and the applicable phase-in periods for Interactive Data files see § 4.02[4] *infra*.

(n144)Footnote 144. 17 C.F.R. § 210.1001.

(n145)Footnote 145. *Exchange Act Release No. 17,524, Fed. Sec. L. Rep. (CCH) P 72,308* (1981).

(n146)Footnote 146. Rule 10-01(a)(1), Regulation S-X.

Interim balance sheets should include only major captions (i.e., numbered captions) prescribed by Regulation S-X, with the exception of inventories. If any major balance sheet caption is less than ten percent of total assets and the amount in the caption has not increased or decreased by more than twenty-five percent since the end of the preceding fiscal year, the caption may be combined with others. Rule 10-01(a)(2), Regulation S-X.

Interim statements of income should also include major captions prescribed by Regulation S-X. If any major income statement caption is less than fifteen percent of average net income for the most recent three fiscal years and the amount in the caption has not increased or decreased by more than twenty percent as compared to the corresponding interim period of the preceding fiscal year, the caption may be combined with others. Rule 10-01(a)(3), Regulation S-X.

(n151)Footnote 151. *Id.*, Rule 10-01(b)(6) and (7).

(n152)Footnote 152. *Id.*, Rule 10-01(b)(3), (4) and (5).

(n153)Footnote 153. Rule 10-01(c)(1), (2) and (3). *Exchange Act Release No. 26,556, Fed. Sec. L. Rep. (CCH) P 84,354* (1989). In lieu of the year-to-date statements specified in Rule 10-01(c)(2) and (3), registrants engaged in seasonal production and sale of a single crop agricultural commodity may provide interim statements of income and changes in financial position for the twelve month period ended during the most recent fiscal quarter and for the corresponding preceding period. *Id.*, Rule 10-01(c)(4). An interim balance sheet as of the end of the corresponding fiscal quarter of the preceding fiscal year need not be provided unless necessary for an understanding of the impact of seasonal fluctuations on the registrant's financial condition. Rule 10-01(c)(1).

(n154)Footnote 154. Rule 10-01(d), Regulation S-X.

(n155)Footnote 155. Rule 10-01(e), Regulation S-X.

(n156)Footnote 156. *Id.*

(n157)Footnote 157. Item 303 of Regulation S-K reprinted in the Primary Law Sourcebook, Volume D, Section K, is discussed in § 4.03[4][c] *infra*.

(n158)Footnote 158. Item 305 of Regulation S-K is discussed in § 4.03[4][e] *infra*.

(n159)Footnote 159. Item 307 of Regulation S-K is discussed in § 4.03[4][g] *infra*.

If the registrant is neither a large accelerated filer nor an accelerated filer, then pursuant to Item 4T of Form 10-Q, the registrant is required to furnish the information required by Items 307 and 308T(b) of Regulation S-K with respect to a quarterly period that the registrant is required to file for a fiscal year ending on or after December 15, 2007, but before December 15, 2009. Item 4T of Form 10-Q is scheduled to expire on June 30, 2010.

(n160)Footnote 160. Item 103 of Regulation S-K is discussed in § 4.03[2][c] *infra*.

(n161)Footnote 161. Instruction, Item 1, Form 10-Q. The Instruction also requires that subsequent Form 10-Q filings in the same fiscal year in which a legal proceeding or a material development is reported should reference any previous reports in that year. *Id.* Note that if substantially the same information has been previously reported by the registrant, duplicative reporting on such information in the Form 10-Q need not be made.

(n162)Footnote 162. See Item 1A of Form 10-Q.

(n163)Footnote 163. *Exchange Act Release No. 37,801, Fed. Sec. L. Rep. (CCH) P 85,852 (1996)*. Information relating to unregistered sales made in reliance on Regulation S must be furnished under Item 2(c). *Exchange Act Release No. 39,668, Fed. Sec. L. Rep. (CCH) P 86,006 (1998)*. If the Item 701 information has been included in a Current Report on Form 8-K, however, it need not be furnished. See SEC Release No. 33-8400.

(n165)Footnote 165. *Exchange Act Release No. 34-48766 (2003)*.

(n166)Footnote 166. Instruction, Item 3(a), Form 10-Q.

(n167)Footnote 167. Instruction, Item 3(b), Form 10-Q.

(n168)Footnote 168. *17 C.F.R. § 249.308*. The Commission amended Item 3, effective August 23, 2004, to include this instruction under Item 3(a). *Securities Act Release No. 33-8400 (2004)*.

(n169)Footnote 169. This information need not be provided if (a) proxies for the meeting were solicited pursuant to Regulation 14, (b) there was no solicitation in opposition to the management's nominees as listed in the proxy statements, and (c) all the nominees were elected. If the registrant did not solicit proxies and the board of directors as previously reported to the Commission was re-elected in its entirety, a statement to that effect is all that is required in response to this paragraph. Instruction 3, Item 4, Form 10-Q.

(n170)Footnote 170. See *Exchange Act Release No. 31,326, Fed. Sec. L. Rep. (CCH) P 85,051 (1992)*.

(n171)Footnote 171. "Participant" is defined in Rule 14a-11(b), see § 7.08 [1][b] *infra*.

(n172)Footnote 172. If the registrant has furnished to its security holders proxy soliciting material containing the information required by this paragraph, the information in that material may be incorporated by reference in response to this paragraph. Instruction 5, Item 4, Form 10-Q. Proxy contests subject to Rule 14a-11 of Regulation 14A are discussed in § 7.08[1] *infra*.

(n173)Footnote 173. For discussion of current reports on Form 8-K, see § 4.02[3] *infra*. If the registrant discloses information under Item 5, it need not be repeated in a report on Form 8-K that would otherwise be required to be filed concerning that information or in a subsequent report on Form 10-Q.

(n174)Footnote 174. The exhibit requirements for Form 10-Q are discussed in § 4.03[7][c] *infra*.

(n175)Footnote 175. In December 2004, the reporting requirements were amended in order to establish a separate framework for the registration and reporting of asset-backed securities due to the differences between asset-backed securities and other securities. Among the amendments is General Instruction G in the General Filing Instructions:

The following applies to registrants that are asset-backed issuers. Terms used in this General Instruction G have the same meaning as in Item 1101 of Regulation AB (17 C.F.R. § 229.1101). 1. *Reportable Events That May Be Omitted*. The registrant need not file a report on this Form upon the occurrence of any one or more of the events specified in the following: (a) Item 2.01, Completion of Acquisition or Disposition of Assets; (b) Item 2.02, Results of Operations and Financial Condition; (c) Item 2.03, Creation of a Direct Financial Obligation or an Obligation under an Off-Balance Sheet Arrangement of a Registrant; (d) Item 2.05, Costs Associated with Exit or Disposal Activities; (e) Item 2.06, Material Impairments; (f) Item 3.01, Notice of Delisting or Failure to Satisfy a Continued Listing Rule or Standard; Transfer of Listing; (g) Item 3.02, Unregistered Sales of Equity Securities; (h) Item 4.01, changes in Registrants Certifying Accountant; (i) Item 4.02, Non-Reliance on Previously Issued Financial Statements or a Related Audit Report or Completed Interim Review; (j) Item 5.01, Changes in Control of Registrant; (k) Item 5.02, Departure of Directors or Principal Officers; Election of Directors; Appointment of Principal Officers; (l) Item 5.04, Temporary Suspension of Trading Under Registrant's Employee Benefit Plans; and (m) Item 5.05, Amendments to the Registrant's Code of Ethics, or Waiver of a Provision of the Code of Ethics. 2. *Additional Disclosure for the Form 8-K Cover Page*. Immediately after the name of the issuing entity on the cover page of the Form 8-K, as separate line items, identify the exact name of the depositor as specified in its charter and the exact name of the sponsor as specified in its charter. 3. *Signatures*. The Form 8-K must be signed by the depositor. In the alternative, the Form 8-K may be signed on behalf of the issuing entity by a duly authorized representative of the servicer. If multiple servicers are involved in servicing the pool assets, a duly authorized representative of the master servicer (or entity performing the equivalent functions) must sign if a representative of the servicer is to sign the report on behalf of the issuing entity.

(n176)Footnote 176. Foreign governments, foreign private issuers required to report on Form 6-K, issuers of ADRs for securities of any foreign issuer, and registered investment companies required to file quarterly reports pursuant to Rule 30b-11 of the Investment Company Act of 1940 do not report on Form 8-K. Rules 13a-11, 15d-11.

(n177)Footnote 177. General Instruction A, Form 8-K.

(n178)Footnote 178. The Commission, as part of its integrated disclosure program, adopted amendments to Form 8-K, for current reports, to ensure that:

- (1) the provisions of Form 8-K are consistent with revised provisions of Forms 10-K and 10-Q; and
- (2) Form 8-K complements other Exchange Act reporting requirements by helping to keep corporate information and documents filed with the Commission reasonably current through prompt and accurate disclosure of material corporate developments to security holders and the investing public.

Exchange Act Release No. 18,524, Fed. Sec. L. Rep. (CCH) P 72,328 (1982).

(n179)Footnote 179. By adopting these amendments, the Commission intended to benefit markets by increasing the number of unquestionably or presumptively material events that must be disclosed. The Commission also intended to benefit investors by providing better and more timely disclosure of important corporate events. The Commission noted that, the amendments were adopted to further the goals of Section 409 of the Sarbanes-Oxley Act.

(n180)Footnote 180. *17 C.F.R. § 230.425.*

(n181)Footnote 181. *17 C.F.R. § 240.14a-12(b).*

(n182)Footnote 182. *17 C.F.R. § 240.14d-2(b).*

Form 8-K may be used by a registrant to satisfy its filing obligations pursuant to Rule 425, Rule 14a-12(b) or Rule 14d-2(b) provided that the Form 8-K filing satisfies all the substantive requirements of those rules (other than the Rule 425(c) requirement to include certain specified information in any prospectus filed pursuant to such rule). A registrant is not required to check the box in connection with Rule 14a-12(b) or Rule 14d-2(b) if the communication is filed pursuant to Rule 425. Communications filed pursuant to Rule 425 are deemed filed under the other applicable sections. General Instructions A(2), Form 8-K.

(n183)Footnote 183. Release No. 34-5430A.

(n184)Footnote 184. General Instruction D to Form 8-K, which permits a registrant to file a single Form 8-K to satisfy one or more disclosure items, was amended to allow omission of the Item 1.01 heading in a Form 8-K that also discloses any other item, so long as the substantive disclosure required by Item 1.01 is included in the Form 8-K.

(n185)Footnote 185. Regulation FD provides that when a registrant, or a person acting on its behalf, selectively discloses material, nonpublic information to securities market professionals or holders of the registrant's securities where it is reasonably foreseeable that the holders will trade on the basis of the information, then the issuer must make public disclosure of the information simultaneously, in the case of an intentional disclosure, or promptly thereafter in the case of an unintentional disclosure. Acceptable methods of public disclosure include press releases distributed through a widely circulated news or wire service, or announcements made through press conferences or conference calls that interested members of the public may attend or listen to either in person, by telephonic transmission, or by other electronic transmission. *Exchange Act Release No. 43,154, Fed. Sec. L. Rep. (CCH) P 86,319 (2000)*. Companies should note that the applicable exchange may nonetheless require disclosure of material information in a press release.

(n186)Footnote 186. General Instruction B(1), Form 8-K.

(n187)Footnote 187. The term "previously reported" is defined in Rule 12b-2.

(n188)Footnote 188. General Instruction B(3), Form 8-K.

(n189)Footnote 189. This instruction does not affect the requirement to otherwise file such documents or instruments, including as exhibits to registration statements and periodic reports pursuant to Item 601 of Regulation S-K or Item 601 of Regulation S-B. General Instructions, B(4), Form 8-K. Item 601 of Regulation S-K is discussed at § 4.03[7][a] *infra*.

(n190)Footnote 190. General Instruction E, Form 8-K. Electronic filers must retain a manually signed original for five years.

(n191)Footnote 191. A material definitive agreement is defined as an agreement that provides for obligations that are material to and enforceable against the registrant, or rights that are material to the registrant and enforceable by the registrant against one or more other parties to the agreement. Item 1.01(b), Form 8-K. An agreement is deemed to be not made in the ordinary course of business even if the agreement is such as ordinarily accompanies the kind of business conducted by the registrant if it involves the subject matter identified in Item 601(b)(10)(ii)(A)-(D) of Regulation S-K (*17 C.F.R. § 229.601(b)(10)(ii)(A)-(D)*). Instruction 1, Item 1.01, Form 8-K. The last line of Instruction 1 to Item 1.01 was deleted and replaced with a sentence specifying that agreements involving the subject matter identified in Item 601(b)(10)(iii)(A) and (B) of Regulation S-K need not be disclosed under amended Item 1.01. This change also applies to the disclosure of terminations of material definitive agreements under Item 1.02 of Form 8-K, which references the

definition of "material definitive agreements" under Item 1.01 of Form 8-K. These changes occurred under the executive compensation rules promulgated in 2006, for the primary purpose of affording Form 8-K disclosure of executive compensation. Instead of being required to be disclosed based on the general requirements with regard to material definitive agreements in Item 1.01 and Item 1.02 of Form 8-K, employment compensation arrangements are covered under Item 5.02 of Form 8-K. Release No. 34-54302A.

Effective April 2006, the Commission admitted amendments to Form 8-K requiring the surviving entity in a transaction where a shell company ceases being a shell company to make a more specific and detailed filing upon assumptions of such a transaction that is required to be reported on that form. In most cases, this will occur when the shell company acquires or is acquired by an operating business. It could also occur when the shell company acquires more than nominal assets (other than cash or cash equivalents). SEC Release 33-8587.

(n192)Footnote 192. A registrant must also provide disclosure if the registrant succeeds as a party to the agreement or amendment to the agreement by assumption or assignment (other than in connection with a merger or acquisition or similar transaction). Instruction 2, Item 1.01, Form 8-K. As amended in December 2004, with respect to asset-backed securities, as defined in Item 1101 of Regulation AB (17 C.F.R. § 229.1101), disclosure is required under this Item 1.01 regarding the entry into or an amendment to a definitive agreement that is material to the asset-backed securities transaction, even if the registrant is not a party to such agreement (e.g., a servicing agreement with a servicer contemplated by Item 1108(a)(3) of Regulation AB (17 C.F.R. § 229.1108(a)(3))).

(n193)Footnote 193. A material definitive agreement carries the same meaning as in Item 1.01.

(n194)Footnote 194. No disclosure is required solely by reason of Item 1.02 if the registrant believes in good faith that the material definitive agreement has not been terminated, unless the registrant has received notice of termination pursuant to the terms of the agreement. Instruction 2, Item 1.02, Form 8-K. As amended in December 2004, with respect to asset-backed securities, as defined in Item 1101 of Regulation AB (17 C.F.R. § 229.1101), disclosure is required under this Item 1.02 regarding the termination of a definitive agreement that is material to the asset-backed securities transaction (otherwise than by expiration of the agreement on its stated termination date or as a result of all parties completing their obligations under such agreement), even if the registrant is not a party to such agreement (e.g., a servicing agreement with a servicer contemplated by Item 1108(a)(3) of Regulation AB (17 C.F.R. § 229.1108(a)(3))).

(n195)Footnote 195. As amended in December 2004, with respect to asset-backed securities, disclosure also is required under Item 1.03 if the depositor (or servicer if the servicer signs the report on Form 10-K (17 CFR 249.310) of the issuing entity) becomes aware of any instances described in Item 1.03 with respect to the sponsor, depositor, servicer contemplated by Item 1108(a)(3) of Regulation AB (17 CFR 229.1108(a)), trustee, significant obligor, enhancement or support provider contemplated by Items 1114(b) or 1115 of Regulation AB (17 CFR 229.1114(b) or 229.1115) or other material party contemplated by Item 1101(d)(1) of Regulation AB (17 CFR 1101(d)(1)).

(n196)Footnote 196. Item 1.03(b) was added in *Exchange Act Release No. 14,618, Fed. Sec. L. Rep. (CCH) P 81,549* (1978). Prior to that amendment, Item 1.03 required only that information about such bankruptcy proceedings be filed with the Commission when the proceedings were commenced. In the Commission's view, information about bankruptcy should also be reported after the proceedings have been completed.

(n197)Footnote 197. In 2005, the Form 8-K rules were amended with respect to reporting qualifications for shell companies. The amendments trigger a heightened degree of disclosure (requiring the same type of information that would be required if the registrant were filing a general form for registration of securities under the Exchange Act) for shell companies where an event occurs that terminates the shell company status. For Item 2.01, this also includes giving information reflecting the registrant and its securities upon consummation of the transaction.

(n198)Footnote 198. Acquisitions include every purchase, acquisition by lease, exchange, merger, consolidation, succession or other acquisition, except that the construction or development of property by or for the registrant or the

acquisition of materials for such purchase are not included. Dispositions include every sale, disposition by lease, exchange, merger, consolidation, mortgage, assignment or hypothecation of assets, abandonment, destruction, or other dispositions. Instruction 2, Item 2.01, Form 8-K.

(n199)Footnote 199. An amount of assets is considered significant if the registrant's and its other subsidiaries' equity in the net book value of such assets or the amount paid or received for the assets upon such acquisition or disposition exceed 10% of the total assets of the registrant and its consolidated subsidiaries, or if the transaction involved a business (see 17 C.F.R. § 210.11-01(d)) that is significant (see 17 C.F.R. § 210.11-01(b)). Acquisitions of individually insignificant businesses are not required to be reported unless they are related (see 17 C.F.R. § 210.3-05(a)(3)) and are significant in the aggregate. Instruction 4, Item 2.01, Form 8-K.

(n200)Footnote 200. Pursuant to Section 13(d)(1)(B) of the Act

(n201)Footnote 201. The requirements (e)(1)(i) of Item 10 of Regulation S-K (17 C.F.R. § 229.10(e)(1)(i)), or, if applicable, (h)(1)(i) of Item 10 of Regulation S-B (17 C.F.R. § 228.10(h)(1)(i)) apply to Item 2.02 disclosures. Instruction 2, Item 2.02, Form 8-K. Item 2.02 does not apply to disclosures made in quarterly reports on Form 10-Q or annual reports on Form 10-K. Instruction 4, Item 2.02, Form 8-K. Additionally, Nasdaq-listed companies providing earnings or other material financial "guidance" in quarterly conference calls or webcasts must comply with Nasdaq Marketplace Rule 5250(b)(1), which require that such "guidance" be provided to the public through any Regulation FD complaint method. Any material information that would reasonably be expected to affect the value of a company's securities or influence an investors' decision, or any other event that requires the filing of a current report with the SEC should be provided to NASDAQ at least ten minutes before its public dissemination. See NASDAQ Regulatory Requirements, August 2006.

(n202)Footnote 202. Regulation G applies whenever a registrant publicly discloses or releases material information that includes financial information that is prepared other than in accordance with generally accepted accounting principles ("GAAP"). Exchange Act Release No. 47,226 (2003). For a discussion of Regulation G, see § 4.03 *infra*.

(n203)Footnote 203. Under Item 2.03, direct financial obligation means the following: 1) a long-term debt obligation, as defined in 303(a)(5)(ii)(A) of Regulation S-K; 2) a capital lease obligation, as defined in 303(a)(5)(ii)(B) of Regulation S-K; 3) an operating lease obligation, as defined in 303(a)(5)(ii)(C) of Regulation S-K; or 4) a short-term debt obligation that arises other than in the ordinary course of business. Item 2.03(c), Form 8-K. Under 2.03, off-balance sheet arrangement has the meaning set forth in 303(a)(4)(ii) of Regulation S-K. Item 2.03(d), Form 8-K. Under 2.03, short-term debt obligation means a payment obligation under a borrowing arrangement scheduled to mature within one year, or, if applicable, within a registrant's operating cycle that is longer than one year. Item 2.03(e), Form 8-K.

(n204)Footnote 204. If the obligation is a security, or a term of a security, that has been or will be sold pursuant to an effective registration statement of the registrant, 8-K disclosure is not required for this obligation, if the prospectus relating to the sale contains the information required by Item 2.03 and is filed according to Securities Act Rule 424. Instruction 5, Item 2.03, Form 8-K.

(n205)Footnote 205. Under 2.03(b)(3), the maximum amount of future payments shall not be reduced by the effect of any amounts that may possibly be recovered by the registrant under recourse or collateralization provision in any guarantee agreement, transaction or arrangement. Instruction 4, Item 2.03, Form 8-K.

(n206)Footnote 206. Under Item 2.04, direct financial obligation has the meaning provided in 2.03, but also include an obligation arising out of an off-balance sheet arrangement that is accrued under FASB Statement of Financial Accounting Standards No. 5 *Accounting for Contingencies* (SFAS No. 5) as a probable loss contingency. Item 2.04(c), Form 8-K. Under 2.04, off-balance sheet arrangement has the meaning provided in Item 2.03. Item 2.04(d), Form 8-K. Under 2.04, a triggering event is an event, including default or acceleration or similar event, as a result of which a direct

financial obligation or an obligation under an off-balance sheet arrangement is increased or becomes accelerated or as a result of which a contingent obligation of the registrant arising out of an off-balance sheet arrangement becomes a direct financial obligation of the registrant. Item 2.04(e), Form 8-K. No disclosure is required under Item 2.04 if the registrant believes in good faith that no triggering event has occurred, unless the registrant has received a notice of the occurrence of a triggering event pursuant to the terms of the agreement, transaction or arrangement and the satisfaction of all conditions to such occurrence, except the passage of time. Instruction 3, Item 2.04, Form 8-K. In December 2004, the Commission amended Item 2.04 by adding the following instruction: "With respect to asset-backed securities, as defined in 17 C.F.R. § 229.1101, disclosure also is required under this Item 2.04 if an early amortization, performance trigger or other event, including an event of default, has occurred under the transaction agreements for the asset-backed securities that would materially alter the payment priority or distribution of cash flows regarding the asset-backed securities or the amortization schedule for the asset-backed securities. In providing the disclosure required by this Item, identify the changes to the payment priorities, flow of funds or asset-backed securities as a result. Disclosure is required under this Item whether or not the registrant is a party to the transaction agreement that results in the occurrence identified."

(n207)Footnote 207. No filing is required under Item 2.06 if the conclusion is made in connection with the preparation, review or audit of financial statements required to be included in the next periodic report due under the Exchange Act, the periodic report is filed on a timely basis and such conclusion is disclosed in the report. Instruction, Item 2.06, Form 8-K.

(n208)Footnote 208. Disclosure under Item 3.01(a) and 3.01(b) is required for failure to satisfy a rule or standard for continued listing (as applicable to 3.01) even if the registrant has the benefit of a grace period during which it may cure the deficiency that triggers the disclosure requirement. Instruction 2, Item 3.01, Form 8-K. Disclosure under 3.01(a), 3.01(b), and 3.01(c) is not mandatory for notices or other communications subsequent to an initial notice that the registrant does not comply with the same rule or standard. Instruction 3, Item 3.01, Form 8-K. Registrants whose securities are quoted exclusively on automated inter-deal quotation systems are not subject to Item 3.01. Instruction 4, Item 3.01, Form 8-K.

(n209)Footnote 209. The registrant is not required to disclose any information pursuant to 3.01(a) where the delisting is a result of one of the following: 1) the entire class of the security has been called for redemption, maturity or retirement; appropriate notice thereof has been given; if required, funds sufficient for the payment of all such securities have been deposited with an agency authorized to make such payments; and such funds have been made available to security holders; 2) the entire class of the security has been redeemed or paid at maturity or retirement; 3) the instruments representing the entire class of securities have come to evidence, by operation of law or otherwise, other securities in substitution thereof and represent no other right, except, if true, the right to receive an immediate cash payment; or 4) all rights pertaining to the entire class of the security have been extinguished, provided, however, that where such an event occurs as the result of an order of a court or governmental authority, the order is final, all applicable appeal periods have expired and no appeals are pending. Instruction 1, Item 3.01, Form 8-K.

(n210)Footnote 210. The registrant has no obligation to disclose information under Item 3.02 until the registrant enters into an agreement enforceable against the registrant, whether or not subject to conditions, under which the equity securities are to be sold. Absent such an agreement, the registrant must provide disclosure within four business days after the occurrence of the closing or settlement of the transaction or arrangement under which the equity securities are to be sold.

(n211)Footnote 211. Number of shares outstanding refers to the actual number of shares of equity securities of the class outstanding and does not include outstanding securities convertible into or exchangeable for such equity securities. Instruction 1, Item 3.02, Form 8-K.

(n212)Footnote 212. A smaller reporting company is defined under Item 10(4)(1) of Regulation S-K. Instruction 2, Item 3.02, Form 8-K. Smaller reporting companies are discussed in § 4.03[12] *infra*.

(n213)Footnote 213. Working capital restrictions and other limitations upon the payment of dividends must be reported pursuant to this Item 3.03. Instruction, Item 3.03, Form 8-K.

(n214)Footnote 214. Item 304 of Regulation S-K is discussed in § 4.03[4][d] *infra*.

(n215)Footnote 215. The resignation or dismissal of an independent accountant, or its refusal to stand for re-appointment, is a reportable event separate from the engagement of a new independent accountant. On some occasions, two reports on Form 8-K are required for a single change in accountants, the first on the resignation (or refusal to stand for re-appointment) or dismissal of the former accountant and the second when the new accountant is engaged. Information required in the second Form 8-K in such situations need not be provided to the extent that it has been reported previously in the first Form 8-K. Instruction, Item 4.01, Form 8-K.

(n216)Footnote 216. Regulation G is discussed in § 4A.01[2][a] *infra*.

(n217)Footnote 217. In 2005, the Form 8-K rules were amended regarding reporting qualifications for shell companies. The amendments trigger a heightened degree of disclosure (requiring the same type of information that would be required if the registrant were filing a general registration form under the Exchange Act) for shell companies where an event occurs that terminates the shell company status. For Item 2.01, this also includes giving information reflecting the registrant and its securities upon consummation of the transaction.

(n218)Footnote 218. The determination of beneficial ownership pursuant to Exchange Act Sections 13(d) and 13(g), and the rules adopted thereunder, is discussed in § 7A.02 *infra*.

(n219)Footnote 219. Item 403(c) of Regulation S-K is discussed in § 4.03[5][c] *infra*. Note that Item 6(c) of Schedule 14A, containing the disclosure requirements governing proxy statements, requires the information called for by Item 403(c) of Regulation S-K to be reported in the proxy statement to the extent known by the person on whose behalf the proxy solicitation is being made.

(n220)Footnote 220. See *Exchange Act Release No. 15,384, Fed. Sec. L. Rep. (CCH) P 81,766* (1978). See SEC Release No. 33-8400 (2004). The disclosure requirements of Item 5.02 do not apply to a registrant that is a wholly-owned subsidiary of an issuer with a class of securities registered under Section 12 of the Exchange Act (15 U.S.C. § 78 l), or that is required to file reports under Section 15(d) of the Exchange Act (15 U.S.C. § 780(d). Instruction 1, Item 5.02, Form 8-K.

The new executive compensation rules adopted in 2006 make significant changes to Item 5.02. The changes modify the overall requirements for disclosure of employment compensation arrangements on Form 8-K and locate all such disclosure under Item 5.02. While Item 5.02 previously contained some executive compensation disclosure, the amendments require description of employment compensation arrangements involving "named executive officers" that were previously disclosed under Item 1.01. A new Instruction to Item 5.02 defines "named executive officer" for the purposes of Item 5.02 as the persons for whom disclosure was required in the most recent filing with the Commission that required disclosure under Item 402(c) of Regulation S-K or Item 402(b) of Regulation S-B, as applicable. A new Instruction to Item 5.02 excludes disclosure of plans, contracts, and arrangements to the extent they do not discriminate in scope, terms or operation, in favor of executive officers or directors of the registrant and are available generally to all salaried employees.

The increased disclosure, with a brief description of the specified matter, includes:

- information regarding retirement, resignation or termination for all named executive officers, whether or not included in the list specified in Item 5.02 prior to the amendments;
- expanding 5.02 disclosure beyond employment agreements to include a brief description of any

material plan, contract or agreement to which a covered officer or director is a party or in which he or she participates that is entered into or materially amended in connection with any of the triggering events specified in Item 5.02(c) and (d), or any grant or award to any such covered person, or modification thereto, under any such plan, contract or arrangement in connection with any such event;

- a brief description of any material new compensatory plan, contract or arrangement, or new grant or award thereunder (whether or not written), and any material amendment to any compensatory plan, contract or arrangement (or any modification to a grant or award thereunder), whether or not such occurrence is in connection with a triggering event specified in Item 5.02; provided, however, that grants, awards or modifications do not require disclosure if they are inconsistent with the terms of previously disclosed plans or arrangements and they are disclosed the next time the company is required to provide new disclosure under Item 402 of Regulation S-K; and

- salary or bonus information for the most recent fiscal year that was not available at the latest practicable date in connection with disclosure under Item 402 of Regulation S-K. This disclosure will also require a new total compensation recalculation to reflect the new salary or bonus information.

(n221)Footnote 221. Instruction 4 was added to Item 5.02 of Form 8-K as part of the executive compensation disclosure amendments in 2006, and defines "named executive officer" as those executive officers for whom disclosure was required in the registrant's most recent filing with the Commission under the Securities Act or Exchange Act that required disclosure pursuant to Item 402(c) of Regulation S-K. Release No. 34- 54302A.

(n222)Footnote 222. If the registrant intends to make a public announcement of the appointment other than by means of a report on Form 8-K, the registrant may delay filing the Form 8-K containing the disclosures required by this Item 5.02(c) until the day on which the registrant otherwise makes public announcement of the appointment of such officer. Instruction, Item 5.02(c), Form 8-K.

(n223)Footnote 223. 17 C.F.R. § 229.401(b),(d), (e) and 229.404(a), or in the case of a small business issuer, 17 C.F.R. § 228.401(a)(4), (a)(5), (c) and 228.404(a) and (b)

(n224)Footnote 224. Item 5.02(c)(3) was amended in 2006 to expand the disclosure of employment compensation arrangements, effective as to triggering events on or after November 7, 2006. Release No. 34-54302A. The instruction to 5.02(c) provides that if the registrant intends to make a public announcement of the appointment other than by means of a report on Form 8-K, the registrant may delay filing the Form 8-K containing the 5.02(c) disclosure until the day on which the registrant otherwise makes public announcement of such officer.

(n225)Footnote 225. 17 C.F.R. § 229.404(a) or 228.404(a), respectively. To the extent that any information required in Item 5.02(c)(3), 5.02(d)(3) or Item 5.02(d)(4) is not determined or is unavailable at the time of the required filing, the registrant must include a statement to this effect in the filing and then must file an amendment to its Form 8-K filing containing such information within four business days after the information is determined or becomes available. Instruction 2, Item 5.02, Form 8-K.

(n226)Footnote 226. Item 5.02(d)(5) was added in 2006 as part of the effort to move all executive compensation disclosure to Section 5.02. Release No. 34-54302A.

(n227)Footnote 227. Item 5.02(e) was added in 2006 as part of the effort to move all executive compensation disclosure to Section 5.02. Instructions to paragraph (e) were also added to (i) require disclosure under Item 5.02(e) regardless of whether the specified event is in connection with events otherwise triggering disclosure pursuant to Item 5.02; and (ii) clarify that grants or awards that are materially consistent with the previously disclosed terms of the plan, contract or arrangement need not be disclosed under Item 5.02(e), provided that the registrant has previously disclosed

such terms and the grant, award or modification is disclosed when Item 402 of Regulation S-K requires such disclosure. Instruction 3 to Item 5.02 was added to exclude the disclosure of plans, contracts or arrangements to the extent they do not discriminate in scope, terms or operation, in favor of executive officers or directors of the registrant and that are available generally to all salaried employees. Release No. 34-54302A.

(n228)Footnote 228. Item 5.02(f) was added in 2006, under the executive compensation disclosure amendments as part of the effort to move all executive compensation disclosure to Section 5.02. Release No. 34-54302A. If the salary or bonus of a named executive officer is omitted from the Summary Compensation Table as specified in Instruction 1 to Item 402(c)(2)(iii) and (iv) of Regulation S-K because the figure cannot be calculated as of the most recent practicable data, disclosure is appropriate under this Item 5.02(f) when there is a payment, grant, award, decision or other occurrence as a result of which such amounts become calculable in whole or in part.

(n229)Footnote 229. Refer to Item 601(b)(3) of regulation S-K regarding the filing of exhibits to this Item 5.03. Instruction, Item 5.03, Form 8-K. Item 601 of Regulation S-K is discussed at § 4.03[7][a] *infra*. In December 2006, the Commission amended Item 5.03 by adding the following instruction: "With respect to asset-backed securities, as defined in 17 C.F.R. § 229.1101, disclosure is required under this Item 5.03 regarding any amendment to the governing documents of the issuing entity, regardless of whether the class of asset-backed securities is reporting under Section 13 or 15(d) of the Exchange Act."

(n230)Footnote 230. 15 U.S.C. § 78l

(n231)Footnote 231. Item 5.03(a), Form 8-K.

(n232)Footnote 232. If the registrant decides later to file the report covering the transition period on a form different from the form specified in the Form 8-K, the registrant should file an amended Form 8-K stating the change. *Exchange Act Release No. 26,589, Fed. Sec. L. Rep. (CCH) P 72,435 (1989). See § 4.02[1][a], supra*, for a discussion of the reporting requirements applicable to a change in fiscal year. *See Exchange Act Release No. 46,084 (2002) for proposed changes to this Item.*

(n233)Footnote 233. 29 U.S.C. § 1021(i)(2)(E).

(n234)Footnote 234. The term "waiver" means the approval by the registrant of a material departure from a provision of the code of ethics, and the term "implicit waiver" means the registrant's failure to take action within a reasonable period of time regarding a material departure from a provision of the code of ethics that has been made known to an executive officer, as defined in Rule 3b-7 of the Exchange Act. Instruction 2, Item 10. Exchange Act Release No. 47,235 (2003).

(n235)Footnote 235. Item 5.05(a). For a detailed discussion of Item 406 of Regulation S-K and the definition of "code of ethics," *see § 4.03[5][f] infra*.

(n236)Footnote 236. Item 5.05, Form 8-K. Only amendments or waivers relating to the specified officers must be disclosed. Instruction 1, Item 5.05, Form 8-K.

(n237)Footnote 237. Item 5.05(b), Form 8-K.

(n238)Footnote 238. Item 5.05(c), Form 8-K.

(n239)Footnote 239. Asset-backed security, or ABS, generally means a security that is primarily serviced by the cash flows of a discrete pool of receivables or other financial assets, either fixed or revolving, that by their terms convert into cash within a finite time period, plus any rights or other assets designed to assure the servicing or timely distributions of proceeds to the security holders. The Commission adopted final rules regarding the regulation, disclosure and reporting requirements for an ABS. According to the adopting release in December 2004, the

Commission felt that an ABS required more disclosure as to servicing, transaction structure, characteristics and quality of the asset pool.

(n240)Footnote 240. ABS information and computational material means a written communication consisting solely of one or some combination of the following: (i) factual information regarding the asset-backed securities being offered and the structure and basic parameters of the securities, and descriptive information relating to each class; (ii) factual information regarding the pool assets underlying the asset-backed securities, including the factual information concerning the parameters of the asset pool appropriate to the nature of the underlying assets, such as the type of assets comprising the pool and the programs under which the loans were originated; (iii) identification of key parties to the transaction, such as services, trustees, depositors, sponsors, originators and providers of credit enhancement or other support, including a brief description of each party's roles, responsibilities, background and experiences; (iv) static pool data, as referenced in Item 1105 of Regulation AB (for amortizing asset pools), such as for the sponsor's and/or servicer's portfolio, prior transactions or the asset pool itself; (v) statistical information displaying for a particular class of asset-backed securities the yield, average life, expected maturity, interest rate sensitivity, cash flow characteristics, total rate of return, option adjusted spread or other financial or statistical information relating to the class or classes under specified prepayment, interest rate, loss or other hypothetical scenarios; (vi) the names of the underwriters participating in the offering of the securities, and other additional roles, if any, within the underwriting syndicate; (vii) the anticipated schedule for the offering (including the approximate date upon which the proposed sale to the public will begin) and a description of marketing events (including the dates, times, locations, and procedures for attending or otherwise accessing them); and (viii) a description of the procedures by which the underwriters will conduct the offering and the procedures for transactions in connection with the offering with an underwriter or participating dealer.

(n241)Footnote 241. Regulation AB is the source of various disclosure items and requirements for asset-backed securities filings under the Securities Act and Exchange Act. Item 1100(a).

(n242)Footnote 242. See *Exchange Act Release No. 43,154, Fed. Sec. L. Rep. (CCH) P 86,319* (2000).

(n243)Footnote 243. General Instructions, Form 8-K. See also, *Exchange Act Release No. 43,154, Fed. Sec. L. Rep. (CCH) P 86,319* (2000). An issuer can use other Exchange Act filings, such as a Form 10-Q, to make requisite public disclosure of information. See *Telephone Interpretations Manual No. 5* (October 2000).

(n244)Footnote 244. Item 8.01 of Form 8-K was amended to permit a registrant to include in Form 8-K any other information that the registrant deems of importance to security holders. Prior to the amendment, Item 8.01 required inclusion of information of "material" importance to security holders. *Exchange Act Release No. 18,524, Fed. Sec. L. Rep. (CCH) P 72,378* (1982).

(n245)Footnote 245. General Instruction B(1), Form 8-K

(n246)Footnote 246. General Instruction B(5), Form 8-K

(n247)Footnote 247. In June 2004, the Commission amended Item 9.01 to require a registrant that was a shell company immediately before a transaction required to be described in Item 2.01 or Item 5.01 of this form to file the financial statements required by those items in the initial report."

(n248)Footnote 248. Item 9.01(a)(1), Form 8-K. The examination, form, and content of the financial statements filed as part of the current report on Form 8-K is governed by Regulation S-X, discussed in § 4A.01[2][a] *infra*; however, no supporting schedules need be filed. Item 9.01(a)(2), Form 8-K. The financial statements must cover the time periods described in Rule 3-05(b) of Regulation S-X. Item 9.01(a)(1), Form 8-K. The financial statements must be accompanied by a manually signed accountant's report pursuant to Rule 2-02 of Regulation S-X. Item 9.01(a)(2), Form 8-K. Where one or more real estate properties are acquired, the registrant must file the financial statements and additional information specified by Rule 314 of Regulation S-X. Item 9.01(a)(3), Form 8-K.

(n249)Footnote 249. Item 9.01(a)(4), Form 8-K. *See Exchange Act Release No. 37,802, Fed. Sec. L. Rep. (CCH) P85,851 (1996).*

(n250)Footnote 250. *Exchange Act Release No. 35,113, Fed. Sec. L. Rep. (CCH) P 85,475 (1995).*

(n251)Footnote 251. Instruction 2, Item 9.01. *Exchange Act Release No. 35,897, Fed Sec. L. Rep. (CCH) P 85,640 (1995)*, allowing registrations and sales if financials are not readily available.

(n252)Footnote 252. The Item 9.01(a)(4) provision concerning the delayed filing of financial statements also applies to the filing of pro forma financial information. Item 9.01(b)(2), Form 8-K.

(n253)Footnote 253. Item 601 of Regulation S-K is discussed at § 4.03[7][a] *infra*. General Instruction F, "Incorporation by Reference," to Form 8-K permits registrants to incorporate by reference, rather than restate in the current report on Form 8-K, press releases or other communications to stockholders containing the required information, provided copies of the press releases or other documents are filed as exhibits to the Form 8-K.

CHAPTER 4 Exchange Act Registration and Reporting Requirements

1-4 Federal Securities Exchange Act of 1934 § 4.03

AUTHOR: Brandon C. Parris, Andrew D. Thorpe

§ 4.03 Integrated Disclosure--Regulation S-K

Regulation S-K was adopted in 1977 to increase the uniformity and integration of disclosure called for by the registration, reporting, and proxy solicitation requirements of the Securities Act and the Exchange Act. n1 Prior to the adoption of Regulation S-K, the Commission's forms and regulations contained separate disclosure requirements for each type of filing under both the Securities Act and the Exchange Act. Since its adoption, the Regulation has evolved into a centralized source of all disclosure requirements for periodic reports, proxy solicitations, and registration statements. n2

Regulation S-K is divided into eleven sections: (1) General; (2) Business; (3) Securities of the Registrant; (4) Financial Information; (5) Management and Certain Security Holders; (6) Registration Statement and Prospectus Provisions; (7) Exhibits; (8) Miscellaneous; (9) List of Industry Guides; (10) Roll-up Transactions; and (11) Disclosure by Registrants Engaged in Oil and Gas-Producing Activities. n3

[1] General

The first section of Regulation S-K, "General," contains six parts: "Application of Regulation S-K," "Commission Policy on Projections," "Commission Policy on Security Ratings," "Incorporating by Reference," "Use of Non-GAAP Financial Measures in Commission Filings," and "smaller reporting companies."

[a] Application of Regulation S-K. This part provides that Regulation S-K is applicable to registration statements under the Securities Act, registration statements, annual or other reports under the Exchange Act, annual reports to security holders and proxy and information statements, and any other documents required to be filed under the Exchange Act, to the extent provided in the forms and rules under the Securities Act and the Exchange Act.

[b] Commission Policy on Projections. This part contains the Commission's policy on disclosure of projections, which encourages the use in those documents specified in Rule 175 under the Securities Act and Rule 3b-6 under the Exchange Act n4 of management's good faith projections of future economic performance that have a reasonable basis and are presented in an appropriate format. The part provides that a history of operations, experience in projecting, or an outside review, among other things, may provide a reasonable basis for projections. The part also provides that in determining the appropriate format for projections, consideration must be given to, among other things, the financial

items to be projected, the period to be covered, and the manner of presentation to be used. Projections should be accompanied by disclosures that provide investors with an understanding of the basis for and the limitations of the projections, including the assumptions that, in management's opinion, are most significant to the projections or are the key factors upon which the financial results of the enterprise depend. Consideration should also be given to disclosures concerning the accuracy or inaccuracy of previous projections; and the discontinuance or resumption of providing projections should have a reasonable basis.

[c] Commission Policy on Security Ratings. This part contains the Commission's policy on disclosure of security ratings, which permits registrants to disclose, on a voluntary basis, ratings assigned by:

- rating organizations to classes of debt securities, convertible debt securities, and preferred stock in registration statements and periodic reports; and
- nationally recognized statistical rating organizations ("NRSROs") in certain communications deemed not to be a prospectus, i.e., "tombstone advertisements."

The Commission's view is that if a registrant includes a security rating in a registration statement or periodic report filed with the Commission, the registrant should also consider including: any other rating intended for public dissemination assigned to the class of securities by a NRSRO that is available on the date of the initial filing of the document and that is materially different from any rating disclosed; and the name of each rating organization whose rating is disclosed, each such rating organization's description of the category in which it rated the class of securities, the relative rank of each rating within the assigning rating organization's overall classification system, and certain disclaimers concerning the rating. Certain written consents must be included with the ratings.

Registrants should consider disclosing in an amendment or an additional filing with the Commission any material change in a security rating included in a registration statement or report. If there is a material change in the rating assigned by any NRSRO to any class of securities of a registrant subject to the reporting requirements of Section 13(a) or 15(d), the registrant should consider filing a Form 8-K or another appropriate report disclosing the rating change.

[d] Incorporation by Reference. This part contains the Commission's policy that where rules, regulations, or instructions to forms permit it, a document previously filed with the Commission may be incorporated by reference to the specific document and to the prior filing or submission in which such document was physically filed or submitted. In addition, registrants or issuers, unless expressly required, may not reference any document that incorporates another document by reference if the pertinent portion of the document containing the information or financial statements to be incorporated by reference includes an incorporation by reference to another document. This part also indicates that no document on file with the Commission for more than five years may be incorporated by reference except: (1) documents contained in registration statements as long as the registrant has a reporting requirement with the Commission; or (2) documents that the registrant specifically identifies by physical location or by Commission file number, provided such materials have not been disposed of by the Commission pursuant to its Records Control Schedule.

[e] Use of Non-GAAP Financial Measures in Commission Filings. n5 Subject to certain exceptions, whenever a registrant includes one or more non-GAAP financial measures in a filing with the Commission, this part requires the registrant to include the following in the filing:

- a presentation, with equal or greater prominence, of the most directly comparable financial measure or measures calculated and presented in accordance with GAAP;
- a reconciliation (by schedule or other clearly understandable method), which shall be quantitative for historical non-GAAP measures presented, and quantitative, to the extent available without unreasonable

efforts, for forward-looking information, of the differences between the non-GAAP financial measure disclosed or released with the most directly comparable financial measure or measures calculated and presented in accordance with GAAP;

- a statement disclosing the reasons why the registrant's management believes that presentation of the non-GAAP financial measure provides useful information to investors regarding the registrant's financial condition and results of operations; and

- to the extent material and not already disclosed, a statement disclosing the additional purposes, if any, for which the registrant's management uses the non-GAAP financial measure. n6

Further, a registrant must not:

- exclude charges or liabilities that required, or will require, cash settlement, or would have required cash settlement absent an ability to settle in another manner, from non-GAAP liquidity measures, other than the measures earnings before interest and taxes (EBIT) and earnings before interest, taxes, depreciation, and amortization (EBITDA);

- adjust a non-GAAP performance measure to eliminate or smooth items identified as non-recurring, infrequent or unusual, when the nature of the charge or gain is such that it is reasonably likely to recur within two years or there was a similar charge or gain within the prior two years;

- present non-GAAP financial measures on the face of the registrant's financial statements prepared in accordance with GAAP or in the accompanying notes;

- present non-GAAP financial measures on the face of any pro forma financial information required to be disclosed by Article 11 of Regulation S-X; or

- use titles or descriptions of non-GAAP financial measures that are the same as, or confusingly similar to, titles or descriptions used for GAAP financial measures. n7

For purposes of this part, a non-GAAP financial measure is a numerical measure of a registrant's historical or future financial performance, financial position or cash flows that:

- excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable measure calculated and presented in accordance with GAAP in the statement of income, balance sheet or statement of cash flows (or equivalent statements) of the issuer; or

- includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable GAAP measure so calculated and presented. n8

[f] Smaller Reporting Companies. n9

The requirements of Regulation S-K apply to smaller reporting companies. A smaller reporting company may comply with either the requirements applicable to smaller reporting companies or the requirements applicable to other companies for each item of Regulation S-K, unless the requirements for smaller reporting companies specify that smaller reporting companies must comply with the smaller reporting company requirements. The items of Regulation S-K that contain requirements that are different for smaller reporting companies than the requirements applicable to other companies include:

Item 101	Description of business
Item 201	Market price of and dividends on registrant's common equity and related stockholder matters
Item 301	Selected financial data
Item 302	Supplementary financial information
Item 303	Management's discussion and analysis of financial condition and results of operations
Item 305	Quantitative and qualitative disclosures about market risk
Item 402	Executive compensation
Item 404	Transactions with related persons, promoters and certain control persons
Item 407	Corporate governance
Item 503	Prospectus summary, risk factors, and ratio of earnings to fixed charges
Item 504	Use of proceeds
Item 601	Exhibits

[2] Business

The second section of Regulation S-K, "Business," contains three items: "Description of Business," "Description of Property," and "Legal Proceedings."

[a] Item 101. Description of Business.

Item 101 of Regulation S-K, "Description of Business," contains eight pertinent parts: "General Development of Business," "Financial Information About Segments," "Narrative Description of Business," "Financial Information About Geographic Areas," "Available Information," "Reports to Security Holders," "Enforceability of Civil Liabilities Against Foreign Persons," and "Smaller Reporting Companies." The Commission may permit, upon the written request of the registrant and if consistent with the protection of investors, the omission of, or the substitution of comparable information for, any information required by Item 101. n10

[i] General Development of Business. Part (a) of Item 101, "General Development of Business," requires a description of the general development of the business of the registrant, its subsidiaries, and any predecessors during the prior five fiscal years, or such shorter period as the registrant has been engaged in business. Earlier periods should be disclosed if material to an understanding of the general development of the business. The description of developments should include the following information:

- the year in which the registrant was organized and the registrant's form of organization;
- the nature and results of any bankruptcy, receivership, or similar legal proceedings involving the registrant or any of its significant subsidiaries;
- the nature and results of any material reclassification, merger, or consolidation of the registrant or any of its significant subsidiaries;
- the acquisition or disposition of any material amount of assets not in the ordinary course of business; and
- any material changes in the mode of conducting the business. n11

Registrants filing a Registration Statement on Form S-1 under the Securities Act or on Form 10 under the Exchange Act, n12 that are not subject to the reporting requirements of Section 13(a) or Section 15(d) n13 of the Exchange Act immediately prior to the filing and that (including predecessors) have not had operating revenues for each of the last three fiscal years, must also describe their future plan of operation. n14

[ii] Financial Information About Segments. Part (b) of Item 101, "Financial Information About Segments," requires the registrant to report for each segment, as defined by generally accepted accounting principles, revenues from external customers, a measure of profit or loss, and total assets n15 for the last three fiscal years or for each fiscal year the registrant has been engaged in business, whichever period is shorter. In lieu of presenting duplicate information about its operating segments, n16 a registrant may reference its financial statements. n17

[iii] Narrative Description of Business. Part (c) of Item 101, "Narrative Description of Business," requires a description of the business done and intended to be done by the registrant and its subsidiaries focusing on the registrant's dominant segment or each of the reportable segments about which financial information is presented in the financial statements. The following information, to the extent material to an understanding of the registrant's business as a whole, n18 must be presented for each segment:

- the principal products produced and services rendered by the registrant in the segment and the principal markets for, and methods of distribution of, the segment's principal products and services, plus quantification of the amount or percentage of the total revenue contributed by any significant class of similar products or services accounting for ten percent or more of consolidated annual revenue for the last three fiscal years or fifteen percent or more of consolidated revenue if total revenue did not exceed \$50,000,000 during any of such fiscal years;
- the status of any material new product or segment, if the registrant has made available public information about it;
- the sources and availability of raw materials;
- the importance to the segment and the duration and effect of all patents, trademarks, licenses, franchises, and concessions held;
- the extent to which the business of the segment is or may be seasonal;
- the practices of the registrant and the industry relating to working capital items;
- the dependence of the segment upon a single or a few customers, the loss of any one or more of which would have a material adverse effect on the segment; n19
- the dollar amount of backlog orders believed to be firm as of a recent date and as of a comparable date in the preceding fiscal year, together with an indication of the portion thereof not reasonably expected to be filled within the current fiscal year, and seasonal or other material aspects of the backlog; n20
- any material portion of the business subject to renegotiation of profits or termination of contracts at the election of the government; and
- competitive conditions in the business including, where material, the identity of particular markets where the registrant competes and estimates of the number of competitors and registrant's competitive position; consideration must also be given to the principal products or services of the segment, if any.

n21

Registrants must also disclose the following information with respect to the registrant's business in general and, if material, must identify the segments to which the information is significant. Registrants must disclose, if the amount is material, the estimated amount spent during each of the last three fiscal years on company-sponsored research and development activities, determined in accordance with generally accepted accounting principles, and, if material, the estimated amount spent in each of such years on customer-sponsored research activities. In addition, the registrant must disclose the material effects of compliance with federal, state, and local environmental protection laws upon the capital expenditures, earnings, and competitive position of the registrant and its subsidiaries, as well as any material capital expenditures for environmental control facilities for the remainder of its current year and its succeeding fiscal year and for such further periods as the registrant may deem material. Finally, the number of persons employed by the registrant must be disclosed. n22

[iv] Financial Information About Geographic Areas. Part (d) of Item 101, "Financial Information About Geographic Areas," requires that the registrant disclose for each of its last three fiscal years, or for each fiscal year the registrant has been engaged in business, whichever period is shorter, revenues from external customers deriving from: the registrant's country of domicile; all foreign countries in total from which the registrant derives revenues; and any individual foreign country if material. In addition, a registrant must disclose the basis for attributing revenues from external customers to individual countries. n23 The registrant must also disclose long-lived assets, other than financial instruments, long-term customer relationships of a financial institution, mortgage and other servicing rights, deferred policy acquisition costs, and deferred tax assets located in: the registrant's country of domicile; all foreign countries in which it holds assets; and any individual foreign country if material. As with Item 101(b), n24 Item 101(d) permits cross-reference to and from the registrant's financial statements under certain circumstances. Restatement of prior period information is required in certain cases.

[v] Available Information. Part (e) of Item 101, "Available Information" requires that certain registrants meeting the definition of "accelerated filer" or "large accelerated filer" n25 disclose their Internet address in Form 10-K, if they have an Internet address, and indicate whether they make available, free of charge or through such Internet website, annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished to the Commission. If such accelerated filers do not make such filings available in this manner, they must disclose the reasons for not doing so and whether they will voluntarily provide electronic or paper copies of their filings free of charge upon request. n26 Additionally, pursuant to part (e) of Item 101, a registrant must disclose the following information in any registration statement it files with the Commission: (1) whether it files reports with the Commission, and, if it is a reporting company, the reports and other information it files with the Commission; and (2) that the public may read and copy any materials the registrant files with the Commission at its Public Reading Room, and, if the registrant is an electronic filer, on the Commission's website. n27

[vi] Reports to Security Holders.

Part (f) of Item 101, "Reports to Security Holders," requires registrants to disclose in any registration statement filed under the Securities Act (i) a brief description of the nature and frequency of reports that the registrant will give to security holders if the Commission's proxy rules or regulations, or stock exchange requirements, do not require the registrant to send an annual report to security holders or to holders of American depository receipts, and (ii) whether the reports that the registrant give will contain financial information that has been examined and reported on, with an opinion expressed "by" an independent public or certified public accountant. For registrants that are foreign private issuers, the registrant must state whether the report will include a reconciliation of financial information with United States generally accepted accounting principles if the report contains financial information that was not prepared in accordance with United States generally accepted accounting principles. n28

[vii] Enforceability of Civil Liabilities Against Foreign Persons.

Part (g) of Item 101, "Enforceability of Civil Liabilities Against Foreign Persons," requires registrants that are foreign private issuers filing registration statements under the Securities Act to make certain disclosures regarding an investor's ability to bring actions under the civil liability provisions of the United States federal securities laws against the registrant, its officers, directors and underwriters. n29

[viii] Smaller Reporting Companies. n30

Part (h) of Item 101, "Smaller Reporting Companies," provides that a registrant that meets the definition of smaller reporting company can satisfy its disclosure obligations under Item 101 of Regulation S-K by describing the development of its business during the last three years. If the smaller reporting company has not been in business for three years, then it can give the same information for predecessor(s) of the smaller reporting company if there are any. This business development description should include:

- Form and year of organization.
- Any bankruptcy, receivership or similar proceeding.
- Any material reclassification, merger, consolidation, or purchase or sale of a significant amount of assets not in the ordinary course of business.
- Business of the smaller reporting company (in response to the specific items addressed in 101(h) of Regulation S-K).

[b] Item 102. Description of Property. Item 102 of Regulation S-K, "Description of Property," requires a brief description of the location and general character of the principal plants, mines, and other materially important physical properties of the registrant and its subsidiaries, with identification of the segments that use the properties described. n31 Item 102 also requires the registrant to state whether any of the described properties is not held in fee or is held subject to any major encumbrance, and, if so, to briefly describe how the property is held. In addition, Item 102 provides specific disclosure requirements for certain extractive enterprises n32 and reserve estimates. n33 In connection with the oil and gas modernization amendments that are effective January 1, 2010, registrants who are engaged in oil and gas producing activities or significant mining operating will be required to provide additional disclosures called for by the relevant Industry Guide applicable to the registrant's business. n34

[c] Item 103. Legal Proceedings. Item 103 of Regulation S-K, "Legal Proceedings," requires a brief description of any material pending legal proceedings, other than ordinary routine litigation incidental to the business, to which the registrant or any of its subsidiaries is a party or of which any of their property is the subject. A pending legal proceeding need not be described if: the business ordinarily results in actions for negligence or other claims and the proceeding does not depart from the normal kind of those actions; n35 or the proceeding involves primarily a claim for damages and the amount involved, exclusive of interest and costs, does not exceed ten percent of the current assets of the registrant and its subsidiaries on a consolidated basis. n36

Notwithstanding the foregoing, the following legal proceedings must be described:

- any material bankruptcy, receivership, or similar proceeding with respect to the registrant or any of its significant subsidiaries; n37
- any material proceeding to which any director, officer, or affiliate of the registrant, more than five percent beneficial owner or owner of record of a class of voting securities of the registrant, or an associate of any of those persons, is an adverse party or has a material interest adverse to the registrant or any of its subsidiaries; n38 and

■ any administrative or judicial proceeding (including proceedings which present in large degree the same issues) arising under any federal, state, or local provisions regulating the discharge of materials into the environment or primarily for the purpose of protecting the environment if: (a) the proceeding is material to the business or financial condition of the registrant; (b) the proceeding involves primarily a claim for damages, or involves potential monetary sanctions, capital expenditures, deferred charges, or charges to income of an amount, exclusive of interest and costs, exceeding ten percent of the current assets of the registrant and its subsidiaries on a consolidated basis; or (c) a governmental authority is a party to the proceeding and the proceeding involves potential mandatory sanctions, n39 unless the registrant reasonably believes that the proceeding will result in no monetary sanctions, or in monetary sanctions of less than \$100,000, exclusive of interest and costs. n40

If a material legal proceeding is pending, or is known to be contemplated by governmental authorities, the registrant should include the following or similar information:

- the court or agency in which the proceeding is pending;
- the date the proceeding was instituted;
- the principal parties to the proceeding;
- a description of the factual basis alleged to underlie the proceeding; and
- the relief sought.

[3] Securities of the Registrant

The third section of Regulation S-K, "Securities of the Registrant," contains two items: "Market Price of and Dividends on the Registrant's Common Equity and Related Stockholder Matters" and "Description of Registrant's Securities."

[a] Item 201. Market Price of and Dividends on the Registrant's Common Equity and Related Stockholder Matters.

Item 201 of Regulation S-K, "Market Price and Dividends on the Registrant's Common Equity and Related Stockholder Matters," contains five parts: "Market Information," "Holders," "Dividends," "Securities Authorized for Issuance under Equity Compensation Plans," and "Performance Graph."

[i] Market Information. Part (a) of Item 201, "Market Information," requires the registrant to identify the principal U.S. market(s) in which each class of the registrant's common equity is being traded. n41 If the principal U.S. market for the registrant's common equity is an exchange, the registrant must state the high and low sales prices for the equity for each full quarterly period within the two most recent fiscal years and any subsequent interim period for which financial statements are included, or are required to be included by Article 3 of Regulation S-X or Article 8 in the case of smaller reporting companies, n42 as reported in the consolidated transaction reporting system, or if not reported in that system, as reported on the principal exchange market for the equity. n43 If the principal U.S. market for the registrant's common equity is not an exchange, the registrant must state the range of high and low bid information for the same periods, as regularly quoted on the automated quotation system of a registered securities association, or if not quoted on a quotation system, the range of quotations as reported, with the source of the quotations indicated. n44

If there is no established public trading market n45 for a class of the registrant's common equity, a statement to that effect must be furnished n46 and reference to bid quotations must be qualified by appropriate explanation. n47 In

addition, if market information is being presented in a registration statement on Form S-1 under the Securities Act, or on Form 10 under the Exchange Act relating to a class of common equity for which at the time of filing there is no established United States public trading market, the registrant must indicate the amount of common equity that:

- is subject to outstanding options or warrants to purchase, or securities convertible into, the registrant's common equity;
- could be sold under Securities Act Rule 144 n48 or that the registrant has agreed to register under the Securities Act for sale by security holders; or
- is being publicly offered (or has been publicly proposed to be offered), unless it is offered pursuant to an employee benefit or dividend reinvestment plan, the offering of which could have a material effect on the market price of the registrant's common equity. n49

If the market information required by Item 201 is presented in a registration statement or a proxy or information statement, the registrant must also include price information as of the latest practicable date, and if the securities are to be issued in connection with an acquisition, business combination, or other reorganization, as of the date immediately prior to the public announcement of the transaction. n50

Foreign registrants must also identify the principal established foreign public trading market, if any, for their common equity n51 and provide market price information comparable, to the extent practicable, to that required for the principal U.S. market. n52 Such price information may be stated in the currency in which it is quoted, or may be translated into U.S. currency at the exchange rate in effect on the date such information was reported on the foreign exchange. If the primary U.S. market for the registrant's common equity trades using American Depositary Receipts, the U.S. prices shall be disclosed on that basis. n53

[iii] Holders. Part (b) of Item 201, "Holders," requires the registrant to disclose the approximate number of holders of each class of the registrant's common equity as of the latest practicable date. n54 If this information is presented in a registration statement or a proxy or information statement relating to an acquisition, business combination, or other reorganization, the registrant must indicate the effect of the transaction on the amount and percentage of present holdings of the registrant's common equity beneficially owned by the following persons:

- any person who is known to the registrant to be the beneficial owner of more than five percent of any class of the registrant's common equity;
- each director and nominee; and
- all directors and officers as a group. n55

The effect of the transaction on the registrant's present commitments to these persons with respect to the issuance of shares of any class of the registrant's common equity must also be indicated. n56

[iii] Dividends. Part (c) of Item 201, "Dividends," requires the registrant to state the frequency and amount of any cash dividends declared on each class of its common equity for the two most recent fiscal years and any subsequent interim period for which financial statements are required to be presented by Article 3 of Regulation S-X. n57 Restrictions on the ability of the registrant to pay dividends currently or in the future, or on the ability of the registrant's subsidiaries to transfer cash dividends, loans, or advances to the registrant, must be described briefly. n58 If the registrant has a record of not paying cash dividends although its earnings indicate that it has the ability to do so, the registrant is encouraged to consider the question of its intention to pay cash dividends in the foreseeable future, and if no such intention to pay cash dividends exists, to state that fact. n59 Registrants that have a history of paying cash

dividends are encouraged to indicate whether they expect comparable cash dividends to be paid in the future, and, if not, the nature of the expected change in the amount or rate of payment. n60

[iv] Securities Authorized for Issuance Under Equity Compensation Plans. Part (d) of Item 201, "Securities Authorized for Issuance Under Equity Compensation Plans," requires the inclusion, in tabular form, of information concerning compensation plans, including individual compensation arrangements, under which the registrant's equity securities are authorized for issuance. The table must distinguish between (i) compensation plans previously approved by security holders and (ii) compensation plans not previously approved by security holders and within these two categories must depict: (a) the number of securities to be issued upon the exercise of outstanding options, warrants, and rights; (b) the weighted-average exercise price of the outstanding options, warrants, and rights disclosed pursuant to (a); and (c) other than securities to be issued upon the exercise of the outstanding options, warrants, and rights disclosed pursuant to (a). n61 In addition, for each compensation plan under which the registrant's equity securities are authorized for issuance that was adopted without the approval of security holders, the registrant must also briefly describe, in narrative form, the material features of such plan. n62

[v] Performance Graph. Item 201(e) requires registrants to provide a line graph comparing, over a minimum period of five consecutive years through and including the company's last full fiscal year, n63 the yearly percentage change in the registrant's cumulative total stockholder return n64 against that of a broad equity market index assuming reinvestment of dividends. This index includes companies whose equity securities are traded on the same exchange, or one of a comparable market capitalization such as the S&P 500 Stock Index, n65 and that of either a published industry or line-of-business index n66 or a company-constructed peer group or similar market capitalization group index. n67 Companies will be expected to use the same index from year to year unless a narrative discussion is provided explaining the reasons for change in indices and comparing return on equity on both the old and the new index for the graph. n68 If the registrant uses a peer issuer comparison or comparison with issuers with similar market capitalizations, the identity of those issuers must be disclosed and the return of each component issuer of the group must be weighted according to the respective issuer's stock market capitalization at the beginning of each period for which a return is indicated. n69

Registrants may include comparisons using performance measures in addition to total return, such as return on average common stockholders' equity, so long as the compensation committee discusses the link between that measure and the level of executive compensation in the statement under Item 402(k). n70 Electronic filers subject to this requirement are required to describe the omitted performance graph by presenting the graph's data points in tabular form. n71

Registrants that qualify as smaller reporting companies are not required to provide the information required by Item 201(e) of Regulation S-K. n72

[b] Item 202. Description of Registrant's Securities.

Item 202 of Regulation S-K, "Description of Registrant's Securities," contains six parts: "Capital Stock," "Debt Securities," "Warrants and Rights," "Other Securities," "Market Information for Securities Other than Common Equity," and "American Depositary Receipts." If the securities being described pursuant to Item 202 have been accepted for listing on an exchange, the registrant may identify the exchange. n73 Foreign registrants must provide information in addition to the information required of domestic registrants in the description of securities. n74

[i] Capital Stock. Part (a) of Item 202, "Capital Stock," requires that if capital stock is to be registered, the registrant must state the title of the class n75 and, to the extent relevant, briefly outline:

- dividend rights;
- terms of conversion;
- sinking fund provisions;

1-4 Federal Securities Exchange Act of 1934 § 4.03

- redemption provisions; n76
- voting rights, including any provisions specifying the vote required by security holders to take action;
- any classification of the board of directors, and the impact of such classification where cumulative voting is permitted or required;
- liquidation rights;
- preemption rights;
- liability to further calls or to assessments by the registrant and for liabilities of the registrant imposed on the registrant's stockholders under state statutes, e.g., to laborers, servants, or employees of the registrant, unless that information is immaterial because the financial resources of the registrant or other factors make it improbable that liability under the state statutes would be imposed;
- any restriction on alienability of the securities to be registered; and
- any provision discriminating against any existing or prospective holder of the securities as a result of such security holder owning a substantial amount of securities. n77 The registrant must also indicate and briefly explain:
 - if the rights of holders of capital stock may be modified other than by a vote of at least a majority of the outstanding shares voting as a class; n78
 - if preferred stock is to be registered, any restriction on the repurchase or redemption of shares by the registrant while there is any arrearage in the payment of dividends or sinking fund installments; n79 and
 - any provision of its charter or bylaws that would have the effect of delaying, deferring, or preventing a change in control of the registrant and that would operate only with respect to an extraordinary corporate transaction involving the registrant or any of its subsidiaries, such as a merger, reorganization, tender offer, sale or transfer of substantially all the registrant's or subsidiary's assets, or liquidation, unless the provision was required by law or imposed by governmental or judicial authority. n80

If the rights evidenced by, or amounts payable with respect to, the capital stock to be registered may be materially limited or qualified by the rights of any other authorized class of securities, the registrant must include information about the other class (unless that class is to be retired and steps have been taken to ensure that the retirement will be completed prior to or upon delivery of the capital stock) that will enable investors to understand the limitations or qualifications. n81

[ii] Debt Securities. Part (b) of Item 202, "Debt Securities," requires that if debt securities are to be registered, n82 the registrant must state:

- the title of the securities; n83
- the principal amount being offered; and

- if a series, the total amount authorized and the total amount outstanding as of the most recent practicable date.

To the extent relevant, the registrant must also briefly outline:

- provisions relating to maturity, interest, conversion, redemption, amortization, sinking fund, or retirement; n84
- provisions relating to the kind and priority of any lien securing the securities, and an identification of the principal properties subject to the lien;
- provisions relating to the subordination of the rights of holders of the securities to other security holders or creditors of the registrant and, if the debt securities being offered are designated subordinated, the amount as of the most recent practicable date of senior indebtedness outstanding and any limitation on the issuance of additional senior indebtedness or that there is no such limitation;
- provisions restricting the declaration of dividends or requiring the maintenance of any asset ratio or the creation or maintenance of reserves;
- restrictions on the incurrence of additional debt or the issuance of additional securities; n85
- the general type of event constituting a default and whether any periodic evidence must be furnished as to the absence of default or as to compliance with the terms of the indenture; and
- provisions relating to modification of the terms of the security or the rights of security holders.

In addition, if the rights evidenced by the securities to be registered may be materially limited or qualified by the rights of any other authorized class of securities, information about the other class (to the extent not otherwise disclosed pursuant to Item 202) sufficient to enable investors to understand the rights evidenced by the securities must be disclosed. However, no other information need be given where the other class is to be retired and steps have been taken to ensure that the retirement will be completed prior to or upon delivery of the debt securities. If the securities are to be offered at an "original issue discount," as defined in paragraph (a) of *Section 1273 of the Internal Revenue Code*, n86 or if the securities are to be sold in a package with other securities and the allocation of the offering price between the two securities may have the effect of offering the securities at an "original issue discount," the tax effects under *Sections 1271-1278 of the Internal Revenue Code* must be disclosed.

Finally, information relating to the trustee must be disclosed, including:

- the name of the trustee;
- the nature of any material relationship between the trustee and the registrant or its affiliates;
- the percentage of the class of securities necessary to require the trustee to take action; and
- what indemnification the trustee may require before proceeding to enforce the lien. n87

[iii] Warrants and Rights. Part (c) of Item 202, "Warrants and Rights," requires that if the securities described are to be issued pursuant to warrants or rights, the registrant must state:

- the amount of securities called for by the warrants or rights;
- the period during which and the price at which the warrants or rights are exercisable;
- the amount of warrants or rights outstanding;
- provisions for changes to or adjustments in the exercise price of the warrants or rights; and
- any other material terms of the warrants or rights. n88

[iv] Other Securities. Part (d) of Item 202, "Other Securities," requires that the registrant provide a comparable description to that required when capital stock, debt securities, or warrants or rights are registered if securities other than those securities are registered.

[v] Market Information for Securities Other Than Common Equity. Part (e) of Item 202, "Market Information for Securities Other Than Common Equity," requires that if securities other than common equity are to be registered and there is an established public trading market for the securities, n89 the registrant must provide market information for those securities comparable to the information required by Item 201(a) of Regulation S-K. n90

[vi] American Depositary Receipts. Part (f) of Item 202, "American Depositary Receipts," requires that if Depositary Shares represented by American Depositary Receipts are being registered, the registrant must state:

- the name of the depositary and the address of its principal executive office;
- the title of the American Depositary Receipts, an identification of the deposited security, and a brief description of the terms of deposit; n91 and
- a description of all fees and charges n92 that may be imposed directly or indirectly against the holder of the American Depositary Receipts, including the type of service for which the fee or charge is incurred, the amount, and to whom paid.

[4] Financial Information

The fourth section of Regulation S-K, "Financial Information," contains seven permanent items: "Selected Financial Data," "Supplementary Financial Information," "Management's Discussion and Analysis of Financial Condition and Results of Operations," and "Changes in and Disagreements with Accountants on Accounting and Financial Disclosure," "Quantitative Disclosures About Market Risk," "Controls and Procedures," and "Internal Control Over Financial Reporting."

[a] Item 301. Selected Financial Data. Item 301 of Regulation S-K, "Selected Financial Data," requires that the registrant furnish selected financial data in comparative columnar form for the registrant and its consolidated subsidiaries. n93 The required data must be furnished for each of the registrant's last five fiscal years or for the life of the registrant and its predecessors, if less, n94 and for additional fiscal years necessary to keep the information provided from being misleading, n95 including as appropriate:

- net sales or operating revenues;
- income or loss from continuing operations;
- income or loss from continuing operations per common share;

- total assets;
- long-term obligations and redeemable preferred stock; n96
- cash dividends declared per common share; and
- additional information, at the option of the registrant, that the registrant believes would enhance an understanding of, and would highlight other trends in, the registrant's financial condition and results of operations. n97

Registrants should also describe, or cross-reference to a discussion of, factors that materially affect the comparability of the selected financial data, e.g., accounting changes, business combinations, dispositions of business operations, and any material uncertainties that may cause the selected financial data not to be indicative of the registrant's future financial condition or results of operations. n98 Foreign registrants must provide information in addition to the information required of domestic registrants in the presentation of selected financial data. n99

Registrants that qualify as smaller reporting companies are not required to provide the information required by Item 301 of Regulation S-K. n100

[b] Item 302. Supplementary Financial Information.

Item 302 of Regulation S-K, "Supplementary Financial Information," contains two parts: "Selected Quarterly Financial Data" and "Information About Oil and Gas Producing Activities."

[i] Selected Quarterly Financial Data. Part (a) of Item 302, "Selected Quarterly Financial Data," sets forth requirements for registrants, except for foreign private registrants that have securities registered pursuant to Section 12(b) (other than mutual life insurance companies) or 12(g) of the Exchange Act. n101

If a registrant meets the above condition, Item 302(a) requires the inclusion of information that discloses:

- net sales;
- gross profit;
- income or loss, in each case before extraordinary items and cumulative effect of a change in accounting;
- per share data based upon income or loss; and
- net income or loss for each full quarter within the two most recent fiscal years and any subsequent interim period for which financial statements are included or are required to be included under Article 3 of Regulation S-X. n102

In addition, information must be included that reconciles the data required by Item 302(a) if that data differs from amounts previously reported on Form 10-Q for any quarter and describes the reason for the difference, e.g., a pooling of interests occurred or an error was corrected. n103 Also, information must be provided that describes the effect of any disposal of segments of a business and extraordinary, unusual, or infrequently occurring items recognized in each fiscal quarter within the two most recent years and for any subsequent interim period for which financial statements are included or are required to be included by Article 3 of Regulation S-X, as well as the aggregate effect and the nature of any year-end or other adjustments material to the results of that quarter. n104

Finally, if the financial statements to which the quarterly data relates have been reported on by an accountant, the quarterly data must be presented by the reporting accountant in accordance with appropriate professional standards and procedures.

Registrants that qualify as smaller reporting companies are not required to provide the information required by Item 302 of Regulation S-K. n105

[ii] Information About Oil and Gas Producing Activities. Paragraph (b) of Item 302, "Information About Oil and Gas Producing Activities," requires registrants engaged in significant oil and gas producing activities to present information about those activities in accordance with Statement of Financial Accounting Standards provisions.

[c] Item 303. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Item 303 of Regulation S-K, "Management's Discussion and Analysis of Financial Condition and Results of Operations," contains three parts: "Full fiscal years," "Interim periods," n106 and "Safe Harbor." In December 2003, the Commission staff published interpretive guidance n107 on how public companies can improve their Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") in their upcoming quarterly and annual reports. The staff's general dissatisfaction with the quality of MD&A disclosure prompted the release. The staff had publicly complained that MD&A disclosure have become too boilerplate and repetitive and only parrot the presentation of information in a company's financial statements. The staff's guidance does not amend the current disclosure requirements of MD&A or its past guidance, but highlights areas of MD&A that need improvement.

The release does not contain specific guidance. It broadly focuses on:

- the overall presentation of MD[A]
- the focus and content of MD[A]
- liquidity and capital resources; and
- critical accounting estimates.

The release recommends that companies include an introductory section to their MD&A. The introduction would highlight the most important developments of the period being reported without being repetitive of or summarizing the ensuing discussion. In past public statements, the staff has suggested that such an introduction be similar to management's letter to shareholders appearing in a company's annual report to shareholders. According to the staff, a "good introduction or overview" would be written in Plain English from the CEO's perspective, focusing on topics "that keep him or her up at night." Such topics could include:

- economic or industry-wide factors relevant to the company;
- how the company earns revenues and income and generates cash;
- the company's lines of business, locations of operations and principal products and services without being repetitive of the Description of Business section; and
- the material opportunities, challenges and risks that management are most focused on for the short and long term, as well as actions that they are taking to address these opportunities, challenges and risks.

Rather than present financial information from the current period and comparable past periods in a line-by-line narrative format, the staff suggests using tabular presentations to present the information. The accompanying narrative could then be used to discuss and analyze known changes, events, trends and uncertainties.

Currently, most companies divide their MD&A discussions under at least two headings, Results of Operations and Liquidity and Capital Resources. The staff encourages companies to use additional headings to assist readers in following "the flow of MD&A."

The release encourages companies to provide more nonfinancial information when such information is used by management to evaluate the company's business. Depending on the circumstances, microeconomic information, such as sales information measured in units or volume or business strategy, may be integral to a company's business. The release reaffirms the staff's position that any analysis of whether non-GAAP financial information is appropriately presented is separate from the consideration of whether MD&A should address "key performance indicators" of a company. The implicit message from the staff is that when non-GAAP financial information is publicly disclosed to analysts and in press conferences, management must evaluate why this information is being released and whether MD&A requires similar disclosure.

The staff is encouraging companies to trim their MD&A. Companies should evaluate whether information already disclosed in prior periods continues to be material for a current period. Though MD&A still requires a comparison of material financial information from a current period against a past comparable period, the staff recommends that companies focus on whether the financial information should be discussed in the first place. The staff recognizes that different quantitative and qualitative information may be material for a company's quarterly and annual MD&A disclosures.

The release reaffirms the staff's past position that, as a general rule, forward-looking information is optional disclosure. However, the staff also reaffirms that disclosure of a known trend, demand, commitment, event or uncertainty is required unless a company is able to conclude either that the trend, uncertainty or other event is not reasonably likely to occur, or that a material effect on the company's liquidity, capital resources or results of operations is not likely to occur.

Companies are required to evaluate their ability to meet upcoming cash requirements over both the short and long term. Routinely, companies have recited how they have spent cash during the period and have represented that "existing capital resources are adequate to meet the company's short and long term needs" or "for the foreseeable future." The release indicates that these types of disclosures are insufficient unless additional more detailed information about known material trends or uncertainties related to cash flow, capital resources, capital requirement or liquidity is not known. The staff intends to use a company's tabular disclosure of its contractual obligations as one means of evaluating the adequacy of a MD&A description of a company's future cash requirements and capital resources. The release clarifies that under the current requirements, companies should consider disclosing accounting estimates or assumptions where:

- the nature of the estimates or assumptions is material due to the levels of subjectivity and judgment necessary to account for highly uncertain matters or the susceptibility of such matters to change; and
- the impact of the estimates and assumptions on financial condition or operating performance is material.

Such disclosures should supplement, not duplicate, the description of accounting policies required in the notes to the financial statements. The accounting policy note to the financial statements generally describes the method used to apply an accounting principle while the MD&A disclosure should present a company's analysis of the uncertainties

involved in applying a principle at the current time or the variability that is reasonably likely to result from its application over time.

[i] Full Fiscal Years.

Paragraph (a) of Item 303, "Full Fiscal Years," requires the registrant to discuss and analyze its (and that of its consolidated subsidiaries) financial condition, n108 changes in financial condition, and results of operations, as based on the financial statements and any other statistical data that the registrant believes will enhance a reader's understanding of those factors. n109 The purpose of the discussion and analysis is to provide information relevant to an assessment of financial condition and results of operations of the registrant as determined by evaluating the amounts and certainty of cash flows from operations and outside sources. n110 The registrant should specifically focus on material events and uncertainties that would cause reported financial information not to be necessarily indicative of future financial condition or operating results, e.g., matters that have not had an effect on operations in the past but may in the future, or matters that have had an impact on reported operations but are not expected to have such an impact in the future. n111

If, in the registrant's judgment, a discussion of segment information or of other subdivisions of the registrant's business would be appropriate to an understanding of the business, the discussion should also focus on each relevant, reportable segment or other subdivision of the business and on the registrant as a whole. n112 The discussion of financial condition and results of operations should generally cover the three-year period of the financial statements and should use year-to-year comparisons or any other formats that in the registrant's judgment enhance a reader's understanding of those factors. n113

The registrant should provide the following information pursuant to Item 303(a).

[A] Liquidity. n114 The registrant must identify any known trends or demands, commitments, events, or uncertainties reasonably likely to result in a material increase or decrease in the registrant's liquidity. n115 The course of action that the registrant has taken or proposes to take to remedy any material deficiency in liquidity must be identified. n116 In addition, the registrant must identify and separately describe internal and external sources of liquidity and must briefly discuss any material unused sources of liquid assets. n117

[B] Capital Resources. n118 The registrant is required to describe its material commitments for capital expenditures as of the end of the latest fiscal period, the general purpose of those commitments, and the anticipated source of funds to meet those commitments. n119 The registrant is also required to describe any material trends in its capital resources and any expected material changes in the mix and relative cost of those resources. The discussion of capital resources should include consideration of changes between equity, debt, and any off-balance sheet financing arrangements. n120

[C] Results of Operations. The registrant is required to describe:

- any unusual or infrequent events or transactions or any significant economic changes that materially affected reported income from continuing operations and the extent to which reported income was affected;
- any significant components of revenues or expenses that in the registrant's judgment should be described to understand its results of operations;
- any known trends or uncertainties that have had or that the registrant reasonably expects will have a material effect on net sales or revenues or income from continuing operations; n121 and
- any known event that will cause a material change in the relationship between costs and revenues,

e.g., future increases in costs of labor or material.

In addition, the registrant must describe, in narrative discussion, the extent to which any material increases in net sales or revenues disclosed in the financial statements are attributable to increases in prices, increases in the volume or amount of goods or services being sold, or the introduction of new products or services.

The registrant is also required to describe the effect of inflation and changing prices on the registrant's net sales and revenues and on income from continuing operations, either for the three most recent fiscal years or the fiscal years in which the registrant has been engaged in business, whichever is shortest. n122

In addition, the registrant should provide any other information that the registrant believes to be necessary to an understanding of its financial condition, changes in financial condition, and results of operations. n123 Registrants are encouraged to supply forward-looking information. n124

[D] Off-Balance Sheet Arrangements. n125 Part (a)(4) of Item 303, "Off-Balance Sheet Arrangements," n126 requires registrants to discuss, in a separately-captioned section, the registrant's off-balance sheet arrangements that have or are reasonably likely to have a material current or future effect on the registrant's financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources. n127 The discussion must include the following items to the extent necessary to an understanding of such arrangements and their effect, and must also include other information that the registrant believes is necessary for such an understanding:

- the nature and business purpose to the registrant of such off-balance sheet arrangements;
- the importance to the registrant of such off-balance sheet arrangements with respect to its liquidity, capital resources, market risk support, credit risk support or other benefits;
- the amounts of revenue, expenses and cash flows of the registrant arising from such arrangements; the nature and amounts of any interests retained, securities issued and other indebtedness incurred by the registrant in connection with such arrangements; and the nature and amounts of any other obligations or liabilities (including contingent obligations or liabilities) of the registrant arising from such arrangements that are or are reasonably likely to become material and the triggering events or circumstances that could cause them to arise; and
- any known event, demand, commitment, trend or uncertainty that will result in or is reasonably likely to result in the termination, or material reduction in availability to the registrant, of its off-balance sheet arrangements that provide material benefits to it, and the course of action that the registrant has taken or proposes to take in response to any such circumstances. n128

The instructions to part (a)(4) of Item 303 clarify several ambiguities, including:

- No obligation to make disclosure under part (a)(4) arises with respect to an off-balance sheet arrangement until a definitive agreement that is unconditionally binding or subject only to customary closing conditions exists or, if there is no such agreement, when settlement of the transaction occurs. n129
- Registrants should aggregate off-balance sheet arrangements in groups or categories that provide material information in an efficient and understandable manner and should avoid repetition and disclosure of immaterial information. Effects that are common or similar with respect to a number of off-balance sheet arrangements must be analyzed in the aggregate to the extent the aggregation increases understanding. Distinctions in arrangements and their effects must be discussed to the extent the

information is material, but the discussion should avoid repetition and disclosure of immaterial information. n130

- Contingent liabilities arising out of litigation, arbitration or regulatory actions are not considered to be off-balance sheet arrangements under part (a)(4). n131

- Generally, the disclosure required by part (a)(4) must cover the most recent fiscal year. However, the discussion should address changes from the previous year if such discussion is necessary to an understanding of the disclosure. n132

- In satisfying the requirements of part (a)(4), the discussion of off-balance sheet arrangements need not repeat information provided in the footnotes to the financial statements, provided that such discussion clearly cross-references to specific information in the relevant footnotes and integrates the substance of the footnotes into such discussion in a manner designed to inform readers of the significance of the information that is not included within the body of such discussion. n133

[E] Tabular Disclosure of Contractual Obligations. Part (a)(5) of Item 303, "Tabular Disclosure of Contractual Obligations," requires the registrant to provide, in a tabular format, certain information as of the latest fiscal year-end balance sheet date with respect to the registrant's known contractual obligations. n134 The categories of contractual obligations of which the registrant must provide information include: "long-term debt obligations," "capital lease obligations," "operating lease obligations," "purchase obligations," and "other long-term liabilities reflected on the registrant's balance sheet under GAAP." n135 Definitions of the foregoing terms are provided in paragraph (ii) of part (a)(5). n136

The registrant must provide amounts, aggregated by type of contractual obligation, in its tabular disclosure. n137 The registrant may disaggregate the specified categories of contractual obligations using other categories suitable to its business, but the presentation must include all of the registrant's obligations that fall within the specified categories. A table covering at least the following periods must be included: less than one year, from one to three years, from three to five years, and more than five years. n138 Additionally, the tabular presentation may be accompanied by footnotes to describe provisions that create, increase or accelerate obligations, or other pertinent data to the extent necessary for an understanding of the timing and amount of the registrant's specified contractual obligations. n139

Finally, the registrant is not required to include the table required by part (a)(5) of Item 303 for interim periods. n140 Instead, the registrant should disclose material changes outside the ordinary course of business in the specified contractual obligations during the interim period. n141

[ii] Interim Periods. Part (b) of Item 303, "Interim Periods," requires the registrant to provide a management's discussion and analysis of financial condition and results of operations, including the same information as required under Item 303(a) (with the exception of the effect of inflation and changing prices on operations), if interim period financial statements are included or are required to be included by Regulation S-X in order to enable the reader to assess material changes in financial condition and results of operations by a comparison of the financial statements provided for full fiscal years with those provided for any subsequent interim periods. n142

The registrant is required to discuss any material changes in its financial condition, including any seasonal aspects of its business that may have had a material effect upon its financial condition, n143 from the end of the preceding fiscal year to the date of the most recent interim balance sheet provided. n144 If the interim financial statements include an interim balance sheet as of the corresponding interim date of the preceding fiscal year, any material changes in financial condition from that date to the date of the most recent interim balance sheet provided should also be discussed. n145 If discussions of changes in financial condition from both the end and the corresponding interim date of the preceding fiscal year are required, the discussions may be combined. n146

The registrant is also required to discuss any material changes in its results of operations, including any significant elements of the registrant's income or loss from continuing operations that do not arise or are not necessarily representative of the registrant's ongoing business, n147 and the seasonal aspects of the registrant's business that have a material effect upon its results of operations n148 for the most recent year-to-date period for which an income statement is provided and the corresponding year-to-date period of the preceding fiscal year. n149

If the registrant is required to provide, or has provided, an income statement for the most recent fiscal quarter, the discussion should also cover material changes in results of operations for that fiscal quarter and the corresponding fiscal quarter in the preceding fiscal year. n150 In addition, if the registrant has provided an income statement for the twelve-month period ended as of the date of the most recent interim balance sheet provided, the discussion should cover material changes for that twelve-month period and the twelve-month period ended as of the corresponding interim balance sheet date of the preceding fiscal year. n151 Any forward-looking information supplied is expressly covered by the safe harbor rule for projections. n152

[iii] Safe Harbor. Part (c) of Item 303 provides a safe harbor for forward-looking statements provided pursuant to parts (a)(4) and (5) of Item 303 in certain circumstances. n153 The safe harbors found in Section 27A of the Securities Act and Section 21E of the Exchange Act apply to forward-looking information provided pursuant to parts (a)(4) and (5) of Item 303 if the disclosure is made by: an issuer; a person acting on behalf of an issuer; an outside reviewer retained by an issuer making a statement on behalf of the issuer; or an underwriter, with respect to information provided by an issuer or information derived from information provided by an issuer. n154

For the purposes of Item 303, part (c):

- all information required by parts (a)(4) and (5) is deemed to be a forward-looking statement, as that term is defined in the safe harbors found in Section 27A of the Securities Act and Section 21E of the Exchange Act, except for historical facts; and
- with respect to part (a)(4), the meaningful cautionary statements element of the safe harbors found in Section 27A of the Securities Act and Section 21E of the Exchange Act are satisfied if a registrant satisfies all requirements of part (a)(4) of Item 303. n155

[d] Item 304. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure. Item 304 of Regulation S-K, "Changes in and Disagreements with Accountants on Accounting and Financial Disclosure," requires that if, during the registrant's two most recent fiscal years or any subsequent interim period, an independent accountant who was previously engaged as the principal accountant to audit the registrant's financial statements, or an independent accountant who was previously engaged to audit a significant subsidiary and on whom the principal accountant expressed reliance in its report, either resigned, indicated an intention not to stand for reelection after completion of the current audit, or was dismissed, the registrant must provide information with respect to:

- whether the former accountant resigned, declined to stand for reelection, or was dismissed and the date of whichever of the foregoing events is applicable;
- whether the principal accountant's report on the financial statements for either of the past two years contained an adverse opinion, a disclaimer of opinion, or was modified or qualified as to uncertainty, audit scope, or accounting principles and the nature of any such adverse opinion, disclaimer of opinion, modification, or qualification;
- whether the decision to change accountants was recommended or approved by any audit or similar committee of the board of directors where the registrant has such a committee or, where the registrant

has no such committee, whether the decision was recommended or approved by the board of directors; and

- whether, during the registrant's two most recent fiscal years and any subsequent interim period preceding such resignation, declination, or dismissal, there were any disagreements with the former accountant on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure, which disagreement(s), if not resolved to the satisfaction of the former accountant, would have caused the accountant to make a reference to the subject matter of the disagreement(s) in connection with the financial report. n156

The registrant must also provide all of the information required by the last bullet point above where any of the following kinds of advice were given to the registrant by the former accountant within the registrant's two most recent fiscal years and any subsequent interim period which preceded the former accountant's resignation, declination to stand for reelection, or dismissal ("reportable events"):

- advice that the internal controls necessary for the registrant to develop reliable financial statements do not exist;
 - advice that information has come to the accountant's attention that has led the accountant to conclude that it can no longer rely on management's representations or that it is unwilling to continue to be associated with the financial statements prepared by management;
 - advice, relating to the need to expand significantly the scope of the audit, not acted upon because of the accountant's resignation or dismissal or for any other reason, or advice that information has come to the attention of the accountant during the two preceding fiscal years and any subsequent interim period which, although not further investigated due to the accountant's resignation or dismissal or for any other reason, could, if further investigated:
 - materially impact the fairness or reliability of either a previously issued audit report or the underlying financial statements, or the financial statements issued or to be issued covering the fiscal period(s) subsequent to the date of the most recent financial statements covered by an audit report (including information that may prevent the accountant from rendering an unqualified audit report on those financial statements); or
 - cause the accountant to be unwilling to rely on management's representations or be associated with the registrant's financial statements; or
 - that information has come to the accountant's attention that creates an issue that was not resolved to the accountant's satisfaction prior to the accountant's resignation, dismissal, or declination to stand for reelection, and the accountant has concluded that the information materially impacts the fairness or reliability of either:
 - a previously issued audit report or the underlying financial statements; or
 - the financial statements issued or to be issued covering the fiscal period(s) subsequent to the date of the most recent financial statements covered by an audit report (including information that, unless resolved to the accountant's satisfaction, would prevent the accountant from rendering an unqualified audit report on the subject financial statements).
- n157

If, during the registrant's two most recent fiscal years or any subsequent interim period, a new independent accountant has been engaged as either the principal accountant to audit the registrant's financial statements, or as an independent accountant to audit a significant subsidiary and on whom the principal accountant is expected to express reliance in its report, the registrant shall identify the newly engaged accountant and indicate the date of engagement. If, during the same time period, the registrant or someone on the registrant's behalf consulted the newly engaged accountant regarding the application of accounting principles to a specified transaction, either completed or proposed, or the type of audit opinion that might be rendered on the registrant's financial statements and there was provided to the registrant by such newly engaged accountant either a written report or oral advice which the new accountant concluded was an important factor considered by the registrant in reaching a decision as to the accounting, auditing or financial reporting issue, or any matter that was either the subject of a "disagreement" as defined in Item 304(a)(1)(iv) and the related instructions to Item 304 or a "reportable event" as described in Item 304(a)(1)(v), then the registrant must:

- so state and identify the issues that were the subject of the consultations;
- briefly describe the views of the newly engaged accountant as expressed orally or in writing to the registrant on each such issue and, if written views were received by the registrant, file them as an exhibit to the subject report or registration statement;
- state whether the former accountant was consulted by the registrant regarding any such issues, and, if so, provide a summary of the former accountant's views; and
- request the newly engaged accountant to review the disclosure required by Item 304(a) before it is filed with the Commission.

The registrant must provide the new accountant the opportunity to furnish the registrant with a letter addressed to the Commission containing any new information, clarification of the registrant's expression of its views, or the respects in which the new accountant does not agree with the statements made by the registrant, and file any such letter as an exhibit to the report or registration statement containing the disclosure required by Item 304. n158

The registrant must request that the former accountant furnish the registrant with a letter addressed to the Commission stating whether the accountant agrees with the statements made by the registrant in response to Item 304(a) and, if not, stating the respects in which it does not agree. The registrant must file the former accountant's letter as an exhibit to the report or registration statement containing the disclosure. If the former accountant's letter is not available at the time of filing, it must be filed by amendment promptly thereafter. n159

If, in connection with a change in accountants subject to Item 304(a), there was any "disagreement" of the type described in paragraph (a)(1)(iv) or any "reportable event" as described in paragraph (a)(1)(v) of Item 304 and, during the fiscal year in which the change of accountants took place or during the subsequent fiscal year, there have been transactions or events similar to those which involved the disagreement or reportable event, and such transactions or events were material and were accounted for or disclosed in a manner different from that which the former accountants apparently would have concluded was required, then the registrant must state the existence and nature of the disagreement or reportable event and the effect on the financial statements if the method had been followed which the former accountants apparently would have concluded was required. n160

[e] Item 305. Quantitative and Qualitative Disclosures About Market Risk. Item 305 of Regulation S-K, "Quantitative and Qualitative Disclosure About Market Risk," requires registrants to provide, in their reporting currency, quantitative information about market risk as of the end of the latest fiscal year in accordance with one of three disclosure alternatives. The three disclosure alternatives are: (1) tabular presentation of information related to market risk sensitive instruments and contract terms; (2) sensitivity analysis disclosures that express the potential loss in future earnings, fair values, or cash flows of market risk sensitive instruments resulting from one or more selected

hypothetical changes in interest rates, foreign currency exchange rates, commodity prices, and other relevant market rates or prices over a selected period of time; or (3) value at risk disclosures that express the potential loss in future earnings, fair values or cash flows of market risk sensitive instruments over a selected period of time, with a selected likelihood of occurrence, from changes in interest rates, foreign currency exchange rates, commodity prices, and other relevant market rates or prices. n161 In preparing this quantitative information, registrants must categorize market risk sensitive instruments into instruments entered into for trading purposes and those entered into for other purposes. Within both such portfolios, separate quantitative information is to be presented for each market risk category (i.e., interest rate risk, foreign currency exchange rate risk, commodity price risk, and other relevant market risks, such as equity price risk). n162 Registrants are required to describe, to the extent material, certain qualitative information about market risk including: (1) the registrant's primary market risk exposures; n163 (2) how these exposures are managed, including a discussion of the objectives, general strategies, and instruments, if any, needed to manage those exposures; and (3) changes in either the registrant's primary market risk exposures or how those exposures are managed, when compared to what was in effect during the most recently completed fiscal year and what is known or expected to be in effect in future reporting periods. n164 Registrants should describe primary market risk exposures that exist as of the end of the latest fiscal year, and how those exposures are managed. n165 If interim period financial statements are included or are required to be included by Article 3 of Regulation S-K, discussion and analysis is required to enable the public to assess the sources and effects of material changes in information that would be provided under Items 305 of Regulation S-K from the end of the preceding fiscal year to the date of the most recent interim balance sheet. The safe harbor provided in Section 27A of the Securities Act and Section 21E of the Exchange Act apply to information provided under Items 305(a), (b), and (c). n166 The required quantitative and qualitative information should be disclosed outside the financial statements and related notes thereto. n167

[f] Item 307. Disclosure Controls and Procedures. Item 307 of Regulation S-K, "Disclosure Controls and Procedures," requires a registrant to disclose the conclusions of its principal executive and principal financial officers, or persons performing similar functions, regarding the effectiveness of the registrant's disclosure controls and procedures as of the end of the period covered by the report. n168 Their conclusions must be based on the evaluation of those controls and procedures required by Rules 13a-15(b) or 15d-15(b) under the Exchange Act. n169 For the purposes of Item 307 disclosure, the term "disclosure controls and procedures" is defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act, which state that the term means "controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the [Exchange] Act is recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms." n170

[g] Item 308. Internal Control Over Financial Reporting. n171 Part (a) of Item 308, entitled "Management's annual report on internal control over financial reporting," requires the registrant to provide a report of its management on the registrant's internal control over financial reporting that contains:

- a statement of management's responsibility for establishing and maintaining adequate internal control over financial reporting for the registrant;
- a statement identifying the framework used by management to evaluate the effectiveness of the registrant's internal control over financial reporting, as required by Rules 13a-15 or 15d-15 under the Exchange Act;
- management's assessment of the effectiveness of the registrant's internal control over financial reporting as of the end of the registrant's most recent fiscal year, including a statement as to whether or not the registrant's internal control over financial reporting is effective; n172 and
- a statement that the registered public accounting firm that audited the registrant's financial statements included in the annual report containing the disclosure required by Item 308 has issued an attestation

report on management's assessment of the registrant's internal control over financial reporting. n173

Part (b) of Item 308 requires the registrant to provide in its annual report the aforementioned registered public accounting firm's attestation report on the registrant's internal control over financial reporting, n174 while part (c) of Item 308 requires the registrant to disclose any changes in its internal control over financial reporting identified in connection with management's evaluation that occurred during the registrant's last fiscal quarter and that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

[5] Management and Certain Security Holders

The fifth section of Regulation S-K contains seven items: "Directors, Executive Officers, Promoters and Control Persons," "Executive Compensation," "Security Ownership of Certain Beneficial Owners and Management," "Certain Relationships and Related Transactions," "Compliance with Section 16(a) of the Exchange Act," "Code of Ethics," and "Corporate Governance."

[a] Item 401. Directors Executive Officers, Promoters, and Control Persons.

Item 401 of Regulation S-K, "Directors, Executive Officers, Promoters and Control Persons," contains seven parts: "Identification of Directors," "Identification of Executive Officers," "Identification of Certain Significant Employees," "Family Relationships," "Business Experience," "Involvement in Certain Legal Proceedings," and "Promoters and Control Persons." Item 401 of Regulation S-K was amended, effective November 7, 2006, as part of the amendments to the executive compensation and related person disclosure rules. Item 401(h), (i) and (j) were removed. The disclosure requirements covered by these sections have been modified and moved to the new Item 407 of Regulation S-K. n175

[i] Identification of Directors. Part (a) of Item 401, "Identification of Directors," requires the registrant to list the names and ages of all directors of the registrant, and all persons nominated or chosen to become directors, n176 and to disclose as to each such individual:

- all positions and offices held with the registrant;
- his or her term of office as director and any periods during which the individual served as such; and
- any arrangement or understanding between the individual and any other persons, naming those persons, pursuant to which he or she was or is to be selected as a director or nominee. n177

The registrant, however, is not required to provide this information in a proxy or information statement for any director whose term of office as a director will not continue after the meeting to which the statement relates. n178

[ii] Identification of Executive Officers. Part (b) of Item 401, "Identification of Executive Officers," requires the registrant to disclose the same information concerning its executive officers n179 as is required concerning directors. n180

[iii] Identification of Certain Significant Employees. Part (c) of Item 401, "Identification of Certain Significant Employees," requires that, if the registrant employs persons such as production managers, sales managers, or research scientists who are not executive officers but who make or are expected to make significant contributions to the business of the registrant, those persons must be identified and their backgrounds disclosed to the same extent as for executive officers. This information, however, is not required if the registrant, immediately prior to the filing of the document in which the information was to be presented, was subject to the reporting requirements of Sections 13(a) or 15(d) or an insurance company whose securities are exempt from the reporting requirements of Section 13(a) by Section 12(g)(2)(G). n181

[iv] Family Relationships. Part (d) of Item 401, "Family Relationships," requires the registrant to state the nature of any family relationship n182 between any director, executive officer, or person nominated or chosen by the registrant to become a director or executive officer.

[v] Business Experience. Part (e) of Item 401, "Business Experience," requires the registrant to provide a brief account of the business experience during the past five years of each person identified by the registrant as a director, executive officer, each person chosen or nominated to become a director or executive officer, and each significant employee identified in response to Item 401(c), including principal occupations and employment and the name and principal business of the organization in which the occupation or employment was carried on. n183 If any person identified by the registrant as an executive officer or significant employee has been employed by the registrant or any of the registrant's subsidiaries for less than five years, the registrant must also include a brief explanation of the nature of the responsibility undertaken by the person in principal occupations and employment in the past five years. n184 Directorships held by each director or person nominated or chosen to become a director in a company:

- with a class of securities registered under Section 12;
- subject to the reporting requirements of Section 15(d); or
- registered as an investment company under the Investment Company Act of 1940;

must be indicated, and the company in which the directorship was held must be named. n185

[vi] Involvement in Certain Legal Proceedings. Part (f) of Item 401, "Involvement in Certain Legal Proceedings," requires the registrant to describe any of the following legal proceedings that occurred during the past five years n186 and that are material n187 to an evaluation of the ability or integrity of a person who is a director, director-nominee, or executive officer of the registrant. First, the registrant must describe any petition under bankruptcy or insolvency laws that was filed by or against, or the appointment of a receiver or similar officer by a court for, the business or property of the person, any partnership in which the person was a general partner at or within two years before the time of the filing, or any corporation or business association of which the person was an executive officer at or within two years before the time of the filing. n188

The registrant must also describe any criminal proceeding in which the person was convicted, or any pending criminal proceeding of which the person is a named subject, excluding traffic violations and other minor offenses. n189 Any order, judgment, or decree must be described that has not been subsequently reversed, suspended, or vacated, of which the person was the subject, permanently or temporarily enjoining the person from, or otherwise limiting, the following activities:

- acting as a futures commission merchant, introducing broker, commodity trading advisor, commodity pool operator, floor broker, leverage transaction merchant, any other person regulated by the Commodity Futures Trading Commission, or an associated person of any of the foregoing, or as an investment adviser, underwriter, broker or dealer in securities, or as an affiliated person, director, or employee of any investment company, bank, savings and loan association or insurance company, or engaging in or continuing any conduct or practice in connection with such activity;
- engaging in any type of business practice; or
- engaging in any activity in connection with the purchase or sale of any security or commodity or in connection with any violation of federal or state securities laws or federal commodities laws. n190

Any order, judgment, or decree, not subsequently reversed, suspended or vacated, of any federal or state authority, of

which the person was the subject, barring, suspending, or otherwise limiting for more than sixty days the right of the person to engage in any activity described in the first bulleted paragraph above or to be associated with persons engaged in any such activity must be described. n191 The registrant must also describe any finding by a court of competent jurisdiction in a civil action or by the Commission that the person violated any federal or state securities law. n192 Finally, the registrant must describe any findings by a court of competent jurisdiction in a civil action or by the Commodities Futures Trading Commission that the person violated any federal commodity law, and the judgment in such civil action or finding by the Commodity Futures Trading Commission has not been subsequently reversed, suspended, or vacated. n193

[vii] Promoters and Control Persons. Part (g) of Item 401, "Promoters and Control Persons," requires registrants that have not been subject to the reporting requirements of Section 13(a) or 15(d) for the twelve months immediately prior to the filing and that were organized within the last five years to describe with respect to promoters and control persons any of the events detailed above that are material to a voting or investment decision and that occurred during the past five years. n194

[b] Item 402. Executive Compensation. n195

Item 402 of Regulation S-K, "Executive Compensation," contains eleven parts: "General," "Compensation Discussion and Analysis," "Summary Compensation Table," "Grants of Plan-Based Awards Table," "Narrative Disclosure to Summary Compensation Table and Grants of Plan-Based Awards Table," "Outstanding Equity Awards at Fiscal Year-End Table," "Option Exercises and Stock Vested Table," "Pension Benefits," "Nonqualified Defined Contribution and Other Nonqualified Deferred Compensation Plans," "Potential Payments Upon Termination or Change-in-Control," and "Compensation of Directors." n196

[i] General.

Part (a) of Item 402, "General," describes the treatment of certain issuers and defines the compensation and persons covered by Item 402.

[A] Specific Issuers. Foreign private issuers are deemed to comply with Item 402 by providing certain limited information. n197

[B] Compensation Covered. Item 402(a)(2) requires clear, concise, and understandable disclosure of all plan and non-plan compensation awarded to, earned by, or paid to the individual for all services rendered in all capacities to the registrant and its subsidiaries, unless otherwise specified. All such compensation must be reported pursuant to Item 402, even if also called for by another requirement, including transactions between the registrant and a third party where the primary purpose of the transaction is to furnish compensation to an individual. n198 Amounts reported as compensation for one fiscal year may be required to be reported in a different manner pursuant to this item.

[C] Persons Covered. Item 402 requires disclosure for each of the following persons (the "named executive officers"): the Commission has solicited comments regarding a proposed disclosure requirement pursuant to which the total compensation and job description of up to an additional three most highly compensated employees who are not executive officers or directors but who earn more than the named executive officers would be required. The proposal may be modified to apply only to large accelerated filers who would disclose the total compensation for the most recent fiscal year and a description of the job position for each of their three most highly compensated employees whose total compensation is greater than any of the named executive officers, whether or not such persons are executive officers. Under this approach, employees who have no responsibility for significant policy decisions within either the company, a significant subsidiary or a principal business unit, division, or function, would be excluded from the determination of the three most highly compensated employees and no disclosure regarding them would be required. n199

- all individuals serving as the registrant's principal executive officer or acting in a similar capacity

during the last completed fiscal year (the "CEO"), n200 regardless of compensation level;

- All individuals serving as the registrant's principal financial officer or acting in a similar capacity during the last completed fiscal year ("PFO"), regardless of compensation level;
- the registrant's three most highly compensated executive officers n201 other than the PEO and PFO who were serving as executive officers at the end of the last completed fiscal year and whose total annual salary and bonuses exceed \$100,000; and
- up to two additional individuals for whom disclosure would have been provided pursuant to the above, but for the fact that the individual was not serving as an executive officer of the registrant at the end of the last completed fiscal year. n202

It may be appropriate in limited circumstances for a registrant not to include in the disclosure an individual, other than the PEO and PFO, who is one of the registrant's most highly compensated executive officers due to payment of amounts of cash compensation relating to overseas assignments that may be attributed predominately to such assignments. n203 Item 402 disclosure includes transactions between the registrant and a third party where the primary purpose of the transaction is to furnish compensation to a named executive officer.

[D] Omission of Tables or Columns. Tables and columns may be omitted if there has been no compensation awarded to, earned by, or paid to any of the named executive officers or directors required to be reported in such table or column. n204

[E] Definitions. Item 402(a)(6) provides the following definition of terms used in the remainder of the item. The term "stock appreciation rights" ("SARs") refers to SARs payable in cash or stock, including SARs payable in cash or stock at the election of the registrant or a named executive officer. The term "plan" includes, but is not limited to, the following: any plan, contract, authorization, or arrangement, whether or not set forth in any formal document pursuant to which cash, securities, similar instruments, or any other property may be received. n205 A plan may be applicable to one person. The term "long-term incentive plan" means any plan providing compensation intended to serve as incentive for performance to occur over a specified period, whether such performance is measured by reference to financial performance of the registrant or an affiliate, the registrant's stock price, or any other measure. The term "equity incentive plan" is an incentive plan or portion of an incentive plan under which awards are granted that fall within the scope of Financial Accounting Standards Board Statement of Financial Accounting Standards No. 123 (revised 2004), *Share-Based Payment*, as modified or supplemented ("FAS 123R"). A "non-equity incentive plan" is an incentive plan or portion of an incentive plan that is not an equity incentive plan. The term "incentive plan award" means an award provided under an incentive plan. The terms "date of grant" or "grant date" refer to the grant date determined for financial statement reporting purposes pursuant to FAS 123R. "Closing market price" is defined as the price at which the registrant's security was last sold in the principal United States market for such security as of the date for which the closing market price is determined.

[ii] Compensation Discussion and Analysis. n206 Under Item 402(b), companies are to provide a discussion of all material elements of the compensation of the named executive officers. The discussion must describe the following:

- the objectives of the registrant's compensation programs;
- what the compensation program is designed to reward;
- each element of compensation;
- why the registrant chooses to pay each element;

1-4 Federal Securities Exchange Act of 1934 § 4.03

- how the registrant determined the amount (and, where applicable, the formula) for each element to pay; and
- how each compensation element and the registrant's decisions regarding that element fit into the registrant's overall compensation objectives and affect decisions regarding other elements.

The material information to be disclosed in the Compensation Discussion and Analysis section will vary depending upon the facts and circumstances. For that reason, Item 402(b) provides the following as examples of the type of information discussed:

- the policies for allocating between long-term and currently paid out compensation;
- the policies for allocating between cash and non-cash compensation, and among different forms of non-cash compensation;
- for long-term compensation, the basis for allocating compensation to each different form of award (such as relationship of award to the achievement of the registrant's long-term goals, management's exposure to downside equity performance risk, correlation between cost to registrant and expected benefit to the registrant);
- how the determination is made as to when awards are granted, including awards of equity-based compensation such as options;
- what specific items of corporate performance are taken into account in setting compensation policies and making compensation decisions;
- how specific forms of compensation are structured and implemented to reflect these items of the registrant's performance, including whether discretion can be or has been exercised (either to award compensation absent attainment of the relevant performance goal(s) or to reduce or increase the size of the award or payout), identifying any particular exercise of discretion, and stating whether it applied to one or more specified named executive officers or to all compensation subject to the relevant performance goal(s);
- how specific forms of compensation are structured and implemented to reflect the named executive officer's individual performance and/or individual contribution to these items of the registrant's performance, describing the elements of individual performance and/or contribution that are taken into account;
- registrant policies and decisions regarding the adjustment or recovery of awards or payments if the relevant registrant performance measures upon which they are based are restated or otherwise adjusted in a manner that would reduce the size of an award or payment; n207
- the factors considered in decisions to increase or decrease compensation materially;
- how compensation or amounts realizable from prior compensation are considered in setting other elements of compensation (*e.g.*, how gains from prior option or stock awards are considered in setting retirement benefits);
- with respect to any contract, agreement, plan or arrangement, whether written or unwritten, that

provides for payment(s) at, following, or in connection with any termination or change-in-control, the basis for selecting particular events as triggering payment (e.g., the rationale for providing a single trigger for payment in the event of a change-in-control);

- the impact of the accounting and tax treatments of the particular form of compensation;
- the registrant's equity or other security ownership requirements or guidelines (specifying applicable amounts and forms of ownership), and any registrant policies regarding hedging the economic risk of such ownership;
- whether the registrant engaged in any benchmarking of total compensation, or any material element of compensation, identifying the benchmark and, if applicable, its components (including component companies); and
- the role of executive officers in determining executive compensation.

[iii] Summary Compensation Table.

Under Item 402(c), companies are required to present a tabular summary of compensation paid to the named executive officers for each of the company's previous fiscal years. The three-year period covered by the Summary Compensation Table is intended to enable stockholders to discern trends in executive compensation and compare their own company's compensation practice with that of other companies. n208 The general instruction to Item 402(b) also provides, however, that if a company was not an Exchange Act reporting company during the entire three-year period, no information need be provided in the Summary Compensation Table for any year, other than the most recently completed fiscal year, during which the company was not an Exchange Act reporting company. However, the registrant will be required to provide information for any such year if that information previously was required to be provided in response to a Commission filing requirement. Disclosure of all forms of executive compensation is required.

The Summary Compensation Table includes disclosure of the following compensation components.

[A] Base Salary and Bonus. Both the base salary and bonus salary figures in the Summary Compensation Table columns should be a dollar value of all cash and non-cash salary and bonus earned, in its respective column, by the named executive officer n209 for the fiscal year. Any amounts deferred shall be included in the appropriate column for the fiscal year in which earned. n210 If the amount of salary or bonus earned in a given fiscal year is not calculable through the latest practicable date, a footnote should so disclose and provide the date at which the amount of salary or bonus is expected to be determined. That updated disclosure of salary or bonus must then be reported under Item 5.02(f) of Current Report Form 8-K. Registrants need not include in the salary column or bonus column any amount of salary or bonus forgone at the election of the named executive officer. n211

[B] Stock Awards. The aggregate grant date fair value for stock awards is to be reported in column (e). A footnote should disclose all assumptions made in the valuation by reference to a discussion of those assumptions in the registrant's financial statements, footnotes to the financial statements, or discussion in the Management's Discussion and Analysis section. n212

[C] Option Awards. The aggregate grant date fair value for award of options, with or without tandem SARs (including awards that subsequently have been transferred) is to be reported in column (f). The incremental fair value produced by any material modification during the last completed fiscal period to past option or SAR awards must be reported as awards in column (f). n213

[D] Non-equity Incentive Plan. The dollar value of all earnings for services performed during the fiscal year pursuant to awards under non-equity plans n214 and all earnings on any outstanding awards are to be reported in

column (g). If the relevant performance measure is satisfied during the fiscal year, even if the earnings are not payable until a later date and even if the earnings are for a single year in a plan with a multi-year performance measure, the earnings are reported for that fiscal year. n215 The timing of payments of earnings in this column must be disclosed in a footnote.

[E] Change in Pension Value and Nonqualified Deferred Compensation Earnings. The aggregate change in the actuarial present value of the named executive officer's accumulated benefit under all defined benefit and actuarial pension plans (including supplemental plans) is to be reported in column (h). If present value is negative, it should be disclosed in footnote but should not be represented in the column. In addition, the above-market or preferential earnings on compensation that is deferred on a basis that is not tax-qualified, including earnings on nonqualified defined contribution plans are reported here. The source of the amounts reported in column (h) are to be identified by footnote.

[F] All Other Compensation. All other compensation for the covered fiscal year that the registrant could not properly report in any other column of the Summary Compensation Table, regardless of the amount, is to be disclosed in column (i). Such compensation reported must include, but is not limited to:

- perquisites and other personal benefits, or property, unless the aggregate amount is less than \$10,000;
- all "gross-ups" or other amounts reimbursed for the payment of taxes; n216
- the compensation cost (as computed in accordance with FAS 123R) of any security of the registrant or its subsidiaries purchased from the registrant or its subsidiaries at a discount from the market price at the date of purchase, unless that discount is generally available to either all security holders or to all salaried employees;
- amounts paid or accrued n217 in connection with termination, including retirement, resignation, severance or constructive termination (including a change in responsibilities);
- amounts paid or accrued n218 in connection with a change in control; n219
- registrant contributions or allocations to a vested and unvested defined contribution plan;
- the dollar value of insurance premiums paid by, or on behalf of, the registrant with respect to life insurance for the benefit of the named executive officer; and
- the dollar value of any dividends or other earnings paid on stock or option awards, when those amounts were not factored into the grant date fair value required to be reported pursuant to columns (e) or (f).

All items reported for a named executive officer under this column (i) that exceed \$10,000 must be identified and quantified in a footnote. n220 When the total value of all perquisites and personal benefits equals or is greater than \$10,000 for any named executive officer, then each perquisite or personal benefit, regardless of its amount, must be identified by type. Any perquisite and personal benefit reported under this column that exceeds \$25,000 or 10% of the total amount of perquisites and personal benefits for that officer must be quantified and disclosed in a footnote. n221

[G] Total Compensation. The dollar value of total compensation for the covered fiscal year is reported in column (j). With respect to each named executive officer, disclose the sum of all amounts reported in columns (c) through (i).

[iv] Grants of Plan-Based Awards Table. For the PEO and PFO and each named officer, the table required under Item 402(d) should disclose certain information concerning each grant n222 of an award made in the last completed

fiscal year under any plan, including awards that have subsequently been transferred. For incentive plan awards, the table requires giving the range of payout (in dollar value for non-equity plans n223 and the number of shares of stock, or the number of shares underlying options to be paid out or vested for equity plans). The table allots columns for the threshold, n224 target n225 and maximum payouts. For all other awards, the number of shares of stock or securities underlying options and the per-share exercise or base price of options granted in a fiscal year are reported in the table. If the exercise or base price is less than the closing market price of the underlying security on the date of the grant, a separate, adjoining column showing the closing market price on the date of the grant is to be added after column (k). The dollar amount of consideration, if any, paid by the executive officer for the awards should be disclosed with an appropriate footnote. n226

[v] Narrative Disclosure to Summary Compensation Table and Grants of Plan-Based Awards Table. Any material facts necessary to understanding the information disclosed in the Summary Compensation Table and the Grants of Plan-Based Awards table should be provided in a narrative description. These material facts include the terms of the named executive officer's employment agreement (written or unwritten), a description of the repricing or material modification of any outstanding option or equity-based award, n227 the material terms n228 of any award reported in the Grants of Plan-Based Awards Table and an explanation of the amount of salary and bonus in proportion to total compensation.

[vi] Outstanding Equity Awards at Fiscal Year-End Table. This table provides details regarding unexercised options, stocks that have not vested and equity incentive plan awards for named executive officers as of the end of the registrant's last completed fiscal year. The awards are delineated on an award-by-award basis, although awards with the same expiration date and exercise and/or base price may be aggregated. n229

[vii] Options Exercises and Stock Vested Table. This table provides details, including the aggregate dollar value realized, n230 regarding each exercise of stock options, SARs and similar instruments, and each vesting of stock, including restricted stock, restricted stock units and similar instruments, during the last completed fiscal year for each of the named executive officers on an aggregated basis.

[viii] Pension Benefit Tables. This table provides details regarding each plan that provides for payments or other benefits at, following, or in connection with retirement. The table includes the number of years of service, n231 the actuarial present value of the named executive officer's accumulated benefit under the plan and the dollar amounts of any payments and benefits paid to the named executive officer during the registrant's last completed fiscal year. n232

A narrative description of any material factors necessary to understanding each plan covered should included with the table. Material factors include:

- the material terms and conditions of payments and benefits available under the plan, including the plan's normal retirement payment and benefit formula and eligibility standards, and the effect of the form of benefit elected on the amount of annual benefits; n233
- whether a named executive officer is currently eligible for early retirement and what the early retirement payment and benefit formula and eligibility standards are;
- the specific elements of compensation included in applying the payment and benefit formula;
- the different purposes of each plan where the named executive officer participates in multiple plans; and
- registrant's policies regarding matters such as granting extra years of credited service.

[ix] Nonqualified Deferred Compensation Table. This table provides details regarding each defined contribution

or other plan that provides for the deferral of compensation on a basis that is not tax-qualified. The table includes, for the registrant's last fiscal year, the dollar amount of aggregate executive contributions and aggregate registrant contributions, the dollar amount of aggregate interest and other earnings accrued, the aggregate dollar amount of all withdrawals by and distributions to the executive, and the total balance of the executive's account. n234

A narrative description of any material factors necessary to understanding each plan covered should be included with the table. Material factors include:

- the types of compensation permitted to be deferred, and any limitations on deferral;
- the measures for calculating interest or other plan earnings (including whether such measure(s) are selected by the executive or the registrant and the frequency and manner in which such selections may be changed), quantifying interest rates and other earnings measures applicable during the registrant's last fiscal year; and
- material terms with respect to payouts, withdrawals and other distributions.

[x] Potential Payment Upon Termination or Change-in-Control. Any arrangement that provides for payments to named executive officers n235 following termination or change-of-control, unless it is non-discriminatory, n236 is to be described in detail. n237 The registrant must provide quantitative disclosure as if the triggering event took place on the last business day of the registrant's last completed fiscal year and the price per share of the registrant's securities were the closing market price as of that date. n238 The specific circumstances that trigger payments or other provisions should be described, including perquisites n239 and health care benefits.

[xi] Director Compensation Table. This table provides details and dollar amounts regarding the compensation of each director n240 for the registrant's last completed fiscal year. The information to be disclosed includes:

- the aggregate dollar amount of all fees earned or paid in cash for services (including retainer fees, committee and/or chairmanship fees and meeting fees); n241
- the aggregate grant date fair value for stock and stock option n242 awards;
- the dollar value of all earnings for services performed during the fiscal year pursuant to non-equity incentive plans and all earnings on outstanding awards;
- the sum of the amounts (i) the aggregate change in the actuarial present value of the director's accumulated benefit under all defined and actuarial pension plans (including supplemental plans) n243 and (ii) the above-market or preferential earnings on compensation that is deferred on a basis that is not tax-qualified, including such earnings on nonqualified defined contribution plans;
- all other compensation for the covered fiscal year; and n244
- the dollar value of total compensation for each director (the sum of all amounts reported in the columns).

Any item reported for a director under the "All Other Compensation" column that is not a perquisite or personal benefit and exceeds \$10,000 in value must be identified and quantified in a footnote to the "All Other Compensation" column. Any amounts deferred, whether pursuant to a plan established under *section 401(k) of the Internal Revenue Code*, or otherwise, are to be included in the appropriate column for the fiscal year in which earned. n245 If the amount of salary or bonus earned in a given fiscal year is not calculable through the latest practicable date, a footnote should so disclose.

When the amount of salary or bonus is later determined, it must then be disclosed in a Current Report filed on Form 8-K. n246

A narrative description of any material factors necessary to understanding the director compensation disclosed in the table. Material factors include:

- a description of the standard compensation arrangements (such as fees for retainer, committee service, service as chairman of the board or a committee, and meeting attendance); and
- whether any director has a different compensation arrangement, identifying that director and describing the terms of that arrangement.

Registrants that qualify as smaller reporting companies provide generally similar executive compensation information, but may omit a Compensation Discussion & Analysis and only must cover two fiscal years in the Summary Compensation Table. n247

[c] Item 403. Security Ownership of Certain Beneficial Owners and Management.

Item 403 of Regulation S-K, "Security Ownership of Certain Beneficial Owners and Management," contains three parts: "Security Ownership of Certain Beneficial Owners," "Security Ownership of Management," and "Changes in Control."

[i] Security Ownership of Certain Beneficial Owners. Part (a) of Item 403, "Security Ownership of Certain Beneficial Owners," requires the registrant to provide information, in tabular form as of the most recent practicable date, for any person n248 known to the registrant n249 to be the beneficial owner of more than five percent of any class of the registrant's voting securities, including the title of the class of voting securities for which the information is being provided, and the name and address n250 of each person for whom information is required to be presented. In addition, disclosure must be provided of the amount and nature of beneficial ownership n251 of each person listed, including disclosure, by footnote or otherwise, of the amount known to the registrant to be shares for which each person has the right to acquire beneficial ownership and, by additional subcolumns or other appropriate explanation necessary, to reflect amounts as to which each person has:

- sole voting power;
- shared voting power;
- sole investment power;
- shared investment power; and
- the percentage of the class of voting securities owned by each person. n252

If any person named pursuant to Item 403(a) holds more than five percent of any class of the registrant's voting securities under a voting trust or similar agreement, the registrant must also state:

- the title of the securities;
- the amount of securities held or to be held pursuant to the agreement, if not clear from the above table;
- the duration of the agreement;

- the names and addresses of the voting trustees; and
- the voting rights and other powers of the voting trustees under the agreement. n253

[ii] Security Ownership of Management. Part (b) of Item 403, "Security Ownership of Management," requires the registrant to provide as of the most recent practicable date, the tabular information required by Item 403(a), with the exception of addresses of the persons for whom information is presented, as to each class of the equity securities of the registrant or any of its parents or subsidiaries including directors' qualifying shares, beneficially owned n254 by (and the percent of class so owned) all: directors and nominees, naming them; named executive officers; and directors and officers as a group, without naming them. n255

[iii] Changes in Control. Part (c) of Item 403, "Changes in Control," requires the registrant to describe any arrangements known to it (including any pledge by any person of securities of the registrant or any of its parents), the operation of which may at a subsequent date result in a change in control of the registrant. n256

[d] Item 404.

Item 404 of Regulation S-K, Transactions with Related Persons, Promoters and Certain Control Persons contains three parts: "Review, Approval or Satisfaction of Transactions with Related Persons" n257

[i] Transactions with Related Persons. Part (a) of Item 404, requires the registrant to briefly describe any transactions or series of similar transactions since the beginning of the registrant's last fiscal year or any currently proposed transactions in which the amount involved exceeds \$120,000 to which the registrant was or is to be a participant and in which any related person had or is to have a direct or indirect n258 material n259 interest.

A related person includes:

- any person who was in any of the following categories at any time since the beginning of the registrant's last fiscal year, including persons involved in any currently proposed transactions, for which disclosure under Item 404(a) is required:
 - any director or executive officer of the registrant
 - any nominee for director, when the information under this Item is being presented in a proxy or information statement relating to the election of that nominee for director; or
 - any immediate family member n260 of a director or executive officer of the registrant, or of any nominee for director when the information called for by Item 404(a) is being presented in a proxy or information statement relating to the election of that nominee for director; and
- any person who was in any of the following categories when a transaction in which such person had a direct or indirect material interest occurred or existed:
 - a security holder covered by Item 403(a); or
 - an immediate family member n261 of any such security holder

The following information regarding the transaction must be disclosed:

1-4 Federal Securities Exchange Act of 1934 § 4.03

- the name of the related person and the basis on which they are a related person;
- the related person's interest in the transaction with the registrant, including position(s) or relationship(s) with, or ownership in, a firm, corporation, or other entity that is a party to, or has an interest in, the transaction;
- the approximate dollar value of the amount involved n262 in the transaction;
- the approximate dollar value of the amount of the related person's interest in the transaction, which shall be computed without regard to the amount of profit or loss;
- in the case of indebtedness, n263 disclosure of the amount involved in the transaction shall include the largest aggregate amount of principal outstanding as of the latest practicable date, the amount of principal paid during the periods for which disclosure is provided, the amount of interest paid during the period for which disclosure is provided, and the rate or amount of interest payable on the indebtedness; and n264
- any other information regarding the transaction or the related person in the context of the transaction that is material to investors in light of the circumstances of the particular transaction.

The registrant need not provide information concerning a transaction if:

- in the case of indebtedness, the transaction involves a related person who is a security holder covered by Item 403(a) or any immediate family member of such security holder; n265
- disclosure of an employment relationship or transaction involving an executive officer and any related compensation and the compensation is reported pursuant to Item 402 or Regulation S-K; n266
- the interest arises solely from such person's position as a limited partner in a partnership in which the related person has an interest of less than ten percent, and the person is not a general partner of and does not hold another position in the partnership;
- the interest of the person arises solely from the (i) ownership, individually and in the aggregate, of less than ten percent of any class of equity securities of another person (other than a partnership) which is a party to the transaction (ii) the person's position as director of the other corporation or organization or (iii) both n267
- the rates or charges for the transaction are determined by competitive bids;
- the transaction involves the rendering of services as a common or contract carrier or public utility at rates or charges fixed in conformity with law or governmental authority;
- the transaction involves services as a bank depository of funds, transfer agent, registrar, trustee under a trust indenture, or similar services; or
- the interest of the person arises solely from the ownership of the registrant's securities and the person receives no extra or special benefit not shared on a pro rata basis. n268

[ii] Review, Approval or Ratification of Transactions With Related Persons. n269 Part (b) of Item 404, "Review, Approval or Ratification of Transactions With Related Persons," requires the registrant to provide detail as to

the process of review, approval or ratification of any transaction with related persons (transactions required to be reported under paragraph (a) of Item 404). Item 404(b) does not set a formula for disclosure but does provide examples of what might be relevant features of the policies and procedures, including (i) the types of transactions that are covered; (ii) the standards applied; (iii) the persons responsible for application; and (iv) a statement regarding the written or other evidence of such policies and procedures.

Under this paragraph (b), the registrant should also identify any transaction required to be reported under paragraph (b) of Item 404 since the beginning of the registrant's last fiscal year where such policies and procedures did not require review, approval or ratification or where such policies and procedures were not followed. n270

[iii] Promoters and Certain Control Persons. n271 Part (c) of Item 404, "*Promoters and Certain Control Persons*," requires registrants filing a registration statement on Securities Act Form S-1 or Exchange Act Form 10 that had a promoter at any time during the last five years to state the names of the promoters and the nature and amount of anything of value received or to be received by each promoter directly or indirectly from the registrant, including money, property, contracts, options or rights of any kind. The nature and amount of assets, services, or other consideration received or to be received by the registrant from each promoter must be described. As to any assets acquired or to be acquired by the registrant from the promoter, the amount at which the assets were acquired or are to be acquired, the principle persons determining the value of the assets and their relationship, if any, with the registrant or any promoter must be described. If the assets were acquired by the promoter within two years before their transfer to the registrant, the cost of the assets to the promoter must be stated.

Where the registrant is a shell company, the above disclosures regarding promoters must also be given as to any person who has, or any person that is part of a group that has, acquired control of the registrant. n272

Registrants that qualify as smaller reporting companies are not required to provide all of the information required by Item 404 of Regulation S-K. n273

[e] Item 405. Compliance with Section 16(a) of the Exchange Act. Item 405 of Regulation S-K requires registrants to provide information concerning noncompliance by its insiders with the reporting requirements of Section 16(a) of the Exchange Act. n274 Part (a) of Item 405 provides that, under the caption "Section 16(a) Beneficial Ownership Reporting Compliance" and based solely upon a review of Forms 3 and 4 and amendments thereto furnished to the registrant pursuant to Exchange Act Rule 16a-3(e) during its most recent fiscal year and Forms 5 and amendments thereto furnished to the registrant with respect to its most recent fiscal year, and certain written representations, n275 the registrant n276 must identify each person who, at any time during the fiscal year, was a "reporting person" that failed to file on a timely basis, as disclosed in the Forms referred to above, reports required by Exchange Act Section 16(a) during the most recent fiscal year or prior fiscal years. n277 A reporting person is defined as:

- a director, officer, beneficial owner of more than ten percent of any class of equity securities of the registrant pursuant to Exchange Act Section 12; or
- any other person subject to Exchange Act Section 16 with respect to the registrant because of the requirements of Section 30 of the Investment Company Act or Section 17 of the Public Utility Holding Company Act.

For each such person, the registrant must set forth the number of late reports, the number of transactions that were not reported on a timely basis, and any known failure to file a required Form. A known failure includes a failure to file a Form 3, which is required of all reporting persons, and a failure to file a Form 5 in the absence of a written representation that no form is required. n278 If the registrant receives a written representation from the reporting person that no Form 5 is required, and maintains the representation for two years, making a copy available to the Commission

upon request, the registrant need not identify such reporting person as having failed to file a Form 5 with respect to the fiscal year. n279

[f] Item 406. Code of Ethics. Item 406 requires a registrant to disclose whether it has adopted a code of ethics n280 that applies to its principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions. n281 If the registrant has not adopted such a code of ethics, it must explain why it has not done so. n282

Additionally, a registrant must:

- file a copy of its code of ethics as an exhibit to its annual report;
- post the text of its code of ethics on its Internet website and disclose, in its annual report, its Internet address and the fact that it has posted its code of ethics on its website; or
- undertake in its annual report to provide to any person, without charge and upon request, a copy of its code of ethics and explain the manner in which such request may be made. n283

Finally, if a registrant intends to satisfy the disclosure requirement under Item 5.05 of Form 8-K Form 8-K (regarding an amendment to, or a waiver from, a provision of its code of ethics) by posting such information on its Internet website, the registrant must disclose its Internet address and its intention to amend or grant a waiver from its code of ethics. n284

[g] Item 407. Corporate Governance. n285 Item 407(a) requires the registrant to identify each director n286 and director nominee that is independent, as defined in this Item 407. The registrant must also disclose the definition of independence used for determining the independence of directors and director nominees and members of specific committees of the board of directors.

When the registrant determines independence of directors and director nominees, the registrant must apply certain applicable independence standards. If the registrant is a listed issuer whose securities are listed on a national securities exchange or an inter-dealer quotation system, and the registrant adopted standards specifically to comply with corporate governance requirements, n287 then the following independence standards apply:

- in determining if a director or director nominee is independent, the applicable definition of independence would be the registrant's definition of independence that it uses for determining if a majority of the board of directors is independent in compliance with the listing standards applicable to the registrant; n288
- in determining whether the members of a committee of the board of directors are independent, the applicable independence standards would be the standards used by the registrant in determining if the members of that specific committee are independent in compliance with the listing standards applicable to the registrant; and
- if the registrant does not have independence standards for a committee, the applicable standard would be the independence standards for that specific committee that the registrant uses in determining if the directors are independent in compliance with the listing standards applicable to the registrant.

If the registrant is not a listed issuer, the registrant is to use the definition of independence of a national securities exchange or an inter-dealer quotation system which has requirements that a majority of the board of directors be independent. n289 The registrant must state which definition is used and must use the same definition with respect to all

directors and director nominees. When determining independence standards for a specific committee, if the chosen source of independence definition has standards for a specific committee, the registrant must use those committee specific standards.

If the registrant has adopted its own definitions for determining independence, the registrant must disclose whether those policies are available to security holders via the registrant's website and give the website address, or include the policies in an appendix to the registrant's proxy statement or information statement that is provided to security holders at least once every three fiscal years (or when the policies have been materially amended as of the beginning of the registrant's last fiscal year). n290

For each director and director nominee that is identified as independent, the registrant must fully describe, in such detail as is necessary, n291 by specific category or type, any transaction, relationship or arrangement not disclosed pursuant to Item 404(a) (regarding transactions with related persons) that was considered by the board of directors under the applicable independence definitions in determining that the director is independent.

Board Meetings and Committees; Annual Meeting Attendance. Item 407(b) requires the registrant to disclose the total number of board meetings held during the last full fiscal year and provide information regarding director attendance. The registrant should also disclose the attendance policies for attendance at annual meetings and state the number of board members who attended the prior year's annual meetings. n292 The registrant must provide details regarding its audit, nominating and compensation committees, including whether they have standing committees, the identity of each committee member, the number of meetings held by each committee during the last fiscal year and the functions performed by each committee.

Nominating Committee. n293 If the registrant does not have a standing nominating committee, it must provide the basis for determining that the absence of a standing committee is appropriate. The registrant should also identify each director who participates in the consideration of director nominees. The following information should be disclosed regarding the director nomination process:

- disclosure of, or absence of, a nominating committee charter;
- description of the policy for consideration of director nominees recommended by security holders, including a statement as to whether the committee will consider director candidates recommended by security holders;
- if there is no policy governing the consideration of director nominees recommended by security holders, there must be a statement as to that fact and the basis for the view of the board of directors that it is appropriate for the registrant not to have such a policy;
- description of the procedures to be followed by security holders submitting director nominee recommendations (if the nominating committee will consider director candidates recommended by security holders) as well as description of any material changes to the procedures; n294
- description of specific minimum qualifications, as well as any specific qualities or skills, that the nominating committee believes must be met by a candidate that committee has recommended;
- description of the process for identifying and evaluating director nominees, including whether the processes are different depending on the source of the nominee;
- the source of the nomination for a nominee submitted on the proxy statement; n295

- disclosure of the function performed any an third party that receives fees from the registrant to identify or evaluate or assist in identifying or evaluating potential nominees; and
- identify and provide certain information for director nominees submitted by a security holder, or a group thereof, that beneficially owns more than 5% of the registrant's voting common stock for at least one year as of the date the recommendation was made. n296

Audit Committee. The registrant must state whether or not the audit committee has a charter. If the registrant is a listed issuer with a director appointed to the audit committee that is not independent (in accordance with the listing standards applicable to the issuer, including as a result or exception or limited or similar circumstances), disclosure as to the nature of the relationship that makes the individual not independent and the reasons for the board of directors' determination must be given.

If the registrant is a listed issuer filing either an annual report on Form 10-K or 10-KSB, or a proxy statement or information statement pursuant to the Exchange Act if action is to be taken with respect to the election of directors and the registrant is not relying upon exemptions to the reporting requirements of Item 407, n297 then the registrant must state whether or not it has a separately-designated standing audit committee established in accordance with the Exchange Act or a committee performing similar functions. If there is a standing audit committee, each member (including where entire board composes the audit committee) must be identified. The registrant must disclose the information required by Rule 10A-3(d) of the Exchange Act if relying upon an exemption from the listing standards for audit committees.

Audit Committee Report. n298 Item 407(d)(3) requires a registrant's audit committee to state whether it has:

- reviewed and discussed the audited financial statements with management;
- discussed with the registrant's independent auditors the matters required to be discussed by Auditing Standards No. 61, as amended (AICPA, *Professional Standards*, Vol. 1, AU section 380) as adopted by the Public Company Accounting Oversight Board in Rule 3200T;
- received the written disclosures and the letter from the registrant's independent accountants required by applicable requirements of the Public Company Accounting Oversight Board regarding the independent accountant's communications with the audit committee concerning independence and has discussed with the independent accountant the independent accountant's independence; and
- based on the review and discussions referred to in the preceding points, whether the audit committee recommends to the registrant's Board of Directors that the audited financial statements be included in the registrant's Annual Report on Form 10-K for the last fiscal year for the filing with the Commission. The name of each member of the registrant's audit committee (or, in the absence of an audit committee, the board committee performing equivalent functions or the entire board of directors) must appear below the audit committee report. n299

Audit Committee Financial Expert. The registrant must disclose if, in the board's determination, the registrant has, or does not have, a financial expert. n300 If the registrant has a financial expert, it should also be disclosed whether he or she is independent, n301 as defined in the listing standards applicable to the listed issuer. If the registrant does not have a financial expert, the registrant must disclose this and provide an explanation. An audit committee financial expert must have the following attributes:

- an understanding of generally accepted accounting principles and financial statements;

1-4 Federal Securities Exchange Act of 1934 § 4.03

- the ability to assess the general application of such principles in connection with the accounting for estimates, accruals and reserves;
- experience preparing, auditing, analyzing or evaluating financial statements that present a breadth and level of complexity of accounting issues that are generally comparable to the breadth and complexity of issues that can reasonably be expected to be raised by the registrant's financial statements, or experience actively supervising one or more persons engaged in such activities;
- an understanding of internal control over financial reporting; and
- an understanding of audit committee functions.

Further, the audit committee expert is to have required such attributes through:

- education and experience as a principal financial officer, principal accounting officer, controller, public accountant or auditor or experience in one or more positions that involve the performance of similar functions;
- experience actively supervising a principal financial officer, principal accounting officer, controller, public accountant, auditor or person performing similar functions;
- experience overseeing or assessing the performance of companies or public accountants with respect to the preparation, auditing or evaluation of financial statements; or
- other relevant experience. n302

Item 407 provides a safe harbor for the audit committee financial expert from the imposition of any extra duties, obligations and liabilities that could arguably accompany such title. The audit committee financial expert does not bear any special duties, obligations or liabilities that are greater than those imposed through membership on the audit committee and the board of directors. The audit committee financial expert is not deemed an *expert* for any purpose, including without limitation for purposes of Section 11 of the Securities Act, as a result of being designated or identified as an audit committee financial expert pursuant to Item 407. The designation or identification of a person as an audit committee financial expert also does not affect the duties, obligations or liabilities of any other member of the audit committee or board of directors.

Compensation Committee. If the registrant does not have a standing compensation committee, there should be a statement disclosing this fact, including the basis for the view of the board of directors that it is appropriate for the registrant not to have such a committee. The registrant must then identify each director who participates in the consideration of executive officer and director compensation.

The registrant must provide a narrative description of the registrant's processes and procedures for the consideration and determination of executive and director compensation, including:

- the scope of authority of the compensation committee (or persons performing the equivalent functions);
- the extent to which the compensation committee (or persons performing the equivalent functions) may delegate any authority that is within the scope of the compensation committee's authority and to whom;

- any role of executive officers in determining or recommending the amount or form of executive and director compensation; and
- any role of compensation consultants in determining or recommending the amount or form of executive and director compensation, identifying such consultants, stating whether such consultants are engaged director by the compensation committee (or persons performing the equivalent functions) or any other person, describing the nature and scope of their assignment, and the material elements of the instructions or directions given to the consultants with respect to the performance of their duties under the engagement.

Compensation Committee Interlocks and Insider Participation. Under the caption "Compensation Committee Interlocks and Insider Participation," the registrant is to provide certain details regarding the members of the compensation committee, or those performing similar function. If the registrant has a compensation committee, the registrant should identify each member of the compensation committee that served on the registrant's board of directors (or board committee performing equivalent functions) during the last completed fiscal year and indicate each member who was, during any part of the fiscal year, an officer or employee of the registrant, was formerly an officer of the registrant, or had a relationship requiring disclosure under Item 404 (transactions with related persons, promoters and certain control persons). n303

If the registrant does not have a compensation committee (or other board committee performing equivalent functions), the registrant is to identify each officer and employee of the registrant, and any former officer of the registrant, who, during the last completed fiscal year, participated in deliberations of the registrant's board of directors concerning executive officer compensation. The registrant must then describe any reciprocal relationship between two entities whereby executive officers serve on the other entity's compensation committee or board of directors.

Compensation Committee Report. n304 Under the caption "Compensation Committee Report," the compensation committee (or other board committee performing equivalent functions, or, in the absence of such committee, the entire board of directors) must state:

- whether the compensation committee has reviewed and discussed the Compensation Discussion and Analysis required by Item 402(b) with management;
- based on such review, whether the compensation committee recommends to the board of directors that the Compensation Discussion and Analysis be included in the registrant's annual report on Form 10-K, proxy statement on Schedule 14A or information statement on Schedule 14C; and
- the name of each member of the registrant's compensation committee (or other board committee performing equivalent functions or, in the absence of any such committee, the entire board of directors).

Stockholder Communications. The registrant must state whether or not it has a process for facilitating security holder communication n305 with board of directors. If the registrant has such a process for security holders to send communications to the board of directors, the registrant must describe the process (the manner in which to send communications to the board and/or specified individual directors, or the registrant's process for determining which communications will be relayed to the board, if all such communications are not sent directly to the board and such process for relaying communications has not been approved by a majority of the independent directors of the board). n306 This may also be satisfied by directing the security holder to the registrant's website where the description of such process can be found. n307 If the registrant does not have such a process, the registrant must state the basis for the view of the board of directors that it is appropriate for the registrant not to have such a process.

Committee Charters. The registrant must state whether or not it has nominating, audit and compensation committee

charters. If so, a current copy of the charters must be available at the registrant's website, with statements indicating where the charters can be found, or must be included as an appendix to the registrant's proxy or information statement that is provided to security holders at least once every three fiscal years, or upon material amendment. n308 For years where the charters are not included as an appendix to the proxy or information statement, the registrant must identify which of the prior fiscal years the charter was so included.

Registrants that qualify as smaller reporting companies are not required to provide all of the information required by Item 407 of Regulation S-K. n309

[6] Registration Statement and Prospectus Provisions

The sixth section of Regulation S-K contains twelve items that set forth specific content requirements applicable only to Securities Act registration statements and the legends and undertakings thereunder.

[7] Exhibits

The seventh section of Regulation S-K covers "Exhibits" to filings under the Securities Act and Exchange Act. Item 601 of Regulation S-K, "Exhibits," provides an exhibit table listing the exhibits that must be filed as part of certain Securities Act and Exchange Act registration statements and reports. A registrant is also permitted to file any additional exhibits that it may wish to file. n310 The filing of exhibits pursuant to Item 601 is subject to Rule 12b-32 which permits incorporation of exhibits by reference n311 and to Regulation S-T under the Exchange Act as to electronic filers. n312

Copies of each required exhibit, rather than originals, need only be filed unless otherwise specifically noted. n313 Each registration statement or report is required to contain an exhibit index, immediately preceding the exhibits filed, indicating the page number where each exhibit can be found or that the exhibit has been incorporated by reference. n314 Each exhibit must be listed in the exhibit index according to the number assigned to it in the exhibit table in Item 601(b) of Regulation S-K. When applicable, the first page of a manually signed registration statement must list the page in the filing where the exhibit index is located.

[a] Form 10 Exhibits. The following exhibits must be filed as part of Form 10:

- (2) n315 each material plan of acquisition, disposition, reorganization, readjustment, succession, liquidation, or arrangement and any amendments to the plan described in the registration statement or report; n316
- (3) the articles of incorporation and bylaws of the registrant, or corresponding instruments, and any amendments to the articles or bylaws; n317
- (4) instruments defining the rights of security holders, n318 including indentures; n319
- (9) each voting trust agreement and any amendments to the agreement; n320
- (10) material contracts; n321
- (11) a statement setting forth in reasonable detail the computation of per share earnings (on both primary and fully diluted bases); n322
- (12) a statement setting forth in reasonable detail the computation of any ratio of earnings to fixed charges, any ratio of earnings to combined fixed charges and preferred stock dividends, or any other

ratios that appear in the registration statement; n323

- (16) a letter relating to a change in the certifying accountant; n324
- (21) a list of all subsidiaries of the registrant, the jurisdiction of incorporation or organization of each, and the names under which each does business; n325
- (24) if any name is signed to the registration statement pursuant to a power of attorney, manually signed copies of the power of attorney, or if the name of any officer signing on behalf of the registrant is signed pursuant to a power of attorney, certified copies of a resolution of the registrant's board of directors authorizing that signature; n326
- (99) additional exhibits; n327 and
- (100) XBRL-related documents. n328

[b] Form 8-K Exhibits. The following exhibits must be filed as part of Form 8-K, if relevant to the particular report:

- (1) each underwriting contract or agreement (or the proposed forms if the terms of the contract or agreement have not been determined) with a principal underwriter pursuant to which the securities being registered are to be distributed, or, if the terms of such documents have not been determined, the proposed forms thereof; n329
- (2) each material plan of acquisition, disposition, reorganization, readjustment, succession, liquidation, or arrangement and any amendments thereto described in the registration statement or report; n330
- (3) the text of any amendment to the articles of incorporation or bylaws, or corresponding instruments, of the registrant; and n331
- (4) instruments defining the rights of security holders, including indentures; n332
- (7) correspondence from an independent accountant regarding non-reliance on a previously issued audit report or completed interim review. n333
- (14) the registrant's code of ethics, if applicable; n334
- (16) a letter relating to the change in certifying accountant; n335
- (17) any letter from a former director that sets forth a description of a disagreement with the registrant that led to the director's resignation or refusal to stand for reelection which requests that the matter be disclosed; n336
- (20) a document or statement furnished to security holders containing information meeting some or all the requirements of Form 8-K, if furnished within the period prescribed for the filing of the report; n337
- (23) where the filing of written consents of experts and counsel (dated and manually signed) as to material incorporated by reference in a previously filed Securities Act registration statement is requested,

such consents may be filed as an exhibit to the material incorporated by reference; n338

- (24) if any name is signed to the report pursuant to a power of attorney, manually signed copies of the power of attorney, or if the name of any officer signing on behalf of the registrant is signed pursuant to a power of attorney, certified copies of a resolution of the registrant's board of directors authorizing that signature; n339 and

- (99) additional exhibits; and n340

- (100) XBRL-related documents may be submitted in electronic format as an exhibit to a Form 8-K that references the filing (or amendment thereto) to which the XBRL-documents relate (if the Form 8-K is submitted no earlier than the date of that filing). n341

[c] Form 10-Q Exhibits. The following exhibits must be filed as part of Form 10-Q:

- (2) each material plan of acquisition, disposition, reorganization, readjustment, succession, liquidation, or arrangement and any amendments thereto described in the report; n342

- (3) the articles of incorporation and bylaws of the registrant, or corresponding instruments, and any amendments to the articles or bylaws; n343

- (4) instruments defining the rights of security holders, including indentures; n344

- (10) material contracts; n345

- (11) a statement setting forth in reasonable detail the computation of per share earnings (on both primary and fully diluted bases); n346

- (15) a letter, if applicable, from the independent accountant acknowledging awareness of the use in a registration statement of a report on unaudited interim financial information that is not considered a part of a registration statement or report prepared or certified by an accountant; n347

- (18) a letter from the registrant's independent accountant indicating whether any change in accounting principles or practices followed by the registrant, or any change in the method of applying any accounting principles or practices, that affected the financial statements filed in the report or that is reasonably certain to affect the financial statements of future fiscal years, is to an alternative accounting principle or practice which in the accountant's judgment is preferable under the circumstances; n348

- (19) a document or statement furnished to security holders containing information meeting some or all the requirements of Part I of Form 10-Q, incorporated by reference into Form 10-Q, if furnished within the period prescribed for the filing of the report; n349

- (22) published reports regarding matters submitted to a vote of security holders incorporated by reference in Form 10-Q n350 that are required to be filed as exhibits by Rule 12b-23(a)(3); n351

- (23) where the filing of written consents of experts and counsel (dated and manually signed) as to material incorporated by reference in a previously filed Securities Act registration statement is required, such consents may be filed as an exhibit to the material incorporated by reference; n352

- (24) if any name is signed to the report pursuant to a power of attorney, manually signed copies of

the power of attorney, or if the name of any officer signing on behalf of the registrant is signed pursuant to a power of attorney, certified copies of a resolution of the registrant's board of directors authorizing that signature; n353

- (31) the certifications required by Rules 13a-14(a) or 15d-14(a) of the Exchange Act adopted pursuant to Section 302 of the Sarbanes-Oxley Act, exactly as set forth in Item 601(b)(31); n354

- (32) the certifications required by Rules 13a-14(b) or 15d-14(b) of the Exchange Act and *18 U.S.C. § 1350* adopted pursuant to Section 906 of the Sarbanes-Oxley Act; n355

- (99) any additional exhibits which the registrant may wish to file; however, if pursuant to Section 11(a) of the Securities Act, an issuer makes available to its security holders generally an earnings statement covering a period of at least twelve months beginning after the effective date of a registration statement (other than through the issuer's Exchange Act reports contemplated by Rule 158 of the Securities Act), it must be filed as an exhibit to the next periodic report required by Section 13 or 15(d) of the Exchange Act covering the period when the earnings statement is released; n356

- (100) XBRL-related documents may be submitted in electronic format as an exhibit to the filing (or amendment thereto) to which they relate; and n357

- (101) Interactive Data File. n358

[d] Form 10-K Exhibits. The following exhibits must be filed as part of Form 10-K:

- (2) each material plan of acquisition, disposition, reorganization, readjustment, succession, liquidation, or arrangement and any amendments to the plan described in the report; n359

- (3) the articles of incorporation and bylaws of the registrant, or corresponding instruments, and any amendments to the articles or bylaws; n360

- (4) instruments defining the rights of security holders, including indentures; n361

- (9) each voting trust agreement and any amendments thereto; n362

- (10) material contracts; n363

- (11) a statement setting forth in reasonable detail the computation of per-share earnings (on both primary and fully diluted bases); n364

- (12) a statement setting forth in reasonable detail the computation of any ratio of earnings to fixed charges, any ratio of earnings to combined fixed charges and preferred stock dividends, or any other ratios that appear in the report; n365

- (13) the annual report to security holders for the last fiscal year, and the quarterly report to security holders if all or a portion of the quarterly report is incorporated by reference in the report; n366

- (14) the registrant's code of ethics, if applicable; n367

- (16) a letter relating to a change in the certifying accountant; n368

- (18) a letter from the registrant's independent accountant indicating whether any change in accounting principles or practices followed by the registrant, or any change in the method of applying any accounting principles or practices, that affected the financial statements of future fiscal years, is to an alternative accounting principle or practice which in the accountant's judgment is preferable under the circumstances; n369
- (21) a list of all subsidiaries of the registrant, the jurisdiction of incorporation or organization of each, and the names under which each does business; n370
- (22) published reports regarding matters submitted to a vote of security holders incorporated by reference in Form 10-K n371 that are required to be filed as exhibits by Rule 12b-23(a)(3); n372
- (23) where the filing of written consents of experts and counsel (dated and manually signed) as to material incorporated by reference in a previously filed Securities Act registration statement is required, such consents may be filed as an exhibit to the material incorporated by reference; n373
- (24) if any name is signed to the report pursuant to a power of attorney, manually signed copies of the power of attorney, or if the name of any officer signing on behalf of the registrant is signed pursuant to a power of attorney, certified copies of a resolution of the registrant's board of directors authorizing that signature; n374
- (31) the certifications required by Rules 13a-14(a) or 15d-14(a) of the Exchange Act adopted pursuant to Section 302 of the Sarbanes-Oxley Act, exactly as set forth in Item 601(b)(31); n375
- (32) the certifications required by Rules 13a-14(b) or 15d-14(b) of the Exchange Act and 18 U.S.C. § 1350 adopted pursuant to Section 906 of the Sarbanes-Oxley Act; n376
- (33) the report on assessment of compliance with servicing criteria for asset-backed securities; n377
- (34) the attestation report on assessment of compliance with servicing criteria for asset-backed securities; n378
- (35) servicer compliance statement; n379
- (99) any additional exhibits which the registrant may wish to file; however, if pursuant to Section 11(a) of the Securities Act, an issuer makes available to its security holders generally an earnings statement covering a period of at least twelve months beginning after the effective date of a registration statement (other than through the issuer's Exchange Act reports contemplated by Rule 158 of the Securities Act), it must be filed as an exhibit to the next periodic report required by Section 13 or 15(d) of the Exchange Act covering the period when the earnings statement is released; and n380
- (100) XBRL-related documents may be submitted in electronic format as an exhibit to the filing (or amendment thereto) to which they relate; and n381
- (101) Interactive Data File. n382

[8] Miscellaneous

The eighth section of Regulation S-K contains two items: "Recent Sales of Unregistered Securities; Use of Proceeds from Unregistered Securities" and "Indemnification of Directors and Officers."

[a] Item 701. Recent Sales of Unregistered Securities; Use of Proceeds from Registered Securities. Item 701 of Regulation S-K, "Recent Sales of Unregistered Securities; Use of Proceeds from Registered Securities," requires the registrant to furnish the following information as to all securities of the registrant sold by the registrant within the last three years, or in the case of Exchange Act reports, within the applicable reporting period, that were not registered under the Securities Act: n383

- the date of sale and the title and amount of securities sold;
- the names of any principal underwriters;
- if the securities were not publicly offered, the names of the persons or the identity of the class of persons to whom the securities were sold;
- if the securities were sold for cash, the aggregate offering price and the aggregate underwriting discounts or commissions;
- if the securities were not sold for cash, the nature of the transaction and the nature and aggregate amount of consideration received; and
- the exemption from registration claimed and the facts relied upon to make the exemption available; and in the case of convertible or exchangeable securities, warrants, and options, the terms of conversion or exercise. n384

Following the effective date of the first registration statement filed under the Securities Act by an issuer, the issuer or successor issuer must report the use of proceeds in its first periodic report filed pursuant to Section 13(a) and 15(d) of the Exchange Act, and thereafter on each of its subsequent periodic reports through the later of disclosure of the application of all the offering proceeds or termination of the offering. In disclosing the use of proceeds in the first periodic report filed pursuant to the Exchange Act, the issuer (or any successor issuer) must include the following information:

- the effective date of the Securities Act registration statement for which the use of proceeds information is being disclosed and the Commission file number assigned to the registration statement;
- if the offering has commenced, the offering date, and if the offering has not commenced, an explanation of why it has not;
- if the offering terminated before any securities were sold, an explanation for such termination;
- if the offering did not terminate before any securities were sold:
 - whether the offering has terminated and, if so, whether it terminated before the sale of all securities registered;
 - the names of any managing underwriter;
 - the title of each class of securities registered and where a class of convertible securities is being registered, the title of any class of securities into which such securities may be converted; and
 - for each class of securities (other than a class of securities into which a class of

1-4 Federal Securities Exchange Act of 1934 § 4.03

convertible securities registered may be converted without additional payment to the issuer) the following information, provided for both the account of the issuer and the accounts of any selling security-holder: the amount registered; the aggregate price of the offering amount registered; the amount sold; and the aggregate offering price of the amount sold to date;

- from the effective date of the Securities Act registration statement to the ending date of the reporting period, the amount of expenses incurred for the issuer's account in connection with the issuance and distribution of the securities registered for underwriting discount and commission, finders' fees, expenses paid to or for underwriters, other expenses, and total expenses. The issuer must indicate if a reasonable estimate for the amount of expenses incurred is provided instead of the actual amount of expenses.

Indicate whether such payments were:

- direct or indirect payments to directors, officers, general partners of the issuers or their associates; to persons owning ten percent or more of any class of equity securities of the issuer; and to affiliates of the issuer; or

- direct or indirect payments to others;

- the net offering proceeds to the issuer after deducting the total expenses;

- from the effective date of the Securities Act registration statement to the ending date of the reporting period, the amount of net offering proceeds to the issuer and for construction of plant, buildings, and facilities, purchase and installation of machinery and equipment; purchases of real estate; acquisition of other businesses; repayment of indebtedness; working capital; temporary investment (which should be specified); and any other purposes for which at least five percent of the issuer's total offering proceeds or \$100,000 (whichever is less) has been used (which should be specified). Indicate if a reasonable estimate for the amount of net offering proceeds applied is provided instead of the actual amount of net offering proceeds and indicate whether such payments were:

- direct or indirect payments to directors, officers, general partners of the issuer or their associates; to persons owning ten percent or more of any class of equity securities of the issuer; and the affiliates of the issuer; or

- direct or indirect payments to others; and

- if the use of proceeds above represents a material change in the use of proceeds from that described in the prospectus, the issuer should briefly describe the material change. n385

Item 701 of Regulation S-K applies to sales of new issues; sales of reacquired securities; securities issued in exchange for property, services, or other securities; and new securities resulting from the modification of outstanding securities.

n386 The Commission has determined that timely disclosure of unregistered sales of equity securities is of interest to the market, particularly with respect to sales made in reliance upon Regulation S, the safe harbor for offshore sales, and Section 4(2), the private placement exemption. Thus, disclosure of this information is now required in annual and quarterly Exchange Act Reports. n387 Item 701 of Regulation S-K enhances the exposure to liability under the Securities Act if the registrant has sold unregistered securities for which no exemption was available. The Commission may take the position that this contingent liability must be reflected in the registrant's financial statements.

[b] Item 702. Indemnification of Directors and Officers. Item 702 of Regulation S-K, "Indemnification of Directors and Officers," requires the registrant to state the general effect of any statute, charter provision, bylaw,

contract, or other arrangement under which any person is insured or indemnified against liabilities incurred in his capacity as a director, officer, or controlling person of the registrant.

[c] Item 703. Purchases of Equity Securities by the Issuer and Affiliated Purchasers. Item 703 of Regulation S-K requires the registrant to disclose, in the tabular format set forth in Item 703, certain information with respect to any purchase made by or on behalf of the registrant or any "affiliated purchaser" (as defined in Rule 10b-18(a)(3) of the Exchange Act) of shares or other units of any class of the registrant's equity securities that is registered pursuant to Section 12 of the Exchange Act. n388 The table must include the following information for each class or series of securities for each month included in the period covered by the report (or in each month in the registrant's fourth quarter if the disclosure is contained in an annual report n389):

- the total number of shares or units purchased; n390
- the average price paid per share or unit;
- the total number of shares or units purchased as part of publicly-announced repurchase plans or programs (in the aggregate); and
- the maximum number (or approximate dollar value) of shares or units that may yet be purchased under the plans or programs (in the aggregate). n391

The registrant must also disclose, by footnote to the table: (a) the date each plan or program was announced; (b) the dollar amount (or share or unit amount) approved; (c) the expiration date (if any) of each plan or program; (d) each plan or program that has expired during the period covered by the table; and (e) each plan or program the registrant has determined to terminate prior to expiration, or under which the issuer does not intend to make further purchases. n392 Issuers should note that this may include certain stock options exercise transactions.

[9] List of Industry Guides

The ninth section of Regulation S-K contains two items: "Securities Act Industry Guides" (applicable to Securities Act filings) and "Exchange Act Industry Guides."

Item 802 of Regulation S-K, "Exchange Act Industry Guides," lists the following guides for disclosure under the Exchange Act: n393

- Guide 2, "Disclosure of oil and gas operations"
- Guide 3, "Statistical disclosure by bank holding companies"
- Guide 4, "Disclosures concerning unpaid claims and claim adjustment expenses of property-casualty underwriters" and
- Guide 7, "Description of property by issuers engaged or to be engaged in significant mining operations."

[10] Roll-up Transactions

The tenth section of Regulation S-K contains fifteen items that set forth specific content requirements applicable only to transactions involving roll-ups of limited partnerships or similar entities. n394

[11] Disclosure by Registrants Engaged in Oil and Gas Producing Activities.

The eleventh section of Regulation S-K contains eight items that set forth specific content requirements applicable only to registrants engaged in oil and gas producing activities. This section of Regulation S-K is not effective until January 1, 2010. n395

[12] Small Businesses

Effective February 4, 2008, the Commission adopted rules significantly revising its regulations regarding small business issuers. n396 The revised rules eliminated the definition of "small business issuer" and created a new category of issuer called a "a smaller reporting company". n397 The revised rules also eliminated Regulation S-B and the related forms in favor of a new system of scaled disclosure for reporting, registration and proxy solicitation filings under the Securities Act and the Exchange Act. n398

[a] Definition. A "a smaller reporting company" is an entity:

- with an aggregate market value of common equity held by nonaffiliates ("public float") of less than \$75 million, or, if unable to calculate its public float, has annual revenue of \$50 million or less;
- that is not an investment or asset-backed company; and
- that is not a majority-owned subsidiary of a non -"smaller reporting company."

In order to qualify as a "smaller reporting company," a reporting company must meet both the public float tests as of the last business day of its most recently completed second fiscal quarter, or if applicable, the revenue test during its most recently completed fiscal year for which audited financial statements are available. n399 The Commission's rules governing smaller reporting companies allow such companies to move in and out of the scaled disclosure system, based upon changes in the smaller reporting company's market capitalization over time. A smaller reporting company is required to exit the scaled disclosure system in the fiscal year after its individual public float rises above \$75 million as of the last business day of its second fiscal quarter. A former smaller reporting company that chooses to re-enter the scaled disclosure system may only do so if its public float was less than \$50 million as of the last business day of its second fiscal quarter, and would be able to use scaled disclosure in the next fiscal year after that determination, beginning with its initial Form 10-Q of that year. n400

[b] Scaled Disclosure. The Commission's smaller reporting company rules integrate individual Regulation S-B disclosure items (other than Item 310) into Regulation S-K. These rules allow each smaller reporting company to select on an item-by-item, or "a la carte" basis, whether it will comply with the new scaled disclosure requirements in Regulation S-K for smaller reporting companies, or whether it will comply with the more rigorous disclosure requirements in Regulation S-K that apply to other companies n401 A smaller reporting company may comply with either the requirements applicable to smaller reporting companies or the requirements applicable to other companies for each item of Regulation S-K, unless the requirements for smaller reporting companies specify that smaller reporting companies must comply with the smaller reporting company requirements. The items of Regulation S-K that contain requirements that are different for smaller reporting companies than the requirements applicable to other companies include: n402

Item 101	Description of business
Item 201	Market price of and dividends on registrant's common equity and related stockholder matters
Item 301	Selected financial data
Item 302	Supplementary financial information
Item 303	Management's discussion and analysis of financial condition and results of operations

1-4 Federal Securities Exchange Act of 1934 § 4.03

Item 305	Quantitative and qualitative disclosures about market risk
Item 402	Executive compensation
Item 404	Transactions with related persons, promoters and certain control persons
Item 407	Corporate governance
Item 503	Prospectus summary, risk factors, and ratio of earnings to fixed charges
Item 504	Use of proceeds
Item 601	Exhibits

The Commission also moved the scaled financial statement requirements in Item 310 of Regulation S-B into new Article 8 of Regulation S-X, and amended the requirements to provide a scaled disclosure option for smaller reporting companies, requiring two years of balance sheet data instead of one year. n403

[13] Plain English

The Commission has adopted "the plain English rule," which requires issuers to write substantially all of the prospectuses and proxy statements in plain English. Specifically, in these sections issuers must use: short sentences; definite, concrete, everyday language; active voice; tabular presentation of complex information; no legal or business jargon; and no multiple negatives. The Commission has stated that it believes that preparing documents in plain English increases investors' understanding and helps them make informal investment decisions. Thus, registrants should consider applying similar principles in Exchange Act reports.

FOOTNOTES:

(n1)Footnote 1. *Exchange Act Release No. 14,306, Fed. Sec. L. Rep. (CCH) P 72,258* (1977), in which the Commission announced the adoption of Item 1 "Description of Business" and Item 2 "Description of Property" of Regulation S-K, reprinted in the Primary Law Sourcebook, Volume D, Section K. Regulation S-K, codified at 17 C.F.R. § 229, is reprinted in the Primary Law Sourcebook, Vol. D, Section K.

(n2)Footnote 2. *Exchange Act Release No. 18,524, Fed. Sec. L. Rep. (CCH) P 956* (1982); cf., *Exchange Act Release No. 18,008, Fed. Sec. L. Rep. (CCH) P 966*, Part I (1981). For a discussion of the disclosure obligation of a smaller reporting company generally, see § 4.03[12] *infra*.

(n3)Footnote 3. Effective January 1, 2010, Subpart 1200 to Regulation S-K was added (including Items 1201-1208) as part of the modernization of oil and gas reporting.

(n4)Footnote 4. Section 21E of the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section F, the statutory safe harbor for forward-looking statements, is discussed in § 4.04 *infra*.

(n5)Footnote 5. In accordance with § 401 of the Sarbanes-Oxley Act, the Commission amended the prior set of rules governing the use of non-GAAP financial measures in Commission filings in January 2003. See *Exchange Act Release No. 47,226* (2003). These amended rules contain more detailed and stringent requirements regarding use of non-GAAP financial measures than Regulation G. Under Regulation G, when the registrant discloses or releases publicly any material non-public information that includes a non-GAAP financial measure, the registrant must include,

in the same disclosure or release, (1) a presentation of the most directly comparable GAAP financial measure and (2) a reconciliation of the disclosed non-GAAP financial measure to the most directly comparable GAAP financial measure. The reconciliation (through a schedule or other detailed presentation) must be quantitative for historic measures and, to the extent available without unreasonable efforts, for prospective measures. If the prospective GAAP financial measure is not accessible, the registrant must identify the unavailable information and disclose its probable significance. Regulation G also provides that a non-GAAP financial measure, taken together with the accompanying information, may not misstate a material fact or omit to state a material fact necessary to make the presentation of the non-GAAP financial measure not misleading, in light of the circumstances under which it is presented. See Exchange Act Release No. 47,226 (2003).

(n6)Footnote 6. Item 10(e)(1)(i), Regulation S-K.

(n7)Footnote 7. Item 10(e)(1)(ii), Regulation S-K.

(n8)Footnote 8. Item 10(e)(2), Regulation S-K.

(n9)Footnote 9. Item 10(f), Regulation S-K. For additional information on smaller reporting companies, *see* § 4.03[12] *infra*.

(n10)Footnote 10. Instruction 3 to Item 101, Regulation S-K.

(n11)Footnote 11. Item 101(a)(1), Regulation S-K.

(n12)Footnote 12. Exchange Act Form 10 under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section H, is discussed in § 4.01[3] *supra*.

(n13)Footnote 13. The reporting requirements of Exchange Act Sections 13(a) and 15(d) are discussed in the introductory paragraphs of § 4.02 *supra*.

(n14)Footnote 14. Item 101(a)(2), Regulation S-K. The description of a future plan of operation should include information as to material product research and development to be performed, anticipated material acquisitions of plants and equipment, and anticipated material changes in number of employees, as well as a statement indicating the registrant's opinion as to the period of time that the proceeds of the offering will satisfy cash requirements and whether it will be necessary in the next six months to raise additional funds. *Id.*

(n15)Footnote 15. SFAS No. 131 does not define segment profit, loss or assets. *Exchange Act Release No. 40,884, Fed. Sec. L. Rep. (CCH) P 86,102* (1999). In determining whether information about segments is required for a particular year, the registrant should look to interperiod comparability. Interperiod comparability would require a registrant to report segment information in the current period if a segment has been significant in the immediately preceding period and the registrant expects it to be significant in the future. Regulation S-K, Instruction 2 to Item 101.

(n16)Footnote 16. An operating segment is a component of a business that engages in activities from which it may earn revenues and incur expenses, for which discrete financial information is available that management regularly evaluates in deciding how to allocate resources and assess performance. *Id.* Release No. 40,884.

(n17)Footnote 17. Conversely, to the extent the information provided pursuant to Item 101(b) complies with generally accepted accounting principles, the registrant may include in its financial statements a cross reference to Item 101(b). Item 101(b), Regulation S-K.

(n18)Footnote 18. In determining what information about the segments is material to an understanding of the registrant's business taken as a whole and is therefore required to be disclosed, the registrant should take into account:

(1) the significance of the matter to the registrant, e.g., whether a matter with a relatively minor effect on the registrant's business is represented by management to be important to the registrant's future profitability;

(2) the pervasiveness of the matter, e.g., whether it affects numerous items in the segment information; and

(3) the impact of the matter, e.g., whether it distorts trends reflected in the segment information.

Situations may arise when information should be disclosed about a segment, although the information in quantitative terms may not appear significant to the registrant's business taken as a whole. Instruction 1 to Item 101, Regulation S-K.

(n19)Footnote 19. The name of any customer and its relationship, if any, with the registrant or its subsidiaries must be disclosed if sales to the customer are equal to ten percent or more of the registrant's consolidated revenue and loss of the customer would have a material adverse effect on the registrant and its subsidiaries taken as a whole. Item 101(c)(1)(vii), Regulation S-K.

(n20)Footnote 20. "Firm orders" may include government orders that are firm but not funded and contracts awarded but not yet signed, provided an appropriate explanatory statement is included. Item 101(c)(1)(viii), Regulation S-K.

(n21)Footnote 21. Item 101(c)(1)(i)(x), Regulation S-K.

(n22)Footnote 22. Item 101(c)(1)(xi)(xiii), Regulation S-K.

(n23)Footnote 23. *Exchange Act Release No. 40,884, Fed. Sec. L. Rep. (CCH) P 86,102 (1999).*

(n24)Footnote 24. If providing the geographic information is impractical, the registrant must disclose that fact. It should also describe any risks attendant to the foreign operations and any dependence of one or more of its segments on such foreign operations. Item 101(d)(ii), Regulation S-K. See n.11 *supra* for discussion of Item 101(b) of Regulation S-K.

(n25)Footnote 25. See the definition of "accelerated filer" and "large accelerated filer" in § 4.02 *supra*.

(n26)Footnote 26. Paragraph (e)(3) and Paragraph (e)(4), Item 101, Regulation S-K.

(n27)Footnote 27. Items 101(e)(1) and (2), Regulation S-K.

(n28)Footnote 28. Item 101(f), Regulation S-K.

(n29)Footnote 29. Item 101(g), Regulation S-K.

(n30)Footnote 30. Item 101(h), Regulation S-K. For additional information regarding smaller reporting companies, see § 4.03[12] *infra*.

(n31)Footnote 31. The information disclosed must inform investors as to the suitability, adequacy, productive capacity, and extent of utilization of the facilities by the registrant. Instruction 1 to Item 102, Regulation S-K. In determining whether properties should be described, the registrant should consider the factors listed in Instruction 1 to Item 101, Regulation S-K. See n.12 *supra*. Instruction 2 to Item 102, Regulation S-K.

(n32)Footnote 32. See Instruction 3 to Item 102, Regulation S-K. Effective January 1, 2010, this instruction was amended as part of the modernization of oil and gas reporting.

(n33)Footnote 33. See Instructions 4 and 5 to Item 102, Regulation S-K. Effective January 1, 2010, this instruction was amended as part of the modernization of oil and gas reporting.

(n34)Footnote 34. See Instructions 7 and 8 to Item 102, Regulation S-K.

(n35)Footnote 35. Instruction 1 to Item 103, Regulation S-K.

(n36)Footnote 36. Instruction 2 to Item 103, Regulation S-K. If, however, the proceeding involves to a large degree the same issues as other proceedings pending or *known to be contemplated*, the amount involved in such other proceedings must be included in determining the percentage of current assets to which the claim relates. *Id.*

(n37)Footnote 37. Instruction 3 to Item 103, Regulation S-K.

(n38)Footnote 38. Instruction 4 to Item 103, Regulation S-K.

(n39)Footnote 39. Permit proceedings and requests for variances or waivers are not required to be disclosed under this provision. *Exchange Act Release No. 18,524, Fed. Sec. L. Rep. (CCH) P 956 (1982).*

(n40)Footnote 40. Instruction 5 to Item 103, Regulation S-K. Proceedings similar in nature may be grouped and described generically. *Id.* This provision, however, does not require that the potential fines in similar proceedings be aggregated to determine whether the \$100,000 threshold has been met. *Exchange Act Release No. 18,524, Fed. Sec. L. Rep. (CCH) P 956 (1982).* Compare Instruction 2 to Item 103 at n. 25 *supra*.

(n41)Footnote 41. Item 201(a)(1)(i), Regulation S-K. Market information for a registrant's noncommon equity is required under Item 202(e) of Regulation S-K, discussed in § 4.03[3][b][v] *infra*.

(n42)Footnote 42. Article 3 of Regulation S-X is discussed in § 4A.01[3][a][i] *infra*.

(n43)Footnote 43. Item 201(a)(1)(ii), Regulation S-K. If the registrant's common equity is listed for trading on more than one exchange, the registrant must indicate each of those exchanges. However, the registrant need only report one set of price quotations, either:

(1) the prices reported in the consolidated trading system, if available; or

(2) if the prices are not reported in the consolidated trading system, the prices on the most significant exchange, in terms of volume of trading, Instruction 1 to Item 201, Regulation S-K.

Market prices must be adjusted to give retroactive effect to material changes resulting from stock dividends, stock splits, and reverse stock splits. *Id.*, Instruction 2.

(n44)Footnote 44. Item 201(a)(1)(iii), Regulation S-K. The registrant must also indicate, as applicable, that such over-the-counter market quotations reflect inter-dealer prices, without retail markup, markdown, or commission, and may not necessarily represent actual transactions. *Id.*

(n45)Footnote 45. The existence of limited or sporadic quotations does not of itself constitute an established public trading market. Item 201(a)(1)(i), Regulation S-K.

(n46)Footnote 46. *Id.*

(n47)Footnote 47. Item 201(a)(1)(iii), Regulation S-K.

(n48)Footnote 48. Securities Act Rule 144, which sets forth conditions governing certain resales of "restricted" and "control" securities, is discussed in *Federal Securities Act of 1933*, ch.6 (Matthew Bender).

(n49)Footnote 49. Item 201(a)(2), Regulation S-K.

(n50)Footnote 50. *Id.*, Item 201(a)(1)(v).

(n51)Footnote 51. *Id.*, Item 201(a)(1)(i).

(n52)Footnote 52. *Id.*, Item 201(a)(1)(iv). Foreign registrants must also briefly describe: (1) government laws, decrees, or regulations in the registrant's country of organization that restrict the export or import of capital; and (2) taxes to which U.S. common equity holders are subject under the laws and regulations of the registrant's country of organization, including pertinent provisions of any reciprocal tax treaty between such foreign country and the United States or that there is no such treaty. Instruction 4 to Item 201, Regulation S-K.

(n53)Footnote 53. *Id.*, Item 201(a)(1)(iv).

(n54)Footnote 54. Item 201(b)(1), Regulation S-K. The number of security holders may be based upon the number of record holders or also may include individual participants in security position listings; the method of computation chosen must be indicated. Instruction 3 to Item 201, Regulation S-K. Rule 17Ad-8 defines a "securities position listing" to mean, as to the securities of any issuer held by a registered clearing agency in the name of the clearing agency or its nominee, a list of those participants in the clearing agency on whose behalf the clearing agency holds the issuer's securities and of the participants' respective positions in those securities as of a specified date.

(n55)Footnote 55. Item 201(b)(2), Regulation S-K. "Beneficial ownership" is discussed in § 7A.02[2] *infra*.

(n56)Footnote 56. Item 201(b)(2), Regulation S-K.

(n57)Footnote 57. Item 201(c)(1), Regulation S-K. Dividends reported must be adjusted to give retroactive effect to material changes resulting from stock dividends, stock splits, and reverse stock splits. Instruction 2 to Item 201, Regulation S-K. Foreign registrants must also briefly describe governmental laws, decrees, or regulations in the registrant's country of organization that effect the remittance of dividends or other payments to nonresident holders of the registrant's common equity. Instruction 4 to Item 201, Regulation S-K.

(n58)Footnote 58. Item 201(c)(1), Regulation S-K. This information may be provided by cross-referencing to:

(1) the discussion of dividend restrictions pursuant to Item 303 of Regulation S-K, discussed in § 4.03[4][c] *infra*; and,

(2) the description of the restrictions in the financial statements.

Id.

(n59)Footnote 59. Item 201(c)(2), Regulation S-K.

(n60)Footnote 60. *Id.*

(n61)Footnote 61. The Commission implemented Item 201(d) in order to enhance disclosure of the number of outstanding options, warrants, and rights granted by registrants to participants in equity compensation plans, as well as the number of securities remaining available for future issuance under these plans. *Exchange Act Release No. 45,189, Fed. Sec. L. Rep. (CCH) P 86,611* (2002). Disclosure should be provided with respect to any compensation plan and individual compensation arrangement of the registrant (or parent, subsidiary, or affiliate of the registrant) under which equity securities of the registrant are authorized for issuance to employees or non-employees (such as directors, consultants, advisors, vendors, customers, suppliers, or lenders) in exchange for consideration in the form of goods or services as described in Statement of Financial Accounting Standards No. 123, *Accounting for Stock-Based Compensation*, or any successor standard. Instruction 1 to Paragraph (d), Item 201, Regulation S-K.

No disclosure need be made by the registrant with respect to:

- (1) any plan, contract or arrangement for the issuance of warrants or rights to all security holders of the registrant as such on a pro rata basis (such as a stock rights offering); or
- (2) any employee benefit plan that is intended to meet the qualification requirements of *Section 401(a) of the Internal Revenue Code (26 U.S.C. § 401(a))*. *Id.*

If more than one class of equity security is issued under its equity compensation plans, a registrant should aggregate plan information for each class of security. A registrant may aggregate information regarding individual compensation arrangements with the plan information required in this table. Instructions 3 and 4 to Paragraph (d), Item 201, Regulation S-K.

A registrant may aggregate information regarding a compensation plan assumed in connection with a merger, consolidation, or other acquisition transaction pursuant to which the registrant may make subsequent grants or awards of its equity securities with the plan information required for this table. A registrant should disclose on an aggregated basis in a footnote to the table the number of securities to be issued upon the exercise of outstanding options, warrants, and rights and the weighted- average exercise price of such outstanding options, warrants, and rights, with respect to any individual options, warrants, or rights assumed in connection with a merger, consolidation, or other acquisition transaction. Instruction 5 to Paragraph (d), Item 201, Regulation S-K.

To the extent that the number of securities remaining available for future issuance disclosed in the table includes securities available for future issuance under any compensation plan or individual compensation arrangement other than upon the exercise of an option, warrant, or right, the registrant should disclose the number of securities and type of plan separately for each such plan in a footnote to the table. Instruction 6 to Paragraph (d), Item 201, Regulation S-K.

If the description of an equity compensation plan set forth in a registrant's financial statements describes the material features of a compensation plan under which the registrant's equity securities are authorized for issuance that was adopted without the approval of security holders, a cross-reference to such description will satisfy the requirements of this Item. Instruction 7 to Paragraph (d), Item 201, Regulation S-K.

If an equity compensation plan contains a formula for calculating the number of securities available for issuance under the plan, including, without limitation, a formula that automatically increases the number of securities available for issuance by a percentage of the number of outstanding securities of the registrant, a description of this formula must be disclosed in a footnote to the table. Instruction 8 to Paragraph (d), Item 201, Regulation S-K.

(n62)Footnote 62. Paragraph (d)(3), Item 201, Regulation S-K.

(n63)Footnote 63. The measurement period begins at the market close of the last trading day before the beginning of the registrant's fifth preceding fiscal year, through and including the end of the last completed fiscal year, or such shorter period during which the registrant has had securities registered under the Exchange Act. Item 201(e)(2), Regulation S-K.

(n64)Footnote 64. Total stockholder return is measured by dividing the sum of the cumulative amount of dividends for the measurement period assuming dividend reinvestment, and the difference between the registrant's share price at the end and beginning of the measurement period by the share price at the beginning of the measurement period. Item 201(e)(1), Regulation S-K.

(n65)Footnote 65. Use of the Standard & Poor's 500 Stock Index is required for entities within such index. Item

201(e)(1)(i), Regulation S-K.

(n66)Footnote 66. A published industry or line-of-business index includes any index that is prepared by a party other than the registrant or an affiliate and is accessible to securities holders, or an index prepared by the registrant if such index is widely recognized and used. Item 201(e)(3), Regulation S-K.

(n67)Footnote 67. An issuer may use a similar market capitalization index only if it does not use a published industry or line-of-business index and does not believe it can reasonably identify a peer group. If the registrant uses this alternative, the graph must be accompanied by a statement of the reasons for this selection. Item 201(4), Regulation S-K. The information required in the performance graph shall not be deemed "soliciting material," or to be "filed" with the Commission. Instruction 8 to Item 201(e), Regulation S-K.

(n68)Footnote 68. Item 201(e)(4), Regulation S-K.

(n69)Footnote 69. Instruction 5 to Item 201(e), *Regulation S-K. Exchange Act Release No. 33,229, Fed. Sec. L. Rep. (CCH) P 85,259 (1993); Exchange Act Release No. 31,420, Fed. Sec. L. Rep. (CCH) P 85,061 (1992).*

(n70)Footnote 70. Instruction 4 to Item 201(e), Regulation S-K.

(n72)Footnote 72. Instruction 6 to Item 201(e), Regulation S-K. For additional information regarding smaller reporting companies, see § 4.03[12] *infra*.

(n73)Footnote 73. Note to Item 202, Regulation S-K. The document should not, however, convey the impression that the registrant may apply successfully for listing of the securities on an exchange or that, in the case of an underwritten offering, the underwriters may request the registrant to apply for such listing, unless there is a reasonable assurance that the securities to be offered will be acceptable to a securities exchange for listing. *Id.*

(n74)Footnote 74. Foreign registrants must provide, to the extent not otherwise provided, a brief description of:

(1) limitations, if any, on the right of nonresident or foreign owners of the securities to hold or vote the securities which are imposed by foreign law or by the charter or other constituent document of the registrant or if no such limitations are applicable;

(2) governmental laws, decrees, or regulations in the country in which the registrant is organized that affect the remittance of dividends, interest, and other payments to nonresident holders of the securities;

(3) taxes to which U.S. security holders are subject under the laws and regulations of the country in which the registrant is organized; and

(4) pertinent provisions of any reciprocal tax treaty between the country in which the registrant is organized and the United States, or if no such treaty exists. Instruction 2 to Item 202, Regulation S-K.

(n75)Footnote 75. In addition to stating the title of the class of securities, the registrant must also provide information that indicates the type and character of the securities to the extent not disclosed pursuant to Item 201, including:

(1) in the case of shares:

- (a) the par or stated value of the shares, if any;
- (b) the rate of dividends, if fixed;
- (c) whether dividends are cumulative or noncumulative;
- (d) an indication of preference, if any; and
- (e) whether the shares are convertible or redeemable; and

(2) in the case of other kinds of securities, appropriate information of comparable character. Instructions 1A and 1C to Item 202, Regulation S-K.

(n76)Footnote 76. Where convertible securities or stock purchase warrants that are subject to redemption or call are being registered, the description of the conversion terms of the securities or material terms of the warrant must disclose:

(1) whether the right to convert the securities will be forfeited unless the right is exercised before the date specified in a notice of redemption or call;

(2) the expiration or termination dates of the warrants;

(3) the kinds, frequency, and timing of the notice of redemption or call, including the cities or newspapers in which notice will be published; and

(4) in the case of bearer securities, that investors are responsible for making arrangements to prevent loss of the right to convert or purchase in the event of redemption or call, e.g., by reading the newspapers in which the notice of redemption may be published. Instruction 4 to Item 202, Regulation S-K.

(n82)Footnote 82. For the purposes of Item 202, debt securities that differ from one another only as to interest rate or maturity are considered to be securities of the same class. Item 202(b), Regulation S-K.

(n83)Footnote 83. In addition to stating the title of the debt securities, the registrant must also provide information that indicates the type and character of the debt securities, including:

(1) the rate of interest;

(2) the date of maturity, or if the issue matures serially, a brief indication of the serial maturities, e.g., "maturing serially from 2015 to 2015;"

(3) whether the payment of interest or principal is contingent and a description of any contingency;

(4) the priority of the issue; and

(5) whether the debt securities are convertible or callable. Instruction 1B to Item 202, Regulation S-K.

(n84)Footnote 84. The registrant must also provide certain information with respect to the conversion terms of convertible debt securities subject to redemption.

(n85)Footnote 85. In the case of secured debt, whether the securities being registered are to be issued on the basis of unbonded bondable property, the deposit of cash, or otherwise; as of the most recent practicable date, the approximate amount of unbonded bondable property available as a basis for the issuance of bonds; provisions permitting the withdrawal of cash deposited as a basis for the issuance of bonds; and provisions permitting the release or substitution of assets securing the issue; provided, however, that provisions permitting the release of assets upon the deposit of equivalent funds or the pledge of equivalent property, the release of property no longer required in the business, obsolete property, or property taken by eminent domain or the application of insurance moneys, and other similar provisions need not be described. Item 202(b)(5), Regulation S-K.

(n86)Footnote 86. 26 U.S.C. § 1273. *Section 1273(2) of the Internal Revenue Code* defines the term "original issue discount" to mean the excess, if any, of the stated redemption price over the issue price.

(n87)Footnote 87. Item 202(b)(1)(10), Regulation S-K.

(n88)Footnote 88. Item 202(c)(1)(5), Regulation S-K. The description of the material terms of stock purchase warrants or convertible securities must disclose:

(1) whether the right to purchase the securities will be forfeited unless the right is exercised before the date specified in a notice of call;

(2) the expiration or termination date of the warrants;

(3) the kinds, frequency, and timing of the notice of call, including the cities or newspapers in which the notice will be published; and

(4) in the case of bearer securities, that investors are responsible for making arrangements to prevent loss of the right to purchase in the event of call, e.g., by reading the newspapers in which the notice of call may be published. Instruction 4 to Item 202, Regulation S-K.

(n89)Footnote 89. The term "established public trading market" in Item 202(e) is used as in Item 201 of Regulation S-K, *see* § 4.03[3][a][i] *supra*.

(n90)Footnote 90. Item 201(a) of Regulation S-K, which requires market information for a registrant's common equity, is discussed in § 4.03[3][a][i] *supra*.

(n91)Footnote 91. The description of the terms of deposit must include the provisions, if any, with respect to:

(1) the amount of deposited securities represented by one unit of American Depositary Receipts;

(2) the procedure for voting, if any, the deposited securities;

- (3) the collection and distribution of dividends;
- (4) the transmission of notices, reports, and proxy soliciting material;
- (5) the sale or exercise of rights;
- (6) the deposit or sale of securities resulting from dividends, splits, or plans of reorganization;
- (7) amendment, extension, or termination of the deposit;
- (8) rights of holders of receipts to inspect the transfer books of the depositary and the list of holders of receipts;
- (9) restrictions upon the right to deposit or withdraw the underlying securities; and
- (10) limitations upon the liability of the depositary. Item 202(f)(2), Regulation S-K.

(n92)Footnote 92. Information is to be provided concerning any fees and charges relating to:

- (1) the deposit or substitution of the underlying securities;
- (2) receipt and distribution of dividends;
- (3) the sale or exercise of rights;
- (4) the withdrawal of the underlying security; and
- (5) the transferring, splitting, or grouping of receipts.

Information concerning the right to collect the fees and charges against dividends received and deposited securities must also be included. Instruction 5 to Item 202, Regulation S-K.

(n93)Footnote 93. Instruction 3 to Item 301, Regulation S-K.

(n94)Footnote 94. Item 301(a), Regulation S-K.

(n95)Footnote 95. Item 301(b), Regulation S-K.

(n96)Footnote 96. Information relating to long-term debt, capital leases, and redeemable preferred stock as defined in Rule 5-02.28(a) of Regulation S-X must be included. Instruction 2 to Item 301, Regulation S-K.

(n97)Footnote 97. Instruction 2 to Item 301, Regulation S-K. The purpose of the presentation of the selected financial data is to highlight significant trends in a registrant's financial condition and results of operations. Instruction 1 to Item 301, Regulation S-K.

(n98)Footnote 98. Instruction 2 to Item 301, Regulation S-K. Registrants should consider updating the selected financial data for interim periods if interim financial statements are included or are required to be included under Article 3 of Regulation S-X, to reflect any material change in trends. Instruction 4 to Item 301, Regulation S-K.

(n99)Footnote 99. The Commission revised the definition of "foreign private issuer" to give clearer guidance on how foreign companies should determine whether their shareholders are U.S. residents. Effective September 30, 2000, the Commission adopted revised disclosure requirements for foreign private issuers to conform to the international

disclosure standards endorsed by the International Organization of Securities Commissions in September 1998. The international disclosure standards replace most of the non-financial statement disclosure requirements of Form 20-F, the basic disclosure document for private issuers. *Exchange Act Release No. 41,936, Fed. Sec. L. Rep. (CCH) P 86,208 (1999-2000)*.

A foreign private issuer is required to disclose the following in all filings containing financial statements:

- (1) in the forepart of the document and as of the latest practicable date, the exchange rate into U.S. currency of the foreign currency in which the financial statements are presented;
- (2) a history of exchange rates for the five most recent years and any subsequent interim period included in the financial statements, setting forth the rate for period end, the average rates, and the range of high and low rates for each year; and
- (3) if equity securities are being registered, a five year summary of dividends per share stated in both the currency in which the financial statements are presented and U.S. currency based on the exchange rates at each respective payment date.

A foreign private issuer must present the selected financial data in the same currency as its financial statements and may present the data on the basis of the accounting principles used in the primary financial statements. However, the issuer must also present the data on the basis of any reconciliation of the data to United States generally accepted accounting principles ("GAAP") and Regulation S-X made under Rule 4-01(a)(2) of Regulation S-X. Instructions 5 and 6 to Item 301, Regulation S-K. The Commission has adopted amendments to Regulation S-X and Form 20-F to facilitate registration and reporting by foreign private issuers. The amendments allow foreign issuers flexibility in the selection of the reporting currency used in filings with the Commission and streamlined financial statement reconciliation requirements for foreign private issuers with operations in countries with hyperinflationary economies. *Exchange Act Release No. 35,093 (1994)*. See also *Exchange Act Release No. 32,531, Fed. Sec. L. Rep. (CCH) P 85,207 (1993)*, amending Form 40-F in order to continue the requirement that financial statements presented in filings on such forms include a reconciliation to U.S. GAAP.

(n100)Footnote 100. Item 301(c) of Regulation S K.

(n101)Footnote 101. Item 302(a)(5), Regulation S-K. Registration of securities under Section 12(b) is discussed in § 4.01[1] *supra*.

(n102)Footnote 102. *Id.*, Item 302(a)(1).

(n103)Footnote 103. *Id.*, Item 302(a)(2).

(n104)Footnote 104. *Id.*, Item 302(a)(3).

(n105)Footnote 105. Item 302(c) of Regulation S K.

(n106)Footnote 106. In *Exchange Act Release No. 26,831, Fed. Sec. L. Rep. (CCH) P 72,436 (1989)* ("1989 MD&A Release"), the Commission set out its views regarding several disclosure matters that should be considered by registrants in preparing their MD&As. According to the Commission, the MD&A requirements are intended to provide, in one section of a registrant's filing, material historical and prospective textual disclosure that enables investors and other users to assess the financial condition and results of operations of the registrant, with particular emphasis on the registrant's prospects for the future.

The 1989 MD&A Release gives interpretive guidance on the following matters among others: Prospective

Information; Liquidity-Capital Resources; Material Changes; Interim Period Reporting; Segment Analysis; Participation in High Yield Financings, Highly Leveraged Transactions, or Non-Investment Grade Loans and Investments; and Preliminary Merger Negotiations. The MD&A Release was based on a systematic study, commenced in early 1988, in which the Commission reviewed the 1989 MD&A reporting of numerous registrants in at least two dozen industries and contains numerous illustrative examples.

Enforcement releases also provide useful illustrations of the Commission's interpretation of the MD&A disclosure requirements. In particular, *Exchange Act Release No. 30,532, Fed. Sec. L. Rep. (CCH) P 73,830* (1992), describes the Commission's application of Item 303 with regard to Caterpillar Inc.'s failure to disclose information about the 1989 earnings of Caterpillar Brazil, S.A. ("CBSA"), its wholly owned Brazilian subsidiary, and uncertainties about CBSA's 1990 earnings. In the release, the Commission noted that Caterpillar's financial results were consolidated and the impact of CBSA's operations in Caterpillar's overall results were not apparent from the face of the financial statements, but even if apparent it would not have obviated the requirement that CBSA's operations be discussed in the MD&A disclosure. The Commission reviewed the 1989 Form 10-K and 1990 first quarter Form 10-Q and found that neither indicated the extent to which CBSA had affected Caterpillar's bottom line in 1989, nor did they indicate that any decline in CBSA's future results could have a material adverse effect on Caterpillar's bottom line in 1990. In fact, nothing in the MD&A section of the 1989 Form 10-K suggested the disproportionate impact of CBSA's profits on Caterpillar's 1989 overall profitability, and neither the 1989 Form 10-K nor the 1990 first quarter Form 10-Q adequately mentioned management's uncertainty about CBSA's 1990 performance. The Commission found that "Caterpillar's failure to include required information about CBSA in the MD&A left investors with an incomplete picture of Caterpillar's financial condition and results of operations and denied them the opportunity to see the Company "through the eyes of management." *Id.* The Commission held that "by failing (i) in its Annual Report on Form 10-K for the year ended December 31, 1989 to provide an adequate discussion and analysis of the impact on CBSA in its 1989 results of operations as contained in its financial statement, and (ii) to adequately disclose in its 1989 Form 10-K and in its Quarterly Report on Form 10-Q for the first quarter of 1990 known uncertainties reasonably likely to have a material effect on Caterpillar's future results of operations, due to CBSA's questionable ability to repeat its 1989 performance, Caterpillar violated Section 13(a) of the Exchange Act..." *Id.*

In January 2002, the Commission issued a statement in which it made several suggestions for improving the quality of MD&A disclosures, including: (1) more detailed liquidity resource disclosures; (2) more clear descriptions of off-balance sheet arrangements; (3) a schedule of future obligations and commitments; (4) disclosures of valuation of trading activities involving commodities contracts; and (5) more detailed disclosures about transactions with related parties. *Exchange Act Release No. 45,321, Fed. Sec. L. Rep. (CCH) § 86,617* (2002).

In May 2002, the Commission proposed amendments to MD&A requirements that would require registrants to disclose their "critical accounting policies." *Exchange Act Release No. 45,907, Fed. Sec. L. Rep. (CCH) § 86,638* (2002). The proposals would require disclosure of the critical accounting estimates made by registrants in applying their accounting policies as well as the initial adoption of new accounting policies that would have a material impact on the registrant's financial condition, changes in financial condition, and results of operations.

In December 2003, the Commission published additional interpretive guidance regarding MD&A. The guidance was intended to elicit more meaningful disclosure in MD&A with respect to several areas, including the overall presentation and focus of MD&A, with general emphasis on the discussion and analysis of known trends, demands, commitments, events and uncertainties, and specific guidance on disclosures about liquidity, capital resources and critical accounting estimates. *Exchange Act Release No. 48960* (2003).

(n107)Footnote 107. Securities Act Release No. 33-8350.

(n108)Footnote 108. Instruction 10 to Item 303(a), Regulation S-K directs that information be given with respect to the registrant and its consolidated subsidiaries.

(n109)Footnote 109. *Id.*, Instruction 1 to Item 303(a).

(n110)Footnote 110. *Id.*, Instruction 2 to Item 303(a).

(n111)Footnote 111. Instruction 3 to Item 303(a), Regulation S-K. For a discussion of the Commission's position on forward-looking statements, see § 4.04 *infra* and *Exchange Act Release No. 34,831, Fed. Sec. L. Rep. (CCH) P 85,436* (1994).

(n112)Footnote 112. Item 303(a), Regulation S-K.

(n113)Footnote 113. *Id.* Instruction 1 to Item 303(a), Regulation S-K. If, however, trend information is relevant, the registrant may be required to refer to the five year selected financial data presented pursuant to Item 301 of Regulation S-K discussed in § 4.03[4][a] *supra*.

(n114)Footnote 114. "Liquidity" is defined for the purposes of Item 303 as the ability of an enterprise to generate adequate amounts of cash to meet the enterprise's need for cash. Instruction 5 to Item 303(a), Regulation S-K. The discussion of liquidity may be combined with that of capital resources whenever the two topics are interrelated. Item 303(a), Regulation S-K.

(n115)Footnote 115. Item 303(a)(1), Regulation S-K. Liquidity should be discussed on both a long-term and short-term basis and in the context of the registrant's own business. Instruction 5 to Item 303(a), Regulation S-K. The registrant should also indicate those balance sheet conditions or income or cash flow items that it believes may be indicators of its liquidity condition. *Id.* The Commission will bring enforcement actions against registrants who fail to timely and fully disclose known trends, demands, commitments, or events materially affecting the registrant's liquidity. *See America West Airlines, Inc.*, Exchange Act Release No. 34,047, Sec. L. Rep. (CCH) P 74,022 (1994) (failure to disclose adverse impact on liquidity of decreased passenger traffic, increased fuel costs and inability to obtain long-term financing) and *Salant Corporation and Martin Tynan*, Exchange Act Release No. 34,046, Sec. L. Rep. (CCH) P 74,021 (1994) (failure to disclose impact on liquidity of excess inventory, operating losses, delays in payments to vendors, and renegotiations of bank financing arrangements). *See also*, *Gordon N. Oates and Ronald P. Freres*, Exchange Act Release No. 35,882, Sec. L. Rep. (CCH) P 74,245 (1995).

The Commission has increased its focus on MD&A disclosures concerning the risks to a registrant of derivative activities, including interest rate swaps, commodity derivatives and foreign currency contracts. *See, e.g.*, *Gibson Greetings, Inc.*, Exchange Act Release No. 36,357 (1995).

(n116)Footnote 116. Item 303(a)(1), Regulation S-K.

(n117)Footnote 117. *Id.* If the financial statements are required to disclose restrictions on the ability of subsidiaries, consolidated or unconsolidated, to transfer cash dividends, loans, or advances to the registrant, pursuant to Rule 408(e)(3) under Regulation S-X, the registrant must also discuss the nature and extent of the restrictions and the effect the restrictions have had and are expected to have on the ability of the parent company to meet its cash obligations. Instruction 6 to Item 303(a), Regulation S-K.

(n118)Footnote 118. The discussion of capital resources may be combined with that of liquidity whenever the two topics are interrelated. Item 303(a), Regulation S-K.

(n119)Footnote 119. Item 303(a)(2), Regulation S-K.

(n120)Footnote 120. *Id.*

(n121)Footnote 121. The 1989 MD&A Release indicates that, if management knows of a trend, demand, commitment, event, or uncertainty, it must make the following assessments:

(1) Is the known trend, demand, commitment, event, or uncertainty likely to come to fruition? If management concludes that it is not, no disclosure is required.

(2) If management is not able to make the determination in (1), it must evaluate objectively the consequences of the known trend, demand, commitment, event or uncertainty on the assumption that it will come to fruition. Disclosure is then required unless management determines that it is not reasonably likely to have a material effect on the registrant's financial condition or results of operations.

In addition to the Caterpillar release, a number of enforcement actions have been brought by the Commission based on the failure of the registrant to adequately discuss a known trend, demand, commitment, event or uncertainty in its MD&A. See Bank of Boston Corporation, Exchange Act Release No. 33,454 (1994) (failure to disclose deterioration in bank's domestic real estate loan portfolio) and Shared Medical Systems, Inc., Exchange Act Release No. 33,632 (1994) (failure to discuss known trend of decreased sales activity and the registrant's expectation that the trend would have a national unfavorable impact on net sales, revenues and earnings during the year).

(n122)Footnote 122. Item 303(a)(3), Regulation S-K reprinted in the Primary Law Sourcebook, Volume D, Section K. Registrants are only required to discuss the effects of inflation and other changes in prices when considered material. The discussion may be made in any appropriate manner. All that is required is a brief textual presentation of management's views. Specific numerical data need not be presented, except as required by Rule 3-20(c) of Regulation S-X. However, registrants may elect to voluntarily disclose supplemental information on the effects of changing prices either as provided for in SFAS No. 89 (as modified in certain limited respects by SFAS No. 96) or through other supplemental disclosures. The Commission encourages experimentation with such disclosures in order to provide meaningful presentation in financial statements of the impact of price changes. Instruction 8 to Item 303(a), Regulation S-K.

Registrants that elect to disclose supplementary information on the effects of changing prices as specified by SFAS No. 89 (as modified in certain limited respects by SFAS No. 96) may combine those explanations with the discussion and analysis required by Item 303(a) of Regulation S-K or may supply information separately with appropriate cross reference. Instruction 9 to Item 303(a), Regulation S-K.

(n123)Footnote 123. Item 303(a), Regulation S-K. The 1989 MD&A Release contains some examples of this type of disclosure, including:

- (1) a known trend in the form of an expected further decline in unit sales of products;
- (2) planned capital expenditures and related financial sources necessary to maintain sales growth;
- (3) the likely effect of a known event in the form of completion of an important contract;
- (4) uncertainty created by implementation of recent legislation;
- (5) violation of covenants of loan agreements and more stringent payment terms imposed by vendors;
- (6) an analysis of a material increase in revenues and the effects of offsetting developments, including depressed economic conditions in the product market;
- (7) the likelihood of a material future effect on financial condition or results of operations as a result of the loss of a major customer;

(8) segment disclosure where the amount contributed to operating income by segments was disproportionate to their revenues;

(9) participation as a lender in highly leveraged transactions;

(10) portfolio investments in noninvestment grade debt securities; and

(11) a financial institution's dependence on federal assistance and the material adverse effect on future operations of the expiration of a put option for problem assets.

Foreign private registrants should also briefly discuss any pertinent governmental economic, fiscal, monetary, or political policies or factors that have materially affected or could materially affect, directly or indirectly, their operations or investments by U.S. nationals. Instruction 11 to Item 303(a), Regulation S-K.

Where the registrant is a foreign private issuer, the discussion required by Item 303(a) should focus on the primary financial statements presented in the statement or report, but there should be reference to the reconciliation to U.S. GAAP and a discussion of any aspects of the differences between foreign and U.S. GAAP that are not discussed in the reconciliation and that the registrant believes must be understood in order to understand the financial statements as a whole. Instruction 12 to Item 303(a), Regulation S-K.

(n124)Footnote 124. Such information is expressly covered by the safe-harbor rules for projections. *See Section 4.04 infra*. As noted above, Item 303 *requires* forward-looking information in a number of areas. *See* Regulation S-K, Items 303(a)(1), 303(a)(2)(ii), and 303(a)(3)(ii).

(n125)Footnote 125. In accordance with the Sarbanes-Oxley Act, the Commission clarified disclosures regarding off-balance sheet arrangements in Management's Discussion and Analysis. Exchange Act Release No. 47,264 (2003).

(n126)Footnote 126. As used in part (a)(4) of Item 303, the term "off-balance sheet arrangement" means any transaction, agreement or other contractual arrangement to which an entity unconsolidated with the registrant is a party, under which the registrant has:

- any obligation under a guarantee contract that has any of the characteristics identified in paragraph 3 of FASB Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others* (November 2002) ("FIN 45"), as may be modified or supplemented, and that is not excluded from the initial recognition and measurement provisions of FIN 45 pursuant to paragraphs 6 or 7 of that Interpretation;
- a retained or contingent interest in assets transferred to an unconsolidated entity or similar arrangement that serves as credit, liquidity or market risk support to such entity for such assets;
- any obligation, including a contingent obligation, under a contract that would be accounted for as a derivative instrument, except that it is both indexed to the registrant's own stock and classified in stockholders' equity in the registrant's statement of financial position, and therefore excluded from the scope of FASB Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities* (June 1998), pursuant to paragraph 11(a) of that Statement, as may be modified or supplemented; or
- any obligation, including a contingent obligation, arising out of a variable interest (as referenced in FASB Interpretation No. 46, *Consolidation of Variable Interest Entities* (January 2003), as may be modified or supplemented) in an unconsolidated entity that is held by, and material to, the registrant,

where such entity provides financing, liquidity, market risk or credit risk support to, or engages in leasing, hedging or research and development services with, the registrant.

(n147)Footnote 147. Instruction 4 to Item 303(b), Regulation S-K.

(n148)Footnote 148. *Id.*, Instruction 5.

(n149)Footnote 149. Item 303(b)(2), Regulation S-K.

(n150)Footnote 150. *Id.*

(n151)Footnote 151. *Id.* If, however, the registrant is engaged primarily in the distribution of electrical, gas, water, or telephone service and pursuant to Rule 303 of Regulation S-X provides a statement of income for the twelve-month period ended as of the date of the most recent interim balance sheet in lieu of the interim income statements otherwise required, the discussion of material changes in results of operations in that twelve-month period will be with respect to the preceding fiscal year rather than the corresponding preceding period. *Id.*

(n152)Footnote 152. Instruction 6 to Item 303(b), Regulation S-K; see Exchange Act Release No. 47,264 (2003). *See also* § 4.02[2] *infra*.

(n153)Footnote 153. Exchange Act Release No. 47,264 (2003). Item 303(c)(1), Regulation S-K.

(n154)Footnote 154. *Id.*

(n155)Footnote 155. Item 303(c)(2), Regulation S-K.

(n156)Footnote 156. Item 304(a)(1)(i)(iv), Regulation S-K. In the event that there has been a disagreement of the kind referred to in the forth bullet point above, the registrant must:

- (1) describe each such disagreement;
- (2) state whether any audit or similar committee of the board of directors, or the board of directors, discussed the subject matter of any such disagreements with the former accountant; and
- (3) state whether the registrant has authorized the former accountant to respond fully to the inquiries of the successor accountant concerning the subject matter of any of such disagreements and, if not, the nature of and reason for any limitation on such authorization. Item 304(a)(1)(iv), Regulation S-K.

Disagreements required to be reported in response to Item 304(a)(1)(iv) of Regulation S-K include both those resolved to the former accountant's satisfaction and those not so resolved and mean those that occur at the decision-making level, i.e., between personnel of the registrant responsible for presentation of the financial statements and personnel of the accounting firm responsible for rendering the report. *Id.*

The term "disagreement" as used in Item 304 of Regulation S-K is to be interpreted broadly so as to include any difference of opinion concerning any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure which, if not resolved to the satisfaction of the former accountant, would have caused such accountant to make reference to the subject matter of the disagreement in connection with the report. Accordingly, a mere difference of opinion triggers disclosure, not only an argument or formal disagreement. Instruction 4 to Item 304, Regulation S-K. Disclosure is not required, however, of initial differences of opinion based on incomplete facts or preliminary information, which were later resolved to the former accountant's satisfaction by obtaining additional relevant facts or information, provided that the registrant and the accountant did not continue to have a difference of opinion with respect to the matter resolved. *Id.* In determining whether any "disagreement" or "reportable event" (as those terms are used in Item 304(a)(1)(iv) and (v)) has occurred, an oral communication from the engagement partner or another person responsible for rendering the accounting firm's opinion (including their designee) will generally suffice as an indication that the accountant has advised the registrant of a "reportable event" or that there has been a "disagreement" at the "decision-making level" as those terms are used in Item 304. Instruction 5 to Item 304, Regulation S-K.

(n157)Footnote 157. Item 304(a)(1)(v)(A)-(D), Regulation S-K.

(n158)Footnote 158. Item 304(a)(2)(A)(D), Regulation S-K.

(n159)Footnote 159. Item 304(a)(3), Regulation S-K. The disclosure called for by Item 304(a) of Regulation S-K need not be provided if it has previously been reported in or filed with a statement under Section 12, a report under Section 13 or 15(d), or a definitive proxy or information statement under Section 14 of the Exchange Act, or a registration statement under the Securities Act. The disclosure must be provided, however, notwithstanding prior disclosure, if required pursuant to Item 9 of Schedule 14A. Instruction 1 to Item 304, Regulation S-K.

When disclosure is required by paragraph (a) of Item 304 of Regulation S-K in an annual report to security holders pursuant to Rule 14a-3 or Rule 14c-3 or in a proxy or information statement filed pursuant to the requirements of Schedule 14A or 14C, all under the Exchange Act, then instead of the letters from the newly engaged accountant and the former accountant which are required by paragraphs (a)(2)(D) and (a)(3) of Item 304, the registrant must furnish, prior to filing with or furnishing such material to the Commission, the disclosure required by paragraph (a) of Item 304 to any former accountant engaged by the registrant during the two preceding fiscal years and any subsequent interim period as well as to the newly engaged accountant. If any such accountant believes that the statements made by the registrant in response to the provisions of paragraph (a) of Item 304 are incorrect or incomplete, it may present its views in a brief statement, ordinarily not expected to exceed 200 words, to be included in the annual report or proxy or information statement. The accountant's statement must be submitted to the registrant within ten business days of the date that the accountant receives the registrant's disclosure. Instruction 2 to Item 304, Regulation S-K.

Unless the written views of the newly engaged accountant required to be filed as an exhibit by paragraph (a)(2)(B) of Item 304 have been previously filed with the Commission, the registrant must file a Form 8-K concurrently with the annual report or proxy or information statement for the purpose of filing such written views as an exhibit to the Form 8-K. *Id.*

The information required by Item 304(a) need not be provided for a company being acquired by the registrant if the acquired company is not subject to the filing requirements of either Section 13(a) or 15(d) of the Exchange Act, or, because of Section 12(i) of the Exchange Act, has not filed an annual report to security holders pursuant to Rule 14a-3 or Rule 14c-3 for its latest fiscal year. Instruction 3 to Item 304, Regulation S-K.

(n160)Footnote 160. Item 304(b), Regulation S-K. These disclosures need not be made if the method asserted by the former accountants ceases to be generally accepted because of authoritative standards or interpretations subsequently issued. *Id.* The disclosure called for by paragraph (b) of Item 304 must be furnished, where required, notwithstanding any prior disclosure about accountant changes or disagreements. Instruction 1 to Item 304, Regulation S-K.

(n161)Footnote 161. Item 305(a), Regulation S-K. Registrants may use different formats for each portfolio or risk exposure category.

(n162)Footnote 162. Item 305(a)(1), of Regulation S-K.

(n163)Footnote 163. Primary market risk exposures means the following categories of market risk: interest rate risk, foreign currency exchange rate risk, commodity price risk, and other relevant market rate or price risks; and within each of these categories, the particular markets that present the primary risk of loss to the registrant. Instruction 1 to Item 305(b), Regulation S-K.

(n164)Footnote 164. Item 305(b)(1), Regulation S-K. Qualitative information for instruments entered into for trading purposes and those entered into for other purposes are to be presented separately. Item 305(b)(2), Regulation S-K.

(n165)Footnote 165. Instruction to Item 305(b), Regulation S-K.

(n166)Footnote 166. Item 305(d), Regulation S-K.

(n167)Footnote 167. *Exchange Act Release No. 38,223, Fed. Sec. L. Rep. (CCH) P 74,389 (1997)*. A number of answers regarding Item 305 disclosure requirements can be found in the Commissioner's July 31, 1997 "Questions and Answers About the New Market Risk Disclosure Rules," available on the Commission's website at <http://www.sec.gov>. In this Question and Answer release, the Commission notes that a separate section for this disclosure is not necessary, although it is usually most appropriate to present the responsive information in a single location outside of MD&A. Management may elect to integrate the disclosures with MD&A and the description of business section of filings. Duplicative information need not be presented, but cross-references may be necessary to make a particular disclosure complete. However, the safe harbor does not apply to market risk information included in the financial statements and the related notes. *Id.*, Question No. 73.

(n168)Footnote 168. Item 307, Regulation S-K.

(n169)Footnote 169. Item 307, Regulation S-K.

(n170)Footnote 170. Exchange Act Rules 13a-15(e) and 15d-15(e).

(n171)Footnote 171. The disclosure requirements of Item 308 of Regulation S-K became effective for accelerated filers (as defined in Rule 12b-2 under the Exchange Act) as of the end of the first fiscal year ending on or after November 15, 2004, for the annual report for that fiscal year. For a company that was not an accelerated filer, compliance with the disclosure requirements became effective for the annual report for the first fiscal year ending on or after December 15, 2009.

(n172)Footnote 172. Instruction 1 to Item 308 states that a registrant need not comply with paragraphs (a) and (b) until it either was required to file an annual report under the Exchange Act for the prior fiscal year, or filed an annual report for the prior fiscal year. Thus, IPOs enjoy a one-year grace period, while voluntary filers do not escape the Item 308 requirements if they filed an annual report for the prior year. Instruction 2 to Item 308 states that the registrant must maintain evidence, including documentation, to provide reasonable support for management's assessment of the effectiveness of the registrant's internal control over financial reporting.

(n173)Footnote 173. Item 308(a), Regulation S-K.

(n174)Footnote 174. Item 308(b), Regulation S-K.

(n175)Footnote 175. Exchange Act Release No. 54,302A (2006).

(n176)Footnote 176. The registrant, however, is not permitted to list any person chosen to become a director who has not consented to act as such. Instruction 2 to Item 401(a), Regulation S-K.

(n177)Footnote 177. The registrant is not required to include arrangements or understandings with directors or officers of the registrant acting solely in their capacities as directors or officers. Instruction 1 to Item 401(a), Regulation S-K.

(n178)Footnote 178. *Id.*, Instruction 3. If the information required by Item 401(a) is presented in a proxy statement concerning the election of directors, the statement must include the following:

(1) if fewer nominees are named than the number fixed by the registrant's governing instruments, the reasons for this procedure and a statement that the proxies cannot be voted for a greater number of persons than the nominees named; and

(2) if the proxy solicitation is made by persons other than management, information must be given as to nominees of the persons making the solicitation. Instructions 4 and 5 to Item 401(a), Regulation S-K.

(n179)Footnote 179. The term "executive officer" is defined in Rule 3b-7 to mean:

- (1) a president;
- (2) a vice president in charge of a principal business unit, division, or function (e.g., sales, administration, finance); or
- (3) any person performing similar policy-making functions for the issuer.

Rule 3b-7 under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section G, also provides that executive officers of subsidiaries may be deemed executive officers of the registrant if they perform policy-making functions for the registrant.

(n180)Footnote 180. The 401(b) information concerning executive officers, however, need not be furnished in proxy or information statements if the information is included in Part I of the registrant's annual report on Form 10-K under a separate item captioned "Executive Officers of the Registrant." Instruction 3 to Item 401(b), Regulation S-K.

(n181)Footnote 181. Item 401(c), Regulation S-K. *See § 4.01[2][a][iv]* and n.47 *supra*.

(n182)Footnote 182. "Family relationship" is defined as any relationship by blood, marriage, or adoption not more remote than first cousin. Instruction to Item 401(d), Regulation S-K.

(n183)Footnote 183. Item 401(e)(1), Regulation S-K. Registrants, in identifying any corporations or other organizations by which the enumerated persons have been employed in the past five years, must indicate whether that corporation or organization is a parent, subsidiary, or other affiliate of the registrant. *Id.*

(n184)Footnote 184. *Id.*, Item 401(e)(1). The explanation required relates to level of professional competence and may include information as to the size of the operation supervised. *Id.*

(n185)Footnote 185. *Id.*, Item 401(e)(2).

(n186)Footnote 186. For purposes of determining this five year period, the date of the reportable proceeding is deemed to be:

- (1) for bankruptcy proceedings, the date
 - (a) of filing for uncontested petitions, or
 - (b) upon which approval of a contested petition became final; and

- (2) for other proceedings, the date

- (a) the final order, judgment, or decree was entered, or
 - (b) upon which any rights of appeal from preliminary orders, judgments, or decrees have lapsed.
- Instruction 1 to Item 401(f), Regulation S-K.

(n187)Footnote 187. If a registrant omits a legal proceeding because it is not deemed material, it may furnish to

the Commission at the time of filing as supplemental information not part of the statement or report to which the omission relates, a description of the proceedings and the reasons for the omission. Instruction 2 to Item 401(f), Regulation S-K.

(n188)Footnote 188. Item 401(f)(1), Regulation S-K.

(n189)Footnote 189. Item 401(f)(2).

(n190)Footnote 190. Item 401(f)(3).

(n191)Footnote 191. Item 401(f)(4).

(n192)Footnote 192. Item 401(f)(5).

(n193)Footnote 193. Item 401(f)(6). The registrant may also explain any mitigating circumstances associated with the legal proceedings. Instruction 3 to Item 401(f), Regulation S-K. The registrant is not required to provide information concerning involvement in legal proceedings in a proxy or information statement for a director whose term of office as a director will not continue after the meeting to which the statement relates. *Id.*, Instruction 4.

(n194)Footnote 194. Item 401(g)(1)(2), Regulation S-K. Paragraph (g) does not apply to a subsidiary of a registrant that has been reporting pursuant to Section 13(a) or 15(d) for the twelve months prior to the filing. Instruction 2 to Item 401(g), Regulation S-K. Instructions 1 to 3 of Item 401(f) also apply to Item 401(g). *See nn. 135, 136 and 142 supra*. The proposed amendment of Item 401(f) would delete Item 401(g). *Exchange Act Release No. 34,923, Fed. Sec. L. Rep. (CCH) P 85,452 (1994)*.

(n195)Footnote 195. Item 402 was amended, effective November 7, 2006, as part of the amendments to the executive compensation and related person disclosure rules.

There is a transition period for a phased-in implementation of the amended Summary Compensation Table and amended Item 404(a) disclosure over a three-year period for Regulation S-K companies. During this phase-in period, companies will not be required to present prior years' compensation disclosure or Item 404(a) disclosure under the former rules.

(n196)Footnote 196. The Commission has issued transition questions and answers related to executive compensation and related person disclosure. See <http://www.sec.gov/divisions/corpfin/faqs/execcompqa.pdf>.

(n197)Footnote 197. Item 402(a)(1), Regulation S-K.

(n198)Footnote 198. Item 402(a)(2), Regulation S-K. *Id.* No item reported as compensation for one fiscal year need be reported as compensation for a subsequent fiscal year. *Id.*

(n199)Footnote 199. Exchange Act Release No. 54,302A; IC-27444A (August 29, 2006).

(n200)Footnote 200. If the CEO served in that capacity during part of a fiscal year, information should be provided as to all compensation for the full fiscal year. Item 402(a)(4), Regulation S-K.

(n201)Footnote 201. The determination as to which executive officers are most highly compensated is made by reference to total compensation for the last completed fiscal year as shown on the Summary Compensation Table, reduced by the amount required to be disclosed pursuant to paragraph (c)(2)(viii), provided, however, that no disclosure need be provided for any executive officer, other than a PEO and PFO, whose total compensation, as so reduced, does not exceed \$100,000. Instruction 1 to Item 402(a)(3), Regulation S-K. It may be appropriate in certain circumstances for a registrant to include an executive officer of a subsidiary in the disclosure required by this Item. Instruction 2 to Item 402(a)(3), Regulation S-K. If a named executive officer served as an executive officer of the registrant (whether or not

in the same position) during any part of a fiscal year, information must be provided as to all compensation of that individual for the full fiscal year. Item 402(a)(4), Regulation S-K.

(n202)Footnote 202. Item 402(a)(3), *Regulation S-K. Exchange Act Release No. 31,327, Fed. Sec. L. Rep. (CCH) P 85,056 (1992)*. Based on the Commission's review of the disclosure provided in filings during the first proxy season after the executive compensation disclosure was revised in 1992, the Commission proposed certain modifications to such disclosures, including modification of the named executive officers to include certain former executive officers. *Exchange Act Release No. 32,723, Fed. Sec. L. Rep. (CCH) P 85,209 (1993)* and *Exchange Act Release No. 33,229, Fed. Sec. L. Rep. (CCH) P 85,259 (1993)*.

(n203)Footnote 203. Instruction 3 to Item 402(a)(3), Regulation S-K.

(n204)Footnote 204. Item 402(a)(5), Regulation S-K. However, the Commission has stated that to promote intercompany comparability and comprehensible disclosure, the rules require, with few exceptions, strict adherence to the specified tabular formats. *Exchange Act Release No. 32,723, Fed. Sec. L. Rep. (CCH) P 85,209 (1993)*.

(n205)Footnote 205. A plan may include a compensatory contract or arrangement for a single individual. Registrants may omit information regarding group life, health, hospitalization, medical reimbursement, or relocation plans that do not discriminate in scope, terms or operation in favor of executive officers or directors of the registrant and that are available generally to all salaried employees. Item 402(a)(7)(ii), Regulation S-K.

(n206)Footnote 206. This section was added pursuant to the executive compensation and related person disclosure rules in 2006.

(n207)Footnote 207. Registrants are not required to disclose target levels with respect to specific quantitative or qualitative performance-related factors considered by the compensation committee or the board of directors, or any other factors or criteria involving confidential trade secrets or confidential commercial or financial information, the disclosure of which would result in competitive harm for the registrant. However, the registrant should discuss the level of difficulty or changes of attainment for the undisclosed target levels or other factors. Instruction 4 to Item 402(b), Regulation S-K.

(n208)Footnote 208. Cf. *Exchange Act Release No. 31,327, Fed. Sec. L. Rep. (CCH) P 85,056 (1992)*.

(n209)Footnote 209. If the named executive officer is also a director who receives compensation for services as a director, the registrant must reflect that compensation in the Summary Compensation Table and provide a footnote identifying and itemizing such compensation and amounts. The categories in the Director Compensation Table required pursuant to Item 402(k) should be used. Instruction 3 to Item 402(c), Regulation S-K.

(n210)Footnote 210. Amounts deferred, whether pursuant to a plan established under *section 401(k) of the Internal Revenue Code*, or otherwise, are to be included in the Summary Compensation Table. Instruction 4 to Item 402(c), Regulation S-K.

(n211)Footnote 211. Where the named executive officer forgoes salary or bonus compensation pursuant to a registrant's program under which stock, equity-based or other forms of non-cash compensation may be received, that non-cash compensation is disclosed in the appropriate column of the Summary Compensation Table corresponding to that fiscal year. Stock awards are reported in column (e); option awards are reported in column (f); and all other compensation is reported in column (i). Grants pursuant to a non-equity incentive plan are not reported under the Summary Compensation Table (and are reported in the Grants of Plan-Based Awards Table required by Item 402(d)) but are mentioned in a footnote to the bonus or salary column. Instruction 2 to Item 402(c)(2)(iii) and (iv), Regulation S-K.

(n212)Footnote 212. Instruction 1 to Item 402(c)(2)(v) and (vi), Regulation S-K.

(n213)Footnote 213. Instruction 2 to Item 402(c)(2)(v) and (vi), Regulation S-K.

(n214)Footnote 214. A non-equity incentive plan is an incentive plan or portion of an incentive plan that is not an equity incentive plan. Item 402(a)(6)(iii), Regulation S-K.

(n215)Footnote 215. The earnings are not reportable again in the fiscal year when the amounts are paid to the named executive officer. Instructions to Item 402(c)(2)(vii), Regulation S-K.

(n216)Footnote 216. Tax reimbursements for perquisites or other personal benefits would be disclosed here. Instruction 4 to Item 402(c)(2)(ix), Regulation S-K.

(n217)Footnote 217. For the purposes of this disclosure, accrued amount is an amount for which payment has become due.

(n218)Footnote 218. Id.

(n219)Footnote 219. Benefits paid pursuant to defined benefit and actuarial plans would be reported only if accelerated pursuant to a change in control. Instruction 2 to Item 402(c)(2)(ix), Regulation S-K.

(n220)Footnote 220. Instruction 3 to Item 402(c)(2)(ix), Regulation S-K.

(n221)Footnote 221. Perquisites and other personal benefits are valued on the basis of the aggregate incremental cost to the registrant. Where there is footnote qualification, the footnote must describe the methodology for computing the aggregate incremental cost. Even if the perquisite or personal benefit does not exceed \$10,000, some disclosure may be required in column (i) if the registrant reimbursed taxes owed with respect to the perquisite or personal benefit. Instruction 4 to Item 402(c)(2)(ix), Regulation S-K.

(n222)Footnote 222. Each grant of an award made during a fiscal year is disclosed on a separate line. If the grants were made to a named executive officer under more than one plan, registrants must identify the particular plan under which each grant was made. Instruction 1 to Item 402(d), Regulation S-K. A tandem grant of two instruments, only one of which is granted under an incentive plan, need only be reported as applicable in this column. The tandem feature should be noted by a footnote or in the accompanying textual narrative. Instruction 4 to Item 402(d), Regulation S-K.

(n223)Footnote 223. If non-equity incentive awards are denominated in units or other rights, a separate, adjoining column between columns (b) (grant date) and (c) (threshold) is added quantifying the unit or other rights awarded. Instruction 6 to Item 402(d), Regulation S-K.

(n224)Footnote 224. Threshold refers to the minimum amount payable for a certain level of performance under an incentive plan. Instruction 2 to Item 402(d), Regulation S-K.

(n225)Footnote 225. If the incentive plan only provides for a single estimated payout, that amount is reported as the target. If the target is not determinable, a representative amount based on the previous fiscal year's performance is required. Instruction 2 to Item 402(d), Regulation S-K.

(n226)Footnote 226. Instruction 5 to Item 402(d), Regulation S-K.

(n227)Footnote 227. Material modification would include extension of exercise periods, a change of vesting or forfeiture conditions, the change or elimination of applicable performance criteria, or the change in the bases upon which returns are determined. Item 402(e) of Regulation S-K. However, re-pricing that occurs through a pre-existing formula or mechanism in the plan or award that results in the periodic adjustment of the option or SAR exercise or base price, an anti-dilution provision, or a recapitalization or similar transaction equally affecting all holders of the class of securities underlying the options or SARs would not need to be reported here. Instruction 1 to Item 402(e), Regulation S-K.

(n228)Footnote 228. Registrants are not required to disclose target levels with respect to specific quantitative or performance-related factors considered by the compensation committee or the board of directors where such disclosure would result in disclosure of confidential trade secrets or confidential commercial or financial information that would cause competitive harm to the registrant. The registrant does not need to seek confidential treatment of this information. The registrant should discuss how difficult it will be for the executive or how likely it will be for the executive to achieve the undisclosed target levels or other factors. Further, disclosure of target levels that are non-GAAP financial measures will not be subject to Regulation G and Item 10(e) of Regulation S-K; but the registrant must disclose how the number is calculated from the registrant's audited financial statements. Instruction 2 to Item 402(e)(1), Regulation S-K.

(n229)Footnote 229. Instruction 4 to Item 402(f), Regulation S-K.

(n230)Footnote 230. The dollar amount realized upon exercise is the difference between the market price of the underlying securities at exercise and the exercise or base price of the options. The value of any related payment or other consideration provided by the registrant to or on behalf of a named executive officer, whether in payment of the exercise price or related taxes is not to be included here, as it is reported in the Summary Compensation Table. Instruction to Item 402(g)(2), Regulation S-K.

(n231)Footnote 231. If the named executive officer's number of years of credited service with respect to any plans disclosed in this table is different from the named executive officer's number of actual years of service with the registrant, it must be disclosed in a footnote quantifying the differences and any resulting benefit augmentation. Instruction 4 to Item 402(h)(2), Regulation S-K.

(n232)Footnote 232. Disclosure applies to each plan that provides for specified payments and benefits, or payments and benefits that will be provided primarily following retirement, including but not limited to tax-qualified defined benefit plans and supplemental executive retirement plans, but excluding tax-qualified defined contribution plans and nonqualified defined contribution plans. Each plan is to be disclosed in a separate row. Instruction 1 to Item 402(h)(2), Regulation S-K.

(n233)Footnote 233. Normal retirement means retirement at the normal retirement age as defined in the plan, or if not so defined, the earliest time at which a participant may retire under the plan without any benefit reduction due to age. Item 402(h)(3)(i), Regulation S-K.

(n234)Footnote 234. A footnote should describe the extent to which amounts reported in the contributions and earnings columns are reported as compensation in the last completed fiscal year, and previous years, in the registrant's Summary Compensation Table. Instruction to Item 402(i)(2).

(n235)Footnote 235. Where a triggering event has actually occurred for a named executive officer and that individual was not serving as a named executive officer of the registrant at the end of the last completed fiscal year, the disclosure for that named executive officer required involves only that triggering event. Instruction 4 to Item 402(j), Regulation S-K.

(n236)Footnote 236. Instruction 5 to Item 402(j), Regulation S-K.

(n237)Footnote 237. If the relevant information regarding termination and change-in-control has been disclosed pursuant to paragraph (h) or (i) of Item 402, reference may be made to that disclosure. If any payment or benefit would be enhanced or its vesting or other provisions accelerated in connection with any triggering event, such enhancement or acceleration would be disclosed under this paragraph. Instruction 3 to Item 402(j), Regulation S-K.

(n238)Footnote 238. Where uncertainty exists as to the provision of payments and benefits or the amounts involved, the registrant should make reasonable estimates. Instruction 1 to Item 402(j), Regulation S-K.

(n239)Footnote 239. Perquisites and other personal benefits or property with an aggregate value less than \$10,000

may be excluded in accordance with Instruction 4 to Item 402(c)(2)(ix) of Regulation S-K. Instruction 2 to Item 402(j), Regulation S-K.

(n240)Footnote 240. Two or more directors may be grouped in a single row in the table if all elements of their compensation are identical. The names of the directors for whom disclosure is presented on a group basis should be clear from the table. Instruction to Item 402(K)(2), Regulation S-K.

(n241)Footnote 241. If the director foregoes salary or bonus and elects non-cash compensation (such as stock), that non-cash compensation is not disclosed in the salary or bonus column, but is disclosed in the column appropriate for that type of compensation. Instruction to Item 402(k), Regulation S-K.

(n242)Footnote 242. The awards of stock options, with or without tandem SARs, and including awards that subsequently have been transferred, are to be disclosed in this table. Item 402(k)(2)(iv), Regulation S-K.

(n243)Footnote 243. The range of time used to calculate the aggregate change in the present value of the director's accumulated benefits is the pension plan measurement date used for financial statement reporting purposes with respect to the registrant's audited financial statements for the prior completed fiscal year to the registrant's audited financial statements for the prior completed fiscal year to the pension plan measurement date used for financial statement reporting purposes with respect to the registrant's audited financial statements for the covered fiscal year. Item 402(k)(2)(vi)(A), Regulation S-K.

(n244)Footnote 244. All other compensation includes the following for the covered fiscal year: (i) perquisites and other personal benefits, or property where the aggregate total value is greater than \$10,000; (ii) "gross-ups" for the payment of taxes; (iii) discounts on the purchase of any security of the registrant or its subsidiaries unless that discount is generally available to all security holders or all salaried employees of the registrant; (iv) amounts paid or accrued to any director pursuant to agreements or arrangements concerning change-of-control, termination or retirement; (v) registrant contributions or other allocations to vested and unvested defined contribution plans; (vi) consulting fees; (vii) the annual costs of payments and promises of payments pursuant to director legacy programs and similar charitable award programs; (viii) the dollar value of insurance premiums paid by the registrant for life insurance for the benefit of the director and the dollar value of any dividends; or (ix) other earnings paid on stock or option awards, when those amounts were not factored into the grant date fair value required to be reported for the stock or option award in column (c) or (d). Item 402(k)(2)(vii), Regulation S-K.

Charitable award programs include programs where the registrant agrees to make donations to one or more charitable institutions in a director's name, payable by the registrant currently or upon a designated event, such as the retirement or death of the director. Foot note disclosure is required and must include the total dollar amount payable under the program and other material terms of each such program for which tabular disclosure is provided. Instruction 1 to Item 402(k)(vii).

Where the total value of perquisites and personal benefits exceeds \$10,000, then each perquisite and personal benefit, regardless of the amount, must be identified by type and each perquisite or personal benefit that exceeds \$25,000 or 10% of the total amount of perquisites and personal benefits for that director must be quantified and disclosed in a footnote. Where footnote disclosure is required, the registrant must give the methodology for determining the incremental value of the perquisite or personal benefit. Reimbursements for taxes must also be included in the "All Other Compensation" column and must be identified and qualified along with all other tax "gross-ups." Instruction 3 to Item 402(k)(2)(vii).

(n245)Footnote 245. Instruction to Item 402(k), Regulation S-K.

(n246)Footnote 246. Id.

(n247)Footnote 247. Item 402(l) of Regulation S-K.

(n248)Footnote 248. Any "person" includes any "group" as the term is used in Section 13(d)(3) of the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section F. *See* § 7A.02[2][b][i] *infra*.

(n249)Footnote 249. The registrant is deemed to know the contents of any statements filed with the Commission pursuant to Section 13(d) or 13(g), discussed in § 7A.02[1][a][i] *infra*, and the registrant may rely upon information in those statements unless the registrant has reason to believe that the information is incomplete or inaccurate. Instruction 3 to Item 403, Regulation S-K. For purposes of furnishing information pursuant to paragraph (a) of this item, the registrant may indicate the source and date of such information. Instruction 4 to Item 403, Regulation S-K.

(n250)Footnote 250. This may be a business, mailing, or residence address. Item 403(a), Regulation S-K.

(n251)Footnote 251. Beneficial ownership is determined in accordance with Rule 13d-3 under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section G discussed in § 7A.02[2][b][ii] *infra*. If more than one beneficial owner is known to the registrant to be listed for the same securities, appropriate disclosure should be made to avoid confusion. Instruction 5 to Item 403, Regulation S-K.

(n252)Footnote 252. The percentages are to be calculated on the basis of the amount of outstanding securities, excluding securities held by or for the account of the registrant or its subsidiaries, plus securities deemed outstanding under Rule 13d-3(d)(1), i.e., securities subject to options, warrants, rights, or conversion privileges by the person whose ownership is being calculated. Instruction 1 to Item 403, Regulation S-K. If the percentage of shares beneficially owned does not exceed one percent of the class, the registrant may so indicate by means of an asterisk and explanatory footnote. *Id*.

(n253)Footnote 253. Instruction 7 to Item 403, Regulation S-K.

(n254)Footnote 254. Effective for fiscal years ending on or after December 15, 2006, Item 403(b) was amended to require footnote disclosure of the number of shares pledged as security by named executive officers, directors and director nominees. Release No. 34-54302A.

(n255)Footnote 255. Registrants should not count shares more than once when computing the aggregate number of shares owned by directors and officers as a group. Instruction 5 to Item 403, Regulation S-K.

(n256)Footnote 256. Item 403(c), however, does not require a description of ordinary default provisions contained in the charter, trust indentures, or other governing instruments relating to securities of the registrant. Instruction 6 to Item 403(c), Regulation S-K.

(n257)Footnote 257. No information need be given in response to any part of Item 404 for any remuneration or other transaction if that information can be reported in response to, or omitted pursuant to, any other paragraph of Item 402 or Item 404 of Regulation S-K. Instruction 1 to Item 404, Regulation S-K.

If the information called for by Item 404 of Regulation S-K is being presented in a registration statement filed pursuant to the Exchange Act, information should be given both for the periods specified in Item 404 of Regulation S-K and for the two fiscal years preceding the registrant's last fiscal year. Instruction 2 to Item 404, Regulation S-K.

A foreign private issuer may respond to Item 404 only to the extent that the registrant discloses to its security holders or otherwise makes public the information specified in that Item. Instruction 3 to Item 404, Regulation S-K.

(n258)Footnote 258. A person who has a position or relationship with a firm, corporation, or other entity that engages in a transaction with the registrant or its subsidiaries may have an indirect interest in the transaction because of that position or relationship. That person, however, will not be deemed to have a material interest in the transaction if

the interest arises only from:

(1) (a) the person's position as a director of another corporation that is a party to the transaction;

(b) the direct or indirect ownership by that person and all other persons specified in the text *infra*, in the aggregate, of less than a ten percent equity interest in another person, other than a partnership, that is a party to the transaction; or

(c) both (a) and (b);

(2) the person's position as a limited partner in a partnership in which the person and all other persons specified in the text *infra* have an interest of less than ten percent; or

(3) the holding of an equity interest (including a limited partnership interest, but excluding a general partnership interest) or a creditor interest in another person that is a party to the transaction with the registrant and the transaction is not material to that other person.

Instruction 8 to Item 404(a), Regulation S-K.

(n259)Footnote 259. Materiality guidelines were given in the old Instructions 1 and 9, which were deleted by the 2006 executive compensation amendments. The Commission, in its adopting release, stated that the materiality standards themselves did not change, but that the instructions were repetitive. The materiality of any interest will continue to be determined on the basis of the significance of the information to investors in light of all the circumstances. And while the instructions to Item 404(a) do not expressly provide that disclosure is not required in certain instances, where the interest of a related person in a particular transaction is not a direct or indirect material interest, no disclosure is required. Release No. 34-54302A. Among the factors noted under the prior instruction to be considered in determining the significance of the information to investors were:

(1) the importance of the interest to the person having the interest;

(2) the relationship of the parties to the transaction with each other; and

(3) the amount involved in the transaction.

(n260)Footnote 260. An "immediate family member" means any child, stepchild, parent, stepparent, spouse, sibling, mother-in-law, father-in-law, son-in-law, daughter-in-law, brother-in-law, or sister-in-law of such aforementioned related person, and any person (other than a tenant or employee) sharing the household of such aforementioned related person. Instruction 1 to Item 404(a). The term "immediate family member" was amended, effective for fiscal years ending on or after December 15, 2006, to include stepchildren, stepparents and persons (other than a tenant or employee) sharing a household. Release No. 34-54302A.

For an example of the difficulties which may arise in the application the term "immediate family member," See *Western District Council of Lumber Production and Industrial Workers v. Louisiana Pacific Corp.*, *Fed. Sec. L. Rep. (CCH)* 94,845, 892 F.2d 1412 (9th Cir. 1989) where the acquisition of a firm whose president was a former sister-in-law of a director of the acquiring company was not required to be disclosed. Although the term "sister-in-law" is included in the definition of the term "immediate family," a panel of the Ninth Circuit Court of Appeals said that the ex-wife of the director's deceased brother did not come within the scope of the definition. In this case, the panel said that the death of the director's brother had broken the connection and severed the status of the "sister-in-law."

(n261)Footnote 261. *Id.*

(n262)Footnote 262. The amount involved must be in dollars and includes all periodic installments of any lease or other agreement providing for periodic installment payments. In the case of indebtedness, the amount involved is to be the largest aggregate amount of all indebtedness outstanding at any time since the beginning of the company's last fiscal year and all amounts of interest payable on it during the last fiscal year. Instruction 3 to Item 404(a), Regulation S-K.

(n263)Footnote 263. Item 404(a) was amended in 2006 to extend to the disclosure of indebtedness, consolidating the disclosure formerly required under Item 404(a) regarding transactions involving the company and related persons with the disclosure regarding indebtedness which had been separately required by Item 404(c). Indebtedness is no longer distinguished from any other type of related person transaction. While Section 402 prohibits personal loans made by a company to its officers and directors (as amended by The Sarbanes-Oxley Act of 2002, see § 4.02 *supra*), the scope of the direct and indirect interests covered by disclosure requirements, the recognition that the term "related person" includes persons not covered by the personal loan prohibition, and the availability of certain exceptions to the prohibition all require an inclusion of the requirement to disclose indebtedness under Item 404(a).

(n264)Footnote 264. The following items of indebtedness may be excluded from the calculation of the amount of indebtedness and need not be disclosed: amounts due from the related person for purchases of goods and services subject to usual trade terms, for ordinary business travel and expense payments and for other transactions in the ordinary course of business. If the lender is a bank, savings and loan association, or broker-dealer extending credit under Federal Reserve Regulation T (12 CFR part 220) and the loans are not disclosed as nonaccrual, past due, restructured or potential problems, disclosure under paragraph (a) of this item may consist of a statement, if such is the case, that the loans to such persons: (i) were made in the ordinary course of business; (ii) were made on substantially the same terms as comparable loans to persons not related to the lender; and (iii) did not involve more than the normal risk of collectibility or present other unfavorable features. Instruction 4 to Item 404(a), Regulation S-K.

(n265)Footnote 265. Instruction 4 to Item 404(a), Regulation S-K.

(n266)Footnote 266. Compensation resulting solely from that employment relationship need not be provided pursuant to Item 404(a). Disclosure is not required where the executive officer is not an immediate family member and such compensation would have been reported under Item 402 as compensation earned for services to the registrant if the executive officer was a named executive officer as that term is defined in Item 402(a)(3), and such compensation had been approved, or recommended to the board of directors of the registrant for approval, by the compensation committee of the board of directors (or group of independent directors performing a similar function) of the registrant. Instruction 5 to Item 404(a), Regulation S-K.

(n267)Footnote 267. Instruction 6 to Item 404(a), Regulation S-K.

(n268)Footnote 268. Instruction 7 to Item 404(a), Regulation S-K.

(n269)Footnote 269. Prior to the 2006 amendments, Item 404(b) required disclosure of *specific* business relationships between a director or nominee for director and the company that could bear on the ability of directors and nominees for director to exercise independent judgment in the performance of their duties. The new Item 404(b) changes approach, focusing more on the process, and now requires disclosure about the *determination* of the independence of directors and nominees for director, including information supplementing the amended related person transaction disclosure that would permit qualitative assessment of those independence determinations.

(n270)Footnote 270. There is no requirement under this paragraph to disclose any transaction with one of the following related persons, where the transaction terminated before the related person became such: (i) director or executive officer of the registrant; (ii) a nominee for director; or (iii) an immediate family member of a director or executive officer of the registrant, or of a nominee for director. Instruction to Item 404(b), Regulation S-K.

(n271)Footnote 271. Prior to amendments in 2006, 404(c) pertained to disclosures regarding the indebtedness of management under Section 16(b) of the Exchange Act. This old 404(c) was deleted because the Commission

determined that the purpose of related person transaction disclosure differed from the purposes of Section 16(b). Release No. 34-54302A.

(n272)Footnote 272. This requirement regarding registrants that are shell companies was added in 2006. A group, for the purposes of this paragraph, consists of "two or more persons that agree to act together for the purpose of acquiring, holding, voting or disposing of equity securities of a registrant." Item 404(c), Regulation S-K.

(n273)Footnote 273. Item 404(d) of Regulation S-K.

(n274)Footnote 274. Item 405 was adopted by the Commission as part of its comprehensive revision of the rules under Exchange Act Section 16. *Exchange Act Release No. 28,869, Fed. Sec. L. Rep. (CCH) P 84,709 (1991)*.

(n275)Footnote 275. If the registrant receives a written representation from the reporting person that no Form 5 is required; and maintains the representation for two years, making a copy available to the Commission upon request, the registrant need not identify the reporting person as having failed to file a Form 5 with respect to that fiscal year.

(n276)Footnote 276. Item 405 applies to every registrant having a class of equity securities registered under Exchange Act Section 12, every closed-end investment company registered under the Investment Company Act of 1940, and every holding company registered pursuant to the Public Utility Holding Company Act of 1935.

(n277)Footnote 277. A failure to timely file need only be disclosed once. Note to Item 405(a)(2).

(n278)Footnote 278. Item 405(a)(2); *Exchange Act Release No. 37,260, Fed. Sec. L. Rep. (CCH) P 85,810 (1996)*. A Note to Item 405(a) provides that any particular failure to make a timely filing need only be disclosed once and need not be included in subsequent filings once disclosure has been made.

(n279)Footnote 279. Item 405(b). *Exchange Act Release No. 28,869, Fed. Sec. L. Rep. (CCH) P 84,709 (1991)*.

(n280)Footnote 280. For purposes of Item 406, the term "code of ethics" means written standards that are reasonably designed to deter wrongdoing and to promote:

- honest and ethical conduct, including the ethical handling of actual or apparent conflicts of interest between personal and professional relationships;
- full, fair, accurate, timely, and understandable disclosure in reports and documents that a registrant files with, or submits to, the Commission and in other public communications made by the registrant;
- compliance with applicable governmental laws, rules and regulations;
- the prompt internal reporting of violations of the code to an appropriate person or persons identified in the code; and
- accountability for adherence to the code.

Item 406(b), Regulation S-K.

(n281)Footnote 281. Item 406(a), Regulation S-K. It is important to note that the NYSE and Nasdaq require a listed company to, among other things, adopt a code of conduct, make the code of conduct publicly available and promptly disclose any waiver of the code of conduct granted to a director or executive officer. NYSE Listed Company Manual, Section 303A.10; Nasdaq Marketplace Rule 5610.

(n282)Footnote 282. *Id.*

(n283)Footnote 283. Item 406(c), Regulation S-K.

(n284)Footnote 284. Item 406(d), Regulation S-K. For additional discussion of Item 10 of Form 8-K, see § 4.02[3][k].

(n285)Footnote 285. Item 407 was added, effective November 7, 2006, as part of the amendments to the executive compensation and related person disclosure rules. See the section on Item 402 of Regulation S-K for compliance dates.

(n286)Footnote 286. Information must be disclosed for any person who served as a director during any part of the last completed fiscal year. Instruction 2 to Item 407(a), Regulation S-K.

(n287)Footnote 287. If the registrant relied upon an exemption provided in the applicable listing standards, that exemption, and the basis for the registrant's conclusion that the exemption is available, must be disclosed. Instruction 1 to Item 407(a), Regulation S-K.

(n288)Footnote 288. This standard may be used where the national securities exchange or the inter-dealer quotation system has requirements that a majority of the board of directors be independent. Item 407(a)(1)(i), Regulation S-K.

(n289)Footnote 289. If the director independence information is being disclosed in registration statement on Form S-1 or Form SB-2 under the Securities Act or Form 10 under the Exchange Act, where the registrant has applied for listing with a national securities exchange or an inter-dealer quotation system which has requirements that a majority of the board of directors be independent, the registrant must use the definitions that were adopted to comply with the listing requirements of the national securities exchange or inter-dealer quotation system to which it is applying for listing. Item 407(a)(1)(iii), Regulation S-K. If the director independence information is being disclosed in a registration statement filed at a time when the registrant is not subject to the reporting requirements of section 13(a) or 15(d) of the Exchange Act, then information respecting any director who is no longer a director at the time of the effectiveness of the registration statement is not required. Instruction 2 to Item 407(a), Regulation S-K.

(n290)Footnote 290. If a current copy of the policies are not available at the registrant's website and not included as an appendix to the registrant's proxy statement or information statement, the registrant must identify the most recent fiscal year in which the policies were so included. Item 407(a)(2), Regulation S-K.

(n291)Footnote 291. Instruction 3 to Item 407(a), Regulation S-K.

(n292)Footnote 292. If the information regarding annual meetings is being disclosed in a proxy statement, the registrant may alternatively provide the registrant's website address where such information appears. Instruction to Item 407(b)(2), Regulation S-K.

(n293)Footnote 293. For the purposes of Item 407(c)(2), the term "nominating committee" refers not only to nominating committees and committees performing similar functions, but also to groups of directors fulfilling the role of a nominating committee, including the entire board of directors. Instruction to Item 407(c)(2), Regulation S-K.

(n294)Footnote 294. Updating the procedure for security holder nominations of director nominees to the nominating committee need only be reported in the registrant's quarterly or annual reports. Instruction 1 to Item 407(c)(3), Regulation S-K. Adoption of procedures for security holder nominations is a material change. Instruction 2 to Item 407(c)(3), Regulation S-K.

(n295)Footnote 295. With regard to each nominee approved by the nominating committee for inclusion on the registrant's proxy card (other than nominees who are executive officers or who are directors standing for re-election),

the registrant must state which one or more of the following categories of persons or entities recommended that nominee: security holder, non-management director, chief executive officer, other executive officer, third-party search firm or other specified source. With regard to each nominee approved by a nominating committee of an investment company, the registrant must state which one or more of the following additional categories of persons or entities recommended that nominee: Item 407(c)(2)(vii), Regulation S-K.

(n296)Footnote 296. The nominating committee must have received the recommendation by a date not later than the 120[th] calendar day before the date of the registrant's proxy statement released to security holders in connection with the previous year's annual meeting. The registrant must identify the candidate and the security holder or security holder group that recommended the candidate and disclose whether the nominating committee chose to nominate the candidate; provided, however, that no such identification or disclosure is required without the written consent of both the security holder or security holder group and the candidate to be so identified. Item 407(c)(2)(ix), Regulation S-K.

(n297)Footnote 297. If the registrant is a subsidiary that is at least 50% beneficially owned by a listed issuer, the registrant is not subject to the requirements of this chapter. Rule 10A-3(c)(2) of the Exchange Act. If the registrant meets one of the following exemptions, the registrant is not subject to the requirements of this chapter: (i) the registrant is reporting pursuant to a listing of a security futures product that has been cleared by a clearing agency that is registered pursuant to section 17A of the Exchange Act or that is exempt from the registrant requirements of section 17A pursuant to paragraph (b)(7)(A) of such section; (ii) the registrant is reporting pursuant to a listing of a standardized option issued by a clearing agency that is registered pursuant to section 17A of the Exchange Act; (iii) the registrant is an asset-backed issuer; (iv) the registrant is issuing unit investment trusts; (v) the registrant is listing securities of a foreign government; or (vi) the listed issuer, as reflected in the applicable listing application, is organized as a trust or other unincorporated association that does not have a board of directors or persons acting in a similar capacity and the activities of the listed issuer are limited to passively owning or holding (as well as administering and distributing amounts in respect of) securities, rights, collateral or other assets on behalf of or for the benefit of the holders of the listed securities. Rule 10A-3(c)(4) through (c)(7) of the Exchange Act.

(n298)Footnote 298. The audit committee report need not be provided in any filings other than a registrant's proxy or information statement relating to an annual meeting of security holders at which directors are to be elected (or special meeting or written consents in lieu of such meeting). Instruction 3 to Item 407(d), Regulation S-K.

(n299)Footnote 299. In adopting Item 306, the predecessor to Item 407(d), the Commission noted that in performing its oversight function, the audit committee likely would have to rely on advice and information that it receives in its discussion with management and the registrant's independent auditors and as such, Item 407(d) permits the audit committee to base its findings on such discussions. *Exchange Act Release No. 42,266, Fed. Sec. L. Rep. (CCH) P 86,230 (1999)*.

(n300)Footnote 300. The disclosure concerning the audit committee financial expert is only required in a registrant's annual report. The registrant need not provide this disclosure in a proxy or information statement unless that registrant is electing to incorporate the information by reference from the proxy or information statement into its annual report pursuant to General Instruction G(3) to Form 10-K. Instruction 1 to Item 407(d)(5), Regulation S-K.

(n301)Footnote 301. If the registrant has more than one financial expert, the registrant is only required to disclose one name. If other names are disclosed, the status of their independence (or lack thereof) should also be disclosed. Instruction to Item 407(d)(5)(i).

(n302)Footnote 302. If a person is qualified as an audit committee financial expert by means of relevant experience, the registrant is to provide a brief listing of that person's relevant experience. Such disclosure may be made by reference to disclosures required under Item 401(e) (regarding disclosure of the business experience of certain persons, including directors). Instruction 2 to Item 407(d)(5).

(n303)Footnote 303. In the event that the member of the compensation committee had any relationship requiring disclosure by the registrant under Item 404, then the disclosure required by Item 404 is to accompany the member identification. Item 407(e)(4)(i)(C), Regulation S-K.

(n304)Footnote 304. This compensation committee report need only be provided in an annual report on Form 10-K, a proxy statement on Schedule 14A or an information statement on Schedule 14C. Instruction 2 to Item 407(e)(5), Regulation S-K. This report need only be provided one time during any fiscal year. Instruction 3 to Item 407(e)(5), Regulation S-K.

(n305)Footnote 305. For the purposes of Item 407(f), security holder communication does not include communications from an officer or director of the registrant, nor does it include communications from an employee or agent of the registrant unless those communications are made solely in such employee's or agent's capacity as a security holder. Instruction 3 to Item 407(f), Regulation S-K. Security holder proposals submitted pursuant to Rule 14a-8 (stockholder proposals) are not considered security holder communications for the purposes of Item 407(f). Instruction 4 to Item 407(f), Regulation S-K.

(n306)Footnote 306. If the registrant's process for collecting and organizing security holder communications, as well as similar or related activities, has been approved by a majority of the independent directors, then the registrant need not disclose such process. Instruction 2 to Item 407(f), Regulation S-K.

(n307)Footnote 307. Instruction 1 to Item 407(f), Regulation S-K.

(n308)Footnote 308. Instruction 2 to Item 407, Regulation S-K.

(n309)Footnote 309. Regulation 407(g) of Regulation S K.

(n310)Footnote 310. Item 601(b)(99), Regulation S-K.

(n311)Footnote 311. Item 601(a)(1), Regulation S-K. Rule 12b-32 provides that any part of a document filed with the Commission or an exchange pursuant to the federal securities laws may be incorporated by reference as an exhibit to any statement or report filed with the Commission or an exchange by the same or any other person. The Rule also provides that if any modification has occurred in the text of any document incorporated by reference since it was filed, the registrant must file with the reference the text and the date of the modification.

Rule 12b-32 is subject to Item 10(d) of Regulation S-K which prohibits incorporation by reference to another document if: (1) the pertinent portion of the document includes an incorporation by reference to a second document, or (2) the document has been on file for more than five years. The five year prohibition, however, does not apply to:

(1) documents contained in registration statements, if the registrant has a reporting requirement with the Commission;

(2) documents the registrant specifically identified by physical location through SEC file number reference, if the documents have not been disposed of pursuant to the Commission's Records Control Schedule (17 C.F.R. § 200.80f). See § 4.03[1][d] *infra*.

(n312)Footnote 312. Under Regulation S-T, exhibits filed in paper prior to the time the filer becomes subject to mandated electronic filing will not have to be refiled in electronic format. Rule 102(e), *Regulation S-T. Exchange Act Release No. 35,113, Fed. Sec. L. Rep. (CCH) P 85,475 (1994)*. See Section 4.05 *infra*.

(n313)Footnote 313. Instruction 3 to Item 601, Regulation S-K.

(n314)Footnote 314. Item 601(a)(2), Regulation S-K. If two or more documents to be filed as exhibits are substantially identical, the registrant need file only one of such documents with a schedule indicating the differing

details. The Commission may require filing of any of the documents so omitted. Instruction 2 to Item 601, Regulation S-K.

Whenever an exhibit is filed in paper pursuant to a hardship exemption, the letter "P" must be placed next to the exhibit in the index and whenever an electronic confirming copy of an exhibit is filed pursuant to a grant of a hardship exemption, the exhibit index shall specify where the confirming electronic copy can be located and the item shall be designated "CE" in the index. Instruction 4 to Item 601, *Regulation S-K. Exchange Act Release No. 38,798, Fed. Sec. L. Rep. (CCH) P 85,947 (1997)*.

(n315)Footnote 315. The number in parenthesis at the beginning of each exhibit refers to the appropriate subsection in Item 601(b) where a description of the exhibit can be found.

(n316)Footnote 316. Item 601(b)(2), Regulation S-K. Schedules or similar attachments to this exhibit need not be filed unless the schedules contain material information not otherwise disclosed in the exhibit or registration statement or report, but the contents of all omitted schedules must be briefly identified in a list accompanying the filed exhibit, which must be accompanied by an agreement to furnish supplementally a copy of any omitted schedule to the Commission upon request. *Id.*

(n317)Footnote 317. Item 601(b)(3), *Regulation S-K. Exchange Act Release No. 31,905, Fed. Sec. L. Rep. (CCH) P 85,111 (1993)*.

If amendments to the articles or bylaws are filed, the registrant must also file a complete copy of the articles or bylaws as amended. *Id.* The registrant may file the form of a charter amendment authorizing new securities to be filed with the appropriate state authority if it is impracticable for the registrant to file the amendment prior to the effective date of the registration statement for the new securities. *Id.* If, however, material changes are made in the form of amendment after it is filed as an exhibit, the registrant must file the form as changed. *Id.*

(n318)Footnote 318. Instruments defining the rights of participants in an employee benefit plan as participants, and not as security holders, need not be filed. Instruction to Item 601(b)(4), Regulation S-K. If the instrument defining the rights of security holders is in the form of a certificate, the text appearing on the certificate must be reproduced in an electronic filing, together with a description of any other graphic or image material. *Exchange Act Release No. 35,113, Fed. Sec. L. Rep. (CCH) P 85,475 (1994)*.

(n319)Footnote 319. Item 601(b)(4), Regulation S-K. The registrant must file all instruments defining the rights of holders of the equity or debt securities being registered, including any relevant portions of the articles or bylaws of the registrant.

In addition, the registrant must file as exhibits all instruments defining the rights of holders of long-term debt of the registrant, its consolidated subsidiaries, and its unconsolidated subsidiaries for which financial statements are required to be filed, except any instrument:

(1) concerning long-term debt not being registered if:

(a) the total amount of securities authorized under the instrument does not exceed ten percent of the total assets of the registrant and its consolidated subsidiaries; and

(b) an agreement to furnish a copy of the instrument to the Commission upon request is filed;

(2) concerning any class of securities if appropriate steps to assure the redemption or retirement of the class will be taken prior to or upon delivery by the registrant of the securities being registered; or

(3) evidencing scrip certificates for fractions of shares.

If any of the securities being registered are, or will be, issued under an indenture to be qualified under the Trust Indenture Act, the copy of such indenture which is filed as an exhibit shall include or be accompanied by:

(1) a reasonably itemized and informative table of contents; and

(2) a cross-reference sheet showing the location in the indenture of the provisions inserted pursuant to sections 310 through 318(a) inclusive of the Trust Indenture Act of 1939. Item 601(b)(4)(ii), (iii) and (iv), Regulation S-K.

The Trust Indenture Act of 1939 is discussed in *Federal Securities Act of 1933*, Matthew Bender, (A.A. Sommer, Jr., General Editor), Chapter 8.

(n320)Footnote 320. Item 601(b)(9), Regulation S-K.

(n321)Footnote 321. Item 601(b)(10), Regulation S-K. Three kinds of material contracts must be filed as exhibits: contracts not made in the ordinary course of business, certain contracts made in the ordinary course of business (i.e., contracts to which directors, officers, promoters, voting trustees, security holders named in the report, or underwriters are parties other than contracts involving only the purchase or sale of current assets having a determinable market price, at such market price; any contract upon which the registrant's business is substantially dependent; any contract calling for the acquisition or sale of property, plant or equipment for a consideration exceeding 15 percent of such fixed assets of the registrant on a consolidated basis; or any material lease under which a part of the property described in the report is held by the registrant), and management contracts and remunerative plans (which include plans relating to options, warrants or rights, pension, retirement, or deferred compensation or bonus, incentive or profit sharing in which any director or "named executive officer," as defined in Item 402(a)(3), participates and any other management contract or compensatory plan, contract, or arrangement in which any other executive officer of the registrant participates, unless immaterial in amount or significance). Any material contract as to which the registrant or any of its subsidiaries: (1) is a party; (2) has succeeded to a party by assumption or assignment; or (3) has a beneficial interest, not made in the ordinary course of business must be filed, if the contract: (1) is to be performed in whole or in part at or after the filing of the registration statement or report, or (2) was entered into not more than two (2) years before the filing of the registration statement or report. Item 601(b)(10)(i), Regulation S-K.

If a material contract is executed or becomes effective during the reporting period reflected by a Form 10-Q or Form 10-K, it must be filed as an exhibit to the Form 10-Q or Form 10-K filed for the corresponding period. *Exchange Act Release No. 35,113, Fed. Sec. L. Rep. (CCH) P 85,475 (1994)*.

(n322)Footnote 322. Item 601(b)(11), Regulation S-K. This statement is not required if the computation can be clearly determined from the material contained in the registration statement or report. *Id.*

(n323)Footnote 323. Item 601(b)(12), Regulation S-K.

(n324)Footnote 324. If required by Item 304 of Regulation S-K, the registrant must include a letter from its former independent accountant regarding that accountant's concurrence or disagreement with the statements made by the registrant in the current report concerning the former accountant's resignation or dismissal. Item 601(b)(16), Regulation S-K. For a discussion of Item 304 of Regulation S-K, see § 4.03(4)[d] *supra*.

(n325)Footnote 325. Item 601(b)(21), Regulation S-K.

(n326)Footnote 326. Item 601(b)(24), Regulation S-K. Where the power of attorney is contained elsewhere in the registration statement or documents filed therewith, a reference shall be made in the index to the location of the power

of attorney. *Id.* A power of attorney that is filed with the Commission can only relate to the specific filing or amendment, and cannot confer general authority. *Exchange Act Release No. 31,905, Fed. Sec. L. Rep. (CCH) P 85,111* (1993).

(n327)Footnote 327. Item 601(b)(99), Regulation S-K.

(n328)Footnote 328. A registrant that participates in the Voluntary eXtensible Business Reporting Language (XBRL) program may submit XBRL-related documents in electronic format as an exhibit to the related filing.

(n329)Footnote 329. Item 601(b)(1), Regulation S-K. The underwriting contract or agreement may be filed with a report on Form 8-K if that report is incorporated into a registration statement subsequent to its effectiveness. *Id.*

(n330)Footnote 330. Item 601(b)(2), Regulation S-K. *See* n. 259 *supra*. In *Franchise Finance Corp. of America* (Div. Corp. Fin. 1985), the staff indicated that where limited partnerships sponsored by a registrant contemplated numerous acquisitions under terms and conditions set forth in a standard form of agreement filed as an exhibit to the registrant's registration statement under the Securities Act, and the acquisitions would differ only in certain particulars, such as the names of the parties, description of the property acquired, including the minimum closing appraised value of the property and the anticipated closing date, and other details unique to the specific acquisition, the staff would raise no objection if each acquisition were reported on Form 8-K by setting forth the details unique to that acquisition and incorporating by reference the standard form of agreement filed with the Commission.

(n331)Footnote 331. Item 601(b)(3).

(n332)Footnote 332. Item 601(b)(4), Regulation S-K. For a filing that discloses the creation of a new class of securities or indebtedness or the modification of existing rights of security holders, the registrant must file all instruments defining the rights of holders of the securities or indebtedness, except for an instrument defining long-term debt not being registered if: (a) the total amount of securities authorized under the instrument does not exceed ten percent of the assets of the registrant and its consolidated subsidiaries, and (b) an agreement to furnish a copy of the instrument to the Commission upon request is filed. Item 601(b)(4)(v), Regulation S-K. *See also* nn.261 and 262 *supra*.

(n333)Footnote 333. Item 601(b)(7).

(n334)Footnote 334. Item 601(b)(14), Regulation S-K; *see* Exchange Act Release No. 47,235 (2003).

(n335)Footnote 335. Item 601(b)(16), Regulation S-K.

(n336)Footnote 336. *Id.*, Item 601(b)(17).

(n337)Footnote 337. *Id.*, Item 601(b)(20). If such document or statement is filed, the information called for by the form may be incorporated by reference from such document or statement.

(n338)Footnote 338. *Id.*, Item 601(b)(23).

(n339)Footnote 339. *Id.*, Item 601(b)(24). *See also* n.269 *supra*. Facsimile signatures will be accepted, provided the registrant maintains the originals for a five-year period. *See* Rule 12b1-11(d).

(n340)Footnote 340. Item 601(b)(99), Regulation S-K.

(n341)Footnote 341. Item 601(b)(100) of Regulation S-K. *See also* footnote 275.1 *supra*.

(n342)Footnote 342. Item 601(b)(2), Regulation S-K. *See also* n.259 *supra*. If the agreement becomes effective during the quarter to which the form relates, it must be filed as an exhibit. *Exchange Act Release No. 31,905, Fed. Sec. L. Rep. (CCH) P 85,111* (1993).

(n343)Footnote 343. Item 601(b)(3), Regulation S-K. *See* n.260 *supra*. *Exchange Act Release No. 53,113, Fed. Sec. L. Rep. (CCH) P 85,475 (1994)*.

(n344)Footnote 344. Item 601(b)(4), Regulation S-K. *See* n.262 *supra*.

(n345)Footnote 345. Item 601(b)(10), Regulation S-K. *See also* n.264 *supra*. Material contracts, or amendments thereto, that become effective during the quarter to which they relate are required to be filed pursuant to this item. *Exchange Act Release No. 31,905, Fed. Sec. L. Rep. (CCH) P 85,111 (1993)*.

(n346)Footnote 346. Item 601(b)(11), Regulation S-K. *See* n.265 *supra*.

(n347)Footnote 347. Item 601(b)(15), Regulation S-K. Registrants have the option of filing this letter with their Securities Act registration statement, or an amendment thereto, or with a Form 10-Q incorporated by reference into the registration statement. *Id.*

(n348)Footnote 348. Item 601(b)(18), Regulation S-K. This letter is not required if:

(1) previously filed, or

(2) the change is made in response to a standard adopted by the Financial Accounting Standards Board (FASB) that:

(a) creates a new accounting principle;

(b) expresses a preference for an accounting principle; or

(c) rejects a specific accounting principle.

Id.

(n349)Footnote 349. Item 601(b)(19), Regulation S-K.

(n350)Footnote 350. These published reports are required by Item 4 of Part II of Form 10-Q, discussed in § 4.02[2][d][iv] *supra*.

(n351)Footnote 351. Item 601(b)(22), Regulation S-K. Rule 12b-23(a)(3) provides that, except for information filed as an exhibit covered by Rule 12b-23, copies of any information or financial statement incorporated into a registration statement or report by reference, or copies of the pertinent pages of the document containing the information or financial statement, must be filed as an exhibit to the registration statement or report, except that a proxy or information statement incorporated by reference in response to Part III of Form 10-K need not be filed as an exhibit.

(n352)Footnote 352. Item 601(b)(23), Regulation S-K.

(n353)Footnote 353. Item 601(b)(24).

(n354)Footnote 354. Item 601(b)(31).

(n355)Footnote 355. Item 601(b)(32)(i). A certification furnished pursuant to Item 601(b)(32) will not be deemed "filed" for purposes of Section 18 of the Exchange Act, or otherwise subject to the liability of that section, and will not be deemed to be incorporated by reference into any filing under the Securities Act or the Exchange Act except to the extent that the registrant specifically incorporates it by reference. Item 601(b)(32)(ii).

(n356)Footnote 356. Item 601(b)(99)(iii). Earnings statements must be filed only where the statement was made available using methods other than including the information in another filing with the *Commission. Exchange Act Release No. 31,905, Fed. Sec. L. Rep. (CCH) P 85,111* (1993); *Exchange Act Release No. 35,113, Fed. Sec. L. Rep. (CCH) P 85,475* (1994).

(n357)Footnote 357. The filing of XBRL-related documents is relevant to electronic filers that participate in the voluntary XBRL program. Item 601(b)(100) of Regulation S-K. See also footnote 275.1 *supra*.

(n358)Footnote 358. See § 4.02[4] *supra*.

(n359)Footnote 359. Item 601(b)(2), Regulation S-K.

(n360)Footnote 360. Item 601(b)(3), Regulation S-K.

(n361)Footnote 361. Item 601(b)(4), Regulation S-K.

(n362)Footnote 362. Item 601(b)(9), Regulation S-K.

(n363)Footnote 363. Item 601(b)(10), Regulation S-K. In addition, for purposes of Form 10-K, a registrant must also file as material contracts any compensatory plan, contract, or arrangement adopted without the approval of security holders pursuant to which equity may be awarded, including options, warrants, or rights in which any employee participates, unless immaterial in amount or significance. Ordinary purchase and sale agreements, agreements with managers of stores in a chain organization, contracts providing for a laborer or salesmen's bonuses or payments to a class of security holders, any compensatory plan, contract or arrangement which by its terms is available to employees, officers or directors generally and which provides for the same method of allocation of benefits between management and non-management, any compensatory plan, contract, or arrangement if the registrant is a foreign private issuer that furnishes compensatory information on an aggregate basis, or any compensatory plan, contract, or arrangement if the registrant is a wholly-owned subsidiary of a company that is filing a report on Form 10-K or registering debt instruments or preferred stock which are not voting securities on Form S-2 maybe excluded. With the exception of management contracts, registrants need not file each individual director or officer's personal agreements under the plans unless necessary to an investor's understanding. Instruction 1 to Item 601(b)(10).

(n364)Footnote 364. Item 601(b)(11), Regulation S-K.

(n365)Footnote 365. Item 601(b)(12), Regulation S-K.

(n366)Footnote 366. Item 601(b)(13), Regulation S-K. The reports are not deemed "filed" as part of the filing except for portions expressly incorporated by reference in the filing. *Id.* If financial statements in the report have been incorporated by reference in the filing, the accountant's certificate must be manually signed in one copy. *Id.* If all or any portion of the annual or quarterly reports to security holders is incorporated by reference into any electronic filing, all, or such portion so incorporated, must be filed in electronic format as an exhibit. *Exchange Act Release No. 31,905, Fed. Sec. L. Rep. (CCH) P 85,111* (1993).

(n367)Footnote 367. Item 601(b)(14), Regulation S-K; see Exchange Act Release No. 47,235 (2003).

(n368)Footnote 368. If required pursuant to Item 304 of Regulation S-K. Item 601(b)(16), Regulation S-K. For a discussion of item 304 of Regulation S-K, see § 4.03(4) *supra*.

(n369)Footnote 369. Item 601(b)(18), Regulation S-K.

(n370)Footnote 370. Item 601(b)(21), Regulation S-K.

(n371)Footnote 371. These reports are required by Item 4 of Part I of Form 10-K, discussed in § 4.02[1][c][iv]

supra.

(n372)Footnote 372. Item 601(b)(22), Regulation S-K.

(n373)Footnote 373. Item 601(b)(23), Regulation S-K.

(n374)Footnote 374. Item 601(b)(24).

(n375)Footnote 375. Item 601(b)(31).

(n376)Footnote 376. Item 601(b)(32)(i). A certification furnished pursuant to Item 601(b)(32) will not be deemed "filed" for purposes of Section 18 of the Exchange Act, or otherwise subject to the liability of that section, and will not be deemed to be incorporated by reference into any filing under the Securities Act or the Exchange Act except to the extent that the registrant specifically incorporates it by reference. Item 601(b)(32)(ii).

(n377)Footnote 377. Item 601(b)(33) of Regulation S-K.

(n378)Footnote 378. Item 601(b)(34) of Regulation S-K.

(n379)Footnote 379. This exhibit is for asset-backed securities. Item 601(b)(35) of Regulation S-K.

(n380)Footnote 380. Item 601(b)(99)(iii). Earnings statements must be filed only where the statement was made available using methods other than including the information in another filing with the *Commission. Exchange Act Release No. 31,905, Fed. Sec. L. Rep. (CCH) P 85,111* (1993); *Exchange Act Release No. 35,113, Fed. Sec. L. Rep. (CCH) P 85,475* (1994).

(n381)Footnote 381. The filing of XBRL-related documents is relevant to electronic filers that participate in the voluntary XBRL program. Item 601(b)(100) of Regulation S-K. See also footnote 275.1 *supra*.

(n382)Footnote 382. See § 4.02[4] *supra*.

(n383)Footnote 383. Include sales of required securities, as well as new issues, securities issued in exchange for property, services or other securities, and other new securities resulting from the modification of outstanding securities.

(n384)Footnote 384. If the sales of the securities were made in a series of transactions, the registrant may give this presentation using totals and periods that will reasonably convey the information required. Instruction 2 to Item 701, Regulation S-K.

(n385)Footnote 385. Item 701, Regulation S-K.

(n386)Footnote 386. Information is not required as to notes, drafts, bills of exchange, or bankers' acceptances that mature not later than one year from the date of issuance. Instruction 1 to Item 701, Regulation S-K.

(n387)Footnote 387. *Exchange Act Release No. 37,801, Fed. Sec. L. Rep. (CCH) P 85,852* (1996). As of January 1, 1999, Current Reports are no longer required to provide such information and the information will instead be provided under Item 5 of Form 10-K and Item 2 of Form 10-Q. *Exchange Act Release No. 39,668, Fed. Sec. L. Rep. (CCH) P 86,006* (1998). Compare to discussion in Section 4.02[3][j].

(n388)Footnote 388. Item 703(a), Regulation S-K. Exchange Act Release No. 48766 (2003).

(n389)Footnote 389. Item 5(c), Form 10-K. Exchange Act Release No. 48766 (2003).

(n390)Footnote 390. The instruction to Part (b)(1) of Item 703 states that all issuer repurchases, including those made pursuant to publicly-announced plans or programs and those not made pursuant to publicly-announced plans or

1-4 Federal Securities Exchange Act of 1934 § 4.03

programs, must be included. The registrant must also disclose, by footnote to the table, the number of shares purchased other than through a publicly-announced plan or program and the nature of the transaction. *Id.*

(n391)Footnote 391. Item 703(b) and Instruction 1 to Parts (b)(3) and (4) thereof, Regulation S-K.

(n392)Footnote 392. Instruction 2 to Item 703, Regulation S-K.

(n393)Footnote 393. The Commission rescinded most of the Guides for the Preparation and Filing of Registration Statements and Reports and designated the remaining *Guides as Securities Act and Exchange Act Industry Guides*, *Exchange Act Release No. 18,525, Fed. Sec. L. Rep. (CCH) P 3,760* (1982) and removed other *Guides in Exchange Act Release No. 37,262, Fed. Sec. L. Rep. (CCH) P 85,812* (1996).

(n394)Footnote 394. The Commission adopted the tenth section of Regulation S-K in 1991 to enhance the quality of information provided to investors in connection with transactions involving roll-ups of limited partnerships or similar entities. The rules included therein require heightened disclosure with respect to the fundamental changes and potential adverse effects arising from roll-up transactions, and the conflicts of interest, reasons for, alternatives to and fairness of such transactions. The rules also call for enhanced disclosure concerning valuation methods and additional pro forma financial statements. In order to highlight for investors the differing effects that roll-up transactions may have on investors in various partnerships, the rules require delivery of individual partnership prospectus supplements illustrating, among other things, the effects of the roll-up transaction on investors in each partnership. *Exchange Act Release No. 29883, Fed. Sec. L. Rep. (CCH) P 72,438* (1991). *See also Exchange Act Release No. 35,036, Fed. Sec. L. Rep. (CCH) P 85,459* (1994). The full text of the roll-up transaction rules appear in Primary Law Sourcebook, Vol. D, Section K.

CHAPTER 4 Exchange Act Registration and Reporting Requirements

1-4 Federal Securities Exchange Act of 1934 § 4.04

AUTHOR: Brandon C. Parris, Andrew D. Thorpe

§ 4.04 Section 21E Statutory Safe Harbor for Forward-Looking Statements

The Private Securities Litigation Reform Act of 1995 "seeks to protect investors, issuers, and all who are associated with our capital markets from abusive securities litigation." n1 The Act provides protections for companies that issue statements about their expected performance and erect hurdles for plaintiffs seeking to bring securities class actions.

From the point of view of a public company's day-to-day operations, the most significant part of the Act is the safe harbor for forward-looking statements. This is also among the most complex portions of the Act.

The Act adds a new Section 21E to the Exchange Act and an identical Section 27A to the Securities Act, in each case creating a safe harbor for certain written or oral forward-looking statements n2 made by any of the following persons:

- an issuer that, at the time the statement is made, is subject to the periodic reporting requirements of Section 13(a) or Section 15(d) of the Exchange Act; n3
- a person acting on behalf of such issuer; n4
- an outside reviewer retained by such issuer making a statement on the issuer's behalf; n5 or
- an underwriter with respect to information provided by such issuer or information derived from information provided by the issuer. n6

Excluded, however, from the protections of the safe harbor are forward-looking statements concerning the business or operations of an issuer if the issuer:

- within the three-year period preceding the statement was convicted of a felony or misdemeanor described in clauses (i) through (iv) of Section 15(b)(4)(B) of the Exchange Act; n7
- has been the subject of a judicial or administrative decree or order arising out of a government action that prohibits future violations of the antifraud provisions of the securities laws, requires the issuer to

1-4 Federal Securities Exchange Act of 1934 § 4.04

cease and desist from violating the antifraud provisions of the securities laws, or determines that the issuer has violated the antifraud provisions of the securities laws; n8

- makes the statement in connection with an offering of securities of a blank check company; n9
- issues penny stock; n10
- makes the statement in connection with a roll-up transaction; n11 or
- makes the statement in connection with a going private transaction. n12

Also excluded from the safe harbor are forward-looking statements included in financial statements prepared in accordance with generally accepted accounting principles n13 or that are made by an investment company, n14 in connection with a tender offer n15 or an initial public offering, n16 or in a beneficial ownership filing pursuant to Section 13(d). n17 Statements made by, or relating to an offering or the operations of, a partnership, limited liability company or direct participation investment program are also excluded from the protections of the safe harbor. n18

The safe harbor is designed to "enhance market efficiency by encouraging companies to disseminate forward-looking information." n19 The Conference Committee Report noted that many companies do not issue forward-looking information because they fear that they will be sued if their actual results do not meet their projections. n20

The safe harbor applies to any "forward-looking statements," n21 which for this purpose include written or oral statements that project financial performance (such as earnings, revenues, capital expenditures, dividends, and capital structure) or describe management's "plans and objectives" for future operations, including plans and objectives relating to the registrant's products and services. n22 The term "forward-looking statement" also includes a statement of future economic performance, including those contained in management's discussion and analysis of financial condition and results of operations, as well as any statement of the assumptions underlying or relating to any of the foregoing forward-looking statements. n23 Finally, the term includes any report issued by an outside reviewer to the extent the report assumes a forward-looking statement made by the issuer as well as other projections or estimates that may be specified under the rules or regulations of the Commission. n24

The safe harbor has two independent prongs. The first prong protects from liability any statement that is identified as a forward-looking statement if that statement is either "immaterial" n25 or is "accompanied by meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those in the forward-looking statement." n26 Regardless of a company's or person's intent in issuing the statement or the state of mind of the person issuing the statement, a plaintiff's claim cannot proceed if the statement contains these "meaningful" cautions.

Section 21E recognizes that company officials often cannot accompany their oral remarks with the "meaningful cautionary statements" described above. For that reason, the Act will protect oral statements under the first prong of the safe harbor if the following requirements are met:

- the oral forward-looking statement is accompanied by a cautionary statement identifying the oral statement as a forward-looking statement and indicating that results may differ materially from those projected; and
- the oral forward-looking statement is accompanied by an oral statement identifying a "readily available" written document or portion thereof that contains additional information concerning factors that could cause actual results to materially differ from those contained in the forward-looking statement. n27 All documents filed with the Commission or otherwise "generally disseminated" are deemed to

qualify as readily available. n28

The second prong of the safe harbor protects companies from liability for forward-looking statements when the person or business entity making the statement did not issue the statements with "actual knowledge" that they were false or misleading. n29 Under preexisting law, defendants could be liable for "reckless" forward-looking statements. n30 Section 21E rejects this standard. Equally important, under this second, independent prong of the safe harbor, plaintiffs must prove "actual knowledge that the statement was false or misleading" *by the person* issuing the statement. n31 If the statement was issued by a business entity, plaintiffs must prove that the statement was made by or with the approval of an executive officer of that entity with "actual knowledge *by that officer* that the statement was false or misleading." n32

The safe harbor expressly dismisses any duty to update a forward-looking statement. n33 In addition, the Conference Report indicates that the safe harbor is not intended to replace the judicial "bespeaks caution" doctrine n34 or to foreclose further development of that doctrine by the courts. n35

Section 21E specifically authorizes the Commission to expand the safe harbor beyond the current statutory parameters. The Conference Report indicates that the new statutory safe harbor is intended to serve as a starting point and that Congress fully expects the Commission to continue its rulemaking proceedings in this area. Specifically, the Conference Report provides that the Commission "should, as appropriate, promulgate rules or regulations to expand the statutory safe harbor by providing additional exemptions from liability or extending its coverage to additional types of information." n36

(n19)Footnote 19. *See* Conference Report.

(n20)Footnote 20. *Id.*

(n21)Footnote 21. The Conference Report indicates that the term "forward-looking statement" adopted the Commission's present definition of the same term in Rule 175(c) with certain additions and clarifying changes. *See* Section 21E(i).

(n22)Footnote 22. Section 21E(i)(1)(A) and (B).

(n23)Footnote 23. Section 21E(i)(1)(C) and (D).

(n24)Footnote 24. Section 21E(i)(1)(E) and (F).

(n25)Footnote 25. Section 21E(e)(1)(A)(ii).

(n26)Footnote 26. Section 21E(e)(1)(A)(i). The Conference Report indicates that boilerplate warnings will not suffice as meaningful cautionary statements. Instead, the cautionary statements "must convey substantive information about factors that realistically could cause results to differ materially from those projected in the forward-looking statement, such as, for example, information about the issuer's business." Conference Report. The Conference Report also indicates that the requirement that the cautionary statements identify "important" factors that could cause actual results to differ materially from those in the forward-looking statement was intended to mean that "the stated factors must be relevant to the projection and must be of a nature that the factor or factors could actually affect whether the forward-looking statement is realized." However, the safe harbor requires only that the cautionary statements identify important, but not all factors, that could cause results to differ from those projected.

The Conference Committee expects that the cautionary statements identify important factors that could cause results to differ materially but not all factors. Failure to include the particular factor that ultimately causes the forward-looking statement not to come true will not mean that the statement is not protected by the safe harbor. The Conference Committee specifies that the cautionary statements identify "important" factors to provide guidance to issuers and not to provide an opportunity for plaintiff's counsel to conduct discovery on what factors were known to the issuer at the time the forward-looking statement was made.

The use of the words "meaningful" and "important factors" are intended to provide a standard for the types of cautionary statements upon which a court may, where appropriate, decide a motion to dismiss, without examining the state of mind of the defendant. The first prong of the safe harbor requires courts to examine only the cautionary statement accompanying the forward-looking statement. Courts should not examine the state of mind of the person making the statement. *Id.*

CHAPTER 4 Exchange Act Registration and Reporting Requirements

1-4 Federal Securities Exchange Act of 1934 § 4.05

AUTHOR: Brandon C. Parris, Andrew D. Thorpe

§ 4.05 EDGAR

On July 15, 1992, the Electronic Data Gathering, Analysis and Retrieval ("EDGAR") system became operational and available, on a volunteer basis, to filers that had participated in the pilot program. The Commission adopted interim rules that required most documents processed by the Divisions of Corporation Finance and Investment Management to be filed electronically by direct transmission over the wire, or by diskette or magnetic tape. The releases setting forth the rules also contained "phase-in" schedules to bring registrants onto the EDGAR system, a process that began 1993. n1 Procedures were established for payment of filing fees, by both paper and electronic filers, to the Commission's lockbox at the Mellon Bank in Pittsburgh, Pennsylvania. n2

All registrants filing reports with the Commission, as well as third parties filing with respect to such registrants, are now required to make such filings electronically in EDGAR format on diskettes or magnetic tape or by wire transmission through the EDGAR system, n3 absent an exemption. n4

[1] Regulation S-T

The general rules and regulations for electronic filings are set forth in Regulation S-T, a separate regulation prescribing requirements and procedures for electronic filings. Reports under the Exchange Act must be filed in EDGAR format, n5 including the cover letter. The Commission rejects, and does not accept for filing, documents that are required to be filed electronically, but are instead delivered to the Commissioner in paper format unless the filing satisfies the requirements for a temporary or continuing hardship exemption under Rule 201 or 202 of Regulation S-T. n6

[2] Passwords

Each filer must have an assigned unique identification number (the "CIK"), obtained by filing Form ID with the SEC. The Form ID may be obtained from any office of the Commission and may be submitted by telefacsimile in emergency situations. In addition to the CIK number, which identifies the filer, each filer will have a confidential "Password," assigned by the Commission after Form ID is filed. The Password provides access to the EDGAR filing system, and need not be given to a filing agent, such as a financial printer, if one is used, as they will have their own Password. The registrant's Password may be changed only at login to the EDGAR system and only by the individual holding a confidential Password Modification Authorization Code. Passwords may also be changed by filing an amended Form

ID.

[3] Superseded Procedures and Requirements

Some existing procedural requirements are superseded by Regulation S-T due to the nature of electronic filing. These include submission of signatures, n7 inclusion of graphics, n8 and required number of copies. n9 Provisions relating to type size, fonts, and other legibility requirements do not apply to EDGAR filings, n10 nor do requirements relating to paper size, binding and sequential page numbering. n11

The Commission has committed itself to modernizing EDGAR in the coming years, making the system easier for filers to use and the documents more readable. As a result, the Commission's guidelines for filers have and will continue to evolve as the potential to include graphics, varied fonts, links to other documents, and means of transmission improve. In January 2006, for example, the Commission implemented its latest round of changes in EDGAR Release 9.3.

Changes to EDGAR include the addition of transmission to the system via the Internet and the elimination of other forms of transmission to the system previously permitted. EDGAR is now compatible with Windows operating systems and will soon phase out its compatibility with DOS-based software. In February 2005, the Commission announced a voluntary program which allows participants ("volunteers") to supplement their Commission filings by furnishing financial data on EDGAR as an exhibit using eXtensible Business Reporting Language ("XBRL"). n12 XBRL is a form of interactive data that allows for the creation of documents that are machine-readable. Interactive data tags all of the key financial facts to give investors quicker access to the desired information, which can then be manipulated in analytical tools. As of 2006, two dozen companies, representing more than \$1 trillion of market value, have joined the Commission's test group of volunteers and submit annual, quarterly and other reports with interactive data for a period of one year. Because of these and other similar changes, the Commission recommends that filers periodically consult the EDGAR Filer Manual for the latest technical requirements. n13

[4] Third-Party Filings

Third-party submissions, whether by entities or individuals, relating to an EDGAR filer must be submitted in electronic format.

[5] Exhibits

Exhibits to electronic filings must be filed in EDGAR format. n14 If long or complex exhibits are to be filed electronically for the first time, it is recommended that the conversion process be started substantially prior to the filing deadline to insure timely completion. An electronic filer may be granted a hardship exemption under Rule 202 of Regulation S-T for a document or portion thereof. n15 If the exemption is only granted for a limited time period and the registrant fails to submit an electronic copy within the specified time period, the registrant will be ineligible to use Forms S-2, S-3, S-8, F-2, and F-3. n16

[6] Penalties for Failure to File Electronically

Filing by a registrant in paper in violation of the EDGAR rules results in the registrant's ineligibility to use Securities Act forms n17 incorporating by reference Exchange Act reports, and the inability to incorporate the paper filing by reference. n18 The penalties cease when the violation is corrected.

[7] Document Conversion Assistance

Depending on availability of in-house personnel, many filers are relying on financial printers to convert word processing and accounting documents to EDGAR format. Several private companies provide training sessions on the conversion process for in-house personnel, and the SEC provides the EDGAR Filer Manual (available online) and a free

software program and extensive instructions to assist filers in converting documents to the EDGAR format.

FOOTNOTES:

(n1)Footnote 1. See *Exchange Act Release No. 31,905, Fed. Sec. L. Rep. (CCH) P 85,111* (1993) (general explanation of the EDGAR system); *Invest. Co. Act Release No. 19,284* (1993) (specific rules for investment companies and institutional investment managers under Section 13(f) of the Exchange Act); *Public Utility Holding Co. Act Release No. 25,746* (1993) (specific rules for public utility holding companies).

(n2)Footnote 2. *Exchange Act Release No. 31,908, Fed. Sec. L. Rep. (CCH) P 85,113* (1993) (relating to the payment of fees, pursuant to Rule 3-a of the Rules Relating to Informal and Other Procedures). Wire deposits can be made between 8:30 a.m. and 6:00 p.m., except on Saturdays, Sundays, and federal holidays. Instructions for the FEDWIRE format and examples can be found on the Internet at www.sec.gov/info/edgar/fedwire-new.htm examples. Filers should always request the "FED" reference number for a wire transfer since it will facilitate the tracing should a problem arise.

(n3)Footnote 3. Located on the Internet at: www.sec.gov/edgarhp.htm.

(n4)Footnote 4. *Exchange Act Release No. 42,712, Fed. Sec. L. Rep. (CCH) P 86,302* (2000).

(n5)Footnote 5. Rule 101(a)(iii) of Regulation S-T provides that statements, reports, and schedules filed with the Commission pursuant to Sections 13, 14, 15(d) or 16(a) of the Exchange Act must be filed electronically. Filers must submit Form 13F reports (including amendments to previously filed reports) electronically using either EDGAR submission type 13F-HR or 13F-NT, as appropriate. As a notable exception to electronic filing requirements, preliminary proxy statements for which confidential treatment is requested must be filed in paper format. Rule 101 is proposed to be amended. See *Exchange Act Release No. 7188, Fed. Sec. L. Rep. (CCH) P 85,639* (1995); *Exchange Act Release No. 35,991, Fed. Sec. L. Rep. (CCH) P 85,644* (1995); *Exchange Act Release No. 37,595, Fed. Sec. L. Rep. (CCH) P 85,831* (1996); *Exchange Act Release No. 38,800, Fed. Sec. L. Rep. (CCH) P 85,948* (1997); *Exchange Act Release No. 34,47809* (2003). Effective November 4, 2002, most filings made by foreign companies are required to be filed electronically. *Exchange Act Release No. 45,922 Fed. Sec. L. Rep. (CCH) P 86,640* (2002).

(n6)Footnote 6. Rule 14, Regulation S-T.

(n7)Footnote 7. Signatures for electronic filings are submitted in typed form rather than manual format. Item 302, Regulation S-T. A manually signed signature page (or other document adopting, acknowledging or authenticating the typed signature) must be retained by the electronic filer for a period of five years after the date of filing, and must be available for inspection by the SEC upon request. The manual signatures must be in place when the electronic filing is submitted.

(n8)Footnote 8. Filers can submit graphics and image material, but may not use graphic or image material to submit information such as text or tables. Instead, filers must submit such information as text in an ASCII document, or as text or an HTML table in an HTML document. In addition, EDGAR does not support the inclusion of graphics in modules and segmented filings. *Exchange Act Release No. 42,712, Fed. Sec. L. Rep. (CCH) P 86,302* (2000).

(n9)Footnote 9. Item 309(b), Regulation S-T. Item 402(l) of Regulation S-K has been amended so that supplemental paper copies of performance graphs included in proxy statements are no longer required to be filed, but should be maintained by the registrant for submission to the Commission staff if specifically requested.

(n10)Footnote 10. Item 308, Regulation S-T.

(n11)Footnote 11. Item 309(a), Regulation S-T.

(n12)Footnote 12. SEC Release 33-8529.

(n13)Footnote 13. The EDGAR Filer Manual is available from the SEC, which also provides, free of charge, a software program that is designed to assist in conversion of word processing documents into acceptable EDGAR format. The EDGAR Filer Manual is updated regularly. *See* Exchange Act Release No. 33-8656 (January 27, 2006).

(n14)Footnote 14. Exhibits previously filed in paper format may be incorporated by reference into an EDGAR filing to the extent otherwise permitted by the Rules of the SEC. *See* Item 102(a) of Regulation S-T. Exhibits previously filed in paper format may be amended by filing an amendment in electronic format, and the entire exhibit need not be converted to electronic format in order to file the amendment unless the exhibit is the articles of incorporation or bylaws, or other organizational document, or, in the case of a registered investment company or business development company, the exhibit is the investment advisory agreement. Item 102(a) and (c), Regulation S-T.

(n15)Footnote 15. The Commission's rules take into account the possibility that under certain circumstances, electronic filing may be difficult or impossible by allowing filers relief from electronic filing through hardship exemptions. *Exchange Act Release No. 39,269, Fed. Sec. L. Rep. (CCH) P 85,967* (1997).

(n16)Footnote 16. Note 3 to Item 202, Regulation S-T.

(n17)Footnote 17. *E.g.*, Forms S-2, S-3, S-8. *See* Note to Item 101(a) of Regulation S-T.

(n18)Footnote 18. Item 303(a)(1) of Regulation S-T.

CHAPTER 4A The SEC and Accounting Standards

1-4A Federal Securities Exchange Act of 1934

AUTHOR: Thomas I. Selling PhD, CPA Former SEC Academic Fellow and Associate Professor, Thunderbird, The Garvin School of International Management.

SUMMARY OF THIS CHAPTER

The determination of accounting standards in the United States is a function of cooperation between the Securities and Exchange Commission ("SEC" or "Commission") and the Financial Accounting Standards Board ("FASB"). In addition, professional bodies such as the American Institute of Certified Public Accountants ("AICPA"), large and small public accounting firms, SEC registrants, academics and even private litigants shape current accounting standards. Only with a genuine understanding of the (1) interaction among these rule-making bodies and (2) the resulting standards, can accountants fluently speak the language of business and fulfill their role in promoting efficient capital markets. Additionally, the above public and private domestic organizations have only recently begun the difficult task of breaking down barriers to effective and efficient financial communications with other countries, principally through the International Accounting Standards Board ("IASB"). The end result of these national and international financial accounting efforts should be an increase in the efficiency with which securities are priced over international markets.

Financial statements are a version of past and uncertain future events produced from accounting systems. From this perspective, it is little wonder that accounting is often referred to as "the language of business." The "grammar" of accounting is the logical rules by which accounting data is organized. Accounting policies determine where to apply that logic: which events to recognize, how to measure them in monetary terms, and how to present them in financial statements. Accounting is an analytical tool of enormous power when properly used; however, it does have its limitations. Ironically, accounting's biggest limitation is its very essence, namely, its focus on monetary phenomena. Accounting cannot measure all aspects of an entity's activity. However, accounting's ability to quantify a significant portion of an entity's overall activity is invaluable to the securities markets.

CHAPTER 4A The SEC and Accounting Standards

1-4A Federal Securities Exchange Act of 1934 § 4A.01

AUTHOR: Thomas I. Selling PhD, CPA Former SEC Academic Fellow and Associate Professor, Thunderbird, The Garvin School of International Management.

§ 4A.01 General Concepts of Accounting and Financial Statements

[1] Financial Disclosure and the Securities Markets

The markets for distribution of securities into public hands and the markets for continuous trading in outstanding securities, collectively referred to as the "securities markets," are said to be more or less efficient. A vital factor in their efficiency is the availability of timely, relevant, and accurate financial information. n1 In order to regulate the sale of securities in the national securities markets, the SEC requires issuers to disclose significant amounts of prescribed information, much of which is financial in nature. In fact, the SEC's stated objective is to assure the public availability in an efficient and reasonable manner and on a timely basis of reliable, firm-oriented information material to informed investment and corporate suffrage decision-makers. This goal, in a nutshell, is to make prices in securities markets more accurate, commonly referred to as "accuracy enhancement." n2 Thus, the more complete and accurate the information used by buyers and sellers in an efficient market, the more closely prices reflect underlying values and the more resources are allocated efficiently to uses that result in the highest benefit to society as a whole. Complete and accurate financial information is a key factor in this efficiency hypothesis.

The efficient market hypothesis is a description of the market as a whole and does not necessarily apply to individual securities or individual investors. The overall view is premised on the effort and skill of investors and their advisers in analyzing and using available information in an attempt to identify undervalued and overvalued securities.

"Accounting" is a specialized information service to periodically produce financial statements for an enterprise. In order to efficiently analyze and use the financial information available to the public, the individual investor or adviser must possess a working knowledge of accounting standards applicable to our securities markets. Advocates of the efficient market hypothesis contend that the market, as a whole, is quite sophisticated when interpreting accounting-based information, such as annual reports, quarterly reports, interim earnings, and dividend announcements. This level of sophistication--the ability to look past accounting changes that alter earnings but have no economic effect, the ability to recognize the effect of certain accounting assumptions and estimates, and the ability to assess the impact of managerial representations--is not widespread. In fact, certain investors and advisers will more effectively interpret available financial information, and act thereon, while others will not.

[2] Accounting Reports and Securities Valuation

The economics of investing in securities is premised on assessments of value. Value is, in turn, a function of subjective assessments of amount, uncertainty, and timing of *future* cash distributions from an issuer to its security holders. n3 The fundamental valuation task investment analysts undertake is to develop predictions of such future distributions. n4

These aforementioned cash distributions to security holders have as their source either: (1) return *of* invested capital, or (2) return *on* invested capital. The latter source is known as "earnings." Thus, a major part of the investment analysis task is the prediction of future earnings.

The primary purpose of financial reporting to investors and analysts is to provide information that will help them estimate the value of securities issued (or to be issued) by the firm. The utility of the information provided in financial reports is conditioned on the degree to which it is predictive of future events, reports recounts and/or summarizes past events, its usefulness to the investing community depends upon the degree to which this information is predictive of future events.

A large portion of financial reporting involves accounting information, which may be regarded as the information contained in financial statements and accompanying notes providing additional detail and explanations of accounting policies. Accounting information shares the general limitations of financial reporting, and is specifically limited in at least two significant respects:

1. They report earnings of past periods, not future periods.
2. The earnings reported are invariably not the economic earnings of the issuer. This is in large part due to the fact that the value of an enterprise may be seen to be the sum of the values of (1) its assets in place and (2) the value of its position to increase value via further asset investment. The relative proportions of these two components vary significantly across enterprises and time. Economic earnings for a period are a function the change in the value of the entity for the period. Our present systems of accounting fail to capture changes in value for many reasons, not least of which are the following:
 - a. Recognition--only assets that have been acquired in a past transaction and have highly probable future value are recognized.
 - b. Measurement--Assets are generally valued at lower of cost or net value to be realized through a hypothetical future sale. This is because objectivity and conservatism in asset valuation is generally preferred in practice to more subjective, yet more economically relevant market-based valuation.

The traditional reporting model centered around historical cost-based financial statements has been roundly criticized as lacking relevance for economic decision making. n5 One of the more obvious patterns of accounting standards to emerge over the past 15 years has been to move toward current value measurements of some assets and liabilities when current values can be determined with a high degree of reliability--such as marketable equity securities with a readily determinable market price--or when historic costs are not materially different from zero, but current values can be very significant--as with interest rate swap contracts and many other derivative financial instruments.

[3] Accounting Logic and Presentation of Financial Statements

[a] Balance Sheet and Financial Position

The starting point for accounting logic is the Fundamental Accounting Equation, stated for an entity as:

Assets = Claims

Where "assets" are economic resources at the disposal of the enterprise. n6

As mathematical expressions go, the Fundamental Accounting Equation is about as simple as it gets, yet its significance to accountants cannot be understated. It was first proposed by an Italian monk in a mathematical treatise over 500 years ago and has been universally accepted for centuries as the logical basis for accounting. The equation simply states that the total value of the claims on the assets of the business cannot be more or less than the total value of the assets--the two *must* be equal.

Before going further with accounting logic, a word of caution is in order. The irrefutable logic of the Fundamental Accounting Equation may lead one to regard accounting as a process whereby the whole truth about the financial position and performance of an enterprise is revealed. This is far from correct. Financial statements along with any accompanying notes should strive to be a *truthful* version of the past. But like any other version of past events, accounting cannot possibly capture the *whole* truth. The Fundamental Accounting Equation is better viewed as a constraint on the versions of the past that we may report in financial statements. In other words, it is a *requirement* that accounting information conforms to the Fundamental Accounting Equation, but this constraint, by itself, does not guarantee truth--or even truthfulness.

The Fundamental Accounting Equation is more commonly expressed as:

$$\text{Assets} = \text{Liabilities} + \text{Equities}$$

or equivalently

$$\text{Assets} - \text{Liabilities} = \text{Equities}$$

The purpose of expanding the claims component of the Fundamental Accounting Equation into two new components is to distinguish between two substantially different types of claims on assets:

- "Liabilities" are the creditors' claims on the assets of a business. For now, we may loosely think of them as contractual or legal claims on assets. Some of these claims may be for specific assets of the enterprise, but for the most part, they are general claims.
- In a business enterprise, "equities" are the ownership interests. They can arise in numerous ways, but are in essence a residual claim, usually seen to result from the legal precedence of creditors' claims on assets. This view is depicted by the second version of the above equation--the amount of assets that would remain after having settled all contractual claims.

[b] Recording Events and Preparing a Balance Sheet

Accountants record events seen to affect assets, liabilities and owners' equity in accounts. An account is simply a place where increases or decreases to a component of the Fundamental Accounting Equation are recorded. It could be a designated column of a worksheet, or a page in a book.

The balance of an account is the sum of the increases and decreases "posted" to the account. Exhibit 1 displays the accounts used by ABC Company in the form of worksheet columns, with their balances as of June 30, 2002. The collection of all the accounts comprising the components of the Fundamental Accounting Equation is called the general ledger.

1-4A Federal Securities Exchange Act of 1934 § 4A.01

Exhibit 1ABC Company Account Balances as of June 30, 20x2

Cash	Accounts Receivable	Supplies	Equipment	Accounts payable	Long-term Debt	Equity
8,000	10,000	1,500	8,000	1,500	-	26,000

This chapter will illustrate the basic procedures of recording transactions by considering the transactions taking place during the following month, July 20x2, for ABC Company:

1. Additional equity in the form of capital stock was issued for cash of \$5,000.
2. Cash of \$6,000 was collected from credit sales (i.e., accounts receivable) made during the previous year.
3. ABC company performed services for which they billed customers \$12,000. Of this amount, \$3,000 was paid in cash and \$9,000 was uncollected by the end of July.
4. Rent of \$1,000 was paid in cash, covering the use of the office space for the month.
5. No new supplies were purchased during the month, but \$1,200 was paid to suppliers in settlement of amounts owed them (i.e., accounts payable).
6. Dividends were paid to stockholders, totaling \$2,000 in cash.
7. Salaries to employees paid in cash were \$3,000.
8. \$10,000 was borrowed for ten years from a bank (a), and the entire proceeds of the loan were used to purchase additional equipment (b).
9. Depreciation on equipment was recorded in the amount of \$1,500.
10. A physical inventory of supplies taken at the end of the year indicates that \$900 of supplies remains. Therefore, \$300 of those supplies was used during the period.

In Exhibit 2, these events are recorded in the accounts. Recording transactions consistent with the accounting logic of the Fundamental Accounting Equation is sometimes called *double-entry bookkeeping*. This is because at least two accounts were affected by each transaction in order for the account balances to maintain the logic of the Fundamental Accounting Equation at all times.

Exhibit 2ABC Company Transactions for the Month Ended July 31, 20x2

Cash	Accounts Receiv- able	Supplies	Equipment	Accounts payable	Long-term Debt	Equity	
Bal., 6/30	8,000	10,000	1,500	8,000	1,500	-	26,000

7/31							

After each entry in the accounts, new balances have been calculated to illustrate that no event may be recognized in the accounts to cause the account balances taken as a whole to violate the logic of the Fundamental Accounting Equation. That is, each line of balances satisfies the Fundamental Accounting Equation (i.e., the sum of asset account balances equals the sum of equity account balances). A brief explanation of the accounting for each transaction follows:

1. The first transaction increases Cash, because cash was transferred from owners to the control of ABC Company. Owners' Equity is increased by the same amount, because investors' claim on the assets of the business has increased by the amount of their investment. Thus, the effect of the transaction is to increase both assets and equities by \$5,000.

2. Similar to the first entry we made, Cash has been increased. In this case, however, another asset was liquidated. ABC's claim to the cash of others has been settled, and is no longer a resource to the company. Thus, the increase to cash is offset by a decrease to Accounts Receivable. The effect of the transaction on the Fundamental Accounting Equation is to increase one asset account and to decrease another, resulting in no net effect on either total assets or total equities.

3. The assets Cash and Accounts Receivable are increased because they were acquired in exchange for providing services. Since ABC Company earned these assets, its owners claim them, and this is reflected in the accounts by increasing Owners' Equity. The effect on the Fundamental Accounting Equation is to

increase the assets Cash and Accounts Receivable, and to increase Owners' Equity by their sum.

4. Cash has been exchanged for services (the use of office space for one month). As this is a cost of doing business borne by the owners of ABC, Owners' Equity is decreased by the amount of cash paid.

5. Cash has been exchanged in settlement of a liability incurred for supplies purchased prior to 30[th] June. The effect on the Fundamental Accounting Equation is to decrease the asset Cash and to decrease the liability Accounts Payable.

6. Cash is decreased by the amount of the dividend, a transfer of cash from control of the ABC company to its owners. Owners' Equity is decreased by the same amount, because owners' claims on the assets of the business have decreased by the amount of the dividend they have received. Thus, the effect of the transaction is to decrease assets and owners' equity both by \$2,000.

7. Similar to #4, cash has been exchanged for services (in this instance, services of employees). As this is a cost of doing business that must be borne by the owners of ABC, Owners' Equity is decreased by the amount of cash paid.

8. The loan transaction (a) is accounted for by increasing Cash and increasing Long-Term Debt, a liability account. The acquisition of equipment decreases Cash and increases the Equipment (b). The net effect of the two transactions on the Fundamental Accounting Equation is to increase assets by the cost of the equipment purchased and to increase liabilities by the same amount.

9. Equity is decreased as a result of consumption of part of the service potential of an asset. The effect on the Fundamental Accounting Equation is to decrease Equipment and to decrease Owners' Equity.

10. In analyzing the effect on the Fundamental Accounting Equation, it may help to reconstruct the entries to the accounts that were made when the supplies were purchased. The Supplies account (an asset) was increased, and one of two other accounts were affected: either Cash was decreased, or a liability such as Accounts Payable was increased if the supplies had been purchased on credit. In either case, the actual use of the supplies in the current period will necessitate a decrease in Supplies for the cost of the supplies used during the year. Owners' Equity will also decrease from the consumption of the service potential of the supplies.

Exhibit 3 presents the original June 30th balance sheet along side the July 31st balance sheet derived from the latest ledger account balances. Comparative financial statements are common and enable a user to see how the financial position of the enterprise or other trends may be changing over time.

Exhibit 3ABC CompanyComparative Balance SheetsAs of June 30 and July 31, 20x2

[c] Reporting Changes in Financial Position**[i] The Statement of Cash Flows**

We have referred to the balance sheet as the "principle" financial statement of a business, because of its direct relationship to the Fundamental Accounting Equation. The other financial statements we will examine simply detail the changes in balance sheet amounts (i.e., changes in financial position) from one point in time to another. For example, the statement of cash flows in Exhibit 4 provides the detail of the change in cash for the month of July 2002. Note that the last line of the statement agrees with the difference between the two cash balances on the comparative balance sheets in Exhibit 4 (i.e., $6,800 = 14,800 - 8,000$).

Exhibit 4ABC Company Statement of Cash Flows For the Month Ended 31 July 20x2

Cash from (used in) operating activities

Collections from customers	\$	9,000
Payments to suppliers	(1,200)	
Payments for rent	(1,000)	
Payments for salaries	(3,000)	

Net cash from (used in) operating activities	\$	3,800

Cash from (used in) investing activities

Purchase of equipment	(10,000)	

Net cash from (used in) investing activities	\$	(10,000)

Cash from (used in) financing activities

Proceeds from issuing capital stock	5,000	
Proceeds from incurring long-term debt	10,000	
Payment of dividends	(2,000)	

Net cash from (used in) financing activities	\$	13,000

Net increase (decrease) in cash	\$ 6,800

It may appear that there is no real point to preparing a statement of cash flows if its "bottom line" can be so easily derived from comparing two balance sheets. But even if the final line of a statement of cash flows does not contain incremental information, knowledge of the components of the change does. To further add value to the components of cash flows, they are classified by their having resulted from operating, investing or financing events.

A fundamental distinction between the balance sheet and the statement of cash flows (or for that matter, any financial statement that reports changes in financial position) is that a balance sheet reports stocks and changes in financial position are flows.

- A balance sheet may be seen as a "snapshot" of assets and equities at a point in time. For example, the amount for cash on June 30, 20x2 is the stock of cash as of that date. The amount for long-term debt on July 31, 20x2 can be regarded as the stock of claims on the assets of the ABC Company that come due later than one year from this date. Since all the amounts on the balance sheet should be seen as stocks, balance sheets are dated as of a specific moment in time.

- The items on the statement of cash flows are, as the name of the statement implies, "flows" of cash over time. In fact, the change in any balance sheet category may be seen as a flow of some fund of resources or obligations. Since flows occur over an interval, or period, of time, the date reference on the statement of cash flows is an interval of time. In this case, that period is the month spanning the comparative balance sheets in Exhibit 3

[ii] The Income Statement

An income statement, like a statement of cash flows, describes flows in balance sheet amounts over a period of time. Unlike the statement of cash flows, however, the flows described by the income statement are not all of the flows occurring in a single balance sheet category (e.g. cash). Actually, the income statement summarizes a subset of equity flows occurring over a period of time. By referring to Exhibit 5 we can see that all changes in owners' equity of the ABC Company occurred as the result of four kinds of events. Two of these event types, "income" and "expenses", are reported as components of net income--i.e., profit--in the income statement:

1. Some person or enterprise will transfer the control of resources to the ABC Company, usually in exchange for some reason other than services rendered--usually for some form of equity interest. Transactions of this nature are often referred to as "capital contributions" (Transaction #1).
2. ABC Company sells products or services, usually (but not exclusively) in exchange for cash or the promise to pay cash in the future. These activities generate "revenue" (Transaction #3).
3. ABC sacrifices resources as part of the process of generating revenues. This class of events is known as "expenses" (Transactions #4, #7, #9, #10).
4. ABC distributes resources to its owners (e.g. capital stockholders, in the case of a corporation). The source of these distributions is seen to be from either (a) the earnings of ABC, or (b) a return of the capital stockholders' past investments. Corporations frequently distribute resources to equity holders in

the form of "dividends" (Transaction #6).

The first two of these general effects described above increase equity, and the second two decrease equity. Only the second and third--resulting from transactions with non-owners--are captured in an income statement. These relationships are depicted schematically in Exhibit 5. Exhibit 6 presents the July income statement for ABC Company.

CHAPTER 4A The SEC and Accounting Standards

1-4A Federal Securities Exchange Act of 1934 § 4A.02

AUTHOR: Thomas I. Selling PhD, CPA Former SEC Academic Fellow and Associate Professor, Thunderbird, The Garvin School of International Management.

§ 4A.02 Sources of Definitive Accounting Rules

[1] General

Accounting rules are not contained in one place, n1 and different sets of rules apply to different companies. For example:

- SEC accounting rules applicable to registrants under various securities laws do not apply in the same way to non-public companies.
- SEC registrants who qualify to be foreign private issuers n2 are allowed to prepare the primary financial statements filed with the Commission in accordance with a comprehensive body of GAAP other than U.S. GAAP. To assist U.S. investors in understanding the nature of the accounting differences and their effects on financial statements, foreign issuers are required to provide a reconciliation to U.S. GAAP. n3

Additionally, once found, accounting rules often allow several different forms of accounting treatment for the same economic event, and on occasion, remain silent with respect to the treatment of other transactions. It is particularly interesting, and controversial, that as a result of SEC policy the accounting profession itself has by and large set its own rules rather than having rules set for it by legislative or administrative bodies. n4

[a] Securities Law Administered by the SEC

One of the major deficiencies in U.S. capital markets noted by the Senate Banking and Commerce Committee prior to the passage of the Securities Act of 1933 ("Securities Act") was the high variance in the quality of financial statements used to sell securities. Financial statements frequently were misleading, lacked consistency and comparability. A significant concern was that misleading financial statements were a major contributor to overvalued stocks, which may have contributed to the Crash of 1929.

1-4A Federal Securities Exchange Act of 1934 § 4A.02

Section 19 of the 1933 Act, as amended, delegates to the SEC the power to make rules and regulations necessary to carry out the provisions of the Act, including the power to prescribe "the items or details to be shown in the balance sheet and earning statement, and the methods to be followed in the preparation of accounts..." for companies who file financial statements with the SEC. Thus, the SEC has long been the final authority on accounting principles used in the preparation of financial statements by public companies in the United States.

The provisions of Section 19 of the 1933 Act, giving the SEC the power to establish accounting rules are repeated in the Securities Exchange Act of 1934 (Exchange Act) in Section 13, which also requires public companies to file "periodic" and current reports with the SEC. Section 13 was amended in 1977 by the Foreign Corrupt Practices Act, which is intended to control questionable or illegal foreign payments by U.S. companies. Section 13(b)(2) of the Exchange Act requires that every company subject to the continuous reporting requirements of the Act shall (a) keep books, records, and accounts, which, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the issuer, and (b) maintain a system of internal accounting controls sufficient to provide reasonable assurances that financial statements are free from material misstatements.

Interstate holding companies engaged, through subsidiaries, in the electric utility business or in the retail distribution of natural or manufactured gas are subject to regulation under the Public Utility Holding Company Act (PUHCA).ⁿ⁵ The Securities Act and Exchange Act deal with the securities markets generally and are not able to address the special problems that arose in the public utilities industry.ⁿ⁶

Public utilities must register with the SEC and file initial and periodic reports. The accountant's function is to certify the financial statements and financial data within such reports.ⁿ⁷ Accountants need to pay attention to the Uniform System of Accounts for Public Utility Holding Companies and the Uniform System of Accounts for Mutual Service Companies and Subsidiary Companies. These systems, promulgated by the SEC, represent the only two instances where the SEC has dictated the detailed manner in which accounts shall be kept. Detailed information concerning the organization, financial structure, and operations of the holding company and its subsidiaries is contained in these reports. Thus, there has been a significant increase in non-utility subsidiaries and repeal has been suggested for a number of years premised on the belief that the work of PUHCA has been largely completed. In 2003, there were 28 registered public utility holding company systems, with 150 public utility subsidiaries.ⁿ⁸

The registration process under PUHCA requires disclosure of the company's operations including a description of its management structure. Unlike the Securities Act and the Exchange Act, the thrust of PUHCA is not limited to disclosure. In addition, the SEC has special accounting rules for regulated holding companies.ⁿ⁹ Interpretive releases relating to PUHCA are periodically issued by the SEC.ⁿ¹⁰

The Trust Indenture Act (TIA) applies to bonds, debentures, notes, and similar debt securities offered for public sale and issued under trust indentures with more than \$1 million of securities outstanding at any one time.ⁿ¹¹ The TIA, designed to safeguard the rights and interests of the purchasers, also imposes various informational and disclosure requirements. The TIA is aimed to fill gaps left by other securities acts concerning the relationship between the debt securities issuer and the indenture trustee.

Section 308 of the TIA provides for integration of the information requirements with those of the Securities Act and the Exchange Act, as well as with the PUHCA. This integration is facilitated by permitting incorporation by reference to filings under the other acts.ⁿ¹²

Activities of companies engaged primarily in investing, reinvesting, and trading securities, and whose own securities are offered to the investing public, are subject to certain statutory prohibitions and to SEC regulation under the Investment Company Act (ICA).ⁿ¹³ The ICA has numerous registration, disclosure, and anti-fraud provisions meant to protect the investing public by requiring information relating to the issuer's policies and activities. Since investment company securities must also be registered under the Securities Act, investment companies must file initial and periodic financial

reports. n14

The public accountant's function thereunder is to certify the required statements and schedules and to make periodic examinations of the securities in the custody of the company or in the custody of a member of a national securities exchange.

The Investment Advisers Act of 1940 (IAA) establishes a pattern for the regulation of investment advisers. n15 These investment advisers may be non-broker-dealers who are not regulated under the Exchange Act provisions. In some respects, the IAA has provisions similar to the Exchange Act provision which govern the conduct of brokers and dealers. With some exceptions, the IAA requires that persons or firms compensated for advising others about securities investment must register with the SEC, file periodic reports, and conform to statutory standards designed to protect investors. n16 Pursuant to Rule 206(4)-2 under the IAA, an independent public accountant is required to verify, at least annually, funds or securities in the custody of the investment adviser in which any of his or her clients have a beneficial interest. A related certificate, prepared by the accountant, is then promptly filed with the SEC following the examination.

[b] SEC Accounting Rules and Regulations

The SEC has historically delegated its responsibility to set accounting standards for public companies to private sector accountants. Beginning in 1938, the SEC affirmed its policy of looking to private standard setting bodies designated by the Council of the American Institute of Certified Public Accounts (AICPA) as being authoritative. Since late 1973, the body designated to establish accounting standards has been the Financial Accounting Standards Board. However, the Commission has not committed itself to blanket acceptance of FASB pronouncements. It reserves the option to not accept a pronouncement in a particular area--although such events have been rare. The Commission frequently uses its authority to address those areas of accounting where rules are not explicit and there is a need for interpretive guidance, or there is a need for an authoritative source of requirements. n17

The primary SEC activities on the accounting front, designed to achieve compliance with the accounting and financial disclosure requirements of the federal securities laws, include:

- rulemaking and interpretations that supplement private-sector accounting standards, implements financial disclosure requirements, and establishes independence criteria for accountants;
- the review and comment process for agency filings directed to improving disclosures in filings, identifying emerging accounting issues (which may result in rulemaking or private sector standard-setting), and identifying problems that may warrant enforcement actions;
- enforcement actions that impose sanctions and serve to deter improper financial reporting by enhancing the care with which registrants and their accountants analyze accounting issues; and
- oversight of private sector efforts, principally by the FASB and the PCAOB, which establish accounting and auditing standards designed to improve financial accounting and reporting and the quality of audit practice. n18

The SEC communicates its positions on accounting rules by various means, including Regulation S-X, Financial Reporting Releases (FRRs), Staff Accounting Bulletins (SABs), and Accounting and Auditing Enforcement Releases (AAERs).

[2] The Public Sector

[a] Regulation S-X

The SEC's principal accounting requirements are embodied in Regulation S-X, n19 which governs the form and content of financial statements required to be filed with it. n20

The provisions of Regulation S-X apply to:

- registration statements under the Securities Act of 1933;
- registration statements under Section 12, annual and other reports under Sections 13 or 15(d), and proxy and information statements under Section 14 of the Exchange Act;
- registration statements and annual reports filed under the Public Utility Holding Company Act of 1935; and
- registration statements and annual reports filed under the Investment Company Act of 1940.

Regulation S-X's articles are conveniently organized according to the subject matter in question:

- Article 1 concerns the overall application of Regulation S-X and contains two rules.
- Article 2 concerns the qualifications and reports of accountants and consists of six rules.
- Article 3, a lengthy and commonly referenced section, deals with the general instructions as to financial statements and contains 21 rules.
- Article 3A, entitled "Consolidated and Combined Financial Statements," contains five rules. The periods to be covered by financial statements are three fiscal years for audited statements of income and cash flow (Rules 3-02 and 3-04) and as of the end of two fiscal years for audited balance sheets (Rules 3-01 and 3-03). The requirement that income statements and statements of cash flow be provided for three years is to enable users and advisers to analyze and understand a company's results of operations for at least the two most recent fiscal years. To understand changes in operations for one year, information for the immediately preceding year is needed. Therefore, comparative information for three years is necessary to understand changes in operations for two years.
- Article 4, consisting of ten rules, addresses the presentation-related rules of general application. Article 4 of Regulation S-X contains the rules of general application, including such matters as form, order, and terminology (Rule 4-01); items not material (Rule 4-02); current assets and current liabilities (Rule 4-05); evidences of indebtedness (Rule 4-06); general notes to financial statements (Rule 4-08); and financial accounting and reporting for oil and gas producing activities (Rule 4-10). n21 Further, Rule 4-01(a) requires an issuer or registrant to furnish "such further material information as is necessary to make required statements, in light of the circumstances under which they are made, not misleading" in addition to information explicitly required in all statements filed with the SEC.
- Article 5 deals with commercial and industrial companies and contains only four rules.
- Article 6 deals with registered investment companies and consists of ten rules.
- Article 6A, comprised of five rules, concerns employee stock purchase, savings, and similar plans.

- Article 7, entitled "Insurance Companies," contains five rules.
- Article 9 concerns bank holding companies and consists of seven rules.
- Articles 10 and 11, dealing respectively with interim financial statements and pro-forma financial information, contain only a few rules. Article 10 of Regulation S-X that contains uniform instructions as to the form and content of interim financial statements and the rules governing the periods to be covered by financial statements in the quarterly report filed on Form 10-Q.
- Finally, Article 12 addresses the form and content of schedules and contains 30 detailed rules. n22

[b] Financial Reporting Releases

Prior to 1982 the SEC issued 307 Accounting Series Releases (ASRs). n23 These releases are opinions of the SEC or its Chief Accountant relating to major accounting and auditing questions or to administrative policy concerning financial statements and certain other material of importance to accountants. Some of the releases were announcements of proposals to adopt amendments to Regulation S-X, while other releases announced the adoption of amendments or enforcement actions. With Financial Reporting Release (FRR) No. 1, the SEC codified the relevant guidance on accounting and auditing matters contained in the approximately 200 non-enforcement ASRs issued since 1937. The Financial Reporting Codification (FRP) n24 has been periodically updated by new Financial Reporting Releases (FRR's). A topical index is also published and updated by new FRRs, or to delete prior ASRs or FRRs. As of May 2004, 73 FRR's have been issued.

[c] Staff Accounting Bulletins

In November of 1975, the SEC authorized the Division of Corporation Finance and the Office of the Chief Accountant to publish a series of Staff Accounting Bulletins (SABs). The purpose of the SABs is to make available to the public a compilation of certain existing staff interpretations and practices and provide a means by which new or revised interpretations and practices can be quickly and easily communicated to registrants and their advisers. Thus, the SABs should not only reduce the staff's workload by eliminating repetitious comments and inquiries, but should save registrants both time and money in the registration and reporting process. n25 The statements in the SABs are not rules or interpretations of the SEC nor do they bear the SEC's official approval.

A table of contents and index by subject matter and citation reference is published and periodically updated. The SABs may be referred to by the SEC and others either by their sequential number (as of December 31, 2004 the highest numbered SAB was No. 106) or by their alphanumeric designation in the topical index (e.g., SAB Topic 4B).

The SABs are not rules or interpretations of the SEC and do not carry the SEC's official approval. However, SABs are generally followed in practice and for all practical purposes, departure from their provisions should be regarded with substantially the same concern as departures from rules and regulations promulgated by the SEC. n26

[d] Accounting and Auditing Enforcement Releases

Accounting and Auditing Enforcement Releases (AAERs), a separate body of public information, announce SEC enforcement activities involving accountants and auditors. All of these public interest items should be referenced when evaluating accounting and auditing issues.

[3] The Private Sector

[a] The American Institute of Certified Public Accountants

The AICPA is a national organization whose numerous committees and publications have been extremely influential in the development of accounting principles, standards of auditing, and a code of ethics within the profession. Until relatively recently, the AICPA, in some respects, was analogous to the legal profession's American Bar Association. n27 However, the influence of the AICPA has gradually waned with the advents of the FASB in 1974 and PCAOB in 2002 as the principal private-sector rule maker for accounting and auditing respectively.

The AICPA has published definitive pronouncements on accounting principles since 1938. Primarily as a result of external pressures, the American Institute of Accountants (AIA), later to become the AICPA, created a committee in 1930 to cooperate with the New York Stock Exchange (NYSE) in creating standards for accounting procedures. The widespread growth in the activities of the NYSE had led to expanded ownership and trading activities by an underinformed public. This lack of information, coupled with the stock market crash of 1929, caused the accounting profession to become more involved in the concept of generally accepted accounting principles. Although the profession had made previous contributions toward creating uniform accounting standards prior to 1930, the creation of this committee was unique due to its recognition that complexities in business activities and in ownership dispersion required consistency in accounting measurements and in the selection of accounting procedures. This special committee recommended five rules to the NYSE which were later published as Accounting Research Bulletin (ARB) No. 1 of the Committee on Accounting Procedure.

The Committee on Accounting Procedure published 51 such bulletins until 1959, including Accounting Research Bulletin No. 43 which consolidated Bulletins No. 1-42. The Committee's method of operation came into question in the late 1950s as the need for research into accounting principles became obvious. The result thereof was the creation and succession of the Accounting Principles Board (APB) in order to promulgate principles, through opinions and interpretations, based primarily on the research of the Accounting Research Division (ARD). The ARD was charged to undertake extensive research, publish the results, and allow the APB to lead the discussions which would ensue concerning accounting principles and practices. The APB's authority was enforced primarily through prestige and Rule 203 of the AICPA's Code of Professional Ethics. Approval by the SEC of the APB's issuances gave additional legitimacy to its activities. During the APB's 14 years of existence, 31 opinions and four statements were issued. In reality, the APB acted independently and did not utilize the ARD and issued pronouncements in areas where little research had been done. Likewise, the ARD acted independently and often performed non-exhaustive research. In the end, the APB did not materially differ from its predecessor, the Committee on Accounting Procedure.

The AICPA's Accounting Standards Executive Committee (AcSEC) is the senior technical committee authorized to make public statements on behalf of the AICPA on financial accounting and reporting standards, and may do so without prior clearance of either the AICPA Council or Board of Directors. It was formed by the AICPA in 1973 and consists of fifteen members of the AICPA.

The AcSEC issues pronouncements, known as Statements of Position (SOPs), to guide preparers and auditors of financial statements and to influence the development of reporting and accounting standards in the direction that the AcSEC believes to be in the public interest.

The AcSEC also maintains liaisons and has established procedures for coordinating activities with the FASB and SEC. As of November 2002, the AICPA has agreed to focus on industry-specific accounting guidance and all SOPs are subject to clearance by the FASB.

[b] Financial Accounting Standards Board ("FASB")

In 1972, as a result of the conclusions of the Wheat Study Group, the Financial Accounting Standards Board (FASB) was formed. As a result of the FASB's statements and interpretations, users and advisers now have access to the most definitive standards of generally accepted accounting procedures concerning a broad area of topics. As of January 31, 2005, the FASB has issued 153 Statements on Financial Accounting Standards, n28 various Interpretations and

Technical Bulletins, and has devoted substantial resources towards developing a conceptual framework for financial accounting.

The FASB consists of seven full-time members with diverse backgrounds. This diversity is demonstrated by three members from public accounting, two from private industry, and one each from academia and government. The FASB is assisted by a staff of professionals who conduct research and work directly with the members. Although there is some controversy and disagreement as to its activities and pronouncements, the FASB continues to operate with the confidence of accounting practitioners, business organizations, the SEC, and most importantly, the public.

The authority of the FASB is buttressed by Rule 203 of the AICPA Code of Professional Ethics, which all members of the AICPA must observe. Rule 203 requires AICPA members to treat pronouncements of the FASB, as well as outstanding and effective pronouncements of its two predecessors, as generally accepted accounting principles.

[c] Emerging Issues Task Force of the FASB

The Emerging Issues Task Force (EITF) was formed in 1984 in response to the recommendations of the FASB's task force on timely financial reporting guidance. The EITF was designed to promulgate implementation guidance within the framework of existing authoritative literature to reduce diversity in practice on a timely basis by addressing narrow implementation, application, or other emerging issues that can be analyzed within existing GAAP.

Task Force members are drawn from a cross section of the FASB's constituencies, including auditors, preparers, and users of financial statements. The chief accountant or the deputy chief accountant of the SEC attends Task Force meetings regularly as an observer with the privilege of the floor. Similar privilege is granted to the chairman of the Accounting Standards Executive Committee (AcSEC). FASB Board members also attend EITF meetings and participate in the discussion.

A consensus on an EITF issue is reached if no more than three of the voting members present at the meeting object to a proposed position on an issue. Although FASB Board members do not vote on consensus at Task Force meetings, all consensus are subject to ratification by the FASB at an ensuing open public meeting of the Board. Consensus are ratified if no more than three Board members object.

EITF Abstracts is a summary of the proceedings of the Task Force and includes a separate abstract for each issue considered by the EITF since its inception, plus a topical index. Through 2004, the EITF has published nearly 500 abstracts, and has reported reaching a consensus on a vast majority of the issues it has published.

(n20)Footnote 20. Regulation S-X, together with the generally accepted accounting principles promulgated by the profession's standard-setting bodies, and opinions issued by the SEC as Accounting Series Releases ("ASRs") or Financial Reporting Releases ("FRRs"), govern the form and content of most of the financial statements filed with the SEC.

(n21)Footnote 21. *See Exch. Act Rel. No. 34-15108 (1978)*, in which the SEC announced the adoption of *17 C.F.R. § 210.3-18* governing the requirements for financial accounting and reporting practices for oil and gas activities. *See also Exch. Act Rel. No. 34-15416 (1978) and Exch. Act Rel. No. 34-16218 (1979).*

In Accounting Series Release No. 289 (1981), the SEC announced that it no longer considers reserve recognition accounting as a potential method of accounting in primary financial statements. Consequently, the FASB is planning to develop supplemental disclosures to cure the inadequacies of the full cost and successful efforts methods of accounting, the two historical-cost accounting methods currently permitted by Rule 3-18 for oil and gas producing companies. *See also Oil and Gas Accounting* (based on the 14th Annual Institute on Oil and Gas Accounting) (Matthew Bender & Co.).

(n22)Footnote 22. For a thorough review of Regulation S-X and its related rules, as well as the impact of SEC releases, see *Fed. Sec. L. Rep. (CCH) P 69,501 et seq.*

(n23)Footnote 23. ASRs are found in 17 C.F.R. Part 211, Subpart A, and may be obtained free of charge, if in stock, from the SEC's Publications Section in Washington, D.C. ASRs are also reproduced in Fed. Sec. L. Rep. (CCH) P 72,001 et seq.

(n24)Footnote 24. Exch. Act Rel. No. 34-18648, Fed. Sec. L. Rep. (CCH) P 72,401 (1982). Accounting and Auditing Enforcement Release (AAER) No. 1 includes a topical index to those ASRs not included in the financial reporting codification but that contain explanations of the SEC's views on accounting and auditing matters that have given rise to SEC enforcement actions. The topical index is intended to facilitate reference to the ASRs but is not a comprehensive representation of the SEC's views on these enforcement-related matters. In addition, the issuance of the topical index has no effect on the legal status of the ASRs to which it refers.

(n25)Footnote 25. 42nd Annual Report of the SEC, for fiscal year ending September 30, 1976, p. 32.

(n26)Footnote 26. SAB Nos. 1 through 38 have been superseded by SAB No. 40, Fed. Sec. L. Rep. (CCH) P 74,040 (January 23, 1981), that revises, updates, and codifies the material included therein. Additionally, in 1982, the SEC published SAB No. 46, a revised topical index collecting the effect of all actions to date on the SAB series. In 2003, the SEC published SAB No. 103 to once again update the codification and eliminate obsolete accounting guidance due to either the passage of time or superseding guidance from other sources.

(n27)Footnote 27. Wixon, Kell, and Bedford, Accountant's Handbook, p. 10 (5th ed. 1970).

(n28)Footnote 28. The FASB has recently begun a practice of issuing new standards on previously-addressed issues by issuing a revised version of a standard bearing the old number. For example, in December 2004, the FASB revised and re-titled Statement No. 123 from "Accounting for Stock-Based Compensation" to "Share-Based Payment."

(n29)Footnote 29. Rule 203 of the AICPA Code of Professional Ethics, concerning accounting principles, provides that a member shall not express an opinion that financial statements are presented in conformity with generally accepted accounting principles if such statements contain any departure from an accounting principle promulgated by the body designated by Council to establish such principles which has a material effect on the statements taken as a whole, unless the member can demonstrate that due to unusual circumstances, the financial statements would otherwise have been misleading. In such cases, his or her report must describe the departure, the approximate effects thereof, if practicable, and the reason why compliance with the principle would result in a misleading statements. 2 AICPA Code of Professional Ethics (CCH) (footnote omitted).

CHAPTER 4A The SEC and Accounting Standards

1-4A Federal Securities Exchange Act of 1934 § 4A.03

AUTHOR: Thomas I. Selling PhD, CPA Former SEC Academic Fellow and Associate Professor, Thunderbird, The Garvin School of International Management.

§ 4A.03 Generally Accepted Accounting Principles

Many commentators categorize Generally Accepted Accounting Principles ("GAAP") as follows:

1. *Assumptions pertaining to the business and its environment* include the separate entity, continuity, constant unit of measurement, and time period assumption
2. *Basic accounting principles* are concerned with the measurement of economic activity (e.g., the historic cost principle), the time when such measurements are made and recorded (e.g., the revenue principle and the matching principle), the disclosures surrounding those activities (e.g., the consistency principle), and the preparation and presentation of summarized economic activity in financial statements. Over time, however, the accounting profession has somewhat modified these principles as the role of accounting has expanded. The historic cost principle, for example, is a basic accounting principle whereby cost is the appropriate basis for initial accounting recognition and for an item's subsequent valuation. This theory, however, has been recently criticized in favor of a current value approach.
3. In combination, the first two categories, above, form the groundwork for development of, and are implemented by *accounting principles and procedures*, which are the detailed rules and methods for recording the monetary effects of specific types of transactions and events. Accounting principles are normally directed toward solutions that are objective, conservative, and verifiable. n1 The two basic categories of accounting principles are measurement and disclosure. Measurement principles are quantitative standards which determine the timing of initial recognition and measurement basis of items which enter the accounting cycle and affect the financial statements. Disclosure principles are qualitative features that complement measurement standards through explanation and expansion on accounting policies, contingencies, uncertainties and other information essential in the analytical process.

As already mentioned, GAAP is vast and comes from disparate sources. To resolve conflicts, the AICPA's Statement of Auditing Standards (SAS) No. 69 establishes a hierarchy of the sources of GAAP as follows:

- Category "A" consists of officially established and mandatory accounting principles such as FASB Statements of Financial Accounting Standards (Statements) and Interpretations, APB Opinions, and AICPA Accounting Research Bulletins (ARBs).
- Category "B" are preferable principles consisting of FASB Technical Bulletins and, if cleared by the FASB, AICPA Industry Audit and Accounting Guides (Guides) and AICPA Statements of Position (SOPs).
- Category "C", also preferable in nature, consists of AICPA Auditing Standards Board Practice Bulletins that have been cleared by the FASB and consensus positions of the FASB Emerging Issues Task Force (EITF).
- Category "D" widely recognized practices or pronouncements, includes AICPA accounting interpretations and implementation guides ("Qs and As") published by the FASB staff, and practices that are widely recognized and prevalent either generally or in the industry.

In the absence of the above established sources of GAAP, n2 other accounting literature may be considered. n3 This literature includes APB Statements, AICPA Issues Papers, Auditing Standards Board Practice Bulletins, FASB Statements of Financial Accounting Concepts, International Accounting Standards Committee Statements of International Accounting Standards, Governmental Accounting Standards Board Statements, Interpretations and Technical Bulletins, Technical Information Service Inquiries and Replies included in AICPA Technical Practice Aids, pronouncements of other professional associations or regulatory agencies, and accounting textbooks and articles.

FOOTNOTES:

(n1)Footnote 1. See APB Statement No. 4.

(n2)Footnote 2. See two FASB publications: *The Current Text* and *The Original Pronouncements*. *The Current Text* integrates all of the currently recognized standards of Category A in alphabetical order and it is the most efficient means of addressing a specific question. *The Original Pronouncements*, however, provide more detailed coverage of an issue.

(n3)Footnote 3. For a comprehensive review and analysis of current promulgated GAAP, see Williams, GAAP Guide: *A Comprehensive Restatement of Current Promulgated Generally Accepted Accounting Principles* (Harcourt Brace & Co.).

CHAPTER 4A The SEC and Accounting Standards

1-4A Federal Securities Exchange Act of 1934 § 4A.04

AUTHOR: Thomas I. Selling PhD, CPA Former SEC Academic Fellow and Associate Professor, Thunderbird, The Garvin School of International Management.

§ 4A.04 Overview of Specific Accounting Principles and Procedures

Two prevalent themes among the specific accounting rules are (1) operational assets (e.g., inventory, equipment) are measured in terms of past cash flows--so-called "historic cost", and (2) financial assets and liabilities (e.g., notes, debt, investments in securities) are measured in terms of future cash flows--so-called present value. In specific cases, there is often considerable debate as to implementation of the historic cost principle--for example which expenditures should constitute the historic cost of a particular asset. There are similar issues in respect to determination of present values.

Setting aside the sticky issues for a moment, these two themes establish that accounting for operating assets can be distinctly different than the accounting for financial assets and liabilities. As such, the distinction between operating and financial items is the high-level framework by which this section is organized. The rules governing presentation of the principle financial statements is covered first, followed by operating assets, and financial assets and liabilities. The section is concluded with a discussion of accounting rules related to business acquisitions.

[1] Principal Financial Statements and their Components

[a] Balance Sheet

The purpose of the balance sheet is to report the aggregate financial effect of transactions at a specified point in time. The format of a balance sheet is not specified by any technical pronouncement, rather it has become established as a matter of tradition and industry practices. Generally, two types of formats are used: the report form and the account form. In the report form, the balance sheet continues line-by-line from top to bottom. In the account form, the balance sheet appears in a balancing concept with assets on the left and liabilities and equity amounts on the right.

Assets, liabilities, and owners' equity are separated in the balance sheet so that important relationships can be shown and attention can be focused on significant subtotals. Tradition and practice have led to the classification of assets into current assets, long-term investments, property, plant, and equipment, intangible assets, and other assets. Liabilities are generally displayed in the order of payment: current liabilities, non-current liabilities, and other liabilities. Equity is ordinarily classified as capital stock, additional paid-in capital, donated capital, and retained earnings.

Assets and its subcategories--The term "assets" is defined as probable future economic benefits obtained or controlled by a particular entity as a result of past transactions or events. n1 The following three accounting characteristics must be present for an item to qualify as an asset: (1) the asset must provide probable economic benefit which enables it to provide future net cash inflows, (2) the entity is able to receive the benefit and restrict other entities' access to that benefit, and (3) the event which provides the entity with the right to the benefit has occurred. Assets have features that help identify them as exchangeable, legally enforceable, and have future economic benefit or service potential.

Current assets are cash and other assets or resources commonly identified as those which are reasonably expected to be realized in cash or sold or consumed during the normal operating cycle. n2 Current assets normally include cash and cash equivalents, n3 short-term investments, n4 receivables, inventories, and pre-paid expenses.

Long-term investments are those investments that are intended to be held for an extended period of time, longer than one operating cycle. n5 They normally include debt and equity securities, tangible assets not currently used in operations, and investments held in special funds.

Property, plant, and equipment are assets of a durable nature that are to be used in the production or sale of goods, sale of other assets, or rendering of services rather than being held for sale. These assets are disclosed with related accumulated depreciation or depletion. n6

Intangible assets are non-current, non-materialistic assets of an entity, the possession of which provides anticipated benefits to the owner. This asset can be disclosed net of accumulated amortization.

Other assets, not otherwise categorized by GAAP, include long-term pre-paid expenses, non-current receivables, and restricted cash.

Liabilities and its Subcategories--The term "liabilities" is defined as probable future sacrifices of economic benefits arising from present obligations of a particular entity to transfer assets or provide services to other entities in the future as a result of past transactions or events. n7 The following three accounting characteristics must be present for an item to qualify as a liability. A liability requires that the entity settle a present obligation by the probable future transfer of an asset on demand when a specified event occurs or at a particular date, the obligation cannot be avoided, and the event which obligates the entity has occurred. An entity will primarily incur liabilities as part of their ongoing economic activities in exchange for economic resources and services required to operate the business.

Current liabilities are those obligations whose liquidation is reasonably expected to require the use of existing resources properly classified as current assets. n8 Exceptions include debt expected to be refinanced through another long-term issue and debt that will be retired through the use of non-current assets.

Non-current liabilities are obligations that are not expected to be liquidated within the current operating cycle. The distinction between current and non-current liabilities generally rests upon both the ability of the entity to liquidate the obligation within the current operating cycle and its related intent.

Equity and its subcategories--The term "equity" is defined in terms of assets and liabilities; for if it were defined independently of these elements of the Fundamental Accounting Equation, the equation would be overspecified. Therefore, equity is the residual interest in the assets that remains after deducting its liabilities. In a business enterprise, the equity is the ownership interest. n9 Equity is increased by owners' investments and comprehensive income and is reduced by distributions to the owners and comprehensive loss. Comprehensive income is the change in equity of an entity during a period from transactions and other events and circumstances from non-owner sources. n10

Capital stock is the common or preferred stock issued at the par or stated value. Additional paid-in capital is the excess of par or stated value from the actual issue price. Additional capital from the entity's own stock transactions is

considered a separate category.

Donated capital is a category of donations of a non-cash variety from either stockholders or third parties.

Retained earnings is a category of accumulated earnings not distributed to the shareholders. It is normally classified as appropriated or unappropriated. Appropriated retained earnings is an amount of retained earnings not to be distributed to the stockholders as dividends. Unappropriated retained earnings are available to be distributed as dividends.

In June 1997, the FASB issued Statement No. 130ⁿ¹¹ requiring a balance sheet presentation of a new category of equity, which is usually labeled "accumulated other comprehensive income" to more prominently and clearly identify elements of "dirty surplus" in equity. The forgoing section on accounting logic and presentation of financial statements analyzed and demonstrated the linkages between (1) initial recognition and subsequent measurement of assets and liabilities, and (2) owners' equity. This analysis assumed what the FASB has termed a "clean surplus" relationship between the beginning and ending amount for owners equity; in non-technical terms, that all changes in owners' equity resulting from transactions with non-owners would be reported as a component of net income in the period in which the change to owners' equity was recorded. In a clean surplus system, net income is identical to "comprehensive income." In a dirty surplus system, "comprehensive income" (defined as the change in equity during a period from transactions with non-owners) is seen to consist of two additive components: net income and the dirty surplus created during the period, which is termed "other comprehensive income." Although a clean surplus relationship may be a desirable goal of a system of accounting rules, it is not the current reality of GAAP. The relationship between net income, dirty surplus and balance sheet accounts is depicted in Exhibit 8

[Click here to view image.](#)

The purpose of reporting comprehensive income is to present a measure of all changes in equity that result from recognized transactions and other economic events of the period other than transactions with owners in their capacity as owners. The FASB believes that the information provided by reporting comprehensive income should aid financial statement analysis, in large part because "dirty surplus" accounting policies have been permitted by the SEC for political expediency in furthering other objectives related to high-quality accounting standards. FAS 130 requires that an enterprise classify items of other comprehensive income for a period by their nature in a financial statement, and display Accumulated Other Comprehensive Income separately from retained earnings and additional paid-in capital in the equity section of the balance sheet.

There are currently four specific exceptions to the clean surplus relationship in GAAP:

1. Unrealized holding gains and losses on "marketable securities" designated as "available for sale" in accordance with SFAS 115.
2. Certain effects on owners' equity resulting from the translation of the foreign-currency-denominated financial statements to the reporting currency of the consolidated entity per SFAS 52.
3. Certain changes to net pension liabilities per SFAS 87.
4. Gains and losses on derivative financial instruments and certain foreign currency denominated non-derivative financial instruments designated to be part of a cash-flow hedging relationship per SFAS 133.

[b] Income Statement

The income statement, also referred to as the statement of income, statement of earnings, or statement of operations, summarizes the results of an entity's economic activities for a given accounting period. The purpose of the income statement, unlike the balance sheet, is to report the net income or loss for a defined period of time. Since the early 1960s, the income statement has been widely perceived by users and advisers as the most important of an entity's basic financial statements when forecasting future earnings performance. Even with renewed interest in the balance sheet by accounting rule makers, the income statement remains important due to an overriding concern with the measurement of income. Essentially, the income statement depicts revenues and gains realized less the expenses and losses incurred during a period.

Revenues are gross increases in assets or decreases in liabilities during a period from delivering goods, rendering services, or other activities constituting the entity's central operations. ⁿ¹² Expenses are gross decreases in assets or increases in liabilities during a period resulting from the delivery of goods, rendering of services, or other activities constituting the entity's central operations. ⁿ¹³

Gains are net increases in equity from peripheral transactions of an entity excluding revenues and investments by owners. Alternatively, losses are net decreases in equity from peripheral transactions of an entity excluding expenses and distributions to owners. ⁿ¹⁴ The accounting characteristics of gains and losses include a result from peripheral transactions and circumstances which may be beyond an entity's control, and which may be classified according to sources or as operating and non-operating.

The major components and items presented in the income statement are income from continuing operations, results from discontinued operations, extraordinary items, cumulative effect of a change in accounting principles, net income, and earnings per share.

[c] Statement of Cash Flows

The primary purpose of the statement of cash flows, formerly known as the statement of changes in financial position, the funds statement, and the statement of source and application of funds, is to provide information about an entity's cash receipts and cash payments during a period. ⁿ¹⁵ A secondary purpose of the statement of cash flows is to provide information about the entity's investing and financing activities during a period. For purposes of this statement, the term cash includes cash equivalents and foreign currency. Cash equivalents are any short-term highly liquid investments used as a temporary investment of idle cash. Additionally, the effects of transactions not resulting in the receipt of payment of cash are reported in a separate schedule.

The statement of cash flows is categorized into investing, financing, and operating activities. Investing activities include the acquisition and disposition of long-term productive assets or securities that are not considered cash equivalents. Investing activities also include the lending of money and the collection on loans. Financing activities include obtaining resources from and returning resources to the owners. Financing activities also include obtaining resources from creditors and repaying the amount borrowed. Operating activities include all transactions that are not investing and financing activities. Operating activities include delivering or producing goods for sale and providing services.

The operating activities section of the statement of cash flows can be presented under the direct or indirect method. The direct method illustrates the items that affected cash flow. The indirect method, the more widely used method of presentment, focuses on the difference between net income and cash flows.

In 1987, the FASB issued Statement No. 95, ⁿ¹⁶ which requires a statement of cash flows as part of a full set of financial statements in place of a statement of changes in financial position. Foreign operations must prepare a separate statement of cash flows and translate the statement to the reporting currency using the exchange rate then in effect when transactions affect cash took place or a weighted-average exchange rate if the result is substantially the same. The combined effect on the consolidated cash balance of holding foreign currencies during periods of exchange rate

fluctuation is reported as a separate item on the statement of cash flows.

[d] Statement of Changes in Other Stockholders' Equity

Article 3 of Regulation S-X requires, in addition to the forgoing financial statements "an analysis of the changes in each balance sheet caption of "other stockholders' equity" presented in the balance sheets or in a note or separate statement. Presentation takes the form of a reconciliation of the beginning balance to the ending balance for each period for which an income statement is required to be filed with all significant reconciling items described by appropriate captions. n17 Although most companies choose to provide reconciling information with respect to all categories of stockholders' equity, "other stockholders' equity" excludes the common stock caption. The requirement of FAS 130 to classify items of other comprehensive income by their nature in a financial statement is usually satisfied through inclusion in the statement of, or note on, changes in other stockholders' equity.

[2] Operating Assets and Related Expenses

[a] General Approach

Generally, operating assets are recorded in the financial statements under the historic cost principle. Historic exchange prices are used because they are objective and capable of being independently verified. According to many users and advisers, one limitation of the balance sheet is that most operating assets are reported at cost, which is less relevant than current values.

Historic cost-based measurements are inappropriate when an asset's carrying value overstates a particular measure of its future utility. The precise definition of impairment, depends in large part on the asset category in question, as does the procedure for recognition and measurement of the impairment.

The appropriate timing of expense recognition has been a matter of significant debate. In 1940, W.A. Paton and A.C. Littleton published *An Introduction to Corporate Accounting Standards*, n18 a comprehensive and eloquent defense of the historical cost convention. It also popularized the "matching principle," which places primary emphasis on the matching of costs with revenues, with assets and liabilities being dependent on the outcome of this matching. Once the decision is made as to which revenues and expenses to recognize in a period, the balance sheet is left with a residue of asset and liability balances, which may or may not fit the reasonable definitions of assets or liabilities.

Soon after its formation in 1973, the FASB issued Statement of Financial Accounting Standards (SFAS) 2, on accounting for research and development costs, and SFAS 5, on accounting for contingencies, which signaled the FASB's belief in the primacy of the "asset and liability view" over the traditional "revenue and expense view" inherent in Paton and Littleton's matching principle. Under the "asset and liability view," the definitions of assets and liabilities govern the recording of revenues and expenses, not the other way round, as under the "matching principle." The FASB believed that the better approach was to agree first on whether a transaction had created an asset or liability and then determine the amount of any revenue or expense. This "asset and liability view," which was to play a central role in the FASB's conceptual framework, was foreshadowed in these two early standards.

[b] Tangible Assets

[i] Property, Plant and Equipment

Property, plant and equipment (PP&E) provide an economic benefit to the entity for a number of future years. In addition to determination of the historic cost of acquisition, accounting policies for the allocation of historic cost to the periods in which a benefit from holding and using PP&E is needed. In circumstances indicating that the reported amount for an individual item and/or group of PP&E overstates the economic value--a condition known as "impairment"--recognition and measurement of the impaired is required.

Cost allocations of PP&E to benefited periods normally occur through depreciation, "...a system of accounting which aims to distribute the cost ... less salvage (if any), over the estimated useful life of the unit (which may be a group of assets) in a systematic and rational manner. *It is a process of allocation, not valuation.*" [italics supplied] n19 Several methods of depreciation are permissible, including straight-line, accelerated methods (such as declining balance or sum-of-the-years digits methods), and units of production methods.

The acquisition cost of an asset is normally the cash purchase price plus shipping and installation costs. Interest costs on borrowings are also capitalized when assets must require a period of time to get them ready for their intended use. Examples are assets that an enterprise constructs for its own use (such as facilities) and assets intended for sale or lease that are constructed as discrete projects (such as ships or real estate projects). n20

In 1995, the FASB issued Statement No. 121, n21 which required that long-lived assets and certain other assets to be held and used by an entity be reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. The basic approach to SFAS 121 was as follows:

1. Review for indicators that an asset is impaired. Indicators include significant decreases in market prices for similar assets, adverse changes to physical conditions or in the business environment in which the asset is being used.
2. Recognize an impairment *if* the sum of the undiscounted n22 future cash flows expected to be generated by a long-lived asset is less than the assets carrying value. Otherwise, no adjustment is required.
3. Reduce the carrying value of the asset to its fair value n23 and recognize an impairment loss on the income statement for the amount of the reduction. Future recoveries of fair value may not be recognized.

While fairly simple in concept, SFAS 121 proved to be extremely difficult to apply. SAB 100, issued in November 1999 provides clarification's on the SEC staff's views on restructuring and asset impairment charges. In October 2001, the FASB issued Statement No. 144 to address significant issues of implementation of impairment accounting and to accomplish other objectives discussed later in this chapter. Although Statement No. 121 was superseded by No. 144, the basic approach to recognition and measurement of impairment was retained in the new statement.

[ii] Inventory

The preparation of financial statements requires careful determination of an appropriate dollar amount for inventory. This amount is present as a current asset on the balance sheet and directly affects the cost of goods sold in the income statement.

Inventory is usually measured at "cost" or "market", whichever is lower. n24 ARB 43, ch. 4 sets forth general principles for determination of the cost of inventory acquired, permissible methods for determining cost flows out of the inventory account and into cost of goods sold on the income statement (analogous to depreciation of fixed assets), and general guidance for determining "market" values for inventory.

Cost of inventory is understood to mean acquisition and production costs. Production costs include both costs directly related to a product (e.g. materials and direct labor) and indirect costs (e.g. depreciation on the manufacturing portion of a company's building). In November 2004, the FASB issued Statement No. 151 n25 to require treatment of abnormal amounts of handling, shipping, re-working, spoilage and idle facility costs associated with production as current period expenses instead of inventory costs.

Transfers of cost out of inventory to cost of goods sold is problematic because individual items of inventory frequently are indistinguishable, but have been purchased over time at different prices. In these cases, management typically chooses a "cost flow assumption" such as first-in first-out, average, and last-in first-out.

GAAP for the measurement of inventories include APB Opinion No. 20, APB Opinion No. 28, APB Opinion No. 29, ARB No. 43, ARB No. 51, FASB Statement No. 2, FASB Statement No. 48, FASB Statement No. 49, FASB Statement No. 151, FASB Interpretation No. 1, and EITF 86-46.

[iii] Prepaid Expenses

Prepaid expenses n26 are identified as a current asset pursuant to ARB 43, ch. 3A, even though they are not current assets in the sense that they will be converted into cash. This is because if these costs were not paid in advance, they would require the use of current assets during the operating cycle. Prepaid expenses are to be amortized to expense on a ratable basis over the life of the asset.

Common examples of prepaid expense include insurance, rents, taxes, unused royalties, current paid advertising service not yet received, and operating supplies. However, it may not be said that all payments of cash in advance of anticipated future service or benefit (so-called "deferred costs") qualify for recognition on the balance sheet as an asset. For example:

- SOP 93-7 does not permit deferral of advertising costs beyond the date of the advertisement's first appearance. An exception is made for direct response advertising in limited circumstances.
- Companies consider deferral of pre-opening, start-up, or customer acquisition costs on the basis that these expenditures provide some future economic benefit. The SEC Staff has taken the position that deferral is generally not appropriate unless the costs are incremental and bear a direct relationship with future revenue. The staff has also raised questions regarding correlation between the amortization period of the deferred charge and the related revenue stream, and assessment of recoverability of the deferred charge. n27

[iv] Intangible Assets

Intangible assets have no physical substance and may be categorized as identifiable or unidentifiable. The latter is synonymous with the term "goodwill". Identifiable intangible assets may be further classified as definite- or indefinite-lived. Goodwill is also the principle example of an indefinite-lived intangible asset, but other cases can exist. For example, the license to operate a taxicab in New York City would presumably qualify. Note well that "indefinite" is not equivalent to infinite: no asset may be presumed to have an infinite life. Thus, in theory, at some point in the economic life of the license, its remaining period of benefit should become subject to reliable estimation.

Identifiable intangible assets may be acquired separately, but often are acquired as part of a business combination. In June 2001, the FASB issued Statement No. 141, "Business Combinations," which superseded APB Opinion No. 16 of the same title. Statement No. 141 requires recognition at fair value of all assets and liabilities acquired in a transaction meeting the definition of a business combination. The "pooling of interests" method of APB 16 is no longer permitted. n28

Assets to be separately recognized in a business combination include any intangible asset (1) arising from either contractual or other legal rights, and (2) which is separable from the combined entity. Common examples include trademarks, noncompetition agreements, customer lists, production backlog and franchise agreements. n29 Goodwill is recognized as the positive difference between the purchase price of the acquiree and the fair value of the identified net assets. These identified net assets consist of assets (both tangible and identified intangible), less recognized liabilities

assumed.

A significant practical effect of Statement No. 141 is to result in the recognition of goodwill in the vast majority of business combinations due to the elimination of the pooling of interests alternative.

The requirement of APB Opinion No. 17 to amortize goodwill over a period not to exceed 40 years has been eliminated, in large measure as part of a political bargain with some constituencies for the acceptance of the elimination of pooling of interests. In its place are the following requirements:

- Definite-lived intangibles are to be amortized over their economic lives.
- Indefinite-lived intangibles other than goodwill are not amortized until their economic lives become definite. Impairment must be assessed at least annually, and is measured as the excess of the carrying amount of the asset over its fair value.
- Goodwill is not subject to amortization, but is subject to an annual impairment test under Statement No. 142, which was issued in tandem with the aforementioned Statement No. 141. The goodwill impairment test, together with the impairment tests on PP&E in Statement No. 144, are some of the most multifaceted and prosaic aspects of GAAP pertaining to operating assets.

Assessing and measuring goodwill impairment involves a two-step procedure, with the operation of the second step contingent on the results of the first step, as in the following flowchart:

[Click here to view image.](#)

A reporting unit is roughly the same as a reportable business segment, but under certain circumstances may be a smaller unit of the entity. The "implied fair value of goodwill" is the amount of goodwill that would be recognized at the date impairment is being assessed under the supposition that the reporting unit had been purchased by the entity on that date. From a practical standpoint, Step 2, which is the costliest part of implementing the impairment test, can be avoided if the result of Step 1 is "Yes."

The logic of the two-step test retains the logic of the initial measurement of goodwill a residual. The procedure for measuring goodwill impairment proceeds along similar lines; a comparison is made between the book value of goodwill, which was originally calculated as a residual, and a hypothetical amount of the residual--supposing the reporting unit been acquired for its current fair value at the date on which impairment is being tested.

[c] Revenue from Sale of Goods or Services

[i] General Approach

The realization concept states that revenues are recognized when the earnings process is complete or virtually complete and revenue can be evidenced by the existence of an exchange transaction which has taken place. Statement of Financial Accounting Concepts No. 5, a source of GAAP below Category "D," is the only source of general revenue recognition guidance:

[Revenue recognition] involves considerations of two factors, (a) being realized or realizable and (b) being earned, with sometimes one and sometimes the other being the more important consideration. n30

In most transactions, both of the above conditions are satisfied at the time goods are delivered or services are performed. There are, however, frequent situations in which special guidance is available in U.S. GAAP. Publications of the SEC's

Division of Enforcement stress that questionable revenue recognition practices have long been an area of accounting abuse and fraud that is one of their greatest financial reporting concerns. In part to address these concerns, in 1989, the SEC issued SAB No. 101, which states that in order for the two criteria in SFAC No. 5 to be satisfied, four conditions must be met:

1. Persuasive evidence of an arrangement exists;
2. Delivery must have occurred or services been rendered;
3. The seller's price to the buyer is fixed or determinable; and
4. Collectibility is reasonably assured.

While these criteria are general, they provide guidance for revenue recognition relating to most traditional business models. For companies that do not employ traditional business models, such as e-commerce companies and companies with a large percentage of Internet transactions, however, SAB 101 provides additional guidance on these revenue recognition issues.

[ii] Long-term Construction

ARB 45 specifies the revenue recognition criteria and procedures for long-term construction-type contracts. It requires the use of the percentage-of-completion method if estimates of cost to complete a project and its stage of completion over time are reasonably estimable. Otherwise, the completed contract method is used. Under the percentage-of-completion method, the amount of revenue and cost recognized in a period is based on the proportion of total work performed during the accounting period. This may appear to violate the concept of realizability enunciated in SFAC No. 5, but two points are worth mentioning in support of percentage-of-completion:

- It results in a fairer presentation over time of the value created by a contractor if the criteria of reasonable estimation can be met.
- Most contracts or U.S. law give both parties to a construction contract enforceable rights. The contractor's activities may be seen as a sale or transfer of those rights as the contract progresses.

The completed contract method postpones revenue recognition and cost matching until the construction project is completed.

SOP 81-1 broadens the scope of long-term contracts to include, for example, the development and production of military and commercial aircraft, weapons delivery systems, space exploration hardware, and computer software and provides more detailed guidance for the application of the two revenue recognition alternatives mentioned above as well as the criteria for determining the applicable method.

[iii] Software Sales

Under U.S. GAAP, software revenue is not recognized until all of the following conditions exist:

- All significant production, modification or customization has been completed.
- There is an arrangement between buyer and seller, usually in the form of a signed contract, purchase order, or on-line authorization.

- Delivery has occurred.
- The fees of the seller are fixed or determinable.
- Collectibility is probable.

Instructions for implementation of these criteria are set forth in SOP 97-2, in which an attempt is also made to consider the many variations that can affect the elements of a sale--such as conditions for customer acceptance, payment and pricing terms, warranties and future service commitments, options for returns, and licensing arrangements.

[3] Financial Assets and Liabilities

It is an economic truth that all financial liabilities of an entity are financial assets of some other party (note that the converse is not true). Despite the frequent symmetry of some financial assets and all financial liabilities, accounting is usually not symmetrical for these contracts. Liabilities are generally measured on the balance sheet at the present value of the payments the entity is obligated to make. It is more difficult to offer a generalization for the measurement of financial assets, but the trend in accounting rules is toward increasing use of fair value measurements of financial assets.

[a] Cash and Receivables

The promulgated GAAP concerning accounting for cash is ARB 43, ch. 3. Cash consists of funds represented by actual coins and currency on hand or demand deposits available without restriction. It must be management's intention that the cash be available for current purposes. n31 It has become common to also include cash equivalents which are other forms of near-cash as well as demand deposits and liquid, short-term securities.

Accounts receivable, open accounts, or trade accounts are agreements by regular customers to pay for services rendered or merchandise obtained. Similar assets include notes receivable, trade acceptances, third-party instruments, and amounts due from officers, shareholders, employees, and affiliated companies. GAAP requires that these different classes of receivables be separately identified and presented at net realizable amounts.

While the accrual of anticipated returns, allowances, and discounts are usually not required, the recording of anticipated uncollectible amounts is almost always required. The matching principle requires an estimation of bad debt expenses through either the percentage-of-sales technique or aging-of-the-accounts method.

Transfers of Receivables

An entity can alter the timing of cash flows relating to its sales by pledging, assigning, or factoring its receivables. Proper disclosure must be made under all of these options, and additional accounting concerns arise when an entity decides to factor its receivables, either with or without recourse. n32

In 2000, the FASB issued Statement No. 140 n33 covering transfers of receivables, including securitizations. Sale accounting with concomitant recognition of a gain or loss is accorded to a transfer if the transferor has no continuing involvement with the transferred assets. Otherwise, the transaction is treated as a financing; the receivables remain on the balance of the entity and a liability is recognized for the proceeds.

Partial sale/financing accounting may occur, and is prevalent in securitization transactions. Sources of partial sale treatment include retained servicing of the receivable(s), transfer of a partial interest, or consideration other than cash is received by the transferor.

[b] Investments in Equity Securities

ARB 43 required that all investments in securities would be carried on the balance sheet at historical cost, subject to a write-down for impairment. In 1975, FASB issued Statement No. 12, on accounting for marketable securities, which requires that many categories of securities be carried at their cost or market, whichever is lower (commonly referred to as "lower of cost or market", or LOCOM). Unrealized holding gains and losses on marketable equity securities classified as current were taken into earnings, but that such gains and losses on marketable equity securities classified as noncurrent be included in the shareholders' equity section in the balance sheet. This SFAS, which was approved by a 5-2 vote, revealed the board's reluctance to reflect upward revaluations of assets in earnings, even though the price of the securities was readily available in the market.

In 1993, the FASB issued Statement No. 115, n34 to address the accounting for investments in equity securities that have readily determinable fair values and all investments in debt securities. Investments outside the scope of FAS 115 continue to be accounted for in accordance with ARB 43. Although the SEC argued strongly for fair value accounting, with all gains and losses taken to earnings, the banking industry vociferously opposed this solution because of the resulting volatility in their earnings from year to year. A 'political' compromise was thus forced on the Board.

Equity securities within the scope of SFAS 115 may be freely classified by management as either "trading" or "available for sale." n35

Securities classified as available-for-sale securities are reported at fair value, with unrealized gains and losses excluded from earnings and reported with its tax effect as other comprehensive income. Upon sale, realized gains and losses are reported in earnings. Dividends are also included in earnings as received. Securities classified as trading securities are reported at fair value with unrealized gains and losses included in earnings. Dividends should also be included in earnings.

[c] Investments in Debt Securities

The accounting for investments in debt securities falls under SFAS 115 and is similar to the accounting in equity securities with one notable difference: debt securities may be classified as "held to maturity" in addition to the trading and available-for-sale categories applicable to equity securities within the scope of SFAS 115. If classified as available for sale, debt securities are measured at "amortized cost", meaning that any difference between cost to acquire the investment and principal amount of the debt is amortized to income over the time interval starting at date of investment and ending at maturity of the debt instrument. The "held to maturity" category was created by the FASB as a compromise to regulated financial institutions such as banks and insurance companies, whose equity and earnings would become highly volatile if their debt portfolios were "marked to market."

Debt securities may be classified as held-to-maturity based on management's positive intent and ability to hold to maturity, which is distinct from the mere absence of an intent to sell. The SEC staff has maintained that sale prior to maturity will taint management's intent for all debt securities held, and will disallow continuation of the use of the held to maturity category by the company for a period of time thereafter.

[d] Equity Investments Resulting in Significant Influence or Joint Control

APB 18 requires that investments in which the investor holds significant influence (but not control) is to be accounted for under the "equity method". In the absence of evidence to the contrary, significant influence is deemed to exist if the investor holds 20-50 percent of the voting shares. APB 18 further states that the equity method is an extension of the consolidation concept (rather than an accrual method of accounting for investments), with the implication that net income will not differ whether an investment is accounted for under the equity method or is consolidated. Subsequent to the acquisition of an investment to be account for under the equity method, the carrying value of the investment changes in the same manner as the owners' equity of the investee: the investment is increased by (the investor's share of) earning,

and decreased by (the investor's share of) dividends.

Frequently, the substantive difference between significant influence and control is small, yet the account result can vary significantly. A consolidated balance sheet will combine the assets of the investor with its proportionate share of the assets of the investee, with the same treatment for liabilities. However, the equity method permits presentation of the investor's share in the assets and liabilities of the investee as one net asset. For example, \$1,000 of assets and \$900 of liabilities will be presented under the equity method as one net asset of \$100, with the effect of hiding the liabilities. For this reason the equity method is considered one of the more common forms of accounting techniques resulting in "off-balance sheet financing."

In order to prevent the equity method from misleading investors regarding the underlying capital structure of a registrant and the sources of its earnings, Rule 4-08(g) of Regulation S-X requires presentation in the notes to the financial statements of summarized balance sheet and income statement information of equity method investees if significant. n36

[e] Investments Requiring Consolidation

ARB No. 51 requires a company to consolidate its financial statements with other entities under its control. Prior to the issuance of FASB Statement No. 141, a consolidation would be effected by either a "pooling of interests" or as a "purchase", depending upon the specific facts and circumstances. A series of restrictive criteria were to be satisfied for a combination to be considered as a pooling of interests. Subsequent to Statement No. 141, all business combinations are considered purchases.

To account for a business acquired, the combined entity reports the assets and liabilities of the target company at fair market value on the date of acquisition. In this process, it may be necessary to recognize assets that were not recognized by the target on its own books, for example, internally developed patents.

Any excess of the fair market of the consideration given over the fair market value of the net assets acquired is reported as goodwill. If there is a deficit, however, the resulting "negative goodwill" is not recognized on the balance, but reported as an extraordinary gain on the income statement. The operating statements for purchase method combinations report combined results only for the period subsequent to the combination.

Regulation S-X, Rule 3-05 governs financial statements of acquired businesses and generally requires an entity to possess complete audited financial statements for a significant target company before it may make a public offering of securities.

In 1989, the SEC issued SAB No. 84, which updated the guidance in SAB No. 51 concerning the ownership of a subsidiary. Under the bulletin, when a parent's percentage ownership of a subsidiary's stock changes due to a sale of some of the stock, the SEC will permit the amount in excess of the parent's carrying value to be reflected as a gain in the consolidated income of the parent provided that the sale is not part of a contemplated broader corporate reorganization.

In 1987, the FASB issued Statement No. 94, n37 which requires the full consolidation of all majority-owned subsidiaries. The statement was aimed at alleviating off-balance-sheet financing. The statement does not require the consolidation of a subsidiary if control is temporary or such control is not possessed by the majority owner.

In 1986, the SEC revised Rule 3A-02 of Regulation S-X concerning the use of consolidated financial statements for a company and its subsidiaries. Under the amendment, the entity and its accountant must evaluate the facts and circumstances to determine whether a company is a controlled subsidiary and must adopt a consolidation policy that clearly reflects the financial position and results of operations of both entities.

In 1985, FASB issued a technical bulletin concerning the proper accounting for the effect of a target company's reacquisition of shares in a "greenmail" transaction. n38 The bulletin requires a target company purchasing its own stock from a corporate raider at a price significantly higher than the current market price of those shares to expense the excess. This treatment will result in a charge to current operations, which will reduce net income, earnings per share, retained earnings, and shareholder's equity.

[i] Translating the Financial Statements of Foreign Subsidiaries and Affiliates

A significant problem for a multinational company is how to present its financial statements on a consolidated basis when one or more of its foreign subsidiaries maintain accounting records that are based in a foreign currency. In 1981, the FASB Issued Statement No. 52, n39 superseding Statement No. 8, which was arguably the most controversial pronouncement of the FASB in its early years. FAS 52 provides considerable latitude to multinationals for translating the financial statements of their foreign subsidiaries.

In order to combine the financial statements of foreign subsidiaries with a parent company, the financial statements of the subsidiaries must first be translated into the reporting currency of the parent. To facilitate the translation process, two key translation method issues must be resolved:

- Which assets and liabilities should be translated at the exchange rate existing at the balance sheet date (i.e., the *current* rate) versus the rates existing when the assets and liabilities were originally measured for financial statement purposes (i.e., *historical* rates)?
- How should variances in the value of translated assets and liabilities (i.e. the effects of differences between the current and historical rates) be characterized on financial statements: as gains and losses on the income statement, or as some component of shareholders' equity on the balance sheet?

SFAS No. 52 provides for two methods of foreign currency translation, depending on the circumstances faced by a company: the "temporal" method and the "current rate" method. Under the current rate method, all assets and liabilities are translated at the current exchange rate--i.e. the rate in effect at the balance sheet date. If the all-current method is used, translation gains and losses must be excluded from income and instead reported on the balance sheet as a component of accumulated other comprehensive income; and, all income statement events must be translated at the rate that prevailed when the revenue or expense was recognized. This rate can be approximated by using the weighted average exchange rate for the period.

All income statement events and balance sheet items can be quantified either in terms of past transactions (e.g., inventory, plant and equipment, common stock, depreciation, cost of goods sold) or in terms of future transactions (e.g., cash, receivables, short-term payables). Under the temporal method of translating foreign financial statements, items quantified in terms of future events are translated at the current exchange rate, whereas items quantified in terms of past events are translated at historical rates. This approach preserves existing accounting logic which argues that if it is proper to quantify an item in relation to its historic cost, it would also seem proper to quantify that item at the exchange rate that existed when the past event took place. SFAS No. 52 also specifies that if the temporal method is used, immediate recognition of translation gains and losses on the income statement is mandatory.

SFAS No. 52 introduced the concept of the "functional currency", the currency of the primary environment in which the entity operates, to determine the appropriate method of translation--and hence the appropriate recognition of foreign currency translation gains, losses and adjustments. In most cases, the functional currency will either be the local currency of the foreign subsidiary or the U.S. dollar.

Management must designate a functional currency for each foreign subsidiary, using the criteria suggested in SFAS No. 52. If the functional currency is determined to be the "local" currency of the subsidiary, the temporal method is used,

and gains or losses resulting from translation are included in income for the period. If the functional currency of the foreign subsidiary is determined by management to be the "reporting" currency (i.e. the U.S. dollar for US-based multinationals), the current rate method is applied; translation gains or losses are not recognized in the income statement, but are included in shareholders' equity as a component of accumulated other comprehensive income.

In general, the criteria for selecting a company's functional currency establish whether or not the foreign subsidiary is an independent, cash-generating center; if it is, then the local currency is considered the functional currency. In coming to this determination, the following factors must be weighed:

- The degree to which cash flows related to the foreign entity's individual assets and liabilities are in the foreign currency or affect the parent's cash flows.
- The responsiveness of sales prices of the foreign entity's products on a short-term basis to changes in exchange rates.
- The existence of an active local market for the foreign entity's product, even though there may be significant amounts of exports.
- Whether labor, materials and other costs for the foreign entity's products are incurred locally or elsewhere.
- The denomination of debt and the extent to which funds generated by the foreign entity's operations are sufficient to service existing and normally expected debt obligations; and,
- The volume of intercompany transactions and the extent of the interrelationship between the operations of the foreign entity and the parent company.

These criteria seek to assess the degree to which the exposure of cash flows from the foreign subsidiary to the parent are a principal source of foreign business risk for the parent. If so, the accounting exposure represented by the temporal method with immediate recognition of translation gains and losses would more closely match the economics of a situation wherein the foreign subsidiary was not an independent generator of cash. The rationale underlying the all current method is that it is merely an arithmetic procedure for restating the financial statements of the foreign subsidiaries, and any gain or loss has no economic interpretation; it is merely a residual of a mechanical arithmetic procedure.

[iii] Variable Interest Entities

Under GAAP (ARB No. 51), a company must consolidate any entity in which it has a "controlling financial interest", which in many circumstances is taken to be ownership of more than 50 percent of the entity's voting interests. The broad applicability of this approach has been called into question over the last two decades by financial arrangements that have created entities controlled by means other than voting shares--often referred to as "special purpose entities." The longstanding politically charged debates over criteria for consolidation of SPEs came to a highly-publicized head as it became known that Enron made liberal use of SPE structures to hide debt and manipulate earnings.

In December 2003, the FASB Issued Interpretation No. 46(R) n40 (superseding FIN 46 issued the previous January. It defines when a company should base controlling financial interest on factors other than voting rights. Entities falling under the scope are termed "variable interest entities" (VIEs) and have at least one of the following characteristics:

- Thinly capitalized--Residual equity holders have not provided a sufficient amount of equity necessary to support the entity's operations. If this is not the case, any voting power legally attributed to

these equity holders is irrelevant in determining who should consolidate the entity.

- Residual equity holders do not control the entity--This runs counter to conventional economic thinking, which suggests that the holder of an entity's residual equity should be in a position to control its destiny.

- Equity holders do not participate fully in an entity's residual economics-- Conventional economic thinking suggests that residual equity holders should enjoy the rewards and be exposed to the risks of owning an entity. This is not the case when contractual arrangements shield equity holders from losses associated with the entity's predominant risks, or when such arrangements cap the return on equity or allow these returns to be shared with other parties.

- Voting interests non-substantive--this is an anti-abuse clause which prevents the sponsor of an entity from structuring or organizing it in a way that allows the sponsor to avoid consolidation under the voting interest model.

Under FIN 46(R), the party exposed to the majority of the risks and rewards associated with the VIE is named its primary beneficiary and must consolidate the entity. The FASB introduced the terms *expected losses* and *expected residual returns* to measure participation in an entity's economic performance in the determination of the party holding the majority of the risks and rewards. These terms relate to statistical concepts that measure deviation from expected results. Expected losses represent negative variance from expected results; they do not represent actual GAAP losses incurred by an entity. Expected residual returns, by contrast, represent the positive variability vis-a-vis expected results and not actual GAAP gains.

[f] Loans

In 1993, the FASB issued Statement No. 114 n41 which addresses the accounting by creditors for impairment of certain loans and amends FASB Statement No. 5, Accounting for Contingencies. n42 A loan is impaired when, based on current information and events, it is probable that a creditor will be unable to collect all amounts due according to the contractual terms of the loan agreement. All amounts due according to the contractual terms means that both the contractual interest payments and contractual principal payments of a loan will be collected as scheduled in the loan agreement in terms of timing and amount.. It also provides that impaired loans within its scope should be measured based on the present value of currently expected future cash flows discounted at the loan's effective interest rate at inception. The effective interest rate of a fixed-rate loan is the rate of return implicit in the loan at inception (i.e., the contractual interest rate adjusted for any net deferred loan fees or costs, premium, or discount existing at the origination or acquisition of the loan).

FAS 114 does not specify how a creditor should identify loans that are to be evaluated for collectibility. In July 2001, the SEC issued SAB 102 to address its concerns that financial institutions are overestimating future loan losses as a device for cushioning the financial statement impact of unforeseen losses. SAB 102 expresses certain of the staff's views on the development, documentation, and application of a systematic methodology as required by Financial Reporting Release No. 28 for determining allowances for loan and lease losses in accordance with Generally Accepted Accounting Principles. In particular, the guidance focuses on the documentation the staff normally would expect registrants to prepare and maintain in support of their allowances for loan losses.

[g] Debt

Long-term debt represents future sacrifices of economic benefits to be repaid over a period of more than one year. Examples of long-term debt include bonds payable, notes payable, lease obligations, pension and deferred compensation plan obligations, deferred income taxes, and unearned revenue. The proper valuation of long-term debt is

the present value of future payments using the market rate of interest, either stated or implied, at the date the debt was incurred.

An issue of recent concern is the use of off-balance-sheet financing. This practice arises when funds borrowed to finance operations or capital projects do not appear on the entity's balance sheet, thus understating the entity's debt as disclosed in the debt-equity ratio. Debt is kept off the balance sheets by creating and utilizing separate trusts, entering into special contracts, and selling receivables.

Troubled debt restructurings are also a topic of continuing interest. Such restructurings arise where the creditor, for economic or legal reasons related to the debtor's financial difficulties, grants the debtor a concession that would not otherwise be given. Not all concessions constitute troubled debt restructurings. These situations can occur by either a settlement of a debt for less than the carrying amount or a continuation of the debt with modified terms.

[h] Pensions and Other Post-Employment Benefits

The accounting concept underlying post employments benefits is that an employer's promise to provide employees with postemployment benefits represents a form of deferred compensation; the cost of those benefits should be recognized systematically over employees' service periods. GAAP for an employer's accounting for post-employment benefits center on the determination of annual cost, and the presentation of an appropriate amount of liability in the balance sheet. When setting rules in this area, the FASB has utilized techniques to delay recognition of some expenses and liabilities, net costs against income from trust funds, and offsetting liabilities with the assets of trust funds.

The two broad categories of pension plans are defined-contribution and defined-benefit plans. Under a defined contribution plan, the employer agrees to contribute an amount to a pension fund, and the actual benefits employees receives depends on the amount contributed to the plan, and the financial return on pension fund assets. Under a defined benefit plan, the employer agrees to make pension payments to employees during retirement using a benefits formula based on wages earned and number of years of employment. There may or may not be a requirement to pre-fund employee pension benefits, although there usually as--at least in the United States, where the pre-funding decisions are heavily tax driven. Taxes aside, however, the economics of these two plans differ in respect to risk bearing: for a defined contribution plan, the employee bears the risk of return on assets, and the opposite holds true for a defined benefit plan.

As a general rule, pension and other employee benefits expense is attributed to periods in which the employee provides benefits. FASB Statement No. 87 is the principal standard under which expenses and obligations under pension plans are reported. FASB Statement No. 106 covers all other post-retirement benefits.

[i] Defined Contribution Pension

The accounting for defined contribution pension plans is straightforward: pension expense for a period is the amount of contributions employers are required to make as a result of the employee having worked during the period.

[ii] Defined Benefit Pension Plans

Firms must calculate net pension expense each year based on changes in the projected benefits obligation, which means that actuarial calculations of the pension obligation's present value use accumulated service to date and projected future salaries. There are six elements of periodic pension cost. The first three are recognized in the period in which they are incurred, and the last three are recognized on a delayed basis. To delay recognition of any element of pension expense is counterintuitive, but the volatility that would have resulted in the measurement of pension expense was unacceptable to some constituencies of the FASB, who threatened to withhold their support for SFAS 87, without delayed recognition of some costs. The six elements of periodic pension cost are as follows:

1. Service cost--the increase in the projected benefits obligation (PBO) because employees work an additional period of time. The effect is to increase pension cost for a period.
2. Interest cost--the increase in the projected benefit obligation because of the passage of time. The effect is to increase pension cost for a period.
3. Expected return on plan assets--the expected change in the market value of plan assets due to interest, dividends and changes in the market value of investments. The effect is to decrease pension cost for a period.
4. Amortization of the unrecognized transition net pension asset or liability at the date of adoption of SFAS 87. The net pension asset or liability is the PBO less the fair value of assets in the pension fund. The net amount is amortized straight line over the average remaining service life of employees.
5. Amortization of increased in the PBO arising from enhancement of benefits (sweetening) the pension benefit formula. The amortization is generally the average remaining service life of employees.
6. Amortization of excess gains and losses because actual experience differs from actuarial assumptions (e.g., salary, interest rate, employee turnover, mortality asset returns). The minimum amount subject to amortization is equal to the portion of the accumulated actuarial gain/loss exceeding 10% of the PBO or the fair value of plan assets. The amortization period is generally the average remaining service life of employees.

Even though some elements of pension cost may be recognized on a delayed basis, FASB Statement No. 87 requires measurement of a minimum pension liability on the balance sheet for any plan (many firms maintain separate pension plans for each of the various groups of employees). The minimum pension liability is the amount by which the accumulated benefit obligation exceeds the fair value of pension plan assets. The accumulated benefit obligation bases its measure of the pension obligation on accumulated service without any projections of salary increases. In recognizing the minimum pension liability, an intangible asset may be recognized up to the amount of any unrecognized prior service cost on plans with underfunded accumulated benefit obligations; the remaining amount of any incremental liability recognized decreases accumulated other comprehensive income and is reported in accordance with FASB Statement No. 130.

[iii] Retirement Benefits Other Than Pensions

In 1990, the FASB issued Statement No. 106, n43 which sets forth accrual-based rules for employers who provide retirement benefits other than pensions. A primary example of such benefits is retiree healthcare costs. While the accounting for such benefits is highly similar to pensions, the economics and tax treatments of the two plans create some important differences. First, estimates of the present value of the benefit to be paid can be significantly less reliable. For example, future costs of healthcare services defy confident prediction as does the future role of government in healthcare for covered individuals. Second, tax law provides little or no incentive to pre-fund post-retirement benefits other than pensions, so most plans are underfunded. Third, many plans leave open the option for the companies to curtail benefits at any time without permission of employees or retirees.

[i] Derivative Financial Instruments and Hedging Activities

Firms incur various risks when carrying out their business operations, some of which may be mitigated by insurance and others by derivative financial instruments. A derivative financial instrument ("derivative") is generally understood to be a certain kind of financial instrument. Its value at expiration is derived through mathematical combination of an

"underlying", (common examples of which are stock prices, spot commodity prices, interest rates on a specific type of loan, and spot foreign exchange rates) and a "notional" amount of the underlying (e.g., hypothetical shares of stock, bushels of wheat, principal of the loan, units of currency). Common examples of freestanding derivative contracts include commodity and foreign currency forward exchange contracts ("forwards"); options to purchase ("calls") or sell ("puts") commodities, stocks, foreign currencies; and interest rate swaps, which are complex variations of forward contracts.

One significant problem in developing accounting standards for derivatives is that many contracts have embedded derivative elements. For example, a lease contract granting the lessee the option to purchase the leased property for a predetermined price at the end of the lease term contains an embedded call option. Any agreement to purchase a good for future delivery can be construed as a forward exchange contract. In 1998, The FASB issued SFAS No. 133, n44 the first comprehensive standard on derivative financial instruments further specifies that derivatives within its scope are: (1) entered into with little or no initial investment relative to the fair value of the underlying, and (2) the terms of the derivatives contract permit net cash settlement--in contrast to requiring physical delivery of the underlying by one party to satisfy their settlement obligation.

The other significant problem in accounting for derivatives is that management frequently enters into derivative contracts to reduce economic risk of an existing asset, liability or future transaction. Hedge accounting refers to methods that either (1) defer all or some of the gains or losses in the fair value of hedging instruments (usually derivatives), (2) or accelerate all or some of the gains or losses in the fair value of a hedged item to achieve offset with the gain/loss on the derivative. In essence, hedge accounting involves some kind of departure from another provision of GAAP with the objective of smoothing reported income.

The need for additional rules to smooth income arises from two different sources:

- *Measurement inconsistencies* potentially addressed by hedge accounting arise from differences in the bases of measurement applied to hedged items and hedging instruments. For example, the value of wheat held by a company for future sale creates exposure to fluctuations in the market price of wheat. A hedging instrument such as a futures or options contract is measured at fair value. The wheat itself being held in inventory is usually measured at lower of cost or market. A hedge accounting solution would alter the accounting for either the hedged item or the hedging instrument in order to match the gain or loss on one to the period in which any gain or loss on the other is recognized.
- *Recognition inconsistencies* potentially addressed by hedge accounting arise when the hedged item is not recognized, or does not even come into being, until after the hedging instrument is acquired. Without some form of hedge accounting, changes in the value of the hedging instrument may occur and be recognized before the effect on net income of the hedged item is recognized. For example, a food processor desires to hedge its price risk from an anticipated purchase of some quantity of wheat. Under hedge accounting, gains or losses in the market value of a hedging instrument designed to reduce price risk would be deferred until the wheat is physically delivered to the food processor.

Borne out of years of intense debate, FASB Statement No. 133 formalized certain controversial hedge accounting practices and also established new methods of accounting for hedges. There can be no doubt that Statement No. 133 increased the rigor with which hedge accounting must be applied, and added much greater transparency of the effects of hedge accounting on reported net income. The four basic concepts embodied in Statement No. 133 are summarized below:

1. Derivative financial instruments--whether entered into for hedging or any other purpose--should always be measured and reported at fair value. For the most part, only derivatives may be designated as hedging instruments.

2. Special hedge accounting should be available when a high degree of "hedge effectiveness" is demonstrated and documented at the inception of the hedge. Hedge effectiveness may be determined in a number of ways, but in rough terms it means that there should be an expectation that an x percent change in the value of the hedged item should be offset by approximately an x percent change, in the opposite direction, of the hedging instrument.
3. No method of hedge accounting should result in reporting deferred losses or gains on the balance sheet. Deferred gains do not meet the conceptual definition of a liability and deferred losses do not meet the conceptual definition of an asset.
4. The method of hedge accounting to be employed will depend on the type of hedge.

With respect to this last concept, Statement No. 133 specifies three permissible hedge accounting treatments:

1. Fair value hedge accounting -- Gains and losses on the fair value of recognized assets and liabilities, and the fair value of firm commitments are accelerated to the current period to serve as offsets to the gains and losses recognized on the hedging instrument. Thus, hedge accounting is achieved by altering the normal accounting for the hedged item.
2. Cash flow hedge accounting -- Gains and losses on the fair value of the hedging instrument are deferred as a component of accumulated other comprehensive income and matched against the financial statement impact of the hedged item in the period when it is recognized. Thus, hedge accounting is achieved by altering the normal accounting for the hedging instrument (which is to recognize the changes in the fair value of a derivative financial instrument in the period in which the change to fair value occurs).
3. Hedge of a net investment in a foreign operation -- The change in the fair value of the hedging instrument is added to accumulate other comprehensive income to the extent that translation of the foreign operation into the reporting currency affects accumulated other comprehensive income.

[j] Deferred Tax Assets and Liabilities

The tax consequences of most operational events recognized in the financial statements for a given period are included in determining income taxes currently payable. Some of these differences are permanent, and others are temporary.

Permanent differences consist of revenues and expenses that firms include in net income for financial reporting but never appear in the income tax return. Interest revenue on tax-exempt municipal bonds is an example of a permanent difference.

Temporary differences are revenues and expenses that firms include in both income for financial reporting and in taxable income, but in different periods. Depreciation expense is a common temporary difference. For example, straight-line depreciation on an item of equipment may be used for calculating net income for financial reporting purposes and a method based on declining balance depreciation may be used for calculating taxable income. Over the time the equipment is owned by the company, expenses related to the equipment will be the same, regardless of the depreciation method used; however, periodic amounts will differ.

In 1992, the FASB issued Statement No. 109⁴⁵, which supersedes Statement No. 96, Accounting for Income Taxes. Statement No. 109 requires a firm to compute income tax expense based on income for financial reporting before taxes excluding the effect of permanent differences. Thus, income tax expense is not simply the amount of income taxes

currently payable. Firms must also recognize the benefit of future tax deductions and the obligations related to future taxable income that arise because of temporary differences. A deferred tax liability or deferred tax asset represents the increase or decrease in taxes payable or refundable in future years as a result of temporary differences and carryforwards at the end of the current period.

Since deferred tax assets represent future deductions, their realization is subject to the uncertain future condition of sufficient future taxable income against which to offset the deduction. Otherwise, the future tax deduction would have no value. In order to avoid overstatement of the benefit of the future tax deduction, Statement No. 109 requires a valuation allowance against the deferred tax asset to reduce it to the amount the firm judges it more likely than not will realize by way of reduced taxes in the future.

[4] Other Areas of Significance

[a] Leases: Combination of Operating and Financial Elements

Lease contracts belong to a group of contracts referred to by accountants as "executory contracts." Generally, these contractual commitments are accounted for off the balance sheet because the event triggering the commitment has usually not yet occurred. Examples include leases, purchase or supply agreements, take-or-pay contracts and working capital maintenance agreements, to name only a few. Many executory contracts share operating and financing characteristics. For example, a purchase agreement for raw materials in a production process involves obtaining access to a producing asset, and also embodies a commitment to pay cash at a future date.

To illustrate the conundrum created by lease contracts, consider the following contrasting contractual relationships:

1. A company borrows \$1 million from a bank, agreeing to repay \$11,100 per month over ten years. The company agrees to use the proceeds of the loan to fund the purchase price of an item of equipment to be used in the operations of the company. The economic life of the equipment is 20 years.
2. A company signs a noncancellable, nontransferable 10-year lease on an identical piece of equipment. Monthly lease payments are \$11,100, and the company may purchase the asset at the end of the lease term for its fair value as determined by an independent appraisal.

In both cases, the company has incurred an economic liability of equivalent amount and acquired access to an economic resource (the equipment). However, in only the first case do accounting rules require the recognition of the liability and recognition of an asset. A central accounting issue involving leases is the identification of those leases that are treated as sales of the property by lessors and as purchases of the property by lessees. These are known as "capital leases." The counterpart to capital lease accounting is operating lease accounting under which the lessee would recognize expense in accordance with the schedule of lease payments.

SFAS No. 13 is the principle source of GAAP as it relates to lease accounting. Statement No. 13 provides that "if a lease meets any one of the following classification criteria, it is a capital lease: n46

- a. The lease transfer ownership of the property to the lessee by the end of the lease term.
- b. The lease contains an option to purchase the leased property at a bargain price.
- c. The lease term is equal to or greater than 75 percent of the estimated economic life of the leased property.
- d. The present value of rental and other minimum lease payments equals or exceeds 90 percent of the fair

value of the leased property.

If a lease contract meets the accounting requirements for capital lease treatment, lessors must further classify the lease contract as a "financing" or "sales-type" lease. In a sales-type lease, the lease payments contain an element of "dealer profit." In other words, the lessor simultaneously acts as an equipment dealer while also performing the financing function.

[b] Earnings Per Share

Earnings per share, or EPS, is an index widely used by actual and prospective investors to gauge the profitability of an entity. Forecasts of EPS serve as inputs to numerous types of equity valuation models. In February 1997, the FASB issued Statement of Financial Accounting Standard No. 128, n47 which is the result of a joint project between the FASB and the IASC to converge on a single standard for the calculation of EPS. The FASB saw a re-write of the EPS rules to be an opportunity to test the waters of international cooperation in an area that did not affect balance sheet or income statement items. Most observers agreed that U.S. standards prior to this project (principally APB 15) were needlessly complicated and out of step with the approach taken by most other countries.

Two measures of EPS are reported under Statement No. 128. "Basic" EPS is intended to measure performance over a reporting period and is calculated as:

Net income available to common shareholders

Weighted average number of common shares outstanding for the period

where "net income available to common shareholders" is reported net income less dividends on preferred stock.

"Diluted" EPS is intended to measure performance over a reporting period while giving effect to all potentially dilutive securities--i.e., securities that could potentially decrease EPS through increase in the denominator without sufficient offset in the numerator of the EPS calculation. Dilution could occur upon the exercise of stock options, stock warrants or similar instruments, conversion of preferred stock or debt to common stock, or securities to be issued in the future based upon the occurrence of a specific event (i.e., "contingently issuable shares").

In calculating Diluted EPS, the numerator of the above EPS equation is adjusted for preferred claims and any appropriate interest addbacks, and the denominator is increased by all common shares issuable from potentially dilutive securities. For example, conversion of preferred stock to common stock will have both a numerator effect and a denominator effect on the calculation of Dilutive EPS. The numerator of Basic EPS is adjusted upward by the preferred dividends eliminated if the preferred stock were converted, and the denominator increases by the number of common shares issuable upon conversion of the preferred shares. If the effect of the conversion were to make Dilutive EPS greater than Basic EPS (i.e., the conversion is "antidilutive"), then the convertible preferred shares would be left out of the calculation of Dilutive EPS.

In 1989, the SEC issued SAB No. 83, which amends section D of Topic 4 of the SAB Series. The Bulletin provides that where a registrant has filed a statement in connection with an initial public offering ("IPO") and has within one year prior to the filing, issued common stock below the IPO price or other options, warrants, or dilutive instruments below the IPO price, such securities and instruments should be treated as outstanding when computing earnings per share. The SEC will not object to the use of the treasury stock approach in measuring the dilutive effect of such issuances. n48

CHAPTER 4A The SEC and Accounting Standards

1-4A Federal Securities Exchange Act of 1934 § 4A.05

AUTHOR: Thomas I. Selling PhD, CPA Former SEC Academic Fellow and Associate Professor, Thunderbird, The Garvin School of International Management.

§ 4A.05 Global Accounting Standards

Our global economy is characterized by electronically accessible stock exchanges and multinational enterprises operating in scores of countries. So, it is natural to believe that accounting standards could be the same throughout the world. Such is not presently the case, but if it were, capital markets and multinational managers could achieve greater efficiencies by not having to cope with the polyglot of accounting standards and practices that presently exist.

The development of accounting standards has been an evolutionary and highly political process, beginning long before the advent of a global economy. Much of the evolution of accounting standards has taken place at the national level. Government bureaucracies, laws and private organizations were established to meet the needs of investors and other stakeholders in the financial reporting process when public dissemination of financial statements was largely restricted to one country at a time. As culture, law, politics and business practice varied significantly among countries, so understandably have national accounting standards promulgated by these national organizations evolved to different points. For example:

- Countries in which investors in large companies have consisted in the main of large *financial institutions* generally require less detail in financial statements and related disclosures, and less rigor in their preparation than countries where there is significant participation by smaller *individual investors*.
- Some cultures are seen to possess a strong desire to avoid repetition of some economic disaster that occurred in its past. In the United States, for example, a widely held view is that the Great Depression of the 1930s was caused in large part by schemes to manipulate and profit from inflated stock market prices, fed through the dissemination of false and misleading financial statement information. In Germany, the post World War I inflation was fuelled by panic.

The reactions in these two countries by accounting standard setters were very different. The United States system consists of highly detailed rules intended to discourage their manipulation. The German system, on the other hand, provides issuers with broad discretion to enable them to report smooth earnings trends. It appears to be designed to reduce investor concerns that could lead to panic, which in

turn might threaten economic stability.

- One of the fundamental aspects of any national system of financial reporting is its relationship to tax law. In Great Britain, for example, companies may report one set of figures in their financial statements and a substantially different set on their tax returns. This is because the objectives of financial reporting are substantially different than tax reporting.

Considerable effort is being made throughout the world to harmonize accounting and financial reporting internationally. n1 Organizations that are principally involved with this effort are: the International Accounting Standards Committee (IASC), the FASB, the International Organization of Securities Commissions (IOSCO), n2 the SEC, and the European Community (EC). The IASC through its standards setting group, the International Accounting Standards Board (IASB) is, along with the FASB, the principal instrument of the accounting profession for achieving global harmonization.

[1] International Financial Reporting Standards (IFRS)

A number of countries have adopted IASC standards, known as International Financial Reporting Standards (IFRS), n3 to constitute their own accounting principles. n4 The International Accounting Standards Committee (IASC) was formed in 1973 through an agreement made by the principle organizations representing the accounting profession from nine major countries. In 1983 it affiliated with the International Federation of Accountants, an organization currently representing approximately 150 national accounting organizations from over 100 countries. In 2001, the IASC separated from IFAC, and the principal standard setter within the IASC was re-organized and renamed as the International Accounting Standards Board (IASB). The purpose of the new organization is to create a funding base to support the IASB and its staff, and to promote efficient and open debate to result in high quality accounting standards.

Nineteen trustees govern the IASC. They also appoint the members of the IASB, the Standing Interpretations Committee (SIC) and the Standards Advisory Council; monitor IASB's effectiveness; raise funds for the IASB; approve its budget and have responsibility for constitutional changes.

Up until the end of 2000, a 34-member committee comprising representatives from 14 countries performed the main standard-setting function. Many constituents criticized this structure because it lead to lengthy deliberations resulting in political compromises, resulting in lack of uniformity in application of IFRS and weakening IFRS quality and image. The IASB is now comprised of 14 individuals (12 full-time members and two part-time members). While the Trustees attempt to avoid dominance by any particular constituency or regional interest, the foremost criteria for appointment to the Board are technical expertise, ability to communicate and capacity to impartially consider varied viewpoints. The intention is that at least five IASB Members have a background as practicing auditors, at least three have a background in the preparation of financial statements, at least three have a background as users of financial statements, and at least one has an academic background.

The IASB has full responsibility for all technical matters addressed by it or other groups within the IASC. The functions of the IASB are similar to the FASB and include:

- Publishing exposure drafts on all projects and to normally publish a draft statement of principles for public comment on major projects
- Setting its own technical agenda
- Reviewing public comments, form steering committees or other types of specialist advisory groups to give advice on major projects, issue bases for conclusions when new authoritative pronouncements are published

The Standards Advisory Council comprises about 30 members, having a diversity of geographic and professional backgrounds. The Council meets approximately three times a year, principally to provide advice to the IASB on major projects and setting priorities.

The International Financial Reporting Interpretations Committee (IFRIC)--formerly named the Standing Interpretations Committee (SIC) prior to the 2002 restructuring--comprises twelve members. Its principal role is to interpret the application of standards promulgated by the IASB, and to provide timely guidance on issues not specifically addressed by existing standards. IFRIC has a chairman and 11 other voting members who are selected to provide an appropriate mix of auditors, preparers and users of accounts. A consensus is achieved when no more than three members vote against an interpretation. The IASB constitution requires IASB approval before a draft or final Interpretation is issued.

IFRS consists of a conceptual framework, accounting standards and interpretations. The "Framework for the Preparation and Presentation of Financial Statements," ("Framework") was adopted in 1989 to assist in the development of standards and review existing standards. Commentators, including FASB staff members, have noted that there are few, if any, substantive differences between the IASB framework and the FASB Statements of Financial Accounting Concepts taken as a whole. The IASB Constitution states that each member shall have regard for the Framework in deciding on and revising standards. n5 In addition, the IASB Framework may assist the following groups or individuals:

- preparers in dealing with topics not specifically addressed by a specific standard;
- auditors in auditing financial statements prepared in accordance with IFRS;
- users in the interpretation of financial statements prepared in accordance with IFRS; and
- those who are interested in the work of the IASB, providing them with information about its approach to the formulation of accounting standards.

[2] Convergence of U.S. GAAP and IFRS

The FASB and IASB have taken a number of initiatives to achieve convergence of accounting standards. They include:

- Joint projects on revenue recognition and business combinations. All future FASB or IASB agenda items are to be considered candidates for future joint projects.
- A "short-term convergence project" to identify those differences between U.S. GAAP and IFRS in which convergence appears achievable in the short-term by selecting between existing U.S. GAAP and IFRS.
- A joint research project seeking to identify all substantive differences between U.S. GAAP and IFRS along with an effort to identify a strategy for resolving each one.

CHAPTER 5 Civil Liabilities Under the Exchange Act

1-5 Federal Securities Exchange Act of 1934 5.syn

AUTHOR: Marc B. Dorfman and Ellen M. Wheeler

§ 5.syn Synopsis to Chapter 5: Civil Liabilities Under the Exchange Act

§ 5.01 Introduction

§ 5.02 Express Civil Liabilities

[1] Section 9(e)

[2] Section 18(a)

[3] Section 20A

[a] Elements

[i] Possession of Material Nonpublic Information.

[ii] Independent Violation.

[iii] Contemporaneous Trading.

[b] Damages.

§ 5.03 Implied Civil Liabilities

[1] Increasing Judicial Hostility to Implied Rights of Action Generally

[2] Implied Liabilities under Particular Provisions other than Section 10(b)

[a] Section 17(a) of the Securities Act.

[b] Section 14(e) of the Exchange Act.

[c] Section 29(b) of the Exchange Act

[3] Construing the Scope of Recognized Implied Private Rights of Action

[4] Relationship between Express and Implied Liabilities

§ 5.04 Implied Civil Liabilities under Section 10(b) and Rule 10b-5

[1] The Principal Varieties of Fraud

[a] Misrepresentations and Omissions

[i] Misrepresentations.

[iii] Omissions.

[b] Trading on Non-Public Information.

[2] Elements of Liability under Section 10(b) and Rule 10b-5

[a] Materiality

[i] Quantitative Matters.

[ii] Failure to Disclose the Obvious.

[iii] Merger Negotiations.

[iv] Puffery.

[v] Statements that Bespeak Caution.

[vi] Forward Looking Statements.

[b] Scienter

[i] Pre-Reform Act Scienter Standard.

[ii] The Reform Act.

[iii] Post Reform Act Pleading Standards.

[c] The "In Connection With" Requirement.

[d] Purchase and Sale of a Security.

[e] Reliance and Causation

[i] Fraud on the Market.

- [ii] Omissions.

- [iii] Loss Causation.

- [3] Secondary Liability

- [a] Aiding and Abetting.

- [i] Central Bank.

- [ii] Aftermath of Central Bank And Scheme Liability.

- [b] Controlling Persons.

- [c] Other Bases for Secondary Liability.

- [4] Affirmative Defenses

- [a] Statute of Limitations.

- [b] In Pari Delicto or "Unclean Hands."

- [c] Laches.

- [d] Waiver, Estoppel, and Ratification.

- [5] Jurisdiction and Venue under the Exchange Act

- [a] Jurisdiction over the Subject Matter

- [i] The Jurisdictional Statute.

- [ii] Supplemental Jurisdiction.

- [iii] Transnational Transactions.

- [b] Jurisdiction over Parties.

- [c] Venue.

- [6] Remedies

- [a] Damages.

- [i] Measurement of Damages.

- [ii] Punitive Damages.

- [iii] Prejudgment Interest.

[b] Rescission and Restitution.

[c] Contribution and Indemnity.

[d] Injunctive Relief.

[e] The Use of Experts When Calculating Damages

[i] Transaction-Based Methodology v. Aggregated Methodology.

CHAPTER 5 Civil Liabilities Under the Exchange Act

1-5 Federal Securities Exchange Act of 1934 § 5.01

AUTHOR: Marc B. Dorfman and Ellen M. Wheeler

§ 5.01 Introduction

The Securities Exchange Act of 1934 ("Exchange Act" or "1934 Act") provides a number of express causes of action. Section 9(e) provides a civil remedy to a person who purchases or sells a security on a national exchange at a price affected by unlawful manipulation. n1 Section 20A furnishes a cause of action to a person who purchases or sells a security in reliance on a false or misleading statement in a document filed under the Exchange Act. n2 Section 20A allows suits against persons trading on non-public information for plaintiffs who trade contemporaneously with such persons. n3 Each of these three express provisions, however, includes significant limitations and is rarely used. n4

The most important right of action under the Exchange Act remains the implied cause of action under Section 10(b) and *Rule 10b-5*. n5 *Rule 10b-5* prohibits any person from engaging in fraudulent practices in connection with the purchase or sale of securities. *Rule 10b-5* cases have principally dealt with fraudulent misrepresentation of, or failures to disclose, material facts, or trading on material non-public information.

To succeed on a *Rule 10b-5* claim, plaintiffs must show (1) there was a "fraud," usually a misrepresentation or failure to disclose a material fact, (2) in connection with plaintiffs' purchase or sale of a security, (3) that defendants acted with "scienter," (4) that plaintiffs "relied" on defendants' misrepresentation or omission, and (5) that such misrepresentation or omission caused plaintiffs' damages. Defendants in *Rule 10b-5* cases have a number of affirmative defenses, available and commonly file motions to dismiss. The Exchange Act provides that federal courts are the exclusive forum for *Rule 10b-5* cases, and class actions tend to be the preferred form of seeking relief. In appropriate circumstances, plaintiffs may file a derivative action under *Rule 10b-5* to obtain a remedy for a defrauded corporation. Finally, if parties to a contract agree to arbitrate disputes under *Rule 10b-5*, their arbitration agreement is valid and enforceable.

Although the elements of the implied right of action under *Rule 10b-5* are well-established, there have been significant limitations placed on securities fraud suits by the courts and by Congress. n6 In the Private Securities Litigation Reform Act of 1995 (the "Reform Act"), Congress sought to eliminate what it perceived as "frivolous" securities fraud suits by requiring plaintiffs to satisfy strict procedural requirements and by heightening the standard for pleading scienter. After class action plaintiffs attempted to avoid these heightened requirements by filing in state rather than federal courts, Congress passed the Securities Litigation Uniform Standards Act of 1998 ("SLUSA"), requiring securities fraud class actions to be filed in federal court.

Limitations placed on *Rule 10b-5* suits by courts and Congress provided a number of weapons to defendants to combat securities fraud suits filed under *Rule 10b-5*. Nevertheless, this implied right of action continues to be a fertile source of significant litigation.

Civil litigation under the Exchange Act may only be one of the causes of action brought against a defendant. Congress included express causes of action in the Securities Act of 1933 ("Securities Act" or "1933 Act"), including Section 11, concerning false statements or material omissions in registration statements, and Section 12, involving unregistered offerings and fraud in connection with prospectuses.ⁿ⁷ Moreover, the express and implied actions under the Exchange Act and the Securities Act do not foreclose suits brought under other federal statutes, or under state securities laws or under common law. Section 28(a) of the Exchange Act expressly provides that "rights and remedies provided by [the Exchange Act] shall be in addition to any and all rights and remedies that may exist at law or in equity."ⁿ⁸

Civil litigation under the Exchange Act may also only be one prong of parallel litigation: the same conduct may give rise to an investigation by the Securities and Exchange Commission ("SEC" or "Commission")ⁿ⁹ and an SEC administrative proceeding or civil injunctive action, including claims for fines, penalties and disgorgement, as well as state and federal criminal prosecutions.

CHAPTER 5 Civil Liabilities Under the Exchange Act

1-5 Federal Securities Exchange Act of 1934 § 5.02

AUTHOR: Marc B. Dorfman and Ellen M. Wheeler

§ 5.02 Express Civil Liabilities

The Exchange Act n1 creates two distinct avenues for civil enforcement: public and private. The Exchange Act authorizes the SEC n2 to institute administrative proceedings n3 or file actions in federal district court seeking injunctive relief. n4 As discussed in this section, the Exchange Act also creates express remedies for private parties: Sections 9(e), 18(a) and 20A. n5

Section 9(e) provides a civil remedy to any person who purchases or sells a security registered on a national exchange at a price affected by unlawful manipulation. Section 18(a) grants a cause of action to any person who purchases or sells a security in reliance on, and at a price affected by, a false or misleading statement in a document filed with the SEC under the Exchange Act. These sections were designed "to protect investors against manipulation of stock prices through regulation of transactions upon securities exchanges and in over-the-counter markets, and to impose regular reporting requirements on companies whose stock is listed on national securities exchanges." n6 As discussed below, however, claims under these sections are rarely brought--and even less frequently succeed--because of the difficult burdens of proof. As a result, plaintiffs prefer claims based on Section 10(b) and *Rule 10b-5*.

In addition, Section 20A provides an express remedy for private plaintiffs who have traded contemporaneously with corporate insiders and others who violated provisions of the Exchange Act by trading while possessing material nonpublic information. Litigation and decisions under Section 20A are relatively rare because it appears that potential plaintiffs have been deterred by Section 20A's limitation on damages and its requirement that trading be contemporaneous.

[1] Section 9(e)

Section 9 of the Exchange Act prohibits specified activities designed to manipulate the price of any security registered on a national exchange. In particular, Section 9(a) outlaws wash sales and matched orders intended to create "a false or misleading appearance of active trading," prohibits the effectuation of transactions to create actual or apparent activity in a security or to raise or depress its price to induce its purchase or sale by others, and prohibits manipulation of the market for a security by making false or misleading statements or by touting. n7

Section 9(e) provides a remedy for investors injured by violations of Section 9(a), (b), or (c). This section permits "any person who shall purchase or sell any security at a price which was affected by" one of the prohibited acts or transactions to recover damages from any person who "willfully participate[d]" in the misconduct. n8 To plead an action under Section 9(e), a plaintiff must show that: (1) a series of transactions in a security created actual or apparent trading in that security or raised or depressed market price; (2) the transaction was carried out with scienter to induce the sale or purchase; (3) the transactions were relied upon by the plaintiff; and (4) the transactions affected plaintiff's purchase or selling price. n9

Section 9(e) only is available for manipulations of exchange-traded securities. It does not apply to a manipulation of a stock, for example, on NASDAQ. Additionally, significant procedural hurdles have resulted in Section 9(e) claims rarely being filed. Under Section 9, plaintiffs face a difficult burden of proof; they must demonstrate the defendant intended to induce a sale n10 and that the price of the security was "affected by" defendant's activity. n11 Moreover, if a plaintiff is unsuccessful, he or she may be ordered to pay defendant's costs and attorneys' fees. n12 As a result of these substantial impediments, few plaintiffs have elected to sue under section 9(e). n13

[2] Section 18(a)

Section 18(a) of the Exchange Act creates a private right of action against any person responsible for a false or misleading statement of material fact in an application, report, or document filed with the SEC under the Exchange Act. n14 Any person who has purchased or sold a security n15 relying on the misleading statement, and at a price affected by the statement, may sue for damages resulting from that reliance. n16 The claim must be filed within one year of discovery of the fraud, or three years within accrual of the cause of action. n17

Plaintiffs' burden of proof under Section 18(a) is daunting. n18 Claimants must plead and prove that: (1) the plaintiff read and relied n19 on a misleading statement in a document filed n20 with the SEC ("eyeball reliance") or relied on a repetition of that statement; (2) the price of the security purchased or sold n21 was "affected by" the statement, causing damages; n22 and (3) the plaintiff had no knowledge that the statement was false or misleading. In addition, complaints alleging Section 18 violations must satisfy the requirement under Fed. R. Civ. P. 9(b) that fraud-based claims be stated with particularity n23 and the heightened pleading standards of the Reform Act. n24

Even if a plaintiff survives a motion to dismiss, there is another barrier to recovery. Section 18 contains a statutory defense if the defendant can prove that he or she "acted in good faith and without knowledge that such statement was false or misleading." n25 Mere negligence by a defendant may not be sufficient to justify plaintiff's recovery. n26 If found liable, a defendant may sue other prospective defendants for contribution. n27 Finally, like Section 9(e), Section 18 authorizes the court to require either party to post an undertaking for costs, including reasonable attorneys' fees. n28

Although Congress included Section 18 in the Exchange Act to strengthen enforcement and to compensate injured investors, n29 the statute has provided little benefit to investors. The heavy burden of proof in these cases has dissuaded all but the most determined plaintiffs. n30 In addition, class action relief is, as a practical matter, rarely available under Section 18 because of the actual reliance requirement. n31 Therefore, most plaintiffs prefer to file a claim based on an implied right of action under another provision of the Exchange Act or common law fraud. n32

[3] Section 20A

Section 20A was added to the Exchange Act in 1988 as part of the Insider Trading and Securities Fraud Enforcement Act. n33 Section 20A states:

Any person who violates any provision of [the Exchange Act or corresponding rules and regulations] by purchasing or selling a security while in possession of material, nonpublic information shall be liable ... to any person who, *contemporaneously* with the purchase or sale of securities that is the subject of

such violation, has purchased (where such violation is based on a sale of securities) or sold (where such violation is based on a purchase of securities) securities of the same class. n34

Actions must be brought within five years of the date of the last transaction relating to the underlying violation. n35

As also discussed below, enactment of Section 20A was a significant development in the law of insider trading because it permits plaintiffs to pursue claims under either the classical theory or the misappropriation theory, n36 effectively overturning a Second Circuit decision where the misappropriation theory was rejected as a basis for a private cause of action. n37 In so doing, Congress extended Section 20A liability to include insiders, tippees and outsiders as potential defendants. n38

[a] Elements n39

[i] Possession of Material Nonpublic Information. Under Section 20A, the defendant must have traded while possessing material nonpublic information. Plaintiffs are generally not required to plead specific factual detail about how the defendant obtained that information. n40 As one court has remarked, "[s]uch a requirement would be absurd, especially since it concerns information peculiarly within the defendant's knowledge." n41

[ii] Independent Violation. Section 20A liability must be predicated on the defendant's violation of the Exchange Act or an Exchange Act regulation. n42 Failure to identify the independent predicate violation in the complaint will result in dismissal. n43 It follows that if the allegation relating to the predicate offense is dismissed, the Section 20A claim will be dismissed as well. n44 Because most Section 20A claims are based on alleged violations of Section 10(b), the heightened pleading standards of the Reform Act n45 have impacted Section 20A claims as well. n46 Of course, Section 20A does not, by its terms, prevent the plaintiff from pursuing other claims. n47 In reality, however, dismissal of the Section 20A claim likely precludes the plaintiff from bringing an implied cause of action under Section 10(b), the only remaining avenue of recovery for the contemporaneous trader, unless the Section 20A claim is predicated on violation of a different provision of the Exchange Act. n48

[iii] Contemporaneous Trading. To proceed with a claim under Section 20A, the plaintiff must have traded contemporaneously with the defendant. The plaintiff must plead with particularity facts showing the trades were contemporaneous, although the plaintiff may be afforded a limited opportunity for discovery to determine the relevant facts. n49

Although "contemporaneous" trading is undefined in the statute, the requirement was developed, and adopted by Congress, from 10b-5 cases involving insider trading on material non-public information under *Rule 10b-5*. Thus, case law under *Rule 10b-5* is instructive in determining whether plaintiffs traded contemporaneously with defendants to establish a Section 20A claim.

Legislative history cites precedent from the Second Circuit n50 reflecting the basic concept underlying the contemporaneous requirement: an individual who trades not long after another individual has traded while in possession of material nonpublic information suffers an informational disadvantage. n51 "Contemporaneousness" substitutes for contractual privity. n52 If a substantial period of time lapses between defendant's and plaintiff's trades, the market presumably has sufficient time to react to the insider's trades so that the plaintiff is not harmed. n53

Courts focus on the length of time between defendant's and plaintiff's trades. Trading by the plaintiff before the insider's trades n54 or trades substantially after -- certainly a month or more n55 -- are not contemporaneous. At the other end of the spectrum, same day trading is likely to be considered contemporaneous. n56

Deciding whether the trades are contemporaneous is more difficult when the length of time between defendant's and plaintiff's trades is more than a day but less than a month. The decisions generally suggest that trading six days or less

after defendant's trades is contemporaneous, n57 reflecting the courts' reluctance to interpret the contemporaneous requirement broadly. There is no definitive interpretation of the requirement by most of the circuit courts. This has resulted in case-specific analysis, leading to inconsistent holdings even among district courts in the same circuit. In the Ninth Circuit, for example, some district courts have held that trading must occur on the same day, whereas others have explicitly or implicitly rejected so stringent an approach. n58

As courts reach consensus on the parameters of contemporaneous trading, parties should expect more claims to be disposed of through motions to dismiss. Even lacking definitive guidance, many courts grant motions to dismiss on this issue. n59

The requirement that plaintiff's trades be contemporaneous with defendant's can lead not only to dismissal of the Section 20A claim, but can also affect plaintiff's ability to pursue class actions. A plaintiff's contemporaneous trading must be determined by the court at the certification stage. If the trades are not contemporaneous, plaintiff is precluded from asserting a claim for a class of contemporaneous traders. n60 In addition, the contemporaneous requirement often necessitates the definition of "subclasses" of plaintiffs within the context of a larger class action because some plaintiffs in the underlying fraud action are not contemporaneous traders for purposes of the secondary Section 20A claim. n61

[b] Damages. Section 20A significantly limits damages. Damages are limited to defendant's profits earned or losses avoided n62 minus any amount the defendant was ordered to disgorge by the SEC in a separate proceeding. n63 This damage cap is a substantial deterrent to potential plaintiffs, particularly in class actions where an award based on defendants' profits would likely be split among numerous plaintiffs, resulting in nominal individual recoveries. The impact of the Sarbanes-Oxley fair funds provision remains to be seen.

FOOTNOTES:

(n1)Footnote 1. 15 U.S.C. § 78 et seq. (1999) ("Exchange Act").

(n2)Footnote 2. Certain provisions of the Exchange Act are enforced by other agencies and organizations. *See, e.g.*, Exchange Act § 12(i) (federal bank regulators). In addition, securities exchanges, clearing agencies, and the NASD, the only registered securities association, are required to enforce compliance with the federal securities laws, subject to review by the SEC. *See* Exchange Act §§ 19(d)-(f).

(n3)Footnote 3. The SEC may impose a variety of disciplinary sanctions for violations of the securities laws and regulations, including censure, disgorgement and civil penalties. *See, e.g.*, Exchange Act § 15(b)(4) (broker-dealer misconduct). Administrative actions that proceed to trial are held before administrative law judges, whose initial decisions may be appealed to the SEC. Appeals from decisions of the SEC are made either to the D.C. Circuit or the Circuit where the respondent resides or has its principal place of business. For a discussion of SEC enforcement actions and procedures, *see* Chapter 9 *infra*.

(n4)Footnote 4. *See* Exchange Act § 21.

(n5)Footnote 5. In addition, § 16(d) creates an express right of action in connection with short-swing trading provision. Section 16(a) is of sufficient importance to receive separate treatment. *See* Chapter 8 *infra*.

(n6)Footnote 6. *Lampf, Pleva, Lipkind, Prupis & Petigrow v. Gilbertson*, 501 U.S. 350, 360-361, 111 S. Ct. 2773,

2780 (1991) (quoting *Ernst & Ernst v. Hochfelder*, 425 U.S. 185, 195 (1976)) .

(n7)Footnote 7. Section 9 is discussed in detail in Chapter 6 *infra*. Under § 9, the SEC may prescribe rules regulating the "pegging, fixing, or stabilizing" of the price of a security. Sections 9(b) and 9(c) authorize the SEC to make rules governing the acquisition, endorsement, or guarantee of any put, call, straddle, or other option or privilege with relation to which such an option or privilege is outstanding.

(n8)Footnote 8. Exchange Act § 9(e).

(n9)Footnote 9. See *Chemetron Corp. v. Business Funds, Inc.*, 682 F.2d 1149, 1164 (5th Cir. 1982) , vacated and remanded on other grounds, 460 U.S. 1007 (1983) ; see also *Perry v. Eastman Kodak Co.*, 1992 U.S. App. LEXIS 11753, at *18 (7th Cir. May 15, 1992) (dismissing for failure to allege actual reliance).

(n10)Footnote 10. Proving "willfulness" under § 9(e), as well as the manipulative purpose that is an element of a substantive violation of § 9(a), may be more difficult than proving "scienter" under *Rule 10b-5*. See, e.g., *Chemetron*, 682 F.2d at 1162 . For a discussion of the "scienter" requirement under *Rule 10b-5*, see Chapter 5.04 *infra* .

(n11)Footnote 11. See, e.g., *Jolley v. Welch*, 904 F.2d 988, 992-993 (5th Cir. 1990) ; *Chemetron*, 682 F.2d at 1162 ; *Crane Co. v. American Standard, Inc.*, 603 F.2d 244, 251-252 (2d Cir. 1979) ; *Rosenberg v. Hano*, 121 F.2d 818, 821 (3d Cir. 1941) ; *Lowe v. Salomon Smith Barney*, 206 F. Supp. 2d 442, 444 (W.D.N.Y. 2002.).

(n12)Footnote 12. See Exchange Act § 9(e) (authorizing the court to require an undertaking for costs from, and to assess costs and attorneys' fees against, either party litigant).

(n13)Footnote 13. 9 Louis Loss & Joel Seligman, *Securities Regulation* 4279 (3d ed., revised 2004) ("It is small wonder that § 9(e) has been virtually a dead letter so far as producing recoveries is concerned.").

(n14)Footnote 14. Section 18(a) provides in relevant part:

Any person who shall make or cause to be made any statement in any application, report, or document filed pursuant to this title or any rule or regulation thereunder or any undertaking contained in a registration statement as provided in subsection (d) of section 15 of this title, which statement was at the time and in the light of the circumstances under which it was made false or misleading with respect to any material fact, shall be liable to any person (not knowing that such statement was false or misleading) who, in reliance upon such statement, shall have purchased or sold a security at a price which was affected by such statement, for damages caused by such reliance, unless the person sued shall prove that he acted in good faith and had no knowledge that such statement was false or misleading.

Exchange Act § 18(a).

(n15)Footnote 15. The purchaser-seller requirement eliminates many potential plaintiffs and defendants. In *Touche Ross & Co. v. Redington*, 442 U.S. 560 (1979) , plaintiffs could not avail themselves of § 18 because they did not meet this requirement. *Id.* at 572-573 .

(n16)Footnote 16. 442 U.S. at 572-73 .

(n17)Footnote 17. Exchange Act § 18(c). Although Congress extended the statute of limitations for securities fraud actions under Section 10(b), it is an open question whether this provision has modified the limitations period under 18(a). See *Sarbanes-Oxley Act of 2002 § 804*, 28 U.S.C. § 1658 (2003).

(n18)Footnote 18. The burden imposed on the plaintiff seeking damages for a misstatement or omission in an Exchange Act filing is greater than that imposed on the plaintiff who seeks to recover damages under § 11 of the

Securities Act in relation to a Securities Act filing. See Merritt B. Fox, *Securities Regulation in the 21st Century: Rethinking Disclosure Liability in the Modern Era*, 75 Wash. U. L.Q. 903, 904 n.4 (1997) (referring, in part, to the "eyeball reliance" requirement under § 18 and stating that the plaintiff seeking damages in relation to an Exchange Act filing "has much less chance of success than if the same statement appears in a registration statement under the Securities Act").

(n19)Footnote 19. Actual reliance must be alleged and proven. See, e.g., *Ross v. A. H. Robins Co.*, 607 F.2d 545, 552-53 (2d Cir. 1979) ; *Heit v. Weitzen*, 402 F.2d 909, 916 (2d Cir. 1968) . Constructive reliance is insufficient to support a claim under § 18. See, e.g., *In re Digi Internat'l Inc. Sec. Litig.*, 6 F. Supp. 2d 1089, 1103 (D. Minn. 1998) (citing cases).

Of course, "eyeball reliance" does not mean that a plaintiff must have viewed the document filed with the SEC--relying on a copy of statements contained within a document filed is sufficient to sustain a claim under § 18. See, e.g., *Erath v. Xidex Corp.*, 1990 U.S. Dist. LEXIS 20828, at *23 (D. Ariz. June 11, 1990) (citing *Wachovia Bank & Trust v. National Student Marketing*, 461 F. Supp. 999, 1006 n.13 (D.D.C. 1978)) . Nonetheless, at least one court has held that the plaintiff must have known at the time of reliance that the document had been filed with the SEC or incorporated into a filed document. *Erath*, 1990 U.S. Dist. LEXIS 20828, at *27 (dismissing claim because plaintiff did not know that statements had been incorporated into filed document).

(n20)Footnote 20. The most important documents that are filed with the SEC under the Exchange Act are the periodic reports that § 13(a) and § 15(d) require of certain publicly held companies. For most of these companies, the required filings include annual reports on Form 10-K, quarterly reports on Form 10-Q and reports of significant corporate events on Form 8-K. Neither the financial information in Form 10-Q nor the glossy annual report disseminated to shareholders under proxy rules are deemed "filed" with the SEC, however. See Exchange Act Rules 13a-13(d) and 15d-13(d). Therefore, plaintiffs cannot allege reliance on the financial statements as the basis of a claim under § 18. See *Digi Internat'l*, 6 F. Supp.2d at 1103 (citing rule and dismissing claim as a matter of law). If the issuer requests that the glossy annual be treated as a part of the proxy soliciting material or incorporates it by reference in a filed document, then the issuer may be held liable under § 18 for misstatements contained in that document. See Exchange Act Rules 14a-3(c) and 14c-3(b).

(n21)Footnote 21. Note that some courts have held that a plaintiff is not required to allege that he or she was a purchaser or seller of securities in order to survive a motion to dismiss under § 18. See, e.g., *International Broadcasting Corp. v. Turner*, 734 F. Supp. 383, 391 (D. Minn. 1990) . But see, e.g., *FMC Corp. v. Boesky*, 727 F. Supp. 1182, 1193-94 (N.D. Ill. 1989) (holding that plaintiff "must adequately allege that it purchased or sold securities" and dismissing complaint for failure to do so).

(n22)Footnote 22. See *Hoover v. Allen*, 241 F. Supp. 213, 225 (S.D.N.Y. 1965) (holding that injury must be a direct result of purchase or sale and, thus, "remote damages resulting from corporate waste" do not support a § 18(a) claim).

(n23)Footnote 23. See, e.g., *Lindner Dividend Fund, Inc. v. Ernst & Young*, 880 F. Supp. 49, 57 (D. Mass. 1995) (citing cases).

(n24)Footnote 24. Pub. L. No. 104-67, 109 Stat. 737 ("Reform Act").

(n25)Footnote 25. Exchange Act § 18(a).

(n26)Footnote 26. Cf. *Lindner*, 880 F. Supp. at 59 (stating that the publication of statements, subsequently proven to be inaccurate when made, does not "necessarily lead to a finding of liability") (citing *Ernst & Ernst v. Hochfelder*, 425 U.S. 185, 211 n.31 (1976)) .

(n27)Footnote 27. Exchange Act § 18(b).

(n28)Footnote 28. Exchange Act § 18(a).

(n29)Footnote 29. S. Rep. No. 73-792, at 12-13 (1934):

Experience with State laws designed to prevent the exploitation of the investor by supervision of the sale of securities has demonstrated the inadequacy of criminal penalties as the sole sanction. Customers are ordinarily reluctant to resort to criminal proceedings, and in the absence of complaints by them, the discovery of violations is often impossible. Furthermore, if an investor has suffered loss by reason of illicit practices, it is equitable that he should be allowed to recover damages from the guilty party. With these considerations in view, the bill provides that any person who ... makes a false or misleading statement in the report of a corporation, shall be liable in damages to those who have bought or sold the security at prices affected by such ... statement.

(n30)Footnote 30. See 9 Louis Loss & Joel Seligman, *Securities Regulation* 4298 (3d ed. revised 2004) ("Relatively few [plaintiffs] have found the courage [to proceed under § 18]").

(n31)Footnote 31. See Richard W. Painter, *Responding to a False Alarm: Federal Preemption of State Securities Fraud Causes of Action*, 84 *Cornell L. Rev.* 1, 3 n.6 (1998) ("Because reliance turns on different questions of fact for each plaintiff (many of whom never read SEC filings), class actions under section 18 are virtually impossible.").

(n32)Footnote 32. See *Ross v. A. H. Robins Co.*, 607 F.2d 545, 556 (2d Cir. 1979) ("We conclude that even as to those documents filed with the S.E.C., plaintiffs may seek to prosecute their claim under Section 10(b) and *Rule 10b-5*"); see also *Wachovia Bank and Trust Co. v. National Student Marketing Corp.*, 650 F.2d 342, 357 (D.C. Cir. 1980) (following *Ross*), cert. denied, 452 U.S. 954 (1981); *In re Scorpion Tech., Inc., Sec. Litig.*, 1996 U.S. Dist. LEXIS 22294, *8-12 (N.D. Cal. Mar. 28, 1996) (following *Ross* but noting older district court cases in which Section 10(b) claims were not permitted where Section 18 applied); 9 Louis Loss & Joel Seligman, *Securities Regulation* 4298-99 (3d ed. revised 2004) (suggesting that a plaintiff consider adding a claim in common law deceit or bring the claim under *Rule 10b-5*) (citing cases); Richard W. Painter, *Responding to a False Alarm: Federal Preemption of State Securities Fraud Causes of Action*, 84 *CORNELL L. REV.* 1, 3 n.6 (1998); ("Most plaintiffs instead use the implied private right of action under Section 10(b) of the 1934 Act."). Cf. *Herman & MacLean v. Huddleston*, 459 U.S. 375, 386, 386-387 (1983) (citing *Ross* and holding that Section 11 was not the exclusive remedy available to plaintiffs alleging misrepresentations in Securities Act filings-remedies were also available to plaintiffs under Section 10(b)).

(n33)Footnote 33. Pub. L. No. 100-704, 102 Stat. 4677 (1988).

(n34)Footnote 34. Exchange Act § 20A(a) (emphasis added).

(n35)Footnote 35. Exchange Act § 20A(b)(4).

(n36)Footnote 36. See Howard M. Friedman, *The Insider Trading and Securities Fraud Enforcement Act of 1988*, 68 *N.C. L. Rev.* 465, 481-84 (Mar. 1990) (discussing the impact of Section 20A).

(n37)Footnote 37. In *Moss v. Morgan Stanley, Inc.*, 719 F.2d 5 (2d Cir. 1983), the plaintiff traded contemporaneously with an outsider who had misappropriated confidential information from his employer but the claim was dismissed because the defendant had not breached any fiduciary duty to plaintiff. 719 F.2d at 5. The House Committee report states that Section 20A was "specifically intended to overturn court cases which have precluded recovery for plaintiffs where the defendant's violation is premised upon the misappropriation theory." H.R. Rep. No. 100-910 at 26.

(n38)Footnote 38. Several years later, the Supreme Court upheld the misappropriation theory for insider trading. See § 5.04[1][6] *infra*.

(n39)Footnote 39. Although § 20A claims involve elements other than the three discussed in this section, such as the requirement that the securities traded be of the same class, reported decisions to date have focused on these three elements.

(n40)Footnote 40. See, e.g., *Simon v. American Power Conversion Corp.*, 945 F. Supp. 416, 423-424 (D.R.I. 1996) (sufficient to state facts that suggest materiality of and access to information); *H.A.B. Assocs. v. Hines*, 1990 U.S. Dist. LEXIS 14301, *15-17 (S.D.N.Y. Oct. 29, 1990) (same).

(n41)Footnote 41. *H.A.B. Assocs.*, 1990 U.S. Dist. LEXIS 14301, at *17 .

(n42)Footnote 42. See Exchange Act § 20A(a); see also *Jackson Nat'l Life Ins. Co. v. Merrill Lynch & Co., Inc.*, 32 F.3d 697, 703-704 (2d Cir. 1994) (rejecting plaintiffs' § 20A claim because it was based on alleged violations of §§ 11 and 12(2) of the Securities Act); see also *In re Advanta Corp. Sec. Litig.*, 180 F.3d 525, 541 (3d Cir. 1999) ; *In re Verifone Sec. Litig.*, 11 F.3d 865, 872 (9th Cir. 1993) .

(n43)Footnote 43. See, e.g., *Hogan v. Piasecki*, 1997 U.S. Dist. LEXIS 6858, at *4-5 (N.D. Ill. May 7, 1997) (dismissing § 20A claim with prejudice).

(n44)Footnote 44. See, e.g., *In re Advanta Corp. Sec. Litig.*, 180 F.3d 525, 541 (3d Cir. 1999) ; *Sterlin v. Biomune Sys.*, 154 F.3d 1191, 1194 (10th Cir. 1998) ; *Picard Chem. Inc. Profit Sharing Plan v. Perrigo Co.*, 940 F. Supp. 1101, 1130-1131 (W.D. Mich. 1996) ; *Thornton v. Micrografx, Inc.*, 878 F. Supp. 931, 938 (N.D. Tex. 1995) .

(n45)Footnote 45. Pub. L. No. 104-67, 109 Stat. 737 ("Reform Act"). For a discussion of the heightened pleading standards under the Reform Act, see Chapter 5.04[2][b][ii] *infra* .

(n46)Footnote 46. See, e.g., *Advanta*, 180 F.3d at 541-42 (holding that plaintiffs' § 10(b) claims failed because, among other things, defendants' alleged misrepresentations were protected statements under the Reform Act's safe harbor and dismissing the 20A claim as derivative of the failed § 10(b) cause of action); *In re Aetna Inc. Sec. Litig.*, 34 F. Supp. 2d 935, 957 (E.D. Pa. 1999) (same). Note: Both of these cases have been criticized many times regarding pleading "scienter" versus pleading "recklessness" after the heightened pleading standards of the PSLRA. There is a circuit split on what is necessary to be pled; the split is discussed in *Nathenson v. Zonagen Inc.*, 267 F.3d 400 (5th Cir., 2001) : "It seems clear to us that the PSLRA has not generally altered the substantive scienter requirement for claims brought under section 10(b) and Rule 10b-5, and therefore severe recklessness, as defined in Broad, remains a basis for such liability. The First, Third, Sixth, and Eleventh Circuits have all explicitly reached similar conclusions. See *Greebel v. FTP Software, Inc.*, 194 F.3d 185, 198-201 (1st Cir. 1999) ; *In re Advanta Corp. Sec. Litig.*, 180 F.3d 525, 534 (3d Cir. 1999) ; *In re Comshare, Inc. Sec. Litig.*, 183 F.3d 542, 548-49 (6th Cir. 1999) ; *Bryant*, 187 F.3d at 1283-84. The Second Circuit has implicitly so concluded as well. See *Novak v. Kasaks*, 216 F.3d 300, 306 (2d Cir. 2000) (observing that the scienter requirement for securities fraud claims, which includes recklessness, "has been firmly established for at least a generation" and that the PSLRA altered the "procedural" requirements for bringing such a claim); see also *Rothman v. Gregor*, 220 F.3d 81, 90 (2d Cir. 2000) (describing substantive recklessness standard). The Ninth Circuit has reached the slightly different conclusion that, at least under the PSLRA, recklessness suffices to meet the substantive scienter requirement only if it rises to the level of "deliberate recklessness." See *In re Silicon Graphics Inc. Sec. Litig.*, 183 F.3d 970, 975-77 (9th Cir.) , *reh'g denied*, 195 F.3d 521 (9th Cir. 1999) .

(n47)Footnote 47. Section 20A(d) states, "Nothing in this action shall be construed to limit or condition the right of any person to bring an action to enforce a requirement of this title or the availability of any cause of action implied from a provision of this title.

(n48)Footnote 48. See *T. Rowe Price New Horizons Fund, Inc.*, 749 F. Supp. 705, 709-10 (D. Md. 1990) (stating that "the language in § 20A(d) is intended to preserve certain implied rights of action for persons other than contemporaneous traders, a category of plaintiff not addressed in § 20A" and holding that plaintiffs cannot plead § 20A and § 10(b) allegations in the alternative) (emphasis added). The court in *T. Rowe Price* reasoned that § 20A allegations

must be premised on a *Rule 10b-5* violation and, therefore, permitting alternative pleading would subject defendants to multiple damage awards exceeding wrongful profits and undermine the damages cap of § 20A. *See* 749 F. Supp. at 709-710 .

(n49)Footnote 49. *See, e.g., Neubronner v. Milken*, 6 F.3d 666, 671, 672 (9th Cir. 1993) (dismissing insider trading claim with prejudice for failure to sufficiently allege specific dates of trades despite substantial opportunity for limited discovery); *Blanchard v. Edgemark Fin. Corp.*, 1999 U.S. Dist. LEXIS 1096, at *43 (N.D. Ill. Feb. 3, 1999) (denying motion to dismiss despite plaintiffs' failure to identify dates of trades because plaintiffs had not had opportunity to conduct discovery).

(n50)Footnote 50. *See* H.R. Rep. No. 100-910 at 27 (1988) (adopting definition developed through 10b-5 cases). The Report cites three cases where varying lengths of time between plaintiffs and defendant's trades were considered. H.R. Rep. No. 100-910 at 27 (1988) (citing *Wilson v. Comtech Telecommunications Corp.*, 648 F.2d 88 (2d Cir. 1981) ; *Shapiro v. Merrill, Lynch, Pierce Fenner & Smith, Inc.*, 495 F.2d 228 (2d Cir. 1974) ; *O'Connor & Assocs. v. Dean Witter Reynolds, Inc.*, 559 F. Supp. 800 (S.D.N.Y. 1983)) .

(n51)Footnote 51. *See, e.g., Wilson*, 648 F.2d at 94-95 (claim under 10b-5); *Neubronner*, 6 F.3d at 670 (same).

(n52)Footnote 52. *See Buban v. O'Brien*, 1994 U.S. Dist. LEXIS 8643, at *7-8 (N.D. Cal. June 16, 1994) ("While an actual trade between plaintiff and defendant need not be expressly shown, harm to the plaintiff is a necessary factor. Such harm may be found where it appears the plaintiff might, in fact, have traded with the defendant."). Considering the fact that contemporaneous trading is a substitute for privity, it is interesting that the Seventh Circuit has held that § 20A does not apply to face-to-face transactions or, in other words, to transactions that *do* involve contractual privity. *See Fujisawa Pharmaceutical Co., Ltd. v. Kapoor*, 115 F.3d 1332, 1337 (7th Cir. 1997) . *But see Hogan v. Piasecki*, 1997 U.S. Dist. LEXIS 6858, *4-5 (N.D. Ill. May 5, 1997) (dismissing the § 20A claim, which was based on a direct sale of plaintiffs securities to defendant, on other grounds).

(n53)Footnote 53. *See, e.g., Buban*, 1994 U.S. Dist. LEXIS 8643, at *8-9 (finding that, in light of the high trading volume and price difference during the time between defendant's trades and plaintiffs trades three days later, the market had already absorbed the defendant's sales and plaintiff suffered no harm).

(n54)Footnote 54. *See, e.g., In re Verifone Sec. Litig.*, 784 F. Supp. 1471, 1489-1491 (N.D. Cal. 1992) (dismissing complaint with prejudice) , *aff'd*, 11 F.3d 865, 872 (9th Cir. 1993) ; *O'Connor & Assocs. v. Dean Witter Reynolds, Inc.*, 559 F. Supp. 800, 803 (S.D.N.Y. 1983) ; *see also Brody v. Transitional Hospital Corp.*, 280 F. 3d 997, 1002 (9th Cir. 2002) (insider purchases were not contemporaneous with plaintiffs' sales two months earlier for liability under either § 10(b) or § 14(e)).

(n55)Footnote 55. *See, e.g., Wilson v. Comtech Telecommunications Corp.*, 648 F.2d 88, 95 (2d Cir. 1981) (holding that one month was too long); *In re United States Surgical Corp. Sec. Litig.*, 1995 U.S. Dist. LEXIS 20895, at * 73 (D. Conn. Apr. 12, 1995) (six weeks too long). *Cf. Chanoff v. United States Surgical Corp.*, 857 F. Supp. 1011, 1021-1022 (D. Conn.) (applying federal securities law on contemporaneous trading to state law claim involving alleged breach of fiduciary duty and holding that plaintiff did not trade contemporaneously with defendant where plaintiff traded more than one month after defendant), *aff'd*, 33 F.3d 50 (2d Cir. 1994) .

(n56)Footnote 56. *See, e.g., Simon v. American Power Conversion Corp.*, 945 F. Supp. 416, 436 n.28 (D.R.I. 1996) ("Because the named plaintiffs traded on the same day as [the defendants], the "contemporaneous" requirement is clearly satisfied. As such, the Court need not at this time determine whether a contemporaneous trader under this section includes someone who traded in the days or weeks after the alleged insider trade."); *In re Gupta Corp. Sec. Litig.*, 900 F. Supp. 1217, 1244 (N.D. Cal. 1994) (noting that plaintiff and defendant traded on same day and, thus, claim could not be dismissed).

(n57)Footnote 57. *First Circuit: Colby v. Hologic, Inc.*, 817 F. Supp. 204, 215-216 (D. Mass. 1993) (eight days

too long in case brought under *Rule 10b-5*); *In re Stratus Computer, Inc.*, 1991 U.S. Dist. LEXIS 21587, at *17 (D. Mass. Dec. 10, 1991) ("The defendants argue persuasively, however, that the logic of Judge McNaught's decision requires an interpretation of 'contemporaneous' to mean 'same day.' "); *Backman v. Polaroid Corp.*, 540 F. Supp. 667, 670-671 (D. Mass. 1982) (plaintiffs' trades two and seven days after defendant's not contemporaneous for purposes of implied cause of action under *Rule 10b-5*). Second Circuit: *Shapiro v. Merrill, Lynch, Pierce Fenner & Smith, Inc.*, 495 F.2d 228, 241 (2d Cir. 1974) (four days sufficient); *In re Oxford Health Plans, Inc., Sec. Litig.*, 187 F.R.D. 133, 144 (S.D.N.Y. 1999) ("Five trading days is a reasonable period between the insider's sale and the plaintiffs purchase to be considered contemporaneous."); *In re United States Surgical Corp. Sec. Litig.*, 1995 U.S. Dist. LEXIS 20895, at *73 (D. Conn. Apr. 12, 1995) (six weeks too long).

Seventh Circuit: *Blanchard v. Edgemark Fin. Corp.*, 1998 U.S. Dist. LEXIS 14957, at *42 n.14 (N.D. Ill. Sept. 15, 1998) ("Although the definition of contemporaneous trading has not been decided, trades between one and four days apart have generally been considered contemporaneous while trades between two weeks and one month apart have generally not been considered contemporaneous."); *Feldman v. Motorola, Inc.*, 1994 U.S. Dist. LEXIS 14809, at *15 (N.D. Ill. Oct. 18, 1994) (refusing to adopt a same day requirement and stating that "some degree of imprecision is unavoidable"). *Eighth Circuit*: *In re Eng'g Animation Sec. Litig.*, 110 F. Supp. 2d 1183, 1196 (S.D. Iowa 2000) (three days); *Ninth Circuit*: *Neubronner v. Milken*, 6 F.3d 666, 670 (9th Cir. 1993) (suggesting that trades should be within a few days of each other but declining to establish limits); *In re Silicon Graphics Sec. Litig.*, 970 F. Supp. 746, 761 (N.D. Cal. 1997) (six day limit); *In re AST Research Sec. Litig.*, 887 F. Supp. 231, 234 (C.D. Cal. 1995) (same day) *Note*: *Middlesex Ret. Sys. v. Quest Software Inc.*, 527 F. Supp. 2d 1164 (C.D. CA. 2007) (Distinguishing AST Research by noting "the Ninth Circuit has explicitly declined to define the contours of the "contemporaneous" requirement," and then finding more persuasive the reasoning in *In re Am. Bus. Computers Corp. Sec. Litig.*, 1994 U.S. Dist. LEXIS 21467, (S.D.N.Y. February 24, 1994) which stated: "the better rule with respect to standing seems to be that a class action may be maintained on behalf of all persons who purchased stock on an exchange during the period that defendants were selling that stock on the basis of insider information."); *Gerstein v. Micron Tech., Inc.*, 1993 U.S. Dist. LEXIS 21214, at *19-21 (D. Idaho Jan. 4, 1993) (establishing a four day requirement); *Tenth Circuit*: *In re Enron Corp. Sec., Derivative & ERISA Litig.*, 258 F.Supp.2d 576, 600 (S.D. Tex. 2003) (two or three days).

(n58)Footnote 58. *Compare* *AST Research*, 887 F. Supp. at 234 ("This court concludes that a same-day definition of contemporaneous is proper.") (Note: see above comment in n.57 re: *AST Research*) with *Silicon Graphics*, 970 F. Supp. at 761 (trades should occur within six days to satisfy contemporaneous requirement) and *Gerstein*, 1993 U.S. Dist. LEXIS 21214, at *19-21 (rejecting defendants' argument that trades must have occurred on the same day and establishing a four day requirement).

(n59)Footnote 59. *See, e.g., Picard Chem. Inc. Profit Sharing Plan v. Perrigo Co.*, 940 F. Supp. 1101, 1131 (W.D. Mich. 1996) (citing Fed. R. Civ. P. 9(b)); *In re AST Research Sec. Litig.*, 887 F. Supp. 231, 235 (C.D. Cal. 1995) (dismissing complaint in part because "allegations are bereft of any details whatsoever."); *In re United States Surgical Corp. Sec. Litig.*, 1995 U.S. Dist. CHAPTER 5 Civil Liabilities Under the Exchange Act

1-5 Federal Securities Exchange Act of 1934 § 5.03

AUTHOR: Marc B. Dorfman and Ellen M. Wheeler

§ 5.03 Implied Civil Liabilities

Although federal courts have long recognized "implied" rights of action that supplement, and sometimes overshadow, express remedies Congress created for injured investors, the Supreme Court in recent years has become increasingly hostile to implied rights. Despite general hostility to implied private rights of action, the Court has adhered to its decisions allowing private parties to sue under Rule 14a-9, outlawing fraud in proxy solicitations, and *Rule 10b-5*, prohibiting fraud in securities transactions. In addition, the Court has held that defrauded purchasers of securities may bypass express remedies under the Securities Act to seek damages under *Rule 10b-5* instead.

[1] Increasing Judicial Hostility to Implied Rights of Action Generally

Courts once routinely let private plaintiffs sue for damages caused by a violation of a federal statute designed to benefit a special class, even if the statutory language did not create an express cause of action. n1 Despite the care Congress used to create and define civil remedies for injured investors in the Securities Act of 1933 and Securities Exchange Act of 1934, for many years courts supplied additional and different remedies. The Supreme Court approved of this practice in *J.I. Case v. Borak*, n2 which inferred a private right of action under Section 14(a) of the Exchange Act and Rule 14a-9 thereunder. n3 The Court's broad rationale that private actions would aid in "enforcement" of the federal statute encouraged lower courts to recognize numerous additional private rights of action. Following *Borak*, though, the Court has taken an increasingly dim view of implied private rights of action. In *Cort v. Ash*, n4 a non-securities case decided in 1975, the Court held that private rights of action would no longer automatically be inferred. n5 More recent decisions emphasize a private right of action will not be available without some affirmative indication of Congressional intent. n6 Some recent lower court decisions have gone one step further, establishing a presumption against implied private rights of action that can be overcome only by strong evidence of Congressional intent to provide a private right. n7

In 1994, the Supreme Court indirectly reaffirmed its restrictive approach to implied private rights of action in *Central Bank of Denver*. n8 The Court held there is no aiding and abetting liability in private actions under Section 10(b), n9 reasoning that "the statutory text controls the definition of conduct covered by Section 10(b)," n10 and the text of the Exchange Act does not itself encompass aiders and abettors. n11 The Court found it unnecessary to examine legislative history. n12 The Court also said that when the text of the statute is clear, policy arguments will not be considered unless "adherence to the text and structure would lead to a result so bizarre that Congress could not have intended it." n13

Construed narrowly, *Central Bank* does not affect the analysis of private rights of action at all. As the Court emphasized, n14 the case concerned the nature of the statutory right itself rather than whether there was an implied remedy for a statutory right. Nevertheless, *Central Bank's* strict textual approach clearly is in tension with implied private rights of action.

[2] Implied Liabilities under Particular Provisions other than Section 10(b)

The status of implied private liabilities under provisions of the securities laws is now established. Despite general hostility to implied private rights of action, the Supreme Court has reaffirmed that private rights of action are implied by Section 10(b) of the Exchange Act and *Rule 10b-5*, and by Section 14(a) of the Exchange Act and Rule 14a-9. n15 On the other hand, the Court has held that a defeated tender offeror cannot sue for damages under Section 14(e) of the Exchange Act, n16 and that there is no implied right of action under Section 17(a) of that Act. n17 Additionally, in a case where it held that there is no private cause of action under the anti-fraud provision of the Investment Advisers Act of 1940, the Court concluded that the clients of an investment adviser could rescind their contracts with the adviser if those contracts were made or performed in violation of the Act. n18

Whether courts will continue to infer private rights of action under other provisions of the Exchange Act and the Securities Act is less certain. n19 The lower federal courts have recognized implied liabilities under numerous provisions of the federal securities laws, the margin regulations, and the rules of self-regulatory organizations. n20 Because many of these lower court decisions pre-dated the Supreme Court's current restrictive approach to implied private causes of action, however, it is unlikely these decisions would be followed today.

The remainder of this section briefly addresses implied rights of action under Section 17(a) of the Securities Act, as well as implied rights of action under Section 14(e) and under Section 29(b) of the Exchange Act. n21 The latter section may assume greater importance given the curtailment of implied private remedies under particular sections of the Act.

[a] Section 17(a) of the Securities Act. n22 Section 17(a) of the Securities Act makes it unlawful for any person to commit fraud or to make false or misleading statements in the *offer or sale* of securities. n23 This language is very similar to *Rule 10b-5*. Suing under Section 17(a), however, might offer plaintiffs several significant advantages. For one, Section 17 allows plaintiffs to choose a state or federal forum. n24 Second, a plaintiff suing under Section 17(a)(2) or (3) does not have to prove the defendant acted with scienter. n25 In contrast, purchasers suing under *Rule 10b-5* must file in a federal court n26 and must prove scienter. n27 Moreover, courts recognizing a private cause of action under Section 17(a) may grant *offerees* as well as purchasers the right to seek damages under that section, whereas mere offerees cannot sue under *Rule 10b-5*. n28

Although several early lower court decisions concluded there is an implied private right of action under Section 17(a), and the Supreme Court has expressly reserved judgment on the issue, n29 more recent authority is overwhelmingly to the contrary. n30 This reflects the increasing judicial hostility towards private rights of action, a hesitation to let plaintiffs avoid limitations Congress built into the express liability sections of the securities laws, and unwillingness to circumvent restrictions courts have imposed on *Rule 10b-5* actions.

[b] Section 14(e) of the Exchange Act. n31 Section 14(e) prohibits any person from engaging in "fraudulent, deceptive, or manipulative acts or practices ... in connection with any tender offer." When Section 14(e) was enacted in 1968, Congress may well have expected courts to allow private parties to sue to enforce the section's prohibitions. n32 Most courts examining the issue have concluded that some private parties can sue for some kinds of relief.

In *Piper v. Chris-Craft Industries, Inc.*, n33 the Supreme Court held that Section 14(e) does not grant a tender offeror an implied cause of action for damages against a competing bidder. The Court reserved judgment on both whether a target company or its shareholders can assert claims under Section 14(e), n34 and whether a tender offeror can seek

injunctive relief against a competing bidder's violation of the section. n35 Some circuit courts have either held or assumed that Section 14(e) impliedly grants defrauded shareholders a cause of action. n36 In addition, a number of courts have found the section will support an award of injunctive relief to a tender offeror n37 or a target company. n38

[c] Section 29(b) of the Exchange Act Section 29(b) of the Exchange Act provides that contracts made in violation of "any" provision of the Act (with enumerated exceptions) or any rule adopted thereunder, and contracts whose performance would involve such a violation, are "void" as to the rights of (1) any violator and (2) any person, not a party to the contract, who acquires any right with actual knowledge of facts resulting in the violation. n39 The potential effect of this section is great, and assumes heightened significance given the curtailment of implied private remedies under specific sections of the Act. n40 The provision conceivably could be invoked to void a wide variety of other transactions where there has been an Exchange Act violation. n41

Despite this potential importance, Section 29(b) has received little judicial attention. The few cases discussing the provision do resolve some interpretive questions, however. First, despite use of the word "void," Section 29(b) renders the contract *voidable* at the option of the innocent party instead of making the contract a nullity, creating no enforceable rights even in a party innocent of the violation." n42 Second, only a contractual party can invoke Section 29(b). n43 Third, at a minimum, Section 29(b) lets plaintiffs sue for rescission, restitution, and similar equitable relief, n44 with equitable defense similarly allowed.

In other important respects, courts have reached disparate interpretations of Section 29(b). Where some courts held that Section 29(b) voids all contracts that are either illegal when made or as in fact performed, n45 others have interpreted the section to find that it voids only contracts whose terms necessarily involve a violation of the Exchange Act. n46

[3] Construing the Scope of Recognized Implied Private Rights of Action

The analysis for determining the scope of recognized private rights of action evidently is less restrictive than that which decides whether a particular statutory provision implies a private remedy in the first place. As the Supreme Court explained in 1993 in *Musick, Peeler & Garrett v. Employers Insurance of Wausau*, n47 courts possess limited discretion when determining the contours and incidents of well-established implied private remedies:

The private right of action under *Rule 10b-5* was implied by the judiciary on the theory [that] courts should recognize private remedies to supplement federal statutory duties, not on the theory Congress had given an unequivocal direction to the courts to do so Thus, it would be futile to ask whether the 1934 Congress also displayed a clear intent to create a contribution right collateral to the remedy Having implied the underlying liability in the first place, to now disavow any authority to allocate it on the theory that Congress has not addressed the issue would be most unfair to those against whom damages are assessed The federal courts have accepted and exercised the principal responsibility for the continuing elaboration of the scope of the 10b-5 right and the definition of the duties it imposes Indeed, [a Congressional statute limiting the retroactive effect of a Supreme Court decision concerning the statute of limitations applicable to a 10b-5 action] not only treats the 10b-5 action as an accepted feature of our securities laws, but avoids entangling Congress in its formulation. That task, it would appear, Congress has left to us. n48

In exercising this discretion, a court first must decide whether it can reasonably infer how the enacting Congress would have addressed the issue if the implied private right of action been express. If this inquiry yields a convincing answer, that answer is determinative. n49 Often, however, a court cannot discern what Congress might have done. n50 In such cases, policy considerations are relevant in determining the contours of an implied private right of action. n51 In no case may a court construe a private cause of action to create liability for conduct not arguably proscribed by the statute's text. n52

Applying this analysis, the Supreme Court in 1993 concluded that a defendant held liable in a private action under Section 10(b) has an implied cause of action for contribution from joint tortfeasors. n53 On the other hand, in 1991, the Court interpreted the implied private right of action under Exchange Act Section 14(a) and Rule 14a-9 narrowly. It concluded that causation of damages compensable under Section 14(a) cannot be shown by members of a class of minority shareholders whose votes are not required by law or corporate bylaw to authorize the corporate action subject to the proxy solicitation. n54

[4] Relationship between Express and Implied Liabilities

Shortly after courts began to recognize implied private rights of action under federal securities laws, they encountered the argument that implied remedies should not be available to redress wrongs that Congress had expressly remedied. Proponents argued that implying private remedies frustrated Congress' intended statutory scheme by permitting plaintiffs to avoid strictures inherent in express remedies. But, an absolute refusal to afford an implied right of action arguably leads to anomalous results in some cases. It deprives injured investors of an implied remedy in contexts where Congress specifically sought to protect them, while affording a private remedy in areas where Congress arguably was less concerned with investor protection (*i.e.*, areas where it did not expressly provide for an express remedy).

The chief controversy concerned the relationship between the implied right of action under *Rule 10b-5* and the express remedies granted in the Securities Act of 1933. The Supreme Court spoke on the issue in *Herman & MacLean v. Huddleston*. n55 Bypassing a potential remedy under Section 11 of the 1933 Act, the *Huddleston* plaintiffs brought an action under *Rule 10b-5* against defendants that helped prepare a prospectus. A unanimous Supreme Court held that "availability of an express remedy under § 11 of the 1933 Act does not preclude defrauded purchasers of registered securities from maintaining an action under § 10(b) of the 1934 Act." n56 The Court reasoned that Section 11 of the Securities Act and Section 10(b) of the Exchange Act "involve distinct causes of action and were intended to address different types of wrongdoing." n57 Section 11, designed to assure compliance with disclosure provisions of the Securities Act, imposes a strict standard of liability on those who play a direct role in a registered offering. Section 10(b), on the other hand, is a "catch-all" provision that was designed to prohibit the use by any person of any manipulative or deceptive device in connection with the purchase or sale of any security. Although some conduct actionable under Section 11 might also be actionable under Section 10(b), the Court saw "no reason to carve out an exception to Section 10(b) for fraud occurring in a registration statement." n58 This would have deprived purchasers of registered securities of protection that Section 10(b) grants to all persons who engage in the purchase or sale of securities. n59

The Court buttressed its decision by noting that Congress included "savings clauses" in both the Securities Act and the Exchange Act n60 to ensure that express remedies would not preempt other rights of action. n61 Congress also impliedly ratified a cumulative construction of the securities acts in 1975 when it comprehensively reviewed them and chose not to alter Section 10(b), which most federal courts found available to plaintiffs even when express remedies were also available. n62 Finally, the Court concluded that a cumulative construction of the securities laws would further their broad remedial purposes. n63

Construed narrowly, *Huddleston* establishes only that a plaintiff with a possible cause of action under Section 11 of the 1933 Act can bypass that section and sue under *Rule 10b-5*. The decision does not necessarily stand for the broader proposition that *Rule 10b-5* offers a remedy independent of, and cumulative with, *all* express remedies in the securities acts. In *Huddleston*, the Court observed that the recognition of an implied right of action under *Rule 10b-5* does not "nullify" procedural restrictions on Section 11 actions, because private plaintiffs must prove scienter under *Rule 10b-5*. n64 It is more difficult, however, to reconcile the right to sue under *Rule 10b-5* with the existence of the express remedies under Sections 9(e) and 18 of the Exchange Act, because both of these provisions require an intent showing that is at least as stringent as the scienter requirement of *Rule 10b-5*. n65 If a party complaining of misconduct covered by Section 9(e) or Section 18 can forego his express remedy and sue under *Rule 10b-5*, these two express liability provisions are effectively "nullified." n66

Subsequent lower federal court decisions, however, overwhelmingly support a broader reading of *Huddleston*: the private remedy under *Rule 10b-5* is cumulative with all of the securities acts' express remedies. n67 As a number of these decisions recognize, displacing *Rule 10b-5* with any express remedy yields an anomalous result. It makes the Rule's benefits unavailable to one class of persons to whom Congress gave preferential treatment, but available to other securities traders alleging that they were victims of fraud. It seems implausible the Congress that enacted the Exchange Act would have selectively denied the benefits of *Rule 10b-5* to the very investors given an express remedy. n68

FOOTNOTES:

(n1)Footnote 1. *Merrill Lynch, Pierce, Fenner & Smith, Inc. v. Curran*, 456 U.S. 353, 374, 102 S. Ct. 1825, 1837 (1982) . (Prior to 1975, "[i]f a statute was enacted for the benefit of a special class, the judiciary normally recognized a remedy for members of that class Under this approach, federal courts, following a common-law tradition, regarded the denial of a[n] [implied] remedy as the exception rather than the rule."); *Lampf, Pleva, Lipkind, et al. v. Gilbertson*, 501 U.S. 350, 366, 111 S. Ct. 2773, 2783-2784 (opinion of Stevens, J. dissenting) (1991) ("The private cause of action for violation Section 10(b) was first recognized in *Kardon v. National Gypsum Co.*, 69 F. Supp. 512 (E.D. Pa. 1946) . In recognizing this implied right of action, Judge Kirkpatrick merely applied what was then a well-settled rule of federal law. As was true during most of our history, the federal courts then presumed that a statute enacted to benefit a special class provided a remedy for those members injured by violations of the statute. Judge Kirkpatrick did not make "new law" when he applied this presumption to a federal statute enacted for the benefit of investors in securities that are traded in interstate commerce.").

(n2)Footnote 2. 377 U.S. 426, 84 S. Ct. 1555 (1964) .

(n3)Footnote 3. Section 14(a) of the Exchange Act declares it "unlawful" for any person to solicit proxies in violation of rules prescribed by the SEC. Rule 14a-9 prohibits the making of false or misleading statements in a solicitation of proxies.

(n4)Footnote 4. 422 U.S. 66, 78, 95 S. Ct. 2080, 2087-2088 (1975) .

(n5)Footnote 5. Specifically, the Court indicated that four criteria were relevant in determining whether to infer a private right of action:

In determining whether a private remedy is implicit in a statute not expressly providing one, several factors are relevant. First, is the plaintiff 'one of the class for whose *especial* benefit the statute was enacted,' *Texas Pacific R. Co. v. Rigsby*, 241 U.S. 33, 39 (1916) (emphasis supplied) -- that is, does the statute create a federal right in favor of the plaintiff? Second, is there any indication of legislative intent, explicit or implicit, either to create such a remedy or to deny one? See, e.g., *National Railroad Passenger Corp. v. National Assn. of Railroad Passengers*, 414 U.S. 453, 458, 460 (1974) (Amtrak). Third, is it consistent with the underlying purposes of the legislative scheme to imply such a remedy for the plaintiff? See, e.g., *Amtrak, supra* ; *Securities Investor Protection Corp. v. Barbour*, 421 U.S. 412, 423 (1975) ; *Calhoon v. Harvey*, 379 U.S. 134 (1964) . And finally, is the cause of action one traditionally relegated to state law, in an area basically the concern of the States, so that it would be

inappropriate to infer a cause of action based solely on federal law? See *Wheeldin v. Wheeler*, 373 U.S. 647, 652 (1963) ; cf. *J.I. Case Co. v. Borak*, 377 U.S. 426, 434 (1964) ; *Bivens v. Six Unknown Federal Narcotics Agents*, 403 U.S. 388, 394-395, 400 (1971) .

(n9)Footnote 9. Subsequent to the Central Bank decision, Congress authorized the SEC to bring civil actions for aiding and abetting a violation of the securities laws. See Section 104(e) of the Reform Act, 15 U.S.C. § 78t(e),

(n10)Footnote 10. 511 U.S. at 175, 114 S. Ct. at 1447 .

(n11)Footnote 11. 511 U.S. at 177, 114 S. Ct. at 1448 .

(n12)Footnote 12. 511 U.S. at 177, 114 S. Ct. at 1448 .

(n13)Footnote 13. 511 U.S. at 188, 114 S. Ct. at 1453-1454 (citations and quotations marks omitted).

(n14)Footnote 14. 511 U.S. at 171-74, 114 S. Ct. at 1445-1447 .

(n15)Footnote 15. See, e.g., *Central Bank v. First Interstate Bank*, 511 U.S. 164, 171, 114 S. Ct. 1439, 1445 (1994) ("The 1933 and 1934 Acts create an extensive scheme of civil liability Private plaintiffs may sue under the express private rights of action contained in the Acts. They may also sue under private rights of action we have found to be implied by the terms of Section 10(b) and Section 14(a) of the 1934 Act.").

(n16)Footnote 16. *Piper v. Chris-Craft Indus., Inc.*, 430 U.S. 1, 42, 97 S. Ct. 926, 949-950 (1977) . Section 14(e) outlaws fraudulent practices in connection with a tender offer. See § 5.03[3][b] *infra*. for a discussion of private actions under Section 14(e).

(n17)Footnote 17. *Touche Ross & Co. v. Redington*, 442 U.S. 560, 579, 99 S. Ct. 2479, 2491 (1979) . Section 17(a) requires broker-dealers and others to keep such records and file such reports as the Commission may prescribe.

(n18)Footnote 18. *Transamerica Mortgage Advisors, Inc. v. Lewis*, 444 U.S. 11, 24-25, 100 S. Ct. 242, 249-250 (1979) . The Court held that the clients could seek rescission under Section 215(b) of the Investment Advisers Act. Section 215(b) of the Investment Advisers Act provides that:

Every contract made in violation of any provision of this title and every contract heretofore or hereafter made, the performance of which involves the violation of, or the continuance of any relationship or practice in violation of any provision of this title, or any rule, regulation, or order thereunder, shall be void (1) as regards the rights of any person who, in violation of any such provision, rule, regulation, or order, shall have made or engaged in the performance of any such contract, and (2) as regards the rights of any person who, not being a party to such contract, shall have acquired any right thereunder with actual knowledge of the facts by reason of which the making or performance of such contract

was in violation of any such provision.

As further discussed below, in § 5.03[2][c], the Court's recognition of a right of rescission under Section 215(b) of the Investment Advisers Act suggests that there is a similar right under Section 29(b) of the Exchange Act, which declares that contracts made or performed in violation of that Act shall be void.

(n19)Footnote 19. Notwithstanding Central Bank, courts have continued to infer private rights of action for various provisions of the Investment Company Act of 1940 (ICA). *E.g.*, *Young v. Nationwide Life Insur. Co.*, 2 F. Supp. 2d 914, 925-926 (S.D. Tex. 1998) (private right of action implied under ICA Section 36(a)); *Strougo v. Scudder, Stevens & Clark, Inc.*, 964 F. Supp. 783, 796-97 (S.D.N.Y. 1997) (same); *In re Nuveen Fund Litig.*, 1996 U.S. Dist. LEXIS 8071, at *38 (N.D. Ill. 1996) (same); *Blatt v. Merrill Lynch, Pierce, Fenner & Smith, Inc.*, 916 F. Supp. 1343, 1349 (D.N.J. 1996) (private action for damages implied under ICA Section 47). Such decisions are predicated in part on specific legislative history in the ICA affirmatively indicating that Congress expected the courts to infer private remedies.

(n20)Footnote 20. For a list of provisions that have generated implied causes of action, see 2 A.L.I., Federal Securities Code 775-79 (1980).

(n21)Footnote 21. Implied rights of action under Sections 13(d) and 14(a) of the Exchange Act are considered in Chapters 4 and 5A.

(n22)Footnote 22. Section 17(a) states: "It shall be unlawful for any person in the offer or sale of any securities ... by the use of any means or instruments of transportation or communication in interstate commerce or by the use of the mails, directly or indirectly (1) to employ any device, scheme or artifice to defraud, or (2) to obtain money or property by means of any untrue statement of a material fact or any omission to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading, or (3) to engage in any transaction, practice, or course of business which operates or would operate as a fraud or deceit upon the purchaser."

Additionally, Section 17(c) explicitly makes the exemptions contained in Section 3 of the Securities Act inapplicable to the provisions of Section 17. The exemptions contained in Section 4 are also inapplicable, since by their own terms they are exemptions only from the operation of Section 5, which establishes the registration and prospectus requirements.

(n23)Footnote 23. As indicated *supra*, the Securities Act is concerned with offers to sell and sales, not with purchases or offers to purchase. The lack of a general federal prohibition on fraudulent purchases was the principal reason for the adoption of *Rule 10b-5*.

(n24)Footnote 24. Section 22(a) of the Securities Act grants the state and federal courts concurrent jurisdiction "of all suits in equity and actions at law brought to enforce any liability or duty created by" the Act. The section also provides that when the plaintiff initiates his suit in a state court, the case cannot be removed to a federal court.

(n25)Footnote 25. In *Aaron v. SEC*, 446 U.S. 680, 697, 697, 100 S. Ct. 1945, 1956 (1980), the Supreme Court held that the language of § 17(a) requires scienter under § 17(a)(1), but not under § 17(a)(2) or § 17(a)(3).

(n26)Footnote 26. Section 27 of the Exchange Act grants the federal courts "exclusive jurisdiction of violations of this title or the rules and regulations thereunder, and of all suits in equity and actions at law brought to enforce any liability or duty created by this title or the rules and regulations thereunder."

(n27)Footnote 27. *Ernst & Ernst v. Hochfelder*, 425 U.S. 185, 193, 96 S. Ct. 1375, 1381 (1976).

(n28)Footnote 28. In *Blue Chip Stamps v. Manor Drug Stores*, 421 U.S. 723, 95 S. Ct. 1917 (1975), which held that persons who have not purchased or sold securities cannot sue for damages under *Rule 10b-5*, the Supreme Court

contrasted the language of Section 10(b) of the Exchange Act with that of Section 17(a) of the Securities Act. 421 U.S. at 733-34, 95 S. Ct. at 1924. The Court noted that while Section 10(b) is directed at fraud "in connection with the purchase or sale of securities," Section 17(a) reaches fraud "in the offer or sale" of securities. 421 U.S. at 733-34, 95 S. Ct. at 1924. Some lower courts have cited the discussion in *Blue Chip Stamps* in support of the proposition that an offeree who did not purchase securities, but who was injured by the defendant's misconduct, can sue under Section 17(a). *Reid v. Madison*, 438 F. Supp. 332, 334-35 (E.D. Va. 1977); *Wulc v. Gulf & Western Industries, Inc.*, 400 F. Supp. 99, 103 (E.D. Pa. 1975).

(n29)Footnote 29. See *Herman & MacLean v. Huddleston*, 459 U.S. 375, 378 n. 2, 100 S. Ct. 683, 685 n. 2 (1983); *International Bhd. of Teamsters v. Daniel*, 439 U.S. 551, 557 n. 9, 99 S. Ct. 790, 795 n. 9 (1979); *Blue Chip Stamps v. Manor Drug Stores*, 421 U.S. 723, 733 n. 6, 95 S. Ct. 1917, 1925 n. 6 (1975).

(n30)Footnote 30. E.g., *Maldonado v. Dominguez*, 137 F.3d 1, 6 (1st Cir. 1998); *Finkel v. Stratton Corp.*, 962 F.2d 169, 174-175 (2d Cir. 1992); *Newcome v. Esrey*, 862 F.2d 1099, 1107 (4th Cir. 1988); *Corwin v. Marney, Orton Invs.*, 788 F.2d 1063, 1066-1067 (5th Cir. 1986); *Sears v. Likens*, 912 F.2d 889, 893 (7th Cir. 1990); *Krause v. Perryman*, 827 F.2d 346, 349 (8th Cir. 1987); *In re Wash. Pub. Power Supply Sys. Sec. Litig.*, 823 F.2d 1349, 1354 (9th Cir. 1987); *Bath v. Bushkin, Gaims, Gaines and Jonas*, 913 F.2d 817, 819 (10th Cir. 1990); *Currie v. Cayman Resources Corp.*, 835 F.2d 780, 784-785 (11th Cir. 1988).

(n31)Footnote 31. Section 14(e) states: "It shall be unlawful for any person to make any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements made, in the light of the circumstances under which they are made, not misleading, or to engage in any fraudulent, deceptive, or manipulative acts or practices, in connection with any tender offer or request or invitation for tenders, or any solicitation of security holders in opposition to or in favor of any such offer, request, or invitation. The Commission shall, for the purposes of this subsection, by rules and regulations define, and prescribe means reasonably designed to prevent, such acts and practices as are fraudulent, deceptive, or manipulative."

(n32)Footnote 32. Just a few years earlier, the Supreme Court had decided *J.I. Case Co. v. Borak*, 377 U.S. 426, 84 S. Ct. 1555 (1964), which encouraged the lower courts to recognize implied private rights of action. See § 5.04[1] *infra*.

(n33)Footnote 33. 430 U.S. 1, 97 S. Ct. 926 (1977).

(n34)Footnote 34. 430 U.S. 1 at 42 n.28, 97 S. Ct. at 949 n.28.

(n35)Footnote 35. 430 U.S. 1 at 47 n.33, 97 S. Ct. at 952 n.33.

(n36)Footnote 36. See, e.g., *Schlesinger Inv. Partnership v. Fluor Corp.*, 671 F.2d 739, 743 (2d Cir. 1982); *Indiana Nat'l Bank v. Mobil Oil Corp.*, 578 F.2d 180, 183 n. 5 (7th Cir. 1978).

In *Schreiber v. Burlington Northern, Inc.*, 472 U.S. 1, 2, 105 S. Ct. 2458, 2459 (1985), the Supreme Court upheld the dismissal of a suit under Section 14(e) on the ground that the plaintiff shareholder had failed to allege any "fraudulent, deceptive, or manipulative" acts or practices on the part of the defendants. The Court did not discuss whether a shareholder has a right to sue under the section.

1982); *Prudent Real Estate Trust v. Johncamp Realty, Inc.*, 599 F.2d 1140, 1148 (2d Cir. 1979) .

(n39)Footnote 39. The text of Section 29(b) is as follows:

Every contract made in violation of any provision of this title or of any rule or regulation thereunder, and every contract (including any contract for listing a security on an exchange) heretofore or hereafter made the performance of which involves the violation of, or the continuance of any relationship or practice in violation of, any provision of this title or any rule or regulation thereunder, shall be void (1) as regards the rights of any person who, in violation of any such provision, rule, or regulation, shall have made or engaged in the performance of any such contract, and (2) as regards the rights of any person who, not being a party to such contract, shall have acquired any right thereunder with actual knowledge of the facts by reason of which the making or performance of such contract was in violation of any such provision, rule or regulation: *Provided*, (A) That no contract shall be void by reason of this subsection because of any violation of any rule or regulation prescribed pursuant to paragraph (3) of subsection (c) of section 15 of this title, and (B) that no contract shall be deemed to be void by reason of this subsection in any action maintained in reliance upon this subsection, by any person to or for whom any broker or dealer sells, or from or for whom any broker or dealer purchases, a security in violation of any rule or regulation prescribed pursuant to paragraph (1) or (2) of subsection (c) of section 15 of this title, unless such action is brought within one year after the discovery that such sale or purchase involves such violation and within three years after such violation. The Commission may, in a rule or regulation prescribed pursuant to such paragraph (2) of such section 15(c), designate such rule or regulation, or portion thereof, as a rule or regulation, or portion thereof, a contract in violation of which shall not be void by reason of this subsection.

The other securities laws contain essentially similar provisions. See 9 Louis Loss & Joel Seligman, *Securities Regulation* 4301-4312 (3d ed. 1992).

(n40)Footnote 40. See, e.g., *Rhoades v. Powell*, 644 F. Supp. 645, 661-65 (E.D. Cal. 1986) (declining to limit rescission under Section 29(b) to contract violating sections of the Exchange Act that themselves are the source of private rights of action).

(n48)Footnote 48. *Musick*, 508 U.S. at 291-94, 113 S. Ct. at 2088-2089.

(n49)Footnote 49. "The parties have devoted considerable portions of their briefs to debating whether a rule of contribution or of no contribution is more efficient or more equitable. Just as we declined to rule on these matters in ... [prior cases], we decline to do so here. Our task is not to assess the relative merits of the competing rules but rather to attempt to infer how the 1934 Congress would have addressed the issue had the 10b-5 action been included as an express provision in the Exchange Act. We do this not as an exercise in historical reconstruction for its own sake, but to ensure that the rules established to govern the 10b-5 action are symmetrical and consistent with the overall structure of the Exchange Act and, in particular, with those portions of the Exchange Act most analogous to the private 10b-5 right of action that is of judicial creation. Although we have narrowed our discretion in this regard over the years, our goals in establishing limits for the 10b-5 action have remained the same: to ensure the action does not conflict with Congress' own express rights of action, to promote clarity, consistency, and coherence for those who rely upon or are subject to, 10b-5 liability, and to effect Congress' objectives in enacting the securities laws. Inquiring about what a given Congress might have done, though not a promising venture as a general proposition, does in this case yield an answer we find convincing." *Musick*, 508 U.S. at 294-95, 113 S. Ct. at 2089-2090 (citations and quotations omitted).

(n50)Footnote 50. 508 U.S. at 295, 113 S. Ct. at 2090 ("Inquiring about what a given Congress might have done ... [is] not a promising venture as a general proposition.").

(n51)Footnote 51. In *Virginia Bankshares, Inc. v. Sandberg*, 501 U.S. 1083, 111 S. Ct. 2749 (1991) , the Court indicated that when an implied cause of action is an established part of the securities laws that has developed without clear indications of congressional intent, "the contours of [the implied private right] need not be frozen absolutely when the result would be demonstrably inequitable to a class of would-be plaintiffs with claims comparable to those previously recognized." 501 U.S. at 1104, 111 S. Ct. at 2764 . Whether expansion of that cause of action is warranted depends on examination of "policy reasons for deciding where the outer limits of the right should lie." 501 U.S. at 1104-05, 111 S. Ct. at 2764-2765 .

(n52)Footnote 52. *Central Bank v. First Interstate Bank*, 511 U.S. 164, 175-176, 114 S. Ct. 1439, 1447-1448 (1994) .

(n53)Footnote 53. *Musick, Peeler & Garrett v. Employers Ins. of Wausau*, 508 U.S. 286, 286, 113 S. Ct. 2085, 2085 (1993) . *See also infra* § 5.04[7][c].

(n54)Footnote 54. *Virginia Bankshares, Inc. v. Sandberg*, 501 U.S. 1083, 1099, 111 S. Ct. 2749, 2761-2762 (1991) .

(n55)Footnote 55. 459 U.S. 375, 103 S. Ct. 683 (1983) .

(n56)Footnote 56. 459 U.S. at 387, 103 S. Ct. at 689-690 .

(n57)Footnote 57. 459 U.S. at 381, 103 S. Ct. at 687 .

(n58)Footnote 58. 459 U.S. at 382, 103 S. Ct. at 687 .

(n59)Footnote 59. 459 U.S. at 383, 103 S. Ct. at 687-688 .

(n60)Footnote 60. Section 16 of the Securities Act and Section 28(a) of the Exchange Act provide that the rights and remedies afforded by the respective Acts are in addition to any other rights and remedies available at law or in equity.

(n61)Footnote 61. 459 U.S. at 383, 103 S. Ct. at 687-688 .

(n62)Footnote 62. 459 U.S. at 384-386, 103 S. Ct. at 688-689 .

(n63)Footnote 63. 459 U.S. at 386-387, 103 S. Ct. at 689-690 .

(n64)Footnote 64. 459 U.S. at 384, 103 S. Ct. at 688 .

(n65)Footnote 65. Section 9(e) of the Exchange Act requires the plaintiff to show that the defendant "willfully" participated in manipulative activity, and Section 18 exonerates a defendant who proves that he "acted in good faith" and without knowledge that a statement attributed to him was false or misleading.

(n66)Footnote 66. Before the Supreme Court decided *Huddleston*, a Fifth Circuit panel held that an action under *Rule 10b-5* would not lie to remedy misconduct actionable under Section 9(e) of the Exchange Act, because that section would be "nullified" if plaintiffs who might have sued under it were permitted to sue under *Rule 10b-5* instead. *Chemetron Corp. v. Business Funds, Inc.*, 682 F.2d 1149, 1169-1170 (5th Cir. 1982) . After deciding *Huddleston*, the Supreme Court vacated the judgment in *Chemetron* and remanded the case to the Fifth Circuit for reconsideration. *Chemetron Corp. v. Business Funds, Inc.*, 460 U.S. 1007, 103 S. Ct. 1244 (1983) . On remand, the panel held that the plaintiff had "an independent cause of action" under *Rule 10b-5*. *Chemetron Corp. v. Business Funds, Inc.*, 718 F.2d 725, 727 (5th Cir. 1983) . The panel concluded that "a fully proved Section 10(b) remedy can no longer be denied because of some other provision of the Securities Acts of 1933 or 1934." *Id.* at 728. The Fifth Circuit subsequently granted a rehearing en banc in *Chemetron*. *Chemetron* was never argued before the full court, however, because the parties reached a settlement.

CHAPTER 5 Civil Liabilities Under the Exchange Act

1-5 Federal Securities Exchange Act of 1934 § 5.04

AUTHOR: Marc B. Dorfman and Ellen M. Wheeler

§ 5.04 Implied Civil Liabilities under Section 10(b) and Rule 10b-5

Section 10(b) makes it unlawful for any person to "use or employ, in connection with the purchase or sale of any security registered on a national securities exchange or any security not so registered, any manipulative or deceptive device or contrivance in contravention of such rules and regulations as the Commission may prescribe... ." *Rule 10b-5*, promulgated pursuant to Section 10(b), makes it unlawful for any person:

- (1) [t]o employ any device, scheme, or artifice to defraud;
- (2) [t]o make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made, in light of the circumstances under where they were made, not misleading; or
- (3) [t]o engage in any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person, in connection with the purchase or sale of any security.

Despite seemingly simple phrasing, Section 10(b) and accompanying *Rule 10b-5* are at the base of much of the Exchange Act's civil litigation, overshadowing any other express or implied action. An implied right of action under *Rule 10b-5* is firmly established, first announced in 1946 in *Kardon v. National Gypsum Co.* ⁿ¹ and later accepted by the Supreme Court. ⁿ² Civil litigation based on 10b-5's implied right of action dwarfs all other express or implied causes of action under the Exchange Act. Section 10(b) and *Rule 10b-5* have proven highly adaptable to a variety of fraud theories, for example, applying when an entity misrepresents or omits to disclose a material fact, when an entity manipulates the price of a stock, and when corporate insiders trade on non-public information.

This Section discusses the principal substantive and procedural issues in a private civil action under Section 10(b), an area undergoing considerable change as a result of the Reform Act. Alarmed by so-called "strike suits," Congress passed the Reform Act to eliminate frivolous litigation by imposing significant changes to both substantive and procedural rules applicable to securities litigation, and 10b-5 cases in particular. As Supreme Court Chief Justice John Marshall said long ago in *Marbury v. Madison*, Congress passes laws, but courts "say what the law is," a jurisprudential truism born out with a vengeance in Reform Act litigation, where the federal courts continue to issue a steady stream of new, important decisions mapping out the meaning and application of that statute.

The Reform Act also made uniform a practice not previously followed in all courts: discovery is stayed in a securities fraud case pending a motion to dismiss "unless the court finds upon motion of any party that particularized discovery is necessary to preserve evidence or to prevent undue prejudice to that party." n3 The automatic stay of discovery provision of the Reform Act applies to all private lawsuits, not exclusively to class actions. Initial disclosures required under the Federal Rules of Civil Procedure and local court rules fall within the "other proceedings" covered by the stay. n4 Some courts have construed "undue prejudice" to mean "improper or unfair detriment." n5 Plaintiffs are not able to show "undue prejudice" by arguing that they need discovery to uncover evidence sufficient to satisfy the pleading requirements under the Reform Act. n6

[1] The Principal Varieties of Fraud

Although Section 10(b) and *Rule 10b-5* have long been regarded as "catchall" provisions, as the Supreme Court has emphasized, the thing that must be caught is "fraud." n7 Although federal courts struggle with whether a "fraud" has been committed for purposes of Section 10(b) and *Rule 10b-5*, particularly when plaintiffs allege corporate mismanagement, n8 reported cases generally involve two broad categories of fraud. The most frequently encountered claims involve allegations that defendants misrepresented or failed to disclose material facts affecting the price of the company's securities, including allegations of fraudulent financial reports. Less frequent are insider trading cases.

[a] Misrepresentations and Omissions

[i] Misrepresentations. Under the Reform Act, a complaint alleging a misleading statement or omission must "specify each statement alleged to have been misleading, the reason or reasons why the statement is misleading and, if an allegation is made on information and belief, the complaint shall state with particularity all the facts on which that belief is formed." n9 This additional requirement supplements Federal Rule of Civil Procedure 9(b), the general rule governing fraud allegations in federal courts, so that plaintiffs must plead "the circumstances constituting fraud ... with particularity." n10

The complaint must attribute the fraudulent statement to a particular defendant or defendants. n11 As one court said, "the plaintiff 'is obligated to distinguish among those they sue and enlighten each defendant as to his or her part in the alleged fraud.'" n12 Some courts, principally the Ninth Circuit, allow a plaintiff to avoid this requirement by using the "group pleading" doctrine, whereby misrepresentations or omissions are attributed to the "group" of senior officers or directors responsible either for the day-to-day operations, or for statements in the corporation's public filings. n13 This theory is available for outside directors or other individuals only if involved in the corporation's daily management. n14 Other circuits, however, have rejected the group pleading doctrine. n15

Although a complaint is typically based on statements made in a corporation's public filings or by its officers and directors, a corporation may be liable for statements made by third parties, particularly where the corporation is deemed "entangled" with statements made by investment analysts working for securities firms. n16 Before liability attaches, there must be some showing the company somehow controlled the content of the analysts' statements. n17 Liability may attach to an analyst's statements where the defendant expressly or impliedly adopts the statements, places his or her imprimatur on them, or otherwise becomes entangled with the analyst to a significant degree. n18 If company management only meets with or provides information to analysts, the company will generally not be liable for analysts' statements. n19 Thus, Courts will require a claim based on an analyst's statements to state with specificity the person affiliated with the defendant company who gave the information to the analyst, how the information was supplied, and facts allowing an inference that defendants exercised the kind of control over the analyst to be liable for the analyst's statement's content. n20

One trap many complaints fall into is alleging "fraud by hindsight." As one court stated, "temporal proximity between positive statements stressing a firm's strengths and announcements of poor economic performance do not create an

inference that earlier statements were fraudulent." n21 Or, as the Seventh Circuit stated in *DiLeo v. Ernst & Young*, n22 in affirming the complaint's dismissal:

The story in this complaint is familiar in securities litigation. At one time the firm bathes itself in a favorable light. Later the firm discloses that things are less rosy. The plaintiff contends that the difference must be attributable to fraud. 'Must be' is the critical phrase, for the complaint offers no information other than the differences between the two statements of the firm's condition. Because only a fraction of financial deteriorations reflect fraud, plaintiffs may not proffer the different financial statements and rest. Investors must point to some facts suggesting that the difference is attributable to fraud... . There is no 'fraud by hindsight,' in Judge Friendly's felicitous phrase, ...and hindsight is all the DiLeos offer.

The Ninth Circuit stated in *GlenFed*:

[I]t is clearly insufficient for plaintiffs to say that the later, sobering revelations make the earlier cheerier statements a falsehood. In the face of such intervening events, a plaintiff must set forth, as part of the circumstances constituting fraud, an explanation as to why the disputed statement was untrue or misleading when made. n23

In *Raab v. Gen. Physics Corp.*, the Fourth Circuit stated: "The market has risks; the securities laws do not serve as investment insurance. Every prediction of success that fails to materialize cannot create on that account an action for securities fraud." n24

[iii] Omissions. Liability for failure to disclose material facts may state a cause of action under Section 10(b) and *Rule 10b-5*. Courts have consistently held, however, that no liability exists for omissions absent a duty to disclose. n25 There are generally three instances creating a duty to disclose: (a) when a corporate insider trades while possessing non-public corporate information; (b) when a corporation realizes that a prior statement was inaccurate, incomplete, or misleading when made; and (c) when a statute or regulation requires disclosure. n26 The absence of any of those circumstances will, in the words of one court, render a complaint alleging material nondisclosure "dead on arrival." n27

Applying these principles, courts have held there is no per se rule requiring a corporation to disclose information, even if the information is material, absent one of those three elements. n28 As the Second Circuit said in *SEC v. Texas Gulf Sulphur*, the existence of a duty to disclose does not "suggest that material facts must be disclosed immediately; the timing of disclosure is a matter for the business judgment of the corporate officers, entrusted with the management of the corporation within the affirmative disclosure requirements promulgated by the exchanges and the SEC." n29 Furthermore, corporations may not have a duty to disclose internal financial projections and other similar soft information, though this limitation is not without exception. n30 The court in *Shaw v. Digital Equipment Corp.* held a company had a duty to disclose results for a quarter ending eleven days after a prospectus was issued, because during the period it was contemplating a stock transaction the corporation was an "insider" and had the duty either to disclose or abstain from trading. n31

Whether a duty to disclose exists often arises when a professional -- an attorney or accountant -- is accused of violating *Rule 10b-5*. In general, a fiduciary relationship is not, absent other facts, sufficient to create a duty of disclosure to third parties. n32 For example, attorneys who draft documents necessary to effect transactions need not disclose facts about their clients. n33 Moreover, an accountant acting "consistent with the role of an accountant" has no duty to disclose information about an issuer. In *Shapiro v. Cantor*, the court held an accountant was not liable for failing to disclose the criminal conviction of one of the issuer's officers and the controlling interest of the officer's minor son in a limited partnership that controlled the issuer. The court affirmed dismissal because the accountants were alleged merely to have acted "together with" the other defendants to sell interests in the issuer, confined themselves to "providing the financial projections that were included with the offering memorandum," and had no "fiduciary or other similar relation of trust

and confidence" with the plaintiffs. Absent such a relationship, the court held there was no duty to disclose. n34

[b] Trading on Non-Public Information. *Rule 10b-5* has also been used to regulate trading by a corporate "insider" using non-public information, although such cases occur less frequently than ones based on misrepresentations or omissions.

It has long been held that, as a general proposition, insiders violate *Rule 10b-5* by using their position to trade based on material non-public information taking unfair advantage of the uninformed shareholder. n35 The Supreme Court established the outlines of liability for insider trading in *Chiarella v. United States* n36 and *Dirks v. SEC.* n37 In *Chiarella*, the Supreme Court overturned the conviction of a printer's employee charged with violating *Rule 10b-5* by purchasing securities using non-public information about impending takeover bids. Chiarella learned the identities of prospective targets from documents his employer printed for the acquiring companies, purchased stock in the targets, and then sold at a profit when the takeover bids were publicly announced. In reversing Chiarella's conviction, the Supreme Court held that "a duty to disclose under Section 10(b) does not arise from the mere possession of non-public market information." n38 The Court said Chiarella had no duty to disclose to shareholders of target companies because he did not have a relationship of trust and confidence with them, and thus, he did not perpetrate a fraud on them by purchasing their securities. n39 In language that would later prove critical eighteen years later in *United States v. O'Hagan* n40 the *Chiarella* Court also rejected the government's claim that Chiarella defrauded his employer and the acquiring company because that theory had not been submitted to the jury. n41

In *Dirks*, the Court reiterated that not *all persons* under *all circumstances* are barred from trading in securities while possessing material non-public information. The Court confirmed that the insiders of a corporation owe a fiduciary duty to the corporation's shareholders, and must either disclose material inside information or refrain from trading in the corporation's securities. n42 The Court then held that a tippee who trades using material non-public information disclosed to him by an insider violates *Rule 10b-5* if the insider breached a fiduciary duty by making the disclosure, and the tippee knew or should have known of the breach. In determining whether the insider had breached his duty, the question is "whether the insider personally will benefit, directly or indirectly, from his disclosures." n43 The Court suggested this benefit might take the form of pecuniary gain or reputational benefit that would translate into future earnings. There might also be "objective facts and circumstances" inferring a benefit. n44 Based on this principle, the Court concluded that *Dirks*, an investment analyst who learned about fraud in an insurance company from the company's employees, did not violate *Rule 10b-5* when he tipped selected clients who sold their stock. *Dirks'* informants acted not for personal gain, but to expose fraud. The Court held that because the insiders had not breached a fiduciary duty to the company's shareholders, *Dirks* had not participated in any breach by them required for him to violate *Rule 10b-5*.

Thus, *Dirks* and *Chiarella* establish that (a) "traditional" insiders -- officers, directors, and controlling shareholders -- have a fiduciary obligation to shareholders to disclose any material inside information in their possession or abstain from trading; (b) "temporary" insiders -- underwriters, attorneys, and accountants who enjoy a special relationship of trust and confidentiality with the company and its shareholders and have access to inside information will be treated as if they were true "insiders;" and (c) a tippee who knowingly participates in an insider's breach of fiduciary duty violates *Rule 10b-5* when he trades on information that has been tipped to him. n45 Moreover, courts deem a corporation trading in its own securities an "insider" for purposes of the "disclose or abstain" rule. n46 Just as an individual insider with material non-public information could not purchase his company's securities without making disclosure, the company may not purchase or offer its own stock while possessing such undisclosed information. n47

One question left unanswered by *Dirks* and *Chiarella* was whether someone who was neither an insider nor received information from an insider could be charged with violating *Rule 10b-5* for trading with material non-public information. Prior to 1997, a number of courts developed the "misappropriation theory" to render "outsiders" liable as long as they breached a duty to (i.e., "misappropriated" information from) the information's source, and they, or someone they tipped, traded on that information. n48 The Fourth and Eighth Circuits had rejected the misappropriation

theory, n49 but the Supreme Court in *United States v. O'Hagan* n50 resolved the circuit split and endorsed it. The Supreme Court held that an individual is liable under *Rule 10b-5* by trading in securities using material non-public information misappropriated in violation of a fiduciary duty to the information's source. n51

O'Hagan was a partner at a law firm representing a company trying to acquire another company via a tender offer. O'Hagan purchased call options in the securities of the target company prior to the tender offer announcement while his firm represented the acquirer. The Court reversed the appeals court's rejection of misappropriation theory and reinstated O'Hagan's criminal conviction under *Rule 10b-5*. The Court had no trouble finding that O'Hagan, who could not have been prosecuted as a "traditional" or "temporary" insider because he had no confidential relationship with the company where he purchased options, utilized a "deceptive device or contrivance in connection with" the purchase or sale of securities. n52 "[M]isappropriators ... deal in deception. A fiduciary who '[pretends] loyalty to the principal while secretly converting the principal's information for personal gain,' 'duplicates' or defrauds the principal." n53 Drawing on *Carpenter v. United States*, n54 the Court observed that "[a] company's confidential information ... qualifies as property to which the company has a right of exclusive use. The undisclosed misappropriation of such information, in violation of a fiduciary duty ... constitutes a fraud akin to embezzlement." n55 The Court had little difficulty finding use of the deceptive information to be " ' in connection with the purchase or sale of [a] security' ... because the fiduciary's fraud is consummated, not when the fiduciary gains the confidential information, but when, without disclosure to his principal, he uses the information to purchase or sell securities." n56

The Court's affirmation of the misappropriation theory may be significant for the viability of private rights of action against misappropriators. As part of the Insider Trading and Securities Fraud Enforcement Act of 1988, Congress authorized contemporaneous traders to sue persons whose trading violated *Rule 10b-5* under Section 20A of the Exchange Act. n57 The House expressly meant to "overturn court cases which have precluded recovery for plaintiffs where the defendant's violation is premised upon the misappropriation theory," referring to *Moss v. Morgan Stanley, Inc.*, n58 a 1983 Second Circuit decision that held the misappropriation theory could not be the basis for civil liability because no duty ran between the misappropriator and the allegedly defrauded shareholder. n59

[2] Elements of Liability under Section 10(b) and Rule 10b-5

Actions under Section 10(b) and *Rule 10b-5* most often allege fraud because defendants either misrepresented or failed to disclose a material fact. It is, therefore, appropriate to use these actions as examples of the elements necessary to support a claim under Section 10(b).

To successfully litigate a misrepresentation or omissions claim, plaintiff must prove:

- (a) defendant made a misrepresentation of or failed to disclose a *material* fact;
- (b) defendant acted with *scienter*;
- (c) plaintiff *relied* upon defendants misrepresentation;
- (d) The misrepresentation or omission occurred *in connection with* a purchase or sale of a security; and
- (e) defendant's actions *caused* plaintiff damages. n60

There is substantial overlap between these seemingly distinct elements. Under certain circumstances, for instance, showing the omission was material may be sufficient to prove the plaintiff relied on the omission. Moreover, the "in connection with" requirement is sometimes analyzed within the rubric of reliance. Finally, the reliance element is commonly viewed as one type of causation -- proof the misrepresentation or omission induced plaintiff to purchase or

sell securities.

Although courts generally agree on the elements of a private right of action under Section 10(b), the contours of each element remain in substantial flux, particularly as courts grapple with the changes instilled by the Reform Act.

[a] Materiality

To support a Section 10(b) claim, there must be a misrepresentation or omission of a "material" fact. The test for materiality was established in *TSC Industries, Inc. v. Northways, Inc.*,ⁿ⁶¹ for Rule 14a-9 and later adapted for purposes of suits under other provisions of both the Securities Act and the Exchange Act.ⁿ⁶² Under Rule 14a-9, an omitted fact is material "if there is a substantial likelihood a reasonable shareholder would consider it important in deciding how to vote." The Supreme Court explained further the standard

does not require proof of a substantial likelihood that disclosure of the omitted fact would have caused the reasonable investor to change his vote. What the standard does contemplate is a showing of a substantial likelihood that, under all the circumstances, the omitted fact would have assumed *actual significance* in the deliberations of the reasonable shareholder.ⁿ⁶³

The Supreme Court formulated its materiality standard in *TSC* to avoid subjecting corporations to liability for "insignificant omissions or misstatements" and burying "shareholders in an avalanche of trivial information."ⁿ⁶⁴

In *Basic, Inc. v. Levinson*, the Supreme Court adopted the *TSC* standard for 10b-5 cases, holding a fact is material if there is a substantial likelihood a reasonable investor would consider it important in making an investment decision. The Court in both *TSC* and *Basic* explained that, "put another way, there must be a substantial likelihood that the disclosure ... would have been viewed by the reasonable investor as having significantly altered the 'total mix' of information made available."ⁿ⁶⁵

Whether an alleged misstatement or omission is material is decided on a case by case basis, usually by referring to the entirety of the disclosure document or documents in question. Materiality is generally considered a mixed question of law and fact. However, though courts are often reluctant to decide issues of materiality at the pretrial stage, a growing number of courts do decide questions of materiality at a preliminary pleading stage, and dismiss claims when the statement or omission is obviously unimportant to a shareholder.ⁿ⁶⁶

Although any general statements about what is--and is not--material is difficult given this case -specific analysis, the issue ordinarily arises in the following circumstances.

[i] Quantitative Matters. Often, in assessing materiality, a court will be swayed by how the market reacted once the truthful information misrepresented or omitted is disclosed. Thus, the Third Circuit found a misstatement of an increase in sales was immaterial as a matter of law, in part because the press release announcing the actual increase did not affect the price of the company's stock.ⁿ⁶⁷

Courts previously measured materiality against a "crude benchmark," drawing on Rule 14a-8(c)(5), where a misstatement or omission was considered immaterial if, absent evidence of egregious behavior such as self-dealing or misappropriation by management, it resulted in a change of less than percent in the company's assets, net earnings, or gross sales.ⁿ⁶⁸ Thus, courts have found the following immaterial: an alleged overstatement of assets by less than 2 percent;ⁿ⁶⁹ an insignificant change in the method for calculating a bond's yield that added three days to the yield period;ⁿ⁷⁰ and an alleged misrepresentation about whether loans were earning or nonearning when any change in classification would have resulted in write-downs of one percent or less.ⁿ⁷¹

In reaction, the Securities and Exchange Commission published a Staff Accounting Bulletin rejecting reliance on

quantitative "benchmarks" to determine materiality. In Staff Accounting Bulletin (SAB) No. 99--Materiality (August 12, 1999), n72 the staff of the Commission's Chief Accountant's Office stated that "exclusive reliance on certain quantitative benchmarks to assess materiality in preparing financial statements and performing audits of those financial statements is inappropriate: misstatements are not immaterial simply because they fall beneath a numerical threshold." The staff did not object to benchmarks as "the basis for a preliminary assumption that ... a deviation of less than the specified percentage with respect to a particular item on the registrant's financial statements is unlikely to be material." Nevertheless, the staff took the position that materiality must be considered in the context of "all relevant considerations," including "qualitative" factors such as whether the misstatement or omission was deliberate or intentional. Among those "considerations" noted by the staff were whether the misstatement or omission hid "a failure to meet analysts' consensus expectations," changed "a loss into income or vice versa," or concerned a segment of the issuer's business that played "a significant role" in the registrant's operations or profitability. In *Ganino v. Citizens Utilities Co.*, n73 the court approved the SEC staff's approach in SAB 99. Investors in Citizens Utilities Company, a publicly-traded communications and public services company, alleged that Citizens fraudulently recognized income. The district court dismissed the complaint, stating that "Most auditors--and their corporate clients--define materiality as any event or news that might affect a company's earnings positively or negatively by 3% to 10%" Applying this 3% to 10% range, the district court held the amounts in issue, 1.7% of revenues for the relevant time period, were immaterial as a matter of law. n74

The Second Circuit reversed the district court's findings on materiality, holding that reliance on a numerical or percentage benchmark, which the court characterized as a "formulaic approach," was error. The court expressly adopted the approach advocated by the SEC staff in SAB 99, including consideration of whether "various qualitative factors may cause misstatement of quantitatively small amounts to be material." Factors may include "whether the misstatement masks a change in earnings or other trends," and "whether the misstatement hides a failure to meet analysts' consensus expectations." The court also stated in a footnote that although SAB 99 was not promulgated until 1999, it "did not alter the existing law" or guidance in the accounting literature, and was persuasive. n75

There is little doubt that Ganino's endorsement of SAB 99 lowered the materiality threshold. Other circuits have begun to follow this approach. n76

[ii] Failure to Disclose the Obvious. Some omissions are not deemed materially misleading because the information is commonly known, and courts will presume a reasonable investor would be aware of the allegedly concealed information. One court applied this principle in the context of a computer company: "As a general matter, investors know of the risk of obsolescence posed by older products forced to compete with more advanced rivals. '[T]echnical obsolescence of computer equipment in a field marked by rapid technological advances is information within the public domain.'" n77

[iii] Merger Negotiations. The Supreme Court in *Basic* found that materiality of merger negotiations must be decided on a case-by-case basis using a sliding scale balancing the probability the event will occur with its significance to an investor. Materiality "will depend at any given time upon a balancing of both the indicated probability that the event will occur and the anticipated magnitude of the event in light of the totality of the company activity." n78 This analysis is often applied to decide the materiality of statements about future events in general.

In *Basic*, the company denied on three occasions that it was engaged in merger negotiations, when in fact negotiations were taking place. The Court found that failure to disclose this information was material, thereby rejecting the company's argument that merger negotiations could be material only when they had reached a point at which there was an agreement in principle. Although the parties had not reached an agreement in *Basic*, the court found that merger negotiations had progressed to a material point: regulatory barriers to merger had been removed; two years of negotiations, meetings and discussions had occurred; attorneys had prepared analyses and evaluations for use in merger negotiations; and investment bankers had been retained. n79

Applying the *Basic* test in *Taylor v. First Union Corp.*,ⁿ⁸⁰ the Fourth Circuit found that merger negotiations were immaterial because they were "preliminary, contingent, and speculative"ⁿ⁸¹ and therefore need not have been disclosed. Negotiations produced only "a vague 'agreement' to establish a relationship" with no meeting of minds on price or structure of a deal.ⁿ⁸² There was no evidence of board resolutions, actual negotiations over merger, or instructions to investment bankers to facilitate a merger.ⁿ⁸³ Finally, any merger was contingent on actions by third parties that had not occurred, including a legal opinion from a state court on the constitutionality of a merger, and legislation being passed in two states' legislatures.ⁿ⁸⁴ On the other hand, a court found a duty to disclose negotiations when a potential acquirer retained a law firm specializing in acquisitions, hired a brokerage firm to help it acquire stock, and met with target executives to discuss acquisition.ⁿ⁸⁵

Whether merger negotiations are material may be affected by the corporation's size or structure, with disclosure being mandated earlier in small or close corporations.ⁿ⁸⁶ Moreover, unsolicited friendly offers to merge, without more, will rarely be disclosable, whereas an unsolicited hostile offer might be.ⁿ⁸⁷

[iv] Puffery. Some courts have rejected claims that vague, optimistic statements, or "puffing" amount to actionable misstatements under § 10(b).ⁿ⁸⁸ The theory is that these statements are loose, vague, or exaggerated predictions of future performances and therefore not material because a reasonable investor would not rely on them. For example, statements that management was "optimistic about 1993" and believed the company would "deliver growth consistent with its historically superior performance" were puffery,ⁿ⁸⁹ as was a statement that a company was "poised to carry the growth and success of 1991 well into the future."ⁿ⁹⁰

[v] Statements that Bespeak Caution. Prior to the Reform Act's passage, courts increasingly found that some statements were not material when accompanied by sufficient cautionary language. The "bespeaks caution" doctrine developed. The essence of the doctrine is that "where an offering statement, such as a prospectus, accompanies statements of its future forecasts, projections and expectations with adequate cautionary language, those statements are not actionable as securities fraud."ⁿ⁹¹ Cautionary language need not be in the same document to be effective.ⁿ⁹²

The bespeaks caution doctrine is applied often in cases involving economic projections and optimistic statements. Thus, in *Gasner v. Board of Supervisors*,ⁿ⁹³ the Fourth Circuit affirmed summary judgment for defendants, finding that cautionary language included in a bond offering rendered alleged misrepresentations immaterial as a matter of law. The bond offering financed a composting facility. The venture failed and the bonds defaulted, leading to litigation. The complaint alleged the offering documents contained several misrepresentations and one omission. Plaintiffs alleged the document misrepresented the composting technology as "proven" defendants misrepresented the commercial viability of the composting facility, and defendants failed to disclose the facility would operate only under a one-year permit from the state of Virginia.ⁿ⁹⁴

The Fourth Circuit found that:

From the outset of its operations of the Facility, [the company] encountered serious problems. The materials used proved to be of poor quality. [The company] lacked sufficient financial resources to permit it to operate, mainly because it had been unable to secure contracts with other counties for the processing of their waste. Sufficient revenue was therefore not forthcoming for the operation of the Facility, and funds were not available for payment of principal and interest to bondholders.ⁿ⁹⁵

The court concluded that warnings contained in the Offering Statement sufficiently bespoke caution:

The venture failed because of the occurrence of the very same events outlined as risks in the Offering Statement. As noted, VBFC had no significant assets other than its contracts with the County. The sole source of funds for the payment of interest and principal to bondholders was the income which VBFC was to receive from its contracts with the County and from future contracts with other Virginia counties. County payments commenced in April of 1994, but VBFC was not thereafter able to secure

contracts from other counties. Because it was under-capitalized and had severe cash flow problems, VBFC announced in September of 1994 that it was unable to fulfill its obligations under its contracts with the County. Operations ceased on October 5, 1994, and the County then stopped making payments. On October 31, 1994, Signet, as Trustee, declared the Bonds to be in default. n96

Despite the courts' general receptivity to the bespeaks caution doctrine, the doctrine is applied on a case-by-case basis, and some courts carefully consider cautionary language to determine if it sufficiently bespeaks caution. n97 Courts have found the cautionary language was not "repeated" and "specific" enough or refused to dismiss on the basis of a "generic" warning that disclosed a risk without cautioning the plaintiffs about the risk's magnitude. n98

[vi] Forward Looking Statements. Closely allied with the bespeaks caution doctrine is the safe harbor under the Reform Act that protects a company from liability when it makes "forward looking" statements, such as projections of future earnings, management plans and objections, and similar information. Under the Reform Act, these statements are not actionable so long as they are accompanied by "meaningful cautionary statements identifying important factors that could cause actual results to differ materially from those in the forward looking statement" and they are made without "actual knowledge" that they were false or misleading.

The safe harbor for forward looking statements and the bespeaks caution doctrine are not coextensive. The safe harbor only covers certain types of forward looking statements, excluding statements (1) included in financial statements prepared in accordance with GAAP; (2) contained in an IPO registration statement; (3) made in connection with a tender offer; (4) made in connection with a partnership, limited liability company, or direct participation program offering; or (5) made in beneficial ownership disclosure statements filed with the SEC under Section 13(d) of the Exchange Act. n99 Similarly, an issuer cannot take advantage of the safe harbor if: (a) during the three year period preceding the date on which the statement was first made, it has been convicted of a felony or misdemeanor under § 15(b)(4)(i)-(iv), or is the subject of a decree or order involving a violation of the securities laws, (b) it makes the statement in connection with a "blank check" securities offering, "rollup transaction," or "going private" transactions, or (c) it issues penny stock. n100

For an issuer to identify "important factors that could cause actual results to differ materially" it does not have to identify all factors. n101 In one of the first cases decided after the Reform Act, the court in *Rasheedi v. Cree Research, Inc.*, stated, "Failure to include the particular factor that ultimately causes the forward-looking statement not to come true will not mean that the statement is not protected by the safe harbor." n102 Thus, defendants do not have to "caution against every conceivable factor that may cause results to differ." n103

The Eleventh Circuit in *Harris v. Ivax Corporation*, affirmed the dismissal of a securities fraud complaint, applying the safe harbor for forward looking statements. n104 Ivax, a manufacturer of generic drugs, issued press releases in August and September of 1996, that did not disclose an intent to take a sizeable write-down of goodwill and, "while acknowledging business problems, also showed some optimism." n105

The plaintiffs claimed that Ivax's hopeful outlook in the press releases concealed an intent to write down goodwill and that Ivax deliberately omitted the risk of a goodwill writedown from its list of identified concerns." n106

The court found that cautionary language appended to both press releases adequately warned investors of the perils of investing in Ivax. The cautionary language was detailed, n107 leading the court to dismiss plaintiff's claim that it was mere "boilerplate." n108 Although the court recognized the cautionary language did not explicitly mention the possibility of a goodwill write-down, it held there need not be "a listing of all factors" nor a listing of the specific factor for the cautionary language to be meaningful. The court noted that the Reform Act's conference report:

specified that '[f]ailure to include the particular factor that ultimately causes the forward-looking statement not to come true will not mean that the statement is not protected by the safe harbor.' In short, when an investor has been warned of

risks of a significance similar to that actually realized, she is sufficiently on notice of the danger of the investment to make an intelligent decision about it according to her own preferences for risk and reward. n109

Other courts have been less lenient in interpreting the safe harbor. In *In re Boeing Sec. Litig.* the court held that the cautionary language must identify some factors that, if they occurred, would render the forward looking statement to be untrue. n110 Thus, the court stated:

Here, the forward-looking statement is that the company was making progress in designing systems to improve efficiency and reduce cycle times. Many of the warnings identified by the defendants, particularly the boiler plate warning in the warnings section of the press release and the warnings in the annual report and first quarter 10-Q, do not speak to factors that could adversely affect the company's development of systems to improve efficiency. Rather, they speak to overall production problems and an expectation that margins would be lower as a result of the production problems. Boeing identified no factors that would caution investors that results might be materially different from those described in the forward-looking statement. Thus, the statement in the July 21 press release about Boeing's "long term progress ... in developing and implementing systems to improve efficiency" is not protected by the safe harbor provision of the Reform Act. n111

Echoing case law interpreting the bespeaks caution doctrine, courts generally have held that boilerplate warnings with little detail will not comport with the safe harbor. n112

[b] Scienter

Plaintiffs in a *Rule 10b-5* case must establish that defendants acted with "scienter," or intent to defraud. Scienter, along with materiality, is the most frequently litigated issue in securities cases--particularly at the preliminary stage of a motion to dismiss. The scienter requirement places two separate burdens on a plaintiff: first, the complaint must "state with particularity facts giving rise to a strong inference that the defendants acted with the required state of mind", and second, plaintiffs must prove at trial that defendants acted with the requisite state of mind.

The Reform Act significantly altered the standard for pleading scienter. Some courts found that it also modified the substantive contours of scienter. The standard for pleading scienter is an issue that has spawned a number of important and conflicting circuit court decisions. Substantial disagreement among courts about what plaintiffs must show to prove scienter makes it likely the Supreme Court will need to give the final resolution.

[i] Pre-Reform Act Scienter Standard. Prior to the Reform Act's passage, the Supreme Court held in *Ernst & Ernst v. Hochfelder* that the plaintiff in a private action under *Rule 10b-5* had to prove the defendant acted with scienter, meaning a "mental state embracing intent to deceive, manipulate or defraud." n113 Although the Court did not decide whether a showing of recklessness could satisfy the scienter requirement, n114 every circuit court that considered the issue prior to the Reform Act concluded, or assumed without deciding, that recklessness was sufficient to demonstrate scienter. n115

Courts disagreed somewhat on the definition of recklessness prior to the Reform Act. The Seventh Circuit's standard in *Sundstrand Corp. v. Sun Chem. Co.*, subsequently adopted by most courts, defined recklessness as

a highly unreasonable omission, involving not merely simple, or even inexcusable negligence, but an extreme departure from the standards of ordinary care, and which presents a danger of misleading buyers or sellers that is either known to the defendant, or so obvious that the actor must have been aware of it.
n116

Recklessness in other circuits was defined as an "extreme carelessness approaching indifference" n117 -- apparently an easier standard to satisfy.

Because the Supreme Court in *Hochfelder* provided no guidance on pleading scienter, courts were divided prior to the Reform Act. The Second Circuit adopted the most stringent standard, requiring plaintiffs to allege specific facts creating a "strong inference" that the defendants acted with scienter. A plaintiff could meet this burden by alleging either (a) facts showing defendants had both a motive and the opportunity to commit fraud, or (b) facts constituting strong circumstantial evidence of reckless or conscious misbehavior. n118 The Ninth Circuit, in contrast, allowed plaintiffs to satisfy the scienter requirement simply by pleading the necessary mental state generally, without setting forth any specific facts supporting the allegation. n119

[ii] The Reform Act.

In passing the Reform Act, Congress intended to strengthen the standard for pleading scienter to prevent frivolous securities lawsuits. Thus, the plain language of the Act required that a securities fraud complaint "state with particularity facts giving rise to a strong inference that the defendant acted with the required state of mind." n120 Congress did not define the state of mind requirement or specify the standard for pleading it. Although Congress plainly rejected the lenient Ninth Circuit standard, did not clarify whether the new standard for pleading a "strong inference" of scienter under the Reform Act mirrored or exceeded the Second Circuit standard.

Confusion over what Congress meant by including a heightened scienter standard in the Reform Act stems from three parts of its legislative history: (1) Senate consideration of the bill, (2) the Conference Committee's explanation of the bill, and (3) the congressional override of President Clinton's veto. The Senate bill required plaintiffs to allege "specific facts demonstrating the state of mind of each defendant at the time the alleged violation occurred." n121 The Senate Report explained that "the Committee chose a uniform standard modeled upon the pleading standard of the Second Circuit... The Committee does not intend to codify the Second Circuit's case law interpreting this pleading standard, although courts may find this body of law instructive.." n122 When the bill reached the Senate floor, Senator Specter offered an amendment closely tracking the language of the Second Circuit pleading standard and case law, specifically stating that his amendment was based on Second Circuit case law. n123 The Senate then adopted the Specter Amendment, but the amendment did not survive the Conference Committee.

The Conference Committee Report, commenting on the pleading standard in the bill, stated that the language of the Act is based in part on the Second Circuit's pleading standard: "The standard also is specifically written to conform to Rule 9(b)'s notion of pleading 'with particularity' ... Because the Conference Committee intends to strengthen existing pleading requirements, it does not intend to codify the Second Circuit's case law interpreting this pleading standard." n124 The Conference Committee emphasized its rejection of the Second Circuit case law by stating that, "[f]or this reason, the Conference Report chose not to include in the pleading standard certain language relating to motive, opportunity, or recklessness ..." n125

President Clinton stated that he vetoed the Act because he believed Congress had raised the standard for pleading scienter beyond the Second Circuit's standard, thereby imposing "an unacceptable procedural hurdle to meritorious claims being heard in Federal courts." n126 Both the House and the Senate overrode the President's veto and stated objection, passing the Reform Act into law without any alternation to its pleading standard.

[iii] Post Reform Act Pleading Standards. In the more than a decade following the passage of the Reform Act, most federal appeals courts interpreted the strong inference of scienter standard under the Reform Act, but their interpretations varied significantly. n127 In 2007, however, the Supreme Court provided some clarity as to requirements for pleading scienter in its decision, *Tellabs, Inc. v. Makor Issues & Rights, Ltd.* n128

In *Tellabs*, the Court held that "an inference of scienter must be more than merely plausible or reasonable—it must be cogent and at least as compelling as any opposing inference of nonfraudulent intent." n129 The Court set forth a three-step process for evaluating motions to dismiss for failure to adequately plead scienter. First, a court must "accept

all factual allegations in the complaint as true." n130 Second, the court must consider "whether all of the facts alleged, taken collectively, give rise to a strong inference of scienter." n131 The Court stressed that the appropriate inquiry "is whether all of the facts alleged, taken collectively, give rise to a strong inference of scienter, not whether any individual allegation, scrutinized in isolation, meets that standard." n132 Third, "the court must take into account plausible opposing inferences." n133 After the completion of these steps, a complaint will survive "only if a reasonable person would deem the inference of scienter cogent and at least as compelling as any opposing inference one could draw from the facts alleged." n134

Although the *Tellabs* decision was widely reported as raising the standard for pleading scienter, n135 cases from at least three circuits suggest otherwise. For example, the Ninth Circuit has held that *Tellabs*' requirement that the allegations be read as a whole "permits a series of less precise allegations to be read together to meet the the PLSRA requirement" notwithstanding the Ninth Circuit's prior rulings, and that "[v]ague or ambiguous allegations are now properly considered as part of a holistic review when considering whether the complaint raises a strong inference of scienter." n136 The Sixth Circuit has also suggested that *Tellabs* lessened the pleading standard, noting that the *Tellabs* "formulation is slightly different than that previously used in the Sixth Circuit, where a plaintiff could survive a motion to dismiss only if the inference of scienter was 'the most plausible of competing inferences.'" n137 The First Circuit had similarly pointed out that prior to *Tellabs* "where there were equally strong inferences for and against scienter, this resulted in a win for the defendant." n138 Under *Tellabs*, however, "where there are equally strong inferences for and against scienter, *Tellabs* now awards the draw to the plaintiff." Indeed, in *Mississippi Pub. Employees' Ret. Sys. v. Boston Scientific Corp.*, the First Circuit reversed the district court's decision granting defendants' motion to dismiss, noting that the district court "did not have the benefit of the *Tellabs* opinion, which reversed a higher standard for scienter imposed by the prior law of this circuit. We apply *Tellabs* and that leads us to a different result." n139

Nonetheless, the post-*Tellabs* appellate court decisions have, more often than not, affirmed dismissals based on the failure of plaintiffs to adequately allege scienter. These courts have held that, without more, allegations of accounting irregularities and internal control deficiencies, n140 allegations that defendants did not disclose and/or correct information immediately, n141 allegations regarding the magnitude or widespread nature of the fraud, n142 allegations of insider trading, n143 and allegations that defendants signed Sarbanes-Oxley certifications n144 are not sufficient to establish a strong inference of scienter.

In those cases where circuit courts have found that plaintiffs have or may have adequately pleaded scienter, the courts have cited factors such as the fraud involving the defendants' most important products, n145 an extremely short time period between the misleading statement and corrective disclosure, n146 statements in public filings indicating contemporaneous knowledge, n147 and evidence that defendants investigated or reviewed information that should have revealed the fraud. n148 In the *Tellabs* case itself, on remand, the Seventh Circuit concluded that the plaintiffs had satisfied the pleading standard set forth by the Supreme Court:

Because the alternative hypotheses-either a cascade of innocent mistakes, or acts of subordinate employees, either or both resulting in a series of false statements-are far less likely than the hypothesis of scienter at the corporate level at which the statements were approved, the latter hypothesis must be considered cogent. n149

An issue that has arisen in numerous post-*Tellabs* decisions, regardless of outcome, is the use of confidential sources to establish scienter. In *Higginbotham v. Baxter Int'l Inc.*, the Seventh Circuit stated that

[o]ne upshot of the approach that *Tellabs* announced is that we must discount allegations that the complaint attributes to five 'confidential witnesses' It is hard to see how information from anonymous sources could be deemed 'compelling' or how we could take account of plausible opposing inferences." n150

The court, while acknowledging that there could be situations where statements from anonymous sources could "corroborate or disambiguate evidence from disclosed sources," the statements must be discounted and "[u]sually that discount will be steep." n151

Other courts have taken a somewhat less skeptical view of allegations based on confidential sources. Indeed, in *Makor Issues & Rights, Ltd. v. Tellabs Inc.*, the Seventh Circuit distinguished its prior decision in *Higginbotham* and held that "the absence of proper names does not invalidate the drawing of a strong inference from informants' assertions." n152 The court pointed out that, in *Higginbotham*, very little information was provided about the confidential sources and there was no other information on which to infer scienter. n153 In the present case, however, the court described the confidential source information as follows:

The confidential sources listed in the complaint in this case, in contrast, are numerous and consist of persons who from the description of their jobs were in a position to know at first hand the facts to which they are prepared to testify The information that the confidential informants are reported to have obtained is set forth in convincing detail, with some of the information, moreover, corroborated by multiple sources. n154

In *New Jersey Carpenters Pension & Annuity Funds v. Biogen Idec Inc.*, the First Circuit followed the Seventh Circuit's approach in *Makor*, stating:

We decline to adopt a rule which would exclude confidential source allegations which have every indication both that the source had access to information and that the information has the earmarks of credibility, simply because the identity of the source is not initially revealed. And we see no reason to exclude consideration of such information from the evaluation of whether plaintiffs' strong inferences of scienter are at least as plausible as defendants' inferences. n155

Although *Tellabs* and these appellate cases are unlikely to be the last pronouncements on pleading scienter, these decisions do indicate that, despite any disagreements, courts general application of an increasingly critical eye to allegations of scienter -- the heart of any securities fraud suit.

[c] The "In Connection With" Requirement. *Rule 10b-5* is violated only when a fraud occurs "in connection with" a purchase or sale of securities. Although early decisions involved a transaction directly between a plaintiff and defendant, n156 courts no longer require privity between plaintiffs and defendants. n157 As a result, the "in connection with" requirement became a subject for judicial interpretation.

The "in connection with" requirement is not an issue in most securities cases. Courts generally find that fraud or misrepresentation occurs "in connection with" securities trading "whenever [such] assertions are made ... in a manner reasonably calculated to influence the investing public" n158 or when the fraud touches on "the value of the stock at issue or the value of the consideration in return for it." n159 As the Second Circuit has stated:

When the fraud alleged is that the plaintiff bought or sold a security in reliance on misrepresentations as to its value, made by a defendant whose position made it reasonable for the plaintiff to rely on the representation and imposed some duty on the defendant to be honest or to disclose information, then whatever problems there may be with the case, a connection between the fraud and the transaction should not be one of them. n160

Nevertheless, a plaintiff may not be able to sustain a claim when he or she purchased a security before the alleged fraud occurred. n161 Courts are reluctant to find a fraudulent scheme is "in connection" with the purchase or sale of a security when it takes place entirely after the securities transaction is complete. n162 This conclusion is consistent with encouraging disclosure to investors of all material facts so that investors can make an informed decision to purchase or sell securities -- one of the principal policies behind the federal securities laws. n163 If there is no fraudulent scheme

until after a transaction is complete, there would be nothing to disclose at or before the transaction.

Pleading a complaint based on a "fraud on the market" theory of reliance can affect whether a misrepresentation or omission is "in connection with" the purchase or sale of a security. As explained later in this chapter, the fraud on the market theory rests on the notion that the price of a security incorporates and reflects all public information about the security, including any misrepresentation. Some courts, therefore, have determined that when a misstatement may have affected the market for a security, it was made "in connection with" a purchase or sale. n165 Thus, the Second Circuit concluded that a misrepresentation in an advertisement in a technical journal may have been made "in connection with" a purchase or sale if plaintiffs could prove that market participants, such as stock analysts, used the advertisements to evaluate the security. n166

Litigation over whether a fraud is "in connection with" a purchase or sale of a security most frequently arises in cases "near the borderline," where courts believe "it is important that the standard be fleshed out by a cautious case-by-case approach." n167

Courts have often addressed the "in connection with" requirement in cases involving allegations of corporate mismanagement. The Supreme Court appeared to approve the application of the securities laws in cases alleging internal corporate mismanagement by endorsing a broad statement of the "in connection with" requirement in *Superintendent of Insurance v. Bankers Life & Casualty Co.* n168 In that case, Bankers Life owned all the stock of Manhattan Casualty Co., which it then sold to a group headed by one Begole for \$5,000,000. Begole obtained the purchase money by causing Manhattan to sell approximately \$5,000,000 of government bonds and then misappropriated the proceeds of the sale for his own use. The funds were transferred to Bankers Life, and the misappropriation was concealed on Manhattan's books. When the facts were discovered, the Superintendent of Insurance, as Manhattan's statutory assignee, sued several parties under *Rule 10b-5*.

The Second Circuit concluded there was no fraud "in connection with" the purchase or sale of securities:

What distinguishes the fraud perpetrated on Manhattan in this case from one cognizable under *Rule 10b-5* is that its sole object was to obtain possession of Manhattan's government bonds for the personal use of the perpetrators. No doubt the deception was successful, for had the board known that Sweeney and his associates intended to misappropriate the proceeds for their own use it undoubtedly would not have authorized their sale. But the deception did not infect the subsequent sales transaction. With respect to the terms of the sale itself neither the purchaser nor the seller of the bonds was deceived or defrauded. n169

The Supreme Court reversed. In an opinion by Justice Douglas, the Court determined that Manhattan had been defrauded "in connection with" the sale of its bonds:

Manhattan was injured as an investor through a deceptive device which deprived it of any compensation for the sale of its valuable block of securities.

* * * * *

The crux of the present case is that Manhattan suffered an injury as a result of deceptive practices *touching* its sale of securities as an investor. n170

There is no evidence that Justice Douglas intended use of the word "touching" to in any way alter the landscape of the "in connection with" requirement. More likely, his choice of words was based on his own literary stylings. n171

However, in a subsequent case, *Santa Fe Industries v. Green*, n172 the Supreme Court limited the reach of *Rule 10b-5* in cases involving corporate mismanagement, at least in cases where no misrepresentation or deception was alleged. In

Santa Fe, the defendant corporation, owning more than 90 percent of the stock of Kirby Lumber Company, effected a short-form merger of Kirby into itself. The defendant complied with all the requirements of the applicable Delaware statute and disclosed all the relevant information to both Kirby's minority shareholders and the independent appraiser of their shares. The plaintiff shareholders, however, alleged that the defendant had violated *Rule 10b-5* by cashing them out of Kirby at an unfairly low price, solely for the defendant's own benefit and not for any justifiable business purpose.

The Supreme Court held the complaint failed to state a cause of action under Section 10(b) and *Rule 10b-5*. The Court reasoned that Section 10(b)'s terms only outlaw use of "manipulative or deceptive" devices and contrivances. The plaintiffs had not charged the defendant with any manipulative or deceptive conduct, but only with a breach of fiduciary duty:

The language of § 10(b) gives no indication that Congress meant to prohibit any conduct not involving manipulation or deception... . Thus the claim of fraud and fiduciary breach in this complaint states a cause of action under any part of *Rule 10b-5* only if the conduct alleged can be fairly viewed as 'manipulative or deceptive' within the meaning of the statute... .

As we have indicated, the case comes to us on the premise that the complaint failed to allege a material misrepresentation or material failure to disclose. ... On the basis of the information provided, minority shareholders could either accept the price offered or reject it and seek an appraisal in the Delaware Court of Chancery. Their choice was fairly presented, and they were furnished with all relevant information on which to base their decision. ...

It is also readily apparent that the conduct alleged in the complaint was not 'manipulative' within the meaning of the statute. 'Manipulation' is virtually a term of art when used in connection with securities markets. The term refers generally to practices, such as wash sales, matched orders, or rigged prices, that are intended to mislead investors by artificially affecting market activity. ... Indeed, nondisclosure is usually essential to the success of a manipulative scheme. No doubt Congress meant to prohibit the full range of ingenious devices that might be used to manipulate securities prices. But we do not think it would have chosen this 'term of art' if it had meant to bring within the scope of § 10(b) instances of corporate mismanagement such as this, in which the essence of the complaint is that shareholders were treated unfairly by a fiduciary. n173

After *Santa Fe*, courts struggled to draw the line as to which types of claims of corporate mismanagement are allowed under Section 10(b) and *Rule 10b-5*. n174 Generally, courts have sustained mismanagement claims brought under the securities anti-fraud laws when non-disclosure or concealment deprives the injured party of an opportunity to prevent the fraud before it occurs. n175

The Supreme Court took up the issue of the "in connection with" requirement again in 2002. *SEC v. Zandford* n176 involved an SEC enforcement action based on the misconduct of a broker-dealer's registered representative's misconduct. The Supreme Court unanimously ruled that the SEC had properly alleged securities fraud in a civil complaint by alleging that a stockbroker sold his customers' securities and diverted the proceeds to his benefit.

The broker, Zandford, persuaded an elderly man to open a joint account for himself and a mentally retarded daughter, with Zandford holding a general power of attorney to engage in securities transactions. When the man died several years later, all the money in the joint account was gone. Zandford was convicted of federal wire fraud crimes for selling the securities in the joint account and making personal use of the proceeds. The SEC filed a civil action in the same court, alleging that Zandford violated Section 10(b) and *Rule 10b-5* by defrauding the customers and misappropriating their securities without their knowledge or consent.

Zandford argued that the sales were lawful and that Section 10(b) of the Exchange Act and *Rule 10b-5* prohibit fraud

only "in connection with the purchase or sale of any security." While conceding that the subsequent misappropriation of the proceeds was fraudulent, Zandford argued that misappropriation of the proceeds was not "in connection with" the sales, but was instead a simple theft. The district court granted the SEC's motion for summary judgment in the civil case based on Zandford's conviction. The United States Court of Appeals for the Fourth Circuit held that Zandford's scheme to steal his customers' assets did not violate *Rule 10b-5*, and ordered the SEC's case dismissed. n177 The Supreme Court reversed, holding that Zandford's scheme to defraud his customers was "in connection with" securities transactions, reasoning that the securities sales and the diversions of proceeds were a unitary course of business rather than independent events. The Supreme Court relied on *Superintendent of Ins. of N.Y. v. Bankers Life & Casualty Co.* n178 as well as the more recent cases of *United States v. O'Hagan*, n179 and *Wharf (Holdings) Ltd. v. United Int'l Holdings, Inc.* n180 to conclude that the SEC's complaint against Zandford described "a fraudulent scheme in which the securities transactions and breaches of fiduciary duty coincide. Those breaches were therefore 'in connection with' securities sales" n181

Courts have read *Zandford's* broad interpretation of the "in connection with" requirement to allow suits under Section 10(b) and *Rule 10b-5* where a customer was charged excess fees and commissions in connection with purchases of mutual funds, n182 and where a company concealed an accounting write-off during the time period when employees could exercise stock options. n183

The "in connection with" requirement was a focal point of *Merrill Lynch, Pierce, Fenner & Smith, Inc. v. Dabit*, a 2006 Supreme Court case that analyzed when certain state court cases are preempted by SLUSA and must be removed to federal court. n184 In *Dabit*, the plaintiffs initially alleged that, in violation of Oklahoma law, Merrill Lynch research analysts had issued overly optimistic opinions that induced the plaintiffs to purchase securities they otherwise would not have and to hold securities they otherwise would have sold. n185 Merrill Lynch moved for dismissal arguing, in part, that the claims based on purchasing securities were precluded by SLUSA. n186 The district court agreed with Merrill Lynch's argument on this point, and dismissed the complaint with leave to amend. n187 The plaintiffs re-pled the action and characterized themselves as a class of individuals who owned and continued to own based on overly optimistic analyst opinions, and the case, along with dozens of similar cases, was transferred to the Southern District of New York. n188 The District Court again found that the case fell "squarely within SLUSA's ambit." n189 The Second Circuit reversed the District Court and found that Congress intended a narrower reading of the "in connection with" requirement in this situation. n190 The Second Circuit permitted the plaintiffs to refile another amended complaint that defined the class to exclude those who purchased securities in connection with the fraud and who, therefore, would be preempted by SLUSA. n191

The Supreme Court overruled the Second Circuit and took a broader view of the "in connection with requirement." The Court explained that, "under our precedents, it is enough that the fraud alleged 'coincide' with a securities transaction--whether by the plaintiff or by someone else." n192 The Court further explained that, the "requisite showing, in other words, is 'deception 'in connection with the purchase or sale of any security,' not deception of an identifiable purchaser or seller.' " n193 The Court closed by noting that the distinction between purchasers and holders of securities is irrelevant for the purposes of SLUSA. n194

[d] Purchase and Sale of a Security. A plaintiff must be a purchaser or seller of securities to sustain a 10b-5 claim. n195 Transactions at the heart of securities fraud suits are rarely something other than a "purchase" or "sale" of a security, in part because courts have found that a "purchase" or "sale" occurred in a wide variety of different contexts. This is due in part to the broad definition of "purchase" and "sale" in the Exchange Act:

[U]nless the context otherwise requires --

(13) The terms "buy" and "purchase" each include any contract to buy, purchase or otherwise acquire.

(14) The terms "sale" and "sell" each include any contract to sell or otherwise dispose of. n196 Thus, contracts for a

purchase or sale of securities are sufficient to sustain a 10b-5 claim regardless of whether the transaction is consummated, as long as the contract is enforceable. n197 While a purchase or sale need not involve cash, a gift is not a purchase or sale. n198 In addition, the Supreme Court has held that the simple exchange of shares in a merger qualifies as a purchase or sale when shareholders become "shareholders in a new company" as a result of "an alleged deception [that] has affected individual shareholders' decisions in a way not at all unlike that involved in a typical cash sale or share exchange." n199 In determining whether changes in the rights of a security holder involve a purchase or sale, courts must decide whether there has occurred "such significant change in the nature of the investment or in the investment risks as to amount to a new investment." n200 Courts have found "a major corporate restructuring requiring the same kind of investment decision by the shareholders as would a proposed merger with a separate existing corporation," n201 or one that constitutes a "fundamental change" in the plaintiff's holdings, n202 constitutes a purchase or sale for purposes of *Rule 10b-5*. The Seventh Circuit has rejected this "fundamental change" or the broader "forced seller" doctrine, "insist[ing] that the wrongdoing affect an investment decision" of the plaintiff. n203

[e] Reliance and Causation

To sustain a claim under *Rule 10b-5*, plaintiffs must show that they relied upon the material misrepresentation in making an investment decision, and that their reliance was justified or reasonable. n204 Whether reliance was justified often involves consideration of the plaintiffs' sophistication and access to information, among other factors. n205

Reliance is sometimes considered "transaction causation" or "causation in fact" -- that is, proof that the misrepresentation or omission "caused" plaintiff to enter into the transaction at issue. n206 Thus, it can be analogized to the common law requirement that fraud be a "but for" cause of the transaction. n207 Unlike common law fraud claims, however, plaintiffs in securities law cases can often satisfy the reliance requirement through using one of two presumptions of reliance: a presumption based on fraud on the market or a presumption when the case involves a failure to disclose material facts. Plaintiffs bringing common law claims normally cannot rely on the same presumptions, n208 and must prove actual reliance.

[i] Fraud on the Market. In *Basic, Inc. v. Levinson*, a plurality of the Supreme Court endorsed the fraud on the market theory, accepting that in an open and efficient securities market, the price of a security incorporates and reflects all relevant, public information regarding a security, including any material misrepresentations. n209

The *Basic* Court rested its opinion on a view of the economic efficiency of certain markets, such as the NYSE or the NASDAQ, for certain securities. As the Court reasoned, "[I]n an open and developed securities market, the price of a company's stock is determined by the available material information regarding the company and its business. ... Misleading statements will therefore defraud purchasers of stock even if the purchasers do not directly rely on the misstatements." n210 In such a market, the price of the stock acts as a proxy for the misrepresentation and the plaintiff, in relying on the price of the stock in making the decision to purchase or sell, is presumed to have relied on the material misrepresentation. This allowed the Court to view transactions in securities different from face-to-face transactions at the heart of common law fraud cases: " 'With the presence of a market, the market is interposed between seller and buyer and, ideally, transmits information to the investor in the processed form of a market price ... The market is acting as the unpaid agent of the investor, informing him that given all the information available to it, the value of the stock is worth the market price.' " n211 The Court concluded that "[a]n investor who buys or sells stock at the price set by the market does so in reliance on the integrity of that price. Because most publicly available information is reflected in market price, an investor's reliance on any public material misrepresentations, therefore, may be presumed for purposes of a *Rule 10b-5* action." n212

The fraud on the market presumption shifts the burden of proof on the issue of reliance from plaintiffs to defendants -- relieving plaintiffs from needing to "show that they themselves actually relied on any particular misrepresentation or omission." n213 Rather, "they need only show that they relied on the integrity of the price of the stock as established by the market, which in turn is influenced by information or the lack of it." n214 Plaintiffs' "reliance on the market ... is

equivalent to reliance upon statements made to the market, or the nondisclosure of material information." n215 The presumption therefore "recognizes that most investors rely on the market to evaluate information for them, rather than on their own independent analysis of a stock's value." n216

The First Circuit has further refined the *Basic* standard of reliance in the fraud on the market theory by defining an efficient market as "one in which the market price of the stock fully reflects all publicly available information," rather than just "most" publicly available information. n217 The court further explained:

By "fully reflect," we mean that market price responds so quickly to new information that ordinary investors cannot make trading profits on the basis of such information. This is known as "informational efficiency." We reject a second and much broader meaning of "fully reflect," known as "fundamental value efficiency," which requires that a market respond to information not only quickly but accurately, such that the market price of a stock reflects its fundamental value. n218

At least in principle, this standard lowers the threshold for plaintiffs to claim a reliance under the fraud on the market theory because plaintiffs need only show that the market responded quickly to information, not also "accurately" to reflect "the actual economic values of securities in terms of their expected risks and returns." n219

While courts continue to define the requirements for the presumption to apply, it is clear that the presumption will not in the absence of an efficient market. Therefore, the presumption may not apply if the security in question is exchanged in a face-to-face transaction, n220 or traded in an undeveloped or inefficient market, n221 such as the market for an initial public offering. n222

In the context of certification of a class action, some courts have held plaintiffs seeking a presumption of reliance must first establish loss causation. In other words, a plaintiff must show that the alleged misstatements actually had an effect on the market price for a stock, e.g. through an empirical analysis disambiguating the effects of a subsequent corrective disclosure from the effects of other disclosures made at the same time. n223

The fraud on the market theory only creates a presumption of reliance -- one that can be overcome. A defendant can defeat the presumption by showing that plaintiffs relied on factors other than the stock price. n224 In addition, because the fraud on the market theory assumes the alleged statements were material and misrepresented, defendants can defeat the presumption by demonstrating that accurate information had sufficiently entered the market (there was "truth on the market") n225 or that the alleged false statement was otherwise immaterial.

[ii] Omissions. In *Affiliated Ute Citizens v. United States*, the Supreme Court embraced a different presumption, one applicable when plaintiffs sue on the basis of a failure to disclose a material fact. Under those circumstances, the Court ruled that reliance can be presumed so long as the facts not disclosed were material:

Under the circumstances of this case, involving primarily a failure to disclose, positive proof of reliance is not a prerequisite to recovery. All that is necessary is that the facts withheld be material This obligation to disclose and this withholding of a material fact establish the requisite element of causation in fact. n226

Defendants may rebut the presumption created by *Affiliated Ute* by showing that plaintiffs would have purchased the securities even if the undisclosed facts had been disclosed to them. n227 Moreover, the presumption may not apply if the plaintiffs plead that defendants made material misrepresentations or both made misrepresentations and omitted material facts. n228 Finally, because the presumption applies only when there are omissions alleged, defendants must have had a duty to disclose before the presumption may apply. n229

[iii] Loss Causation. In addition to reliance or "causation in fact," plaintiffs also must prove that the fraud or deception caused their damages. n230 This has been variously labeled "loss causation" or "proximate cause" in that

some courts require that plaintiffs' damages be a foreseeable consequence of defendants' misrepresentation or omission. n231

Plaintiffs' complaints have often foundered on this element because they may be able to show reliance either directly or through a presumption, but cannot prove that the misrepresentation or omission "caused" their loss. n232 As the Fifth Circuit in *Huddleston v. Herman & MacLean* n233 framed it:

[A]n investor might purchase stock in a shipping venture involving a single vessel in reliance on a misrepresentation that the vessel has a certain capacity when in fact it had less capacity than was represented in the prospectus. However, the prospectus does disclose truthfully that the vessel will not be insured. One week after the investment the vessel sinks as a result of a casualty and the stock becomes worthless. In such circumstances, a fact-finder might conclude that the misrepresentation was material and relied upon by the investor but it did not cause the loss. n234

In 2005, the Supreme Court resolved a split among the Circuit Courts concerning the standard for pleading loss causation in fraud on the market cases, holding that "an inflated purchase price will not itself constitute or proximately cause the relevant economic loss." n235 The Court rejected the standard set by the Eighth and Ninth Circuits -- that a plaintiff need only allege that the purchase price of securities was artificially inflated due to a material misstatement or omission, regardless of the effect on the price of subsequent disclosures. n236 The Court explained that an inflated stock price on the date of purchase is not sufficient to prove loss causation because at the time of purchase, the plaintiff has suffered no loss. n237 Because the plaintiff has suffered no harm at the time of purchase, this approach is irreconcilable with the common law origins of securities fraud actions which require actual damages to be shown. n238 The plaintiff's burden to allege and prove proximate causation and economic loss is congruent with the other circuit decisions cited by the Court in support of its standard of proximate causation as rooted in common law tort theory. n239

The Court held the plaintiff's particularity of pleading in *Dura* was inadequate in light of the traditional elements of causation and loss. n240 "It should not prove burdensome for a plaintiff who has suffered an economic loss to provide a defendant with some indication of the loss and the causal connection that the plaintiff has in mind." n241 Because the plaintiffs in *Dura* were seeking class certification, the Court reiterated the pleading requirements set forth in the Private Securities Litigation Reform Act of 1995 ("PSLRA") that plaintiffs "'specify' each misleading statement," plead facts with particularity, and bear the burden of proving causation. n242 The Court reminded the parties that private securities actions exist not to provide investors general insurance against losses, but to protect them from losses that are actually caused by misrepresentations. n243 Specifically pleading causation and loss reinforces this policy objective.

The Fourth and Seventh Circuits have subsequently cited *Dura* for the proposition that both the alleged misstatement as well as the causal connection of the particular misstatement to the drop in stock price are specifically pled. n244 In the class action context, the Fifth Circuit relied on *Dura* to confer more expansive power on the courts to reach the merits of the case at the certification stage rather than at summary judgment. n245 In sum, *Dura* has resulted in a higher threshold for plaintiffs to meet in alleging sufficient facts to demonstrate to the court their ability to prove loss causation, and therefore has also solidified these circuit courts' distaste for "in terrorem" securities fraud actions. n246

However, not all circuits have embraced *Dura's* potentially expansive reach. The Ninth Circuit refused to extend the *Dura* reasoning to cases alleging loss causation in the context of a privately sold and privately traded stock. In *Livid Holdings, Ltd. v. Salomon Smith Barney*, the Ninth Circuit adhered to its pre-*Dura* reasoning that an artificially inflated stock price can be sufficient to plead loss causation because the transaction was private, and therefore *Dura* did not control. n247 The Second Circuit has refused to extend the *Dura* loss causation analysis to proximate cause analysis in common law fraud claims. n248 The Eighth Circuit has refused to apply *Dura* to loss causation analysis in criminal securities fraud actions. n249 Even the Fifth Circuit, while expanding the scope of courts' analysis at the class certification stage, simultaneously characterized the holding in *Dura* as "very narrow" and tangential to its examination of reliance. n250

[3] Secondary Liability

Plaintiffs in *Rule 10b-5* cases often attempt to include as many defendants as possible in their lawsuit. Prior to 1994, potential defendants included principal violators, those who made or were responsible for making the allegedly false statement or for withholding the allegedly material facts, and secondary violators, those who assisted in or were responsible for the wrongdoer's activities. Employers, corporate directors, banks and other financial institutions, and professionals like auditors and lawyers tended to be the ones most often named as defendants secondarily liable for alleged violations of *Rule 10b-5*. Plaintiffs relied on theories of aiding and abetting, conspiracy, common law principles of respondent superior, and control person liability under Section 20(b) to allege that these individuals and entities were liable for the underlying securities violation.

The 1994 Supreme Court decision in *Central Bank of Denver v. First Interstate Bank of Denver* n251 altered many of the theories upon which defendants were held secondarily liable in suits under *Rule 10b-5*. The Court surprised many by holding that no private civil cause of action for aiding and abetting existed under Section 10(a). After *Central Bank*, courts have had to confront, sometimes with contrary results, questions of what constitutes a primary violation of Section 10(b) and to what extent causes of action still remain against defendants who can only be said to be "secondarily" liable.

This subsection explores the theories of secondary liability after *Central Bank*. The civil liabilities of potential defendants such as lawyers, accountants, and broker-dealers are addressed more specifically and in more detail in other chapters. n252

[a] Aiding and Abetting.

Prior to *Central Bank*, courts generally accepted a private civil cause of action for aiding and abetting violations of Section 10(a) and *Rule 10b-5*. n253 The elements for liability included (i) the existence of a primary violation of § 10(b) or *Rule 10b-5*, (ii) the defendant's knowledge of (or recklessness as to) that primary violation, and (iii) "substantial assistance" of the violation by the defendant. The principal debate among the courts was over the appropriate standard of scienter for these actions, and in particular whether reckless behavior could support a claim for aiding and abetting in the absence of a duty running from defendants to plaintiffs. n254

Indeed, the Supreme Court initially granted certiorari in *Central Bank* to address the scienter standard for aiding and abetting liability. On its own initiative, the Court asked the parties to brief whether there was any basis for a private cause of action for aiding and abetting violations of Section 10(b) and *Rule 10b-5*. n255 It was on this issue that the Court issued its decision.

[i] Central Bank. Central Bank was the indenture trustee for two bond issues in 1986 and 1988, totaling \$26 million, used to finance improvements in a planned residential and commercial development in Colorado Springs, Colorado. The bonds were secured by landowner assessment liens and the covenants required the land subject to the liens to be worth at least 160 percent of the outstanding principle and interest on the bonds.

The bond covenants required the developer to give Central Bank an annual report that the 160 percent test had been met. In January 1988, the developer furnished Central Bank with an appraisal of the land securing the 1986 bond offering and the land proposed to secure the 1988 bond offering. The appraisal showed the assessed value of the land remained virtually unchanged since 1986.

Central Bank received a letter shortly after from the senior underwriter for the 1986 bonds expressing skepticism about the appraisal in light of the downturn in the Colorado Springs' real estate market between 1986 and 1988 and the use of an outdated appraisal for the 1988 bonds. Central Bank's in-house appraiser echoed that view and suggested Central Bank retain an independent appraisal of the property. The developer got Central Bank to delay the appraisal until the

end of 1988, six months after the 1988 bond issue closed, by which time the bonds were in default. n256 After the default, the plaintiffs sued Central Bank for aiding and abetting the violation of Section 10(b) and *Rule 10b-5*. The district court granted summary judgment to Central Bank and the appeals court reversed, with the courts differing over whether Central Bank acted with scienter to support a private aiding and abetting violation.

The Supreme Court affirmed, holding there was no private right of action for aiding and abetting violations of Section 10(b) and *Rule 10b-5*. The Court construed its prior relevant decisions as falling into two groups: one group of cases determined the "*scope of conduct* prohibited by Section 10(b)," and the other group determined *the elements* of "the 10b-5 private liability scheme." As to the latter, because Congress did not create a private cause of action, the Court has had to "infer how the 1934 Congress would have addressed the issue[s] had the 10b-5 action been included as an express provision in the 1934 Act."

Because *Central Bank* involved an issue of the *scope of conduct* covered by Section 10(b), the Court looked to the plain language of the statute: "the text of the statute controls our decision." The Court decided the text of § 10(b) prohibits "only the making of a material misstatement (or omission) or the commission of a manipulative act" but not aiding or abetting these acts; therefore, it held that no private civil liability exists under § 10(b) for aiding and abetting. The Court rejected the argument that the statute covers aiding and abetting because Section 10(b) covers individuals who "directly or indirectly" defraud plaintiffs:

The federal courts have not relied on the "directly or indirectly" language when imposing aiding and abetting liability under Section 10(b), and with good reason. There is a basic flaw with this interpretation The problem, of course, is that aiding and abetting liability extends beyond persons who engage, even indirectly, in a proscribed activity; aiding and abetting liability reaches persons who do not engage in the proscribed activities at all, but who give a degree of aid to those who do. A further problem with respondents' interpretation of the "directly or indirectly" language is posed by the numerous provisions of the Exchange Act that use the term in a way that does not impose aiding and abetting liability. In short, respondents' interpretation of the "directly or indirectly" language fails to support their suggestion that the text of Section 10(b) itself prohibits aiding and abetting. n257

In short, the Court observed, "Congress knew how to impose aiding and abetting liability when it chose to do so ... If ... Congress intended to impose aiding and abetting liability, we presume it would have used the words 'aid' or 'abet' in the statutory text. But it did not." n258

Although it held that "the statute itself resolves the case," the Court also examined "how the 1934 Congress would have addressed the issue had the 10b-5 action been included as an express provision in the 1934 Act." n259 For this analysis, the Court used "the express causes of action in the securities Acts as the primary model The reason is evident: Had the 73d Congress enacted a private Section 10(b) right of action, it likely would have designed it in a manner similar to the other private rights of action in the securities Acts." n260 Given that the Securities Act of 1933 (§§ 11 and 12) and the Securities Exchange Act of 1934 (§§ 9, 16, 18, and § 20A) do not contain explicit provisions for aiding and abetting liability, the Court observed that: each (like § 10(b)) specifies the conduct for which defendants may be held liable. Some of the express causes of action specify categories of defendants who may be liable; others (like 10(b)) state only that 'any person' who commits one of the prohibited acts may be held liable ... however, none of the express causes of action in the Exchange Act further imposes liability on one who aids or abets a violation.

From this, the Court concluded that "we can infer that Congress likely would not have attached aiding and abetting liability to Section 10(b) had it provided a private Section 10(b) cause of action." n261

Based on this analysis, the Court held that Section 10(b) could not support aiding and abetting liability and thus "Central Bank may not be held liable as an aider and abettor." n262

The Court cautioned, however, that:

The absence of § 10(b) aiding and abetting liability does not mean that secondary actors in the securities markets are always free from liability under the security Acts. Any person or entity, including a lawyer, accountant, or bank, who employs a manipulative device or makes a material misstatement (or omission) on which a purchaser or seller of securities relies may be liable as a primary violator under 10b-5, assuming *all* of the requirements for primary liability under *Rule 10b-5* are met. In any complex securities fraud, moreover, there are likely to be multiple violators n263

The Court's language in *Central Bank* was broad enough to bring into question the SEC's ability to bring aiding and abetting charges under Section 10(b). n264 Thus, Congress, in the Reform Act, explicitly gave the Commission power to seek an injunction or money penalties against "any person who *knowingly* provides substantial assistance to another person in violation of a provision" of the '33 or '34 Act "or any rule or regulation issued" under the '33 or '34 Act. n265 In doing so, Congress rejected calls to overturn the holding of *Central Bank* and provide for private civil actions for aiding and abetting. n266

[iii] Aftermath of Central Bank And Scheme Liability. After *Central Bank*, plaintiffs attempted to bring securities fraud suits against secondary actors, such as accountants, lawyers, and consultants, using a theory of liability known as scheme liability. Under this theory, plaintiffs argued that secondary actors who knowingly participated in transactions that resulted in a company issuing fraudulent financial statements, should be considered primary violators and subject to liability for the issuer's violations of Section 10(b). Until recently, the circuits were split as to what extent scheme liability could be used to hold secondary actors liable.

The Ninth Circuit adopted a standard of primary liability that differed little from the aiding and abetting standard that controlled prior to *Central Bank*. In *Simpson v. AOL Time Warner, Inc.* n267, the Ninth Circuit ruled that conduct in the furtherance of a "scheme to defraud" may be the basis of primary liability. n268 The court held that

to be liable as a primary violator of § 10(b) for participation in a 'scheme to defraud,' the defendant must have engaged in conduct that had the principal purpose and effect of creating a false appearance of fact in furtherance of the scheme. n269

The court further clarified its holding by stating it was not enough that a transaction in which a defendant was involved had a deceptive purpose and effect; "the defendant's own conduct contributing to the transaction or overall scheme must have had a deceptive purpose and effect." n270

Other courts rejected plaintiffs' attempts to use scheme liability to state claims against secondary actors, taking a stricter view of what constitutes a primary violator and requiring the actor to have made the false statement or to have directly engaged in a manipulative trading practice to be held liable under Section 10(b) or *Rule 10b-5*. The Second Circuit, in *Wright v. Ernst & Young*, n271 rejecting the "substantial participation" standard of the Ninth Circuit, found that an auditor's "private" review of allegedly misleading financial statements included in a press release did not support primary liability. As the opinion explains, a secondary actor cannot incur primary liability under the [Exchange] Act for a statement not attributed to the actor at the time of its dissemination [T]he misrepresentation must be attributed to that specific actor at the time of public dissemination, that is, in advance of the investment decision. n272

The Supreme Court took up the issue in 2008 in *Stoneridge Investment Partners, LLC v. Scientific-Atlanta, Inc.* n273, In *Stoneridge*, the plaintiffs sued Scientific-Atlanta, Inc., and Motorola, Inc., both suppliers to Charter Communications, Inc. ("Charter"), which allegedly issued false and misleading financial statements. n274 Specifically, plaintiffs alleged that Scientific-Atlanta and Motorola supplied digital cable converter boxes to Charter at inflated prices with the understanding that Scientific-Atlanta and Motorola would use the excess payments to purchase advertising revenue from Charter. n275 Scientific-Atlanta and Motorola allegedly knowingly entered into these agreements, which Charter

improperly accounted for and used to inflate its earnings. n276 Although the defendants played no role in preparing or disseminating Charter's financial statements, the plaintiffs alleged that they were nonetheless liable because the defendants participated in these sham transaction knowing or in reckless disregard of Charter's intention to use the transactions to inflate its revenues and knowing the resulting financial statements would be relied upon by research analysts and investors. n277

The Supreme Court rejected plaintiffs' arguments, finding that the actions of Scientific-Atlanta and Motorola "were not relied upon by the investors and that, as a result, liability cannot be imposed upon respondents." n278 In refusing to presume reliance, the Court explained that

Respondents had no duty to disclose; and their deceptive acts were not communicated to the public. No member of the investing public had knowledge, either actual or presumed, of respondents' deceptive acts during the relevant times. Petitioner, as a result, cannot show reliance upon any of respondents' actions except in an indirect chain that we find too remote for liability. n279

The Court concluded that the plaintiffs' theory of scheme liability would impermissibly revive aiding and abetting liability, stating that:

Petitioner's view of primary liability makes any aider and abettor liable under § 10(b) if he or she committed a deceptive act in the process of providing assistance. ... Were we to adopt this construction of § 10(b), it would revive in substance the implied cause of action against all aiders and abettors except those who committed no deceptive act in the process of facilitating the fraud; and we would undermine Congress' determination that this class of defendants should be pursued by the SEC and not by private litigants. n280

Following *Stoneridge*, lower courts have interpreted the Supreme Court's decision to all but eliminate liability for secondary actors. n281

[b] Controlling Persons. Section 20(a) provides that any person who "controls" a person liable under the Act is liable for the violation with the primary violator unless the controlling person acted in good faith and did not induce the violation that gave rise to the cause of action. n282 Although Section 20(a) does not define "control," legislative history indicates that control can exist through stock ownership, a lease or a contract, agency, or other means. n283 The Commission, in a rule that may have applied by analogy to Section 20(a), has declared that "control" means "the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a person, whether through the ownership of voting securities, by contract, or otherwise." n284

Courts generally have followed the Commission's lead and require persons to have the power to control the conduct underlying the claim. Differences between the courts exist over whether controlling person liability requires "culpable participation" in the fraud, n285 or whether it is sufficient merely to have the indirect or direct power to control or influence the corporate policy that resulted in the violation. n286

[c] Other Bases for Secondary Liability. *Central Bank* also called into question whether there is a private right of action against individuals who would be liable for violations of Section 10(b) under other theories of secondary liability, such as conspiracy and respondeat superior. n287

Most courts, however, have determined that respondeat superior liability has survived *Central Bank*. n288 As one court concluded, the issue of whether respondeat superior is a legitimate basis for liability under Section 10(b) "is not a question of defining the scope of affirmative conduct proscribed by the statute. Instead, the issue is 'deciding on whose shoulders to place responsibility for conduct indisputably proscribed' by the statute." n289

Central Bank also struck a fatal blow on conspiracy claims under *Rule 10b-5*. The Second Circuit, in *Dinsmore v.*

Squadron, Elenoff, Pleasant, Sheinfeld & Sorkin, n290 held that such a conspiracy claim could not survive after *Central Bank*. The case involved a "Ponzi" scheme perpetrated by Towers Financial Corporation. Squadron, Elenoff served as counsel for Towers and two of its executives during investigations by the Securities and Exchange Commission. Plaintiffs alleged that Squadron, Elenoff took part in and prolonged Towers' fraud by making material misstatements and omissions to the SEC and by drafting an offer of rescission to earlier investors who were not plaintiffs in *Dinsmore*.

The Second Circuit noted that every court after *Central Bank* has rejected a private cause of action for securities fraud based on conspiracy. n291 It followed suit and held the reasoning that led the Supreme Court to reject aiding and abetting liability under Section 10(b) and 10b-5 in *Central Bank* applied with equal force to conspiracy claims. The court noted the statute is silent on whether there is liability for co-conspirators; finding liability would therefore " 'extend liability beyond the scope of conduct prohibited by the statutory text.' " n292 Indeed, the Second Circuit noted that, as with aiding and abetting, "none of the express causes of action in the Securities Exchange Act mention conspiracy, despite the fact that the Act imposed other forms of secondary liability -- namely upon controlling persons under § 20." Finally, the Second Circuit was persuaded that adopting a cause of action for conspiracy under Section 10(b) would abrogate the requirement that the plaintiff show reliance:

[A] conspiracy cause of action would similarly render irrelevant the question whether plaintiffs relied on any misstatement or omission by the defendant being sued. The instant case provides an apt example: the only misstatements or omissions alleged to have been made by Squadron Elenoff were made to the 1986 Noteholders and the SEC, and plaintiffs -- far from relying upon these communications in purchasing their securities -- were entirely unaware of them. This fact would be immaterial were we to recognize a conspiracy cause of action and inasmuch as this 'would disregard the careful limits on 10b-5 recovery mandated' by the Supreme Court, *Central Bank*, 511 U.S. at 180, 114 S. Ct. at 1450, we refuse to do so. n293

The Second Circuit also noted, in conclusion, that adopting a cause of action for conspiracy would vitiate the holding of *Central Bank* "inasmuch as many aiding and abetting claims would simply be repleaded as conspiracy claims." n294

[4] Affirmative Defenses

Rule 10b-5 contains no express affirmative defenses, but courts have recognized certain defenses to accompany the private right of action under *Rule 10b-5*. Chief among these affirmative defenses is a statute of limitations for suits under *Rule 10b-5*. Of lesser importance are the doctrine of *in pari delicto* and certain equitable and common law defenses.

[a] Statute of Limitations. In *Lampf, Pleva, Lipkind, Prupis & Pettigrew v. Gilbertson*, n295 the Supreme Court adopted a one-year/three-year statute of limitations for all private actions under *Rule 10b-5*, rejecting state-law statutes of limitations as the closest analog for federal securities law cases. Instead, the Court held there should be a uniform federal statute of limitations for securities fraud cases, and reviewed limitations periods applicable to similar express causes of action under the Exchange Act and Securities Act. n296 Noting that Sections 9 and 18 of the Exchange Act included a one-year/three-year period similar to that contained in Section 13 of the Securities Act of 1933 for express causes of action under the Securities Act, the Court concluded: "Litigation instituted pursuant to § 10(b) and *Rule 10b-5* therefore must be commenced within one year after the discovery of the facts constituting the violation and three years after such violation." n297

In 2002, however, Congress adopted a two-year from discovery/five-year from violation statute of limitations for private actions alleging "fraud, deceit, manipulation or contrivance" in violation of the federal securities laws. n298 Although this statute of limitations clearly applies to actions brought pursuant to *Rule 10b-5*, its application to some other actions is less clear. However, courts have generally declined to apply the extended statute of limitations to actions which do not require proof of fraudulent intent. n299 In addition, every circuit court that has considered the

question has held that Sarbanes-Oxley does not revive claims barred on the Act's effective date. n300

After *Lampf*, courts have generally interpreted "discovery" as imposing a duty of inquiry upon plaintiffs, holding that plaintiffs must bring suit within one year of when they knew, or could have known upon inquiry, of the facts constituting the alleged fraud. n301 To put plaintiffs on notice, there must be "sufficient storm warnings alerting a reasonable person to the possibility that there were either misleading statements or significant omissions involved in the sale." n302 The test is objective -- that is, courts will consider whether a reasonable person would have had notice of the facts, not whether the plaintiff had actual notice. Thus, the analysis turns on information available to the public, regardless of whether plaintiff was aware of the information. Courts have found notice provided by public filings with the Securities and Exchange Commission, n303 an article in a business journal, n304 or unusual moves in the price of the company's stock. n305

[b] *In Pari Delicto* or "Unclean Hands." Defendants in cases under *Rule 10b-5* can assert the doctrine of *in pari delicto*, derived from the Latin maxim *in pari delicto potior est conditio possidentis [defendentis]*: "In a case of equal or mutual fault ... the position of the [defending] party ... is the better one." n306 The doctrine affords a defense if the plaintiff engages in conduct sufficiently egregious to preclude him from recovery, whether or not the defendant committed securities fraud. n307 The Supreme Court, in two cases, established guidelines severely restricting availability of this defense in private securities fraud litigation.

In *Bateman Eichler, Hil, Richards, Inc. v. Berner*, n308 plaintiffs sued, claiming they sustained substantial losses when a securities broker and an officer of the issuer gave them false and misleading information. Defendants moved to dismiss, claiming that plaintiffs themselves violated Section 10(b) and *Rule 10b-5* by trading on what they believed was non-public information. The district court dismissed the suit on the basis of the *in pari delicto* defense. The Ninth Circuit reversed, holding that "securities professionals and corporate officers who have allegedly engaged in fraud should not be permitted to invoke the *in pari delicto* doctrine to shield themselves from the consequences of the fraudulent misrepresentation." n309 The Supreme Court affirmed, holding the *in pari delicto* defense was available only when plaintiffs bore at least substantial responsibility for the violations, and the defense would not significantly interfere with the effective enforcement of the securities laws and protection of the investing public. n310

In light of this two-part test, the Court affirmed. First, it found the tippee-plaintiffs less culpable than the defendant tippers: "In the context of insider trading ... a person whose liability is solely derivative can[not] be said to be as culpable as one whose breach of duty gave rise to that liability in the first place." n311 Second, the Court found that denying the defense to defendants would promote the objectives of the federal securities laws: "the public interest will most frequently be advanced if defrauded tippees are permitted to bring suit and to expose illegal practices by corporate insiders and broker-dealers to full public view for appropriate sanctions." n312

In *Pinter v. Dahl*, a subsequent opinion under Section 12 of the Securities Act of 1933, the Supreme Court held that to bar recovery under the *in pari delicto* doctrine, the plaintiff must be "an active, voluntary participant in the unlawful activity that is the subject of the suit." n313

The Court's decisions in *Bateman Eichler* and *Pinter* have made the *in pari delicto* doctrine, and the companion equitable defense of "unclean hands," substantially less attractive to defendants. The doctrine of unclean hands has generally been applied in bankruptcy cases, against people who allegedly contributed to pre-bankruptcy losses. n314

[c] Laches. Even if a statute of limitations does not bar a plaintiff's *Rule 10b-5* suit, the doctrine of laches may preclude relief. n315 Under this theory, a plaintiff's unreasonable delay in filing suit will bar a claim for equitable relief if the delay has prejudiced defendant. n316

However, the adoption in *Lampf* of a general federal statute of limitations for suits under *Rule 10b-5* and the subsequent extension of the statute of limitations under Sarbanes-Oxley suggests the doctrine of laches should not be applied to

shorten the period where plaintiff may bring suit. In cases arising under the express remedies in the Exchange Act and the Securities Act, a number of courts have held that there is a strong inference the statute of limitations period should not be cut short by the application of laches. n317

[d] Waiver, Estoppel, and Ratification. There are a number of other defenses, including waiver, estoppel, ratification, and due diligence, available to defendants, although each of these defenses are applied narrowly and infrequently.

Each of these defenses rests on the notion that plaintiffs, by not being diligent in discovering defendant's misfeasance or in asserting their rights, n318 should be precluded from pursuing a claim under Section 10(b) and *Rule 10b-5*. n319 As the Second Circuit stated:

The purpose of the Securities Exchange Act is to protect the innocent investor, not one who loses his innocence and then waits to see how his investment turns out before he decides to invoke the provisions of the Act. n320

These defenses are often asserted in claims by customers against broker-dealers, with varying results. Early decisions generally turn on the trading experience of the plaintiff and whether the plaintiff knowingly consented to defendant's actions. n321 These claims are now most often arbitrated. n322 There are relatively few recent federal court decisions addressing estoppel, waiver or ratification.

[5] Jurisdiction and Venue under the Exchange Act

[a] Jurisdiction over the Subject Matter

Federal courts have exclusive jurisdiction over private actions under *Rule 10b-5*. Once a court has accepted jurisdiction, it may exercise "supplemental jurisdiction" over a closely related state law claim. In a number of cases in recent years, the federal courts have been called upon to decide whether they have subject matter jurisdiction over 10b-5 claims arising out of transnational securities transactions.

[i] The Jurisdictional Statute. Section 27 of the Exchange Act gives the federal courts exclusive jurisdiction over violations of the Act or the rules thereunder, and over suits in equity and actions at law to enforce liabilities arising under the Act or the rules. n323 The Securities Litigation Uniform Standards Act of 1998 (SLUSA) n324 bars most class actions for securities fraud from being filed in state court, and provides defendants with the right to remove any such suit filed in state court to federal court.

Under SLUSA, a "covered class action" alleging "(a) an untrue statement or omission of a material fact in connection with the purchase or sale of a covered security; or (b) that the defendant used or employed any manipulative or deceptive device or contrivance in connection with the purchase or sale of a covered security" cannot be brought in state court. n325 A "covered class action" is one filed for 50 or more "persons or prospective class members" or by one or more shareholders "in a representative capacity." n326 The Supreme Court has held that the scope of pre-emption under SLUSA may include state law class actions which could not be brought under the federal laws -- e.g. suits by securities holders -- provided the suit alleges fraud "in connection with" the purchase or sale of a covered security. n327

There are several exceptions to the class actions governed by the Act. First, a "covered class action" does not include "exclusively" derivative actions. n328 Second, Congress carved out a "Delaware" exception -- allowing class actions brought under the statutory or common law of the state of incorporation about (a) the purchase or sale of securities by the issuer to or from its shareholders or (b) any recommendation, position, or other communication by the issuer to its shareholders relating to a vote of the shareholders' securities, a tender or exchange offer, or the exercise of dissenters' or appraisal rights. n329 Third, the Act does not affect the ability of a state or state pension fund to bring an action, either individually or as a member of a class composed solely of other states or state pension funds.

A "covered security" subject to SLUSA is any security that "satisfies the standards specified" in Section 18(b)(1) and (2) of the Exchange Act "at the time during which" the alleged fraud occurred. n330 This includes securities listed or authorized for listing on the NYSE, AMEX, or any other major exchange or on the NASDAQ National Market System. Given its reliance on the standards in Section 18, SLUSA excludes from its coverage penny stocks, shares in limited partnerships, private placements and similar securities. Explicitly excluded is any debt security exempt from registration pursuant to Section 4(2) of the Securities Act of 1933.

To further its purpose of funneling "covered" class actions into federal court, SLUSA provides that class actions filed in state court "shall be removable" to "the federal district court for the district in which the action is pending." n331

Two other aspects of SLUSA deserve comment. First, the Act provides that a federal court shall have the power to stay discovery in a parallel state court class action. Second, the Act applies only prospectively. n332

[ii] Supplemental Jurisdiction. If a federal court has jurisdiction over an action under *Rule 10b-5*, it also possesses "supplemental jurisdiction" over any state claims "so related to claims in the action ... that they form part of the same case or controversy under Article III of the United States Constitution." n333 A court may decline to exercise supplemental jurisdiction if (1) the state law claim raises a novel or complex issue of state law, (2) the state law claim substantially predominates over the 10b-5 claim and any other claims over which the district court has original jurisdiction, (3) the district court has dismissed the 10b-5 claim and any other claims over which it has original jurisdiction, or (4) in exceptional circumstances, there are other compelling reasons for declining jurisdiction. n334

Plaintiffs' ability to append state law claims significantly affects the scope of damages in securities fraud cases. Because punitive damages are not available in actions under Section 10(a) or *Rule 10b-5* n335 but may be available under state common law, the exercise of supplemental jurisdiction over state law claims allows plaintiffs to seek punitive damages.

[iii] Transnational Transactions. As capital markets have become increasingly internationalized, federal courts have had to decide the extraterritorial application of the antifraud provisions of the securities laws. Courts have attempted to define, for example, the extent to which *Rule 10b-5* applies to sales of securities by foreign issuers to Americans and to foreigners, and the extent to which *Rule 10b-5* applies to securities transactions that take place in part in this country and in part in other nations.

"[T]he Securities Exchange Act is silent as to its extraterritorial application." n336 Courts (principally the Second Circuit) have developed two jurisdictional tests. One of these tests focuses on the *conduct* of foreign persons within the United States; the other focuses on effects within the United States of conduct occurring in foreign nations. A court may use either or both of two tests.

Under the "effects" test, a U.S. court has subject matter jurisdiction when illegal activity abroad causes a "substantial effect" within the United States. n337 For example, the Second Circuit concluded the "effects" test was met in a derivative suit brought by an American investor against the directors of a Canadian corporation. n338 The corporation sold treasury stock to two non-American companies. Although the fraudulent sales transactions occurred outside the United States, the transactions reduced the value of the Canadian corporation's stock, which was listed on an American stock exchange. The resulting "impairment of the value of American investments by sales by the issuer in a foreign country" amounted to "a sufficiently serious effect upon United States commerce to warrant assertion of jurisdiction for the protection of American investors..." n339 On the other hand, the effects test is not met when, for example, all parties involved in a transaction are foreign, even though nonparty U.S. purchasers ultimately acquire some fraudulently issued securities. The presence of a foreign investor's agent in the United States does not matter because it was "entirely fortuitous and personal." n340 Similarly, defrauding a foreign investment trust is not a "substantial effect" when United States residents own only a *de minimis* proportion of the trust's securities. n341

The rationale for the "conduct" test is that "Congress does not want the United States to be used as a base for

manufacturing fraudulent security devices for export, even when they are peddled only to foreigners." n342 Under the Second Circuit's formulation of this test, a federal court has subject matter jurisdiction if (1) the defendant's activities in the United States are more than "merely preparatory" to a securities fraud conducted elsewhere, and (2) these activities or culpable failures to act within the United States "directly caused" the losses. n343 Applying the conduct test, the Second Circuit found subject matter jurisdiction in a case where an American corporation charged the defendants violated *Rule 10b-5* by conspiring to cause it to purchase some of the stock of a British corporation at an excessive price. n344 Although sales transactions had taken place outside the United States, the plaintiff alleged the defendants made a number of material misrepresentations during meetings between the parties in the United States. In contrast to the Second Circuit, other courts have concluded that a lesser quantum of conduct within the United States is necessary to support subject matter jurisdiction. In particular, they have indicated the domestic conduct need be only significant to the fraud rather than a direct cause of it. n345 Applying this more permissive approach, the Ninth Circuit found subject matter jurisdiction based upon a single U.S. meeting on the purchase of one foreign corporation by another. n346

The conduct and effects tests can be applied in conjunction with each other (e.g., the more significant the effects of the fraud in the United States, the lesser the quantum of conduct required to establish subject matter jurisdiction). n347 Thus, for example, the Second Circuit has indicated that anti-fraud provisions of the securities laws:

(1) "Apply to losses from sales of securities to Americans resident in the United States whether or not acts (or culpable failures to act) of material importance occurred in this country;" n348

(2) "Apply to losses from sales of securities to Americans resident abroad or to a foreign corporation with a significant proportion of United States shareholders if acts (or culpable failures to act) of material importance in the United States have significantly contributed thereto;" n349

(3) "Do not apply to losses from sales of securities to foreigners outside the United States unless acts (or culpable failures to act) within the United States directly caused such losses." n350

[b] Jurisdiction over Parties. "The Securities Exchange Act permits the exercise of personal jurisdiction to the limits of the *Due Process Clause of the Fifth Amendment*." n351 Section 27 of the Exchange Act authorizes worldwide service of process in any suit to enforce any liability created by the Act or by rules and regulations under the Act. n352 The Federal Rules of Civil Procedure, in turn, authorize worldwide service where a federal statute authorizes this service, personal jurisdiction exists over the defendant, and service does not otherwise offend constitutional principles. n353

To be subject to service, a foreign defendant must have minimum contacts with the United States. Thus, courts will apply the same analysis used in state law cases to decide whether extraterritorial jurisdiction over out-of-state defendants is constitutionally permissible. n354 The leading case examining the issue is *Leasco Data Processing Equipment Corp. v. Maxwell*. n355 There, the Second Circuit held that although there was jurisdiction over a British corporation because its managing director appeared at meetings and made misrepresentations in the United States, there was not jurisdiction over the corporation's British accounting firm, which had not performed relevant acts or caused foreseeable consequences in this country. The court declared that "where a defendant has acted within a state or sufficiently caused consequences there, he may fairly be subjected to its judicial jurisdiction even though he cannot be served with process in the state..." n356

Moreover, courts generally have found that if there is personal jurisdiction over a corporation, there is personal jurisdiction over officers and directors or others who are "control persons" for purposes of the Exchange Act, even if they reside outside of the United States, and do not have minimum contacts with the United States. n357

Personal jurisdiction may also increasingly be an issue in cases involving off-shore Internet Web sites. In a number of cases not involving securities fraud, courts generally have found that a "passive" Internet Web site, through which a

putative defendant does not target residents of a particular state, will not support exercise of personal jurisdiction over the company that established or maintained the Web site. For example, in *Soma Medical International v. Standard Chartered Bank*, the Tenth Circuit, in a case involving a British bank, held that jurisdiction could not be founded on the Bank's operation of a Web site when it appeared "to be a passive Web site that does little more than make information available to those who are interested" and one where [the Bank] "has simply posted information on an Internet Web site which is accessible to users in foreign jurisdictions." n358 The court in *Zippo Manufacturing Co. v. Zippo Dot Com, Inc.*, n359 succinctly summarized the case law that has developed concerning personal jurisdiction based on the operation of an Internet Web site:

At one end of the spectrum are situations where a defendant clearly does business over the Internet. If the defendant enters into contracts with residents of a foreign jurisdiction that involve the knowing and repeated transmission of computer files over the Internet, personal jurisdiction is proper. *E.g.*, *CompuServe, Inc. v. Patterson*, 89 F.3d 1257 (6th Cir. 1996) . At the opposite end are situations where a defendant has simply posted information on an Internet Web site which is accessible to users in foreign jurisdictions. A passive Web site that does little more than make information available to those who are interested in it is not grounds for the exercise personal jurisdiction. *E.g.*, *Bensusan Restaurant Corp., v. King*, 937 F.Supp. 295 (S.D.N.Y. 1996) . The middle ground is occupied by interactive Web sites where a user can exchange information with the host computer. In these cases, the exercise of jurisdiction is determined by examining the level of interactivity and commercial nature of the exchange of information that occurs on the Web site. *E.g.*, *Maritz, Inc. v. Cybergold, Inc.*, 947 F. Supp. 1328 (E.D. Mo. 1996) . n360

Given the increasing use of the Internet to effect securities transactions, promote companies, and disseminate information about securities, these decisions may assume increased importance in cases under *Rule 10b-5*.

[c] Venue. A private action under *Rule 10b-5* may be brought in any district where any act or transaction constituting the alleged violation of the Rule occurred, or in any district where the defendant is found or is an inhabitant or transacts business. n361 If the plaintiff's cause of action stems from a fraudulent scheme among a group of defendants, venue will lie in any district where any of the defendants committed a material act in furtherance of the scheme. n362 Courts sometimes refer to this as the "co-conspiracy venue theory." n363 Venue can be based on an act that was not "crucial" to the consummation of the fraud, n364 but the act must have been "more than an immaterial part of the alleged violation." n365

Even though the plaintiff initiates his suit in a proper forum, the case may be transferred to another forum "[f]or the convenience of parties and witnesses, in the interest of justice..." n366 In ruling on a motion for a change of venue, a court will give substantial weight to the plaintiff's choice of forum. n367 Otherwise, "[i]f transfers were granted in securities cases with too much abandon, the effect would be to undermine Congressional efforts to enforce securities laws by minimizing burdens on plaintiffs in civil suits." n368 In addition, however, the court will consider which alternatives is superior in terms of factors such as availability of process to compel the attendance of witnesses, the cost of obtaining the attendance of witnesses, and the ease of access to sources of proof. n369

[6] Remedies

Section 28(a) of the Exchange Act provides that a plaintiff cannot recover more than "actual damages" in a *Rule 10b-5* suit (although plaintiffs may also seek any other remedy available in law or equity). n370 Because Section 28(a) does not define "actual damages," courts have adopted a number of alternative theories of damages available in a private securities fraud case. In addition, courts have allowed plaintiffs to seek rescission, contribution, and injunctive relief.

[a] Damages.

[i] Measurement of Damages. A plaintiff's "out-of-pocket" loss is generally the "correct" measurement of

damages in a *Rule 10b-5* action. n371 At least one Court of Appeals has noted that courts are "unanimous" in limiting damages to "out of pocket" losses except when "defendant was a broker-dealer or the plaintiff and defendant were in privity." n372 A plaintiff's "out of pocket" loss is the difference between the "true value" of the security at the time the plaintiff purchased or sold the security (that is, the price unaffected by the misrepresentation or omission alleged) and the price plaintiff paid or received for the security. n373 Plaintiffs generally allege that the degree to which the alleged fraud affected the price of the security is evidenced by the change in the price of the security once the allegedly fraudulent statement, omission, or activity is corrected or becomes public. To prevent a recovery being influenced by the volatility of the price of the security, the Reform Act provided that, in cases involving open market transactions, damages are to be measured by the average share price over a 90-day period after the allegedly fraudulent statement, omission, or activity is corrected or becomes public. n374

In any event, the determination of plaintiffs' "out of pocket" losses, and particularly the "true value" of the security, typically requires expert testimony. n375 Not infrequently, this results in a "battle of the experts" between plaintiffs' expert, who claims the price of the security (or the change in the price once the fraud is discovered) is wholly or substantially influenced by the alleged fraud, and defendants' expert, who opines the price of the stock (or the change in the stock price once the fraud is discovered) reflects industry or market trends rather than the influence of the alleged fraud. n376

Under an out of pocket measure of damages, plaintiffs may be awarded consequential damages n377 but cannot recover "lost" profits or other "foreseeable" damages. n378 Plaintiffs are not restricted to an "out of pocket" measurement of damages, however. A district court has the discretion to consider several alternative damage measurements. First, when defendants receive more than plaintiffs' loss, such as when they fraudulently purchase securities from plaintiff and sell the securities at a profit, damages can be measured by defendants' profit. n379 The rationale behind this principle is that it prevents the "unjust enrichment of a fraudulent buyer." n380 In language quoted with approval by the Supreme Court, the First Circuit observed that "[i]t is more appropriate to give the defrauded party the benefit even of windfalls than to let the fraudulent party keep them." n381

Second, some courts may award "benefit of the bargain" damages if proven with "reasonable certainty." n382 This measure of damages is based on the difference between the value of the security as represented and the value actually received. These damages may be awarded when plaintiff received less than promised in a business combination n383 or suffered losses as a result of the churning of his securities account. n384

Third, rescissory damages may be appropriate in certain circumstances -- normally limited to when money damages will not adequately compensate plaintiff. n385 These damages are equal to the consideration paid by plaintiff minus any value received on the investment. n386 They cannot be reduced by any tax benefits the plaintiffs might receive on the investment. n387 A rescissory damage award is intended to "return the defrauded purchaser to the status quo ante: it contemplates the return of the injured party to the position he occupied before he was wrongfully induced to enter the transaction." n388

The court in *Gould v. American-Hawaiian S.S. Co.*, n389 held that: "(1) 'lost opportunity' damages are available unless the loss is 'wholly speculative'; and (2) if the fact of loss is not 'wholly speculative,' the risk of uncertainty as to amount of damages is cast on the wrongdoer and it is the duty of the fact finder to determine the amount of the damages as best he can from all the evidence in the case." n390 Although the "lost opportunity" theory of damages had not been applied to a 10b-5 case in the Third Circuit, n391 the plaintiffs in *Tse v. Ventana Medical Systems* sought these damages on their 10b-5 claim. n392 As former shareholders of an acquired company, the plaintiffs asserted that they suffered a loss by not knowing, before voting on the merger, the acquiring company had agreed to give compensation packages to two directors of the acquired company. n393 The plaintiffs claimed they would have negotiated a better deal or blocked the merger had they known about the compensation. n394 The court held the shareholders' loss was "wholly speculative", and thus not recoverable. n395

[ii] Punitive Damages. Because damages under Section 28(a) are limited to "actual damages," courts have uniformly held that punitive damages are not allowed for suits under *Rule 10b-5*. n396 Nevertheless, plaintiffs may be able to seek punitive damages by including common law causes of action in a federal securities fraud case.

[iii] Prejudgment Interest. A plaintiff may recover prejudgment interest on any damages awarded in a 10b-5 action. n397 Interest is measured in accordance with the federal statute on prejudgment interest in civil suits. n398

[b] Rescission and Restitution. "Rescission" is the avoidance of a contract or transaction. n399 "Restitution" or "restoration" is often used to denote the return to each person who participated in an exchange of what he gave up in the exchange. n400 Either remedy, alone or in combination, is available under *Rule 10b-5*. n401

If the contract at issue in the lawsuit is still executory, its rescission ordinarily will afford plaintiff complete relief. If the contract has been executed, the plaintiff can sue for damages or for rescission and restitution. n402 A plaintiff who is granted rescission may obtain specific restitution -- the recovery of the property defendants fraudulently obtained -- or rescissory damages. For example, if the defrauded plaintiff sold securities to the defendant, and the defendant still owns the securities at the time of judgment, the plaintiff can recover the securities themselves. n403 If, however, defendant no longer owns the securities, and cannot purchase and tender other securities of the same class, the plaintiff is entitled to rescissory damages. n404

[c] Contribution and Indemnity. The Supreme Court in 1993 confirmed defendants have a right of contribution in securities fraud cases under Section 10(b) and *Rule 10b-5*. n405 Nevertheless, this right in practical terms may provide little benefit to defendants in securities fraud cases, if the sole remaining defendants are able to pay damages while the principal wrongdoers are either effectively judgment-proof or incarcerated.

Congress, in the Reform Act, imposed rules governing contribution in private federal securities fraud cases. Although the Act confirms that contribution is available in all private actions, n406 it imposes proportionate liability depending on the state of mind of the defendants. Defendants found to have committed "knowing violations" are jointly and severally liable for the total amount of all damages. n407 Defendants whose liability rests on less than a "knowing" violation, however, are liable only for their proportionate share of damages, unless this would inadequately compensate plaintiffs with a low net worth. n408 An action for contribution must be brought within six months of entry of judgment. n409

Defendants cannot sue for indemnity, because courts have generally found that it is against public policy to allow one party to shift liability for a violation of the federal securities laws to another party. n410 Directors and officers of corporations will also commonly have a right to indemnification under the corporate by-laws and state corporate statutes. n411

[d] Injunctive Relief. Plaintiffs can seek an injunction in a private *Rule 10b-5* suit. Almost all of the 10b-5 cases discussing the propriety of injunctive relief are concerned with the granting of preliminary injunctions. Although the precise formulation of the preliminary injunction standard varies somewhat from circuit to circuit, a plaintiff, to be awarded injunctive relief, must typically demonstrate the following factors:

- (1) plaintiffs have no adequate remedy at law and will be irreparably harmed if the injunction does not issue; (2) the balance of hardships tilts toward plaintiffs; and (3) plaintiffs have at least a reasonable likelihood of success on the merits. n412

Because plaintiffs must show they do not have an adequate remedy at law, and given that plaintiffs will usually have available to them an action for damages under *Rule 10b-5*, injunctive relief may only be awarded when damages would be unusually difficult to fix or when uncertainty about the amount of damages could cause great injustice to one of the parties. n413

[e] The Use of Experts When Calculating Damages

While courts have generally applied the "out-of pocket" measure of damages in *Rule 10b-5* cases, the Exchange Act and the PSLRA do not sanction a specific method for calculating damages. n414 Because courts have used different methods to calculate damages, parties rely largely on expert witnesses to convince the court of the best method for calculating damages in each specific case.

Measuring damages typically requires a valuation of the stock absent the alleged misrepresentation or omissions. Courts have relied on "event studies" produced by experts as evidence of what the value of the stock would have been had the alleged misrepresentation or omission not occurred. n415 "An event study is a statistical regression analysis that examines the effect of an event on a dependant variable, such as a corporation's stock price." n416 While the "failure to perform an event study comparing the stock's price to the market as a whole or a selected index of similar businesses is enough to cause an expert's opinion to be excluded," the completion of an event study in itself does not validate an expert witness' testimony. n417

In *Carpe*, the court granted the defendant's motion to exclude the plaintiff's expert witness' testimony after it was revealed that "the plaintiffs' expert did not perform a proper event study and failed to follow the accepted methodology of his field, making his opinions in this case inherently unreliable." n418 Without an event study or a valid event study, a plaintiff can be left unable to demonstrate the actual losses that were suffered as a consequence of the fraud and are then vulnerable to summary judgment in favor of the defendant. n419

[i] Transaction-Based Methodology v. Aggregated Methodology. Expert testimony often centers around a debate between the parties concerning whether economic loss should be calculated using a transaction-based methodology or a cumulative methodology that aggregates all of the stock transactions. n420 Using a transaction-based methodology benefits the plaintiff, because it treats each transaction separately and considers only the transactions that resulted in a loss during the loss period when calculating damages. In contrast, a cumulative methodology allows the aggregation of all transactions during the loss period regardless of whether the transactions resulted in gains or losses, which often results in significant off-setting of the economic losses and lower damages. n421 Courts have accepted both methodologies as valid ways to calculate damages in 10b-5 actions. n422 The transaction-based methodology has been viewed as more in line with the intent of securities laws to deter fraud. n423 In *In re Cigna Corp. Sec. Litig.*, the court refused to grant summary judgment for the defendant even though the defense's expert witness demonstrated that the plaintiff did not suffer an economic loss once all of the plaintiff's transactions were aggregated. n424 In reaching this decision, the court considered conflicting expert testimony as to the better measure of damages and concluded that there was no precedent preventing a jury from considering both an aggregated and a transaction-based methodology for calculating damages. n425 In *Rocker Management, LLC v. Lernout & Hauspie Speech Products N.V.*, where there were hundreds of short transactions involving millions of shares over an extended period of time, the court used an aggregated approach because "it best reflects the activities of the investor during the damages period." n426 The court noted that "whether the netting or transactional approach is utilized depends on the circumstances." n427 As the court in *Rocker Management* indicates, the approach that the court takes in calculating damages can differ based the facts of each case and the quality of the expert testimony presented by the parties.

(n34)Footnote 34. *Shapiro v. Cantor*, 123 F.3d 717, 721-22 (2d Cir. 1997) . See at § 5.04[3].

(n35)Footnote 35. The seminal case is *In re Cady, Roberts & Co.*, where the Commission extended *Rule 10b-5* in finding that trading by insiders on non-public information violated *Rule 10b-5(3)* since it "operated as a fraud or deceit upon the purchasers." 40 S.E.C. 907, 913 (1961) . A partner in a brokerage firm had learned from one of the firm's employees, also a director of Curtiss-Wright Corporation, that Curtiss-Wright planned to cut its dividend. Armed with this non-public information, the broker sold his customers' Curtiss-Wright stock. In sanctioning the broker, the SEC relied on state precedents to impose a "special obligation" of disclosure on "corporate insiders [such as] officers, directors and controlling shareholders" and other "persons who are in a special relationship with a company and privy to its internal affairs":

[T]he obligation rests on two principal elements: first, the existence of a relationship giving access, directly or indirectly, to information intended to be available only for a corporate purpose and not for the personal benefit of anyone, and second, the inherent unfairness involved where a party takes advantage of such information knowing it is unavailable to those with whom he is dealing.

40 S.E.C. at 912 (footnote omitted).

Some seven years after *Cady, Roberts*, the Second Circuit issued its landmark opinion in *SEC v. Texas Gulf Sulphur*. There, the court held that a number of corporate insiders had violated *Rule 10b-5* when they purchased stock when possessing knowledge of a major mineral strike that had not yet been announced to the public. In addition, the court held that an insider who had passed the non-public information to others who then traded on it had violated *Rule 10b-5* by his tipping. *Texas Gulf Sulphur* thus announced a broad "disclose or abstain" rule: "anyone in possession of material inside information must either disclose it to the investing public or ... must abstain from trading in or recommending the securities concerned while such inside information remains undisclosed." 401 F.2d 833, 848 (2d Cir. 1968) . *Shapiro v. Merrill Lynch, Pierce, Fenner & Smith, Inc.*, extended the holding of *Texas Gulf Sulphur* to tippees, holding that tippees could be liable for trading on the basis of material non-public information. 495 F.2d 228 (2d Cir. 1974) .

(n42)Footnote 42. 463 U.S. 646, 653-54 (1983) . This limited the "disclose or abstain" doctrine announced by the Second Circuit in *Texas Gulf Sulphur*. See *Chiarella* 445 U.S. at 235 .

(n43)Footnote 43. 463 U.S. at 663 .

(n44)Footnote 44. 463 U.S. at 664-65 .

(n45)Footnote 45. One unsettled issue in the wake of *Dirks* and *Chiarella* is what, if any, causal connection must be shown between the trader's possession of inside information and his or her trading. The Securities and Exchange Commission has long taken the position that "knowing possession" is sufficient. In *U.S. v. Smith*, 155 F.3d 1051 (9th Cir. 1998) and *SEC v. Adler*, 137 F.3d 1325 (11th Cir. 1998) , the Ninth and Eleventh Circuits rejected that proposition, concluding that an insider trading violation requires "actual use" of inside information by the insider.

In August 2000, the SEC adopted new rules addressing the issue of when insider trading liability arises in connection with a trader's "use" or "knowing possession" of material nonpublic information. Final Rule: Selective Disclosure and Insider Trading, Rel. No. 7881 (Aug. 15, 2000). Rule 10b5-1 provides that a person trades on the basis of material nonpublic information when that person purchases or sells securities while "aware" of the information when the purchase or sale is made. 17 C.F.R. 240.10b5-1.

(n46)Footnote 46. See, e.g., *McCormick v. Fund American Cos., Inc.*, 26 F.3d 869, 876 (9th Cir. 1994) (collecting cases) ("[T]he corporate issuer in possession of material non-public information, must, like other insiders in the same situation, disclose that information to its shareholders or refrain from trading with them."); 7 Louis Loss & Joel Seligman, *Securities Regulation* 3505 (3d ed. 1992) ("When the issuer itself wants to buy or sell its own securities, it has a choice: desist or disclose."); 18 Donald C. Langevoort, *Insider Trading: Regulation, Enforcement & Prevention* § 3.02[1][d] at 3-5 (3d ed. 1994) ("Issuers themselves may buy or sell their own securities, and have long been held to an obligation of full disclosure... . Conceptually, extending the insider trading prohibition to instances of issuer insider trading makes perfect sense.").

(n106)Footnote 106. *Harris, 182 F.3d at 804*.

(n107)Footnote 107. The August 2 press release in *Harris, 182 F.3d at 809*, contained this cautionary language:

Statements made in this press release, including those relating to expectations of increased reorders, receipt of a credit facility waiver, earnings distribution, and the generic drug industry, are forward looking and are made pursuant to the safe harbor provisions of the Securities Litigation Reform Act of 1995. Such statements involve risks and uncertainties which may cause results to differ materially from those set forth in these statements. Among other things, additional competition from existing and new competitors will impact reorders; the credit facility waiver is subject to the discretion of the bank syndicate; and IVAX's ability to distribute earnings more evenly over future quarters is subject to industry practices and purchasing decisions by existing and potential customers. In addition, the U.S. generic drug industry is highly price competitive, with pricing determined by many factors, including the number and timing of product introductions. Although the price of a generic product generally declines over time as competitors introduce additional versions of the product, the actual degree and timing of price competition is not predictable. In addition to the factors set forth elsewhere in this release, the economic, competitive, governmental, technological and other factors identified in IVAX's filing with the Securities and Exchange Commission, could affect the forward looking statements contained in this press release.

The September 30 press release in *Harris, 182 F.3d at 813*, included the following cautionary language:

Statements made in this press release, including those relating to the estimated cost reductions, the amount of the restructuring charge expected in the third quarter, the purchase of the Kirkland facility, the time frames for closing and consolidating facilities and eliminating employee positions, the expected manufacturing costs of products made at the Kirkland facility, the expected transfer of verapamil production from Miami to Ireland, the amount of the write-off expected in the third quarter relating to the wholesaler customer's receivable, the expected loss for the third quarter, expectations for the fourth quarter, the prospects of the generic drug industry, and the expected submissions of NDAs for Cervene (R) and PaxenetM are forward looking and are made pursuant to the safe harbor provisions of the Securities Litigation Reform Act of 1995. Such statements involve risks and uncertainties which may cause results to differ materially from those set forth in these statements. Among other things, the cost reductions are estimated based on preliminary information as well as certain assumptions which management believes to be reasonable at this time and are subject to the successful completion of the actions described in this press release; the expected restructuring charge is an estimate based on certain assumptions which management believes to be reasonable at this time; the purchase of the Kirkland facility is subject to a number of contractual conditions, including governmental approvals; the timing of the closing and consolidating of facilities and the elimination of employee positions are subject to the acquisition of the Kirkland facility, the construction and leasing of the Kentucky distribution center, and FDA approval to transfer manufacturing of certain products; the amount of the write-off of the wholesaler customer's receivable is subject to developments in the related reorganization which could impact the value of the receivable; the transfer of verapamil production is subject to FDA approval; and the expected submissions of NDAs for Cervene (R) and PaxenetM are subject to the successful completion of clinical trials and the development of additional data required for the NDAs. The waiver of, and amendment to, the credit agreement is subject to the discretion of the participating banks. Expectations concerning financial results for the 1996 third and fourth quarters are not actual results and are based on preliminary estimates as well as certain assumptions which management believes to be reasonable at this time, including estimates and assumptions concerning the price and number of competitors for IVAX's generic drugs, the volume and product mix of sales, and the levels of required reserves for returns, shelf stock adjustments, and other items. The U.S. generic drug industry is extremely competitive, with pricing determined by many factors, including the number and timing of products introductions. Although the price of a generic drug product generally declines over time as competitors introduce additional versions of the product, the actual degree and timing of price competition is not predictable. In addition to the factors set forth elsewhere in this release, the economic, competitive, governmental, technological and other factors identified in IVAX's filings with the Securities and Exchange Commission could affect the forward looking statements contained in this press release.

(n205)Footnote 206. *E.g., Castellano v. Young & Rubicam, Inc.*, 257 F.3d 171, 186 (2d Cir. 2001) ("transaction causation is generally understood as reliance"); *Suez Equity Investors, L.P. v. Toronto-Dominion Bank*, 250 F.3d 87, 95 (2d Cir. 2001) ("a plaintiff must allege...transaction causation, *i.e.*, that *but for* the fraudulent statement or omission, the plaintiff would not have entered into the transaction...").

(n206)Footnote 207. *Bastian v. Petren Res. Corp.*, 892 F.2d 680, 683-85 (7th Cir. 1990) .

(n207)Footnote 208. *Mirkin v. Wasserman*, 5 Cal. 4th 1082, 1090-91 (1993) . This distinction between federal and state law posed problems for plaintiffs who, in the wake of the Reform Act, sought to bring class actions in state court under state common law. These cases were, generally, dismissed at the pleadings stage because reliance would not be presumed based on a fraud on the market theory. The passage of the Securities Litigation Uniform Standards Act of 1998 mooted this issue by generally requiring that securities fraud class actions be brought in federal court.

(n208)Footnote 209. *Basic, Inc. v. Levinson*, 485 U.S. 224, 241-250 (1988) .

The genesis for the fraud on the market theory was *Blackie v. Barrack*, 524 F.2d 891, 905-06 (9th Cir. 1975) . The Second Circuit followed *Blackie* in *Panzirer v. Wolf*, 663 F.2d 365, 367 (2d Cir. 1981) , *vacated*, 459 U.S. 1027, 103 S. Ct. 434 (1982) . Other circuits have followed suit. See *Shaw v. Digital Equip. Corp.*, 82 F.3d 1194, 1218 (1st Cir. 1996) ; *Peil v. Speiser*, 806 F.2d 1154, 1160-61 (3d Cir. 1986) ; *Cooke v. Manufactured Homes, Inc.*, 998 F.2d 1256, 1260-61 (4th Cir. 1993) ; *Fine v. Am. Solar King Corp.*, 919 F.2d 290, 299 (5th Cir. 1990) , cert. granted, 501 U.S. 1229, 111 S. Ct. 2849 , cert. dismissed, 502 U.S. 976, 112 S. Ct. 576 (1991) ; *Freeman v. Laventhol & Horwath*, 915 F.2d 193, 197-98 (6th Cir. 1990) ; *Flamm v. Eberstadt*, 814 F.2d 1169, 1179-80 (7th Cir.) ; *Harris v. Union Elec. Co.*, 787 F.2d 355, 367 n.9 (8th Cir.) ; *Grossman v. Ct. 2849, cert. dismissed, 502 U.S. 976, 112 S. Ct. 576 (1991); *Moore v. Fenex, Inc.*, 809 F.2d 297, 303 (6th Cir. 1987); *Schlifke v. Seafirst Corp.*, 866 F.2d 935, 947 (7th Cir. 1989); *K & S Partnership v. Continental Bank, N.A.*, 952 F.2d 971, 977 (8th Cir. 1991); *Levine v. Diamanthuset, Inc.*, 950 F.2d 1478, 1483 (9th Cir. 1991); *Farlow v. Peat, Marwick, Mitchell & Co.*, 956 F.2d 982, 986 (10th Cir. 1992); *Schneberger v. Wheeler*, 859 F.2d 1477, 1480 (11th Cir. 1988), cert. denied, 490 U.S. 1091 (1989)).

The majority opinion noted, however, that there was some disagreement over the existence of a cause of action for aiding and abetting:

After our decisions in *Santa Fe Industries, Inc. v. Green*, 430 U.S. 462 (1977), and *Ernst & Ernst v. Hochfelder*, 425 U.S. 185 (1976), where we paid close attention to the statutory text in defining the scope of conduct prohibited by § 10(b), courts and commentators began to question whether aiding and abetting liability under § 10(b) was still available. Professor Fischel opined that the "theory of secondary liability [under § 10(b) was] no longer viable in light of recent Supreme Court decisions strictly interpreting the federal securities laws." *Secondary Liability Under Section 10(b) of the Securities Act of 1934*, 69 Calif. L. Rev. 80, 82 (1981). In 1981, the District Court for the Eastern District of Michigan found it "doubtful that a claim for 'aiding and abetting' ... will continue to exist under 10(b)." *Benoay v. Decker*, 517 F. Supp. 490, 495 (E.D. Mich. 1981), aff'd, 735 F.2d 1363 (6th Cir. 1984). The same year, the Ninth Circuit stated that the "status of aiding and abetting as a basis for liability under the securities laws [was] in some doubt." *Little v. Valley National Bank of Arizona*, 650 F.2d 218, 220, n. 3 (1981). The Ninth Circuit later noted that "[a]iding and abetting and other 'add-on' theories of liability have been

justified by reference to the broad policy objectives of the securities acts ... The Supreme Court has rejected this justification for an expansive reading of the statutes and instead prescribed a strict statutory construction approach to determining liability under the acts." *SEC v. Seaboard Corp.*, 677 F.2d 1301, 1311, n. 12 (1982) . The Fifth Circuit has stated: "[I]t is now apparent that open-ended readings of the duty stated by *Rule 10b-5* threaten to rearrange the congressional scheme. The added layer of liability ... for aiding and abetting ... is particularly problematic ... There is a powerful argument that ... aider and abettor liability should not be enforceable by private parties pursuing an implied right of action." *Akin v. Q-L Investments, Inc.*, 959 F.2d 521, 525 (1992) . Indeed, the Seventh Circuit has held that the defendant must have committed a manipulative or deceptive act to be liable under § 10(b), a requirement that in effect forecloses liability on those who do no more than aid or abet a 10b-5 violation. *See, e.g., Barker v. Henderson, Franklin, Starnes & Holt*, 797 F.2d 490, 495 (1986) .

Central Bank, 511 U.S. at 169-70.

(n253)Footnote 254. *See, e.g., Central Bank*, 511 U.S. at 194 & n.3, (Stevens, J., dissenting). As David Ruder, former Chairman of the SEC, phrased it, in discussing the state of the law prior to *Central Bank*:

1. Some courts held that there could be aiding and abetting liability for inaction coupled with knowledge and a high conscious intent to assert the primary violator. Some courts denied liability for inaction, absent a duty to disclose.

2. Recklessness was considered by some courts as satisfying both the *rule 10b-5* scienter requirement and the aiding and abetting knowledge requirement.

David Ruder, *The Future Of Aiding And Abetting And Rule 10b-5 After Central Bank Of Denver*, 49 *Bus. Law* 1479, 1484 (August 1994) (citations omitted).

(n315)Footnote 316. *Hecht v. Harris, Upham & Co.*, 430 F.2d 1202, 1208 (9th Cir.1970) ; *Kennedy v. Tallant*,

710 F.2d 711 (11th Cir. 1983) (laches defense not available when no prejudice to defendant).

(n316)Footnote 317. 10 Louis Loss & Joel Seligman, *Securities Regulation*, at 4529 & n.149 (Rev. ed. 1996) (citing cases).

(n317)Footnote 318. *Mercury Air et al. Inc. v. Mansour*, 237 F.3d 542, 546 (5th Cir. 2001) .

(n318)Footnote 319. Estoppel is "available against a nongovernmental party who has made a knowing false representation or concealment of material facts to a party ignorant of the facts, with the intention that the other party should rely on it, where the other party actually and detrimentally relies on it." *Mukherjee v. I.N.S.*, 793 F.2d 1006, 1009 (9th Cir. 1986) ; *Socop-Gonzalez v. INS*, 208 F.3d 838, 842 (9th Cir. 2000) .

Waiver is the "intentional relinquishment of a known right." *United States v. RePass*, 688 F.2d 154, 158 (2d Cir. 1982) . Without full knowledge of her rights, plaintiff cannot intentionally waive them. *Royal Air Props., Inc. v. Smith*, 333 F.2d 568, 571 (9th Cir. 1964) . It differs from estoppel in that it does not require a showing of reliance on the part of the defendant: "It is elementary and well settled that waiver and estoppel are two distinct and different doctrines. ... Waiver is a voluntary relinquishment, expressly or impliedly, of a known right and depends upon the intention of one party only." Estoppel, on the other hand, "requires detrimental reliance or prejudice." *Association of California Water Agencies Joint Powers Ins. Auth. v. Transcontinental Ins. Co.*, 92 F.3d 1191, 1192 (9th Cir. 1996) (unpublished opinion)

Ratification is the intentional and knowing approval of a prior act. Black's Law Dictionary 1135 (5th ed. 1979). "An effective ratification requires that a party be put on notice as to the true state of affairs." *Nye v. Blyth Eastman Dillon & Co.*, 588 F.2d 1189, 1197 (8th Cir. 1978) .

(n319)Footnote 320. *Royal Air Properties, Inc. v. Smith*, 312 F.2d 210, 213-14 (9th Cir. 1962) (defenses of estoppel, waiver and laches are available to defendants in securities fraud cases).

(n320)Footnote 321. Compare *Hecht v. Harris, Upham & Co.*, 430 F.2d 1202, 1208 (9th Cir. 1970) (suitability claim dismissed given that plaintiff spoke with broker every day, discussed trades with broker once a week, had her trading activities independently examined by her tax accountants and was occasionally represented by an attorney); *Landry v. Hempill, Noyes & Co.*, 473 F.2d 365, 473 F.2d 365, 373-374 (1st Cir. 1973) (plaintiffs "obvious experience" and failure to object to trades done over a twenty-two month period failed to support a claim for churning) with *Davis v. Merrill Lynch, Pierce, Fenner & Smith, Inc.*, 906 F.2d 1206, 1213 (8th Cir. 1990) (unsophisticated investor did not waive rights by receiving and not responding to documentation); *Mihara v. Dean Witter & Co.*, 619 F.2d 814, 822 (9th Cir. 1980) (same). The court in *Stephenson v. Paine Webber Jackson & Curtis, Inc.*, 839 F.2d 1095, 1099 (5th Cir. 1988) , *cert. denied*, 488 U.S. 926, 109 S. Ct. 310 (1988) , found under similar circumstances that plaintiffs failure to act upon receiving monthly account statements warranted dismissal based on plaintiffs lack of due diligence.

(n321)Footnote 322. See § 5.04[7][d] *infra*.

(n322)Footnote 323. Section 27 reads in part as follows:

"The district courts of the United States and the United States courts of any Territory or other place subject to the jurisdiction of the United States shall have exclusive jurisdiction of violations of this Act or the rules and regulations thereunder, and of all suits in equity and actions at law brought to enforce any liability or duty created by this Act or the rules and regulations thereunder. ..." 15 U.S.C. 78a (1994).

(n345)Footnote 346. *Grunenthal* 712 F.2d at 422-23 . (the court found that to hold that there was no subject matter jurisdiction would "make it convenient for foreign citizens and corporations to use this country and its lawyers, accountants and underwriters to further fraudulent securities schemes")

(n346)Footnote 347. *Itoba Ltd.*, 54 F.3d at 122 ("[i]ndeed an admixture or combination of the two often gives a better picture of whether there is a sufficient United States involvement to justify the exercise of jurisdiction by an American court.").

(n347)Footnote 348. *Bersch v. Drexel Firestone, Inc.*, 519 F.2d 974, 993 (2d Cir. 1975) .

(n348)Footnote 349. *Id.*

(n349)Footnote 350. *Id.*

(n350)Footnote 351. *Application to Enforce Administrative Subpoenas Duces Tecum of SEC v. Knowles*, 87 F.3d 413, 417 (10th Cir. 1996) . *But see* *Peay v. BellSouth Medical Assistance Plan*, 205 F.3d 1206, 1209 (10th Cir. 2000) (noting that "Knowles merely stands for the narrow proposition that under the facts and circumstances presented in that case [i.e., to enforce the SEC's subpoenas duces tecum against the defendant], § 77v(a) authorized the district court to exercise and enforce its subpoena power worldwide.")

(n351)Footnote 352. Section 27 reads in part as follows: "Any suit or action to enforce any liability or duty created by this Act or rules and regulations thereunder, or to enjoin any violation of such Act or rules and regulations, may be brought in [the district wherein any act or transaction constituting the violation occurred] or in the district wherein the defendant is found or is an inhabitant or transacts business, and process in such cases may be served in any other district of which the defendant is an inhabitant or wherever the defendant may be found. ..." 15 U.S.C. § 78aa (1994).

(n352)Footnote 353. *Fed. R. Civ. P. 4(k)(2)*. *See also* *Knowles*, 87 F.3d at 417 .

(n353)Footnote 354. *See, e.g., Stauffacher v. Bennett*, 969 F.2d 455, 461 (7th Cir. 1992) ; *Bourassa v. Desrochers*, 938 F.2d 1056 (9th Cir. 1991) ; *SIPC v. Vigan*, 764 F.2d 1309, 1316 (9th Cir. 1985) ; *Bersch*, 519 F.2d at 998-1000 ; *Leasco Data Processing Equip. Corp. v. Maxwell*, 468 F.2d 1326, 1339-1341 (2nd Cir. 1972) . As suggested by foregoing, in the case of service under a federal statute, it is contacts with the United States rather than with a particular state that are relevant. *See, e.g., SEC v. Carrillo*, 115 F.3d 1540, 1544 (11th Cir. 1997) ("Because in this case our personal jurisdiction is invoked based on the applicable federal securities laws, which provide for world wide service of process, we conclude that the proper forum for minimum contacts analysis is the United States."); *United Liberty Life Ins. Co. v. Ryan*, 985 F.2d 1320, 1330 (6th Cir. 1993) (the question is whether a party has sufficient contacts with the United States, not any particular state).

(n354)Footnote 355. *Leasco*, 468 F.2d at 1326 .

(n355)Footnote 356. *Leasco*, 468 F.2d at 1340 .

(n356)Footnote 357. *SEC v. Carrillo*, 115 F.3d 1540, 1547 (11th Cir. 1997) (holding that personal jurisdiction over the defendants was proper where Costa Rican defendants, who were officers of a Costa Rican Corporation, "effectively controlled the operations of the corporation"); *Derensis v. Coopers & Lybrand Chtd. Accountants*, 930 F. Supp. 1003, 1014 (D.N.J. 1996) (holding that personal jurisdiction over foreign defendant was proper where plaintiffs made a *prima facie* showing that Canadian defendants, who were officers of a Canadian corporation, were "controlling persons" who allegedly provided and disseminated financial statements that they knew would influence the price of corporation's securities on the NASDAQ market); *Itoba Ltd. v. LEP Group PLC*, 930 F. Supp. 36, 41 (D. Conn. 1996) (holding that defendant was subject to the personal jurisdiction of the court where the plaintiff made a *prima facie* showing that a British defendant, who was the deputy chairman and director of a London-based company whose securities were traded on the NASDAQ, knew or should have known that the Form 20-F he approved would be filed with the SEC and would be relied on by potential investors); *Landry v. Price Waterhouse Chtd. Accountants*, 715 F. Supp. 98, 102 (S.D.N.Y. 1989) (holding that a Canadian third party defendant was subject to the court's jurisdiction where plaintiff made a *prima facie* showing that the defendant was "controlling person").

CHAPTER 5A Accountants' Liability Under the Federal Securities Laws

1-5A Federal Securities Exchange Act of 1934

AUTHOR: Marvin G. Pickholz Elliot Cohen Robert M. Carmen

Summary of this Chapter

The federal securities laws contain various provisions under which civil and criminal liability may potentially be imposed upon an accountant for professional misconduct, including Sections 11, 12(2) and 17(a) of the Securities Act of 1933 (the "Securities Act") and Sections 10(b), 14 and 18 of the Securities Exchange Act of 1934 (the "Exchange Act"). Before the potential liability of accountants under each of these statutory provisions is analyzed, it is useful to provide an historical background concerning accountants' liability under the federal securities law.

CHAPTER 5A Accountants' Liability Under the Federal Securities Laws

1-5A Federal Securities Exchange Act of 1934 § 5A.01

AUTHOR: Marvin G. Pickholz Elliot Cohen Robert M. Carmen

§ 5A.01 Introduction

[1] Prior to the 1960's--Hints That Accountants Faced Potential Liability Under the Federal Securities Laws

The potential imposition of civil liability against accountants under the federal securities laws is a relatively new development. Until roughly the latter half of the twentieth century, private parties holding grievances against accountants were essentially relegated to whatever state law causes of action were available for "fraud," "negligence" or "breach of contract."

Even when private litigants relied on state law, they faced significant hurdles in bringing claims against accountants. The most significant hurdle for parties other than the accountant's client has been securing "standing" to sue, although this limitation has eased in more recent decades.

More particularly, prior to approximately the last 40 years, accountants were largely insulated from liability in lawsuits brought by parties other than their clients (*e.g.*, lenders, trade creditors and investors) who claimed injury due to the accountants' alleged negligent conduct. The issue of whether a non-client may sue an accountant for professional negligence was first addressed by the New York State Court of Appeals in 1931 in *Ultramares Corp. v. Touche, Niven & Co.* n1 The court in that case recognized that the risk to the profession of exposure to claims from anyone who could conceivably rely upon a financial statement, as to which an accounting firm has expressed an opinion, was potentially enormous. n2 Accordingly, the court determined to limit liability for professional negligence to only those in contractual privity with the firm or in a relationship closely approximating that of privity. *Ultramares* expressly noted that the defense of privity would be applicable only to negligence claims and not to claims where the firm's level of misconduct would support a claim of fraud.

Subsequently, commencing generally in the 1960's, various state courts (and federal courts applying state law) began to question the continued propriety of the "privity" defense. Since then, three standards (none of which require strict privity) have evolved as the courts continue to grapple with the issue:

- (a) Based on continued adherence to the basic principles of *Ultramares*, the most demanding standard requires the existence of a relationship between the plaintiff and the accountant which is close to that of

privity; n3

(b) "Foreseeability," the least restrictive standard, which permits claims to be asserted against an accounting firm by all reasonably foreseeable third-persons who might rely on reports prepared by it; n4 and

(c) The Restatement of Torts standard which permits a negligence claim against an accountant to be asserted by a third party who is one of a limited group of persons whom the accountant knew might rely on the accountant's report. n5

Although private litigation against accountants was long subject to the type of limitations just discussed, the Securities and Exchange Commission (the "SEC" or "Commission") provided early hints of the substantial expansion of an accountant's potential liability to third parties (*i.e.*, parties other than his or her client), beyond the bounds set by *Ultramares*, which later began during the 1960's under the federal securities laws. For example, in 1939, only a few years after the enactment of the Securities Act and the Exchange Act, the public learned that the consolidated financial statements of McKesson Robbins ("McKesson"), a substantial pharmaceutical company, were fraudulent because millions of dollars of assets reported on McKesson's consolidated balance sheet were only traceable to a sham subsidiary which did not exist. The accountant who audited McKesson's consolidated financial statements did not discover the fraud. The SEC (which had just recently been established by the Exchange Act) conducted an investigation of the McKesson fiasco. Foreshadowing the future expansion of accountants' liability under the Securities Act and the Exchange Act, the SEC emphasized in its McKesson report that while McKesson's auditors satisfied their then existing professional responsibilities, the auditor "must now recognize fully his responsibility to *public investors* by including the activities of the management itself within the scope of his work and *by reporting thereon to investors*." n6

In 1957, in *In re Touche, Niven, Bailey & Smart* n7 the SEC reiterated its position that the responsibility of an independent public accountant based on its certification of a company's financial statements "is not only to the client who pays his fee, but also to investors, creditors and others who may rely on the financial statements which he certifies. ... The public accountant must report fairly on the facts as he finds them whether favorable or unfavorable to his client. His duty is to safeguard the public interest, not that of his client." n8

[2] The 1960's--The Birth of Accountants' Liability Under the Federal Securities Laws

The emergence of accountants' liability under the federal securities laws as a significant phenomenon began during the 1960's. The opening took hold with the acceptance by federal courts of an implied private right of action under Section 10(b) of the Exchange Act. n9 This section soon became the primary vehicle for the potential liability of accountants (and others) under the federal securities laws. Although the existence of a private cause of action under Section 10(b) became axiomatic, n10 the Supreme Court eliminated any doubt as to this question in 1971 in *Superintendent of Ins. v. Bankers Life & Casualty Co.* n11

Initially, the newly established private right of action under Section 10(b) was mainly invoked against (i) corporations whose stock was purchased or sold by aggrieved investors, (ii) corporate insiders and (iii) broker-dealers. However, during the late 1960's the federal district court's decision in *Fischer v. Kletz*, n12 which was one of the earliest actions brought against accountants under the federal securities laws, received wide attention in the legal community. In that case the court, denying a motion to dismiss, held that an accounting firm which failed to disclose that it had discovered that a client's financial statements, which it had earlier certified, were, in fact, materially false and inaccurate, could potentially be liable under Section 10(b).

It is also noteworthy that the *Fischer* court expressly refused to dismiss the 10(b) claim on the ground that no privity existed between the plaintiffs and the accountants. In that regard, the court harkened back to the language from *In re Touche Niven Bailey & Smart* n13 which stated that the responsibility of an independent public accountant "is not only

to the client who pays his fee, but also to investors, creditors and others who may rely on the financial statements which he certifies." n14

On the heels of the *Fischer* decision, in 1968 the court in *Escott v. BarChris Construction Corp.* n15 provided further impetus for the coming explosion of litigation instituted against accountants under the federal securities laws. In *Escott*, the court found an accounting firm liable to various debenture holders under Section 11 of the Securities Act (subject to certain defenses such as statute of limitations) based on its certification of false financial statements of a client which were subsequently included in a registration statement the client filed with the SEC. In essence, the court concluded that the accounting firm had failed to satisfy its duty of "due diligence" when it audited its client's financial statements. n16

[3] The 1970's Through the 1990's--Growth and Then Restriction of Accountants' Liability Under the Federal Securities Laws

Although the potential availability of federal securities claims against accountants was not generally recognized until the end of the 1960's, once the genie had escaped, it was impossible to put it back in the lamp. During approximately the last forty years, plaintiffs have instituted thousands of lawsuits against accountants under the Securities Act and the Exchange Act. This trend was reinforced because the plaintiffs' bar increasingly recognized that large national accounting firms were potential "deep pockets" both because of their size and the substantial amount of professional liability insurance they generally carry.

While the maintenance of securities claims against accountants has been a constant since the 1970's, there have been various significant judicial and legislative developments during this time period which either expanded (mostly during the 70's and 80's) or limited (mostly during the 90's) the reach of such claims against accountants. For example:

[a] Section 10(b) Claims Cannot Be Asserted Against Accountants (or Other Defendants) Based on Merely Negligent Conduct

As noted above, the potential scope of accountants' liability under the federal securities laws largely expanded during the 1970's and 1980's. However, in 1976, in an important milestone for the profession, the U.S. Supreme Court in *Ernst & Ernst v. Hochfelder* n17 removed any doubt as to the requirement of proving "scienter" (i.e., some form of "knowing" misconduct), as opposed to merely negligent conduct, as a prerequisite to civil liability under Section 10(b).

In *Ernst & Ernst*, the Supreme Court did not clarify whether "scienter" is limited to actual intentional misconduct or also encompasses some lesser level of wrongdoing greater than negligence. As will be explained later, virtually all courts which have addressed the matter since *Ernst & Ernst* was decided have generally accepted "recklessness" as the functional equivalent of intentional behavior for purposes of satisfying the "scienter" requirement.

[b] Accountants Were Exposed to the Substantial Risk of Aiding and Abetting Liability Under Section 10(b) of the Exchange Act Until That Threat Was Eliminated by the Supreme Court

From approximately 1970 until 1994, accountants and other secondary actors in a securities transaction (e.g., attorneys and underwriters), who themselves did not purchase or sell any stock, were exposed to substantial securities law liability based on the concept, which was regularly followed by the courts, that such persons could be held liable as aiders and abettors under Section 10(b) of the Exchange Act. In fact, each of the federal circuit courts of appeal expressly allowed plaintiffs to state claims of aiding and abetting under Section 10(b) against accountants and others based on their involvement in schemes perpetrated by others to wrongfully buy and sell securities. n18

In 1994, in a significant triumph for accountants (and other professionals), the Supreme Court in *Central Bank of Denver, N.A. v. First Interstate Bank of Denver, N.A.* n19 swept aside all the above precedents and ruled by a 5-4 margin that a private right of action for aiding and abetting liability did not exist under Section 10(b) of the Exchange

Act. Based on this decision, accountants and other secondary actors can now only be liable under Section 10(b) if they are determined to be "primary" violators of the statute.

Since *Central Bank*, many securities law plaintiffs have sought with mixed results to cast accountants (and attorneys and underwriters) as primary violators (rather than aiders and abettors) under Section 10(b) of the Exchange Act. As detailed later in this chapter, in the years since *Central Bank* was decided, the federal courts have differed over what conduct is required by accountants (and other secondary actors) to incur Section 10(b) primary liability. Two lines of cases have emerged: cases applying the "bright line" test which requires that the defendant must actually make a false or misleading statement to be liable under Section 10(b); and cases applying the "substantial participation" test which imposes primary liability on secondary actors who play a "significant role" in the creation of the false or misleading statement.

In addition, as discussed later in this chapter, in 2008, the Supreme Court, in *Stoneridge Investment Partners, LLC v. Scientific Atlanta, Inc.*,ⁿ²⁰ effectively eliminated "scheme liability" under Section 10b-5(a) and (c) as a mechanism to extend primary Section 10(b) liability to secondary actors, such as accountants.

[c] Accountants Were Exposed to the Risk of Treble Damages Under RICO Until This Threat Was Virtually Eliminated by the Supreme Court and Congress

During the 1980's (and early 90's) accountants were besieged by civil lawsuits under the federal Racketeer Influenced Corrupt Organization Act ("RICO").ⁿ²¹ Although initially conceived as a tool in the fight against organized crime, RICO was drafted broadly enough to potentially encompass more garden variety commercial disputes, with fraud as the usual predicate for the claim. Where potentially applicable, RICO dramatically impacted claims against accountants. The statute provides for an award of treble damages and allows the successful plaintiff to recover its attorneys' fees, thus escalating potential monetary exposure. Moreover, the continuing overlay of an organized crime connotation to the offense added to the *in terrorem* effect of RICO claims.

Applying language from the statute, the most common RICO claim against an accountant alleged that by certifying a corporation's false financial statements the accountant "conduct[ed] or participate[d] ... in the conduct of ... [an] enterprise's [i.e., the aforesaid corporation] affairs through a pattern of racketeering."ⁿ²² Under RICO, a "pattern of racketeering" consists of two or more predicate acts of racketeering--typically mail fraud, wire fraud, or (until recently) *securities fraud*--which took place within a ten-year period.ⁿ²³

During RICO's heyday, numerous lawsuits brought against accountants under the federal securities laws also asserted a RICO count, which claimed that the alleged securities law violations also constituted multiple predicate acts of "racketeering." While very few RICO judgments were actually entered against accountants, many accountants who were sued under RICO were compelled to settle the claims against them in order to avoid the Damocles swords of treble damages and professional opprobrium.

In 1993, in a major victory for the accounting profession, the U.S. Supreme Court substantially eliminated the menace of RICO claims against accountants when it ruled in *Reves v. Ernst & Young*ⁿ²⁴ that an accountant's mere certification of a corporation's financial statements does not by itself satisfy the requirement that the defendant "conduct or participate ... in the conduct" of a RICO "enterprise." As a practical matter, under *Reves*, an accountant must participate in the actual *operation* or *management* of its client's business in order to be potentially liable under RICO.

Subsequently, in 1995, Congress put to rest virtually any potential risk of RICO claims against accountants by including a provision in the Private Securities Litigation Reform Act which removed securities fraud as a predicate act under RICO (unless the defendant was criminally convicted in connection with the fraud).ⁿ²⁵

[d] The Potential Reach of Securities Law Claims Against Accountants Was Narrowed Under the Private

Securities Litigation Reform Act

The Private Securities Litigation Reform Act (the "PSLRA") was enacted in 1995. n26 The primary intent of the PSLRA was to curb abusive shareholder class action lawsuits, which were often based on nothing more than an unexpected decline in a corporation's stock price. To accomplish this objective, the PSLRA imposed many new hurdles to the prosecution of private actions under the federal securities laws, including, among others:

- (1) The express requirement that plaintiffs alleging the scienter element of a Section 10(b) claim "state with particularity facts giving rise to a strong inference that the defendant acted with the required state of mind." n27
- (2) Absent unusual circumstances, discovery in securities actions is stayed during the pendency of any motion to dismiss. As a result, plaintiffs are unable to use discovery as a "fishing expedition" to search for a factual basis to support claims which they cannot properly plead in their complaints. n28
- (3) In order to reduce the influence of "professional" plaintiffs, substantial restrictions are placed on who can serve as a class representative in a securities action. For example, a proposed class representative must certify that he or she did not purchase the securities at the direction of counsel or to participate in a lawsuit. In addition, in appointing a "lead plaintiff," the court must use the "most adequate plaintiff" standard, which, presumptively, requires selection of the plaintiff with the largest financial interest. n29
- (4) To reduce the incentive for bringing frivolous securities claims against accountants and other potential "deep pockets," joint and several liability under the Exchange Act is limited to defendants who "knowingly commit" a securities law violation. n30 Also, under certain circumstances, there is a "cap" on the amount of damages which can be recovered by a plaintiff. n31
- (5) As previously noted, securities fraud can no longer serve as a predicate act for an alleged RICO violation unless the defendant was criminally convicted in connection with the fraud.

Although the above provisions of the PSLRA grant accountants (and others) potential relief from abusive litigation, another provision added Section 10A to the Exchange Act. Section 10A imposes significant new obligations on accountants. In general, the PSLRA mandates that auditors of public companies (a) design procedures to provide reasonable assurance that illegal acts will be detected, (b) report illegal acts (or internal irregularities) which are detected to corporate management, and if no appropriate action is taken, to the board of directors, and (c) report certain illegal acts to the SEC if the client fails to do so. n32

While increasing the whistle-blowing responsibilities of accountants, the PSLRA expressly insulates audit firms from liability in a private action for anything contained in a report submitted by them to the SEC under the requirements of the statute. On the other hand, a willful failure by the accounting firm to comply with the applicable reporting requirements may lead to adverse action by the SEC, including the imposition of civil penalties and other relief. Moreover, the failure to report, as required, could form the basis of a civil damage claim. n33

Not surprisingly, to avoid the restrictions imposed by the PSLRA, class action plaintiffs soon began instituting a large number of class actions in state courts rather than in the federal system. To prevent such state suits from frustrating the objectives of the PSLRA, Congress passed the 1998 Securities Litigation Uniform Standards Act ("SLUSA"), n34 which was designed to establish "national standards for securities class action lawsuits involving nationally traded securities" n35 Among other things, SLUSA provides (subject to limited exceptions) that "covered class action[s]" n36 based on the statutory or common law of any state relating to material misrepresentations or omissions (or the use of any manipulative or deceptive device) in connection with the purchase or sale of publicly-traded securities may not be maintained in state (or federal) court.

Notwithstanding SLUSA's substantial limitations on the maintenance of state law securities class actions, the statute carves out a few categories of "covered class actions" which may be litigated under state law (in state or federal court). These exceptions include certain actions brought (i) pursuant to the state law of the issuer corporation's state of incorporation, (ii) by a State, a political subdivision of a State or a State pension plan, and (iii) to enforce contractual agreements between issuers and indenture trustees. n37

Procedurally, if a "covered class action" subject to SLUSA is instituted in state court, the defendant's remedy is to remove the action to federal district court in contemplation of dismissal by that court. Under the statute, if the federal court determines that a removed action may be maintained in state court based on one of the above carve-outs, it must remand the action to state court. n38

Until recently, there was dispute as to whether SLUSA's application was limited to claims that could otherwise have been brought as federal securities fraud claims. On the one hand, the Second Circuit held that while SLUSA barred state law class actions brought by *purchasers or sellers of securities*, it permitted state law class actions by shareholders who acquired stock in a company prior to any alleged wrongdoing and then *held* their stock during the entire class period (*i.e.*, until after disclosure of the alleged wrongdoing). n39 In contrast, the Seventh Circuit construed SLUSA more broadly, ruling that state law "holding" claims were subject to the *same* prohibitions under SLUSA as claims brought by purchasers or sellers of securities. n40 The U.S. Supreme Court resolved this conflict in March 2006 when it unanimously held in *Merrill Lynch, Pierce, Fenner & Smith, Inc. v. Dabit* n41 that stockholders are *barred* under SLUSA from bringing state law class action lawsuits if the wrongful conduct alleged in the action "coincide[s] with a securities transaction - whether by the plaintiff or by someone else." n42 Thus, like the Seventh Circuit, the Supreme Court concluded that any distinction between (i) purchasers or sellers and (ii) holders of securities is irrelevant in determining the applicability of SLUSA.

Despite SLUSA (and the Supreme Court's decision in *Dabit*), state law securities cases will not completely disappear. As previously noted, based on the statutory language of SLUSA, certain actions are not subject to the statute's prohibitions. For example, SLUSA does not bar actions involving securities brought by or on behalf of 50 or fewer stockholders. n43 Accordingly, among other shareholders, large pension funds may continue to find it advantageous to institute such actions in state court in order to avoid the obstacles imposed in federal court by the PSLRA.

[4] The Aftermath of Enron

As noted above, during the 1990's, accountants scored important judicial and legislative victories which decreased the scope of their potential liability under the federal securities laws. Possibly as a result of those victories (especially, the restrictions on litigation imposed by the PSLRA), the number of investor class action lawsuits instituted against accountants in federal court declined. Illustratively, according to a report issued by Prof. Joseph A. Grundfest of Stanford Law School (a former SEC Commissioner), only five such cases were filed during 2005. In contrast, during the same period there were approximately 1,200 earnings restatements. n44

On the other hand, the dramatic collapse of Enron, in late 2001, amid allegations concerning the role of Enron's accounting firm, Arthur Andersen, caused reconsideration of the proper equilibrium for the scope of securities fraud claims. n45 This reconsideration was expressed in July 2002 with the enactment of the Sarbanes-Oxley Act of 2002 (the "Sarbanes-Oxley Act"). Among other things, as detailed later in this chapter, this legislation established the Public Accounting Oversight Board (the "PCAOB"), a new regulatory body for accountants who audit public companies, and increased criminal penalties for violations of securities and related laws.

In addition, the question of whether technical compliance with generally accepted accounting principles ("GAAP") will insulate an accountant from liability has received renewed attention in the aftermath of Enron. For example, while serving as the SEC's Chairman, Harvey L. Pitt stated in a speech addressing the aftershocks of Enron's collapse that

"literal compliance with GAAP" may not necessarily be sufficient. n46

Another hovering issue with potentially significant securities liability consequences for accounting firms relates to the scope of audit materiality. As detailed in SEC Staff Accounting Bulletin 99 ("SAB 99"), even small misstatements or omissions may be deemed material if "all relevant considerations," including "the factual context in which the user of financial statements would view the financial statement item," require that the accounting discrepancy be corrected. n47 In order to make the above assessment, SAB 99 lists numerous factors which should be weighed by accountants (and others), including, for example, (i) whether a misstatement masks a change in earnings or other trends, (ii) the extent to which management "intentionally" misstated items in the financial statements, and (iii) the location of the misstatement on the financial statement. n48

It appears that aspects of SAB 99 are in the process of being re-assessed. Recently, in August 2008, the SEC Advisory Committee on Improvements to Financial Reporting issued its "Final Report" n49 which noted (among other things) that a recent increase in financial restatements n50 may be attributable to "an overly broad application of the concept of materiality and misinterpretations of the existing guidance regarding materiality in SAB 99... . As a result of this broad application ... [of SAB 99], errors may have been deemed to be material when an investor may not consider them to be important." n51 In the context of eliminating unnecessary restatements, the Final Report recommends (among other things) that "the existing materiality guidance be enhanced to clarify that the total mix of information available to investors should be the main focus of a materiality judgment and that *qualitative* factors are relevant in analyzing the materiality of all errors." n52 In particular, the Final Report provided the following examples of qualitative factors (in addition to those already in SAB 99) which should be taken into consideration when assessing the materiality of "all errors":

- "The error impacts metrics that do not drive investor conclusions or are not important to investor models.
- The error is a one-time item and does not alter investors' perceptions of key trends affecting the company.
- The error does not impact a business segment or other portion of the registrant's business that investors regard as driving valuation or risks." n53

As an outgrowth of Enron, issuers and their accountants entered into a new period of increased oversight by the SEC. High profile accounting failures, like Enron (as well as Global Crossing, Sunbeam and Waste Management), which have caused private investors (including, many who, directly or through 401K plans, have retirement plans tied to stock performance) to suffer huge financial losses, focused attention on financial statement disclosures.

For example, then SEC Chairman, Harvey L. Pitt suggested that:

- (i) Public companies and their auditors should identify the three, four or five most critical accounting principles upon which a company's financial status depends, and which involve the most complex, subjective or ambiguous decisions or assessments;
- (ii) Investors should be told, concisely and clearly, how these principles are applied, as well as information about the range of possible effects in differing application of these principles;
- (iii) Public companies should disclose significant trend and evaluative data to enable investors to assess a company's financial posture as it evolves and changes;
- (iv) Financial statements should be clear and informative so that investors can easily interpret and understand them;

(v) Audit committees should be proactive, not merely reactive, to ensure the quality and integrity of corporate financial reports; and

(vi) Audit committees, senior management and outside auditors should improve interaction. n54

An important focus of SEC oversight has been the potential imposition of tighter "independence" standards for auditors of public companies. In 2000, the SEC adopted new independence standards in an attempt to limit the circumstances where accountants might provide consulting services to their public audit clients. n55 As detailed in § 5A.09, the fallout from Enron and other recent business failures provided strong impetus for even more stringent SEC standards and pronouncements in this area.

The SEC has also moved to require more rigid adherence to prior pronouncements. For example, in its January 2002 "Statement About Management's Discussion and Analysis of Financial Condition and Results of Operations" n56 (the "MDA Statement"), the SEC provided various "suggestions" for compliance with existing disclosure rules. Among other matters, the SEC addressed "liquidity and off balance sheet arrangements;" "related party transactions," and what was termed "relationships and transactions with persons or entities that derive benefits from their non-independent relationship with the registrant or the registrant's related parties." The SEC reminded registrants that disclosure must be timely and "both useful and understandable." n57 Registrants are obliged to "provide the most relevant information and provide it using language and formats that investors can be expected to understand." n58 On the issue of "liquidity," the SEC eschewed "overly general" disclosure in favor of registrants clearly describing the sources of short-term funding and the effects thereon of changes in the economy, technology or other factors. n59 In words clearly aimed at the financial crisis arising from the Enron situation, the SEC stated that "if commercial paper is a principal source of liquidity, the registrant should consider the need to disclose how the facility could be adversely affected by a debt rating downgrade or deterioration in certain of the company's financial ratios or other measures of financial performance." n60 The SEC added that: "If the registrant's liquidity is dependent on the use of off- balance sheet financing arrangements, such as ... obtaining access to assets through special purpose entities, the registrant should consider factors that are reasonably likely to affect its ability to continue using these off-balance sheet financing arrangements." n61 The SEC's MDA Statement specifically addressed off-balance sheet special purpose entities which are not required to be consolidated, but which have arrangements that impose obligations on the registrant to fund or make up losses in cash or stock of the public company.

Subsequently, in January 2003, the SEC issued rules that codified some of the interpretative guidance set forth in its above MDA Statement. n62 Among other things, the SEC's new rules (i) clarify disclosures that registrants are obligated to make concerning off-balance sheet arrangements, (ii) require registrants to set apart disclosure with regard to off-balance sheet arrangements in a separately contained subsection of the MD&A section of disclosure documents and (iii) obligate registrants (except for small business issuers) to disclose certain known contractual obligations in a tabular format. n63

In June 2005, the SEC again addressed off-balance sheet arrangements (and related matters) when it released a staff report entitled "Report and Recommendations Pursuant to Section 401(c) of the Sarbanes-Oxley Act of 2002 On Arrangements with Off-Balance Sheet Implications, Special Purpose Entities and Transparency of Filings by Issuers" (the "Report"). n64 According to the staff, in preparing the Report, it took "a relatively expansive approach to the scope and meaning of the term 'off-balance sheet.'" n65 In particular, the staff examined "a variety of business arrangements that may be viewed as having off-balance sheet implications and that are deemed important from a policy perspective," including: (i) investments in the equity of other entities, (ii) transfers of financial assets (where there is continuing involvement), (iii) certain retirement arrangements, (iv) leases, (v) contingent obligations and guarantees, (vi) derivatives and (vii) other contractual obligations (with an emphasis on the use of special purpose entities where relevant. n66 Based largely on this examination, the Report identified the following "key initiatives" to improve the transparency of financial reporting related to the balance sheet:

- Discourage transactions and transaction structures motivated primarily and largely by accounting and reporting considerations rather than economics. According to the Report "many of the areas dealing with off-balance sheet arrangements involve significant use of accounting-motivated structured transactions." n67

- Expand the use of objectives-oriented standards, which would have the desirable affect of reducing complexity in accounting standards.

- Improve the consistency and relevance of disclosures that supplement the basic financial statements.

- Focus financial reporting on communications with investors rather than just compliance with rules. n68

In 2006, the Financial Accounting Standards Board (the "FASB") issued a response to the above Report. n69 Among other things, the FASB stated that it concurred with the standard-setting recommendations and other goals set forth in the Report and strongly supported the objective of "reducing complexity and increasing the overall understandability, transparency, and usefulness of financial reporting." n70 The FASB emphasized that achieving the initiatives contained in the Report will require coordinated and concerted efforts by the PCAOB, the SEC, the FASB and others. n71

[5] Looking to the Future

Based on recent events, it appears that the "Enron" era may be coming to a close. During the last few years, the government's heightened effort to regulate corporations (*and their accountants*) and punish corporate wrongdoers has suffered some judicial setbacks, as well as pushback from the business community. In addition, during the 2005-2008 time period, the U.S. Supreme Court issued three significant decisions which create new impediments for shareholders seeking to assert claims under Section 10(b), especially against secondary actors such as accountants.

[a] Supreme Court's Reversal of Conviction of Arthur Andersen LLP

In 2005, in a unanimous opinion, the U.S. Supreme Court overturned the 2002 federal conviction of Arthur Andersen LLP ("Andersen") (previously, a "Big 5" accounting firm) for obstruction of justice which was predicated on the destruction of various Enron-related documents by firm personnel. n72 The Supreme Court's decision is based on a conclusion that the jury instructions allowed too low a threshold of culpable intent and on an express recognition that not all withholding of material from the government is wrongful. n73

Shortly after Andersen was convicted by the trial court, the firm went out of business and thousands of its personnel (almost all of whom had nothing to do with the Enron engagement) lost their jobs. Based on these draconian consequences, the Supreme Court's subsequent reversal of Andersen's conviction exposed the government to substantial second-guessing concerning its decision to bring criminal charges against the firm in the first instance. n74 In the eyes of some, the *Andersen* decision has also caused prosecutors to back off from seeking criminal convictions of other supposedly culpable entities (as opposed to persons affiliated with those entities). n75

[b] Dismissal of Charges Against Former Partners and Employees of KPMG

In June 2006, the federal judge overseeing the criminal prosecution of various former partners and employees of the accounting firm KPMG LLP ("KPMG") ruled in *United States v. Stein* that the federal government had violated their constitutional right to a fair trial (and legal representation) by pressuring KPMG to refuse to pay their legal fees. n76

In this matter, KPMG avoided criminal prosecution on charges arising from its alleged marketing of fraudulent tax

shelters by agreeing in a "deferred prosecution" agreement with the government to pay a \$456 million fine and satisfy certain other conditions. n77 Before entering this agreement with the government, KPMG told all partners and employees who appeared to be under suspicion that it would pay their legal fees and expenses up to \$400,000 *on the condition they cooperated* with prosecutors and would *stop* paying the fees and expenses of any person who was indicted. n78 According to the *Stein* court, "KPMG refused to pay [the defendants] because the government held the proverbial gun to its head... . [A]bsent the Thompson Memorandum and the actions of the U.S. Attorney's Office, KPMG would have paid the legal fees and expenses of all of its partners and employees both prior to and after indictment, without regard to cost." n79

The "Thompson memo" referred to in the *Stein* decision is a Justice Department memorandum (prepared by former Deputy Attorney General Larry D. Thompson) that advises prosecutors to (among other things) "scrutin[ize] ... the authenticity of a corporation's cooperation" when determining whether to bring a criminal action against the entity. n80 According to the Thompson memo, among other "cooperation" factors n81 to be considered by the prosecutor, is "whether the corporation appears to be protecting its culpable employees and agents. Thus, while cases will differ depending on the circumstances, a corporation's promise of support to culpable employees and agents ... through the advancing of attorney's fees ... may be considered by the prosecutor in weighing the extent and value of a corporation's cooperation." n82

Although the *Stein* court did not immediately impose a remedy, it stressed that the appropriate resolution would be for KPMG "*either on its own or at the government's urging or insistence*," to pay the past and ongoing legal expenses of the indicted personnel. n83 As an alternative, the court stated that it possessed "ancillary jurisdiction" in the criminal action to entertain civil claims by the indicted personnel against KPMG to compel payment of their legal expenses and it instructed the clerk of the court to open a civil docket number to accommodate such claims. n84

Shortly after the *Stein* court's "invitation" to do so, the indicted former KPMG partners and employees instituted a civil suit against KPMG in the pending criminal proceeding to obtain payment of their legal expense and expenses. While the *Stein* court denied KPMG's motion to dismiss this suit, n85 the Second Circuit reversed, dismissing plaintiffs' complaint on the grounds that the district court in the criminal action lacked "ancillary" jurisdiction to hear Plaintiffs' claims for legal expenses. n86

In July 2007, following the Second Circuit's dismissal of the above action for legal expenses, the *Stein* court dismissed the criminal charges against thirteen of the indicted KPMG personnel on the grounds that the government had deprived them of their constitutional right to a fair trial. n87 Recently, in August 2008, the Second Circuit affirmed this decision dismissing criminal charges against indicted KPMG personnel. n88 In doing so, the Second Circuit emphasized that "the government deprived Defendants ... of their right to counsel under the *Sixth Amendment* by causing KPMG to place conditions on the advancement of legal fees to Defendants ... and to cap the fees and ultimately end them." n89

[c] Retreat from the Thompson Memo

The *Stein* court's objections to the Thompson memo reflected a growing consensus in the business community (and among civil liberties organizations) that this memo had created an uneven playing field in favor of the government. n90 In apparent response to these criticisms, in December 2006, the Justice Department issued a new memorandum (prepared by Deputy Attorney General Paul J. McNulty) entitled "Principles of Federal Prosecution of Business Organizations" (the "McNulty memo") to supersede and replace the guidance contained in the Thompson memo. n91 Among other things, in contrast to the Thompson memo, the McNulty memo expressly states that when making a charging decision prosecutors "generally should *not* take into account whether a corporation is advancing attorneys' fees to employees or agents under investigation and indictment." n92

In August 2008, the Justice Department issued a memorandum prepared by Deputy Attorney General Mark Filip (the "Filip memo") which further revised corporate charging guidelines contained in the McNulty memo. Among other

things, the revised guidance in the Filip memo provides that "credit for cooperation will not depend on the corporation's waiver of attorney-client privilege or work product protection, but rather the disclosure of relevant facts." n93 In addition, the Filip memo instructs prosecutors not to take into consideration a corporation's advancement of attorneys' fees to its employees when evaluating the corporation's level of cooperation. n94

It remains to be seen whether the Filip memo will satisfy critics of federal corporate charging guidelines. For example, some critics may assert that the Filip memo's focus on a corporations' disclosure of "relevant facts" as distinguished from its waiver of privilege ignores the practical reality that pressure by the Justice Department to waive privilege will not abate if the government believes that the protected information constitutes "relevant facts" which should be disclosed.

[d] Efforts to Limit the Applicability or Burdens of the Sarbanes-Oxley Act

Serious efforts are now underway to limit the applicability or burdens of the Sarbanes-Oxley Act. For example (as detailed at § 5A.09), this new legislation established the PCAOB to (among other things) register, monitor and discipline accounting firms in connection with their audits of public companies. In response to this delegation of authority, the Free Enterprise Fund (a free-markets lobbying group) and the accounting firm of Beckstead & Watts LLP instituted a lawsuit n95 challenging the constitutionality of the PCAOB on the grounds that the agency lacks required oversight from the executive branch. n96 In August 2008, the United States Court of Appeals for the District of Columbia (in a 2-1 decision) affirmed the district court's earlier grant of summary judgment in favor of the government. n97 Among other things, the appeals court held that the (i) SEC's power to appoint members of the PCAOB does not intrude on the President's constitutional "appointment" power because Board members are "inferior officers" who are "subject to [the] direction and supervision" of the SEC and (ii) "for-cause limitations" on both the SEC's power to remove PCAOB members and the President's power to remove SEC Commissioners "do not strip the President of sufficient power to influence the Board" so as to violate "separation of powers" under the Constitution. n98

In addition, as discussed later at § 5A.09[3], compliance with the Sarbanes-Oxley Act (especially, Section 404's requirement that a company's auditors attest to and report on management's assessment of internal controls) can be costly. Among other things, in response to this financial burden, legislation has recently been introduced in Congress to exempt many companies from adherence to Section 404's internal control audit requirements or limit the burden of such compliance. n99

[e] Chamber of Commerce "Action Plan" To Protect Accountants From "Over-Litigation"

The Chamber of Commerce has issued an "action plan" to (among other things) protect the accounting profession against "overlitigation" and "unfair enforcement." For example, the Chamber has requested that the PCAOB adopt a safe harbor standard that establishes the procedures that must be applied by an accounting firm to detect fraud. According to the Chamber, compliance with that "safe harbor" standard should insulate accounting firms from legal liability. n100 In addition, the Chamber has, *inter alia*, (i) requested Congress to restrict the circumstances under which accounting firms may be criminally indicted and (ii) supported the establishment of an alternative dispute process for the resolution of certain audit disputes by experts, outside the judicial process. n101

[f] The Supreme Court's Decision in *Dura Pharmaceuticals v. Broudo* Tightened the Requirements for Pleading Causation under Rule 10b-5

In 2005, the Supreme Court in *Dura Pharmaceuticals, Inc. v. Broudo* n102 addressed the critical issue of causation under *Rule 10b-5* and made clear that even at the pleading stage of litigation, a plaintiff must clearly set forth that the loss it claims was actually caused by the wrongdoing charged. In this regard, the *Dura* court unanimously held that a private plaintiff cannot satisfy the loss causation (*i.e.*, proximate cause) element of a *Rule 10b-5* action by merely alleging that the price of the security in question was inflated on the date of purchase as a result of defendant's alleged

misrepresentations. According to the Supreme Court, the objective of private actions under the securities laws is to protect investors "against those economic losses that misrepresentations actually cause," but "not to provide investors with broad insurance against market losses." n103 In this regard, the Supreme Court observed that normally in "fraud on the market" cases an inflated purchase price by itself does not establish the necessary causal connection between alleged wrongdoing and economic loss because:

■ As "a matter of pure logic, at the moment the transaction takes place, the plaintiff has suffered no loss; the inflated purchase payment is offset by ownership of a share that *at that instant* possesses equivalent value." n104 Accordingly, if "the purchaser sells the shares quickly before the relevant truth begins to leak out, the misrepresentation will not have led to any loss." n105

■ Even when a stock sale occurs at a lower price after the truth makes its way into the marketplace, it does not necessarily follow that the initially inflated purchase price was the proximate cause of any relevant economic loss. Numerous other factors or intervening causes, such as an industry specific market collapse, may have caused, or at least impacted, the drop in the value of the stock. In addition, the longer the time between purchase and sale, the more likely it is that factors unrelated to the initially inflated purchase price are the reason for all or some of the decline in the stock's market value. n106

While the Supreme Court indicated that the *Dura* complaint was fatally defective because it did not assert that the "share price fell significantly after the truth became known," n107 the opinion did not set forth the level of detail that is required to properly allege (and prove) loss causation. It is therefore necessary to look to lower court decisions applying *Dura* to obtain this type of practical guidance. n108

[g] The Supreme Court's Decision in Tellabs, Inc. v. Makor Issues & Rights, Ltd. Establishes A High Burden To Establish Scienter

In 2007, in *Tellabs, Inc. v. Makor Issues & Rights, Ltd.*, n109 the Supreme Court clarified the meaning of the term "strong inference" as used in the PSLRA n110 by holding, *inter alia*, that "[t]o qualify as 'strong' ... an inference of scienter must be *at least as compelling* as any opposing inference of nonfraudulent intent." n111 Accordingly, under *Tellabs*, allegations of scienter will *not* survive a motion to dismiss as long as a legitimate explanation for claimed misconduct "tips the scales ever so slightly" in defendant's favor against plaintiffs' competing interpretation of the alleged facts. n112 As discussed later in this chapter, this decision creates a significant obstacle which securities law plaintiffs must overcome in order to successfully establish a claim under Section 10(b).

[h] The Supreme Court's Decision in Stoneridge Investment Partners, LLC v. Scientific-Atlanta, Inc. Eliminates A Method For Asserting 10(b) Claims Against Secondary Actors

Recently, in early 2008, the Supreme Court issued a 5-3 decision in *Stoneridge Investment Partners, LLC v. Scientific Atlanta, Inc.*, n113 which effectively eliminated "scheme liability" under *Rule 10b-5(a)* and *(c)* as a mechanism to extend primary Section 10(b) liability to secondary actors (such as accountants) and thereby circumvent the impediment to secondary actor liability imposed by the Supreme Court's rejection of aider and abetter liability in *Central Bank of Denver, N.A. v. First Interstate Bank of Denver, N.A.* n114

As discussed later in this chapter, in determining that plaintiffs could not sustain their Section 10(b) claim against those defendants, the Supreme Court expressly rejected plaintiffs' contention that such liability could be imposed on those parties, even absent any public statement by them, based on their participation in a "scheme" to violate 10(b). According to the Court, applying "scheme liability" would "not answer the objection that ... [the plaintiffs] did not, in fact, rely upon ... [the defendant's] own deceptive conduct." n115 Based on *Stoneridge*, it appears that "scheme liability" may not be utilized to expand the reach of Section 10(b) private action beyond cases involving misstatements, omissions by a party who has a duty to disclose or certain types of manipulative trading activity (such as "churning" and "wash sales").

n116

[6] The 2008 Financial Crisis

In 2008, the United States (and much of the rest of the world) was hit with the worst financial crisis since the Great Depression as a result of the shockwaves emanating from the sub-prime mortgage meltdown. Given that many blame this crisis (and the substantial market losses incurred by investors) on corporate "greed" and misconduct, a strong likelihood exists that many participants in the sub-prime marketplace (*e.g.*, financial institutions, insurance companies and broker/dealers) and, possibly, their accountants will soon find themselves subject to heightened government attention and an increase in civil litigation under the securities laws. n117

FOOTNOTES:

(n1)Footnote 1. 255 N.Y. 170, 174 N.E. 441 (N.Y. 1931) .

(n2)Footnote 2. In this regard, the *Ultramares* court emphasized that lifting the shield of privity would unfairly "expose accountants to a liability in an indeterminate amount for an indeterminate time to an indeterminate class." 255 N.Y. at 179, 174 N.E. at 444 .

(n3)Footnote 3. Since the *Ultramares* decision, courts which had adhered to its basic principles have refined the privity concept to further define the contours of an accountant's liability to third-parties. In *Credit Alliance Corp. v. Arthur Andersen & Co.*, 65 N.Y.2d 536, 551, 493 N.Y.S.2d 435, 443, 483 N.E.2d 110, 118 (N.Y. 1985) , the New York Court of Appeals held that a noncontractual party could not hold accountants liable for negligence unless three prerequisites are met:

- (1) the accountants must have been aware that the financial reports were to be used for a particular purpose or purposes;
- (2) in the furtherance of which a known party or parties was intended to rely; and
- (3) there must have been some conduct on the part of the accountants linking them to that party or parties, which evinces the accountants' understanding of that party or parties reliance.

The third prong of the test raises the question of the nature and extent of the "conduct on the part of the accountants" linking them to the third-party which would be sufficient to meet the test. This issue was addressed by the *New York Court of Appeals in Security Pacific Bus. Credit, Inc. v. Peat Marwick Main & Co.*, 79 N.Y.2d 695, 586 N.Y.S.2d 87, 597 N.E.2d 1080 (N.Y. 1992) , where the only linking "conduct" was a single telephone conversation between the accountant and the lender, initiated by the lender in which the lender announced its intended reliance and made certain inquiries regarding the audit then in progress. The court held that this was not sufficient to establish the necessary link and dismissed the claim.

Various courts outside New York have followed the general approach of *Credit Alliance*. See, *e.g.*, *Toro Co. v. Krouse, Kern & Co.*, 827 F.2d 155 (7th Cir. 1987) (applying Indiana law); *Colonial Bank of Alabama v. Ridley & Schweigert*, 551 So. 2d 390 (Ala. 1989) ; *Twin Mfg. Co. v. Blum Shapiro & Co.*, 602 A.2d 1079 (Conn. Super. Ct. 1991) .

(n4)Footnote 4. The foreseeability standard abandons any notion of privity and exposes accountants to potential negligence liability to a spectrum of potential claimants limited only by the requirement that the claimant fall within a class of potential claimants who might reasonably be expected to rely on the financial statement in question. Only two states: (i) Wisconsin; see *Citizens State Bank v. Timm, Schmidt & Co.*, 113 Wis. 2d 376, 335 N.W.2d 361 (1983) ; and (ii) Mississippi; see *Touche Ross & Co. v. Commercial Union Ins. Co.*, 514 So. 2d 315 (Miss. 1987) ; *Travelers*

Casualty & Surety Co. v. J.L. Holloway, 2007 U.S. Dist. LEXIS 33891 (S.D. Miss. May 8, 2007) (applying Touche Ross); MISS. CODE ANN. § 11-7-20 (2008) ("privity shall not be a requirement" to prosecute action for "economic loss brought on account of negligence"); currently follow this approach. New Jersey which had been a leading proponent of the foreseeability standard; see *H. Rosenblum, Inc. v. Adler*, 93 N.J. 324, 351, 461 A.2d 138, 153 (1983) ; statutorily reversed itself and adopted a near privity standard similar to that of New York; see, N.J. STAT. ANN. § 2A:53A-25 (West Pocket Part 1998) and *E. Dickerson & Son, Inc. v. Ernst & Young, LLP*, 179 N.J. 500, 846 A.2d 1237 (N.J. 2004) (interpreting New Jersey's "near privity" statute). In the case of banks, the statute requires as a predicate to standing that the accountant acknowledge the bank's intended reliance and the client's knowledge of that reliance in writing.

(n5)Footnote 5. The restatement standard provides that liability is limited to loss suffered "(a) by the person or one of a limited group of persons for whose benefit and guidance he intends to supply the information or knows that the recipient intends to supply it; and (b) through reliance upon it in a transaction that he intends the information to influence or knows that the recipient so intends or in a substantially similar transaction." Restatement (Second) of Torts § 552 (ALI 1977). Thus, the Restatement approach does not require that the accountant be aware of a particular person's reliance, but rather permits liability if the person is part of a "limited group" of persons (whether or not specifically identified to the accountant) who the accountant intends or expects to be influenced by the information supplied. Unlike the test under *Credit Alliance*, the accountant need not be affirmatively linked to the third-party by its own specific conduct. California, previously a "foreseeability" state, adopted the Restatement standard in *Bily v. Arthur Young & Co.*, 3 Cal. 4th 370, 11 Cal. Rptr.2d 51, 834 P.2d 745 (1992) , in connection with negligent misrepresentation claims. See also, e.g., *Scottish Heritable Trust, PLC v. Peat Marwick Main & Co.*, 81 F.3d 606 (5th Cir.) , cert. denied, 519 U.S. 869 (1996) ; *Nycal Corp. v. KPMG Peat Marwick LLP*, 426 Mass. 491, 688 N.E.2d 1368 (1998) ; *Boykin v. Arthur Andersen & Co.*, 639 So. 2d 504 (Ala. 1994) ; *Bethlehem Steel Corp. v. Ernst & Whinney*, 822 S.W.2d 592 (Tenn. 1991) ; *First Fla. Bank, N.A. v. Max Mitchell & Co.*, 558 So. 2d 9 (Fla. 1990) ; *Badische Corp. v. Caylor*, 257 Ga. 131, 356 S.E.2d 198 (1987) ; *Nycal Corp. v. KPMG Peat Marwick LLP*, 426 Mass. 491, 688 N.E.2d 1368) ; *Haddon View Inv. Co. v. Coopers & Lybrand*, 70 Ohio St. 2d 154, 436 N.E.2d 212 (1982) ; *Loop Corp. v. McIlroy*, 2004 Minn. App. LEXIS 1146 (Minn. Ct. App., Oct. 5, 2004) ; *Law Offices of Lawrence J. Stockler, P.C. v. Rose*, 174 Mich. App. 14, 436 NW.2d 70 (1989) ; *Blue Bell v. Peat Marwick, Mitchell & Co.*, 715 S.W.2d 408 (Tex. App. 1986) .

Some states adhere to a variation of the Restatement approach through statutes that apply what is known as the "primary intent rule." See, e.g., ARK. CODE ANN. § 16-114-302 (2008); 225 ILL. COMP. STAT. 450/30.1 (2005); KAN. STAT. ANN § 1-402 (2005); MICH. COMP. LAWS § 600.2962 (2005). As a general matter, under these statutes, an accountant's liability to a non-client based on negligence may arise when the accountant is aware that "a primary intent" of the client is for the professional services to benefit or influence the particular person (or entity) bringing the action. In addition, these statutes generally provide that if the accountant (a) identifies in writing to its client those persons (or entities) who are intended to rely on the services rendered and (b) sends a copy of that writing to the persons (or entities) identified therein, the accountant may be held liable *only* to the persons (or entities) identified in the writing (in addition to any party in privity of contract with the accountant). See, e.g., *Freeman, Freeman & Salzman, P.C. v. Lipper*, 349 Ill. App. 3d 677, 812 N.E.2d 562 (Ill. App. Ct. 2004) (interpreting above Illinois statute and applying the "primary intent rule").

(n31)Footnote 31. 15 U.S.C. § 78u-4(e)(1) and (2) (1997 & Supp. 2008).

(n32)Footnote 32. 15 U.S.C. § 78j-1 (1997 & Supp. 2008).

(n33)Footnote 33. 15 U.S.C. § 78j-1. Section 10A is discussed in greater detail in § 5A.08.

(n34)Footnote 34. 15 U.S.C. § 77p (1997 & Supp. 2008).

(n35)Footnote 35. 15 U.S.C. § 78a Note (1997 & Supp. 2008).

(n36)Footnote 36. As a general rule, the definition of a "covered class action" under 15 U.S.C. § 78bb(f)(5)(B) "is a lawsuit in which damages are sought on behalf of more than 50 people." *Merrill Lynch, Pierce, Fenner & Smith, Inc. v. Dabit*, 547 U.S. 71, 83 (2006) . Exclusively derivative actions brought by one or more shareholders on behalf of a corporation are outside the scope of SLUSA. 15 U.S.C. § 78bb(f)(5)(C).

(n37)Footnote 37. 15 U.S.C. 77p(d)(1) -- (3) (1997 & Supp. 2008).

(n38)Footnote 38. 15 U.S.C. 77p(d)(4) (1997 & Supp. 2008). See *Kircher v. Putnam Funds Trust*, 547 U.S. 633, 643-644 (2006) . A split of authority exists concerning whether SLUSA applies to entire actions or just individual claims. In this regard, the Second Circuit determined in *Gray v. Seaboard Securities, Inc.*, 126 Fed. Appx. 14, 16, 2005 U.S. App. LEXIS 4098, *2 (2d Cir. 2005) that only claims subject to SLUSA's prohibitions should be dismissed (as opposed to entire actions). On the other hand, the Third Circuit strongly suggested in *Rowinski v. Salomon Smith Barney, Inc.*, 398 F.3d 294, 305 (3d Cir. 2005) , that if any one claim is barred under SLUSA, then the entire action must be dismissed. See also *In re Lord Abbott Mut. Funds Fee Litig.*, 463 F.Supp. 2d 505, 508 (D. N.J. 2006) . Recently, in *Anderson v. Merrill Lynch Pierce Fenner & Smith, Inc.*, 521 F.3d 1278, 1288 (10th Cir. 2008) , the Tenth Circuit acknowledged this split of authority, but avoided taking a position when it dismissed an entire action on the grounds that plaintiffs had incorporated by reference allegations subject to SLUSA's prohibitions into *each* of their causes of action. See also *U.S. Mortg. Inc. v. Saxton*, 494 F.3d 833, 846 (9th Cir. 2007) .

In *Superior Partners v. Chang*, 471 F.Supp. 2d 750, 758 (S.D. Tex. 2007) , the court determined that SLUSA applies to actions rather than claims, *but* held that if some individual claims of a "covered class action" should be remanded to state court based on an applicable "carve-out," *the entire action should be remanded*, despite the existence of additional claims which were otherwise subject to SLUSA's prohibitions. See also *Greaves v. McAuley*, 264 F.Supp. 2d 1078, 1086 (N.D. Ga. 2003) .

(n39)Footnote 39. *Dabit v. Merrill Lynch, Pierce, Fenner & Smith, Inc.*, 395 F.3d 25 (2d Cir. 2005) , *rev'd*, *Merrill Lynch, Pierce, Fenner & Smith, Inc. v. Dabit*, 547 U.S. 71 (2006) .

(n40)Footnote 40. *Kircher v. Putnam Funds Trust*, 403 F.3d 478 (7th Cir. 2005) , *vacated*, 547 U.S. 633 (2006) .

(n41)Footnote 41. 547 U.S. 71 (2006) .

(n42)Footnote 42. 547 U.S. at 84 . In this regard, the Supreme Court rejected the argument that SLUSA incorporates the federal securities laws' purchaser/seller standing requirement.

In *Prof'l Mgmt. Assocs., Inc. Employees Profit Sharing Plan v. KPMG LLP*, 335 F.3d 800 (8th Cir. 2003) , *cert. denied*, 540 U.S. 1162 (2004) , a decision preceding and consistent with *Merrill Lynch*, the putative class action plaintiffs, shareholders of an issuer, Green Tree Financial Corporation, attempted to assert state law claims for aiding and abetting a breach of fiduciary duty, breach of a state consumer fraud statute, negligent misrepresentation, and negligence, against Green Tree's accounting firm, KPMG. Plaintiffs alleged that: (i) KPMG made its own misrepresentations and (ii) aided and abetted Green Tree in making misrepresentations. 335 F.3d at 802 . The misrepresentations were made by Green Tree or KPMG beginning in 1994 and continuing through 1997. The putative

class included those who bought and held Green Tree stock from January 30, 1996 to January 27, 1997. Plaintiff only claimed damages suffered as a result of its holding the stock. 335 F.3d at 803 . Thus, in this case misrepresentations made as early as 1994 were alleged to have caused the inaction of the plaintiff as much as three (3) years later. This, the court held, was sufficient to satisfy the requirement that "misrepresentations and omissions were made in connection with the purchase of securities and thus SLUSA requires dismissal." *Id.*

(n43)Footnote 43. *See, e.g., 15 U.S.C. §§ 78bb(f)(3)(A)-(C) and (5)(C)-(D).*

(n44)Footnote 44. *See* Stephen Labaton, *Earnings Restated? Don't Blame a Lawsuit for It*, The New York Times, Feb. 3, 2006, at C7.

(n45)Footnote 45. As a result of the uproar over the Enron situation, government prosecutors substantially increased their attempts to crack down on alleged corporate wrongdoing. According to the Justice Department, between mid-2002 to mid-2006 this effort resulted in more than 1,000 convictions (or guilty pleas) related to corporate malfeasance. *See* Paul Davies and Karen Scannell, *Guilty Verdicts Provide "Red Meat" to Prosecutors Chasing Companies*, Wall Street Journal, May 26, 2006, at A1. Among others, high profile convictions include (i) Kenneth Lay (Chairman and CEO of Enron) (technically vacated upon his death), (ii) Jeffrey Skilling (President and CEO of Enron), (iii) Bernard Ebbers (CEO of WorldCom), (iv) John Rigas (Chairman and CEO of Adelphia) and (v) L. Dennis Kozlowski (CEO of Tyco) (state court conviction).

Some government prosecutions have failed; for example, a jury acquitted former Health South CEO, Richard Scrushy, of numerous criminal counts brought against him (although he was subsequently convicted on unrelated bribery charges). The Supreme Court's 2005 decision reversing the criminal conviction of Arthur Andersen LLP (for the destruction of various Enron-related documents) is discussed at §§ 5A.01[5] and 5A.10, *infra* .

(n62)Footnote 62. See Final Rule: *Disclosure on Management's Discussion and Analysis about Off-Balance Sheet Arrangements and Aggregate Contractual Obligations*, at www.sec.gov/rules/final/33-8182.htm (May 7, 2003). In connection with the foregoing, Section 401 of the Sarbanes-Oxley Act requires the SEC to adopt final rules that obligate a registrant, in each annual and quarterly financial report filed with the SEC, to disclose "all material off-balance sheet transactions, arrangements, obligations (including contingent obligations), and other relationships of the issuer with unconsolidated entities or other persons, that may have a material current or future effect on financial condition, changes in financial condition, results of operations, liquidity, capital expenditures, capital resources, or significant components of revenues and expenses."

(n63)Footnote 63. The effective date of the above rules was April 7, 2003. SEC registrants must comply with the above off-balance sheet arrangement disclosure requirements in certain disclosure documents that are required to include financial statements for their fiscal years ending on or after June 15, 2003. Registrants (other than small business issuers) must include the table of contractual obligations in such disclosure documents that are required to include financial statements for the fiscal years ending on or after December 15, 2003.

(n64)Footnote 64. The Report, which was prepared by the Office of the Chief Accountant, the Office of Economic Analysis and the Division of Corporation Finance, was intended to satisfy the mandate of Section 401(c) of the Sarbanes-Oxley Act which required the SEC to issue a report that addressed (among other things) (i) the prevalency of off-balance sheet arrangements and (ii) whether current financial statements of issuers transparently reflect the economics of such arrangements.

The Report may be found at www.sec.gov/news/studies/soxoffbalancercpt.pdf.

(n65)Footnote 65. Report, p. 1.

(n66)Footnote 66. Report, p. 1.

(n68)Footnote 68. See Report, p. 3, and SEC Release 2005-91, "SEC Staff Report On Off-Balance Sheet Arrangements, Special Purpose Entities and Related Issues" (June 15, 2005). As detailed in the Report, the staff also provided recommendations for changes in accounting and reporting requirements, each of which furthers one or more of the above initiatives. *Id.*

(n69)Footnote 69. The FASB response is available at: http://www.fasb.org/articles&reports/fasb_response_sec_study_obs.pdf.

(n70)Footnote 70. See FASB response at p. 9.

(n71)Footnote 71. *Id.*

(n72)Footnote 72. *Arthur Andersen LLP v. United States*, 544 U.S. 696 (2005).

(n73)Footnote 73. While the *Andersen* decision was a setback for the Justice Department, it is unclear how much prospective guidance it provides in light of provisions of the Sarbanes-Oxley Act, enacted after *Andersen's* conviction.

See § 5A.10, *infra*.

(n74)Footnote 74. See Paul Davies and Karen Scannell, *Guilty Verdicts Provide "Red Meat" To Prosecutors Chasing Companies*, Wall Street Journal, May 26, 2006, at A1.

(n75)Footnote 75. *Id.* In lieu of criminal prosecution, the government has entered into "deferred prosecution agreements" with some entities (*e.g.*, KPMG LLP and Computer Associates Inc.) under which the entity agrees to certain conditions to avoid prosecution (for example, the retention of an independent monitor) and leaves itself open to likely conviction if it fails to satisfy those conditions.

On the other hand, in May 2006 the law firm of Milberg Weiss Bershad & Schulman LLP (together with two of its partners) was indicted for allegedly making illegal payments to class action plaintiffs represented by them after the firm refused to enter into a deferred prosecution agreement. See Julie Creswell, *U.S. Indictment For Big Law Firm in Class Actions*, The New York Times, May 19, 2006, at A1. Subsequently, as part of a deal with the Milberg firm, the government dropped all criminal charges against the firm.

(n76)Footnote 76. 435 F. Supp. 2d 330 (S.D.N.Y. 2006) . In addition to focusing on the deprivation of the defendants' constitutional rights, the court also stated: "[A]n employer often must reimburse an employee for legal expenses when the employee is sued, or even charged with a crime, as a result of doing his or her job... . Persons in jobs big and small, private and public, rely on it every day. Bus drivers sued for accidents, cops sued for allegedly wrongful arrests ... and corporate chieftains embroiled in securities litigation generally have similar rights to have their employers pay their legal expenses if they are sued as a result of their doing their jobs. This right is as much a part of the bargain between employer and employee as salary and wages." *Id.*, at 335 .

(n77)Footnote 77. *Id.* at 349-350 . As described earlier, under a deferred prosecution agreement, a party avoids a criminal conviction as long as it satisfies the conditions set forth in that agreement.

(n78)Footnote 78. *Id.* at 345 .

(n79)Footnote 79. *Id.* at 336 and 353.

(n80)Footnote 80. See Thompson memo p. 1 (which is available at http://www.usdoj.gov/dag/cftf/corporate_guidelines.htm).

(n81)Footnote 81. As a matter of "General Principle," the Thompson memo states: "In determining whether to charge a corporation, that corporation's timely and voluntary disclosure of wrongdoing and its willingness to cooperate with the government's investigation may be relevant factors. In gauging the extent of the corporation's cooperation, the prosecutor may consider the corporation's willingness to identify the culprits within the corporation, including senior executives; to make witnesses available; to disclose the complete results of its internal investigation; and to waive attorney-client and work product protection." Thompson memo, p. 5.

(n82)Footnote 82. Thompson memo, p. 5. Under the memo, if a corporation is required by governing law to pay the legal fees of officers under investigation prior to a formal determination of their guilt, this circumstance is not considered a failure to cooperate. *Id.* at p. 10 n. 4 .

(n106)Footnote 106. *Id.* at 342-343 .

(n107)Footnote 107. 544 U.S. at 347 .

(n108)Footnote 108. It is apparent from subsequent lower court rulings that the easiest way to comply with *Dura's* holding on loss causation is to allege (and prove) that the market price of a corporation's security dropped in response to a public disclosure by the company itself or another source that exposed a prior fraudulent misrepresentation or omission concerning the value of that security. Post-*Dura* guidance, however, is unclear concerning the extent to which an alleged corrective disclosure must specifically address the subject matter of the alleged fraudulent misrepresentation or omission. For example, while some courts have stated that there is no requirement under *Dura* that an alleged corrective disclosure must be the "linguistic mirror" of the alleged fraud, *e.g.*, *In re Bristol-Myers Squibb Sec. Litig.*, 2005 U.S. Dist. LEXIS 18448 at *57 (D.N.J. Aug. 17, 2005) , other courts have required a stricter "linguistic mirror," *e.g.*, *Teacher's Retirement System of Louisiana v. Hunter*, 477 F.3d 162, 185-188 and 194 (4th Cir. 2007) .

(n110)Footnote 110. See § 5A.01[3][d], *supra*.

(n111)Footnote 111. 127 S. Ct. at 2504-05 .

(n112)Footnote 112. *New Jersey v. Sprint Corp.*, 531 F. Supp. 2d 1273, 1281 (D. Kan. 2008) . The Supreme Court also stressed in *Tellabs* that the relevant inquiry is "whether *all* of the facts alleged, taken collectively, give rise to a strong inference of scienter, not whether any individual allegation, scrutinized in isolation, meets that standard." 127 S. Ct. at 2509 .

(n113)Footnote 113. U.S. ___, 128 S. Ct. 761 (2008) .

(n114)Footnote 114. As previously noted in this chapter, the Supreme Court in *Central Bank of Denver, N.A. v. First Interstate Bank of Denver, N.A.*, 511 U.S. 164 (1994) , previously determined that a private right of action for aiding and abetting liability does not exist under Section 10(b).

(n115)Footnote 115. 128 S. Ct. 761, 769 (2008) . According to the Supreme Court, Section 10(b) liability is not necessarily foreclosed by the absence of "a specific oral or written statement," if the plaintiff relied to its detriment on some other "conduct" of the defendant. *Id.*

(n116)Footnote 116. As also detailed later in this chapter, it is possible (although unlikely) that the Supreme Court in *Stoneridge* did not intend to categorically foreclose all future applications of scheme liability.

(n117)Footnote 117. According to a report released on July 29, 2008 by Cornerstone Research in cooperation with Stanford Law School's Securities Class Action Clearinghouse, the sub-prime meltdown has already led to a marked increase in class action filings under the securities laws. In this regard, the Cornerstone report discloses (among other things) that (i) such filings "jumped from 119 in the twelve months ending June 2007 to 217 over the next twelve months," (ii) there "were 110 [such] filings between January 1 and June 30, 2008, suggesting as many as 220 filings by the end of the year" and (iii) approximately "half of the filings in the first half of 2008 were driven by sub-prime mortgage/credit crunch with 58 filings containing related allegations." See July 29, 2008 press release of the Stanford

Law School's Securities Class Action Clearinghouse, available at <http://securities.stanford.edu/index.html>.

CHAPTER 5A Accountants' Liability Under the Federal Securities Laws

1-5A Federal Securities Exchange Act of 1934 § 5A.02

AUTHOR: Marvin G. Pickholz Elliot Cohen Robert M. Carmen

§ 5A.02 Liability for False or Misleading Statements Under Section 11 of the Securities Act

Section 11 of the Securities Act imposes liability upon public accountants to every person who acquires a security issued under a registration statement for false or misleading statements or omissions of material facts contained in portions of the registration statement where the accountant, with his consent, is named as having prepared or certified any part of the registration statement or any report or valuation used in connection therewith. n1 Thus, Section 11 provides relief to any purchaser of securities who received or relied upon the particular registration statement regardless of contractual privity or a requirement of a special relationship with the independent accountants. Under Section 11, if the action is brought within the applicable period of limitations, the purchaser is required only to prove that he acquired securities covered by the registration statement, generally suffered a loss and the registration statement contained a misstatement or omission of material importance. The purchaser is not required to allege negligence, reliance, or even a causal connection between the misstatement or omission and the loss. n2 The courts have consistently held, however, that Section 11 remedies cover only shares newly issued under the registration statement. n3

As indicated above, Section 11 exposes the accountant and other experts n4 to liability for material misstatements and omissions in registration statements even without a showing of negligence. But Section 11 liability is limited with respect to accountants, and other experts to those material misrepresentations contained in portions of "the registration statement they have certified or prepared." n5

Section 11(b) provides an accountant with two defenses: n6 "disassociation" or "good faith and due diligence." To establish a "disassociation" defense, the accountant may establish that either prior to the effective date of the registration statement or upon becoming aware of its effectiveness, he had:

- taken appropriate steps to sever the relationship with the issuer;
- advised the accountant, the SEC, and the issuer in writing that such steps had been taken and would not take responsibility for that portion of the registration statement attributed to him; (i.e., withdrew the consent to the use of the accountant's name and report in the registration statement) and
- if the registration statement became effective without the accountant's knowledge, upon becoming

aware of such fact, the accountant "forthwith" advised the SEC given reasonable notice to the public. n7

To demonstrate "good faith and due diligence," the auditor may show that "he had, after reasonable investigation, reasonable grounds to believe and did believe, at the time such part of the Registration Statement became effective, that the statements therein were true and that there was no omission to state a material fact required to be stated therein and necessary to make the statements therein not misleading." n8

The scope and applicability of Section 11 (including, the above "due diligence" defense) was explored in the seminal decision of *Escott v. BarChris Construction Corp.* n9 BarChris had been in the business of constructing and installing bowling alleys. During 1961, BarChris sold convertible debentures under a registration statement to raise additional working capital. However, the fortunes of the bowling industry declined that year, primarily due to over-expansion. Consequently, in October 1962, BarChris filed a petition in bankruptcy. Thereafter, an action was brought by the purchasers of the debentures against those potentially liable under Section 11, including BarChris' accountants. The purchasers' claims were based upon alleged misstatements contained in a registration statement that included audited financial statements for the calendar years 1958, 1959, and 1960, as well as interim unaudited statements.

Significantly, the *BarChris* court held that the accountants were not responsible for any misrepresentation contained in the unaudited interim statements because the accountants had not audited those statements. n10 Subsequent cases have confirmed that the liability of accountants under Section 11 is limited to those financial statements included within the auditor's audit opinion. n11 As to the allegedly false audited financial statements, the accountants in *BarChris* pled a "due diligence defense." In holding that the accountants had failed to establish this defense, the court found that the accountants' Form S-1 audit program, n12 as formulated, conformed to the standards of the profession and would have been sufficient to sustain a due diligence defense and thus avoid liability if the BarChris auditors had actually followed the audit program.

The *BarChris* court found, however, that the S-1 review actually conducted by the accountants was inadequate in the following respects: (1) the auditors had not reviewed the minutes of the executive committee and subsidiary meetings, major contracts, important financial records and the prospectus itself; (2) no inquiry was made of BarChris' creditors; and (3) only one officer of the company was interviewed. The court decided that "glib answers" received in response to the auditor's questions should have prompted more questions and that the appearance of "danger signals" should have elicited further investigation. n13 Unfortunately, the court did not illuminate its definition of these terms, nor did it set forth detailed performance standards for the accounting and auditing procedures required. Thus, while the court underscored the importance of thorough examination and independent verification in a review program, the accounting profession received no definitive guidance from the *BarChris* decision for establishing audit procedures and conducting proper audits.

In addition to the defenses set forth in Section 11(b), courts have recognized additional defenses under Section 11, including: (i) lack of "loss causation" (i.e., absence of a causal connection between the misstatement or omission and the loss) and (ii) the "bespeaks caution" doctrine.

As explained in *McKowan Lowe & Co., Ltd. v. Jasmine, Ltd.*, n14 "[i]n contrast with *Rule 10b-5*, loss causation is not a necessary element of the plaintiff's [Section 11] claim. Rather, under Section 11, a defendant may assert loss causation -- more precisely, the lack thereof -- as an affirmative defense." n15 In *McKowan*, the court dismissed a Section 11 claim brought by shareholders against an accounting firm because (among other things) the accountants had "adduced compelling evidence" that (i) the misrepresentations at issue were not publicly corrected until after the company's stock had ceased to be publicly traded and (ii) the company's poor business results (as opposed to any revelation of alleged misrepresentations) caused the value of the company's stock to decline. n16

Under the "bespeaks caution" doctrine, a defendant may not be held liable under Section 11 for alleged misrepresentations in a stock offering if "it cannot be said that any reasonable investor could consider them important in

light of adequate cautionary language set out in the same offering." n17 Thus, in dismissing Section 11 claims brought against an accounting firm and others, the court in *Pew v. Carderelli* stated that "in view of the extensive factual disclosures and cautionary statements, the absence of a going concern qualification [by the accounting firm] did not render the Annual Reports or Registration Statements misleading." n18 The "bespeaks caution" doctrine only applies to forward-looking representations as opposed to material misstatements (or omissions) of historical fact. n19

FOOTNOTES:

(n1)Footnote 1. 15 U.S.C. § 77k(a)(4) (1997 & Supp. 2008). Section 13 of the Securities Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section F, 15 U.S.C. § 77m, provides that an action brought under Section 11 must be brought within one year after the false or misleading statement was or should have been discovered, but no more than three years after the security was offered to the public. In *Finkel v. Stratton Corp.*, 962 F.2d 169, 174 (2d Cir. 1992), it was held that the statute of limitations begins to run on the effective date of the registration statement; and in *Summer v. Land & Leisure, Inc.*, 664 F.2d 965 (5th Cir. 1981), cert. denied, 458 U.S. 1106 (1982) it was held that normal tolling rules do not apply to actions brought under Section 11.

(n2)Footnote 2. *Herman & MacLean v. Huddleston*, 459 U.S. 375, 382 (1983), where the court stated that under Section 11, "[i]f a plaintiff purchased a security issued pursuant to a registered statement, he need only show a material misstatement or omission to establish his *prima facie* case." A plaintiff may be required to prove reliance, however, when he purchases the security after the issuance of an earnings statement covering a period of at least 12 months following the effective date of the registration statement. See 15 U.S.C. § 77k (1997 & Supp. 2008).

Most Circuit Courts have ruled that claims under Section 11 are subject to F.R.Civ. P.9(b) if the plaintiff affirmatively relies on fraud allegations to support such a claim. See *Rombach v. Chang*, 355 F.3d 164, 170 (2d Cir. 2004); *Shapiro v. UJB Fin. Corp.*, 964 F.2d 272, 288 (3d Cir. 1992); *Melder v. Morris*, 27 F.3d 1097, 1100 n.6 (5th Cir. 1994); *Sears v. Likens*, 912 F.2d 889, 893 (7th Cir. 1990); *In re Stac Elecs. Secs. Litig.*, 89 F.3d 1399, 1404-05 (9th Cir. 1996). In dictum, the First and Tenth Circuits have also indicated their approval of this approach. See *Shaw v. Digital Equip. Corp.*, 82 F.3d 1194, 1223 (1st Cir. 1996); *Schwartz v. Celestial Seasonings, Inc.*, 124 F.3d 1246, 1252 (10th Cir. 1997). On the other hand, the Eighth Circuit has held that Rule 9(b) does not apply in such circumstances because "fraud" is not an essential element of a claim under Section 11. See, e.g., *Carlton v. Thaman*, 130 F.3d 309, 314 (8th Cir. 1997).

(n3)Footnote 3. *McFarland v. Memorex Corp.*, 493 F. Supp. 631, 641 (N.D. Cal., 1980), citing *Barnes v. Osofsky*, 373 F.2d 269 (2d Cir. 1967); see also *Harden v. Raffensperger, Hughes & Co.*, 933 F. Supp. 763, 767 (S.D. Ind. 1996); *Perksy v. Turley*, No. CIV 88-1830-PHX-SMM, CIV. 88-2089-PHX-SMM (consolidated), 1991 U.S. Dist. LEXIS 19841, at *18 (D. Ariz. Dec. 19, 1991).

(n4)Footnote 4. An expert is defined in Sections 7 and 11(a)(4) of the Securities Act and Rule 435 under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section G, thereunder as an "accountant engineer or appraiser, or any person whose profession gives authority to a statement made by him, who has with his consent been named as having prepared or certified any part of the registration statement or ... [any portion as described herein] ... used in connection with the registration statement." 15 U.S.C. § 77g (1997); 15 U.S.C. § 77k (1997 & Supp. 2008).

(n5)Footnote 5. Section 11(a)(4) expressly provides that an accountant's liability may be predicated on misstatements and omissions present in portions of the registration statements where the accountant "with his consent [has] been named as having prepared or certified any report or valuation which is used in connection with the registration statement, with respect to the statement, report or valuation, which purports to have been prepared or certified by him." The cases generally have held that even if part of a registration statement is misleading, there is no accountant liability unless the misleading data can be expressly attributed to the accountant. See, e.g., *Herman &*

MacLean v. Huddleston, 459 U.S. 375, 386 n.22 (1983) ; *Endo v. Arthur Andersen & Co.*, 163 F.3d 463, 466 (7th Cir. 1999) (quoting 15 U.S.C. § 77k(a)(4) (1997)); *Monroe v. Hughes*, 31 F.3d 772, 774 (9th Cir. 1994) (accountant is only liable for those documents he certifies); *Rebenstock v. Deloitte & Touche*, 907 F. Supp. 1059 (E.D. Mich. 1995) (liability is limited to portions prepared or certified by accountant); *McFarland v. Memorex Corp. supra.* at 643 .

(n6)Footnote 6. 15 U.S.C. § 77k (1997 & Supp. 2008).

(n7)Footnote 7. 15 U.S.C. § 77k.

(n8)Footnote 8. 15 U.S.C. § 77k.

(n9)Footnote 9. 283 F. Supp. 643 (S.D.N.Y. 1968) .

(n10)Footnote 10. *Escott v. BarChris Constr. Corp.*, 283 F. Supp. 643, 683-4 and 698 (S.D.N.Y. 1968) .

(n11)Footnote 11. See *Endo v. Arthur Andersen & Co.*, 163 F.3d 463, 466 (7th Cir. 1999) (quoting 15 U.S.C. § 77k(a)(4)(1997)); *Monroe v. Hughes*, 31 F.3d 772, 774 (9th Cir. 1994) (accountant is only liable for those documents he certifies); *Grimm v. Whitney-Fildago Seafoods, Inc.*, [1977-1978 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 96,029 (S.D.N.Y. Dec. 4, 1973); *McFarland v. Memorex Corp.*, 493 F. Supp. 631 at 643 (N.D. Cal. 1980) .

In late 1979, the SEC clarified its position on the liability of accountants for misstatements in a registration statement by adopting a rule providing that a report prepared or audited by an accountant within the meaning of Section 11 shall not include a report by an independent accountant on a review of unaudited interim information. See Fed. Sec. L. Rep. (CCH) P 72,296 (1979). The SEC noted that this rule conformed to existing case law, specifically *BarChris* and *Grimm*, in that the liability of the accountant who consents to be named in a registration statement is limited to those audited financial statements it has certified. See *McFarland v. Memorex Corp.*, 493 F.Supp. at 643 n. 16 .

(n12)Footnote 12. The S-1 review included a review of events subsequent to the date of *BarChris*'s certified 1960 balance sheet to ascertain whether any material changes had occurred in the company's financial position which should be disclosed to prevent the balance sheet figures from being misleading. See 283 F.Supp. at 701 .

(n13)Footnote 13. *Escott v. BarChris, supra* at 701-703 .

(n14)Footnote 14. 2005 U.S. Dist. LEXIS 32164 (D. N.J., June 30, 2005) , *aff'd*, *McKowan Lowe & Co. v. Jasmine, Ltd.*, 231 Fed. Appx. 216, 2007 U.S. App. LEXIS 19774, Fed. Sec. L. Rep. (CCH) P94480 .

(n15)Footnote 15. *Id.* at *36-37 [citing *In re Adams Golf, Inc. Secs. Litig.*, 381 F.3d 267, 277 (3d Cir. 2004)] ; see also 15 U.S.C. § § 77k(e) and 77l(b).

(n16)Footnote 16. 2005 U.S. Dist. LEXIS 32164, at *37 , *aff'd*, *McKowan Lowe & Co. v. Jasmine, Ltd.*, 231 Fed. Appx. 216, 2007 U.S. App. LEXIS 19774 .

(n17)Footnote 17. See *Rombach v. Chang*, 355 F.3d 164, 175 (2d Cir. 2004) (holding registration statement contained sufficient cautionary language to apply "bespeak caution" doctrine); *Halperin v. Ebanker USA.com*, 295 F.3d 352, 357 (2d Cir. 2002) .

(n18)Footnote 18. 2005 U.S. Dist. Lexis 40018, at *27-28 (N.D.N.Y., Mar. 17, 2005) , *aff'd*, *Pew v. Cardarelli*, 164 Fed. Appx. 41, 2006 U.S. App. LEXIS 2132 .

(n19)Footnote 19. See *P. Stolz Family P'ship L.P. v. Daum*, 355 F.3d 92, 96-97 (2d Cir. 2004) . As explained by the *Stolz* court: "The cautionary language associated with the 'bespeaks caution' doctrine is aimed at warning investors that bad things may come to pass -- in dealing with the contingent or unforeseen future. Historical or present fact -- ... is a different matter. Such facts exist and are known; they are not unforeseen or contingent." 355 F.3d at 97 .

Accordingly, "cautionary words about future risk cannot insulate from liability for the failure to disclose that the risk has transpired." *Rombach v. Chang*, 355 F.3d 164, 173 (2d Cir. 2004) .

CHAPTER 5A Accountants' Liability Under the Federal Securities Laws

1-5A Federal Securities Exchange Act of 1934 § 5A.03

AUTHOR: Marvin G. Pickholz Elliot Cohen Robert M. Carmen

§ 5A.03 Liability for False or Misleading Statements Under Section 12(2) of the Securities Act

Section 12(2) of the Securities Act provides that "sellers" are liable for material misrepresentations or omissions contained in a "prospectus" or any "oral communications" made in connection with the offer or sale of any security. However, as the U.S. Supreme Court clarified in *Gustafson v. Alloyd Co.*,ⁿ¹ such claims are limited to misrepresentations (or omissions) made in connection with primary or initial offerings of securities and may not arise from misrepresentations (or omissions) made in aftermarket transactions or in private placements not involving use of a "prospectus."

Unlike Section 11, which is expressly limited to material misrepresentations or omissions contained in registration statements filed with the SEC, Section 12(2) liability can be imposed even in connection with transactions exempt from registration under the Securities Act other than those exempted by section 3(a)(2). Moreover, liability can be imposed upon sellers who merely acted negligently.

By its terms, however, liability under Section 12(2) is limited to "sellers" only and does not apply broadly to the "expert" as that term is described in and applied under Section 11. In 1988, the Supreme Court effectively eliminated claims under Section 12(1) against accountants, holding that "liability extends only to the person who successfully solicited the purchase" ⁿ² Most Circuit Courts of Appeal have extended that ruling to cover Section 12(2) claims against accountants, finding that liability is limited to those who either actually sold or solicited investors to purchase securities. ⁿ³

Accordingly, accountants who are merely alleged to have rendered a materially false or misleading opinion or financial statement will escape liability because they are not deemed to be sellers within the literal meaning of Section 12(2). ⁿ⁴

(n1)Footnote 1. *513 U.S. 561 (1995)* .

(n2)Footnote 2. *Pinter v. Dahl, 486 U.S. 622, 650 (1988)* .

(n3)Footnote 3. *See, e.g., Ackerman v. Schwartz*, 947 F.2d 841 (7th Cir. 1991) ; *Ryder Int'l Corp. v. First Am. Nat'l Bank*, 943 F.2d 1521 (11th Cir. 1991) ; *Mercer v. Jaffe, Snider, Raitt & Huer, P.C.*, 933 F.2d 1008 (6th Cir 1991) ; *Craftmatic Sec. Lit. v. Kraftsow*, 890 F.2d 628 (3d Cir. 1989) ; *Schlifke v. Seafirst Corp.*, 866 F.2d 935, 106 O.&G.R. 444, 106 O.&G.R. 446 (7th Cir. 1989) ; *Moore v. Kayport Package Express, Inc.*, 885 F.2d 531 (9th Cir. 1989) ; *Wilson v. Saintine Exploration & Drilling Corp.*, 872 F.2d 1124, 1126 (2d Cir. 1989) ; *Abell v. Potomac Ins. Co.*, 858 F.2d 1104 (5th Cir. 1988) , *vacated on other grounds*, 109 S. Ct. 3236 (1989) .

(n4)Footnote 4. *See Moore v. Kayport Package Express, Inc.*, 885 F.2d 531 (9th Cir. 1989) . In *Moore*, plaintiff alleged Section 12(2) of the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section F, claims against attorneys and accountants which prepared financial statements used to sell unregistered securities. The Court states that "these professionals are only subject to Section 12(2) liability if they solicited purchases" and that "merely performing professional services, without actively soliciting a purchase of underlying securities does not give rise to liability under Section 12." *Id. at 537* .

CHAPTER 5A Accountants' Liability Under the Federal Securities Laws

1-5A Federal Securities Exchange Act of 1934 § 5A.04

AUTHOR: Marvin G. Pickholz Elliot Cohen Robert M. Carmen

§ 5A.04 Liability for Violations of Section 17(a) of the Securities Act

Section 17(a) makes it unlawful for persons in the offer or sale of securities "(1) to employ any device, scheme or artifice to defraud; or (2) to obtain money... by means of any untrue statement ...; or (3) to engage in any transaction... which operates... as a fraud or deceit upon the purchaser." n1 The wording of *Rule 10b-5* was derived from, and is nearly identical to, Section 17(a). n2 Plaintiffs, however, would generally prefer to sue under Section 17(a) because there is no scienter requirement for actions under Sections 17(a)(2) and 17(a)(3). n3 However, most Circuit Courts of Appeal have held that no private cause of action exists under Section 17(a). n4

FOOTNOTES:

(n1)Footnote 1. *15 U.S.C. 77q (1997 & Supp. 2008)*.

(n2)Footnote 2. *Kirshner v. United States*, 603 F.2d 234, 241 (2d Cir. 1978), cert. denied, 442 U.S. 909 (1979) (comparing Sections 10(b) and 17(a)). Section 17(a) of the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section F, contains the more narrow language of "in the offer or sale" while *Rule 10b-5* speaks more broadly in terms of "in connection with the purchase or sale."

CHAPTER 5A Accountants' Liability Under the Federal Securities Laws

1-5A Federal Securities Exchange Act of 1934 § 5A.05

AUTHOR: Marvin G. Pickholz Elliot Cohen Robert M. Carmen

§ 5A.05 Liability for Violations of Section 14 of the Exchange Act

Section 14(a) of the Exchange Act and the SEC's related rules make it unlawful to make materially false or misleading statements in soliciting proxies. By its express terms, Section 14(a) applies only to any person who actually solicits proxies and to anyone who "permit[s] the use of his name" in the solicitation. However, the mere appearance of one's name in a proxy statement does not trigger liability for any misstatement appearing therein. Instead, there must have been "a substantial connection between the use of the person's name and the solicitation effort." n1

It is generally recognized that an independent accountant functioning purely as an auditor can rarely meet the "solicitation" or "substantial connection" tests, and therefore accountants are not usually charged as principal violators of Section 14(a). n2

In re Clinton Oil Co. Securities Litigation, n3 is typical of the courts' treatment of accountants in solicitation cases. In *Clinton*, the court held that direct liability could not be imposed upon the independent auditor because the "accounting firm... was not involved in the solicitation of the proxy." n4

FOOTNOTES:

(n1)Footnote 1. *Yamamoto v. Omiya*, 564 F.2d 1319, 1323 (9th Cir. 1977) .

(n2)Footnote 2. Rule 14a-11(b)(6)(iii) under the Securities Exchange Act of 1934, reprinted in the Primary Law Sourcebook, Volume B, Section G, which deals with election contests, contains a clause that expressly excludes from the definition of "participant in a solicitation": "(ii) any person employed by a participant in the capacity of attorney, accountant, or advertising, public relations or financial adviser, and whose activities are limited to the performance of his duties in the course of such employment" (Emphasis added).

CHAPTER 5A Accountants' Liability Under the Federal Securities Laws

1-5A Federal Securities Exchange Act of 1934 § 5A.06

AUTHOR: Marvin G. Pickholz Elliot Cohen Robert M. Carmen

§ 5A.06 Liability for False or Misleading Statements Under Section 18 of the Exchange Act

To insure the accuracy of the financial and other information contained in the various reports required to be filed with the SEC, Section 18 of the 1934 Act makes any person who makes any "false and misleading" statement in any document "filed" with the SEC under the Exchange Act liable to any person "who, in reliance upon such statement, shall have purchased or sold a security at a price which was affected by the statement." n1 Obviously, the scope of an accountant's liability under Section 18 is very narrow, since Section 18 applies only to documents actually filed, and not to all documents sent to, received or reviewed by purchasers. In fact, Rules 14a-3(c) and 14c-5(b) specifically state that annual reports to shareholders are not deemed to be documents "filed" with the Commission for purposes of Section 18.

The reliance requirement under Section 18 has been determined to mean actual "eyeball reliance." In *Heit v. Weitzen*, n2 the Court of Appeals stated that "[r]eliance on the actual 10-K report is an essential prerequisite for a Section 18 action and constructive reliance is not sufficient." n3 Similarly, in *Barotz v. Monarch General Inc.*, n4 the Court held that the "plaintiff must allege that he actually read a filed document or documents, and this he has not done. To this, plaintiff responds that such 'eyeball reliance' should not be necessary. I believe the present law in this circuit supports defendants." n5

Moreover, the plaintiff must prove that his damages were caused "directly" by his reliance on the false or misleading statement. n6 As a result of these strict standards, Section 18 has proved to be an unsatisfying vehicle for imposing liability on accountants. n7

CHAPTER 5A Accountants' Liability Under the Federal Securities Laws

1-5A Federal Securities Exchange Act of 1934 § 5A.07

AUTHOR: Marvin G. Pickholz Elliot Cohen Robert M. Carmen

§ 5A.07 Liability for False or Misleading Statements Under Section 10(b) of the Exchange Act

Section 10(b) of the Exchange Act and *Rule 10b-5* promulgated thereunder have been the most fertile source of litigation under the federal securities laws. Section 10(b) makes it "unlawful for any person, directly or indirectly, ... to use or employ, in connection with the purchase or sale of any security ... , any manipulative or deceptive device or contrivance" n1 Although neither Section 10(b) nor *Rule 10b-5* expressly makes accountants subject to liability for improperly certifying financial statements, the statute and the rule are sufficiently broad to provide such relief against accountants. For example, clause (b) of *Rule 10b-5* is potentially applicable to accountant misrepresentations in financial statements since a plaintiff need only establish that "any person" has made "any untrue statement of material fact" or has omitted "to state a material fact necessary in order to make the statements made, in light of the circumstances under which they were made, not misleading." n2

Although such fraudulent misrepresentations or omissions must occur "in connection with" the purchase or sale of any security, courts have applied *Rule 10b-5* to defendants, such as accountants, who are associated with others more directly involved in the wrongful purchase and sale of securities, even though they have not entered into any securities transactions themselves.

Typically, the accountants' liability flows from an independent audit report which (i) states that an audit of a client's financial statements was conducted in accordance with Generally Accepted Auditing Standards ("GAAS") and (ii) opines that those financial statements present fairly, in all material respects, the financial position and results of operation of the client in conformity with Generally Accepted Accounting Principles ("GAAP"). n3

Section 10(b) does not expressly provide for a private cause of action as distinct from, for example, Sections 11 and 12 of the Securities Act and Sections 14, 16 and 18 of the Securities Exchange Act. n4 However, as early as 1946, courts recognized the existence of a private right of action under Section 10(b) and *Rule 10b-5*. n5 That right, consistently held to exist by the federal courts, was eventually recognized by the Supreme Court in 1971. n6

[1] Conduct for Which Liability Under Section 10(b) is Imposed

To prove a Section 10(b) claim, a plaintiff must generally establish that a material misrepresentation or omission was

made with the requisite scienter causing injury in connection with the purchase or the sale of a security. n7 The inherent ambiguities in the statutory language of Section 10(b) have led to innumerable judicial explanations of its scope. n8

In *Santa Fe Industries v. Green*, the Supreme Court considered whether Section 10(b) "reached breaches of fiduciary duty by a majority against minority shareholders without any charge of misrepresentation or lack of disclosure." n9 The Supreme Court held that it did not, noting that the "language of § 10(b) gives no indication that Congress meant to prohibit any conduct not involving manipulation or deception." n10

Later, in *Chiarella v. United States*, n11 the Supreme Court considered whether Section 10(b) is violated when a person trades securities without disclosing inside information. The Court held that where the plaintiff's Section 10(b) claim is predicated on an allegation that the defendant failed to disclose material information, the plaintiff must additionally prove that the defendant had assumed a duty to disclose: "Section 10(b) is aptly described as a catchall provision, but what it catches must be fraud. When an allegation of fraud is based upon nondisclosure, there can be no fraud absent a duty to speak." n12

In *Ernst & Ernst v. Hochfelder*, n13 the Supreme Court held that proof of merely negligent conduct is insufficient to impose liability under *Rule 10b-5* and that some measure of scienter or intentional misconduct is required. The SEC had argued that the broad congressional purposes behind the Act--to protect investors from false and misleading practices that might injure them--suggested that Section 10(b) should also reach negligent conduct. n14 The Supreme Court rejected that argument, concluding that the SEC's interpretation would "add a gloss to the operative language of the statute quite different from its commonly accepted meaning." n15

Although the Supreme Court has never ruled on the issue, most Circuits have held that an inference of fraud (sufficient to satisfy the scienter requirement) can be predicated upon reckless behavior. n16 However, aside from a general consensus that "[a]n inference of fraud does *not* arise from the mere fact that an auditor 'certified' an inaccurate report," n17 courts have disagreed concerning what level of wrongdoing is enough to constitute recklessness. For example, some federal courts have held recklessness to be more in the nature of intentional misconduct as distinguished from gross negligence. Thus, in *Pegasus Fund, Inc. v. Laraneta*, n18 mere inadequate accounting or auditing procedures without a showing of bad faith was not enough for the court to impose liability. n19 In that case, plaintiff and three mutual funds sued Arthur Young & Company, charging the firm with reckless performance of an audit of the funds' financial statements. The basis of the claims was Arthur Young's alleged failure during its audit to properly investigate various transactions relating to the purchase of restricted debentures secured by deeds of trust on realty. Plaintiff's primary charge was that Arthur Young's auditors had failed to discover that the debentures were worthless at the time of the audit.

Plaintiffs in *Pegasus Fund* established that the auditors had not inspected the deeds of trust, but rather, had accepted written and oral assertions that they were first deeds of trust, which could, and apparently did, represent a junior security interest. As a result, the auditors failed to discover that the transactions at issue were part of a fraudulent scheme by certain officer-directors of the mutual funds to siphon the investment capital of the fund through investments made by the fund into corporations the directors owned or controlled.

On those facts, the Ninth Circuit affirmed a lower court grant of summary judgment in favor of the auditors. The court held that the failure to discover the fraud perpetrated on the funds by their officer-directors did not amount to recklessness. Inadequate accounting or auditing without a showing that the accountant acted in "bad faith" was not sufficient to establish a Section 10(b) claim. Quoting language from the Seventh Circuit, the *Pegasus* court summarized:

Even a custom or statutory directive that an auditor who accepts a particular sort of commission must perform a certain "ministerial" accounting task cannot ground the inference that corrupt motives underlie [the very] failure to perform that task. We quite agree that the recklessness that *rule 10b-5* requires must come "closer to being a lesser form of intent [to deceive] than merely a greater degree of

ordinary negligence." n20

Some courts have described recklessness in terms which suggest a closer approximation to negligence (albeit in an extreme form) than the *Pegasus Fund* standard. In *Sharp v. Coopers & Lybrand*, n21 an accounting firm was held liable under Section 10(b) for the reckless conduct of a nonpartner employee. According to the *Sharp* court, "[r]eckless conduct may be defined as a highly unreasonable omission (or misrepresentation), involving not merely simple, or even inexcusable, negligence, but an extreme departure from the standards of ordinary care, and which presents a danger of misleading buyers or sellers that is either known to the defendant or is so obvious that the actor must have been aware of it." n22

The *Sharp* case concerned a tax opinion prepared in connection with an oil drilling limited partnership offering. The court found that the jury properly could have determined that the accountant was culpable and reckless in failing to state the tax impact of nonrecourse loans that were not secured by valuable collateral, failing to point out that certain of the partnership loans, critical from a tax point of view, were merely paper loans, and failing to disclose that the accountant, had a relationship with the clients that may have affected his independence. n23 In addition, the court found the accounting firm liable notwithstanding the jury's finding that no partner had "caused any misstatement." The court based its decision in part on the theory that the accounting firm had a special duty to supervise the accountant-employee. n24

As set forth below, although courts continue to grapple with the question of what level of alleged wrongdoing constitutes recklessness, since 1995 this and other matters related to pleading scienter under Section 10(b) have been addressed against the backdrop of the Private Securities Law Reform Act (the "PSLRA"). n25

[2] Pleading Standards

Since the passage of the PSLRA in 1995, the courts have been split in their interpretations of the PSLRA's pleading requirements in order to sufficiently allege scienter, a requisite element of liability under Section 10(b). The PSLRA requires that to sufficiently allege scienter, "the complaint shall, with respect to each act or omission alleged to violate th[e] chapter, state with particularity facts giving rise to a strong inference that the defendant acted with the required state of mind. " n26 The division among the circuits relates to what gives rise to the requisite "strong inference."

The PSLRA pleading standards as interpreted by the circuit courts are discussed below.

In addition, as also set forth below, the Supreme Court in *Tellabs, Inc. v. Makor Issues & Rights, Ltd.* n27 recently clarified an important aspect of the term "strong inference" as used in the PSLRA, but left unresolved the split among the circuits concerning the proper method for pleading scienter under the PSLRA.

[a] The Pleading Standard in the United States Courts of Appeal for the Second and Third Circuits

Prior to the enactment of the PSLRA, the Second Circuit's pleading standard for scienter could be met either "(a) by alleging facts to show that defendants had both motive and opportunity to commit fraud, or (b) by alleging facts that constitute strong circumstantial evidence of conscious misbehavior or recklessness." n28 The Second Circuit held in *Press v. Chemical Inv. Servs. Corp.*, n29 that "[t]he [PSLRA] heightened the requirement for pleading scienter to the level used by the Second Circuit." n30 However, in *Novak v. Kasaks* n31 a little more than one year after deciding *Press*, the Second Circuit, while reaffirming its decision in *Press*, n32 took the position that "Congress's failure to include language about motive and opportunity suggests that we need not be wedded to these concepts in articulating the prevailing standard." n33

Although the Second Circuit arguably applies the most plaintiff-friendly standard for asserting scienter, in *Rothman v. Gregor* n34 that court upheld dismissal of a 10(b) claim brought against an accounting firm on the grounds that the complaint failed to sufficiently plead scienter. In particular, the Second Circuit found that defendant Arthur Andersen's

alleged disregard of certain sales data in issuing its audit opinion did not meet the court's standard for recklessness and as a result the plaintiff failed to adequately plead "facts supporting a strong inference of Andersen's scienter." n35 The court stated: "For recklessness on the part of a non-fiduciary accountant to satisfy securities fraud scienter, such recklessness must be conduct that is highly unreasonable, representing an extreme departure from the standards of ordinary care. It must, in fact, approximate an actual intent to aid in the fraud being perpetrated by the audited company." n36

As discussed at § 5A.07[5], only the SEC (as opposed to private plaintiffs) may assert aiding and abetting claims under Section 10(b). Recently, some district courts in the Second Circuit have held that the SEC must establish "knowing misconduct" (as opposed to simply reckless conduct) to establish such liability. n37

The Third Circuit, in *In re Advanta Corp. Securities Litigation*, n38 in adopting the Second Circuit's standard for pleading scienter after the passage of the PSLRA, held that "it remains sufficient for plaintiffs [to] plead scienter by alleging facts 'establishing a motive and an opportunity to commit fraud, or by setting forth facts that constitute circumstantial evidence of reckless or conscious behavior.'" n39

Subsequently, the Third Circuit in *In re Ikon Office Solutions, Inc. Securities Litigation* n40 held that a Section 10(b) claim against Ernst & Young, LLP ("Ernst") failed because Ernst did not act with scienter. According to the *Ikon* court, to show "recklessness," plaintiffs "must establish ... at a minimum, 'highly unreasonable (conduct), involving not merely simple, or even inexcusable negligence, but an extreme departure from the standards of ordinary care, ... which presents a danger of misleading buyers or sellers that is either known to the defendant or is so obvious that the actor must have been aware of it' ... [s]imple computation errors or slight accounting mistakes will not suffice to establish scienter." n41 The *Ikon* court further observed that for purposes of Section 10(b) "recklessness" is closer to "intent" than "indifference." n42

[b] The First, Fourth, Fifth, Sixth, Eighth, Tenth and Eleventh Circuits' Standard

The First, Fourth, Fifth, Sixth, Eighth, Tenth and Eleventh Circuits have taken the position that to establish scienter, a plaintiff must at least allege facts giving rise to a strong inference of recklessness, and have expressly rejected the "motive and opportunity" standard accepted by the Second and Third Circuits as sufficient by itself to adequately support a claim of scienter against a motion to dismiss. n43

[c] The Ninth Circuit Standard

The Ninth Circuit has adopted the highest pleading standard for scienter under the PSLRA. In *In re Silicon Graphics Inc. Securities Litigation*, n44 the Ninth Circuit, upon a review of the legislative history of the PSLRA, decided that the PSLRA pleading standard is higher than the Second Circuit's standard. n45 In announcing the pleading standard in the Ninth Circuit, the court stated: "[P]laintiffs proceeding under the PSLRA can no longer aver intent in general terms of mere 'motive and opportunity' or 'recklessness,' but rather, must state specific facts indicating no less than a degree of recklessness that strongly suggests actual intent." n46 In utilizing the term "recklessness," the court explained that "recklessness is a form of intent rather than a greater degree of negligence." n47

[d] The Supreme Court's Decision in *Tellabs, Inc. v. Makor Issues & Rights, Ltd.*

In *Tellabs, Inc. v. Makor Issues & Rights, Ltd.*, n48 the Supreme Court clarified the meaning of the term "strong inference" as used in the PSLRA by holding, *inter alia*, that "[t]o qualify as 'strong' ... an inference of scienter must be at least as compelling as any opposing inference of nonfraudulent intent." n49

In *Tellabs*, plaintiffs instituted a Section 10(b) class action that alleged that Tellabs, Inc. ("Tellabs") and its chief executive officer and president knowingly issued false statements indicating that Tellabs was enjoying strong demand

for its products and earning record revenues when, in fact, the opposite was true. n50 After the district court dismissed plaintiffs' pleading on the ground that it did not adequately allege scienter, n51 the Seventh Circuit reversed this decision. n52 According to the Seventh Circuit, in order to plead "sufficient facts to create a strong inference of scienter," it was enough to "allege facts from which, if true, a reasonable person could infer that the defendant acted with the required intent." n53 In adopting this standard, the Seventh Circuit specifically considered and rejected the stricter standard of the Sixth Circuit, i.e., that "plaintiffs are entitled only to the most plausible of competing inferences." n54

On appeal, the Supreme Court held that the Seventh Circuit's relaxed formulation for alleging a "strong inference" of scienter "did not capture the stricter demand Congress sought to convey" in the PSLRA. n55 Emphasizing that the "strength of an inference cannot be decided in a vacuum," n56 the Supreme Court thus ruled that:

To qualify as 'strong' within the intendment of § 21D(b)(2) [of the PSLRA], we hold, an inference of scienter must be more than merely plausible or reasonable?it must be cogent and at least as compelling as any opposing inference of nonfraudulent intent. n57

Based on the foregoing, under *Tellabs*, allegations of scienter will *not* survive a motion to dismiss as long as a legitimate explanation for claimed misconduct "tips the scales ever so slightly" in defendant's favor against plaintiffs' competing interpretation of the alleged facts. n58

The Supreme Court also stressed in *Tellabs* that the relevant inquiry is "whether *all* of the facts alleged, taken collectively, give rise to a strong inference of scienter, not whether any individual allegation, scrutinized in isolation, meets that standard." n59 In addition, the Court cautioned that "omissions and ambiguities *count against* scienter, for plaintiffs must state with particularity facts giving rise to a strong inference that the defendant acted with the required state of mind." n60

As the *Tellabs* court failed to resolve the aforementioned division among the circuits concerning the correct PSLRA standard for pleading that a "defendant acted with the required state of mind," n61 courts addressing allegations of scienter after *Tellabs* have generally (i) adhered to their pre-existing pleading standards *and* (ii) added the requirement imposed by *Tellabs* that an inference of fraud must be at least as compelling as any opposing inference of non-fraudulent intent. n62

While it is premature to fully assess the effect of the *Tellabs* decision, it is reasonable to assume that aggrieved shareholders may find it difficult to comply with its strict standards, especially since they generally must allege scienter before obtaining any discovery (which might bolster their case). n63

[3] Violations of Generally Accepted Accounting Principles or Generally Accepted Auditing Standards Do Not on Their Own Rise to the Level of a Violation of Section 10(b)

An issue of great significance to accountants both before and after the enactment of the PSLRA is whether the failure to adhere to GAAP or GAAS may, by itself, constitute recklessness for purposes of determining liability under Section 10(b). As discussed below, the courts have almost uniformly answered this question in the negative.

For example, the Ninth Circuit has held that "[t]he mere publication of inaccurate accounting figures, or a failure to follow GAAP, without more, does not establish scienter." n64 Addressing the matter in further detail, the Ninth Circuit stated:

The [plaintiff] must prove that the accounting practices were so deficient that the audit amounted to no audit at all, or an egregious refusal to see the obvious, or to investigate the doubtful, or that the accounting judgments which were made were such that no reasonable accountant would have made the

same decisions if confronted with the same facts. n65

Similarly, the Second Circuit stated in *Chill v. General Electric Co.*, n66 that "[a]llegations of a violation of GAAP provisions or SEC regulations, without corresponding fraudulent intent, are not sufficient to state a securities fraud claim." n67

The First Circuit has stated in *dicta* that: "Violations of GAAP standards ... could provide evidence of scienter." However, the court went on to note that "[t]o support even a reasonable inference of scienter ... the complaint must describe the violations with sufficient particularity." n68

By the same token, as emphasized by the court in *In re Bristol-Myers Squibb Sec. Litig.*, a company's financial restatement in and of itself does not provide a basis for inferring scienter. n69 The fact that a corporation later states that earlier recorded transactions should have been treated differently "does not mean, however, that the inaccurate way the transactions were originally recorded was fraudulent." n70

Although bare allegations of violations of GAAP or GAAS (or a corporate restatement) are insufficient, some courts have addressed what additional allegations joined with such alleged violations might be enough to properly plead recklessness against an accountant under Section 10(b). For example, in *In re Suprema Specialties, Inc. Sec. Litig.*, n71 the court held that allegations that an auditor violated GAAS *coupled* with allegations that it turned a blind eye to "red flags" that provided warnings that its clients' financial statements were artificially inflated were sufficient to survive a motion to dismiss. Among others, the "red flags" overlooked in *Suprema Specialties* included (i) astronomical growth in net sales, gross margin and net earnings despite substantially increased negative cash flow, (ii) growth that was radically disproportionate with the performance of the industry as a whole, (iii) weak internal controls and (iv) restrictions on auditor access to key corporate accounting personnel. n72

Moreover, in some cases involving alleged GAAP or GAAS violations, courts have stated that the "sheer magnitude" of the alleged accounting error may permit the inference that the defendant accountant engaged in reckless conduct. n73 On the other hand, other courts have declined to follow those authorities reasoning that "[a]llowing ... an inference of scienter based on the magnitude of fraud would eviscerate the principle that accounting errors alone cannot justify a finding of scienter." n74

[4] Compliance with Generally Accepted Accounting Principles and Generally Accepted Auditing Standards Generally Insulates Accountants from Liability Under Section 10(b)

As previously discussed, in general, violations of GAAP or GAAS do not on their own rise to the level of a violation of Section 10(b). In addition, as recognized by numerous authorities, accountants can, in most instances, insulate themselves from liability by complying with GAAP and GAAS. n75

For example, in *SEC v. Arthur Young & Co.*, n76 the SEC urged that "the proper standard is whether the accountant performed his audit functions in a manner that would have revealed to an ordinary prudent investor, who examined the accountant's audits or other financial statements, a reasonably accurate reflection of the financial risk such an investor presently bears or might bear in the future if he invested in the audited endeavor." In opposition, Arthur Young contended that "good faith compliance with [GAAS] under the circumstances of this case will immunize it from liability under the securities laws." n77 The Ninth Circuit agreed with Arthur Young and held that no more than compliance with GAAS was required of the auditor. n78

Moreover, citing its prior decision in *SEC v. Arthur Young*, the Ninth Circuit held in *Monroe v. Hughes* n79 that "an accountant's good faith compliance with Generally Accepted Accounting Principles and Generally Accepted Auditing Standards discharges the accountant's professional obligation to act with reasonable care." n80

On the other hand, there is authority for the proposition that technical compliance with GAAP may not insulate an accountant from liability under Section 10(b) when the accountant has chosen not to disclose a known material fact or acted in bad faith. This was illustrated in the criminal case, *United States v. Simon*,ⁿ⁸¹ in which the Second Circuit took the position that compliance with GAAP is not enough if the accountant fails to reveal improper conduct it discovers during its audit:ⁿ⁸² "Generally accepted accounting principles instruct an accountant what to do in the usual case where he has no reason to doubt that the affairs of the corporation are being honestly conducted. Once he has reason to believe that this basic assumption is false, an entirely different situation confronts him ... If ... he finds his suspicions [of misconduct] to be confirmed, full disclosure must be made ... " ⁿ⁸³ Similarly, the Ninth Circuit also took this view in *SEC v. GLT Dain Rauscher, Inc.*,ⁿ⁸⁴ holding that compliance with GAAS alone did not immunize an accountant who failed to reveal material facts that were known or which, but for a deliberate refusal to become informed, should have been known.

In an accountant's liability case, the trier of fact often places heavy reliance on expert testimony (offered by both sides) in determining whether the accountant satisfied or departed from the required standard of conduct. Showing the deference generally accorded to compliance with GAAP and GAAS, the court in *Danis v. USN Communications, Inc.*ⁿ⁸⁵ held that "[w]hen qualified experts disagree on whether GAAP and GAAS procedures were properly followed, the accounting procedures *cannot* be deemed reckless" for purposes of determining liability under Section 10(b).ⁿ⁸⁶

[5] The Elimination of Aiding and Abetting Liability Under Section 10(b)

In 1994, in *Central Bank of Denver, N.A. v. First Interstate Bank of Denver, N.A.*, the Supreme Court eliminated the long established concept of aiding and abetting liability under Section 10(b) of the Exchange Act for secondary actors (*i.e.*, those other than the purchaser or seller) in a securities transaction, such as attorneys, accountants, underwriters and others.ⁿ⁸⁷ These secondary actors can now be liable only as primary violators of Section 10(b).

The Court used a strict textual analysis of Section 10(b) to override decisions of each United States circuit court,ⁿ⁸⁸ in holding that Congress did not intend liability for aiding and abetting a violation of Section 10(b). The Central Bank of Denver was the indenture trustee of two bond issues. The bond covenants required that the bonds be secured by land appraised at a value of at least 160% of the outstanding principal and interest. Central Bank delayed a second appraisal it had decided was advisable, until after the second offering closed. Plaintiffs purchased the second issue bonds which went into default before the appraisal could be completed.

The Court found that Section 10(b) only prohibits making misrepresentations (or omissions where there is a duty to disclose) and committing manipulative acts; it does not prohibit giving aid to a person who commits a deceptive or manipulative act. This reasoning mandated the rejection of aiding and abetting liability under Section 10(b) because such liability reaches persons who did not engage in the proscribed activities.ⁿ⁸⁹

The Court found further support for its reasoning in the requirement that to recover in an action for primary liability, the plaintiff must show reliance on the defendant's misstatement or omission. Permitting an aiding and abetting action could impose liability on a defendant without any showing that the plaintiff relied upon the aider and abettor's statements or actions.ⁿ⁹⁰ The Court did, however, specifically note that the absence of aiding and abetting liability does not mean that "secondary actors" are immune from Section 10(b) liability. The oft-quoted language is, "Any person or entity, including a lawyer, accountant or bank, who employs a manipulative device or makes a material misstatement [or omission] on which a purchaser or seller of securities relies" may be liable as a primary violator.ⁿ⁹¹ This left open the question of what types of conduct by a secondary actor could constitute primary liability under Section 10(b).

In the years since *Central Bank* was decided, the federal courts have differed over what conduct is required by secondary actors, such as accountants, to incur Section 10(b) primary liability. Two lines of cases have emerged: cases applying the "bright line" test which requires that the defendant must actually make a false or misleading statement to be liable under Section 10(b); and cases applying the "substantial participation" test which imposes primary liability on

secondary actors who play a "significant role" in the creation of the false or misleading statement.

In addition, at least one district court has followed a test proposed by the SEC that potentially makes secondary actors primarily liable under Section 10(b) if they "create" a misrepresentation even if they are not identified with the misrepresentation by name. n92

[a] The "Bright Line" Test

This test and the line of cases that have applied it hold that "if *Central Bank* is to have any real meaning, a defendant must actually make a false or misleading statement in order to be held liable under Section 10(b). Anything short of such conduct is merely aiding and abetting, and no matter how substantial that aid may be, it is not enough to trigger liability under Section 10(b)." n93

The Second Circuit has been the strongest advocate of the "bright line" test. For example, in *Wright v. Ernst & Young*, n94 the Second Circuit affirmed the district court's dismissal of securities claims which asserted that an accounting firm was liable for its client's allegedly false and misleading statements because the firm had "reviewed and approved" those "misstatements." n95 In dismissing the action, the *Wright* court held that "a secondary actor cannot incur primary liability under the Act for a statement not attributed to that actor at the time of its dissemination. Such a holding would circumvent the reliance requirements of the Act, as reliance only on representations made by others cannot itself form the basis of liability. Thus, the misrepresentation must be attributed to that specific actor at the time of public dissemination, that is, in advance of the investment decision." n96

In recent years, however, there appears to be a discernable movement towards relaxing the "bright line" test even in courts within the Second Circuit. First, in *Scholastic Corp. Sec. Litig.* n97 (decided after *Wright v. Ernst & Young*), the Second Circuit, itself, upheld a ruling that a company's vice president could be liable under Section 10(b) for misstatements which were *not* specifically attributed to him. In that case, the vice president had been "primarily responsible" for communications with investors, and he had been "involved in the drafting, producing, reviewing and/or disseminating of the false and misleading statements." n98

Subsequently, the Southern District of New York in *In re Global Crossing Ltd. Sec. Litig.* n99 sent a clear signal that strict attribution may not be required to impose primary securities liability on an accountant. In *Global Crossing*, the bulk of the plaintiffs' allegations against Arthur Andersen (Global Crossing's auditors) arose from allegedly misleading public statements made by Global Crossing in various press releases, unaudited quarterly statements and "pro forma" financials concerning improper "swap" transactions engaged in by Global Crossing. On a motion to dismiss, Andersen asserted that it could not be held liable for its client's "misstatements" because (among other things) they were never publicly attributed to Andersen, as required by the Second Circuit's decision in *Wright v. Ernst & Young*. In denying Andersen's motion, the court noted that the Second Circuit's more recent decision in *In re Scholastic Corp. Sec. Litig.* "might indicate some relaxation of *Wright's* [attribution] requirement ... [but] it d[id] not provide any guidance as to when a statement not attributed to a defendant might cross the line into a primary violation." n100 Attempting to supply such guidance, the court adopted the rule that "a plaintiff may state a claim for primary liability under Section 10(b) for a false statement (or omission), *even where the statement is not publicly attributed to the defendant*, where the defendant's participation is substantial enough that s/he may be deemed to have *made* the statement, and where investors are sufficiently aware of the defendant's participation that they may be found to have relied on it as if the statement had been attributed to the defendant." n101 Applying the "participation" element of this rule, the court held that "[a]llegations that Andersen 'prepared, directed or controlled,' 'helped create' or 'materially assisted in preparing false statements' issued by Global Crossing place its involvement well beyond the realm of 'aiding and abetting' liability precluded by *Central Bank*." n102 With respect to attribution, the court emphasized that "it [wa]s undisputed, as a matter of public record, that Andersen's audit reports were included in all of [Global Crossing's] registration statements and annual reports from 1998 to 2000, and that they were widely available to shareholders during the class period," thereby permitting a reasonable inference that Andersen was one of the "makers" of the allegedly false statements and

that investors viewed Andersen as such. n103

The above formulation of the "bright-line" test in *Global Crossing*, which permits "constructive" attribution, appears to be significantly closer to the "substantial participation" test than earlier applications of the "bright-line" test. n104

The Tenth n105 and Eleventh Circuits n106 and courts in the First n107 and Third Circuits n108 have also applied the "bright line" test to determine secondary actor liability under § 10(b). In a recent decision, the Tenth Circuit noted that it has "never adopted an attribution requirement" as part of the "bright line" test in private securities litigation. n109

[b] The "Substantial Participation" Test

The courts applying the "substantial participation" test, led by the Ninth Circuit, hold that secondary actors, such as accountants, can be held primarily liable under Section 10(b) for statements made by others, when they substantially participate or play a significant role in the preparation of the statement. n110 In finding liability for secondary actors under Section 10(b), these courts do not require as high a level of involvement by the secondary actor as the courts that utilize the "bright line" rule. While this view has been primarily limited to the courts in the Ninth Circuit, at least two district courts, one in the Northern District of Illinois and one in the Southern District of Indiana has applied the "substantial participation" test. n111

[c] The SEC Approach Based on the Defendant's Alleged Making of a Misrepresentation

In *Enron Corp. Securities and Derivative Litigation*, n112 the SEC filed an *amicus curiae* brief that argued that the "bright-line test" should not be followed because it serves to provide a safe harbor from primary liability for everyone except for those identified with the alleged misrepresentation by name. n113 As an alternative, the SEC proposed the following rule for primary liability of a secondary party under section 10(b): "when a person, acting alone or with others, creates a misrepresentation [on which the investor-plaintiffs relied], the person can be liable as a primary violator ... if ... he acts with the requisite scienter." Under this proposed rule, "it would not be necessary for a person to be the initiator of a misrepresentation in order to be a primary violator ... Furthermore, 'a person who prepares a truthful and complete portion of a document would not be liable as a primary violator for misrepresentations in other portions of the document.' ... Finally, of course, the plaintiff must plead and prove the elements of scienter and reliance." n114 The *Enron* court adopted the SEC's approach to liability under Section 10(b) and *Rule 10b-5*, stating the view that it was "a reasonable interpretation of the text of the statute and serves its underlying policies." n115

[d] Liability Under Sections 10b-5 (a) and (c)

[i] Cases Prior to the Stoneridge Decision

The vast majority of *Rule 10b-5* cases target false or misleading statements prohibited by subsection (b) of the Rule. Before *Central Bank* eliminated aider and abetter liability, subsections (a) and (c), if they were referred to at all, were usually used to target certain types of manipulative trading activity (such as "churning" and "wash sales."). n116

After *Central Bank*, however, private plaintiffs increasingly attempted to use subsections (a) and (c) of *Rule 10b-5* n117 to extend securities liability to secondary actors based on what is generally referred to as "scheme liability." "Scheme liability" is based on the concept that a party who participates in a fraudulent "scheme" violates 10b-5 even though that party did not make a public misstatement or violate any duty to disclose. n118

Until the Supreme Court's recent *Stoneridge Partners, LLC v. Scientific Atlanta, Inc. decision* n119 (discussed below), a clear division existed among circuit courts concerning the legal viability of "scheme liability." In this regard, the Fifth and Eighth Circuits expressly rejected "scheme liability" holding that *Rule 10b-5* liability requires that a defendant violate a duty to disclose material information and that it is not sufficient to plead that the defendant participated in a "scheme to defraud." n120 In contrast, the Ninth Circuit held that a defendant could be liable as a primary violator of

Rule 10b-5 for participation in a "scheme to defraud" if that party "engaged in conduct that had the principal purpose and effect of creating a false appearance of fact in furtherance of the scheme." n121

In addition, in *In re Global Crossing Ltd. Sec. Litig.* (an accountants' liability case discussed above), n122 the plaintiffs sued defendant Arthur Andersen in the Southern District of New York for alleged violation of 10b-5(a) and (c), as well as asserting false statements under (b). In denying Andersen's motion to dismiss, the court found that plaintiffs had "clearly alleged ... that Andersen committed a manipulative or deceptive act in furtherance of the alleged scheme to defraud." n123 According to the court, "Andersen's allegedly central role" in "*creat[ing]* the accounting schemes used to inflate ... [its client's] financials, ... as their chief architect and executor, leaves no doubt as to its potential liability as a primary violator." n124

[iii] The Supreme Court's Decision in *Stoneridge Investment Partners, LLC v. Scientific-Atlanta, Inc.*

In early 2008, the Supreme Court issued a 5-3 decision in *Stoneridge Investment Partners, LLC v. Scientific Atlanta, Inc.*, n125 which effectively eliminated "scheme liability" as a mechanism to extend primary Section 10(b) liability to secondary actors, such as accountants.

In *Stoneridge*, the class action plaintiffs -- shareholders of Charter Communications, Inc. ("Charter") (a cable operator) -- sought to impose Section 10(b) primary liability on corporate entities who, acting both as customers and suppliers of Charter, allegedly agreed to fraudulent arrangements that allowed Charter to mislead its auditor and issue misleading financial statements that adversely affected Charter's stock price. Notwithstanding this alleged misconduct by the customer/supplier defendants, plaintiffs did *not* assert that those parties had played any role in the preparation or dissemination of Charter's false financial statements. Based on the foregoing, the Supreme Court held that plaintiffs did not assert an actionable Section 10(b) claim against the customer/suppliers because they could not show that they *relied* on any deceptive acts or statements of those defendants. In this regard, the Court emphasized that defendants' alleged deceptive acts "were *not* disclosed to the investing public" and were "too remote to satisfy the requirement of reliance." n126 The Court further stated that it was Charter, not the customer/suppliers, that misled Charter's auditor and filed false financial statements and that nothing that defendants did "made it necessary or inevitable for Charter to record ... [fraudulent] transactions as it did." n127

In determining that plaintiffs could not sustain their Section 10(b) claim against the customer/supplier defendants, the Supreme Court expressly rejected plaintiffs' contention that such liability could be imposed on those parties, even absent a public statement, based on principles of "scheme liability." According to the Court, applying "scheme liability" would not "answer the objection" that the plaintiffs did not, in fact, rely upon the defendant's own "deceptive conduct." n128

Among other things, the Supreme Court also emphasized that adopting plaintiffs' theory of "scheme liability" would "put an unsupportable interpretation on Congress' specific response to *Central Bank* in § 104 of the PSLRA." n129 After the Supreme Court's decision in *Central Bank* eliminated aiding and abetting liability under Section 10(b), Congress included a provision in the PSLRA (§ 104) which authorized Section 10(b) liability for aiders and abettors in SEC actions, but *not* in actions brought by private parties. According to the Supreme Court, if it adopted plaintiffs' broad construction of Section 10(b):

it would revive in substance the implied cause of action against all aiders and abettors except those who committed no deceptive act in the process of facilitating the fraud ... and ... undermine Congress' determination that this class of defendants should be pursued by the SEC and not by private litigants.
n130

In this regard, the Court also noted that it is not necessary to employ "scheme liability" to insure that secondary actors are held accountable for their misconduct because such parties are subject to (i) civil enforcement by the SEC, (ii)

criminal penalties, (iii) certain state securities laws that allow state regulators to seek fines and restitution from aiders and abettors *and* (iv) federal securities law liability when they commit primary violations of Section 10(b). n131

In addition, the Supreme Court stated that applying "scheme liability" to Section 10(b) litigation would improperly expose "a new class of defendants" to the risk that plaintiffs with "weak claims" might use "extensive discovery and the potential for uncertainty and disruption" in such litigation to "extort settlements from innocent companies." n132 According to the Court, expanding potential Section 10(b) liability in this manner might (i) raise "the costs of doing business" if parties find it necessary to protect themselves against the threat of increased litigation, (ii) deter "[o]verseas firms with no other exposure to our securities laws" from doing business in the U.S., (iii) increase "the cost of being a publicly traded company" under U.S. law and (iv) "shift securities offerings away from domestic capital markets." n133

Based on *Stoneridge*, it appears that plaintiffs will not be able to utilize "scheme liability" to expand the reach of Section 10(b) private action beyond cases involving misstatements, omissions by a party who has a duty to disclose or the type of "manipulative" trading activity previously discussed. n134 Nevertheless, it may be argued that the Supreme Court in *Stoneridge* did not intend to categorically foreclose all future applications of 'scheme liability.' In this regard, in *Stoneridge*, the Court observed that applying "scheme liability" to the case before it would extend Section 10(b) liability "beyond the securities markets the realm of financing business to purchase and supply contracts the realm of ordinary business operations." n135 Based on this language, it may be asserted that the Supreme Court left the door open to apply the "scheme liability" concept to litigation arising from what the Court described as the "investment sphere" (an area often involving accountants and other professionals). n136 However, that potential argument was significantly undercut, if not eliminated, by the fact that the Supreme Court subsequently denied plaintiffs' petition for certiorari in *Regents of the Univ. of Cal. v. Credit Suisse First Boston*, n137 which asked the Court to review the Fifth Circuit's refusal to apply "scheme liability" to Section 10(b) claims brought against *banks* allegedly connected to the demise of Enron.

[6] Proportionate Liability and Settlement

Prior to the enactment of the PSLRA in 1995, parties who violated Section 10(b) (and *Rule 10b-5*) were subject to joint and several liability which meant that a defendant could be required to pay an amount greatly in excess of its equitable share of the plaintiff's total damages. Now, under the PSLRA, n138 the imposition of joint and several liability under the Exchange Act is limited to only those defendants who "knowingly" commit securities law violations n139 and the liability of other "violators" is subject to a system of proportionate liability. As such, secondary actors, such as accountants, whose activities do not rise to the level of "knowing" violations, but may satisfy a lower standard of liability, will only be held liable for their proportionate share of the plaintiff's damages.

In addition, the PSLRA laid to rest the often conflicting and confusing framework which previously governed partial settlements in cases brought under the Exchange Act. Resolving this issue, the PSLRA states that "[i]f a covered person enters into a settlement with the plaintiff prior to final verdict or judgment, the verdict or judgment with respect to other defendants shall be reduced by the greater of--(i) an amount that corresponds to the percentage responsibility of that covered person; or (ii) the amount paid to the plaintiff by that covered person." n140

FOOTNOTES:

(n1)Footnote 1. *15 U.S.C. § 78j (1997 & Supp. 2008)*. Rule 10(b)-5, promulgated pursuant to Section 10(b), makes it unlawful for any person:

(a) [t]o employ any device, scheme or artifice to defraud;

(b) [t]o make any untrue statement of a material fact or to omit to state a material fact necessary in order

to make the statements made, in light of the circumstances under which they were made, not misleading;
or

(c) [t]o engage in any act, practice, or course of business which operates or would operate as a fraud or
deceit

upon any person in connection with the purchase or sale of any security.

17 C.F.R. § 240.10b-5(b) (2007).

(n2)Footnote 2. 17 C.F.R. § 240.10b-5(b).

(n3)Footnote 3. Financial statements are prepared by an audit client for examination and the expression of an opinion by the auditor. Therefore, Rule 10(b)-5 cases brought against accountants generally turn on the issue of whether the auditor performed its audit examination in a manner indicating that it knowingly or recklessly disregarded or failed to apply GAAS or GAAP or intentionally participated in the audit client's financial statement wrongdoing.

(n4)Footnote 4. The Supreme Court has noted that the "text of § 10(b) does not provide for private claims," and has therefore "made no pretense that it was Congress' design to provide the remedy afforded." *Lampf, Pleva, Lipkind v. Gilbertson*, 501 U.S. 350, 358-359 (1991) ; see *Musick, Peeler & Garrett v. Employers Ins.*, 508 U.S. 286, 291 (1993) ("The private right of action under *Rule 10b-5* was implied by the judiciary on the theory courts should recognize private remedies to supplement federal statutory duties, not on the theory Congress had given an unequivocal direction to the courts to do so."); *Ernst & Ernst v. Hochfelder*, 425 U.S. 185, 196 (1976) ("There is no indication that Congress, or the [Securities and Exchange] Commission when adopting *Rule 10b-5*, contemplated such a remedy."). One of the principal drafters of *Rule 10b-5* has remarked "[o]bviously neither I, nor the Commission that promulgated the Rule, had any ... idea [that this Rule was the basis for a private suit] when the Rule was adopted." Supp. 79, 83 (S.D.N.Y. 1978) (nor can an inference of fraud arise with respect to an auditor by the mere fact that fraud allegedly occurred at the audited company); *Decker v. Massey-Ferguson, Ltd.*, 681 F.2d 111, 120 (2d Cir. 1982) . Cf. *Skubik v. Leeds*, [1981 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 97,986 at 91,069 (S.D.N.Y. 1981) (financial misstatements do not give rise to an inference that auditors were involved in fraud); *Crystal v. Foy*, 562 F. Supp. 422, 431-432 (S.D.N.Y. 1983) ("the law is clear that the mere fact that a financial report contains overstatements does not *ipso facto* give rise to an inference of impropriety"); *Jacobson v. Peat, Marwick, Mitchell & Co.* 445 F. Supp. 518, 523 (S.D.N.Y. 1977) . See also *CL-Alexanders Laing & Cruickshank v. Goldfeld*, 739 F. Supp. 158 (S.D.N.Y. 1990) , where an investment bank was unable to sustain its claim against an accounting firm which had issued a "comfort letter" in connection with allegedly false projections contained in a prospectus. The comfort letter, included in the prospectus, expressly disclaimed any opinion on the accuracy of the projections and, accordingly, the court found that the bank's claimed reliance on the projections was unreasonable as a matter of law.

(n18)Footnote 18. 617 F.2d 1335 (9th Cir. 1980) .

(n19)Footnote 19. 617 F.2d at 1341 .

(n20)Footnote 20. 617 F.2d at 1341 , quoting *Sanders v. John Nuveen & Co.*, 554 F.2d 790, 793 (7th Cir. 1977) . Regardless of the formulation adopted by a court, recklessness is merely a description of a state of mind that generally in the end must be inferred from evidence constituting behavior. As a result, similar evidence may or may not support a finding of recklessness, depending on how it is viewed by the trier of fact. See *McLean v. Alexander*, 420 F. Supp. 1057 (D. Del. 1976) , rev'd, 599 F.2d 1190 (3d Cir. 1979) (negligence but not recklessness); see also *Adams v. Standard Knitting Mills, Inc.*, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,683 (E.D. Tenn. May 19, 1976) (fraud by auditor), rev'd, 623 F.2d 422 (6th Cir. 1980) (negligence in part, innocent behavior in part), cert. denied sub nom, *Adams v. Peat, Marwick, Mitchell & Co.*, 449 U.S. 1067 (1980) .

(n21)Footnote 21. 457 F. Supp. 879 (E.D. Pa. 1978) , aff'd in part, vacated in part, 649 F.2d 175 (3d Cir. 1981) .

(n22)Footnote 22. 457 F. Supp. at 889 (citations omitted). See also *SEC v. Infinity Group Co.*, 212 F.3d 180, 192 (3d Cir. 2000) , cert. denied, 532 U.S. 905 (2001) ; *McLean v. Alexander*, 599 F.2d 1190, 1197-98 (3d Cir. 1979) .

(n23)Footnote 23. As noted above, this case suggests that gross negligence may be sufficient to constitute "recklessness." However, this raises the question as to how "gross" the accountant's negligence must be to amount to

"recklessness." In *Hubshman v. Alexander Grant & Co.*, [1976-1977 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 95,923, 91,485 (S.D.N.Y. Mar. 7, 1977), the court observed:

While, taken separately, these claims might only be indicative of negligence or professional malpractice, when taken together they may read to support plaintiff's allegations of a pattern of behavior from which plaintiffs may draw an inference of scienter. ...

See also Magna Inv. Corp. v. John Does One Through Two Hundred, 931 F.2d 38 (11th Cir. 1991) (severe recklessness by an accounting firm would satisfy the scienter requirement).

(n24)Footnote 24. Liability was also predicated on Section 20 of the Exchange Act which provides that a person "controlling" any person liable under the Exchange Act is likewise liable unless "the controlling person acted in good faith and did not directly or indirectly induce the act or acts constituting the violation." *See Sharp v. Coopers & Lybrand*, *supra* at 891. *But see Barker v. Henderson, Franklin, Starnes & Holt*, 797 F.2d 490 (7th Cir. 1986) (accounting firm not liable under Section 20(a) as controlling person, since control involves the power to direct the activities of an issuer and does not arise merely from providing advice and counsel).

(n25)Footnote 25. The PSLRA, enacted in 1995, was a reaction to the perceived abusive use of the federal securities laws against accountants and others. Since the potential exposure of accountants and others to damage claims sought in class actions brought by investors was enormous, and since damage awards were generally rendered on a "joint and several" basis, the impetus to settle even highly questionable claims to avoid potentially catastrophic financial consequences, was strong. The PSLRA sought to readjust the balance.

(n26)Footnote 26. 15 U.S.C. § 78u-4(b)(2) (1997 & Supp. 2008).

(n27)Footnote 27. ___ U.S. ___, 127 S. Ct. 2499 (2007) .

(n28)Footnote 28. *Shields v. Citytrust Bancorp, Inc.* 25 F.3d 1124, 1128 (2d Cir. 1994) . Prior to PSLRA's enactment, the Ninth Circuit adopted a standard for pleading scienter which was less demanding than the above Second Circuit test: "[P]laintiffs may aver scienter *generally* ... simply by saying that scienter existed." *In re GlenFed, Inc. Securities Litigation*, 42 F.3d 1541, 1545 (9th Cir. 1994) (emphasis added). However, as will be discussed below, based on its interpretation of the PSLRA's effect on the standard for pleading scienter, the Ninth Circuit subsequently raised its required standard to a level *higher* than that used by the Second Circuit. *See In re Silicon Graphics Inc. Securities Litigation*, 183 F.3d 970 (9th Cir. 1999) .

(n58)Footnote 58. *New Jersey v. Sprint Corp.*, 531 F. Supp. 2d 1273, 1281 (D. Kan. 2008) .

Some federal courts have recently expressed the view that the strict pleading standard mandated by *Tellabs* did not change (or dramatically alter) prior law in this area. For example, in *Central Laborers' Pension Fund v. Integrated Electrical Services Inc.*, 497 F.3d 546, 551 (5th Cir. 2007) , the Fifth Circuit interpreted *Tellabs* as strengthening its pre-existing view that the court should "engage in some weighing of the allegations to determine whether the inferences toward scienter are strong or weak" [quoting *Rosenzweig v. Azurix Corp.*, 332 F.3d 854, 867 (5th Cir. 2003)] . See also *Dotson v. Collins*, 2008 U.S. App. LEXIS 1120 at *11 (6th Cir. Jan. 15, 2008) (noting that *Tellabs* court "recently reiterated" the controlling pleading requirements) (emphasis added); *Middlesex Retirement System v. Quest Software Inc.*, 527 F. Supp. 2d 1164, 1181 (C.D. Cal. 2007) ; *Elam v. Neidorff*, 502 F. Supp. 2d 988, 993-995 (E.D. Mo. 2007) .

(n59)Footnote 59. 127 S. Ct. at 2509 .

In addition, although the court in *Mizzaro v. Home Depot, Inc.*, 2008 U.S. App. LEXIS 21091 at **13-14 (11th Cir. Oct. 8, 2008), recognized that the Supreme Court had clarified the meaning of the term "strong inference" in *Tellabs*, it noted that *Tellabs* failed to address more specific issues concerning how courts should evaluate allegations to determine whether the inference of scienter is "cogent and compelling."

(n60)Footnote 60. *Id.* at 2511 (emphasis added).

(n61)Footnote 61. 15 U.S.C. § 78u-4(b)(2) (1997 & Supp. 2008).

(n62)Footnote 62. For example, after *Tellabs* was decided, the Second Circuit reiterated in *ATSI Communications Inc. v. Wolfson*, 493 F.3d 87, 99 (2d Cir. 2007) that the basic test for pleading scienter *remained* whether plaintiff had alleged facts "(1) showing that the defendants had both motive and opportunity to commit fraud or (2) constituting strong circumstantial evidence of conscious misbehavior or recklessness." However, based on *Tellabs*, the *ATSI* court also stated that for an "inference of scienter to be strong [enough to satisfy the PSLRA], 'a reasonable person [must] deem [it] cogent and *at least as compelling* as any opposing inference one could draw from the facts alleged.'" *Id.* (quoting *Tellabs*) (emphasis in original).

Likewise, in *Key Equity Investors Inc. v. Sel-Leb Marketing Inc.*, 246 Fed. Appx. 780, 786, (3d Cir. 2007) (decided after *Tellabs*), the Third Circuit made it clear that *Tellabs* supplemented, but did *not* replace, its pre-*Tellabs* standard for pleading scienter under the PSLRA, stating, *inter alia*, that plaintiffs must allege facts that either show "motive and opportunity" to commit fraud or which constitute "strong circumstantial evidence of conscious misbehavior or recklessness."

In addition, in *In re Winn-Dixie Stores, Inc. Sec. Litig.*, 531 F. Supp. 2d 1334, 1349 (M.D. Fla. 2007), the court acknowledged the *Tellabs* decision, but noted that 'the Eleventh Circuit continues to "'adhere to the rule that a showing of severe recklessness [is needed] to satisf[y] the scienter requirement' " (citations omitted). Similarly, the First Circuit and at least one court in the Ninth Circuit have confirmed in post-*Tellabs* decisions that those circuits continue to follow their preexisting standards for pleading scienter. See *ACA Financial Guaranty Corp. v. Avest, Inc.*, 512 F.3d 46, 58 (1st Cir. 2008) ("a plaintiff may satisfy the scienter requirement with a showing of either conscious intent to defraud or a high degree of recklessness") [quoting *Aldridge v. A.T. Cross Corp.*, 284 F.3d 72, 82 (1st Cir. 2002)] ; *Tripp v. IndyMac Bancorp, Inc.*, 2007 U.S. Dist. LEXIS 95445 at * 5 (C.D. Cal. Nov. 29, 2007) .

Rouhana (In re Winstar Communs.)*, 2006 U.S. Dist. LEXIS 7618, at *n.7 (S.D.N.Y., Feb. 27, 2006) (allegations of scienter against auditor properly predicated upon alleged violations of GAAP and GAAS and auditor's alleged reckless disregard of "red flags"); *United States SEC v. Gold*, 2006 U.S. Dist. LEXIS 87042 at **11-12 (E.D.N.Y. Aug. 18, 2006) ("scienter may be inferred where an auditor consciously disregards 'red flags' or substantially ignores GAAS"); *In re Sunbeam Sec. Litig.*, 89 F. Supp. 2d 1326, 1344 (S.D. Fla. 1999) [scienter properly pled against an accounting firm charged with GAAS violations because (among other things) firm was allegedly "tipped off" by an employee of its client that the client had overstated certain reserves]; *In re Health Management, Inc. Sec. Litig.*, 970 F.Supp. 192, 203 (E.D.N.Y. 1997) (allegations that an accounting firm violated

GAAS together with allegations that it ignored certain "red flags," including an analyst letter which warned of artificially inflated accounts receivable levels, were sufficient to withstand a motion to dismiss). On the other hand, the court in *Cheney v. Cyberguard Corp.*, [2000-2001 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 91,258 at 95,417 (S.D. Fla. 2000), held that an accounting firm's alleged failure to address certain "red flags" (e.g., the allegation that the client was motivated to engage in fraudulent accounting because it was attempting to locate an acquirer or merger partner) did not support an inference of scienter because (unlike in *Sunbeam* above) there were no allegations that the accountant was ever "told" about the alleged improper accounting practices. *See also Fidel v. Farley*, 392 F.3d 220, 230 (6th Cir. 2004) (allegations of scienter failed because plaintiffs were unable to properly plead that defendant auditor knew or should have known of any of the claimed financial improprieties occurring at its client); *Montalvo v. Tripos, Inc.*, 2005 U.S. Dist. LEXIS 22753 (E.D. Mo., Sept. 30, 2005) .

(n73)Footnote 73. *In re Cabletron Sys., Inc.*, 311 F.3d 11 (1st Cir. 2002) (significant GAAP violations could provide evidence of scienter when the complaint made particularized allegations of large-scale fraudulent practices over a sustained period); *In re Sunbeam Sec. Litig.*, 89 F. Supp. 2d 1326, 1345 (S.D.Fla. 1999) . *See also Danis v. USN Communications, Inc.*, 121 F. Supp. 2d 1183, 1194 (N.D.Ill 2000) ("In considering whether auditors acted recklessly, courts consider (1) the magnitude of the accounting error; (2) whether defendants had prior notice of the error; and (3) whether defendants were responsible for calculating and disseminating the financial data"); *Carley Capital Group v. Deloitte & Touche LLP*, 27 F. Supp. 2d 1324, 1340 (N.D. Ga. 1999) ("[t]he Court concludes that the allegations concerning the totality and magnitude of the Defendant's accounting violations constitute strong circumstantial evidence of reckless or conscious misbehavior.").

(n74)Footnote 74. *Fidel v. Farley*, 392 F.3d 220, 231 (6th Cir. 2004) [citing *In re SCB Computer Tech., Inc. Sec. Litig.*, 149 F. Supp. 2d 334, 359 (W.D. Tenn 2001)] . *See also Ley v. Visteon Corp.*, 2008 U.S. App. LEXIS 20994 at *38 , 2008 FED App. 0360P (6th Cir. Oct. 6, 2008) (stating that the Sixth Circuit has declined to follow the cases that hold that the magnitude of financial fraud contributes to an inference of scienter on the part of the defendant, and noting that even if the "magnitude" was relevant, the magnitude at issue was not sufficient to raise a strong inference of scienter); *In re Cardinal Health, Inc. Sec. Litigs.*, 426 F. Supp. 2d 688, 2006 U.S. Dist. LEXIS 18687, *1 (S.D. Ohio, April 12, 2006) . ("The magnitude of an erroneous financial statement caused by allegedly fraudulent representations, without more, cannot sustain a finding that an auditor acted with scienter.")

(n75)Footnote 75. *See, e.g., Midwest Imports, Ltd. v. Les Coval*, 71 F.3d 1311, 1317-1319 (7th Cir. 1995) (accountants entitled to summary judgment dismissing plaintiff's contract and negligence claims because "the record fails to create a genuine issue of fact as to whether ... [the accountants] violated any professional auditing standard"); *In re Hawaii Corp.*, 567 F. Supp 609, 617 (D. Haw. 1983) ("Generally, an accountant or auditor discharges his professional obligations by complying with industry standards, Generally Accepted Accounting Principles ... and Generally Accepted Auditing Standards"); *Shahmoon v. General Dev. Corp.*, [1973-1974 Transfer Binder] Fed. Sec. L. Rep. (CCH) P 94,308 (S.D.N.Y. 1973) (in dismissing Section 10(b) action, court stated that "[d]efendant's financial statements and accounting procedures cannot be considered fraudulent when they conform with generally accepted accounting procedures as that term is understood by at least a majority of accounting experts in the field and when the methods used are endorsed by the accounting profession as a whole"); *Escott v. BarChris Construction Corp.*, 283 F. Supp. 643, 703 (S.D.N.Y. 1968) (in action brought under Section 11 of the Securities Act, court stated that "[a]ccountants should not be held to a standard higher than that recognized in their profession").

(n76)Footnote 76. 590 F.2d 785 (9th Cir. 1979) .

(n77)Footnote 77. 590 F.2d at 788 .

(n78)Footnote 78. 590 F.2d at 788 .

(n79)Footnote 79. 31 F.3d 772 (9th Cir. 1994) .

(n80)Footnote 80. 31 F.3d at 774 .

(n81)Footnote 81. 425 F.2d 796 (2d Cir. 1969) . See also *Siemens Info. Sys., Inc. v. TPI Enter., Inc.*, 1992 U.S. Dist. LEXIS 3018, at *1 (S.D.N.Y., Mar. 12, 1992) .

(n82)Footnote 82. In *United States v. Simon*, the court upheld a jury charge that proof of compliance with generally accepted accounting principles was "evidence which may be very persuasive but not necessarily conclusive that he [the auditor] acted in *good faith*, and that the facts as certified were not materially false or misleading." 425 F.2d at 805-806 (emphasis added).

(n83)Footnote 83. 425 F.2d at 806 ; see also *Monroe v. Hughes*, 31 F. 3d 772, 774 (9th Cir. 1994) ("[C]ompliance with GAAP and GAAS do not immunize an accountant who consciously chooses not to disclose on a registration statement a known material fact"); *Siemens Information Systems, Inc. v. TPI Enterprises, Inc.*, [1991-1992 Transfer Binder] Fed. Sec. L. Rep (CCH) P 96,573 at 92,662 (S.D.N.Y. 1992) ("If Touche failed to disclose any suspicious practices uncovered during the course of its audit, ... it might conceivably be held liable for fraud even if the Financial Statements it certified required no technical adjustment under GAAP"); *In re Hawaii Corp.*, 567 F. Supp. 609, 617 (D. Haw. 1983) ("Compliance with GAAP and GAAS ... will not immunize an accountant when he consciously chooses not to disclose on a financial statement a known material fact").

As noted in the Introduction to this chapter, while serving as the SEC's Chairman, Harvey L. Pitt stated in a speech addressing the aftershocks of Enron's collapse that "literal compliance with GAAP" may not necessarily be sufficient to insulate an accountant from liability.

See also *United States v. Finnerty*, 533 F.3d 143, 150 (2d Cir. 2008) (affirming district court's order setting aside conviction because defendant made no deceptive statements).

(n94)Footnote 94. 152 F.3d 169 (2d Cir. 1998) , cert. denied, 525 U.S. 1104 (1999) .

(n95)Footnote 95. 152 F.3d at 175 .

(n96)Footnote 96. 152 F.3d at 172-175 (emphasis added). See also *Morrison v. Nat'l Austl. Bank Ltd.*, 2008 U.S. App. LEXIS 21986, at *26-27 (2d Cir. Oct. 23, 2008) (quotes Wright for the proposition that "[a]nything short of ... [making a false or misleading statement] is merely aiding and abetting, and no matter how substantial that aid may be, it is not enough to trigger liability under Section 10(b)"); *Lattanzio v. Deloitte & Touche LLP*, 476 F.3d 147, 156 (2d Cir. 2007) (Section 10(b) liability could not be imposed on accounting firm because misstatements contained in its client's interim financial statements could not be "attributed" to the firm).

(n97)Footnote 97. 252 F.3d 63 (2d Cir. 2001) .

(n98)Footnote 98. 252 F.3d at 75-76 . Earlier, in *SEC v. First Jersey Sec., Inc.*, 101 F.3d 1450 (2d Cir. 1996) , cert. denied, 522 U.S. 812 (1997) , the Second Circuit found primary liability against a person who had knowledge of the fraud and participated in the fraudulent scheme. The court stated, "primary liability may be imposed not only on persons who made fraudulent misrepresentations but also on those who had knowledge of the fraud and assisted in its perpetration." 101 F.3d at 1471 . However, this case appears to be sui generis because the individual defendant was the 100% stockholder in First Jersey and the court specifically found that he "orchestrated every facet of First Jersey's branch office network." 101 F.3d at 1472 .

(n99)Footnote 99. 322 F. Supp. 2d 319 (S.D.N.Y. 2004) .

(n100)Footnote 100. 322 F. Supp. 2d at 331 .

(n101)Footnote 101. 322 F. Supp. 2d at 333 (emphasis added). In providing the above guidance, the *Global Crossing* court used the "constructive" attribution rule espoused in *In re Lernout & Hauspie Sec. Litig.*, 230 F.Supp. 2d 152 (D. Mass. 2002) . In *Lernout*, the district court refused to dismiss investors' claims against an auditor where the defendant's role was both widely known to the public and where it was "appropriate to infer that ... investors reasonably attributed the statements" to the auditor. 230 F. Supp. 2d at 166-67 . The *Global Crossing* court noted that the rationale of *Lernout* "reconciles the Second Circuit's reasoning in [*In re Scholastic Corp.*] with the focus on reliance that was central to its holding in *Wright*." 230 F. Supp. 2d at 153.

(n102)Footnote 102. See 322 F. Supp. 2d at 333 .

(n103)Footnote 103. See 322 F.Supp.2d at 334 . In connection with attribution, the court also relied on Andersen's alleged aggressive marketing of certain novel accounting strategies which would "raise[] an inference that sophisticated investors would have known of Andersen's role in creating the reporting practices behind ... [*Global Crossing's*] false statements." Id.

(n104)Footnote 104. See also *Menkes v. Stolt-Nielsen, S.A.*, 2006 U.S. Dist. LEXIS 42644 * 23 (D. Conn. June 19, 2006) (holding that wholly-owned subsidiary and directors of the subsidiary could be held responsible under Section 10(a) for false or misleading statements attributed to parent holding company because parent was either "a mere conduit" for the subsidiary, through its directors, to carry out a fraud or "was a co-conspirator."); *SEC v. KPMG LLP*, 412 F. Supp. 2d 349 (S.D.N.Y. 2006) (refusing to dismiss plaintiff's claims against three individual defendants who served as engagement partners on the audits because they should be "deemed to have made the misstatements"); *In re Alstrom SA Sec. Litig.*, 406 F. Supp. 2d 433 (S.D.N.Y. 2005) (refusing to dismiss plaintiff's claims against a subsidiary because *Global Crossing* emphasizes a constructive attribution rule, which was satisfied because "it is plausible and

reasonable to infer that investors...implicitly relied on the financial information provided by the subsidiary itself"); see also 2005 U.S. Dist. LEXIS 39032 (S.D.N.Y. Dec. 28, 2005) ; *In re Van Der Moolen Holding N.V. Sec. Litig.*, 405 F. Supp. 2d 388 (S.D.N.Y. 2005) ; *Fields v. Merrill Lynch, Pierce, Fenner & Smith, Inc.*, 301 F. Supp. 2d 259, 2004 U.S. Dist. LEXIS 913 (S.D.N.Y., Jan. 27, 2004) ; *Teachers Ret. Sys. v. ACLN Ltd.*, 2004 U.S. Dist. LEXIS 25927 (S.D.N.Y., Dec. 27, 2004) . C.f. , *Schnall v. Annuity & Life Re (Holdings), Ltd.*, 2006 U.S. Dist. LEXIS 55439 , at **16-18 (D. Conn. Aug. 10, 2006) (finding that Section 10(b) claim against accounting firm did not satisfy Global Crossing's constructive attribution test because there was "no allegation that the public was 'aware' of KPMG US's alleged participation in the ANR audits"); *Jefferson Ins. Co. v. Rouhana (In re Winstar Communs.)*, 2006 U.S. Dist. LEXIS 7618 (S.D.N.Y., Feb. 27, 2006) (dismissing plaintiff's claims against auditor, finding that the auditor's review and approval of the company's unaudited quarterly reports did not rise to the level of Andersen's involvement in *Global Crossing*); *Pension Comm. of the Univ. of Montreal Pension Plan v. Banc of Am. Sec., LLC*, 446 F. Supp. 2d 163, 179, 182 (S.D.N.Y. 2006) .

Outside the Second Circuit, the court in *In re Mutual Funds Investment Litig.*, 384 F. Supp. 2d 845, 857-858 (D. Md. 2005) relied on *Global Crossing* when it upheld a complaint against trader defendants who "[were] alleged to have been involved in the fraudulent schemes from the outset and to have been at least one of the architects... [T]hese are not the activities of a mere aider and abettor but those of a primary participant in the unlawful conduct.").

In a different context, the Second Circuit broadened the scope of an accountant's potential liability for securities fraud when it held in *Overton v. Todman & Co.*, 478 F.3d 479 (2d Cir. 2007) , that an auditor can be found primarily liable under Section 10(b) if it violates its duty to correct a certified opinion that was false or misleading when made. Specifically, the *Todman* court determined that an auditor incurs such Section 10(b) liability if:

it (1) makes a statement in its certified opinion that is false or misleading when made; (2) subsequently learns or was reckless in not learning that the earlier statement was false or misleading; (3) knows or should know that potential investors are relying on the opinion and financial statements; yet (4) fails to take reasonable steps to correct or withdraw its opinion and/or the financial statements; and (5) all the other requirements for liability are satisfied.

Id. at 486-87 .

(n105)Footnote 105. *Anixter v. Home-Stake Prod. Co.*, 77 F.3d 1215 (10th Cir. 1996) . The claims against the defendant accountant were based both on the accountant's opinion letters on financial statements and assistance in preparing parts of prospectuses distributed to investors. The court found that for a secondary actor to violate Section 10(b), it must itself make a false or misleading statement that it knows or should know will reach potential investors. Merely giving aid to a person who commits securities fraud, in the form of assistance in drafting offering documents or in some other manner, no matter how significant, is nothing more than aiding and abetting and is insufficient after *Central Bank* to create Section 10(b) liability. See *id.* at 1225-6 . Here, the accountant was accused of making false statements himself (i.e., false opinion letters on financial statements), so his conduct was within the ambit of post - *Central Bank* § 10(b) primary liability. See also *Steed v. Warrior Capital, LLC*, 2007 U.S. Dist. LEXIS 27308 *15 (W.D. Okla. Apr. 11, 2007) (dismissing Section 10(b) claim against lawyer and law firm for allegedly assisting a corporate client in fraudulent conduct because "[p]laintiffs have not alleged that lawyer and law firm made any statements at all to plaintiffs or that lawyer and law firm engaged in any manipulative or deceptive acts on which plaintiffs relied"); *Stichting Pensioenfonds, ABP v. Qwest Communs. Int'l, Inc.*, 2005 U.S. Dist. LEXIS 9026, at *32-33 (D. Colo., Mar. 28, 2005) (dismissing 10b-5(b) claim against accountants "to the extent that claim is based on allegations that [the accountants] participated in a scheme or artifice to defraud by providing substantial assistance to the representations of others").

(n106)Footnote 106. *Ziemba v. Cascade Int'l, Inc.*, 256 F.3d 1194, 1205 (11th Cir. 2001) ("Following the Second Circuit, we conclude that, in light of *Central Bank*, in order for the defendant to be primarily liable under Section 10(b)

and *Rule 10b-5*, the alleged misstatement or omission upon which a plaintiff relied must have been publicly attributable to the defendant at the time that the plaintiff's investment decision was made"). See also *SEC v. Dauplaise*, 2006 U.S. Dist. LEXIS 9589, at *18-22 (M.D. Fla., Feb. 22, 2006) (finding that SEC stated a claim for primary liability against directors because "one can infer from these allegations that [the directors] w[ere] responsible for the misrepresentations and omissions [contained in] a deceptive Form 8-K").

(n107)Footnote 107. *In re Kendall Square Research Corp. Sec. Litig.*, 868 F. Supp. 26 (D. Mass. 1994) . The court decided that an accountant's role in reviewing and approving quarterly financial statements and prospectuses does not constitute the making of a material misstatement and, therefore, does not establish a primary violation. 868 F. Supp. at 28 . According to the court, the misstatements were attributable only to the client: "Because ... [the accounting firm] did not actually engage in the reporting of the financial statements and Prospectuses, but merely reviewed and approved them, the statements are not attributable to ... [the firm] and thus ... [it] cannot be found liable for making a material misstatement." 868 F. Supp. at 28 .

(n108)Footnote 108. Although the district court in *SEC v. Lucent Techs., Inc.*, 363 F. Supp. 2d 708, 722 (D.N.J. 2005) , acknowledged that the Third Circuit has yet to definitively decide which test should be applied to determine Section 10(b) secondary actor liability, it employed the "bright line" test when it dismissed the SEC's primary liability claim against a corporate finance director because the claimed financial misstatement was "not alleged to have been made by ... [her] and was "not directly attributed to her." In this regard, the court noted that while the bright-line test "is more closely aligned with the language of Section 10(b) and *Rule 10b-5*, thereby limiting the scope of actors who can be primarily liable, the adoption of this test does not mean that those who fall outside this net will escape punishment as the SEC readily can bring an aiding and abetting action against such actors." *Id.* at 724 .

In re Ikon Office Solutions, Inc. Sec. Litig., 131 F. Supp. 2d 680 (E.D. Pa. 2001) , *aff'd on other grounds*, 277 F.3d 658 (3d Cir. 2002) . Relying on Second Circuit authority, the court declined to hold an accounting firm potentially liable for a primary violation of Section 10(b) where the firm approved an audit client's press release concerning its financial status, but the press release did not mention the defendant accountant or refer to an audit. 131 F. Supp. 2d at 685 n.5 . See also *In re Royal Dutch/Shell Transp. Sec. Litig.*, 380 F. Supp. 2d 509, 559 (D.N.J. 2005) ("allegations that [directors] participated in meetings and conferences in which material misrepresentations were made are insufficient to survive the instant motion to dismiss"); *In re Rent-Way Secs. Litig.*, 209 F. Supp. 2d 493, 501-05 (W.D. Pa. 2002) (court found that *Central Bank* precluded holding accountant liable under Section 10(b) based on its alleged review and approval of client's unaudited quarterly reports); *Copland v. Grumet*, 88 F. Supp. 2d 326, 332-3 (D.N.J. 1999) (Based on Second Circuit law, court found conduct of defendants to be insufficient to hold them liable as primary violations under Section 10(b)).

In *Klein v. Boyd*, 1998 U.S. App. LEXIS 2004 (3d Cir. 1998), *rehearing en banc granted, judgment vacated*, 1998 U.S. App. LEXIS 4121 (3d Cir. 1998), a panel of the Third Circuit apparently rejected the "bright line" test when it found that a law firm which allegedly participated in the creation of misleading documents for distribution to investors could be liable as a primary violator under Section 10(b) even though the attorneys did not sign those documents and the investors did not know that the attorneys had participated in the documents' creation. However, the Third Circuit vacated the foregoing panel decision when it granted a rehearing *en banc*. The case was settled before the Third Circuit could conduct its *en banc* review.

(n109)Footnote 109. *SEC v. Wolfson*, 539 F.3d 1249, 1259 (10th Cir. 2008) . In the *Wolfson* case, the Tenth Circuit expressly held that the "attribution requirement" does *not* apply to SEC enforcement actions because imposing such a requirement "directly conflicts with our jurisprudence recognizing that the SEC need not plead and prove reliance in a § 10(b) case." *Id.* at 1259-60 . As previously noted, to the extent courts have adopted an "attribution requirement," it arises from the need for plaintiffs in private litigation to prove reliance on an alleged fraud.

(n110)Footnote 110. *McGann v. Ernst & Young*, 102 F.3d 390 (9th Cir. 1996) , *cert. denied*, 117 S. Ct. 1460 (1997) . A securities fraud claim brought against accountants based upon the preparation of an audit report containing

allegedly false information. In this case, the accountants knew that the financial statements would be filed with the SEC as part of the issuer's annual 10-K report. The Ninth Circuit held that *Central Bank* did not preclude finding the accounting firm primarily liable. The accounting firm's false statements were made in a manner reasonably calculated to influence the investing public and were therefore made "in connection with" the purchase or sale of securities as required under § 10(b). The accounting firm petitioned the Supreme Court for certiorari on the grounds that primary liability should be limited to those who trade in securities. The petition was denied.

In re Software Toolworks Inc. Sec. Litig., 50 F.3d 615 (9th Cir. 1994) . The Ninth Circuit reversed (in part) the district court's grant of summary judgment in favor of an underwriter and accountant where certain claims were premised on the defendants' "direct participation" in drafting offering documents which contained allegedly fraudulent representations. See 50 F.3d at 625 . The underwriters were potentially liable for having participated in the preparation of an allegedly false letter sent to the SEC and knew or should have known of the alleged fraud in quarterly financial statements. The accountants' participation in the drafting of two letters that Toolworks, Inc. sent to the SEC, was "sufficient to sustain a primary cause of action under § 10(b) and, as a result, *Central Bank* does not absolve Deloitte on these issues." 50 F.3d at 628 n.3 . See also *Howard v. Everex Systems, Inc.*, 228 F.3d 1057, 1061 n.5 (9th Cir. 2000) ("substantial participation or intricate involvement in the preparation of fraudulent statements is grounds for primary liability even though that participation might not lead to the actor's actual making of the statements") (citing *In re Software Toolworks*); *In re Maxim Integrated Prods.*, 2008 U.S. Dist. LEXIS 69527, at *29 (N.D. Cal. August 27, 2008) (citing *Howard*, court reaffirms continuing validity of "substantial participation" test in district courts within Ninth Circuit).

In re ZZZZ Best Sec. Litig., 864 F. Supp. 960 (C.D. Cal. 1994) ("Z Best"). Ernst & Young ("E&Y") was alleged to have taken part in a fraud committed by Z Best by releasing a review report on first quarter interim financial information, which was included in an offering prospectus. The report stated, "we are not aware of any material modifications that should be made to the consolidated interim financial statements referred to above for them to be in conformity with GAAP." 864 F. Supp. at 963 . E&Y allegedly knew that there were major discrepancies in Z Best's internal accounting procedures and that the figures released by Z Best were not accurate. Thus, E&Y allegedly knowingly engaged in a fraudulent scheme resulting in the issuance of the review report which contained misrepresentations and/or omissions that directly affected the purchase or sale of securities in violation of § 10(b). The plaintiffs also alleged E&Y took part in the fraud through its involvement in the creation, review or issuance of other publicly released statements like press releases, a 10-Q and 8-K form and through its failure to make certain disclosures, such as failing to reveal or correct misrepresentations in public statements and failing to disclose that it knew or believed that at least some of Z's Best business was a sham. E&Y moved for summary judgment, claiming that all the allegations other than those regarding the review report were eliminated by *Central Bank*. The court emphasized that, "[i]t is also well settled that '[a] plaintiff must show reliance on the defendant's misstatement or omission to recover under 10b-5;' " 864 F. Supp. at 968 . The court then found that an accountant may be liable for a violation of Section 10(b) if its "participation in the misrepresentation is direct and if it knows or is reckless in not knowing that the facts reported in the prospectus materially misrepresent the condition of the issuer." 864 F. Supp. at 970 (quoting *SEC v. Seaboard*, 677 F.2d 1301 (9th Cir. 1982)) . See also *In re Broadcom Corp. Secs. Litig.*, 2004 U.S. Dist. LEXIS 28090, *4 (C.D. Cal., Nov. 23, 2004) (court refused to award defendant director summary judgment because his review and approval of press releases and SEC filings before they were released rose to "substantial participation").

(n111)Footnote 111. *Cashman v. Coopers & Lybrand*, 877 F. Supp. 425 (N.D. Ill. 1995) . Accountants who advised a company regarding restructuring its business and were "centrally involved" in the drafting and preparation of a prospectus and other promotional material were found primarily liable. The complaint charged that the accountants knew that their representations would be reflected in statements in the prospectus and that these representations would induce the investors' decisions. See 877 F. Supp. at 433 . See also *SEC v. Church Extension of The Church of God*, 2005 U.S. Dist. LEXIS 34510 (S.D. Ind., December 9, 2005) .

In *McNamara v. Bre-X Minerals, Ltd.*, 57 F.Supp. 2d 396, 429-30 (E.D. Tex. 1999) , the court appeared to state that

primary Section 10(a) liability can be imposed on secondary actors under either the "bright line" or the "substantial participation" test.

(n122)Footnote 122. 322 F. Supp. 2d 319 (S.D.N.Y. 2004) .

(n123)Footnote 123. 322 F. Supp. 2d at 336 .

(n124)Footnote 124. 322 F. Supp. 2d at 346-347 (emphasis added). See WM High Yield Fund v. O'Hanlon, 2005 U.S. Dist. LEXIS 12064 (E.D. Pa., May 16, 2005) (finding that plaintiffs had alleged actionable claims against accountants and other defendants on the basis of Rule 10b-5(a) and (c) liability). See also In re Parmalat Sec. Litig., 376 F. Supp.2d 472 (S.D.N.Y. 2005) ; Quaak v. Dexia S.A., 357 F. Supp. 2d 330 (D. Mass. 2005) ; In re Salomon Analyst AT&T Litigation, 350 F. Supp. 2d 455 (S.D.N.Y. 2004) ; Filler v. Lernout (In re Lernout & Hauspie Sec. Litig.),

236 F. Supp. 2d 161 (D. Mass. 2003) ; *In re Enron Corp. Secs., Derivative & ERISA Litig.*, 235 F. Supp. 2d 549 (S.D. Texas 2002) .

Although the prohibition on private aiding and abetting claims imposed by *Central Bank* does not apply to the SEC, the SEC has also relied on *Rule 10b-5(a)* and *(c)* in cases in which it sought to establish *primary* liability on the part of a secondary act. For example, in *SEC v. U.S. Environmental, Inc.*, 155 F.3d 107 (2d Cir. 1998) , *cert. denied*, 526 U.S. 1111 (1999) , the Second Circuit held that the SEC had an actionable claim for primary liability under subsections (a) and (c) against defendant, a registered trader, "for following a stock promoter's directive to execute stock trades that ... [he] knew, or was reckless in not knowing, were manipulative, even if ... [he] did not share the promoter's specific overall purpose to manipulate the market for that stock." *Id.* at 108. In deciding this case, the court stated that "[w]e have noted further that a primary violator is one who 'participated in the fraudulent scheme' or other activity proscribed by the securities laws." *Id.* at 111 [citing *SEC v. First Jersey Sec., Inc.*, 101 F.3d 1450, 1471 (2d Cir. 1996)] . While the foregoing statement was made in a "manipulation" case (rather than a "misrepresentation" case), at least one district court suggested that the Second Circuit, as a general matter, "permit[ed] plaintiffs to allege 'participation in' a securities fraud scheme as one manner in which a plaintiff may state a claim under § 10(b) and *Rule 10b-5*." *Rich v. Maidstone Fin., Inc.*, 2002 U.S. Dist. LEXIS 24510, at *23 (S.D.N.Y., Dec. 19, 2002) .

(n125)Footnote 125. ____ U.S. ____, 128 S. Ct. 761 (2008) .

(n126)Footnote 126. *Id.* at 769 . In addition to stressing that defendants' alleged deceptive acts were not communicated to the public, the Court noted that defendants did *not* have a duty under the securities laws to make any public disclosures concerning those matters. *Id.* at 769 .

(n127)Footnote 127. *Id.*

(n128)Footnote 128. *Id.* at 770 . According to the Supreme Court, Section 10(b) liability is not necessarily foreclosed by the absence of "a specific oral or written statement," if the plaintiff relied to its detriment on some other "conduct" of the defendant. *Id.*

(n129)Footnote 129. *Id.* at 770 .

(n130)Footnote 130. *Id.* at 770 .

(n131)Footnote 131. *Id.* at 770 . The conduct required by secondary actors to incur Section 10(b) primary liability is discussed at § 5A.07[5][a]-[c], *supra*.

(n132)Footnote 132. *Id.* at 771 .

(n133)Footnote 133. *Id.* at 772 .

(n134)Footnote 134. *See also* *Avis Budget Group, Inc. v. California State Teachers' Retirement System*, ____ U.S. ____, 128 S. Ct. 1119 (2008) , *granting cert. and vacating judgment*, *Simpson v. AOL Time Warner*, 452 F.3d 1040 (9th Cir. 2006) (remanding action in which Ninth Circuit held that a defendant can be liable as a primary violator of *Rule 10b-5* for participation in a "scheme to defraud" for "further consideration in light of *Stoneridge* ...").

(n135)Footnote 135. *Id.* at 777 .

(n136)Footnote 136. *Id.* at 762 .

(n137)Footnote 137. *Univ. of Cal. v. Merrill Lynch*, 128 S. Ct. 1120, denying cert., 482 F.3d 372 (5th Cir. 2007).

(n138)Footnote 138. 15 U.S.C. § 78u-4(f)(2)(a)(1997 & Supp. 2008).

(n139)Footnote 139. The PSLRA defines a "knowing violation" as one in which a "covered person makes an untrue statement of a material fact, with actual knowledge that the representation is false, or omits to state a fact necessary in order to make the statement made not misleading, with actual knowledge that, as a result of the omission, one of the material representations of the covered person is false; and persons are likely to reasonably rely on that misrepresentation or omission." 15 U.S.C. § 78u-4(f)(10)(A) (1997 & Supp. 2008). A "covered person" is defined as "(i) a defendant in any private action arising under this chapter; or (ii) a defendant in any private action arising under section 77k of this title, who is an outside director of the issuer of the securities that are the subject of this action." *Id.* at § 78u-4(f) (1997 & Supp. 2008).

(n140)Footnote 140. 15 U.S.C. § 78u-4(f) (1997 & Supp. 2008). At least one court has held that this provision of the PSLRA also applies to partial settlements of claims brought under Section 11 of the Securities Act. *See In re Worldcom, Inc. Sec. Litig.*, 2005 U.S. Dist. LEXIS 1805, at *32-45 (S.D.N.Y., Feb. 9, 2005) .

CHAPTER 5A Accountants' Liability Under the Federal Securities Laws

1-5A Federal Securities Exchange Act of 1934 § 5A.08

AUTHOR: Marvin G. Pickholz Elliot Cohen Robert M. Carmen

§ 5A.08 Section 10A: New Audit Requirements and Limitation on Auditor Liability

In enacting the PSLRA, Congress added Section 10A to the Exchange Act, which imposes significant new requirements on the accounting profession, including searching out fraud and reporting certain wrongdoing to the SEC.

Under Section 10A, auditors are now required to devise audit procedures "to provide reasonable assurance of detecting illegal acts n1 that would have a direct and material effect on the determination of financial statement amounts" and "procedures designed to identify related party transactions that are material to the financial statements, *or otherwise require disclosure*" n2

The Congress then created a "required response" by auditors to audit discoveries which not only raised the expectational bar for auditors, but imposed upon them requirements to make legal judgments, for which they are not suited by training. Thus, Section 10A(b)(1) provides:

(b) Required Response to Audit Discoveries.

(1) Investigation and Report to Management. If, in the course of conducting an audit pursuant to this title to which subsection (a) applies, the independent public accountant detects or otherwise becomes aware of information *indicating* that an illegal act (whether or not perceived to have a *material effect* on the financial statements of the issuer) has or *may have* occurred, the accountant *shall*, in accordance with generally accepted auditing standards, as may be modified or supplemented from time to time by the Commission --

(A)(i) determine whether it is likely that an illegal act has occurred; and

(ii) if so, determine and consider the *possible effect* of the illegal act on the financial statements of the issuer, including any *contingent monetary effects*, such as *finances, penalties, and damages*. n3

The foregoing leaves open questions such as what degree of information is required to reach the level of "indicating?" Is an unsupported statement adequate? How does the accountant "determine" if it is likely an *illegal act* occurred since "illegal acts" in a corporate context may be masked as proper business activities? How does the accountant determine if

the act is "illegal" when, in many cases, illegality turns on motives and objectives not readily discernible? Worse from the accountants perspective is 10A(b)(A)(ii), quoted above. Not only must the auditor determine if an illegal act occurred, but it must engage in prophesying what the "contingent" prospects are for fines, penalties and damages. This may involve numerous jurisdictions, governmental or quasi-governmental bodies, licensing standards and issues of who might sue the issuer, where and, then, the standards applicable in that jurisdiction.

Section 10A then instructs the auditor:

(B) as soon as practicable, inform the appropriate level of the management of the issuer and assure that the audit committee of the issuer, or the board of directors of the issuer in the absence of such a committee, is adequately informed with respect to illegal acts that have been detected or have otherwise come to the attention of such accountant in the course of the audit, *unless the illegal act is clearly inconsequential*. n4

In light of the above references to the phrases "material" and "whether or not perceived to have a material effect on the financial statements," the meaning of the phrase "unless the illegal act is clearly *inconsequential*" introduces another concept, without benefit of an articulated standard. Is "inconsequential" to be construed by a monetary materiality standard, or the non-monetary *consequentially* standard? What "illegal acts" are inconsequential? Need they relate only to the company? What if the "consequence" is the loss of an executive? Must the auditor determine the importance of the executive to the audit client internally and externally in customer relations? What is the length of time needed to replace the executive?

Section 10A then reintroduces the concept of "materiality" in a confusing manner and one which raises more questions.

(2) Response to Failure to Take Remedial Action. If, *after* determining that the *audit committee of the board of directors of the issuer, or the board of directors of the issuer* in the absence of an audit committee, is adequately informed with respect to illegal acts that have been detected or have otherwise come to the attention of the accountant in the course of the audit of such accountant, the independent *public accountant concludes that-*

(A) the illegal act *has a material effect* on the financial statements of the issuer;

(B) the senior management has not taken, and the board of directors has not caused senior management to take, timely and appropriate remedial actions with respect to the illegal act; and

(C) the failure to take remedial action is reasonably expected to warrant departure from a standard report of the auditor, when made, or warrant resignation from the audit engagement;

the independent public accountant *shall*, as soon as practicable, *directly report its conclusions to the board of directors*. n5

In other words, is the auditor required to make a "materiality" judgment only *after* telling the audit committee or the board of directors? Is that judgment to be made independently or may the auditor rely on the company or its counsel? Does reference here to "material effects on the financial statements of the issuer" create a different standard and duty than was set forth in Section 10A(a)? Are these two provisions of Section 10A to be read as a progression, a continuum of what is to occur or separately with separate standards and duties? Which "conclusions" is the auditor to report? Those relating to "material effects" on the financial statements? Those illegal acts which may have occurred, without regard to the financial materiality of them?

Section 10A then states that an issuer who receives a report under Section 10A(b)(2) shall inform the SEC within one business day after receipt of the report and provide a copy of the notice to the auditor. Absent receipt of such a report from the company, within one business day thereafter, the independent accountant shall resign the engagement *or* furnish all its information and documents to the SEC. n6

In exchange for all the foregoing, the independent accountant is granted "auditor limited liability" n7 by absolving the auditor from liability in a *private* action -- but not in an action by the SEC or other governmental body -- for any finding, conclusion or statement in the report. Put otherwise, if the independent auditor "blows the whistle," even if erroneously, it will avoid suit from the company and private claimants. On the other hand, a wilful failure by the accounting firm to comply with applicable reporting requirements may lead to adverse action by the SEC, including the imposition of civil penalties. n8

To enforce compliance with Section 10A, the SEC has instituted various administrative and civil proceedings against accountants based on their alleged failure to satisfy responsibilities established by the statute. Illustratively, in *SEC v. Chancellor Corp.*, n9 the Commission sued an accounting firm (and an engagement partner) under Section 10A claiming that defendants learned during their audits of Chancellor Corporation ("Chancellor") that it was likely that Chancellor had fabricated corporate documents, but failed to properly report this circumstance to Chancellor's audit committee or take other steps called for by Section 10A. The relief sought by the SEC against defendant accountants included (i) entry of a permanent injunction prohibiting future violations of Section 10A, (ii) disgorgement of fees received for their audits of Chancellor and (iii) civil monetary penalties. n10

In *SEC v. Solucorp Industries Ltd.*, n11 a court in the Southern District of New York held that scienter is not needed to find an auditor liable under Section 10A. In the *Solucorp* case, the SEC contended that a defendant accountant (i) became aware while conducting an audit of information indicating that his client had backdated a license agreement for the purpose of improperly recognizing license fees in violation of GAAP and (ii) failed to satisfy his Section 10A obligations to (a) adequately investigate whether an illegal act had occurred, (b) notify management and (c) assure that the audit committee was apprised of his concerns. The accountant moved for summary judgment on the grounds that the SEC failed to allege facts which showed that he had actual knowledge of or recklessly disregarded the existence of any illegal acts. Based on the language of Section 10A, the court determined that an auditor need not "become aware of illegal acts" in order for the statute to apply and that an auditor is subject to 10A requirements "upon acquiring knowledge of information *indicating* that an illegal act *may* have occurred." n12

In an enforcement proceeding instituted by the PCAOB n13, an accounting firm consented to an order of censure based on the PCAOB's finding that the firm violated Section 10A(b)(2) "in failing to take prompt and appropriate steps in response to indications that an issuer audit client may have committed an illegal act." n14

In particular, the PCAOB made the following findings (among others) in the above matter:

- On January 13, 2004 Respondent accounting firm learned that its client had "filed an unauthorized audit report [with the SEC] falsely representing that ... [its] FY 2003 financial statement had been audited by Respondent." The accounting firm knew that its client's "apparently illegal act had a material effect on ... [the client's] financial statements."

- On the same day, the accounting firm notified its client's management and a member of the company's board of directors that its audit was incomplete and that it had not given the company permission to use its name in connection with the financial statements included in the company's SEC filing.

- During the following 15 weeks, the accounting firm was aware that its client's management failed to

take appropriate remedial actions, *but the firm took no further steps in response to that failure.*

■ After 15 weeks, when it was prompted by the prospect of an imminent PCAOB inspection, the accounting firm advised its client (among other things) that it should notify the SEC of the above situation. On May 4, 2004, the client made disclosures to the SEC.

The PCAOB concluded that the accounting firm violated Section 10A(b)(2) by failing to directly report its client's "apparently illegal act" to the company's board of directors "*as soon as practicable.*" n15

FOOTNOTES:

(n1)Footnote 1. "Illegal acts" are defined to mean "an act or omission that violates *any* law, or *any* rule or regulation having the force of law." Section 10A(f) (emphasis added). This can be read to require auditors to know every law, rule and regulation in every country, state, county or the equivalent where the client operates, and every regulatory statute, rule, regulation or interpretative memorandum issued by any regulatory organization, worldwide, that has an oversight function for the audit client.

(n2)Footnote 2. Section 10A(a)(1)-(2) (emphasis added).

(n3)Footnote 3. Emphasis added.

(n4)Footnote 4. Section 10(A)(b)(1)(B) (emphasis added).

(n5)Footnote 5. Section 10A(b)(2) (emphasis added).

(n6)Footnote 6. Section 10A(b)(3).

(n7)Footnote 7. Section 10A(c).

(n8)Footnote 8. Section 10A(d).

(n9)Footnote 9. No. 03-10762 MEL (D. Mass. 2003), *available at* www.sec.gov/litigation/complaints/comp18104.htm.

(n10)Footnote 10. The matter was subsequently settled. In addition, in an administrative cease and desist proceeding, *In re Rossetti & Yonkers*, Administrative Release 34-43497, *available at* <http://www.sec.gov/litigation/admin/34-43497.htm> (Oct. 31, 2000), the SEC alleged that two accountants discovered fraud in a client's quarterly financial statements, but failed to notify the company's management and board of directors in violation of Section 10A. Pursuant to a settlement, both accountants were ordered to cease and desist from further Section 10A violations and barred from appearing or practicing before the SEC for one and three years, respectively.

Several complaints filed by the SEC under Section 10A may be found *at* <http://www.sec.gov> by conducting a search under the litigation tab for "Section 10A."

(n11)Footnote 11. *197 F. Supp. 2d 4 (S.D.N.Y. 2002)* .

(n12)Footnote 12. *197 F. Supp. 2d at 10* (footnote omitted) (emphasis supplied). The court noted that requiring an auditor to be *aware* of illegal actions before applying Section 10A would be inconsistent with the requirement that an auditor must determine whether "it is likely that an illegal act has occurred" after it acquires information indicating that such an act may have occurred. *197 F. Supp. 2d at 10* .

Since the SEC alleged that the defendant accountant had *actual* knowledge indicating that an illegal act may have occurred, the court did not consider whether negligence and/or recklessness would similarly satisfy Section 10A.

(n13)Footnote 13. The functions of the PCAOB (including its enforcement powers) are addressed in detail at § 5A.09, *infra* .

(n14)Footnote 14. *Order Instituting Disciplinary Proceedings, Making Findings and Imposing Sanctions*, PCAOB Release No. 2006-002 (April 18, 2006). In agreeing to settle the disciplinary proceeding brought against it, the firm neither admitted nor denied the findings of the PCAOB (except as to the PCAOB's jurisdiction over it and the subject matter of the proceedings, which was admitted). *Id.*

CHAPTER 5A Accountants' Liability Under the Federal Securities Laws

1-5A Federal Securities Exchange Act of 1934 § 5A.09

AUTHOR: Marvin G. Pickholz Elliot Cohen Robert M. Carmen

§ 5A.09 Provisions of the Sarbanes-Oxley Act of 2002 Pertaining to the Audit of Public Companies

[1] Enactment of the Sarbanes-Oxley Act of 2002

As noted in the Introduction to this chapter, in July 2002, in reaction to the collapse of Enron Corp. and other high level corporate failures, the Sarbanes-Oxley Act n1 was enacted in an effort to increase the regulatory oversight of financial statements and accountants. n2 Among other things, the Sarbanes-Oxley Act establishes a new regulatory body for accountants who audit public companies, increases criminal penalties for violations of securities and related laws, and imposes far-reaching requirements on public companies, their officers and directors.

This section focuses on certain provisions of the Sarbanes-Oxley Act that particularly pertain to accountants.

[2] The Public Company Accounting Oversight Board

The Sarbanes-Oxley Act established the Public Company Accounting Oversight Board ("PCAOB") whose functions include the registration, monitoring and discipline of independent accounting firms in connection with their audits of public companies. As of October 22, 2003, accounting firms must be registered with the PCAOB prior to preparing or issuing an audit report with respect to a public company or playing a substantial role in the preparation or furnishing of such a report. n3

As indicated in PCAOB Rule 2106(a), "the Board will approve applications consistent with its responsibilities under the Sarbanes-Oxley Act ... to protect investors and to further the public's interest in the preparation of informative, accurate and independent audit reports." n4 An accounting firm which receives written notice from the PCAOB that its registration application has not been approved may request (i) a hearing before the PCAOB followed by review by the SEC if the hearing does not result in approval of the application or (ii) immediate SEC review of the PCAOB's decision to deny registration. n5

Applications to register require a substantial amount of information about the accounting firm's recent history relating to public company audit clients, including:

- The name of each public company audit client.

- Disclosure of the fees received from each public company audit client for audit services, other accounting services and non-accounting services.
- A statement of the firm's quality control policies for its auditing and accounting practices.
- Information about criminal, civil, administrative or disciplinary proceedings against the applicant or its associated persons.
- A listing of filings disclosing the firm's accounting disagreements with public company audit clients.
- Information about each accountant at the firm who participates in the preparation of audit reports.
- A consent of the firm to comply with PCAOB requests for testimony or documents and an agreement to secure a similar consent from each accountant as a condition of continued employment. n6

As of December 4, 2008, 1874 accounting firms are registered with the PCAOB. n7 Moreover, the PCAOB has issued 18 orders denying registration applications. n8

In addition to requiring registration of public accounting firms, the Sarbanes-Oxley Act provides that each such firm must submit an annual report to the PCAOB and may also be required to report more frequently to provide information specified by the PCAOB or the SEC. n9 In June 2008, the PCAOB adopted rules (and forms) to govern and facilitate this reporting requirement and to require, govern and facilitate special reporting of certain other information if certain specified events take place. n10

Among the above rules is a requirement that obligates an auditor to file a report with the PCAOB when it withdraws a prior audit report on financial statements and the issuer has failed to report this circumstance to the SEC. n11 In this regard, at the time this requirement was proposed, PCAOB member Charles D. Niemeier stated that "[t]he disclosure requirements only go to the issuer, but if the company doesn't say anything there's no mechanism for the auditor to file anything for the public to see. Now we create an obligation on the part of the accounting firm that relieves them of that awkward situation with a client." n12

[3] Interim and Permanent Professional Standards

[a] Interim Standards

As contemplated by Section 103 of the Sarbanes-Oxley Act, the PCAOB proposed certain interim professional standards to govern the conduct of registered public accounting firms, which were approved by the SEC. n13 These interim standards essentially adopted various standards previously established by the American Institute of Certified Public Accountants ("AICPA") and its Auditing Standards Board ("ASB"), n14 which relate to (i) auditing, n15 (ii) attestation engagements, n16 (iii) quality control, n17 (iv) ethics n18 and (v) independence. n19 The PCAOB has been taking what amounts to a "wait-and-see" approach before recommending to the SEC that any of these interim standards become permanent PCAOB standards. n20

On October 21, 2008, the PCAOB proposed seven new auditing standards, which would (i) supersede the Board's interim auditing standards related to audit risk and materiality, n21 audit planning and supervision, n22 consideration of internal control in an audit of financial statements, n23 audit evidence, n24 and performing tests of accounts and disclosures before year end n25 and (ii) update existing requirements for assessing and responding to risk during an audit. n26 As described by the PCAOB, the following is an "overview" of the proposed new risk assessment standards:

● **Audit Risk in an Audit of Financial Statements.** This proposal "describes the components of audit risk and the auditor's responsibilities for reducing audit risk to an appropriately low level in order to obtain reasonable assurance in an audit of financial statements."

● **Audit Planning and Supervision.** This proposal "describes the auditor's responsibilities for planning the audit, including assessing matters that are important to the audit, and establishing an appropriate audit strategy and audit plan. The proposed standard also describes the responsibilities of the engagement partner and other engagement team members for supervising and reviewing the work of the engagement team."

● **Identifying and Assessing Risks of Material Misstatement.** This proposal "describes the auditor's responsibilities for identifying and assessing risks of material misstatement. The risk assessment process discussed in the proposed standard includes information-gathering procedures to identify risks (e.g., obtaining an understanding of the company, its environment, and its internal control) and analysis of the identified risks."

● **The Auditor's Responses to the Risks of Material Misstatement.** This proposal "sets forth the auditor's responsibilities for responding to the risks of material misstatement, including overall responses related to the general conduct of the audit and responses involving specific audit procedures."

● **Evaluating Audit Results.** This proposal "describes the auditor's responsibilities regarding the process of evaluating the results of the audit in order to form the opinion(s) to be presented in the auditor's report. This process includes evaluating uncorrected misstatements and control deficiencies identified during the audit."

● **Consideration of Materiality in Planning and Performing an Audit.** This proposal "sets forth the auditor's responsibilities for applying the concept of materiality, as described by the federal securities laws, in planning the audit and determining the scope of the audit procedures."

● **Audit Evidence.** This proposal "sets forth the auditor's responsibilities regarding designing and applying audit procedures to obtain sufficient appropriate evidence to support the opinion(s) in the auditor's report. In particular, it discusses the principles for determining the sufficiency and appropriateness of audit evidence." n27

After the applicable comment period has closed, the Board will decide whether to take final action on the above proposed standards. Any such "final action" will be submitted to the SEC for approval. n28

[b] Permanent Standards

[i] Auditing Standard No. 1

In late 2003, the PCAOB adopted its first permanent professional standard, Auditing Standard No. 1, *References in Auditors' Reports to the Standards of the Public Company Accounting Oversight Board*, n29 which mandates that auditors' reports on engagements performed pursuant to standards of the PCAOB include the statement that the engagement was performed in accordance with PCAOB standards. In the past, auditors' reports were required to state that the engagement was performed in conformity with Generally Accepted Auditing Standards.

[ii] Auditing Standards No. 2 and 5

Under rules issued by the SEC pursuant to Section 404 of the Sarbanes-Oxley Act, each public company's annual report

must include an internal control report that (i) states that management is responsible for establishing and maintaining adequate internal controls and procedures for financial reports, (ii) identifies the "framework" that management used to conduct the required internal control evaluations, (iii) sets forth management's assessment of the effectiveness of the company's internal controls and identifies any "material weaknesses" in those controls, *and* (iv) includes a statement that the company's auditors have provided an attestation report relating to management's above assessment of internal controls. n30

With respect to the foregoing, Section 404 of the Sarbanes-Oxley Act expressly requires the company's auditors to attest to and report on management's assessment of the effectiveness of the company's internal controls. In March 2004, the PCAOB issued Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements* n31 to govern an auditor's review of internal controls. Later, in May 2007 the PCAOB adopted Auditing Standard No. 5, *An Audit of Internal Control Over Financial Reporting that is Integrated with an Audit of Financial Statements*, to replace Auditing Standard No. 2 as its controlling internal control auditing standard. n32

[A] Auditing Standard No. 2

As a general matter, Auditing Standard No. 2 stated that "the auditor must plan and perform the audit to obtain reasonable assurance about whether the company maintained, in all material respects, effective internal control over financial reporting as of the date specified in management's assessment." n33

On May 16, 2005, the PCAOB issued a policy statement relating to the implementation of Auditing Standard No. 2, n34 which stated, *inter alia*, that, to properly plan and perform an effective audit of internal controls, auditors should:

- **"integrate their audits** of internal control with their audits of the client's financial statements, **so that evidence gathered and tests conducted in the context of either audit contribute to completion of both audits;"**
- **"exercise judgment to tailor their audit plans to the risks facing individual audit clients**, instead of using standardized 'checklists' ..."
- **"use a top-down approach** that begins with company-level controls, to identify for further testing only those accounts and processes that are, in fact, relevant to internal control over financial reporting ...;"
- **"take advantage of the significant flexibility that the standard allows to use the work of others;"** and
- **"engage in direct and timely communication with audit clients** when those clients seek auditors' views on accounting or internal control issues before those clients make their own decisions on such issues, implement internal control processes under consideration, or finalize financial reports." n35

Based on its inspections (and other monitoring) relating to the initial year that Auditing Standard No. 2 was put into effect, the PCAOB issued a report on November 30, 2005 which identified the "most common reasons" why internal control audits were not as "effective or efficient" as the PCAOB expected them to be in the future. n36 As the audits selected for inspection by the PCAOB were conducted (and most were completed) before issuance of the PCAOB's May 16, 2005 Policy Statement, many of the observations in the November 30, 2005 Report relate to matters addressed in that guidance. n37

Subsequently, based on Board inspections conducted in 2006 (and other monitoring), the PCAOB issued a report dated April 18, 2007 which assessed audit firms' second-year implementation of Auditing Standard No. 2. n38

According to the PCAOB, inspections conducted during 2006 n39 disclosed that progress had been achieved in enhancing the efficiency of audits of internal controls. n40 In addition, the PCAOB stated that firms had performed better in certain areas the Board had earlier addressed in its May 16, 2005 Policy Statement. n41 Nevertheless, the Board found room for improvement in those areas because (among other things) some auditors (a) failed to "fully integrate their audits," (b) did not "apply a top-down approach to testing controls," (iii) probably "expended more effort than necessary when testing controls for assertions that were lower risk" and (iv) could have more extensively "use[d] the work of others."

[B] Auditing Standard No. 5

As noted above, on May 25, 2007, the PCAOB adopted (and the SEC subsequently approved) Auditing Standard No. 5 to replace Auditing Standard No. 2 as the Board's controlling internal control auditing standard.

According to the PCAOB, its new internal control auditing standard resulted from its above monitoring of auditors' implementation of Auditing Standard No. 2, through, among other things, Board inspections of internal control audits. n42 While the PCAOB observed substantial benefits produced by audits conducted pursuant to Auditing Standard No. 2 (including, higher quality financial reporting), the Board noted that sometimes the effort involved appeared greater than what was needed to perform an effective audit. n43 Largely as a response to those observations, Auditing Standard No. 5 is specifically designed to achieve the following four objectives:

1. Focus the Internal Control Audit on The Most Important Matters: The Board's new standard focuses on the areas that create the greatest risk that a client's internal controls will not prevent or detect a material misstatement in its financial statements. For example, the new standard accomplishes this "by incorporating certain best practices designed to focus the scope of the audit on identifying material weaknesses in internal control, before they result in material misstatements of financial statements, such as in a top-down approach to planning the audit." The new standard also stresses the importance of auditing "higher risk areas, such as the financial close process and controls designated to present fraud by management." At the same time, this standard offers auditors a "range of alternatives for addressing lower risk areas, such as by more clearly demonstrating how to calibrate the nature, training and extent of testing based on risk, as well as how to incorporate knowledge accumulated in previous years' audits into the auditors' assessment of risk, as well as how to incorporate knowledge accumulated in previous years' audits."

2. Eliminate Procedures that are Unnecessary to Achieve the Intended Benefits: The PCAOB stated that it looked into every aspect of the internal control audit to ascertain whether Auditing Standard No. 2 encouraged audit firms to conduct procedures that are not required to obtain the intended benefit of the audit. Among other things, based on this examination, Auditing Standard No. 5 "does not include the previous standard's detailed requirements to evaluate management's own evaluation process and clarifies that an internal control audit does not require an opinion on the adequacy of management's process." In addition, Auditing Standard No. 5 "refocuses the multi-location direction on risk rather than coverage" by eliminating the requirement that auditors "test a 'large portion' of the company's operations or financial position."

3. Make the Audit Clearly Scalable to Fit the Size and Complexity of Any Company: In line with the PCAOB's ongoing effort to provide guidance for auditors of smaller, less complex issuers, Auditing Standard No. 5 explains how internal control audits can be tailored to fit the size and complexity of the issuer being audited.

4. Simplify the Text of the Standard: According to the PCAOB, its new standard is streamlined and easier to read. Among other things, the new standard, "eliminates the previous standard's discussion of materiality, thus clarifying that the auditor's evaluation of materiality for purposes of an internal control audit is based on the same long-standing principles applicable to financial statement audits." n44

[C] Costs Associated with Compliance With Section 404's Internal Control Requirements.

As compliance with Section 404's internal control requirements can be costly and time consuming, a heated debate has developed concerning whether small and medium-sized companies should be exempt from some or all of those provisions. In this regard, in April 2006 the SEC Advisory Committee on Smaller Public Companies (the "SEC Advisory Committee") formally proposed that companies with market caps (i) less than \$128 million be excused from having to report on their internal controlsⁿ⁴⁵ and (ii) \$128 million to \$787 million be required to issue such reports, but not be obligated to engage an outside auditor to attest to those reports.ⁿ⁴⁶ While proponents of such exemptions argued that Section 404's internal control provisions are too burdensome for smaller companies,ⁿ⁴⁷ opponents countered that smaller companies are more inclined to have internal control weaknesses that should be disclosed to investors.ⁿ⁴⁸

Subsequently, the argument made by smaller businesses that the cost of complying with Section 404 is prohibitive was potentially undercut by a study conducted by CRA International (and sponsored by the Big Four accounting firms) that found that the average costs of compliance for smaller companies (market caps of \$75 million to \$700 million) dropped almost 31% to \$860,000 in 2005, the second year that the new internal control rules were in force.ⁿ⁴⁹ For large companies (market caps greater than \$700 million), the study determined that average costs dropped 44% to \$4.8 million in 2005.ⁿ⁵⁰ According to CRA group vice president, Greg Bell, these costs dropped because companies better understood the Section 404 process in the second year and "a lot of ... start up costs didn't have to be repeated."ⁿ⁵¹

In addition, a research study conducted by Lord & Benoit LLC ("Lord & Benoit") (in conjunction with the online research firm Auditanalytics.com) provided further support for maintaining Section 404's requirements by disclosing that public companies that did not report internal control deficiencies in either 2004 or 2005 experienced an average share-price *gain* of 27.7% between March 31, 2004 and March 31, 2006 while those that reported deficiencies in 2004 and 2005 experienced an average share-price *decline* of 5.7%.ⁿ⁵² The Lord & Benoit study also revealed that companies that reported internal control deficiencies in 2004, but not in 2005, experienced an average share-price increase of 25.7%.ⁿ⁵³ Based on these findings, Robert Benoit (founder of Lord & Benoit) stated that "[t]he value of the increase in the internal controls more than offsets the outlay" needed to comply with Section 404.ⁿ⁵⁴

In May 2006, the SEC largely resolved the above debate concerning Section 404 (at least for the time being) by rejecting the exemptions previously proposed by its Advisory Committee.ⁿ⁵⁵ In addition, the SEC recently determined that smaller U.S. public companies (with caps of less than \$75 million), which have been excused from reporting on their internal controls, will be required to include such reports in their 2007 annual reports.ⁿ⁵⁶

On the other hand, in June 2007, in an effort to reduce Section 404 costs for companies of all sizes, while still preserving the benefits of Section 404, the SEC issued new guidance for management's required assessment under Section 404.ⁿ⁵⁷ Addressing the needs of "smaller" companies, SEC Chairman Christopher Cox stated that this guidance "was specifically written with smaller companies' unique control systems in mind. It encourages management to tailor their documentation and evaluation approaches to their particular business."ⁿ⁵⁸

In addition, on June 20, 2008, the SEC announced that "smaller" companies will *not* be subject to Section 404's audit requirements until issuance of their annual reports for fiscal years ending on or after December 15, 2009.ⁿ⁵⁹ On the same day, the SEC also stated that it would "proceed with data collection for a study of the costs and benefits of Section 404 implementation, focusing on the consequences for smaller companies and the effects of the Section 404 auditor attestation requirements."ⁿ⁶⁰ As stated by the SEC, this "cost-benefit study" will help determine whether recent management guidance provided by the Commission on evaluating internal controls over financial reporting and newly adopted Auditing Standards No. 5 "are having the intended effect of facilitating more cost-effective internal control evaluations and audits of smaller reporting companies."ⁿ⁶¹

The PCAOB continues to believe that the efficiencies contemplated by its adoption of Auditing Standard No. 5 (as a replacement for Auditing Standard No. 2) will make the internal audit process less costly, especially for smaller public

companies. In this regard, in October 2007, the PCAOB's staff published its preliminary guidance on how auditors can apply Auditing Standard No. 5 to audits of smaller companies and it devoted considerable attention to the provisions of that standard which provide direction to auditors on "scaling the audit" based on the company's size and complexity. n62

In the end, Congress may have the last word concerning Section 404's requirements as bills have been introduced in both houses to limit the cost of compliance. For example, proposed legislation would exempt many public companies; *i.e.*, any company with (i) a market value under \$700 million, (ii) product revenue less than \$125 million or (iii) less than 1,500 owners of record; from mandatory adherence to Section 404's audit requirements. n63

[iii] Auditing Standard No. 3

In June 2004, the PCAOB issued Auditing Standard No. 3, *Audit Documentation*, n64 which establishes general requirements for documentation which must be prepared and retained by auditors in connection with engagements conducted pursuant to PCAOB standards, including (i) audits of financial statements, (ii) audits of internal control over financial reporting and (iii) reviews of interim financial information. Among other important requirements of Auditing Standard No. 3:

- Audit documentation must be sufficient to (i) "demonstrate that the engagement complied with the standards of the PCAOB," (ii) "support the basis for the auditor's conclusions concerning every relevant financial statement assertion" and (iii) "demonstrate that the underlying accounting records agreed or reconciled with the financial statements."
- Audit documentation "must contain sufficient information to enable an experienced auditor, having no previous connection with the engagement ... [t]o [among other things] understand the nature, timing, extent, and results of the procedures performed, evidence obtained and conclusions reached." n65
- An auditor should consider the following factors when determining the nature and extent of the documentation for an assertion in the financial statements: (i) "nature of the auditing procedure," (ii) "risk of material misstatement associated with the assertion," (iii) "extent of judgment required in performing the work and evaluating the results, for example, accounting estimates require greater judgment and commensurately more extensive documentation," (iv) "significance of the evidence obtained to the assertion being tested," and (v) "responsibility to document a conclusion not readily determinable from the documentation of the procedures performed or evidence obtained."
- Audit documentation "must include information the auditor has identified relating to significant findings or issues that is inconsistent with or contradicts the auditor's final conclusions." n66

As a general matter, under Auditing Standard No. 3, the auditor must retain required "audit documentation" for seven years from the release date of the auditor's report in connection with the issuance of the company's financial statements. n67

Auditors must remember that in addition to Auditing Standard No. 3 they are subject to record retention requirements imposed by SEC rules that implement Section 802 of the Sarbanes-Oxley Act. Under these rules accounting firms must retain specified records relating to their audits or reviews of issuers' and registered investment companies' financial statements for seven years n68 after the completion of the audit or review of those financial statements. n69 In large measure, these record retention rules apply to workpapers and other documents that support the work performed during the audit or review, such as correspondence and other communications. n70 In addition, these rules obligate accountants to retain records that either support their final conclusions on such an engagement or that contain information about a significant accounting matter that is inconsistent with their final conclusion. For example, such documents would

address consultations on the resolution of differences in professional judgment. n71

On the other hand, the above SEC rules provide that non-substantive materials (such as administrative records and other documents that do not contain relevant financial data or the accountant's conclusions, opinions or analyses) do not have to be retained. n72 Accordingly, as clarified by the SEC staff, the following documents generally do not have to be retained: superseded drafts of memoranda, financial statements or regulatory filings, notes on those superseded drafts, previous copies of workpapers that have been corrected for typographical errors or errors due to the training of new employees, duplicates of documents, and voice-mail messages. n73 In addition, financial information, records, databases and reports that an accountant examines at the client's premises, but are not made part of the accountant's workpapers, do not have to be retained under the SEC's new rules. n74

While Auditing Standard No. 3 and the above SEC rules are similar in many respects, they are not co-extensive. n75 For example, according to PCAOB, the SEC obligates auditors to retain, *in addition to documentation required by Auditing Standard No. 3*, all "memoranda, correspondence, communications (for example, electronic mail), other documents and records (in the form of paper, electronic or other media) that are created, sent, or received in connection with an engagement conducted in accordance with auditing and related professional practice standards and that contain conclusions, opinions, analyses or data related to the engagement." n76 Accordingly, to avoid potential regulatory difficulties, auditors must carefully check that they have created and retained all documentation mandated by *both* the PCAOB and the SEC.

[iv] Auditing Standard No. 4

In July, 2005, the PCAOB issued Auditing Standard No. 4, *Reporting on Whether a Previously Reported Material Weakness Continues to Exist*, n77 which sets forth requirements for auditors who are retained to report on whether a material weakness in internal controls (previously described in an auditor's report issued pursuant to Auditing Standard No. 2), that management believes has been remediated, continues to exist. These engagements (i) are strictly voluntary and only performed at the election of management and (ii) do not have to be conducted in conjunction with any attestation services. n78

Under Auditing Standard No. 4, the form of the resulting auditor's report is generally an opinion on whether the previously reported material weakness continues to exist. However, if any limitations exist relating to the scope of the auditor's work, the auditor is barred from expressing any opinion. The above standard does not permit the issuance of a qualified opinion under any circumstances. n79

[v] Auditing Standard No. 5

Auditing Standard No. 5 was previously discussed at § 5A.09[3][b][ii].

[vi] Auditing Standard No. 6

In January 2008, the PCAOB announced its adoption of Auditing Standard No. 6, *Evaluating Consistency of Financial Statements* (and conforming amendments to the Board's interim auditing standards) n80. This new standard was approved by the SEC on September 16, 2008 and became effective on November 15, 2008. n81

Under Auditing Standard No. 6 auditors must evaluate the consistency of an issuer's financial statements and report any inconsistencies. n82 This new standard concentrates on the responsibilities of auditors concerning certain events that warrant recognition in their reports on financial statements, i.e., changes in accounting principles and corrections of misstatements in previously issued statements. n83 In addition, this standard makes it clear that auditors' reports must state whether an adjustment made to prior-period financials results from a change in accounting principle or the correction of a misstatement. n84

[4] Inspections, Investigations and Disciplinary Proceedings Conducted by the Public Company Accounting Oversight Board

Under Section 104 of the Sarbanes-Oxley Act, the PCAOB is required to regularly inspect each registered accounting firm to assess its compliance with the Sarbanes-Oxley Act and the PCAOB's rules. Firms that audit more than 100 public companies are inspected annually; other firms are inspected at least once every three years. n85 The inspection reports are made public, except that portions of the reports relating to defects in quality control systems are not made public if appropriate action is taken within 12 months to address the defect. n86

As stated by the PCAOB, "[w]hen audit deficiencies are identified after the date of the audit report, PCAOB standards require a firm to take appropriate actions to assess the importance of the deficiencies to the firm's present ability to support its previously expressed opinions, and failure to take such actions could be a basis for Board disciplinary sanctions." n87

[a] Summary of PCAOB Inspections

In 2003, the PCAOB commenced its inspection program with limited inspections of the four largest U.S. public accounting firms, Deloitte & Touche LLP ("Deloitte"), Ernst & Young LLP ("Ernst"), KPMG LLP ("KPMG") and PricewaterhouseCoopers LLP ("Pricewaterhouse"). n88 According to PCAOB member Daniel Goelzer, these first year inspections focused on the "tone at the top," the audit firm's mechanisms for evaluating, compensating and promoting professional employees, client acceptance and retention practices, internal training procedures and the effect of non-audit services (and other factors) on auditor independence. n89

On August 26, 2004, the PCAOB issued reports on the results of the limited inspections it conducted of the above four largest U.S. public accounting firms. Among other things, the public portion of these inspection reports n90 identified instances in which (i) financial statements of the firms' public clients did not appear to comply with GAAP and (ii) the firms' workpapers did not properly document the audit work which was performed. n91 Although these inspection reports focused on criticisms, then PCAOB Chairman William J. McDonough emphasized the positive aspects of the 2003 inspection program, as follows:

"As our reports state, their emphasis on criticisms do not reflect any broad negative assessment of the firms' audit practices. * * * The Board's inspections are unprecedented, and in this first year, our findings say more about the benefits of the robust, independent inspection process envisioned in the Sarbanes-Oxley Act of 2002 than they do about any infirmities in these firms' audit practices.

None of our findings has shaken our belief that these firms are capable of the highest quality auditing. * * * The Board is also encouraged by the firms' demonstrably cooperative attitude toward our inspections, which are designed to drive the firms to improve any aspects of their practices that may stand as impediments to the highest quality audit performance." n92

During 2004, the PCAOB conducted inspections of the eight largest U.S. public accounting firms and 91 smaller accounting firms which were based on those firms' 2003 audits. n93 In separate inspection reports on Deloitte, Ernst, KPMG and Pricewaterhouse, the PCAOB stated that "[i]n some cases, the deficiencies identified were of such significance that it appeared to the inspection team that the Firm had not, at the time it issued its audit report, obtained sufficient competent evidential matter to support its opinion on the issuer's financial statements. In some of these audits, that conclusion followed from the omission or insufficient performance of a simple procedure, while other audits included more than one such failure." n94 While each of these firms submitted individual responses that addressed criticisms specific to them, they all emphasized that they took the PCAOB's findings seriously and were committed to continued cooperation with the PCAOB. n95

In 2005, the PCAOB expanded its inspection program from 91 to approximately 300 smaller firms (as well as the eight largest firms). n96 Among other things, the "issues of continuing concern" disclosed by the PCAOB's 2005 inspections included "related party issues," "revenue recognition," "auditing of expenses" and "independence." n97

According to George Diacont, PCAOB director of registration and inspections, the PCAOB sought to concentrate in 2006 on inspections of larger small firms (i.e., multi-office firms with more partners) and (as in the past) firms that audit Fortune 500 companies. n98 In effecting this plan, the Board inspected the eight largest U.S. firms, the largest firm in Canada and 183 smaller firms. n99

During 2007, the Board conducted inspections of the nine largest U.S. firms, the largest firm in Canada and 226 smaller firms. n100

[b] Recent PCAOB Reports Based on Observations Made During Inspections

In a report dated January 22, 2007, the PCAOB addressed certain observations, made in the course of its inspections, concerning failures by some auditors to satisfy their responsibilities relating to the detection of fraud under existing Board audit standards (principally, AU § 316, *Consideration of Fraud in a Financial Statement Audit*). n101 According to the PCAOB, these observations are "sufficiently important or arise with sufficient frequency" to warrant reminding auditors about adherence to procedures relevant to their consideration of fraud. n102

At the outset, the PCAOB noted that under AU § 316 an auditor is required to plan and perform an audit to obtain reasonable assurance about whether the financial statements are free of material misstatements, including any caused by fraud. Accordingly, the auditor is obligated to assess risks and apply procedures directed specifically to the detection of a material fraudulent misstatement of its client's financial statements. n103

In the main body of its report, the PCAOB provided various examples of failures by audit firms to comply with AU § 316 that were observed by Board inspection teams, including (among others):

- In some cases, auditors failed to properly expand audit procedures after identifying specific fraud risk factors.
- On some engagements, audit teams failed to hold required "brainstorming sessions" during the planning stage of the audit to address fraud-related matters.
- Some auditors failed to investigate identified departures from GAAP in order to determine whether those departures were indicative of fraud.
- On occasion, auditors have not properly analyzed late adjustments proposed by management that significantly affect financial results and partially or completely offset adjustments previously proposed by the auditors.
- In some instances, it appears that auditors did not appropriately address the risk of management override of internal controls with respect to journal entries and accounting estimates.
- Some auditors failed to test the underlying data utilized in analytical procedures.
- In some situations, auditors who did not request confirmations of accounts receivable balances (or did not receive responses to positive confirmation requests) either failed to obtain, or failed to document that they had obtained, sufficient other evidence regarding the existence of those balances. n104

At the conclusion of its report, the PCAOB stated that it communicated quality control concerns to the audit firms at which the above deficiencies were identified. According to the report, those firms are responding to the Board's criticisms in a positive manner. n105

Subsequently, on October 22, 2007, the PCAOB issued a report that discusses audit areas where Board inspectors "observed significant or frequent deficiencies" during their inspections of smaller firms (i.e., those that audit no more than 100 issuers), which (as noted above) are subject to triennial Board inspections. n106 The observations in this report were identified during the course of the PCAOB's 2004, 2005 and 2006 inspections of domestic triennially inspected firms. n107

Specifically, in identifying audit areas of concern, the October 22, 2007 report stated that Board inspectors have (among other things):

- identified "deficiencies relating to firms' testing of *issuers' recognition of revenue*, including the firms' failure to (a) perform any or adequate substantive procedures to test the existence, completeness and valuation of revenue; (b) review representative contracts or appropriately evaluate the specific terms and provisions included in significant contractual arrangements; or (c) test whether revenue was recorded in the appropriate period,"
- observed "deficiencies related to firms' failures to identify and address the lack of disclosure of *related party transactions*. They also have identified deficiencies relating to the effectiveness of firms' testing of the nature, economic substance and business purpose of transactions with related parties."
- noted "instances where firms failed to test or insufficiently tested, the *accounting for equity transactions*, including evaluating the adequacy of the disclosure of these transactions in the notes to the financial statements."
- observed "that some firms failed to perform, or to perform adequately ... procedures" to "evaluate whether there is substantial doubt about ... *[an] entity's ability to continue as a going concern*"
- identified several ways in which firms have failed to comply with *independence requirements of the SEC and the Board*, especially with respect to prohibited non-audit services and improper agreements between an auditor and its issuer client that limit the auditor's potential liability n108

Notwithstanding the above deficiencies, the October 22, 2007 report also emphasized that the majority of the triennially inspected firms appreciate the feedback they obtained during the inspection process and are taking measures to enhance the quality of their audits. n109

In a report dated December 5, 2008, the PCAOB discussed various observations it identified during the course of its 2004, 2005, 2006 and 2007 inspections of the eight domestic accounting firms that have been inspected every year since the commencement of the Board's inspection program. n110 Among other things, based on its inspections, the report noted that the following "trends have emerged":

- Board inspections continue to uncover deficiencies in important audit areas including "critical and high-risk parts of audits, such as revenue, fair value, management's estimates, and the determination of materiality and audit scope." According to the PCAOB, "[i]n some cases, the deficiencies appeared to have been caused, at least in part, by the failure to apply an appropriate level of professional skepticism when conducting audit procedures and evaluating audit results."
- On the other hand, "[i]n certain well-established audit areas, such as the confirmation of accounts

receivable and the auditing of income tax accounts, the incidence of deficiencies encountered has declined." In addition, in some other areas, "such as the performance of analytical procedures, the nature of the deficiencies identified by inspectors has generally narrowed during the four year [inspection] period, with fewer of them relating to the overall failure to apply the governing standard and more relating to only one or a few aspects of the standard."

- In response to the Board's identification of quality control deficiencies during the inspection process, accounting firms "have changed their audit methodologies, processes or related quality control systems." In this regard, in remediation plans submitted to the Board, firms have described changes in "their structure, partner evaluation processes, internal inspection programs, procedures for using the work of foreign affiliates, and processes for compliance with independence standards." n111

Addressing the substance of the Board's December 5, 2008 report, George Diacont, PCAOB director of registration and inspections, stated:

While we are encouraged by the efforts of firms to remediate quality control deficiencies that we have observed, the report highlights the need for continued focus on performing high quality audits. Even in recent years, we are seeing deficiencies in the most important and high-risk areas of the audits, where appropriate levels of care and professional skepticism are needed. n112

[c] PCAOB Investigations and Disciplinary Proceedings n113

In addition to conducting inspections, the PCAOB has broad authority to investigate any act or practice, or omission to act, by a registered firm (or associated person) "that may violate any provision of ... [the Sarbanes-Oxley] Act, the rules of the Board, the provisions of the securities laws relating to the preparation and issuance of audit reports and the obligations and liabilities of accountants with respect thereto ... or professional standards." n114

In a PCAOB investigation, registered firms (and associated persons) may be required to produce documents and provide testimony and are subject to specified sanctions for noncooperation with the investigation. n115 While the PCAOB only has disciplinary authority over accountants, it is authorized to seek information from other persons, including clients of registered firms. n116

When the PCAOB detects violations of applicable law or standards, it may institute disciplinary proceedings against a registered firm (or an associated accountant). n117 Sanctions available to the PCAOB include:

- Temporary or permanent revocation of a firm's registration.
- Temporary or permanent bar of an individual from associating with a registered firm.
- Temporary or permanent limits on the activities of a firm or individual. n118
- Fines up to \$100,000 for individuals and \$2,000,000 for entities and up to \$750,000 and \$15,000,000, respectively, in the case of intentional or other knowing conduct.
- Censure.
- Additional education and training.
- Requiring a firm to engage an independent monitor to observe and report on the firm's compliance with applicable law and standards.

- Requiring a firm to engage counsel or another consultant to design policies to effectuate compliance with applicable law and standards.

- Requiring a firm to obtain an independent review and report on one or more audit engagements.

n119

Sanctions may also be imposed on an accounting firm for failure to supervise employees where the employee commits a violation of the federal securities laws or the rules of the PCAOB. n120

As of December 4, 2008, the PCAOB has issued nineteen disciplinary proceeding decisions which imposed sanctions on registered firms and associated persons. n121 Illustratively, in *In the Matter of Clyde Bailey, P.C., and Clyde B. Bailey, CPA*, n122 pursuant to offer of settlement, the PCAOB revoked the registration of an accounting firm and banned its sole shareholder from being an associated person of a registered firm after finding that they failed to exercise due professional care, exercise professional skepticism and obtain sufficient competent evidential manner in connection with audits they performed for certain public clients. n123 In particular, the PCAOB found (among other things) that respondents failed to perform audit procedures sufficient (i) to evaluate representations made by a client's management, (ii) to evaluate whether a client had engaged in material related party transactions and (iii) to assess the valuation of marketable securities held by a client. n124

[5] Pre-approval of Audit and Non-Audit Services by Audit Committee

Under the Sarbanes-Oxley Act, auditing services (including providing comfort letters in connection with securities underwritings and certain statutory audits) and permitted non-audit services must be pre-approved by the issuer's audit committee (which approval must be disclosed in periodic reports). n125

[6] Restrictions on Non-Audit Services and Independence Issues

To enhance auditor independence, Section 201 of the Sarbanes-Oxley Act prohibits registered accounting firms from providing to issuers, contemporaneously with an audit, any of the following non-audit services:

- Bookkeeping or other services related to the accounting records or financial statements of the audit client. n126
- Financial information systems design and implementation. n127
- Appraisal or valuation services, fairness opinions or contribution-in-kind reports. n128
- Actuarial services. n129
- Internal audit outsourcing services. n130
- Management functions n131 or human resources. n132
- Broker or dealer, investment adviser or investment banking services. n133
- Legal services n134 and expert services unrelated to the audit. n135
- Any other service that the PCAOB determines, by regulation, is impermissible. n136

Auditors should not assume that the above list (and related SEC rules) gives them a "green light" to perform all non-audit services that are not specifically prohibited. As emphasized by then-SEC Commissioner Cynthia Glassman, audit committees should carefully examine every proposed non-audit service and make an informed judgment concerning its effect on the auditor's independence.

Commissioner Glassman further noted that any pre-approval by an audit committee of a "basket" of non-audit services would be inconsistent with the Sarbanes-Oxley Act's requirement that the committee pre-approve each service. n137 For example, while an accounting firm can generally provide tax services (which are not listed above) to its audit clients without compromising the firm's independence, the SEC has cautioned that "merely labeling a service as a 'tax service' will not necessarily eliminate its potential to impair independence...". Specifically, accountants would impair their independence by representing an audit client before a tax court, district court, or federal court of claims. In addition, audit committees also should scrutinize carefully the retention of an accountant in a transaction initially recommended by the accountant, the sole business purpose of which may be tax avoidance and the tax treatment of which may not be supported in the Internal Revenue Code and related regulations." n138

In addition, on July 26, 2005, the PCAOB proposed rules, which were subsequently approved by the SEC, that further limit tax services accountants may perform for their public audit clients (and certain senior officers of those clients). n139 For example, under these rules, an auditor's independence unquestionably would be impaired if it provides (i) certain aggressive tax shelter services to audit clients (Rule 3522), (ii) contingent fee tax-related services to audit clients (Rule 3521) or (iii) tax services to certain individuals who serve in financial reporting oversight roles for audit clients (and immediate family members of those persons) (Rule 3523). n140 These new rules took effect at varying times depending upon specified effective dates established by the PCAOB. n141

Moreover, to further enhance auditor independence, the SEC has adopted a rule that states that an accountant is not independent from an audit client if an audit partner on the engagement received compensation based on selling engagements to that client for services other than audit, review and attest services. n142 The foregoing rule does not apply to an audit partner who is a "specialty partner" (e.g., a tax specialist or a valuation specialist). n143

In April 2008, the PCAOB adopted Rule 3526, *Communication with Audit Committees Concerning Independence*, in an effort to improve communication between registered accounting firms and their clients' audit committees concerning independence issues. n144 As described by the PCAOB, this rule obligates accounting firms, prior to accepting an initial engagement, "to describe in writing to the audit committee all relationships between the firm or any of its affiliates and the issuer or persons in a financial reporting oversight role at the issuer that may reasonably be thought to bear on the firm's independence." n145 In addition, accounting firms are obligated to discuss with their clients' audit committees the potential consequences of any such relationships on their independence. n146

In an administrative proceeding brought by the SEC against Ernst & Young LLP ("E&Y") for alleged violations of auditor independence standards, a SEC administrative law judge suspended E&Y from accepting new public audit clients for six months. According to the judge's decision, E&Y's independence was compromised because of a joint business relationship it maintained with an audit client. In reaching this decision, the judge declined to consider E&Y's defenses based on alleged immateriality. According to the judge, the SEC has consistently refused to apply any materiality standard when addressing auditor independence. n147

[7] Audit Partner Rotation

Under Section 203 of the Sarbanes-Oxley Act, the lead audit partner having primary responsibility for the audit of an issuer and the concurring partner responsible for reviewing that audit are each prohibited from providing audit services to the client for more than five consecutive years. n148 In May 2003, the SEC adopted rules under the Sarbanes-Oxley Act that provide that after being rotated off an audit engagement, the lead and concurring partners must be subject to a five-year "time-out" period before they can return to the engagement. n149 In addition, "audit partners" other than lead

and concurring partners (*e.g.*, "relationship partners who serve the client at the issuer or parent level") must rotate after no more than seven years and are subject to a two-year "time-out" period. n150

Audit firms with fewer than five audit clients that are issuers and fewer than ten partners may seek an exemption from the above SEC partner rotation requirements. n151 In order to obtain this exemption, qualifying firms must allow the PCAOB to review all of their professional engagements subject to the rotation requirement at least once every three years. n152 According to the SEC, "[t]his special review should focus on the overall quality of the audit and, in particular, the independence and competence of key personnel on the audit engagement teams." n153

The SEC allowed for the orderly transition of firms' audit engagement teams by establishing transition provisions related to partner rotation requirements. n154 For example, since lead partners already were subject to rotation requirements under the AICPA (SEC Practice Section) membership requirements, the SEC stated that its rotation requirements for lead partners were not effective until the first fiscal year ending after the effective date of the rotation rule [May 6, 2003]. n155 The lead partner's time served in that position prior to the effective date of the rotation rule was included in determining when that partner must rotate. n156 If the lead partner was in his or her fifth, sixth or seventh year as lead partner for an audit client, he or she were required to rotate off the following year's engagement. n157

Under Section 207 of the Sarbanes-Oxley Act, the Comptroller General of the United States is directed to report to Congress as to whether there should be a mandatory rotation of auditing firms of the issuer.

[8] Hiring Auditor Personnel

The Sarbanes-Oxley Act prohibits a registered accounting firm from providing audit services for an issuer if the issuer's chief executive officer, controller, chief financial officer, chief accounting officer or person serving in an equivalent position for the issuer was employed by the accounting firm and participated in any capacity in the audit during the one-year period preceding the date of the initiation of the current audit. n158

[9] Appearance and Practice Before the Securities and Exchange Commission

Section 602 of the Sarbanes-Oxley Act codifies the SEC's pre-existing power under Rule 102(e) n159 of its Rules of Practice to sanction accountants, lawyers and other professionals who "appear or practice" before the Commission. n160 Specifically, Section 602 authorizes the SEC to censure, or deny, temporarily or permanently, any person the privilege of appearing or practicing before the SEC in any way if the SEC finds that the person (1) does not possess the requisite qualifications to represent others, (2) is lacking in character or integrity or has engaged in unethical or improper professional conduct, or (3) has willfully violated, or has willfully aided and abetted the violation of, any securities laws or regulations. n161 For accounting firms and accountants, improper professional conduct is defined to include intentional, knowing or reckless conduct that results in a violation of applicable professional standards, or negligent conduct in the form of a single instance of highly unreasonable conduct that results in a violation of such standards in circumstances in which the firm or accountant knew, or should have known, that heightened scrutiny was warranted or repeated instances of unreasonable conduct, each resulting in a violation of such standards.

The following are examples of Rule 102(e) proceedings instituted against accountants since the enactment of the Sarbanes-Oxley Act:

1. In *In the Matter of Barry C. Scuttillo, CPA and Mark F. Jensen, CPA*, n162 the Order Instituting Proceedings (the "OIP") charged that the engagement partner failed (among other things) to plan or perform appropriate procedures to audit accounts relating to Sky Scientific's ("Sky") Russian Certificates of Deposit and mineral properties, maintain control over the confirmation process and take appropriate steps to satisfy itself that Sky's financial statements complied with GAAP. Based on the foregoing, the Division of Enforcement's requested a permanent Rule 102(e) bar against the

engagement partner. After hearing the matter, the Administrative Law Judge (the "ALJ") barred the partner from practicing before the Commission for three years. In imposing this sanction, the ALJ noted that the engagement partner had surrendered his professional judgment to the demands of his client in placing undue reliance on a doubtful confirmation. On review, the Commission affirmed the three-year Rule 102(e) bar.

2. In *In the Matter of Philip L. Pascale*, n163 the OIP charged (among other things) that the engagement partner on certain audits of Composite Holdings, Inc. ("Composite") engaged in improper professional conduct within the meaning of Rule 102(e) based on his failure to detect Composite's improper accounting for a patent it acquired pursuant to an acquisition, its subsequent failure to take an impairment charge on the patent, and its improper recording of a deferred tax asset. n164 The ALJ determined that the engagement partner had not committed any actionable conduct and dismissed the proceeding. On appeal, the Commission found that the engagement partner had failed to maintain an attitude of professional skepticism, obtain sufficient competent evidential matter and exercise due professional care and it issued a cease-and-desist order against the partner based on specified statutory violations. On the other hand, while the Commission also ruled that the engagement partner violated Rule 102(e), it stated, without any other explanation, that "[i]n light of our issuance of a cease and desist order, under the particular circumstances of this case, we have determined not to sanction Pascale [the engagement partner] for his improper professional conduct under Rule 102(e)(1)(ii)." n165

3. In *In the Matter of Kevin M. Harris, C.P.A.*, n166 Kevin Harris ("Harris"), a CPA who served as Akorn, Inc.'s ("Akorn") CFO for six months, was charged with various statutory and other violations in connection with Akorn's understatement of its allowance for doubtful accounts and failure to properly account for chargebacks and rebates. In its request for relief, the Division of Enforcement sought a cease-and-desist order, disgorgement of \$38,000, and a Rule 102(e) sanction against Harris. While the ALJ found willful violations on Harris' part, the judge did not grant the requested relief on account of Harris' short tenure with Akorn, his lack of profit from any violations, and his general credibility and positive demeanor. In addition, in declining to grant any sanction under Rule 102(e), the ALJ stated that this measure "tarnishes an accountant's professional career for life, and [was] too severe in these circumstances." n167

4. In *In the Matter of Kenneth L. Rubin, CPA and Michael W. Lewis, CPA*, n168 the OIP alleged various violations against the audit engagement partner and manager that arose from their client's (Eisner Securities Inc.) failure to accrue a contingent liability that resulted from its offer to settle claims asserted by customers whose funds had been misappropriated by a former registered representative. The OIP further alleged that the audit partner and manager failed to obtain sufficient competent evidential matter, exercise due professional care and maintain professional skepticism with respect to the underlying transactions. Based on the foregoing, the ALJ imposed a three-year Rule 102(e) bar against both the audit partner and the manager.

5. In *In the Matter of James Thomas McCurdy, CPA*, n169 McCurdy was charged with having issued an unqualified audit report on the 1998 financial statements of JWB Aggressive Growth Fund without adequate consideration of a substantial receivable whose collectability was not probable. The Division of Enforcement also claimed that McCurdy failed to obtain sufficient competent evidential matter, maintain an attitude of professional skepticism and exercise due professional care. While the ALJ determined that McCurdy should have obtained more audit evidence from additional sources, the judge declined to impose a Rule 102(e) sanction because McCurdy had not acted recklessly or highly unreasonably in the matter. On review, the Commission reversed the ALJ's decision, holding that the auditor had acted in a culpable manner. In addition, the Commission imposed a one-year Rule 102(e) suspension on McCurdy and this suspension was affirmed on appeal by the Court of Appeals for the District of Columbia Circuit.

Shortly after the enactment of the Sarbanes-Oxley Act, in December 2002, Stephen Cutler, then Director of the SEC's Enforcement Division, proposed a new enforcement model in which the SEC would hold accounting firms legally accountable for the actions of their partners as opposed to only suing individual members of audit engagement teams. n170 Later in May 2003, the SEC announced that it had settled an enforcement action against PricewaterhouseCoopers LLC ("PwC") for improper professional conduct. n171 In this announcement, Associate Enforcement Director Antonia

Chion said the case was an example of the division's new enforcement model.

[10] The Statute of Limitations

Section 804 of the Sarbanes-Oxley Act increases the statute of limitations for actions alleging securities fraud to the earlier of two years after discovery of the facts constituting the violation or five years from the time of the violation.
n172

Under Section 804, the above increased limitations periods only apply to actions instituted after July 30, 2002, the date of enactment of Sarbanes-Oxley. In addition, virtually every court which has addressed the issue has held that Section 804 cannot be applied retroactively to revive claims which were already time-barred on July 30, 2002. n173

(n9)Footnote 9. Section 102.

(n10)Footnote 10. *See* Rules on Periodic Reporting by Registered Public Accounting Firms, PCAOB Rel. No. 2008-004 (June 10, 2008). These rules are subject to approval by the SEC.

(n11)Footnote 11. *See* PCAOB Rel. No. 2008-004, *supra* at, e.g., p. 20. *See also* David Reilly, *Rule Would Boost Audit Disclosure*, Wall Street Journal, May 24, 2006, at C5.

(n12)Footnote 12. *Id.* It is anticipated that the above requirement might deter companies from attempting to

conceal financial restatements. According to a report by the firm of Glass Lewis & Co., in 2005, such "stealth restatements" comprised one-third of the restatements made by domestic public companies. *Id.*

(n13)Footnote 13. See SEC Rel. No. 33-8222 (April 25, 2003). See also *SEC Finds That PCAOB Satisfies Requirements of the Sarbanes-Oxley Act*, SEC TODAY, Vol. 2003-82 (Apr. 30, 2003).

(n14)Footnote 14. Order Regarding Section 103(a)(3)(B) of the Sarbanes-Oxley Act of 2002, 68 Fed. Reg. 23335 (May 1, 2003) .

(n15)Footnote 15. In particular, under PCAOB Rule 3200T, Interim Auditing Standards, registered public accounting firms must follow Generally Accepted Auditing Standards as they existed on April 16, 2003. See Order Regarding Section 103(a)(3)(B) of the Sarbanes-Oxley Act of 2002, 68 Fed. Reg. 23335 (May 1, 2003) .

(n16)Footnote 16. PCAOB Rule 3300T, Interim Attestation Standards, requires registered public accounting firms to comply with those Statements on Standards for Attestation Engagements and related Interpretations and Statements of Position adopted by the ASB, as they existed on April 16, 2003. See *Establishment of Interim Professional Auditing Standards*, PCAOB Rel. No. 2003-006, at <http://www.pcaobus.org> (Apr. 18, 2003).

(n17)Footnote 17. Rule 3400T, Interim Quality Control Standards, designates (i) the Statements on Quality Control Standards adopted by the ASB and (ii) certain AICPA SEC Practice Section membership requirements as they existed on April 16, 2003, as the PCAOB's Interim Quality Control Standards. See Order Regarding Section 103(a)(3)(B) of the Sarbanes-Oxley Act of 2002, 68 Fed. Reg. 23335 (May 1, 2003) .

Based on the foregoing, the requirements incorporated in Rule 3400T relate, among other things, to:

- Continuing professional education of audit personnel;
- Concurring partner review of the audit report and the financial statements of Commission registrants. It should be noted that instead of incorporating the AICPA SEC Practice Section membership provision that allows the AICPA's peer review committee to "authorize alternative procedures" when the requirement for a concurring review cannot be met because of the small size of the firm, Rule 3400T provides that requests for such authorization should be directed to the Board itself;
- Communication by written statement to all professional personnel of firm policies and procedures on the recommendation and approval of accounting principles, present and potential client relationships, and the types of services provided;
- Notification of the Commission of resignations and dismissals from audit engagements for Commission registrants; and
- Policies and procedures to comply with applicable independence requirements.

See *Establishment of Interim Professional Auditing Standards*, PCAOB Rel. No. 2003-0006, at <http://www.pcaobus.org> (Apr. 18, 2003); Order Regarding Section 103(a)(3)(B) of the Sarbanes-Oxley Act of 2002, 68 Fed. Reg. 23335 (May 1, 2003) .

On February 26, 2008, the PCAOB proposed an auditing standard, *Engagement Quality Review*, that would supersede the Board's interim requirements relating to concurring partner review. See *Proposed Auditing Standard -- Engagement Quality Review and Conforming Amendment to the Board's Interim Quality Control Standards*, PCAOB Rel. No. 2008-002 (February 26, 2008). Under existing requirements, in order for a concurring reviewer to provide "approval of

issuance," he or she must conclude that no matters have come to his or her attention that would cause him or her to believe that the issuer's financial statements did not conform with GAAP or that the audit was not performed in accordance with applicable Board Standards, *Id.*, p. 6. Among other things, the proposed standard adds the new requirement that "the reviewer must *not* provide concurring approval of issuance if he or she knows, or should know based upon the requirements of the standard, that the engagement team failed to obtain sufficient competent evidence, the engagement team's overall conclusion or report is inappropriate, or the firm is not independent of its client." *Id.* (*emphasis added*). In addition, the proposed standard also states that approval of the concurring reviewer must be obtained before an audit firm can grant permission to its client to use the firm's engagement report (or communicate any conclusion to its client if no such report is issued.) *Id.*

Now that the applicable comment period has closed, the Board will decide whether to adopt final rules concerning the concurring review requirement. Any final rules will be submitted to the SEC for approval.

(n18)Footnote 18. Rule 3500T, Interim Ethics Standards, provides that in connection with the preparation or issuance of any audit report, a registered public accounting firm (and its associated persons) must comply with the ethics standards set forth in the AICPA's Code of Professional Conduct Rule 102, and interpretations and rulings thereunder, as in existence on April 16, 2003. *See Order Regarding Section 103(a)(3)(B) of the Sarbanes-Oxley Act of 2002, 68 Fed. Reg. 23335 (May 1, 2003).*

(n19)Footnote 19. Rule 3600T, Interim Independence Standards, provides that in connection with the preparation or issuance of any audit report, a registered public accounting firm (and its associated persons) must comply with (i) the independence standards set forth in the AICPA's Code of Professional Conduct Rule 101, and interpretations and rulings thereunder, as in existence on April 16, 2003 and (ii) certain standards and interpretations of the Independence Standards Board. *See Order Regarding Section 103(a)(3)(B) of the Sarbanes-Oxley Act of 2002, 68 Fed. Reg. 23335 (May 1, 2003).* To the extent that an auditor independence rule previously established by the SEC under Rule 2-01 of Reg. S-X (17 C.F.R. 240.2-01) is more restrictive-or less restrictive-than the Board's Interim Standards, a registered public accounting firm must comply with the more restrictive rule. *Id.*

(n20)Footnote 20. *See Establishment of Interim Professional Auditing Standards*, PCAOB Rel. No. 2003-006, at <http://www.pcaobus.org> (Apr. 18, 2003). In addition, on December 17, 2003, the PCAOB approved technical amendments to the above interim standards rules indicating that "when the Board adopts a new auditing and related professional standard that addresses a subject matter that also is addressed in the interim standards, the affected portion of the interim standards will be superseded or effectively amended. Accordingly, the Board approved adding the phrase 'to the extent not superseded or amended by the Board' to each of the interim standards rules." *Technical Amendments to Interim Standards Rules*, PCAOB Rel. No. 2003-26 (Dec. 17, 2003), Exchange Act Release No. 49624 (April 28, 2004) (SEC approval).

The United States Sentencing Commission's Ad Hoc Advisory Group has urged an amendment to the Sentencing Guidelines related directly to internal control compliance at the corporate level. The proposed Guidelines would hold directors and those in leadership posts of all organizations, including government agencies, responsible for failures in the compliance system. The Advisory Group recommended that the "governing authority" of an organization--often the board of directors--be held responsible for their company's compliance program and its effectiveness in white collar crime detection and prevention. See *Report of the Ad Hoc Advisory Group on the Organizational Sentencing Guidelines*, at www.ussc.gov/corp/advgrprpt/advgrprpt.htm.

(n31)Footnote 31. PCAOB Rel. No. 2004-001 (March 9, 2004), which was subsequently approved by the SEC. See *Order Approving Proposed Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*, Securities Exchange Act Rel. No. 49884 (June 17, 2004).

(n32)Footnote 32. PCAOB Rel. No. 2007-005 (May 24, 2007), which was subsequently approved by the SEC on July 25, 2007. See *Order Approving Proposed Auditing Standard No. 5, An Audit of Internal Control Over Financial Reporting that is Integrated with an Audit of Financial Statements*, Securities Exchange Act. Rel. No. 2007-144 (July 25, 2007). Auditing Standard No. 5 is effective for audits of fiscal years on or after November 25, 2007.

(n35)Footnote 35. See May 16, 2005 Policy Statement, p. 2 (emphasis in original).

(n36)Footnote 36. *Report on the Initial Implementation of Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction With an Audit of Financial Statements*, PCAOB Release No. 12005-023 (Nov. 30, 2005) (the "November 30, 2005 Report").

(n37)Footnote 37. For example, this report (pp. 2-4) observed that some auditors did not (i) integrate their internal control audits with their audits of financial statements, (ii) alter the notice, timing and extent of their internal control testing to reflect the level of risk, (iii) effectively apply a "top-down approach," (iv) utilize the work of others to the extent allowable by Auditing Standard No. 2 and (v) perform sufficient testing of the internal controls over the preparation of financial statement disclosures.

(n38)Footnote 38. *Report on the Second-Year Implementation of Auditing Standard No. 2, An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements*, PCAOB Rel. No. 2007-004 (April 18, 2007).

(n39)Footnote 39. During 2006, PCAOB inspectors reviewed portions of approximately 275 audits that were

conducted of internal control over financial reporting. *Id.*, at p. 1.

(n40)Footnote 40. *Id.*

(n41)Footnote 41. *Id.*, pp. 1-2.

(n42)Footnote 42. See PCAOB Press Release entitled, *Board Approves New Audit Standard for Internal Control Over Financial Reporting and, Separately, Recommendations on Inspection Frequency Rule* (May 24, 2007) (p.2), available at http://www.pcaobus.org/News_and_Events/News/2007/05-24.aspx.

(n43)Footnote 43. *Id.*, The PCAOB stated that it adopted its new internal control auditing standard based on its above observations and the approaching date for smaller issuers to comply with Sarbanes-Oxley's internal control reporting requirement. *Id.*

(n44)Footnote 44. *Id.*

(n45)Footnote 45. In the past, based on deferrals granted by the SEC, smaller public companies (with caps of less than \$75 million) did not have to comply with Section 404's reporting and auditing requirements. However, based on recent SEC directives, "smaller" public companies must begin reporting on their internal controls in their 2007 annual reports. In addition, according to the SEC, those companies will become subject to Section 404's audit requirements in connection with their annual reports for fiscal years ending on or after December 15, 2009. See SEC Release entitled SEC Approves One-Year Extension for Small Businesses From Auditor Attestation Requirement in Sarbanes-Oxley Act (June 20, 2008), available at <http://www.sec.gov/news/press/2008/2008-116.htm>. See also SEC brochure entitled Sarbanes-Oxley Section 404, A Guide for Small Business available at <http://www.imanet.org/pdf/SBC404guide.pdf>; Judith Burns, SEC Seeks Rules Delay For Small Companies, Wall Street Journal, December 13, 2007, at C4.

(n46)Footnote 46. If these exemptions were put into place, approximately 80% of all public companies would be excused from the provisions of Section 404. See *Senator Sarbanes Does Not Support Section 404 Exemption for Small Companies*, SEC TODAY, Vol. 2006-59 (Mar. 28, 2006).

(n47)Footnote 47. For example, a report issued by the Government Accountability Office (the "GAO") noted that smaller companies subject to Section 404 internal control requirements were paying more as a percentage of revenue than larger companies to satisfy those requirements. Siobhan Hughes, *GAO Seeks Smaller Exemption to Sarbanes-Oxley Provisions*, Wall Street Journal, May 9, 2006, at C4. Despite this finding, the GAO report concluded that while "some interim regulatory relief [for smaller public companies] on a limited scale may be appropriate, ... given the number of public companies that would potentially qualify, a significant reduction in scope of the ... relief [proposed by the SEC Advisory Committee] needs to occur to preserve the overriding investor protection purpose of the Sarbanes-Oxley Act." *Id.*

Among other critics of Section 404, Congressman Tom Feeney of Florida complained that its requirements was "outsourcing America's lead in capital markets" by causing public companies to list their stock in foreign countries. Floyd Norris, *SEC Eases Audit Rules But Rejects Exemptions*, The New York Times, May 18, 2006, at C1.

(n48)Footnote 48. See Michael Rapoport, *SEC Panel to Turn In Report on Sarbanes Debate*, Wall Street Journal, April 17, 2006, at C3. In addition, according to a report from Glass Lewis & Co., the companies subject to partial or full exemption under the SEC Advisory Committee's proposal accounted for 59% of restatements of financial results by public companies in 2005. Karen Scannell and David Reilly, *Small Firms' Sarbanes Suffering? -- SEC Seems Unwilling to Exempt Little Guys from Internal Controls*, Wall Street Journal, April 6, 2006, at C1.

In addition to the debate over whether smaller companies should be excused from complying with Section 404, there are differing views concerning whether the SEC has the statutory power to exempt any public companies from Section 404's requirements. See *Oxley and Baker Say SEC Has Authority to Provide Section 404 Exemptions*, SEC TODAY,

Vol. 2006-54 (Mar. 21, 2006); *Senator Sarbanes Does Not Support Section 404 Exemption for Small Companies*, SEC TODAY, Vol. 2006-59 (Mar. 28, 2006).

(n49)Footnote 49. David Reilly, *Internal Control Help Becomes Less Costly*, Wall Street Journal, April 19, 2006, at C3; Floyd Norris, *Audit Law's Costs Decline Survey Shows*, The New York Times, April 19, 2006, at C2..

(n50)Footnote 50. *Id.* According to the CRA study, total costs included both internal company costs and the costs of the audits required by Section 404. While Section 404 auditing fees dropped for all businesses, the decline for the larger business was offset by higher regular audit fees. Floyd Norris, *Audit Law's Costs Decline Survey Shows*, The New York Times, April 19, 2006, at C2.

(n51)Footnote 51. *Id.*

(n52)Footnote 52. David Reilly, *Outside Audit: Checks on Internal Controls Pay Off*, Wall Street Journal, May 8, 2006, at C3. It should be noted that the Lord & Benoit study did not encompass public companies with a market cap of less than \$75 million because they were not yet required to comply with Section 404's requirements. *Id.*

(n53)Footnote 53. *Id.*

(n54)Footnote 54. *Id.*

(n55)Footnote 55. See Floyd Norris, *SEC Eases Audit Rules But Rejects Exemptions*, The New York Times, May 18, 2006, at C1; David Reilly and Karen Scannell, *SEC Won't Exempt Small Firms From Controls Rules*, Wall Street Journal, May 18, 2006, at C4.

(n56)Footnote 56. See SEC brochure entitled *Sarbanes-Oxley Section 404, A Guide for Small Business*, available at <http://www.imanet.org/pdf/SBC404guide.pdf>; Judith Burns, *SEC Seeks Rules Delay For Small Companies*, Wall Street Journal, December 13, 2007, at C4.

(n57)Footnote 57. See SEC Press Release entitled *SEC Begins Small Business Costs and Benefits Study of Sarbanes-Oxley Act Section 404* (February 1, 2008), available at <http://www.sec.gov/news/press/2008/2008-8.htm>. According to the SEC, this new guidance will assist companies in focusing their reviews "on the internal control issues that matter most to investors." *Id.*

(n58)Footnote 58. See December 12, 2007 testimony of SEC Chairman Christopher Cox before the U.S. House of Representatives Committee on Small Business, available at <http://www.sec.gov/news/testimony/2007/ts121207cc.htm>.

(n59)Footnote 59. See SEC Press Release entitled *SEC Approves One-Year Extension for Small Businesses From Auditor Attestation Requirement in Sarbanes-Oxley Act* (June 20, 2008), available at <http://www.sec.gov/news/press/2008/2008-116.htm>.

(n60)Footnote 60. *Id.* The SEC stated that it would gather "new data from a broad array of companies about the costs and benefits" of compliance with Section 404's requirements through "interviews and other outreach," including a "Web-based survey." *Id.*

(n61)Footnote 61. *Id.* It is anticipated that the results of the SEC's study will become available during the extension period recently established by the Commission for "smaller" companies to comply with Section 404's audit requirements.

(n62)Footnote 62. See (i) *Preliminary Staff Views, An Audit of Internal Control That is Integrated with an Audit of Financial Statements: Guidance for Auditors of Smaller Public Companies*, dated October 17, 2007 and (ii) PCAOB Press Release entitled *PCAOB Issues Staff Guidance On Auditing Internal Control in Smaller Public Companies* (October 17, 2007); both available at

http://www.pcaobus.org/Standards/Standards_and_Related_Rules/AS5/Guidance.pdf. See also SEC brochure entitled *Sarbanes-Oxley Section 404, A Guide for Small Business* available at <http://www.sec.gov/info/smallbus/404guide.pdf>.

(n63)Footnote 63. See Recent Work of the Public Company Accounting Oversight Board: Registration, Inspections, Enforcement and Standard Setting, submitted by Daniel L. Goelzer, Claudius B. Modesti and Helen A. Munter for the American Law Institute/American Bar Association seminar on Accountants' Liability (May15-16, 2008), pp. 39-42. In addition, as discussed above, litigation has been instituted by a private group to obtain a ruling that the establishment of the PCAOB was unconstitutional.

(n64)Footnote 64. PCAOB Rel. No. 2004-006 (June 6, 2004), which was subsequently approved by the SEC. See *Order Approving Proposed Auditing Standard No. 3, Audit Documentation, and an Amendment to Interim Auditing Standards -- AU sec 543, Part of Audit Performed by Other Independent Auditors*, Securities Exchange Release No. 50253 (August 25, 2004).

(n65)Footnote 65. Auditing Standard No. 3 (par. 6) states that "[a]n *experienced auditor* has a reasonable understanding of audit activities and has studied the company's industry as well as the accounting and auditing issues relevant to the industry." (emphasis in original).

(n66)Footnote 66. Auditing Standard No. 3, par. 8. Based on the foregoing, "[t]he relevant records to be retained include, but are not limited to, procedures performed in response to the information, and records documenting consultations on, or resolution of, differences in professional judgment among members of the engagement team or between the engagement team and others consulted." *Id.*, par. 8.

(n67)Footnote 67. *Id.*, par. 14. If the auditor's report is not issued in connection with an engagement, the auditor must retain the "audit documentation" for seven years from the date that "fieldwork was substantially completed." In circumstances where an auditor was unable to complete the engagement, the auditor must retain the "audit documentation" for seven years from the date the engagement ceased. *Id.*

(n68)Footnote 68. Section 802 of the Sarbanes-Oxley Act originally created explicit criminal liability, including fines and/or no more than ten years in prison, for auditors of a public company failing to retain all audit or review workpapers for at least five years from the end of the fiscal period in which the audit or review was concluded. See 18 U.S.C. § 1520(a)(2) (2008). Pursuant to Section 802, the SEC was required to adopt rules specifying the records to which the foregoing record retention provision applies.

Under the above SEC rule, the five-year record retention period contemplated by Section 802 was extended to seven years. This increased retention requirement coordinates with Section 103(a)(2)(A)(i) of the Sarbanes-Oxley Act which required that the PCAOB adopt an auditing standard (i.e., Auditing Standard No. 3) that mandates registered firms to "prepare and maintain for a period of not less than 7 years, audit work papers, and other information related to any audit report, in sufficient detail to support the conclusions reached in such report." See *SEC Adopts Record Retention Rules for Auditors*, SEC TODAY, Vol. 2003-18, at 1 (Jan. 28, 2003).

The criminal sanctions established by Section 802 are more fully addressed at § 5A.10, *infra*.

(n69)Footnote 69. See Retention of Audit and Review Records, 17 C.F.R. § 210.2-06 (2008).

(n70)Footnote 70. 17 C.F.R. § 210.2-06.

(n71)Footnote 71. 17 C.F.R. § 210.2-06

(n72)Footnote 72. See *SEC Adopts Record Retention Rules for Auditors*, SEC TODAY, Vol. 2003-18, at 1 (Jan. 28, 2003).

(n73)Footnote 73. SEC TODAY, Vol. 2003-18 at 1.

(n74)Footnote 74. SEC TODAY, Vol. 2003-18 at 2.

(n75)Footnote 75. According to the PCAOB, the objective of Auditing Standard No. 3 is different from the objective of the SEC's record retention requirement: "The objective of the Board's standard is to require auditors to *create* certain documentation to enhance the quality of audit documentation, thereby improving the quality of audits and other related engagements... . In contrast, the focus of the SEC rule is to require auditors to *retain* documents that the auditor does create in order that those documents will be available in the event of a regulatory investigation or other proceeding." See Appendix A to Auditing Standard No. 3, paras. A43-44. (emphasis in original).

(n76)Footnote 76. See Auditing Standard No. 3, n. 5.

(n77)Footnote 77. PCAOB Rel. No. 2005-015 (July 26, 2005), which was subsequently approved by the SEC. See *Order Approving Proposed Auditing Standard No. 4, Reporting on Whether a Previously Reported Material Weakness Continues to Exist*, Securities Exchange Act Release No. 34-53227 (February 6, 2006).

(n78)Footnote 78. On the other hand, a public company is *required* to disclose in its quarterly SEC filing any remediation of a material weakness (or other material changes) in internal control over financial reporting that occurred during the company's most recent fiscal quarter. See Item 308(c) of Regulation S-K, 17 C.F.R. § 229.308(c); Auditing Standard No. 4, Appendix B, P B3.

(n79)Footnote 79. Pursuant to Auditing Standard No. 4, in addition to the above reporting alternatives, an auditor may decide not to report on whether a previously reported material weakness continues to exist and, instead, withdraw from the engagement.

(n80)Footnote 80. *Auditing Standard No. 6 -- Evaluating Consistency of Financial Statements and Conforming Amendments*, PCAOB Rel. No. 2008-001 (January 29, 2008).

(n81)Footnote 81. See *Order Approving Proposed Rule on Auditing Standard No. 6, Evaluating Consistency of Financial Statements and Conforming Amendments*, Securities and Exchange Commission Rel. No. 34-58555 (September 16, 2008).

(n82)Footnote 82. *Auditing Standard No. 6 -- Evaluating Consistency of Financial Statements and Conforming Amendments*, PCAOB Rel. No. 2008-001 (January 29, 2008) p. 4. According to the PCAOB, this new standard updates existing requirements in this area and aligns them more closely with Statement of Financial Accounting Standards No. 154, *Accounting Changes and Error Corrections*, by providing that the auditor's report must recognize an issuer's correction of a material misstatement, regardless of whether it involves the application of an accounting principal. *Id.*

(n83)Footnote 83. *Id.*

(n84)Footnote 84. *Id.* In addition, in Auditing Standard No. 6, the Board removed the hierarchy of GAAP from its interim auditing standards. This decision was prompted by the proposal of the Financial Accounting Standards Board to incorporate the GAAP hierarchy into the accounting standards. *Id.* at pp. 14-15 .

(n85)Footnote 85. Under certain circumstances, the PCAOB may, by rule, adjust the above inspection schedules. Section 104.

(n86)Footnote 86. Under Section 104, accounting firms are also subject to special investigations at any time by the PCAOB to deal with issues raised by the PCAOB or the SEC.

(n87)Footnote 87. The above quotation is included as standard language in the introductory portion of inspection reports issued by the PCAOB. In addition, the Act provides that when the PCAOB identifies potential violations of law,

PCAOB rules, SEC rules, or professional standards in the course of an inspection, it "should, where appropriate, begin a formal investigation or disciplinary proceeding (including a hearing on the record) or report the matter to the Commission or the appropriate state regulatory authority." *Statement Concerning the Issuance of Inspection Reports*, PCAOB Rel. No. 104-2004-001 (Aug. 26, 2004). *See also* Section 104 of the Act.

(n88)Footnote 88. Although the above firms were not required to submit to any inspection procedures before the PCAOB approved their registration applications in October 2003, they voluntarily submitted to such procedures in advance of registration. *See* PCAOB Release No. 104-2004-001 (Aug. 26, 2004).

(n89)Footnote 89. *See* PCAOB Member *Goelzer Cautions Against Certain Tax Services by Auditors*, SEC TODAY, Vol. 2003-179, at 1 (Sept. 17, 2003).

(n90)Footnote 90. The public portions of PCAOB inspection reports may be reviewed at <http://www.pcaobs.org>.

(n91)Footnote 91. *See The Work of the Public Company Accounting Oversight Board; Registration, Inspections, Enforcement and Standard Setting*, submitted by Daniel L. Goelzer for the 37th Annual Institute on Securities Regulation (PLI) (November 3, 2005) pp. 552-554.

(n92)Footnote 92. *Board Releases Reports on 2003 Limited Inspections of Big Four Accounting Firms*, PCAOB Press Rel. 104-2004-001 (Aug. 26, 2004).

In similar fashion, the initial inspections conducted by Britain's Professional Oversight Board for Accountancy (the "POBA") of the Big Four accounting firms found failures in some audits to apply proper procedures or document the performance of required work on those engagements, but uncovered no "systemic weaknesses" in the firms' policies and procedures. *See* Floyd Norris, *Big Four Audit Firms are Chided in Britain*, New York Times, June 21, 2005, at C5. As stated by POBA director Paul George: "The firms are capable of doing very good audits. But we identify some areas where they are not applying their procedures and practices across all audits." *Id.*

(n93)Footnote 93. *See* Goelzer, *supra* at p. 557.

(n94)Footnote 94. PCAOB Rel. Nos. 104-2005-088 (September 29, 2005), 104-2005-089 (October 6, 2005), 104-2005-119 (November 17, 2005) and 104-2005-120 (November 17, 2005).

(n95)Footnote 95. In particular, each of the above firm submissions consisted of comments on a draft of the formal inspection report for that firm. A copy of the applicable submission is included as an appendix to the final inspection reports cited above.

(n96)Footnote 96. *See* Goelzer, *supra* at p. 557.

(n97)Footnote 97. *Id.* In addition, the PCAOB's 2005 inspections included limited inspection reviews of firms' implementation of PCAOB Auditing Standard No. 2, *An Audit of Internal Control Over Financial Reporting Performed in Conjunction with an Audit of Financial Statements*. *Id.* This "auditing standard" was addressed at Section 5A.09[3], *supra*.

(n98)Footnote 98. *PCAOB Officials Discuss Diverse Issues at AICPA Conference*, SEC TODAY Vol. 2005-237, at 1 (Dec. 12, 2005). Mr. Diacont observed that the contemplated inspections were difficult and involve complex accounting and auditing issues. *Id.*

(n99)Footnote 99. *See Recent Work of the Public Company Accounting Oversight Board: Registration, Inspections, Enforcement and Standard Setting*, submitted by Daniel L. Goelzer, Claudius B. Modesti and Helen A. Munter for the American Law Institute/American Bar Association seminar on Accountants' Liability (May 15-16, 2008), p. 13.

During 2006, the Board also conducted limited inspection reviews of audit firms' implementation of Auditing Standard No. 2 (relating to audits of internal control over financial reporting). *Id.*

(n100)Footnote 100. During 2007, the Board continued to conduct limited inspection reviews of audit firms' implementation of Auditing Standard No. 2. *Id.*

(n101)Footnote 101. *Observations on Auditors' Implementation of PCAOB Standards Relating to Auditors' Responsibilities With Respect to Fraud*, PCAOB Rel. No. 2007-001 (January 22, 2007).

As previously discussed (§ 5A.09[3][a]), in April 2003, the PCAOB adopted various pre-existing auditing (and other professional) standards to serve as interim Board standards to be used on a transitional basis. AU § 316 is included among those interim standards. See PCAOB Rel. No. 2007-01, p. 1.

(n102)Footnote 102. *Id.* at pp. 1-2.

(n103)Footnote 103. *Id.* at p. 2.

(n104)Footnote 104. *Id.* at pp. 2-14.

(n105)Footnote 105. *Id.* at p. 14.

(n106)Footnote 106. *Report on the PCAOB's 2004, 2005 and 2006 Inspections of Domestic Triennially Inspected Firms*, PCAOB Rel. No. 2007-010 (October 22, 2007).

(n107)Footnote 107. *Id.* at p. 1. During the 2004-2006 time period, the Board performed 497 inspections of U.S. "triennial" firms. *Id.* at p. 2.

(n108)Footnote 108. *Id.* at pp. 5-19 (emphasis added). In addition to the areas set forth above, the report also identified (i) "Business Combinations and Impairment of Assets," (ii) "Loan and Accounts Receivable (including allowance accounts)," (iii) "Service Organizations," (iv) "Use of other Auditors," (v) "Use of the Work of Specialists" and (vi) "Concurring Partner Review" as areas of concern. *Id.*

(n109)Footnote 109. *Id.* at p. 3.

(n110)Footnote 110. *Report on the PCAOB's 2004, 2005, 2006 and 2007 Inspections of Domestic Annually Inspected Firms*, PCAOB Rel. No. 2008-008 (December 5, 2008). As a general matter, the above inspections involved the review of audits of financial statements for 2003 through 2006. *Id.* at p. 2.

As reported by the PCAOB, the eight domestic firms covered by this report are collectively responsible for the audits of approximately 66 percent of all public companies based in the United States. In addition, four of those firms audit public companies that comprise 98 percent of the total domestic market capitalization. See PCAOB's December 5, 2008 press release entitled PCAOB Report Reviews First 4 Years of Inspections of the 8 Largest U.S. Audit Firms, *available at* http://www.pcaobus.org/Inspections/Other/2008/1205_Release_2008-008.pdf.

(n111)Footnote 111. PCAOB Rel. No. 2008-008 *supra* at p. 2; PCAOB press release dated December 5, 2008, *supra*.

(n112)Footnote 112. PCAOB press release dated December 5, 2008, *supra*.

(n113)Footnote 113. Mr. Diacont observed that the contemplated inspections were difficult and involve complex accounting and auditing issues. *Id.* In addition, in May 2006, the PCAOB announced that it would focus its 2006 inspections on whether auditors had achieved cost-savings efficiencies in the audits they performed under Auditing

Standard No. 2 and on whether they had followed prior PCAOB guidance urging them to do so. *See* SEC Press Rel.: *SEC Announces Next Steps for Sarbanes-Oxley Implementation*, 2006-75 (May 17, 2006).

(n114)Footnote 114. Section 105. In addition, as noted above, the PCAOB has issued rules relating to investigations and adjudications which have subsequently been approved by the SEC. PCAOB Rule 5100 addresses, in general terms, the circumstances in which the PCAOB may conduct an investigation.

(n115)Footnote 115. Section 105 and PCAOB Rule 5102.

(n116)Footnote 116. Section 105 and PCAOB Rule 5105. While the PCAOB is only empowered to request (as opposed to demand) documents and testimony from parties who are not subject to its regulation [PCAOB Rule 5105(a)], it may seek the issuance of a SEC subpoena to require that such parties furnish information needed by the PCAOB. *See* Section 105 and PCAOB Rule 5111.

(n117)Footnote 117. Section 105 and PCAOB Rule 5200-5201.

(n118)Footnote 118. According to PCAOB Rule 5300: "Limitations on the activities, functions or operations of a firm may include prohibiting a firm from accepting new audit clients for a period of time, requiring a firm to assign a reviewer or supervisor to any associated person, requiring a firm to terminate one or more audit engagements and requiring a firm to make functional changes in supervisory personnel organization and/or in engagement team organization."

(n119)Footnote 119. Section 105 and PCAOB Rule 5300.

(n120)Footnote 120. Section 105. As set forth at § 5A.09[2], the PCAOB adopted rules that address procedures for PCAOB investigations and adjudications.

(n121)Footnote 121. *See* PCAOB Disciplinary Proceedings at <http://www.pcaobus.org>. (December 4, 2008).

(n122)Footnote 122. PCAOB Rel. No. 2005-21 (Nov. 22, 2005).

(n123)Footnote 123. In settling this disciplinary proceeding, the accounting firm and its shareholder, neither admitted nor denied the findings made by the PCAOB (except as to matters relating to the PCAOB's jurisdiction). *See* PCAOB Rel. No. 2005-021, *supra*.

(n124)Footnote 124. *See* PCAOB Rel. No. 2005-21, *supra*.

(n125)Footnote 125. There is a very narrow exception to the pre-approval requirement for non-audit services, which applies if all three of the following requirements are satisfied:

- The aggregate amount of all such non-audit services does not exceed 5% of the total fees paid by the issuer to the accounting firm during the fiscal year in which the non-audit services are provided.
- The services were not recognized by the issuer at the time of engagement to be non-audit services.
- The services are promptly brought to the attention of the audit committee and approved by the committee or a designated member of the committee prior to the completion of the audit. Section 202.

(n126)Footnote 126. To clarify the foregoing, the SEC has adopted rules stating that all bookkeeping services cause auditors to lack independence, unless one can reasonably conclude that the results will not be subject to audit procedures. *See* Final Rule: Strengthening the Commission's Requirements, Securities Act Release No. 8183

(2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003).

(n127)Footnote 127. The applicable SEC rule prohibits accounting firms from providing any service related to the audit client's information system, unless one can reasonably conclude that the results of these services will not be subject to audit procedures during an audit of the audit client's financial statements. An accounting firm may work on hardware or software systems that are unrelated to the audit client's financial statements or accounting, provided that the audit committee pre-approves those services. See Final Rule: Strengthening the Commission's Requirements, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003).

In addition, the SEC rule expressly prohibits auditors "from designing or implementing a hardware or software system that aggregates source data or generates information that is 'significant' to the financial statements taken as a whole." Information is "significant if it is reasonably likely to be material to the financial statements of the audit client. Since materiality determinations may not be complete before financial statements are generated, the audit client and accounting firm by necessity will need to evaluate the general nature of the information as well as system output during the period of the audit engagement." *Id.*

(n128)Footnote 128. The applicable SEC rule prohibits an accountant from providing such services unless it can be reasonably concluded that the results of these services will not be subject to audit procedures during an audit of the audit client's financial statements. See Final Rule: Strengthening the Commission's Requirements, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003).

On the other hand, an accounting firm is not prohibited "from providing the above services for non-financial reporting (e.g., transfer pricing studies, cost segregation studies, and other tax-only valuations) purposes. Also, the rule does not prohibit an accounting firm from utilizing its own valuation specialist to review the work performed by the audit client itself or an independent third-party specialist employed by the audit client, provided the audit client or the client's specialist (and not the specialist used by the accounting firm) provides the technical expertise that the client uses in determining the required amounts recorded in the client financial statements. In those instances the accountant will not be auditing his or her own work because a third party or the audit client is the source of the financial information subject to the audit. Additionally, the quality of the audit may be improved where specialists are utilized in such situations." *Id.*

(n129)Footnote 129. The applicable SEC rule prohibits an accounting firm from providing to an audit client any actuarially oriented advisory service involving the determination of amounts recorded in the financial statements and related accounts for the audit client unless one can reasonably conclude that the results of these services will not be subject to audit procedures during an audit of the audit client's financial statements. The accountant, however, may assist a client in understanding the methods, models, assumptions and inputs used in computing such an amount. See Final Rule: Strengthening the Commission's Requirements, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003).

(n130)Footnote 130. The applicable SEC rule prohibits the accountant from providing any internal audit service that has been outsourced by the audit client that relates to the audit client's internal accounting controls, financial systems or financial statements unless one can reasonably conclude that the results of these services will not be subject to audit procedures during an audit of the audit client's financial statements. On the other hand, the above "prohibition on outsourcing" does not preclude engaging the accountant to perform nonrecurring evaluations of discrete items or other programs that are not in substance the outsourcing of the internal audit function. See Final Rule: *Strengthening the Commission's Requirements Regarding Auditor Independence*, at <http://www.sec.gov/rules/final/33-8183a.htm> (May 7, 2003).

In addition, since evaluating an audit client's internal controls and recommending improvements to those controls are part of the accountant's responsibilities under GAAS (or other applicable attestation standards), providing those services are not prohibited under the above SEC rule. *Id.*

(n131)Footnote 131. The applicable SEC rule prohibits "accountants from acting, temporarily or permanently, as a director, officer or employee of an audit client, or performing any decision-making, supervisory or ongoing monitoring functions for the audit client." *See* Final Rule: Strengthening the Commission's Requirements, Regarding Auditor Independence, at <http://www/sec.gov/rules/final/33-8183a.htm> (May 7, 2003).

(n132)Footnote 132. The applicable SEC rule provides that an accountant's independence is impaired with respect to an audit client when the accountant seeks out prospective candidates for management, executive or director positions; acts as negotiator on the audit client's behalf; or undertakes reference checks of prospective candidates. Under the rule, an accountant's independence will also be impaired when the accountant engages in psychological testing or other formal testing or evaluation programs or recommends or advises the audit client to hire a specific candidate for a specific job. *See* Final Rule: *Strengthening the Commission's Requirements*, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003).

(n133)Footnote 133. The SEC added "serving as an unregistered broker-dealer to [its] rules that prohibit serving as a promoter or underwriter, making investment decisions on behalf of the audit client or otherwise having discretionary authority over an audit client's investments, or executing a transaction to buy or sell an audit client's investment, or having custody of assets of the audit client." *See* Final Rule: Strengthening the Commission's Requirements, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003). According to the SEC, "[w]hen an accountant, in any capacity, recommends to anyone (including non-audit clients) that they buy or sell the securities of an audit client or an affiliate of the audit client, the accountant has an interest in whether those recommendations were correct. That interest could affect the audit of the client whose securities, or whose affiliate's securities, were recommended. These concepts are echoed in the 'simple principles' included in the legislative history to the Sarbanes-Oxley Act." *Id.* *See also* Floor Statement of Senator Sarbanes, 148 Cong. Rec. § 7364 (July 25, 2002).

(n134)Footnote 134. The SEC has "long maintained that an individual cannot be both a zealous legal advocate for management or the client company and maintain the objectivity and impartiality that are necessary for an audit." *See* Final Rule: Strengthening the Commission's Requirements, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003). Under the new SEC rule, an accountant may not provide any service to an audit client "that, under circumstances in which the service is provided, could be provided only by someone licensed, admitted, or otherwise qualified to practice law in the jurisdiction in which the service is provided." www.sec.gov/rules/final/33-8183a.htm.

(n135)Footnote 135. The applicable SEC rule prohibits an accountant from providing expert opinions or other services to an audit client, or an audit client's legal representative, for the purpose of advocating that audit client's interests in litigation or in a regulatory or administrative proceeding or investigation. *See* Final Rule: Strengthening the Commission's Requirements, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003). On the other hand, the SEC rule does not prohibit an audit committee (or, at its direction, legal counsel) from engaging the accountant to perform internal investigations or fact-finding engagements or preclude an accountant from explaining the positions taken or conclusions reached during the performance of any service by the accountant. *Id.*

(n137)Footnote 137. *See Glassman Raises Concern About Understanding of Internal Control Rules*, SEC TODAY, Vol. 2003-137, at 1 (Jul. 18, 2003).

(n138)Footnote 138. *See* Final Rule: Strengthening the Commission's Requirements, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003). *See also* Lawrence Goldfein and David Cace, *No Wiggle Room with Sarbanes-Oxley, Companies Need a Tight Control System to Fight Financial Fraud and Miscues*, Mergers & Acquisitions, Vol. 38, No. 4, (Mar. 2003).

To provide additional guidance concerning various independence issues (including the provision of non-audit services), the SEC's Office of the Chief Accountant recently issued its responses to "Frequently Asked" independence questions, which are posted at www.sec.gov/info/accountants/oacaFAQind080703.htm.

(n139)Footnote 139. See *Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees*, PCAOB Release No. 2005-014, PCAOB Rulemaking Docket Matter No. 017 (July 16, 2005). Subsequently, the PCAOB adopted certain technical amendments to these rules. See, e.g., *PCAOB Adopts Budget and Amends Ethics Rule*, SEC TODAY, Vol. 2005-225 at 1 (Nov. 23, 2005).

The SEC approved the PCAOB's proposed rules on April 19, 2006. See *Order Approving Proposed Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees and Notice of Filing and Order Granting Accelerated Approval of the Amendment Delaying Implementation of Certain of these Rules*, SEC Rel. No. 34-53677 (April 19, 2006).

(n140)Footnote 140. See also *SEC Issues Notice of PCAOB Rules on Independence and Tax Services*, SEC TODAY, Vol. 2006-47, at 1 (Mar. 10, 2006).

On March 7, 2006, the SEC published the PCAOB's proposed rules for comment and the comment period closed on April 3, 2006. Various entities, including each of the Big Four accounting firms, submitted comments expressing reservations or seeking clarification concerning the above proposed rules. For example, Deloitte & Touche expressed concern that the proposed restrictions on providing tax services to various persons who serve in financial oversight roles is too broad and that monitoring for compliance will be overly burdensome. See *Commenters Seek Clarification of PCAOB Rules*, SEC TODAY, Vol. 2006-67, at 1-2 (April 7, 2006).

(n141)Footnote 141. See *SEC Issues Notice of PCAOB Rules on Independence and Tax Services*, SEC TODAY, vol. 2006-47, at 1 (Mar. 10, 2006); *Implementation Schedule for Certain Ethics and Independence Rules Concerning Independence, Tax Services, and Contingent Fees*, PCAOB Rel. No. 2006-001 (March 28, 2006); SEC Rel. No. 34-53677 (April 19, 2006).

See also *Concept Release Concerning Scope of Rule 3523, Tax Services for Persons in Financial Reporting Oversight Roles*, PCAOB Release No. 2007-002 (April 3, 2007), p. 2.

In addition, in April 2008, the PCAOB adopted (subject to SEC approval) an amendment to the above-mentioned Rule 3523 (Tax Services for Persons in Financial Reporting Oversight Roles) which states that an accounting firm's independence is not necessarily impaired to the extent it provides tax services to a person covered by the rule during the portion of the audit period that precedes the beginning of the professional engagement period. See *Amendment to Rule 3523 Tax Services for Persons in Financial Reporting Oversight Roles*, PCAOB Rel. No. 2008-003 (April 22, 2008) (e.g., pp. 14-17), which was subsequently approved by the SEC. See *Order Approving Amendment to Rule 3523, Tax Services for Persons in Financial Reporting Oversight Roles*, Securities Exchange Act Rel. No. 34-58415 (August 22, 2008).

(n142)Footnote 142. See *Final Rule: Strengthening the Commission's Requirements*, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003).

(n143)Footnote 143. *Id.*

(n144)Footnote 144. See *Ethics and Independence Rule 3526, Communication with Audit Committees Concerning Independence*, PCAOB Rel. No. 2008-003 (April 22, 2008), which was approved by the SEC. See *Order Approving Proposed Ethics and Independence Rule 3526, Communication with Audit Committees Concerning Independence*, Securities Exchange Rel. No. 34-58415 (August 22, 2008).

(n145)Footnote 145. See PCAOB's April 22, 2008 press release entitled *Board Adopts New Ethics and Independence Rule Concerning Communications with Audit Committees and an Amendment to its Existing Tax Services Rule*, available at http://www.pcaobus.org/News_and_Events/News/2008/04-22.aspx.

(n146)Footnote 146. *Id.* Under Rule 3526, accounting firms are also required to make a similar communication each year for their continuing engagements. *Id.*

(n147)Footnote 147. See *Audit Firm Sanctioned for Violating Independence Rules*, SEC TODAY, Vol. 2004-76, at 7 (April 20, 2004). Based on the judge's decision (and the SEC order that finalized that decision), E&Y was also required to, *inter alia*, (i) disgorge the audit fees it received from the above client during the relevant time period and (ii) retain an independent consultant (acceptable to the SEC) to review its policies relating to business arrangements with audit clients.

(n148)Footnote 148. Under pre-existing requirements of the AICPA, SEC Practice Section, Requirements of Members (item e), the "lead" partner was required to rotate off the audit engagement of SEC registrants after seven years with a two-year "time-out" period.

(n149)Footnote 149. Final Rule: *Strengthening the Commission's Requirements*, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003).

(n150)Footnote 150. *Strengthening the Commission's Requirements*, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003). As used in the SEC rule, "the term audit partner means a partner (or person in an equivalent position) who is a member of the audit engagement team...who has responsibility for decision-making or significant auditing, accounting, and reporting matters that affect the financial statements or who maintains regular contact with management and the audit committee. The team audit partners would include the lead and concurring partners, partners such as relationship partners who serve the clients at the issuer or parent level, other than a partner who consults with others on the audit engagement during the audit, review, or attestation engagement regarding technical or industry-specific issues, transactions, or events, and the lead partner on subsidiaries of the issuer whose assets or revenues constitute 20% or more of the consolidated assets or revenues of the issuer."

The SEC rule concerning partner rotation contains specific provisions that address certain unique circumstances involving audits of investment companies. See Final Rule: *Strengthening the Commission's Requirements*, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003).

(n151)Footnote 151. Final Rule: *Strengthening the Commission's Requirements*, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003).

(n152)Footnote 152. *Id.*

(n153)Footnote 153. *Id.*

(n154)Footnote 154. *Id.*

(n155)Footnote 155. *Id.*

(n156)Footnote 156. *Id.*

(n157)Footnote 157. *Id.* *Strengthening the Commission's Requirements*, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003). Rotation requirements for concurring partners became effective as of the end of the second fiscal year after the effective date of the rotation requirements. *Id.* Thus, concurring partners for calendar year audit clients in which 2003 was their fourth or more year

in that role were able to serve as concurring partners for the 2004 audit before having to rotate. *Id.*

The SEC rule became effective for audit partners other than lead and concurring partners as of the beginning of the first fiscal year after the effective date of the rule. *Id.* As those partners were not mentioned in the Sarbanes-Oxley Act or previously subject to rotation requirements, the SEC established the first fiscal year as the first year of service for such partners, regardless of how many years they previously served. *Id.*

(n158)Footnote 158. Section 206. In connection with the foregoing, the SEC promulgated a rule under Section 206 of the Sarbanes-Oxley Act that states that "when the lead partner, the concurring partner, or any other member of the audit engagement team who provides more than ten hours of audit, review or attest services for the issuer accepts a position with the issuer in a financial reporting oversight role within the one year period preceding the commencement of audit procedures for the year that included employment by the issuer of the former member of the audit engagement team, the accounting firm is not independent with respect to that registrant." *See* Final Rule: Strengthening the Commission's Requirements, Securities Act Release No. 8183 (2002-2003 Transfer Binder) Fed. Sec. L. Rep. (CCH) P 86,822 (January 28, 2003). This SEC rule provides for a limited number of exemptions from its restrictions, including an exemption for "emergency or unusual circumstances." *Id.*

(n159)Footnote 159. 17 C.F.R. 201.102(e). Prior to 1995, Rule 102(e) was set forth in substantially its present form as Rule 2(e).

(n160)Footnote 160. Although the federal securities statutes do not expressly authorize the SEC to sanction professionals or to bar them from practice before the Commission, courts upheld its power to promulgate Rule 102(e) as "reasonably related" to the purposes of the federal securities laws. *See Sheldon v. SEC*, 45 F.3d 1515, 1518 (11th Cir. 1995) ; *Davy v. SEC*, 792 F.2d 1418, 1421 (9th Cir. 1986) ; *Touche Ross & Co. v. SEC*, 609 F.2d 570, 582 (2d Cir. 1979) ; *Checkosky v. CHAPTER 5A Accountants' Liability Under the Federal Securities Laws

1-5A Federal Securities Exchange Act of 1934 § 5A.10

AUTHOR: Marvin G. Pickholz Elliot Cohen Robert M. Carmen

§ 5A.10 Criminal Liability Under the Federal Securities Laws

Section 24 of the Securities Act provides criminal penalties for wilfully making an untrue statement or omitting any material fact in a registration statement. Similarly, Section 32(a) of the Exchange Act provides criminal penalties for wilfully making false or misleading statements in reports required to be filed under the Act. Violations of the anti-fraud provisions of Exchange Act Section 10(b) are also punishable under Section 32(a). These criminal sanctions were dramatically applied in *United States v. Natelli*,ⁿ¹ where the Second Circuit affirmed the conviction of defendant, a partner at Peat, Marwick, Mitchell & Co. ("Peat Marwick"), for criminal fraud in connection with the National Student Marketing offering.

Peat Marwick reported on National Student Marketing's financial statements. Just before National Student Marketing issued a proxy statement in September 1969, the auditors learned that over \$1 million of \$1.7 million in "unbilled accounts receivable" included in the 1968 financial statements had been written off by the company. However, instead of requiring a restatement of the 1968 earnings to reflect the write-off, the auditor approved netting the receivables write-off with a tax credit of approximately the same amount that he learned of when he prepared the financial information for inclusion in the September 1969 proxy statement. The netting procedure effectively negated the retroactive adjustment that would have shown materially decreased earnings for 1968. The court held that a jury could properly have found that the concealment of the retroactive adjustments to the company's 1968 year revenues and earnings was intentional.ⁿ²

The proxy statements also contained a nine-month unaudited statement that was prepared by the company with Peat Marwick's assistance. The unaudited statement included revenue from a suspicious sale. The question raised with respect to this report was whether the auditor had a duty to object to issuance of the unaudited statement or to insist upon independent verification of the "suspicious" transaction. The court held that there was a duty to object here, even though the statements were unaudited and under ordinary circumstances the auditor would not be required to discover the invalidity of booked accounts receivable. The court noted, among other things, that the company had a history of invalidly booked entries. Moreover, the auditor's ability to reject the transaction indicated that Peat, Marwick controlled the unaudited figures. Under these circumstances, the court found that "the accountant may [not] shut his eyes in reckless disregard of his knowledge that highly suspicious figures, known to him to be suspicious, were being included in the unaudited earnings figures with which he was 'associated' in the proxy statement."ⁿ³

In addition, as previously noted, in a unanimous opinion, the U.S. Supreme Court overturned the 2002 federal conviction of Arthur Andersen for destruction of various Enron-related documents by firm personnel. n4 The court's decision is predicated on a conclusion that the jury instructions allowed too low a threshold of culpable intent and on an express recognition that not all withholding of material from the government is wrongful. While this decision is a setback for the Justice Department, it is unclear how much prospective guidance it provides in light of provisions of the Sarbanes-Oxley Act, enacted after Andersen's conviction.

As noted by the Supreme Court, shortly after Andersen learned about potential accounting improprieties involving Enron, certain partners and employees of the firm urged members of its Enron engagement team (and other Andersen personnel) to comply with the firm's established document retention policy. n5 According to the court, this was "followed by substantial destruction" of Enron-related documents. n6 The document destruction ceased after Andersen was served with a document subpoena by the SEC. n7

Andersen was convicted of violating a general federal obstruction of justice statute [18 U.S.C. § 1512(b)] which "makes it a crime to 'knowingly use intimidation or physical force, threaten, or corruptly persuade another person ... with intent to ... cause' that person to 'withhold' documents from, or 'alter' documents for use in, an 'official proceeding.'" n8 In reversing Andersen's conviction, the Supreme Court held that the jury instructions failed to require the requisite statutory level of specific intent by instructing that the jury could convict the firm even if it honestly believed that its suggestions to its employees that they comply with the firm's document retention policy were lawful. According to the court, "[o]nly persons conscious of wrongdoing can be said to 'knowingly ... [and] corruptly persuade'." n9 In arriving at this conclusion, the court observed that "[d]ocument retention policies", which are created in part to keep certain information from getting into the hands of ... the Government, are common in business ... It is, of course, not wrongful for a manager to instruct his employees to comply with a valid document retention policy under ordinary circumstances." n10

The Supreme Court also held that the jury instructions incorrectly led the jury "to believe that it did not have to find *any* nexus between the 'persuasion' to destroy documents and any particular proceeding." According to the court, a person cannot be convicted under the charged statute for "'knowingly" and "corrupt[ly]" persuading someone to destroy documents unless the actor contemplated a particular proceeding in which the documents "might be material." n11

Just a month after the Andersen conviction, Congress included in the Sarbanes-Oxley Act three new provisions of the federal Criminal Code of particular interest to accountants: 18 U.S.C. §§ 1512(c), 1519 and 1520.

Section 1520(a), added by section 802 of the Act and implemented in related SEC rules, requires accounting firms to retain for seven years numerous workpapers and other documents relevant to their audits or reviews of public companies, including documents that do not support their final conclusions concerning certain matters. n12 Section 1520(b) subjects an accountant who knowingly and willfully violates the statutory requirement to preserve documents or any of the Commission's implementing rules to criminal liability, including fines and imprisonment up to ten years. n13

18 U.S.C. § 1519, anticipating some of the Supreme Court's criticisms in *Andersen*, imposes criminal liability for any person who knowingly "alters, destroys, mutilates, conceals, ... any document ... with the intent to impede, obstruct or influence the investigation or proper administration of any matter within the jurisdiction of any department or agency of the United States ... or in relation to or contemplation of any such matter ..." n14 The element of corrupt intent, which is required by § 1512(b) under which Andersen was prosecuted, is removed. In addition, some courts in the past have been reluctant to allow convictions under obstruction of justice statutes unless the defendant's misconduct was connected to a pending or imminent proceeding. n15 However, § 1519 is not confined merely to current or imminent proceedings. It sweeps more broadly to include any federal agency matter within the actor's contemplation. n16 Moreover, it should be noted that § 1519 also goes beyond destruction or mutilation to cover mere alteration. The maximum incarceration

under § 1519 is twenty years.

Section 1512(c) was enacted as a separate section to impose criminal liability for (among other things) altering documents to make them unavailable for use in an "official proceeding" where the intent was corrupt. Thus, while § 1512(b) - the section used in *Andersen* - requires both knowledge and corrupt intent and sets a ten-year maximum; new § 1512(c) increases the maximum to twenty years for purely corrupt conduct. n17

Notably, in 2003, the United States Attorney for the Northern District of California instituted a criminal proceeding against a former Ernst & Young ("E&Y") partner charging (i) falsification of records in a federal investigation in violation of § 1519 and (ii) obstruction of the examination of a financial institution in violation of 18 U.S.C. § 1517. n18 According to the government, the defendant allegedly (i) destroyed, altered and falsified both hard and electronic copies of workpapers related to audit and review services E&Y provided to a financial institution, (ii) assisted in the collection and production of altered workpapers to the Office of the Comptroller of the Currency, pursuant to a subpoena and (iii) gave sworn testimony to the SEC in which he concealed his alteration and destruction of documents. n19 Subsequently, the defendant pled guilty and was sentenced to one year in prison. n20 In the same matter, a former senior manager at E&Y pled guilty to a criminal count charging him with obstructing the examination of a financial institution. n21

Also, as discussed above, n22 in apparent response to criticisms from the judiciary (arising from the criminal prosecution of various former KPMG partners and employees), the business community and civil liberties organizations, the Justice Department has revised its corporate charging guidelines. For example, in contrast to the guidance contained in the superceded Thompson memo, the government's revised guidance instructs prosecutors *not* to take into consideration a corporation's advancement of attorneys' fees to its employees when evaluating the corporation's level of cooperation.

CHAPTER SA-5B SPECIAL ALERT TO CHAPTER 5B

1-SA5B Federal Securities Exchange Act of 1934

SPECIAL ALERT TO CHAPTER 5B

A Reorganization and Restructuring in Light of Recent Developments n*

The last few years have witnessed considerable expansion in the responsibilities of attorneys under the federal securities laws, as well as increasing exposure to liability and sanction. Most prominent among these developments is the Sarbanes-Oxley Act of 2002, pursuant to which the Securities and Exchange Commission (the "SEC") has issued rules setting forth minimum professional conduct standards for attorneys appearing and practicing before the SEC in the representation of issuers and, in certain circumstances, requiring that attorneys report within the issuer organization evidence of material violations of law. The last few years have also witnessed the beginning of a revitalization in private litigation seeking to impose liability on attorneys for their role in securities transactions under both established and still-evolving theories.

In the next release, Chapter 5B will be restructured and revised to take account of these developments. Highlights of the chapter will include:

- An in-depth discussion of the Sarbanes-Oxley attorney conduct rules, as well as the most recent pronouncements of the SEC staff and others on the subject.
- A survey of recent activity involving attorneys under SEC Rule 102(e).
- A detailed analysis of attorney liability under Section 10(b) of the Securities Exchange Act of 1934, including discussion of theories of primary and secondary liability after *Central Bank of Denver, N.A. v. First Interstate Bank of Denver, N.A.* and its progeny.

The recent developments in attorney responsibility and exposure will impact both in-house and outside counsel. The revised Chapter 5B is intended as a resource to help attorneys evaluate these developments.

CHAPTER 5B Attorney Liability Under the 1934 Act *

1-5B Federal Securities Exchange Act of 1934

Summary of This Chapter

There is a renewed interest in secondary actors in securities transactions including attorneys; private litigants are pursuing attorneys as aggressively as ever, though their efforts were dealt a blow by the Supreme Court's decision in *Stoneridge Investment Partners, LLC v. Scientific-Atlanta, Inc.* ⁿ¹ which holds that only those whose actions rise to the level of a primary violation of Section 10(b) of the Securities Exchange Act of 1934 (the "1934 Act") can be subject to liability. At the same time, the Securities and Exchange Commission (the "SEC") has stepped up enforcement efforts, naming attorneys as respondents in dozens of enforcement actions in the past few years. And, of course, attorneys remain subject to the Sarbanes-Oxley Act of 2002 ("Sarbanes-Oxley"), pursuant to which the SEC has issued rules requiring attorneys to report material illegality "up the ladder" within the issuer organization.

This chapter provides an overview of these potential bases of attorney liability and sanction. First, the chapter discusses attorney liability under the 1934 Act itself, with particular emphasis on Section 10(b) and *Rule 10b-5*--which historically have been, and continue to be, principal means by which alleged attorney wrongdoing in securities transactions is pursued. Second, the chapter discusses SEC proceedings against attorneys. Third, the chapter discusses the attorney conduct rules issued under Sarbanes-Oxley, violation of which is treated as a violation of the 1934 Act itself.

CHAPTER 5B Attorney Liability Under the 1934 Act *

1-5B Federal Securities Exchange Act of 1934 § 5B.01

§ 5B.01 Introduction

Attorneys have a wide range of roles under the federal securities laws touching on virtually every aspect of a client's use of the securities markets to raise capital, to manage or make investments, and to enter into mergers, acquisitions, and other transactions. The attorney may represent a corporation making an initial public offering. The attorney may represent an individual or entity that is acting on behalf of another, such as an investment banking firm or other financial advisor. The attorney may render an opinion concerning some aspect of a transaction involving securities. And there are any number of other possibilities. Each of these roles carries with it potential exposure to liability. When something in a securities transaction goes amiss, attorneys may find themselves among the targets of lawsuits seeking large damages or subject to potential sanction by the SEC. Historically, the most common 1934 Act claim against attorneys (and others) is a claim pursuant to Section 10(b) and Rule 10b-5, which make it unlawful to make false statements of material fact in connection with the purchase or sale of securities. ⁿ¹ And while the U.S. Supreme Court's decision in *Stoneridge Investment Partners, LLC v. Scientific-Atlanta, Inc.* ⁿ² makes clear that private litigants may not maintain claims for aiding and abetting Section 10(b) violations against attorneys and other secondary actors, the SEC retains authority to bring civil enforcement actions for aiding and abetting 1934 Act violations. Attorneys may also be subject to liability under other 1934 Act provisions including Sections 14, 18 and 20. Attorneys may also face disciplinary action from the SEC, which has the power, pursuant to SEC Rule of Practice 102(e), to suspend an attorney from practicing before it. Finally, attorneys may also face sanction under the Sarbanes-Oxley Act. Each of these bases of liability and sanction--under the 1934 Act itself, under SEC Rule of Practice 102(e) and under Sarbanes-Oxley--is discussed in turn.

CHAPTER 5B Attorney Liability Under the 1934 Act *

1-5B Federal Securities Exchange Act of 1934 § 5B.02

§ 5B.02 Attorney Liability Under Section 10(b) of the 1934 Act

Section 10(b) of the 1934 Act prohibits the use of any "manipulative" or "deceptive" device in connection with the purchase or sale of securities. n1 *Rule 10b-5*, promulgated by the SEC pursuant to Section 10(b), gives effect to the statute and states, in relevant part, that it is unlawful "[t]o make any untrue statement of a material fact or to omit to state a material fact necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading ... in connection with the purchase or sale of any security." n2 In other words, the elements of a *Rule 10b-5* claim are:

- a misstatement or omission;
- of a material fact;
- made with scienter;
- in connection with the purchase or sale of securities;
- on which investors relied;
- that proximately caused the investor's injury. n3

Attorneys who serve clients in securities transactions may provide legal advice on the structure of a transaction, the necessary disclosure to be made in connection with the transaction, the language to be used in the agreements and other documents associated with the transaction, and other matters. In addition, attorneys may participate in negotiating and drafting sessions with issuers, underwriters, purchasers, sellers, accountants and others who have a role in the undertaking. Attorneys may also be asked to provide information, such as opinion letters, that may be communicated directly to potential investors. All of these activities can subject attorneys to Section 10(b) liability. The most common bases for attorney liability under Section 10(b) are: (1) liability for misstatements; (2) liability for nondisclosures; and, (3) liability for insider trading, each of which is discussed in more detail below. n4

But one point to be made clear at the outset is that, at least in the context of lawsuits by private litigants, it appears that

liability must be premised on the attorney's conduct as a principal--for example, as one who makes a misstatement to the investing public.

Liability in a private lawsuit for aiding and abetting the Section 10(b) violation of another appears to be foreclosed by the Supreme Court's decision in *Stoneridge*, which affirmed the Court's earlier ruling in *Central Bank of Denver, N.A. v. First Interstate Bank of Denver, N.A.* n5

In *Stoneridge*, a shareholder brought suit against an issuer (a cable service provider) and two of its suppliers under 10(b), alleging that the issuer entered into fraudulent transactions with the suppliers for the purpose of inflating the issuer's reported revenues. n6 The plaintiff did not allege that the suppliers themselves made any direct misstatements upon which the plaintiff relied. Rather plaintiff sought to hold the suppliers liable (both as principals and as aidors and abettors) for misstatements made by the issuer in its financial statements on the basis that those misstatements were only made possible because the suppliers agreed to enter into fraudulent transactions with the issuer. n7 The suppliers moved to dismiss the complaint, arguing that the plaintiff could not prove reliance as the suppliers had no role in preparing or disseminating the financial statements that contained the misrepresentations. n8 The district court dismissed the claims against the suppliers, and the Eighth Circuit affirmed the dismissal.

The Supreme Court affirmed the dismissal as well, holding that the claim in substance amounted to an aiding and abetting claim, and that Section 10(b) provides no private right of action for aiding and abetting. n9 The Court reasoned that Congress decided against including in Section 10(b) a private right of action for aiding and abetting, and that in Section 104 of the Private Securities Litigation Reform Act of 1995 (the "Reform Act"), Congress permitted only the SEC to pursue aiding and abetting claims. n10 The Court further observed that the power to expand the reach of Section 10(b) to include aiding and abetting liability belongs to the legislature, and absent clear Congressional guidance the Court will not imply a right of action unfounded in the statute. n11

The *Stoneridge* Court went on to hold that in order to sustain liability against a secondary actor, "conduct of the secondary actor must satisfy each of the elements or preconditions for liability," including the reliance requirement. n12 Because the plaintiff could not prove that the suppliers made any misstatements upon which the plaintiff directly relied, and because the suppliers neither had a duty to speak to investors nor made any public statements affecting the stock price, the Court concluded that the claims against the suppliers were properly dismissed. n13 In reaching this decision, the Court rejected a so-called "scheme liability" theory, in effect that the suppliers should be held liable for the misstatements in the issuer's financial statements because "in an efficient market investors rely not only upon the public statements relating to a security but also upon the transactions those statements reflect." n14 The Court concluded that the suppliers' "deceptive acts, which were not disclosed to the investing public, [were] too remote to satisfy the requirement of reliance." n15

The *Stoneridge* Court's rejection of aiding and abetting liability reaffirms its earlier decision in *Central Bank*. In that case, the defendant Central Bank of Denver, N.A. served as indenture trustee for \$26 million in bonds to be issued by a public building authority to finance public improvements in a residential and commercial development in Colorado Springs. n16 The bonds were secured by liens on the property to be developed, and the bond covenants required that the property subject to the liens be worth at least 160 percent of the bonds' outstanding principal and interest. Annual reports confirming that this threshold was met were also required. After the authority defaulted on the bonds, plaintiff investors brought an action claiming that the underwriters and the public building authority violated Section 10(b). In addition, plaintiffs claimed that Central Bank, as trustee, aided and abetted the underlying violation, since it had received certain questionable appraisals of the property securing the bonds but took no action. n17 Central Bank's own internal assessment of the appraisals also suggested they were too optimistic. n18

There too, the Supreme Court rejected the claim for aiding and abetting liability under Section 10(b) on the grounds based on the plain language of the statute, which does not specifically proscribe aiding and abetting activity. n19 The Court reached this conclusion despite the fact that the private right of action for a primary violation of Section 10(b) is

implied, not express. The Court reasoned that since Section 10(b) prohibits only manipulative or deceptive acts, and "aiding and abetting liability reaches persons who do not engage in the proscribed activities at all, but who give a degree of aid to those who do," n20 such a claim was beyond the statute's prohibitions.

Several post-*Stoneridge* cases have further clarified the scope of secondary-actor liability. Of particular interest is a recent decision by the district court for the Eastern District of Pennsylvania which addresses attorney liability specifically. In *In re DVI Inc. Sec. Litig.*, shareholders brought a class action against an issuer, its law firm, and others, alleging that the various defendants all participated in a scheme to artificially inflate the issuer's stock price. n21 With respect to the law firm, the plaintiffs alleged that the attorneys "attained knowledge of DVI's financial situation and substantially assisted in all elements of its fraudulent scheme, including *inter alia*, drafting fraudulent public financial reports, making fraudulent disclosures related to DVI's internal controls, and deflecting inquiries" from the SEC." n22 The law firm objected to class certification, arguing that there was no presumption of reliance by investors on the attorneys because the attorneys neither had a duty to speak nor made any misrepresentations that were communicated to the public. n23

The court denied class certification as to the law firm. The court noted that the plaintiffs did not allege that the law firm "directly made any public misstatements that affected the market for DVI securities." Instead, the Lead Plaintiffs argued that the law firm should have been "held liable under section 10(b) because it participated in a scheme to defraud investors in DVI." n24 The plaintiffs attempted to distinguish *Stoneridge* on the basis that the law firm's allegedly "unique role in initiating and masterminding certain aspects of the overall scheme was sufficiently related to the injury suffered by DVI's investors as to satisfy the reliance element." n25 The court found that the plaintiffs

have not overcome the objection that investors in DVI did not rely upon the allegedly deceptive conduct of [the law firm]. Though Lead Plaintiffs allege that [the law firm] knew of the scheme, and at times took a more active part in assisting DVI in the scheme, the fact remains that none of this alleged conduct was publicly disclosed such that it affected the market for DVI's securities." n26

The court further held that the law firm owed no duty of disclosure to DVI's investors.

[1] Attorney Liability for Misstatements

Stoneridge did not foreclose attorney liability for misstatements under 10(b); rather, it merely clarified that to hold an attorney (or other secondary actor) liable in a private lawsuit requires proving all the elements under 10(b) and that vague allegations of participation in a "scheme to defraud" will not suffice. In a way, *Stoneridge* was an easy case, insofar as there was no real allegation that the secondary actors there ever undertook to speak either to the plaintiff directly or to the market -- rather, the claim against the secondary actors was premised upon their participation in underlying business transactions that affected the issuer's financial statements. *Stoneridge*, therefore, will not in all cases resolve a fundamental question on which many 10(b) cases against attorneys turn, that is, what constitutes a misstatement by an attorney, as opposed to a misstatement by the client.

The guiding principle with respect to attorney liability for misstatements appears to be that, in order for an attorney to be liable under Section 10(b), the misstatements in question must have been made by the attorney in some concrete sense. Analysis of that issue requires reference to pre-*Stoneridge* cases. At one end of the spectrum, preparation of transaction documents that contain misstatements will generally not, by itself, subject an attorney to liability. That conclusion seems manifest after *Stoneridge* but was relatively clear even before that decision.

For example, in *Schatz v. Rosenberg*, n27 a law firm represented a corporation in the purchase of two other corporations. The law firm drafted the closing documents and supplied the sellers at closing with an update letter prepared by the purchaser stating that the purchaser's financial condition had not materially changed. n28 The sellers

later premised a Section 10(b) claim against the law firm on misstatements made in these documents. The lower court granted the law firm's motion to dismiss for failure to state a claim. The Fourth Circuit affirmed, finding that because the law firm did not make any "independent affirmative misstatements" to the sellers, the firm did not violate Section 10(b). n29 The court stated, "[the law firm's] drafting of closing documents which contained representations by [its client] does not mean that they warranted or promised that [the client] had been honest." n30 Rather, when the law firm had "only 'papered the deal,' and did not participate in negotiation or solicitation," the firm was not responsible for any misstatements made in the documents. n31

At the other end of the spectrum, where attorneys do make representations, they must ensure those representations are free of misstatement even when based on client-supplied projections or opinions and even when the attorneys' representations themselves take the form of an opinion. n32 The Third Circuit's decision in *Eisenberg v. Gagnon* is particularly instructive. n33 In that case, an attorney and two others allegedly purchased coal rights and then sold those rights to tax-advantaged limited partnerships which they had formed. n34 The offering memoranda for two of these limited partnerships included a tax opinion letter prepared by the attorney and issued under the name of his law firm. n35 The plaintiffs bought shares in the limited partnerships but subsequently lost their investment, and were not afforded the tax deduction indicated in the opinion. n36 The case went to trial and the jury found for the attorney on the Section 10(b) allegations. n37

The Third Circuit overturned the jury verdict, holding that the trial court incorrectly instructed the jury that Section 10(b) liability must be predicated on misstatements about existing facts and not projections or opinions. n38 The court held that "an opinion that has been issued without a genuine belief or reasonable basis is an 'untrue' statement which, if made knowingly or recklessly, is culpable conduct actionable under § 10(b) and *Rule 10b-5*." n39 Furthermore, "[w]hen the opinion or forecast is based on underlying materials which on their face or under the circumstances suggest that they cannot be relied on without further inquiry," this may support a finding that the opinion was issued without a genuine belief that the information relied on was true. n40 The opinion letters at issue relied on management assumptions regarding projections for future options. n41 The management assumptions, in turn, relied on an engineering report which was later altered, as evidenced by a typeface change in the middle of the report. n42 The Third Circuit held that these facts were sufficient to order a new trial based on the above standards. n43

Beyond these two extremes, the law was to some extent unsettled before *Stoneridge*, and will remain that way until the impact of *Stoneridge* is fully considered. Courts have reached varying conclusions about the level of involvement a plaintiff must show to impose misstatement-based Section 10(b) liability on indirect participants, such as attorneys or accountants. Some courts, including the Ninth Circuit and district courts in the Seventh and Fifth Circuits (among others), n44 deem it sufficient that the defendant had "substantial participation" in the steps leading to the publication of the allegedly fraudulent statements. n45 This "substantial participation" test n46 is satisfied where there is "substantial participation or intricate involvement" of the secondary party in the preparation of fraudulent statements "even though that participation might not lead to the actor's actual making of the statements." n47

Other courts, including the Second Circuit, have adopted a more stringent "bright line" test. n48 Under this formulation, in order for Section 10(b) liability to be imposed, a defendant must not only make a material misstatement, but the misstatement must be attributed to the defendant at the time of public dissemination. n49 The defendant itself need not have communicated the misstatement to investors so long as it knew or had reason to know that it would be communicated. n50 In addition to the Second Circuit, the "bright line" test has been employed by the Eleventh Circuit, n51 and district courts within the First and Third Circuits. n52 The Tenth Circuit also applies the "bright line" test but does not require attribution to the secondary actor at the time of dissemination to the public. n53

Finally, at least one court--the district court in the high-profile Enron case--has employed yet another test that appears to borrow elements of both the "substantial participation" and "bright line" standards. The test employed in *In re Enron* n54 was as follows: "when a person, acting alone or with others, creates a misrepresentation [on which the investor-plaintiffs relied], the person can be liable as a primary violator." n55 "Provided that a plaintiff can plead and

prove scienter, a person can be a primary violator if he or she writes misrepresentations for inclusion in a document to be given to investors, even if the idea for those misrepresentations came from someone else." n56 Furthermore, "a person who prepares a truthful and complete portion of a document would not be liable as a primary violator for misrepresentations in other portions of the document. Even assuming such a person knew of misrepresentations elsewhere in the document and thus had the requisite scienter, he or she would not have created those misrepresentations." n57

The *Enron* court concluded based on this test that the plaintiff class had adequately alleged a Section 10(b) claim against a law firm that supposedly actively participated with its largest client, Enron, in an intricate Ponzi scheme. n58 The court rejected the law firm's contention that plaintiffs alleged only that the firm "merely represented and kept confidential the interests of its client." Rather, the court found that the law firm "was not merely a drafter, but essentially a co-author of the documents it created for public consumption concealing its own and other participants' actions," and, as such, was itself the maker of misstatements. n59 The court did add, however, that "had [the law firm] remained silent publicly, the attorney/client relationship and the traditional rule of privity for suit against lawyers might protect [it]." n60

[2] Attorney Liability for Nondisclosures

Attorney Section 10(b) liability on the basis of non-disclosure turns on whether there is a duty to disclose the material information at issue. In *Chiarella v. United States*, n61 the Supreme Court held that whether a secondary actor in a securities transaction owes such a duty generally depends on whether a "fiduciary or similar relation of trust and confidence" exists between the secondary actor and the investor. n62

Courts look to a number of factors to determine whether the requisite relationship exists, which, in large part, depends on the specific circumstances in which these claims arise. But one clear principle that emerges is that a relationship obliging attorneys to make full disclosure on a subject is created where the attorney begins to speak on that subject. The Third Circuit's decision in *Kline v. First Western Government Securities, Inc.* is a leading case. In *Kline*, purchasers of forward contracts sued a law firm that issued three opinion letters concerning the tax consequences of those investments, alleging both affirmative misrepresentations and material omissions. n63 Plaintiffs alleged, among other things, that defendants failed to include in their opinion letters any mention of multiple investigations which had been commenced by the IRS, SEC and the Minnesota Department of Commerce relating to the transactions. n64 The Third Circuit held that the attorneys could be liable for material omissions in the tax opinion letters. n65 The court reasoned that, because the law firm had elected to speak by issuing opinion letters, it had a duty to disclose information that bore directly on the accuracy of its opinion. n66 The court therefore refused to grant the defendant's summary judgment motion. n67

The Sixth Circuit reached the same conclusion in an en banc decision in *Rubin v. Schottenstein, Zox & Dunn*. n68 The issue in that case was whether an attorney and his law firm would be held liable based on an opinion letter to a corporate client regarding a transaction in which the company issued notes and stock. n69 The defendant attorney did not reveal that the transaction would result in the company's default on certain outstanding bank loans in either the opinion letter or two subsequent conversations the attorney had with the plaintiff investors. n70 The trial court granted summary judgment to the defendant attorney on the basis that no fiduciary or confidential relationship existed between the attorney and the plaintiffs, and that the opinion letter--which stated only that the company was acting within its corporate powers and did not speak to its financial stability--contained no affirmative misstatements. n71 The Sixth Circuit, sitting *en banc*, reversed, holding that while an attorney representing the seller in a securities transaction may not have an independent duty to disclose information, that attorney "assumes a duty to provide complete and nonmisleading information with respect to subjects on which he undertakes to speak." n72 The court went on to find that since the attorney's omission regarding the financial viability of the corporation was material, reliance by the plaintiffs may be presumed; thus plaintiffs had presented sufficient facts to warrant a trial on the merits. n73 Defendants' argument that attorneys should be treated differently due to their obligation of confidentiality was rejected

by the court out of concern that such an exception would "allow an attorney to mislead investors with impunity." n74

Beyond this basic principle, whether there exists a "fiduciary or similar relationship of trust and confidence" sufficient to give rise to a duty to speak requires exceedingly fact-intensive inquiry. n75 That said (though by no means uniformly accepted), a number of courts around the country distill the inquiry down to a five-part test that looks to:

- the defendant's relationship to the plaintiff;
- the defendant's access to the information as compared to the plaintiff's access;
- the benefit the defendant derives from the relationship;
- the awareness by the defendant of the plaintiff's reliance on him; and
- the defendant's activity in initiating the transaction. n76

The Eleventh Circuit's decision in *Ziemba v. Cascade Int'l, Inc.* is illustrative. n77 In that case, the Eleventh Circuit affirmed the dismissal of claims against a law firm on the basis that the attorneys had no duty to speak in connection with certain securities offerings. n78 The plaintiff-investors based their claims against the law firm on, among other things, the fact that the firm "played a significant role in drafting, creating, reviewing or editing allegedly fraudulent letters or press releases." n79 The court applied the five part test, and affirmed the dismissal because (1) there was no attorney-client relationship between the law firm and the plaintiffs; (2) the law firm had certain privileges not to disclose information about its client owing to its fiduciary obligations to that client; (3) no statements attributable to the law firm were made to the plaintiffs (in other words, the law firm had not undertaken to speak to the plaintiffs at all); and (4) there were no allegations that the law firm had initiated the transaction. n80

An illustrative case reaching the opposite conclusion is the decision in *Walco Investments, Inc. v. Thenen*, n81 a case arising out of a failed Ponzi scheme in which the court denied two law firm defendants' motions to dismiss. n82 Plaintiffs alleged that the law firms "were retained to ensure compliance with state and federal securities laws and to prepare Offering Documents to be relied upon by prospective investors," and that the law firms "knew the Offering Documents were designed to and in fact would induce investors to purchase the securities at issue." n83 The court applied the five-part test, and held that defendants' awareness that investors would be relying upon the information contained in the Offering Documents "may be sufficient to create a relationship between the law firms and Plaintiffs... which would give rise to a duty to disclose." n84

[3] Attorney Liability for Insider Trading

Attorneys may also face liability under Section 10(b) in an insider trading action. Under the conventional approach, first articulated by the SEC in *In re Cady, Roberts & Co.*, n85 and endorsed by the Supreme Court in *Chiarella v. United States*, n86 corporate "insiders" are prohibited from trading in the company's securities if they are in possession of material nonpublic information. n87 In such circumstances, insiders must either disclose the material non-public information or abstain from trading in the company's securities. The duty to disclose or abstain arises from "(i) the existence of a relationship affording access to inside information intended to be available only for a corporate purpose, and (ii) the unfairness of allowing a corporate insider to take advantage of that information by trading without disclosure." n88 Put differently, the responsibility arises out of a fiduciary duty insiders have to the shareholders of the corporation they serve. n89

An outside attorney representing a company engaged in a securities transaction may not be an "insider" in the traditional sense that an employee or member of a company's board of directors is. At the same time, both outside and in-house attorneys who provide legal services to their clients in connection with a securities transaction or who otherwise come

into possession of material inside information face grave risks of insider trading liability if they engage in transactions in the company's stock as either a "tippee" or a "quasi" or "temporary" insider. Under conventional insider trading prohibitions, "tippee" liability may be imposed on one who receives nonpublic information from an insider in breach of the insider's fiduciary duty if the "tippee" trades on the information while knowing of the insider's breach. n90 At the same time, the Supreme Court, in *Dirks v. SEC*, expressly recognized "quasi" or "temporary" insider status for attorneys and other professionals. n91 The Court stated:

Under certain circumstances, such as where corporate information is revealed legitimately to an underwriter, accountant, lawyer, or consultant working for the corporation, these outsiders may become fiduciaries of the shareholders. The basis for recognizing this fiduciary duty is not simply that such persons acquired nonpublic corporate information, but rather that they have entered into a special confidential relationship in the conduct of the business of the enterprise and are given access to information solely for corporate purposes ... When such a person breaches his fiduciary relationship, he may be treated more properly as a tipper than a tippee ... For such a duty to be imposed, however, the corporation must expect the outsider to keep the disclosed nonpublic information confidential, and the relationship at least must imply such a duty. n92

A related theory of insider trading liability--and one equally applicable to attorneys--is the so-called "misappropriation theory." Under the misappropriation theory, those who obtain material inside information through a confidential or fiduciary relationship are prohibited from using that information in connection with a securities transaction. n93 That was the Supreme Court's holding in *United States v. O'Hagan*. n94 In *O'Hagan*, a partner in a law firm that served as local counsel for a corporation planning a tender offer purchased stock in the target corporation based on non-public information. n95 The partner was not personally involved in advising over the transaction. The government nevertheless pursued criminal charges under Section 10(b) based on the misappropriation theory. The Eighth Circuit rejected the theory, stating that:

the misappropriation theory bases liability upon the mere misappropriation of material nonpublic information in breach of a fiduciary obligation and subsequent use of that information in a securities transaction. By its very definition then, it does not require either a material misrepresentation or nondisclosure. Thus, the misappropriation theory runs counter to [Supreme Court] holdings that the mere breach of a fiduciary obligation, without misrepresentation or nondisclosure, is not deception within the meaning of § 10(b). n96

The Supreme Court reversed and held that criminal liability for violations of Section 10(b) may be grounded on the misappropriation theory. n97 The Court explained that liability for misappropriation satisfies the statute's requirement that the conduct must be a "deceptive device or contrivance" because it involves a fiduciary's "feigning fidelity to the source of information" and because such deception may be cured by disclosure to the source of the intent to trade. n98 The Court further explained that such conduct was "in connection with the purchase or sale of a security" because the misappropriated information at issue "ordinarily" derives its value from such trading. n99 A number of courts (both before and after *O'Hagan*) have likewise held that attorneys may be liable for Section 10(b) violations under the misappropriation theory. n100 The First Circuit's decision in *United States v. Larrabee* illustrates a special risk of securities liability, and misappropriation in particular, in the law firm setting. In *United States v. Larrabee*, n101 the defendant Larrabee, a law firm employee, was found to have misappropriated material non-public information that the firm possessed in connection with its representation of a client in a potential merger. n102 Larrabee, who was not an attorney, served as Director of Fiduciary Services and had daily contact with the firm's attorneys and access to highly confidential information. n103 Larrabee used this information to tip off a stockbroker with whom he had both professional and personal dealings. n104 The First Circuit held that the tipper's knowledge that he was breaching a duty to his employer, the law firm, which was the owner of the confidential information, was sufficient to establish an expectation that the information might be misused by the tippee stockbroker. n105 The law firm was not charged in the matter. Finally, in at least one reported decision, an attorney was found liable for insider trading for conduct entirely

outside his professional functions. In *SEC v. Jakubowski*, n106 a financial institution issued stock in connection with a conversion from mutual to stock ownership, and gave preferential treatment to certain eligible accountholders. n107 Jakubowski, an attorney, was not such an accountholder, but a secretary in his firm was. n108 Jakubowski had the secretary sign a stock order form, and then sign an agreement transferring the stock rights to him. n109 Jakubowski's, not the secretary's, address was filled in on the stock order form, which clearly stated that the stock rights were not transferable. The Seventh Circuit held that in falsely representing on the order form that the stock was being purchased for the secretary's account, Jakubowski made a material misrepresentation directly to the issuer in order to induce acceptance of his offer to buy stock, thus his actions satisfied the "in connection with the purchase or sale of any security" language of Section 10(b). n110 Factoring Jakubowski's occupation into its finding of scienter, the court noted, "for a lawyer to fail to read a document central to a business transaction is reckless indeed... . Deliberate ignorance ... is a form of knowledge." n111

[4] Aiding and Abetting Liability Under Section 10(b)

As discussed above, private litigants may not pursue claims for aiding and abetting Section 10(b) violations. For a short time after *Central Bank*, it seemed possible that the Supreme Court would find that all actions for aiding and abetting a Section 10(b) violation were prohibited. This prospect was eliminated with respect to SEC actions in December 1995 when Congress overrode a presidential veto to pass the Private Securities Litigation Reform Act of 1995 (the "Reform Act"). Section 104 of the Reform Act explicitly granted the SEC the authority to bring an action against "any person that knowingly provides substantial assistance to another person in violation of [the antifraud provisions of the 1934 Act]," and provided that such persons "shall be deemed to be in violation of such provision to the same extent as the person to whom such assistance is provided." n112

In 1996, the Ninth Circuit interpreted Section 104 in the context of attorney liability in a case that remains instructive. In *SEC v. Fehn*, n113 Fehn (an attorney) was hired to represent a company as well as its officers and directors in an SEC inquiry arising from the company's initial public offering. n114 Subsequently, Fehn also assisted the company in preparing its quarterly securities filings. n115 The SEC brought an action under Section 10(b) against the corporation and Wheeler (the corporation's original promoter, president and Chief Executive Officer) as primary violators, and against Fehn as an aider and abettor on the basis of certain alleged misstatements and nondisclosures in the company's quarterly reports. n116 The SEC alleged that the quarterly reports at issue stated that Wheeler had only recently been appointed as the company's chief executive officer and president when, in fact, he had been the company's promoter, incorporator, and had effectively controlled the company since its incorporation in 1987. n117 The SEC also alleged that the quarterly reports failed to disclose certain prior securities violations by the corporation and Wheeler in connection with the initial public offering. n118 Although Fehn did not actually prepare the first report which initially contained the alleged errors, he reviewed it, made technical changes to it, and mailed it to the SEC. n119 Fehn's law firm then prepared two subsequent quarterly reports based on the information contained in the first. n120

The Ninth Circuit considered Section 104's legislative history as well as its text and held that the section authorizes the SEC to seek injunctions against those who aid and abet securities violations. n121 The court also concluded that, since the language of Section 104 mirrors the elements of aiding and abetting actions as expressed in prior case law, it "simply restores the pre- *Central Bank* status quo with respect to SEC injunctive actions." n122 Accordingly, in order to establish a claim against Fehn, the SEC was required to show: "(1) an independent primary violation; (2) actual knowledge by the alleged aider and abettor of the primary violation and of his or her own role in furthering it; and (3)'substantial assistance' by the defendant in the commission of the primary violation." n123

Applying this standard, the court found that Wheeler and the corporation had committed primary violations of Section 10(b) because the misstatements and nondisclosures were material and because they were made with reckless disregard for their truth or falsity. n124 The court then held that Fehn had substantially assisted these violations, finding that Fehn had actual knowledge of his role in the primary violation because he knew that the statements were inaccurate and knew that Wheeler had refused to include the correct information. n125 Thus, the court concluded that Fehn was liable for

aiding and abetting and that a permanent injunction was appropriate. n126

[5] Conspiracy To Violate Section 10(b)

Prior to *Central Bank*, many courts recognized that attorneys could also be subject to secondary liability based on conspiracy to violate the federal securities laws. After *Central Bank*, essentially every court that has considered this issue has held that there is no implied cause of action for conspiracy. n127 The *Central Bank* court determined that there could be no aiding and abetting liability under Section 10(b) because the text of that section did not explicitly impose it. Extending this rationale, courts have since held that Section 10(b)'s failure to include a cause of action for conspiracy precludes that theory as a basis for liability as well. n128

FOOTNOTES:

(n1)Footnote 1. 15 U.S.C. § 78j(b).

(n2)Footnote 2. 17 C.F.R. § 240.10b-5(b). The majority of cases against attorneys have arisen from *Rule 10b-5(b)*. But claims also have been brought under *Rule 10b-5(a)*, 17 C.F.R. § 240.10b-5(a), which makes it unlawful "[t]o employ any device, scheme, or artifice to defraud," and *Rule 10b-5(c)*, 17 C.F.R. § 240.10b-5(c), which makes it unlawful to engage in "any act, practice, or course of business which operates or would operate as a fraud or deceit upon any person." See generally *Scholes v. Stone, McGuire and Benjamin*, 786 F. Supp. 1385, 1400 (N.D. Ill. 1992) .

(n3)Footnote 3. *In re IKON Office Solutions, Inc., Sec. Litig.*, 277 F.3d 658, 666 (3d Cir. 2002) ; *Rothman v. Gregor*, 220 F.3d 81, 89 (2d Cir. 2000) ; *Ross v. Bank South, N.A.*, 885 F.2d 723, 728 (11th Cir. 1989) .

(n4)Footnote 4. In an unusual case, *Popovice v. Milides*, the Eastern District of Pennsylvania held that a client adequately stated a claim for securities fraud against her divorce attorney for misrepresentation of the value of his legal services. 11 F. Supp. 2d 638 (E.D. Pa. 1998) . The attorney performed substantial work for the client for eight months but refused to discuss his fee with her until just before the child custody phase of the trial was set to begin; at that point, the attorney presented the plaintiff with a fee agreement obligating her to deliver one million dollars worth of securities to his firm. 11 F. Supp. 2d at 640 . The court found that the plaintiff reasonably relied upon the attorney's misrepresentation of the value of his services and that an agreement exchanging services for stock is a "sale" for purposes of Section 10(b) and *Rule 10b-5*. 11 F. Supp. 2d at 643 .

(n5)Footnote 5. 511 U.S. 164 (1994).

(n6)Footnote 6. 128 S.Ct. at 766-68.

(n7)Footnote 7. *Id.* at 766.

(n8)Footnote 8. *Id.*

(n9)Footnote 9. *Id.* at 772-74.

(n10)Footnote 10. *Id.*

(n11)Footnote 11. *Id.* The Supreme Court stated: "The § 10(b) private cause of action is a judicial construct that Congress did not direct in the text of the relevant statutes. See, e.g., *Lampf, Pleva, Lipkind, Prupis & Petigrow v. Gilbertson*, 501 U.S. 350, 358-359, 111 S.Ct. 2773, 115 L.Ed.2d 321. Separation of powers provides good reason for the now-settled view that an implied cause of action exists only if the underlying statute can be interpreted to disclose the intent to create one, see, e.g., *Alexander v. Sandoval*, 532 U.S. 275, 286-287, 121 S.Ct. 1511, 149 L.Ed.2d 517. The decision to extend the cause of action is thus for the Congress, not for this Court. This restraint is appropriate in light of the PSLRA, in which Congress ratified the implied right of action after the Court moved away from a broad willingness to imply such private rights, see, e.g., *Merrill Lynch, Pierce, Fenner & Smith, Inc. v. Curran*, 456 U.S. 353, 381-382,

and n. 66, 102 S.Ct. 1825, 72 L.Ed.2d 182. It is appropriate for the Court to assume that when PSLRA § 104 was enacted, Congress accepted the § 10(b) private right as then defined but chose to extend it no further. *See, e.g., Alexander, supra*, at 286-287, 121 S.Ct. 1511."

Despite the Supreme Court's rejection of aiding and abetting liability under the federal securities laws, aiding and abetting liability may still exist under state securities laws. *See Houston v. Seward & Kissel LLP*, No. 07cv6305, 2008 U.S. Dist. LEXIS 23914 (S.D.N.Y. March 27, 2008) (holding that federal law does not preempt claims of aiding and abetting brought under state securities laws).

(n12)Footnote 12. *Id.* at 770.

(n13)Footnote 13. *Id.*

(n14)Footnote 14. *Id.* The Court further described the plaintiff's theory as follows: "Liability is appropriate, petitioner contends, because respondents engaged in conduct with the purpose and effect of creating a false appearance of material fact to further a scheme to misrepresent [the issuer's] revenue. The argument is that the financial statement [the issuer] released to the public was a natural and expected consequence of respondents' deceptive acts... . That causal link is sufficient, petitioner argues, to apply [the] presumption of reliance to respondents' acts."

(n15)Footnote 15. *Id.* at 770.

Litig.*, 840 F. Supp. 1558, 1564 (S.D. Fla. 1993); *Austin v. Bradley, Barry & Tarlow, P.C.*, 836 F. Supp. 36, 38 (D. Mass. 1993); *Buford White Lumber Co. Profit Sharing and Savings Plan & Trust v. Octagon Properties, Ltd.*, 740 F. Supp. 1553, 1560 (W.D. Okla. 1989).

At least with regard to the misappropriation theory of insider trading, the Supreme Court seems to have expanded the situations under which a person owes a fiduciary duty requiring disclosure of material information. *O'Hagan*, 521 U.S. 642, 117 S. Ct. at 2208 (a deceptive device or contrivance is found where "[a] fiduciary... pretends loyalty to the principal while secretly converting the principal's information for personal gain") (internal citations omitted). Whether the analysis of *O'Hagan* will be applied outside the misappropriation context remains an open question.

April 23, 2008) (presumption of reliance appropriate because attorney had assumed duty to disclose by preparing subscription agreements which purported to disclose certain risks but which did not disclose risk that ultimately led to plaintiff's loss).

(n73)Footnote 73. *143 F.3d at 268 .*

(n74)Footnote 74. *143 F.3d at 270 .*

(n75)Footnote 75. To take one example, in *Molecular Technology Corp. v. Valentine*, 925 F.2d 910 (6th Cir. 1991) , the Sixth Circuit considered Section 10(b) liability for nondisclosures in a private placement offering circular and other materials made available to potential investors. As to the attorney defendants, who were the attorneys for certain directors of the issuer, the court found that sufficient evidence had been presented to permit the jury to decide whether the attorneys had violated Section 10(b). The court based its decision on evidence that the attorneys had attended meetings and drafted documents that would have made them aware of alleged misrepresentations in the offering documents and further found that the attorneys had participated in marketing the offering by preparing marketing materials. On the basis of all of that, the court concluded that "a reasonable jury could find that [the attorneys] knew certain information in the amended offering circular was misleading and... had a duty to disclose that information to investors..." *925 F.2d at 918 . See also* *Lopes v. Vieira*, No. CV-F-06-1243, 2006 U.S. Dist. LEXIS 19481, *77 (E.D. Ca. March 12, 2008) (holding that whether attorney has a duty to disclose depends on the facts, and therefore cannot be resolved at pleading stage).

CHAPTER 5B Attorney Liability Under the 1934 Act *

1-5B Federal Securities Exchange Act of 1934 § 5B.03

§ 5B.03 Attorney Liability Under The Proxy Solicitation Provisions

Section 14(a) of the 1934 Act n1 and Rule 14a-9 n2 promulgated thereunder prohibit the solicitation of proxies by means of a proxy statement or other communication "containing any statement which ... is false or misleading with respect to any material fact, or which omits to state any material fact necessary to make the statement therein not false or misleading." n3

Attorney liability for misleading statements in proxy solicitations under Section 14 has rarely been litigated and does not appear to have been considered in recent years. But two 1970s decisions from the District of Delaware shed some light on the how courts might treat such a claim. In *Gould v. American Hawaiian Steamship Co.*, n4 decided in 1972, investors sued numerous defendants for disseminating misleading proxy materials in connection with the merger of two corporations. n5 These defendants included the surviving corporation and several of its outside directors, but did not include attorneys. n6 The Delaware District Court held that negligence must be proven in order to recover under Section 14, n7 and observed in dicta that "[s]ection 14(a) imposes liability on individuals soliciting proxies, and not on the attorneys or accountants preparing them." n8 Of course, the precedential value of this observation may be limited by the fact that there were no attorney defendants in the action. Four years later, the Delaware District Court squarely faced the question of attorney liability under Section 14 in *National Home Products, Inc. v. Gray*, n9 a case that arose from the battle for control of a company between two factions of the company's board of directors. n10 The court found that an attorney "recklessly" prepared proxy solicitation materials that contained a material misstatement. Against the background of the attorney's long-standing representation of one of the directors, including representation in another action arising from the same corporate control contest, n11 the court held that the attorney violated Section 14(a) and was liable for the corporation's solicitation expenses. n12

CHAPTER 5B Attorney Liability Under the 1934 Act *

1-5B Federal Securities Exchange Act of 1934 § 5B.04

§ 5B.04 Attorney Liability Under Section 18

Section 18 of the 1934 Act n1 provides an express private right of action to any person who suffers damages in the purchase or sale of a security in reliance on materially false or misleading statements. Section 18 thus permits private lawsuits against persons who "make or cause to be made" materially misleading statements in any reports or other documents filed with the SEC pursuant to the Exchange Act. n2

Judicial discussion of Section 18 liability is relatively rare--and discussion of attorney liability basically non-existent--because Section 18 imposes an actual reliance requirement that deters many prospective plaintiffs. n3 But there is no reason to assume that a Section 18 claim cannot be stated against an attorney in the same way as against any other actor in a securities transaction. n4

CHAPTER 5B Attorney Liability Under the 1934 Act *

1-5B Federal Securities Exchange Act of 1934 § 5B.05

§ 5B.05 Attorneys as Controlling Persons

Section 20 of the 1934 Act n1 imposes liability upon those who "control" any person who commits a primary violation of the federal securities laws. More precisely, Section 20(a) provides that "[e]very person who ... controls any person liable under any provision of [the 1934 Act] ... shall ... be liable jointly and severally ... unless the controlling person acted in good faith and did not directly or indirectly induce the act or acts constituting the violation" n2

Attempts to impose liability against attorneys as controlling persons under Section 20(a) have generally been unsuccessful because attorneys rarely exercise sufficient control over the principals in a securities transaction to meet the stringent standards established by Section 20(a). In *Barker v. Henderson, Franklin, Starnes & Holt*, n3 for example, the Seventh Circuit considered whether two attorneys exercised sufficient control over their client, a foundation operating a retirement village, to be liable under Section 20(a) for that client's violations of Section 10(b). n4 One attorney was a director of the foundation and chairman of its trust committee. n5 The other attorney had given advice since the inception of the project. n6 Both attorneys were incorporating directors of the foundation, but were immediately replaced upon incorporation by permanent directors. n7 Both attorneys also drafted the bylaws, negotiated the purchase of the land, and reviewed the selling documents. n8 Considering all of these facts, the Seventh Circuit rejected the claim of control person liability against the attorneys. The court found that "[t]he [law] [f]irms had no ability to control the [client]. Their ability to persuade and give counsel is not the same thing as 'control,' which almost always means the practical ability to direct the actions of the people who issue or sell the securities." n9

Decisions in the district courts are in accord. Thus, courts have held that there is no controlling person liability if an attorney merely serves as a legal advisor and agent of a corporation without exercising any actual control. n10 For example, in *Morin v. Trupin*, n11 investors sued the in-house counsel of a partnership that allegedly made a fraudulent offering of its shares to the public. n12 The court held that allegations asserting that this status created controlling person liability under Section 20(a) were insufficient. n13 In particular, the complaint failed insofar as it alleged only the lawyer's status as in-house counsel and did not allege that the lawyer "exercise[d] influence or control over, participated in the day-to-day operations of, or was a principal of" the limited partnership. n14

However, attorneys that do influence and participate in their client's decisions may be subject to controlling person liability. n15 In *In Re Parmalat*, n16 for instance, purchasers of Parmalat securities filed a class action lawsuit against a number of defendants for securities law violations, including Parmalat's outside counsel and that counsel's law firm. The court found that the attorney was "one of Parmalat's most important outside lawyers" who had "drafted, negotiated and

reviewed many of the legal documents that were necessary to effectuate the fraudulent transactions." n17 Accordingly, the court held that he could be considered a "control person" under Section 10(b). The court also found that his law firm could be considered "control person" for purposes of Section 20(a) because "the partnership had the power to manage or direct any single partner." n18

CHAPTER 5B Attorney Liability Under the 1934 Act *

1-5B Federal Securities Exchange Act of 1934 § 5B.06

§ 5B.06 SEC Proceedings

The SEC, of course, may bring enforcement proceedings for violations of the federal securities laws against attorneys in the same way it can commence proceedings against anyone else. Additionally, Rule 102(e) of the SEC's Rules of Practice n1 provides that the SEC may suspend an attorney from practicing before it if it finds that the attorney is unqualified, is "lacking in character or integrity or ... engaged in unethical or improper professional conduct," or "willfully violated or willfully aided and abetted the violation of any provision of the Federal securities laws." n2 The Rules of Practice define the term "practice" broadly, to include "[t]ransacting any business with the Commission." n3

[1] The SEC and Attorney Liability

The SEC has stepped up its scrutiny of attorneys in recent years, increasingly demonstrating a willingness to commence both enforcement proceedings under the substantive provisions of the securities laws and proceedings under Rule 102(e). n4 Several recent speeches by SEC Commissioners and Staff reaffirm the SEC's interest in the role of attorneys as "gatekeepers." n5 For instance, in March 2007, Chairman Christopher Cox described attorneys as "crucial gatekeepers" responsible for safeguarding shareholder interests and reiterated the SEC's intention to ensure attorney compliance through enforcement actions. n6 Similarly, Director of Enforcement Linda Thomsen recently confirmed, in connection with the options backdating scandal, that the SEC "will still look at lawyers." n7 And the SEC's enforcement program demonstrates an increasing willingness to pursue not only lawyers who engage in wrongdoing for direct personal gain, but also those who find themselves implicated in client wrongdoing -- in other words, those who fail to satisfy their responsibility as "gatekeepers" either intentionally or through reckless inattention. Several recent SEC proceedings against attorneys illustrate this trend. n8 In *In the Matter of John B. Zankowski*, the SEC alleged that Zankowski, outside counsel for Nutraceutical Clinical Laboratories International, Inc., violated various antifraud and registration provisions of the federal securities laws. n9 Zankowski was alleged to have orchestrated a fraudulent reverse merger and stock sale for Nutraceutical, as well as actively "deceiving Nutraceutical's transfer agent with a legal opinion falsely representing that the company's shares were exempt from the registration provision of the securities law." n10 At the conclusion of these activities, Zankowski then sold \$200,000 worth of Nutraceutical's shares. n11 The SEC instituted proceedings against Zankowski, and suspended him from appearing or practicing before the Commission under Rule 102(e). n12

Similarly, in *SEC v. Scott*, the SEC brought charges against attorney Craig Scott for aiding and abetting violations of SEC reporting rules for FFP Marketing Company, Inc. ("FFP"). n13 Through his employment at FFP, Scott served as

both Chief Financial Officer and general counsel. Scott was also responsible for preparing and filing notices of late filings (Forms 12b-25). However, in preparing these filings, Scott "fraudulently omitted to disclose that an internal investigation of the company's accounting lapses caused the company to delay filing its periodic reports." n14 Under Rule 102(e), the SEC denied Scott from appearing or practicing before the Commission as an attorney for a minimum of three years. n15

Finally, in *SEC v. Leboe and Rasmussen*, the SEC alleged that Dale Rasmussen, a former Enron attorney, actively negotiated and drafted agreements that enabled Enron to circumvent GAAP standards and recognize improper gains. n16 The complaint further alleged that Rasmussen actively sought to keep outside auditors unaware of undocumented side agreements, thereby further enabling Enron to depart from GAAP standards. n17 Rasmussen ultimately consented to the entry of an administrative order pursuant to Rule 102(e), under which he was barred from practicing before the Commission as an attorney for at least three years. n18

The SEC has also actively pursued attorneys involved in potentially improper options practices. Beginning in 2006 when the options backdating scandal first came to light, the SEC commenced proceedings against numerous attorneys for their roles in alleged options backdating. For instance, on August 9, 2006, the SEC charged William F. Sorin, former general counsel of Comverse Technology, Inc., with numerous securities laws violations arising out of his involvement in options backdating at Comverse. n19 The SEC alleged that Sorin and others engaged in a decade-long fraudulent scheme to grant undisclosed in-the-money options to themselves and to others by backdating stock option grants to coincide with historically low closing prices of Comverse common stock. n20 Among other things, the SEC alleged that Sorin created company records that falsely indicated that Comverse's compensation committee had approved a grant of stock options on a date when, in reality, no such corporate action took place. The SEC also alleged that Sorin created false company records that facilitated a similar backdating scheme at one of Comverse's subsidiaries. n21 On January 10, 2007, Sorin agreed to a settlement with the SEC which included, in addition to civil penalties, disgorgement, and an injunction against further violations of the securities laws, the entry of an administrative order pursuant to Rule 102(e) suspending him from appearing or practicing before the Commission as an attorney. n22

FOOTNOTES:

(n1)Footnote 1. 17 C.F.R. § 201.102(e) (LEXIS 2004). Many commentators have questioned the validity of Rule 102(e) and its predecessor, Rule 2(e), suggesting that the rule permits the SEC to usurp the judicial function of disciplining attorneys, that it is an unauthorized incursion by a federal agency into state rights to practice law, and that it is an unchartered alternative forum to seek to bring a de facto proceeding to enforce substantive law violations free of the procedural and tactical limitations imposed by the federal district courts. *See, e.g.,* Mitchell F. Dolin, *SEC Rule 2(e) After Carter-Johnson: Toward a Reconciliation of Purpose and Scope*, 9 Sec. L. J. (1982); Note, *SEC Disciplinary Proceedings Against Attorneys Under Rule 2(e)*, 79 Mich. L. Rev. 1270 (1981). At least one SEC commissioner agreed with the criticism that Rule 2(e) was an invalid exercise of the SEC's power. *In re Keating, Muething & Klekamp*, Exch. Act Rel. No. 34-15982, 1979 SEC LEXIS 1186, at *49 (July 2, 1979) (Comm. Roberta Karmel, dissenting). Courts that have considered this issue, however, have consistently found that Rule 102(e) (and its predecessor, Rule 2(e)) is a valid exercise of the SEC's power. *See, e.g.,* *Touche Ross & Co. v. SEC*, 609 F.2d 570 (2d Cir. 1979); *Davy v. SEC*, 792 F.2d 1418, 1421 (9th Cir. 1986); *Danna v. SEC*, No. C-93-4158 CW, 1994 U.S. Dist. LEXIS 7256, at *5 (N.D. Cal. Feb. 8, 1994); *Sheldon v. SEC*, 45 F.3d 1515, 1518 (11th Cir. 1995); *Checkosky v. SEC*, 23 F.3d 452, 493 (D.C. Cir. 1994), *remanded*, 139 F.3d 221, 225 (D.C. Cir. 1998) (dismissing proceedings due to SEC's failure to provide a "clear mental state standard").

(n2)Footnote 2. The Rules of Practice also allow the SEC temporarily to suspend an attorney without a preliminary hearing if that attorney has been "by name," in an action brought by the SEC, permanently enjoined, or found to have violated, the securities laws, either primarily or as an aider and abettor. 17 C.F.R. § 201.102(e)(3)(i-iii) (LEXIS 2004). *See In re Emanuel Fields*, Exch. Act Rel. No. 33-5404, 1973 SEC LEXIS 2816, at *10 (June 18, 1973) (rejecting respondent's assertion that this section of the Rules of Practice violates federal due process guarantees).

(n3)Footnote 3. 17 C.F.R. § 201.102(f)(1). *See, e.g., In re Emanuel Fields*, 1973 SEC LEXIS 2816, at *10 n.20 ("A lawyer barred from appearing before us is still free to hold himself out to the world as a lawyer, to practice before all tribunals save this one, and to counsel clients with respect to the infinite variety of legal problems that do not impinge on the area affected by the federal securities statutes."). Although proceedings under Rule 2(e) (the predecessor to Rule 102(e)) were once private, the SEC amended Rule 2(e) in 1988 to require that such proceedings be public unless otherwise ordered by the SEC on its own motion or the motion of a party. 17 C.F.R. § 201.102(e)(6) (LEXIS 2004).

(n4)Footnote 4. The seminal Rule 2(e) decision (the predecessor of the current Rule 102(e)) is *In re Carter & Johnson*. *In re Carter & Johnson* was a Rule 2(e) proceeding brought against attorneys who represented a company during a year-long period in which the company failed to disclose matters relating to a credit agreement in numerous documents. The company's chairman, controlling stockholder, and founder allegedly refused to make certain disclosures even though the attorneys urged him to do so on numerous occasions. The SEC claimed that the failure of the attorneys to report the nondisclosures to the company's board amounted to unethical conduct in violation of Rule 2(e), and brought a proceeding against Carter & Johnson alleging violations of the securities laws. The administrative law judge found against the attorneys on all counts. On review, the Commission reversed these findings. Exch. Act Rel. No. 34-17597, 1981 SEC LEXIS 1940 (Feb. 28, 1981) .

(n5)Footnote 5. In a 2004 speech, the SEC's then-Director of Enforcement Stephen Cutler first emphasized the role of attorneys as "gatekeepers" to the securities markets--in the director's words, the "sentries of the marketplace" who "advise companies on disclosure standards and other securities law requirements." *See* S. Cutler, The Themes of Sarbanes-Oxley as Reflected in the Commission's Enforcement Program, Speech at UCLA School of Law (September 20, 2004). That speech also noted that the SEC has "named lawyers as respondents or defendants in more than 30 of our enforcement actions in the past 2 years," and promised additional such actions in the future. *Id.*

CHAPTER 5B Attorney Liability Under the 1934 Act *

1-5B Federal Securities Exchange Act of 1934 § 5B.07

§ 5B.07 Attorney Liability Under the Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act, signed into law on July 30, 2002 n1, made sweeping changes in accounting and auditor oversight, corporate governance, and executive responsibility which apply to all public companies. Section 307 of Sarbanes-Oxley requires that the SEC set "minimum standards of professional conduct for attorneys appearing and practicing before [it] in any way in the representation of issuers." n2 On January 23, 2003, after much debate and comment over the proposed rule, the SEC adopted a final rule concerning professional conduct by attorneys. n3 The final rule, which became effective on August 5, 2003, requires that attorneys who "appear and practice" before the SEC "in the representation of an issuer" n4 report evidence of material violations of law to the chief legal officer (the "CLO") or chief executive officer (the "CEO") of the issuer. n5 If the CLO or CEO does not respond appropriately to the report, the rule requires the attorney to report the evidence "up the ladder" to the issuer's audit committee, another committee of independent directors, or the full board of directors. n6 This reporting requirement is triggered when the attorney becomes aware of evidence such that "it would be unreasonable, under the circumstances, for a prudent and competent attorney not to conclude that it is reasonably likely that a material violation has occurred, is ongoing, or is about to occur." n7 If the reporting attorney believes that the CLO or the CEO has provided an appropriate response, then the reporting attorney has no further obligations. If, however, this does not occur, the attorney must report the evidence of the violation "up the ladder" to the issuer's audit committee, or, if no such committee exists, another committee of independent directors or the full board. n8 Exclusive authority to enforce the rule is vested with the SEC--the rule explicitly provides that it creates no private right of action against an attorney, law firm, issuer, or any other entities having responsibilities under the rule. n9 The SEC also proposed a "noisy withdrawal" provision in November 2002 which would, in certain circumstances, have permitted or required attorneys who become aware of possible violations to withdraw from representation of an issuer, to notify the SEC of the withdrawal, and to disaffirm documents filed with or submitted to the SEC on behalf of the issuer. After receiving extensive comments on its original proposal, the SEC advanced an alternative proposal in January 2003 merely requiring attorneys who become aware of possible violations to withdraw from representation in writing and cease participation in the matter. Neither version of the proposed rule has yet been adopted by the SEC in final form.

FOOTNOTES:

(n1)Footnote 1. H.R. 3763, 107th Cong. (2002) (enacted).

(n2)Footnote 2. H.R. 3763, § 307.

(n3)Footnote 3. SEC Press Release No. 2003-13 (Jan. 13, 2003). The SEC released the text of the final rule shortly

thereafter. *See SEC Release Nos. 33-8185, 34-4726, IC-25919, 2003 SEC LEXIS 256 (Jan. 29, 2003)* .

(n4)Footnote 4. Under this rule, a lawyer is "appearing and practicing" before the SEC when transacting any business with the SEC; representing an issuer in an SEC administrative proceeding or in connection with an SEC investigation, inquiry, information request, or subpoena; providing advice concerning U.S. securities laws or SEC rules or regulations regarding any document that the attorney has notice will be filed with or submitted to, or incorporated into any document that will be filed or submitted to, the SEC; or advising an issuer as to whether information is required to be filed with or submitted to the SEC. An attorney acts "in the representation of an issuer" when providing legal services for the issuer, regardless of whether the attorney is employed or retained by the issuer. *See 2003 SEC LEXIS 256, at **167-168, 170.*

(n5)Footnote 5. *See 2003 SEC LEXIS 256, at **174-75*

(n6)Footnote 6. *See 2003 SEC LEXIS 256, at **175-176* .

(n7)Footnote 7. *See 2003 SEC LEXIS 256, at *170* .

(n8)Footnote 8. *See 2003 SEC LEXIS 256, at **176-177.*

The rule also allows for an alternative reporting procedure, under which an issuer may establish a qualified legal compliance committee (a "QLCC"), which would be responsible for carrying out the requirements of the rule. A QLCC must consist of at least one audit committee member (or, in the absence of an audit committee, one member of a committee of independent directors), and two or more independent directors. The QLCC changes the reporting duties of attorneys and CLOs by relieving them of any further obligation under the rule once they have reported to the QLCC. *See 2003 SEC LEXIS 256, at **180-181.*

(n9)Footnote 9. *See 2003 SEC LEXIS 256, at *186.*

The SEC has alleged that an issuer filed false reports with the SEC that failed to disclose related party transactions, despite the advice of its U.S. counsel. *SEC v. TV Azteca S.A.C.V., et al.* (Civil Action No. 1:05-CV-00004, D.D.C.), Litigation Release No. 19022 (January 4, 2005). TV Azteca's U.S. counsel read a newspaper article discussing a TV Azteca officer's false denials about the reports and advised the CEO and then the issuer's board to take corrective action. *Id.* The issuer did not take any corrective action, causing the U.S. counsel to resign, stating that its resignation was pursuant to the Rule. *Id.* The U.S. counsel did not report the matter outside the issuer to the SEC. There is no SEC allegation of any violation of the Rule by the U.S. counsel. *Id.*

* This chapter was prepared by Antonio Yanez, Jr. of Willkie Farr & Gallagher LLP, New York, New York. Mr. Yanez specializes in securities and financial reporting. His experience includes representation of issuers, officers, directors, accounting firms, and others in securities class actions, SEC investigations, internal investigations, and other matters. Derek M. Schoenmann, Rina Vazirani, and Alan A. Stevens, associates of the firm, assisted in researching and writing this chapter.

CHAPTER 5C Broker-Dealers' Liabilities Under the Securities Exchange Act *

1-5C Federal Securities Exchange Act of 1934 § 5C.01

§ 5C.01 Introduction

This chapter discusses the special issues that arise in connection with claims by private parties under the Exchange Act when the defendant is a broker-dealer. Other parts of this treatise deal with (1) the liabilities of underwriters and other broker-dealers under the Securities Act n1 and (2) issues relating to claims under the Exchange Act against participants in the securities markets generally, whether or not they are broker-dealers. n2 This chapter also does not discuss the panoply of requirements that broker-dealers must comply with under the Exchange Act and implementing regulations, but which may only be enforced by the SEC, the SROs, or in criminal proceedings. n3

Beginning with *Cort v. Ash*, n4 the federal courts stopped authorizing new private rights of action under federal statutes, including the Exchange Act. In *Cort v. Ash*, the Supreme Court established four factors for consideration in determining whether a private remedy is implicit in a statute that does not expressly provide for one:

- (1) whether the plaintiff is a member of the class for whose benefit the statute was enacted;
- (2) whether the legislative history indicates any legislative intent, explicit or implicit, either to create or deny such a remedy;
- (3) whether the implication of a private remedy would frustrate the underlying purposes of the legislative scheme; and
- (4) whether the cause of action is one traditionally relegated to state law. n5

Applying *Cort v. Ash* to the Exchange Act, the Supreme Court later stated that the "central inquiry remains whether Congress intended to create, either expressly or by implication, a private cause of action." n6 As a result of these standards and the addition of subsection (f) to Section 7 of the Exchange Act, prohibiting borrowers from violating the margin rules, the courts no longer recognize a private right of action for violations of Section 7. n7

Since *Cort v. Ash*, courts generally have agreed that there is no private right of action under the Exchange Act based on violation of SRO rules. n8 However, this chapter discusses certain SRO rules and guidance in some detail because they are an important source for establishing standards for broker-dealers' conduct and may be relevant to private claims asserted under the Exchange Act. n9

The tendency to afford relief under the Exchange Act using more liberal standards than state law slowed or even reversed itself after *Ernst & Ernst v. Hochfelder*, n10 and Congress imposed new restrictions on *Rule 10b-5* claims in the Private Securities Litigation Reform Act ("PSLRA"). n11 Moreover, as a result of the Supreme Court's decision in *Shearson/American Express v. McMahon*, n12 claims under the Exchange Act are subject to compulsory arbitration to the same extent as state law claims, with the additional effect of making federal court jurisdiction useless to a customer who has signed an arbitration agreement. Finally, Section 107 of the PSLRA n13 amended the Racketeer Influenced and Corrupt Organizations Act n14 to preclude claims for treble damages based on *Rule 10b-5* violations unless the defendant has been convicted for the violations.

For these reasons, the Exchange Act does not offer anything resembling a comprehensive set of private remedies against broker-dealers. n15 This chapter does not discuss any of the remedies available against broker-dealers under state law, notably the principles of agency, bailment and misrepresentation.

FOOTNOTES:

(n1)Footnote 1. 2 Matthew Bender's Securities Regulation Series: Federal Securities Act of 1933, ch. 9 (2005).

(n2)Footnote 2. *See* ch. 5, *supra.*).

(n3)Footnote 3. *See* ch. 3, *supra.*). Section 15 of the Exchange Act (1) requires broker-dealers to register with the SEC and (2) authorizes the SEC to adopt regulations having the force of law to prohibit certain types of conduct, such as fraud, and to promote certain objectives, such as financial responsibility. Section 15(b)(8) subjects broker-dealers to additional regulation by requiring them to belong to a securities association or national securities exchange (collectively, "self-regulatory organizations" or "SROs"). Sections 6(b)(5)-(6) and 15A(b)(6)-(7) require SROs to adopt rules, among other things, (1) to prevent fraudulent and manipulative practices, (2) to promote just and equitable principles of trade, and (3) to discipline members for violations of the Exchange Act, the rules and regulations thereunder, and SRO rules. Section 19(b) requires SROs to obtain the SEC's approval to amend their rules, and Section 19(c) authorizes the SEC itself to adopt rules for the SROs.

CHAPTER 5C Broker-Dealers' Liabilities Under the Securities Exchange Act *

1-5C Federal Securities Exchange Act of 1934 § 5C.02

§ 5C.02 Investment Recommendations

[1] Suitability

A suitability claim is a claim that a broker-dealer made a recommendation to a customer to make an investment that was not suitable in terms of the customer's financial circumstances and stated investment objectives. A classic example is recommending volatile stocks that do not pay any regular dividends and present a significant risk of loss of principal to an elderly person who depends on a regular return on investments for financial support. It is equally unsuitable to recommend such securities to a customer whose stated investment objectives are regular income and conservation of principal, regardless of the customer's financial circumstances. n1

Self-regulatory organization ("SRO") rules require a broker-dealer to take affirmative steps to learn about both the securities it recommends and its customers' financial circumstances and investment objectives. n2 None of these requirements, however, are directly relevant to a private claim for damages under the Securities Exchange Act of 1934 ("Exchange Act"). The courts are unlikely to authorize a private right of action for damages based on the SRO rules. n3 The only claim that the courts recognize under the Exchange Act based on an alleged recommendation of an unsuitable investment is a claim under *Rule 10b-5*. n4

A *Rule 10b-5* claim, of course, requires proof of *scienter*, i.e., intent to defraud or, at a minimum, recklessness. The scienter requirement is inconsistent with holding a broker-dealer liable for a lack of care in making recommendations. As a result, and as described in detail below, relief for unsuitable investments under *Rule 10b-5* is quite restricted.

In *Hanly v. SEC*, a 1969 opinion affirming the grant of an injunction to the SEC prohibiting unsuitable recommendations by a broker-dealer, Judge Timbers wrote:

A securities dealer occupies a special relationship to a buyer of securities in that by his position he implicitly represents he has an adequate basis for the opinions he renders. While this implied warranty may not be as rigidly enforced in a civil action where an investor seeks damages for losses allegedly caused by reliance upon his unfounded representations, its applicability in the instant proceedings cannot be questioned.

[The security that petitioners recommended] was an over the counter stock. Those who purchased through petitioners could not readily confirm the information given them. In Charles Hughes & Co., Inc.

v. SEC ... this Court recognized the difficulties involved in over the counter stocks and the special duty imposed upon those who sell such stocks not to take advantage of customers in whom confidence has been instilled.

In summary, the standards by which the actions of each petitioner must be judged are strict. He cannot recommend a security unless there is an adequate and reasonable basis for such recommendation. He must disclose facts which he knows and those which are reasonably ascertainable. By his recommendation he implies that a reasonable investigation has been made and that his recommendation rests on the conclusions based on such investigation. Where the salesman lacks essential information about a security, he should disclose this as well as the risks which arise from his lack of information.

A salesman may not rely blindly upon the issuer for information concerning a company, although the degree of independent investigation which must be made by a securities dealer will vary in each case. Securities issued by smaller companies of recent origin obviously require more thorough investigation.
n5

As the quoted language indicates, Judge Timbers recognized that the same standard might not apply to a private action for damages. More importantly, *Hanly's* emphasis on duties to inquire concerning the security and the customer was premised on a negligence standard. n6 Accordingly, the standard enunciated in that case could not survive the Supreme Court's decisions requiring scienter for *Rule 10b-5* claims. n7 In *Clark v. John Lamula Investors, Inc.* n8 the plaintiff sought damages based on a broker's alleged recommendation of unsuitable securities pursuant to *Rule 10b-5*, Section 17(a) of the Securities Act of 1933, and provisions of the NASD's rules of fair practice, and the district court had entered judgment in her favor based on the jury's special written findings. n9

The court of appeals affirmed on the basis that the jury's findings established liability under the standards of *Rule 10b-5*, including the scienter requirement confirmed by the Supreme Court. The court explained:

It is clear from the jury's answers to the interrogatories, that appellants violated *Rule 10b-5*. The jury specifically found that the debentures were unsuited to appellee's needs, that appellant Lamula knew or reasonably believed they were unsuitable, but that he recommended them to her anyway. In addition, the jury found that Lamula failed to inform her (1) how the leading rating services rated the debentures, (2) that she could not expect to acquire \$12,000 annual income from her investments unless she bought speculative securities involving great financial risk, and (3) the extent of the risks involved in purchasing the securities. The jury found further that had appellant Lamula informed her of these matters, including other investment opportunities, she would not have purchased the securities. Thus, there can be no doubt but that appellant Lamula engaged in an act, practice or course of business which operated as a fraud or deceit upon Mrs. Grupe and omitted to state facts material to an informed purchase by her. n10

In the following decade, at least two district judges apparently concluded that the references to nondisclosures in *Lamula* were inessential and held that a suitability claim under *Rule 10b-5* required a showing that "(1) the investment was incompatible with the plaintiff's investment objectives; and (2) the broker recommended the investment although (3) the broker knew or reasonably believed the investment was inappropriate." n11 In 1992 the Tenth Circuit interpreted *Lamula* in the same way, and adopted that test with an additional requirement that "the broker exercised control over the investor's account." n12 In that case the broker had exercised discretion over the account and had simply purchased the securities it selected, rather than recommending them to the customer. n13 Although the broker's conduct did not involve anything that could be considered a misrepresentation, the court held that it violated *Rule 10b-5* as "fraud by conduct," by analogy to churning. n14 In this context, the court explained that the additional requirement that the investor show that the broker controlled the account "is essential to satisfy the causation/reliance requirement of a § 10(b), *Rule 10b-5* violation." n15

When the Second Circuit revisited the issue in *Brown v. E.F. Hutton Group, Inc.*, n16 however, it indicated that to establish a *Rule 10b-5* claim based on an unsuitable recommendation, the plaintiff must show:

(1) that the securities purchased were unsuited to the buyer's needs; (2) that the defendant knew or reasonably believed the securities were unsuited to the buyer's needs; (3) that the defendant recommended or purchased the unsuitable securities for the buyer anyway; (4) that, with scienter, the defendant made material misrepresentations (or, owing a duty to the buyer, failed to disclose material information relating to the suitability of the securities); and (5) that the buyer justifiably relied to its detriment on the defendant's fraudulent conduct. n17

The Fourth Circuit adopted the same standard in *Banca Cremi, S.A. v. Alex. Brown & Sons, Inc.* n18

Since a plaintiff who proves that he or she incurred damages as a result of purchasing securities in reliance on a broker-dealer's misrepresentation will have established all the elements of a *Rule 10b-5* claim by proving the items listed in *Brown* as (4) and (5), it is not clear why items (1) through (3) are relevant. However, in *GMS Group, LLC v. Benderson*, the Second Circuit seems to have accepted that the plaintiff must also prove that the defendant made a "recommendation" of a security that was not "suitable." n19

Both *Brown* and *Banca Cremi* also indicate that a suitability claim is subject, like other *Rule 10b-5* claims, to the defense that the plaintiff could not have justifiably relied on the broker-dealer's misrepresentation. n20 These holdings may preclude a suitability claim relating to a security for which complete and current information is publicly available, such as a recent prospectus, if the customer is capable of understanding that information and making an independent investment decision.

Where the broker has not made a recommendation and the transaction is customer-driven, most courts have held that there is no basis for a suitability claim. n21 Nevertheless, at least one court has suggested that a broker-dealer may have the obligation to refuse a transaction where it is clearly unsuitable for the customer and the broker-dealer is aware (or should be aware) that the customer lacks capacity to make independent investment decisions. n22

In 1996 the NASD adopted an interpretation concerning a broker-dealer's suitability obligations when making recommendations to institutional customers. The interpretation defined an "institutional" customer as "any entity other than a natural person," but added that the interpretation was "more appropriately applied to an institutional customer with at least \$10 million invested in securities." n23 The interpretation states that a broker-dealer's responsibility to determine that a recommendation is suitable for a particular institutional customer is fulfilled if the broker-dealer has reasonable grounds for concluding that: (1) the customer is making independent investment decisions, and (2) the customer is capable of evaluating investment risk.

The interpretation then provides guidance concerning when a broker-dealer has reasonable grounds for making these determinations, such as whether the customer is advised by one or more consultants, and its experience with financial markets and the type of instrument under consideration. n24

The NASD's interpretation seems to reflect the same principle as court decisions holding that a suitability claim is subject to a defense that the plaintiff did not justifiably rely on the defendant's recommendation. The "sophistication and expertise of the plaintiff in financial and securities matters" is one of the factors considered in determining whether an investor is justified in relying on a misstatement. n25 Accordingly, sophisticated customers like those meeting the criteria set forth in the NASD's interpretation have found it difficult to pursue suitability claims. n26

As a practical matter the adjudication of a suitability claim is most likely to occur through arbitration. n27 The Court's decision in *Shearson/American Express Inc. v. McMahon*, n28 held that pre-dispute arbitration agreements are an

enforceable part of a brokerage contract. Securities arbitration is normally conducted through the dispute resolution forum sponsored by the Financial Industry Regulatory Authority ("FINRA").ⁿ²⁹ In 2007, FINRA substantially amended and reorganized its Code of Arbitration Procedure into three separate procedural codes: (1) Code of Arbitration for Customer Disputes; (2) Code of Arbitration Procedure for Industry Disputes; and (3) Code of Mediation Procedure.ⁿ³⁰

Arbitration differs greatly in both substance and procedure from the courts,ⁿ³¹ and has minimal judicial oversight.ⁿ³² As a general matter, arbitration is more focused on hearing and resolving factual disputes than advancing competing legal theories. In addition, arbitration generally offers more limited discovery, limits opportunities for appeal, and does not rely on traditional rules of evidence. Arbitration also relies more heavily on the underlying substantive rules promulgated by the relevant sponsoring self-regulatory organization than those promulgated by the SEC.ⁿ³³

The structural differences between arbitration and the courts have resulted in a divergence in outcomes between judicial rulings and arbitration decisions in several areas of suitability claims. This divergence is pronounced in a series of suitability cases alleging that a broker negligently allowed an investor to commit "economic suicide."ⁿ³⁴ Plaintiffs in such cases allege that their brokers are liable for negligently failing to advise them against or otherwise restrain their destructive trading practices.ⁿ³⁵ Some have claimed that the arbitration process, by substituting equity and efficiency for legal sophistication, commonly uses negligence as a proxy for scienter and justified reliance when reaching a decision in such suitability disputes.ⁿ³⁶ While arbitration decisions are not binding as precedent and therefore do not create a new legal standard for broker liability, such cases illustrate a greater degree of uncertainty when suitability disputes are resolved through arbitration.

[2] Misleading Recommendations

Beginning in 2002, an investigation by the New York Attorney General gave rise to a large number of *Rule 10b-5* claims against broker-dealers based on allegations that they had recommended the purchase of shares in research reports that did not accurately reflect the analysts' true opinions, but instead were motivated by a desire to obtain future investment banking business from the subject companies. In general, such false opinion claims are subject to the usual requirements for *Rule 10b-5* claims.ⁿ³⁷ It is well established that a misrepresentation concerning an opinion may, under certain circumstances, satisfy *Rule 10b-5*'s requirement for a material misrepresentation.ⁿ³⁸

In 2005 the Second Circuit issued a decision identifying a potentially disabling obstacle to such false research claims in *Lentell v. Merrill Lynch & Co.*ⁿ³⁹ Merrill Lynch had issued research reports with four-part "Investment Opinions" that were presented using numerical codes for "Investment Risk Rating," intermediate and long-term "Appreciation Potential," and likely dividend payout. The analyst's opinion concerning Appreciation Potential was purportedly reflected in a number from one to six, with one representing "Buy," five representing "Sell," and six representing "No Rating." The plaintiffs asserted claims based on reports for two internet companies issued over a period of 21 months that almost all rated "Appreciation Potential" at one or two, and never below three.ⁿ⁴⁰ The Second Circuit emphasized, however, that they all gave the highest possible rating for "Investment Risk."ⁿ⁴¹

The plaintiffs alleged that Merrill Lynch's analysts did not actually believe that the recommended shares were, in fact, good investments, that the reports failed to disclose that the firm's true motivation for publishing the positive recommendations was to attract future investment banking business, and that the plaintiffs bought the shares as a result of the misstatements and omissions only to lose millions of dollars when the value of the shares later dropped.ⁿ⁴² Although none of the plaintiffs were alleged to have read the reports, Merrill Lynch's motion to dismiss did not assert that they had failed to plead "transaction causation," *i.e.*, that they would not have bought the securities but for the misrepresentations, and the Second Circuit assumed that they adequately pleaded transaction causation based on the fraud-on-the-market theory endorsed in *Basic Inc. v. Levinson*.ⁿ⁴³

The Second Circuit nonetheless affirmed the dismissal of the complaint because it failed to allege "loss causation." The

court explained, "Loss causation is the causal link between the alleged misconduct and the economic harm ultimately suffered by the plaintiff." n44 The court reviewed and reconciled its own precedents and held that loss causation requires both that the loss should be a foreseeable consequence of the misrepresentation or omission and "that the misstatement or omission concealed something from the market that, when disclosed, negatively affected the value of the security." n45 It further held, "It is not enough to allege that a defendant's misrepresentations and omissions induced a 'purchase-time disparity' between the price paid for a security and its 'true "investment quality"' ." n46 The Court of Appeals specifically held that the plaintiffs' allegations that they bought the securities at prices that were artificially inflated by the alleged misrepresentations at most established transaction causation, but it did not show loss causation. n47 Rather, the court held that the complaint failed to allege loss causation because it did not allege that "the market reacted negatively to a corrective disclosure regarding the falsity of Merrill's 'buy' and 'accumulate' recommendations." n48

The court also rejected the plaintiffs' contention that they pleaded loss causation because they alleged that the market price of the shares fell when Merrill Lynch downgraded its recommendations for the two stocks, in one case from "buy" to "accumulate" and in the other case from "accumulate" to "neutral." "These allegations," the court explained, "do not amount to a corrective disclosure ... because they do not reveal to the market the falsity of the prior recommendations." n49

At the time of the Second Circuit's decision in *Lentell*, the Ninth Circuit apparently would have reached a different conclusion. In *Broudo v. Dura Pharmaceuticals, Inc.*, n50 the Ninth Circuit reversed a decision dismissing a *Rule 10b-5* claim based on the plaintiffs' failure to allege that the price of their shares dropped as a result of a corrective disclosure. The Court of Appeals followed its prior decisions holding that "[i]n a fraud-on-the-market case, plaintiffs establish loss causation if they have shown that the price *on the date of purchase* was inflated because of the misrepresentation." n51 Three months after the Second Circuit's decision in *Lentell*, however, the Supreme Court reversed the Ninth Circuit's decision in *Broudo v. Dura Pharmaceuticals, Inc.* Writing for a unanimous Court, Justice Breyer held that "as a matter of pure logic, at the moment the transaction takes place, the plaintiff has suffered no loss; the inflated purchase price is offset by ownership of a share that *at that instant* possesses equivalent value." n52

Under *Lentell*, a *Rule 10b-5* claim based on false and misleading research cannot survive a motion to dismiss unless there are adequate allegations demonstrating that the market price of the recommended shares declined once the true information that was the subject of the research was disclosed. n53 *Lentell* has been interpreted to give rise to broader causes of action than merely corrective disclosure. n54

Mundheim, *Professional Responsibilities of Broker-Dealers: The Suitability Doctrine*, 1965 DUKE L.J. 445 (1965) (discussing suitability generally).

(n2)Footnote 2. NYSE Rule 405 requires members to use "due diligence to learn the essential facts relative to every customer, every order, every cash or margin account accepted or carried by such organization." NASD Conduct Rule 2310 states:

[p]rior to the execution of a transaction recommended to a non-institutional customer ... a member shall make reasonable efforts to obtain information concerning: (1) the customer's financial status; (2) the customer's tax status; (3) the customer's investment objectives; and (4) such other information used or considered to be reasonable by such member ... in making recommendations to the customer.

In addition, NASD Rule 2360 requires broker-dealers that promote day-trading to make a determination that day-trading is suitable for a customer, based on his or her financial situation, tax status, investment experience, and investment objectives, before approving the account for a day-trading strategy. NASD Rule 2860(b)(19) imposes a suitability requirement for recommendations for purchases and sales of options. NASD IM-2310-3 also imposes specific suitability requirements for institutional customers. FINRA has provided specific suitability guidance regarding, among other topics, structured products (see FINRA Notice to Members ("NTM") 05-59 (Sept. 2005)), online communications (see FINRA NTM 01-23 (April 2001)), and speculative and low-priced securities (see FINRA NTM 96-60 (Sept. 1996)). Municipal Securities Rulemaking Board ("MSRB") Rule G-19 provides suitability standards for dealers in municipal securities.

Regardless of whether the broker-dealer makes a recommendation, SEC Rule 15c2-11, 17 C.F.R. § 240.15c2-11, provides that, prior to publishing or submitting for publication an initial quotation for certain OTC securities in a quotation medium, or upon the occurrence of enumerated events (such as a suspension of trading), a broker-dealer must: (A) review specified information about the issuer and the security; (B) determine that it has a reasonable basis for believing that the information is accurate and current in all material respects and is obtained from reliable sources; and (C) record the date it reviewed the specified information, the sources of the information, and the person at the firm responsible for the broker-dealer's compliance with the rule. The Rule does not apply to broker-dealers publishing quotations for securities listed and traded on a national securities exchange or quoted on NASDAQ.

A 1991 amendment eliminated the so-called "piggyback provision" of the previous version of the rule, which permitted broker-dealers to publish quotations for a security without complying with the Rule's requirements if any other broker-dealer published regular and frequent quotations for that security. Finally, the rule requires any broker-dealer that publishes quotations for covered OTC securities to make the Rule 15c2-11 information promptly available upon request by any person.

(n3)Footnote 3. *See supra* § 5.03[2].

(n4)Footnote 4. *See, e.g., O'Connor v. R.F. Lafferty & Co.*, 965 F.2d 893, 897 (10th Cir. 1992) . In *GMS Group, LLC v. Benderson* , 326 F.3d 75 (2d Cir. 2003) , the Court of Appeals stated that a violation of the NASD's suitability rules "may be considered relevant for purposes of § 10(b) unsuitability claims," even though the court noted that "arguably there is no right of action simply for a violation of NASD rules." *Id. at 82* . The Court then cited its decision in *Brown v. E.F. Hutton Group, Inc.* , 991 F.2d 1020 (2d Cir. 1993) , discussed below, as "describing the nature of [an] 'unsuitability' claim under § 10(b)." *Id.* *Brown* makes clear that such a claim must satisfy the usual requirements for a fraud claim under *Rule 10b-5*. The opinion in *GMS Group* refers to the NASD rules in the context of a discussion of whether the claimant had proved that the respondents had made a recommendation and that the recommended security was not suitable. *Id. at 81-82* . This suggests that the NASD rules are relevant to factors that the plaintiff asserting suitability claim must establish *in addition* to the elements of a *Rule 10b-5* claim. *See also Malhorta v. Equitable Life Assurance Soc'y of the United States*, 364 F. Supp. 2d 299, 308 (E.D.N.Y. 2005) ("[E]ven if NASD Conduct Rule 2310 establishes an affirmative duty to disclose the alleged omission, the Court finds that no Section 10(b) or *Rule 10b-5* claim was sufficiently alleged."); *infra* note 15.

(n5)Footnote 5. *Hanly v. SEC*, 415 F.2d 589, 596-97 (2d Cir. 1969) (citations omitted).

(n6)Footnote 6. *Id. at 596* ; *SEC v. Paro*, 468 F. Supp. 635, 648 (N.D.N.Y. 1979) . Before the Supreme Court's decision in *Aaron v. SEC*, 446 U.S. 680, 695 (1980) , the Second Circuit took the position that the SEC could obtain an injunction under *Rule 10b-5* based on negligence, without a showing of scienter. *See SEC v. Aaron*, 605 F.2d 612, 620-21 (2d Cir. 1979) , *vacated*, 446 U.S. 680 (1980) .

(n7)Footnote 7. *Ernst & Ernst v. Hochfelder*, 425 U.S. 185 (1976) . In 1980 the Supreme Court held that the SEC also must show scienter to obtain an injunction under *Rule 10b-5*. *Aaron*, 446 U.S. at 695 . The SEC still may be able to obtain an injunction against a broker-dealer that sells securities under the *Hanly* standard pursuant to subsections 17(a)(2)-(3) of the Securities Act of 1933, 15 U.S.C. §§ 77q(a)(2)-(3), which do not require scienter, *see Aaron*, 446 U.S. at 702 . In addition, while acknowledging the scienter requirement, some courts seemingly have continued to apply the *Hanly* standard to SEC proceedings under *Rule 10b-5*. *See SEC v. Shainberg*, No. 06-0384-cv, 2008 U.S. App. LEXIS 5935, at *6 (2d Cir. Mar. 20, 2008) ; *Abbondante v. SEC*, No. 06-0558-ag, 2006 U.S. App. LEXIS 30982, at *3-4 (2d Cir. Dec. 12, 2006) ; *SEC v. Randy*, 38 F. Supp. 2d 657, 670 (N.D. Ill. 1999) ; *SEC v. Hasho*, 784 F. Supp. 1059, 1107 (S.D.N.Y. 1992) . Of course, under the standards applicable to injunctions generally, it is harder to justify an injunction based on negligent misconduct. *See SEC v. Pros Int'l, Inc.*, 994 F.2d 767, 769 (10th Cir. 1993) ("A knowing violation of §§ 10(b) or 17(a)(1) will justify an injunction more readily than a negligent violation of § 17(a)(2) or (3)").

(n8)Footnote 8. 583 F.2d 594 (2d Cir. 1978) .

(n9)Footnote 9. *Id.* at 597 , 599.

(n10)Footnote 10. *Id.* at 600 .

(n11)Footnote 11. *Keenan v. D.H. Blair & Co.*, 838 F. Supp. 82, 86-87 (S.D.N.Y. 1993) ; accord, *Eickhorst v. E.F. Hutton Group, Inc.*, 763 F. Supp. 1196, 1200 (S.D.N.Y. 1990) . In *Keenan* the court did not cite, and presumably was unaware of, the Second Circuit's decision rendered four months earlier in *Brown v. E.F. Hutton Group, Inc.*, discussed below.

(n12)Footnote 12. *O'Connor v. R.F. Lafferty & Co.*, 965 F.2d 893, 898 (10th Cir. 1992) .

(n13)Footnote 13. *Id.* at 895.

(n14)Footnote 14. See *infra* § 5C.03.

(n15)Footnote 15. *O'Connor*, 965 F.2d at 898.

(n16)Footnote 16. 991 F.2d 1020, 1031 (2d Cir. 1993) .

(n17)Footnote 17. *Id.*; SEC v. Solow, No. 06-81041- CV-Middlebrooks/Johnson, 2007 U.S. Dist. LEXIS 34712, at *7-8 (S.D. Fla. May 10, 2007) . In addition, since a suitability claim under the Exchange Act is simply "a subset of the ordinary § 10(b) fraud claim," *id.*, the plaintiff must prove loss causation. See *Louros v. Kreicas*, 367 F. Supp. 2d 572, 592 n.145 (S.D.N.Y. 2005) ("The Second Circuit's formulation of an unsuitability claim in *Brown* ... does not mention loss causation. *Brown*, however, was rendered before the Private Securities Litigation Reform Act codified the causation requirement for Section 10(b) cases. In any case, *Brown* does require that 'the buyer justifiably relied to its detriment on the defendant's fraudulent conduct.' This element comprehends a requirement of causation, and with it the jurisprudence on loss causation in securities fraud cases." (quoting *Brown*, 991 F.2d at 1031)).

(n18)Footnote 18. 132 F.3d 1017, 1032 (4th Cir. 1997) ; accord, *Rowe v. Morgan Stanley Dean Witter*, 191 F.R.D. 398, 410-11 (D.N.J. 1999) .

(n19)Footnote 19. 326 F.3d 75, 81-83 (2d Cir. 2003) . See also *Louros*, 367 F. Supp. 2d at 585 ("An unsuitability claim ... is similar to an ordinary Section 10(b) fraud claim, except that the unsuitability claim requires (a) proof of the knowing purchase or recommendation of unsuitable securities, and (b) that the misrepresentations and omissions in question relate to the suitability of the securities, rather than that they be in connection with their purchase or sale.").

In *Keenan v. D.H. Blair & Co.*, 838 F. Supp. 82 (S.D.N.Y. 1993) , the court dismissed a *Rule 10b-5* suitability claim but went on to sustain a claim of breach of fiduciary duty under New York law based on the same facts. *Id.* at 87-89 . The court quoted the opinions in *Hanly* and a number of other SEC injunctive proceedings and, without citing any New York law decisions directly on point, assumed that the New York law of fiduciary duty would authorize an award of damages based on the same standards. *Id.* at 88-89 . A similar effort to assert a suitability claim based on the fiduciary duty law of Massachusetts was rejected in *Lefkowitz v. Smith Barney, Harris Upham & Co.*, 804 F.2d 154, 155 (1st Cir. 1986) (per curiam).

(n20)Footnote 20. *Banca Cremi*, 132 F.3d at 1032-33; *Brown*, 991 F.2d at 1031-32 .

(n21)Footnote 21. See, e.g., *Podgoretz v. Evans & Co., Inc.*, No. 86 CV 2681, 1994 U.S. Dist. LEXIS 6670 (E.D.N.Y. Mar. 23, 1994) .

A broker-dealer may use "data-mining technology" (the electronic collection of information about customers) to analyze a customer's financial or online activity. If it then provides specific investment suggestions to a customer based on this analysis, the NASD has taken the position that it is making a recommendation subject to a suitability obligation.

See NASD NTM 01-23, at 3 (April 2001).

(n22)Footnote 22. *Board of Trustees v. Chicago Corp.*, No. 88-C-3855, 1988 U.S. Dist. LEXIS 14031, at *3 (N.D. Ill. Dec. 8, 1988) (under certain circumstances, broker may have duty to monitor investment decisions made by customer).

(n23)Footnote 23. *NASD Conduct Rule IM-2310-3*; approved, 61 Fed. Reg. 44,100 (Aug. 20, 1996) .

(n24)Footnote 24. *Id.*

(n25)Footnote 25. *Banca Cremi*, 132 F.3d at 1028; *Myers v. Finkle*, 950 F.2d 165, 167 (4th Cir. 1991) .

(n26)Footnote 26. See, e.g., *Banca Cremi v. Alex. Brown*, 955 F. Supp. 499, 515-16 (D. Md. 1997) , *aff'd*, 132 F.3d 1017 (4th Cir. 1997) . Nevertheless, "[i]t is well established that wealth of the customer (however accumulated) and sophistication are not bases for recommending risky investments, nor are they defenses to claims of unsuitability." *Strobel v. Morgan Stanley Dean Witter*, No. 04cv1069-BEN, 2006 U.S. Dist. LEXIS 89673, at *17 (S.D. Cal. Dec. 11, 2006) . Thus, sophistication is only relevant for proving the elements of suitability claim, it cannot be used as a defense in the event that the elements are otherwise proven.

(n27)Footnote 27. See, e.g., *Black*, *supra* note 1, at 991 (2002) (noting that SROs have become "virtually the only playing field[] for resolving customer's disputes with their brokers"); See also, *Gedicks*, *supra* note 1, at 546 n.33 (noting a greater than three fold increase in claims made by NASD members to their insurance providers related to unsuitability claims since 2000).

CHAPTER 5C Broker-Dealers' Liabilities Under the Securities Exchange Act *

1-5C Federal Securities Exchange Act of 1934 § 5C.03

§ 5C.03 Churning

[1] In General

Churning refers to the practice of excessive trading in an account by a broker for the purpose of generating commission income, n1 or excessive trading in an account by a broker in light of the investor's objectives. n2 A churning claim is typically a claim under *Rule 10b-5*. A churning claim consists of three elements:

- (1) trading that is excessive in light of the customer's investment objectives;
- (2) control over the account by the broker; and
- (3) scienter, e.g., the broker's intent to defraud the customer or his willful or reckless disregard of the customer's interests. n3

[2] Excessive Trading

Evaluation of the frequency of trading in the account generally requires the calculation of the "turnover rate." The turnover rate has been described as "a measure of the volume of trading that changes the holdings of a portfolio without changing its size." n4 One method of calculating it is to divide the total amount of purchases over the relevant period by the average equity in the account, net of any debt, for that period. The result is then annualized. For example, where average monthly equity is \$10,000 and a total of \$30,000 in purchases has been made in six months, the turnover for the six-month period is three and the annualized turnover rate would equal six. n5 Courts generally state that no particular turnover rate, without more, is conclusive evidence of churning, n6 but a turnover rate in excess of six is considered very strong evidence that the account is being churned. n7

Appropriate turnover rates vary with the type of account and the objectives of the customer. A turnover rate of two may be excessive for an account with non-speculative investment objectives. n8 When an investor has aggressive investment goals, it is easier to conclude that trading is not excessive. n9 Apart from turnover rate, courts have cited a pattern of in-and-out trading (sale of part or all of a customer's portfolio with the proceeds immediately reinvested in other securities followed shortly by a sale of the newly acquired securities), and high commissions relative to the size of the account, as evidence of excessive trading. n10

[3] Control By Broker

Whether a broker has control over an account is a question of fact. A power of attorney or other document giving the broker discretionary authority to make trades in the account is obviously strong evidence that the broker controls the account. However, the fact that no power of attorney has been executed and the customer retains formal authority over the account is not dispositive of the question of control. The broker may have control if the customer acted on its recommendations and lacked the financial acumen to "adequately determine his own best interests and to independently evaluate his broker's suggestions." n11 Generally, the greater the financial sophistication of the customer, and the more frequently he or she is kept informed of the status of the account and the frequency of the trades, the less likely the customer will be able to establish a churning claim. n12

Courts have cited many factors relevant to the determination of the issue of control. One list of factors includes "(1) the identity, age, education, intelligence, and investment and business experience of the customer; (2) the relationship between the customer and the account executive, that is, whether it is an arms-length one or a particularly close relationship; (3) knowledge of the market and the account; (4) the regularity of discussions between the account executive and the customer; (5) whether the customer actually authorized each trade; and (6) who made the recommendations for trades." n13

[4] Scienter

Like every *Rule 10b-5* claim, a claim for churning requires proof of scienter. Once excessive trading and control are established, however, scienter has sometimes been found to be "implicit in the nature of the conduct." n14

CHAPTER 5C Broker-Dealers' Liabilities Under the Securities Exchange Act *

1-5C Federal Securities Exchange Act of 1934 § 5C.04

§ 5C.04 Excessive Mark-Ups/Mark-Downs

[1] Introduction

Broker-dealers are obligated to deal fairly with their customers in pricing securities. This duty of fair dealing includes the implied representation that the prices they charge to customers bear a "reasonable relationship" to the prevailing market price. n1 The SEC and the SROs have recognized a special regulatory need to protect investors from excessive charges in securities transactions. One focus of that concern has been on principal transactions in the over-the-counter (OTC) market for which a dealer charges a mark-up or mark-down from the prevailing market price instead of a commission.

Generally, a mark-up is the difference between the price charged to a customer for a security and the prevailing market price for the security when the broker-dealer, acting in a principal capacity and holding ownership of the security, sells the security to the customer. n2 Conversely, a mark-down is the difference between the price charged to a customer for a security and the prevailing market price for the security when the broker-dealer, acting in a principal capacity and taking ownership of the security, buys the security from the customer. In contrast to principal transactions, brokers' compensation in agency transactions, whether executed on an exchange or in the OTC market, is an agency "commission." A commission is the fee paid to a broker for executing a trade based on the number of shares traded or the dollar amount of the trade.

The SEC and SROs prohibit undisclosed excessive and fraudulent mark-ups and mark-downs on principal transactions between broker-dealers and their customers. In general, a mark-up is "excessive" if it bears no reasonable relationship to the prevailing market price. n3 Broker-dealers that charge excessive, undisclosed mark-ups violate the antifraud provisions of the federal securities laws. n4 Additionally, broker-dealers that charge excessive mark-ups, whether or not disclosed, may violate SRO and state rules and interpretations. n5

Both the SEC and SROs have refused to state a specific percentage of the market price which would make a mark-up of that percentage presumptively reasonable or unreasonable. For equity securities, both case law and an NASD guideline suggest that a mark-up under 5% is reasonable. n6 A mark-up of over 10%, on the other hand, has been described as fraudulent as a matter of law. n7

[2] Liability Under Federal Securities Laws

No specific statute, SEC rule or regulation proscribes excessive mark-ups or mark-downs. Nevertheless, section 10(b) of the Exchange Act, and *Rule 10b-5* thereunder prohibit deceptive practices in connection with the purchase or sale of securities. Charging customers excessive mark-ups or mark-downs without proper disclosure has been held to constitute such a deceptive practice. In addition, under Rules 10b-10 and 15g-4 of the Exchange Act, the SEC requires broker-dealers to disclose the mark-up on various transactions. Further, under section 15(b)(4)(E), the SEC has brought actions against broker-dealers that have failed to reasonably supervise for excessive mark-ups.

[a] Antifraud Provisions Under the Securities Laws

Under section 10(b) of the Exchange Act, it is unlawful for any person, directly or indirectly, by the use of any means or instrumentality of interstate commerce or of the mails, or of any facility of any national securities exchange to use or employ, in connection with the purchase or sale of any security registered on a national securities exchange or any security not so registered, or any securities-based swap agreement, any manipulative or deceptive device or contrivance in contravention of such rules and regulations as the Commission may prescribe as necessary or appropriate in the public interest or for the protection of investors. n8

A securities fraud claim under section 10(b) and *Rule 10b-5* thereunder requires a private plaintiff to prove the following elements:

- (1) a misstatement or omission of a material fact,
- (2) made with scienter,
- (3) in connection with the purchase or sale of a security,
- (4) upon which the plaintiff relied,
- (5) which caused the plaintiff injury. n9

A plaintiff typically must prove that a defendant acted with scienter in order to recover under section 10(b) and *Rule 10b-5* thereunder. n10 Scienter is established by showing that the defendant acted intentionally, willfully, or recklessly. n11 In the past, however, the SEC has argued that the scienter requirement is not at issue in mark-up cases. For example, in *Elysian Federal Savings Bank v. First Interregional Equity Corp.*, the SEC argued that the scienter issue in mark-up cases is not often addressed because the facts relevant to this issue usually are not in dispute and the scienter determination is usually straightforward. n12 Specifically, the SEC argued that it is not necessary to determine whether the dealer acted recklessly if the dealer:

- (1) knows the prevailing inter-dealer market price for the securities,
- (2) knows the retail price that it is charging the customer, and'
- (3) is aware that its mark-up exceeds industry norms.

In such circumstances, the dealer's knowing conduct satisfies the scienter requirement. n13 The SEC has long held that broker-dealers violate *Rule 10b-5* when they charge excessive mark-ups without proper disclosure. n14 The SEC consistently has held that undisclosed mark-ups in excess of 10% of "prevailing market price" are fraudulent per se. n15 Mark-ups of less than 10%, particularly for debt securities, also may be fraudulent, although they are not fraudulent per se. n16

The SEC's policy on mark-ups is based on the so-called "shingle theory," which is the view that the "relationship of a

securities dealer to his clients is not that of an ordinary merchant to his customers." n17 Instead, it is a relationship in which dealers impliedly represent, by hanging out their "shingles," that they will treat their customers fairly and honestly. This implied representation is deemed to include a promise that the prices a dealer charges customers will bear a reasonable relationship to the prevailing market. n18

The SEC's mark-up policy has been regularly affirmed by reviewing courts. Federal courts consistently have held that it is a violation of Section 10(b) and *Rule 10b-5* thereunder for a broker-dealer to charge excessive mark-ups on the sale of securities and fail to disclose this compensation to the customer. n19 As the Second Circuit explained in its landmark opinion in *Hughes*:

[a]n over-the-counter firm which actively solicits customers and then sells them securities at prices ... far above the market ... must be deemed to commit a fraud. It holds itself out as competent to advise in the premises, and it should disclose the market price if sales are to be made substantially above that level. n20

In *Hughes*, a broker-dealer sold securities to widows and unsophisticated buyers at 16% to 40% above market value. n21 The court found that "the failure to reveal the mark-up pocketed by the firm was both an omission to state a material fact and a fraudulent device." n22

[b] Mark-Up Disclosure Requirements: SEC Rules 10b-10 and 15g-4

Until 1978, SEC rules did not address the disclosure requirements applicable to mark-ups in principal transactions, in contrast to the requirements applicable to brokerage commissions in agency transactions. Since then, Rule 10b-10 has required disclosure of mark-ups for broker-dealers acting in a principal capacity. Rule 10b 10 generally requires that broker-dealers provide customers with a written confirmation of a transaction disclosing certain information. It is important to emphasize, however, that compliance with Rule 10b-10's disclosure requirements will not relieve a broker-dealer of its obligations to disclose excessive mark-ups to customers. The SEC consistently has taken the position that Rule 10b 10 is not a safe harbor from *Rule 10b-5* liability for failure to disclose excessive mark-ups, and this position has received judicial support. n23
